This course is designed to provide students who have fourth-year standing, with practical experience by working at a government or non-government, research, or advocacy organization that is instrumental in shaping public policy or advancing human rights; to enable students to participate in services, projects, and campaigns undertaken by specific organizations; to support students in applying and sharing the knowledge that they have gained from their academic studies in political theory, public policy, international relations, and/or human rights advocacy; and allow them to become familiar with the day-to-day challenges of employment in government and non-government organizations and public services.

PREREQUISITES: Open to 4th year students, and permission of the instructor
CROSSLISTED: POLI 4390
FORMATS: Experiential Learning

GWST 4400 Indigenous Women and the State

CREDIT HOURS: 3

In this course, we will study systemic factors shaping the lives of Indigenous women in Canada, with a focus on Indigenous identity, cultural, political, and ceremonial involvement, Indian status, access to treaty rights, and experiences of poverty and violence.

CROSSLISTED: INDG 4400

EXCLUSIONS: INDG 4000 taken in 2019/2020 or 2020/2021.

FORMATS: Lecture

GWST 4402 Recent French Feminist Theory

CREDIT HOURS: 3

This course will concentrate on some of feminism's most challenging voices, those that have emerged from France in the past 50 years: Beauvoir, Kristeva, Cixous and Irigaray. The course will attempt to illuminate the intellectual background against which these women write, particularly in the areas of linguistic and anthropological structuralism, and in psychoanalytic theory. The course will be organized in part by the historical evolution of feminist thought, in part by the consideration of central feminist concerns.

CROSSLISTED: CTMP 4302.03

EXCLUSIONS: CTMP 2030.06 and 4300.06

FORMATS: Lecture | Tutorial

GWST 4427 Queer Theory

CREDIT HOURS: 3

This course provides an overview of the general questions and debates -- and the philosophical, political and cultural contexts—of the interdisciplinary field that is now known as 'Queer Theory.' It will profile a wide selection of foundational writings by leading scholars and contributors to GLBT thought and activism. Examining topics such as difference, identity, discrimination, and equality, we will address its articulations critical race theory, feminist philosophy, and critical analyses of political economy. We will also address the significance of queer theory to GLBT equality activism, attending to the relationship between political thought and legislative practice in addressing institutionalized heteronormativity and the public expressions of homophobia, transphobia, sexism, and racism and their impact on social policy.

CROSSLISTED: POLI 4427.03

GWST 4500 Topics in Feminist Philosophy

CREDIT HOURS: 3

In this course, we shall explore some of the current research in a focused area of feminist philosophy. Previous topics have included feminist ethics, feminist epistemology, postmodern feminism, the feminist sexuality debates, and ecofeminism.

PREREQUISITES: Strong background in philosophy or feminist theory (normally including at least one class in feminist philosophy or permission of the instructor).

CROSSLISTED: PHIL 4500.03, PHIL 5500.03, GWST 5500.03

FORMATS: Seminar

GWST 4550 La femme de lettres au Grand Siècle/ Literary Women of French Classicism

CREDIT HOURS: 3

In this course, we will explore: aspects of the intellectual and social context particularly relevant to a study of literary women in seventeenth-century France (for example: social structures and norms, la préciosité, the salons, the libertinage of Ninon de Lanclos, women's contributions as patrons of the arts); a representative selection of works, from several literary genres, written by seventeenth-century women (for example: novels by Mme de La Fayette and/or Mlle de Scudéry, Mme de Sévigné's letters, Mme d'Aulnoy's contes, Mme de Sablé's maxims); examples of literature written by men which counters the ambient misogyny of the period (for example: Molière's L'École des femmes and La Bruyère's Caractères).

PREREQUISITES: 3000-level French literature course or instructor's permission

CROSSLISTED: FREN 4550.03

FORMATS: Lecture

GWST 4900 Honours Thesis

CREDIT HOURS: 3

Students writing an honours thesis in Gender and Women's Studies as the primary subject of a Combined Honours program must enroll in this course.

Students will be guided through the process of developing their honours project and writing their thesis. Students can work with any faculty supervisor they would like to or consult with the GWST Coordinator who runs this class for the academic year. The course meets approximately five times over the course of

the academic year in which the student writes their thesis. The grade for the honours thesis is assigned under this course number.

CALENDAR NOTES: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

PREREQUISITES: Admission to the honours program

FORMATS: Seminar

GWST 4901 Honours Thesis Pt. 1

CREDIT HOURS: 1.5

Students writing an honours thesis in Gender and Women's Studies as the primary subject of a Combined Honours program must enroll in this course.

Students will be guided through the process of developing their honours project and writing their thesis. Students can work with any faculty supervisor they would like to or consult with the GWST Coordinator who runs this class for the academic year. The course meets approximately five times over the course of the academic year in which the student writes their thesis. The grade for the honours thesis is assigned under this course number.

CALENDAR NOTES: Students taking this course must register in and complete GWST 4901.015 and GWST 4902.015 in consecutive terms; credit will not be granted if courses are not completed consecutively.

PREREQUISITES: Admission to the honours program

EXCLUSIONS: GWST 4900X/Y.06

FORMATS: Seminar

GWST 4902 Honours Thesis Pt. 2

CREDIT HOURS: 1.5

Students writing an honours thesis in Gender and Women's Studies as the primary subject of a Combined Honours program must enroll in this course.

Students will be guided through the process of developing their honours project and writing their thesis. Students can work with any faculty supervisor they would like to or consult with the GWST Coordinator who runs this class for the academic year. The course meets approximately five times over the course of the academic year in which the student writes their thesis. The grade for the honours thesis is assigned under this course number.

CALENDAR NOTES: Students taking this course must register in and complete GWST 4901.015 and GWST 4902.015 in consecutive terms; credit will not be granted if courses are not completed consecutively.

PREREQUISITES: Admission to the honours program

EXCLUSIONS: GWST 4900X/Y

FORMATS: Seminar

Geography

Note: There is no Geography program at Dalhousie; however, several courses taught in various departments are commonly recognized as Geography courses. Only courses which are cross-listed in Science departments may be used to meet the life or physical science subject requirement for the BA degree.

Staff

Deans

Macy, C., BA (Arch) (Calif. At Berkeley), MArch (MIT)

Macdonald, C.L.B., BSc (Hons), PhD (Dalhousie), Professor (Chemistry)

Gantar, J., BA, MA (University of Ljubljana), PhD (University of Toronto) (Acting Dean)

Geography Coordinators

Architecture and Planning: **Manuel, P.**, BA (Carleton), MSc (McGill), PhD (Dalhousie), MCIP, LPP (patricia.manuel@dal.ca)

Arts and Social Sciences: **TBD**

Science: **Cray, H.**, BA Hon (McGill), MSc (McGill), PhD (Waterloo) (hcray@dal.ca)

Minor in Geography

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Science) program.

To fulfill the requirements for a Minor in Geography, students must complete 24 credit hours, including the following:

- GEOG 1030.03/ERTH 1030.03: Introduction to Physical Geography

- GEOG 1035.03: Introduction to Human Geography
- GEOG 2000.03: Cartography

Additional 15 credit hours from the following list: at least 6 of which must be at the 3000 level or higher.

- GEOG 1060/ERTH 1060: Natural Disasters
- GEOG 2006.03/PLAN 2006.03: Space, Place, and Geographic Information Systems
- GEOG 2070.03/HIST 2383.03/SPAN 2070.03: Area Studies on Mexico and Central America
- GEOG 2100.06/SOSA 2100.06: Environment and Culture
- GEOG 2201.03/INTD 2001.03: Introduction to Development
- GEOG 2202.03/INTD 2002.03: Introduction to Development II
- GEOG 2206.03/INTD 2106.03: Africa: An Introduction
- GEOG 2336.03/ECON 2336.03: Regional Development
- GEOG 2800.03/PHYC 2800.03/OCEA 2800.03: Climate Change
- GEOG 3102.03/SUST 3102.03: Coastal Change and Adaptation
- GEOG 3106.03/SUST 3106.03: The Canadian North
- GEOG 3165.03/SOSA 3165.03: Peoples and Cultures of the World: Selected Area Studies
- GEOG 3110.03/INTD 3110.03: Migration and Development
- GEOG 3114.03/INTD 3114.03: Agriculture and Development
- GEOG 3284.03/SOSA 3284.03: Living in cities
- GEOG 3400.03/ENVS 3400.03: Human Health and Sustainability
- GEOG 3440.03/ERTH 3440.03: Geomorphology
- GEOG 3500.03/ERTH 3500.03/ENVS 3500.03/ERTH 5600.03: Exploring Geographic Information Systems
- GEOG 3633.03/ENVS 3633.03/BIOL 3633.03: Spatial Information and GIS in Ecology
- GEOG 3700.03/ERTH 3700.03/ENVS 3700.03: Earth resources, sustainability, and society
- GEOG 4440.03/ERTH 4440.03: Geomorphology and Landscape Evolution
- GEOG 4450.03/ERTH 4450.03: Introduction to Landscape Simulation
- GEOG 4520.03/ERTH 4520.03: GIS Applications to Environmental and Geological Sciences
- GEOG 4530.03/ERTH 4530.03: Environmental Remote Sensing
- GEOG 4850.03/SCIE 4850.03/BIOL 4850.03/ENVS 4850.03/ERTH 4850.03: Geographic Information Science Research Project

Note that the following courses are not offered in upcoming terms, but may be counted toward the Minor in Geography if taken previously:

- GEOG 2001.03/PLAN 2001.03: Landscape analysis
- GEOG 3001.03/PLAN 3001.03: Landscape Ecology
- GEOG 3002.03/PLAN 3002.03: Reading the City
- GEOG 3005.03/PLAN 3005.03: Cities and the Environment
- GEOG 3006.03/PLAN 3006.03: Reading the Landscape
- GEOG 3110.03/INTD 3110.03: Migration and Development
- GEOG 3114.03/INTD 3114.03: Agriculture and Development
- GEOG 3210.03/HIST 3210.03/CANA 3020.03: Canadian Cultural Landscapes
- GEOG 3220.03/SOSA 3220.03: Coastal Communities in the North Atlantic
- GEOG 3370.03/HIST 3370.03: North American Landscapes

NOTE: Students in the BCD program may not select PLAN cross-listed courses that are required courses for their degree program

Contact [Geography](#) for more information.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions

GEOG 1030 Introduction to Physical Geography

CREDIT HOURS: 3

This non-lab science course examines the nature of weather and climate, earth's surface features and processes, and internal processes that contribute to landform development. An integral component of the course is an exploration of the representation and interpretation of physical geographic data through the examination of a variety of maps.

CALENDAR NOTES: There are no pre-requisites for this course and students may take this class in addition to any other first year Earth Sciences class.

CROSSLISTED: EARTH 1030.03

FORMATS: Lecture | Tutorial

GEOG 1035 Introduction to Human Geography

CREDIT HOURS: 3

Human geography examines the ways that people perceive, use, and alter the landscapes they occupy. This course considers aspects of culture that characterize different social groups, as well as the systems of production, livelihood, spatial organization, and administration that societies erect. The class introduces the principal tools of human geographers: maps, demography, and analysis of cultural patterns.

CALENDAR NOTES: This class cannot be used to meet the life or physical science subject requirement for the BA degree.

FORMATS: Lecture

GEOG 1060 Earthquakes, Volcanoes and Natural Disasters

CREDIT HOURS: 3

Earthquakes, meteorite impacts, rapid climate change, volcanic eruptions, hurricanes, landslides, solar flares, and floods are natural disasters that affect our economy, public policy, and safety. Where, why and how frequently do natural disasters occur? Are predictions possible? Are media portrayals of risk and damage realistic? This course, aimed at the nonspecialist, investigates these intriguing questions. Excerpts of "disaster films", in conjunction with lectures and discussions are used to identify the causes, consequences and sometimes erroneous perceptions of natural hazards. Examples from Atlantic Canada and contemporary disasters are used to assess local risk and real-time events worldwide.

CROSSLISTED: EARTH 1060.03

FORMATS: Lecture

GEOG 2000 Cartography

CREDIT HOURS: 3

Maps, are essential aids to disciplines that span archaeology to zoology. Navigation is the art and science of finding one's way through both natural and built landscapes. This class investigates how maps are constructed and interpreted, how maps can distort perceptions, and can influence one's decisions.

PREREQUISITES: EARTH/GEOG 1030, or EARTH 1080

FORMATS: Lecture

GEOG 2001 Landscape Analysis

CREDIT HOURS: 3

Designers and planners need to understand the influence of physical, biological, and cultural systems in landscape evolution, and the relevance of that information in analyzing land capability. Students develop inventory and analysis tools for understanding environmental processes and their implications for design and planning. There will be field trips and a lab component.

CROSSLISTED: PLAN 2001.03

FORMATS: Lecture | Lab

GEOG 2006 Space, Place and Geographic Information Systems

CREDIT HOURS: 3

Planners use Geographical Information systems (GIS) for data collection, coordination, and analysis. Properly interpreted, GIS data contribute to informed

decision-making. This course explores the application of GIS in planning within a project-centred setting. Students learn to use GIS to address and use and site planning issues. The course also considers mapping standards used within the field of planning, and examines legal, privacy, and ethical implications of using GIS data in the public realm.

CROSSLISTED: PLAN 2006.03

FORMATS: Lecture | Lab

GEOG 2070 Area Studies on Mexico and Central America

CREDIT HOURS: 3

Following an examination of the indigenous heritage, and the colonial legacy of the conquistadors, the class deals principally with the contemporary period, examining the Mexican Revolution and its aftermath, the Somoza dynasty, Nicaragua under the Sandinistas, the U.S. role in the region, the human rights situation in Central America, and probable developments in the region. The class is designed to provide an understanding of the contemporary reality of this volatile region, in many ways a microcosm of the crucial situation of Latin America as a whole.

PREREQUISITES: No prerequisites. Open to students in all departments. No knowledge of Spanish necessary

CROSSLISTED: HIST 2383.03. SPAN 2070.03

FORMATS: Lecture | Discussion

GEOG 2100 Environment and Culture

CREDIT HOURS: 6

Concern about the environment is a widespread phenomenon as virtually everyone is confronted by environmental issues -- be they global warming, the depletion of the ozone layer or the continuing problems of water pollution and solid waste disposal. Furthermore, we are becoming increasingly aware of that environmental issues often have global implications. The efforts of cities in Canada to deal with environmental pollution, for example, may lead to conflicts with rural regions. Similarly, rural regions, in their use of various chemical agents, may find themselves affecting the lives of city dwellers. This class will explore key relationships between human culture and the physical environment. Topics to be examined include: historical, social, and legal aspects of contemporary environmentalism, food and agriculture, environmental ethics, health, traditional ecological knowledge, sustainable forestry, waste management, public participation and environmental movements.

CALENDAR NOTES: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

PREREQUISITES: One of SOSA 1000X/Y.06, SOSA 1050X/Y.06, SOSA 1100X/Y.06, SOSA 1200 X/Y.06

CROSSLISTED: SOSA 2100.06

FORMATS: Lecture

GEOG 2201 Global Justice and Development I

CREDIT HOURS: 3

Poverty, inequality and injustice are widespread throughout the contemporary developing world. This course will examine how this situation came to be. It begins by analyzing the different meanings of the term "development" and then examines the major approaches that have shaped practical development initiatives on the ground in the Global South over the past 60 years. The course also examines the legacies of history for contemporary development efforts in the Global South through specific case studies.

PREREQUISITES: Completion of five full credits at the 1000 level or permission of the instructor

CROSSLISTED: INTD 2001.03

FORMATS: Lecture | Tutorial

GEOG 2202 Global Justice and Development II

CREDIT HOURS: 3

This course builds upon the core concepts and approaches studied in INTD 2001 (i.e. different theoretical approaches to development and the historical creation of underdevelopment). The course examines key contemporary issues in the field of development and analyses the connections between them: debt, global trade rules, foreign aid, hunger and malnutrition, rural and urban livelihoods, population growth. The course also examines the principle actors involved in development and the strategies they have used to promote and resist development, including: governments, non-governmental organizations (NGOs), the World Bank and IMF, and popular social movements in the Global South and North.

PREREQUISITES: Completion of five credits at the 1000 level or permission of the instructor

CROSSLISTED: INTD 2002.03

FORMATS: Lecture | Tutorial

GEOG 2206 Africa: An Introduction

CREDIT HOURS: 3

This course will focus on contemporary Africa. Stereotypical portrayals of Africa will be examined and critiqued with the goal of emphasizing the immensity, diversity and complexity of the continent in order to better understand the opportunities and challenges of African development in the twenty-first century.

CROSSLISTED: INTD 2106.03

FORMATS: Lecture | Tutorial

GEOG 2336 Regional Development

CREDIT HOURS: 3

Most countries have richer and poorer regions. Economic development issues, policies, and theories facing more industrialized nations are analyzed with particular focus on Canada (especially the Atlantic region), the European Economic Community, U.S.A., Japan, and Australia. Approved with Canadian Studies. In addition to the prerequisites, the student is advised to take one class in Political Science and one class in Canadian History before taking ECON 3336.

PREREQUISITES: ECON 1101.03 and 1102.03

CROSSLISTED: ECON 2336.03

FORMATS: Tutorial | Seminar

GEOG 2800 Climate Change

CREDIT HOURS: 3

Most models of the atmosphere predict that increasing concentrations of greenhouse gases will continue to warm the surface of the earth and the oceans in the twenty-first century. The magnitude of the warming and its consequences are still very controversial. This class will discuss, mainly from a nonmathematical viewpoint, the reasons for the greenhouse effect, the current warming in the context of the historical record of climate change, and sources of natural climate variability such as the El Nino Southern Oscillation. It will also review arguments that attribute the warming that has occurred in the Twentieth century to natural variability, and those that attribute the warming to increased human emission of greenhouse gases.

CROSSLISTED: PHYC 2800.03 and OCEA 2800.03

EXCLUSIONS: ECON2850.06, PHYC2850.06

GEOG 3001 Landscape Ecology

CREDIT HOURS: 3

Landscapes reflect the interaction of natural and cultural processes. This course introduces the principles of ecology to landscape analysis. It explores relationships between environmental components in the landscape to inform community design and land use planning applications.

PREREQUISITES: PLAN 2001.03 or GEOG 2001.03 or permission of the instructor

CROSSLISTED: PLAN 3001.03

FORMATS: Lecture | Lab

GEOG 3002 Reading the City

CREDIT HOURS: 3

Any city reflects the history of its topography, cultural traditions, and design interventions. This course introduces the principles, theories, and methods of urban form analysis in the local urban context. Students explore the local urban environment to interpret what the city means, and how it comes to take the shape it does.

CROSSLISTED: PLAN 3002.03

FORMATS: Lecture | Lab

GEOG 3005 Cities and the Environment

CREDIT HOURS: 3

The contemporary landscape reflects a long history of human activities on the land and design and planning interventions through time. Civilizations rise and fall, often because of their degradation of the ecosystems that support them. This course examines the relationship of cities with the environment to enhance our understanding of landscape change, urban form and patterns in human settlements through the ages.

CROSSLISTED: PLAN 3005.03

FORMATS: Lecture | Seminar

GEOG 3006 Reading the Landscape

CREDIT HOURS: 3

Any landscape reflects its natural and cultural history. This course explores principles, theories, and methods of landscape interpretation. These approaches will be applied to community design problems in local landscapes.

PREREQUISITES: PLAN 3001.03, 3002.03, or GEOG 3001.03, 3002.03

CROSSLISTED: PLAN 3006.03

FORMATS: Lecture | Lab

GEOG 3102 Coastal Change and Adaptation

CREDIT HOURS: 3

Human activities alter coastal environments directly and by influencing natural processes. We analyze the drivers of change and impacts on environment, economy and society. Mitigation and management strategies for sustainable adaptation are investigated. Lectures are integrated with student presentations, guest lectures and discussion of current coastal and marine research.

PREREQUISITES: Must be third year standing or above

CROSSLISTED: SUST 3102.03

EXCLUSIONS: SUST 3952.03 (winter 2016 and winter 2017)

GEOG 3106 The Canadian North

CREDIT HOURS: 3

This course introduces the Canadian North through an examination of the challenges faced by northern peoples. Emphasis is placed on the causes and consequences of global environmental change, and interactions with ecological processes and challenges for the human environment. Inuit perspectives of ecological knowledge will complement discussions on planning and development in a warming future. Principles of ecosystem management and emergent challenges for a sustainable future will also be addressed.

PREREQUISITES: Third year status or above, or permission of instructor.

CROSSLISTED: SUST 3106.03

EXCLUSIONS: SUST 3956.03 (offered in Winter 2019) ENVI 5106.03

FORMATS: Lecture

GEOG 3110 Migration and Development

CREDIT HOURS: 3

The purpose of this course is to explore and better understand the connections between migration and development in contemporary societies. Classes will introduce or further explore one main theme or issue, such as development-induced displacement, labour migration, and HIV/AIDS and migration. Each class will centre on one or more discussion questions, exchange insights from relevant experiences of class participants or focus on a case study

CROSSLISTED: INTD 3110.03

FORMATS: Lecture | Seminar

GEOG 3114 Environment and Development

CREDIT HOURS: 3

This course will examine the interconnections between the natural environment and different forms of social and economic development with a specific focus on developing countries. Various perspectives will be used to analyze the links between environmental issues and poverty, inequality, wealth, economic globalization and the ways in which different cultures understand and interact with the environment.

CROSSLISTED: INTD 3114.03

FORMATS: Lecture | Seminar

GEOG 3165 Peoples and Cultures of the World: Selected Area Studies

CREDIT HOURS: 3

This class examines a specific geographic and/or culture area. The class begins with background material on geography and history. Its focus is on the people themselves, their social organization and political, economic, and cultural systems. How they relate to globalization and development will also be examined.

Consult the Department to find which region is to be covered in a particular year. **Approved with International Development Studies.**

PREREQUISITES: SOSA 1000X/Y.06; 1050X/Y.06; 1100X/Y.06; 1200X/Y.06

CROSSLISTED: SOSA 3165.03

EXCLUSIONS: SOSA 2370.03

FORMATS: Lecture

GEOG 3210 Canadian Cultural Landscapes

CREDIT HOURS: 3

This course explores the origins of one "signature" landscape in each province. Contact with different geographies shaped distinctive regional histories; but at the same time, the story of each place is tied to the national narrative. These landscapes also illuminate how nature has been understood, used, and transformed since the fifteenth century.

CROSSLISTED: HIST 3210.03, CANA 3020.03

FORMATS: Lecture | Discussion

GEOG 3220 Coastal Communities in the North Atlantic

CREDIT HOURS: 3

Coastal communities as a social/ecological type are examined as populations, and social structures (territorial, economic, occupational, political) as they have developed in response to particular ecological and social circumstances. Various perspectives which have been applied to coastal communities are examined

with regard to the contribution they may make to understanding the dynamics of these communities. The focus is on North Atlantic communities.

PREREQUISITES: One of SOSA 1000X/Y.06, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06

CROSSLISTED: SOSA 3220.03

FORMATS: Lecture

GEOG 3284 Living in Cities

CREDIT HOURS: 3

2008 marked the first time in history that more of the global population lived in cities than in rural areas. What perspectives to anthropology and sociology offer on cities and their inhabitants? This course explores the social dynamics that constitute 'the city' and surveys how social scientists have studied and engaged with cities and city-dwellers. It approached 'the city' both as a whole and through its constituent parts: people and places. Examples may be drawn from cities large and small, near and far - including Halifax.

PREREQUISITES: One of SOSA 1000.06, SOSA 1050.06, SOSA 1100.06 SOSA 1200.06 FYP or PLAN 2005.06

CROSSLISTED: SOSA 3284.03

FORMATS: Lecture | Seminar

GEOG 3302 Quaternary Sedimentary Environments

CREDIT HOURS: 3

The student is exposed to fluvial, alluvial, subglacial, glaciolacustrine, hillslope, eolian, coastal, shallow marine, rift, wedge top, retroarc, and foreland basin environments. Field trips and labs provide experience in methods used to distinguish the environments, including sedimentology, geomorphology, geochronology and thermochronology, and analysis of soils, cores, pebble fabrics, and section-scale non-petroleum sedimentary facies. Quaternary paleoclimatology and tectonic controls on weathering and deposition are discussed and debated.

PREREQUISITES: EARTH 2203.03

CROSSLISTED: EARTH 3302.03

FORMATS: Lecture | Lab

GEOG 3370 North American Landscapes

CREDIT HOURS: 3

Landscapes are the product of human culture ordering nature for economic, social, political, religious, recreational, and artistic purposes. Landscape history analyzes and interprets the use and design of such features as fields and woodlands, roads and waterways, settlements and buildings, towns and suburbs, and parks and cities. This class examines the use and meaning of the spatial environment among the various societies in North America from the sixteenth to the twentieth centuries. Among the topics are the meaning of area resources for indigenous peoples, the occupation and settlement of colonial populations, transportation and continental expansion, town planning, the politics of water and land in the West, preservation movements, scenic tourism, and the literary and artistic stylization of landscapes. The class welcomes non-history students with an interdisciplinary interest in issues regarding planning and design, cultural ecology, and the governance of resources.

CROSSLISTED: HIST 3370.03

FORMATS: Lecture | Discussion

GEOG 3400 Human Health and Sustainability

CREDIT HOURS: 3

This course examines the relationships between the health of populations and health determinants in the context of environmental sustainability. Weekly laboratory exercises will teach students how geomatics (GIS, GPS, and remote sensing technologies) and epidemiological tools can be used to assess the links between the health of human populations and the health of the environment, and how to use these tools for environmental health research.

PREREQUISITES: Must be a third year student or have permission of instructor

CROSSLISTED: ENV 3400.03

FORMATS: Lecture | Lab

GEOG 3440 Geomorphology

CREDIT HOURS: 3

Geomorphology is the quantitative study of Earth's surface processes and landforms applies to geology, civil engineering, hydrogeology, and environmental management. We investigate slope stability, weathering and soils, sediment production, wind-driven and coastal environments, tectonic landforms, and river, glacial and permafrost processes.

PREREQUISITES: EARTH 1080.03 (or SCIE 1506.09/SCIE 1507.09) and (ERTH 1090.03 or EARTH 1091.03); OR completion of (or concurrent enrolment in) a 1000-level mathematics class, a 1000-level physics class, a 1000-level chemistry class AND permission of instructor

CROSSLISTED: EARTH 3440.03

FORMATS: Lecture | Lab

GEOG 3500 Exploring Geographic Information Systems

CREDIT HOURS: 3

Geographic Information Systems (GIS), as a tool for the management of georeferenced data, have become indispensable for disciplines where location of objects and pattern of processes is important. GIS plays a fundamental role for a wide range of applications, from modeling, to analysis and predictions, to decision making. The class is designed for a broad base of potential users and draws on examples of the role of GIS in global climate change, mineral exploration, preservation of biodiversity, coastal zone management, resource depletion, and many other present and future environmental issues. The course material will be of interest to those studying geoscience, environmental science, ecology, marine biology, oceanography, epidemiology, urban and rural planning, civil engineering, and any other field involving spatial data. Laboratory exercises emphasize the principles of raster and vector GIS, and the integration of databases and GPS (global positioning systems) data into GIS. Exercises draw on the diversity of GIS applications in a number of topical areas.

PREREQUISITES: Two years of university study or equivalent or instructor's permission

CROSSLISTED: EARTH 3500, EARTH 5600, ENV 3500

EXCLUSIONS: Credit will only be given for one of GEOG 3500, SCIE 3600, EARTH 3500, EARTH 5600, ENV 3500

FORMATS: Lecture | Lab

GEOG 3633 Spatial Information and GIS in Ecology

CREDIT HOURS: 3

A hands-on approach to understanding and using spatial information, this course introduces students to Geographic Information Systems (GIS) as a tool to answer ecological questions. Together, students conduct a major field project, collecting data, creating maps using GIS, and interpreting spatial patterns, to address an applied problem in ecology.

CALENDAR NOTES: Offered in the summer through SEASIDE. an auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.

PREREQUISITES: BIOL 2060.03

CROSSLISTED: ENV 3633.03, BIOL 3633.03

GEOG 3700 Earth Resources, Sustainability, and Society

CREDIT HOURS: 3

This course addresses the question: What do we need to know and understand about the nature and distribution of geologic resources to optimally reconcile mineral extraction with society's needs, considerations of the environment, and the sustainable development goals in a more sustainable, geoethical, and balanced approach, through the 21st century.

CALENDAR NOTES: Aimed as an elective course for majors in Earth Sciences and in Environmental Sciences. Must be third year students.

PREREQUISITES: EARTH 1080

CROSSLISTED: EARTH 3700 ENV 3700

RESTRICTIONS: E1 and E2

FORMATS: Lecture | Seminar | Discussion | Other (explain in comments)

GEOG 4520 GIS Applications to Environmental and Geological Sciences

CREDIT HOURS: 3

Geographic information systems (GIS) provide a rich set of new tools to the geologist and environmental scientist, not only to solve conventional problems, but also to explore transdisciplinary questions not readily answered by other means. This class builds on the fundamentals of GIS taught in EARTH 3500.03 to explore analytical tools that aid in decision-making processes encountered in mineral exploration, hydrogeology, site selection, environmental assessment, and global change analysis. The class concentrates on case studies and problem solving, including those requiring multi-criteria and multi-objective decision making processes.

PREREQUISITES: GEOG 3500.03, ENV 3500, EARTH 3500.03; EARTH 5600, or SCIE 3600.03; STAT 1060.03

CROSSLISTED: EARTH 4520.03

FORMATS: Lecture | Lab

GEOG 4530 Environmental Remote Sensing

CREDIT HOURS: 3

The goal of this class is to introduce students to the role of remote sensing as a technique provide environmental and geologic information. Particular emphasis will be placed on examining the potential and limitations of remote sensing methods and data in this context. The lectures discuss the fundamentals of remote sensing with an emphasis on optical multispectral satellite systems. In the lab, students use computerized techniques of digital image enhancement and thematic information extraction to process images derived from a range of remote-sensing systems. The integration of remote-sensing information with GIS (Geographic Information Systems) is stressed in both the labs and lectures.

PREREQUISITES: EARTH 3500.03, ENV 3500.03, or EARTH 5600.03 or SCIE 3600.03 or GEOG 3500.03

CROSSLISTED: EARTH 4530.03

FORMATS: Lecture | Lab

GEOG 4850 Geographic Information Science Research Project

CREDIT HOURS: 3

Students learn how to design, manage and complete a research project in Geographic Information Science (GIS). Projects must include a substantive analytical component where GIS is central to methods employed. Evaluation includes a written report, oral presentation and digital data. Required for

completion of the Certificate in GIS.
COREQUISITES: EARTH 5420.03/GEOG 4520.03/ERTH 4520.03
PREREQUISITES: ENV 3500.03/ERTH 3500.03/GEOG 3500.03
CROSSLISTED: BIOL 4850.03, ENV 4850.03, SCIE 4850.03, EARTH 4850.03
EXCLUSIONS: Restricted to 3rd and 4th year students
FORMATS: Lecture

Introduction

German, the most widely used language in Europe, is spoken by approximately 100 million people as their native tongue in Austria, Germany, Switzerland, Italy, Belgium, and some parts of Eastern Europe. The cultural, economic, and scientific role of the German-speaking countries makes the knowledge of German indispensable to the study of most academic disciplines. The number of publications in the German language is second only to the number published in English.

The departmental program "German Studies" is the investigation of German culture and its place in the formation of the modern world. The program concentrates on significant aspects of the cultural tradition of the German-speaking countries. From Luther to Nietzsche, Freud, and Marx, German writers have moved people and nations to change the course of the world. The literary and intellectual development of Germany culminated around 1800 in the epochs of "klassik" and "romantik". The authors of this epoch (Lessing, Herder, Goethe, Schiller, Novalis, The Schlegel brothers, and Hegel) founded their writings on a thorough knowledge of the cultural tradition of Europe, especially Greek culture. As scientists, historians, and politicians they described problems and questions of a universal nature in their works. They became the first historians of literature and created the discipline of aesthetics. The universality of the authors of the period 1770-1830 explains their present-day relevance and makes the study of German important and attractive.

Major or honours students may, with the approval of the Department of German, take up to one year (30 credit hours) at a university in a German-speaking country and receive credit at Dalhousie. The Department has study abroad arrangements with the universities of Heidelberg and Freiburg. In addition there is a "visiting scholars" program which brings distinguished scholars from Germany to Dalhousie.

For students of **German for Business** who have taught for a year with the Pädagogischer Austauschdienst (PAD), which is an Education Exchange Service in Germany, the Department offers access to one of the most prestigious MBA programs in International Industrial Management in Germany at the FH-Esslingen in co-operation with Daimler and Bosch.

For advanced **Engineering students**, the Department offers access to the MSc in Automotive Engineering and the MSc in Information Technology and Automation Systems at the same Graduate School.

Degree Programs

In addition to the departmental requirements listed below, students must satisfy the requirements outlined in the [Degree Requirements](#) section.

The following programs are normally followed, other possibilities do exist. Students considering a degree in German are advised to consult with the undergraduate advisor of the Department.

Applications for Honours Programs should be discussed with a departmental advisor at an early stage. Later applications can also be accommodated.

Staff

Dean

Andrews, J. Hons BA (McGill), MA, PhD (University of Toronto)

Chair

Pifano, D., BA, MA, PhD (Ottawa)

Undergraduate Advisor

Garvey, B. V. (902 494-1095)

Professor

Schwarz, H. -G., MA (Munich), PhD (McGill), McCulloch Chair in German; also *Lehrauftrag* at the University of Heidelberg

University Teaching Fellow

Garvey, B. V., BA (Hons), MA (Dalhousie)

BA with Honours in German

Beyond Beginner-level German, the Honours program requires 54 additional credit hours in German Language, Literature and Thought at or above the 2000 level, including at least twelve credit hours in German Literature or Thought at the 3000 level or higher. It is recommended that at least twenty-four credit hours be completed in the last two years of the program. At the end of the program, students take an oral Honours Exam.

Honours students are strongly advised to complete some coursework in Germany, e.g. through the Canadian Year in Freiburg Program or a study term at a German university. Consult with the undergraduate advisor.

BA with Combined Honours

To take an Honours degree combining German with another subject, a student must consult with the academic advisors of both departments to arrange the specifics of the program. In general, a combination of 66 - 84 intermediate and advanced credit hours in the two subjects is required. Of these 30 to 48 credit hours can be in German, and at least 18 must be at the 3000 level or higher. If students intend to take the German Honours exam, they need a minimum of 36 credit hours in German, including courses in Literature and Thought; if the Honours thesis or exam is completed in the other department, a minimum of 30 intermediate and advanced credit hours in German is required.

BA (120 credit hour) Major in German

For a BA with Major in German, at least 36 (and up to 54) credit hours beyond the 1000 level must be completed; at least 18 of these credit hours must be at the 3000 level or higher. 12 credit hours must be in courses dealing with literature or thought.

BA (120 credit hour) Double Major in German

A BA with a Double Major in German and another subject requires a combination of 60 to 84 intermediate and advanced credit hours in the two subjects. Of these 30 to 54 credit hours can be in German, and at least 18 must be at the 3000 level or higher. 12 credit hours must be in courses dealing with literature or thought.

BA (90 credit hour) Minor in German

See the [Minor in German](#) section of this Calendar

Minor in German Studies

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Students must complete 24 credit hours beyond the 1000 level.

Requirements

- GERM 2001.03: Intermediate German I
- GERM 2002.03: Intermediate German II

Contact [German](#) for more information.

Minor in German Philosophy

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Students must complete between 18 and 27 credit hours beyond the 1000 level from the following list:

- GERM 2290.03: German: Romanticism: From Goethe to Hegel
- GERM 2451.03: Kant and the History of German Idealism I
- GERM 2452.03: Kant and the History of German Idealism II
- GERM 2551.03: In Pursuit of Freedom from Luther to Nietzsche II
- GERM 2600.03: 'Freiheit'. Freedom in German Literature and Thought I
- GERM 2601.03: 'Freiheit'. Freedom in German Literature and Thought II. 19th and 20th Century
- GERM 2651.03: Modern German Philosophy I
- GERM 2652.03: Modern German Philosophy II
- GERM 3101.03: German Literature and Thought from Reformation to Enlightenment I
- GERM 3102.03: German Literature and Thought from Reformation to Enlightenment II
- GERM 3120.03: Origins of Comparative Religion from Hegel to Nietzsche
- GERM 3450.03: Confronting Fascism
- GERM 3550.03: Germany and the Environment
- GERM 4101.03: Aesthetics and Poetics I
- GERM 4102.03: Aesthetics and Poetics II
- GERM 4201.03: Seminar on Hegel's Phenomenology of Spirit I
- GERM 4202.03: Seminar on Hegel's Phenomenology of Spirit II
- GERM 4251.03: Studies in German Idealism I
- GERM 4252.03: Studies in German Idealism II
- PHIL 2651.03: Modern German Philosophy I
- PHIL 2652.03: Modern German Philosophy II
- PHIL 3630.03: History of Philosophy: Kant
- PHIL 3635.03: History of Philosophy: 19th Century Philosophy
- PHIL 4190.03: Topics in the History of Philosophy I: Wittgenstein

Other courses may be possible with departmental approval. Students must take nine credit hours from the German Department and nine credit hours from the Philosophy department.

Contact [German](#) for more information.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

Course Notes

PLEASE NOTE:

- GERM 1010X/Y.06 is to be taken by students with no previous knowledge of German.
- GERM 2046.03 and GERM 2047.03 are to be taken by students with no previous knowledge of German.
- Students who have completed high school German will normally take GERM 2001.03 and GERM 2002.03.
- A combination of GERM 1010X/Y.06, GERM 2046.03 and GERM 2047.03 serves as an intensified introduction to German language.

All students with previous knowledge of German should see the Undergraduate Advisor.

Intermediate Courses

Intermediate courses are based on GERM 1010X/Y.06, GERM 2046.03 and GERM 2047.03 (formerly GERM 2045X/Y.06), high school German Grade 10, 11, 12 or an equivalent basic knowledge. A combination of GERM 2001.03, GERM 2002.03, GERM 2021.03 and GERM 2022.03 serves as an accelerated Intermediate German course and is designed for students who want to make rapid progress in the language.

Unless noted otherwise, all upper year courses are taught in German with German texts.

Course Descriptions

GERM 1003 German for Beginners I

CREDIT HOURS: 3

A seminar course for beginners only, and no previous knowledge is required. The course emphasizes the spoken language, and provides the student with a thorough knowledge of basic grammar. Conversational tutorials are a required part of the course.

EXCLUSIONS: GERM 1010.06

FORMATS: Seminar

GERM 1004 German for Beginners II

CREDIT HOURS: 3

This course is the continuation of GERM 1003, and should be taken sequentially or in cases where students have a prior knowledge of the language and have been placed at this level by the Academic Advisor. The course emphasizes the spoken language, and provides the student with a thorough knowledge of basic grammar. Conversational tutorials are a required part of the course.

PREREQUISITES: GERM 1003.03 or instructor permission

EXCLUSIONS: GERM 1010.06

FORMATS: Seminar

GERM 1010 German for Beginners

CREDIT HOURS: 6

GERM 1010 is a six-credit German language course for beginners only, and no previous German knowledge is required. Students with prior knowledge of German are requested to consult with the undergraduate advisor for placement. This course is equivalent to GERM 1003 and GERM 1004. The course emphasizes the spoken language, and provides the student with a thorough knowledge of basic grammar. FORMAT: Seminar

FORMATS: Seminar

GERM 1025 German Fiction in Novel and Film

CREDIT HOURS: 3

This class examines the conceptual transition from the printed word to the screen; classic German novels and short stories are to be read and compared with their film versions. Works by Kleist, Fontane, Kafka, Thomas Mann, Heinrich Mann, Böll and Handke will be included on the reading list. All texts will be read in English translation. Some of the best known and most innovative cinematic works will be shown and discussed. Directors will include Fassbinder, Herzog, Schlöndorff, Wenders, von Trotta and Visconti. All German language films will either be “dubbed” into English or provided with English subtitles. This class is writing intensive.

RESTRICTIONS: Restricted to Engineering students.

EXCLUSIONS: GERM 1020.06, GERM 1021.06, GERM 1023.03, GERM 1026.03

GERM 1026 German Fiction in Novel and Film I

CREDIT HOURS: 3

This course examines the conceptual transition from the printed word to the screen; classic German novels and short stories are to be read and compared with their film versions. All texts will be read in English translation. Some of the best known and most innovative cinematic works will be shown and discussed. All German language films will either be “dubbed” into English or provided with English subtitles.

CALENDAR NOTES: This course along with GERM 1027.03 satisfies the university's guidelines for the Writing Requirement.

EXCLUSIONS: GERM 1020.06, GERM 1021.06, GERM 1023.03, GERM 1025.03

FORMATS: Lecture

GERM 1027 German Fiction in Novel and Film II

CREDIT HOURS: 3

This course is a continuation of GERM 1026.03. It continues to examine the conceptual transition from the printed word to the screen; classic German novels and short stories are to be read and compared with their film versions. All texts will be read in English translation. Some of the best known and most innovative cinematic works will be shown and discussed. All German language films will either be "dubbed" into English or provided with English subtitles.

CALENDAR NOTES: This course along with GERM 1026.03 satisfies the university's guidelines for the Writing Requirement.

EXCLUSIONS: GERM 1020.06, GERM 1021.06, GERM 1024.03 GERM 1025.03

FORMATS: Lecture

GERM 1061 German for Reading Knowledge

CREDIT HOURS: 3

Students acquire a knowledge of basic vocabulary and grammatical structures sufficient to understand newspapers and texts in the humanities and sciences.

No previous knowledge of German is required. The class is taught in English. For purposes of admission to advanced classes in German it is equivalent to

GERM 1003.03. GERM 1061.03 & 1062.03 together are equivalent to GERM 1010.06

CALENDAR NOTES: This course along with GERM 1062.03 satisfies the university's guidelines for the Language Requirement. For purposes of admission to advanced classes in German, GERM 1061.03 & GERM 1062.03 are equivalent to GERM 1010.06, or GERM 1003.03 & GERM 1004.03

FORMATS: Seminar

GERM 1062 German for Reading Knowledge II

CREDIT HOURS: 3

This is the continuation of GERM 1061.03. In this course, students will continue to acquire a knowledge of basic vocabulary and grammatical structures sufficient to understand newspapers and texts in the humanities and sciences. The course is taught in English. No previous knowledge of German is required.

CALENDAR NOTES: This course along with GERM 1061.03 satisfies the university's guidelines for the Language Requirement. For purposes of admission to advanced classes in German, GERM 1061.03 & GERM 1062.03 are equivalent to GERM 1010.06 or GERM 1003.03 & GERM 1004.03.

PREREQUISITES: GERM 1061.03

FORMATS: Seminar

GERM 1080 German Folk and Fairy Tales

CREDIT HOURS: 6

This course satisfies the university's guidelines for the Writing Requirement. Beginning with the great Germanic epic of the Nibelungen, and finishing with the famous collection of fairy tales by the Brothers Grimm, this course aims to familiarize students with the most significant Germanic myths and tales. Their origins and aspects of their historical, political, social and literary importance will be discussed, through readings presenting a wide variety of critical approaches. The course encourages an interest in narrative style - in the epic, the legend and the fairy tale as literary forms. The history and essential qualities of these forms will be investigated; students will develop a greater awareness of the role and influence which the imagery of these forms has had (and continues to have) in the visual arts and music, in advertising and film, in poetry and theatre. The readings for this course are in English.

CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term. This course satisfies the university's guidelines for the Writing Requirement.

EXCLUSIONS: GERM 2010.03, GERM 2011.03

FORMATS: Seminar

GERM 2001 Intermediate German I

CREDIT HOURS: 3

In Intermediate German I students will build on their basic skills, learning new structures and vocabulary, and work on listening and reading comprehension.

Students will gain a greater ability both to understand and express themselves in German. Small conversation classes are offered once per week as an aid to developing speaking fluency.

PREREQUISITES: GERM 1010.06, or GERM 1046.03 and GERM 1047.03, or equivalent

EXCLUSIONS: GERM 2000.06

FORMATS: Lecture | Tutorial

GERM 2002 Intermediate German II

CREDIT HOURS: 3

As a continuation of Intermediate German I, students will further develop their linguistic skills, learning new structures and vocabulary, and work on listening and reading comprehension. Students will gain a greater ability both to understand and express themselves in German. Small conversation classes are offered

once per week as an aid to developing speaking fluency.
PREREQUISITES: GERM 2001.03 or by instructor permission
EXCLUSIONS: GERM 2000.06
FORMATS: Lecture | Tutorial

GERM 2021 Translation & Composition I

CREDIT HOURS: 3

English and German texts from various periods and of different types will be translated. These translations lead to the discussion of specific difficulties of grammar and construction, word choice and style. Students must prepare translations or compositions for each class.

PREREQUISITES: GERM 1010X/Y.06 or equivalent

EXCLUSIONS: GERM 2020X/Y.06

FORMATS: Seminar

GERM 2022 Translation & Composition II

CREDIT HOURS: 3

As in Translation and Composition I, English and German texts from various periods and of different types will be read and translated. Students will develop their reading comprehension and translation skills and hone their ability in written expression in German. Students must prepare translations or compositions for each class. GERM2022 builds on the skills acquired in Translation and Composition I, although it may be taken on its own by students with strong language ability.

PREREQUISITES: GERM1010X/Y.06 or equivalent

EXCLUSIONS: GERM 2020X/Y.06

FORMATS: Seminar

GERM 2040 Monsters and Madness: Early 20th Century German Film

CREDIT HOURS: 3

This course provides an introduction to German film of the early 20th century. We will focus on one of the most influential periods of cinema history, German Expressionism, and continue to early sound film, Nazi-Propaganda and Postwar film. No knowledge of the German language is necessary. All films are subtitled.

CROSSLISTED: THEA 2340.03, FILM 2340.03

FORMATS: Seminar

GERM 2045 German for Reading

CREDIT HOURS: 6

In this class, students acquire a solid foundation for comprehending and translating texts in the humanities and sciences. No previous knowledge of German is required. The class is taught in English. For purposes of admission to advanced classes in German it is equivalent to GERM 1010X/Y.06.

CALENDAR NOTES: This class satisfies the Bachelor of Arts Language Requirement.

EXCLUSIONS: GERM 1060.06

FORMATS: Lecture

GERM 2050 German Seminar I

CREDIT HOURS: 3

This is a seminar specifically intended for students who do not fit into our normal program offerings. Please consult departmental advisor.

GERM 2051 German Seminar II

CREDIT HOURS: 3

This is a seminar specifically intended for students who do not fit into our normal program offerings. Please consult departmental advisor.

GERM 2201 Introduction to German Literature I

CREDIT HOURS: 3

Texts representing major periods of German Literature are studied, with a special emphasis on the interaction between intellectual history, society, literature and other forms of art. The language of instruction is German, with English as needed; the texts are in German.

PREREQUISITES: GERM 2000.06, or GERM 2002.03, or permission of instructor

EXCLUSIONS: GERM 2200.06

FORMATS: Lecture

GERM 2202 Introduction to German Literature II

CREDIT HOURS: 3

This is the continuation of Introduction to German Literature I. Texts representing major periods of German Literature are studied, with a special emphasis on the interaction between intellectual history, society, literature and other forms of art. The language of instruction is German, with English as needed; the texts are in German.

PREREQUISITES: GERM 2000.06, or GERM 2003.03, or permission of the instructor

EXCLUSIONS: GERM 2200.06

FORMATS: Lecture

GERM 2280 Friedrich Schiller's Historical Drama

CREDIT HOURS: 3

Friedrich Schiller's five historical dramas range over Early Modern Europe from the Hundred Years War, and find settings in medieval Switzerland and France, as well as Counter-Reformation Spain and Elizabethan England. These five plays will be analyzed according to lyrical, theatrical, historical and aesthetic criteria.

CROSSLISTED: EMSP 2280

FORMATS: Lecture | Discussion

GERM 2290 German Romanticism: from Goethe to Hegel

CREDIT HOURS: 3

Genuine feeling and political liberation are enhanced by attention to classical antiquity and modern folktale. Apparently a reaction against the modern, from Goethe to Hegel, Romanticism manages to eclipse almost everything else and define some six decades of German philosophy and literature in the writings of Herder, Goethe, Schiller, Novalis, A.W. and Friedrich Schlegel, Eichendorff, Hölderlin, Schelling, Hegel, Büchner.

CROSSLISTED: EMSP 2290

FORMATS: Lecture | Discussion

GERM 2400 German Art and Literature

CREDIT HOURS: 6

This course gives an introduction to modern German Art and Literature. Special emphasis is on the interaction between art and literature, particularly the themes and styles shared by visual and literary expression during the various epochs of modernity. The language of instruction is German and English, as needed. The texts are in German.

CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

PREREQUISITES: GERM 2000X/Y.06 or equivalent

FORMATS: Seminar

GERM 2401 German Art and Literature: Realism and Symbolism I

CREDIT HOURS: 3

The course differentiates between imitative and symbolic Art and Literature. It opposes Greek sculpture and the Oriental carpet as their archetypes. The former is based on the eye and observation, the other one on Geist, idea and abstraction. We follow this opposition from the Greeks to modern literature and art. Language of instruction: English and German, as desired by the students. This course should appeal to students interested in the history of literature and of ideas.

CALENDAR NOTES: This course is the first part of the former full-year course GERM 2400X/Y.06. This course description reflects the entirety of the pair (GERM 2401.03 and GERM 2402.03).

EXCLUSIONS: GERM 2400X/Y.06

FORMATS: Seminar

GERM 2402 German Art and Literature: Realism and Symbolism II

CREDIT HOURS: 3

Art The course differentiates between imitative and symbolic Art and Literature. It opposes Greek sculpture and the Oriental carpet as their archetypes. The former is based on the eye and observation, the other one on Geist, idea and abstraction. We follow this opposition from the Greeks to modern literature and art. Language of instruction: English and German, as desired by the students. This course should appeal to students interested in the history of literature and of ideas.

CALENDAR NOTES: This course is the second part of the former full-year course GERM 2400X/Y.06. This course description reflects the entirety of the pair (GERM 2401.03 and GERM 2402.03).

EXCLUSIONS: GERM 2400X/Y.06

FORMATS: Seminar

GERM 2451 Kant and the History of German Idealism I

CREDIT HOURS: 3

A study of Kant's relation to modern Rationalism and Empiricism, and an inquiry into the principles of Idealism. This course is taught in English and uses English translations.

CALENDAR NOTES: This course is the first part of the former full-year course GERM 2450X/Y.06. This course description reflects the entirety of the pair (GERM 2451.03 and GERM 2452.03).

EXCLUSIONS: GERM 2450X/Y.06

FORMATS: Seminar

GERM 2452 Kant and the History of German Idealism II

CREDIT HOURS: 3

A study of Kant's relation to modern Rationalism and Empiricism, and an inquiry into the principles of Idealism. This course is taught in English and uses English translations.

CALENDAR NOTES: This course is the second part of the former full-year course GERM 2450X/Y.06. This course description reflects the entirety of the pair (GERM 2451.03 and GERM 2452.03).

PREREQUISITES: GERM 2451.03

EXCLUSIONS: GERM 2450X/Y.06

FORMATS: Seminar

GERM 2550 In Pursuit of Freedom from Luther to Nietzsche I

CREDIT HOURS: 3

This is a study of major thinkers, with emphasis on Luther, Leibniz, Herder, Hamann, Kant and Schiller. This course is taught in English using English translations.

PREREQUISITES: A general introduction to literature, culture or philosophy

EXCLUSIONS: GERM 2300X/Y.06

FORMATS: Seminar

GERM 2551 In Pursuit of Freedom from Luther to Nietzsche II

CREDIT HOURS: 3

This is a study of major thinkers, with emphasis on Hegel, Schopenhauer and Nietzsche. This course is taught in English using English translations.

PREREQUISITES: A general introduction to literature, culture or philosophy

FORMATS: Seminar

GERM 2600 'Freiheit'. Freedom in German Literature and Thought I 18th Century

CREDIT HOURS: 3

In contrast to other European literatures of the 18th century with their utilitarian and moralistic aims, the German Sturm and Drang movement puts the individual into the centre. A secular society demands a new conception of man ("Mensch") liberated from God and the gods. As a consequence, the traditional view of man inherited from Aristotelian poetics is replaced by characters who shape their own destiny. A new myth of a defiant Prometheus is created by Goethe. German idealism formulates a new theory of freedom which was summed up by Kant in the categorical imperative. Goethe's Iphigenie illustrates the humanism of the epoch. The ultimate freedom, however, can only be achieved in the artistic realm. Again, Goethe provides the model in his Divan. Texts by J.M.R. Lenz, Goethe, Schiller, Winckelmann, Kant, and others will be read. Translations will be offered. Language of instruction: English and German, as desired by the students. This course should appeal to students interested in the history of ideas.

FORMATS: Lecture

GERM 2601 'Freiheit'. Freedom in German Literature and Thought II. 19th and 20th century

CREDIT HOURS: 3

Goethe's Divan opens our discussion; Goethe follows the Persian poet Hafiz to the Orient. There he finds freedom of the imagination which enables him to ignore the reality of the Napoleonic wars. Goethe's avoidance of reality became the role model for the Symbolist movement. The German Romantics placed a writer's imaginative capacity ("Fantasie") and "symbolische Anschauung", his ability to view the world symbolically, higher than any concerns about objective reality. New forces, like chance ("Zufall"), counter man's perceived freedom, as is shown in the works of Henrich von Kleist. The dependence on circumstances, social structures and natural laws becomes the great topic of Realism and Naturalism. The human being without hope, faith, or the chance of salvation is manifested in Büchner's works. Finally, the existential crisis of modern man finds its most representative expression in the works of Franz Kafka. Texts by Goethe, Gautier, Kleist, Büchner, Kafka and others will be read in German. English translations will be provided. Language of instruction: English and German, as desired by the students. This course should appeal to students interested in the history of ideas. Attendance of Part I is not a prerequisite.

FORMATS: Lecture

GERM 2651 Modern German Philosophy I

CREDIT HOURS: 3

This course looks at the history of German philosophy from the Enlightenment to the End of German Idealism. Part one examines the early history of German philosophy, focusing on German Idealism. Students will gain a broad overview of German intellectual history through focused readings of key texts. The goal is to understand how the ideas formed in this tradition contribute to both the core philosophic disciplines (such as metaphysics, epistemology and moral philosophy) as well as other fields (like history, aesthetics, psychology, and political thought). Our focus will be on the construction of the free autonomous subject—the basis for our understanding of democratic institutions.

GERM 2652 Modern German Philosophy II

CREDIT HOURS: 3

This course looks at the history of German philosophy from German Idealism until today. In particular, the focus will be on the radical philosophical movements of the 19th and 20th centuries. Students will gain a broad overview of German intellectual history through focused readings of key texts. The goal is to understand how the ideas formed in this tradition contribute to both the core philosophic disciplines (such as metaphysics, epistemology and moral philosophy) as well as other fields (like history, aesthetics, psychology, and political thought). The focus will be on how critiques of the free autonomous individual—constructed in the context of German Idealism—effect the political institutions of the 19th and 20th centuries.

GERM 3001 Advanced Spoken German I

CREDIT HOURS: 3

This course aims to develop the oral proficiency and fluency of advanced students. We will improve pronunciation, practise discussion skills and idiomatic expression, build vocabulary, memorize set phrases and practise listening comprehension. Audio-visual materials will be used. Students' active participation is essential in this course (Non-native speakers only).

PREREQUISITES: GERM 2000X/Y.06 or equivalent

FORMATS: Seminar

GERM 3002 Advanced Spoken German II

CREDIT HOURS: 3

This course builds on German 3001. In this half of the course, we will continue to work on improving pronunciation and intonation, to expand vocabulary and practise sentence and conversational structures. We will especially focus on increasing fluency and confidence in conversational interaction. Students' active participation is essential in this course (Non-native speakers only).

PREREQUISITES: GERM 2000X/Y.06 or equivalent

FORMATS: Seminar

GERM 3003 Advanced German I

CREDIT HOURS: 3

Listening, speaking, reading, and writing skills in the German language will be promoted at an advanced level. Activities will include reading and writing texts, discussions, presentations, film viewing, and revising and developing grammar skills.

CALENDAR NOTES: This course is the first part of the former full-year course GERM 3000X/Y.06. This course description reflects the entirety of the pair (GERM 3003.03 and GERM 3004.03).

GERM 3015 Experiential Learning - Advanced Translation Project (Franz Boas Papers Project)

CREDIT HOURS: 3

This course presents an exciting opportunity for upper-level students to participate in an international research project, and to apply their translation skills in a productive and meaningful way. Conceived as an experiential learning class, the course focuses on the translation (German to English) of archival materials of the Franz Boas Papers Project (FBP) housed at the American Philosophical Society. The documentary edition of the Franz Boas papers is a major interdisciplinary research initiative that reassesses and re-contextualizes the Boas papers. Students will complete background reading and exercises in preparation for the transcription and translation of primary research materials; collaborative and individual work will be assigned, as well as presentations and a reflection paper.

GERM 3120 Origins of Comparative Religion from Hegel to Nietzsche

CREDIT HOURS: 3

Comparative Religion was an invention of lecturers at the University of Berlin from 1810. Religious doctrines and cults were assessed according to the Christology of German Idealism. The beginning is Hegel's 1827 Lectures on Religion; the criticisms of Schopenhauer, D.F. Strauss, Feuerbach and Kierkegaard shall lead us to Nietzsche's "Anti-Christ."

GERM 3203 Goethe and Romanticism I

CREDIT HOURS: 3

Romanticism is a term used more loosely in English than in German. Goethe's life and work encompass three distinct epochs in German literature: Sturm und Drang, Klassik, and Romantik. Goethe founded the first two. The third includes two great contributions by him: the Divan and Faust II. The course aims to introduce Goethe's thought and works from 1770 to the end of his life 1832. We begin with the young Goethe who revolutionized German literature by breaking with European Classicism. Shakespeare and Richardson were his models. They led to a new form of drama G'tz and the novel of letters Werther. He also propagated contemporary philosophical ideas regarding the human being and its freedom. The anti-Aristotelianism of German literature starts with him.

CALENDAR NOTES: This course is the first part of the former full-year course GERM 3200X/Y.06. This course description reflects the entirety of the pair (GERM 3203.03 and GERM 3204.03).

GERM 3400 Germany and Europe: The Cultural Union

CREDIT HOURS: 6

Modern German literature is shaped by the orient (*Les mille et une nuits 1704-1717*), by Winckelmann's discovery of Greek sculpture and the reception of Shakespeare and Milton in the mid 18th century. The Sturm and Drang movement used the works of Shakespeare as its inspiration to create a radical anti-Aristotelian concept of drama and of man. Writers of this period created an "open form" of drama which foreshadowed the plays of Büchner and Brecht. The new concept of man spread throughout Europe, becoming the basis for European Romanticism. German Romanticism, however, is quite different from its European counterparts; its influence is felt by European Symbolists like Baudelaire and Mallarmé. This course aims to study the interconnectedness of the European national arts and literatures. A reading knowledge of German, French and English is required.

CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

PREREQUISITES: GERM 2200X/Y.06, 2400X/Y.06 or other German literature course at the 2000 level or by instructor permission.

FORMATS: Seminar

GERM 3401 Germany and Europe: The Cultural Union I

CREDIT HOURS: 3

"Europe", Heinrich Mann once said, "is an invention of poets". As an early proponent of the Pan-European idea, Mann refers to a long-standing connection between European literary discourse and the condition of the European continent as its topic. Animated by the political clashes that tore apart European lands and cultures over the centuries, especially German and French thinkers articulated their ideas about the possibilities of a peaceful, united continent with a shared culture fostering a strong identity. Today, Europe still wrestles with war and a multitude of identities: a heterogenous continent, an intellectually and culturally diverse union, and a challenging idea for literary studies, philosophy, and political theory. In this course, we will trace the complex plurality of Europe by fusing literary discourse with historical and political narrative. Beginning with an evaluation of the current cultural and political state of Europe, the focus of the seminar will be the interconnectedness of cultural and historical developments in Germany and its larger European context from Romanticism to the twentieth century. Among the authors that we will be discussing are Novalis, Schiller, Goethe, Baudelaire, Mallarmé, Gide as well as Heinrich and Thomas Mann. This course is taught in English. All texts will be provided in English translation. No prerequisites.

CALENDAR NOTES: This course is the first part of the former full-year course GERM 3400X/Y.06. This course description reflects the entirety of the pair (GERM 3401.03 and GERM 3402.03).

GERM 3450 Confronting Fascism

CREDIT HOURS: 3

This interdisciplinary course focuses on writers, artists, filmmakers, and intellectuals whose work responded to the rise of fascism in the 20th century. Primarily, they confronted fascism and critiqued it, hence the title of the course. In 1935, appalled by the political and social changes that deformed the culturally thriving Weimar Republic into Hitler's Third Reich, German playwright Bertolt Brecht began writing a compilation of theatrical scenes inspired by his times – an artistic project created "in order to see this people, compiled of what sort of men, in which kind of condition, with what type of thoughts, that [Hitler] could gather them under his flag." In this seminar, our inquiry will follow and expand on Brecht's line of questioning in order to gain insight to the rise of fascism as a new political mass movement that would, like no other, shape and darken the 20th century. Taking into account the movement's European roots, which would culminate in Germany, we will query the political, ideological, and antisemitic practices of fascism in order to gain a broader understanding of its national and global impact. Our historical trajectory will lead us from the early theoretical conceptions of this new kind of nationalist ideology to an exploration of the life and suffering within the Third Reich, to the atrocities of the Holocaust, and toward post-war attempts of historical Aufarbeitung [working-through the past] in and beyond Germany. Finally, we will discuss the lasting necessity to continue this work of working-through and contemporary concerns that democratic societies face in view of neo-fascist movements. This seminar will be conducted in English. All readings will be in English.

CREDIT HOURS: 6

A historical study of the development of aesthetic and poetical theory: What is art, what is literature?. Aristotle's "Poetik", Horace's "Ars Poetica", Lenz's "Anmerkungen übers Theater", Hegel's "Ästhetik", Heidegger's "Ursprung des Kunstwerkes" and Gadamer's "Aktualität des Schönen" will be studied.

CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

PREREQUISITES: GERM 2200X/Y.06 or GERM 2400X/Y.06 and another literature course

FORMATS: Seminar

GERM 4101 Aesthetics and Poetics I

CREDIT HOURS: 3

The course begins with a study of Aristotle's Poetics. The anti-Aristotelian thought of J. M. R. Lenz., his *Anmerkungen* (1771), marks the beginning of modern Realism. The poetics of Romanticism and its symbolic orientation are explained by reading passages from the works of Novalis, F. Schlegel and Goethe. To illustrate what aesthetic theory is and how it differs from poetics, Hegel's *Ästhetik* and Heidegger's *Ursprung des Kunstwerkes* will be studied. "hönen" will be studied.

CALENDAR NOTES: This course is the first part of the former full-year course GERM 4100.06. This course description reflects the entirety of the pair (GERM 4101.03 and GERM 4102.03).

PREREQUISITES: The ability to read the German texts in German. Each of the German texts can be provided in English translation.

EXCLUSIONS: GERM 4100.06

FORMATS: Seminar

GERM 4102 Aesthetics and Poetics II

CREDIT HOURS: 3

The course begins with a study of Aristotle's Poetics. The anti-Aristotelian thought of J. M. R. Lenz., his *Anmerkungen* (1771), marks the beginning of modern Realism. The poetics of Romanticism and its symbolic orientation are explained by reading passages from the works of Novalis, F. Schlegel and Goethe. To illustrate what aesthetic theory is and how it differs from poetics, Hegel's *Ästhetik* and Heidegger's *Ursprung des Kunstwerkes* will be studied.

CALENDAR NOTES: This course is the second part of the former full-year course GERM 4100X/Y.06. This course description reflects the entirety of the pair (GERM 4101.03 and GERM 4102.03).

PREREQUISITES: GERM 4101.03 The ability to read the German texts in German. Each of the German texts can be provided in English translation.

EXCLUSIONS: GERM 4100X/Y.06

FORMATS: Seminar

GERM 4201 Seminar on Hegel's Phenomenology of Spirit I

CREDIT HOURS: 3

The *Phenomenology of Spirit*, published in 1807, was Hegel's first major work. He intended to write an introduction to philosophy by demonstrating the necessity of the advance from the most immediate form of knowledge to absolute knowledge. To achieve this he had to write the *Phenomenology* as an introduction to his own philosophy.

CALENDAR NOTES: This course is the first part of the former full-year course GERM 4200.06. This course description reflects the entirety of the pair (GERM 4201.03 and GERM 4202.03).

PREREQUISITES: 2000-level German literature course (GERM 2200.06, or GERM 2202.03, or GERM 2400.06, or GERM 2402.03) or by instructor permission

EXCLUSIONS: GERM 4200.06

FORMATS: Seminar

GERM 4202 Seminar on Hegel's Phenomenology of Spirit II

CREDIT HOURS: 3

The *Phenomenology of Spirit*, published in 1807, was Hegel's first major work. EXCLUSIONS: GERM 4250.06

GERM 4252 Studies in German Idealism II

CREDIT HOURS: 3

This seminar is specifically intended for students in the 20-credit major and 20-credit honours degree programs. The specific content of the seminar varies from year to year, but is always related to some aspect of Idealism.

CALENDAR NOTES: This course is the second part of the former full-year course GERM 4250.06. This course description reflects the entirety of the pair

(GERM 4251.03 and GERM 4252.03).
PREREQUISITES: GERM 4251.03
EXCLUSIONS: GERM 4250.06

GERM 4500 Special Topics I

CREDIT HOURS: 3

This is an intensive research seminar dealing with selected topics to be announced.

PREREQUISITES: 2000-level German literature course (GERM 2200.06, or GERM 2202.03, or GERM 2400.06, or GERM 2402.03) or by instructor permission

GERM 4501 Special Topics II

CREDIT HOURS: 3

This is an intensive research seminar dealing with selected topics to be announced.

PREREQUISITES: 2000-level German literature course (GERM 2200.06, or GERM 2202.03, or GERM 2400.06, or GERM 2402.03) or by instructor permission

GERM 4601 Special Topics III - Realism and Symbolism in Literature and Art I

CREDIT HOURS: 3

The course differentiates between imitative and symbolic Art and Literature. It opposes Greek sculpture and the Oriental carpet as their archetypes. The former is based on the eye and observation, the other one on Geist, idea and abstraction. We follow this opposition from the Greeks to modern literature and art. Language of instruction: English and German, as desired by the students. This course should appeal to students interested in the history of literature and of ideas.

Introduction

Just as people need to know who they are and how they arrived where they are, groups, communities, states and nations need a sense of their own past as part of their culture.

The academic study of history is concerned to discover as much as possible of the reality of the past and to interpret human behaviour in its changes through time. It is a unique subject, scientific in the way it uses evidence, but still an art because the reconstruction of the past requires a disciplined imagination and an effective rhetoric for the communication of meaning.

The contemporary world is one of intensive specialization, in which the varieties of human knowledge have increased well beyond the capacity of any individual to command them all. These developments have reinforced the role of history as the foundation of a person's education, because history can never exclude any branch of human knowledge, although individual historians will want to select that portion of it especially relevant for them. History's field of study will always be the entirety of the human experience.

The subject of history does not have a monolithic body of knowledge. Historical understanding is a matter of interpretation, of offering explanations for events and movements which are subject to constant revision by scholars. Arguments, scepticism and controversy are thus the very stuff of history. The history student does not merely acquire a particular mass of information, but learns to think independently.

Especially in the 3000 and 4000 level courses, students gain more than sophistication about substantive areas of history. They also develop transferable skills for oral and written communication, for presentations of findings to groups, for group and independent research, for computer literacy in the human sciences, for research skills in primary and secondary materials, and for the application of foreign languages.

A degree in history provides a superb background for students planning to enter professional careers in fields such as law, education and journalism, as well as those interested in pursuing graduate study in history or related social science and humanities disciplines.

Degree Programs

All BA programs are governed by the general requirements of the College of Arts and Science for degrees, as set out in the University Calendar. See the Degree Requirements section for complete details, particularly with respect to Distribution Requirements, the Writing Course, the Language Course, and Arts and Science Electives. Before registering for the second year, each student in the College of Arts and Science must declare a subject of concentration. Once a student has declared History as the subject of concentration the following degree programs apply.

Courses in the History Department are grouped numerically in several geographical, chronological, subject and other areas: for example, Canadian, American, British, African, Medieval and Early Modern European, Modern European, Science and Technology, etc. Students are strongly encouraged to select a distribution of courses from different areas in order to experience the variety and richness of history.

However, students planning to take a minimum of 30 credit hours in History (above the 1000 level) are required to choose at least three credit hours above the 1000 level in each of four categories (A, B, C and D). See details under [History Degree Requirements](#).

Students who wish to build up a greater specialization in history than the minimum requirements outlined below may do so by taking courses of an historical nature given by the Departments of Classics, Economics, Music, Philosophy, Political Science, Spanish and Latin American Studies, Theatre, etc.

All history majors must complete HIST 2700.03 (Introduction to Historical Methods), preferably during their second year.

History students interested in obtaining an Emphasis in Canadian Studies along with their Major or Minor in History should consult the Canadian Studies calendar entry for information on requirements and for a list of History courses approved with Canadian Studies.

Students who wish to concentrate in a particular area of history should acquire the appropriate language skills, especially if they intend to pursue graduate study in it.

The following outline presents the MINIMUM departmental requirements for each program and should be read in conjunction with the general requirements of the Faculty.

(Note: This requirement applies to students who start their BA degree in Fall **2022** and after.)

Staff

Dean

Andrews, J., BA (McGill), MA, PhD (University of Toronto)

Chair

Kesselring, K. (902 494-3623)

Undergraduate Coordinator

Kozlov, D. (902 494-3579)

Professors Emeriti

Crowley, J. E., AB (Princ), MA (Mich), PhD (Johns Hopkins)

Flint, J. E., MA (Cantab), PhD (London), FRHistS, FRSC

Neville, C. J., BA, MA (Carleton), PhD (Aberdeen) FRHistS, FSA Scot.

Roberts, J., BA (Simon Fraser), MA (Queen's), PhD (Johns Hopkins)

Zachernuk, P., BA, MA (Dalhousie), PhD (Toronto)

Assistant Professors

Bingham, J., BA (UNB), MA (Toronto), PhD (York)

Binkley, L., BA, MA, PhD (Queen's)

Langford, W., BA, MA (UBC), PhD (Queen's)

Luciuk, K., BA, MA (Queen's), PhD (Toronto)

McCallum, T., BA (Queen's), MA (Simon Fraser), PhD (Queen's)

BA (120 credit hour) Honours in History

The Honours degree is intended for students who plan to proceed to graduate work and for others who wish to enjoy the experience of an intensive research project, the Honours essay. Students must complete the requirements for the BA with a major in History (NOTE: for students who begin from September 2022, and in subsequent years, these include completing HIST 2700.03) and fulfil the following additional requirements:

- Honours students must take at least 54 but not more than 66 credit hours in History beyond the 1000 level.
- Honours students must take HIST 4981.03 and HIST 4982.03 (Honours Essay in History I and II) in consecutive terms; HIST 4971.15 and HIST 4972.15 (History Honours Seminar) in consecutive terms; and at least one three-credit-hour 4000-level seminar in History.
- Applicants normally should have achieved an existing Grade Point Average of at least 3.3 in their History courses above the 1000 level to be considered for admission.
- A grade of B- or better is required on 54 credit hours in History
- A grade of B- or better is required on the honours thesis

NOTE: Applications for Honours in History are not considered by the Department until the winter term of the student's third year. Please enquire at the Department for the relevant deadline.

Students are required to choose at least three credit hours above the 1000 level in **EACH** of four categories (A, B, C and D).

Group A: The Premodern Era

2002, 2006, 2007, 2012, 2015, 2022, 2060, 2061, 2064, 2101, 2106, 2135, 2153, 2205, 2207, 2211, 2221, 2271, 2331, 2381, 2386, 2392, 2425, 2503, 2509, 2614, 2711, 3000, 3002, 3003, 3006, 3013, 3030, 3040, 3102, 3103, 3105, 3107, 3108, 3109, 3210, 3226, 3245, 3260, 3273, 3300, 3350, 3360, 3370, 3380, 3394, 3435, 3451, 3470, 3509, 3510, 3511, 3515, 3750, 4003, 4004, 4060, 4104, 4105, 4106, 4250, 4360, 4545, 4550, 4162, 4175

Group B: The Modern Era

2021, 2022, 2032, 2041, 2055, 2064, 2081, 2111, 2112, 2205, 2208, 2210, 2211, 2212, 2221, 2222, 2231, 2235, 2250, 2260, 2261, 2272, 2280, 2333, 2335, 2340, 2381, 2382, 2383, 2387, 2388, 2392, 2425, 2426, 2502, 2504, 2505, 2510, 2615, 2711, 2712, 2900, 2950, 3007, 3030, 3043, 3045, 3049, 3050, 3051, 3056, 3090, 3092, 3094, 3096, 3113, 3114, 3210, 3220, 3222, 3223, 3227, 3245, 3260, 3274, 3282, 3292, 3293, 3333, 3350, 3358, 3360, 3361, 3365, 3367, 3369, 3370, 3372, 3380, 3390, 3393, 3430, 3431, 3435, 3451, 3452, 3470, 3471, 3512, 3513, 3515, 3551, 3552, 3750, 4045, 4090, 4117, 4222, 4255, 4260, 4300, 4360, 4400, 4401, 4500, 4510, 4550, 4555, 4600, 4613, 4614, 4639, 4710, 4987, 4988

Group C: The Euro-Americas

2002, 2006, 2007, 2012, 2015, 2021, 2022, 2032, 2041, 2055, 2060, 2061, 2064, 2081, 2101, 2106, 2111, 2112, 2135, 2153, 2205, 2207, 2208, 2210, 2211, 2212, 2221, 2222, 2231, 2235, 2250, 2260, 2261, 2271, 2272, 2280, 2331, 2333, 2335, 2340, 2381, 2382, 2383, 2386, 2387, 2388, 2392, 2614, 2615, 2900, 3000, 3002, 3003, 3006, 3013, 3030, 3040, 3043, 3045, 3049, 3050, 3051, 3056, 3088, 3090, 3092, 3094, 3096, 3102, 3105, 3107, 3108, 3109, 3113, 3114, 3210, 3220, 3222, 3223, 3226, 3227, 3245, 3260, 3273, 3274, 3282, 3292, 3293, 3300, 3333, 3350, 3358, 3360, 3361, 3365, 3367, 3369, 3370, 3372, 3380, 3390, 3393, 3394, 3435, 3750, 4003, 4004, 4045, 4060, 4090, 4104, 4105, 4106, 4117, 4162, 4175, 4222, 4250, 4255, 4260, 4300, 4360, 4550, 4600, 4613, 4614, 4639, 4987, 4988

Group D: The Afro-Asias

2021, 2022, 2425, 2426, 2502, 2503, 2504, 2505, 2509, 2510, 2711, 2712, 2715, 3088, 3430, 3431, 3435, 3451, 3452, 3470, 3471, 3509, 3510, 3511, 3512, 3513, 3515, 3520, 4090, 4401, 4404, 4500, 4510, 4545, 4550, 4555

Students may **not** satisfy two areas with the same course. See <http://www.dal.ca/faculty/arts/history/programs/undergraduate-programs/diversityhistory.html> for a complete course list with titles.

BA (120 credit hour) Combined Honours including History

Besides the general requirements for all BA programs, students must meet the Faculty degree requirements for Combined Honours (120 credit hours). Students must take 66 to 84 credit hours in two subjects beyond the 1000-level, with no more than 48 nor fewer than 30 credit hours in either of them. Students must complete 18 credit hours at the 3000/4000 level in both Honours subjects, and at least one three-credit hour 4000-level seminar in History.

Students must complete HIST 2700.03 (Introduction to Historical Methods).

Students will do the Honours Essay (or equivalent) in one of the Honours subjects. If you choose History as your primary subject (i.e., you take more classes in History than in your other Combined Honours subject), you will write an Honours Essay (HIST 4981/4982) and take the Honours seminar (HIST 4971/4972).

Applicants normally should have achieved an existing Grade Point Average of at least 3.3 in their History courses above the 1000 level to be considered for admission. A grade of B- or better is required in at least 30 History credit hours.

Students are required to choose at least three credit hours above the 1000 level in **EACH** of four categories (A, B, C and D).

Group A: The Premodern Era

2002, 2006, 2007, 2012, 2015, 2022, 2060, 2061, 2064, 2101, 2106, 2135, 2153, 2205, 2207, 2211, 2221, 2271, 2331, 2381, 2386, 2392, 2425, 2503, 2509, 2614, 2711, 3000, 3002, 3003, 3006, 3013, 3030, , 3040, 3102, 3103, 3105, 3107, 3108, 3109, 3210, 3226, 3245, 3260, 3273, 3300, 3350, 3360, 3370, 3380, 3394, 3435, 3451, 3470, 3509, 3510, 3511, 3515, 3750, 4003, 4004, 4060, 4104, 4105, 4106, 4162, 4250, 4360, 4545, 4550, 4175

Group B: The Modern Era

2021, 2022, 2032, 2041, 2055, 2064, 2081, 2111, 2112, 2205, 2208, 2210, 2211, 2212, 2215, 2221, 2222, 2231, 2235, 2250, 2260, 2261, 2272, 2280, 2333, 2335, , 2340, 2381, 2382, 2383, 2387, 2388, 2392, 2425, 2426, 2502, 2504, 2505, 2510, 2615, 2711, 2712, 2900, 2950, , 3007, 3030, 3043, 3045, 3049, 3050, 3051, 3056, 3090, 3092, 3094, 3096, 3113, 3114, 3210, 3220, 3222, 3223, 3227, 3245, 3260, 3274, 3282, 3292, 3293, 3333, 3350, 3358, 3360, 3361, 3365, 3367, 3369, 3370, 3372, 3380, 3390, 3393, 3430, 3431, 3435, 3451, 3452, 3470, 3471, 3512, 3513, 3515, 3551, 3552, 3750, 4045, 4090, 4117, 4222, 4255, 4260, 4300, 4360, 4400, 4401, 4500, 4510, 4550, 4555, 4600, 4613, 4614, 4639, 4710, 498, 4988

Group C: The Euro-Americas

2002, 2006, 2007, 2012, 2015, 2021, 2022, 2032, 2041, , 2055, 2060, 2061, 2064, 2081, 2101, 2106, 2111, 2112, 2135, 2153, 2205, 2207, 2208, 2210, 2211, 2212, 2221, 2222, 2231, 2235, 2250, 2260, 2261, 2271, 2272, 2280, 2331, 2333, 2335, 2340, 2381, 2382, 2383, 2386, 2387, 2388, 2392, 2614, 2615, 2900, 3000, 3002, 3006, 3013, 3030, 3040, 3043, 3045, 3049, 3050, 3051, , 3056, 3088, 3090, 3092, 3094, 3096, 3102, 3105, 3107, 3108, 3109, 3113, 3114, 3210, 3220, 3222, 3223, 3226, 3227, 3245, 3260, 3273, 3274, 3282, 3292, 3293, 3300, 3333, 3350, 3358, 3360, 3361, 3365, 3367, 3369, 3370, 3372, 3380, 3390, 3393, 3394, 3435, 3750, 4003,

4004, 4045, 4060, 4090, 4104, 4105, 4106, 4117, 4162, 4175, 4222, 4250, 4255, 4260, 4300, 4360, 4550, 4600, 4613, 4614, 4639, 4987, 4988

Group D: The Afro-Asias

2021, 2022, 2425, 2426, 2502, 2503, 2504, 2505, 2509, 2510, 2711, 2712, 2715, 3088, 3430, 3431, 3435, 3451, 3452, 3470, 3471, 3509, 3510, 3511, 3512, 3513, 3515, 3520, 4090, 4400, 4401, 4500, 4510, 4545, 4550, 4555

Students may **not** satisfy two areas with the same course. See <http://www.dal.ca/faculty/arts/history/programs/undergraduate-programs/diversityhistory.html> for a complete course list with titles.

BA (120 credit hour) Major in History

The 120 credit hours Major requires more advanced training in History than does the three year degree. Besides the general degree requirements for all BA degrees, students majoring in History are required to take at least 36 but not more than 54 History credit hours beyond the 1000 level.

- At least 18 of these History credit hours must be above the 2000 level.
- Within the last 90 credit hours, students must take at least six credit hours in each of two subjects other than History.
- BA Majors in History must complete HIST 2700.03 (Introduction to Historical Methods)
- BA Majors in History must take at least three credit hours 4000 level seminar in History

Students are required to choose at least three credit hours above the 1000 level in **EACH** of four categories (A, B, C and D).

Group A: The Premodern Era

2002, 2006, 2007, 2012, 2015, 2022, 2060, 2061, 2064, 2101, 2106, 2135, 2153, 2205, 2207, 2211, 2221, 2271, 2331, 2381, 2386, 2392, 2425, 2503, 2509, 2614, 2711, 3000, 3002, 3003, 3006, 3013, 3030, 3037, 3040, 3102, 3103, 3105, 3107, 3108, 3109, 3210, 3226, 3245, 3260, 3273, 3300, 3350, 3360, 3370, 3380, 3394, 3435, 3451, 3470, 3509, 3510, 3511, 3515, 3750, 4003, 4004, 4060, 4104, 4105, 4106, 4162, 4175, 4250, 4360, 4545, 4550

Group B: The Modern Era

2021, 2022, 2032, 2041, 2055, 2064, 2081, 2111, 2112, 2205, 2208, 2210, 2211, 2212, 2221, 2222, 2231, 2235, 2250, 2260, 2261, 2272, 2280, 2333, 2335, 2340, 2381, 2382, 2383, 2387, 2388, 2392, 2425, 2426, 2502, 2504, 2505, 2510, 2615, 2711, 2712, 2900, 2950, 3007, 3030, 3043, 3045, 3049, 3050, 3051, 3056, 3090, 3092, 3094, 3096, 3113, 3114, 3210, 3220, 3222, 3223, 3227, 3245, 3260, 3274, 3282, 3292, 3293, 3333, 3350, 3358, 3360, 3361, 3365, 3367, 3369, 3370, 3372, 3380, 3390, 3393, 3430, 3431, 3435, 3451, 3452, 3470, 3471, 3512, 3513, 3515, 3551, 3552, 3750, 4045, 4090, 4117, 4222, 4255, 4260, 4300, 4360, 4400, 4401, 4500, 4510, 4550, 4555, 4600, 4613, 4614, 4639, 4710, 4987, 4988

Group C: The Euro-Americas

2002, 2006, 2007, 2012, 2015, 2021, 2022, 2032, 2041, 2055, 2060, 2061, 2064, 2081, 2101, 2106, 2111, 2112, 2135, 2153, 2205, 2207, 2208, , 2210, 2211, 2212, 2221, 2222, 2231, 2235, 2250, 2260, 2261, 2271, 2272, 2280, , 2331, , 2333, 2335, , 2340, , , 2381, 2382, 2383, , , 2386, 2387, 2388, 2392, 2614, 2615, 2900, 3000, 3002, 3003, 3006, 3013, 3030, 3040, 3043, 3045, 3049, 3050, 3051, 3056, 3088, 3090, 3092, 3094, 3096, 3102, 3105, 3107, 3108, 3109, 3113, 3114, 3210, 3220, 3222, 3223, 3226, 3227, 3245, 3260, 3272, 3273, 3274, 3282, 3292, 3293, 3300, 3333, 3350, 3358, 3360, 3361, 3365, 3367, 3369, 3370, 3372, 3380, 3390, 3393, 3394, 3435, 3750, 4003, 4004, 4045, 4060, 4090, 4104, 4105, 4106, 4117, 4162, 4175, 4222, 4250, 4255, 4260, 4300, 4360, 4550, 4600, 4613, 4614, 4639, 4987, 4988

Group D: The Afro-Asias

2021, 2022, 2425, 2426, 2502, 2503, 2504, 2505, 2509, 2510, 2711, 2712, 2715, 3088, 3430, 3431, 3435, 3451, 3452, 3470, 3471, 3509, 3510, 3511, 3512, 3513, 3515, 3520, 4090, 4401, 4404, , 4500, 4510, 4545, 4550, 4555

Students may **not** satisfy two areas with the same course. See <http://www.dal.ca/faculty/arts/history/programs/undergraduate-programs/diversityhistory.html> for a complete course list with titles.

BA (120 credit hour) Double Major including History

Besides the general requirements for all BA programs, students must meet the Faculty degree requirements for the BA with Double Major, which include 60 to 84 credit hours in the major subjects beyond the 1000 level, with no more than 48 nor fewer than 30 credit hours in either subject. Students must complete at least 18 credit hours above the 2000 level in each major subject. Within the last 90 credit hours, students must complete six credit hours in a single subject other than the two major subjects. If History is the primary subject for the Double Major, students are required to take at least three credit hours in a 4000 level seminar in History.

- Students must complete HIST 2700.03 (Introduction to Historical Methods)

- Students must take at least three credit hours in a 4000 level seminar in History.

Students are required to choose at least three credit hours above the 1000 level in **EACH** of four categories (A, B, C and D).

Group A: The Premodern Era

2002, 2006, 2007, 2012, 2015, 2022, 2060, 2061, 2064, 2101, 2106, 2135, 2153, 2205, 2207, 2211, 2221, 2271, 2331, 2381, 2386, 2392, 2425, 2503, 2509, 2614, 2711, 3000, 3002, 3003, 3006, 3013, 3020, 3030, 3040, 3046, 3102, 3103, 3105, 3107, 3108, 3109, 3210, 3226, 3245, 3260, 3273, 3300, 3350, 3360, 3370, 3380, 3394, 3435, 3451, 3470, 3509, 3510, 3511, 3515, 3750, 4003, 4004, 4060, 4104, 4105, 4106, 4162, 4175, 4250, 4360, 4545, 4550

Group B: The Modern Era

2021, 2022, 2032, 2041, 2055, 2064, 2081, 2111, 2112, 2205, 2208, 2210, 2211, 2212, 2221, 2222, 2231, 2235, 2250, 2260, 2261, 2272, 2280, 2332, 2333, 2335, 2336, 2340, 2381, 2382, 2383, 2387, 2388, 2392, 2425, 2426, 2502, 2504, 2505, 2510, 2615, 2711, 2712, 2900, 2950, 3007, 3030, 3043, 3045, 3049, 3050, 3051, 3056, 3090, 3092, 3094, 3096, 3113, 3114, 3210, 3220, 3222, 3223, 3227, 3245, 3260, 3274, 3282, 3292, 3293, , 3333, 3350, 3358, 3360, 3361, 3365, 3367, 3369, 3370, 3372, 3380, 3390, 3393, 3430, 3431, 3435, 3451, 3452, 3470, 3471, 3512, 3513, 3515, 3551, 3552, 3750, 4045, 4090, 4117, 4222, 4255, 4260, 4300, 4360, 4400, 4401, 4500, 4510, 4550, 4555, 4600, 4613, 4614, 4639, 4710, 4987, 4988

Group C: The Euro-Americas

2002, 2006, 2007, 2012, 2015, 2021, 2022, 2032, 2041, 2055, 2060, 2064, 2061, 2081, 2101, 2106, 2111, 2112, 2135, 2153, 2205, 2207, 2208, 2210, 2211, 2212, 2221, 2222, 2231, 2235, 2250, 2260, 2261, 2271, 2272, 2280, 2331, 2333, 2335, 2340, 2381, 2382, 2383, 2386, 2387, 2388, 2392, 2614, 2615, 2900, 3000, 3002, 3003, 3006, 3013, 3030, 3040, 3043, 3045, 3049, 3050, 3051, 3056, 3088, 3090, 3092, 3094, 3096, 3102, 3105, 3107, 3108, 3109, 3113, 3114, 3210, 3220, 3222, 3223, 3226, 3227, 3245, 3260, 3273, 3274, 3282, 3292, 3293, 3300, 3333, 3350, 3358, 3360, 3361, 3365, 3367, 3369, 3370, 3372, 3380, 3390, 3393, 3394, 3435, 3750, 4003, 4004, 4045, 4060, 4090, 4104, 4105, 4106, 4117, 4162, 4175, 4222, 4250, 4255, 4260, 4300, 4360, 4550, 4600, 4613, 4614, 4639, 4987, 4988

Group D: The Afro-Asias

2021, 2022, 2425, 2426, 2502, 2503, 2504, 2505, 2509, 2510, 2711, 2712, 2715, 3088, 3430, 3431, 3435, 3451, 3452, 3470, 3471, 3509, 3510, 3511, 3512, 3513, 3515, 3520, 4090, 4400, 4401, 4500, 4510, 4545, 4550, 4555

Students may **not** satisfy two areas with the same course. See <http://www.dal.ca/faculty/arts/history/programs/undergraduate-programs/diversityhistory.html> for a complete course list with titles.

BA (90 credit hour) Minor in History

See the [Minor in History](#) section of this Calendar

Minor in Middle East and South Asian Studies

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Students minoring in Middle East Studies select a minimum of 18 to a maximum of 27 credit hours from the list below. Student are required to take one of the following:

- HIST 2502.03: The Ottoman Empire
- HIST 2503.03/RELS 2503.03: Classical and Medieval History of Islamic Civilization
- HIST 2504.03: History of Modern Middle East
- RELS 2001.03: Judaism
- RELS 2003.03: Islam

At least three credit hours must be at the 3000 or 4000 level. Please note that not all courses are offered each year.

Second Year

- ARBC 2021.03: Intermediate Arabic I
- ARBC 2022.03 Intermediate Arabic II
- ARBC 2100.03//RELS 2052.03: A Cultural Introduction to the Arab World
- RELS 2053.03/GWST 2053.03: Women and Islam
- CLAS 2103.03: Ancient Mythology I

- CLAS 2104.03: Ancient Mythology II
- CLAS 2216.03/HIST 2089.03: Alexander the Great
- CLAS 2220.03/HIST 2520.03/RELS 2220.03: Ancient Israel
- CLAS 2281.03/RELS 2281.03: The Orthodox and Oriental Churches
- CLAS 2900X/Y.06: Intermediate Hebrew
- HIST 2502.03: The Ottoman Empire
- HIST 2503.03/RELS 2503.03: Classical and Medieval History of Islamic Civilization
- HIST 2504.03: History of the Modern Middle East
- HIST 2509.03/RELS 2509.03 Hindu, Muslim, Sikh: Identity, Culture and State in Pre-Colonial South Asia
- HIST 2510.03/RELS 2510.03 Hindu, Muslim, Sikh: Colonial Trauma and Nationalism in Modern South Asia
- INTD 2045.03: Indian Society: Change and Continuity
- MUSC 2023.03: Middle Eastern Music
- RELS 2001.03: Judaism
- RELS 2003.03: Islam
- RELS/CLAS 2600.03: Sanskrit II
- RELS 2011.02: Hinduism

Third Year

- ARBC 3030.03: Advanced Arabic
- ARBC 3031.03: Advanced Arabic II (Readings)
- ARBC 3040.03: Arabic Philosophical Texts (al-Ghazali)
- ARBC 3050.03: Arabic Philosophical Texts (Maimonides)
- ARBC 3100.03: Arabic Pre-Islamic Poetry
- CLAS 3016.03/HIST 3016.03/RELS 3018.03: Meetings between Hellenism and the East to Philo the Jew
- CLAS 3017.03/HIST 3017.03/RELS 3019.03: Meetings between Hellenism, Judaism, Christianity and Islam
- CLAS 3021.03: Ancient Art and Architecture
- CLAS 3382.03: Medieval Philosophy from Arabic and Jewish Thinkers to Aquinas
- CLAS 3501.03: Herodotus
- CLAS 3502.03/HIST 3502.03: Thucydides and the Greek World at War
- HIST 3508.03: History of Perso-Islamic Culture in South Asia, 1000-1800
- HIST 3509.03/CLAS 3601.03: Arab Caliphs, Turkish Commanders, Persian Viziers, 750-1200
- HIST 3510.03/RELS 3510.03: Islamicate Empires, 1300-1700: The Ottoman and Safavid Empires
- HIST 3511.03/CLAS 3602.03: Ancient and Medieval History of the Persianate World
- HIST 3512.03: Modern History of Iran
- HIST 3520.03: Empire, War and Resistance in Sri Lanka
- RELS 3009.03: Christianity in the Lands of Islam
- RELS 3012.03: Mystics of the Middle East
- RELS 3101.03: The Self and the World in Indian Story
- RELS 3111.03: Vishnu and Krishna in the Dark Lord Popular Hindu Religion
- RELS 3112.03: Buddhism in India and Tibet
- RELS 3113.03: The Mahabharata
- RELS 3600.03: Sanskrit Texts I Narrative and Epic Selections

Fourth Year

- CLAS 4011.03/RELS 4011.03: Jewish Philosophy: Maimonides
- CLAS 4018.03/RELS 4018.03: Christian Theology in Islamic Lands: John of Damascus
- CLAS 4019.03/RELS 4019.03: Philo Judaeus

Types of Courses

1000 level courses take broad geographic or thematic perspectives over long periods of history to provide a background to many subsequent History courses. 2000 level courses typically deal with countries and transnational regions over a couple of centuries. 1000 level courses assume no prior university-equivalent preparation; second-year courses assume that students have the skills typically developed in the first year of university study. At the 1000 and 2000 levels, courses are usually lecture format, three hours per week, with tutorials featured in some courses. 2000 level courses begin more specialized study of an area of History as a major or minor.

3000 and 4000 level courses provide opportunities for the intensive pursuit of interests developed in previous courses. The relatively small size of 3000 level courses (usually 30 students) allows intensive discussion of demanding primary materials and secondary publications, as well as students' presentation of their independent work. 4000 level courses are taught in a seminar format to cultivate students' independent research skills; undergraduate enrolments are limited to 15 or less; some are cross-listed as graduate courses. These courses are particularly recommended for Honours students and prospective Honours students.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions

HIST 1020 Europe: Before the French Revolution

CREDIT HOURS: 3

This course will introduce students to the major themes and events in early European history. The exact period and topics to be covered will vary from one year to the next, but will typically introduce students to the formation of European culture in the middle ages, the sixteenth-century Reformation, the beginnings of European colonization, and the intellectual and economic 'revolutions' of the eighteenth century.

EXCLUSIONS: HIST 1004.06, HIST 1005.06, HIST 1002.03, HIST 1022.03

FORMATS: Lecture

HIST 1021 Europe: French Revolution to the Present

CREDIT HOURS: 3

This course will introduce students to the major themes and events in modern European history. The exact period and topics covered will vary from one year to the next, but typically this course will survey European political, social, and cultural developments from the era of the French Revolution through to the present.

EXCLUSIONS: HIST 1004.06, HIST 1005.06, HIST 1003.06, HIST 1023.03

FORMATS: Lecture

HIST 1022 Europe: Before the French Revolution (Writing Requirement)

CREDIT HOURS: 3

This course will introduce students to the major themes and events in early European history. The exact period and topics to be covered will vary from one year to the next, but will typically introduce students to the formation of European culture in the middle ages, the sixteenth-century Reformation, the beginnings of European colonization, and the intellectual and economic 'revolutions' of the eighteenth century. While the lectures for this course are shared with students in HIST 1020, students registered in HIST 1022 will have more instruction in writing and assignments that hone their writing skills, thus allowing this course to satisfy the Writing Requirement.

CALENDAR NOTES: Students must do BOTH HIST 1022.03 and HIST 1023.03 to satisfy the Writing Requirement.

EXCLUSIONS: HIST 1004.06, HIST 1005.06, HIST 1002.03, HIST 1020.03

FORMATS: Lecture | Tutorial

HIST 1023 Europe: French Revolution to the Present (Writing Requirement)

CREDIT HOURS: 3

This course will introduce students to the major themes and events in modern European history. The exact period and topics covered will vary from one year to the next, but typically this course will survey European political, social, and cultural developments from the era of the French Revolution through to the Present. While the lectures for this course are shared with students in HIST 1021, students registered in HIST 1023 will have more instruction in writing and assignments that hone their writing skills, thus allowing this course to satisfy the Writing Requirement.'

CALENDAR NOTES: Students must do BOTH HIST 1022.03 and HIST 1023.03 to satisfy the Writing Requirement.

EXCLUSIONS: HIST 1004.06, HIST 1005.06, HIST 1003.03, HIST 1021.03

FORMATS: Lecture

HIST 1501 Comparative Global History

CREDIT HOURS: 3

Global history — the study of change over long spans of time and large areas — allows us to examine questions not easily recognized in history conducted on smaller scales. Many aspects of the contemporary world can be understood in revealing ways when approached through a global lens. This course examines a selection of global historical themes each year to understand the broad stories and patterns of change which have shaped our world. Some years this course will trace such global narratives as the histories of capitalism, slavery, or colonialism to explore ways in which the world has become connected. Some years it will examine important themes in global history which our typical focus on the current West-dominated capitalist system obscure, such as the Chinese and Mongol empires or the Islamic world system.

EXCLUSIONS: HIST 1500.06; HIST 1503.03

FORMATS: Lecture

HIST 1502 Origins of Modern Global Society: Non-Writing Requirement

CREDIT HOURS: 3

The contemporary world is both intricately connected and intensely confusing. To make some sense of the global stage on which we now live, historians have recently redoubled their efforts to explore the development of these connections, especially since the eighteenth century. This course follows some of these explorations, attempting to understand the nature and impact of Europe's economic expansion, and how diverse cultures around the world experienced modern social and economic forces. Understanding the complex flows of such things as nationalist ideas, labour migrations, disease epidemics, and imperial control helps reveal the ties which bind us together.

EXCLUSIONS: HIST 1500.06; HIST 1504.03

FORMATS: Lecture | Tutorial

HIST 1503 Comparative Global History

CREDIT HOURS: 3

Global history — the study of change over long spans of time and large areas — allows us to examine questions not easily recognized in history conducted on smaller scales. The world order familiar to us — dominated by “the West” and organized by capitalist relations — contains elements both ancient and new. By comparing different cultural zones in historical periods before Europe's global dominance in the nineteenth century, this course will explore the diverse ways different cultures met the challenges of survival, and how patterns of connection and domination were made and unmade. Select themes — including trade, transportation, ecology, and state formation — will be used to highlight pre-modern patterns of connection across the globe.

EXCLUSIONS: HIST 1501.03

FORMATS: Lecture | Tutorial

HIST 1504 Origins of Modern Global Society: Writing Requirement

CREDIT HOURS: 3

This course is a parallel course to HIST 1502, a first-year introduction to the Origins of Modern Global Society and satisfies one half of the writing requirement component for all Dalhousie undergraduate students (students will need an additional half credit in another approved course to satisfy fully the writing requirement). The course introduces students to the major events and developments in modern global history and how they shaped twentieth century societies, especially in the non-Western world. The focus will be on colonial encounters and the subsequent developments.

EXCLUSIONS: HIST 1502.03

HIST 1510 The History of the Future: How Visions of the Future Have Shaped History Around the World

CREDIT HOURS: 6

Climate change, among other prospects, clouds our future. But visions of the future have bewitched, enchanted, and troubled human dreams for millennia. This class explores diverse moments of doubt, desire and dread across global history when oracles, artists, believers and popular leaders projected hopes and fears into near and distant futures. It explores how prophecies of the world's end reordered the world instead, how promises of impending perfection sometimes generated quite opposite results. This class asks how the future is used to shape the present.

CALENDAR NOTES: Meets Writing Requirement

FORMATS: Lecture

HIST 1910 First Year Seminar: Special Topics

CREDIT HOURS: 3

This course introduces first-year students to the principles and practices of historical research. The goal of the course is to engage students in historical debate, writing and group work at the university level, while helping them develop effective research and writing skills that will assist them throughout their university education. Topics vary; please see timetable for details.

RESTRICTIONS: Restricted to students who have completed 60 credit hours or less. Students can take up to 6.0 credit hours in the Life Stories Seminar classes.

FORMATS: Seminar

HIST 1911 First Year Seminar: Special Topics

CREDIT HOURS: 3

This course introduces first-year students to the principles and practices of historical research. The goal of the course is to engage students in historical debate, writing and group work at the university level, while helping them develop effective research and writing skills that will assist them throughout their university education. Topics vary; please see timetable for details.

RESTRICTIONS: Restricted to students who have completed 60 credit hours or less. Students can take up to 6.0 credit hours in the Life Stories Seminar Classes.

FORMATS: Seminar

HIST 1912 First Year Seminar: Special Topics

CREDIT HOURS: 3

This course introduces first-year students to the principles and practices of historical research. The goal of the course is to engage students in historical debate, writing and group work at the university level, while helping them develop effective research and writing skills that will assist them throughout their university education. Topics vary; please see timetable for details.

RESTRICTIONS: Restricted to students who have completed 60 credit hours or less. Students can take up to 6.0 credit hours in the Life Stories Seminar classes.

FORMATS: Seminar

HIST 1971 Engineering and Society: Historical and Philosophical Perspectives

CREDIT HOURS: 3

This course uses historical case studies to examine the connections between engineers, technology, and society. Topics will include the emergence of engineering as a profession; the societal impact of the Industrial Revolution; the rise of environmentalism and green technology; the relation of engineers to governments and militaries; and ethical responsibility for engineering disasters. In addition to developing written and oral communication skills, students will learn various ethical theories and apply them to key cases in engineering history.

CROSSLISTED: ASSC 1971

EXCLUSIONS: HSTC 1801.03

FORMATS: Lecture | Tutorial

HIST 2001 Early Medieval Europe

CREDIT HOURS: 3

An investigation of the period between the fourth and the twelfth centuries. Major themes of lectures and tutorials include the mingling and exchange of Roman traditions with the Barbarian cultures in the fifth and sixth centuries, the creation of the successor states of Europe following the disintegration of the Carolingian Empire, the development of monasticism, church-state relations, the rise of papal government, the twelfth-century Renaissance, peasant life and popular culture. Original sources in translation are used to familiarise students with the medieval world view.

FORMATS: Lecture | Tutorial

HIST 2002 Later Medieval Europe

CREDIT HOURS: 3

A study of the period beginning with the crusades, and ending with the emergence of the early modern European states. After a preliminary introduction to the nature of medieval society at the end of the twelfth century attention is turned to a variety of themes: political, social, cultural, economic and religious. Topics examined include church-state relations, heresy, peasant life and peasant rebellions, chivalry, political thought, varieties of medieval law, literature, and the concept of decline, or the "autumn" of the Middle Ages. Students make use of original sources in translation.

FORMATS: Lecture | Tutorial

HIST 2003 The Fall of the Roman Republic

CREDIT HOURS: 3

See course description for CLAS 2205.03 in the Classics section of this calendar.

HIST 2006 The Atlantic World, 1450-1650: European Colonization of the Americas

CREDIT HOURS: 3

The commercial and colonial expansion of Europe into the Americas. Topics of particular interest are the relations of Europeans and Indigenous peoples, the ecological consequences of colonization, the use of unfree labour, the role of technology, the establishment of settler colonies, the effect of overseas communication on European culture, and the role of colonial expansion in the development of the world economy.

CROSSLISTED: BAFD 2006

FORMATS: Lecture | Discussion

HIST 2007 The Atlantic World, 1650-1800: European Empires in the Americas

CREDIT HOURS: 3

The development of the European colonial societies after their initial settlement and the establishment of their staple economies in the sixteenth and seventeenth centuries. The topics of chief interest are the predominance of colonial trade in Europe's large-scale commerce, the role of the colonies in European conflicts, the renewal of exploration, the development of the colonies' internal economies, and their revolts against European rule.

CROSSLISTED: BAFD 2007

FORMATS: Lecture | Discussion

HIST 2012 Eighteenth-Century Europe: Politics, Society and Culture

CREDIT HOURS: 3

The course explores the major political, social, intellectual and artistic developments of eighteenth-century continental Europe. Topics of special interest will include: the emergence of the great powers; property, the underprivileged and reform; literacy and education; art and culture; religious observance and beliefs; the Enlightenment; and the crisis of the old order leading to the French Revolution.

PREREQUISITES: RECOMMENDED: HIST 1004X/Y.06, or HIST 1020.03 and HIST 1021.03

FORMATS: Lecture | Discussion

HIST 2014 First World War: How It Changed Our World

CREDIT HOURS: 3

This course examines the legacy of the First World War from a variety of national, regional, global and thematic perspectives. Topics for discussion will include the impact of the First World War on: the international system; colonial empires; Europe, the Middle East, Africa and Asia; and art, film and literature. Lectures will also explore how different nations experience the war through an examination of the 'home fronts', popular culture, memory, commemoration, and nation-building throughout the British Commonwealth and states such as Germany, Russia, Turkey, and the United States.

HIST 2015 European Military History 1550-1740

CREDIT HOURS: 3

The course deals with the presence of war in European societies, and how states and societies adapted and transformed under the impetus of the desire to achieve victory against an adversary. Among specific topics the course will deal with the transformation of tactics and technology on land and sea; the creation of modern tax systems; problems of supply and recruitment; ideologies of the military function; the creation of standing armies; the impact of hostilities on society.

FORMATS: Lecture | Tutorial

HIST 2016 The Classical Greek World: Athens, Sparta and a Century of Conflict

CREDIT HOURS: 3

See course description for CLAS 2215.03 in Classics section of this calendar.

HIST 2017 The Roman World from Constantine to Theodosius (AD 313-395)

CREDIT HOURS: 3

See course description for CLAS 2209.03 in the Classics section of this calendar.

HIST 2018 The Transformation of the Roman World (AD 395-565)

CREDIT HOURS: 3

See course description for CLAS 2211.03 in the Classics section of this calendar.

HIST 2021 Soviet Russia

CREDIT HOURS: 3

Survey of Soviet Russia from 1917 to the collapse of the Soviet Union in 1991. Topics discussed will include the Revolution of 1917, the Civil War and War Communism, the New Economic Policy, Collectivization, the Great Terror, World War II, the Post-Stalin Thaw, the Gorbachev reforms, and the Soviet collapse. Throughout the course, there is an emphasis on Soviet culture.

CROSSLISTED: RUSN 2023.03

EXCLUSIONS: RUSN 2021X/Y.06

FORMATS: Lecture | Tutorial

HIST 2022 Imperial Russia

CREDIT HOURS: 3

Chronologically covers the imperial period of Russian history, from Peter the Great to the Revolution of 1917.

CROSSLISTED: RUSN 2022.03

EXCLUSIONS: HIST 2020X/Y.06, RUSN 2021X/Y.06

FORMATS: Lecture | Discussion

HIST 2023 Roman Legions and the Barbarians

CREDIT HOURS: 3

See course description for CLAS 2233.03 in the Classics section of this calendar.

CROSSLISTED: CLAS 2233.03

FORMATS: Lecture

HIST 2032 Twentieth Century Germany

CREDIT HOURS: 3

Across two catastrophic world wars and a revolution, as empire, quasi-socialist republic, Cold War outpost, and the showplace for the end of Communism, Germany's history has embodied to an unparalleled extent the "age of extremes" in the twentieth century. The course explores the historical dimensions of these events and their resonance today.

FORMATS: Lecture

HIST 2041 France from the Revolution to the Great War

CREDIT HOURS: 3

The course examines the long nineteenth century in France and its interpretations. The themes include: the legacy of the French Revolution, social structure and divisions, religion, education, crime and punishment, gender issues, intellectual and artistic developments. No French required.

PREREQUISITES: RECOMMENDED: HIST 1004X/Y.06, or HIST 1020.03 and HIST 1021.03

EXCLUSIONS: HIST 2040X/Y.06

FORMATS: Lecture | Discussion

HIST 2042 Capital of Europe: Paris in the Nineteenth Century

CREDIT HOURS: 3

In the 19th century, Paris became the most liberal capital city in Europe, the centre of literary and artistic activity, the capital of fashion and style, and the site of a spectacular reconstruction of urban infrastructure. The course examines the key political, cultural, artistic and urban developments that contributed to this reputation.

PREREQUISITES: Recommended: HIST 1004.06, or HIST 1020.03 and HIST 1021.03

FORMATS: Lecture | Discussion

HIST 2049 The First World War: Causes and Campaigns

CREDIT HOURS: 3

This course will examine the origins and course of the First World War on a thematic basis, concentrating on the military, diplomatic, political and economic aspects of the conflict. Lecture topics will include: the origins of the war and the July crisis; grand strategies in peace and war; the Western Front and trench warfare; the Dardanelles and Gallipoli campaigns; the Eastern Front; economic mobilisation; the war at sea and in the air.

HIST 2055 War and Society since 1945

CREDIT HOURS: 3

This course examines the role of war, the development of military forces, and the changes in the international balance of power since 1945. Topics of discussion will include the Cold War; decolonization; "superpowers", military alliances, and the "Third World"; nuclear weapons and deterrence theory; terrorism, guerrilla warfare, and counter-insurgency; developments in conventional forces; war in Algeria, Indo-China, Korea and the Middle East.

FORMATS: Lecture

HIST 2061 Civilization of Baroque Italy

CREDIT HOURS: 3

This course studies Italy at the time of its greatest influence on Western civilization. The course examines Italy's politics, its vibrant urban and rural societies, the place of Catholicism in its cultural and intellectual life, and the innovative early modern economy, all before the great crisis of the 1620s. Open to first-year students.

CROSSLISTED: ITAL 2061.03

EXCLUSIONS: HIST 2066.03/HIST 2067.03

FORMATS: Lecture | Tutorial

HIST 2064 Economic History of the Early Modern West 1500-1800

CREDIT HOURS: 3

The course provides an overview of Europe's growing economic power - agriculture, manufacturing, commerce, consumption and fiscality - in the centuries between the first overseas exploration and the onset of the Industrial Revolution. Along with the lectures, students will be introduced to a variety of period sources, transcribed and translated. *Though cross-listed with Economics, this course cannot be used to meet the Life or Physical Science degree requirement.

CROSSLISTED: ECON 2064.03

HIST 2065 Evolving Spain: History, Culture, Society

CREDIT HOURS: 3

Please see the description for SPAN 2100 in the Spanish and Latin American Studies section of the Calendar

HIST 2075 Introduction to the History of Science I: from the Ancients to the Birth of the Modern

CREDIT HOURS: 3

See course description for HSTC 1201.03 in the History of Science and Technology section of this calendar.

CALENDAR NOTES: HIST 2075 and HIST 2076 must normally be taken in the same academic year.

CROSSLISTED: HSTC 1201.03, HSTC 2211.03, SCIE 2001.03

EXCLUSIONS: HSTC 1200.06, HSTC 2200.06, HIST 2074.06, SCIE 2000.06

FORMATS: Lecture | Tutorial

HIST 2076 Introduction to the History of Science II: From The Birth of the Modern to the Present

CREDIT HOURS: 3

See course description for HSTC 1202.03 in the History of Science and Technology section of this calendar.

CALENDAR NOTES: HIST 2075.03 and HIST 2076.03 must normally be taken in the same academic year.

PREREQUISITES: HIST 2075.03 or permission of the instructor

CROSSLISTED: HSTC 1202.03, HSTC 2212.03, SCIE 2002.03

EXCLUSIONS: HSTC 1200.06, HSTC 2200.06, HIST 2074.06, SCIE 2000.06

FORMATS: Lecture | Tutorial

HIST 2082 Twentieth-Century Europe in Literature, Art and Film

CREDIT HOURS: 3

A survey of contemporary European history that employs representative works of literature, arts, architecture and film as well as traditional published records and monographic accounts to introduce students to major events of the twentieth century: the two world wars, the Russian Revolution, the political systems of Italian Fascism, German Nazism and Soviet Communism, the Holocaust and others. RECOMMENDED: HIST 1001.03 or 1002.03 or 1003.03 or 1004.06

RESTRICTIONS: Restricted to students in their second year or higher

EXCLUSIONS: HIST 2081X/Y.06

FORMATS: Lecture | Discussion

HIST 2088 The Roots of Greek Civilization: From Crete and Troy to the Rise of Athens

CREDIT HOURS: 3

See course description for CLAS 2214.03 in the Classics section of this calendar.

HIST 2089 Alexander the Great and the Hellenistic Kings: Transforming the Ancient East and West

CREDIT HOURS: 3

See course description for CLAS 2216.03 in the Classics section of this calendar.

CROSSLISTED: CLAS2216

HIST 2090 The Rise of Rome: Consuls, Classes, and World Conquest

CREDIT HOURS: 3

See course description for CLAS 2231.03 in the Classics section of this calendar.

HIST 2091 The Fall of Rome: Caesars, Saints, and Warlords

CREDIT HOURS: 3

See course description for CLAS 2232.03 in the Classics section of this calendar.

HIST 2092 Death, Sex, and Gold in the Ancient Roman World

CREDIT HOURS: 3

See the description for CLAS 2234.03 in the Classics section of the calendar.

HIST 2106 Tudor and Stuart England, 1485-1688

CREDIT HOURS: 3

A survey of the major events, personalities, and developments in sixteenth and seventeenth century English history. Topics to be covered include the religious reformation, the achievements of the Elizabethan age, colonial expansion, the civil war, and the “Glorious Revolution.”

EXCLUSIONS: 2104.03, 2105.03

FORMATS: Lecture

HIST 2111 Modern Britain to 1884

CREDIT HOURS: 3

A survey of the development of British society from the reign of George III to the late Victorian era. This course will examine the emergence of class society, movements of popular protests, political reform, the growth of empire, and cultural change.

FORMATS: Lecture | Tutorial

HIST 2112 Modern Britain from 1880 to 1980

CREDIT HOURS: 3

This course will examine the development of British society from 1884 to the present day, touching upon the experience of Britain in two world wars, the growth of the welfare state, the decline of Britain's empire and economy, the upheavals of the 1960's and 1970's and the emergence of Thatcher.

RECOMMENDED: HIST 2111.03

FORMATS: Lecture | Tutorial

HIST 2135 The Rule of Law? Topics in British Legal History (Pre-1900)

CREDIT HOURS: 3

The British long claimed to have developed a uniquely potent conception of the ‘rule of law’, inseparable from ‘the liberties of the subject’, which they then bestowed (often by force) upon the peoples in their empire. This course offers students an introduction to key concepts and developments in English, then British, legal history up to c. 1900, with a focus on the apparent paradoxes of the rule of law. How did law serve to justify violence and dispossession? How, conversely, did people use law to define and fight injustices? Topics may vary from year to year but can include such subjects as the role of jury trial; Magna Carta and its myths; torture and penology; imperial violence; enslavement, abolition, and emancipation; and campaigns for women's rights that secured changing to laws on divorce, property ownership, and the franchise.

FORMATS: Lecture

HIST 2205 Historical Issues in Indigenous Studies

CREDIT HOURS: 3

This course is an interdisciplinary introduction to the history of encounters and relationships between Indigenous peoples and European settlers in Canada. Topics may include treaties, colonial policy, residential schools, child welfare, resettlement, and the Indian Act. This course provides the necessary background to understand contemporary Indigenous issues.

CROSSLISTED: CANA 2050.03; INDG 2050.03

EXCLUSIONS: TYPR 1750.03; TYPR 1751.03

FORMATS: Lecture | Discussion

HIST 2207 Indigenous Peoples and Empires: Canada's Origins to 1763

CREDIT HOURS: 3

This course explores Canada's origins to 1763. It covers the history of Indigenous Peoples before and after the arrival of Europeans. It addresses themes such as the role of the physical environment; the fur, fish, and timber trades; and the imperial struggle for dominance in North America. While the lectures will narrate the major developments in the seventeenth and eighteenth centuries, the tutorials will focus on specific issues, such as the role of treaties in Canadian history. The course climaxes with the Conquest of Quebec and the end of the Seven Years War.

CROSSLISTED: CANA 2207.03

FORMATS: Lecture | Tutorial

HIST 2208 Patriots, Rebels, Refugees: Canada's Roots in the Age of Revolution, 1763 to 1860

CREDIT HOURS: 3

As empires continued their international contest and Britain fought to maintain colonies within North America, old and new inhabitants of what would become Canada also wrestled with questions concerning who would exercise power within their communities and governing bodies. In the process they gave new and, at times, conflicting answers to old questions: What did it mean to be a patriot? Who and what were they willing to defend? Who and what were they prepared to resist? Immigrants, exiles and the refugees of European and North American wars shaped new homelands, even as the First Nations peoples became refugees within their own lands. In this course we explore the related questions of loyalty and conscience through the diaries and letters of men and women defining their place in a new order.

CROSSLISTED: CANA 2208.03

FORMATS: Lecture | Tutorial

HIST 2209 Making a Nation: Canada, 1860-1929

CREDIT HOURS: 3

This is the story of how British North America was transformed into a distinct nation-state for the twentieth century. We'll see how a young Canada grappled with geographical, political, and social challenges: acquiring enormous territories amid growing provincial differences; maintaining loyalties to Empire while developing a New World identity; reconciling new and diverse cultural communities; and mobilizing for war.

CROSSLISTED: CANA 2209.03

HIST 2210 Many Canadas: Canada, 1930 to the present

CREDIT HOURS: 3

This course explores the remaking of Canada, including the shift from imperial to continental and nationalist politics, the rise and transformation of third-party political movements, and the emergence of new ideas about the rights and responsibilities of the liberal individual subject.

CROSSLISTED: CANA 2210.03

FORMATS: Lecture | Tutorial

HIST 2211 Social History of Canada before 1870

CREDIT HOURS: 3

This course examines the social history of pre-Confederation Canada through such topics as social control, violence and protest, women and domestic life, regionalism and marginal peoples, and the transformation of the economy.

CROSSLISTED: CANA 2211.03

EXCLUSIONS: HIST 2210.03

HIST 2212 Social History of Canada since 1870

CREDIT HOURS: 3

This course examines the social history of Canada since Confederation through such topics as the impact of industrialization, social classes, conflict, the role of women, the state and social development, and relationships among the wide variety of social groups in Canada.

CROSSLISTED: CANA 2212.03

EXCLUSIONS: HIST 2210.03

FORMATS: Lecture | Tutorial

HIST 2215 A History of Health and the Body

CREDIT HOURS: 3

Although we experience our bodies as natural and personal, they are also historical. Conceptions of bodily matters such as health or fitness, disability or desirability, depend on technologies, medical science, demographics, and many other forces that partly transcend nature or individual choice and that change over time. In this class, we will explore variety and change in bodily norms and in the conditions under which bodies have suffered and thrived over the past 200 years. Topics include physical training, clothing, addiction, physical disability, food practices, and health advice.

FORMATS: Lecture

HIST 2221 Rough Justice - Order, Disorder and Canadian Popular Culture to the 1890s

CREDIT HOURS: 3

This course investigates the character of popular culture, investigating forms of community control and ideas of order among different classes and cultures, beginning with aboriginal societies at the time of contact, through the revolutionary era, to the Victorian period and the first decades of Canada's nationhood. The sexual tensions of frontier towns, drunken revelry and riot, the smallpox, religious and revolutionary passions, and other sources of disorder (and the evolution of the means of making order) feature in this exploration of Canadian history's most dramatic passages.

EXCLUSIONS: HIST 3241.03, 3242.03, 3280.03, 3281.03

FORMATS: Lecture | Tutorial

HIST 2222 Rough Justice - Order, Disorder and Canadian Popular Culture, 1890s to the Present

CREDIT HOURS: 3

This course continues the themes explored in History 2221, setting out the context within which legislation related to popular culture and leisure pastimes evolved from the 1890s into the present. Included are the regulation of alcohol, drug and tobacco consumption, sexual mores, pulp fiction and comics, sporting cultures, gambling, organized crime, and the use and abuse of animals in our redefinition of appropriate forms of recreation. **Approved with Canadian Studies.**

EXCLUSIONS: HIST 3241.03, 3242.03, 3280.03, 3281.03

FORMATS: Lecture | Tutorial

HIST 2231 The Making of Modern Canada: Canadian Political History, 1896 to the Present

CREDIT HOURS: 3

This course surveys the major political developments in Canadian history since 1896. Topics to be examined include: regionalism and the emergence of third-party movements; French-English relations; federal-provincial relations; and the transformation of the liberal state in the post-1945 era.

CROSSLISTED: CANA 2231.03

EXCLUSIONS: HIST 2230X/Y.06

FORMATS: Lecture | Discussion

HIST 2235 History of Canadian Culture

CREDIT HOURS: 3

This course explores the history of Canadian culture since the mid-nineteenth century, including art, architecture, music, literature, sport, and mass media. Themes include creating a "national" culture amid regional differences, and the relationship between popular culture (heavily influenced by the United States) and "high" culture cultivated by the state.

CROSSLISTED: CANA 2235.03

FORMATS: Lecture | Discussion

HIST 2240 French Canada

CREDIT HOURS: 3

This course introduces the history of Acadiens, Canadiens, Canadiens-français, and Québécois. It begins by describing the encounters of Mi'kmaq and other Indigenous peoples with Basque, Breton and Norman cod fishers in the northeastern North American during the early 16th century. It concludes by discussing contemporary neoliberal society in 21st-century Quebec. Along the way, the course examines how conflict, economy, gender, race, empire, nation, language, and religion shaped changing social relations, political power, and identities over time. Lectures and readings will explore key themes of the history of French-speaking peoples in what is now Canada.

FORMATS: Lecture

HIST 2261 True Believers 1914 to Present - The Left and the Right in Canadian Politics

CREDIT HOURS: 3

The course will study the ideas and practices of Canadian political movements of the Left and the Right. We will attempt to understand why such movements

have arisen and declined, and what significance they have had for Canadian politics and society. Topics will include: the Progressive movement; the CCF and NDP; Communism and Fascism; Social Credit; the radical right and the New Left; the Reform Party.

FORMATS: Lecture | Tutorial

HIST 2271 Atlantic Canada to Confederation: The Northeast in the Age of Empire, 1450-1867

CREDIT HOURS: 3

A survey of the history of Atlantic Canada (the Maritimes and Newfoundland) from the origins of human habitation to the early 1860s. Emphasis is placed on the pattern of change and conflict which, over time, forged a series of “limited identities” that gradually became elements of an emerging regional personality.

CROSSLISTED: CANA 2271.03

EXCLUSIONS: HIST 2270X/Y.06

FORMATS: Lecture | Discussion

HIST 2272 Atlantic Canada since Confederation: Regionalism, Identity, and Development, 1867-2000

CREDIT HOURS: 3

A survey of the history of Atlantic Canada (the Maritimes and Newfoundland) from the 1860s to the present. Emphasis is placed on how episodes such as the “age of sail”, industrialization, class and gender conflict, war, the struggle for human rights and a chronic effort to play “catch-up” with the rest of the nation have defined this region’s identity.

CROSSLISTED: CANA 2272.03

EXCLUSIONS: HIST 2270X/Y.06

FORMATS: Lecture | Discussion

HIST 2280 African Nova Scotian History

CREDIT HOURS: 3

Do African Nova Scotians constitute a distinct people? This course provides an historical survey of the Black population in Nova Scotia, from its origins through to the present. Treating the people of African descent in Nova Scotia as a particular aspect of the broader African diaspora, we will examine the African Nova Scotian experience in both local and global contexts. The central tenet of the course is that the history of the Black population is an integral component of the region’s history: neither can be understood in isolation from the other. A recurring theme is the active and conscious historical agency of African Nova Scotians in the struggle to assert their democratic rights and achieve self-determination.

CROSSLISTED: CANA 2280.03, BAFD 2280

EXCLUSIONS: TYPR 1650.03; TYPR 1651.03

FORMATS: Lecture | Discussion

HIST 2325 The Rise and Fall of the Slave-Holding Republic

CREDIT HOURS: 3

This course studies the political history of American slavery, from the formation of the United States to the American Civil War. Lectures cover the growth of American slavery, antislavery politics and abolitionism, the sectional crisis of 1850s, and the complex relationship between slavery and American democracy.

FORMATS: Lecture

HIST 2331 Creation of an American Republic: The United States, to 1865

CREDIT HOURS: 3

This course studies the first example of a major theme of modern history: how colonial societies become nations. When British colonization of the Americas began at the turn of the seventeenth century, no one involved in the process intended or expected the result to include an independent republic on the other side of the Atlantic. Yet during the following two centuries of colonial history many of the crucial and distinctive features of what became the United States took shape: aggressive displacement of Indigenous peoples, thoroughgoing privatization of economic resources, racial slavery, ethnic diversity, popular sovereignty, and religious pluralism. The revolution of 1776-1783 institutionalized these features in the new United States of America. But migration and growth, new technologies, ongoing conflict with First Nations and European states, western expansion and a new middle class culture of commerce, industry and reform and a rapid growth in racial slavery increasingly strained the Union. By the mid-nineteenth century the United States faced the fate of so many post-colonial nations: irreconcilable sectional divisions. Fierce debates over slavery erupted in 1861 in a bloody civil war.

EXCLUSIONS: HIST 2330X/Y.06

FORMATS: Lecture

HIST 2332 The American Republic from 1865

CREDIT HOURS: 3

A survey of major political, economic and social developments in the history of the United States from the civil war to the present.

FORMATS: Lecture

HIST 2335 Modern American Culture

CREDIT HOURS: 3

American culture is so ubiquitous today that it seems almost timeless. But it has a long and tumultuous history, one that both reflects and challenges the modern history of the United States. Ranging from high culture to mass culture, this course focuses on how major changes in American history have affected American literature, American cinema, and the everyday lives of American people. Documentary and feature films supplement the lectures.

FORMATS: Lecture

HIST 2336 The American Century: American Foreign Relations in the Twentieth Century

CREDIT HOURS: 3

More than six decades ago Henry Luce the editor of Time Magazine argued that the 20th Century was “the American Century,” and he urged the American people to shoulder the burdens that such a destiny required. This course is designed to assess the record of US foreign policy over the last one hundred years. Its goal is to address the question of whether the Americans were successful in meeting Luce’s challenge. In order to get at this question this course examines American foreign policy from the turn of the century to the Gulf War. We will discuss US imperialism and the birth of the American empire in South America, World War One, World War Two, the Cold War, the Korean War, the Cuban Missile Crisis, the Vietnam War, Détente, and the end of the American-Soviet rivalry.

FORMATS: Lecture

HIST 2381 Latin America

CREDIT HOURS: 3

This survey course offers an introduction to Latin America's history, peoples, and politics from pre-colonial times to the present day. The course builds a foundational understanding of Latin America and its past, focusing on a broad range of Latin American countries. We will pay particular attention to issues of race, class, faith, and gender.

EXCLUSIONS: HIST 2386.03, HIST 2387.03

FORMATS: Lecture

HIST 2382 Mexico and Central America to 1979: From Conquest to Revolution

CREDIT HOURS: 3

HIST 2425 Africa Disclosed: The Patterns of Africa's Early History

CREDIT HOURS: 3

Myth, ignorance and prejudice cloud understanding of Africa's past. This class explores how historians have worked to disclose the patterns of the past in Africa, linking them to global history while also finding unique stories. Africa's past will be explored in terms of connections within the continent, in relation to old world dynamics before 1500 CE, and in the context of the rise of the Atlantic world after 1500 CE.

CROSSLISTED: BAFD 2425

EXCLUSIONS: HIST 2410.03 and 2421.03

FORMATS: Lecture | Tutorial

HIST 2426 Africa: Disruption and Innovation

CREDIT HOURS: 3

Africa experienced much disruption through the 20th century, from colonial exploitation to Cold War meddling. Development has often been double-edged, advancing foreign interests while opening opportunities for Africans. This class examines how African men and women have constructed their lives against and despite these dislocations, acting in various capacities as soldiers, politicians, workers, and activists. It seeks the roots of both Africans' current troubles and their accomplishments.

CROSSLISTED: BAFD 2426

EXCLUSIONS: HIST 2422.03

FORMATS: Lecture | Tutorial

HIST 2502 The Ottoman Empire and Its Legacy in the Middle East, 1299-1923

CREDIT HOURS: 3

This course covers the history of one of the greatest world empires, the Ottoman Empire, from its foundation in the late 13th century until its dissolution in 1923. The course examines its political, social and cultural institutions, its different religious and ethnic communities and the relationship between Islam and the State. It pays particular attention to the Empire's relations with European powers, to Ottoman reforms, pan-Islamism, the rise of nationalism, and Zionism. The course ends with World War One and the dissolution of the Ottoman Empire. The main focus of this course will be on the region known today as the Middle East.

FORMATS: Lecture | Discussion

HIST 2503 Medieval Islamic Civilization

CREDIT HOURS: 3

This course will introduce students to the Perso- Levantine world at the time of Muhammad's prophecy in the 7th century, and how the Arabian Peninsula was impacted by the creation and emergence of an Islamic society in Medina and Mecca. With the displacing of Byzantine control in the Holy Land and the collapse of the Sasanian Empire in Persia, the Arab-centric society of Mecca and Medina had become an empire of unprecedented size and ethnic complexity. The course will examine the respective Umayyad and Abbasid dynasties, as well as the slave states of the Saljuqs and Mamluks. The final portion of the course will focus on the gunpowder empires of the Ottomans, Safavids, and Mughals. The central theme of this course will be an examination of the Islamic community, or umma, from its earliest days and how it interacted over the next thousand years with different surrounding traditions and cultures in the Mediterranean, the Iranian Plateau, the Caucasus, the Steppe, India, and Southeast Asia. Another important theme will be the study of how various Islamic societies understood and resolved the age-old dynamic between tribal nomadism and hierarchical urbanism.

CROSSLISTED: RELS 2503.03

EXCLUSIONS: HIST 2501.03

FORMATS: Lecture

HIST 2504 A History of the Modern Middle East

CREDIT HOURS: 3

This course focuses on the history of the Middle East from World War One until the creation of the Islamic State in Iraq and Syria in 2014. It pays particular attention to the Mandate period and the subsequent creation of the state of Israel in 1948, the emergence of Arab nationalism, the Algerian revolution, the Baath rule in Syria and Iraq, the Arab-Israeli wars, the rise of political Islam, and the Arab uprisings between 2011 and 2013.

FORMATS: Lecture | Discussion

HIST 2505 Turbans and Berets: A Modern History of Iraq

CREDIT HOURS: 3

This course is a survey of the history of Iraq from late Ottoman history until the present. It discusses monarchial rule, the rise of the Baath, the regime of Saddam Hussein, the Gulf Wars and the American invasion of Iraq and its aftermath. It pays particular attention to the role of the different ethnic and religious groups in Iraqi politics and cultural life.

FORMATS: Lecture | Discussion

HIST 2509 Hindu, Muslim, Sikh: Identity, Culture and State in Pre-Colonial South Asia

CREDIT HOURS: 3

See the description for RELS 2509.03 in the Religious Studies section of this calendar.

CROSSLISTED: RELS 2509.03

FORMATS: Lecture

HIST 2510 Hindu, Muslim, Sikh: Colonial Trauma and Nationalism in Modern South Asia

CREDIT HOURS: 3

This course will examine the region of South Asia from the mid-19th century - the height of the British Raj - to the present. Areas of concentration will include resistance to British rule, rise of the Congress Party, the 1947 Partition, and subsequent decolonization. The respective histories of modern India, Pakistan, and Bangladesh will be examined against the backdrop of nationalism, communalism, and regional conflict.

CROSSLISTED: RELS 2510.03

FORMATS: Lecture

HIST 2520 Ancient Israel

CREDIT HOURS: 3

See course description for CLAS 2220.03 in the Classics section of this calendar.

HIST 2614 Making Gender: Sex and Gender in Pre-Modern Europe

CREDIT HOURS: 3

This course examines the diverse and fascinating ways western cultures have shaped what it meant to be a woman or a man. Beginning in the time of the Roman Empire and continuing to the age of the French Revolution, the course examines such topics as eunuchs, fasting saints, female 'popes', changing notions of the physical differences between the sexes, and early struggles for women's rights.

CROSSLISTED: GWST 2300.03

FORMATS: Lecture | Tutorial

HIST 2615 Making Gender - Sex and Gender from the American Revolution to the Present

CREDIT HOURS: 3

This course examines the diverse and fascinating ways that gender has shaped American history from the colonial period to the present. The history of women informs us about the once little-known history of femininity. And, as a result, historical changes in definitions of masculinity become visible. The meanings of gender across the U.S. history are explored in this course through topics such as: the doctrine of separate spheres, the family wage, queer sexualities and gender variance, imperialism, citizenship, and fertility.

CROSSLISTED: GWST 2301.03

FORMATS: Lecture

HIST 2700 Introduction to Historical Methods

CREDIT HOURS: 3

This course is intended to help students think broadly about what history is, what historians do, and how they do it. Topics for discussion will include the evolution of history as a discipline from ancient times to the present; theories of history, past and present; working with primary and secondary sources; historical research, writing, and critical analysis; contemporary historiography, methodology, and schools of historical thought. Students will also develop the skills central to the historian's craft through practical exercises such as developing research strategies, preparing a bibliography, analysing primary documents

and other historical sources, and crafting a viable research project.
CALENDAR NOTES: Required of all History majors (including double majors).
FORMATS: Lecture | Discussion

HIST 2711 Struggles that Shaped the Modern World: 1600-1900

CREDIT HOURS: 3

European expansion from the 16th century reshaped the global economy, obliging many established societies to confront new challenges. Throughout Asia, the New World and Africa, old conflicts between and within states now had to confront the additional challenge of increasingly powerful European intruders. These encounters, and how historians have understood their struggles, shaped the modern world as diverse groups struggled to pursue their interests through resistance, accommodation, coercion, cooperation and alliance. This course will explore the ways in which select societies navigated these encounters to better understand the intricate patterns of linkage and division that mark our world in modern times.

FORMATS: Lecture

HIST 2714 Slavery and Slaving in Global History

CREDIT HOURS: 3

Slavery was a powerful and widespread part of human history long before it became embedded in the Atlantic world. People continue to be enslaved today. This course will look at slavery from ancient to contemporary times in diverse parts of the world to better understand what slavery is, why it is so common, why it takes different forms, and how it has been resisted. Many historians approach this study by dividing societies into those dependent on slave labour, and those merely holding slaves. Other historians are more interested in the situations and processes which give rise to slaving systems, how power is negotiated within them, and how both slaves and masters have shaped diverse slaving orders. This class combines both approaches, looking first at the sophisticated understandings of slavery historians have developed for the ancient Mediterranean, then exploring more recent scholarship about the varieties of slavery in Asia and Africa. The last part of the class will look at slavery in the Atlantic world and contemporary times considering what we have learned about slavery and the fights against it elsewhere

CROSSLISTED: BAFD 2714

FORMATS: Lecture

HIST 2715 Locked Up: A Global History of Incarceration

CREDIT HOURS: 3

The class will provide a broad historical overview of incarceration as it has been practiced and experienced internationally. We will consider the development of various forms of incarceration as the dominant form of punishment in the modern world. Prison systems have their roots in Europe, but the systematic practice of incarceration was exported to all corners of the globe as a key imperial and colonial construct. In our exploration of carceral practices and institutions across a range of settings and time periods, we will examine the birth of the modern prison; various theories and philosophies that have informed penal practices; penal transportation; colonial models of imprisonment; various reform movements; intersections between race, class and incarceration; political imprisonment; prison cultures; prisons as business; different national approaches to incarceration; and alternatives to mass imprisonment.

FORMATS: Lecture

HIST 2750 The Pirate and Piracy

CREDIT HOURS: 3

See course description for EMSP 2480.03 in the Early Modern Studies section of this calendar.

CROSSLISTED: EMSP 2480.03

CROSSLISTED: CHIN 2020.03

FORMATS: Lecture | Discussion

HIST 2900 Ways of Seeing: An Introduction to Art History & Visual Culture

CREDIT HOURS: 3

Why have all human beings, at all times and in all places, made art? In order to understand the role of visual culture, this course will explore broad themes in global art production, such as sex, death, religion, race, knowledge, power and entertainment. Students will be encouraged to consider cross-cultural perspectives and trans-historical connections in their study of visual culture. They will be introduced to different 'ways of seeing' including an introduction to Indigenous visual culture through a regional study of North America and the fundamentals of traditional art history with a chronology of western stylistic movements. Students will develop the skills to describe, analyze and think critically about the visually saturated world in which they live.

CROSSLISTED: GWST 2900.03

FORMATS: Lecture

HIST 2920 Environmental History: People and their Environments

CREDIT HOURS: 3

Environmental history focuses on the relationship between people and their environments over time. This course surveys global environmental history, exploring key themes and transformations that shaped – and sometimes continue to shape – modern societies. Stretching from human evolution to late capitalism, core topics include transitions in energy, climate, settlement, agriculture, technology, disease, empire, social relations, and cultural knowledge about the environment. You will gain an understanding of environmental history as a broad field offering insights on the interdependence of nature and society.

FORMATS: Lecture

HIST 2950 Introduction to Heritage Studies and Public Humanities

CREDIT HOURS: 3

What gets to count as ‘history’? What gets preserved and remembered, and how? This course introduces students to the theory and practices of heritage studies and ‘public humanities’, examining the role of cultural institutions such as libraries, museums, universities, and the media in informing and shaping public discourse about the past. Students will examine how historical, cultural, and traditional knowledge is communicated to various publics and analyze its current and potential use in today’s social context. An applied project will complete the course.

FORMATS: Lecture

HIST 2985 Totalitarianism and Science

CREDIT HOURS: 3

See course description for HSTC 2205.03 in the History of Science and Technology section of this calendar.

CROSSLISTED: HSTC 2205.03

FORMATS: Lecture | Tutorial

HIST 3000 Topics in Early Modern European History

CREDIT HOURS: 3

Topics to be studied and researched will vary from year to year. In some years, the geographical focus may be Britain, while in others it will be western Europe more generally. Topics may include the religious reformations; print culture; political protest; and popular culture.

PREREQUISITES: A course in European or British History

FORMATS: Lecture

HIST 3001 Mediaeval Civilization

CREDIT HOURS: 3

HIST 3002 The Medieval Church

CREDIT HOURS: 3

This course ranges far and wide over the history of the church in medieval Europe, adopting a thematic rather than a strictly chronological approach. Subjects of study include monasticism, heresy, education and the universities, town and cathedral, lay-clerical conflict, and “popular” concepts of religion. Each year several topics are examined in detail, with the help of original documents in translation, and using recent periodical literature and/or monographs. Students prepare two versions of a well-researched paper, and class discussions are used to explore related materials and readings in greater depth. Some prior knowledge of medieval European history is essential.

PREREQUISITES: HIST 2001.03 or HIST 2002.03, or permission of the instructor.

CROSSLISTED: RELS 3008.03

EXCLUSIONS: HIST 3021.03 and 3022.03

FORMATS: Lecture | Discussion

HIST 3006 Renaissance and Reformation Europe, 1450-1650

CREDIT HOURS: 3

A survey of the major themes, subjects, and personalities in western European history from the Italian Renaissance through to the Protestant Reformation, with a focus on the latter. Topics to be covered include the rise of Italian humanism, religious thought and practice, the various reform movements of the era, the rise of religious conflict, and the nascent stirrings of toleration. Although most areas of western Europe will be dealt with, the focus will be on Italy, France, and Germany.

PREREQUISITES: Any first- or second-year European history course

CROSSLISTED: RELS 3260

EXCLUSIONS: HIST 2005.03, 2019.03

FORMATS: Lecture | Discussion

HIST 3007 The European Enlightenment

CREDIT HOURS: 3

This course examines eighteenth-century European Enlightenment and the continuing controversies over its interpretations and its legacies. Class discussions focus on Enlightenment debates on religion, gender, science, non-European people, society and government, and the possible impact of the Enlightenment on the French Revolution.

PREREQUISITES: HIST 1004X/Y.06, or HIST 1020.03 and HIST 1021.03

EXCLUSIONS: HIST 3012.03, HIST 5007.03

FORMATS: Seminar

HIST 3008 Florence and Tuscany Under the Medici, 1530-1737

CREDIT HOURS: 3

This course examines the history of Tuscany and Florence between 1530 and 1737.

FORMATS: Lecture

HIST 3016 Meetings between Hellenism and the East to Philo the Jew

CREDIT HOURS: 3

See course description for CLAS 3016.03 in the classics section of this Calendar.

CROSSLISTED: CLAS 3016.03, RELS 3018.03

HIST 3017 Meetings between Hellenism, Judaism, Christianity and Islam until the Renaissance

CREDIT HOURS: 3

See course description for CLAS 3017.03 in the classics section of this Calendar.

CROSSLISTED: CLAS 3017.03, RELS 3019.03

HIST 3020 Fall of the Roman Republic

CREDIT HOURS: 3

See course description for CLAS 3205.03 in the Classics section of this calendar.

HIST 3030 Russian Intellectual History

CREDIT HOURS: 3

This course will examine intellectual developments in modern Russia, from Peter the Great to the late 20th century. Among the possible topics we will cover are: Russian thought and the West, the Russian intelligentsia and its relationship with the people and the state, Russian Orientalism, the roles of literature, arts, and media in Russian politics and society, the nature of dissent and revolutionary movements, as well as the functions of historical memory in Russian thought and culture. Throughout the course we will approach Russia as a multinational country that developed in constant and close interaction with the outside world.

PREREQUISITES: Some Russian history required; Recommended are HIST 2021.03 or HIST 2022.03.

CROSSLISTED: RUSN 3091.03

FORMATS: Lecture | Discussion

HIST 3037 The Age of Kings: Apex of Royalty 1660-1715

CREDIT HOURS: 3

This course examines the growing attraction of strong monarchy in Europe after the turbulent era of the Thirty Years War. Louis XIV played a preponderant role in this trend, but the course will also examine the royal regimes in the Spanish European empire (Spain, Italy, Low Countries), the Habsburg lands of Central Europe, the last Stuart kings in Britain, the House of Orange in the Dutch Republic, and the rise of ambitious princes in Savoy, Brandenburg and Saxony-Poland.

PREREQUISITES: one early modern course

FORMATS: Lecture | Seminar

HIST 3043 Napoleon Bonaparte

CREDIT HOURS: 3

The course examines Napoleonic historiography and focuses on selected representations of Napoleon that originated both during his life and after his death, and gained ascendancy at different points in time. The themes draw from a large repository of images and associations, and include: Napoleon as conqueror, as proto-fascist dictator, as the Little Corporal of the people, as heir of the French Revolution, as state builder, and as European visionary and unifier. The course offers an opportunity to develop analytical and critical skills, by discussing historiographical issues, such as the dynamic nature of historical representations the impact of circumstances in shaping historical representations, and the role of methods employed to examine the past in creating these representations.

PREREQUISITES: HIST 1004X/Y recommended

FORMATS: Lecture | Discussion

HIST 3045 The French Revolution and Its Interpretations

CREDIT HOURS: 3

The seminar examines the French Revolution, its origins and its interpretations, as well as the legacy of the French Revolution for modern political culture.

Each time the seminar is offered it may focus on a specific theme related to the French Revolution.

PREREQUISITES: HIST 1004X/Y.06, or HIST 1020.03 and HIST 1021.03 recommended

CROSSLISTED: HIST 4045.03

EXCLUSIONS: HIST 5045.03

FORMATS: Seminar

HIST 3046 Culture and Behaviour in France, 1550-1750 I

CREDIT HOURS: 3

This course, exploring the characteristics and complexities of elite and popular culture in Early Modern France, focuses primarily on the techniques of historical research. Heavy emphasis is placed on archival sources (translated and transcribed) relating to diverse facets of social, cultural and religious history, and on historical logic. The course also welcomes students from other branches of behaviour studies. No French required.

CALENDAR NOTES: This course is the first part of the former full-year course HIST 3040X/Y.06. This course description reflects the entirety of the pair (HIST 3046.03 and HIST 3047.03).

PREREQUISITES: FYP or some background in early modern or medieval history

EXCLUSIONS: HIST 3040X/Y.06

FORMATS: Lecture | Discussion

HIST 3047 Culture and Behaviour in France, 1550-1750 II

CREDIT HOURS: 3

This course, exploring the characteristics and complexities of elite and popular culture in Early Modern France, focuses primarily on the techniques of historical research. Heavy emphasis is placed on archival sources (translated and transcribed) relating to diverse facets of social, cultural and religious history, and on historical logic. The course also welcomes students from other branches of behaviour studies. No French required.

CALENDAR NOTES: This course is the second part of the former full-year course HIST 3040X/Y.06. This course description reflects the entirety of the pair (HIST 3046.03 and HIST 3047.03).

PREREQUISITES: HIST 3046.03

EXCLUSIONS: HIST 3040X/Y.06

FORMATS: Lecture | Discussion

HIST 3050 Europe and World War Two

CREDIT HOURS: 3

Selected topics on the origins, conflict and aftermath of the Second World War as this involved Europe, including Nazi foreign and occupation policies, strategic and political decision-making by the Allied and Axis powers, national resistance movements, and the wartime origins of the Cold War.

RECOMMENDED: HIST 2032.03, 2062.03, 2081X/Y.06, 2021.03, 2040X/Y.06, 2112.03

PREREQUISITES: One 2000 level course in European or modern British history

FORMATS: Lecture | Discussion

HIST 3053 Fascist and National Socialist Movements in Europe, 1900-1945

CREDIT HOURS: 3

Fascism remains one of the most misunderstood and intriguing curiosities of modern history. At the height of its popularity and influence in the period between the World Wars, virtually every European country had one or more groups that were considered fascist or thought of themselves as such: in Germany and Italy, of course, but also in France, Spain, Hungary, Romania, and elsewhere. This course, structured as lecture/discussion, offers students the opportunity to explore the ideals, experiences, aspirations and political realities of this simultaneously threatening and fascinating historical problem.

PREREQUISITES: One European history course or permission of instructor

FORMATS: Lecture | Discussion

HIST 3056 The Holocaust: The Destruction of the Jews of Europe, 1933-1945

CREDIT HOURS: 3

The destruction of most of European Jewry by Nazism and its helpers during the Second World War is studied in the context of centuries-old religious anti-Semitism, nineteenth-century Jewish emancipation and the emergence of racist ideology, the political and social situation of Jews in eastern and western Europe after World War I, “legal” and bureaucratic persecution of German Jews culminating in mass killing at Auschwitz and other death camps, and the response of bystander nations to the perpetration of genocide. RECOMMENDED: HIST 2032.03, 2062.03, 2081X/Y.06, 2021.03, 2040X/Y.06, 2112.03

PREREQUISITES: One 2000-level course in European History

EXCLUSIONS: HIST 3055.06

FORMATS: Seminar

HIST 3059 Confronting Fascism

CREDIT HOURS: 3

CROSSLISTED: HSTC3331, SCIE4000, BIOL4664, OCEA431, MARI4664

HIST 3075 Science and Religion: Historical Perspectives

CREDIT HOURS: 3

See course description for HSTC 3200.03 in the History of Science and Technology section of this calendar.

HIST 3076 Science and Religion: Contemporary Perspectives

CREDIT HOURS: 3

See course description for HSTC 3201.03 in the History of Science and Technology section of the calendar.

CROSSLISTED: CTMP 3201.03, HSTC 3201.03, RELS 3201.03

HIST 3085 The Many Faces of Frederic Chopin: Problems in Modern Biography

CREDIT HOURS: 3

The seminar examines the process of creating biographical representations in history by focusing on Frederic Chopin (1810–1849) and the appropriations of his life, personality and music, that occurred both during his lifetime and after his death. By analyzing how Chopin’s images were construed—and the manner in which he fashioned himself—the course explores broader themes, such as biography in historical writing, the nineteenth-century paradigm of biography writing, politics of biography, biography and the construction of the subject, biography as a control of cultural memory and the limits of biographical knowledge.

PREREQUISITES: One European history course, permission of instructor

FORMATS: Seminar

HIST 3088 History and Memory in Modern Russia and the West

CREDIT HOURS: 3

What can we learn from the memory of modern history – particularly that of the twentieth century? How did people remember, forget, imagine, and explain the upheavals of the past in Russia, France, Germany, Italy, Spain, Bulgaria, Ukraine, Poland, or the United States? How do memories of revolutions and wars, nation building and national collapses, construction and destruction of monuments, political violence, denials of and nostalgias about the past compare in these countries? Those are the central questions this course considers. Rather than viewing Russian historical memory as a unique phenomenon, the course

focuses on parallels and dialogues between memories in several countries, Russia included, viewing them as constitutive parts of the modern experience. The course begins with a discussion of such fundamental conceptual paradigms as memory, history, experience, identity, heritage, and commemoration. Subsequently, adopting a comparative approach, we examine several major problems of memory in modern societies, Russia among them. The principal emphasis is on the twentieth century. The course is based on advanced historical scholarship as well as on primary sources: memoirs, oral history, literary, artistic, and cinematic representations of the past.

FORMATS: Lecture | Discussion

HIST 3090 Russian Society

CREDIT HOURS: 3

Basic institutions of 20th century Russian society are considered in their historical context, with special attention to the former role of the Party, official culture and literature, the workings of the economy, and social stratification. RECOMMENDED: RUSN 1000.06, 2000.06

PREREQUISITES: Some Russian history. Recommended HIST 2021.03 and HIST 2022.03

CROSSLISTED: HIST 5090.03, RUSN 3090.03

FORMATS: Seminar

HIST 3092 Russian Topics

CREDIT HOURS: 3

Topics to be studied and researched will vary from year to year. They may include the sources of Bolshevism/Leninism, the doctrine of peaceful coexistence, the position of national minorities, the role of literature (official and samizdat) and the press, the Cult of Personality, Khrushchev's "Thaw", Brezhnev, Gorbachev, and Yeltsin. RECOMMENDED: HIST 2020X/Y.06 or 2021.03/2022.03 or RUSN 2022.03/2023.03

CROSSLISTED: RUSN 3092.03

FORMATS: Lecture | Discussion

HIST 3094 Vladimir Lenin and Leon Trotsky: Their Life and Works

CREDIT HOURS: 3

This course examines the intellectual and political biographies of V.I. Lenin and L.D. Trotsky, the main architects of the 1917 Revolution in Russia. Among the questions to be considered are Trotsky's relationships to Lenin and Stalin, their roles in the Revolution and Civil War, their analyses of the New Economic Policy, Trotsky's leadership of the Left Opposition, and their place in the history of Marxist theory and practice. The course will look at secondary literature on Lenin and Trotsky as well as selections from their writings.

CROSSLISTED: RUSN 3094.03

FORMATS: Seminar

HIST 3096 The History of Ideas in Russia - From Official Nationality to Solzhenitsyn's Neo-Slavophilism

CREDIT HOURS: 3

This course examines some of the main currents in Russian intellectual history from the middle of the nineteenth century through the 1990s. Topics include classical Slavophilism and early Westernism, Populism and Nihilism, Anarchism, Marxism, Leninism, Socialist Realism, anti-Stalinism, Glasnost, neo-Westernism (Sakharov), and neo-Slavophilism (Solzhenitsyn). RECOMMENDED: HIST 2020X/Y.06 or 2021.03/2022.03 or RUSN 2022.03/2023.03

CROSSLISTED: RUSN 3096.03

FORMATS: Lecture | Discussion

HIST 3101 Punishment, Crime, and the Courts in England, c. 1559-1850

CREDIT HOURS: 3

This course explores the nature and development of the English criminal justice system during the period in which it first began to be exported to other areas, and at home had to deal with the turmoil wrought by reformation, war, and industrialization. It examines the historical development and social uses of the criminal law. We will explore such questions as whether the law acted in the interests of particular people or groups, and if so, how? Did it serve to enforce and legitimize social and economic structures? Classes will progress thematically rather than chronologically; some will be devoted to a particular type of punishment, some to the different groups of people involved in the legal process; and others to scholarly debates on the subject.

EXCLUSIONS: HIST 4104

FORMATS: Lecture | Discussion

HIST 3102 Seminar in Tudor History, 1485-1603

CREDIT HOURS: 3

This course examines in depth the major events, personalities, and developments of sixteenth-century England. Topics include the dissolution of the monasteries, formation of the state, the reformations in religion and their broader effects, royal propaganda, political culture, and the achievements of the Elizabethan age. Class discussions will rely on detailed readings of primary sources and historiographical debates. Students will be expected to produce a major, well-researched essay. Some prior knowledge of early modern English history is essential.

EXCLUSIONS: HIST 2104.03

FORMATS: Seminar

HIST 3103 Seminar in Stuart History, 1603-1688

CREDIT HOURS: 3

This course examines in depth the principal events of seventeenth-century English history. Topics include: the fear of Catholicism at home and abroad; the causes and course of the civil war, including the growth of radical political thought; the Cromwellian regime; the importance of Parliament; the Restoration; and the Revolution of 1688. Class discussions will rely on detailed readings of primary sources and historiographical debates. Students will be expected to produce a major, well-researched essay. Some prior knowledge of early modern English history is essential.

EXCLUSIONS: HIST 2105.03

FORMATS: Seminar

HIST 3105 The English Civil War

CREDIT HOURS: 3

An advanced course on one of the most tumultuous and eventful periods in British history, leading up to and including civil war and revolution 1642 to 1660. Select primary sources will be used in addition to secondary works. Topics to be studied include the social structure of early Stuart England; the Church and its critics; foreign policy; radical politics; religious sectarianism; and the impact of the war and its aftermath on the populace.

CROSSLISTED: HIST 5105.03

FORMATS: Lecture | Discussion

HIST 3109 Topics in the Social and Cultural History of England, c 1500-1850: Everyday Life

CREDIT HOURS: 3

Aspects of daily life are often assumed to be “outside” of History, either unchanging or altered simply by natural forces of progress. This course will challenge such assumptions and look at the historically contingent practices surrounding such things as death, manners, sport, festivity, medicine, and education as experienced in early modern England. The course will address how and why such daily practices change, and the effects of such changes on the larger society.

PREREQUISITES: One previous history course

FORMATS: Seminar

HIST 3113 Britain in the Age of the First World War

CREDIT HOURS: 3

This course examines in depth major themes in British history from 1906 to the early 1920s, including the origins of the First World War, the experience and impact of war, wartime politics and strategy, the decline of the Liberal party and the rise of Labour, and post-war reconstruction.

PREREQUISITES: One of the following: HIST 2032.03, 2111.03; 2112.03; 3112.03; 3314.03; 3116.03; 2030X/Y.06; 2081X/Y.06; 2082.03.

FORMATS: Lecture | Discussion

HIST 3114 Britain in the Age of the Second World War

CREDIT HOURS: 3

This course examines in depth major themes in British history from the early 1930s to the early post-war years, including the Great Depression, Appeasement and the outbreak of the Second World War, the experience and impact of war, wartime politics and strategy, the welfare state, the post-war Labour government and the transition to peace.

PREREQUISITES: One of the following: HIST 2032.03, 2111.03; 2112.03; 3112.03; 3113.03; 3116.03; 2030X/Y.06; 2081X/Y.06; 2082.03.

FORMATS: Lecture | Discussion

HIST 3210 Canadian Cultural Landscapes

CREDIT HOURS: 3

This course explores the origins of one "signature" landscape in each province. Contact with different geographies shaped distinctive regional histories; but at the same time, the story of each place is tied to the national narrative. These landscapes also illuminate how nature has been understood, used, and transformed since the fifteenth century.

CROSSLISTED: CANA 3020.03, GEOG 3210.03

FORMATS: Lecture | Discussion

HIST 3212 Indigenous Visual and Material Culture of North America

CREDIT HOURS: 3

Ceremonial and creative expression has been part of Indigenous cultures since time immemorial. However, only in recent years have these forms of expression been considered by art historians and historians for their beauty and importance. This course explores Indigenous visual and material culture from

pre-contact to present, and from east to west coasts across Turtle Island (North America), engaging with themes of the Ancient World, colonialism, inclusion, regionalism, artistic crossroads, modernity, power, and cross-cultural exchanges.

CROSSLISTED: INDG 3212 Art History Certificate (every other year)

FORMATS: Lecture | Seminar

HIST 3215 Indigenous Textiles in Canada: Tourism, Industry, Identity

CREDIT HOURS: 3

The making of textiles by Indigenous peoples serves as a way for communities and individuals to pass on traditional knowledges and ways of knowing from grandparent to parent to child and between community members. However, during industrial development, globalization, and European settlement, Indigenous textile producers adapted to the many changes imposed upon them, altering how they made and used textiles, all the while sustaining cultural traditions. This course explores the practices of making and the uses of textiles as cultural and spiritual objects, as commodities, and as objects of resistance, repatriation, and reconciliation.

CROSSLISTED: INDG 3215

FORMATS: Lecture | Discussion

HIST 3220 Youth Culture in Canada, 1950s to 1970s

CREDIT HOURS: 3

The 1950s and 1960s were decades of often startling social change throughout North America in general and Canada in particular. This course will attempt to understand these changes and their impact on our society. The primary focus of the investigation is the popular youth culture of the time, the culture of “sex, drugs and rock n’ roll.” The course will look at economic and social factors underlying youth culture, at some of the major thinkers who influenced it (such as Marshall McLuhan and Herbert Marcuse), and the responses of authority to youth culture. RECOMMENDED: HIST 2222.03

PREREQUISITES: One previous history course

FORMATS: Lecture | Tutorial

HIST 3222 Topics in Canadian Social History, Nineteenth and Twentieth Centuries

CREDIT HOURS: 3

This seminar will explore major themes in Canadian social development. The topics discussed will vary from year to year but will emphasize such themes as: changing values in Canadian society; the nature of popular cultures; the relationship of order and disorder; the family; gender relations; and social classes.

Approved with Canadian Studies.

PREREQUISITES: A course in Canadian History

EXCLUSIONS: HIST 5222.03

FORMATS: Lecture | Seminar | Discussion

HIST 3226 Law and Justice in Canadian Society, to 1890

CREDIT HOURS: 3

Discussion begins with an exploration of concepts of law and justice among Native Peoples prior to and during the occupation of the continent by the French and British. The course pursues crime and the criminal law as they relate to broader changes within the society and economy of New France, British North America, and Canada. We analyze shifting patterns and perceptions of crime and punishment; the social, economic, political, and ideological significance of the criminal law; the influence of Britain, France and the United States on legal developments. **Approved with Canadian Studies.** RECOMMENDED: One previous history course

EXCLUSIONS: HIST 3225.03

FORMATS: Lecture | Discussion

HIST 3227 Criminal Law, Crime and Punishment in Canadian Society, 1890 to the present

CREDIT HOURS: 3

Continuing the approach and themes of HIST 3226.03, this course studies crime, punishment, and the criminal law as they reflect social, economic, political, and ideological developments. As appropriate, these are placed within their international context, and in particular linked to the American system of law and justice. We pay attention to the impact of technological change on crime, detection of crime, enforcement mechanisms, and alternative means and methods of punishment. **Approved with Canadian Studies.** RECOMMENDED: One previous history course

EXCLUSIONS: HIST 3225.03

FORMATS: Lecture | Discussion

HIST 3247 Métis Histories and Culture

CREDIT HOURS: 3

This course explores Métis History and Culture in North America from its historical development in relation to the fur trade to current social and political issues, interrogating ideas of membership, identity, and race-shifting. Topics include Métis diversity, ethnogenesis, mobility, resistance, resilience, dispossession, displacement, and relocation.

HIST 3252 Making the News: a behind-the-scenes look at the making of History

CREDIT HOURS: 3

Over the 19th and 20th centuries, newspapers moved from being government and commercial bulletins to serving as a central method of social communication. The owners, editors, and journalists were major actors in the political and business worlds of their time. By the mid-20th century, newspapers could claim to be key makers of cultural common sense. Today, the print editions of papers are significantly less central to culture and politics than they once were. But for historians, increasingly able to access two centuries' worth of newspapers online, the newspaper has recently regained importance as a research source, for cultural and social history as much as for political history. Complementing lectures in newspaper history and research methods, weekly guided research exercises in class will give students hands-on experience in using newspapers as a research source.

FORMATS: Lecture

HIST 3260 History of the Canadian West

CREDIT HOURS: 3

This course takes a thematic approach within a chronological framework, exploring social, economic and political topics in the development of Western Canada. Among the themes considered are Indigenous economies, political dissent, labour radicalism, ethnic relations, and federal-provincial relations.

Approved with Canadian Studies.

PREREQUISITES: A course in Canadian history

EXCLUSIONS: HIST 2250.03

FORMATS: Lecture | Seminar | Discussion

HIST 3272 Themes in the History of Atlantic Canada

CREDIT HOURS: 3

This class provides students an opportunity to broaden their knowledge of historical trends in the region through archival research based on specific selected themes, which vary from year to year.

FORMATS: Lecture | Discussion

HIST 3273 Nova Scotia: Pre-Confederation

CREDIT HOURS: 3

An exploration of character and circumstances in the history of provincial society, from the era of European "invasion" to the debate over entry into British American union. **Approved with Canadian Studies.**

PREREQUISITES: One Canadian History course or instructor's consent

EXCLUSIONS: HIST 3270X/Y.06

FORMATS: Seminar

HIST 3274 Nova Scotia: Post-Confederation

CREDIT HOURS: 3

This course focuses on First Nations, immigration, and race in the history of Nova Scotia from the 1860s to the present. Topics include a survey of the resource economy in the province, particularly the history of coal; the impact of the Indian Act, centralization, the reserve system, and residential schools on both Mi'kmaq and non-indigenous communities in the province; Africville and the Black Nova Scotian community; Nova Scotia's relationship with the rest of Canada; and both immigration and emigration in the recent past.

FORMATS: Lecture | Seminar | Discussion

HIST 3282 Public History

CREDIT HOURS: 3

This course explores how and why history is represented and interpreted beyond the university. Through lectures, discussion, activities, and assignments, it will address some of the major issues and debates around how history is communicated to and understood by the public. Drawing on theoretical concepts as well as engaging with the politics of history, it will consider why public history matters - whether in relation to the arts, historic sites, tourism, national narratives, collective memory, identity, and more.

PREREQUISITES: One second-year course in history

EXCLUSIONS: HIST 3222.02 in 2005-2006

FORMATS: Lecture | Discussion

HIST 3292 Wealth & Power in N. America

CREDIT HOURS: 3

This course explores the history of American capitalism from the colonial period to present. Among the major topics treated include agriculture, labor, and commerce in the colonial-era Atlantic world; slavery and its afterlife; industrialization and the rise of "big business"; the development of consumer culture; the rise and decline of organized labor; the changing position of the United States in the global economy, and recent trends toward deindustrialization and growing inequalities of income and wealth.

PREREQUISITES: One class in Canadian or U.S. history, or an appropriate class in a related discipline

EXCLUSIONS: HIST 3293.06

FORMATS: Lecture | Discussion

HIST 3300 Topics in the History of the Americas, 1450-1870

CREDIT HOURS: 3

This course examines aspects of the historical development of the Americas from the beginnings of European imperialism in the fifteenth century to the emergence of nation states in the nineteenth century. It explores topics such as relationships between Indigenous and European peoples; religion and socio-economic development; popular culture and gender; imperialism and the slave trade; the development of slavery; the rise of revolutionary ideologies; the American and Haitian Revolution; and the impact of civil wars.

FORMATS: Lecture | Discussion

HIST 3302 Tech & Hist in N. America

CREDIT HOURS: 3

This course explores the relationship between technology and North American histories—histories of nations, of social classes, and of bodies. Topics may include colonialism; Indigenous history; feminist and women's history; industry and economy; and natural resource extraction. This course sheds fresh light on classic topics such as firearms and the fur trade. Students will experience the foundation of historical scholarship by developing a self-directed archival research project.

CROSSLISTED: HSTC 3401 5 seats available

HIST 3303 De-Colonizing Modernism: Critiquing the Legacy of Modern Art

CREDIT HOURS: 3

What is Modernism? Modern Art? Our answers to these questions reflect our attitudes towards art and the role of the artist in society. This course gives students a foundation in the western visual culture of the 20th century. It will equip them to research and write about art and critique the omissions and biases of art history. Through this process they will better understand how the Western art production of the past 150 years affects the visual culture they experience daily.

CROSSLISTED: GWST 3303

FORMATS: Lecture

HIST 3350 Family and Community in North America, 1600-1900

CREDIT HOURS: 3

The family in North American society, from when the family was a model for social relations to the time when it was idealized as a private refuge. Among the topics considered are the role of the family in rural and urban communities, the demographic transition from high fertility and mortality, the reduction of the family's economic and educational autonomy, the role of ideology in shaping sex roles and child rearing, and the relations of family and community according to ethnic group, class and economic setting. RECOMMENDED: A course in the sociology or social anthropology of the family

CROSSLISTED: GWST 3300.03

FORMATS: Lecture | Discussion

HIST 3358 Slavery, Gender, and Power: Women in Nineteenth Century America

CREDIT HOURS: 3

This course studies the tangled histories of slavery and gender in nineteenth century America. Principal topics include the lives of enslaved women, the cult of domesticity, the rise of early feminism, the role of women in the destruction of slavery, and the tension between gender and race.

CROSSLISTED: GWST 3358.03

FORMATS: Seminar

HIST 3360 Enslavement and Emancipation: African-Americans in the US South to 1900

CREDIT HOURS: 3

This course examines slavery as a system of racial subordination and economic exploitation. Attention is given to the social, familial, and cultural life of the

slaves, the role of slavery in shaping southern nationalism and national racial beliefs, and to reconstruction after the Civil War. RECOMMENDED: HIST 2332.03

PREREQUISITES: One 2000-level United States history course

FORMATS: Seminar

HIST 3361 The American Civil War and Reconstruction

CREDIT HOURS: 3

The Civil War, occasioned by the formation of the Southern Confederacy and the Union government's refusal to recognize the existence of a separate southern nation, was a pivotal moment in the history of the United States. This course will examine the causes of the war, the forces behind slave emancipation, the military fortunes of the two combatants, and the efforts undertaken by the victorious society to alter the polity of the defeated South. RECOMMENDED: HIST 2332.03

FORMATS: Seminar

HIST 3369 America in the 1960s

CREDIT HOURS: 3

The “long sixties” – a period from the mid-fifties through the early seventies – was an extraordinary time in American history when a number of different groups attempted to transform American society. In many ways they were successful, and we are still living with the legacy of the sixties today. This course is designed to introduce students to the numerous issues, conflicts, and problems that confronted Americans in the 1960s. The course will focus on the various movements of social reform that characterized this period. We will also discuss the rise of the “new left” and the “new right” and what these ideological movements meant for American political culture. The overall goal of the course is to encourage students to think about how individuals adjust their values to fit a particular political and cultural climate. Why do some people conform to political and social values, while others do not? Students will come at these questions from a variety of perspectives. Art, film, fiction, and music will be used throughout the course.

FORMATS: Lecture | Discussion

HIST 3370 North American Landscapes

CREDIT HOURS: 3

This course is an introduction to the history of landscapes in North America from the fifteenth century to the present day. Each week we will explore how nature has been understood, used, and transformed in a variety of different places across the continent, and how the history of these landscapes tie into the larger histories of Canada and the United States.

CROSSLISTED: HIST 5370.03

FORMATS: Lecture | Seminar

HIST 3380 Slavery and Freedom in the Americas

CREDIT HOURS: 3

This course examines slavery and freedom, their meanings and practices in the Americas from the time of the Colombian adventures through the colonial era, and their post-colonial legacies into the twentieth century. European enslaving countries developed legal frameworks which legalized the enslavement of Africans as property or chattel, in Europe and its colonies. In addition to looking at slavery regimes in The United States and the British Caribbean, this course will also explore the institution in Latin America, especially in such places as Brazil, Cuba, and Haiti. Slavery in Canada, which is often missing from studies of slavery in the Americas, will also be explored. It should be borne in mind that slavery was simultaneously a labour, legal, carceral, sexual, racial, and gender system.

CROSSLISTED: BAFD 3380

FORMATS: Seminar

HIST 3394 Slavery, War and Piracy in the Early Caribbean

CREDIT HOURS: 3

The Caribbean was a world of rapid riches, constant brutality and death and it was the central interest of European powers as they expanded to the Americas. This course will explore the politics, economies, societies, and cultures on the islands within the Caribbean Sea and the mainland territories bordering on it during the early modern era. It will conclude by examining how this world was changed by the dismantling of the slave system and the age of revolutions. The course will demonstrate exactly why this region became the most important, economically, within the Americas and why European powers were so intent on defending it.

FORMATS: Lecture | Seminar

HIST 3402 Baroque to Bustles, Dress from 1700 to1870

CREDIT HOURS: 3

See course description for THEA 3402.03 in the Theatre Section of this Calendar.

CROSSLISTED: THEA 3402.03

HIST 3403 Bustles to Boardrooms: Modern Fashion from 1900

CREDIT HOURS: 3

CROSSLISTED: THEA 3403.03

HIST 3430 The Making of Colonial Africa, c 1850 - 1930

CREDIT HOURS: 3

European colonial rulers and business interests laid out the framework of the sub-Saharan African colonial order from about 1850 to the 1920s, seeking ways to exploit African labour and natural resources. But imperial plans were limited and sometimes frustrated by African interests, and by historical dynamics within Africa, such as the rise of new merchants and Islamic revolution. This course assesses how the realities of Africa intersected with European imperial ambitions to profoundly change African society during this early colonial period.

CROSSLISTED: HIST 5430.03; BAFD 3430

FORMATS: Lecture | Discussion

HIST 3435 The Rise and Fall of African Slavery

CREDIT HOURS: 3

Many African societies, like pre-industrial societies elsewhere, used slaves as well as other forms of labour for a variety of purposes. The rise of external slave trades after 1700 — notably across the Atlantic and Sahara — transformed many African societies into specialized slave exporters. As external slave trades declined in the 19th century, many African economies used extensive internal slave labour to produce exports, a pattern colonial governments were slow to change in the 20th century. This course examines these changes in African slavery, and how they affected such issues as gender relations and class structure.

CROSSLISTED: BAFD 3435

FORMATS: Lecture | Discussion

HIST 3451 Southern Africa to 1860

CREDIT HOURS: 3

Examines the history of Southern Africa before the coming of the mineral revolution. The course focuses on South Africa, but with a regional perspective. Themes include the nature of Khoi and San societies, the expansion of Bantu-speakers, Dutch settlement and administration of the Cape area, the rise of the Zulu, Shaka's empire and the mfecane, the British takeover from the Dutch, the impact of the humanitarian movement and the Great Trek, African states and kingdoms in the nineteenth century, and the formation of the Boer Republics.

FORMATS: Lecture | Discussion

HIST 3452 Apartheid and After: Racial Rule in South Africa

CREDIT HOURS: 3

The course examines not only the changes in race relations and politics, but also the effects of mining and other industries on rural and urban societies after the discoveries of diamonds and gold. Themes will include a regional perspective on British policies and the “imperial factor”, the growth of Afrikaner and African nationalism, the Boer War and unification, the development of apartheid and South Africa's relations with the wider world. RECOMMENDED: HIST 3451.03

CROSSLISTED: HIST 5452.03; BAFD 3452

FORMATS: Lecture | Discussion

HIST 3470 Wars and Revolutions in Nineteenth-Century Africa

CREDIT HOURS: 3

Africa in the nineteenth century was profoundly reshaped by a complex set of events. Muhammed Ali undertook to modernize Egypt. New Islamic states founded in the west developed plantation economies of unrivaled size. On the Atlantic coast, merchant princes made their fortunes supplying tropical goods for Europe's Industrial Revolution. In Central Africa the search for slaves and ivory both wreaked havoc and stimulated new states. In the south, the rise of Zulu power generated waves of conquest and consolidation. This course assesses the extent to which Africa was reshaped in the revolutionary century before colonial partition.

CROSSLISTED: BAFD 3470

FORMATS: Lecture | Discussion

HIST 3471 Armed Conflict and Security in Modern Africa

CREDIT HOURS: 3

Beginning in the colonial period and proceeding to the present day, this course will examine the ways in which Africans have engaged with various challenges to peace and security. We will address such issues as: resistance to colonial rule; colonial policies and practices as drivers of conflict; African elites and

governance; Cold War dynamics; democratic transitions and security; protests, violence and state responses to organised opposition; pervasive criminality and vigilantism; and post-conflict justice and security initiatives.

CROSSLISTED: HIST 5471.03; BAFD 3471

FORMATS: Lecture | Discussion

HIST 3500 Topics in Global History

CREDIT HOURS: 3

This is a special course dedicated to those topics that comprise multi-regional, global themes in the early modern and modern eras. Topics will vary, but possible course themes include: History of Slavery from a Global Perspective, Rise of Early Modern world-systems, and Colonialism and Ideology in Asia and Africa.

FORMATS: Lecture

HIST 3502 Thucydides and the Greek World at War

CREDIT HOURS: 3

See course description for CLAS 3502.03 in the Classics section of this calendar.

CROSSLISTED: CLAS 3502.03

FORMATS: Seminar

HIST 3508 The History of Perso-Islamic Culture in South Asia, 1000-1800

CREDIT HOURS: 3

This class focuses on the history of South Asia during the medieval and early modern periods (1000-1700), with an emphasis on the various Muslim sultanates and kingdoms which dominated much of the subcontinent. Traditional narratives have historically emphasized the spread of Islamic culture by Turkish dynasties to compete with 'indigenous' Hindu, Jain, and Buddhist cultures. However, recent scholarship has highlighted the idea of a "Persian cosmopolis" wherein Muslim culture in South Asia was especially enamoured with Persian culture and systems of literature, religious thought and philosophy which were better recognized and understood as "Perso-Islamic". This class purports to examine the history of South Asia with such priorities in mind. In two additional to political narratives, the class will be dedicated to introducing and discussing important Indo-Persian texts which were produced in this "Persian cosmopolis" which shaped so much of western and south Asia in the medieval period.

CROSSLISTED: RELS 3508

FORMATS: Lecture | Discussion

HIST 3509 Arab Caliphs, Turkish Commanders, and Persian Viziers: Islamic History, 750-1200

CREDIT HOURS: 3

The focus of this course will be the different manifestations of Islamic civilization as it reached its zenith under a series of caliphates and sultanates across Spain, North Africa, the Levant, Iran, Central Asia, and South Asia between 750 and 1400. Emphasis will be placed on the role of heterodoxy and the emergence of numerous Islamic communities and movements (shī'ites, Sufis) as the `Abbasid empire (750-1258) struggled to maintain political and doctrinal unity. There will also be a discussion of the Turkic migrations and the corresponding rise in Turkic Islamic sultanates such as the Saljuqs and the Ghaznavids in the East, and how such developments were mirrored by the establishment of a number of Crusader states in the Holy Land. Lastly, we will examine the invasions by the Mongol khans and their devastating effect on the central Islamic world. This course will also discuss the incorporation of Hellenistic culture during the Abbasid period and the rise of Mutazilite ('rationalist') thought, notably in physical sciences, political studies, and philosophy, and how such syncretism was also reflected in terms of mysticism, art, architecture, and literature in the East as Islamic culture interacted with Zoroastrian, Buddhist and Hindu culture in Iran, Central Asia, and India.

FORMATS: Lecture | Discussion

HIST 3510 Islamicate Empires, 1300-1700: The Ottomans and Safavids

CREDIT HOURS: 3

Until the devastating Mongol invasions of the 13th century, the principal centers of Islamic power, culture, and thought had been based in Cairo and Baghdad. This course will examine the post-Mongol Islamic world, and how politics and religion were irrevocably changed with the annihilation of the Sunni Abbasid caliphate and the emergence of new power centers led by the Ottomans and the Safavids respectively in cities like Istanbul and Isfahan. Religious heterodoxy, combined with the power vacuum left by Chingiz Khan and his descendants, allowed for the emergence of a number of unique Turkmen states in Western Asia, the most famous being the Ottoman Turks of Anatolia and the Safavids of Iran. It is this period - the 16th century- which saw the emergence and ongoing confessionalization of western Asia between Sunnism and Shi'ism. While religious polemic and confessional, dynastic conflict dominated the narrative of 1500-1700, there was a fluorescence in poetry, art, architecture, literature and philosophy in the Ottoman and Safavids periods; moreover, there was significant cultural exchange between the Turkish and Persian spheres of Anatolia and Iran.

FORMATS: Lecture | Discussion

HIST 3511 Ancient and Medieval History of the Persianate World

CREDIT HOURS: 3

This course is dedicated to studying those periods from antiquity to the medieval age where parts of Asia were influenced and defined by the Persian language and culture (i.e. Iran, the Caucasus, the Steppe, Mesopotamia, Central Asia, Anatolia, South Asia). This course will begin with examining the Aryan invasions of the 2nd Millennium B.C.E., and the eventual establishment of the Median and Achaemenid empires in the 7th – 6th centuries B.C.E. The Persian Wars between the Persians and the Greeks, culminating with Alexander the Great’s invasion and the establishment of a Perso-Hellenistic state in the 4th century B.C.E. will be studied along with various issues associated with ancient Iran and Central Asia (Zoroastrianism, Manicheism, Nestorian Christianity, Buddhism) during the Achaemenid, Seleucid, Parthian, and Sasanian periods. This course will also examine the impact of the Arab Muslim invasions on Iran and Central Asia in the 7th, 8th, and 9th centuries, and the contribution of Persian civilization to the growth and success of Islam during the Abbasid period (750-1258). Strong emphasis will be placed on examining various aspects of Persianate culture, namely poetry, literature, art, architecture, philosophy, and mysticism in the medieval period.

CROSSLISTED: CLAS 3602.03

FORMATS: Lecture | Discussion

HIST 3512 Modern History of Iran

CREDIT HOURS: 3

This course will examine Iran from the 19th to the 21st centuries. It will begin with an examination of the Qajar dynasty and its responses to the imperial ambitions of Russia and England in the late 19th and early 20th centuries. In terms of Iranian domestic politics, we will look at the Constitutional Revolution of 1906, the rise and establishment of the Pahlavi regime, and the course of Iranian politics in an era of burgeoning nationalism as seen in the Mosaddegh period and the subsequent CIA-orchestrated coup d'etat in 1953. Particular focus will be placed on Reza Shah's monarchy, and the implications of the Revolution in 1979, not only in Iran, but throughout Afghanistan, Pakistan, and the Gulf Region. This course will continue with the impact of the Islamic Republic of Iran in terms of the Iranian culture, religion and politics.

EXCLUSIONS: First-year students.

FORMATS: Lecture | Discussion

HIST 3513 From Cairo to Cape Town: Religious Revival, Identity and Colonialism in Muslim Africa

CREDIT HOURS: 3

This course aims at introducing students to a number of themes and issues related to the history of Islam in nineteenth and twentieth century Africa.

EXCLUSIONS: HIST 3551.03 in 2006-07

FORMATS: Lecture | Discussion

HIST 3515 Food for Thought: History and the Culinary Cultures of the Islamic World

CREDIT HOURS: 3

The symbol and meaning of food transcend pleasure and necessity. This course explores aspects of Islamic history through the lens of the culinary cultures in Muslim societies. It treats food as an essential factor in creating and shaping identities, social space and political discourses.

FORMATS: Lecture | Discussion

HIST 3520 Empire, War, and Resistance in Sri Lanka

CREDIT HOURS: 3

The official birth of the British Raj in South Asia is conventionally dated to 1857, following a rebellion of Indian soldiers working for the British East India Company. But the antecedents of the British Raj arguably have its roots in the island of Ceylon, more than half a century earlier. In this class, we will challenge the thesis that the Raj begins in India by studying the dynamics of empire, war, and resistance on the small island state of Ceylon (now Sri Lanka) in the Indian Ocean. No prior knowledge of the region is required, this course is meant to introduce students to the global history, politics, and conflicts that contoured the development of modern/colonial Ceylon, known today as “Sri Lanka.” We focus on the imperial conflicts that defined the period of British colonial rule (1802 – 1948), but towards the end of the class, emphasize how these historical events continue to impact post-colonial Sri Lanka in terms of ethnonationalist strife and Asian geopolitics. In so doing, part of the conceptual work of this course is to draw into contention the stability with which we think of the term “post” colonial in terms of states within the former British empire.

FORMATS: Lecture

HIST 3551 Topics in Modern History

CREDIT HOURS: 3

This course will explore major themes in the history of the 19th and 20th centuries. Topics discussed will vary from year to year, but the course will involve an in-depth examination of a selected subject in modern history, and may include an historiographical, comparative, or interdisciplinary dimension.

FORMATS: Lecture | Tutorial | Seminar

HIST 3600 Topics in the History of Law, Crime, and Justice

CREDIT HOURS: 3

This course will explore significant historical themes or topics in related to law, crime, and justice. Topics will vary but might include, e.g., organized crime, policing, or war crimes trials.

FORMATS: Seminar

HIST 3601 Topics in the History of Law, Crime, and Justice

CREDIT HOURS: 3

This course will explore significant historical themes or topics in related to law, crime, and justice. Topics will vary but might include, e.g., organized crime, policing, or war crimes trials.

FORMATS: Seminar

HIST 3602 Topics in the History of Law, Crime, and Justice

CREDIT HOURS: 3

This course will explore significant historical themes or topics in related to law, crime, and justice. Topics will vary but might include, e.g., organized crime, policing, or war crimes trials.

FORMATS: Seminar

HIST 3750 Social History of Seafaring: Maritime Culture in the Age of Sail

CREDIT HOURS: 3

An examination of our maritime heritage. Within the context of these overlapping periods - the age of discovery, the age of sail, and the age of steam - the focus is on the development of merchant and naval fleets; the roles of the state, capital, and labour; and the features of seafaring culture. Special emphasis is given to the shipping industries and maritime traditions of this region. **Approved with Canadian Studies.**

PREREQUISITES: One course in history or permission of the instructor

FORMATS: Lecture | Discussion

HIST 3916 Health and Disease in Medieval Society

CREDIT HOURS: 3

Welcome to Health and Disease in Medieval Society, a historical introduction to how medieval people thought about bodies, sickness, and healing. The basic medical framework of medieval Europe and the Near East was inherited from the doctors of ancient Greece. But the medieval world was confronted with new diseases that ancient healers did not know, or never wrote about, most notoriously leprosy and plague. These two diseases are often considered the archetypal illnesses of the Middle Ages, as they transformed or devastated entire communities in the eleventh through sixteenth centuries. In this course we will study general concepts of disease and illness in the Middle Ages and perform more focused analyses of how leprosy and plague were interpreted in the later Middle Ages through a complex framework of scientific, religious, and socioeconomic ideas.

FORMATS: Lecture | Discussion

HIST 3990 In Search of the Philosopher's Stone: The History of European Alchemy

CREDIT HOURS: 3

See course description for EMSP 3321.03 in the Early Modern Studies section of this calendar.

HIST 4001 Directed Readings

CREDIT HOURS: 3

This is a course of individual instruction. Students may only register for this course with the written permission of a Faculty member and the Undergraduate Coordinator.

HIST 4045 The French Revolution

CREDIT HOURS: 3

The seminar examines the French Revolution, its origins and its interpretations, as well as the legacy of the French Revolution for modern political culture. Each time the seminar is offered it may focus on a specific theme related to the French Revolution.

PREREQUISITES: One European history course

CROSSLISTED: HIST 3045.03

FORMATS: Seminar

HIST 4090 Soviet History Seminar

CREDIT HOURS: 3

This is an advanced seminar on the history of Soviet Russia from 1917 to 1991. We will explore the origins, mechanisms, costs, and outcome of perhaps the most ambitious and tragic historic experiment at creating a modern yet equitable society in a country far from conducive to such an undertaking.

CROSSLISTED: RUSN 4090.03

FORMATS: Lecture

HIST 4103 Digital Humanity

CREDIT HOURS: 3

This seminar brings together students from the Humanities and Social Sciences (HSS) with students from Computer Science (CS) to address critical questions at the intersection of digital technologies and our common humanity. Students will form multidisciplinary teams to tackle problems of common interest. How is the development of Artificial Intelligence shaped by histories of technology, race, gender, and colonialism? How can digital tools be used to analyze critical questions? Students will learn data visualization tools and discuss the interaction of computing in society, from the past to the present. No technical skills or HSS experience required.

FORMATS: Seminar

HIST 4105 The English Civil War: Society, Religion, and Politics, 1603 - 1660

CREDIT HOURS: 3

An advanced course on one of the most tumultuous and eventful periods in British history, that leading up to and including civil war and revolution 1642 to 1660. Select primary sources will be used in addition to secondary works. Topics to be studied include the social structure of early Stuart England; the Church and its critics; foreign policy; radical politics; the military course of the war; religious sectarianism; and the impact of the war and its aftermath on the populace.

PREREQUISITES: Any course in medieval or early modern British history

CROSSLISTED: HIST 5105.03

FORMATS: Seminar

HIST 4106 Topics in Early Modern English History

CREDIT HOURS: 3

Topics to be studied will vary from year to year, and may include the religious reformations, print culture, political protest, and state formation. The course will offer students the opportunity to examine in depth key features of English history in the sixteenth and early seventeenth centuries.

CROSSLISTED: HIST 5106.03

FORMATS: Seminar

HIST 4117 Winston Churchill

CREDIT HOURS: 3

This course is not designed to examine every aspect of Winston Churchill's life; rather, it focuses on major events in British and world history in which Churchill was a leading actor. Subjects for discussion may include: social reform and the welfare state; the return to the gold standard; Ireland; India, empire and decolonization; appeasement; grand strategy in the two world wars; the Anglo-American "Special Relationship"; and the Cold War. This course will also examine the historiography of these subjects and the impact of Churchill's own extensive writings in shaping the historical records. RECOMMENDED: HIST 3050.03

FORMATS: Seminar

HIST 4162 Advanced Seminar in Baroque Culture

CREDIT HOURS: 6

Taught at the State Castle, Cesky Krumlov in the Czech Republic, this course offers upper-level students in History, Theatre and related disciplines the opportunity to study European Baroque culture while surrounded by its material traces. Topics covered include: seventeenth- and eighteenth-century theatre and opera; historical costume; Baroque court life; and/or the history of Central Europe.

CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

CROSSLISTED: THEA 4735.06

EXCLUSIONS: THEA 4733.03, HIST 4160.03

FORMATS: Lecture | Tutorial

HIST 4175 Bella Figura: Display behaviours in Baroque Europe

CREDIT HOURS: 3

This course, which requires some background in Early Modern Europe is a broad overview of behaviour surrounding appearance and display in Baroque Europe, roughly from the late sixteenth to the mid-eighteenth century. The intellectual framework of the course is situated in behaviour as a human universal,

with roots in animal display. After dealing briefly with display as a human universal, the readings examine the phenomenon in the context of the state, of religion, in architecture and interior decoration, and as stable behaviour in civil society art, dress and protocol. Reading in French not obligatory but encouraged and rewarded. All the readings will be posted to the course page on Brightspace.

PREREQUISITES: an Early Modern European Course

FORMATS: Seminar

HIST 4210 Museums, Archives, and Material Culture

CREDIT HOURS: 3

This course critically explores the ideas of the modern museum, archives, and material culture as significant avenues through which history, culture, and society are formed, disseminated, and perpetuated. The course is divided into three sections, which will consider the establishment of the survey museum through to contemporary digital museums, the difficulties and benefits of archival work for researchers, and the importance of material culture as an alternative and addition to text-based learning.

CROSSLISTED: INDG 4210.03

FORMATS: Seminar

HIST 4222 Topics in Canadian Social History, Nineteenth and Twentieth Centuries

CREDIT HOURS: 3

This seminar is an opportunity to explore in depth a specific theme or issue in Canadian history. The exact topic will vary from year to year, but will focus on some aspect of social, political or cultural history. The subject may be regional or national in scope. Past examples include cowboys in the North American west, native-newcomer relations, and the social history of health. Weekly discussions and a research paper emphasize historiographical debates as well as its significance to the story of Canada. Approved with Canadian Studies.

PREREQUISITES: A Canadian History course at the 3000 level or permission of the instructor

EXCLUSIONS: HIST 5222.03

FORMATS: Seminar

HIST 4250 Popular Culture in the Atlantic World, 1650-1850

CREDIT HOURS: 3

This course examines the history of popular culture in the Atlantic world. It focuses on using primary sources, such as diaries and journals, to explore the culture and customs in pre-industrial communities. We will discuss topics such as family relationships, popular ideologies, religious practices, economic culture, the role of gender, and attitudes towards sex. In addition to participating in weekly seminar discussions, students will present drafts of their research papers in class, and a revised version of the paper will be submitted at the end of term.

PREREQUISITES: A History course at the 3000 level or permission of the instructor

EXCLUSIONS: HIST 4222 (Fall 2004 and Fall 2005) HIST 5250.03

FORMATS: Seminar

HIST 4303 The Birth of Pop: How Visual Culture Makes Meaning

CREDIT HOURS: 3

Contemporary western society is saturated with visual images of all kinds: from oil painting to pornography. Visual culture is not only becoming more diverse but also increasingly globalized. For these reasons alone, the study of popular visual culture is an important pursuit. But popular images, like all visual images, also carry meaning and generate effects. The first part of this course explores the origins of mass popular culture in 19th Century Britain. Through case studies, suggesting that Western ideas about mental health, gender, romance, weddings and marriage emerged and were transmitted through Victorian visual culture, students learn to see connections between the popular culture of the past and contemporary visuality. Students will also critique the development of cultural studies as a discipline and form their own theoretical positions. In the second part, students will conduct their own self-directed primary research into a visual popular culture topic of their choosing. In the final weeks of the course, students will be asked to reflect on the course as a whole, consolidate what they have learned, and articulate the connections (or disruptions) they see between historical and contemporary theory and practice.

This course is ideally suited to students who want to incorporate visual or popular culture sources in their Honours or MA thesis.

PREREQUISITES: HIST 2900.03 or HIST 3303.03 or GWST 2900.03 or GWST 3303.03 or permission of the instructor

CROSSLISTED: GWST 4303.03

FORMATS: Seminar

HIST 4355 Becoming the State

CREDIT HOURS: 3

The state is undeniably the central “agent” of the modern global system, yet explanations for the emergence of the state as the hegemonic mode of organizing human society tend to privilege Eurocentric histories, obfuscating the different ways of organizing space that have existed around our shared planet.

Consequently, the inter-state system itself that constitutes the ‘terrain’ of modern global studies remains only partially historicized. In this seminar, we study the emergence of the modern territorial state with attention to the tensions that emerge when distinct modes of organizing space encounter one another in the modern, colonial era. We begin surveying methods and approaches for studying the state, then move into geographic case studies and critical problems emerging from the rise of the state as a creature of the modern, colonial encounter.

FORMATS: Seminar

HIST 4360 Slavery and American Political Culture

CREDIT HOURS: 3

This course studies the relationship between slavery and American political culture from the Revolution until the Civil War. Major themes will include the expansion of American slavery, the political ideology of slaveholders, racism in American life, and the antislavery arguments of abolitionists and runaway slaves.

FORMATS: Seminar

HIST 4370 The American Revolution

CREDIT HOURS: 3

This course examines the American Revolution and the larger revolutionary era in the Atlantic World. It situates this critically important event in American history within the broader context of the Atlantic World. We will explore the origins of the Revolution and discuss its immediate impact on the British Empire and the colonies which became the new United States. We will examine the military conflict that led to American independence as well as the major ideological and social shifts that were part of the Revolution. We will try to determine the motivations of the various colonies in joining the Revolution and we will ask why some colonies in the British Empire chose not to revolt. We will conclude with the creation of the Constitution. We will explore the meaning of the revolution and American independence for various groups of people in the colonies, including colonial elites, women, Native Americans and African-Americans. We will also examine the Loyalists and the Loyalist diaspora. Throughout the course we will try to determine how revolutionary or radical this event was.

FORMATS: Seminar

HIST 4400 Topics in African History

CREDIT HOURS: 3

This course will undertake a careful, in depth examination of a select theme in African history. The theme will vary from year to year, but the aim will be to probe the deep complexities of Africa's past that recent scholarship is bringing to light. Themes may be regional or continental, and could include such topics as witchcraft, resistance, urban history, religious change, migration, or nationalism. The core of the work will be a significant research paper and seminar presentations. Classes will also involve the reading, presentation, and discussion of selected readings.

PREREQUISITES: At least one 3000-level African history course or permission of the instructor

CROSSLISTED: BAFD 4400

EXCLUSIONS: HIST 5400.03

FORMATS: Seminar

HIST 4401 State Violence, Communal Conflict and Criminality in Modern South Africa

CREDIT HOURS: 3

South Africa is plagued by one of the world's highest rates of violent crime and social conflict. Despite the unprecedented level of public concern with violence, little attention is paid to the historical origins of this phenomenon. This course explores the changing patterns of crime and violence since the 1890s.

CROSSLISTED: HIST 5401.03; BAFD 4401

FORMATS: Seminar

HIST 4404 Crime and Punishment in Modern Africa

CREDIT HOURS: 3

This course will explore the extent to which state legitimacy and power can illuminate the trajectories of crime, policing and punishment from early colonial era in Africa to the present day.

FORMATS: Seminar

HIST 4475 African Intellectuals and the Modern Experience

CREDIT HOURS: 3

African thinkers have long pondered the challenges of the modern era, and have established lines of thought with which African intellectuals now address Africa's profound problems. But this engagement with the modern world has moved through different phases, just as the social location of the African intelligentsia has changed over time. This course will explore this intellectual history by setting specific writers in context, and then examining their original writings to ponder such questions as: What were the roots of "African Christianity"? How did African intellectuals respond to "scientific" racism? What was the appeal of Pan-Africanism? What was Negritude? How socialist was African socialism? How do postmodern insights about the invention of identity affect the idea of being "African"?

CROSSLISTED: HIST 5475.03; BAFD 4475

EXCLUSIONS: HIST 3475.03

FORMATS: Seminar

HIST 4500 Topics in Modern History

CREDIT HOURS: 3

The specific content of the seminar varies from year to year, but generally involves examination of a subject in history in some depth, and may include an historiographical, comparative, or interdisciplinary dimension.

CROSSLISTED: HIST 5500.03

FORMATS: Seminar

HIST 4510 Topics in Islamic and Middle East History

CREDIT HOURS: 3

This is a special course dedicated to a topic dealing with the Islamic world/Middle East from the medieval era to the present. Topics will vary, but possible course themes include: political thought in Islam, slavery in Islamic civilization, Nationalism and Ethnicity in the Middle East, and Women in the Islamic world.

FORMATS: Seminar

HIST 4545 Scripture and Statecraft: History of Islamic Political Thought

CREDIT HOURS: 3

This course is dedicated to understanding how Arab-centric tribal relations and networks initially defined Islamic politics in 7th-century Arabia, and how these definitions were later influenced by external 'imperial' and 'kingly' traditions (from Byzantines, Iranians, Indians). Muslim concepts of authority, however, were and still are defined by prophetic genealogies and charisma, and parts of this course will examine the shi'ite doctrine of imamate and the growth of millenarian thought. This course will also focus on the changes in political philosophy as a result of the violent arrival of the Mongols, and how traditional sunni notions of authority and state were displaced by the rise of Shi'ism and Sufism. Discussions will also focus on Muhammad ibn `Abd al-Wahhab and Jamal al-Din al-Afghani and the extent to which Islamic political thought retooled and reappraised in the wake of European hegemonic imperialism. The remainder of the course will examine the rise of Islamism, its radicalization following World War Two, and the implications of Islamism and its opponents against the backdrop of the Islamic Revolution in Iran and other religio-political movements in the Middle East, Africa, and South Asia.

PREREQUISITES: Any 3000-level course in Middle East history or permission of the instructor

CROSSLISTED: HIST 5545.03

FORMATS: Seminar

HIST 4550 Orientalism and Occidentalism

CREDIT HOURS: 3

This seminar is intended for senior undergraduate and graduate students interested in discussing how scholarship has historically approached non-Western and non-Christian areas of the globe. Dating back to Herodotus, Plato, and Isocrates, the description of "the Other" has been a consistent theme in European literary and academic traditions. Whether or not it was the apologetic theological rivalry between Islam and Christianity in the Middle Ages, or the Humanist mania for non-European languages and ethnography, Occidental scholarship has historically been attracted to understanding and depicting the non-Occident. This course will examine the different European intellectual traditions of early modern Europe and how they laid the foundation for subsequent 19th and early 20th century characterizations of the Islamic world. Concurrently, however, there is evidence that a discourse of "Occidentalism" emerged among Muslim scholars and literati, and the ensuing dialectic between West and East framed the introduction of a number of political and religious ideologies to the Middle East, Iran, Central Asia, and India. There will be readings and discussions of a number of different scholars and theorists - Foucault, Chakrabarty, Said - who have commented on these discourses. Equal attention will be given to those Muslim scholars - Shayaghan, Soroush, al-Ahmad - who have written and commented on these dynamics between Western and Islamic civilization.

PREREQUISITES: Any 2000 or 3000-level course in Middle East history or permission of the instructor

FORMATS: Seminar

HIST 4555 A Dream Palace or a Bitter Reality: Arab Intellectuals and Their Ideologies in the Modern Period

CREDIT HOURS: 3

From Ottoman reforms to European colonialism, from the creation of the state of Israel to the invasion of Iraq, Arab intellectuals have been constantly evaluating the weight of the past, the burdens of the present and the prospects of the future. This course examines the ideas and ideologies of Arab intellectuals of Muslim, Christian and Jewish background and those who reside in the Arab world as well as those who have made their careers in the West.

PREREQUISITES: Any 2000 or 3000 level course in Middle East history or permission of the instructor.

FORMATS: Seminar

HIST 4577 Books of Wonder, Tales of Amazement: Travel, Fantasy, and Cosmography in the Islamicate Lands, 800-1700

CREDIT HOURS: 3

This class is dedicated to examining how peoples of the Islamicate lands (primarily Muslims, but also including Jews and Christians) interacted with and represented foreign societies and associated myths and legends during the medieval and early modern period. While travel accounts will represent part of the primary source material for this course, students will also be introduced to "wonder books", cosmographical texts which represented the world with a fantastical and supernatural focus. These original texts were written in Arabic, Persian and Ottoman Turkish, but all class material will be translated into English.

CROSSLISTED: Crosslist with RELS 4577
FORMATS: Seminar

HIST 4600 Topics in Late Nineteenth- and Twentieth-Century American and British History

CREDIT HOURS: 3

This course will, depending upon the staffing in any particular year, examine a selection of themes in late 19th and 20th century British and American history, including, for instance, labour/labour history, political history (including state formation), cultural history, and history of race and national identity.

Depending upon staffing, this course may concentrate upon the history of one country or may offer a comparative aspect. It will be intended for graduate or senior undergraduate students with some background in either British, American or Canadian history. Evaluation will be through research papers and, possibly, a final exam.

PREREQUISITES: 3000-level course in modern British, American or Canadian history

CROSSLISTED: HIST 5600.03

FORMATS: Seminar

HIST 4613 Women's Suffrage from the French Revolution to World War I

CREDIT HOURS: 3

The question of women's participation in representative government first emerged during the French Revolution but by 1914, only two European countries had granted women the right to vote. This seminar explores the suffrage movement in the nineteenth century and the obstacles in the process of women's enfranchisement.

PREREQUISITES: Some background in Modern European History

CROSSLISTED: GWST 4315.03

FORMATS: Seminar

HIST 4614 Topics in the History of Sexuality

CREDIT HOURS: 3

This seminar is intended for senior undergraduates. The specific content of the course varies from year to year, with a general focus on comparative, historiographic, and theoretical issues relating to the history of sexuality. Topics may include: the rise and fall of schools of sexology as embodied by Ellis, Freud, and Kinsey; sexual violence and harassment; the commodification of sexuality; the history of the body; sexuality and colonialism; gay and lesbian subcultures; and the intersection of class, race, and gender in sexual experiences, discourses, and communities.

PREREQUISITES: HIST 2614.03 or GWST 2300.03 or HIST 2615.03 or GWST 2301.03 or HIST 3358.03 or GWST 3358.03 or GWST 2500.03 or GWST 2800.03 or HIST 3013.03 or GWST 3013 or permission of the instructor

HIST 4639 Britain, Appeasement, and the Origins of the Second World War

CREDIT HOURS: 3

This course examines Britain's response to the rise of expansionist regimes in Germany, Italy, and Japan during the 1930s. Topics of discussion will include: the historical "roots" of appeasement; Neville Chamberlain and the Munich Conference; the Foreign Office; the Treasury; the armed services and British rearmament; the press and public opinion.

PREREQUISITES: One previous British history course

FORMATS: Seminar

HIST 4710 Heritage Studies (Capstone)

CREDIT HOURS: 3

This capstone seminar provides students with the opportunity to apply the skills and knowledge gathered from the Certificate in Heritage Studies program to an institution-focused research project in Heritage Studies. The project will allow students to draw on the resources of a particular local institution (e.g., Pier 21, Nova Scotia Museum sites, Dalhousie Archives, etc.) and will culminate in the submission of a final project. Each participant will choose a local institution early on in the course. By the end of the semester, they will be required to submit a research project focused on a collection or potential collection at their organization, along with an executive summary presentation of this project.

PREREQUISITES: HIST 2950.03

FORMATS: Seminar

HIST 4971 History Honours Seminar I

CREDIT HOURS: 1.5

This seminar course, reserved for fourth-year Honours students in History, familiarizes the students with the practice of history as a research discipline. At the center of the seminar is the production of an Honours thesis as a high-quality work of research, persuasively written and generally in accordance with the standards of the historical profession. Over the course of the seminar, the students go through several stages of research and writing of their Honours theses, in

the process benefiting from the advice of their faculty supervisors, the seminar coordinator, guest speakers, and their student peers as well. Thereby, the students acquire skills crucial in the formation and work of a professional historian.
CALENDAR NOTES: Credit can only be given for this course if HIST 4971.15 and HIST 4972.15 are completed in consecutive terms and partial credit cannot be given for a single term.
PREREQUISITES: Concurrent enrolment in HIST 4991.03 and 4992.03 or instructor's permission.
EXCLUSIONS: HIST 4986.06, HIST 4983.03, HIST 4984.03
FORMATS: Seminar

Over the course of the seminar, the students go through several stages of research and writing of their Honours theses, in the process benefiting from the advice of their faculty supervisors, the seminar coordinator, guest speakers, and their student peers as well. Thereby, the students acquire skills crucial in the formation and work of a professional historian.

CALENDAR NOTES: Credit can only be given for this course if HIST 4971.015 and HIST 4972.015 are completed in consecutive terms and partial credit cannot be given for a single term.

PREREQUISITES: Concurrent enrolment in HIST 4991.03 and 4992.03 or instructor's permission.

EXCLUSIONS: HIST 4986.06, HIST 4983.03, HIST 4984.03

FORMATS: Seminar

HIST 4981 Honours Essay in History I

CREDIT HOURS: 3

All History Honours students and those in combined Honours programs in which History is their principal subject must write a substantial essay on a topic to be chosen in consultation with the undergraduate coordinator and an individual faculty supervisor.

CALENDAR NOTES: Credit can only be given for this course if HIST 4981.03 and HIST 4982.03 are completed in consecutive terms and partial credit cannot be given for a single term.

PREREQUISITES: Admission to History Honours Programme

EXCLUSIONS: HIST 4990.06

HIST 4982 Honours Essay in History II

CREDIT HOURS: 3

All History Honours students and those in combined Honours programs in which History is their principal subject must write a substantial essay on a topic to be chosen in consultation with the undergraduate coordinator and an individual faculty supervisor.

CALENDAR NOTES: Credit can only be given for this course if HIST 4981.03 and HIST 4982.03 are completed in consecutive terms and partial credit cannot be given for a single term.

PREREQUISITES: Admission to History Honours Programme

EXCLUSIONS: HIST 4990.06

History of Science and Technology Program

Science and technology shape who we are, our environments, our conditions of work and play, and what we consider to be trustworthy knowledge. The History of Science and Technology (HOST) program explores the historical, cultural, and philosophical contexts of this engagement to elucidate the nature of scientific knowledge and to understand the role of science and technology in the development of past and present societies.

HOST is an interdisciplinary program that bridges the sciences and the humanities. Our courses explore topics as diverse as the ancient origins of technology, medieval natural philosophy, alchemy and magic, ecology and the Anthropocene, the history and place of health and disease, religion and nature, the Scientific Revolution, science in movies, art and literature, and how modern science is influencing and transforming our political, cultural, and economic institutions.

HOST courses are open to all students registered at Dalhousie University or the University of King's College. We also welcome visiting students (attending on a Letter of Permission) from other universities.

Degree Options

Students registered in the BA or BSc degree at either King's or Dalhousie have two options for pursuing a degree in the HOST program: (a) the Combined Honours degree or (b) the Minor.

For general information on Bachelor of Arts program requirements, see the [College of Arts and Science](#) section of the Academic Calendar.

Staff

Dean

Andrews, J., Hons BA (McGill), MA, PhD (University of Toronto)

Director

Fraser, K., BA (*Vind*), MA (Dalhousie), MPhil, PhD (Cantab)

Teaching Staff at the University of King's College

Bennett, M., BA (*Vind*), MA (Western), PhD (McMaster)

Burke, M., BA (*Vind*), MA (Concordia), PhD (Ottawa)

Frappier, M., BScA, MA (Laval), PhD (Western)

Fraser, K., BA (*Vind*), MA (Dalhousie), MPhil, PhD (Cantab)

McOuat, G., BA, MA, PhD (Toronto)

Snobelen, S., BA (Hon), MA (Victoria), MPhil, PhD (Cantab)

Stewart, I., BSc (Trent), MA (Toronto), PhD (Cantab)

Wright, A., BA, BSc (McGill), MA, PhD (Toronto)

Teaching Staff at Dalhousie

Gass, G., BSc (Dalhousie), MA, PhD (Toronto)

Combined Honours

Pursuing an honours degree requires a higher quality of work than is required by the other undergraduate programs (such as a 120 credit hours Major). Students who intend to apply to graduate school or professional programmes (e.g. medicine or law) are especially encouraged to take a Honours degree as scholarships and program committees tend to look more favourably on students with Honours-level degrees. Choosing a Combined Honours degree enables you to pursue your studies in two disciplines, while demonstrating your seriousness and abilities as a student.

The HOST Combined Honours degree is available to students pursuing a BA, a BSc, or a Bachelor of Journalism. The Combined Honours BA or BSc degree in HOST is offered jointly by Dalhousie University and the University of King's College.

The other honours subject must be selected from the following list of Dalhousie departments and programs: Canadian Studies, Cinema and Media Studies, Classics, Creative Writing, English, Environment, Sustainability and Society, Environmental Science, French, Gender and Women's Studies, German, History, International Development Studies, Law, Justice and Society, Music, Philosophy, Political Science, Religious Studies, Russian Studies, Sociology, Social Anthropology, Spanish and Latin American Studies, Theatre, Biochemistry, Biology, Chemistry, Computing Science, Earth Sciences, Economics, Marine Biology, Mathematics, Microbiology and Immunology, Neuroscience, Oceanography, Physics, Psychology, and Statistics.

Students are encouraged to apply to the program and seek advice on course selection as early as possible, even before registering for the second year. All students must meet the degree requirements for the Faculty of Arts and Social Sciences or Faculty of

Science program as detailed in the [Degree Requirements section](#) of this calendar. For each individual student, the entire degree program, including elective courses and honours requirements, is subject to supervision and approval by the two concerned programs.

All History of Science and Technology students are encouraged to acquire (through appropriate courses) competence in languages which are relevant to their degree, interests and future plans.

The joint Dalhousie/King's History of Science and Technology Combined Honours Program is based on the general requirement that the full credits needed to graduate include:

1. In the case of a Combined Honours BSc degree, a minimum of 66 and a maximum of 84 credit hours beyond the 1000 level in the two honours subjects, but not more than 54 and no fewer than 30 credit hours being in either of them. Students may elect to complete only 24 credit hours in HOST, but require prior program approval to do so. **The larger number of honours credit hours must be in the science subject.**
In the case of a Combined Honours BA degree, a minimum of 66 and a maximum of 84 credit hours beyond the 1000 level in the two honours subjects, with no more than 48 and no fewer than 30 credit hours in either.
2. Six (6) to twenty-four (24) elective credit hours, depending on the number selected in the honours subject.
3. 12 credit hours of "core" courses in history of science: HSTC 2001.03: Ancient and Medieval Science, HSTC 3001.03: Scientific Revolution, HSTC 4001.03: Modern Science, HSTC 4600: Methodologies in the History of Science and Technology (or their equivalent). (With special permission from the Program Director HSTC 3031.03 may be substituted for one of the core courses).
4. An honours qualifying examination (see Honours Programs). BSc students must acquire this additional grade in their science subject. BA students may choose to acquire this additional grade in either honours subject with the approval of both units. In the History of Science and Technology Program, the honours thesis (HSTC 4650.03) fulfills the requirement of the honours qualifying examination.

Students will be eligible to take an "Independent Reading" course only when they reach their third or fourth year. The permission of a member of the teaching staff and the Director of the Program is necessary in order to take one of these courses, and their availability is strictly limited.

Minor in History of Science and Technology

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science, or Bachelor of Science (Medical Sciences) program.

The Minor in HOST indicates a willingness and ability to approach issues at the crossroad between the sciences and the humanities from an interdisciplinary perspective.

The Minor in HOST requires a minimum of 18 to a maximum of 27 credit hours taken at the 2000 level or above. This must include:

1. Any one of the following three core classes:
 - HSTC 2001.03: Ancient and Medieval Science (or equivalent)
 - HSTC 3001.03: The Scientific Revolution (or equivalent)
 - HSTC 4001.03: Science and Nature in the Modern Period (or equivalent)
2. 6 credit hours at the 3000 or 4000 level.

Contact [History of Science and Technology](#) for more information.

Dalhousie Selectives

HOST Selectives

Students enrolled in the Combined Honours or Minor program in HOST can opt to take a maximum of one 3-credit hour "selective" course at Dalhousie University to count toward the HOST part of their degree. The [Registrar's Office](#) at King's should be notified if students wish to pursue this option.

Approved selective for 2022/23:

- There will be no electives offered in the 2022/23 academic year.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions

NOTE: For History of Science and Technology, courses at the 2000 level are open to all students, even those in their first year of study.

Course Descriptions

HSTC 1201 Introduction to the History of Science I: from the Ancients to the Birth of the Modern

CREDIT HOURS: 3

This course covers the historical foundations of science, from ancient Babylonia to the Enlightenment. Open to first-year students and above, it can be taken as a humanities or a science course and serves as preparation for its modern counterpart, HSTC 1202.03 / HSTC 2212.03 / HIST 2076.03 / SCIE 2002.03.

CALENDAR NOTES: HSTC 1201.03 and HSTC1202.03 must normally be taken in the same academic year

CROSSLISTED: HSTC 2211.03, HIST 2075.03, SCIE 2001.03

EXCLUSIONS: HSTC 1200.06, HSTC 2200.06, HIST 2074.06, SCIE 2000.06

FORMATS: Lecture | Tutorial

HSTC 1202 Introduction to the History of Science II: From The Birth of the Modern to the Present

CREDIT HOURS: 3

This course covers the creation of modern science, from the radical changes of the Enlightenment to contemporary notions of technoscience and our place in nature and the cosmos. It follows the themes and contexts introduced in HSTC 1201.03/HSTC 2211.03/ HIST 2075.03/SCIE 2001.03. Open to first-year students and above, it can be taken as a humanities or science credit.

CALENDAR NOTES: HSTC 1201.03 and HSTC 1202.03 must normally be taken in the same academic year

PREREQUISITES: HSTC 1201.03 or permission of the instructor

CROSSLISTED: HSTC 2212.03, HIST 2076.03, SCIE 2002.03

EXCLUSIONS: HSTC 1200.06, HSTC 2200.06, HIST 2074.06, SCIE 2000.06

FORMATS: Lecture | Tutorial

HSTC 2001 Beginnings of Wisdom: Science in the Pre-modern World

CREDIT HOURS: 3

This course introduces key developments in pre-modern science. Fundamental concepts in the physical sciences, astronomy and cosmology are treated through the study of primary sources from antiquity (Near Eastern and Greco-Roman) and the medieval Islamic, Jewish and Christian cultures. We will be attentive to the wider cultural contexts in which science was pursued and to intersections between science and other ways of knowing (e.g., myth, magic, religion).

CROSSLISTED: CLAS 2001.03

EXCLUSIONS: HSTC 2000X/Y.06

FORMATS: Lecture | Seminar

HSTC 2002 Medieval Natural Philosophy: From the Roman Empire to the Age of Dante

CREDIT HOURS: 3

This course introduces key developments in medieval understandings of nature (better called "natural philosophy" than "science") through a direct engagement with primary sources. We consider how the texts and authorities of antiquity (Plato and Aristotle, most notably) were assimilated, adapted, and transformed during the Roman Empire, in Islam, and in later medieval Christian Europe. Questions such as the role of 'nature' in defining human happiness, the good life, and the character of political power will figure prominently. We will attend to the limits of 'natural' reason in relation to established disciplines like theology, as well as more contested areas of knowledge such as magic, astrology and alchemy. The approach taken will be that of intellectual history, in the sense that we will focus on fundamental concepts articulated by the authors and on careful textual exegesis, while always attentive to the wider historical and cultural contexts. Especially given that this course's authors, texts, and contexts are quite distant in time from our contemporary world, there will also be occasions for us to reflect on the challenges facing the modern inquirer into pre-modern conceptions of nature and scientific knowledge.

PREREQUISITES: HSTC 2001.03 is recommended, but not required.

CROSSLISTED: CLAS 2002.03

EXCLUSIONS: HSTC2000X/Y.06

FORMATS: Lecture | Seminar

HSTC 2011 The Lecture Series

CREDIT HOURS: 3

NOTE: Course Details listed here also apply to HSTC 3011/HSTC 4011.

CROSSLISTED: HSTC 3011.03, HSTC 4011.03

FORMATS: Lecture | Seminar

HSTC 2102 Origins of Modern Medicine

CREDIT HOURS: 3

This course looks at defining moments that led to modern health and medicine, beginning with the ancient world leading up to the development of 'modern' institutionalized medicine at the birth of the 20th Century. Focus will be on changing ideas about the causes of disease and the possibilities of medicine, but also on the broader conceptions of health, life and death and their social/cultural place. This class also stands as the Core Area Credit in the Medical Humanities Certificate Program.

FORMATS: Lecture | Seminar | Discussion

HSTC 2105 The Life, Science and Philosophy of Albert Einstein

CREDIT HOURS: 3

In 1999 *Time Magazine* named Albert Einstein "Person of the Century" for the impact his scientific work had not only on physics, but also on culture in general. In this course, we will explore how Einstein's proof of the existence of atoms, his belief in light particles (the photons), and his application of the famous principle of relativity revolutionized both modern physics and philosophy. We will also pay attention to the main events of Einstein's life (his divorce, the rise of Nazism in Germany, etc.), Einstein's pacifism and Zionism, his attitude toward religion and his personal relationships with other scientists (Poincaré, Bohr, etc.) to understand the personal, social and cultural contexts in which these revolutionary theories were developed. NO prior knowledge of physics, mathematics, or philosophy is expected. This course is for everyone with interest in science, but is not a science course (mathematics will be kept at a minimum).

FORMATS: Lecture | Discussion

HSTC 2120 Magic, Science and the Occult: from Antiquity to Postmodernity

CREDIT HOURS: 3

A perennial source of fear and fascination, magic and related forms of 'occultism' (e.g. alchemy and astrology) have been dismissed as pseudo-science and even stigmatized as 'Satanism'. This course aims to recover the original meaning of occultism from the perspective of the practitioners of magic. It explores the origins and development of the 'occult sciences', highlighting their often-overlooked contributions to the history of science, and their continuing evolution in the modern world.

CROSSLISTED: HIST 2990.03, EMSP 2360.03, RELS 2120.03

FORMATS: Lecture | Tutorial

HSTC 2202 The Beginnings of Western Medicine: the Birth of the Body

CREDIT HOURS: 3

This course will look at how the body was viewed in ancient scientific theory and practice. Western medicine as a rationalized scientific practice finds its origins in the ancient Greek philosophical and medical texts attributed to "Hippocrates". Through a close reading of selected ancient medical texts, this course will explore ideas of how the human body is constituted, how it relates to the Cosmos as a whole, what the role of the physician was seen to be, and how illness and healing were seen as changes in the balance of the components of the body.

CROSSLISTED: CLAS 2202.03

FORMATS: Lecture | Seminar

HSTC 2204 The Darwinian Revolution

CREDIT HOURS: 3

Arguably, the Darwinian Revolution marks the greatest revolution in our conception of nature and our place within it, deeply challenging received views on chance, teleology, history, the soul and nature. This course opens up the historical and philosophical background to the Darwinian revolution, the main episodes of that revolution and the consequences for contemporary moral, scientific and social theory. Emphasis will be placed on reading contemporary primary texts.

FORMATS: Lecture | Seminar

HSTC 2205 Totalitarianism and Science

CREDIT HOURS: 3

The question of who has authority over funding, direction and priorities of modern science is a central political concern. This course considers the case of totalitarian states (USSR and Nazi Germany) and consists of two parts. Part I analyses the essential features of totalitarian regimes. Part II concentrates on the fortune of particular sciences (medicine, biology, physics) under them.

CROSSLISTED: HIST 2985.03, CTMP 2205.03

FORMATS: Lecture | Tutorial

HSTC 2206 Bio-Politics: Human Nature in Contemporary Thought

CREDIT HOURS: 3

To what extent do biology and culture determine what it is to be human? Drawing on theorists ranging from Foucault to Steven Pinker, this course will examine the recent political, moral and existential issues raised by attempts to answer that question. Topics will include socio-biology, evolutionary psychology, the construction of human kinds and the problem of free will.

CROSSLISTED: CTMP 2203.03

FORMATS: Lecture

HSTC 2209 Environmentalism: origins, ideals, and critique

CREDIT HOURS: 3

In this course, we examine the ideals of environmentalism from its origins in the late 18th century to the present. Topics include the romantic critique of industrialization, forest management and sustainability, wilderness preservation, animal rights, radical environmentalism, and environmental justice.

CROSSLISTED: CTMP 2206.03

FORMATS: Lecture | Seminar

HSTC 2210 Engineering the Planet: the Anthropocene Era, from Prehistory to Today's Global Crisis

CREDIT HOURS: 3

This course explores the notion of the Anthropocene, the idea that the Earth has been significantly and permanently altered by human activity. Through the lens of environmental history, the course examines the material, social, political, and conceptual technologies used to relate and manipulate environments over the last 12 000 years.

EXCLUSIONS: HSTC 3210.03

FORMATS: Lecture | Seminar

HSTC 2211 Introduction to the History of Science I: from the Ancients to the Birth of the Modern

CREDIT HOURS: 3

This course covers the historical foundations of science, from ancient Babylonia to the Enlightenment. Open to first-year students and above, it can be taken as a humanities or a science course and serves as preparation for its modern counterpart, HSTC 1202.03/HSTC 2212.03/HIST 2076.03/SCIE 2002.03.

CALENDAR NOTES: HSTC 2211.03 and HSTC 2212.03 must normally be taken in the same academic year

CROSSLISTED: HSTC 1201.03, HIST 2075.03, SCIE 2001.03

EXCLUSIONS: HSTC 1200.06, HSTC 2200.06, HIST 2074.06, SCIE 2000.06

FORMATS: Lecture | Tutorial

HSTC 2212 Introduction to the History of Science II: From The Birth of the Modern to the Present

CREDIT HOURS: 3

This course covers the creation of modern science, from the radical changes of the Enlightenment to contemporary notions of technoscience and our place in nature and the cosmos. It follows the themes and contexts introduced in HSTC 1201.03/HSTC 2211.03/ HIST 2075.03/SCIE 2001.03. Open to first-year students and above, it can be taken as a humanities or science credit.

CALENDAR NOTES: HSTC 2211.03 and HSTC 2212.03 must normally be taken in the same academic year

PREREQUISITES: HSTC 2211.03 or permission of the instructor

CROSSLISTED: HSTC 1202.03, HIST 2076.03, SCIE 2002.03

EXCLUSIONS: HSTC 1200.06, HSTC 2200.06, HIST 2074.06, SCIE 2000.06

HSTC 2220 IDEAS OF THE SEA AND SEAFARING: INTERCULTURAL PERSPECTIVES

CREDIT HOURS: 3

A survey of intercultural ideas of the sea and seafaring from ancient to modern times. Topics include oceanic myths and origin stories, the myth of Atlantis, marine natural history, sea monsters, mermaids, the law and freedom of the sea, Black Atlantic identity, scientific sea voyages, oceanic science fiction, modern sea power, and marine conservation.

CROSSLISTED: EMSP 2490.03, CTMP 2207.03

FORMATS: Lecture | Discussion

HSTC 2310 Women and Gender in Early Modern Science

CREDIT HOURS: 3

This course will explore the roles of women, and questions about women's nature, in the development of Early Modern science. The course will consider several interrelated aspects of scientific culture in the sixteenth, seventeenth, and eighteenth centuries: first, we will look at the place of women in the scientific institutions of the time. The second part of the course will look at the contributions of some particular women to the fields of physics, astronomy, botany, and medicine. We will then examine how science interpreted sex and gender. Finally, the course will explore the ways in which gender and nature were portrayed in the broader cultural context. We will, for example, discuss the ways in which women were depicted as scientists and as symbols of science in art and literature.

CROSSLISTED: EMSP 2310.03, GWST 2310.03

FORMATS: Lecture | Seminar

HSTC 2340 The Origins of Science Fiction in Early Modern Europe

CREDIT HOURS: 3

In 1500, literate Europeans lived in a bounded, geocentric universe. By 1800, the sun had replaced the earth at the centre of a limited planetary system situated in infinite space. These changes prompted early modern philosophers, scientists and writers to consider the possibility that the universe might contain a plurality of worlds. This course will explore the ways in which the "plurality" theme was developed in some of the earliest works of science fiction. We will consider this theme as it appears in stories of intergalactic voyages, utopian societies, and encounters with extraterrestrial beings, paying special attention to the ways in which early modern writers used these tales to speculate on philosophical, political, and scientific issues.

CROSSLISTED: EMSP 2340.03

EXCLUSIONS: EMSP 2330.03

FORMATS: Seminar

HSTC 2350 The Body in Early Modern Europe

CREDIT HOURS: 3

This course will explore how the emergence of the modern self intersected with changing conceptions of the body. We will explore such topics as the rise of Renaissance anatomy; Early Modern perceptions of gender, race, and sexual difference; new explanations of madness and melancholy; monstrous and demonic bodies; representations of the diseased body; and the emergence of the modern ideal of the disciplined body.

CROSSLISTED: EMSP 2350.03

FORMATS: Lecture | Tutorial

HSTC 2400 Science and the Media

CREDIT HOURS: 3

From the first Babylonian astronomical records on cuneiform to the public understanding of science on television and the Internet, the various media have long been crucial to the success and spread of science. This course provides a history of science in the media from the ancient and medieval use of geometrical diagrams, astronomical figures and anatomical illustration through early modern printed texts, popular broadsheets and colour botanical plates all the way to the ubiquity of science in literature, cinema, journalism and online. It focusses on the technologies of communication, the use of the media by science and the ways science and scientists are represented in the media. The expanding presence of science in the media is examined against the backdrop of five revolutions: literary and artistic (writing and the visual arts), mechanical (the printing press), electric (telegraph, telephone and cinema), electronic (radio and television) and digital (computing and the Internet). Specific themes considered include the increasing accuracy of scientific illustration, the rise of scientific journals, public scientific demonstrations, science in poetry and prose fiction, science and art, radio and television documentaries, the advertising and marketing of science, scientific apocalypses and techno-utopias, bioethics, environmentalism, Soviet-era technological iconography, science fiction from Jules Verne and H.G. Wells to Jurassic Park and Interstellar, and science in computing, cyberspace and augmented reality.

CROSSLISTED: JOUR 2400.03

FORMATS: Lecture | Seminar

HSTC 2410 Imagining Artificial Intelligence

CREDIT HOURS: 3

Though the term 'artificial intelligence' was first coined in 1956, human beings have dreamt of creating intelligent machines for centuries. In this course, we will uncover the rich history of attempts to create artificial intelligence. We will begin with the automata of ancient Greece and work our way through the Islamic golden age toward the modern era of artificial intelligence research. This historical picture will be complemented by an examination of current advances in AI in several fields, including mathematical proof, policing, high-frequency trading, art, and warfare. Along the way, we will also pay close attention to the philosophical, social, and ethical implications posed by these technological developments and their applications to nearly every aspect of modern life.

FORMATS: Lecture | Seminar

HSTC 2500 Science Fiction in Film

CREDIT HOURS: 3

This course explores the ways science and technology are represented in science fiction film from the birth of cinema to today. This course uses classic and recent science fiction films as a vehicle to discuss and analyse science and technology themes of the past, present and imagined future. Themes examined include the 'mad scientist'; science as malevolent versus science as salvation; the survival of humanness in a technological world and the contrary trend of dehumanisation in the face of advancing technology; scientific utopias and dystopias; science fiction as self-fulfilling prophecy; voyages into space and inner space; time travel; computers and artificial intelligence; virtual reality; nuclear holocaust and environmental apocalypses; alien life; genetic engineering; imagined technocracies; neo-Luddism; ethics and technology; and science fiction as a vehicle for social and political commentary. Examples of films screened include classics of science fiction such as *Metropolis* (1927), *Frankenstein* (1931), *The Time Machine* (1960), *2001: A Space Odyssey* (1968), *Solaris* (1972) and *Bladerunner* (1982), along with more recent films such as *Gattaca* (1997), *Moon* (2009), *Interstellar* (2014), *The Martian* (2015) and *Arrival* (2016). These feature films will be supplemented with footage from civil defence films, government celebrations of science and technology along with science documentaries. Films will be accompanied in class by discussion and criticism. Students will also read scholarly treatments of cinematic science fiction.

FORMATS: Discussion

HSTC 2809 Making History: A Global History of Technology through reproductions from Prehistory to the First Industrial Revolution

CREDIT HOURS: 3

This course explores the reciprocal influences of technology and social, political, cultural and economic institutions from the Stone Age to the First Industrial Revolution (ca. 1800) using case studies from the history of technology and historical reproductions.

EXCLUSIONS: HSTC 1800.03

FORMATS: Lecture | Seminar

HSTC 2810 History of Chinese Science and Technology

CREDIT HOURS: 3

This course introduces central features of the history of science and technology at the heart of Chinese and East Asian history. Focus will be on and the long-term global trajectories of environmental and technological change that transformed the production of goods, the conduct of governance, and the relationships between humans and their environments.

CROSSLISTED: CHIN 2040.03

FORMATS: Lecture | Tutorial

HSTC 2811 Asia and the West: Centuries of Dialogue

CREDIT HOURS: 3

This course will explore some of the most important engagements of modern Western thinkers with various texts and traditions of East and/or South Asian thought, examine the very aspects of Asian thought that intrigued modern Western thinkers, and assess Western values and projects in their lights.

CROSSLISTED: EMSP 2390, CHIN 2082, CTMP 2102

EXCLUSIONS: EMSP 2460.03, CHIN 2080.03

FORMATS: Lecture | Seminar

HSTC 3001 The Scientific Revolution

CREDIT HOURS: 3

This course examines the history and historiography of the Scientific Revolution (1500–1800). Beginning with the late Medieval developments that prepared the ground for the Scientific Revolution, this course examines the revolutions in astronomy, medicine, physics, natural history and the earth sciences through the innovative work of such natural philosophers as Copernicus, Vesalius, Kepler, Galileo, Descartes and Boyle up to the achievement of Isaac Newton's *Principia mathematica* (1687) and *Opticks* (1704). The course then evaluates the immediate spread and legacies of Newtonianism and considers more broadly developments in astronomy, physics, chemistry, geology and the emerging life sciences along with their impact on culture and society in the Enlightenment.

EXCLUSIONS: HSTC 3000X/Y.06

FORMATS: Lecture | Seminar

HSTC 3002 Science in the Enlightenment

CREDIT HOURS: 3

This course examines the history and historiography of science in the long eighteenth century Enlightenment along with Romantic views of nature that extend into the early nineteenth century. Beginning with the Newtonian achievement in mathematics, physics and optics, this course evaluates the immediate spread and legacies of Newtonianism and then considers more broadly developments in astronomy, physics, chemistry, geology and the emerging life sciences along with their impact on culture and society.

See HSTC 2011.

CROSSLISTED: HSTC 2011.03, HSTC 4011.03

FORMATS: Lecture

HSTC 3031 Science and Culture I: The Discourses of Modernity

CREDIT HOURS: 3

This class engages one of the main questions of our modern world: what is science and how does it relate to the rest of modernity? It explores the rise of a “scientific” world view, the clashes over methodologies, the disputed meanings of technology and the oppositions between the social/cultural and the natural, introducing recent crises of rationality and its defence.

CALENDAR NOTES: HSTC 3031.03 and HSTC 3032.03 must normally be taken in the same academic year to fulfill the requirements of the HSTC Combined Honours degree.

CROSSLISTED: CTMP 3001.03

EXCLUSIONS: CTMP 3000.06/HSTC 3030.06

FORMATS: Lecture | Tutorial

HSTC 3032 Science and Culture II: Resetting the Modern

CREDIT HOURS: 3

This class follows on CTMP 3001.03/HSTC 3031.03, using case studies and recent debates within Science and Technology Studies, feminist theory, postcolonial and ecological thinking, to deepen the critical engagement with science and reset the place of science and technology in our contemporary world.

CALENDAR NOTES: HSTC 3031.03 and HSTC 3032.03 must normally be taken in the same academic year to fulfill the requirements of the HSTC Combined Honours degree.

PREREQUISITES: HSTC 3031.03 or permission of the instructor

CROSSLISTED: CTMP 3002.03

EXCLUSIONS: CTMP 3000.06/HSTC 3030.06

FORMATS: Lecture | Seminar

HSTC 3100 Aristotle's *Physics*

CREDIT HOURS: 3

The *Physics* defines nature and its study both for Aristotle and for much of the development of science and philosophy of nature in the west. The class will treat the dialectic which Aristotle finds in earlier thinkers on nature, the definition of nature, the causes, chance and necessity, time, the void, infinity and limit in nature and place. Finally, it will consider the understanding of change which is at the heart of the work as a whole. Problems in earlier considerations of nature in the ancients generally and especially in the Pre-Socratics and Plato will be treated, as well as the relation of Aristotelian arguments to the social and technological context of his time.

FORMATS: Lecture | Tutorial

HSTC 3101 Human Experiments

CREDIT HOURS: 3

This course explores the history, method, and meaning of experimenting on humans through a series of case studies that question how these experiments mediate between experimenters, their subjects, and the state and how these relationships have influenced our ideas of scientific objectivity, autonomy and consent, race, gender, and class divides.

CROSSLISTED: CTMP 3204.03

EXCLUSIONS: HSTC 3615.03 and CTMP 3411.03 for the 2017/18 academic year only.

FORMATS: Lecture | Seminar | Discussion

HSTC 3102 Plagues, Pandemics, and People: A Global History of Epidemics

CREDIT HOURS: 3

This course offers a survey of the global impact of epidemic diseases, from the bubonic plague to COVID-19. We will pay special attention to how infectious diseases--understood as biosocial events--have shaped culture, human behaviour and power relations, transformed our natural and urban environments and upset geopolitics, while leading to profound medical reforms.

FORMATS: Seminar

HSTC 3120 Distilling Nature's Secrets: The Ancient Alchemists

CREDIT HOURS: 3

This course explores the scientific and esoteric currents which contributed to the rise of alchemy in the late Ancient World. This 'sacred science' of transmutation was a cultural synthesis of Greek natural philosophy, late pagan mysticism, and Near Eastern metallurgic technologies. The physical processes enacted in the alchemical laboratory -where metals were decomposed, purified and transformed - were experienced inwardly by the alchemist himself as a spiritual drama of death and resurrection, analogous to the rites of initiation in the mystery cults. Alchemy was thus a form of ritual technology, aimed simultaneously at the purification of self and cosmos. The texts studied in the course range from technical manuals preserved on papyrus, to the highly esoteric and visionary works of the Hermetic philosopher Zosimos (circa 300CE). The relation between these technical and occult dimensions will be of central concern.

CROSSLISTED: CLAS 3120.03

FORMATS: Lecture | Seminar

HSTC 3121 In Search of the Philosopher's Stone: The History of European Alchemy

CREDIT HOURS: 3

This course traces the development of alchemical theories and practices in the Medieval Latin West up to the emergence of early modern chemistry. It employs a multi-disciplinary approach which treats the scientific, technological, esoteric and iconographic dimensions of alchemy as interdependent. The entire development of European alchemy is covered from the transmission of the Greek and Islamic alchemical traditions in the 12th century up to Newton, whose alchemical theories represent a point of transition to early modern chemistry in one direction, and to a more spiritualised occult philosophy in the other.

CROSSLISTED: HIST 3990.03, EMSP 3321.03, RELS 3121.03

FORMATS: Lecture | Seminar

HSTC 3130 The Origins of Chemistry: From Alchemy to Chemical Bonds

CREDIT HOURS: 3

This course explores the scientific and social development of modern chemistry from the work of alchemists to the chemical revolution of Lavoisier and Dalton from, the beginnings of organic chemistry and biochemistry, to the development of the periodic table, and from our early notions of atom to those of chemical bonds. Note: There is no science pre-requisite for the course.

FORMATS: Lecture | Seminar

HSTC 3150 Nature and History

CREDIT HOURS: 3

In the nineteenth and twentieth centuries, the study of the natural world and historical thought have been closely linked. Participants in the seminar will read texts which helped to define ideas of history in the era after the Enlightenment and consider how these ideas influenced, and were influenced by, developments in scientific thought. The seminar will consider how nature and history are related in idealism, historical materialism and the thinking of the evolutionists, and how this connection is rejected by Nietzsche, Freud and Foucault.

CROSSLISTED: CTMP 3250.03

FORMATS: Seminar

HSTC 3200 Science and Religion: Historical Perspectives

CREDIT HOURS: 3

This course tells the story of interactions between religious belief and the study of nature from deepest Antiquity to 1800. Beginning with an overview of the history and methodology of the study of science and religion, encounters between science and religion are traced from the dawn of civilization to the end of the eighteenth century, with a special focus on the early modern period. From an examination of the biblical view of nature and Creation, ancient Babylonian astrology and divination and Plato's Timaeus, this course moves through a treatment of the centrality of theology to Medieval science on to natural theology and the "Watchmaker" Design Argument of the seventeenth and eighteenth centuries. Models of conflict, harmony and complementarity offered to characterize relations between science and religion are explored through case studies such as the understanding of the soul, Galileo's controversy with the Church and instances where religious belief inspired natural philosophers like Boyle and Newton. Claims that certain confessional traditions (notably Protestantism and its dissenting offshoots) facilitated the rise of modern science are also appraised. Science-religion relations are examined both from the standpoint of mainstream religion and with respect to religious heterodoxy, prophecy, alchemy, magic and witchcraft. This course employs examples from Judaism, Christianity and Islam and involves the reading and discussion of primary texts.

CROSSLISTED: EMSP 3330.03, HIST 3075.03, RELS 3200.03

FORMATS: Lecture | Seminar

HSTC 3201 Science and Religion: Contemporary Perspectives

CREDIT HOURS: 3

This course tells the story of interactions between religious belief and the study of nature from 1800 to today. Beginning with an overview of the history and methodology of the study of science and religion, encounters between science and religion are traced from the rise of Darwinism in the early nineteenth century to the contemporary postmodern age. From an examination of nineteenth-century natural theology and the religious impact of Darwin's *Origin of Species* (1859), this course moves on to such contemporary topics as the religious interpretations of quantum mechanics, the Big Bang, the anthropic principle, medical science, bioethics, evolutionary psychology, chaos theory, aesthetics in nature, science fiction, extra-terrestrial life (including the SETI Project) and the quest for techno-immortality. Case studies of "conflict" emanating from Darwinism, the Scopes Trial, the on-going Creation-Evolution debates and the New Atheism are contrasted with examples of harmony and interdependence between science and religion in the careers of modern scientists, along with phenomena like neurotheology and the Intelligent Design (ID) movement. The religious scope of the course is intentionally wide-ranging, and examinations of science-religion interaction within indigenous spirituality are added to treatments of traditional eastern and western religion.

CROSSLISTED: CTMP 3201.03, RELS 3201.03, HIST 3076.03

FORMATS: Lecture | Seminar

HSTC 3202 Ecology and Religion

CREDIT HOURS: 3

This course examines the relationship between spirituality and the human encounter with the environment in history and today. Beginning with an examination of some of the ancient, Medieval and early modern religious foundations of ecology and the environmental movement, the course moves on to focus on contemporary green theology, the practice of religious environmentalism and the interaction between religious traditions and the environmental sciences and technologies. It engages with primary sources from and scholarship about Western (Abrahamic), Eastern (Dharmic) and Indigenous religions, along with twenty-first-century green theology, religious environmentalism, ecofeminist perspectives and Dark Green Religion. Grounded in the history of science and technology, this course takes an interdisciplinary approach to its themes, incorporating historical, literary, theological, political, sociological and philosophical perspectives.

CROSSLISTED: RELS 3211.03

FORMATS: Seminar | Discussion

HSTC 3205 Knowledge is Power: Francis Bacon and the Birth of Modernity

CREDIT HOURS: 3

Francis Bacon (1561-1626) helped shape our modern assumptions that natural knowledge (science) will lead to both human flourishing and political power. By reading some of his works in their late Renaissance context we will reflect on the birth of those assumptions, thus gaining a new perspective on their modern form.

CROSSLISTED: EMSP 3340.03

FORMATS: Lecture | Seminar

HSTC 3212 The Biosphere: Global Perspectives in Science and Philosophy

CREDIT HOURS: 3

Intended for both science and humanities students interested in ecology, this course will focus on the historical, philosophical and methodological aspects of central concept of "biosphere" in order to provide a picture of the history and actual state of affairs in the study of global ecology. We will address both purely scientific and philosophical topics such as the holism vs. reductionism debate; the compatibility of the global approaches with the most influential version of contemporary Darwinism (STE); pre-Socratic precedents for the notion of biosphere; modelling nature in the modern global ecology and many others.

FORMATS: Lecture | Tutorial

HSTC 3250 Going Wild: Exploring the Animal Nature of Humans

CREDIT HOURS: 3

The major concentration of this course is the question of how and to what extent evolutionary sciences can explain the brilliance and insanity of the "moral animals" including the current course of the Western civilization. We will discuss the evolutionary foundations of romantic (!) love, suicide, sports, diets, and sexual self-identification.

EXCLUSIONS: HSTC 3615.03

FORMATS: Seminar

HSTC 3270 Leonardo Da Vinci: Between Art and Science

CREDIT HOURS: 3

Leonardo da Vinci (1452-1519) moved easily between the artistic, literary, and scientific circles of Renaissance Italy. Scholars, however, often treat his art and science as competing interests. In this course, students consider the relationship between art and science, imagination and knowledge, by exploring all aspects of Leonardo's career.

CROSSLISTED: EMSP 3270.03

EXCLUSIONS: EMSP3620.03 and HSTC3611.03 for the 2017/18 academic year only.

FORMATS: Lecture | Discussion

HSTC 3301 Macromolecules—The Rise of Molecular Biology

CREDIT HOURS: 3

Molecular biology is arguably as important as quantum theory. At the beginning of the 20th century molecular biology barely existed; by the end of the century it was part of everyday life. How did this happen? We will examine how we think about biological molecules, and why—and the implications for social policy going forward.

FORMATS: Lecture | Seminar | Discussion

HSTC 3302 History of Biology

CREDIT HOURS: 3

What was life? This course explores a wide range of human attempts to understand the living world, from ancient accounts of spontaneous generation to atomic-age genetics and ecology.

CROSSLISTED: BIOL 3602.03

FORMATS: Lecture | Seminar

HSTC 3310 Hidden Worlds: Microscopy in Early Modern Europe

CREDIT HOURS: 3

Microscopes were introduced into Europe at the beginning of the seventeenth century. In the words of Robert Hooke, the microscope opened up a “new visible World” to the understanding -- a strange new landscape populated by vast numbers of new creatures. This course will explore the influence the microscope, and the micro world that it opened up, in the development of early modern science.

CROSSLISTED: EMSP 3310.03

FORMATS: Lecture | Seminar

HSTC 3320 Oracles, Omens and Astrology in the Ancient World

CREDIT HOURS: 3

In all of the cultures of antiquity there were specialists who claimed knowledge of future events based on the reading of ominous “signs” in various media, earthly and heavenly. This course examines the history of divination and astrology in Mesopotamia, Egypt, Greece and Rome from a multidisciplinary perspective.

CROSSLISTED: CLAS 3320.03

EXCLUSIONS: HSTC 2300.03

FORMATS: Lecture | Seminar

HSTC 3331 History of the Marine Sciences

CREDIT HOURS: 3

This course, traces the history of marine sciences from the antiquity to the 20th century. Topics may include ancient cosmologies, voyages of discovery, ocean circulation, and a range of scientific perspectives and technological developments that have shaped the human understanding of the oceans.

CROSSLISTED: HIST 3073.03, BIOL 4664.03, MARI 4664.03, OCEA 4331.03/5331.03, SCIE 4001.03

FORMATS: Lecture | Seminar

HSTC 3350 Art, Optics, and Technologies of Illusion

CREDIT HOURS: 3

On the basis of a wide range of technologies of vision such as camera obscura, stereoscopes, and virtual reality, this course focuses on the ways in which artistic methods and applied science have contributed to our changing understanding of perception. Ultimately, this course asks: what does it mean to “fool the eye”?

CROSSLISTED: EMSP 3350.03

FORMATS: Lecture | Discussion

HSTC 3400 The History of Mathematics

CREDIT HOURS: 3

In the history of western thought, mathematics has had a central place. Its own history has “internal” aspects, characterised by a cumulative development of great and greater complexity and a proliferation of powerful methods for solving problems which mathematics generated from within itself, and which thereby gradually transformed its very nature. However, this class will seek to regard such “internal” aspects in the context of their place within and their contribution to broader philosophical inquiries and to conceptions of how the natural world is known. Central “moments” in the history will be featured, beginning with ancient Greek mathematics through to the development of non-Euclidean geometry in the 19th-century and beyond.

FORMATS: Seminar

HSTC 3401 Technology and History in North America

CREDIT HOURS: 3

This course explores the relationship between technology and North American histories—histories of nations, of social classes, and of bodies. Topics may include colonialism; Indigenous history; feminist and women's history; industry and economy; and natural resource extraction. This course sheds fresh light on classic topics such as firearms and the fur trade. Students will experience the foundation of historical scholarship by developing a self-directed archival research project.

CROSSLISTED: HIST 3302.03

HSTC 3403 Anti-Colonial Science

CREDIT HOURS: 3

This course examines the intersections of science and colonialism, from Early Modern European colonization to today. Topics include: feminist, postcolonial, and Indigenous theories of science; how colonialism shapes science, and vice versa; and Indigenous and local resistance. This is not a course about Indigenous Knowledges, per se. This course is about how science—and the way we think about science—has been a force for and against colonialism. One theme of this course is the meanings and responsibilities of concepts including 'anti-colonial,' 'decolonial,' 'postcolonial,' especially as they relate to 'science.' Students in this course will collectively peer-review and publish an issue of the open-access course journal, *Anti-Colonial Science: A course journal*. Students will become familiar with academic publishing and learn the critical skills of writing, reviewing, and revising. In this way, students connect their engagement with the course material to their fellow students, and our wider communities.

EXCLUSIONS: HSTC 3615.03, EMSP 3620.03, CTMP 3411.03 for the 2021/22 academic year only.

FORMATS: Seminar

HSTC 3411 Feminism and Science

CREDIT HOURS: 3

Science has been the subject of intense scrutiny by contemporary feminist theorists. The course will examine the various feminist critiques of natural science, as well as the positive proposals that feminism has brought to science and scientific culture. Questions that will be addressed include: Is the style of science gendered? Has feminism influenced the content of various sciences? How has science contributed to gendered constructions of nature? Is there such a thing as value-free scientific research? How do feminist theories of knowledge differ from traditional understandings of scientific knowledge and scientific objectivity? The readings for this course will include work by Donna Haraway, Sandra Harding, Evelyn Fox Keller, Helen Longino, and Hilary Rose.

CROSSLISTED: GWST 3215.03, CTMP 3215.03

FORMATS: Seminar

HSTC 3412 Hypatia's Daughters: Women in Science

CREDIT HOURS: 3

From Hypatia to Hildegard von Bingen, from Mary Somerville to Marie Curie, this course surveys the scientific contributions made throughout history by some of the most important women scientists and natural philosophers while examining how their respective social contexts shaped their philosophical and scientific practices.

CALENDAR NOTES: This course complements, but is distinct from EMSP 2310: *Women and Gender in Early Modern Science*, which focuses on the work of early modern women scientists, and from GWST 3215: *Feminism and Science*, which focuses on questions from feminist epistemology which will only be indirectly discussed in this course.

CROSSLISTED: GWST 3412.03

FORMATS: Lecture | Tutorial

HSTC 3415 Brewing Civilization: The History, Culture and Science of Beer

CREDIT HOURS: 3

Beer and the process of brewing stand at the origins and centre of the key developments of the "West", its cultural institutions and scientific developments. This lecture/seminar class will take an interdisciplinary approach to the study of the relation between brewing history, science and culture by focusing on primary texts along with in-class reconstructions of particular experiments and activities associated with the history of brewing.

EXCLUSIONS: HSTC 3611.03 for the 2007/08 and 2013/14 academic years

FORMATS: Lecture

HSTC 3430 Experiments in the Mind: Thought Experiments in Physics

CREDIT HOURS: 3

Einstein's elevator, Schrodinger's cat, Maxwell's demon; the history of physics is full of these instructive fictions that are thought experiments. This course examines the historical contexts of many thought experiments in order to understand the different roles they have played in the conceptual development of physics from Antiquity to the present.

FORMATS: Lecture | Seminar | Discussion

HSTC 3501 The Nature of Time in Antiquity and the Middle Ages

CREDIT HOURS: 3

This course will consider views of time beginning with Mesopotamian notions of narrative, Egyptian conceptions, and the encounter between linear and circular time in Judaic thought. The vision of Greece will be brought out through epic narration, in Pre-Socratic thought, in Greek historical texts. The course will treat some central texts, in Plato on the concept of time in the soul, in Aristotle, where time becomes the measure of motion, in the willed totality in Stoic and Epicurean thought, in Plotinus, where time is grounded in a pretemporal duration. The course will then take up the relation of this duration and time to revelation, creation and conversion in Medieval Christian, Islamic and Jewish thought.

FORMATS: Seminar

HSTC 3502 The Nature of Time in the Modern World

CREDIT HOURS: 3

From the Renaissance notion of fortune to the possibility of time travel, this seminar examines the impacts our changing notions of time have had on philosophy, cultures, societies, religions, and science and technologies over the past 500 years.

FORMATS: Seminar

HSTC 3610 Studies in Ancient and Medieval Science

CREDIT HOURS: 3

Topics vary each year. Some of the topics are "Causation", "History of dissection", "Mesopotamian science", "Sciences and cultures in antiquity", "The mangle of praxis", "Ptolemy", "Ancient Method", "Embryology", "Posterior analytics", etc. For descriptions of the current year's studies topics, please contact the History of Science and Technology Program.

CALENDAR NOTES: Not more than two studies courses (one full credit) and no more than one of each course number, can be taken for credit towards the History of Science and Technology Program.

CROSSLISTED: RELS 3610.03 (for the 2010/2011 academic year only)

FORMATS: Lecture | Discussion

HSTC 3611 Studies in Early Modern Science (1500-1800)

CREDIT HOURS: 3

Topics vary each year. Some of the topics are: "Science and Society", "Popularization of Science", "Science and Religion", "Technology and Scientific instruments", etc. For descriptions of the current year's studies topics, please contact the History of Science and Technology Program.

CALENDAR NOTES: Not more than two studies courses (one full credit) and no more than one of each course number, can be taken for credit towards the History of Science and Technology Program.

FORMATS: Lecture | Discussion

HSTC 3615 Studies in Science and Nature in the Modern Period

CREDIT HOURS: 3

Topics vary each year. Some of the topics are: "The Century of the Gene", "Cybernetics", "Nazi Science", "The Political Economy of Science", etc. For descriptions of the current year's Studies topics, please contact the History of Science and Technology Program.

CALENDAR NOTES: Not more than two studies courses (one full credit) and no more than one of each course number, can be taken for credit towards the History of Science and Technology Program.

FORMATS: Lecture | Discussion

HSTC 4001 Science and Nature in the Modern Period

CREDIT HOURS: 3

This course examines the development of science in its social, philosophical, political, and cultural contexts from the end of the 18th century to the present. Topics will include the development of our contemporary notion of evidence, the debates over the "scientific method", the "historicisation of nature," the rise of "big" science, the acceptance of probabilistic accounts of the world, and the construction of human nature in modern biology. Emphasis will be on the physical and biological sciences.

EXCLUSIONS: HSTC 4000X/Y.06

FORMATS: Seminar

HSTC 4002 Science and Nature in the 20th and 21st Century

CREDIT HOURS: 3

From relativity to the human genome project, from the A-bomb to CRISPR, science has shaped our socio-political institutions, our environment, and our understanding of human nature. This course explores the conceptual debates that surrounded some of the major scientific developments of the last century and

their long-lasting, global consequences.

PREREQUISITES: HSTC 4001.03 is recommended, but not required.

EXCLUSIONS: HSTC 4000X/Y.06

HSTC 4011 The Lecture Series

CREDIT HOURS: 3

See HSTC 2011.

CROSSLISTED: HSTC 3011.03, HSTC 2011.03

FORMATS: Lecture | Seminar

HSTC 4102 Topics in Ancient Natural Philosophy

CREDIT HOURS: 3

Through the close reading of one selected ancient work, this course seeks to explore fundamental problems in ancient natural philosophy, such as: How did the ancients see the validity of their approaches to the natural world? What sorts of phenomena were seen as “natural” in antiquity? What are the limitations to textual evidence for ancient science? How did theories about the natural world inform how the ancients saw their place in the Cosmos? How did ancient social values affect views of nature?

FORMATS: Seminar

HSTC 4120 Artefacts: The Material Culture of Science and Technology

CREDIT HOURS: 3

The history of science and technology is not just about ideas, it is also about things. Through the creation of their own exhibit, students will learn how to ‘read’ artefacts, discuss the current material culture literature, study artefact conservation, and explore the challenges faced by today’s science museums.

FORMATS: Seminar

HSTC 4200 Philosophies of Technology: From Techne to Technology

CREDIT HOURS: 3

This half-year course will explore the history, structure and associated problems of our coming to be technological, beginning with an elaboration of the concept of “techne” in the ancients and its modification in the technical arts and instrumental reasoning of the Enlightenment and of 19th-century industrial ideology. Post-Enlightenment critiques polarized around the place of the machine and alienation in Karl Marx and the “question concerning technology” in Martin Heidegger will then be examined, leading up to an examination of the present state of technological discourse. In each case, we shall mark the importance of contextualising the debate by exploring the actual historical evolution of technology. Lectures will be devoted to presenting a social and historical background to the development of modern technologies whilst seminars will focus on the reading of primary texts in the field.

CROSSLISTED: CTMP 4200.03

FORMATS: Seminar

HSTC 4201 Contemporary Technologies: Living with Machines

CREDIT HOURS: 3

This half-year seminar will explore in detail the implications of powerful contemporary debates concerning the meaning and place of technology. What do we mean by technology? Can there be a philosophy of technology? What are the political and cultural ramifications of going technological? Topics will include: technological determinism in history, feminist critiques, technology and development, the meaning of expertise, technology, art and the “lifeworld”, “social construction” versus “actor-network” theory, Donna Haraway’s concept of cyborg culture and the “modern technological sublime”. The course will be conducted in seminar format with particular emphasis placed on the elucidation of historical and contemporary case-studies. Whenever possible, guest lecturers from the “real world” of technology will be invited to participate in the class.

CROSSLISTED: CTMP 4201.03

FORMATS: Seminar

HSTC 4300 Nature and Romanticism

CREDIT HOURS: 3

Kant’s “Copernican Revolution” in philosophy, ironically, marked a resurrection of a full-blown “idealist” philosophy of nature. This course will investigate the attempts of Kant’s followers to construct a natural philosophy and its engagement with the rival mechanical world picture. It explores the implications of this endeavour for the growth of romanticism, vitalism and our modern picture of “nature”. It begins with an examination of the ambiguous heritage presented by Kant’s writings on nature and proceeds through the attempts to develop a complete program of idealist *Naturphilosophie* and its spread throughout European thought by the medium of romanticist art and natural philosophy.

CROSSLISTED: HIST 5004.03, EMSP 4300.03

FORMATS: Lecture | Tutorial

HSTC 4301 The History of Neuroscience.

CREDIT HOURS: 3

This course examines the history of the attempts to find the neurobiological basis for human thought and behaviour, from the ancient world to the present. It will be of interest to honours students in History of Science and Technology, as well as honours and graduate students in Psychology and Neuroscience.

EXCLUSIONS: NESC 4587.03

FORMATS: Seminar

HSTC 4400 Newton and Newtonianism

CREDIT HOURS: 3

This seminar involves a close study of the work of Isaac Newton, along with that of his supporters and detractors. Beginning with an overview of pre-Newtonian science, topics range from Newton's rejection of Cartesianism through his contributions to mathematics, physics, astronomy and optics, along with his inductive scientific method, laws of motion and calculus priority dispute with Leibniz. Also considered are lesser-known aspects of his career, such as his secretive pursuit of alchemy, his heretical theology, his attempts to unravel the Apocalypse, his role in British statecraft and his autocratic rule of the Royal Society. A taxonomy of the forms of Newtonianism that emerged after Newton's death also allows an exploration of iconographical and apologetic uses of Newton, and his differing legacies in the Britain and France. This seminar concentrates on primary readings, including Newton's *Principia* (1687), *Opticks* (1704), alchemical treatises and unpublished theological papers, as well as the Leibniz-Clarke correspondence (1717), anti-Newtoniana and eighteenth-century popularizations of Newtonianism such as Voltaire's *Philosophical letters* (1733) and Maclaurin's *Account of Newton's discoveries* (1748). Attention is paid to the social, cultural and political aspects of Newtonianism and no prior knowledge of science is required.

CROSSLISTED: EMSP 4310.03

FORMATS: Seminar

HSTC 4510 Independent Readings in History of Science and Technology

CREDIT HOURS: 3

Students are assigned to a member of the staff for regular meetings to discuss readings in a selected area. Papers and research projects are expected.

PREREQUISITES: Honours registration in History of Science and Technology Honours program, permission of instructor and Director of program. Students must complete 60 credit hours before registering in this course.

HSTC 4511 Independent Readings in History of Science and Technology

CREDIT HOURS: 3

Students are assigned to a member of the staff for regular meetings to discuss readings in a selected area. Papers and research projects are expected.

PREREQUISITES: Honours registration in the History of Science and Technology Honours program, permission of the instructor and the Director of the program. Students must complete 60 credit hours before registering in this course.

HSTC 4600 Disputes: Methodologies in the History of Science and Technology

CREDIT HOURS: 3

This course will introduce selected methodological topics within the secondary scholarship in the field of history of science, including a consideration of select topics within the philosophy of science as these bear on the practice of the history of science.

RESTRICTIONS: Students must be registered in honours History of Science and Technology. Permission of the instructor and the Director of the program is required.

FORMATS: Seminar | Discussion

HSTC 4650 Honours Thesis in the History of Science and Technology

CREDIT HOURS: 3

In this course the student is assigned to a member of staff for regular meetings to discuss readings and present research for the purpose of completing an honours thesis in the History of Science and Technology.

PREREQUISITES: Honours registration in the History of Science and Technology, permission of the instructor and the Director of the program.

Indigenous Studies

Location:

Marion McCain Building

Website: www.dal.ca/indigenoustudies

Introduction

Students can enhance their familiarity with Indigenous peoples and nations, their cultures and languages, and the issues affecting them. Learners completing the Certificate or Minor in Indigenous Studies at Dalhousie will become familiar with local L'nuwey perspectives on historical and contemporary political, social, and economic issues.

Objectives of the Indigenous Studies program include:

- Recognizing and affirming the unceded nature of Mi'kmaw territory and nurturing scholarly work to deepen our understandings of our nation-to-nation relationship under our Peace and Friendship Treaties;
- Celebrating and supporting the renaissance in Mi'kmaw language, culture, ceremony, and other Mi'kmaw ways of being, thinking, and doing.
- Developing capacities to design and conduct community-driven and culturally relevant research with the Mi'kmaw nation, Mi'kmaw communities, Mi'kmaw people, and with other Indigenous nations and peoples;
- Imparting an appreciation for diverse ways the Mi'kmaq and other Indigenous peoples, create, understand, evaluate, share, and express knowledge;
- Nurturing the skills to critically analyze, understand, and respond to issues pertaining to the Mi'kmaq and/or to other Indigenous nations and peoples.

- INDG 4210.03: Museums, Archives & Material Culture
- INDG 4400.03: Indigenous Women & the State
- INDG 4890.03/ENGL 4890.03: Indigenous Graphic Novels

Faculty of Health

- IPHE 2201.03: Introduction to Aboriginal Peoples' Health and Healing
- HPRO 3360.03: Multicultural Health Promotion Research and Strategy
- NURS 4330.03: Community-based Participatory Research with Indigenous Populations

Faculty of Management

- MGMT 2805: Indigenous Governance

Faculty of Science

- BIOL 4003.03: Indigenous Perspectives in Conservation
- BIOL 4004.03: Principles of Indigenous Medicine

Other Faculty of Arts and Social Sciences Courses To Be Included at the Discretion of the Coordinator and Instructor *

- PHIL 2450.03: Democracy, Difference and Citizenship
- SOSA 3190.03: Social Movements
- SOSA 3183.03: Special Topics
- SOSA 3206.03: Ethnicity, Nationalism, and Race
- SOSA 4012.03: Issues in Sociology and Social Anthropology
- SOSA 4005.03: Issues in Social Justice and Inequality
- SOSA 4006.03: Issues in Critical Health Studies

[*These courses are offered regularly, but depending on the instructor in any given year, may or may not have sufficient amounts of content relevant to Indigenous Studies to be counted toward the minor.]

Courses at NSCAD, MSVU and SMU can be taken on a letter of permission and counted toward the minor, at the discretion of the coordinator. Such courses may include:

NSCAD

- AHIS 2505.03: Survey of Indigenous Art

- AHIS 3460.03: Contemporary Indigenous Art
- AHIS 3463.03: Exhibiting Indigenous Art
- AHIS 4119.03: Indigenous Self/Representation

MSVU

- HIST 3304.03: Gender and Aboriginal Peoples in Canada

SMU

- HIST/SOCI 4570: Indigenous Politics and Settler Colonialism
- SMU ACS 2345: First Nations of the Atlantic Region
- ACST 2849: Introduction to the Mi'kmaq Language

Contact [Indigenous Studies](#) for more information.

Certificate in Indigenous Studies

This certificate is open to currently registered Dalhousie students in all Faculties; it is not yet open for direct application.

The Certificate in Indigenous Studies is a 9 credit hour certificate with two core 3 credit hour courses and a choice of one of three 3 credit hour courses.

Requirements:

- HIST 2205.05/INDG 2050.03/CANA 2050.03: Historical Issues in Indigenous Studies
- INDG 2052.03/CANA 2052.03/SOSA 2052.03: Contemporary Issues in Indigenous Studies
- Plus one of the following three courses:
 - INDG 3050.03/CANA 3050.03: Indigenous Research Methodology & Knowledge Practices
 - INDG 3052.03/CANA 3052.03/SOSA 3052.03: Indigenous Social, Health, and Environmental Issues
 - IPHE 2201: Introduction to Aboriginal Peoples' Health and Healing

Students will be able to count credit earned in these courses toward their undergraduate major, minor, or distribution requirements, unless otherwise specified in their program's regulations.

Learning Outcomes:

- Students will become familiar with Indigenous perspectives on historical and contemporary political, social, and economic issues.
- Students will learn about the Indian Residential School system and the implications of the Truth and Reconciliation Commission of Canada's Calls to Action.
- Students will become familiar with Indigenous models of research.
- Students will attain basic competencies in protocols of working with Indigenous groups or in Indigenous communities.

Contact [Indigenous Studies](#) for more information.

Courses

Below you will find descriptions for courses offered in the Indigenous Studies Program at Dalhousie. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non-credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department or visit the department's website.

Course Descriptions

INDG 1000 Mi'kma'ki

CREDIT HOURS: 3

This course will provide a grounding in the unceded territory of Mi'kma'ki and the broader Wabanaki Confederacy from the perspective of the Mi'kmaq, who call themselves L'nu'k. Drawing on a number of disciplines including history, geography, and sociology, the course will support students to make connections between territory and Mi'kmaw language, culture, and identity. This course will prepare students to pursue additional work in Indigenous Studies by providing a grounding in the territory as seen from the perspective of its First People.

FORMATS: Lecture | Discussion

INDG 1002 Introduction to Indigenous Studies

CREDIT HOURS: 3

Indigenous Studies is distinguished by a commitment to serving the needs and values of Indigenous communities by prioritizing Indigenous cultural frameworks and methodologies. This course will draw on a range of Indigenous perspectives to 'unsettle' students and reframe understandings of familiar subjects. This class will provide an overview of Indigenous approaches to historical events (e.g., the Oka Resistance, Crisis at Burnt Church) and current issues (e.g. criminalization, child welfare), emphasizing how knowing is constructed, how perspectives are authorized and how values are communicated. This class will prepare students to pursue additional work in Indigenous Studies by providing a grounding in Indigenous perspectives and epistemologies.

FORMATS: Lecture | Discussion

INDG 2050 Historical Issues in Indigenous Studies

CREDIT HOURS: 3

This course is an interdisciplinary introduction to the history of encounters and relationships between Indigenous peoples and European settlers in Canada. Topics may include treaties, colonial policy, residential schools, child welfare, resettlement, and the Indian Act. This course provides the necessary background to understand contemporary Indigenous issues.

CROSSLISTED: HIST 2205.03; CANA 2050.03

EXCLUSIONS: TYPR 1750 and TYPR 1751

FORMATS: Lecture | Discussion

INDG 2052 Contemporary Issues in Indigenous Studies

CREDIT HOURS: 3

This course offers an interdisciplinary introduction to contemporary challenges faced by Indigenous peoples in Canada. Topics may include language and culture, land rights, economics, governance and treaty relationships, child welfare and education, health, social services, environmental issues, violence, criminal justice and self-determination, political mobilization and resistance, and decolonization.

PREREQUISITES: Recommended: INDG 2050.03/CANA 2050.03/HIST 2205.03

CROSSLISTED: SOSA 2052.03 and CANA 2052.03

FORMATS: Lecture | Discussion

INDG 2704 Indigenous Peoples and Media

CREDIT HOURS: 3

This course introduces students to key aspects of Indigenous cultures, legal frameworks, and the historical relationship between Indigenous nations and the state required for responsible reporting in Canada. From the Indian Act to treaty rights to the legacy of residential schools, students will gain a deeper understanding of Indigenous perspectives, Canadian history, key issues in reporting, and impacts of colonialism. Students will be able to articulate best practices in reporting on Indigenous communities and apply a critical analysis to current coverage of Indigenous stories.

PREREQUISITES: JOUR 1003.03 or JOUR 1001.06 or permission of the instructor

CROSSLISTED: JOUR 2704.03

FORMATS: Lecture

INDG 2901 Mi'kmaw Language for Non-Speakers 1

CREDIT HOURS: 3

Conversational Mi'kmaq for Non-speakers: Level I is designed for students who have no previous knowledge of the Mi'kmaw language, L'nui'sin. At the end of this course, students should have acquired conversational Mi'kmaw language skills related to everyday expressions and introductions. The focus of this course is on basic comprehension of simple Mi'kmaw phrases and some beginning speaking skills.

CALENDAR NOTES: This course is accepted toward language requirements for the Faculty of Arts and Social Sciences.

PREREQUISITES: None

FORMATS: Lecture | Discussion

INDG 2902 Mi'kmaw Language for Non-Speakers II

CREDIT HOURS: 3

Building on conversational Mi'kmaq for Non-speakers Level I: Level II is designed so that by the end of this course, students can interact in simple conversation, speak on familiar topics with little hesitation, and can create short narrations on familiar topics.

CALENDAR NOTES: This course is accepted toward language requirements for the Faculty of Arts and Social Sciences.

PREREQUISITES: INDG 2901 - Mi'kmaw Language for Non-Speakers I

FORMATS: Lecture | Discussion

INDG 3001 Indigenous Cultures & Urban Space

CREDIT HOURS: 3

This course will trouble the construction of urban space as settler territory. Stereotypes of Indigenous peoples have tended to frame them as savage in contrast to a civilized settler norm. Indeed, many Indigenous scholars have framed territory, identity, or nationhood in ways that are implicitly or explicitly pre-industrial. Despite this, contemporary Indigenous politics and activism is strongly rooted in the experience of urban Indigenous people, and half of Indigenous people in Canada now live in an urban centre. This class examines factors shaping the development of Indigenous cultural, national, or pan-national identities in urban space through a variety of scholarly and artistic media. What forms of settler colonialism do Indigenous people confront in urban space? What social and cultural factors led to the emergence of the American Indian Movement or Idle No More? What questions are raised or answered by a photo series such as 'Concrete Indians'?

FORMATS: Lecture | Discussion

INDG 3002 Topics in Indigenous Studies

CREDIT HOURS: 3

This course will examine significant themes in Indigenous Studies in Canada. As the particular topics to be discussed will vary from year to year, students are advised to consult with the home department for information.

FORMATS: Lecture | Seminar | Discussion

INDG 3003 Topics in Indigenous Studies

CREDIT HOURS: 3

This course will examine significant themes in Indigenous Studies internationally. As the particular topics to be discussed will vary from year to year, students are advised to consult with the home department for information.

FORMATS: Lecture | Discussion

INDG 3005 Science Topics in Indigenous Studies

CREDIT HOURS: 3

This course will examine significant scientific themes in Indigenous Studies. As the particular topics to be discussed will vary from year to year, students are advised to contact the department for more information at INDG@dal.ca.

FORMATS: Lecture | Discussion

INDG 3050 Indigenous Research Methods

CREDIT HOURS: 3

This course examines the methods and practices used for research with Indigenous groups or communities, and explores their ethical and political aspects.

Topics will cover the history of research relationships with Indigenous groups or communities, community-based research approaches, research ethics, the political, cultural, and practical aspects of conducting research with groups or communities, research protocols, research agreements, data collection and analysis, and the OCAP® (ownership, control, access, and possession) principle.

PREREQUISITES: CANA 2050.03/HIST 2205.03 or CANA 2052.03/SOSA 2052.03 or permission of instructor

CROSSLISTED: CANA 3050.03

FORMATS: Lecture | Discussion

INDG 3052 Indigenous Social Health and Environmental Issues

CREDIT HOURS: 3

This course offers an interdisciplinary overview of contemporary social, health, and environmental issues impacting Indigenous peoples in Canada. Topics will include an exploration of the human rights of Indigenous peoples, social statistics, food sovereignty, health and well-being in Indigenous communities, connection to place, impact of environmental degradation and land dispossession, Indigenous knowledge and the environment, politics and political activism.

PREREQUISITES: A previous course in Indigenous Studies is recommended, eg. INDG 2050.03/CANA 2050.03/HIST 2205.03 or INDG 2052.03/CANA 2052.03/SOSA 2052.03

CROSSLISTED: SOSA 3052.03; CANA 3052.03
FORMATS: Lecture | Discussion

INDG 3212 Indigenous Visual and Material Culture of North America

CREDIT HOURS: 3

Ceremonial and creative expression has been part of Indigenous cultures since time immemorial. However, only in recent years have these forms of expression been considered by art historians and historians for their beauty and importance. This course explores Indigenous visual and material culture from pre-contact to present, and from east to west coasts across Turtle Island (North America), engaging with themes of the Ancient World, colonialism, inclusion, regionalism, artistic crossroads, modernity, power, and cross-cultural exchanges.

CROSSLISTED: HIST 3212

FORMATS: Lecture | Seminar

INDG 3215 Indigenous Textiles in Canada: Tourism, Industry, Identity

CREDIT HOURS: 3

The making of textiles by Indigenous peoples serves as a way for communities and individuals to pass on traditional knowledges and ways of knowing from grandparent to parent to child and between community members. However, during industrial development, globalization, and European settlement, Indigenous textile producers adapted to the many changes imposed upon them, altering how they made and used textiles, all the while sustaining cultural traditions. This course explores the practices of making and the uses of textiles as cultural and spiritual objects, as commodities, and as objects of resistance, repatriation, and reconciliation.

CROSSLISTED: HIST 3215.03

FORMATS: Lecture | Discussion

INDG 3247 Métis Histories and Culture

CREDIT HOURS: 3

This course explores Métis History and Culture in North America from its historical development in relation to the fur trade to current social and political issues, interrogating ideas of membership, identity, and race-shifting. Topics include Métis diversity, ethnogenesis, mobility, resistance, resilience, dispossession, displacement, and relocation.

CROSSLISTED: HIST 3247

FORMATS: Lecture | Seminar

INDG 3400 Contemporary Indigenous Art

CREDIT HOURS: 3

This course examines a range of contemporary artistic expression by Indigenous people from nations across North America. Works examined may include painting, sculpture, hip hop, textile, and video. Focus will be on how Indigenous artists respond to contemporary issues of identity, politics, and culture.

CROSSLISTED: CANA 3400

EXCLUSIONS: CANA 3001.03

FORMATS: Lecture | Discussion

INDG 3401 Indigenous Representation in Film

CREDIT HOURS: 3

This course offers an overview of issues shaping the portrayal of Indigenous peoples in film. Focus will be on developing a critical understanding of Indigenous representation in political and cultural context. Films examined will span the silent to contemporary film era, and will include Indigenous cinema. Some of the videos included in this syllabus will contain sexual, violent, racist, sexist, and otherwise disturbing content.

CROSSLISTED: CANA 3401; FILM 3401

EXCLUSIONS: CANA 3002.03

FORMATS: Lecture | Discussion

INDG 4000 Seminar in Indigenous Studies

CREDIT HOURS: 3

This course will examine, in depth, a single issue, topic or theme in Indigenous Studies that crosses disciplinary borders. Topics will vary from year to year; please consult the online timetable listing or the Coordinator of the Indigenous Studies minor for details.

FORMATS: Seminar

INDG 4001 Treaty in Contemporary Society

CREDIT HOURS: 3

Treaty is the foundation of the Canadian state, and Dalhousie University's land acknowledgement states that "we are all treaty people." Despite the growing visibility of land acknowledgements, few outside the field of Aboriginal law study treaties closely or relate them to contemporary life in treaty territory. This course will examine archival treaty documents, critically analyze and discuss the contents of treaties in depth, and relate that analysis to the growing scholarship on treaties in Canada. More broadly, the course examines the question of what role treaties—past and present—have in reconciling relationships between Indigenous nations and the settler states that occupy their territories.

FORMATS: Lecture | Discussion

INDG 4002 Land, Territory, and Community Development

CREDIT HOURS: 3

Settler constructions of Indigeneity are frequently rooted in the past, with authenticity determined by how closely Indigenous identity or cultural expression relates to a pre-contact standard recorded from a settler perspective. In *Delgamuukw v. British Columbia*, for example, lawyers opposing the land claim of the Gitksan and Wet'suwet'en nations argued there had been no sufficient, continuous, and exclusive Indigenous occupation of the territory, because the claimants ate pizza and drove motor vehicles. This course will draw on news media, stories, poetry, and film to ask: How are Indigenous people framing their relationship between land and identity? How have events like the Oka Resistance drawn connections between identity, nationhood, and development?

FORMATS: Lecture | Discussion

INDG 4003 Indigenous Perspectives in Conservation Biology

CREDIT HOURS: 3

This two week field course takes a holistic approach to conservation biology. Paradigms and frameworks in native science are discussed in conservation study hotspots, in outdoor and indoor classrooms, and laboratories in First Nations' territories. Native knowledge systems from Turtle Island are explored to highlight the roles and duties indigenous peoples have with attention to Canada's colonial framework and the treaties.

CALENDAR NOTES: Intensive summer field course. Multiple overnight trips. Auxiliary fee charged to cover field expenses. Application and deposit required for permission to register. See www.seaside.science.dal.ca for details.

CROSSLISTED: BIOL 4003

RESTRICTIONS: Requires permission of instructor

FORMATS: Lecture | Lab | Experiential Learning | Other (explain in comments)

INDG 4004 Principles of Indigenous Medicine

CREDIT HOURS: 3

A holistic, two-eyed seeing course highlighting indigenous medicine's principles in ceremony, concepts of health and wellness, biochemistry, ethnopharmacology, practice and discovery. This course introduces indigenous ways of knowing medicine, important natural products, their biosynthesis, the drug discovery process, synthetic biology and indigenous style formulations and medicine practices.

PREREQUISITES: Recommend that students have completed the second year requirements of a degree program. Override permitted with instructor permission.

CROSSLISTED: BIOL 4004

FORMATS: Lecture | Discussion | Experiential Learning

INDG 4200 Topics in Experiential Travel Experience-Prep

CREDIT HOURS: 3

This course will prepare students for travel to an Indigenous community outside Mi'kma'ki. Pre-travel coursework in Halifax will examine the history of the chosen destination. Content may examine the ongoing impact of colonialism, and the connection of that history and impact to colonialism in Canada. Issues of reconciliation will be discussed in light of this shared history. Students will develop critical thinking and consensus building skills. This course must be completed prior to participating in INDG 4201: Topics in Experiential Travel Experience-Travel. This is a general topics course and destinations will change from year to year. Contact the Department for more details.

PREREQUISITES: INDG 2050/CANA 2050/HIST 2205.03 and SOSA/CANA/INDG 2052.03. Plus an additional 6 credit hours of INDG courses (12 cr hrs total)

FORMATS: Seminar | Experiential Learning

INDG 4201 Topics in Experiential Travel Experience-Travel

CREDIT HOURS: 0

Students will travel to an Indigenous community outside Mi'kma'ki to gain first-hand experience. Students will meet with peers, sit in on classes at partner universities, and engage with the local community. INDG 4200: Topics in Experiential Travel Experience-Prep, must be completed prior to travel. This is a general topics course and destinations will change from year to year. Contact the Department for more details.

PREREQUISITES: INDG 4200, INDG 2050/CANA 2050/HIST 2205.03 and SOSA/CANA/INDG 2052.03. Plus an additional 6 credit hours of INDG courses (15 cr hrs total)

FORMATS: Seminar | Experiential Learning

INDG 4202 Directed Readings in Indigenous Studies

CREDIT HOURS: 3

Readings and research in Indigenous Studies on selected topics. In exceptional circumstances, and with the permission of both the Indigenous Studies Coordinator and the Instructor concerned, students may arrange to take appropriate courses for credit in Indigenous Studies that are not otherwise available as one term courses in Indigenous Studies.

PREREQUISITES: Permission of the Indigenous Studies Coordinator and Instructor. Signature Required.

FORMATS: Other (explain in comments)

INDG 4210 Museums, Archives, and Material Culture

CREDIT HOURS: 3

This course critically explores the ideas of the modern museum, archives, and material culture as significant avenues through which history, culture, and society are formed, disseminated, and perpetuated. The course is divided into three sections, which will consider the establishment of the survey museum through to contemporary digital museums, the difficulties and benefits of archival work for researchers, and the importance of material culture as an alternative and addition to text-based learning.

CROSSLISTED: HIST 4210.03

FORMATS: Seminar

INDG 4400 Indigenous Women and the State

CREDIT HOURS: 3

In this course, we will study systemic factors shaping the lives of Indigenous women in Canada, with a focus on Indigenous identity, cultural, political, and ceremonial involvement, Indian status, access to treaty rights, and experiences of poverty and violence.

CROSSLISTED: GWST 4400

EXCLUSIONS: INDG 4000 taken in 2019/2020 or 2020/2021.

FORMATS: Lecture | Discussion

INDG 4600 Seminar in Indigenous Studies

CREDIT HOURS: 3

This course will examine, in depth, a single issue, topic or theme in Indigenous Studies that crosses disciplinary borders. Topics will vary from year to year; please consult the online timetable listing or the Coordinator of the Indigenous Studies minor for details.

FORMATS: Seminar | Other (explain in comments)

International Development Studies

Location:

Marion McCain Building
6135 University Avenue
Room 3038
PO BOX 15000
Halifax NS
B3H 4R2

Phone Number: (902) 494-3814

Fax Number: (902) 494-2105

Email Address: IDS@dal.ca

Website: www.dal.ca/ids

Introduction

International Development Studies is an interdisciplinary program involving the study of poverty, inequality, social change and justice in a global context. The IDS program is structured around two broad axes: development theory/practice, and the global/local. Areas of teaching expertise among the core faculty in IDS include development theory, structural and intersectional forms of power, including gender, caste, race, and class, activism, culture, democracy, human security, rural development, agriculture, migration, violence, children and youth, health, Indigenous peoples, participatory development and global citizenship. Additional areas of expertise are drawn from over 40 cross-appointed and adjunct faculty members who teach IDS approved courses and/or supervise our honours thesis and graduate students.

The department's areas of expertise include many of the key regions of the developing world, particularly Africa, Asia, Latin America and the Caribbean. We take a broad view of development - including development issues within Canada as well as the global South.

We offer a diverse set of opportunities for students to participate in experiential learning in both Canadian and international contexts. Experiential learning enables students to focus on skills development in a range of areas: language development, research, writing, managerial, etc. Through our experiential learning opportunities, students can volunteer or intern in Halifax, East Africa, Cuba, and many other locations. Students are encouraged to draw upon international development experiences from overseas linkage programs through Dalhousie and local Halifax community organizations.

As an interdisciplinary program, IDS recommends students consider combined degree programs. Students are therefore encouraged to enter the combined honours, double major or minor programs, which provide opportunities that further integrate their IDS studies with those of an approved arts or science field, e.g. IDS and History, IDS and Biology. Double majors and combined honours degrees provide additional opportunities for students to pursue graduate studies in more than one area.

Students with backgrounds in sciences are also welcome in this program as topics in international development cut across all disciplines from anthropology to animal science.

The interdisciplinary nature of the program requires that students take a number of credits outside the IDS department as IDS approved courses in other departments. The first year of study at Dalhousie is dedicated to completing first year requirements. IDS students are encouraged to take a broad range of disciplines in their first year to prepare them for the interdisciplinary format of the program. First year students are encouraged to participate in numerous student-led organizations related to International Development. Other events and activities are advertised on the IDS website and Facebook page. Information can be obtained from the IDS office.

Students are encouraged to acquire competence in a relevant language in addition to English (e.g. Arabic, French, Spanish) and Economics. Research design and basic statistics courses (e.g. POLI 3492/POLI 3493 or SOSA 3402/SOSA 3403) are also useful skills to acquire throughout the IDS degree.

Degree Programs

In addition to the departmental requirements listed below, students must satisfy the requirements outlined in the Degree Requirements for [College of Arts and Science](#).

The IDS Department offers the following undergraduate degree options:

IDS as the second subject of study

1. Minor in IDS (30 IDS credit hours required)
2. Double Major with IDS as the second subject (30 IDS credit hours required)
3. Combined Honours with IDS as the second subject (30 IDS credit hours required)

IDS as the primary subject of study

1. BA (90 credit hours) Minor in IDS (18 IDS credit hours required)
2. BA (120 credit hours) Double Major in IDS as the primary subject (30 IDS credit hours required)
3. BA (120 credit hours) Major in IDS (36 IDS credit hours required)
4. BA (120 credit hours) Combined Honours in IDS + a second subject: (42 IDS credit hours required)
5. BA (120 credit hours) Concentrated Honours in IDS (54 IDS credit hours required)

First Year Recommended Courses

To enter any of the IDS undergraduate degree programs, students should have completed 30 credit hours and are strongly recommended to fulfill the first year requirements outlined in the Degree Requirement section of this calendar. Students who intend to pursue degrees in IDS are encouraged to take first year courses that will both fulfill their first year requirements and contribute to their broad understanding of international development issues. Students are highly encouraged to take INTD 1102.03/CANA 1102.03 (Halifax and the World) and INTD 1103.03/CANA 1103.03, which can be used to satisfy either the first year social science or humanities requirement. Students who are considering a double major or combined honours program in IDS and another discipline are also encouraged to take any pre-requisite courses for upper level courses in the other discipline. The following courses provide background to key issues or basic skills related to International Development Studies, but are not pre-requisites for upper level IDS courses:

Social Science Requirement: INTD 1102/CANA 1102, INTD 1103/CANA 1103, ECON 1101/ECON 1102; GWST 1010/GWST 1015; HIST 1501/HIST 1502, HIST 1701/HIST 1702; POLI 1010, POLI 1015, POLI 1050, POLI 1055, POLI 1103, POLI 1100; SOSA 1002, SOSA 1003, SOSA 1050, SOSA 1100, SOSA 1200; King's FYP.

Humanities Requirement: INTD 1102/CANA 1102, INTD 1103/CANA 1103, HIST 1501/HIST 1502, HIST 1701/HIST 1702; GWST 1010/GWST 1015; RELS 1001/RELS 1002; PHIL 1000; ENGL 1000, ENGL 1040, ENGL 1041; RUSN 1020/RUSN 1070; King's FYP.

Physical Science Requirement: SUST 1000, SUST 1001; ECON 1101/ECON 1102; ENVS 1000; EARTH 1060; PSYO 1021, PSYO 1022.

Language Requirement: French, Spanish, Arabic, Chinese, Italian, Russian.

Writing Requirement: HIST 1005; POLI 1103; SOSA 1050; SUST 1000; PHIL 1010; ENGL 1010, ENGL 1020, ENGL 1040, ENGL 1045, ENGL 1050, ENGL 1100; King's FYP.

IDS Honours Program

The IDS Honours program is designed for students with a demonstrated aptitude for advanced study in the field. The major requirements for the IDS Honours Program is an Honours Thesis, which students submit as part of the requirements for INTD 4401/4402.

- Admission to the IDS Honours program is based on academic performance and a writing sample. Applicants normally should have achieved an overall Grade Point Average (GPA) of at least 3.30 (B+) or better and a minimum B+/A- in all IDS and IDS-approved courses to be considered for admission. In the case of a combined degree, these same requirements must be met in the second major subject
- The deadline for Departmental Honours Applications is January 31 of a student's third year of study. Consult the IDS Department website dal.ca/ids for information on how to apply to the honours program.
- Successful applicants must be registered in both the Fall and Winter Honours Thesis courses, INTD 4401 and INTD 4402. These are two classes that constitute a multi-term course and both must be successfully completed to earn an Honours degree in International Development Studies.

BA (120 credit hour) Double Major in IDS and a second subject

Advanced Courses Required:

- INTD 2001.03 Global Justice and Development I, INTD 2002.03: Global Justice and Development II
- INTD 3002.03: Development Practice or INTD 3003.03: Development and Activism: Methods of Organization, Manifestation and Dissent

- INTD 4401 Fall Honours Thesis Course A, INTD 4402 Winter Honours Thesis Course B
- Three credit hours of INTD with theory content at the 3000 or 4000 level; that is, any INTD course at the 3000 or 4000 level excluding INTD 3002, INTD 3003, INTD 3118, INTD 3119, INTD 3109 and INTD 4401.03, INTD 4402.03.
- 12 credit hours of INTD and/or IDS approved courses at the 2000 level or above, at least six of which need to be taken from departments other than IDS (see list of [IDS approved courses](#)).
- 12 credit hours of INTD and/or IDS approved courses at the 3000 level or above.

In total, a minimum of 36 and a maximum of 48 credit hours in IDS are required. A minimum of 60 and a maximum of 84 credit hours at the 2000 level or above are required in the two major fields, with at least 18 credit hours at the 3000 level or above.

Double Major - IDS as the second subject

Advanced Courses Required:

- INTD 2001.03 Global Justice and Development I, INTD 2002.03: Global Justice and Development II
- INTD 3002.03: Development Practice or INTD 3003.03: Development and Activism: Methods of Organization, Manifestation and Dissent
- Three credit hours INTD with theory content at the 3000 or 4000 level: that is, any INTD course at the 3000 or 4000 level, excluding INTD 3002, INTD 3003, INTD 3118, INTD 3119, INTD 3109 and INTD 4401, INTD 4402.
- 12 credit hours of INTD and/or IDS approved courses at the 2000 level or above (See list of [IDS approved courses](#)).
- Six credit hours of INTD and/or IDS approved courses at the 3000 level or above.

In total, a minimum of 30 and a maximum of 42 credit hours in IDS are required, with at least 18 credit hours at the 3000 level or above.

BA (120 credit hour) Major in International Development Studies

Advanced Courses Required:

- INTD 2001.03 Global Justice and Development I, INTD 2002.03: Global Justice and Development II
- INTD 3002.03: Development Practice or INTD 3003.03: Development and Activism: Methods of Organization, Manifestation and Dissent
- Three credit hours INTD with theory content at the 3000 or 4000 level; that is, any INTD course at the 3000 or 4000 level excluding INTD 3002, INTD 3003, INTD 3118, INTD 3119, INTD 3109 and INTD 4401, INTD 4402.
- 18 credit hours of IDS and/or IDS-approved courses at the 2000-level or above, at least of which must be taken from departments other than IDS. (See list of [IDS approved courses](#)).
- 18 credit hours of IDS and/or IDS-approved courses at the 3000 level or above.

In total, a minimum of 36 and a maximum of 54 credit hours in IDS are required.

BA (120 credit hour) Combined Honours in IDS and a second subject

Advanced Courses Required:

- INTD 2001.03 Global Justice and Development I, INTD 2002.03: Global Justice and Development II
- INTD 3002.03: Development Practice or INTD 3003.03: Development and Activism: Methods of Organization, Manifestation and Dissent
- INTD 4401.03 Fall Honours Thesis Course A, INTD 4402.03 Winter Honours Thesis Course B
- At least three credit hours INTD with theory content at the 3000 or 4000 level; that is, any INTD course at the 3000 or 4000 level excluding INTD 3002, INTD 3003, INTD 3118, INTD 3119, INTD 3109 and INTD 4401, INTD 4402
- 18 credit hours of INTD and/or IDS courses at the 2000 level or above. Students must take at least six credit hours of IDS approved courses from departments other than IDS.
- Six credit hours of INTD and/or IDS approved courses at the 3000 level or above.

In total, a minimum of 42 and a maximum of 48 credit hours in IDS are required, with at least 18 credit hours at the 3000 level or above.

Combined Honours with IDS as the second subject

Advanced Courses Required:

- INTD 2001.03 Global Justice and Development I, INTD 2002.03: Global Justice and Development II
- INTD 3002.03: Development Practice or INTD 3003.03: Development and Activism: Methods of Organization, Manifestation and Dissent
- Three credit hours INTD with theory content at the 3000 or 4000 level; that is, any INTD course at the 3000 or 4000 level excluding INTD 3002, INTD 3003, INTD 3118, INTD 3119, INTD 3109 and INTD 4401, INTD 4402.
- 12 credit hours of INTD and/or IDS approved courses at the 2000 level or above. At least six credit hours of IDS approved courses must be taken from departments other than IDS (see list of [IDS approved courses](#)).
- 6 credit hours of INTD and/or IDS approved courses at the 3000 level or above.

In total, 30 credit hours in IDS are required, with at least 18 credit hours at the 3000 level or above.

BA with Concentrated Honours in International Development Studies

Advanced Courses Required:

- INTD 2001.03 Global Justice and Development I, INTD 2002.03: Global Justice and Development II
- INTD 3002.03: Development Practice or INTD 3003.03: Development and Activism: Methods of Organization, Manifestation and Dissent
- INTD 4401.03: Fall Honours Thesis Course A, INTD 4402.03 Winter Honours Thesis Course B
- Three credit hours INTD with theory content at the 3000 or 4000 level; that is, any INTD course at the 3000 or 4000 level excluding INTD 3002, INTD 3003, INTD 3118, INTD 3119, INTD 3109 and INTD 4401, INTD 4402.
- 18 credit hours of INTD and/or IDS-approved courses at the 2000 level or above. Students must take at least six credit hours of IDS approved courses from departments other than IDS.
- 18 credit hours of INTD and/or IDS approved courses at the 3000 level or above. (See list of [IDS-approved courses](#)).

In total, a minimum of 54 and a maximum of 66 IDS credit hours are required.

BA (90 credit hour) Minor in IDS

See the [Minor in International Development Studies](#) section of this Calendar

Conversions

Students who have completed a 90 credit hour degree can upgrade to a 120 credit hour major or double major degree. Students who have completed a Major in IDS can upgrade to an honours degree (pending acceptance to the IDS honours program). The requirements for conversions are as follows:

BA Major Conversion in International Development Studies

Dalhousie graduates who wish to upgrade their qualifications from a 90 credit hour minor to a 120 credit hour Major degree may enter this program. Students must complete the full set of 120 credit hour Major requirements, usually by taking 30 additional credit hours.

BA Honours Conversion in International Development Studies

Dalhousie graduates who wish to upgrade their qualifications from a 90 credit hour minor or a 120 credit hour major or double major degree to a 120 credit hour Honours degree may enter this program if they meet the conditions for admission to the Honours program. Students must complete the full set of Honours requirements. Students interested in this program should consult the Undergraduate Advisor.

IDS Approved Courses from Other Departments

NOTE: Some courses are not offered every year so please consult the current timetable, in addition to the calendar, when registering.

Arabic

ARBC 2100.03: A Cultural Introduction to the Arab World.

Arts & Social Sciences

ASSC 3150.03: Intercultural Communication

Canadian Studies

- CANA 2050.03: Historical Issues in Indigenous Studies
- CANA 2052.03: Contemporary Issues in Indigenous Studies
- CANA 3050.03: Indigenous Research Methodology & Knowledge Process
- CANA 3052.03: Indigenous Research Methodology & Knowledge Practices
- CANA 3400.03: Contemporary Indigenous Art
- CANA 3401.03: Indigenous Representation in Film

Contemporary Studies

- CTMP 2115.03: Conception of Race in Philosophy, Literature and Art
- CTMP 2322.03: The Experience of Others in Philosophy, History and Literature
- CTMP 3103.03: Critiques of Modernity
- CTMP 3130.03: The Thought of Michel Foucault
- CTMP 3311.03: Culture, Politics and the Post Colonial Condition
- CTMP 4125.03: Hannah Arendt: Terror, Politics, Thought.

Biology

The importance of an understanding of biology for informed contribution to sustainable development cannot be over-emphasized.

- BIOL 3065.03: Conservation Biology
- BIOL 3226.03: Plants and Civilization
- BIOL 3601.03: Nature Conservation
- BIOL 4065.03: Sustainability and Global Change
- BIOL 4160.03: Political Ecology

Economics

A grasp of economic frameworks whereby societies allocate resources (human resources and capital) is a prerequisite for understanding development plans and national prospects, development projects and foreign aid, and the constraints and possibilities for sustainable development.

- ECON 2213.03: Emerging Giants: The Economic rise of China and India
- ECON 2216.03: Economics of Global Warming
- ECON 2334.03: Globalization and Economic Development: Current Debates
- ECON 2336.03: Regional Development
- ECON 2850.06: The Science and Economics of climate Change
- ECON 3310.03: Economic Growth in Historical Perspective
- ECON 3317.03: Poverty & Inequality
- ECON 3330.03: International Trade
- ECON 3331.03: International Finance
- ECON 3332.03: Resource Economics
- ECON 3333.03: Theories of Economic Development
- ECON 3335.03: Environmental Economics
- ECON 3349.03: History of Economic Thought
- ECON 4317.03: Poverty and Inequality
- ECON 4360.03: Ethics, Justice and Economics

English, French and Spanish

Language skills are obviously important for effective communication for those wishing to pursue international development studies; but through the study of languages and literature, important insights about culture and development experience are also to be gleaned. The IDS program encourages students minimally to study one additional (relevant) language to English.

English

- ENGL 2005.03: World Literature
- ENGL 2090.03: Literature, Multiculturalism, and Identity
- ENGL 3003.03: Critical Theory
- ENGL 3086.03: Post-Colonial Literatures
- ENGL 3087.03/CHIN 3080.03: Literature of the Asian Diaspora: Language and Identity in Asian North American Literature.

French

- FREN 3125.03: Le Monde francophone/The French-Speaking World
- FREN 3150.03: Aspects de la francophonie/Aspects of the Francophone World
- FREN 3175.03: Topical Issues in Francophone/Thèmes de la francophonie

Please note: Some courses in the French Department's Dijon Study Abroad Program are likely to be eligible for IDS credit. Consult the undergraduate advisor to determine eligibility.

Spanish

- SPAN 2069.03: Central America to 1979 From Conquest to Revolution
- SPAN 2070.03: Mexico and Central America since 1979: From Revolution to Drug wars
- SPAN 2109.03: Cuba from Colonial Times to 1961
- SPAN 2110.03: Cuban Revolution 1961 - the Present
- SPAN 2130.03: Latin American Dictators: From Fact to Fiction
- SPAN 2200.03: Latin American Culture: From the Maya to the 21st Century
- SPAN 3408.03: The Cuban Development Model

Students are able to receive either INTD or SPAN credits.

- SPAN 3301.03/SPAN 3302.03/SPAN 3303.03/SPAN 3304.03/SPAN 3306.06: The Cuba Program at FLACSO (Facultad Latino Americana de Ciencias Sociales Programma Cuba), The University of Havana

Students are able to receive either INTD or SPAN credits.

- SPAN 3310.06: Cuban Culture & Society
- SPAN 3408.03: The Cuban Development Model

Environmental Studies

Most environmental scientists have primary expertise in a particular discipline and work cooperatively with specialists from other disciplines to solve environmental problems. Dalhousie now offers a minor in both environmental studies and science. However, current programs that also provide courses emphasizing environmental subjects include Earth Science (geology and hydrogeology), marine biology and POLI 3585.03.

- ENVS 3220.03: International Environmental law for Scientistss
- ENVS 3501.03: Environmental Problem Solving I
- ENVS 3502.03: Environmental Problem Solving II: The Campus as a Living Laboratory.
- ENVS 4001.03: Environmental Impact Assessment
- EARTH 2410.03: Environmental & Resource Management
- EARTH 3410.03: Enhanced Environmental Geology
- GEOG 2070.03: Area Studies on Mexico and Central America
- GEOG 2201.03: Intro to Development Studies
- GEOG 2202.03: Intro to Development Studies II

- GEOG 2206.03: Africa: An Introduction
- GEOG 2800.03: Climate Change
- GEOG 3165.03: Peoples and Cultures of the World: Selected Area Studies

Gender and Women's Studies

It is important to recognize the implications of gender issues and to be sensitive to how these are viewed in different cultural circumstances. Hence, students are strongly encouraged to participate in at least one of the following GWST courses.

- GWST 2412.03: Human Sexuality
- GWST 3006.03: Comparative Perspectives on Gender and Work
- GWST 3168.03: Issues in Latin American Society
- GWST 3426.03: Sex and the State
- GWST 3503.03: Human Rights Foundations
- GWST 3600.03: Sexualization of Western Political Thought
- GWST 4116.03: Contemporary Issues in Gender and Development
- GWST 4211.03: Gender and Development Theory, Concepts, and Methods
- GWST 4400.03: Indigenous Women and the State

History

Just as people need to know who they are and how they arrived there, groups, races, courses, states and nations need a sense of their own past as part of their culture and to guide their future development choices.

- HIST 2006.03: The Atlantic World, 1450-1650: European Colonization of the Americas
- HIST 2007.03: The Atlantic World, 1650-1800: European Empires in the Americas
- HIST 2021.03: Soviet Russia
- HIST 2205.03: Historical Issues in Indigenous Studies
- HIST 2381.03: Latin America
- HIST 2382.03: Central America to 1979
- HIST 2383.03: Area Studies on Mexico and Central America
- HIST 2384.03: Cuba from Colonial Times to 1961
- HIST 2385.03: Cuban Revolution, 1961 - Present
- HIST 2386.03: Colonial Latin America
- HIST 2387.03: Latin America since Independence
- HIST 2388.03: Latin American Dictators in the Novel
- HIST 2392.03: Introduction to Caribbean History (1540 to present)
- HIST 2425.03: Africa Before 1900
- HIST 2426.03: Africa Since 1900
- HIST 2502.03: The Ottoman Empire and Its Legacy in the Middle East, 1750-1923.
- HIST 2503.03: Medieval Islamic Civilization
- HIST 2504.03: A History of the Modern Middle East
- HIST 2505.03: Turbans and Berets: A Modern History of Iraq
- HIST 2510.03: Modern History of South Asia
- HIST 2711.03: Struggles that Shaped the Modern World: 1600 - 1900
- HIST 2712.03: Freedom Fighters or Terrorists?
- HIST 3091.03: Russian Society
- HIST 3092.03: Russian Topics
- HIST 3380.03: Slavery and Freedoms in the America
- HIST 3390.03: Latin America: Revolution and Repression.
- HIST 3393.03: Indigenous Movements in Latin America
- HIST 3430.03: The Making of Colonial Africa, c. 1850-1930
- HIST 3431.03: Struggles in the City: Labour, Migration and Urban Live in Colonial Africa.
- HIST 3435.03: The Rise and Fall of African Slavery
- HIST 3451.03: Southern Africa to 1860
- HIST 3452.03: Southern Africa since 1860
- HIST 3470.03: Wars and Revolutions in Nineteenth Century Africa
- HIST 3471.03: Wars and Revolution in Twentieth Century Africa
- HIST 3500.03: Topics in Global History

- HIST 3509.03: Arab Caliphs, Turkish Commanders, and Persian Viziers: Islamic History, 750-1200
- HIST 3510.03: Sultans and Shahs: Politics and Religion in the Islamic Gunpowder Age (1500-1800)
- HIST 3511.03: Ancient and Medieval History of the Persianate World
- HIST 3512.03: Modern History of Iran
- HIST 3513.03: From Cairo to Cape Town: Religious Revival, Identity and Colonialism in Muslim Africa.
- HIST 3515.03: Food for Thought: History and the Culinary Cultures of the Islamic World
- HIST 3520.03: Empire, War and Resistance in Sri Lanka
- HIST 4355.03: Becoming The State
- HIST 4360.03: Slavery and American Political Culture
- HIST 4401.03: State Violence Communal Conflict and Criminology in Modern South Africa
- HIST 4404.03: Crime and Punishment in Modern Africa
- HIST 4475.03: African Intellectuals and the Modern Experience
- HIST 4510.03: Topics in Islamic and Middle East History.
- HIST 4545.03: Scripture and Strategy: History of Islamic Political Thought
- HIST 4550.03: Orientalism and Occidentalism
- HIST 4555.03: A dream Palace or a Bitter Reality Arab Intellectuals and their ideologies in the Modern Period
- HIST 4614.03: Sex, Conquest, and Power, Sex and Gender in Latin America - 1492 to the Present

Indigenous Studies

- INDG 2050.03: Historical Issues in Indigenous Studies
- INDG 2052.03: Contemporary Issues in Indigenous Studies
- INDG 3050.03: Indigenous Research Methods
- INDG 3052.03: Indigenous Social Health and Environmental Issues
- INDG 3400.03: Contemporary Indigenous Art
- INDG 3401.03: Indigenous Representation in Film
- INDG 4400.03: Indigneous Women and the State

Philosophy

Issues in International Development are fundamentally concerned with principles of ethics and justice. Philosophy provides students with the necessary foundation to think about these principles and apply them to international issues in an informed way.

- PHIL 2081.03: Ethics in the World of Business
- PHIL 2160.03: Philosophical Issues of Feminism
- PHIL 2165.03: Philosophy and the Black Experience
- PHIL 2450.03: Democracy, Difference and Citizenship: A Survey of Political Philosophy
- PHIL 2475.03: Justice in Global Perspective
- PHIL 2480.03: Environmental Ethics
- PHIL 2485.03: Technology and the Environment
- PHIL 3470.03: Human Rights: Philosophical Issues
- PHIL 3476.03: Liberalism and Global Justice
- PHIL 4700.03: Philosophy of Race

Political Science

Political Science is critical for individuals who want to know more about the values, laws, institutions and policy mechanisms that govern their lives in society, and, as well, the differences between their systems of government and those in other countries.

- POLI 2215.03: Canadian Aboriginal Politics: An Institutional Perspective
- POLI 2301.03: Comparative Politics I: Developed Democracies Under Pressure
- POLI 2302.03: Comparative Politics II: Developing World
- POLI 2350.03: Governance and Globalization
- POLI 2520.03: World Politics
- POLI 2530.03: Foreign Policy in Theory and Practice
- POLI 3311.03: Sport and Politics
- POLI 3315.03: African Politics
- POLI 3350.03: Governance and Globalization

- POLI 3360.03: Politics in Latin America

- POLI 3426.03: Sex and the State
- POLI 3427.03: Sexualization and Western Political Thought
- POLI 3505.03: Human Rights Foundations
- POLI 3520.03: Building Democracy and Peace
- POLI 3525.03: Comparative Foreign Policy Simulation
- POLI 3531.03: The UN in World Politics
- POLI 3532.03: Model UN
- POLI 3535.03: Wealth, Power and Poverty in the Global South
- POLI 3540.03: Foreign Policies in the Third World
- POLI 3544.03: Political Economy of Southern Africa
- POLI 3560.03: Issues in Global Security and Development
- POLI 3567.03: International Organizations
- POLI 3568.03: Canada and the World
- POLI 3581.03: Diplomacy and Negotiation
- POLI 3587.03: International Political Economy
- POLI 3596.03: Explaining Global Conflict and Violence
- POLI 4302.03: Governance and Administration in Developing Countries: Issues and Controversies
- POLI 4303.03: Human Rights Political Issues
- POLI 4340.03: Approaches to Development
- POLI 4355.03: Comparative Perspectives on the Development State
- POLI 4380.03: Politics of Climate Change
- POLI 4403.03: Human Rights: Philosophical Issues
- POLI 4569.03: Canadian Foreign Policy
- POLI 4481.03: Theories of Violence, Persecution, Genocide
- POLI 4587.03: International Political Economy
- POLI 4636.03: Nationalism and Statecraft

Religious Studies

Understanding religion and its influences on human behaviour involves grasping both the meaning of faith in the lives of participants and the critical analysis of outside observers. It has important implications for international cultures and development questions.

- RELS 2001.03: Judaism
- RELS 2003.03: Islam

- RELS 4018.03: Christian Theology in the Lands of Islam: John of Damascus

Russian

Russia and the Soviet Union have been important players on the world stage for many centuries. The history and current situation of this region has had profound importance for the development of both Europe and Asia, as well as the developing regions. The study of this region is increasingly important to development theory, practice and planning.

- RUSN 2023.03: Soviet Russia
- RUSN 2046.03: East European Cinema: War, Love, Revolutions
- RUSN 2081.03: Contemporary Russian Culture - The Seven Deadly Sins

Sociology and Social Anthropology

Sociology provides a context within which students learn to think critically about their social environment. Social Anthropology aims at generalizations by comparing structures and processes in major institutions within societies (kinship, political, economic and religious) as well as between societies.

- SOSA 2006.03: Global Migration: Transnational Lives
- SOSA 2012.03: Thinking through Anthropology
- SOSA 2013.03: Anthropology in Practice
- SOSA 2041.03: Describing Social Inequality
- SOSA 2042.03: Explaining Social Inequality
- SOSA 2045.03: Indian Society: Change & Continuity
- SOSA 2052.03: Contemporary Issues in Indigenous Studies
- SOSA 2101.03: Environment and Culture

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

Course Groupings

A. Core Courses

INTD 2001.03: Introduction to Development I

INTD 2002.03: Introduction to Development II

INTD 3002.03: Development Practice

INTD 3003.03: Development and Activism: Methods of Organization, Manifestation and Dissent

B. Additional IDS Courses

INTD 1102.03: Halifax and the World, Part I

INTD 1103.03: Halifax and the World, Part II

INTD 2045.03: Indian Society: Change and Continuity

INTD 2106.03: Africa: An Introduction

INTD 2107.03: Special Topics in International Development Studies

INTD 3000.03: Seminar in Development Studies

INTD 3001.03: Contemporary Debates in Development

INTD 3010.03: Seminar in Development Studies

INTD 3011.03 : Seminars in Development Studies

INTD 3012.03: Sustainability, Development, Economy

INTD 3020.03: Special Topics in International Development Studies

INTD 3021.03: Communicating Development and Environment : Critical Debates and Alternatives

INTD 3022.03: World Cities

INTD 3023.03: Special Topics in International Development Studies

INTD 3024.03: Special Topics in International Development Studies

INTD 3101.03: Special Topics in International Development Studies

INTD 3102.03: Special Topics in International Development Studies

INTD 3104.03: Seminar in Development Studies

INTD 3106.03: Seminar in Development Studies

INTD 3109.03: Experiential Learning: Abroad

INTD 3110.03: Migration and Development

INTD 3111.03: Popular Culture and Development

INTD 3114.03: How to (Not) Feed The World
 INTD 3115.03: Global Health: Challenges of Global Health Equity in the 21st Century
 INTD 3116.03: Contemporary Issues in Gender and Development
 INTD 3118.03: Experiential Learning I
 INTD 3119.03: Experiential Learning II
 INTD 3125.03: The French-Speaking World
 INTD 3150.03: Aspects de la francophonie/Aspects of the Francophone World
 INTD 3202.03: Special Topics in International Development Studies

 INTD 3302.03: Social Development in Cuba
 INTD 3303.03: The Political Economy of Cuba
 INTD 3304.03: Sustainable Development in Cuba
 INTD 3306.06: Field Research Practicum
 INTD 3310.06: Cuban Culture and Society
 INTD 3401.03: Seminars in Development Studies
 INTD 3406.03: Seminars in Development Studies
 INTD 3408.08: The Cuban Development Model
 INTD 4001.03: Special Topics in International Development Studies
 INTD 4002.03: Special Topics in International Development Studies
 INTD 4006.03: Global Poverty and Human Rights: From Development to Global Citizenship
 INTD 4011.03: Advanced Seminar in Development Theory
 INTD 4013.03: Environmental Conflict and Security
 INTD 4014.03: Development as Modernity and Modernity as Development
 INTD 4015.03: Pandemic: A Real time Simulation Course in Pandemic Management
 INTD 4022.03: Advanced Seminar in Development Theory
 INTD 4100.06: Special Topics in IDS
 INTD 4211.03: Gender and Development: Theory, Concepts and Methods
 INTD 4322.03: Children and War
 INTD 4401.03: Honours Thesis Course A
 INTD 4402.03: Honours Thesis Course B
 INTD 4403.03: Global Citizenship in Theory and Practice

Course Descriptions

INTD 1102 Halifax and the World: Part I

CREDIT HOURS: 3

This course offers an introduction to both International Development Studies and Canadian Studies by exploring the connections between important global issues and your daily life as a student in Halifax. As you walk across the Dalhousie campus and go about daily life in Halifax, your actions connect you to people around the globe and to the history of the city and world as well as to the many works of literature, art and music that depict these connections. Here are just a few examples of connections that we will explore in Halifax and the World: Part I (INTD / CANA 1102.03 – Fall semester): Walking across the Dalhousie campus you are traversing what remains unceded Mi'kmaq territory raising hard questions about relations between Settler and First Nations Peoples. While walking downtown on a Friday night you might tread in the footsteps of the central characters in Hugh MacLennan's novel *Barometer Rising* and other major works of Canadian fiction. As you walk through the city you'll see monuments and statues that commemorate the city's early colonial leaders – which raise questions about how we chose to remember history of the city and its connections to the world. The course will critically examine the connections between daily life in Halifax and broader issues of colonialism, race and class relations, historical memory, ethics and justice through a combination of lectures, guest speakers, discussion groups, field trips, experiential learning in the city of Halifax. Assignments include written reflections on specific sites in Halifax which students are expected to visit and explore, a public engagement project, and a series of quizzes (there is no final exam).

CROSSLISTED: CANA 1102.03

EXCLUSIONS: INTD 1100, INTD 1101

INTD 1103 Halifax and the World: Part II

CREDIT HOURS: 3

This course explores the connections between contemporary global issues and daily life in Halifax. It is organized into four modules that examine the social and environmental impacts of our daily consumption patterns and how these decisions connect us to the lives of people around the world. We will expose these links through an examination of our usage with commodities and the processes that connect their production, consumption and disposal. Students will be prompted to engage with ethical questions that emerge from these global connections and addresses the practical ways in which we can respond to their associated urgent global challenges.

CROSSLISTED: CANA 1103.03

EXCLUSIONS: INTD 1100, INTD 1101

FORMATS: Lecture

INTD 2001 Global Justice and Development I

CREDIT HOURS: 3

Poverty, inequality and injustice are widespread throughout the contemporary developing world. This course will examine how this situation came to be. It begins by analyzing the different meanings of the term “development” and then examines the major approaches that have shaped practical development initiatives on the ground in the Global South over the past 60 years. The course also examines the legacies of history for contemporary development efforts in the Global South through specific case studies.

PREREQUISITES: Completion of five full credits at the 1000 level or instructor's permission

CROSSLISTED: GEOG 2201.03

FORMATS: Lecture | Tutorial

INTD 2002 Global Justice and Development II

CREDIT HOURS: 3

This course builds upon the core concepts and approaches studied in INTD 2001 (i.e. different theoretical approaches to development and the historical creation of underdevelopment). The course examines key contemporary issues in the field of development and analyses the connections between them: debt, global trade rules, foreign aid, hunger and malnutrition, rural and urban livelihoods, population growth. The course also examines the principle actors involved in development and the strategies they have used to promote and resist development, including: governments, non-governmental organizations (NGOs), the World Bank and IMF, and popular social movements in the Global South and North.

PREREQUISITES: Completion of five credits at the 1000 level or instructor's permission

CROSSLISTED: GEOG 2202.03

FORMATS: Lecture | Tutorial

INTD 2045 Indian Society: Change and Continuity

CREDIT HOURS: 3

The objective of this half-credit course is to introduce students to the society and culture of India from an interdisciplinary perspective. India presents a society of enormous complexity and an unbroken living civilization of great antiquity. The focus of the course will be on selected, significant aspects of Indian society with particular emphasis on issues of current relevance. Topics discussed include: a historical background, social structure, political and social constraints to economic development, health issues, major religions and philosophy, development and foreign policy since independence, science and technology, disaster relief and development, and literature.

CROSSLISTED: SOSA 2045.03

EXCLUSIONS: INTD 3045.03

FORMATS: Lecture

INTD 2106 Africa: An Introduction

CREDIT HOURS: 3

This course will focus on contemporary Africa. Stereotypical portrayals of Africa will be examined and critiqued with the goal of emphasizing the immensity, diversity and complexity of the continent in order to better understand the opportunities and challenges of African development in the twenty-first century.

CROSSLISTED: GEOG 2206.03

FORMATS: Lecture | Tutorial

INTD 2107 Special Topics in International Development Studies

CREDIT HOURS: 3

A course on a particular aspect of International development taught by special arrangement between individual IDS Major or honours students and individual instructors associated with the program. Available in summers as well as regular sessions

FORMATS: Lecture

INTD 3001 Contemporary Debates in Development Theory

CREDIT HOURS: 3

This seminar course examines key contemporary theoretical debates in International Development Studies and their relevance to the real world of development practice.

PREREQUISITES: INTD 2001.03 and INTD 2002.03 or instructor's permission

FORMATS: Seminar

INTD 3002 Development Practice

CREDIT HOURS: 3

This course is designed for third year undergraduate students who are considering a career in international development. The course will introduce students to the policy and funding context for international cooperation (government and civil society), community-based approaches to sustainable development, analysis of the rapidly-changing international environment and challenge students to re-think how change is created and measured. Throughout the course,

students will practice professional skills – beginning with a self-assessment of their current knowledge, skills and competencies – followed by in-class engagement & assignments designed to develop new competencies. This includes taking individual initiative on an issue of interest and as well as groupwork on an international development project proposal. As a practice-based course, it involves presentations, seminar discussions, participatory workshops and guest practitioner speakers. Key elements include self-reflection, collaborative critical analysis, and peer learning to enhance professional writing (policy briefs & project funding proposals), data analysis, monitoring, evaluation & learning (MEL), collaboration and communication skills.

PREREQUISITES: INTD 2001.03 and INTD 2002.03 or instructor's permission

FORMATS: Lecture | Seminar

INTD 3003 Development and Activism: Methods of Organization, Manifestation and Dissent

CREDIT HOURS: 3

This course focuses on practical and conceptual tools for effective activism and advocacy related to international development. Much of the injustice in the world calls for social, political, policy and legal change – in Canada and globally – which in turn requires effective activism and advocacy. By the end of this course, students will be able to understand and practice different approaches to activism, public policy advocacy and public engagement; relate critical historical analysis of activist strategy to contemporary political struggles; design and implement a campaign for public policy change as part of a team; engage public audiences with ideas related to activism (through blog and podcast assignments)

PREREQUISITES: INTD 2001.03 and INTD 2002.03 or instructor's permission

FORMATS: Seminar

INTD 3004 Seminars in Development Studies

CREDIT HOURS: 3

This seminar course consists of an intensive examination of a selected issue within International Development Studies. Since the specific topic or research problem will vary from year to year, students are advised to consult the department prior to registration.

PREREQUISITES: INTD 2001.03 and INTD 2002.03 or instructor's permission

EXCLUSIONS: INTD 3003.03 X/Y

FORMATS: Seminar

INTD 3010 Seminar in Development Studies

CREDIT HOURS: 3

This seminar course consists of an intensive examination of a selected issue within International Development Studies. Since the specific topic or research problem will vary from year to year, students are advised to consult the department prior to registration.

PREREQUISITES: INTD 2001.03 and INTD 2002.03 or instructor's permission

FORMATS: Seminar

INTD 3011 Seminar in Development Studies

CREDIT HOURS: 3

PREREQUISITES: INTD 2001.03 and INTD 2002.03 or permission from the instructor

INTD 3012 Sustainability, Development, Economy

CREDIT HOURS: 3

This course offers an introduction to principles of sustainability and equitable distribution of benefits oriented towards issues of economy. The course adopts an interdisciplinary framework of inquiry to explore challenges of appropriate scale (relative to biocapacity), efficient allocation, and inter and intra-generational equity. In addition, the course will consider how these issues apply to managing real world issues in environmental management, and will explore tools to quantify and interpret scale, efficiency, and distributive justice. This course is designed as a one-term introduction to the intersection of sustainability, economic issues and social justice for undergraduate students who have little or no prior exposure to economics, but who have completed one or more courses in international development, ESS, environmental science, or related programs.

PREREQUISITES: INTD 2001 and INTD 2002 or permission of instructor

FORMATS: Online Delivery

INTD 3020 Special Topics in International Development Studies

CREDIT HOURS: 3

A course on a particular aspect of international development taught by special arrangement between individual IDS major or honours students and individual instructors associated with the program. Available in summers as well as regular sessions.

FORMATS: Lecture

INTD 3021 Communicating Development and Environment: Critical Debates and Alternative Strategies

CREDIT HOURS: 3

The ways in which global development, environment and climate change issues are represented to the public in the global North matters, a lot. The communication strategies of NGOs, governments, media outlets and cultural producers shape the ways people understand these issues and whether they feel motivated to act on them. In this course students will learn to design effective communications strategies for development, environment and climate change issues and develop the skills to critically analyse communications on these issues from a variety of theoretical and methodological perspectives. The skills of effective communication and public engagement are in increasing demand in all sectors of the economy and society – including among development and environmental NGOs. This course was designed in collaboration with the NGO leaders in Canada to help students to develop the theoretical and practical skills to be effective in this field of work, including critical analysis of ongoing and new communications strategies.

PREREQUISITES: INTD 2001 + INTD 2002 or SUST 2000 + SUST 2001

FORMATS: Seminar

INTD 3022 World Cities

CREDIT HOURS: 3

Around the world, cities are growing at an incredible speed, particularly in Asia and Africa where megacities continue to increase in number. Along with this growth, new issues are emerging including rising inequality, environmental pollution, climate change, racialized segregation, and growing slums.

Municipalities are responding by restructuring and gentrifying urban spaces to attract economic growth, often at the expense of the historically marginalized poor. In this course, we'll focus on cities around the world in order to understand how rapid urban growth is reshaping cities. Themes include: neoliberalism, migration, informal labour, poverty and exclusion, slums and segregation, environment and health, food security, gentrification and displacement, and alternative urban futures.

FORMATS: Lecture

INTD 3023 Special Topics in IDS

CREDIT HOURS: 3

A course on a particular aspect of international development taught by special arrangement between individual IDS major or honours students and individual instructors associated with the program. Available in summers as well as regular sessions.

FORMATS: Lecture

INTD 3024 Special Topics in International Development

CREDIT HOURS: 3

A course on a particular aspect of International Development taught by special arrangement between individual IDS major or honours students and individual instructors associated with the program. Available in summers as well as regular sessions.

FORMATS: Lecture

INTD 3101 Special Topics in International Development Studies

CREDIT HOURS: 3

A course on a particular aspect of international development taught by special arrangement between individual IDS major or honours students and individual instructors associated with the program. Available in summers as well as regular sessions.

CALENDAR NOTES: Students taking INTD 3202X/Y.06 must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

PREREQUISITES: INTD 2001.03 and 2002.03 or instructor's permission

FORMATS: Seminar

INTD 3102 Special Topics in IDS

CREDIT HOURS: 3

See INTD 3101.

INTD 3104 Seminar in Development Studies

CREDIT HOURS: 3

This seminar course consists of an intensive examination of a selected issue within International Development Studies. Since the specific topic or research problem will vary from year to year, students are advised to consult the department prior to registration.

PREREQUISITES: INTD 2001.03 and INTD 2002.03 or instructor's permission

FORMATS: Seminar

INTD 3106 Seminar in Development Studies

CREDIT HOURS: 3

This seminar course consists of an intensive examination of a selected issue within International Development Studies. Since the specific topic or research problem will vary from year to year, students are advised to consult the department prior to registration.

PREREQUISITES: INTD 2001.03 and INTD 2002.03 or instructor's permission

FORMATS: Seminar

INTD 3109 Experiences of International Development: Volunteerism and Global Citizenship

CREDIT HOURS: 3

The experiential learning abroad course is open to International Development Studies students who wish to obtain academic credit for an overseas placement, volunteer experience or internship. Students who have already secured a place in an overseas experiential learning program can register for this half credit. Special permission to register for this course is required and an application for this course must be completed prior to registration. Students are required to complete course readings and to write several reports reflecting on the relevant literature and the practical work experience. One half credit is completed over the course of a full academic year.

PREREQUISITES: This course is open to non-IDS students with the permission of the instructor.

FORMATS: Seminar

INTD 3110 Migration and Development

CREDIT HOURS: 3

The purpose of this course is to explore and better understand the connections between migration and development in contemporary societies. Classes will introduce or further explore one main theme or issue, such as development-induced displacement, labour migration, and HIV/AIDS and migration. Each class will centre on one or more discussion questions, exchange insights from relevant experiences of class participants or focus on a case study

PREREQUISITES: INTD 2001.03 and INTD 2002.03 or instructor's permission.

FORMATS: Lecture | Seminar

INTD 3111 Popular Culture and Development

CREDIT HOURS: 3

Development does not occur in a vacuum; it is informed by a particular cultural understanding and carried out by a specific mode of politics. Similarly, culture too, unlike the common belief, is not an autonomous realm, but consistently shapes and is shaped by other societal dimensions. This course will seek to understand the connections between culture and development by specifically exploring the dynamics of popular culture and its linkages with capitalist forms of development mainly in the South.

PREREQUISITES: INTD 2001.03 and INTD 2002.03 or instructor's permission

FORMATS: Seminar

INTD 3114 Agricultural Development : How (Not) To Feed The World

CREDIT HOURS: 3

This seminar investigates the history, evolution and contemporary debates of efforts to enhance yields and livelihoods via increased agricultural production in low-income countries. The course is organized into three distinct sections. The first focuses on theoretical perspectives, the second on case studies, and the third consists of a simulated negotiation.

PREREQUISITES: INTD 2001.03 and INTD 2002.03 or instructor's permission

FORMATS: Lecture | Seminar

INTD 3115 Global Health: Challenges of Global Health Equity in the 21st Century

CREDIT HOURS: 3

By examining global inequities that lead to health injustices, this course explores why health care is abundant for some and nonexistent for others. It identifies why some are born to live well, and other are doomed to die quick. It asks, "what are we going to do about it?"

PREREQUISITES: INTD 2001.03 and INTD 2002.03 or instructor's permission

FORMATS: Lecture

INTD 3116 Contemporary Issues in Gender and Development

CREDIT HOURS: 3

The course critically examines the ways in which gender and development interact. What are the gendered impacts of development policies and processes on the people of the Global South and how do people from the Global South work to reframe these processes? The course starts with a theoretical and conceptual review of the key debates in women/gender and development and unpacks fundamental concepts such as 'gender', 'intersectionality' and 'empowerment' as they relate to development. We will focus on a range of issues - such as masculinities and engaging men and boys for gender justice, gender and work, gender-based violence, female genital cutting, sexuality and development, activism, and the gendered impacts of COVID-19 - drawing on case studies to illustrate the gendered processes and assumptions implicit in 'gender and development'.

PREREQUISITES: INTD 2001.03 and INTD 2002.03 or instructor's permission

CROSSLISTED: GWST 4116.03
FORMATS: Seminar

INTD 3118 Experiential Learning: Experiences of Canadian Development: Volunteerism and Citizenship in Times of Austerity I

CREDIT HOURS: 3

Experiential learning is an opportunity for students to reflect on the global/local and theory/practice dynamics of the world around them. Other programs and departments use terms such as internship, volunteer or co-op placements. IDS has adopted the term experiential learning because it reflects the interplay between academic and practical skills development that this program offers. Experiential learning courses are available for both local/Canadian and international placements. The Canadian component of experiential learning focuses on the themes of community development and public engagement. The international component addresses questions of global citizenship. The Canadian component of experiential learning combines classroom learning with volunteer work experience in a community organization in Halifax or other parts of Canada. Students are required to volunteer for a minimum of 60 hours in each term, or approximately 3 hours/week. In addition to this work, students are required to complete a set of readings and assignments.

CALENDAR NOTES: Students taking this course must register in and complete INTD 3118 and INTD 3119 in consecutive terms; credit will not be granted if courses are not completed consecutively. Partial credit will not be given for a single term.

PREREQUISITES: INTD 2001.03 and INTD 2002 .03 or instructor's permission

EXCLUSIONS: INTD 3107.06

FORMATS: Seminar | Discussion

INTD 3119 Experiential Learning: Experiences of Canadian Development: Volunteerism and Citizenship in Times of Austerity II

CREDIT HOURS: 3

INTD 3125 The French-Speaking World

CREDIT HOURS: 3

Introduction to the French-speaking world from a political, cultural, social and economic perspective. Study of the organization known as la Francophonie, with an emphasis on its evolution and mandate, as well as on the bilateral and multilateral cooperation between its member countries. The course is designed for students who are not specializing in French. The course format will consist of lectures and in-class discussion of print and audio-visual materials. Student assessment will be based on oral presentations, assignments, exams and written papers. The language of the course will be English.

CROSSLISTED: FREN 3125.03

INTD 3150 Aspects de la francophonie/Aspects of the Francophone World

CREDIT HOURS: 3

Taught in French. Introduction to the study of the francophone world: political, economic, linguistic, literary and cultural aspects. From year to year the course might emphasize different regions: Western Countries, Sub-Saharan Africa, Pacific Islands, West Indies, Northern Africa.

PREREQUISITES: 2000-level course or consent of instructor

CROSSLISTED: FREN 3150.03

FORMATS: Lecture

INTD 3205 Special Topics in International Development Studies

CREDIT HOURS: 3

A course on a particular aspect of International development taught by special arrangement between individual IDS Major or honours students and individual instructors associated with the program. Available in summers as well as regular sessions

INTD 3301 Spanish Language and Grammar: The Cuban Dialect

CREDIT HOURS: 3

NOTE: INTD 3301 - 3306 are offered as part of the Cuba Semester program. Only students enrolled in this program may take these courses. Spanish Language and Grammar: The Cuban Dialect (prerequisite for the remaining courses).

PREREQUISITES: SPAN 1020.06 and SPAN 2020.06 or equivalent. Student must be functional in Spanish.

CROSSLISTED: SPAN 3301

INTD 3302 Social Development in Cuba

CREDIT HOURS: 3

This course examines the situation of women, the family and children in Cuba, and the educational system in theory and in practice.

PREREQUISITES: SPAN 1020.06 and SPAN 2020.06 or equivalent. Student must be functional in Spanish

CROSSLISTED: SPAN 3302

INTD 3304 Sustainable Development in Cuba

CREDIT HOURS: 3

The course examines Cuba's experience with sustainable development, including recently introduced agricultural cooperatives and communal environmental education.

PREREQUISITES: SPAN 1020.06 and SPAN 2020.06 or equivalent. Student must be functional in Spanish

CROSSLISTED: SPAN 3304

INTD 3307 Field Research Practicum

CREDIT HOURS: 6

This course involves four weeks of field research under the supervision of a Cuban professor, culminating in the production of a major research paper.

Research will be undertaken in one of the following three areas: *the environment and sustainable development; *women, family and childhood in the community; *community work and social participation.

PREREQUISITES: Students must be, at least, functional in Spanish (SPAN 1020.06 and SPAN 2020.06 or equivalent).

CROSSLISTED: SPAN 3306.06

RESTRICTIONS: Open to students enrolled in 3rd or 4th year of the IDS or Spanish program or comparable programs at other universities

EXCLUSIONS: INTD 3306.03 X/Y

FORMATS: Experiential Learning

INTD 3311 Cuban Culture and Society

CREDIT HOURS: 6

Through seminars, lectures and other activities, students will be introduced to Cuban society and culture. This course consists of briefing and debriefing sessions in Halifax with two weeks spent in Cuba. In Cuba, there will be daily lectures in English at the University of Havana and field visits to sites in and around Havana with opportunities to meet and interact with the local population. Participants will be required to keep a journal, and prepare and present a research paper on an approved topic related to Cuban development. This course counts as a credit in IDS, or Spanish towards the IDS established discipline requirement.

PREREQUISITES: INTD 2001.03 and 2002.03 or instructor's permission

CROSSLISTED: SPAN 3310.06

FORMATS: Experiential Learning

INTD 3401 Seminar in Development Studies

CREDIT HOURS: 3

This seminar course consists of an intensive examination of a selected issue within International Development Studies. Since the specific topic or research problem will vary from year to year, students are advised to consult the department prior to registration.

PREREQUISITES: INTD 2001.03 and INTD 2002.03 or instructor's permission

FORMATS: Seminar

INTD 3406 Seminar in Development Studies

CREDIT HOURS: 3

This seminar course consists of an intensive examination of a selected issue within International Development Studies. Since the specific topic or research problem will vary from year to year, students are advised to consult the department prior to registration.

PREREQUISITES: INTD 2001.03 and INTD 2002.03 or instructor's permission

FORMATS: Seminar

INTD 3408 The Cuban Development Model

CREDIT HOURS: 3

This course examines the evolution of the Cuban development model, from the Conquest and colonization by the Spanish to the reforms of the early 21st Century. The objective is to develop an understanding of the various development strategies employed by Cuba, particularly since the revolution of 1959. When asked about the Cuban development model, most people nowadays would say "tourism". Thirty years ago it was sugar--as it had been from the beginning of the 16th Century. In fact Cuba obtains most of its hard currency from medical-related services--mainly from the exportation of medical services, but also from the sale of sophisticated biotechnological products. Cuba's approach has evolved dramatically in the last two decades, and particular attention will be paid to this period.

PREREQUISITES: INTD 2001.03 and INTD 2002.03 or permission from the instructor.

INTD 4006 Global Poverty and Human Rights: From Development to Global Citizenship

CREDIT HOURS: 3

This course explores contemporary debates from an interdisciplinary cadre of scholars in order to understand why our political and financial systems acquiesce to world poverty. The course will run as a seminar course that will require students to contribute as active participants by generating critical debate out of the assigned readings.

PREREQUISITES: INTD 2001.03 and INTD 2002.03 or instructor's permission

FORMATS: Seminar

INTD 4008 Special Topics in International Development Studies

CREDIT HOURS: 3

A course on a particular aspect of International development taught by special arrangement between individual IDS Major or honours students and individual instructors associated with the program. Available in summers as well as regular sessions

INTD 4011 Advanced Seminar in Development Theory

CREDIT HOURS: 3

PREREQUISITES: INTD 2001.03 and INTD 2002.03 or instructor's permission

INTD 4013 Environmental Conflict and Security

CREDIT HOURS: 3

This seminar seeks to unravel the origins of conflict in the Global South. It emphasizes the ecological dimension of conflict, by investigation the intersections between natural resources and political upheaval. We will trace the origins of a diverse set of conflicts evaluating the role the non-human environment plays in triggering upheaval, as well as possible steps to alleviate ongoing conflicts and prevent new ones.

PREREQUISITES: INTD 2001.03 and INTD 2002.03 or instructor's permission

FORMATS: Seminar

INTD 4014 Development as Modernity, Modernity as Development

CREDIT HOURS: 3

Development as we understand today is a definite product of the modern condition. Therefore, we cannot understand development unless we understand modernity. But often this relationship is obscured when development is discussed. This course will seek to make sense of modernity and its inter-linkages with development. After looking at some classical understandings of modernity, we will examine the lacunae in such understandings. The way in which actual historical processes of development actualize or subvert the ideal-typical notions of modernity will also be examined. Finally, we will dwell upon the attempts to resist modernity and imagine possibilities that are hitherto not part of the horizons of modernity. Here the debate will be about if it is actually possible to go beyond modernity and inaugurate new understandings of development or are these attempts radicalizing the original intent of modernity.

CALENDAR NOTES: Previously offered as Advanced Seminars in Development - INTD 4011- Development as Modernity and Modernity as Development

FORMATS: Lecture

INTD 4015 Pandemic! A Real time Simulation Course in Pandemic Management

CREDIT HOURS: 3

Viruses are everywhere. Best thought of as packages of genetic material that exploit another organism's metabolism in order to reproduce, they have adapted to attack every organism that exists. For human beings, viruses have caused a litany of epidemics: small pox, measles, influenza, HIV, SARS, Ebola, and now COVID-19. Viruses strip down life itself to the bare essentials and its replication. They gain opportunity when the target organism becomes overly common, and leaves a window of vulnerability open. For COVID-19, a planet of 7 billion humans, of whom many could travel globally in hours and whom many more are clustered in urban settings, was this vulnerability. Currently two major public health policy strategies exist to prevent viruses turning into pandemics: Modern-Day Vaccines & Antiquated Public Health Policy. In this class, we build pandemic management skills of health promotion, disease prevention, and collaboration: three things that viruses struggle against. The COVID-19 pandemic forced every government of the planet, from the municipal to the national, to take unorthodox and extraordinary actions. Public gatherings and social behaviour that was perfectly legal in December 2019 was forbidden by March 2020. The social and economic impacts of self isolation, quarantines and restrictive movements will be felt for years to come. Pandemic playbooks and international guidelines were prepared, and in many cases acted upon, but few governments were prepared to work collaboratively in order to actually prevent the widespread transmission of the COVID-19 virus in the first place. This is a course where students work together to save humanity from the next global pandemic. This course returns to the basics of public health to understand how the social determinants of health matter most in times of pandemics. It is a class that builds collaborative working skills while critically exploring the experience of the COVID-19 pandemic. This is conducted through a series of 10 podcast modules, and an active live-time game-based simulation. In this course students will: - Understand the social determinants of health, and why it matters for pandemics. - Gain a thorough comprehension of COVID-19 public policy on a global scale. - Development collaborative team management skills for public health frameworks. - Development collaborative intra-team management skills for public health frameworks.

INTD 4211 Gender and Development: Theory, Concepts and Methods

CREDIT HOURS: 3

The primary aim of this course is to provide a broad foundation to some of the theoretical perspectives which have informed current thinking in gender and development. The course introduces students to key concepts in the analysis.

PREREQUISITES: INTD 2001.03 and INTD 2002.03 or instructor's permission

CROSSLISTED: GWST 4211.03

FORMATS: Seminar

INTD 4322 Children and War

CREDIT HOURS: 3

The aim of this course is to explore the many dynamics of conflict that affect children globally. The course will take both a thematic and case study approach. Currently, conflicts that occur are most often intra-state conflicts. The victims of such conflicts are disproportionately women and children. At the same time, the demographics of many of the most war-torn societies has led to increasing numbers of children being involved in the conflict. This course will aim to explore various aspects related to children and war. On the one hand, the course will discuss the effects of war on children. However, it will also discuss the involvement of children in the participation of war. In addition, what are the responsibilities of the International Community to protect and support children of war? What can we learn from the children that have survived in terms of their agency and resilience? What preventative measures can be taken to better ensure children do not fall victims to armed conflict? The course will also explore aspects of culture and its effects on solutions to the dynamics of children and war. In addition, students will learn about various types of child exploitation that make children vulnerable across the peace and wartime spectrum.

PREREQUISITES: Classes in IDS and/or professor's permission.

FORMATS: Lecture | Seminar

INTD 4401 Honours Thesis Crse A

CREDIT HOURS: 3

Students pursuing an Honours Degree with a thesis must register in both the Fall and Winter Honours courses. These are two classes that constitute a multi-term course and both must be successfully completed to earn an Honours degree in International Development Studies by way of a thesis. The thesis courses are restricted to students enrolled in the Honours Thesis option.

CALENDAR NOTES: This is the first required seminar for students accepted into the IDS honours thesis class. The class is structured to help students

develop a conceptual research framework, pair with a supervisor, and improve research, editing, and writing skills.

INTD 4403 Global Citizenship in Theory and Practice

CREDIT HOURS: 3

The question of global citizenship lies at the core of what International Development Studies is all about: critically examining causes of global poverty, inequality and injustice – and the ethical obligations which these issues pose for all human beings. Questions about our ethical obligations to other human beings – especially those who are very poor and very far away – have persisted in debates among philosophers and ordinary people for centuries. The idea of global citizenship – also often referred to as cosmopolitanism – dates back to ancient Greece and has been an ongoing focus of debate since then. At its core are a series of fundamental questions that have particular importance in the context of the challenges of the twenty-first century – such as economic globalization and climate change: What basic rights do all human beings possess? What ethical obligations do those rights imply for other humans? What specific actions do those ethical obligations require us to undertake? This course examines both the ethical obligations which global citizenship suggests and the ways in which people might fulfill those obligations in practice.

Note

Courses in Italian studies are administered by the [French Department](#). The Minor in Italian is open to all students and can be combined with any major. New admissions to the Italian second major and honours programs have been suspended. The Minor remains open.

Introduction

Learning to read and speak Italian offers access to an important world culture. While modern Italy began to emerge in its present-day form in the 19th century, the civilizations that preceded it have exerted a strong influence on contemporary culture. Whether in religion, art, music, or science, Italy's past offers many keys to the present. Through its tradition of global exploration and entrepreneurial endeavors, Italy has played a significant role in world history. Today, it is one of the world's wealthiest democratic nations, and a leader in a variety of fields, including film, design, cuisine, and intellectual life. Courses in Italian literature and culture, building on courses in Italian language, will open up to the student this wide and fascinating array of topics.

Degree Programs

1. [Minor in Italian Studies](#), open to all students.

2. Major currently suspended.

In addition to the departmental requirements listed below, currently declared students must satisfy the requirements outlined in the [Degree Requirements](#) section.

Minor in Italian Studies

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A minimum of 18 to a maximum of 27 credit hours in Italian Studies above the 1000 level, including:

- ITAL 2010.06: Intermediate Italian or
- ITAL 2000.03 Intermediate Italian Part 1 and ITAL2001.03 Intermediate Italian Part 2
- At least one of:
 - ITAL 3010.06: Advanced Italian
 - ITAL 3200.03: Modern Italian Literature
 - ITAL 3300.03: 20th Century Italian Literature
 - ITAL 3500.03: Topics in Italian Culture
 - ITAL 3600.03: Italian National Cinema
 - ITAL 3700.03: Topics in Italian Drama and Spectacle
 - ITAL 4010.03: Advanced Composition
 - ITAL 4020.03: General Translation

Contact [Italian Studies](#) for more information.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

Courses Descriptions

ITAL 1000 Italian for Beginners, Part 1

CREDIT HOURS: 3

Introduction to the basic structures of Italian, combined with practical vocabulary for oral and written communication. This course aims to develop all language skills (listening, speaking, reading, writing), by integrating grammar study, oral and written exercises, and situational contexts. The course also includes an introduction to Italian culture.

CALENDAR NOTES: Students must complete both ITAL 1000 and ITAL 1001 to satisfy the BA language requirement, and/or continue to Intermediate Italian (ITAL 2000.03/ITAL 2001.03).

EXCLUSIONS: ITAL 1010X/Y.06

FORMATS: Lecture

ITAL 1001 Italian for Beginners, Part 2

CREDIT HOURS: 3

This course follows ITAL 1000 and continues development of the basic structures of Italian, combined with practical vocabulary for oral and written communication. This course aims to develop all language skills (listening, speaking, reading, writing), by integrating grammar study, oral and written exercises, and situational contexts. The course also includes an introduction to Italian culture.

CALENDAR NOTES: Students must complete both ITAL 1000 and ITAL 1001 to satisfy the BA language requirement, and/or continue to Intermediate Italian (ITAL 2000.03/ITAL 2001.03).

PREREQUISITES: ITAL 1000.03 or instructor's permission

EXCLUSIONS: ITAL 1010X/Y.06

FORMATS: Lecture

ITAL 1010 Italian for Beginners

CREDIT HOURS: 6

Introduction to the basic structures of Italian, combined with practical vocabulary for oral and written communication. This course aims to develop all language skills (listening, speaking, reading, writing), by integrating grammar study, oral and written exercises, and situational contexts. The course also includes an introduction to Italian culture. This course fulfills the BA language requirement.

CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMATS: Lecture

ITAL 2000 Intermediate Italian, Part 1

CREDIT HOURS: 3

This course is open to students with a sound knowledge of the basics of the Italian language (verb tenses, sentence structure, high frequency vocabulary) and is designed to build on that knowledge. The objective of the course is fourfold: 1) to develop awareness of finer points of usage in writing Italian; 2) to provide practice in listening comprehension of material ranging from texts read aloud to spontaneous dialogue; 3) to provide the practice required for the consolidation and development of speaking skills; 4) to provide the practice required for the consolidation and development of reading skills.

CALENDAR NOTES: Students must complete both ITAL 2000 and ITAL 2001 to satisfy the requirements for a Minor in Italian, and/or continue to Advanced Italian.

PREREQUISITES: ITAL 1010X/Y.06, or ITAL 1000.03/ITAL 1001.03, or instructor's permission

EXCLUSIONS: ITAL 2010X/Y.06

FORMATS: Lecture

ITAL 2001 Intermediate Italian, Part 2

CREDIT HOURS: 3

This course follows ITAL 2000.03 and continues work on the basics of the Italian language (verb tenses, sentence structure, high frequency vocabulary) and is designed to build on that knowledge. The objective of the course is fourfold: 1) to develop awareness of finer points of usage in writing Italian; 2) to provide practice in listening comprehension of material ranging from texts read aloud to spontaneous dialogue; 3) to provide the practice required for the consolidation and development of speaking skills; 4) to provide the practice required for the consolidation and development of reading skills.

CALENDAR NOTES: Students must complete both ITAL 2000 and ITAL 2001 to satisfy the requirements for a Minor in Italian, and/or continue to Advanced Italian.

PREREQUISITES: ITAL 2000.03, or instructor's permission

EXCLUSIONS: ITAL 2010X/Y.06

FORMATS: Lecture

ITAL 2010 Intermediate Italian

CREDIT HOURS: 6

This course is open to students with a sound knowledge of the basics of the Italian language (verb tenses, sentence structure, high frequency vocabulary) and is designed to build on that knowledge. FORMATS: Lecture | Discussion

ITAL 2061 Civilization of Baroque Italy

CREDIT HOURS: 3

This is a scaled-down version of 2060X/Y.06, and studies Italy at the time of its greatest influence on Western civilization. The course examines Italy's politics, its vibrant urban and rural societies, the place of Catholicism in its cultural and intellectual life, and the innovative early modern economy, all before the great crisis of the 1620s. Open to first-year students.

CROSSLISTED: HIST 2061.03

EXCLUSIONS: HIST 2060.06, HIST 2066.03/HIST 2067.03

FORMATS: Lecture | Tutorial

ITAL 2200 Modern Italian Culture

CREDIT HOURS: 3

This course will focus on the transformation of modern Italian culture from the early twentieth century to the present, with discussion of major historical and social events of the period. Topics may include fascism, futurism, neo-realism, the rise of media culture, Italian cinema, and Italy's political role in the European Union.

FORMATS: Lecture

ITAL 2201 Survey of Italian Literature I: from the Origins to 1600

CREDIT HOURS: 3

This course will provide a survey of Italian Literature from the Middle-Ages to 1600. Literature covered may include works of writers such as Dante Alighieri, Francesco Petrarca, Giovanni Boccaccio, Catherine of Siena, Niccolò Machiavelli, Benvenuto Cellini and Veronica Franco. This course will be given in English; readings for Italian Minor students will be in both English and Italian.

EXCLUSIONS: ITAL 2210

FORMATS: Lecture

ITAL 2202 Survey of Italian Literature II: 1600 to Present

CREDIT HOURS: 3

This course will provide a survey of Italian Literature from 1600 to present. Literature covered may include works by Ugo Foscolo, Giacomo Leopardi, Sibilla Aleramo, the Futurists, Luigi Pirandello, Italo Svevo, Italo Calvino, Natalia Ginzburg, and Dacia Maraini. This course will be given in English; readings for Italian Minor students will be in both English and Italian.

EXCLUSIONS: ITAL 2210

FORMATS: Lecture

ITAL 2210 Introduction to Italian Literature

CREDIT HOURS: 3

This course will focus on selected topics in Italian literature and criticism. The course will be given in English.

FORMATS: Lecture

ITAL 2600 Survey of Italian Cinema

CREDIT HOURS: 3

Class to be held in English; with part of the course work in Italian for Italian minors. Survey of the Italian Cinema from the origins onwards: Focus: the 'golden age' of Italian silent movies; visual culture under fascism; Italian neo-realism; the impact of television.

CROSSLISTED: FILM 2314.03

FORMATS: Lecture

ITAL 3000 Advanced Italian, Part 1

CREDIT HOURS: 3

This course will focus on spoken and written Italian. Cultural aspects of Italy's past and contemporary history will be the subjects of oral discussion and written composition. Topics such as fine arts, theatre, cinema, music, culinary history, and fashion will be the basis for language practice. The goal of the course is to provide students with conversational and writing skills. Attention will be given to finer points of grammar, particularly Italian morphology and syntax. Students will engage in small group work and individual reporting. The material for the course will be drawn from both specialized workbooks and

news/articles from authentic Italian newspapers and websites. Some class time will be devoted to impromptu discussions allowing students to test their thinking and communication skills.

PREREQUISITES: ITAL 2000.03 and 2001.03, or ITAL 2010X/Y.06, or instructor's permission

FORMATS: Lecture

ITAL 3001 Advanced Italian, Part 2

CREDIT HOURS: 3

This course follows ITAL 3000.03 and will focus on spoken and written Italian. Cultural aspects of Italy's past and contemporary history will be the subjects of oral discussion and written composition. Topics such as fine arts, theatre, cinema, music, culinary history, and fashion will be the basis for language practice. The goal of the course is to provide students with conversational and writing skills. Attention will be given to finer points of grammar, particularly Italian morphology and syntax. Students will engage in small group work and individual reporting. The material for the course will be drawn from both specialized workbooks and news/articles from authentic Italian newspapers and websites. Some class time will be devoted to impromptu discussions allowing students to test their thinking and communication skills.

EXCLUSIONS: HIST 2060.06, ITAL 2101.06, ITAL 3060X/Y.06, HIST 2066.03/HIST 2067.03

FORMATS: Lecture

ITAL 3300 Twentieth Century Italian Literature

CREDIT HOURS: 3

This course examines Italian literature in the twentieth century, with references to contemporary Italy's social history and culture. Students will acquire first-hand knowledge of the work of key writers of the Novecento, such as for example Sibilla Aleramo, Luigi Pirandello, Italo Svevo, Natalia Ginzburg, Primo Levi, Elsa Morante, Italo Calvino, Dacia Maraini, or others. The course goals are multi-folded: while strengthening their communicative skills in Italian, students will forge their own tools for critical and argumentative thinking, and use them to engage in a productive reading of the literary texts under consideration. All coursework will be done in Italian.

PREREQUISITES: ITAL 2010XY or permission of instructor

FORMATS: Lecture | Seminar

ITAL 3500 Topics in Italian Culture

CREDIT HOURS: 3

This course will discuss and critically assess selected topics of Italian culture. The subjects will vary from year to year, and may range from Italy's fine arts tradition to the history of its commedia dell'arte, from its political and literary movements to its world-renowned filmmaking practice, from the changing role of women in Italian society to its religious evolution, from its history of migration and exploration to its "Made in Italy" international appeal and marketing. Topics may be added and perspectives changed as the contemporary Italian and European context evolve. The course will be conducted in a seminar setting where students may report on the specific issue and subject researched. Students will take part in reading and critical evaluation of peer work and individually propose an oral presentation on a selected theme that elicits their interest.

PREREQUISITES: ITAL 2010X/Y.06 or permission of instructor

FORMATS: Lecture | Discussion

ITAL 3600 Italian National Cinema

CREDIT HOURS: 3

The main focus of the course: the Italian cineastes, who received international recognition since the 1960s. It aims to investigate Italian film production within the social and cultural climate of contemporary Italy.

CROSSLISTED: FILM 3320.03

FORMATS: Lecture | Seminar

ITAL 3700 Topics in Italian Drama and Spectacle

CREDIT HOURS: 3

This course focuses on Italian drama and performance. It covers a variety of topics including: Italian Medieval and Renaissance theatre, the Commedia dell'arte, Pirandello's productions and contemporary Italian spectacle. The course will examine these topics while placing Italian theatre into a broader European context; students will acquire reading strategies for drama and spectacle and learn to consider the works from a theoretical perspective. The class is held in English.

CROSSLISTED: THEA 3914.03

FORMATS: Lecture | Seminar

ITAL 4010 Advanced Composition

CREDIT HOURS: 3

This course addresses issues of syntax and grammar, register and style, and advanced vocabulary for both creative and academic writing. It will have both a theoretical and a practical component and will be writing intensive. Students will exercise advanced reading skills, advanced grammar skills (using sophisticated Italian syntax and morphology), and advanced composition skills (from structuring a creative piece of work to essay composition and completion). Compositions will address Italian literary and cinematic works. Students will work both in groups and individually. The course will be given in a workshop format, and student participation is essential to its success. It is recommended that students read Italian as much as possible (texts from mass media, popular fiction as well as academic material). Work in class and at home will include summaries, synopses, bullet-point schemes, writing and re-writing, peer reviewing, and related research.

PREREQUISITES: ITAL 3010X/Y.06 or permission of instructor

FORMATS: Lecture | Discussion

ITAL 4040 Dante's Inferno

CREDIT HOURS: 3

From Dante's spiritual crisis to his descent into the pit of Hell. A journey of self-discovery, the Comedy is a summa of the medieval culture. This course offers a general knowledge of its first section, Inferno, and provides an introduction to medieval culture and history. Each class will involve reading from the text, commentary and discussion of the readings assigned. The course is taught in English. Italian Minor students will be required to read the texts in Italian.

PREREQUISITES: Any 2000-level humanities course or instructor's permission

CROSSLISTED: CLAS 4460

FORMATS: Lecture

ITAL 4060 Topics in the Civilization of Baroque Italy

CREDIT HOURS: 3

This course emphasizes the methods and sources historians employ to study Italian history, circa 1570-1740. Topics to be explored include Baroque Italian princely courts, Roman Catholicism, social interaction, social status and display, deviance and punishment, books and learned culture, standards of living, historical ecology and geography. There will be substantial use of translated and transcribed archival sources. A reading knowledge of French is recommended.

CROSSLISTED: HIST 4060.03

FORMATS: Tutorial | Seminar

ITAL 4998 Independent Study

CREDIT HOURS: 3

Individually directed research and writing under the supervision of a member of department.

FORMATS: Seminar

ITAL 4999 Independent Study

CREDIT HOURS: 3

Individually directed research and writing under the supervision of a member of department.

Law, Justice and Society

The Law, Justice and Society program offers a multi- and inter-disciplinary learning experience for students who are interested in the study of law and justice as subjects of historical, philosophical, political, or socio-anthropological enquiry or as an avenue towards work in fields such as in criminal justice, public policy, legal research, or human rights advocacy.

Drawing on a wide range of relevant courses from several different disciplines, the program offers students the opportunity to deepen their understanding of the role of law in relation to other social institutions. It also facilitates the understanding of the historical development, political uses, and place in philosophical traditions of concepts and practices of law and justice. The program will also help students critically evaluate, apply, and engage in research and analysis focused on law and justice.

Students typically enter the LJSO program in their second year of study, after completing a year (30 credit hours) of study, or a King's Foundation Year.

The interdisciplinary nature of the LJSO program means students will obtain most of their credits through LJSO-approved courses in other programs and departments. Students in their first year are encouraged to take courses in disciplines that can prepare them for the more advanced courses in the subjects that contribute to the Core Courses of the Program: Political Science, Sociology, History, and Philosophy.

In their second year, students typically take LAWS 2510.03: Introduction to Law I, and LAWS 2520.03: Introduction to Law II (Law), both of which are taught by faculty in the Schulich School of Law (and for which Law School tuition rates apply); and PHIL 2020.03: Legal Thinking, which is taught by faculty in the Department of Philosophy.

Third year core courses include LJSO 3000.03: Processes of Justice (LJSO); SOSA 3285.03: Sociology of Law (Sociology); POLI 3505.03: Human Rights (Political Science) and HIST 3226.03: Law & Justice in Canadian Society to 1890, OR HIST 3227.03: Criminal Law, Crime and Punishment, 1890 to the Present (History).

In addition to taking these core courses, students choose from an array of LJSO-approved electives (see the list provided here or the LJSO Website at dal.ca/ljs under "Programs"), which are taken from a wider range of disciplines, including Contemporary Studies, Psychology, International Development Studies, Commerce, and Journalism. In this way, the inter-disciplinary nature of the program not only provides LJSO students with the opportunity to pursue studies in law and justice, but it also grants access to -- and fosters relations within -- different fields and faculties where law and justice-related courses are offered.

Not all elective courses are offered each year, so students should check the [LJSO Program website](#) to see the Course Offerings for the current year.

Students thinking of pursuing a B.A. in Law, Justice and Society as a Major, Double Major or Honours degree, are encouraged to speak with the Advisors in the [Bissett Student Success Centre](#) or the Program Coordinator about developing a program of study that suits their needs and interests.

In addition to the LJSO course requirements listed under each degree option, students must satisfy the [general requirements for admission to all programs within the Faculty of Arts and Social Sciences](#), listed in the [College of Arts and Science](#) section of this Academic Calendar.

BA (120 credit hour) Major in Law, Justice and Society

As an interdisciplinary program, LJSO recommends students consider combined degree programs. Students are therefore encouraged to enter the combined honours, double major or minor programs, which provide opportunities that further integrate their LJSO studies with those of an approved arts or science field, e.g. LJSO and History or LJSO and Political Science. Double majors and combined honours degrees provide additional opportunities for students, in keeping open the possibility that they may pursue graduate studies in more than one area.

To complete the 120 hour Major in LJSO, students are required to take a minimum of 30 and a maximum of 54 credit hours in the major subject. This requirement includes 21 credit hours of LJSO core courses, and a minimum of 9 credit hours of elective courses, 6 of which should be at or beyond the 3000 level, and 3 must be 4000 level. The list of LJSO-approved electives can be found here or on the LJSO Website at dal.ca/ljso under “Programs”.

First year students are encouraged to select from existing introductory courses across the arts and social sciences. It is recommended that selections include the prerequisites for the LJSO courses that are required at the 2000 and 3000 levels in the contributing disciplines of Political Science, Sociology and/or Anthropology, Philosophy, and History (see below). Students should also make sure that 6 credit hours are taken in courses that satisfy the Writing Requirement (WR). Examples of recommended courses include:

- PHIL 1500.03 and PHIL 1501.03 or PHIL 1810.03 and PHIL 1820.03 (WR)
- POLI 1050.03 and POLI 1055.03 or POLI 1060.03 and POLI 1065.03 or POLI 1001.03 and POLI 1002.03 (WR)
- SOSA 1002.03 and SOSA 1003.03 or POLI 1500/SOSA 1500.06
- HIST 1020.03 and HIST 1021.03; HIST 1022.03 and HIST 1023.03 (WR); HIST 1510.06 (WR); or HIST 1910.03 and HIST 1911.03

King’s Foundation Year Program and the DalCAP combination of courses also provide suitable entry points.

Second year there are 9 required credit hours at the 2000-level:

- LAWS 2510.03 Introduction to Law I
- LAWS 2520.03 Introduction to Law II
- PHIL 2020.03 Legal Thinking

Third year there are 12 required credit hours at the 3000-level:

- POLI 3505.03 Human Rights: Foundations
- SOSA 3285.03 Sociology of Law
- HIST 3226.03 Law & Justice in Canadian Society to 1890, OR HIST 3227.03 Criminal Law, Crime and Punishment, 1890 to the Present
- LJSO 3000.03 Processes of Justice

Fourth year there are no specific core courses required at the 4000-level.

Other requirements:

- A minimum of 9 and a maximum of 33 credit hours must be from the list of Approved Electives (see the list provided here or the LJSO Website at dal.ca/ljso under “Programs”), 6 of which should be at or beyond the 3000-level, and 3 of which must be a 4000-level seminar other than POLI 4390.03.

BA (120 credit hour) Double Major in Law, Justice & Society and a second subject

To complete the 120 hour Double Major in LJSO, students are required to take a minimum of 60 and a maximum of 84 credit hours beyond the 1000 level in the two allied subjects, with no more than 48 credit hours and no fewer than 30 credit hours in either (21 credit hours covered by LJSO core classes), including 18 credit hours at or beyond the 3000 level in each of the two major subjects.

First year students are encouraged to select from existing introductory courses across the arts and social sciences. It is recommended that selections include the prerequisites for the LJSO courses that are required at the 2000 and 3000 levels in the disciplines of Political Science, Sociology and/or Anthropology, Philosophy, and History (see below). Students should also make sure that 6 credit hours are taken in courses that satisfy the Writing Requirement (WR). Examples of recommended courses include:

- PHIL 1500.03 and PHIL 1501.03 or PHIL 1810.03 and PHIL 1820.03 (WR)

- POLI 1050.03 and POLI 1055.03 or POLI 1060.03 and POLI 1065.03 or POLI 1001.03 and POLI 1002.03 (WR)
- SOSA 1002.03 and SOSA 1003.03 or POLI 1500/SOSA 1500.06
- HIST 1020.03 and HIST 1021.03; HIST 1022.03 and HIST 1023.03 (WR); HIST 1510.06 (WR); or HIST 1910.03 and HIST 1911.03

King's Foundation Year Program and the DalCAP combination of courses also provide suitable entry points.

Second year there are 9 required credit hours at the 2000-level:

- LAWS 2510.03 Introduction to Law I
- LAWS 2520.03 Introduction to Law II
- PHIL 2020.03 Legal Thinking

Third year there are 12 required credit hours at the 3000-level:

- POLI 3505.03 Human Rights: Foundations
- SOSA 3285.03 Sociology of Law
- HIST 3226.03 Law & Justice in Canadian Society to 1890, OR HIST 3227.03 Criminal Law, Crime and Punishment, 1890 to the Present
- LJSO 3000.03 The Processes of Justice

Fourth year there are no required core courses at the 4000-level.

Other requirements:

- a minimum of 9 and a maximum of 27 credit hours must be from the list of Approved Electives (see the list provided here or the LJSO Website at dal.ca/ljsso under "Programs"), 6 of which should be at or beyond the 3000 level, and 3 of which must be a 4000-level seminar (This requirement can not be fulfilled by POLI 4390.03).

Minor in Law, Justice and Society

This minor is available to students registered in a 120 credit hour Bachelor of Computer Science, Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science and Bachelor of Science (Medical Science) program.

The requirements for a minor in LJSO include the following:

1. Core Courses:

- LAWS 2510.03: Introduction to Law I
- LAWS 2520.03: Introduction to Law II

2. Electives:

In addition to the core courses, students are required to take 18 credit hours from the approved list of Electives below, including at least 3 credit hours from your choice of three different disciplines (e.g. history, philosophy, political science, sociology and social anthropology, contemporary studies, or international development studies).

- CLAS 2365.03: Plato and the Case of Socrates: Philosophy on Trial
- CLAS 3434.03/PHIL 3434.03/POLI 3434.03: The Ancient Origins of Political Thought: From Homer to Aristotle
- COMM 2603.03: Legal Aspects of Business
- CTMP 2203.03/HSTC 2206.03: Bio-Politics: Human Nature in Contemporary Thought
- CTMP 3121.03: Genocide: Contemporary Perspectives
- CTMP 3204.03: Human Experiments
- CTMP 3321.03: Representations of the Holocaust: Bearing Witness
- CTMP 4125.03: Hannah Arendt: Terror, Politics, Thought
- ECON 2212.03: Law and Economics
- ECON 4360.03/PHIL 4361.03: Ethics, Justice, and Economics
- EMSP 2480.03/HIST 2750.03: The Pirate and Piracy
- EMSP 3430.03: Theories of Punishment: Retribution and Social Control in Early Modern Thought

- ENGL 2237.03: Outlaw Tales
- ENGL 4880.03: Prison Literature
- ENV5 3200.03: Introduction to Environmental Law
- HIST 2006.03: The Atlantic World 1450-1650
- HIST 2007.03: The Atlantic World 1650-1800
- HIST 2135.03: The Rule of Law? Topics in British Legal History (Pre-1900)

- HIST 2714.03: Slavery and Slaving in Global History
- HIST 2715.03: Locked Up: A Global History of Incarceration
- HIST 3053.03: Fascist and National Socialist Movements in Europe, 1900-1945
- HIST 3056.03: The Holocaust
- HIST 3101.03: Punishment, Crime and the Courts in Early Modern England
- HIST 3226.03: Law and Justice in Canadian Society, to 1890
- HIST 3227.03: Criminal Law, Crime and Punishment in Canadian Society, 1890 - present
- HIST 3600.03: History of Law & Justice
- HIST 4401.03: State Violence, Communal Conflict and Criminality in Modern South Africa
- HIST 4404.03: Crime and Punishment in Modern Africa
- JOUR 3339.03: Ethics and Law for Journalists
- LJSO 3000.03: Processes of Justice
- LJSO 3100.03: Current Issues in Criminal Justice
- LJSO 3200.03: Topics in Law and Society
- LJSO 3500.03: Legal Research and Writing
- LJSO 3600.03: Critical Legal Studies
- LJSO 4300.03: Ethics, Law & Society
- MGMT 2200.03: Fundamentals of the Legal Environment of Management *Distance*
- MGMT 2805.03: Indigenous Governance
- MGMT 4205.03: Law and Policy for Resource and Environmental Law
- PHIL 2020.03: Legal Thinking
- PHIL 2450.03: Democracy, Difference, Citizenship
- PHIL 2475.03: Justice in Global Perspective
- PHIL 2490.03 / CSCI 3101.03: Social, Ethical and Professional Issues in Computer Science
- PHIL 3106.03: Animal Ethics
- PHIL 3211.03: Philosophy of Law
- PHIL 3476.03: Liberalism and Global Justice

- POLI 2215.03: Canadian Aboriginal Politics
- POLI 2220.03: Political Power and Partisan Politics
- POLI 2230.03: Municipal Law and City Politics in Canada
- POLI 2520.03: World Politics
- POLI 3206.03: Constitutional Law and Politics in Canada
- POLI 3208.03: Canadian Provincial Policies
- POLI 3378.03: US Constitutional Government & Politics
- POLI 3385.03: Politics of the Environment
- POLI 3401.03: Contemporary Political thought
- POLI 3426.03/GWST 3426.03: Sex, Race, and the State*
- POLI 3505.03: Human Rights: Foundations
- POLI 3510.03: Politics of Pandemics
- POLI 3531.03: The UN in World Politics
- POLI 3532.03: Model UN
- POLI 3581.03: Diplomacy and Negotiations
- POLI 4240.03/PUAD 5120.03: Policy Formation in Canada
- POLI 4303.03: Human Rights: Political Issues
- POLI 4390.03: Practicum in Public Policy: NGOs & Government Services
- POLI 4403.03: Human Rights: Philosophical Issues
- POLI 4450.03: Political Theories of International Ethics and Global Justice
- POLI 4481.03: Theories of Violence, Persecution and Genocide
- POLI 4505.03: Human Rights: Legal Issues

- POLI 4532.03: Indigenous Global Politics
- PSYO 2444.03: Forensic Psychology
- PSYO 3444.03: Criminal Behaviour
- SOSA 2181.03: Explaining Crime and Criminal Behavior
- SOSA 2182.03: Exploring Crime and Criminal Behaviour
- SOSA 3148.03: Drugs, Health and Society
- SOSA 3185.03: Owning and Belonging: De-colonial Issues in Indigenous/Settler Knowledges, Rights and Authority
- SOSA 3190.03: Social Movements
- SOSA 3225.03: Culture, Rights, Power
- SOSA 3260.03: Deviance
- SOSA 3275.03: Crime and Public Policy
- SOSA 3281.03: Youth Crime
- SOSA 3283.03: Globalized Security and Justice (Discontinued Course)
- SOSA 3285.03: Sociology of Law
- SOSA 3291.03: Corrections
- SOSA 3295.03: Society and the Police
- SOSA 4005.03: Issues in Social Justice and Inequality
- SUST 4125.03: Conflict Negotiation and Sustainability

*fulfills the POLI requirement even if taken as GWST 3426.03

Contact Law, Justice and Society <https://dal.ca/ljso> for more information.

BA Required Courses and Electives

NOTE: Not all courses are offered every year. Please consult the Program website at <http://www.dal.ca/LJSO> for a list of currently offered courses. In the case of a discrepancy, the information othe timetable will be given priority.

Required courses (majors and honours)

- LAWS 2510.03: Introduction to Law I
- LAWS 2520.03: Introduction to Law II
- HIST 3226.03: Law and Justice in Canada to 1890 **or** HIST 3227.03: Criminal Law, Crime and Punishment in Canadian Society, 1890-present
- PHIL 2020.03: Legal Thinking
- POLI 3505.03: Human Rights: Foundations
- SOSA 3285.03: Sociology of Law
- LJSO 3000.03: Processes of Justice
- LJSO 3500.03: Legal Research and Writing [for Honours and Combined Honours only]
- LJSO 0400.00 and LJSO 4000.03: Honours Seminar in LJSO [for Honours and Combined Honours with LJSO as the Primary Subject only]

List of Approved Elective Courses

- CLAS 2365.03: Plato and the Case of Socrates: Philosophy on Trial
- CLAS 3434.03/PHIL 3434.03/POLI 3434.03: The Ancient Origins of Political Thought: From Homer to Aristotle
- COMM 2603.03: Legal Aspects of Business (*Distance*)
- CTMP 2203.03/HSTC 2206.03: Bio-Politics: Human Nature in Contemporary Thought
- CTMP 3121.03: Genocide: Contemp. Perspectives
- CTMP 3204.03: Human Experiments
- CTMP 3321.03: Representations of the Holocaust: Bearing Witness
- CTMP 4125.03: Hannah Arendt: Terror, Politics, Thought
- ECON 2212.03: Law and Economics
- ECON 4360.03/PHIL 4361.03: Ethics, Justice, and Economics
- EMSP 2480.03/HIST 2750.03: The Pirate and Piracy
- EMSP 3430.03/CTMP 3170.03: Theories of Punishment: Retribution and Social Control in Early Modern Thought

- SUST 4125.03: Conflict Negotiation and Sustainability

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions

LJSO 0400 Honours Seminar in Law, Justice and Society Pt 1

CREDIT HOURS: 0

The Honours seminar provides LJSO Honours Students with the opportunity to embark on a concerted independent study of their choice of topic within the interdisciplinary field of Law, Justice and Society. Students are asked to identify a supervisor/professor to oversee the development of a substantial research paper or thesis as an independent capstone project. The paper and reading list will be arranged with the professor, and approved by the Coordinator. Regular meetings will be held for LJSO Honours students, to provide an opportunity for the Honours students to engage in discussions about their research papers and projects, but the main working relationship will be between the student and the chosen supervisor. Students must enroll in LJSO 0400.00 and LJSO 4000.03 in the same academic year. LJSO 0400.00 in the Fall term will be mainly preparations for writing the thesis in the Winter term under LJSO 4000.03.

PREREQUISITES: LAWS 2510.03, LAWS 2520.03, LJSO 3000.03, and Admission to the Honours Program

RESTRICTIONS: Restricted to LJSO Honours students ONLY

FORMATS: Seminar

LJSO 3000 Processes of Justice

CREDIT HOURS: 3

This course provides an overview of the rules and procedures of Canadian Civil and Criminal Justice systems, as well as those of Alternative Dispute Resolution and Restorative approaches to justice. It will clarify the roles of the parties, lawyers, courts, and intervenors in these different judicial systems, and give students the opportunity to apply the rules to hypothetical problems and/or various case scenarios. This course will also provide students with the tools to critically evaluate these processes in terms of access to justice, efficiency, fairness, and legitimate outcomes. An examination of Alternative Dispute Resolution and Restorative approaches to justice will provide the opportunity to evaluate the limits of conventional retributive and adversarial approaches, and to consider their potential for reforming our understanding of justice.

PREREQUISITES: LAWS 2510.03/LAWS 2520.03

FORMATS: Lecture

LJSO 3100 Current Issues in Criminal Justice

CREDIT HOURS: 3

Topics covered within this course will vary from year to year, and may include the administration of criminal justice; crime and popular culture; racial profiling and race-based discrimination; organized crime; international criminal law; mass incarceration; and criminal procedure.

PREREQUISITES: Must have completed 60 credit hours of study

FORMATS: Lecture

LJSO 3200 Topics in Law and Society

CREDIT HOURS: 3

Topics covered within this course will vary from year to year, and may include alternative theories and approaches to justice; law and social media; the role of law in social inequalities; and human rights issues.

PREREQUISITES: Must have completed 60 credit hours of study

FORMATS: Lecture

LJSO 3500 Legal Research and Writing

CREDIT HOURS: 3

This course aims to develop practical research skills, with a focus on researching the law in Nova Scotia and Canada using both print and electronic resources. It will provide students with a practical understanding of how to locate and update relevant case law, legislation and commentaries on specific topics. It will cultivate the analytical skills for students to identify the legal authorities and relevant case law to pursue specific research projects. The course will introduce students to fundamentals of legal/criminological research methods through the exploration principles, ethical and political issues, writing procedures, and various theoretical and methodological approaches involved in undertaking legal/criminological research. Students will also learn various data collection techniques and how to effectively organize and analyze both quantitative and qualitative information about legal/criminological phenomena.

PREREQUISITES: LAWS 2510.03 and LAWS 2520.03

FORMATS: Lecture

LJSO 3600 Critical Legal Studies

CREDIT HOURS: 3

This interdisciplinary seminar engages prominent debates within critical legal theory. In particular, we trace the emergence and contemporary application of critical race theory, feminist and queer theory; disability or 'crip' analyses; and post-colonial and decolonizing approaches to law. It will introduce students to critical perspectives on different areas of legal inquiry, such as administrative and criminal justice. The course will examine these theories and movements as they emerge in core disciplinary texts and through the subsequent discussion and debate these texts generate. We also consider the application of these critical traditions to current issues, with particular focus on the critical traditions that inform Canada's evolving legal landscape and practices.

PREREQUISITES: LAWS 2510.03

FORMATS: Seminar

LJSO 4000 Honours Seminar in Law, Justice and Society - Pt 2

CREDIT HOURS: 3

The Honours seminar provides LJSO Honours Students with the opportunity to embark on a concerted independent study of their choice of topic within the interdisciplinary field of Law, Justice and Society. Students are asked to identify a supervisor/professor to oversee the development of a substantial research paper or thesis as an independent capstone project. The paper and reading list will be arranged with the professor, and approved by the Coordinator. Regular meetings will be held for LJSO Honours students, to provide an opportunity for the Honours students to engage in discussions about their research papers and projects, but the main working relationship will be between the student and the chosen supervisor. Students must enroll in LJSO 0400.00 and LJSO 4000.03 in the same academic year. LJSO 0400.00 in the Fall term will be mainly preparations for writing the thesis in the Winter term under LJSO 4000.03.

PREREQUISITES: LAWS 2510.03, LAWS 2520.03, LJSO 3000.03, and Admission to the Honours Program

RESTRICTIONS: Restricted to LJSO Honours students

FORMATS: Seminar

LJSO 4300 Ethics, Law & Society

CREDIT HOURS: 3

The aim of this advanced seminar is to examine the relationship between law (a system of authoritative rules that is typically enforced by states) and ethics (normative principles that guide ethical or just conduct). The very reference to ethics and the law speaks to possible tensions between what is lawful and what is just, that is, between actions that are legal but potentially unethical, as well as conduct that is potentially ethical but prohibited by law. We begin by studying the background sources of both ethics and law as interpreted through different disciplines and traditions. We then look more closely at specific debates touching on ethics and the law, as well as how these debates have been expressed in landmark legal cases. Readings will be drawn from legal, political, and social theory, as well as case law. By the end of the seminar, students should have a good grasp of fundamental legal concepts and be better positioned to navigate the complex relationship between ethics and the law in contemporary social and political life.

PREREQUISITES: LAWS 2520.03 AND any one 3000-level Core LJSO course (LJSO 3000, HIST 3226.03, HIST 3227.03, POLI 3505.03, or SOSA 3285.03)

FORMATS: Seminar

Music - Fountain School of Performing Arts

Introduction

Dalhousie provides ways to study many kinds of music, within the vibrant context of our multi-disciplinary [Fountain School of Performing Arts](#). Our offerings range from large survey classes open to students from across the campus, to performing ensembles entered by audition, to one-on-one applied music and composition study for those with demonstrated talent and interest. Through our programs, students can develop expertise as listeners, performers, and creators, in styles ranging from classical to popular.

The Bachelor of Music offers focused music studies to prepare graduates for careers or further study in many areas, including performance, composition, theory, musicology, popular music, and more. Through experiential learning, training in music teaches poise, discipline, creativity, collaboration, empathy, and the ability to think on one's feet. These transferable skills are excellent preparation for many career paths in and beyond the performing arts.

In addition to the BMus, we offer the Honours BA in Music, the BA or BSc Combined Honours and Double Majors with Music, the Minor in Music, the Minor in Musicology, and many elective classes.

Elective Courses for Non-Majors

- PERF 1000.03: Writing About Performance
- PERF 1001.03: Writing About Music
- PERF 4250.03: Artists as Entrepreneurs
- MUSC 2007.06: The Guitar: History and Techniques (summer term)
- MUSC 2008.06: Modern Guitar (summer term)
- MUSC 2016.03: Topics in Music and Cinema
- MUSC 2018.03: The Road to Rock 'n' Roll
- MUSC 2019.03: The Rock 'n' Roll Era and Beyond
- MUSC 2020.03: The History of Jazz
- MUSC 2024.03: The Guitar: History and Techniques 1
- MUSC 2025.03: The Guitar: History and Techniques 2
- MUSC 3176.03: Vocal Pedagogy and Vocology
- MUSC 3177.03: Vocal Literature
- MUSC 3314.03: History of Opera
- MUSC 4355.03: Narrative Strategies in 19th-Century Music (cross-listed with GWST 4355.03)
- MUSC 4356.03: Opera Studies
- MUSC 4358/MUSC 4359: Studies in Medieval Music
- MUSC 4360.06: Advanced Seminar in Baroque Culture (summer term, study abroad)
- MUSC 4361.03/MUSC 4365.03: Topics in Musicology 1
- MUSC 4362.03: Topics in Canadian Music
- MUSC 4363.03/MUSC 4367.03: Topics in Musicology 2
- MUSC 4375.03: African American Popular Music
- MUSC 4380.03/MUSC 4381.03: Musician Studies

Other courses in Music may be taken by special permission. Applied study (individual studio instruction in voice or instrument) may be taken subject to an audition and available space.

Admission Procedures for all Music Programs

All Music major programs require that candidates (including transfer students) apply to both the university and the Fountain School of Performing Arts and audition for Applied Study OR submit a portfolio for Composition Studies. See the website at dal.ca/fspa for the full application process. Re-audition and testing may be required if enrolment is deferred, if a program is interrupted for a year or more, or if an applied study course is not successfully completed in one academic year.

Students who demonstrate outstanding potential at their audition, or in their composition portfolio, but who require further preparation for university level music study, will be required to upgrade skills over the summer. Details will be communicated following the audition.

Ensemble Participation

Music Majors:

All students in music major programs enrolled in an applied study course (instrument or voice) or in first and second year composition studies must participate in ensembles for credit.

Year 1: MUSC 2751.015 Ensemble 1a; MUSC 2752.015 Ensemble 1b

Year 2: MUSC 2753.015 Ensemble 2b; MUSC 2754.015 Ensemble 2b

Year 3: MUSC 3751.015 Ensemble 3a; MUSC 3752.015 Ensemble 3b

Year 4: MUSC 4751.015 Ensemble 4a; MUSC 4752.015 Ensemble 4b

Advanced: MUSC 4753.015 Ensemble (Advanced) a; MUSC 4754.015 Ensemble (Advanced) b

Music minors and Elective students:

Students in music minor programs who enrol in applied study (instrument or voice) and students who take applied study as an elective are encouraged to participate in ensembles. Students may register for an ensemble credit class, depending on course load.

The Fountain School of Performing Arts will monitor the number and types of ensembles for each student.

Students must attend regularly and punctually the rehearsals and performances of their required ensembles. Students should note that ensemble participation typically requires regularly occurring rehearsals and scheduled performances.

Membership in ensembles is open to the university and the community by audition. Auditions are held in the first week of September. Please contact the Fountain School for further details.

Dalhousie University Chorus and Dal Ora
Dalhousie Symphony Orchestra (L. Perez)
Dalhousie Wind Ensemble (J. Caines)
Dalhousie Jazz Ensemble (C. Mitchell)
Dalhousie Opera
Small Ensembles (staff coaches)
Collaborative Piano (staff coaches)

Applied Study (Instrument and Voice)

Individual studio instruction in voice or instrument is required for most music degree programs. Applied study courses may be taken as electives subject to an audition and available space. Please note that admission to all applied study courses requires an audition. Please contact the Fountain School of Performing Arts for audition dates or visit website <http://dal.ca/music>. Auxiliary fees apply. Students must achieve a minimum grade of C in first year applied study in order to advance to second year applied study. Idioms offered are:

- Voice
- Guitar
- Piano
- Organ
- Violin
- Viola
- Cello
- Double Bass
- Flute

- Oboe
- Clarinet
- Bassoon
- Saxophone
- French Horn
- Trumpet
- Trombone
- Tuba
- Percussion
- Harp

Bachelor of Music (BMus)

The BMus is a four year program with 96 out of 120 credit hours in Music. Upon successful completion of the second year, students in good standing (minimum overall average GPA of 2.7 [B-] in 1000 and 2000-level MUSC and PERF courses) may continue with studies in the BMus general degree or may apply for one of four concentrations: Composition, Musicology, Performance, or Popular Musics. Additional requirements for acceptance to the areas of concentration are listed below, including applicable standards. Please also see Section 6: Standards for overall BMus grade and other requirements.

Students wishing to pursue one of the four concentrations must apply by March 1 of the second year of study.

NOTE: For the first two years of their degree, students interested in pursuing the Concentration in Composition may take Applied Study (MUSC 1801.03/MUSC 1802.03 and MUSC 2801.03/MUSC 2802.03 by audition) OR Composition Studies (MUSC 1213.03/MUSC 1214.03 and MUSC 2213.03/MUSC 2214.03 by submission of portfolio). Please see the Composition section of this Calendar and contact the Fountain School for further details.

BMus Standards

Students may not enrol in the Bachelor of Music Graduation Requirement courses (MUSC 4199/MUSC 4299/MUSC 4399/MUSC 4599) until the fourth year of the Program.

Students must achieve an average minimum overall GPA of 2.7 (B-) in MUSC courses beyond the 1000 level in order to graduate with a BMus degree. Students must achieve a minimum grade of C in 1000 level Applied (or Composition) study in order to advance to 2000 level Applied Study (Voice/Instrument) or Composition Studies. Grades in MUSC courses beyond the 1000 level must be "C" or better in order to count toward the BMus degree.

See also the sections below for specific standards regarding concentrations.

Common Curriculum

First Year

- MUSC 1801.03: Applied Study 1a OR MUSC 1213.03: Composition Studies 1a*
- MUSC 1802.03: Applied Study 1b OR MUSC 1214.03: Composition Studies 1b*
- MUSC 1201.03: Music Theory 1a
- MUSC 1222.03: Music Theory 1b
- MUSC 1276.03: Musicianship: Skills for All Musicians 1a
- MUSC 1277.03: Musicianship: Skills for All Musicians 1b
- PERF 1000.03: Writing About Performance
- PERF 1001.03: Writing About Music
- 3 credit hours, Arts and Social Sciences or Science elective
- MUSC 2751.015: Ensemble 1a
- MUSC 2752.015: Ensemble 1b

Second Year

- MUSC 2801.03: Applied Study 2a OR MUSC 2213.03: Composition Studies 1a
- MUSC 2802.03: Applied Study 2b OR MUSC 2214.03: Composition Studies 1b
- MUSC 2221.03: Music Theory 2a
- MUSC 2222.03: Music Theory 2b

- MUSC 2276.03: Musicianship: Skills for All Musicians 2a
- MUSC 2277.03: Musicianship: Skills for All Musicians 2b
- MUSC 2354.03: History of Western Music to 1750
- MUSC 2355.03: History of Western Music 1750 to the Present Day
- 3 credit hours, Arts and Social Sciences or Science electives*
- MUSC 2753.015: Ensemble 2a
- MUSC 2754.015: Ensemble 2b

*Students interested in the Concentration in Composition should refer to the Composition section for program options and further class selection guidance.

BMus General Degree

Students in good standing (minimum overall average GPA of 2.7 [B-] in 1000 and 2000-level MUSC and PERF courses) may proceed to a BMus general degree program in their third year. This program choice allows for the greatest flexibility within the BMus program offerings. It will prepare students well for advanced degrees in Music, as well as for a wide range of careers in music.

Students must submit a proposal for their intended graduation project (MUSC 4599.03 or 4000-level musicology seminar) by March 1 of the third year of study, according to the Fountain School of Performing Arts guidelines. Students must achieve a minimum grade of 2.7 (B-) in this credit.

Third Year

- MUSC 3801.03: Applied Study 3a
- MUSC 3802.03: Applied Study 3b
- MUSC 3283.03: Modal Counterpoint OR MUSC 3284.03: Tonal Counterpoint
- MUSC 3221.03: Form and Analysis: The Second Viennese School to the Present Day
- 3 credit hours in music history beyond the 2000-level chosen from: MUSC 3066.03, MUSC 3314.03, MUSC 3370.03, MUSC 4353.03, MUSC 4354.03, MUSC 4355.03, MUSC 4356.03, MUSC 4358/MUSC 4359.03, MUSC 4361/MUSC 4365.03, MUSC 4362.03, MUSC 4363/MUSC 4367.03, MUSC 4375.03, MUSC 4380/MUSC 4381.03
- 3 credit hours of Music electives*
- 6 credit hours of Arts and Social Sciences or Science electives
- MUSC 3751.015: Ensemble 3a
- MUSC 3752.015: Ensemble 3b

Fourth Year

- MUSC 4801.03: Applied Study 4a
- MUSC 4802.03: Applied Study 4b
- MUSC 3282.03: Orchestration
- MUSC 4599.03: Graduation Project or 4000-level Musicology seminar (see 4. Concentration in Musicology for the list of seminars)
- 9 credit hours of Music electives*
- 6 credit hours of Arts and Social Sciences or Science electives
- MUSC 4751.015: Ensemble 4a
- MUSC 4752.015: Ensemble 4b

Additional requirements for third and fourth year:

- 3 credit hours of Music electives chosen from: MUSC 2018.03, MUSC 2019.03, MUSC 2020.03, MUSC 4353.03, MUSC 4375.03, or any music Seminar or Special Topics course that engages critical race theory (announced/approved by the Fountain School from year to year)

* The 12 credit hours of Music electives at any level do not have to be distributed as 3 hours in third year and 9 hours in fourth year, as long as 12 credit hours are completed.

NOTE: Those students who are interested in pursuing a career in classroom teaching of music must complete an undergraduate degree in Music and then complete a Bachelor of Education (BEd) degree at another institution. Students are advised to consult provincial

regulations for teacher certification and entrance requirements for their institution of choice, and to meet with the Undergraduate Advisor, in order to ensure optimal course selection within the BMus General degree program.

Concentration in Composition

Students selected for this Concentration will demonstrate outstanding abilities and potential as composers. Contact the Fountain School of Performing Arts for further details concerning admission procedures.

There are two possible options for students pursuing the Concentration in Composition:

Option A: For students who take Applied Study (Instrument or Voice) in years 1 and 2

With this option, students audition and take instrumental or vocal applied lessons during the first two years of the BMus program and begin composition lessons in year 3. Students will normally take MUSC 2210.03: Introduction to Composition in the Fall semester of their second year. To do so, they may have to defer their three credit hours Arts and Social Sciences or Sciences elective to another year. MUSC 2210.03 will be counted as a Music elective.

Students in good standing (minimum overall average GPA of 2.7 [B-] in 1000 and 2000-level MUSC and PERF courses), along with a minimum overall average GPA of 3.3 (B+) in their Music Theory and Composition courses (MUSC 1201, MUSC 1222, MUSC 2221 and MUSC 2210) must submit a portfolio of original music by March 1 of the second year to apply for admission to this concentration.

Students who are accepted in this concentration must achieve a minimum grade of 3.3 (B+) in Composition 1a and 1b (MUSC 3211.03 and MUSC 3212.03) in order to remain in the concentration. Students must achieve a minimum grade of 2.7 (B-) in each of MUSC 4211.03, MUSC 4212.03 and MUSC 4299.03.

Third Year

- MUSC 3211.03: Composition 1a
- MUSC 3212.03: Composition 1b
- MUSC 3221.03: Form and Analysis: the Second Viennese School to the Present Day
- MUSC 3283.03: Modal Counterpoint or MUSC 3284.03 Tonal Counterpoint
- MUSC 3282.03: Orchestration
- MUSC 4280.03: Contemporary Techniques
- 6 credit hours of Arts and Social Sciences or Science electives
- 6 credit hours of Music electives (including MUSC 2210.03, normally taken in year 2)

Fourth Year

- MUSC 4211.03: Composition 2a
- MUSC 4212.03: Composition 2b
- MUSC 4353.03: Music Since 1945
- MUSC 3662.03: Introduction to Digital Audio Sound Design (NEW for 2022-23 - replaces MUSC 3660.03)
- MUSC 3663.03: Advanced Digital Audio Sound Design (NEW for 2022-23 - replaces MUSC 3661.03)
- MUSC 4299X/Y.03: Composition Recital
- 6 credit hours of Arts and Social Sciences or Science electives
- 6 credit hours of Music electives

Option B: For students who begin Composition Studies in years 1 and 2

Students are accepted to this option in year 1 (via portfolio submission) and take composition lessons during all four years of the BMus. Students in good standing (minimum overall average GPA of 2.7 [B-] in 1000 and 2000-level MUSC and PERF courses), along with a minimum overall average GPA of 3.3 (B+) in their Music Theory and Composition courses (MUSC 1201, MUSC 1222, MUSC 2221) will be accepted in the concentration, provided their overall GPA for Composition Studies classes in the first two years (MUSC 1213.03, MUSC 1214.03, MUSC 2213.03 and MUSC 2214.03) is not lower than 3.3 (B+).

Students who are accepted in this concentration must achieve a minimum grade of 3.3 (B+) in Composition Studies 3a and 3b (MUSC 3213.03 and MUSC 3214.03) in order to remain in the concentration. Students must achieve a minimum grade of 2.7 (B-) in each of MUSC 4213.03, MUSC 4214.03 and MUSC 4299.03.

Third Year

- MUSC 3213.03: Composition Studies 3a
- MUSC 3214.03: Composition Studies 3b
- MUSC 3221.03: Form and Analysis: the Second Viennese School to the Present Day
- MUSC 3283.03: Modal Counterpoint or MUSC 3284.03 Tonal Counterpoint
- MUSC 3282.03: Orchestration
- MUSC 4280.03: Contemporary Techniques
- 6 credit hours of Arts and Social Sciences or Science electives
- 6 credit hours of Music electives

Fourth Year

- MUSC 4213.03: Composition Studies 4a
- MUSC 4214.03: Composition Studies 4b
- MUSC 4353.03: Music Since 1945
- MUSC 3662.03: Introduction to Digital Audio Sound Design (NEW for 2022-23 - replaces MUSC 3660.03)
- MUSC 3663.03: Advanced Digital Audio Sound Design (NEW for 2022-23 - replaces MUSC 3661.03)
- MUSC 4299X/Y.03: Composition Recital
- 6 credit hours of Arts and Social Sciences or Science electives
- 6 credit hours of Music electives

All students in Composition (both options) are encouraged to take one or more courses from the following list:

Music elective:

- MUSC 3263.03: Theory of Popular Musics
- MUSC 4354.03: Popular Music Analysis

Arts and Social Sciences or Science elective:

- CRWR 3100.03: Songwriting: Creative Writing for Lyric Forms

Concentration in Musicology

Students in good standing (minimum overall average GPA of 2.7 [B-] in 1000 and 2000-level MUSC and PERF courses) must submit two writing samples by March 1 of the second year to apply for admission to this concentration.

Students selected for this concentration will demonstrate outstanding abilities and potential as musicologists. See the Fountain School of Performing Arts for further details concerning admission procedures.

Students who are accepted in this concentration must achieve a minimum grade of 2.7 (B-) in the graduation requirement MUSC 4399.03.

Third Year

- MUSC 3801.03: Applied Study 3a
- MUSC 3802.03: Applied Study 3b
- MUSC 3221.03: Form and Analysis: The Second Viennese School to the Present Day
- MUSC 3283.03: Modal Counterpoint or 3284.03: Tonal Counterpoint
- MUSC 4353.03: Music since 1945
- 6 credit hours in music history beyond the 2000-level chosen from: MUSC 3066.03, MUSC 3314.03, MUSC 3370.03, MUSC 4353.03, MUSC 4354.03, MUSC 4355.03, MUSC 4356.03, MUSC 4358/MUSC 4359.03, MUSC 4360.06, MUSC 4361/MUSC 4365.03, MUSC 4362.03, MUSC 4363/MUSC 4367.03, MUSC 4375.03, MUSC 4380/MUSC 4381.03
- 6 credit hours of Arts & Social Sciences or Science electives
- MUSC 3751.015: Ensemble 3a
- MUSC 3752.015: Ensemble 3b

Fourth Year

- MUSC 4801.03: Applied Study 4a
- MUSC 4802.03: Applied Study 4b
- MUSC 4399X/Y.03: Thesis
- 6 credit hours in music history beyond the 2000-level chosen from: MUSC 3066.03, MUSC 3314.03, MUSC 3370.03, MUSC 4353.03, MUSC 4354.03, MUSC 4355.03, MUSC 4356.03, MUSC 4358/MUSC 4359.03, MUSC 4360.06, MUSC 4361/MUSC 4365.03, MUSC 4362.03, MUSC 4363/MUSC 4367.03, MUSC 4375.03, MUSC 4380/MUSC 4381.03
- 6 credit hours of music electives (students are strongly encouraged to take MUSC 3282.03 Orchestration)
- HIST 1020.03: Europe: Before the French Revolution and HIST 1021.03: Europe: French Revolution to the Present
- MUSC 4751.015: Ensemble 4a
- MUSC 4752.015: Ensemble 4b

Concentration in Performance

Acceptance to the Performance Concentration requires a written application, audition, and permission of the Fountain School of Performing Arts. Students in good standing (minimum overall average GPA of 2.7 [B-] in 1000 and 2000 level MUSC and PERF courses), along with a minimum grade of 3.3 (B+) in their 1000 and 2000 level Applied Study, may audition at the end of second year to apply for admission to this concentration.

Students selected for this concentration will demonstrate outstanding abilities and potential as performers. See the Fountain School of Performing Arts for further details concerning admission procedures.

Students who are accepted in this concentration must achieve a minimum grade of 3.3 (B+) in third year Performance Concentration Applied Study (MUSC 3811.03 and MUSC 3812.03) and in the third year performance recital (MUSC 3199.03) in order to remain in the concentration. Students must achieve a minimum grade of 2.7 [B-] in their fourth year Performance Concentration Applied Study (MUSC 4811.03 and MUSC 4812.03) and in their fourth year performance recital (MUSC 4199.03).

Third Year

- MUSC 3811.03: Applied Study (Performance) 3a
- MUSC 3812.03: Applied Study (Performance) 3b
- MUSC 3199.03: Half-Recital
- MUSC 3221.03: Form and Analysis: The Second Viennese School to the Present Day
- MUSC 3283.03: Modal Counterpoint or MUSC 3284.03: Tonal Counterpoint
- MUSC 3751.015 Ensemble 3a
- MUSC 3752.015 Ensemble 3b
- 3 credit hours in music history beyond the 2000-level chosen from: MUSC 3066.03, MUSC 3314.03, MUSC 3370.03, MUSC 4353.03, MUSC 4354.03, MUSC 4355.03, MUSC 4356.03, MUSC 4358/MUSC 4359.03, MUSC 4361/MUSC 4365.03, MUSC 4362.03, MUSC 4363/MUSC 4367.03, MUSC 4375.03, MUSC 4380/MUSC 4381.03

Fourth Year

- MUSC 4811.03: Applied Study (Performance) 4a
- MUSC 4812.03: Applied Study (Performance) 4b
- MUSC 4199.03: Full Recital
- MUSC 4751.015: Ensemble 4a
- MUSC 4752.015: Ensemble 4b

Although not required, students in Performance are encouraged to take MUSC 3282.03, Orchestration, as one of their Music electives.

Also in the third and fourth years, according to idiom:

Voice (27 credit hours):

- MUSC 2175.03 Lyric Diction for Singers
- MUSC 3176.03: Vocal Pedagogy and Vocology
- MUSC 3177.03: Vocal Literature
- MUSC 3314.03: History of Opera
- 3 credit hours of Music electives from the following list:
 - MUSC 2018.03

- MUSC 2019.03
- MUSC 2020.03
- MUSC 4353.03
- MUSC 4375.03
- any music Seminar or Special Topics course that engages critical race theory (announced/approved by the Fountain School from year to year)
- 12 credit hours Arts and Social Sciences or Science electives (at least 6 credit hours of Arts and Social Sciences or Science elective taken over the four year program must be an Introductory Language course: either Italian, German or French)

Piano (27 credit hours):

- 12 credit hours of Music electives, any choice; however, if offered, students should take MUSC 3353.03: Chamber Music Literature
- 3 credit hours of Music electives from the following list:
 - MUSC 2018.03
 - MUSC 2019.03
 - MUSC 2020.03
 - MUSC 4353.03
 - MUSC 4375.03
 - any music Seminar or Special Topics course that engages critical race theory (announced/approved by the Fountain School from year to year)
- 12 credit hours Arts and Social Sciences or Science electives

Strings (27 credit hours):

- 12 credit hours Music electives, any choice; however, if offered, students should take:
 - MUSC 3160.03: Conducting
 - MUSC 3353.03: Chamber Music Literature
- 3 credit hours of Music electives from the following list:
 - MUSC 2018.03
 - MUSC 2019.03
 - MUSC 2020.03
 - MUSC 4353.03
 - MUSC 4375.03
 - any music Seminar or Special Topics course that engages critical race theory (announced/approved by the Fountain School from year to year)
- 12 credit hours Arts and Social Sciences or Science electives

Guitar (27 credit hours):

- MUSC 3308.06: Modern Guitar
- MUSC 4170.03: Improvisation Techniques and Practices
- 3 credit hours of Music electives from the following list:
 - MUSC 2018.03
 - MUSC 2019.03
 - MUSC 2020.03
 - MUSC 4353.03
 - MUSC 4375.03
 - any music Seminar or Special Topics course that engages critical race theory (announced/approved by the Fountain School from year to year)
- 3 credit hours Music electives, any choice
- 12 credit hours Arts and Social Sciences or Science electives

Saxophone (27 credit hours):

- MUSC 2020.03: The History of Jazz
- MUSC 4170.03: Improvisation Techniques and Practices

- 3 credit hours of Music electives from the following list:
 - MUSC 2018.03
 - MUSC 2019.03
 - MUSC 2020.03
 - MUSC 4353.03
 - MUSC 4375.03
 - any music Seminar or Special Topics course that engages critical race theory (announced/approved by the Fountain School from year to year)
- 6 credit hours Music electives, any choice
- 12 credit hours Arts and Social Sciences or Science electives

Wind and brass instruments, percussion (27 credit hours):

- 3 credit hours of Music electives from the following list:
 - MUSC 2018.03
 - MUSC 2019.03
 - MUSC 2020.03
 - MUSC 4353.03
 - MUSC 4375.03
 - any music Seminar or Special Topics course that engages critical race theory (announced/approved by the Fountain School from year to year)
- 12 credit hours of Music electives, any choice
- 12 credit hours Arts and Social Sciences or Science electives

Concentration in Popular Musics

Students in good standing (minimum overall average GPA of 2.7 [B-] in 1000 and 2000-level MUSC and PERF courses) may proceed to a BMus concentration in Popular Musics. This concentration is designed for students interested in the performance, creation, and/or study of popular music styles such as pop, jazz, soul, rock, and more.

Third Year

- MUSC 3801.03: Applied Study 3a or MUSC 3821.03: Applied Study in Popular Musics 3a
- MUSC 3802.03: Applied Study 3b or MUSC 3822.03: Applied Study in Popular Musics 3b
- MUSC 3263.03: Theory of Popular Musics*
- MUSC 3282.03: Orchestration
- MUSC 3751.015 Ensemble 3a
- MUSC 3752.015 Ensemble 3b
- PERF 1000.03: Writing About Performance**
- PERF 1001.03: Writing About Music**

Fourth Year

- MUSC 4801.03: Applied Study 4a or MUSC 4821.03: Applied Study in Popular Musics 4a
- MUSC 4802.03: Applied Study 4b or MUSC 4822.03: Applied Study in Popular Musics 4b
- MUSC 4353.03: Music Since 1945 or MUSC 4354.03 Popular Music Analysis
- MUSC 4599.03: Graduation Project or 4000-level Musicology seminar
- MUSC 4751.015: Ensemble 4a
- MUSC 4752.015: Ensemble 4b

Additional requirements for third and fourth year:

- MUSC 4170.03: Improvisation Techniques and Practices
- 15 credit hours of MUSC electives, at least 6 of which must come from the following list:

MUSC 2016.03: Topics in Music and Cinema
 MUSC 2018.03: The Road to Rock 'n' Roll
 MUSC 2019.03: The Rock 'n' Roll Era and Beyond

MUSC 2020.03: The History of Jazz
MUSC 4375.03: African American Popular Musics

- 6 credit hours of non-MUSC courses taken from the Minor in Popular Culture Studies, with at least 3 credit hours at the 3000- or 4000-level.

Additional requirements for Voice students:

- MUSC 3176.03: Vocal Pedagogy and Vocology (to be taken as part of the 15 credit hours of MUSC electives)

*Students who have already taken MUSC 3263 instead of MUSC 1201 will replace MUSC 3263 with 3 more credit hours of music electives, bringing their music electives to 18 credit hours.

**Students who have completed PERF 1000 and PERF 1001 in previous years will replace these courses with 6 additional credit hours in non-MUSC electives for a total of 12 credit hours in non-MUSC electives.

BA (120 credit hour) Honours in Music

In addition to the School requirements listed below, students must satisfy the requirements outlined in the College of Arts and Science [Degree Requirements](#) section of this calendar.

Students must successfully complete an audition/entrance tests.

School Requirements

First year (30 credit hours):

- MUSC 1801.03: Applied Study 1a
- MUSC 1802.03: Applied Study 1b
- MUSC 1201.03: Music Theory 1a
- MUSC 1222.03: Music Theory 1b
- MUSC 1276.03: Musicianship: Skills for All Musicians 1a
- MUSC 1277.03: Musicianship: Skills for All Musicians 1b
- PERF 1000.03: Writing About Performance
- PERF 1001.03: Writing About Music
- 3 credit hours, Arts and Social Sciences or Science elective
- MUSC 2751.015: Ensemble 1a
- MUSC 2752.015: Ensemble 1b

Second year (30 credit hours):

- MUSC 2801.03: Applied Study 2a
- MUSC 2802.03: Applied Study 2b
- MUSC 2221.03: Music Theory 2a
- MUSC 2222.03: Music Theory 2b
- 15 credit hours, Arts and Social Sciences or Science electives (see [Degree Requirements for the College of Arts and Science](#))
- MUSC 2753.015: Ensemble 2a
- MUSC 2754.015: Ensemble 2b

Additional School Requirements

- MUSC 2354.03: History of Western Music to 1750
- MUSC 2355.03: History of Western Music 1750 to the Present Day
- MUSC 4399.03: Thesis
- 27 to 39 credit hours of Music electives, at least 18 of which must be above the 2000-level

BA or BSc (Combined Honours Program)

Students may enroll in either of these combined honours programs with the joint approval of the Fountain School of Performing Arts and the department of the allied subject (in compliance with the Combined Honours requirements detailed in the [Degree Requirements](#) of this calendar). Students must successfully complete an audition/entrance tests.

School Requirements

1000 level

- MUSC 1801.03: Applied Study 1a
- MUSC 1802.03: Applied Study 1b
- MUSC 1201.03: Music Theory 1a
- MUSC 1222.03: Music Theory 1b
- MUSC 1276.03: Musicianship: Skills for All Musicians 1a
- MUSC 2751.015: Ensemble 1a
- MUSC 2752.015: Ensemble 1b
- PERF 1000.03: Writing About Performance
- PERF 1001.03: Writing About Music

Additional School Requirements:

- 27 to 45 credit hours in Music above the 1000-level, at least 18 of which must be at the 3000 or 4000 level. Among these, 3 credit hours of additional courses in Musicology must be completed (chosen from MUSC 2354.03, MUSC 2355.03, MUSC 4353.03).

NOTE: Students considering Honours programs must meet with an academic advisor in the Fountain School of Performing Arts as soon as possible in their program, and no later than their second year of studies. For Combined Honours programs, students must consult with Advisors in BOTH departments for application procedures and deadlines. Students may apply for most honours programs before registering for the second year. Application forms are available from departments, at the Registrar's Office, or at <http://www.dal.ca/registrar>.

BA (120 credit hour) Major in Music

In addition to the School requirements listed below, students must satisfy the requirements outlined in the College of Arts and Science [Degree Requirements](#) section of this calendar.

Students must successfully complete an audition/entrance tests.

School Requirements

First year (30 credit hours):

- MUSC 1801.03: Applied Study 1a
- MUSC 1802.03: Applied Study 1b
- MUSC 1201.03: Music Theory 1a
- MUSC 1222.03: Music Theory 1b
- MUSC 1276.03: Musicianship: Skills for All Musicians 1a
- MUSC 1277.03: Musicianship: Skills for All Musicians 1b
- PERF 1000.03: Writing About Performance
- PERF 1001.03: Writing About Music
- 3 credit hours, Arts and Social Sciences or Science elective
- MUSC 2751.015: Ensemble 1a
- MUSC 2752.015: Ensemble 1b

Second year (30 credit hours):

- MUSC 2801.03: Applied Study 1a
- MUSC 2802.03: Applied Study 1b
- MUSC 2221.03: Music Theory 2a
- MUSC 2222.03: Music Theory 2b
- 15 credit hours, Arts and Social Sciences or Science electives

- MUSC 2753.015: Ensemble 2a
- MUSC 2754.015: Ensemble 2b

Additional School Requirements:

- MUSC 2354.03: History of Western Music to 1750
- MUSC 2355.03: History of Western Music 1750 to the Present Day
- 18 to 30 credit hours of Music electives beyond the 1000-level, at least 18 of which must be above the 2000-level

BA or BSc (120 credit hour) Double Major

In addition to the Fountain School of Performing Arts requirements below, students must satisfy the requirements outlined in the College of Arts and Science [Degree Requirements](#) section of this calendar. Students must successfully complete an audition/entrance tests. The major subject with the most advanced credit hours appears first on the record.

School Requirements

1. Music as First Subject:

First year (30 credit hours):

- MUSC 1801.03: Applied Study 1a
- MUSC 1802.03: Applied Study 1b
- MUSC 1201.03: Music Theory 1a
- MUSC 1222.03: Music Theory 1b
- MUSC 1276.03: Musicianship: Skills for All Musicians 1a
- MUSC 1277.03: Musicianship: Skills for All Musicians 1b
- PERF 1000.03: Writing About Performance
- PERF 1001.03: Writing About Music
- 3 credit hours, Arts and Social Sciences or Science elective
- MUSC 2751.015: Ensemble 1a
- MUSC 2752.015: Ensemble 1b

Second year (30 credit hours):

- MUSC 2801.03 Applied Study 2a
- MUSC 2802.03 Applied Study 2b
- MUSC 2221.03: Music Theory 2a
- MUSC 2222.03: Music Theory 2b
- 15 credit hours, Arts and Social Sciences or Science electives
- MUSC 2753.015: Ensemble 2a
- MUSC 2754.015: Ensemble 2b

Additional School Requirements:

- MUSC 2354.03: History of Western Music to 1750
- MUSC 2355.03: History of Western Music 1750 to the Present Day
- 12 to 24 hours of Music electives beyond the 1000-level, at least 18 of which must be above the 2000-level

2. Music as Second Subject:

Students must complete one year of applied study (subject to audition) and 24 Music credit hours above the 1000-level, including MUSC 2751.015: Ensemble 1a and MUSC 2752.015: Ensemble 1b, as well as 18 credit hours beyond the 2000-level. The following courses may NOT be used to count toward this degree: MUSC 2007.06, MUSC 2022.06, MUSC 2024.03, MUSC 2025.03, MUSC 2028.03, MUSC 2029.03, MUSC 2130.06, MUSC 2131.03, MUSC 2132.03.

Minor in Music

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A BA (90 credit hour) degree program with a minor in Music is also available.

Students must complete a minimum of 18 to a maximum of 27 credit hours in Music beyond the 1000 level. The following courses may not be used to count toward this degree:

- MUSC 2007.06, MUSC 2024.03, MUSC 2025.03: The Guitar: History and Techniques
- MUSC 2022.06, MUSC 2028.03, MUSC 2029.03: The Art and Science of Drumming
- MUSC 2130.06, MUSC 2131.03, MUSC 2132.03: Jazz Dance 1

Contact [Music - Fountain School of Performing Arts](#) for more information.

Minor in Musicology

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Students must complete a minimum of 18 to a maximum of 27 credit hours in Musicology courses as follows:

- MUSC 2354.03: History of Western Music to 1750
- MUSC 2355.03: History of Western Music 1750 to the Present Day
- 12 credit hours chosen from the following, 6 of which must be beyond the 2000-level, including at least 3 at the 4000 level.
 - MUSC 2016.03: Topics in Music and Cinema
 - MUSC 2018.03: The Road to Rock 'n' Roll
 - MUSC 2019.03: The Rock 'n' Roll Era and Beyond
 - MUSC 2020.03: The History of Jazz
 - MUSC 3066.03: Women, Gender and Music
 - MUSC 3314.03: History of Opera
 - MUSC 3370.03: Performance Practice
 - MUSC 4353.03: Music since 1945
 - MUSC 4354.03: Popular Music Analysis
 - MUSC 4355.03: Narrative Strategies
 - MUSC 4356.03: Opera Studies
 - MUSC 4358.03/MUSC 4359.03: Studies in Medieval Music
 - MUSC 4360.06: Advanced Seminar in Baroque Culture
 - MUSC 4361.03/MUSC 4365.03: Topics in Musicology 1
 - MUSC 4362.03: Topics in Canadian Music
 - MUSC 4363.03/MUSC 4367.03: Topics in Musicology 2
 - MUSC 4375.03: African American Popular Music
 - MUSC 4380.03/MUSC 4381.03: Musician Studies

Contact [Music - Fountain School of Performing Arts](#) for more information.

Cooperative Degree Programs with the University of King's College

The following degree programs are offered in cooperation with the University of King's College:

Bachelor of Music with King's Foundation Year Program (FYP)
Bachelor of Journalism with Music History Option
Bachelor of Arts combined honours in Contemporary Studies

Students may also pursue a BA (120 credit hour) and an honours BA through the University of King's College.

The Bachelor of Music with King's Foundation Year (FYP) is described below. Please consult the University of King's College (Office of the Registrar) for further information including curriculum and registration details for other cooperative programs.

Bachelor of Music with King's Foundation Year Program (FYP)

The King's BMus program basically follows the Dalhousie BMus program requirements, with a few exceptions:

1. The order of courses will have to be modified in order to complete the program in four years.

2. Students in the King's BMus program are NOT required to take:

- PERF 1000.03: Writing About Performance
- PERF 1001.03: Writing About Music
- MUSC 2751.015: Ensemble 1a
- MUSC 2752.015: Ensemble 1b

3. In the first year of the program, King's BMus students take the Foundation Year Program (24 credit hours) and 1000-level Applied Study (MUSC 1801.03 and MUSC 1802.03). As well, they may opt to take MUSC 2751.015 and MUSC 2752.015 as music elective courses, but will require permission from the King's Registrar to carry an overload.

For further information and consulting on program planning, please contact the Associate Director (Music) at the Fountain School of Performing Arts.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses so designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

Course Descriptions

PERF 1000 Writing About Performance

CREDIT HOURS: 3

What is performance, and who counts as a performer? Why is performance one of the most ancient and durable aspects of human community and interaction? Why do we adore certain performers and despise others? How are performers and their choices shaped by their societies, and vice versa? This course will explore these questions by looking at some of the vital roles fulfilled by theatrical, musical, and cinematic performers in global societies, both ancient and modern. Via readings of articles and plays as well as in-class screenings of film and video performances, it will consider the performer's role in shaping, embodying, and questioning societies' conceptions of beauty, morality, religious faith, gender, race, ethnicity, social class, and more.

CALENDAR NOTES: PERF 1000.03 and PERF 1001.03 or PERF 1000.03 and PERF 1002.03 satisfies the Arts and Science Writing requirement.

EXCLUSIONS: THEA 1000X/Y.06

FORMATS: Lecture | Tutorial

PERF 1001 Writing About Music

CREDIT HOURS: 3

This course is an introduction to the academic study of music. It is designed to help students develop effective research and writing skills and to familiarize them with the sources, methods, repertoires, and debates that have shaped music history and scholarship. Students will develop critical listening and analytical skills, will be challenged to consider music from a variety of perspectives, will become familiar with a number of standard works from various repertoires, and will engage in the issues and debates surrounding various musical cultures.

CALENDAR NOTES: PERF 1000.03 and PERF 1001.03 or PERF 1000.03 and PERF 1002.03 satisfies the Arts and Science Writing requirement.

PREREQUISITES: PERF 1000.03

EXCLUSIONS: MUSC 1352.03

FORMATS: Lecture | Tutorial

MUSC 1081 Voice Clinic for the Theatre

CREDIT HOURS: 3

A course in the principles of singing as applied to classical actor training. Exercises and repertoire appropriate to this training will be prepared by the students for class performance. No prior instruction in music or singing is presumed.

EXCLUSIONS: This class is offered exclusively to students in the third year of the Acting Program

FORMATS: Tutorial

MUSC 1201 Music Theory 1a

CREDIT HOURS: 3

This course starts with a review of important music theory basics like intervals and scales. It then focuses on 4-part tonal harmony, as a preparation to Music Theory 1b (MUSC 1222, winter term) which is a more in-depth study of tonal harmony. Special attention will be given to voice leading and harmonic analysis.

COREQUISITES: MUSC 1272, 1273, 1274, 1275

PREREQUISITES: Permission of the instructor, based on placement testing.

FORMATS: Lecture

MUSC 1213 Composition Studies 1a

CREDIT HOURS: 3

Techniques and approaches of today's music are studied through writing of musical works for diverse instruments and ensembles, and through analysis of important works of repertoire. Emphasis will be given to creativity and to practical aspects of musical composition: effectiveness of orchestration, playability, quality of score, and preparation of parts.

CALENDAR NOTES: Students entering this course may do so only by portfolio submission and interview. Please contact the Fountain School of Performing Arts for application/interview procedures and dates. <http://dal.ca/fspa>. Auxiliary fees apply. MUSC 1213.03 and MUSC 1214.03 must be completed within the same academic year.

PREREQUISITES: Portfolio submission and interview. Permission of the Instructor.

FORMATS: Studio

MUSC 1214 Composition Studies 1b

CREDIT HOURS: 3

A continuation of MUSC 1213. Techniques and approaches of today's music are studied through writing of musical works for diverse instruments and ensembles, and through analysis of important works of repertoire. Emphasis will be given to creativity and to practical aspects of musical composition: effectiveness of orchestration, playability, quality of score, and preparation of parts.

CALENDAR NOTES: MUSC 1213.03 and MUSC 1214.03 must be completed in the same academic year. Auxiliary fees apply.

PREREQUISITES: MUSC 1213.03. Permission of instructor.

RESTRICTIONS: Students entering this course must have completed MUSC 1213 via application process including portfolio submission and interview. Please contact the Fountain School for more information.

FORMATS: Studio

MUSC 1222 Music Theory 1b

CREDIT HOURS: 3

As a continuation to Music Theory 1a, MUSC 1201, this course is a study of tonal harmony. Topics include modulation to closely related keys, tonicization, use of non-chord tones, and an introduction to chromatic progressions, especially using the augmented sixth and Neapolitan sixth chords. Skills in part-writing and harmonic analysis will be developed.

COREQUISITES: MUSC 1272, 1273, 1274, 1275

PREREQUISITES: MUSC 1201.03 or permission of the instructor

EXCLUSIONS: MUSC 1202.03

FORMATS: Lecture

MUSC 1276 Musicianship: Skills for All Musicians 1a

CREDIT HOURS: 3

Musicianship: skills for all musicians is a core requirement course for all music students. The course combines aural skills (ear training, sight-singing, rhythmic/harmonic/melodic dictation) and keyboard skills. The course places equal emphasis on learning to sight-sing and sight-read exercises on a keyboard instrument as well as writing dictation. Topics include singing in major/minor keys and modes using moveable Do, alternative notation systems, playing one and two-part keyboard exercises, singing and playing scales and chords, as well as reading pop and lead sheet notations.

EXCLUSIONS: MUSC 1272, MUSC 1274

FORMATS: Lab

MUSC 1277 Musicianship: Skills for All Musicians 1b

CREDIT HOURS: 3

Musicianship: skills for all musicians is a core requirement course for all music students. The course combines aural skills (ear training, sight-singing, rhythmic/harmonic/melodic dictation) and keyboard skills. The course places equal emphasis on learning to sight-sing and sight-read exercises on a keyboard instrument as well as writing dictation. Topics include singing in major/minor keys and modes using moveable Do, alternative notation systems, playing one and two-part keyboard exercises, singing and playing scales and chords, as well as reading pop and lead sheet notations.

PREREQUISITES: MUSC 1276

EXCLUSIONS: MUSC 1273, MUSC 1275

FORMATS: Lab

MUSC 1801 Applied Study 1a

CREDIT HOURS: 3

Please note that all instrument and voice courses require an audition. Please contact the Fountain School for audition dates or visit the website at <http://dal.ca/fspa> Auxiliary fees apply.

CALENDAR NOTES: MUSC 1801.03 and MUSC 1802.03 must be completed within the same academic year.

PREREQUISITES: Audition

EXCLUSIONS: MUSC 1101, 1102, 1103, 1104, 1105, 1106, 1107, 1108, 1109, 1110, 1111, 1112, 1113, 1114, 1115, 1116, 1117, 1118, 1119, 1120, 1121, 1122

FORMATS: Studio

MUSC 1802 Applied Study 1b

CREDIT HOURS: 3

Please note that all instrument and voice courses require an audition. Please contact the Fountain School for audition dates or visit the website at <http://dal.ca/fspa> Auxiliary fees apply.

CALENDAR NOTES: This course is a continuation of MUSC 1801.03. MUSC 1801.03 and MUSC 1802.03 must be completed within the same academic year.

PREREQUISITES: Permission of the instructor.

EXCLUSIONS: MUSC 1101, 1102, 1103, 1104, 1105, 1106, 1107, 1108, 1109, 1110, 1111, 1112, 1113, 1114, 1115, 1116, 1117, 1118, 1119, 1120, 1121, 1122

FORMATS: Studio

MUSC 1803 Applied Study in Second Instrument 1a

CREDIT HOURS: 3

Applied study of a second instrument. All instrument/voice courses require an audition. Please contact the Fountain School for audition dates or visit the website at <http://dal.ca/fspa> Auxiliary fees apply.

CALENDAR NOTES: MUSC 1803.03 and MUSC 1804.03 must be completed within the same academic year.

PREREQUISITES: Audition and permission of Associate Director (Music).

FORMATS: Studio

MUSC 1804 Applied Study in Second Instrument 1b

CREDIT HOURS: 3

A continuation of MUSC 1803.03 for study of a second instrument. All instrument/voice courses require an audition. Please contact the Fountain School for audition dates or visit the website at <http://dal.ca/fspa> Auxiliary fees apply.

CALENDAR NOTES: MUSC 1803.03 and MUSC 1804.03 must be completed within the same academic year.

PREREQUISITES: MUSC 1803.03 and permission of Associate Director (Music)

FORMATS: Studio

MUSC 2007 The Guitar: History and Techniques

CREDIT HOURS: 6

This course will introduce students to the various styles of guitar playing from classical to jazz to folk. The history of the instrument (including lute and other related plucked instruments) and an examination of the key styles and performers will be covered. Practical instruction will be provided in this course, so a guitar will be necessary. Practical instruction will attempt to accommodate the various skill levels of the students enrolled. SPECIAL NOTE: This course is for non-music majors and cannot be counted toward a music degree.

FORMATS: Lecture | Lab

MUSC 2008 Modern Guitar

CREDIT HOURS: 6

A course for students with a serious interest in preparing for studio guitar playing. The course includes jazz, folk, rock and accompanying idioms. Students will receive instruction and participate in ensemble playing in improvisation, score reading, chording, and arranging.

CALENDAR NOTES: Students taking this course must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively. Music majors must register in MUSC 3308X/Y.06

PREREQUISITES: MUSC 2007.06 or permission of instructor

EXCLUSIONS: MUSC 3308.03

FORMATS: Lecture | Lab

MUSC 2010 Topics in Music and Cinema

CREDIT HOURS: 3

This course investigates various engagements of music and cinema. Topics vary from year to year and may include: diegetic/non-diegetic music, musical narrativity in film, representation, manipulation, cinema and opera, music or sound as special effect, film-scoring and the use of notable songs/tunes.

CROSSLISTED: FILM 2010

EXCLUSIONS: MUSC 2015X/Y.06

MUSC 2018 The Road to Rock 'n' Roll: Popular Music until 1960

CREDIT HOURS: 3

This course focuses on the origins and development of popular music in the twentieth century, tracing a history of rock'n'roll from its roots in minstrelsy and music hall styles of the nineteenth century until the end of rock'n'roll era in the 1950s. While no previous background in music is required, students will be expected to listen closely to selected music and to contribute to class discussions. Students will gain greater knowledge of history, as it affects and is affected by musical activities, and they will appreciate the motives behind the debates that have always surrounded popular music. Above all, students will learn to understand the history of rock'n'roll in terms of changes in both musical techniques and social values, and to recognize music as a site of celebration and struggle.

FORMATS: Lecture | Discussion

MUSC 2019 The Rock'n'Roll Era and Beyond

CREDIT HOURS: 3

This course focuses on the many different kinds of popular music that have proliferated since the 1950s. While no previous background in music is required, students will be expected to listen closely to selected music and to contribute to class discussions. Students will gain greater knowledge of history, as it affects and is affected by musical activities, and they will appreciate the motives behind the debates that have always surrounded popular music. Above all, students will learn to understand the history of rock'n'roll in terms of changes in both musical techniques and social values, and to recognize music as a site of celebration and struggle.

FORMATS: Lecture | Discussion

MUSC 2020 The History of Jazz

CREDIT HOURS: 3

This course is a survey of the origins and development of jazz, concentrating on the historical and social contexts of music and musicians. We will discuss many of the kinds of music that have been called jazz, and we will analyze their roles in twentieth century culture. Knowledge of musical notation and terminology is not required.

EXCLUSIONS: MUSC 2013X/Y.06, MUSC 3313X/Y.06

FORMATS: Lecture | Discussion

MUSC 2022 The Art and Science of Drumming

CREDIT HOURS: 6

This course will introduce students to the art and science of music using hand drums. The history of the instrument as well as cultural context and rhythmic structure will be discussed for various styles of drumming. A significant portion of the class will be practical, where students will be taught the rudiments of reading music and playing hand drums. This means that it will be necessary for each student to bring an approved hand drum to each class.

CALENDAR NOTES: This course is for non-music majors only and cannot be counted as a credit in a Music degree program.

MUSC 2023 Middle Eastern Music

CREDIT HOURS: 3

This class introduces students to the musical system of the Middle East as well as its various roles and applications throughout different countries. Music theory, performance practices, music making as a social activity, and the role music has in religion are a few of the topics examined. Students will also formalize their own opinions on trends in Middle Eastern music and discuss them in the classroom with the instructor. Topics in essential knowledge of performance will be examined.

FORMATS: Lecture

MUSC 2024 Guitar: History and Techniques 1

CREDIT HOURS: 3

This course will introduce students to the various styles of guitar playing from classical to jazz to folk. This term covers the history of the instrument (including lute and other related plucked instruments) and an examination of guitar building techniques and guitar maintenance. Practical guitar instruction will include basic chord playing, music reading (first three strings) and melody playing. The basic rudiments of music theory will also be covered.

CALENDAR NOTES: This course is for non-music majors and cannot be counted toward a music degree.

EXCLUSIONS: MUSC 2007.06

FORMATS: Lecture | Lab

MUSC 2025 Guitar: History and Techniques 2

CREDIT HOURS: 3

A continuation of MUSC 2024, this class includes an examination of various music styles and performers related to the guitar. Practical guitar instruction will include advanced chord playing, music reading (all six strings) and melody playing. Theory will include theoretical understanding of various music scales and chord theory.

CALENDAR NOTES: This course is for non-music majors and cannot be counted toward a music degree.

PREREQUISITES: MUSC 2024.03

EXCLUSIONS: MUSC 2007.06

FORMATS: Lecture | Lab

MUSC 2026 Modern Guitar I

CREDIT HOURS: 3

This course introduces students to intermediate guitar skills. This class builds on the curriculum of Guitar: History and Techniques and introduces more complex theory leading to an understanding and building of skills in improvisation and song writing. Students will work mostly on understanding and applying major scale theory to chord and melody playing in the fall term.

CALENDAR NOTES: This course is for non-music majors and cannot be counted toward a music degree.

EXCLUSIONS: MUSC 2008.06

FORMATS: Lecture | Lab

MUSC 2027 Modern Guitar 2

CREDIT HOURS: 3

A continuation of MUSC 2026, this class includes more advanced guitar techniques as well as understanding and use of minor, pentatonic and modal scales. Advanced chord playing and understanding of chord progressions will be introduced. As well, basic soloing, chord substitution, and bass line patterns will be taught.

CALENDAR NOTES: This course is for non-music majors and cannot be counted toward a music degree.

PREREQUISITES: MUSC 2026.03

EXCLUSIONS: MUSC 2008.06

FORMATS: Lecture | Lab

MUSC 2028 The Art and Science of Drumming 1

CREDIT HOURS: 3

This course aims to give an introduction to hand drumming of various styles, as well as Western Music theory and the concept of so-called "World Music". Students will learn how to play Basic African (djembe) and Afro-Cuban (conga) techniques and rhythms. Topics in World Music will include the music of Africa, Latin America, and North America, and music theory topics will cover note values and rhythmic dictation.

CALENDAR NOTES: This course is for non-music majors only and cannot be counted for credit in a Music degree program.

EXCLUSIONS: MUSC 2022.06

FORMATS: Lecture | Lab

MUSC 2029 The Art and Science of Drumming 2

CREDIT HOURS: 3

This course is a continuation of the Art and Science of Drumming 1, providing an introduction to hand drumming of various styles as well as Western Music theory and the concept of so-called "World Music". Students will learn basic Middle-Eastern (dumbek) techniques and rhythms. Topics in World Music will include the music the Middle East, India, Brazil, and Japan, and music theory topics will cover more advanced note values and rhythmic dictation.

CALENDAR NOTES: This course is for non-music majors only and cannot be counted for credit in a Music degree program.

PREREQUISITES: MUSC 2028.03

EXCLUSIONS: MUSC 2022.06

FORMATS: Lecture | Lab

MUSC 2045 Read and Perform - Exploring Hispanic Literature and its Music through Spanish/Flamenco Guitar

CREDIT HOURS: 3

The course brings together the study of Hispanic literary texts and the relevant guitar repertoire and performance techniques. Both components will unfold concurrently providing an opportunity for reflection on crucial political and social junctures, through both music and narrative. Topics will include the military dictatorships of the Southern Cone, life in southern Spain in the years leading up to the country's civil war, and the Mexican Revolution, as an event that re-shaped Latin America's political landscape. The musical component of the class will be centered on the New Latin American song and the music of protest; Flamenco guitar performance techniques and repertoire, and the Mexican Corrido and Ballads of the Revolution.

CROSSLISTED: SPAN 2045

FORMATS: Lecture | Lab

MUSC 2130 Jazz Dance 1 (summer term)

CREDIT HOURS: 6

This course is a practical exploration into the specifics of Jazz Dance technique, incorporating the use of space, rhythm, and correct body alignment, as well as flexibility and strength. Emphasis is on the development of personal expression through the medium of dance. Students are expected to develop an awareness of dance terminology and the appreciation of movement as a practice.

CROSSLISTED: THEA 2020.06: Jazz Dance I (spring session only)

FORMATS: Lecture | Lab

MUSC 2131 Jazz Dance 1a

CREDIT HOURS: 3

This course is a practical exploration into the specifics of Jazz Dance technique, incorporating the use of space, rhythm, and correct body alignment, as well as flexibility and strength. Emphasis is on the development of personal expression through the medium of dance. Students are expected to develop an awareness of dance terminology and the appreciation of movement as a practice.

CALENDAR NOTES: Completion of MUSC 2131.03 and MUSC 2132.03 satisfy course requirements toward the Certificate in Dance and Movement.

CROSSLISTED: THEA 2021.03: Jazz Dance 1a

EXCLUSIONS: MUSC 2130, THEA 2020

FORMATS: Lecture | Lab

MUSC 2132 Jazz Dance 1b

CREDIT HOURS: 3

This is a continuation of MUSC 2131.03. This course is a practical exploration into the specifics of Jazz Dance technique, incorporating the use of space, rhythm, and correct body alignment, as well as flexibility and strength. Emphasis is on the development of personal expression through the medium of dance. Students are expected to develop an awareness of dance terminology and the appreciation of movement as a practice.

CALENDAR NOTES: This is a continuation of MUSC 2131.03. Completion of MUSC 2131.03 and MUSC 2132.03 satisfy course requirements toward the Certificate in Dance and Movement.

PREREQUISITES: MUSC 2131.03 or THEA 2021.03

CROSSLISTED: THEA 2022.03: Jazz Dance 1b

EXCLUSIONS: MUSC 2130, THEA 2020

FORMATS: Lecture | Lab

MUSC 2164 Special Topics: Applied Study

CREDIT HOURS: 3

A course for music students to pursue applied study in a secondary idiom as a special topic. Enrolment in this course is at the discretion of the Fountain School of Performing Arts through approval of the committee on studies and an audition. This course involves an auxiliary fee.

CALENDAR NOTES: SIGNATURE REQUIRED

FORMATS: Studio

MUSC 2175 Lyric Diction for Singers

CREDIT HOURS: 3

This class is an introduction to the International Phonetic Alphabet and lyric diction as applied to the field of singing. Through study of the International Phonetic Alphabet, the course explores how this tool can be the foundation for pronouncing all languages. This foundation is then related to the sung pronunciation of vocal music, with a focus on classical and Contemporary Commercial Music styles. (Note: This course cannot satisfy a language requirement in a program.)

PREREQUISITES: Permission of the instructor

EXCLUSIONS: MUSC 3175.03

FORMATS: Lecture | Experiential Learning

MUSC 2210 Introduction to Composition

CREDIT HOURS: 3

An introductory composition course in which students will write short pieces for a solo instrument or a small chamber ensemble. Each piece will be written using a different approach, including for example traditional tonality, modes, intervallic organization and 12-tone techniques.

PREREQUISITES: MUSC 1222.03 OR permission of instructor

FORMATS: Lecture | Tutorial

MUSC 2213 Composition Studies 2a

CREDIT HOURS: 3

Techniques and approaches of today's music are studied through writing of musical works for diverse instruments and ensembles, and through analysis of important works of repertoire. Emphasis will be given to creativity and to practical aspects of musical composition: effectiveness of orchestration, playability, quality of score, and preparation of parts.

CALENDAR NOTES: MUSC 2213.03 and MUSC 2214.03 must be completed within the same academic year. Auxiliary fees apply.

PREREQUISITES: MUSC 1214.03. Permission of Instructor.

RESTRICTIONS: Restricted to students who have applied and been accepted to the BMus program (composition studies stream). Please contact the Fountain School for application information.

FORMATS: Studio

MUSC 2214 Composition Studies 2b

CREDIT HOURS: 3

A continuation of MUSC 2213. Techniques and approaches of today's music are studied through writing of musical works for diverse instruments and ensembles, and through analysis of important works of repertoire. Emphasis will be given to creativity and to practical aspects of musical composition: effectiveness of orchestration, playability, quality of score, and preparation of parts.

CALENDAR NOTES: Auxiliary fees apply. MUSC 2213.03 and MUSC 2214.03 must be completed within the same academic year.

PREREQUISITES: MUSC 2213.03. Permission of Instructor.

RESTRICTIONS: Restricted to students in BMus who have been accepted to study Composition. Contact the Fountain School for details.

FORMATS: Studio

MUSC 2221 Music Theory 2a

CREDIT HOURS: 3

A continuation of Music Theory 1b, developing further skills in chromatic harmony through part-writing and harmonic analysis.

COREQUISITES: MUSC 2272, 2273, 2274, 2275

PREREQUISITES: MUSC 1222.03 or permission of the instructor

EXCLUSIONS: MUSC 2201.03

FORMATS: Lecture

MUSC 2222 Music Theory 2b

CREDIT HOURS: 3

Formal and harmonic analysis of selected 18th- and 19th-century compositions in various styles and idiom.

COREQUISITES: MUSC 2272, 2273, 2274, 2275

PREREQUISITES: MUSC 2221.03 or permission of the instructor

EXCLUSIONS: MUSC 3281.03

FORMATS: Lecture

MUSC 2231 Core Music Elective a

CREDIT HOURS: 3

For transfer students from NSCC needing additional course work in specified areas.

PREREQUISITES: Approval of Associate Director (Music)

MUSC 2232 Core Music Elective b

CREDIT HOURS: 3

For transfer students from NSCC needing additional course work in specified areas.

PREREQUISITES: Approval of Associate Director (Music)

MUSC 2276 Musicianship: Skills for All Musicians 2a

CREDIT HOURS: 3

Musicianship: skills for all musicians is a core requirement course for all music students. The course builds from the concepts learned in MUSC 1277 and combines aural skills (ear training, sight-singing, rhythmic/harmonic/melodic dictation) and keyboard skills. The course places equal emphasis on learning to sight-sing and sight-read exercises on a keyboard instrument as well as writing dictation. Topics include singing in major/minor keys and modes using moveable Do, alternative notation systems, playing one-two-three and four-part keyboard exercises, singing and playing scales and chords (including inversions), as well as reading pop and lead sheet notations.

PREREQUISITES: MUSC 1277

EXCLUSIONS: MUSC 2272, MUSC 2274

FORMATS: Lab

MUSC 3026 Advanced Fretboard and Harmony 1

CREDIT HOURS: 3

For music majors only, this course aims to give the committed guitarist a thorough grounding in fretboard harmony, progressing from the simplest structures to the most complex, and to provide resources and practical exercises for applying this content within various musical idioms.

EXCLUSIONS: MUSC 3308.06

FORMATS: Lecture | Lab

MUSC 3027 Advanced Fretboard and Harmony 2

CREDIT HOURS: 3

For music majors only, this course expands upon the concepts introduced in MUSC 3026.03, including creating harmonic structures in more advanced scale systems as well as applying fretboard harmony in composition and improvisation.

PREREQUISITES: MUSC 3026.03

EXCLUSIONS: MUSC 3308.06

FORMATS: Lecture | Lab

MUSC 3066 Women, Gender and Music

CREDIT HOURS: 3

The course explores the variety of ways in which gender shapes musical discourse. The role of gender in music will be examined through three broad topics: the history of female contributions to music as musicians, composers, patrons and listeners; musical constructions of gender, race, class and sexuality; and feminist criticism in recent musical discourse. Music students will be directed to more technical literature for their assignments and research paper, and will be required to engage in more technical descriptions of the music for all written work.

PREREQUISITES: Any one of: MUSC 2016.03, MUSC 2018.03, MUSC 2019.03, MUSC 2020.03, MUSC 2022.06, MUSC 2023.03, MUSC 2024.03, MUSC 2026.03, MUSC 2028.03, MUSC 2045.03, MUSC 2131.03, MUSC 2164.03, MUSC 2175.03, MUSC 2210.03, MUSC 2213.03, MUSC 2221.03, MUSC 2276.03, MUSC 2354.03

CROSSLISTED: GWST 2066.03

FORMATS: Lecture

MUSC 3160 Conducting

CREDIT HOURS: 3

A practical introduction to the basic techniques of conducting. SIGNATURE REQUIRED

FORMATS: Lab

MUSC 3161 Choral Techniques

CREDIT HOURS: 3

A study of the distinctive features of choral practice and performance including repertoire, programming, vocal technique, and the role of choral music in society. This class is open to non-music majors with experience/interest in choral music. SIGNATURE REQUIRED

PREREQUISITES: MUSC 2270.03 or MUSC 2272.015 and MUSC 2273.015, MUSC 2222.03 and/or permission of the instructor
FORMATS: Lecture | Lab

MUSC 3176 Vocal Pedagogy and Vocology

CREDIT HOURS: 3

This course explores the basic principles of vocal pedagogy and vocology. Classes address the anatomy and physiology of singing, the processes of sound production, and the methodologies of vocal pedagogy as applied to habilitation and teaching of voice in all disciplines of singing.

PREREQUISITES: Permission of the instructor

FORMATS: Lecture | Experiential Learning

MUSC 3177 Vocal Literature

CREDIT HOURS: 3

This class examines Classical art song literature through the lens of the historical and personal context from which composers created their works. Through the investigation of context, style and performance practice, the course provides links to the creation of contemporary classical art song, jazz, and Contemporary Commercial Music. This exploration of Classical art song literature aligns it with today's society and provides foundations for practicing musicians, as well as for those with curiosity about the genre.

PREREQUISITES: Permission of the instructor

FORMATS: Lecture | Experiential Learning

MUSC 3199 Half-Recital

CREDIT HOURS: 3

Required for all third-year Bachelor of Music students in the Performance concentration. May also be available to exceptional students in the fourth year of other 120 credit hour Music degree programs, by audition. Students must have completed all 2000-level theory courses as per Calendar guidelines. Students not in BMus Performance concentration must have a co-requisite of a minimum 4000-level applied study course. Please note that additional fees will apply for students not in BMus Performance concentration. This performance is a solo recital only. Recital repertoire should consist of 30 to 45 minutes of music. See the Fountain School of Performing Arts for further details including audition procedures and deadlines. Exclusions: students in 90 credit hour degree programs are not eligible.

PREREQUISITES: Audition and permission of department

MUSC 3200 Beats and Notes: Russian Music from Baroque to Rock

CREDIT HOURS: 3

Designed for the interested listener who wants to learn about the target culture through its melodic legacy, the course will consider the history of Russian music from its origin to the present day. This course is for non-music majors. Knowledge of musical notation and terminology is not a prerequisite.

Knowledge of Russian language is not required, but those with the basic command will be given an option of completing special assignments.

CROSSLISTED: RUSN 3200.03

FORMATS: Lecture | Discussion | Other (explain in comments)

MUSC 3221 Form and Analysis: the Second Viennese School to the Present Day

CREDIT HOURS: 3

Analysis of selected 20th- and 21st-century compositions. SIGNATURE REQUIRED

PREREQUISITES: MUSC 2222.03, MUSC 2352.03 or MUSC 2355.03, or permission of the Department

EXCLUSIONS: MUSC 4281.03

FORMATS: Lecture

MUSC 3263 Theory of Popular Musics

CREDIT HOURS: 3

This course will focus on jazz and contemporary music theory and harmony practices. Topics will include extended harmony and melodic development that will be used to develop skills in advanced performance, as well as arranging and compositional techniques.

CALENDAR NOTES: This course is required for students in the Bachelor of Music Concentration in Popular Musics.

PREREQUISITES: MUSC 1201.03 or permission of the instructor

FORMATS: Lecture

MUSC 3282 Orchestration

CREDIT HOURS: 3

A survey of the development of the orchestra and the orchestral instruments with an introduction to acoustics. Technique in the deployment of instrumental combinations is emphasized through practical exercises in scoring for small chamber ensembles and a medium-sized orchestra common in the 20th century.

SIGNATURE REQUIRED

PREREQUISITES: MUSC 2222.03

FORMATS: Lecture

MUSC 3283 Modal Counterpoint

CREDIT HOURS: 3

Polyphonic techniques of the Renaissance period studied through written exercises in species and free counterpoint, as well as through analysis of works by Lasso, Palestrina, Victoria and others. SIGNATURE REQUIRED

PREREQUISITES: MUSC 2222.03

EXCLUSIONS: MUSC 3280.03

FORMATS: Lecture

MUSC 3284 Tonal Counterpoint

CREDIT HOURS: 3

A study of tonal counterpoint in the baroque style. A particular emphasis will be made on the instrumental music of its most representative master, J.S. Bach, through analysis of works and writing of stylistic exercises. SIGNATURE REQUIRED

PREREQUISITES: MUSC 2222.03

EXCLUSIONS: MUSC 3280.03

FORMATS: Lecture

MUSC 3308 Modern Guitar (Advanced Fretboard and Harmony)

CREDIT HOURS: 6

For music majors only, this course aims to give the committed guitarist a thorough grounding in fretboard harmony, progressing from the simplest structures to the most complex, and to provide resources and practical exercises for applying this content within various musical idioms.

CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

PREREQUISITES: MUSC 1102, MUSC 2102

EXCLUSIONS: MUSC 2008

FORMATS: Lecture | Lab

MUSC 3314 History of Opera

CREDIT HOURS: 3

Consideration of the history of Opera from its origin to the present day. Concepts to be examined include: "high" and "low" styles; national styles; gender and race; and function in contemporary Western society.

PREREQUISITES: MUSC 1353.03 or MUSC 2354.03, and MUSC 2352.03 or MUSC 2355.03, or permission of the instructor

EXCLUSIONS: MUSC 2011.06 and MUSC 3311.06

FORMATS: Lecture

MUSC 3353 Chamber Music Literature

CREDIT HOURS: 3

A study in depth of chamber music from the Eighteenth century to contemporary schools.

PREREQUISITES: MUSC 2352.03 or MUSC 2355.03 or permission of the instructor

FORMATS: Lecture

MUSC 3355 The Piano and its Literature

CREDIT HOURS: 3

A study in depth of the evolution of the piano and its repertoire from the Eighteenth century to the contemporary.

PREREQUISITES: MUSC 2352.03 or MUSC 2355.03 or permission of the instructor

FORMATS: Lecture

MUSC 3662 Introduction to Digital Audio Sound Design

CREDIT HOURS: 3

This class introduces the concepts, language, and technology associated with digital audio sound design as it applies to Theatre Sound Design, Film/TV, Immersive and Interactive Experiences, Music Production, and Multi-Media Art. Students will learn to use a digital audio workstation (Logic Pro) to create original short digital audio pieces. Students will also gain knowledge on how audio is made manifest in performances and events through the use of theatrical cueing software (QLab) and sound reinforcement systems.

CALENDAR NOTES: All third or fourth year students may take this course with permission from the instructor, noting that previous music/theatre/media/software knowledge is not mandatory, but will be considered an asset.

PREREQUISITES: All third or fourth year students may take this course with permission from the instructor, noting that previous music/theatre/media/software knowledge is not mandatory, but will be considered an asset.

CROSSLISTED: PERF 3662

RESTRICTIONS: Third and fourth year students

FORMATS: Lecture | Lab

MUSC 3663 Advanced Digital Audio Sound Design

CREDIT HOURS: 3

Using knowledge and concepts learned in the prerequisite course PERF/MUSC 3662.03: Introduction to Digital Audio Sound Design, this class focuses on varied creative and artistic applications for digital audio sound design in the realms of Theatre, Film/TV, Immersive and Interactive Experiences, Music Production and Performance, and Multi-Media Art. Students will advance their knowledge of audio software (Logic Pro, QLab) and design principles in order to create nuanced sound design elements and a complete theatrical sound design.

PREREQUISITES: PERF 3662 or MUSC 3662

CROSSLISTED: PERF 3663

FORMATS: Lecture | Lab

MUSC 3751 Ensemble 3a

CREDIT HOURS: 1.5

Open to all students by audition, this course is also a co-requisite for students in 3rd Year (3000-level) Applied Study (voice or instrument) MUSC 3801.03 and MUSC 3802.03 OR MUSC 3811.03 and MUSC 3812.03 in music degree programs. The ensembles are selected in accordance with instrument/program requirements and with the guidance and approval of the applied studies instructor. Ensemble participation typically requires regular weekly rehearsals and scheduled performances. Please see the department for specific guidelines and schedules. Refer to Ensemble Participation for further details and a list of ensembles.

FORMATS: Experiential Learning

MUSC 4170 Improvisation Techniques and Practices

CREDIT HOURS: 3

A studio course in the techniques and performance skills of improvisation as related to the jazz idiom, and other contemporary and non-Western music; students will perform as soloists and in small ensembles.

PREREQUISITES: 3000-level applied study and the approval of the instructor

FORMATS: Studio

MUSC 4192 Short Apprenticeship

CREDIT HOURS: 3

Students gain practical, workplace experience with an organization appropriate to their course of study. The Short Apprenticeship will represent approximately 50 - 60 hours of work on an approved project with a sponsoring organization. Positions may be paid as appropriate, but this is not guaranteed.

PREREQUISITES: Permission of the Fountain School

RESTRICTIONS: Students must have completed two years of study in a Minor/Major/Double Major/Honours/Combined Honours Bachelor of Arts program in Music or the Bachelor of Music program. Applications for apprenticeships will be evaluated in consultation with faculty by the Associate Director (Music) and the Director of the Fountain School of Performing Arts, who will have final decision about which apprenticeships can be sponsored by the School.

EXCLUSIONS: There are no exclusions, but students who have completed MUSC 4193.06 will not be prioritized if they apply for MUSC 4192.03 and vice versa. Approval will not be granted for two apprenticeship credits with the same or similar course content.

MUSC 4193 Long Apprenticeship

CREDIT HOURS: 6

Students gain practical, workplace experience with an organization appropriate to their course of study. The Long Apprenticeship will represent approximately 100 – 120 hours of work on an approved project with a sponsoring organization completed within one semester. Positions may be paid as appropriate, but this is not guaranteed.

RESTRICTIONS: Students must have completed two years of study in a Minor/Major/Double Major/Honours/Combined Honours Bachelor of Arts program in Music or the Bachelor of Music program. Applications for apprenticeships will be evaluated in consultation with faculty by the Associate Director (Music) and the Director of the Fountain School of Performing Arts, who will have final decision about which apprenticeships can be sponsored by the School.

EXCLUSIONS: There are no exclusions, but students who have completed MUSC 4193.06 will not be prioritized if they apply for MUSC 4192.03 and vice versa. Approval will not be granted for two apprenticeship credits with the same or similar course content.

FORMATS: Experiential Learning

MUSC 4199 Full Recital

CREDIT HOURS: 3

Required of and restricted to all students in the Performance concentration of the Bachelor of Music program. The recital repertoire should consist of 55 to 75 minutes of music.

PREREQUISITES: Permission of the department

MUSC 4211 Composition 2a

CREDIT HOURS: 3

Open only to students accepted into the BMus Concentration in Composition. Techniques and approaches of today's music studied through writing of musical works for diverse instruments and ensembles, and through analysis of important works of repertoire. Emphasis will be given to creativity and to practical aspects of musical composition: effectiveness of orchestration, playability, quality of score, and preparation of parts. SIGNATURE REQUIRED.

CALENDAR NOTES: MUSC 4211.03 and MUSC 4212.03 must be completed within the same academic year.

PREREQUISITES: MUSC 3211.03 and MUSC 3212.03 and permission of the composition instructor.

MUSC 4250 Artists as Entrepreneurs: From Concept to Creation

CREDIT HOURS: 3

A business course designed for those interested in arts-led entrepreneurial ventures and self-producing theatre, music and film events for public platforms. It is aimed at developing the preparatory skill set needed for entrepreneurial ventures, which can feature creative products, services, and performances. Content will focus on an arts-led approach and how this can define entrepreneurial ventures, operations, and engagement with audiences and customers. Product benefits, customer groups, promotion, branding, distribution, financial and legal concepts, and digital platforms will be examined through the creative arts lens. Finally, audience-building strategies for those leading small performing arts organizations will be explored.

PREREQUISITES: Permission of the instructor

CROSSLISTED: PERF 4250, THEA 4250

FORMATS: Lecture | Discussion

MUSC 4280 Contemporary Techniques

CREDIT HOURS: 3

Some of today's main compositional techniques will be studied in this course. These may include advanced modal and 12-tone writing, interval and texture-oriented procedures, as well as aleatoric strategies. Special attention will be given to problems of notation and instrumentation raised by the afore-mentioned approaches. SIGNATURE REQUIRED

PREREQUISITES: MUSC 2222.03, 3283.03 or 3284.03

FORMATS: Lecture

MUSC 4299 Composition Recital

CREDIT HOURS: 3

A jury-based assessment of the final requirements for the BMus, Concentration in Composition.

PREREQUISITES: Permission of the composition instructor

MUSC 4353 Music Since 1945

CREDIT HOURS: 3

This seminar explores themes in the history of music after 1945. This period is so recent that there is not a standard narrative for it, and the very premise of a single absolute narrative is called into question. We will focus throughout this course on music's meaning in contemporary society, with critical attention to issues of equity, diversity, and inclusion. Whether we are exploring avant-garde experimentation, the historical performance movement, jazz, rock, or rap, our aim will be to examine how the music engages with its social and political surroundings, and how it shapes and is shaped by historical circumstances and context.

PREREQUISITES: MUSC 2352.03 and MUSC 2353.03, or MUSC 2355.03 or permission of instructor

CROSSLISTED: MUSC 5353

FORMATS: Seminar

MUSC 4354 Popular Music Analysis

CREDIT HOURS: 3

In this course for music majors, we examine various methods and techniques for studying popular music. We consider the central debates of this relatively new field of scholarly inquiry, and we assess the contributions of popular music scholarship to the larger fields of music study.

PREREQUISITES: MUSC 2352.03 and MUSC 2353.03, or MUSC 2355.03 or permission of instructor

CROSSLISTED: MUSC 5354

FORMATS: Seminar

MUSC 4355 Narrative Strategies in Nineteenth-Century Music: Gender, Identity, and Social Politics

CREDIT HOURS: 3

An interdisciplinary survey of nineteenth-century instrumental music, focusing on the narrative potential of nineteenth-century musical conventions and their relationship to other aspects of nineteenth-century Western culture. Representative musical works will be studied within the context of broader social and cultural issues, including gender, race, class, sexuality, nationality, ethnicity, and identity.

MUSC 4360 Advanced Seminar in Baroque Culture

CREDIT HOURS: 6

This course offers its students a survey of key aspects of seventeenth and eighteenth-century European history and society along with a first-hand view of some of the most important aspects of baroque style and material culture. It takes place in the town of Cesky Krumlov in the Czech Republic. The course introduces students to the socio-political conditions that led to the birth of Baroque civilization before entering into an exploration of the court life of seventeenth and eighteenth-century Europe. It then examines the cultural and artistic forms most characteristic of this period, with particular emphasis on opera history and on the role of the 'theatrical' in the Baroque arts. As the course proceeds, students will have an opportunity to consider the connections between course material and the evidence of Baroque culture to be found in the Castle Theatre's scenographic machinery, its stock of original scenery and props, and its collection of historical costumes, as well as to witness an experimental Baroque opera performance. Finally, the course will include visits to Prague and other sites of interest to add to students' understanding of the Baroque and its legacy to subsequent periods.

CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

PREREQUISITES: Permission of the Fountain School of Performing Arts and/or the Department of History.

CROSSLISTED: HIST 4162.06, THEA 4735.06

RESTRICTIONS: 3rd and 4th year students only.

MUSC 4901 Symphony Apprenticeship a

CREDIT HOURS: 3

A student in the Bachelor of Music Performance Concentration who has demonstrated exceptional aptitude and ability in his/her orchestral instrument, appropriate to the standards for employment by Symphony Nova Scotia, will serve apprenticeship in the Symphony, supervised by their Applied Study Instructor. Preference will normally be given to a fourth-year student. Normally the majority or all of the 34-38 services will be played during the First Term. Qualification for this credit will be subject to the needs of the Symphony, nomination by the Fountain School of Performing Arts, and a successful audition for the Symphony Artistic Director and relevant Symphony Section Principals. The student will be hired by the Symphony at the current per-service rate, and must be a Member in Good Standing of the Atlantic Federation of Musicians. The student will be graded by their supervising Instructor based on personal observation and on receipt of a signed evaluation from the Artistic Director of the Symphony. Normally there shall be only one such apprenticeship per season, and it is not renewable.

CALENDAR NOTES: MUSC 4901.03 and MUSC 4902.03 must be completed within the same academic year.

PREREQUISITES: Nomination by the Fountain School of Performing Arts; audition with Symphony Artistic Director and relevant Symphony Section Principals; permission of the department.

RESTRICTIONS: Normally restricted to a student in the fourth year of BMus concentration in performance

EXCLUSIONS: MUSC 4190.06XY

FORMATS: Experiential Learning

MUSC 4903 Long Apprenticeship a

CREDIT HOURS: 3

Students gain practical, workplace experience with an organization appropriate to their course of study. With MUSC 4904.03, the Long Apprenticeship will represent approximately 100 – 120 hours of work on an approved project with a sponsoring organization completed over two academic terms. Positions may be paid as appropriate, but this is not guaranteed.

CALENDAR NOTES: MUSC 4903.03 and MUSC 4904.03 must be completed within the same academic year.

RESTRICTIONS: Students must have completed two years of study in a Minor/Major/Double Major/Honours/Combined Honours Bachelor of Arts program in Music or the Bachelor of Music program. Applications for apprenticeships will be evaluated in consultation with faculty by the Associate Director (Music) and the Director of the Fountain School of Performing Arts, who will have final decision about which apprenticeships can be sponsored by the School.

EXCLUSIONS: MUSC 4193.06. Also, students who have completed MUSC 4903.03 and MUSC 4904.03 will not be prioritized if they apply for MUSC 4192.03 and vice versa. Approval will not be granted for two apprenticeship credits with the same or similar course content.

Beginning in Philosophy

There are many different ways of beginning in philosophy. The Dalhousie Philosophy Department offers two sorts of courses for beginners: (1) general survey introductions, which will give you a taste of a variety of questions and answers, and (2) introductions to special areas. Students wishing to major in philosophy are encouraged to begin with Introduction to Philosophy (either PHIL 1500 Ethics, Social and Political Philosophy (non-writing); PHIL 1501 Epistemology, Metaphysics (non-writing); PHIL 1810 Ethics Social and Political Philosophy (writing); PHIL 1820 Epistemology, Metaphysics (writing)). Any student may begin philosophy with a course that has no prerequisites, including most of the courses at the 2000 level. Courses at the 3000 level and beyond usually have prerequisites. See the [course descriptions](#).

We encourage students who plan to pursue a degree in Philosophy to speak with the Undergraduate Advisor.

Degree Programs

All students planning to take a degree in philosophy are encouraged to talk to an undergraduate advisor; those planning to do an honours degree must consult with the honours advisor. Students who intend to specialize in philosophy are encouraged to take an honours degree, which is advantageous for graduate study in philosophy.

In addition to the departmental requirements listed below, students must satisfy the general degree requirements outlined in the [Degree Requirements](#) section.

Note: In the statement of program requirements and prerequisites, "credit" means one full credit (six credit hours).

Not all courses are offered every year. Please consult the current timetable to determine if these courses are offered.

Detailed descriptions are available from the department website at philosophy.dal.ca and from the departmental office.

Staff

Dean

Andrews, J., Hons BA (McGill) MA, PhD (Toronto)

Chair of Department

Hymers, M.

Undergraduate Advisor

Borgerson, K.

Baylis, F., BA (McGill), MA, PhD (Western), CM, ONS, FRSC, FCAHS, Distinguished Research Professor, Special Advisor to the Vice-President Research and Innovation

Diamond, E., BA (Vind), MA (Dalhousie), PhD (Northwestern), Associate Professor and Chair, Department of Classics

Doolittle, F., PhD (Stanford), Professor Emeritus, Department of Biochemistry and Molecular Biology

Frappier, M., BScA, MA (Laval), PhD (Western), Associate Professor of Humanities, King's

McOuat, G., BA, MA, PhD (Toronto), Professor of Humanities, King's

BA with Honours in Philosophy

See general degree requirements for the BA Honours under [Degree Requirements](#).

Students interested in Honours Programs are encouraged to apply by the middle of their third year. Please contact honours advisor. For more information, and to download the honours application form, available online at https://www.dal.ca/campus_life/academic-support/advising/declaring-your-major/how-and-when-to-declare.html

Departmental Requirements

At least 60 credit hours in Philosophy of which at least 54 and no more than 66 are beyond the 1000 level

Select at least six credit hours from the following- Philosophy (Logic):

- PHIL 2130.03: Logic Deduction
- PHIL 2660.03: Logic: Understanding of Scientific Reasoning
- PHIL 3140.03: Logic: Logical Theory 1

Select at least six credit hours from the following - Philosophy (History):

- PHIL 2350.03: History of Philosophy: Ancient
- PHIL 2165.03: Philosophy and the Black Experience
- PHIL 2610.03: History of Philosophy: The Rationalists
- PHIL 2620.03: History of Philosophy: The Empiricists
- PHIL 3110.03: History of Ethics: Plato to Epicurus
- PHIL 3115.03: History of Ethics: Kant's Moral Theory
- PHIL 3630.03: History of Philosophy: Kant
- PHIL 3635.03: History of Philosophy: 19th Century Philosophy
- PHIL 3640.03: History of Philosophy: 20th Century Philosophy
- PHIL 3660.03: Post-Modern Philosophy

At least 24 credit hours at or above the 3000 level, including three credit hours in:

- PHIL 3051.03: Epistemology

and

- PHIL 3105.03: Ethics

At least six credit hours at the 4000 level.

Honours Thesis

BA with Combined Honours

See general degree requirements for the BA Combined Honours under [Degree requirements](#).

Departmental Requirements

At least 30 and no more than 48 credit hours in Philosophy beyond the 1000 level, including 18 credit hours beyond the 2000 level. Since the requirements for the combined honours degree vary (depending on the program with which philosophy is combined), students must see an honours advisor. An honours thesis (or qualifying exam) in one of the two combined subjects is required.

Select at least three credit hours from the following - Philosophy (Logic):

- PHIL 2130.03: Logic: Deduction
- PHIL 2660.03: Logic: Understanding of Scientific Reasoning

Select at least six credit hours from the following - Philosophy (History):

- PHIL 2165.03: Philosophy and the Black Experience
- PHIL 2350.03: History of Philosophy: Ancient
- PHIL 2610.03: History of Philosophy: The Rationalists
- PHIL 2620.03: History of Philosophy: The Empiricists
- PHIL 3110.03: History of Ethics: Plato to Epicurus

- PHIL 3115.03: History of Ethics: Kant's Moral Theory
- PHIL 3630.03: History of Philosophy: Kant
- PHIL 3635.03: History of Philosophy: 19th Century Philosophy
- PHIL 3640.03: History of Philosophy: 20th Century Philosophy
- PHIL 3660.03: Post-Modern Philosophy

At least 18 credit hours at or above the 3000 level including three credit hours chosen from:

- PHIL 3051.03: Epistemology
or
- PHIL 3105.03: Ethics

Honours Thesis (Philosophy as the primary honours subject)

BA (120 credit hour) Major in Philosophy

See general degree requirements for the BA Major (120 credit hour) under [Degree Requirements](#).

Departmental Requirements

At least 36 and no more than 54 credit hours in Philosophy beyond the 1000 level, including 18 credit hours beyond the 2000 level

Select at least three credit hours from the following - Philosophy (Logic):

- PHIL 2130.03: Logic: Deduction
- PHIL 2660.03: Logic: Understanding of Scientific Reasoning

Select at least six credit hours from the following - Philosophy (History):

- PHIL 2165.03: Philosophy and the Black Experience
- PHIL 2350.03: History of Philosophy: Ancient
- PHIL 2610.03: History of Philosophy: The Rationalists
- PHIL 2620.03: History of Philosophy: The Empiricists
- PHIL 3110.03: History of Ethics: Plato to Epicurus
- PHIL 3115.03: History of Ethics: Kant's Moral Theory
- PHIL 3630.03: History of Philosophy: Kant
- PHIL 3635.03: History of Philosophy: 19th Century Philosophy
- PHIL 3640.03: History of Philosophy: 20th Century Philosophy
- PHIL 3660.03: Post-Modern Philosophy

At least 18 credit hours at or above the 3000 level including three credit hours in:

- PHIL 3051.03: Epistemology
or
- PHIL 3105.03: Ethics

BA (120 credit hour) Double Major

See general degree requirements for the BA (120 credit hour) Double Major under [Degree requirements](#).

Departmental Requirements

At least 30 and no more than 48 credit hours in Philosophy beyond the 1000 level, including 18 credit hours beyond the 2000 level

Select at least three credit hours from the following - Philosophy (Logic):

- PHIL 2130.03: Logic: Deduction
- PHIL 2660.03: Logic: Understanding of Scientific Reasoning

Select at least six credit hours from the following - Philosophy (History):

- PHIL 2165.03: Philosophy and the Black Experience
- PHIL 2350.03: History of Philosophy: Ancient
- PHIL 2610.03: History of Philosophy: The Rationalists
- PHIL 2620.03: History of Philosophy: The Empiricists
- PHIL 3110.03: History of Ethics: Plato to Epicurus
- PHIL 3115.03: History of Kant's Moral Theory
- PHIL 3630.03: History of Philosophy: Kant
- PHIL 3635.03: History of Philosophy: 19th Century Philosophy
- PHIL 3640.03: History of Philosophy: 20th Century Philosophy
- PHIL 3660.03: Post-Modern Philosophy

At least 18 credit hours at or above the 3000 level including three credit hours chosen from:

- PHIL 3051.03: Epistemology
or
- PHIL 3105.03: Ethics

BA (90 credit hour) with a Minor in Philosophy

Requirements

A minimum of 18 to a maximum of 27 credit hours in Philosophy beyond the 1000 level, including at least 3 credit hours beyond the 2000 level.

Select at least three credit hours from the following:

- PHIL 2130.03: Logic: Deduction
- PHIL 2085.03: Reasoning Skills
- PHIL 2090.03: How to Win an Argument
- PHIL 2660.03: Logic: Understanding of Scientific Reasoning

Minor in Applied Ethics

The Minor in Applied Ethics is open to students in all disciplines except those already pursuing a Major or Honours in Philosophy.

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Requirements

At least 18 credit hours and no more than 27 credit hours in Philosophy beyond the 1000 level, including at least three credit hours beyond the 2000 level.

Select at least three credit hours from the following:

- PHIL 2130.03: Logic: Deduction
- PHIL 2085.03: Reasoning Skills
- PHIL 2090.03: How to Win an Argument
- PHIL 2660.03: Logic: Understanding of Scientific Reasoning

Select:

- PHIL 3105.03: Ethics

Select at least nine credit hours from the following:

- PHIL 2805.03: Ethics & Health Care: Patient Care
- PHIL 2810.03: Ethics & Health Care: Social Policy
- PHIL 2081.03: Ethics in the World of Business
- PHIL 2680.03: Ethics in Science

- PHIL 2475.03: Justice in Global Perspective
- PHIL 2480.03: Environmental Ethics
- PHIL 2490.03: Social, Ethical and Professional Issues in Computer Science
- PHIL 2720.03: The Good Life: Well-being, Meaning and Happiness
- PHIL 4801.03: Topics in Ethics and Health Care
- PHIL 4125.03: Topics in Ethics

Contact [Philosophy](#) for more information.

Minor in Bioethics

The Minor in Bioethics is open to students in all disciplines except those already pursuing a Major or Honours in Philosophy.

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Requirements

At least 18 credit hours and no more than 27 credit hours in Philosophy beyond the 1000 level, including at least three credit hours beyond the 2000 level.

Select:

- PHIL 3105.03: Ethics

Select at least three credit hours from the following:

- PHIL 2130.03: Logic: Deduction
- PHIL 2085.03: Reasoning Skills
- PHIL 2090.03: How to Win an Argument
- PHIL 2660.03: Logic: Understanding Scientific Reasoning

Select at least nine credit hours from the following:

- PHIL 2805.03: Ethics & Health Care: Patient Care
- PHIL 2810.03: Ethics & Health Care: Social Policy
- PHIL 2720.03: The Good Life: Well-being, Meaning and Happiness
- PHIL 3800.03: Philosophy of Medicine
- PHIL 4801.03: Topics in Ethics and Health Care

Contact [Philosophy](#) for more information.

Minor in Philosophy

The Minor in Philosophy is open to students in all disciplines except those already pursuing a Major or Honours in Philosophy.

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts (excluding Philosophy), Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A BA (90 credit hour) degree program with a minor in Philosophy is also available.

Requirements

A minimum of 18 to a maximum of 27 credit hours in Philosophy beyond the 1000 level, including at least 3 credit hours beyond the 2000 level.

Select at least three credit hours from the following:

- PHIL 2130.03: Logic: Deduction
- PHIL 2085.03: Reasoning Skills
- PHIL 2090.03: How to Win an Argument

- PHIL 2660.03: Logic: Understanding Scientific Reasoning

Contact [Philosophy](#) for more information.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

Course Notes

NOTE: Many courses are listed as being exclusionary to one another. This means that students may not take both courses so designated.

NOTE: Courses at the 4000 level are intended for advanced undergraduates with a strong background in philosophy. It is assumed that normally a student will have already taken relevant courses at the 3000-level. Courses with titles beginning "Topics in..." have no description, since the selection of topics and instructor is determined after the time of calendar preparation. These are seminar courses. Interested students should consult the department for up-to-date information.

Course Descriptions

PHIL 1050 Ethics in Science

CREDIT HOURS: 3

An introduction to ethical questions that arise in the practice of science. The course will explore a variety of ethical questions associated with the study and practice of science. Students will learn about the nature of philosophical approaches to ethics and how to employ these insights to the tasks of recognizing and reflecting on ethical issues that arise when engaged in scientific research and practice. One section of this course is offered as part of the Dalhousie Integrated Science Program and relates to the specific scientific topics studied within that program where it serves as one-half of the writing requirement for first year students and is available to DISP students only.

EXCLUSIONS: PHIL 2680.03

FORMATS: Lecture | Discussion

PHIL 1500 Introduction to Philosophy: Ethics, Social and Political Philosophy - Non-Writing Version

CREDIT HOURS: 3

In this class we ask what it is to think logically and critically, whether the existence of God can be proven, whether his existence is relevant to our ethical duties or whether they have some other basis than in divine command (e.g., in contracts for mutual advantage), whether claims about which duties we have can be objectively correct, and whether it is rational to fulfill those duties. We consider sample moral questions, such as whether abortion is permissible, and what duties we have to those less well off, or to animals. Turning to social and political philosophy, we ask what the best political system is, and how goods should be justly distributed. We may ask what racism is, how feminism requires a re-thinking of issues of social justice, whether life has meaning, whether death is to be feared, and whether the value of art works is merely subjective. We learn that the answers to philosophy's profound questions aren't just matters of opinion but must pass rigorous standards of justification; and that philosophy engages with our lives. Students will learn how to evaluate the assumptions of their own cultures about these things, to engage in constructive dialogue, and to write and speak clearly and logically. Historical and contemporary readings are studied.

CALENDAR NOTES: This course cannot contribute to satisfying the Faculty Writing Requirement. It is recommended that students seeking a full introduction to philosophy also take: Phil 1501, Introduction to Philosophy: Epistemology, Metaphysics, Non-Writing Class Version, however, students may get credit for Phil 1500 without having to take Phil 1501. If students do wish to take both classes, they may be taken in any order.

EXCLUSIONS: PHIL 1000X/Y.06, PHIL 1010X/Y.06, PHIL 1810.03

FORMATS: Discussion

PHIL 1501 Introduction to Philosophy: Epistemology, Metaphysics - Non-Writing Class Version

CREDIT HOURS: 3

In this class we review what it is to think logically and critically, then move on to epistemology, which asks what knowledge is and whether it is possible to have knowledge about ourselves, the minds of others, the past, and the future. Might we just be dreaming the physical world, or can we know it exists? What roles do sense perception and scientific method play in knowledge acquisition? How is this complicated by biases caused by, e.g., racism and sexism? We then study such metaphysical issues as whether the existence of the universe proves that God exists, whether a person's mind is just her brain, whether one can survive bodily death, what it is to be the same person at different times given that everything about a person can be different at a later time, and whether we are really free and morally accountable for the choices we make if, as science says, everything we do is caused by the laws of physics. We learn that the answers to philosophy's profound questions aren't just matters of opinion but must pass rigorous standards of justification; and that philosophy engages with our lives. Students will learn how to evaluate the assumptions of their own cultures about these things, to engage in constructive dialogue, and to write and speak clearly and logically. Historical and contemporary readings are studied. This course cannot contribute to satisfying the Faculty Writing Requirement. It is recommended that students seeking a full introduction to Philosophy also take PHIL 1500, Introduction to Philosophy: Ethics, Social and Political Philosophy - Non-Writing Class Version; however, students may get credit for PHIL 1501 without having to take PHIL 1500. If students do wish to take both parts, they may be taken in any order

EXCLUSIONS: PHIL 1000 X/Y.06, PHIL 1010 X/Y.06, PHIL 1820.03

PHIL 1810 Introduction to Philosophy: Ethics, Social and Political Philosophy - Writing Class Version

CREDIT HOURS: 3

In this class we ask what it is to think logically and critically, whether the existence of God can be proven, whether his existence is relevant to our ethical duties or whether they have some other basis than in divine command (e.g., in contracts for mutual advantage), whether claims about which duties we have can be objectively correct, and whether it is rational to fulfill those duties. We consider sample moral questions, such as whether abortion is permissible, and what duties we have to those less well off, or to animals. Turning to social and political philosophy, we ask what the best political system is, and how goods should be justly distributed. We may ask what racism is, how feminism requires a re-thinking of issues of social justice, whether life has meaning, whether death is to be feared, and whether the value of art works is merely subjective. We learn that the answers to philosophy's profound questions aren't just matters of opinion but must pass rigorous standards of justification; and that philosophy engages with our lives. Students will learn how to evaluate the assumptions of their own cultures about these things, to engage in constructive dialogue, and to write and speak clearly and logically. Historical and contemporary readings are studied. This course satisfies one half of the Faculty Writing Requirement, but only if the other half is satisfied by taking: PHIL 1820, Introduction to Philosophy: Epistemology, Metaphysics - Writing Version. The classes may be taken in any order.

EXCLUSIONS: PHIL 1000X/Y.06, PHIL 1010X/Y.06, PHIL 1500.03

PHIL 1820 Introduction to Philosophy: Epistemology, Metaphysics - Writing Version

CREDIT HOURS: 3

In this class we review what it is to think logically and critically, then move on to epistemology, which asks what knowledge is and whether it is possible to have knowledge about ourselves, the minds of others, the past, and the future. Might we just be dreaming the physical world, or can we know it exists? What roles do sense perception and scientific method play in knowledge acquisition? How is this complicated by biases caused by, e.g., racism and sexism? We then study such metaphysical issues as whether the existence of the universe proves that God exists, whether a person's mind is just her brain, whether one can survive bodily death, what it is to be the same person at different times given that everything about a person can be different at a later time, and whether we are really free and morally accountable for the choices we make if, as science says, everything we do is caused by the laws of physics. We learn that the answers to philosophy's profound questions aren't just matters of opinion but must pass rigorous standards of justification; and that philosophy engages with our lives. Students will learn how to evaluate the assumptions of their own cultures about these things, to engage in constructive dialogue, and to write and speak clearly and logically. EXCLUSIONS: PHIL 1000X/Y.06, PHIL 1010X/Y.06, PHIL 1501.03

PHIL 1971 Engineering and Society: Historical and Philosophical Perspectives

CREDIT HOURS: 3

This course uses historical case studies to examine the connections between engineers, technology, and society. Topics will include the emergence of engineering as a profession; the societal impact of the Industrial Revolution; the rise of environmentalism and green technology; the relation of engineers to governments and militaries; and ethical responsibility for engineering disasters. In addition to developing written and oral communication skills, students will learn various ethical theories and apply them to key cases in engineering history.

CROSSLISTED: HIST 1971

FORMATS: Lecture | Tutorial

PHIL 2020 Legal Thinking

CREDIT HOURS: 3

This course examines the role of practical reason in resolving legal controversies. It will address various questions on which there is a current legal debate and challenge students to develop their own informed opinions on these matters. Questions may include: Should the state prevent people from ending their lives to escape the pain of terminal disease? Shall we leave people free to make up their own minds regarding abortion? Should the law be used to control pornography? Is affirmative action demanded by (or inconsistent with) equality under the law? Legislation enacted in these and other controversial areas will dramatically affect how we live. It thus demands our critical attention.

FORMATS: Lecture | Discussion

PHIL 2081 Ethics in the World of Business

CREDIT HOURS: 3

Business practices are sometimes in accord with moral principles, sometimes at odds with them. By considering cases that illustrate business practices and dilemmas this course studies the application of ethical principles to the world of business in national and international contexts.

EXCLUSIONS: COMM 2310.03

FORMATS: Lecture | Discussion

PHIL 2085 Reasoning Skills

CREDIT HOURS: 3

Thinking clearly and effectively is something that people can learn to do. Understanding some basic concepts as well as mastering certain practical techniques can help in this. In this course you will learn about classifying concepts and how to define them; about the nature of arguments and the way to bring their structure to the surface by diagramming techniques; about some of the classic fallacies people commit in their reasoning; about some of the basic concepts and procedures of logic. This course does not satisfy the logic requirement for the major or honours in Philosophy.

EXCLUSIONS: PHIL 2090.03

FORMATS: Lecture | Discussion

PHIL 2090 How to Win an Argument

CREDIT HOURS: 3

This course is devoted to developing the practical skills involved in evaluating reasoning and producing convincing arguments. Note: this course does not count towards satisfying the logic requirement for the major or honours program.

EXCLUSIONS: PHIL 2085.03

FORMATS: Lecture | Discussion

PHIL 2112 Act Like You Know: Street-Level Epistemology

CREDIT HOURS: 3

This course examines some of the challenges and pitfalls everyone faces in their attempts to get the knowledge necessary to make better decisions on a wide range of issues. It is a course in applied – ‘street-level’ – epistemology that focuses on how we make (more) informed decisions given that each of us is limited in our knowledge-acquiring capacities, and given that each of us is faced – every day -- with having to rely on information and knowledge sourced from others. By getting clearer on these challenges and pitfalls, we might find that we can know better (in part) by realizing that we are worse at knowing some things than we often suppose.

FORMATS: Lecture

PHIL 2120 Philosophical Topics in Theory and Popular Culture

CREDIT HOURS: 3

This course examines the relation between theories about the human condition and different expressions of popular culture in order to assess how our academic discourse illustrates or departs from aesthetic works that reflect our current state of affairs.

FORMATS: Lecture

PHIL 2130 Logic: Deduction

CREDIT HOURS: 3

A systematic introduction to the operations of formal deductive logic, with considerable attention devoted to the relation between artificial and natural language and to the philosophical problems that arise from the study of reasoning. No previous study of logic is presupposed.

FORMATS: Lecture | Discussion

PHIL 2150 Philosophy of Disability

CREDIT HOURS: 3

Disability scholars argue that there is no other marginalized identity as universal and ubiquitous as disability. If we live long enough, we will all experience disability at some point in our lives. The disability rights movement invokes the slogan, “Nothing about us without us,” to capture the importance of centering and amplifying the voices of people with disabilities in conversations and initiatives to ameliorate, rectify, and prevent their own oppression. Hence, any critical identity studies or social critique must recognize the experience and politics of disability and ableism, while showing how disability can be reclaimed and empowering. This course will introduce students to theories and concepts fundamental to critical disability studies such as normalcy, cure, transhumanism, accessibility, queer-crip theory, eugenics/ newgenics, and more.

COREQUISITES: There are no co-requisites required to take this course.

PREREQUISITES: There are no pre-requisites required to take this course.

RESTRICTIONS: No Restrictions
FORMATS: Lecture

PHIL 2160 Philosophical Issues of Feminism

CREDIT HOURS: 3

An exploration and examination of some of the concepts, issues, and arguments underlying feminist claims and perspectives. Such topics as pornography, rape, mothering, the nature of gender, and feminism's responses to racism will be considered.

CROSSLISTED: GWST 2500.03

FORMATS: Lecture | Discussion

PHIL 2165 Philosophy and the Black Experience

CREDIT HOURS: 3

This is an introduction to Africana philosophy, that is, philosophy by and about people of African descent. It will begin with a brief look at philosophical thought in precolonial Africa and then turn to consider philosophical thought produced in the wake of slavery and colonization.

PREREQUISITES: Successful completion of a 1st year writing requirement course

FORMATS: Lecture | Discussion

PHIL 2170 Philosophy of Sex and Love

CREDIT HOURS: 3

This course offers an examination of key concepts and questions related to love and sexual desire. Topics will include the nature of desire, of romantic love, and of sexual orientation. We will take up questions in sexual ethics and politics, and look at selected concepts such as trust and betrayal, sexual objectification, and perversion.

CROSSLISTED: GWST 2170

FORMATS: Lecture | Discussion

PHIL 2205 Philosophy of Religion

CREDIT HOURS: 3

Philosophical exploration of the nature and function of religious faith, belief, and practice. Topics typically include: relations between religion and morals; the existence of divinity/divinities; problems of evil; the nature and significance of religious experiences. As the course focus has clear global social significance, that is typically reflected in the course source material.

CROSSLISTED: RELS 2205.03

FORMATS: Lecture | Discussion

PHIL 2210 Crisis and Consent: Foundations of Political Thought: 1651-1778

CREDIT HOURS: 3

See course description for POLI 2410.03, in the Political Science section of this Calendar.

PREREQUISITES: An introductory course in Philosophy or Political Science

CROSSLISTED: POLI 2410.03

PHIL 2260 Philosophy of Art

CREDIT HOURS: 3

The objective of this course is to provide students with an overview of a number of different theories concerning the nature of art. It will address questions such as: What is art? What is the place of art in human life? Can judgements of artistic value be rational and objective? What is the relation of the appreciation of artworks to pleasure, emotion, and knowledge?

FORMATS: Lecture | Discussion

PHIL 2350 History of Philosophy: Ancient

CREDIT HOURS: 3

The beginnings of Western philosophy are studied in the writings of the pre-Socratics, Plato, and Aristotle.

FORMATS: Lecture | Discussion

PHIL 2361 Ancient Philosophy: from Thales to Plato

CREDIT HOURS: 3

See course descriptions for CLAS 2361.03 in the Classics section of this calendar.

PHIL 2362 Ancient Philosophy: from Aristotle to Plotinus

CREDIT HOURS: 3

See course description for CLAS 2362.03 in the Classics section of this calendar.

PHIL 2365 Plato and the Case of Socrates: Philosophy on Trial

CREDIT HOURS: 3

See class description for CLAS 2365 in the Classics section of the calendar.

CROSSLISTED: RELS 2365, CLAS 2365

PHIL 2382 Medieval Philosophy from Arabic and Jewish thinkers to Aquinas

CREDIT HOURS: 3

See class description for CLAS 3382.03 in the Classics section of the calendar.

PREREQUISITES: CLAS 3381 or PHIL 2381 or permission of the instructor

CROSSLISTED: CLAS 3382.03

EXCLUSIONS: CLAS 3380X/Y.06, PHIL 2380X/Y.06

PHIL 2450 Democracy, Difference and Citizenship: A Survey of Political Philosophy

CREDIT HOURS: 3

This is a survey course in political philosophy. This course will give participants a foundation for thinking critically about what these key political concepts mean and why people have long thought these ideals behind these concepts are important. This course aims to show students an analytic and normative survey of the topics; it is not intended either as a historical survey or as an intervention in political science (though it would certainly complement such things)

PREREQUISITES: Successful completion of a 1st year writing requirement course

CROSSLISTED: POLI 2450.03

FORMATS: Lecture | Discussion

PHIL 2475 Justice in Global Perspective

CREDIT HOURS: 3

In this course, we will explore answers to the central question in philosophical ethics “How should we live our lives and interact with others?” in the context of the international community or “Global Village” in which we now live. The course will involve close concentration on analyses of liberal and non-liberal theorists from around the world on the subjects of: moral rights, the nature of justice, social welfare, human diversity and equality, and the nature of social responsibility. Specific topics may include: the impact of globalization on understanding of moral rights (human rights, labour rights, language rights, etc.), developing world responses to western conceptualizations of rights, new conceptions of justice and social transformation including conceptions of restorative justice, conceptualizations of race and ethnicity and sources of personal and communal identity, the nature and importance of autonomy, the importance of different cultural constructions of gender and the problem of sexual violence in a global perspective, and frameworks for understanding shared agency and

shared responsibility for poverty and environmental degradation.

FORMATS: Lecture | Discussion

PHIL 2480 Environmental Ethics

CREDIT HOURS: 3

This course examines humanity's relation to nature from a philosophical perspective. Of particular importance will be the moral or ethical obligations humanity may have towards the natural environment. Attention will be given to the historical sources of the attitudes and values that have given rise to current ecological problems in the environment, as well as to the question of how to remediate our relationship to nature. We will read from environmental holists, biocentrists, ecofeminists, deep ecologists, and others, and discuss issues concerning animal rights, environmental justice, and activism.

FORMATS: Lecture | Discussion

PHIL 2485 Technology and the Environment

CREDIT HOURS: 3

What is technology and what role does it play in current environmental problems? Can technologies help us find solutions to environmental crises, or are those problems themselves a direct result of seeing the world from a technological point of view? In this course, we will assess the environmental impact of particular technologies (e.g., fossil fuel technologies, pharmaceutical and information technologies) and discuss sustainable alternatives and appropriate technologies in developing as well as developed nations.

CROSSLISTED: INTD 2485.03

FORMATS: Lecture | Discussion

PHIL 2490 Social, Ethical and Professional Issues in Computer Science

CREDIT HOURS: 3

Computers can enable people to do things that our present laws and policies were not formulated to cover (hacking, sharing files on the internet, and companies sharing data). In such cases, people need to be able to decide for themselves the best course of action, and defend such decisions. This course aims at developing the ethical reasoning skills and sensitivities that computer professionals will need to make good decisions and to justify them. The course includes a general introduction to ethical theories and their use in making and justifying decisions. We then consider various issues and case studies, illustrating the kinds of problems that can arise from the use and misuse of computers and technology: the responsibilities of computing professionals; ethics on the internet (hacking, computer crime, netiquette); privacy and information; intellectual property; social and political issues (digital divide, computers and work, the internet as a democratic technology).

PREREQUISITES: No previous knowledge of computing or of philosophy is assumed. Some familiarity with computers is an advantage.

CROSSLISTED: CSCI 3101.03

EXCLUSIONS: COMP 3090.03

FORMATS: Lecture | Discussion

PHIL 2560 Minds and Machines: Introduction to Cognitive Science

CREDIT HOURS: 3

Could we build a robot (or program a computer) that has a mind? What is the relationship between the mind, brain, body and the world? How can technology assist cognition? In what ways are human cognitive systems similar to and different from animal cognitive systems? The course takes a philosophical approach, introducing assumptions and issues arising in research at the intersections of artificial intelligence, robotics, neuroscience, psychology, linguistics, animal cognition, evolutionary biology, and philosophy. This is a useful complement to a major in any Cognitive Science discipline, as well as a fascinating investigation of cognition for anyone who has wondered about what the human mind is and how it works.

EXCLUSIONS: PHIL 3460

FORMATS: Lecture | Discussion

PHIL 2610 History of Philosophy: The Rationalists

CREDIT HOURS: 3

Modern philosophers (those working in the European tradition between, roughly 1600 and 1800 CE) can be divided into two schools: Rationalists, who believed that all knowledge ultimately rests on reason alone; and Empiricists, who believed that all knowledge ultimately rests on our sense experience. This course investigates the central ideas of Rationalist philosophers - especially, Descartes, Leibniz and Spinoza. It will provide students with an overview of the central ideas and controversies in this school, such as the proper method of philosophy; the distinction between reason and innate ideas, sense-perception and imagination; the significance of basic ontological categories (substance, mode, cause, force, action); the place of religious belief in philosophy.

PREREQUISITES: One previous credit in philosophy or permission of the instructor

FORMATS: Lecture | Discussion

PHIL 2620 History of Philosophy: The Empiricists

CREDIT HOURS: 3

Modern philosophers (those working in the European tradition between, roughly 1600 and 1800 CE) can be divided into two schools: Empiricists, who

believed that all knowledge ultimately rests on our sense experience; and Rationalists, who believed that all knowledge ultimately rests on reason alone. This course investigates the central ideas of Empiricist philosophers - especially, Locke, Berkeley and Hume - with an introduction to Kant. It will provide students with an overview of the central ideas and controversies in this school, such as the nature of ideas, personal identity, human agency, the nature of body, causation and induction.

PREREQUISITES: One previous credit in philosophy or permission of the instructor

FORMATS: Lecture | Discussion

PHIL 2650 Modern German Philosophy

CREDIT HOURS: 6

See class description for GERM 2650.06 in the German section of the calendar.

CROSSLISTED: GERM 2650.06

FORMATS: Lecture | Tutorial

EXCLUSIONS: GERM/PHIL 2650X/Y.06

FORMATS: Lecture | Seminar

PHIL 2652 Modern German Philosophy II

CREDIT HOURS: 3

See class description for GERM 2652.03 in the German section of the calendar.

COREQUISITES: GERM 2652.03

CROSSLISTED: GERM 2652.03

EXCLUSIONS: GERM/PHIL 2650X/Y.06

FORMATS: Lecture | Seminar

PHIL 2660 Logic: Understanding of Scientific Reasoning

CREDIT HOURS: 3

The course is a general philosophical introduction to methods of evaluating hypotheses, experimental tests, and reasoning in science with applications to everyday reasoning as well. The course is divided into discussion of three kinds of evaluation: theoretical hypotheses, statistical and causal hypotheses, and decisions. No background in science or philosophy is presupposed for this course.

FORMATS: Lecture | Discussion

PHIL 2680 Ethics in Science

CREDIT HOURS: 3

An introduction to ethical questions that arise in the practice of science. The class will explore a variety of ethical questions associated with the study and practice of science. Students will learn about the nature of philosophical approaches to ethics and how to employ these insights to the tasks of recognizing and reflecting on ethical issues that arise when engaged in scientific research and practice.

EXCLUSIONS: PHIL 1050.03

PHIL 2710 Existentialism

CREDIT HOURS: 3

The existentialists focus on what is individual and unique about human lives. They emphasize the sense in which we choose projects and lives and even deaths for ourselves and find self-deception in our ways of avoiding choices. Some existentialists argue that whatever meaning our lives have must be invented. Some contend that life is absurd. This course is an introduction to the themes of existentialism through the study of the philosophy and fiction of Dostoevsky, Ortega y Gasset, Sartre, Camus, and Simone de Beauvoir.

FORMATS: Lecture | Discussion

PHIL 2720 The Good Life: Well-Being, Meaning & Happiness

CREDIT HOURS: 3

This course is a survey of various ethical views in the history of Western Philosophy, concentrating on the issues facing people who are concerned with what human beings should aim for and do if they are to lead lives that are fulfilling.

FORMATS: Lecture | Discussion

PHIL 2805 Ethics & Health Care: Patient Care

CREDIT HOURS: 3

Should physicians be allowed to lie to patients? When, if ever, should health professionals be permitted to override decisions made by patients? Should medical decisions made by children be respected? Should health professionals tell patients about "near misses"? Should people have living wills? Should physicians be permitted to assist patients in committing suicide? In this class we will explore questions related to the health professional-patient relationship through a combination of lecture and discussions.

FORMATS: Lecture | Discussion

PHIL 2810 Ethics & Health Care: Social Policy

CREDIT HOURS: 3

Do all people have a right to health care? How should we make allocation decisions about scarce health care resources? Should Canadians be allowed to buy organs? Should health care professionals be allowed to refuse to provide a referral for abortion? What are the ethical implications of prenatal genetic testing? Should health care workers be required to receive an annual influenza vaccination? What types of research on humans should be prohibited? In this class we will explore questions of this nature through a combination of lecture and discussion.

FORMATS: Lecture | Discussion

PHIL 3051 Epistemology

CREDIT HOURS: 3

A study of fundamental issues in the contemporary theory of knowledge. The course examines skepticism and investigates the nature of knowledge, belief, meaning, evidence, and truth. Questions are raised about perception and memory and their relation to knowledge.

PREREQUISITES: Two of PHIL 2610.03, PHIL 2620.03, 2130.03 or permission of the instructor

EXCLUSIONS: PHIL 5051.03

FORMATS: Lecture | Discussion

PHIL 3105 Ethics

CREDIT HOURS: 3

A systematic study of the foundation of morality, including readings from Kant's, "Foundation of the Metaphysics of Morals" and Hume's, "A Treatise of Human Nature."

PREREQUISITES: Two previous credits in philosophy or permission of the instructor

EXCLUSIONS: PHIL 5105.03

FORMATS: Lecture | Discussion

PHIL 3106 Animal Ethics

CREDIT HOURS: 3

How should we treat the other animals with whom we share this planet? This question frames the issues explored in this course. Answering it will require examining some points of contact between our understanding of the minds of other animals and challenges or insights offered by central approaches in ethics. Topics will typically include how other animals should be treated in our homes, on our farms, in our zoos or aquaria, in our laboratories, and - among free-living (wild) populations - in their home territories. As the course focus has clear global social significance, that is typically reflected in the course source material.

PREREQUISITES: One previous credit in philosophy or permission of the instructor.

RESTRICTIONS: Third year or above

FORMATS: Lecture

PHIL 3110 History of Ethics: Plato to Epicurus

CREDIT HOURS: 3

In this course we will carefully read a number of seminal works in the history of Western Moral Philosophy covering Plato, Aristotle, Stoicism and Epicureanism.

PREREQUISITES: Two previous credits in philosophy

CROSSLISTED: PHIL 5110.03

FORMATS: Seminar | Discussion

PHIL 3115 History of Ethics: Kant's Moral Theory

CREDIT HOURS: 3

In this course we will look closely at one of the most seminal thinkers in the history of Western Moral Philosophy. The course will explore Kant's own

writing, some of his most important predecessors, and contemporary commentators. The course will aim to develop a plausible understanding of Kantian ethics - including both its normative and meta-ethical commitments. A primary concern will be the relevance of Kant's views for contemporary moral reflection.

PREREQUISITES: Two previous credits in philosophy

CROSSLISTED: PHIL 5111.03

FORMATS: Seminar | Discussion

PHIL 3140 Logic: Logical Theory I

CREDIT HOURS: 3

An introduction to non-classical logics from a formal perspective.

PREREQUISITES: PHIL 2130.03

CROSSLISTED: PHIL 5140.03

FORMATS: Lecture | Discussion

PHIL 3170 Contemporary Feminist Theories

CREDIT HOURS: 3

Contemporary feminism is not a single theory but comprises multiple theoretical perspectives, reflecting both a diversity in women's experience of subordination and a diversity of interests and approaches. This course aims to present some of the richness and variety in feminist theory while offering students the opportunity for sustained critical engagement with influential feminist thinkers.

PREREQUISITES: One previous credit in philosophy or in Gender and Women's Studies or permission of the instructor.

EXCLUSIONS: GWST 3500.03, PHIL 5170

FORMATS: Lecture | Discussion

PHIL 3211 Philosophy of Law

CREDIT HOURS: 3

Is coercion central to law? How are law and morality related? What justification can be given for punishment? What is the appropriate scope of individual liberty? These and other issues relating to the analysis and evaluation of law will be considered. The course will examine the competing claims of the Positivist, Realist, and Natural Law accounts of law before turning to some normative issues concerning the justification of legal practice.

PREREQUISITES: Two previous credits in philosophy, permission of the instructor

CROSSLISTED: PHIL 5211.03

FORMATS: Lecture | Discussion

PHIL 3300 Philosophy of Language

CREDIT HOURS: 3

How is it possible for this string of marks to ask you a question? What is it for a word to have a meaning? Is the meaning of a an idea that you associate with it? Is it the objects in the world that it picks out? Is it an abstract "object" of some kind? What is the relationship between language and the world? Between words and sentences? Between what I mean and what I say? Between saying and acting? Between what I say and what you understand? Between meaning and linguistic use? Between meaning and behaviour? Between meaning and truth? Between the literal the metaphorical? Is there any meaning at all? This introduction to some major themes in the Philosophy of Language will explore answers to such questions as these, focusing on the work of such figures as Locke, Frege, Russell, Wittgenstein, Carnap, Quine, Chomsky, Austin, Langton, Saul, Searle, Hesse and Davidson.

PREREQUISITES: Two previous credits in philosophy including one half credit in logic class, half- or full-year

CROSSLISTED: PHIL 5300.03

FORMATS: Lecture | Discussion

PHIL 3361 Ethics, Justice, and Economics

CREDIT HOURS: 3

See course description for ECON 3360.03 in the Economics section of this calendar.

PREREQUISITES: ECON 2200.03, ECON 2201.03

CROSSLISTED: ECON 3360.03

FORMATS: Lecture

PHIL 3420 Philosophy of Biology

CREDIT HOURS: 3

This course provides an up-to-date systematic examination of central issues in the philosophy of biology. Topics typically include: How far can the Darwinian paradigm be taken to explain adaptive complexity? Is the new emphasis on developmental theory likely to revolutionize evolutionary theory? What are the most fundamental units of selection? Can the concept of biological function be understood without attributing purpose to nature? Why is the concept of species so elusive? Is there a human nature? Is genuine altruism possible given the forces of selection? Is there progress in evolution? How should clashes

between faith and reason over the nature of our evolution be resolved?

PREREQUISITES: One previous credit in philosophy or biology

CROSSLISTED: BIOL 3580.03, PHIL 5420.03

FORMATS: Lecture | Discussion

PHIL 3434 The Ancient Origins of Political Thought: From Homer to Aristotle

CREDIT HOURS: 3

See course description for POLI 3434.03 in the Political Science section of this calendar.

CROSSLISTED: POLI 3434.03, CLAS 3434.03

FORMATS: Lecture | Tutorial

PHIL 3445 Philosophy of Mind: The Mind-Body Problem

CREDIT HOURS: 3

This course will critically examine philosophical and scientific articles, and possibly short works of fiction, which explore various theories, problems and arguments regarding the status of minds in the physical world and the relationships between mind, body and world. We will explore and discuss controversies regarding the thesis that the mind is (nothing but?) the brain, and issues such as the theoretical foundations of artificial intelligence, the problem of subjectivity and consciousness, "naturalized" intentionality (how thoughts—if they are physical things or processes— can have the property of being about other things), and animal cognition.

PREREQUISITES: Two previous credits in philosophy

CROSSLISTED: PHIL 5445.03

EXCLUSIONS: PHIL 3440.03

FORMATS: Lecture | Discussion

PHIL 3450 Philosophy of Emotions

CREDIT HOURS: 3

We will concentrate on the resurgence of philosophical interest in the emotions over the last twenty years. Although it is obvious that much human action is emotionally driven, traditionally many philosophers have expressed skepticism about the value of emotions to rational and ethical conduct. Recently, philosophers such as Martha Nussbaum, Amelie Rorty and Ronald De Sousa have argued powerfully that rationality requires emotions. Other philosophers have argued that we need a renewed assessment of the epistemic importance of emotion in revealing power and value. Topics will include emotional rationality; emotion and value; first person authority; cognitive, social constructivist and psycho-evolutionary approaches; emotion and feminist epistemology; emotion, power and racial construction.

PREREQUISITES: At least one previous credit in philosophy including one half credit above the 1000 level.

CROSSLISTED: PHIL 5450

FORMATS: Lecture | Discussion

PHIL 3475 Democratic Theory

CREDIT HOURS: 3

See course description for POLI 3475.03 in the Political Science section of this calendar.

PHIL 3476 Liberalism and Global Justice

CREDIT HOURS: 3

This is a course in normative political theory. We will critically examine some recent normative political theory, and then examine the prospects and perils of attempts by recent liberal theory to articulate a principled vision of global justice. We will consider Rawls' original bounded theory of justice and examine some challenges it faces from both cosmopolitan theories of justice and proponents of nationalism. Next we'll consider rival political conceptions of liberal international justice, and Rawls' response in the form of his recent "The Law of Peoples." Concluding, we will examine specific issues of applied political justice (namely, human rights and immigration) as well as issues of economic and social justice and poverty.

PREREQUISITES: 1 credit in Philosophy or Political Science or permission of the instructor

CROSSLISTED: POLI 3476.03, INTD 'Approved List,' PHIL 5476.03

FORMATS: Lecture | Discussion

PHIL 3520 Philosophy of Social Science

CREDIT HOURS: 3

Can people from different cultures understand each other? What is to be a member of a culture? Are societies best thought of as collections of individuals, or are individuals constituted by societies? In what sense are the social sciences "sciences"? Are societies describable by explanatory laws? What counts as an explanation of human behaviour: This course explores these and related questions through a reading of classic and contemporary philosophers and social theorists.

PREREQUISITES: two full credits in philosophy

PHIL 3530 Freedom, Action, and Responsibility

CREDIT HOURS: 3

An investigation of the nature of action seeking criteria for individuating, describing, and explaining actions. Topics may include the roles of volitions, intentions, motives, and reasons in actions; responsibility for actions and the concept of free actions.

PREREQUISITES: Two previous credits in philosophy

CROSSLISTED: PHIL 5530.03

FORMATS: Lecture | Discussion

PHIL 3630 History of Philosophy: Kant

CREDIT HOURS: 3

This course will examine the Epistemology and Metaphysics of Immanuel Kant.

PREREQUISITES: PHIL 2610.03 or PHIL 2620.03 or permission of the instructor

CROSSLISTED: PHIL 5630.03

FORMATS: Lecture | Discussion

PHIL 3635 History of Philosophy: 19th-Century Philosophy

CREDIT HOURS: 3

This course will study major figures in 19th-century philosophy between Kant and Russell: Fichte, Hegel, Schopenhauer, Marx, Kierkegaard, Mill, Nietzsche, James and Bradley. Attention will also be paid to some important figures in related arts and sciences (e.g., Beethoven, Wagner, Ibsen, Feuerbach, Darwin, Freud, Wollstonecraft, Frege). We shall trace the main lines of development in epistemology and metaphysics as well as in ethics and political philosophy.

PREREQUISITES: PHIL 2610.03 or 2620.03

CROSSLISTED: PHIL 5635.03

FORMATS: Lecture | Discussion

PHIL 3640 History of Philosophy: Twentieth-Century Philosophy

CREDIT HOURS: 3

The Twentieth Century has been a period of revolutionary change in Anglophone philosophy. This course surveys the most influential figures, including Moore, Austin, Ayer, Wittgenstein, and Quine.

PREREQUISITES: One previous credit in the history of philosophy or permission of the instructor

EXCLUSIONS: PHIL 5640.03

FORMATS: Lecture | Discussion

PHIL 3660 Post-Modern Philosophy

CREDIT HOURS: 3

Modern Philosophy is a philosophical perspective in which individuals and their conscious thoughts are paramount. Post-modern philosophy rejects this perspective, replacing it with one in which language and society are paramount. We shall study this perspective in the writings of post-Wittgenstein philosophers like Rorty in the English-speaking world as well as those like Derrida, Irigaray, and Habermas on the Continent. (This course is designed to complement 3640.03 but can be taken independently).

PREREQUISITES: Two previous credits in philosophy (including, ideally, PHIL 2610 or PHIL 2620)

CROSSLISTED: PHIL 5660.03

FORMATS: Lecture | Discussion

PHIL 3670 Philosophy of Science

CREDIT HOURS: 3

This course offers an advanced survey of issues in the philosophy of science. Topics typically include: the demarcation between science and pseudo-science; scientific method and explanation; metaphysical assumptions of science and the role of values in scientific method and practice. Particular attention will be paid to key episodes in 20th Century philosophy of science. No scientific background is presupposed.

PREREQUISITES: At least two previous credits in philosophy, including one logic course, such as PHIL 2130.03, PHIL 2660.03 or, permission of instructor

CROSSLISTED: PHIL 5670.03

FORMATS: Lecture | Discussion

PHIL 3800 Philosophy of Medicine

CREDIT HOURS: 3

Is medicine a science? How should we define health and disease? Do definitions of disease help us to understand cognitive disabilities or disorders? Is a risk for a disease, for instance high cholesterol, itself a disease or is this a misuse of the concept? Should health care professionals provide care whenever a patient claims to be suffering or only when the patient has a recognized disease or disorder? What are the implications of classifying too much of normal human experience as disordered? Are screening tests, for instance mammography, typically a good idea because it is better to be safe than sorry? Should health care providers aim to practice evidence-based medicine? Should complementary and alternative medicine be held to the same epistemic standards as mainstream medicine? In this class, we consider these questions, among others. This course aims to explore perspectives on the most important philosophical issues in the emerging field of philosophy of medicine, with particular attention to medical epistemology and metaphysics.

PREREQUISITES: Two previous credits in Philosophy (including ideally Philosophy 2805 and Philosophy 2810).

CROSSLISTED: PHIL 5805

FORMATS: Lecture

PHIL 3851 Metaphysics

CREDIT HOURS: 3

A study of topics such as the nature of substance and change, body and mind, cause and effect, and the concept of existence.

PREREQUISITES: Two previous credits in philosophy including PHIL 1000.06 or PHIL 1010.06 or PHIL 2610.03 or PHIL 2620.03

CROSSLISTED: PHIL 5851.03

FORMATS: Lecture | Discussion

PHIL 4055 Topics in Epistemology

CREDIT HOURS: 3

In this seminar course, students focus on a particular topic in epistemology and investigate it in detail. When the course is offered, the topic is assigned by the Department at the end of the preceding academic year and is then posted at the Department and in the Faculty's timetable on the Web.

PREREQUISITES: At least two previous credits in philosophy or permission of the instructor

CROSSLISTED: PHIL 5055.03

FORMATS: Seminar

PHIL 4070 Topics in Philosophy of Psychology

CREDIT HOURS: 3

In this seminar course, students focus on a particular topic in the philosophy of psychology and investigate it in detail. When the course is offered, the topic is assigned by the Department at the end of the preceding academic year and is then posted at the Department and in the Faculty's timetable on the Web.

PREREQUISITES: At least two previous credits in philosophy or permission of the instructor

EXCLUSIONS: PHIL 5070.03

FORMATS: Seminar

PHIL 4115 Topics in Ethics I

CREDIT HOURS: 3

In this seminar course, students focus on a particular topic in ethical theory and investigate it in detail. When the course is offered, the topic is assigned by the Department at the end of the preceding academic year and is then posted at the Department and in the Faculty's timetable on the Web.

PREREQUISITES: At least two previous credits in philosophy or permission of the instructor

CROSSLISTED: PHIL 5115.03

FORMATS: Seminar

PHIL 4120 Theory of Rational Decision

CREDIT HOURS: 3

How would rational people choose which actions to do, given what they desire? We will see that theories about this have evolved to respond to such toy problems as the Prisoner's Dilemma and the Deterrence Paradox. We then explore the relationship between rationality and other phenomena, e.g.: is it always rational to be moral? Are persons necessarily rational? (What about those with mental health issues?) Would rational persons always be prudent, i.e., always make choices now in the light of desires they expect to have, not just those they currently have? Are good laws necessarily ones people would find it rational to accept and follow? We eventually examine whether rationality is grounded in people's actual desires, or whether there are objective constraints on desires it is rational to have and to choose from, whether desires are relevant at all, and whether there can be a single standard of rationality for all times and all people. Throughout, we apply philosophical accounts of rationality to selected issues of the moment, e.g., to issues in war, governance, democracy, intelligence, and cyber ethics, many of these dealt with as they arise in processing issues being mooted by the American think tank, the Center for Ethics and the Rule of Law. The association between that think tank and the class means that students can expect to have influence at the highest levels of government and policy.

PREREQUISITES: At least two previous credits in philosophy or permission of the instructor

CROSSLISTED: PHIL 5120.03

FORMATS: Seminar

PHIL 4125 Topics in Ethics II

CREDIT HOURS: 3

In this seminar course, students focus on a particular topic in ethics and investigate it in detail. When the course is offered, the topic is assigned by the Department at the end of the preceding academic year and is then posted at the Department and in the Faculty's timetable on the Web.

EXCLUSIONS: PHIL 5125.03

FORMATS: Seminar

PHIL 4150 Contemporary Metaethics

CREDIT HOURS: 3

This seminar course surveys contemporary work in metaethics - the branch of moral philosophy concerned with the metaphysical, epistemological, semantic and psychological commitments of the moral discourse and practice.

PREREQUISITES: 2 courses in Philosophy

CROSSLISTED: PHIL 5150.03

FORMATS: Seminar

PHIL 4165 Logic: Logical Theory II

CREDIT HOURS: 3

Devoted primarily to the study of formal semantics and its relation to symbolic language.

PREREQUISITES: PHIL 2130.03, PHIL 2140.03, PHIL 3140.03 or permission of the instructor

EXCLUSIONS: PHIL 5165.03

FORMATS: Lecture | Discussion

PHIL 4190 Topics in the History of Philosophy I

CREDIT HOURS: 3

In this seminar course, students focus on a particular topic in the History of Philosophy and investigate it in detail. When the course is offered, the topic is assigned by the Department at the end of the preceding academic year and is then posted at the Department and in the Faculty's timetable on the Web.

PREREQUISITES: At least two previous credits in philosophy or permission of the instructor

CROSSLISTED: PHIL 5190.03

FORMATS: Seminar

PHIL 4191 Topics in the History of Philosophy II

CREDIT HOURS: 3

In this seminar course, students focus on a particular topic in Modern Philosophy (e.g., the work of Descartes or Spinoza) and investigate it in detail. When the course is offered, the topic is assigned by the Department at the end of the preceding academic year and is then posted at the Department and in the Faculty's timetable on the Web.

PREREQUISITES: At least two previous credits in philosophy or permission of the instructor

CROSSLISTED: PHIL 5191.03

FORMATS: Seminar

PHIL 4192 Topics in the History of Philosophy III

CREDIT HOURS: 3

In this seminar course, students focus on a particular topic in Modern Philosophy (e.g., the work of Locke or Hume) and investigate it in detail. When the course is offered, the topic is assigned by the Department at the end of the preceding academic year and is then posted at the Department and in the Faculty's timetable on the Web.

PREREQUISITES: At least two previous credits in philosophy or permission of the instructor

CROSSLISTED: PHIL 5192.03

FORMATS: Seminar

PHIL 4200 Topics in Normative Theory

CREDIT HOURS: 3

In this seminar course, students focus on a particular topic in Normative Theory and investigate it in detail. When the course is offered, the topic is assigned by the Department at the end of the preceding academic year and is then posted at the Department and in the Faculty's timetable on the Web.

PREREQUISITES: At least two previous credits in philosophy or permission of the instructor

CROSSLISTED: PHIL 5200.03

FORMATS: Seminar

PHIL 4220 Contemporary Philosophical Issues

CREDIT HOURS: 3

Intensive study of a few topics which are currently being debated and may fall outside of or cut across standard classification of areas of interest. Examples are: evolution and value, philosophical accounts of "race" and culture, artificial intelligence, probability, theories of causation, supervenience.

PREREQUISITES: At least two previous credits in philosophy or permission of the instructor

EXCLUSIONS: PHIL 5220.03

FORMATS: Seminar

PHIL 4361 Ethics, Justice and Economics

CREDIT HOURS: 3

Assumptions of Neoclassical economic theory are critically examined with a focus on the ethical and distributional consequences of using markets as an allocation mechanism. We discuss the major conceptions of economic justice, including utilitarianism and social choice theory, Rawlsian egalitarianism Nozickian libertarianism, Sen's capabilities approach and equality of opportunity.

CROSSLISTED: Econ 4360.03

EXCLUSIONS: PHIL 3361.03, ECON 3360.03

FORMATS: Lecture

PHIL 4470 Contemporary Liberalism and Democracy

CREDIT HOURS: 3

Liberalism takes a variety of forms and includes many topics including the rule of law, limited government, the free exchange of goods, entitlement to property, the self, and individual rights. Its philosophical and political assumptions provide the intellectual context within which its account of the individual, its vision of the community and its preferred allocation of resources will be assessed. Recent work in Democratic Theory will also be explored.

PREREQUISITES: Two full credits in philosophy or political science or permission of the instructor

EXCLUSIONS: POLI 4479.03/5479.03, PHIL 5470.03

FORMATS: Seminar

PHIL 4500 Topics in Feminist Philosophy

CREDIT HOURS: 3

In this course, we shall explore some of the current research in a focused area of feminist philosophy. Previous topics have included feminist ethics, feminist epistemology, post modern feminism, the feminist sexuality debates and ecofeminism.

PREREQUISITES: Strong background in philosophy or feminist theory (normally including at least one previous course in feminist philosophy or instructor's consent)

CROSSLISTED: GWST 4500.03/5500.03, PHIL 5500.03

FORMATS: Seminar

PHIL 4510 Topics in the Philosophy of Language

CREDIT HOURS: 3

In this seminar course, students focus on a particular topic in the Philosophy of Language and investigate it in detail. When the course is offered, the topic is assigned by the Department at the end of the preceding academic year and is then posted at the Department and in the Faculty's timetable on the Web.

PREREQUISITES: At least two previous credits in philosophy or permission of the instructor

CROSSLISTED: PHIL 5510.03

FORMATS: Seminar

PHIL 4680 Topics in the Philosophy of Science

CREDIT HOURS: 3

In this seminar course, students focus on a particular topic in the Philosophy of Science and investigate it in detail. When the course is offered, the topic is assigned by the Department at the end of the preceding academic year and is then posted at the Department and in the Faculty's timetable on the Web.

PREREQUISITES: At least two previous credits in philosophy or permission of the instructor

EXCLUSIONS: PHIL 5680.03

FORMATS: Seminar

PHIL 4700 Philosophy of Race

CREDIT HOURS: 3

This course explores the metaphysics and ethics of race. Topics covered include: what "race" means; how old the concept is; whether races exist; what kinds of thing races are; whether it is valuable to acknowledge one's racial identity; and what counts as racism.

PREREQUISITES: At least two previous credits in Philosophy or permission of instructor

CROSSLISTED: PHIL 5700.03

FORMATS: Seminar

PHIL 4801 Topics in Ethics and Health Care

CREDIT HOURS: 3

In this seminar course, students focus on a particular topic in Ethics and Health Care and investigate it in detail. When the course is offered, the topic is assigned by the Department at the end of the preceding academic year and is then posted at the Department and in the Faculty's timetable on the Web.

PREREQUISITES: PHIL 2800.06 or 2805.03 AND 2810.03 or permission of the instructor

CROSSLISTED: PHIL 5801.03, BIOT 5801.03

FORMATS: Seminar

PHIL 4855 Topics in Metaphysics

CREDIT HOURS: 3

In this seminar course, students focus on a particular topic in Metaphysics and investigate it in detail. When the course is offered, the topic is assigned by the Department at the end of the preceding academic year and is then posted at the Department and in the Faculty's timetable on the Web.

PREREQUISITES: At least two previous credits in philosophy or permission of the instructor

CROSSLISTED: PHIL 5855.03

FORMATS: Seminar

PHIL 4940 Directed Reading

CREDIT HOURS: 3

NOTE: Course Details listed here also apply to PHIL 4960/PHIL 4970/PHIL 4980/PHIL 4990.

CALENDAR NOTES: Students taking PHIL 4970X/Y.06 OR 4990X/Y.06 must register in both X and Y in consecutive terms; credit will only be given if both are completed consecutively.

PREREQUISITES: At least two previous credits in philosophy or permission of the instructor

RESTRICTIONS: Students may only register for this class with the written permission of the faculty member

PHIL 4960 Directed Readings

CREDIT HOURS: 3

See PHIL 4940.

PHIL 4970 Directed Reading

CREDIT HOURS: 6

See PHIL 4940.

PHIL 4980 Directed Readings

CREDIT HOURS: 3

See PHIL 4940.

What is Political Science?

Politics has been described as “Who gets what, when, how, and why”. It is the process by which collective decisions and actions are advocated, debated, contested, and implemented in communities – local, regional, national, and international. Politics is, more fundamentally, about the study of power.

The study of politics, or Political Science, is almost as old as the practice of politics. In ancient civilizations like Greece, political philosophers concerned themselves with the characteristics of a good society, including conceptions of justice and order. These issues still concern political scientists, but their focus now covers a wider range of issues, including institutions of government, non-state actors like social movements or political parties, political identities and divisions, and international relations (including war, peace, negotiations, trade, aid or humanitarianism).

Political Science is important because it fosters informed citizens in an age of political complexity and uncertainty. It has been described, only partly in jest, as “defence against the dark arts” of politics. The study of Political Science enables students to better understand the exercise of political power and authority, and the values, laws, institutions, and policy processes by which decisions are made and implemented. It also focuses on the similarities and differences between different political communities, within and beyond our own country. It helps prepare students for a wide range of careers, such as teaching, law, public policy, advocacy, journalism, or business.

The department offers courses on a wide range of topics, including: political ideas and philosophies, political institutions and processes in different parts of the world (e.g., Canada, the US, Africa, Europe, or Latin America), the roles of interest groups and political parties, international politics (including conflict and cooperation, peacebuilding and human rights, and diplomacy and development), and how to *do* political research (research methods). Course topics also include globalization, environmental politics, indigenous politics, gender, race and politics, social media, and the politics of health care, among others.

The admissions requirements for Political Science are listed under the Faculty of Arts and Social Sciences. There are no additional requirements for Political Science beyond those of the Faculty.

Students thinking of majoring or doing an Honours degree in Political Science are encouraged to speak with the department’s Undergraduate Advisor or Honours Coordinator about developing a program of studies that suits their needs and interests.

For General Interest

Students who have not yet decided on a major, or are looking for an elective in Political Science, should take one of the Introductory courses.

PLEASE NOTE: Students registered prior to 2022-23 had the option to take the [DalCAP option](#) but it has been suspended until further notice.

Students who complete the King’s Foundation Year program with a grade of “B-” or higher will not be required to complete an Introductory course in Political Science.

Students should take no more than the equivalent of six to nine credit hours in 1000-level Political Science courses. Students should also pay close attention to course exclusions, particularly in the 1000 level course listings. If an exclusion is listed, it means that it is not possible to obtain credit for both courses in question.

Degree Programs

Students concentrating in Political Science may take a 90 credit hour minor program, 120 credit hour major, or 120 credit hour honours program. The degree requirements are listed in the University and Faculty regulations, and in departmental regulations outlined below.

A student’s program may consist of a general selection of courses from the Department’s offerings or may emphasize one of the sub-fields of Political Science, as set out below.

Students are encouraged to develop distinctive programs tailored to their own particular interests and circumstances. They should, however, seek advice early in their program to ensure that they are consistent with University regulations.

In addition to the departmental requirements, students must satisfy the requirements outlined in the [Degree Requirements](#) section.

In addition to introductory courses, Political Science courses are divided into four subfields:

- Canadian Government and Politics
- Comparative Government and Politics
- Political Theory and Methodology

- International Politics and Foreign Policy

PLEASE NOTE: Not all classes are offered each year. Please see online [timetable](#) for classes available for the current academic year.

[Full course descriptions](#)

Introductory

- POLI 1001.03: Introduction to Government and Politics I
- POLI 1002.03: Introduction to Government and Politics II
- POLI 1060.03: Political Worlds: Themes and Concepts
- POLI 1065.03: Political Worlds: The Global Domain
- POLI 1500.06: Global Politics and Society

Canadian Government and Politics

- POLI 2210.03: Unity and Diversity: The Federal Dynamics of Canadian Politics
- POLI 2215.03: Indigenous Politics in Canada
- POLI 2220.03: Political Power and Partisan Politics: The Structures of Canadian Parliamentary Government
- POLI 2230.03: Municipal Law and City Politics in Canada
- POLI 3206.03: Constitutional Law and Politics in Canada
- POLI 3208.03: Canadian Provincial Politics
- POLI 3220.03: Intergovernmental Relations
- POLI 3224.03: Canadian Political Parties
- POLI 3228.03: Pressure Politics in Canada
- POLI 3232.03: Municipal Law, Urban Governance, and Public Policy in Canada
- POLI 3233.03: Canada in the Global Economy
- POLI 3235.03: The Politics of Regionalism

BA (120 credit hour) Major in Political Science

The Major program offers the opportunity for students to design a more focused study within a specific subfield of Political Science. The Major program requires 120 credit hours: students must have a minimum of 36 and a maximum of 54 credit hours in Political Science above the 1000 level; 18 of these credit hours must be beyond the 2000 level.

Departmental Requirements

1000 level

- A **minimum of six** and a **maximum of nine** credit hours at the 1000 level in Political Science or the Foundation Year Program (with a final grade of B-or higher)

A writing course or King's Foundation Year Program.

2000 level

- Students must complete 6 credit hours in two different core course areas, for a total of 12 credit hours. The core course areas are as follows:
 - Canadian government and politics: POLI 2210.03 and POLI 2220.03
 - Comparative government and politics: POLI 2301.03 and POLI 2302.03
 - Political theory and methodology: POLI 2410.03 and POLI 2420.03
 - International politics and foreign policy: POLI 2520.03 and POLI 2530.03

3000 level

- 18 credit hours at or above the 3000 level in Political Science. Note: three credit hours must be either POLI 3492.03 (or an equivalent quantitative methods course approved by the Department) or POLI 3493.03

4000 level

- 3 credit hours at the 4000 level (excludes POLI 4390.03).

3 additional credit hours in Political Science above the 1000 level

BA (120 credit hour) Double Major in Political Science

Departmental Requirements

1000 level

- A **minimum of six** and a **maximum of nine** credit hours at the 1000 level in Political Science or the Foundation Year Program (with a final grade of B-or higher)

A writing course or King's Foundation Year Program

2000 level

- Students must complete 6 credit hours in two different core course areas, for a total of 12 credit hours. The core course areas are as follows:
 - Canadian government and politics: POLI 2210.03 and POLI 2220.03
 - Comparative government and politics: POLI 2301.03 and POLI 2302.03
 - Political theory and methodology: POLI 2410.03 and POLI 2420.03
 - International politics and foreign policy: POLI 2520.03 and POLI 2530.03

3000 level

- 18 credit hours at or above the 3000 level in Political Science. Note: three credit hours must be either POLI 3492.03 (or an equivalent quantitative methods course approved by the Department) or POLI 3493.03.

4000 level

- 3 credit hours at the 4000 level (excludes POLI 4390.03).

3 additional credit hours in Political Science above 1000 level.

Honours Program

An Honours program is a separate pathway within the undergraduate degree, which involves more intensive—and extensive—coursework within the discipline of Political Science, and requires students to maintain higher grades in relevant courses. It is thus generally seen as a more demanding and prestigious program of study. The Department offers a thesis-based Honours program, which involves independent research chosen by the student, in consultation with their supervisor. Thesis-based honours degrees are designed to teach students how to plan and execute a focused research project, working closely with the supervisor of their choice. Honours students in the Department are given special instruction, both individually and collectively, on methodologies, research design, data collection, ethical issues, and cutting-edge debates in the discipline. They work closely with other Honours students in sharing ideas and experiences as they pursue their respective research projects. The Honours degree is generally chosen by students planning to pursue graduate studies or a professional degree, but it can be a good choice for any student with good preparation, a strong work ethic, and a desire to produce original research. In terms of career development, Honours degrees are useful as they signal that an individual is capable of performing to high standards, can work independently, can think rigorously and creatively, and can express complicated ideas clearly and coherently.

In most cases, students apply to the Honours program at the end of their third year, and, if accepted, are formally enrolled in the program at the start of their fourth year. It is, however, never too early to be thinking about the Honours program, and early attention to program requirements can help ensure successful applications and timely completion. Students considering an Honours degree in Political Science are encouraged to meet with the Honours Coordinator and the Undergraduate Advisor, who will be happy to assist in selecting classes and addressing any administrative questions that may arise.

The deadline each year to apply for the Honours program is August 31st.

Program Requirements

The requirements listed below are just for admission to, and completion of, the Honours program in Political Science. Honours students must also complete the relevant requirements for the College of Arts and Social Sciences (“General Degree Requirements”).

As part of a 120 credit hour degree, the Honours program consists of not less than 54 credit hours, and not more than 60 credit hours, in Political Science above 1000 level. The program requires students to take some specific courses, and to choose some other courses from a list of designated courses, to ensure that they acquire the necessary preparation in “core” areas of Political Science. Exceptions to the requirements stipulated below can only be obtained through written petition to the Undergraduate Committee, which reserves the authority to determine admission into the Honours program in these cases.

Required Courses and Grades

To gain admittance into the Honours program, students must have:

1. B grade average in their last 60 credit hours of coursework;
2. B+ grade average in a group of 24 credit hours in Political Science, which must include:
 - The two core courses for the Political Theory subfield: POLI 2410.03 and POLI 2420.03;
 - One of the following pairs of 2000-level core courses, representing one of the other subfields of Political Science:
 - Canadian Politics: POLI 2210.03 and POLI 2220.03; or
 - Comparative Politics: POLI 2301.03 and POLI 2302.03; or
 - International Relations: POLI 2520.03 and POLI 2530.03.
 - The two research methods courses: POLI 3492.03 and POLI 3493.03;
 - 6 additional credit hours at the 3000- or 4000-level in Political Science.

Students in the Honours program **must complete all of the following courses by the end of their program:**

- **1000 level:** A **minimum of six** and a **maximum of nine** credit hours at the 1000 level in Political Science or the Foundation Year Program (with a final grade of B-or higher)
- **2000 level:** POLI 2410.03 and POLI 2420.03, plus at least 6 additional credit hours from the 2000-level core courses listed above (i.e., POLI 2210.03 and POLI 2220.03, or POLI 2301.03 and POLI 2302.03, or POLI 2520.03 and POLI 2530.03);
- **3000 level:** POLI 3492.03 and POLI 3493.03, plus at least 12 additional credit hours of 3000-level or 4000-level Political Science courses;
- **4000 level:** POLI 4601.03 and POLI 4602.03.
- An additional 18 credit hours in Political Science above the 1000 level.

Honours Essay and Honours Seminar

In addition to the courses above, students in the Political Science Honours program will complete an Honours thesis, under the supervision of a faculty member in the department. The Honours thesis is normally undertaken in the fourth year of the program (after admission to the Honours program), and is completed during the academic year.

The Honours thesis is an opportunity for the student to undertake a more sustained scholarly project, featuring theoretical analysis and/or systematic, empirical research. It normally takes the form of a formal essay of approximately 40 double-spaced pages.

Students undertake the Honours thesis with guidance and support from a designated faculty mentor (the Honours thesis supervisor). Students admitted to the Honours program should consult with the Honours Coordinator—usually early in the fall semester—to identify a suitable faculty mentor and make arrangements for supervision. Each student should expect to meet with his or her supervisor regularly in the second half of the Fall and through the Winter term, to report on progress and receive advice on the project. When the Honours thesis is completed (usually in March of the Honours year), the student will sit down with the members of his or her committee—the supervisor, another faculty member (the examiner) and, in most cases, the Honours Coordinator—to answer questions about the Honours project and its results (the oral “defence”).

The Honours thesis is associated with a formal course, led by the Honours Coordinator: the Honours Seminar (POLI 4601.03 and POLI 4602.03), which counts for 6 credit-hours toward the degree. At the conclusion of an honours program in Political Science a student's record must show a grade which is additional to the grades for the courses taken, the Honours Qualifying Examination, for which a pass/fail will be awarded.

Combined Honours

An Honours program is a separate pathway of the undergraduate degree, which involves more intensive—and extensive—coursework within a discipline, and requires students to maintain higher grades in relevant courses. It is thus generally seen as a more demanding and prestigious program of studies.

The Combined Honours is a modified version of the Honours program, which allows students to specialize in more than one discipline. Interested students should also review the procedures and requirements for the regular Honours program, listed separately.

In most cases, students apply to the Combined Honours program at the end of their third year, and, if accepted, are formally enrolled in the program at the start of their fourth year. It is, however, never too early to be thinking about Honours, and early attention to program requirements can help ensure successful applications and timely completion. Students considering an Honours degree in Political Science are encouraged to meet with the Honours Coordinator and the Undergraduate Advisor, who will be happy to assist in selecting classes and addressing any administrative questions that may arise.

The requirements listed below are just for admission to, and completion of, the Combined Honours program in Political Science. Combined Honours students must also complete the relevant requirements for the College of Arts and Social Sciences (“General Degree Requirements”).

The procedures and requirements for Combined Honours depend on which department the student chooses as his or her primary discipline. Those that choose Political Science as the primary discipline for their Combined Honours will apply through the Political Science department, be advised by the Political Science Honours Coordinator, and participate in the Political Science Honours Seminar. Those that choose another department as their primary discipline, will apply through and follow the guidelines for that other department; but they must still satisfy some basic requirements set down by the Political Science department (see below).

For both versions of Combined Honours, the deadline each year to apply is August 31st.

Combined Honours with Political Science as Primary Discipline

The Department offers a thesis-based Honours program, which involves independent research chosen by students, in consultation with their supervisor. Thesis-based honours degrees are designed to teach students how to design and execute focused research projects, working closely with the supervisor of their choice. Honours students in the Department are given special instruction, both individually and collectively, on methodologies, research design, data collection, ethical issues, and cutting-edge debates in the discipline. They work closely with other Honours students in sharing ideas and experiences as they pursue their respective research projects. The Honours degree is generally chosen by students planning to pursue graduate studies or a professional degree, but they can be a good choice for any student with good preparation, a strong work ethic, and a desire to produce original research. In terms of career development, Honours degrees are useful as they signal that an individual is capable of performing to high standards, can work independently, can think rigorously and creatively, and can express complicated ideas clearly and coherently.

Program Requirements

The requirements listed below are just for admission to, and completion of, the Combined Honours program, with Political Science as primary discipline. Combined Honours students must also complete the relevant requirements for the College of Arts and Social Sciences (“General Degree Requirements”) and for the BA (120 credit hour) Major in Political Science.

The program requires students to take some specific courses, and to choose some other courses from a list of designated courses, to ensure that they acquire the necessary preparation in core areas of Political Science. Exceptions to the requirements stipulated below can only be obtained through written petition to the Honours Coordinator, which reserves the authority to determine admission into the Honours program in these cases.

To obtain the Combined Honours, the student must also satisfy the specific program requirements required by the other (secondary discipline) department. These are listed separately, in the calendar entry for the other department.

Required Courses and Grades

To gain admittance into the Combined Honours program (with Political Science as the primary discipline), students must have:

1. B grade average in their last 60 credit hours of coursework;
2. B+ grade average in a group of 12 credit hours in Political Science, which must include
 - The two core courses for the Political Theory subfield: POLI 2410.03 and POLI 2420.03;
 - One of the following pairs of 2000-level core courses, representing one of the other subfields of Political Science:
 - Canadian Politics: POLI 2210.03 and POLI 2220.03; or
 - Comparative Politics: POLI 2301.03 and POLI 2302.03; or
 - International Relations: POLI 2520.03 and POLI 2530.03.

Students in the Combined Honours program (with Political Science as the primary discipline) **must complete all of the following courses by the end of their program:**

- **1000 level:** A **minimum of six** and a **maximum of nine** credit hours at the 1000 level in Political Science or the Foundation Year Program (with a final grade of B-or higher)
- **2000 level:** POLI 2410.03 and POLI 2420.03, plus at least 6 additional credit hours from the 2000-level “core” courses listed above (i.e., POLI 2210.03 and POLI 2220.03, or POLI 2301.03 and POLI 2302.03, or POLI 2520.03 and POLI 2530.03);
- **3000 level:** POLI 3492.03 and POLI 3493.03, plus at least 12 additional credit hours of 3000-level or 4000-level Political Science courses;
- **4000 level:** POLI 4601.03 and POLI 4602.03 (including Honours thesis, described above).

Students considering a Combined Honours degree should seek advice, as early as possible, from the Honours Coordinator.

Combined Honours with another department as Primary Discipline

Students taking a Combined Honours degree with another department as the primary discipline will mainly be governed by the procedures and rules set by that department, and should seek advice from the relevant program coordinator.

However, in order to obtain a Combined Honours degree with Political Science as the secondary discipline, students must still fulfill specific minimum requirements set by Political Science.

To gain admittance into the Combined Honours program, with another department as the primary discipline, students must have:

1. B+ grade average in a group of 12 credit hours in Political Science, which must include:
 - One of the following pairs of 2000-level core courses, representing one of the other subfields of Political Science:
 - Canadian Politics: POLI 2210.03 and POLI 2220.03; or
 - Comparative Politics: POLI 2301.03 and POLI 2302.03; or
 - Political Theory: POLI 2410.03 and POLI 2420.03; or
 - International Relations: POLI 2520.03 and POLI 2530.03.

Students in the Combined Honours program, with another department as the primary discipline, **must complete all of the following courses by the end of their program:**

- **1000 level:** A **minimum of six** and a **maximum of nine** credit hours at the 1000 level in Political Science or the Foundation Year Program (with a final grade of B-or higher)
- **2000 level:** at least 6 credit hours from the 2000-level core courses listed above (i.e., POLI 2210.03 and POLI 2220.03, or POLI 2301.03 and POLI 2302.03, or POLI 2410.03 and POLI 2420.03, or POLI 2520.03 and POLI 2530.03);
- **3000 level:** POLI 3492.03 and POLI 3493.03, plus at least 12 additional credit hours of 3000-level or 4000-level Political Science courses.
- An additional 6 credit hours in Political Science above the 1000 level.

Students considering a Combined Honours degree should seek advice, as early as possible, from the Honours Coordinator.

BA (90 credit hour) Minor in Political Science

See the [Minor in Political Science](#) section of this Calendar

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions

POLI 1001 Introduction to Government and Politics I

CREDIT HOURS: 3

This course, together with POLI 1002, is a general introduction to the study of politics. The two classes together fulfill the Faculty of Arts and Social Sciences' writing requirement. The two courses must be taken in sequence (that is, POLI 1001, followed by POLI 1002) and must be taken in the same academic year. In this introductory course, you will be exposed to the fundamental concepts of political life, including a range of key issues and approaches that animate contemporary politics. The course focuses on the fundamental themes and concepts that help us analyze politics, society, political values, and institutions. Topics will include: Fundamental concepts in political science; political philosophies and the bedrocks of various political ideologies; the nature and limits of democracy; and considerations of belonging within political communities. The scope of this course is broad, but maintains a significant focus on these issues as they relate to the study of Canadian politics.

CALENDAR NOTES: This course, together with POLI 1002, is a general introduction to the study of politics. The two classes together fulfill the Faculty of Arts and Social Sciences' writing requirement. The two courses must be taken in sequence (that is, POLI 1001, followed by POLI 1002), and must be taken in the same academic year.

EXCLUSIONS: POLI 1500.06, POLI 1060.03, POLI 1065.03

FORMATS: Lecture

POLI 1002 Introduction to Government and Politics II

CREDIT HOURS: 3

This course, together with POLI 1001, is a general introduction to the study of politics. The two classes together fulfill the Faculty of Arts and Social Sciences' writing requirement. The two courses must be taken in sequence (that is, POLI 1001, followed by POLI 1002) and must be taken in the same academic year. In this introductory course, you will utilize the knowledge gained on the fundamental concepts of political life in POLI 1001 and apply them to gain an understanding of political institutions and political processes. In so doing, you will explore a range of key issues and approaches that animate contemporary politics. Topics will include: The role of institutions in shaping political life; approaches to realizing individual and group representation; and the role of rhetoric and communication in politics. The scope of this course is broad, but maintains a significant focus on these issues as they relate to the study of Canadian politics.

RESTRICTIONS: This course must be taken following POLI 1001.03, and in the same year as POLI 1001.03.

EXCLUSIONS: POLI 1500.06, POLI 1060.03, POLI 1065.03

FORMATS: Lecture

POLI 1060 Political Worlds: Themes and Concepts

CREDIT HOURS: 3

In this introductory course, you will be exposed to the diverse worlds of political life. You will be introduced to a range of key issues and approaches that animate both research and contemporary politics in various parts of the world. Topics addressed will include: fundamental concepts in political science; political philosophies and the bedrocks of various ideologies; the nature and limits of democracy; the Canadian regime and American regime (how their 'governments' and institutions work in comparison); forms of political participation; culture and socialization; and the relationship between politics and the media.

EXCLUSIONS: POLI 1001.03 and POLI 1002.03, POLI 1010.03, POLI 1015.03, POLI 1020.03, POLI 1025.03, POLI 1030.03, POLI 1035.03, POLI 1050.03, POLI 1100X/Y.06, POLI 1103X/Y.06

FORMATS: Lecture

POLI 1065 Political Worlds: The Global Domain

CREDIT HOURS: 3

This course, which builds on Political Science 1060, introduces you to key approaches, actors, and issues in the study of global politics. After discussing the

role of theory and history in understanding contemporary global politics, it considers the role of national governments, international and regional organizations (like the United Nations, the European Union, or the African Union), Non-governmental organizations (like the Red Cross or Greenpeace), and Multinational Corporations. It then looks at the Politics of Global Security and Human Rights, and the Politics of Global welfare (including trade, poverty alleviation, and environmental stress). The objective is to increase your global political 'literacy', to better understand contemporary global challenges and to prepare you for further study of international relations and comparative politics.

EXCLUSIONS: POLI 1001.03 and POLI 1002.03

FORMATS: Lecture | Discussion

POLI 1500 GPS: Global Politics and Society

CREDIT HOURS: 6

Global politics and society have been remade by processes of globalization, referring to the multiple ways nations, communities, and people are connected and disconnected across traditional boundaries. The dynamics of the Covid-19 pandemic are but one example of these far-reaching processes. This course covers key concepts from political science, sociology and social anthropology with a view to examining how interactions of large scale global processes, politics, and policies resonate in communities, social institutions and people's everyday lives. We will focus upon the changing dynamics of global capitalism as these are manifest in the political, economic, and sociological conditions across and within regions, nations, and communities.

CROSSLISTED: SOSA 1500.06

EXCLUSIONS: POLI 1001.03 and POLI 1002.03, SOSA 1000X/Y.06, SOSA 1050X/Y.06, SOSA 1100X/Y.06, SOSA 1200X/Y.06, SOSA 1002.03, SOSA 1003.03

FORMATS: Lecture | Tutorial

POLI 2210 Unity and Diversity: The Federal Dynamics of Canadian Politics

CREDIT HOURS: 3

This course is an introduction to the social, economic, and participatory dynamics that drive Canadian politics. It covers political culture, regionalism, political economy, interest groups, social movements, and elections. Federalism is central to all these topics, as we study the role of Quebec nationalism in the federation's evolution, the relationship between the Charter of Rights and Freedoms and federalism, the place of emerging "orders of government" (including Aboriginal governments), and debates concerning the causes and consequences of centralization and decentralization in the Canadian federation.

PREREQUISITES: 1000-level course in Political Science or Kings FYP recommended

EXCLUSIONS: POLI 2200X/Y.06

FORMATS: Lecture | Discussion

POLI 2215 Indigenous Pol in Canada

CREDIT HOURS: 3

This course explores the colonial relationship between Indigenous peoples in what we call Canada and the Canadian settler-state, or the Crown. Dominant themes include nationhood, identity, autonomy, colonialism, and the state. We discuss Indigenous ways of knowing and being in Canada and how the settler state attempts to subvert these ideas. We examine the key political and legal issues, cases, and events that shape the relationship between Indigenous peoples and Canada. Some key questions include how Indigenous peoples conceptualize self-determination; how the state is understood and experienced by Indigenous peoples; and how misogyny and the patriarchy have shaped colonialism and self-determination.

FORMATS: Lecture

POLI 2220 Political Power and Partisan Politics: The Structures of Canadian Parliamentary Government

CREDIT HOURS: 3

Canadian government is dominated by prime ministers and premiers. Why this concentration of power at both the federal and provincial levels of government? Are Members of Parliament who are not in the Cabinet really "nobodies" as one recent PM characterized them? Are Cabinets themselves becoming no more than "focus groups"? Do unelected partisan aides and public service advisors have more influence than the vast majority of elected representatives? Are political parties irrelevant as vehicles for citizen engagement? Are interest groups or social movements any more relevant? Do elections matter? Are the media merely the political instruments of the business elites? These are among the issues that are examined in this course in an attempt to understand the most critical factors that shape the structuring of power in contemporary Canadian government.

PREREQUISITES: 1000-level course in Political Science or Kings FYP recommended

EXCLUSIONS: POLI 2200X/Y.06

FORMATS: Lecture | Discussion

POLI 2230 Municipal Law and City Politics in Canada

CREDIT HOURS: 3

Most Canadians live in cities, yet municipal government is the weakest and least understood order of government in our federal system. What accounts for this? After all, municipal government has often been described as the foundation of democracy. In Canada, municipal governments have many unique characteristics, from their constitutional status to the council system and a tradition of non-partisan government. In this class we explore the character of municipal government, engaging with fundamentally constitutional questions about the purpose of municipalities and their evolving role within Canadian federalism. The course covers the legal basis of municipal systems as well as engages critically with municipal lawmaking and governance in Canadian cities using lenses such as political economy, anti-racism and anti-colonialism. A major concern is to evaluate whether municipal governments and their legal frameworks support a rich local democracy as well as equitable and effective service delivery in the face of contemporary urban challenges.

PREREQUISITES: 1000-level course in Political Science or King's FYP recommended.
EXCLUSIONS: POLI 3216.03 and POLI 3232.03
FORMATS: Lecture | Discussion

POLI 2301 Comparative Politics I: Developed Democracies under Pressure

CREDIT HOURS: 3

The course surveys the methods and scope of Comparative Politics. It does so through an examination of what have been the two major prototypes of democratic systems in the contemporary world: liberal democracies (industrial, capitalist nations) featuring examples of presidential systems (USA) and parliamentary models (UK and Japan); and illiberal democracies as found in some post-communist (Russia) and emerging industrialized states (Mexico). After a general overview of the nature of these classifications, countries from each will be studied in depth. Concepts and theories which are useful for comparing political life in various countries will be discussed. In each case, contemporary trends which put democratic practices under pressure or threaten their continuity altogether will be introduced. It is paired with POLI 2302 on Developing States to provide the core undergraduate requirement in Comparative Politics

PREREQUISITES: 1000-level Political Science course or King's FYP recommended.
EXCLUSIONS: POLI 2300X/Y
FORMATS: Lecture | Discussion

POLI 2302 Comparative Politics II: the Developing World

CREDIT HOURS: 3

This course proceeds on the assumption that it is fascinating to study diverse political systems and processes in their own right; but further, that through comparison and generalization, we can gain a better understanding of the characteristics of politics everywhere, including our own country. The course surveys the methods and scope of Comparative Politics. It does so through an examination of what have been the three major classifications of political systems in the post-World War II world, with particular focus on "Third World" countries (an increasingly problematic term encompassing "Newly Industrializing Countries" and "Less Developed Countries"). After a general overview of the nature of these classifications, countries from each will be studied in depth. Concepts and theories which are useful for comparing political life in various countries will be discussed.

PREREQUISITES: 1000-level Political Science course or King's FYP recommended
EXCLUSIONS: POLI 2300
FORMATS: Lecture | Discussion

POLI 2350 Governance and Globalization

CREDIT HOURS: 3

This seminar course provides students with an opportunity for critical evaluation of the reshaping of political processes and institutions that are occurring as the result of globalization. The course will explore the concept of governance in the context of changing dynamics related to the trans-nationalisation of production and increased capital mobility as well as the rise in numbers and influence of NGOs and new social movements. Hence, "new" forms of governance emerging out of decentralization and/or disinvestment of state authority and supra-national arrangements that are broadly captured within the concept of "global governance" will be explored along with traditional concepts of governance that centre on the actors, structures and environments of governmental policy-making. A range of issues will be examined – governance of economies, environment, communications, human rights, health, conflict and complex emergencies – within the context of debates involving the "internationalization" of the state; the role of identities – e.g. nationalist, ethnic, gender, cosmopolitan; the growing relevance of regions and the nature of and prospects for democracy and citizenship.

PREREQUISITES: 1000-level course in Political Science or Kings FYP recommended
EXCLUSIONS: POLI 3350.03
FORMATS: Seminar

POLI 2410 Crisis and Consent: Foundations of Political Thought: 1651-1778

CREDIT HOURS: 3

This course covers some of the most important early modern theorists (Hobbes, Locke, Hume, Smith, Rousseau, and Montesquieu). It looks at the development of natural rights, democracy, capitalism, and citizenship.

PREREQUISITES: 1000-level course in Political Science or Philosophy or Kings FYP recommended

POLI 2420 Revolution and Rationality: Foundations of Political Thought, 1789-1900

CREDIT HOURS: 3

This course focuses upon late-eighteenth and nineteenth-century thought (theorists such as Burke, Paine, Tocqueville, Kant, Mill, Hegel, Marx, Nietzsche), and investigates human rights, democracy, utilitarianism, individualism, socialism, and the roots of postmodern thought. POLI 2410 is not a formal prerequisite for POLI 2420, although students will find POLI 2410 a very useful introduction to POLI 2420.

POLI 2450 Democracy, Difference and Citizenship: A Survey of Political Philosophy

CREDIT HOURS: 3

This is a survey course in Political Philosophy. This course will give participants a foundation for thinking critically about what these key political concepts mean and why people have long thought these ideals behind these concepts are important. This course aims to show students an analytic and normative survey of the topics; it is not intended either as a historical survey or as an intervention in political science (though it would certainly complement such things)

CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

CROSSLISTED: PHIL 2450.03

FORMATS: Lecture

POLI 2520 World Politics

CREDIT HOURS: 3

Why do states fight wars? Commit genocide? Sign treaties? Acquire and sell ballistic missile and nuclear technologies? Join economic and military alliances? Enforce and/or dismantle sanctions against states like Iraq, Iran or North Korea? Why can't we enforce international law as effectively as we enforce domestic law? Can we identify (and enforce) an objective set of universal moral values to guide relations between states and peoples? Is the U.N. a useful institution or is it destined to fail? Should NATO have intervened in conflicts in Bosnia, Kosovo, Rwanda or Afghanistan? What were the factors that led to the US-UK invasion of Iraq in 2003, and what does this tell us about US foreign policy and the origins of major conflict? These are some of the questions the course is designed to answer.

FORMATS: Lecture | Discussion

POLI 2530 Foreign Policy in Theory and Practice

CREDIT HOURS: 3

Foreign Policy is concerned with the way that individual states decide on their priorities and strategies in relation to the rest of the world. This course begins with a brief review of International Relations theories and their application to foreign policy. The main part of the course explores theories about what drives foreign policy decision-making: political systems, bureaucracy, culture, psychology, and leadership. The last part of the course looks at the instruments of foreign policy, with particular attention to the military, trade and investment, and foreign aid. All parts of the course feature a mix of abstract theory and specific, real-world examples.

FORMATS: Lecture | Discussion

POLI 2540 Canadian-American Relations

CREDIT HOURS: 3

Canada's relationship with the United States affects almost every aspect of our political, economic, social and cultural life. The U.S. outranks Canada on all the dimensions of power and influence by factors of 10 or 12 to one, and in some fields (e.g., military capacity) by considerably more. Well over 40% of Canada's economic production goes into exports, and of that well over 80% goes to the United States. Canadians cannot go to the movies, watch television, listen to popular music, consume fast food, or do errands at the local shopping centre without exposing themselves to what a prominent American political scientist has described as his country's 'soft power'. This course will consider how Canadians are affected by these and other influences from south of the border, how they have debated them among themselves, and what public policies have been established in response to the concerns they have generated.

POLI 3206 Constitutional Law and Politics in Canada

CREDIT HOURS: 3

These are political issues that possess an important constitutional dimension. They include judicial review and the role of the Supreme Court of Canada, constitutional amendment, the representation formula, the Charter of Rights and Freedoms, language rights and the Crown.

PREREQUISITES: POLI 2210.03 or 2220.03 recommended

FORMATS: Seminar

POLI 3207 Charter Politics

CREDIT HOURS: 3

In 1982, Canada successfully patriated its constitution, transferring constitutional power from the British Parliament to Canada's federal and provincial legislatures. The Constitution was also amended to include both guidelines outlining the procedures under which future amendments to the Act could occur and a Charter of Rights and Freedoms. The Charter entrenched individual and some groups rights and forever changed the terrain of rights in Canada. This course considers the development, enactment, and reception of the Charter, questioning how it has influenced both law and politics in Canada in the years since its enactment. It focuses on the key issues and debates that have animated supporters and critics since its inception, including concerns about judicial activism, dialogue between the Court and the legislature, and the recognition of positive rights. It also looks to landmark cases to illuminate different sections of the Charter, their interpretation by the Court and government, and their implications for politics, public policy, and rights-claiming today.

PREREQUISITES: 54 credit hours

FORMATS: Seminar

POLI 3208 Canadian Provincial Politics

CREDIT HOURS: 3

An analysis of the dynamics and structures of provincial governments. Topics may include: Political parties, voting behaviour, legislatures, electoral systems, bureaucracies and the formulation of economic, energy, environmental, and other policies. Attention is also paid to interprovincial and intergovernmental relations.

PREREQUISITES: POLI 2210.03 or POLI 2220.03 recommended

FORMATS: Seminar

POLI 3220 Intergovernmental Relations

CREDIT HOURS: 3

This course will examine the territorial division of political and administrative power and the nature of relations between governments which result from such a division of power, including federal-provincial-municipal or "tri-level" relations. Specific topics will include the role of the courts in constitutional interpretations, the instruments of "fiscal federalism" (including equalization payments, conditional grants, tax sharing arrangements and shared cost programs), administrative relationships and the concept of "executive federalism". These themes will be pursued further by each student through the preparation of a research paper. This paper will deal with a policy area selected by the student (transportation, education, health, etc.) and will provide an opportunity for a more intensive examination of the impact of intergovernmental relations, on public policy and vice versa. For additional information about course requirements, please consult the instructor.

PREREQUISITES: POLI 2210.03 or POLI 2220.03 recommended

FORMATS: Lecture | Discussion

POLI 3224 Canadian Political Parties

CREDIT HOURS: 3

The Canadian party system, viewed as an integral part of the entire political system, presents a number of interesting questions for exploration, such as lower voter turnout, electoral reform, the role of party leaders, and the manner in which parties contribute to Canadian democracy. The particular themes emphasized will vary from year to year. Approved with Canadian Studies.

PREREQUISITES: POLI 2210.03 and POLI 2220.03 recommended

FORMATS: Lecture | Discussion

POLI 3232 Municipal Law, Urban Governance and Public Policy in Canada

CREDIT HOURS: 3

Most Canadians live in cities, yet local government is the weakest unit in our federal system. What accounts for this? After all, local government has often been described as the foundation of democracy. In Canada, local governments have many unique characteristics, from their constitutional status to the council system and a tradition of non-partisan government. We will explore the character of local government and the issues related to local governance, including regional and metropolitan restructuring and citizen participation, municipal finance, provincial-local relations, and the role of the federal government.

PREREQUISITES: 1000-level course in Political Science or Kings FYP recommended

EXCLUSIONS: POLI 2230 and POLI 3231

FORMATS: Lecture | Discussion

POLI 3233 Canada in the Global Economy

CREDIT HOURS: 3

This seminar course, for senior undergraduates, will explore the relationship between politics and economic life in Canada. The course addresses the placement of Canada in continental and global economies at a time of profound transnational integration and accelerated technological change. It surveys major themes and perspectives in the Canadian political economy tradition and evaluates past and current practices in Canada's economic governance. It will introduce students to staples, liberal and neo-classical, socialist, and feminist analyses of the nature of Canada's economic development, and the role of the state in economic life. The importance of commercial, industrial and resource sectors will be examined. The transition to the service sector and information economy will be addressed. The impact of Canada's imperial, global and continental relationships will also be considered, including the negotiation and impact of economic and trade agreements. Other themes include the role of women, industrial relations and trade unions, first nations and immigrant communities, and the future evolution of the political economy and economic policy. Students will debate controversial themes on each topic. Student essays will explore a range of contemporary issues including debt, federal-provincial fiscal relations, the economic consequences of Quebec separation, women in the economy, development prospects for First Nations, regional inequality and development programs, immigrants and economic revival, and policies on trade, industrial development, investment, intellectual property, human resources, technological change, poverty and inequality, and the impact of economic forces on national unity.

PREREQUISITES: Open to undergraduates who have completed courses in Canadian politics or economic history, or by permission of the instructor.

FORMATS: Seminar

POLI 3234 Political Psychology

CREDIT HOURS: 3

This course explores research that utilizes psychological theories and methods to help us better understand the political world in which we live: exploring how individuals think, feel, and behave in relation to politics. As a sub-discipline that bridges psychology and political science, political psychology is a vast and ever-expanding field of study. As such, the course cannot explore the field in its entirety, but instead will focus on some of the discipline's most enduring questions (emotions, identities, etc.) as well as contemporary questions of interest (fake news, conspiracy theories, etc.). Topics to be covered include the origins of political ideology, processes of radicalization, causes of intergroup conflict and prejudice, and the role of genes and personality in political behaviour.

POLI 3235 The Politics of Regionalism

CREDIT HOURS: 3

The course surveys the interaction between politics and economics in Canada with emphasis on the question of regional development. It will canvass competing explanations for differences in economic development among Canada's regions with special emphasis on Maritime economic problems, highlighting both the political sources of regional disparities and continuing efforts to rectify them. Distinctive Western, Quebec and Ontario concerns will also be covered. Seminars for senior undergraduates will feature student presentations and research projects. Approved with Canadian Studies.

PREREQUISITES: POLI 2210.03 or POLI 2220.03 recommended

FORMATS: Seminar

POLI 3236 Political Representation in Canada

CREDIT HOURS: 3

This course explores questions of political representation in contemporary Canadian politics. While the overwhelming focus will be on the Canadian case, the course often draws upon examples and readings from other countries/institutional contexts to highlight important differences and similarities. The course considers where political representatives come from, how representative our legislatures are, and what representatives do. Weekly topics include political ambition, recruitment, electoral systems and quotas, and substantive representation.

POLI 3250 Canadian Public Administration

CREDIT HOURS: 3

This course examines the organization and management of the executive-bureaucratic structures of government for the formation and management of public policy and public services. It considers the design and operation of the cabinet system and ministerial portfolios; relations between ministers and the career public service, policy and budgetary processes; and the structural designs of departments, agencies, crown corporations and regulatory commissions. A major focus will be the effects of the new public management on public administration, as governments in Canada, as elsewhere, seek to cope with budgetary restraints, increased demands for quality services and public participation, and greater effectiveness in securing results.

FORMATS: Seminar

POLI 3260 The Politics of Health Care

CREDIT HOURS: 3

Because of its nature as both a public institution and a political icon, the Canadian health care system is an inherently political institution which cannot be understood without a clear comprehension of both its composition and its relationship to the broader political landscape in Canada. This class will provide a survey of the political and theoretical debates within the area of health care in Canada, including investigations of federalism, funding, and governance.

POLI 3360 Politics in Latin America

CREDIT HOURS: 3

This seminar for advanced undergraduates examines one of the world's most dynamic, diverse and rapidly changing regions. It surveys Latin America's search for democracy from colonial to contemporary times. Students examine differing perspectives on the nature of democracy and explore Latin American political history and development, including the indigenous foundations, the colonial impositions, and more recent foreign intervention. The course examines political structures and values, the authoritarian presidency, military politicization, party competition and electoral politics. The course also examines state-society relations, the immense inequality, the changing role of women, the remobilization of indigenous peoples, the impact of liberalization, and reactions to liberalization from civil society. The course concludes by examining prospects for consolidation of democracy and liberalization in the contemporary era of globalization, the significance of the revitalization of the political left, and the implications for scholarly interpretations.

PREREQUISITES: POLI 2300.03 or POLI 2350.03 or POLI 2520.03 or INTD 2001.03 or INTD 2002.03 or SPAN 2109.03 or SPAN 2110.03 or POLI 2301.03 or POLI 2302.03 or SOSA 3168.03 or HIST 2384.03 or HIST 2385.03 or HIST 2386.03 or HIST 2387.03 or HIST 3390.03 recommended

FORMATS: Seminar

POLI 3365 Politics of the Middle East

CREDIT HOURS: 3

This course offers an advanced introduction to the politics of the Middle East. Issues covered include state structures, the legacy of colonialism, political economy, religion, society and social movements, human rights, and terrorism. These issues will be explored thematically and through several country case studies.

FORMATS: Lecture | Discussion

POLI 3378 American Politics: Polarization And Crisis

CREDIT HOURS: 3

The purpose of this seminar course, for senior undergraduates, is to provide a thorough and critical understanding of the American national political process and its current crises and contradictions. It will examine the colonial displacement of First Peoples and founding of a colonial "settler" society, the slave-based economy, and the revolutionary route to independence. It examines the framing of the constitution and the novel institutions of separation of powers and federalism. It will consider the contemporary evolution of the presidential-congressional relationship which experiences periods of cooperation, contestation and gridlock, and the important Supreme Court role of judicial review. It will then examine the unique electoral system and political parties and the role of lobbyists and money in politics. Students will examine persistent divisions of class, race, ethnicity and gender which remain hotly contested in contemporary political discourses and practices. These themes will be set in the context of political economy in the world's wealthiest, but increasingly unequal, society. Contemporary controversies in governance will be highlighted including the divisive culture of "values" politics. Classes will build around student-lead presentations and debates.

PREREQUISITES: POLI 2210.03 or POLI 2220.03 or POLI 2300X/Y.06, or POLI 2301.03 or POLI 2302.03 recommended

FORMATS: Seminar

POLI 3385 Politics of the Environment

CREDIT HOURS: 3

This course examines competing perspectives on the political, social, and economic forces driving environmental degradation, as well as differing visions of the types of political change required for ecological sustainability. Topics include: competing perspectives on ideas of limits to growth and sustainable development; the links between poverty, North-South inequality, and environmental degradation; population growth; the promise and limits of technological solutions; consumerism and ecological degradation; market-based environmentalism; ecological modernization; and ecological critiques of capitalism.

PREREQUISITES: 30 credit hours required; previous coursework in Political Science recommended.

EXCLUSIONS: POLI 3585.03

FORMATS: Lecture | Discussion

POLI 3390 Politics of Consumption

CREDIT HOURS: 3

The course examines the political and economic importance of consumption and critical perspectives on the ecological, social, and wellbeing impacts of consumer society. Topics include: the emergence of consumer society, consumption during the Depression and war years, the central role of expanded consumption in the post-war "golden age" of capitalism, the struggles of marginalized groups to participate in consumer society, growing inequalities of consumption in the neoliberal era, consumption in communist and post-communist societies, and political and ethical consumerism. The environmental impacts of consumer society are a prominent theme in the course, along with competing perspectives on how to achieve "sustainable consumption."

PREREQUISITES: 30 credit hours required; previous coursework in Political Science recommended

FORMATS: Lecture | Discussion

POLI 3401 Contemporary Political Thought

CREDIT HOURS: 3

This course provides an overview of general themes and current debates within contemporary western social and political thought. The course will profile the work of selected authors (such as Michel Foucault, Noam Chomsky, Judith Butler, Carole Pateman, and Charles Mills) on topics such as power, justice, community, citizenship, property, entitlement, identity, and difference. We will also discuss the impact of theoretical developments, such as post-colonialism, feminism, postmodernism, and critical race studies on social, political, and legal reform.

PREREQUISITES: POLI 2410.03 or POLI 2420.03 or PHIL 2210.03 or PHIL 2220.03 recommended

FORMATS: Seminar

POLI 3420 Refugees, Migrants, and International Order: Understanding the Politics of Global Mobility

CREDIT HOURS: 3

The international politics of migration and mobility have become important flashpoints and growing areas of contention and debate in contemporary public discourse. Like most popular political issues, many people have strong opinions with a relatively weak understanding of the core issues. This course is designed to give students an in-depth introduction to the history, laws, institutions, and changing political dynamics of international migration. The course places a special emphasis on forced migration, refugee flows, and irregular migration given the unique challenges these trends present for the international system. The overall goal is to help develop the substantive knowledge and analytical tools necessary for understanding the complexities of international mobility in a world of states. Theoretically, the course will explore the tensions around globalization and the politics of mobility in a world that is politically and institutionally defined by nation states. At the same time a specific emphasis will be given to case studies and contemporary examples in order to better inform our discussions.

PREREQUISITES: 2nd year course is mandatory.

FORMATS: Lecture | Discussion

POLI 3426 Sex, Race, and the State

CREDIT HOURS: 3

This course will consider the role of the state and other institutions in the social, moral and legal production and regulation of sex and gender, particularly in Western countries. It will begin with a brief historical overview of the role of religious prescriptions in the social and legal regulation of sex, and in the refinement of laws and policies that have been implicated in sex- and gender-based discrimination. We will also address a range of contemporary topics such as the decriminalization of homosexuality; hate crimes against sexual minorities; the politics of relationship recognition; state response to HIV/AIDS; gender-related refugee claims; and developments in the regulation of reproductive technologies.

PREREQUISITES: Previous coursework in Political Science recommended

CROSSLISTED: GWST 3426.03

FORMATS: Seminar

POLI 3427 Sexuality, Racism, and Western Political Thought

CREDIT HOURS: 3

Representations of women and constructs of femininity are a significant part of mainstream Western political thought. Drawing on contemporary critical analyses, this course examines the roles of such representations in the work of leading philosophers, with attention to understanding the relation between ideas of sexual difference and their general systems of thought. We will also discuss the work of contemporary feminist political theorists on a range of social and legal issues, through a review of recent developments in theories of knowledge, embodiment, equality, and rights.

PREREQUISITES: Previous course work in Political Science recommended.

CROSSLISTED: GWST 3600.03

FORMATS: Lecture | Seminar

POLI 3431 Politics Through Film and Literature

CREDIT HOURS: 3

Film and literature often capture the depth and texture of politics in a way that the social scientific method cannot. This course uses contemporary novels and films to analyze the Enlightenment, Orientalism, the frontier, and the political economy of community.

PREREQUISITES: POLI 2410.03 or POLI 2420.03 recommended.

FORMATS: Seminar

POLI 3434 The Ancient Origins of Political Thought: From Homer to Aristotle

CREDIT HOURS: 3

This course will study the very beginnings of political thought with Greek poets, historians and educators, culminating in a careful investigation of the political writings of Plato and Aristotle. We will investigate philosophical questions about the origin of the state, the purpose of political community, the different kinds of regimes or constitutions, the common good, individual freedoms, revolution, war, wealth, poverty, and slavery.

CROSSLISTED: CLAS 3434.03, PHIL 3434.03

FORMATS: Lecture | Tutorial

POLI 3440 The Politics of Fear

CREDIT HOURS: 3

This course will consider the instrumentality of fear and terror in public policy, and its role in fostering public opinion and managing social groups and populations. Drawing on interdisciplinary and theoretical analyses of sex and race discrimination, it will consider various ways in which sexual and racial politics are implicated in the production and proliferation of "terror" in contemporary western societies, in practices perpetrated or sanctioned by both state and non-state actors. It will look at the recent discourses of terrorism and its representation in the media: philosophical considerations of anti-immigrant fear-mongering; and political analyses of the economy of "security" industries. It will also address the role of both state and corporate interest in disaster relief, epidemics, and other social crises.

PREREQUISITES: Previous coursework in Political Science recommended

FORMATS: Lecture | Seminar

POLI 3446 The Politics of Crime

CREDIT HOURS: 3

This course explores the relations between politics and criminal justice, with attention to how political approaches to crime are instrumental to the racial and socio-economic hierarchies and systemic discrimination that structure social relations. It addresses why crime continues to be a major political issue, nationally and internationally, and how various approaches to its control materially effect particular social groups. The course will also cover influential theoretical works and critical analyses of a range of topics, including criminality and punishment; law enforcement and police violence; restorative vs retributive justice; racial profiling; criminalization of poverty; mass-incarceration; and the over-representation of Black and Indigenous peoples in the prison system.

COREQUISITES: none

PREREQUISITES: 30 completed credit hours [i.e., 10 courses] or an introductory course in Political Science.

RESTRICTIONS: E1 - class restriction

EXCLUSIONS: none

FORMATS: Lecture

POLI 3449 Confronting Fascism

CREDIT HOURS: 3

This course focuses on German writers, artists, filmmakers, and intellectuals whose work impacted and was impacted by the rise of fascism in the 20th century.

CROSSLISTED: GERM 3450.03

FORMATS: Lecture | Tutorial

POLI 3450 Storm and Stress: Romanticism and the Backlash Against Enlightenment Political Thought

CREDIT HOURS: 3

Romanticism is generally seen as a cultural movement, with its expression in literature, music, painting, and philosophy. Yet its effect upon politics have been profound. Nonetheless, there has been little extensive political analysis of the Romantic movement and its effects. This course examines the development of Romanticism, especially in its opposition to rationalism, positivism, and classicism, from the late eighteenth century to the present. It examines the thesis that the early 21st century is experiencing a significant period of neo-romanticism, with its own set of reactions against rationalism and realism. What is the political manifestation of this neoromanticism, and what are the implications for contemporary politics?

PREREQUISITES: POLI 2410.03, POLI 2420.03 recommended

FORMATS: Lecture | Seminar

POLI 3475 Democratic Theory

CREDIT HOURS: 3

Democracy is an essential component of legitimacy for all western states: few would be inclined to assert their "undemocratic" nature. But what are the essential characteristics of democracy; and to what extent must modern democratic theory remain grounded in nineteenth-century western liberal thought?

While this course has a predominantly theoretical orientation, it will include an examination of the relations between democratic theory and economic

production/redistribution; as well as an investigation into how democratic theory can be developed in non-Western political contexts.

PREREQUISITES: Previous courses in Political or Moral Philosophy recommended

CROSSLISTED: PHIL 3475

FORMATS: Seminar

POLI 3492 Political Inquiry I

CREDIT HOURS: 3

This course is an introduction to empirical research methods in political science and the social sciences more generally. It covers a range of issues that are relevant to both qualitative and quantitative empirical research, but the emphasis is on quantitative strategies (i.e., statistical analysis). Key issues include specification of hypotheses, measurement of variables, case selection, choosing and evaluating research designs, and drawing sound inferences from research findings. The “quantitative” component of the course de-emphasizes statistical theory and math, and focuses instead on the generation and interpretation of statistical results, using statistical software. The course is built around a series of small homework assignments, lab sessions, a formal “data analysis paper,” and a midterm and final exam.

PREREQUISITES: 30 credit hours required, 60 credit hours recommended; previous coursework in Political Science recommended

FORMATS: Lecture | Lab

POLI 3493 Political Inquiry II

CREDIT HOURS: 3

This course introduces the theory and practice of qualitative research methods to study political phenomena. Themes addressed in the course include the theoretical and conceptual implications of choosing a particular methodology; the philosophical assumptions behind social science research; the various qualitative research methods available to political scientists, including interviewing, participant observation, case studies, comparative analysis, and the use of documentary/primary sources; the evaluation of academic texts in political science, focusing on the logic of their argument, their methodologies, and the relationship between the evidence presented and their argument; and the ethical issues involved in conducting qualitative research.

PREREQUISITES: 30 credit hours required, 60 credit hours recommended; previous coursework in Political Science recommended

EXCLUSIONS: POLI 2494X/Y.06

FORMATS: Lecture | Discussion

POLI 3496 Philosophy of Social Science

CREDIT HOURS: 3

Can people from different cultures understand each other? What is to be a member of a culture? Are societies best thought of as collections of individuals, or are individuals constituted by societies? In what sense are the social sciences “sciences”? Are societies describable by explanatory laws? What counts as an explanation of human behaviour: This course explores these and related questions through a reading of classic and contemporary philosophers and social theorists.

POLI 3505 Human Rights: Foundations

CREDIT HOURS: 3

This course examines the formation of international human rights institutions, mechanisms, practices, and related jurisprudence. It provides an overview of the development of international humanitarian law and policy; the treaty system and monitoring bodies; and international criminal court and criminal tribunals. Through analyses of reporting systems under a selection of treaties, we will address how both states and non-government organizations have engaged human rights treaty committees on different conventions and areas of law (e.g., civil and political rights; the rights women, children, migrants, torture victims, etc.), and we will consider their applications within domestic law and policy. We will also look at the formation of international criminal law institutions, and, through a sample of case studies, we will consider their approaches to state and individual responsibility and accountability for persecution, genocide and crimes against humanity.

POLI 3510 The Politics of Pandemics

CREDIT HOURS: 3

This course considers the relationship between plague and politics, both theoretically and in practice. We will consider some of the most pressing questions that contagion has posed to and revealed about the political communities they infect and affect. For example, what do contagions and the public crises they induce teach us about fear and risk in political life? How have and should political communities balance individual freedoms against collective well-being and what do these choices reveal about that polity’s deeper ethical and political commitments? Which pandemic responses strengthen communities and which contribute to their breakdowns? How do communities assign blame and responsibility for health crises and what are the larger socio-political repercussions of these choices? The course is divided into five units, with each unit lasting approximately two-three weeks. Over the semester students will also work in smaller groups to create multimedia presentations on a central political issue related to Covid-19 (such as migration and mobility, the economy and class division, labour and labour rights, globalization and transnational supply chains, race and marginalized groups, democratic participation and voting, surveillance and big-data tracing), which they will workshop with classmates in our final unit prior to a public launch at the end of term.

FORMATS: Seminar

POLI 3520 Building Democracy and Peace

CREDIT HOURS: 3

Many people have long argued that there is an intimate relationship between democracy and peace. Thus, they claim, democracies are much more inclined to peace - both internal and external than other political systems. It is clear that democracy allows the representation of a large number of interest in a society, and this can lead to peaceful resolution of-or accommodation of - disputes. There have been many studies about established democracies in this regard, but less research into societies in transition--i.e., countries which are democratizing. Since countries in transition present the majority of countries in the world, it would seem timely to study this phenomenon. Democratization involves a multitude of steps and must therefore incorporate a great variety of actors, particularly in post-conflict societies. The role of three (overlapping) elements in post-conflict societies in the process of democratizing appear to be the key. These elements are civil society, the institutional environment and refugees. This third or fourth year level course will examine these key actors/elements and processes.

FORMATS: Lecture

POLI 3525 Comparative Foreign Policy Simulation

CREDIT HOURS: 3

This course is designed for advanced (i.e., 3rd/4th year) undergraduate and graduate students in Political Science. Once students become familiar with basic concepts, theories and decision-making frameworks developed within the sub-field of comparative foreign policy (part 1), they will be expected to apply what they have learned through participation in an interactive computer simulation involving other university teams throughout North and South America and Eastern and Western Europe. As they attempt to implement policy initiatives and work in teams to resolve international disputes, students will confront foreign policy issues in a context that provides an authenticity of experience. The objective is to enable students to create and test organizational skills, understand the interdependence of international issues, appreciate cultural differences and approaches to world problems, and use computers for multinational communications.

PREREQUISITES: POLI 2520.03 or POLI 2530.03 recommended

FORMATS: Seminar

POLI 3531 The United Nations in World Politics

CREDIT HOURS: 3

The evolution of the United Nations from its early concentration on problems of collective security, through the period of preventive diplomacy and anti-colonialism, to its present role as a forum for the aspirations and demands of the Less Developed Countries is reviewed. The more distant future, and the continuing relevance of the United Nations in world politics, and how its role and objectives should be determined, are considered.

PREREQUISITES: POLI 2520.03 or POLI 2530.03 recommended

FORMATS: Seminar

POLI 3532 Model UN

CREDIT HOURS: 3

The primary goal of this course is to help students understand the operation of the UN system through preparation for Model UN meetings. The course is designed particularly but not only for students who are participating in Model UN meetings and aims to help students prepare effectively for those meetings. Through their preparatory research for the meetings, students will learn the politics of UN voting practices of various countries and the relationships between domestic politics, international politics and UN voting records. This course will also enable students to understand the internal dynamics of the UN General Assembly and committee systems, how UN meetings operate, and the professional skills involved in drafting and negotiating the text of resolutions. The course will also provide students with the opportunity to learn about the political issues that influence the positions at the UN of various countries (assigned by the Model UN Assembly to individual students), and about committee issues under debate at the UN (assigned by the Model UN Assembly to individual students).

POLI 3535 Wealth, Power and Poverty in the Global South

CREDIT HOURS: 3

This seminar provides an overview of the global political economy in the current post-Bretton Woods, post-Cold War period. It considers various issues pertaining to wealth, power and poverty, from several theoretical and political perspectives, from global frameworks to feminism. Issues addressed include the rise of the BRICs, the Fourth World, international development organizations, transnational civil society, democracy and popular participation, and alternative futures.

PREREQUISITES: POLI 2520 or POLI 2530 recommended

FORMATS: Seminar

POLI 3540 Foreign Policy in the Third World

CREDIT HOURS: 3

This seminar offers a comparative perspective on the political economy of foreign policy in Africa, Asia, the Middle East, and South America at the end of the

twentieth century. Its focus is how such state and non-state actors in the South relate to the New International Divisions of Labour and Power given the demise of both Bretton Woods and Cold War global regimes. In addition to selective case studies of both large and small states - from Brazil, India, Indonesia, and Nigeria to Botswana, Jamaica, Kuwait, and Singapore - it treats formal and informal external relations, from regional intergovernmental institutions to non-governmental coalitions. It also examines new forms of regional conflict and cooperation, including guerrilla struggles and civil societies. It emphasizes the incidence and impact of structural adjustment programs and conditionalities along with the emergence of “new” issues such as debt, democracy, ecology, gender, refugees, and technology. A range of alternative approaches is identified and evaluated appropriate to the contemporary period of revisionism.

PREREQUISITES: POLI 2520 or POLI 2530 recommended

FORMATS: Seminar

POLI 3544 Political Economy of Southern Africa

CREDIT HOURS: 3

An introduction to the comparative politics, economic structures and international relations of Southern Africa, which provides a study of regional political economy with both empirical and theoretical significance. As well as country comparisons, the course will look at the region as a political unit, exploring the opportunities for and constraints against formal regional cooperation on economy or security as well as informal processes that constitute the basis of “new” regionalism forces.

PREREQUISITES: POLI 2300X/Y.06 or POLI 2301.03 or POLI 2302.03 recommended

FORMATS: Seminar

POLI 3546 Social Media and Politics

CREDIT HOURS: 3

This course will examine the origins, features and dynamics that characterize the relationship between politics and social media, paying particular attention to the following topics: political communication theories and social media; digital democracy; political campaigns and social media, revolutions and social media; international organization and social media; the ethics of social media in politics.

FORMATS: Lecture | Seminar | Experiential Learning

POLI 3560 Issues in Global Security and Development

CREDIT HOURS: 3

Security and development are indissolubly linked: development is compromised when security remains problematic, while a secure environment requires some form of sustainable development. Two of the principle manifestations of this ‘security-development nexus’ have been intrastate wars and collapsed states. In 2011 for example, none of the states emerging from civil war had reached any of the Millennium Development Goals set by the United Nations. Moreover, the security-development relationship conditions our capacity to develop effective policies on how and whether to intervene in ‘fragile’ or ‘collapsed’ states where the security environment is highly problematic, and our capacity to contribute to the economic and human development of these countries. This course aims, first, to give students a broad understanding of the various dimensions of the security-development nexus; and second, to address significant practical implications of this nexus. An important portion of the course will examine specific case studies, and feature keynote practitioners who are grappling with these concepts in everyday situations in the field.

PREREQUISITES: POLI 2300X/Y.06 or POLI 2301.03 or POLI 2302.03 or POLI 2520.03 or POLI 2530.03 recommended

FORMATS: Seminar

POLI 3565 Contemporary Security Studies

CREDIT HOURS: 3

The course examines developments in the theory and practice of international security since the end of the Cold War. The first part reviews the concept of security and the main theoretical approaches that inform the contemporary security debate. The second part analyzes some of the key contemporary issues in world politics and their relation with international security. Topics include: Military Security, Terrorism, Human Security, Environmental Security, Migration, Health and Security.

PREREQUISITES: POLI 2300X/Y.06 or POLI 2301.03 or POLI 2302.03 or POLI 2520.03 or POLI 2530.03 recommended

POLI 3567 International Organization

CREDIT HOURS: 3

This course will investigate the process of international organization through analysis of the role of international organizations, institutions and regimes. For the purposes of the course, international organizations as well as less formal institutional arrangements. The course will focus on the contemporary debate between rationalist and constructivist theoretical approaches to analyzing international organization. These perspectives will be employed to study the role of international organizations in areas such as international security and international political economy. Topics to be covered include democracy and international organizations, culture and international organizations, bargaining in international organizations, political and economic integration, NGOs and global civil society, and the future of global governance.

PREREQUISITES: POLI 2520.03 or POLI 2530.03 recommended

FORMATS: Lecture | Seminar

POLI 3568 Canada and the World

CREDIT HOURS: 3

This course examines post-World War II Canadian Foreign Policy in two parts: (1) an analysis of 'landmark' policy issues; and (2) an investigation of the general factors that help to "explain" the form and content of Canadian Foreign Policy, with particular reference to the institutions and processes through which policy decisions are made. Issues discussed are likely to include: the "invention" of peacekeeping; the Mulroney government's involvement in the campaign to end apartheid in South Africa; the negotiation of the North American free trade; the politics of immigration and diasporas; and the place of the Arctic in Canada and international relations.

PREREQUISITES: POLI 2210 or POLI 2220 or POLI 2520 or POLI 2530 or HIST 2212 or HIST 2235 or HIST 2661 recommended

CROSSLISTED: CANA 3568.03

FORMATS: Seminar

POLI 3569 Canadian Foreign Policy

CREDIT HOURS: 3

This advanced seminar course is concerned with the 'structure-agent' problem as it applies to Canadian foreign policy. In other words, what are the structures (both material and normative) that shape and constrain the pursuit of Canadian foreign policy; what room for maneuver and initiative is there; and who are the key actors, or the 'agents' who shape and implement Canada's global role? The course discusses these questions through four sections: theoretical and analytical approaches to the study of Canadian foreign policy; the external context; the domestic context; and key themes and issues in Canadian foreign policy

FORMATS: Seminar

POLI 3574 American Foreign Policy

CREDIT HOURS: 3

This course is a general introduction to American foreign policy, with special attention to the theoretical and policy debates of the post-Cold War period. The course begins with relatively brief introductions to the history of US foreign policy and the institutions of foreign policy-making, but most of the readings and lectures are concerned with broad theoretical debates about what does, and/or what should, drive US foreign policy decisions. In later weeks, some of these theoretical lenses are applied to some specific (recent) foreign policy decisions, including the signing and "unsigning" of the Kyoto Accord, the extension of Permanent Normal Trade Relations status to China, and/or the war in Iraq.

PREREQUISITES: POLI 2520.03 or POLI 2530.03 recommended

FORMATS: Lecture

POLI 3576 Defence Policy in Canada

CREDIT HOURS: 3

This seminar examines the substance, processes, recurring themes, and major international and domestic determinants of post-World War II Canadian defence policies. It explores several major policy "milestones" (e.g. Canadian Forces' role in the Persian Gulf conflict), and various persistent themes (the "Commitment-capability gap"; efforts to "democratize" defence policy reviews) and current issues (e.g. the implications of recent human rights challenges to traditional military professionalism; Canada's role in the Afghanistan conflict) of Canadian defence. Approved with Canadian Studies.

PREREQUISITES: POLI 2520.03 or POLI 2530.03 or POLI 2210.03 or POLI 2220.03 recommended

EXCLUSIONS: POLI 3571.06

FORMATS: Lecture

POLI 3581 Diplomacy and Negotiation

CREDIT HOURS: 3

This course looks at the way states decide which diplomatic strategies to pursue, and why these succeed or fail. Among the themes considered are the evolution of diplomacy as an international institution, national power and bargaining leverage, and the effects of domestic politics, psychology, and culture on international negotiation. Specific historical cases which may be reviewed in any given year include: the Peloponnesian War, the Munich Crisis, the Cuban Missile Crisis, the negotiation of the Canada-US Free Trade Agreement and NAFTA, and the Kyoto Protocol. Students participate in a negotiation-simulation exercise and write a paper on a particular historical case.

PREREQUISITES: POLI 2520 or POLI 2530 recommended

FORMATS: Seminar

POLI 3587 International Political Economy

CREDIT HOURS: 3

This course is composed of two overlapping constituent themes. The first theme is that of competing explanations of international political economic behaviour - behaviour affected by that diffuse political authority characteristic of the international system, the second, that of examining the basic issues in international political economy - the fundamental questions as to why international trade, international finance, unequal economic development, international organization, and the multinational enterprise. The first theme functions to create the over-all framework of analysis by which competing approaches to

international political economy can be evaluated. The second theme will integrate these approaches with issue areas within the fields of international trade, international finance, and what might be termed "international production" (within which fields issues such as economic development, the multinational enterprise, and the global "division of labour" constitute the major foci). The course sessions will roughly be constituted by 50 percent lecture and 50 percent organized student contributions for seminar discussion and debate.

PREREQUISITES: POLI 2520 recommended

FORMATS: Seminar

POLI 3589 Politics of the Sea I

CREDIT HOURS: 3

The major issues involved in the Law of the Sea, the differing interests of different countries, the developing legal framework, and the political process of the on-going negotiations are covered.

CROSSLISTED: POLI 5589

FORMATS: Seminar

POLI 3596 Exploring Conflict and Violence

CREDIT HOURS: 3

As the Cold War ended, many people believed that we would see an unprecedented era of peace. And yet large-scale violence associated with war and conflict continues to have undeniable relevance for all of humanity. Given the (apparent) increase of ethnic and religious conflicts and spread of advanced weapons technology world wide, providing answers to pressing questions about the onset and escalation of war is becoming more and more imperative. How do we define war and conflict? Are there rules about conduct in war? What are the causes of conflict? Is warfare becoming more common or is it decreasing? What international institutions exist to prevent or intervene in conflict? How has technology changed warfare? Unfortunately, notwithstanding many years of inquiry into the nature and origins of war, many questions remain to be answered. This seminar is designed to provide students with a comprehensive and critical review of the onset, escalation and de-escalation of violent conflict.

POLI 4050 BORDERS IN WORLD POLITICS

CREDIT HOURS: 3

The objective of this in person seminar course is to critically reflect on recent developments affecting international borders and their implications for world politics. Topics covered in the course include the global governance of borders; borders and diplomacy; borders and international security; borders and international political economy; borders and international law. Although its main focus is on the political dimension of borders, the course explores this subject from an interdisciplinary perspective, including insights from law, history, sociology, and economics. It also relies on examples taken from different regions of the world. The course includes an experiential learning component. During the term students will be offered the opportunity to visit local sites where international border practices are deployed (e.g. the Port of Halifax), or where historical artefacts related to border-crossing are kept (e.g. Museum of Immigration at Pier 21).

PREREQUISITES: Second Year Political Science course or instructor's approval

CROSSLISTED: POLI5050

FORMATS: Seminar

POLI 4221 Canadian Parties in Comparative Perspective

CREDIT HOURS: 3

This is an advanced undergraduate/graduate course that explores the organization, role, functions, and decline (?) of political parties in modern democracies. Although we will spend considerable time exploring the Canadian case, debates surrounding Canadian parties will be situated in a broader comparative context. In doing so we will consider the extent to which Canadian parties are 'unique'. Throughout the course we will consider whether and how the institutional features of the Canadian state (e.g., federalism) and the makeup of Canadian society (e.g., regionalism, multinationalism, etc.) effect the organization, character, and functions of our parties. The topics to be covered include party organization, party membership, personnel recruitment, and election campaigning. While in no way a prerequisite, students may find it beneficial to take POLI 3224 prior to this class as it provides an introduction to Canadian parties.

PREREQUISITES: Recommended (but not required): POLI 3224.03

CROSSLISTED: Will be xlisted with POLI 5221.03 (Held with as per new FGS regulations)

FORMATS: Seminar

POLI 4228 Pressure Politics in Canada: Opportunities and Obstacles

CREDIT HOURS: 3

The goal of this seminar is to explore the opportunities for and obstacles to advocacy politics in Canada. We analyze the strategies that pressure groups use to engage the most important loci of power in the Canadian political system; parliament, the public service and the courts.

POLI 4232 Urban Governance in Canada

CREDIT HOURS: 3

The objective of this course is to provide students with the empirical, analytical, theoretical, and methodological tools to understand and explain the politics and policy activities of Canada's urban and suburban municipalities within their socioeconomic, institutional, and Constitutional contexts. A major concern is to evaluate how effectively and equitably city governments in Canada have responded to contemporary urban challenges. The course adopts a critical perspective on urban governance and engages with contemporary debates concerning municipal governance reform and the evolving nature of urban governance within Canadian federalism.

PREREQUISITES: POLI 3220.03 or POLI 3232.03 or permission of instructor

EXCLUSIONS: POLI 3231, POLI 5231

FORMATS: Seminar

POLI 4234 Canadian Urban Politics in Comparative Perspective

CREDIT HOURS: 3

This course examines the politics and governance of Canadian cities from a comparative perspective. More specifically, the course uses comparative method in three ways: it asks what one can learn from comparing Canadian cities with each other (subnational comparisons), what cross-national comparisons of Canadian cities can teach as well as compares Canadian cities implicitly with other cities by applying theories of urban politics and development that have been developed elsewhere to Canadian cities. The objective of this course is to provide advanced political science students with the theoretical, empirical and methodological tools to understand and explain the political development of Canadian cities.

PREREQUISITES: POLI 3220.03 or POLI 3232.03 or permission of instructor

CROSSLISTED: POLI 5234 03

FORMATS: Seminar

POLI 4240 Policy Formulation in Canada

CREDIT HOURS: 3

This course provides a general introduction to the field of policy management, for graduate and honours undergraduate students. Using British 'best practice' ideas of professional policy making and Canadian statements of generic policy competencies, it seeks to improve the policy capacity of participants. It does this first by increasing their knowledge of public policy structures, processes, and outputs, and secondly, by giving them knowledge that they can use in policy advocacy both inside and outside government. The first section of the course examines policy definitions and professional policy making approaches in the 21st century. The second section considers the role of the state in the 21st century, and the policy competencies that analysts must have if that role is to be carried out effectively. Section three explores vertical, horizontal and external policy relationships, both as determinants of policy and as practical matters of management. Section four explores, and helps participants to gain proficiency in, the most recent processes of strategic policy design and implementation. This blend of theory and practice will increase the policy knowledge of all participants, and equip those who are in professional programs, including the various public services, to contribute more effectively to policy processes in the future. SIGNATURE REQUIRED.

PREREQUISITES: Honours students only. Permission of instructor

EXCLUSIONS: POLI 5240.03, PUAD 5120.03

FORMATS: Seminar

POLI 4242 Political Behaviour: Reason, Passion, Biology

CREDIT HOURS: 3

Political behavior is the study of the private roots of public action. To understand how and why people act politically, we delve into psychology, family life, sexuality, and genetics. In addition to these individual characteristics, the economy, geography, and class drive the political behaviour of individuals and organized groups. Topics include: public opinion, political polarization, culture wars, elections, modernization theory, populism, democratization, and the resource curse. The final unit considers big data and commercial applications of social science research in political practice. Although this material is comparative, we principally want to investigate how it applies to Canada.

CROSSLISTED: POLI 5242.03

FORMATS: Seminar

POLI 4255 The Politics of Public Policy

CREDIT HOURS: 3

This course is geared towards an exogenous understanding and evaluation of Canadian public policy. To this end, it engages with the power dynamics that guide policy from initial inception through to evaluation and assessment. The first half of the course lays the foundations of the field of public policy through a focus on the policy cycle. Although, in reality, the policy process does not cohere to a neat cycle, this model continues to provide a useful heuristic to understand the relevant aspects of the often chaotic policy process and the theories and approaches that underlie it. The second half of the course is case driven, affording students opportunities to delve into the pressing policy issues of the day and assess policy responses to real world challenges. Themes in these weeks include: crisis response, climate change, creating inclusive policy, and housing policy.

PREREQUISITES: 60 credit hours

EXCLUSIONS: POLI 5255

FORMATS: Seminar

POLI 4260 The Politics of Health Care

CREDIT HOURS: 3

Because of its nature as both a public institution and a political icon, the Canadian healthcare system is an inherently political institution which cannot be understood without a clear comprehension of both its composition and its relationship to the broader political landscape in Canada. This course will provide a survey of the political and theoretical debates within the area of healthcare in Canada, including investigations of federalism, funding, and governance.

FORMATS: Seminar

POLI 4303 Human Rights: Political Issues

CREDIT HOURS: 3

This course will introduce students to the evolving place of human rights in politics, both comparative and international. We begin by examining the historic

emergence of human rights as an issue in world politics, principally since the Second World War, and their conceptual foundations. We then focus on a number of specific topics and controversies concerning human rights in world politics, including: the sources of and struggle to end human rights-abusive regimes; the multilateral politics of human rights; human rights in national foreign policies; the rights of indigenous peoples; genocide, humanitarian intervention; and the responsibility to protect; and the relationship between globalization and human rights, and the 'Global War on Terrorism' and human rights. Finally we look at the role of human rights in domestic politics, focusing on the issues of women's rights and sexual orientation.

PREREQUISITES: Previous third year course work in Political Science or Law, Justice & Society or by permission of the instructor.

CROSSLISTED: POLI 5303.03

EXCLUSIONS: POLI 3303.03

FORMATS: Seminar

POLI 4322 The EU as a Global Actor

CREDIT HOURS: 3

The aim is to enable the student to analyze and understand the international roles played by the EU in both economic and political areas. Why has the EU been better able to speak with one voice in economic areas than political areas? To what extent can the member states control the foreign policies of the EU? The introductory part will include an overview of the EU governance systems in the area of external economic relations (first pillar) and the Common Foreign and Security Policy (the second pillar) and analyses of the main achievements in both areas. Specific topics to be selected for analyses during the second part will include the EU and the WTO, the EU and the US, the EU and the East Asia, and the EU and developing countries. Finally, in the third part of the course students study recent efforts to develop a European Security and Defence Policy.

PREREQUISITES: POLI 2520.03 or POLI 2530.03 or permission of instructor

POLI 4427 Queer Theory

CREDIT HOURS: 3

This course provides an overview of the general questions and debates -- and the philosophical, political and cultural contexts—of the interdisciplinary field that is now known as 'Queer Theory.' It will profile a wide selection of foundational writings by leading scholars and contributors to GLBT thought and activism. Examining topics such as difference, identity, discrimination, and equality, we will address its articulations critical race theory, feminist philosophy, and critical analyses of political economy. We will also address the significance of queer theory to GLBT equality activism, attending to the relationship between political thought and legislative practice in addressing institutionalized heteronormativity and the public expressions of homophobia, transphobia, sexism, and racism and their impact on social policy.

CROSSLISTED: GWST 4427.03

FORMATS: Seminar

POLI 4440 The Politics of Affect: Theories of Emotion and Political Life

CREDIT HOURS: 3

This course draws on recent developments in the burgeoning of field of affect studies to address the relation of both conscious and non-conscious emotive experience to public and political life. Drawing on the insights and scholarship from different disciplines, we will examine the social, political and cultural theories of affect, emotion, and aesthetics to explore their role in political decision-making and public responses. Topics will include the affective logic of public threat, the cultural politics of emotion such as fear and shame; sensorial responses to moralistic rhetoric; visceral responses to social groups and/or cultural practices. We will also look at how sensibility, feeling, and affect have operated in social and political movements, including a consideration of emotions such as fear, disgust, and distain, and compassion in social conflict, and in the formative approaches to retribution and reconciliation.

PREREQUISITES: 1000-level course in Political Science and 60 credit hours, or permission of instructor

CROSSLISTED: POLI 5440.03

FORMATS: Seminar

POLI 4450 Democracy, Human Rights, War, and Peace: Ethics in International Affairs

CREDIT HOURS: 3

What duties do states, and their members, have beyond their borders? Are obligations of justice global in scope? Or, alternatively, are they constrained by national borders? What is the moral standing of states? This advanced undergraduate-level seminar will focus on contemporary debates in international political theory. In this course we will discuss liberal, republican and discursive democratic perspectives on issues of global justice, particularly in light of global social structures and international inequalities. Major themes include: human rights in theory and practice; the historical roots of international relations theory; global distributive justice; republicanism and the ideal of non-domination; the possibility of global discursive democracy; cosmopolitanism; the moral relevance of borders; nationalism, patriotism and special duties; sovereignty, international law and the international order. Major thinkers include: Immanuel Kant, John Rawls, Jürgen Habermas, Phillip Pettit, Charles Beitz, Thomas Pogge, Iris Marion Young and Seyla Benhabib, among others. Students should therefore have a background in political theory. The course will consist of seminar discussions, framed by short presentations by students that draw on their critical reflection papers.

PREREQUISITES: 3rd year course is mandatory. Some background in political theory and/or political philosophy is recommended.

FORMATS: Seminar

POLI 4466 The Social and Political Construction of Health and Medicine

CREDIT HOURS: 3

Despite the rise of "evidence-based medicine," the way in which health and illness are understood and addressed remains strongly influenced by social and political variables. This class examines the way in which the "scientific" evidence underlying medicine is constructed and applied; the manner in which certain categories of illness (depression, anxiety, schizophrenia, addiction, low libido, and obesity) are mediated by social and political dynamics; and the role of specific social and political agents in shaping how health and illness are conceived and addressed. In contradistinction to POLI 4260, which focuses on systems and institutions, this class looks at the way in which ideas and epistemology shape conceptions of health, the design of health policy, and the practice

of medicine.

COREQUISITES: 60 credit-hours completed, or instructor's permission

EXCLUSIONS: POLI 5466.03

FORMATS: Seminar

POLI 4479 Liberalism

CREDIT HOURS: 3

Liberalism takes a variety of forms and includes many topics including the rule of law, limited government, the free exchange of goods, entitlement to property, the self, and individual rights. Its philosophical and political assumptions provide the intellectual context within which its account of the individual, its vision of the community and its preferred allocation of resources will be assessed. Recent work in Democratic Theory will also be explored.

PREREQUISITES: Normally, courses in philosophy or political science or economics: consult instructor.

CROSSLISTED: PHIL 4470.03/5470.03, POLI 5479.03

FORMATS: Seminar

POLI 4481 Theories of Violence, Persecution, Genocide

CREDIT HOURS: 3

This course will provide an overview of contemporary theoretical approaches to systemic violence, particularly against racial, ethnic, and sexuality minorities. Through a selection of historical and contemporary case studies, it will assess different accounts and explanatory frameworks for understanding the instigation and exacerbation of persecution and genocide. Attending to the role of the state and state policies in the history of violence, it will examine the discourses and practices that have both fuelled and justified the colonization of native peoples, enslavement of racial groups, the holocaust, and ethnic cleansing in the 20th century genocides. We will also consider the recent attempts of the international community to prevent, deter, and curb genocidal outbreaks, and the theoretical assumptions about human behaviour that underpin them.

PREREQUISITES: 2000-level course in Political Science or permission of the instructor

CROSSLISTED: POLI 5481.03

FORMATS: Seminar

POLI 4505 Human Rights: Legal Issues

CREDIT HOURS: 3

This course focuses on the legal issues and debates that are implicated in the development and enforcement of domestic and international human rights. It will address the changing legal status of international human rights treaties and conventions, with attention to the work of international treaty bodies, courts, tribunals, and the implications of their decisions and recommendations in domestic contexts. It will look at the impact of the development of international criminal courts and tribunals – with attention to the debates concerning state sovereignty and accountability, and what enables or restricts intervention in human rights crises. A central theme of the course will be theories and approaches to justice, and their relation to the force of law and the challenges of legal systems and obligations.

PREREQUISITES: Previous third year course work in Political Science or Law, Justice & Society

FORMATS: Seminar

POLI 4512 The Politics of North America

CREDIT HOURS: 3

North America has become increasingly integrated over the last thirty years--economically, demographically, and even politically. This course will review the history of regional integration in North America, and consider a number of contemporary policy controversies. It bridges sub-disciplinary boundaries by looking at both domestic policy-making (Comparative Politics) and at bargaining between the three countries (International Relations).

PREREQUISITES: 2000 or 3000-level course in International Relations or permission of instructor

FORMATS: Seminar

POLI 4521 Theories of International Relations I: Security Studies

CREDIT HOURS: 3

4521 and 4522 are independent courses that are conceptually closely related. This relationship is partially based on the more general division within IR between "Security Studies" and International Political Economy (IPE). POLI 4521 sets things up by reviewing the broadest theoretical debates within the field, with an emphasis on questions of power and order, and looks at theoretical work which focuses on political/military issues like deterrence, balancing, and the meaning of "national security." POLI 4522 begins with theoretical debates over cooperation and institutions, and is empirically anchored in various aspects of IPE, including trade, finance, and development.

PREREQUISITES: Permission of the instructor.

CROSSLISTED: POLI 5421.03

EXCLUSIONS: POLI 4520.06

FORMATS: Seminar

POLI 4522 Theories of International Relations II: International Political Economy

POLI 4523 International Relations Theory 1: Order, Conflict and Change

CREDIT HOURS: 3

Explores classic and contemporary debates in International Relations theory, with particular attention to the nature of international order, the bases for war and peace, and the question of transformational change.

PREREQUISITES: Permission of instructor

EXCLUSIONS: POLI 5523

FORMATS: Seminar

POLI 4524 Theories of International Relations 2: Cooperation, Institutions and Development

CREDIT HOURS: 3

Explores classic and contemporary debates in International Relations theory, with particular attention to the bases for international cooperation, the role of law and institutions, and the foundations of political economy.

PREREQUISITES: Permission of instructor

CROSSLISTED: POLI 5524

FORMATS: Seminar

POLI 4532 Indigenous Global Politics

CREDIT HOURS: 3

This course introduces students to topics of Indigenous governance, power, and self-determination in a global perspective. It examines how Indigenous peoples participate in contemporary global politics, challenging conventional approaches to the scholarship and practice of international relations. We explore the contradictions of the state as it relates to Indigenous peoples and alternatives to the current international system as expressed by Indigenous scholars, recognizing that these "alternatives" are not alternative to the peoples and cultures where these ways of knowing and being originate. We will ground our discussions in the context of colonialism past and present, highlighting Indigenous peoples' resistance to colonialism and state violence, as well as relationships between decolonization and self-determination.

EXCLUSIONS: POLI 5532.03

FORMATS: Seminar

POLI 4561 Security-Development Nexus: Theory, Policy and Complex Operations

CREDIT HOURS: 3

Security and development are indissolubly linked: development is compromised when security remains problematic, while a secure environment requires some form of sustainable development. Two of the principle manifestations of this 'security-development nexus' have been intrastate wars and collapsed states. In 2011 for example, none of the states emerging from civil war had reached any of the Millennium Development Goals set by the United Nations. Moreover, the security-development relationship conditions our capacity to develop effective policies on how and whether to intervene in 'fragile' or 'collapsed' states where the security environment is highly problematic, and our capacity to contribute to the economic and human development of these countries. This course aims, first, to give students a broad understanding of the various dimensions of the security-development nexus; and second, to address significant practical implications of this nexus. An important portion of the course will examine specific case studies, and feature an interagency simulation to provide students with a sense of what it is like to grapple these concepts beyond the classroom.

PREREQUISITES: POLI 2301.03 or POLI 2302.03 or POLI 2520.03 or POLI 2530.03 INTD 2001.03 or INTD 2002.03 or by permission of instructor

RESTRICTIONS: By permission of Instructor

EXCLUSIONS: POLI 3560.03, POLI 5561.03

FORMATS: Seminar

POLI 4569 Canadian Foreign Policy

CREDIT HOURS: 3

This advanced seminar course is concerned with the 'structure-agent' problem as it applies to Canadian foreign policy. In other words, what are the structures (both material and normative) that shape and constrain the pursuit of Canadian foreign policy; what room for maneuver and initiative is there; and who are the key actors, or the 'agents' who shape and implement Canada's global role? The course discusses these questions through four sections: theoretical and analytical approaches to the study of Canadian foreign policy; the external context; the domestic; and key themes and issues in Canadian foreign policy.

PREREQUISITES: POLI 2210 or POLI 2220 or POLI 2520 or POLI 2530 or POLI 3568 or POLI 3569 or POLI 3570 OR Permission of instructor
CROSSLISTED: POLI 5569.03
EXCLUSIONS: POLI 3569.03, POLI 3570.06 or POLI 5570.06
FORMATS: Seminar

POLI 4581 International Diplomacy: Institutions and Practices

CREDIT HOURS: 3

This course considers the historical evolution of international diplomacy. Among the themes reviewed are the emergence of national states, sovereignty norms, human rights and norms governing military intervention, the growth of international law and institutions, and the prospects for global governance. The course features extensive student participation, an emphasis on writing, and a negotiation simulation.

PREREQUISITES: 2000 or 3000-level course in International Relations or permission of the Instructor

FORMATS: Seminar

POLI 4587 International Political Economy

CREDIT HOURS: 3

This course is composed of two overlapping constituent themes. The first theme is that of competing explanations of international political economic behaviour - behaviour affected by that diffuse political authority characteristic of the international system, the second, that of examining the basic issues in international political economy - the fundamental questions as to why international trade, international finance, unequal economic development, international organization, and the multinational enterprise. The first theme functions to create the over-all framework of analysis by which competing approaches to international political economy can be evaluated. The second theme will integrate these approaches with issue areas within the fields of international trade, international finance, and what might be termed "international production" (within which fields issues such as economic development, the multinational enterprise, and the global "division of labour" constitute the major foci). The course sessions will roughly be constituted by 50 percent lecture and 50 percent organized student contributions for seminar discussion and debate.

PREREQUISITES: 2000 or 3000-level course in International Relations or permission of the Instructor

FORMATS: Seminar

POLI 4590 Politics of the Sea II

CREDIT HOURS: 3

This course will examine environmental, political and economic forces which affect contemporary ocean governance and management. Contemporary issues will be used to explore the geo-political ocean on a sectoral basis (transportation, fisheries and resources, military, etc.), as well as analyzing the evolution of national oceans policies and institutions.

PREREQUISITES: 2000- or 3000-level course in International Relations or permission of the instructor; previous coursework in economics is recommended.

CROSSLISTED: POLI 5595.03, MARA 5589.03

EXCLUSIONS: POLI 3590.03

FORMATS: Lecture | Seminar

POLI 4600 Honours Essay

CREDIT HOURS: 6

Political Science undergraduates in the Honours program are required to attend the Honours seminar as scheduled. This seminar is designed as a research seminar for Honours students.

CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

PREREQUISITES: Honours students only. Permission of the instructor.

RESTRICTIONS: Restricted to Political Science Honours students in their final year.

POLI 4601 Honours Seminar and Essay I

CREDIT HOURS: 3

Political Science undergraduates in the Honours program are required to attend the Honours seminar as scheduled. This course is one of two linked courses (POLI 4601 and 4602) which are designed as a research seminar for Honours students.

CALENDAR NOTES: Credit can only be given for this course if both it and POLI 4602 are completed in consecutive terms.

PREREQUISITES: Honours students only. Permission of the instructor.

POLI 4602 Honours Seminar and Essay II

CREDIT HOURS: 3

Political Science undergraduates in the Honours program are required to attend the Honours seminar as scheduled. This course is one of two linked courses (POLI 4601 and 4602) which are designed as a research seminar for Honours students.

CALENDAR NOTES: Credit can only be given for this course if both it and POLI 4601 are completed in consecutive terms.

PREREQUISITES: Honours students only. Permission of the instructor.

RESTRICTIONS: Restricted to Political Science Honours students in their final year.

FORMATS: Seminar

POLI 4636 Nationalism and Statecraft

CREDIT HOURS: 3

An examination of the sources, ingredients and consequences of contemporary nationalism, with particular reference to its implications for the conduct of international politics. In the early sessions of the course, pertinent literature from the pre-World War II period will be evaluated for its relevance to our understanding of current circumstances, in which the apparent revival of nationalist impulses has coincided with intensifying manifestations of functional interdependence. SIGNATURE REQUIRED.

PREREQUISITES: 3000-level course in International Relations or permission of instructor

CROSSLISTED: POLI 5636.03

FORMATS: Seminar

POLI 4810 Special Topics in Political Science

CREDIT HOURS: 3

An examination of selected issues in Political Science. This course explores (e.g., when a visiting scholar is on campus) a special topic that is not a regular offering of the department. It is taught as a lecture or seminar course, not as an independent studies course. Since the topics covered in these courses differ from year to year, students should seek further information from the Political Science Department before registering. The subject matter in this course will be explored in greater depth than a course offered under 3810.03/3820.03

Note

Courses in Religious Studies are administered by the [Classics Department](#).

Introduction

Religion is a phenomenon virtually universal in human society and history. Understanding religion involves grasping simultaneously both the meaning of faith in the lives of participants, and the critical analysis of outside observers. Both the student wishing enhanced understanding of religion as an historical, and social and human fact, and the student who wishes to wrestle with problems arising in

academic reflection concerning the relation between the personal and the objective, can find material to engage them in the programs and courses described below.

Degree Programs

In addition to the departmental requirements listed below, students must satisfy the requirements outlined in the [Degree Requirements](#) section.

Staff

Dean

Andrews, J. Hons BA (McGill), MA, PhD (University of Toronto)

Chair

Diamond, E., BA (Vind), MA (Dalhousie), PhD (Northwestern)

Undergraduate Advisor

Austin, C., BA, MA (Concordia), PhD (McMaster)

Professor Emeritus

Ravindra, R., BSc, MTech (IIT), MA (Dalhousie), MSc, PhD (Toronto), Adjunct Professor of Physics

Professor

Treiger, A., BA, MA (Jerusalem), MPhil, PhD (Yale)

Associate Professor

Austin, C., BA, MA (Concordia), PhD (McMaster)

BA (120 credit hour) Major in Religious Studies

Departmental Requirements

Students must complete a minimum of 36 credit hours or a maximum of 54 credit hours in Religious Studies beyond the 1000 level including 18 credit hours beyond the 2000 level. They must include:

1. 6 credit hours of 1000-level RELS classes or King's Foundation Year Programme;
2. 12 credit hours of 2000-level RELS classes;
3. 18 credit hours of 3000-level or 4000-level RELS classes.

BA (120 credit hour) Double Major in Religious Studies

Students must complete the Faculty requirements for a double major. These include 60 to 84 credit hours in the Major subjects at the 2000 level or higher, with no more than 48 credit hours and no fewer than 30 credit hours in each subject, including at least 18 credit hours beyond the 2000 level in each of the two major subjects. Religious Studies requires:

1. 6 credit hours of 1000-level RELS classes or King's Foundation Year Programme;
2. 12 credit hours of 2000-level RELS classes;
3. 18 credit hours of 3000-level or 4000-level RELS classes.

BSc (120 credit hour) Double Major, Second Subject in Religious Studies

Students must complete the Faculty requirements for a double major. Religious Studies can only be the second subject, with no fewer than 30 credit hours and no more than 54 credit hours above the 1000 level. 18 credit hours must be at the 3000 level or higher.

Religious Studies requires:

1. 6 credit hours of 1000-level RELS classes or King's Foundation Year Programme;
2. 12 credit hours of 2000-level RELS classes;
3. 18 credit hours of 3000-level or 4000-level RELS classes.

BA (120 credit hour) Combined Honours in Religious Studies

Students must complete the Faculty requirements for the combined honours degree. At least 30 credit hours and no more than 48 credit hours must be in Religious Studies above the 1000 level. At least 66 credit hours and no more than 84 credit hours are to be in both subjects beyond the 1000 level.

The Religious Studies requirements are:

1. 6 credit hours of 1000-level RELS classes or King's Foundation Year Programme;
2. 12 credit hours of 2000-level RELS classes;
3. 18 credit hours of 3000-level or 4000-level RELS classes, of which minimum 12 credit hours should be from the following list: RELS 3000.03; RELS 3009.03; RELS 3012.03; RELS 3100.03; RELS 3101.03; RELS 3111.03; RELS 3112.03; RELS 3113.03; RELS 3114.03; RELS 3282.03; RELS 4010.03; RELS 4018.03; RELS 4401.03;
4. Outside Religious Studies 6 credit hours will be required from the following list: both ARBC 1021.03 (Intro Arabic I) and ARBC 1022.03 (Intro Arabic II); both CHIN 1031.03 (Intro Mandarin I) and CHIN 1032.03 (Intro Mandarin II); both RELS/CLAS 1600.03 (Intro Sanskrit I) and RELS/CLAS 2600.03 (Intro Sanskrit II); both CLAS 2401.03 (Intro Latin I) and CLAS 2402.03 (Intro Latin II); CLAS 1900.06 (Classical Hebrew); both CLAS 2505.03 (Intro Ancient Greek I) and CLAS 2506.03 (Intro Ancient Greek II). Students may substitute a more advanced course in these languages for this requirement.
5. If the first subject is Religious Studies, completion of the Honours component (RELS 0400.00): either (a) the Religious Studies Honours Examination, or (b) the Religious Studies Honours Thesis, subject to approval by faculty.

BSc (120 credit hour) Combined Honours, Second Subject in Religious Studies

Students must complete the Faculty requirements for the combined honours degree. Religious Studies can be the second subject only. At least 30 credit hours and no more than 42 credit hours, must be in Religious Studies above the 1000 level. At least 66 credit hours, to a maximum of 84 credit hours are to be in both subjects.

The Religious Studies requirements are:

1. 6 credit hours of 1000-level RELS classes or King's Foundation Year Programme;
2. 12 credit hours of 2000-level RELS classes;
3. 18 credit hours of 3000-level or 4000-level RELS classes, of which minimum 12 credit hours should be from the following list: RELS 3000.03; RELS 3009.03; RELS 3012.03; RELS 3100.03; RELS 3101.03; RELS 3111.03; RELS 3112.03; RELS 3113.03; RELS 3114.03; RELS 3282.03; RELS 4010.03; RELS 4018.03; RELS 4401.03;
4. Outside Religious Studies 6 credit hours will be required from the following list: both ARBC 1021.03 (Intro Arabic I) and ARBC 1022.03 (Intro Arabic II); both CHIN 1031.03 (Intro Mandarin I) and CHIN 1032.03 (Intro Mandarin II); both RELS/CLAS 1600.03 (Intro Sanskrit I) and RELS/CLAS 2600.03 (Intro Sanskrit II); both CLAS 2401.03 (Intro Latin I) and CLAS 2402.03 (Intro Latin II); CLAS 1900.06 (Classical Hebrew); both CLAS 2505.03 (Intro Ancient Greek I) and CLAS 2506.03 (Intro Ancient Greek II). Students may substitute a more advanced course in these languages for this requirement.

BA (90 credit hour) Minor in Religious Studies

See [Minor in Religious Studies section](#).

Minor in Abrahamic Religions

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Students declaring a Minor in the Abrahamic Religions will complete a minimum of 18 credit hours at the 2000 level or above to a maximum of 27 credit hours, chosen from the lists below. At least three credit hours must be taken from each of the Judaism,

Christianity and Islam lists; RELS 3019: Meetings between Hellenism, Judaism, Christianity and Islam until the Renaissance and RELS 3382: Medieval Philosophy from Arabic and Jewish Thinkers to Aquinas may each be used to satisfy parts of this requirement.

Judaism courses

- RELS 2001.03: Judaism
- RELS 2220.03: Ancient Israel
- RELS 3018.03: Meetings between Hellenism and the East to Philo the Jew
- RELS 4011.03: Jewish Philosophy: Maimonides
- RELS 4019.03: Philo Judaeus

Christianity courses

- RELS 2281.03: Christian Beginnings: The Orthodox and Oriental Churches
- RELS 3009.03: Christianity in the Lands of Islam
- RELS 3282.03: Christian Beginnings: Catholicism
- RELS 3381.03: Medieval Philosophy from Anselm to Augustine
- RELS 3411.03: St. Augustine's Confessions I
- RELS 3412.03: St. Augustine's Confessions II
- RELS 3431.03: St. Augustine's On the Trinity Part I
- RELS 3432.03: St. Augustine's On the Trinity Part II
- CLAS 3841.03: Latin Philosophical Texts: Aquinas Texts
- CLAS 3842.03: Latin Philosophical Texts: Anselm and Bonaventure Texts
- CLAS 4018.03: Christian Theology in Islamic Lands: John of Damascus
- CLAS 4070.03: The Confessions in Latin
- CLAS 4401.03: Philosophy of the Greek Church Fathers
- CLAS 4402.03: Philosophy of the Latin Church Fathers

Islam courses

- RELS 2003.03: Islam
- RELS 2052.03: Cultural Introduction to the Arab World
- RELS 4010.03: Islamic Philosophy: al-Ghazali
- RELS 3012.03: Mystics of the Middle East
- RELS 2503.03: Classical and Medieval History of Islamic Civilization
- RELS 3510.03: Sultans and Shahs: Polity and Religion in the Islamic Gunpowder Age
- CLAS 3602.03: Classical and Medieval History of the Persianate World

Bridging courses

- RELS 2203.03: Philosophy and God
- RELS 3000.03: Topics in Religious Studies
- RELS 3019.03: Meetings between Hellenism, Judaism, Christianity, and Islam until the Renaissance
- RELS 3382.03: Medieval Philosophy from Arabic and Jewish Thinkers to Aquinas
- RELS 3910.06: Neoplatonism: Plato and Neoplatonism
- RELS 4450.06: Medieval Interpreters of Aristotle
- CLAS 4500.06: Seminar on Neoplatonism

Note: Not all courses are offered each year. Please consult with the timetable for courses offered.

Contact [Religious Studies](#) for more information.

Minor in Middle East & South Asian Studies

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Students minoring in Middle East Studies select a minimum of 18 to a maximum of 27 credit hours from the list below. Student are required to take one of the following:

- HIST 2502.03: The Ottoman Empire
- HIST 2503.03/RELS 2503.03: Classical and Medieval History of Islamic Civilization
- HIST 2504.03: History of Modern Middle East
- RELS 2001.03: Judaism
- RELS 2003.03: Islam

At least three credit hours must be at the 3000 or 4000 level. Please note that not all courses are offered each year.

Second Year

- ARBC 2021.03: Intermediate Arabic I
- ARBC 2022.03 Intermediate Arabic II
- ARBC 2100.03//RELS 2052.03: A Cultural Introduction to the Arab World
- RELS 2053.03/GWST 2053.03: Women and Islam
- CLAS 2103.03: Ancient Mythology I
- CLAS 2104.03: Ancient Mythology II
- CLAS 2216.03/HIST 2089.03: Alexander the Great
- CLAS 2220.03/HIST 2520.03/RELS 2220.03: Ancient Israel
- CLAS 2281.03/RELS 2281.03: The Orthodox and Oriental Churches
- CLAS 2900X/Y.06: Intermediate Hebrew
- HIST 2502.03: The Ottoman Empire
- HIST 2503.03/RELS 2503.03: Classical and Medieval History of Islamic Civilization
- HIST 2504.03: History of the Modern Middle East
- HIST 2505.03: Modern History of Iraq
- HIST 2509.03/RELS 2509.03 Hindu, Muslim, Sikh: Identity, Culture and State in Pre-Colonial South Asia
- HIST 2510.03/RELS 2510.03 Hindu, Muslim, Sikh: Locating the Trauma of Modern South Asia

Minor in Religious Studies

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A BA (90 credit hour) degree program with a minor in Religious Studies is also available.

Students must complete a minimum of 18 to a maximum of 27 credit hours above the 1000 level.

Minimum of 18 credit hours in RELS beyond the 1000 level. At least 6 of these credit hours must be chosen from:

- RELS 2001.03: Judaism
- RELS 2003.03: Islam
- RELS 2011.03: Hinduism
- RELS 2012.03: Chinese & Japanese Religions
- RELS 2013.03: Buddhism
- RELS 2281.03: Christian Beginnings: The Orthodox and Oriental Churches
- RELS 2509.03: Hindu, Muslim, Sikh: Identity, Culture and State in Pre-Colonial South Asia
- RELS 2510.03: Hindu, Muslim, Sikh: Locating the Trauma of Modern South Asia

and at least 6 credit hours must be chosen from:

- RELS 3000.03: Topics in Religious Studies
- RELS 3009.03: Christianity in the Lands of Islam
- RELS 3012.03: Mystics of the Middle East
- RELS 3101.03: The Self and the World in Indian Story
- RELS 3111.03: Vishnu and Krishna the Dark Lord
- RELS 3112.03: Buddhism in India and Tibet
- RELS 3113.03: The Mahabharata: India's Great Epic of Strife and Salvation
- RELS 3114.03: Special Topics in Eastern Religions
- RELS 3282.03: Christian Beginnings: Catholicism
- RELS 4010.03: Islamic Philosophy: al-Ghazali
- RELS 4018.03: Christian Theology in the Lands of Islam: John of Damascus
- RELS 4401.03: Philosophy of the Greek Church Fathers

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

Course Notes

First year students are not admitted to courses beyond the 1000 level without the consent of the instructor. Courses at the 2000 level do not have prerequisites; in general, they are available only to students in their second year or above. Prerequisites for courses at the 3000 and 4000 levels are listed with each individual course below; in general, they are available only to students in their third year or above in the University.

Course Descriptions

RELS 0400 Religious Studies Honours Examination

CREDIT HOURS: 0

Details available from the department.

PREREQUISITES: Students must be declared as BA Combined Honours Religious Studies, first subject Religious Studies.

RELS 0401 Honours Examination I

CREDIT HOURS: 0

The Religious Studies exam consists of one exam in Western and one in Eastern Religions.

CALENDAR NOTES: This course is the first part of the former course RELS 0400.00. RELS 0401 and RELS 0402 must both be completed in fulfill the RELS honors examination.

EXCLUSIONS: RELS 0400.00

RELS 0402 Honours Examination II

CREDIT HOURS: 0

The Religious Studies Honours Exam consists of one exam in Western and one in Eastern Religions.

CALENDAR NOTES: Students must be declared as BA Combined Honours Religious Studies, first subject Religious Studies. This course is the second part of the former RELS 0400.00 This course description reflects the entirety of the pair (RELS 0401 and RELS 0402).

EXCLUSIONS: RELS 0400.00

RELS 1001 Religions of the East

CREDIT HOURS: 3

This course serves as an introduction to the history, beliefs, and practices of Hinduism, Jainism, Sikhism, Buddhism, Daoism, Shinto, and Confucianism.

EXCLUSIONS: RELS 1000.06

FORMATS: Lecture

RELS 1002 Judaism, Christianity, and Islam: The Abrahamic Religions

CREDIT HOURS: 3

This course serves as a comparative and thematic introduction to the history, beliefs, and practices of Judaism, Christianity, and Islam.

EXCLUSIONS: RELS 1000.06

FORMATS: Lecture

RELS 1101 Classical Mythology

CREDIT HOURS: 3

This class will study various mythic texts from ancient Greece and Rome, with occasional attention to other nearby ancient cultures. Students will demonstrate competence in describing the content of specific myths as found in various primary sources, understanding the function of myth in expressing and shaping ancient cultural values, assessing the relationships between specific myths or versions of the same myth, and examining the reception of myths in later societies. All primary texts will be read in English translation.

CROSSLISTED: CLAS 1101.03

RESTRICTIONS:

EXCLUSIONS: CLAS 1103.03, CLAS 1104.03; CLAS 2103.03; CLAS 2104.03; RELS 1201.03; RELS 1204.03

RELS 1201 Gods, Heroes, and Monsters: Ancient Mythology I

CREDIT HOURS: 3

An introductory survey of the traditional religious narratives of ancient civilizations including Mesopotamia, Egypt, Israel, Greece, and Rome. Of special interest: the function of myth in shaping and expressing a culture's understanding of the divine, the institutions of human community (religion, the family, government), and the natural world; the interrelationships of the myths of those civilizations; the reception of those traditions in the origins of Christian and Islamic culture. The traditional narratives and their broader cultural contexts will be approached through study of primary sources including epic, tragic, and didactic poetry, hymnography, historiography, philosophy, the visual arts, and architecture. This course fulfills the first year writing requirement.

CALENDAR NOTES: This course is the first part of the former full-year course RELS 1200X/Y.06. This course description reflects the entirety of the pair (RELS 1201.03 and RELS 1202.03).

CROSSLISTED: CLAS 1100X/Y.06, CLAS 1103.03

EXCLUSIONS: CLAS 2100X/Y.06, CLAS 2103.03, CLAS 2104.03, RELS 1200X/Y.06

FORMATS: Lecture

RELS 1202 Gods, Heroes, and Monsters: Ancient Mythology II

CREDIT HOURS: 3

An introductory survey of the traditional religious narratives of ancient civilizations including Mesopotamia, Egypt, Israel, Greece, and Rome. EXCLUSIONS: CLAS 2100X/Y.06, CLAS 2103.03, CLAS 2104.03, RELS 1200X/Y.06

FORMATS: Lecture

RELS 1600 Introductory Sanskrit I

CREDIT HOURS: 3

This course provides students with all the basic tools required for the study of Sanskrit, with a particular emphasis on basic Sanskrit grammar. Students will learn the Devanagari script, several common nominal forms and the basics of the verbal system, as well as develop a competency in basic reading and recitation.

CROSSLISTED: CLAS 1600.03

RELS 2001 Judaism

CREDIT HOURS: 3

An introduction to Jewish beliefs, practices, history, and writings from the Hellenistic period to the present. Topics to be covered include: the Torah, the Talmud, the development of the Rabbinic tradition, Jewish philosophy and mysticism.

FORMATS: Lecture | Seminar

RELS 2002 Christianity

CREDIT HOURS: 3

An introduction to Christian history and writings from the New Testament to the present. The course will examine core Christian beliefs (the Trinity and the Incarnation) and practices (Baptism, Eucharist, prayer, liturgical worship, iconography) as they have evolved in the different varieties of Christianity - Orthodox, Catholic, and Protestant - in the past and today.

FORMATS: Lecture

RELS 2003 Islam

CREDIT HOURS: 3

An introduction to Muslim beliefs, practices, history and writings from the 7th century to the present. Topics to be covered include: the life and mission of Muhammad, the Qur'an, the Islamic legal, philosophical, and mystical tradition, the development of the Hadith, and the rise of political Islam in the twentieth century.

FORMATS: Lecture | Seminar

RELS 2011 Hinduism

CREDIT HOURS: 3

This course offers a basic introduction to Hinduism, including early Vedic religion and philosophy, the emergence of classical Brahminical religion in the Sanskrit epics and Puranas, and the popular regional traditions of the deities Vishnu, Shiva, and Devi. The course also examines Hindu social structures, colonial period reform movements and treats the relationship between Hindu religion and politics in the 20th and 21st centuries.

FORMATS: Lecture

RELS 2012 Chinese and Japanese Religions

CREDIT HOURS: 3

This course offers an introduction to the cultural, religious, and philosophical traditions of China and Japan. The course examines the roots and development of the ritual traditions of ancient China, early Confucianism, Philosophical and Religious Daoism, Chinese Buddhism, Neo-Confucianism, Shinto, Japanese Buddhism and Shugendo, as well as the Shin Shukyo and other features of 20th and 21st century Chinese and Japanese religions.

CROSSLISTED: CHIN 2060.03

FORMATS: Lecture

RELS 2013 Buddhism

CREDIT HOURS: 3

This course introduces the student to the Buddhist religious tradition, beginning with its origins and early developments in India and followed by a treatment of key themes of later world Buddhism such as meditation, devotion, monasticism, and ritual. The course thus exposes students to both Buddhism's early Indian doctrinal and institutional dimensions, and to aspects of Buddhism as it developed in China, Japan, and Tibet, including its lived and practised forms in those regions today.

CROSSLISTED: CHIN 2070.03

FORMATS: Lecture | Tutorial

RELS 2025 Conceptions of Nature in the Pre-Modern World

CREDIT HOURS: 3

What is nature? What is the proper relationship between nature and the human being, political community, and divinity? This course will investigate ancient Greek, Roman, Jewish, Christian and Islamic answers, to this question through the study of literature, philosophy, art and architecture of the Pre-Modern West.

CROSSLISTED: CLAS 2025.03

FORMATS: Lecture

RELS 2026 Paganism

CREDIT HOURS: 3

"Pagan" originated as a derogatory Christian designation for ignorant conservative rustics who kept to the pre-Christian religions. We shall look at those religions in their origins, nature, and development in antiquity, their continuations in the Middle Ages and modernity, and their persistence and revival in the contemporary world.

CROSSLISTED: CLAS 2026.03

FORMATS: Lecture | Discussion

RELS 2027 Magic, Religion and Philosophy

CREDIT HOURS: 3

Reading the Greek Magical Papyri, as well as curse tablets and binding spells for ancient sources, we will explore the intersections of, and relations between, magic, religion, and philosophy in antiquity. The focus will be on both the practical and theoretical aspects of magic in the Greek and Roman worlds.

CROSSLISTED: CLAS 2027.03

RELS 2052 A Cultural Introduction to the Arab World

CREDIT HOURS: 3

This course provides students with the basic tools for approaching the Arab world from a cultural perspective. The main topics are: 1) the guide marks of

Arabic history; 2) a civilization "of the Word": the Arabic language, the Koran, the Tradition of the Prophet Mohammed, and the sciences related to the Islamic Law (shari'a); 3) the Arabic legacy in sciences, philosophy, literature, architecture, calligraphy, decoration, etc; 4) multi-cultural Al-Andalus and the ideal of 'convivencia'; 5) present nostalgia for the past; 6) tradition, modernity and effects of 'Globalization' in the contemporary Arabic "high culture" and "pop culture": in literature, music, arts, cinema, life style, education system, media, etc. Some lectures will be accompanied by audio-visual presentations including documentary films. The course does not require background in Arabic.

CROSSLISTED: ARBC 2100.03, HIST 2500.03

FORMATS: Lecture | Discussion

RELS 2120 Magic, Science and the Occult: from Antiquity to Postmodernity

CREDIT HOURS: 3

A perennial source of fear and fascination, magic and related forms of 'occultism' (e.g. alchemy and astrology) have been dismissed as pseudo-science and even stigmatized as 'Satanism'. This course aims to recover the original meaning of occultism from the perspective of the practitioners of magic. It explores the origins and development of the 'occult sciences', highlighting their often-overlooked contributions to the history of science, and their continuing evolution in the modern world.

CROSSLISTED: HIST 2990.03, EMSP 2360.03, HSTC 2120.03

FORMATS: Lecture | Tutorial

RELS 2203 Philosophy and God

CREDIT HOURS: 3

Does God exist? Can God be known? Have a nature? Do evil? Beginning by occupying the same ground as religion, philosophy has asked these questions. Starting with Pythagoras, Empedocles, Plato, Aristotle, Epicurus, and continuing with their pagan, Jewish, Christian, and Islamic followers, we shall learn to state the answers of sages and mystics with historical accuracy and to judge their persuasive power.

CROSSLISTED: CLAS 2024

FORMATS: Lecture | Discussion

RELS 2205 Philosophy of Religion

CREDIT HOURS: 3

The philosophical exploration of the nature and function of religious faith, belief, and practice. Topics typically include: relations between religion and morals; the existence of divinity/divinities; problems of evil; the nature and significance of religious experiences

CROSSLISTED: PHIL 2205.03

EXCLUSIONS: PHIL 2200X/Y.06

RELS 2209 The Roman World from Constantine to Theodosius (312-395)

CREDIT HOURS: 3

This course covers one of the most important periods of Roman history in which Christianity became the dominant religion in the empire and foreign peoples threatened the existence of the empire itself. The course is open to first-year students. There is no foreign language requirement.

CROSSLISTED: HIST 2017.03, CLAS 2209.03

EXCLUSIONS: CLAS 2210X/Y.06, HIST 2004X/Y.06

FORMATS: Seminar

RELS 2220 Ancient Israel in Her Near Eastern Context

CREDIT HOURS: 3

Students will become familiar with the broad outlines of ancient Israelite history with specific attention to Israel's relationship to her immediate neighbours and the major imperial powers from the 2nd millennium BCE to first century CE. This will entail an initial survey of biblical texts in order to lay an adequate understanding of ancient Israel's self-conception, followed by a detailed survey of Israel's interaction with other nations, including early Mesopotamia, Egypt, Assyria, Babylon, Persia, the Seleucid empire, and Rome.

CROSSLISTED: CLAS 2220.03/HIST 2520.03

FORMATS: Lecture | Seminar

RELS 2281 Christian Beginnings: The Orthodox and Oriental Churches

CREDIT HOURS: 3

This course traces the development of Christianity from its origin as a Jewish sect to its status as the dominant religion within the Byzantine Empire. The Christian religion as patronized by the Eastern Roman Emperors identified itself with the persecuted Christian sect of the first three centuries through the cult of the martyrs, articulated in the increasing importance of relic, icon, and pilgrimage to holy place. The seven ecumenical councils (325-787) progressively defined the Orthodox faith and resulted in the rise of Oriental churches, rejecting aspects of the definitions. Through to our end-date of 843 (when the icon was finally accepted) themes will be treated by attention to historical events (including the rise of Islam), art, architecture, liturgy, and various genres of literature (including hagiography).

CROSSLISTED: CLAS 2281.03
EXCLUSIONS: CLAS 3280X/Y.06
FORMATS: Lecture

RELS 2292 Goblins, Ghosts, Gods, Gurus I

CREDIT HOURS: 3

CALENDAR NOTES: This course is the first part of the former full-year course RELS 2291X/Y.06. This course description reflects the entirety of the pair (RELS 2292.03 and RELS 2293.03).

CROSSLISTED: SOSA 2292.03

EXCLUSIONS: RELS 2291X/Y.06, SOSA2291X/Y.06

FORMATS: Lecture

RELS 2293 Goblins, Ghosts, Gods, Gurus II

CREDIT HOURS: 3

CALENDAR NOTES: This course is the second part of the former full-year course RELS 2291X/Y.06. This course description reflects the entirety of the pair (RELS 2292.03 and RELS 2293.03).

PREREQUISITES: RELS 2292.03

CROSSLISTED: SOSA 2293.03

EXCLUSIONS: RELS 2291X/Y.06, RELS 2291X/Y.06

FORMATS: Lecture

RELS 2362 Ancient Philosophy: From Aristotle to Plotinus

CREDIT HOURS: 3

This course covers the period in Ancient Philosophy from Aristotle to Plotinus: selected texts of Aristotle, Stoicism, Epicureanism, Pyrrhonian and Academic Scepticism, Middle Platonism, Neoplatonism.

CROSSLISTED: PHIL 2362.03, CLAS 2362.03

FORMATS: Lecture

RELS 2365 Plato and the Case of Socrates: Philosophy on Trial

CREDIT HOURS: 3

Socrates (469-399 BCE) never wrote a single word, but posed such threat to Athens that a jury put him to death for the alleged ethical corruption and impiety of his thought. This course will explore the revolutionary life and thought of Socrates, and consider whether the jury's decision against him was justified.

CROSSLISTED: CLAS 2365, PHIL 2365

FORMATS: Lecture

RELS 2420 Witchcraft in Early Modern Europe

CREDIT HOURS: 3

The period of European history from 1500 to 1800 saw the rise of modern science and philosophy. It was also a period in which thousands of witch trials and executions were carried out. This course will seek to understand how these seemingly contradictory developments could have occurred simultaneously. The course will examine changing conceptions of the witch and witchcraft in their historical, intellectual, cultural, religious, and political contexts. Questions that will be addressed include: How did the Renaissance interest in magic influence the Early Modern understanding of witchcraft? What impact did concerns about popular religion have on the witch trials? What constituted evidence that someone was a witch? What did Early Modern scientists think about witchcraft? The course will pay special attention to Early Modern notions of gender and sexuality and their influence on the witch hunts and witch trials.

CROSSLISTED: GWST 2320.03, EMSP 2320.03

FORMATS: Lecture | Tutorial

RELS 2503 Medieval Islamic Civilization

CREDIT HOURS: 3

This course will introduce students to the Perso-Levantine world at the time of Muhammad's prophecy in the 7th century, and how the Arabian Peninsula was impacted by the creation and emergence of an Islamic society in Medina and Mecca. With the displacing of Byzantine control in the Holy Land and the collapse of the Sasanian Empire in Persia, the Arab-centric society of Mecca and Medina had become an empire of unprecedented size and ethnic complexity. The course will examine the respective Umayyad and Abbasid Dynasties, as well as the Ottomans, Safavids, and Mughals. The central theme of this course will be an examination of the Islamic surrounding traditions and cultures in the Mediterranean, the Iranian Plateau, the Caucasus, the Steppe, India, and Southeast Asia. Another important theme will be the study of how various Islamic societies understood and resolved the age-old dynamic between tribal nomadism and hierarchical urbanism.

CROSSLISTED: HIST 2503.03
EXCLUSIONS: first year students and HIST 2501.03
FORMATS: Lecture

RELS 2509 Hindu, Muslim, Sikh: Identity, Culture and State in Precolonial South Asia

CREDIT HOURS: 3

This course introduces students to the fundamental units of the religious and political history of South Asia from the pre-Islamic period to approximately 1750 CE, guided by the following questions: who are the peoples that have made up the religious, cultural and political communities of South Asia? What, if anything, defines religious and political identity in the ancient and early modern world? What role has religion played in the formation and administration of political regimes in South Asia? And how have the identities of those whom we today call "Muslim," "Hindu" and "Sikh" changed and evolved in the centuries preceding the British Imperial period?

CROSSLISTED: HIST 2509.03

FORMATS: Lecture | Tutorial

RELS 2510 Hindu, Muslim, Sikh: Colonial Trauma and Nationalism in Modern South Asia

CREDIT HOURS: 3

This course will examine the region of South Asia from the mid-19th century - the height of the British Raj - to the present. Areas of concentration will include resistance to British rule, rise of the Congress Party, the 1947 Partition, and subsequent decolonization. The respective histories of modern India, Pakistan, and Bangladesh will be examined against the backdrop of nationalism, communalism, and regional conflict.

CROSSLISTED: HIST 2510.03

FORMATS: Lecture

RELS 2600 Introductory Sanskrit II

CREDIT HOURS: 3

This course develops further the basic grammar and vocabulary of Introductory Sanskrit I, emphasizing the basic past tense verbal systems, participial formations, and translation of simple Sanskrit texts.

PREREQUISITES: RELS 1600.03 or CLAS 1600.03

CROSSLISTED: CLAS 2600.03

RELS 3000 Topics in Religious Studies

CREDIT HOURS: 3

This course treats a range of theoretical and methodological issues in the study of religion and serves to introduce students to key problems in scholarship on both Western and Eastern traditions. A variety of themes will be explored such as the relationship between philosophy and religion, the functions of doctrine and ritual, the nature of holiness and the nature of scripture. Beyond a basic understanding of these and other themes, however, the course will engage students with the various - often conflicting - ways in which these themes have been treated in Religious Studies scholarship.

RESTRICTIONS: Students must be in their third year of study, or beyond

FORMATS: Seminar

RELS 3009 Christianity in the Lands of Islam

CREDIT HOURS: 3

After the Islamic conquest of the Middle East in the seventh century, approximately half of the world's Christians found themselves under Islamic rule. The course tells the story of these Christians, their religious practices, their literatures, written in Greek, Arabic, Syriac, and Coptic, and their complex relations with the Muslims from the seventh century until today.

PREREQUISITES: RELS 1002.03 or RELS 2003.03 or permission of the instructor.

FORMATS: Lecture

RELS 3012 Mystics of the Middle East

CREDIT HOURS: 3

The course is designed as an introduction to mystical dimensions of Islamic thought and practice in their historical development and in relation to Jewish and Christian mysticism in the Middle East. Topics to be covered include: Middle Eastern Christian mysticism, the beginnings of the Sufi tradition in relation to other varieties of Middle Eastern mysticism, orthodoxy and heresy in early Sufism, stations and states on the Sufi path, Sufism and philosophy in interaction, Sufi orders, Sufi poetry as vehicle of mystical experience.

PREREQUISITES: RELS 1002.03 or RELS 2003.03 or permission of the instructor.

RELS 3018 Meetings Between Hellenism and the East to Philo the Jew

CREDIT HOURS: 3

We consider the constitution of Hellenism in relation to Eastern cultures as this emerges in Homer and Herodotus, the emergence of philosophy and the polis. With Alexander and the Hellenistic empires we look at the results and limits of military conquest especially in what is now Afghanistan. The course concludes with the constitution of Jewish religion and culture and its meeting with Hellenism with Philo Judaeus in Alexandria. In order to integrate the presentation of text and art the lectures are all in PowerPoint.

CROSSLISTED: CLAS 3016.03, HIST 3016.03

FORMATS: Lecture | Discussion

RELS 3019 Meetings between Hellenism, Judaism, Christianity and Islam until the Renaissance

CREDIT HOURS: 3

We consider the constitution of Christianity in relation to Hellenism and Judaism during the first six centuries of the Christian era. After treating the constitution of Islam, we consider its meetings with Christianity and Judaism especially in Spain and Norman Sicily. We conclude with medieval Jewish, Christian and Islamic philosophical theologians. Integrating the presentation of text and art the lectures are all in PowerPoint.

CROSSLISTED: CLAS 3017.03, HIST 3017.03

FORMATS: Lecture | Discussion

RELS 3100 Readings in Western Religions

CREDIT HOURS: 3

This course will focus on a single body of literature from the Jewish, Christian, or Islamic religious traditions such as the Gospels, Midrashic collections, or Tafsir. The course will examine the interpretation of the literature in its original context, in traditional commentaries, and in the modern academy.

PREREQUISITES: A 2000 level course or permission of instructor

EXCLUSIONS: RELS 3002.03

FORMATS: Lecture | Seminar

RELS 3101 The Self and the World in Indian Story

CREDIT HOURS: 3

Through a close reading of narrative and other forms of story literature, this course explores the twin themes, fundamental to all South Asian religions, of renouncing and embracing the world. Reading materials will draw from Hindu, Indian Buddhist, Jain and Sikh narrative literature, and will reflect a range of religious attitudes towards engaged worldly life within the family and society, and the pursuit of personal liberation through asceticism, renunciation and monasticism.

PREREQUISITES: A 2000 level RELS course or permission of the instructor

EXCLUSIONS: RELS 3002.03

FORMATS: Seminar

RELS 3111 Vishnu and Krishna the Dark Lord

CREDIT HOURS: 3

This course focuses on the Hindu god Vishnu and his various manifestations, particularly Krishna, the "Dark Lord." Through an examination of early Sanskrit sources (particularly the Mahabharata, Harivamsa and Vishnu Purana) and popular regional and vernacular traditions across India, the course treats the varied theological, mythic and cultic expressions of one of South Asia's most beloved figures.

PREREQUISITES: any 2000 level RELS or permission of the instructor

FORMATS: Seminar

RELS 3112 Buddhism in India and Tibet

CREDIT HOURS: 3

This course engages the student with the Tantric forms of Buddhism practiced initially in early medieval India and subsequently in the Tibetan cultural region, emphasizing the ritual, devotional, meditative and social expressions of Vajrayana or Tantric Buddhism which informed the rise of Buddhist institutions and popular practice in premodern Tibet and the Himalayan region. The course also examines issues of religion and the Tibetan state, diaspora and the fraught nature of the Western reception of Tibetan Buddhism.

PREREQUISITES: Any 2000 level RELS or permission of the instructor

FORMATS: Seminar

RELS 3113 The Mahabharata: India's Great Epic of Strife and Salvation

CREDIT HOURS: 3

Barring perhaps the Ramayana, the Mahabharata or "Great [Epic] of India" is the most widely known and retold narrative in all South Asian tradition, and is one of the most important literary works of human civilization. The Sanskrit Mahabharata is enormous, complex, endlessly fascinating, and has remained for 2000 years the principal venue for the Hindu tradition's reflection on the dark and elusive dimensions of war, violence, civil and divine law, human destiny and freedom. This course will lead students into the colourful world of India's great Sanskrit epic, provide them with the tools for mastering the narrative itself

and the scholarly issues arising from its study.

PREREQUISITES: A 2000-level RELS course or permission of the instructor.

FORMATS: Seminar

RELS 3114 Special Topics in Eastern Religions

CREDIT HOURS: 3

This course treats a variety of special themes in Asian religious traditions. Topics may include ritual, scripture and its interpretation, gender and social expressions of faith, religion and modernity, and the relationship between political and religious authority in India, Southeast Asia, Tibet, China, Korea and Japan.

PREREQUISITES: A 2000-level RELS course or permission of the instructor.

FORMATS: Lecture | Seminar

RELS 3121 In Search of the Philosopher's Stone: The History of European Alchemy

CREDIT HOURS: 3

This course traces the development of alchemical theories and practices in the Medieval Latin West up to the emergence of early modern chemistry. It employs a multi-disciplinary approach which treats the scientific, technological, esoteric and iconographic dimensions of alchemy as interdependent. The entire development of European alchemy is covered from the transmission of the Greek and Islamic alchemical traditions in the 12th century up to Newton, whose alchemical theories represent a point of transition to early modern chemistry in one direction, and to a more spiritualised occult philosophy in the other. This course is independent of HSTC 3120.03. All students interested in the intersections of science, magic and mysticism are welcome.

CROSSLISTED: HIST 3990.03, EMSP 3321.03, HSTC 3121.03

FORMATS: Lecture | Seminar

RELS 3200 Science and Religion: Historical Perspectives

CREDIT HOURS: 3

This course tells the story of interactions between religious belief and the study of nature from deepest Antiquity to 1800. Beginning with an overview of the history and methodology of the study of science and religion, encounters between science and religion are traced from the dawn of civilization to the end of the eighteenth century, with a special focus on the early modern period. From an examination of the biblical view of nature and Creation, ancient Babylonian astrology and divination and Plato's Timaeus, this course moves through a treatment of the centrality of theology to Medieval science on to natural theology and the "Watchmaker" Design Argument of the seventeenth and eighteenth centuries. Models of conflict, harmony and complementarity offered to characterize relations between science and religion are explored through case studies such as the understanding of the soul, Galileo's controversy with the Church and instances where religious belief inspired natural philosophers like Boyle and Newton. Claims that certain confessional traditions (notably Protestantism and its dissenting offshoots) facilitated the rise of modern science are also appraised. Science-religion relations are examined both from the standpoint of mainstream religion and with respect to religious heterodoxy, prophecy, alchemy, magic and witchcraft. This course employs examples from Judaism, Christianity and Islam and involves the reading and discussion of primary texts.

CROSSLISTED: HSTC 3200.03, EMSP 3330.03, HIST 3075.03

FORMATS: Lecture | Discussion

RELS 3201 Science and Religion: Contemporary Perspectives

CREDIT HOURS: 3

This course tells the story of interactions between religious belief and the study of nature from 1800 to today. Beginning with an overview of the history and methodology of the study of science and religion, encounters between science and religion are traced from the rise of Darwinism in the early nineteenth century to the contemporary postmodern age. From an examination of nineteenth-century natural theology and the religious impact of Darwin's Origin of Species (1859), this course moves on to such contemporary topics as the religious interpretations of quantum mechanics, the Big Bang, the anthropic principle, medical science, bioethics, evolutionary psychology, chaos theory, aesthetics in nature, science fiction, extra-terrestrial life (including the SETI Project) and the quest for techno-immortality. Case studies of "conflict" emanating from Darwinism, the Scopes Trial, the on-going Creation-Evolution debates and the New Atheism are contrasted with examples of harmony and interdependence between science and religion in the careers of modern scientists, along with phenomena like neurotheology and the Intelligent Design (ID) movement. The religious scope of the course is intentionally wide-ranging, and examinations of science-religion interaction within indigenous spirituality are added to treatments of traditional eastern and western religion.

CROSSLISTED: HSTC 3201.03, CTMP 3201.03, HIST 3076.03

FORMATS: Lecture | Discussion

RELS 3211 Ecology and Religion

CREDIT HOURS: 3

This course examines the relationship between spirituality and the human encounter with the environment in history and today. Beginning with an examination of some of the ancient, Medieval and early modern religious foundations of ecology and the environmental movement, the course moves on to focus on contemporary green theology, the practice of religious environmentalism and the interaction between religious traditions and the environmental sciences and technologies. It engages with primary sources from and scholarship about Western (Abrahamic), Eastern (Dharmic) and indigenous religions, along with twenty-first-century green theology, religious environmentalism, ecofeminist perspectives and Dark Green Religion. Grounded in the history of science and technology, this course takes an interdisciplinary approach to its themes, incorporating historical, literary, theological, political, sociological and philosophical perspectives.

CROSSLISTED: HSTC 3202.03
FORMATS: Lecture

RELS 3250 Atheism in Early Modern Europe

CREDIT HOURS: 3

Although atheism continues to be a source of controversy and debate, one of the most significant features of the modern world is the extent to which religious unbelief has become accepted as a morally and intellectually defensible position. This course will seek to understand the rise of modern atheism by examining its origins in the Early Modern world.

CROSSLISTED: EMSP 3250.03

FORMATS: Lecture | Tutorial

RELS 3260 Renaissance and Reformation Europe, 1450-1650

CREDIT HOURS: 3

A survey of the major themes, subjects, and personalities in western European history from the Italian Renaissance through to the Protestant Reformation, with a focus on the latter. Topics to be covered include the rise of Italian humanism, religious thought and practice, the various reform movements of the era, the rise of religious conflict, and the nascent stirrings of toleration. Although most areas of western Europe will be dealt with, the focus will be on Italy, France, and German.

CROSSLISTED: HIST 3006

RELS 3282 Christian Beginnings: Catholicism

CREDIT HOURS: 3

This course will consider the formation of Catholicism (Latin Christianity) up to the 12th century in relation to the Greco-Roman context and the barbarian invasions. Moving from North Africa to Western Europe, and using a combination of text, music and artistic, architectural, and archaeological evidence, it will examine the formation of doctrine and discipline in relation to schisms, heresies and Hellenic philosophy, the origin and developments of western monasticism, the papacy, church and state relations, and the construction of liturgy. A theme will be the interplay between the centrifugal and centripetal.

CROSSLISTED: CLAS 3282.03

EXCLUSIONS: CLAS 3280X/Y.06

FORMATS: Lecture | Discussion

RELS 3283 Gods in the Flesh: Iamblichus and Anselm

CREDIT HOURS: 3

This course presents two opposed arguments for the union of divinity with the sensuous and human ("incarnation") and looks at one instance of how they meet: Iamblichus, *On the Mysteries*, Anselm, *Why the God-man*, Bonaventure, *The Journey of the Mind into God*. We shall look at how these arguments bridge the pagan / Christian, philosophy/ theology/ religion, Orthodox / Catholic, and Greek / Latin divides.

CROSSLISTED: CLAS 3283.03

FORMATS: Lecture | Discussion

RELS 3371 The Augustinian Tradition

CREDIT HOURS: 3

same as Clas 3370

CROSSLISTED: CLAS 3371.03

EXCLUSIONS: CLAS 3370.03

FORMATS: Seminar

RELS 3381 Medieval Philosophy from Augustine to Anselm

CREDIT HOURS: 3

A study of texts, primarily within the Latin tradition from Augustine to Anselm, but including selected writings of the Pseudo-Dionysius. Three works will normally be read in their entirety: Boethius, *Consolation of Philosophy*; Dionysius, *Mystical Theology*; Anselm, *Proslogion*. The main interest is the use and transformation of the philosophy of Plato, Aristotle, the Stoics and the Neoplatonists in this development.

CROSSLISTED: CLAS 3381, PHIL 2381

FORMATS: Lecture

RELS 3382 Medieval Philosophy from Arabic and Jewish Thinkers to Aquinas

CREDIT HOURS: 3

A study of texts which reflect the transformation of the ancient philosophical tradition within the works of medieval Arabic and Jewish thinkers and of the

Latin Christians to whom they mediated ancient philosophy. Selections from al-Farabi, Moses Maimonides, Averroes, and Aquinas, among others will be read. Bonaventure's *The Mind's Journey into God* will be read in its entirety.
CROSSLISTED: CLAS 3382, PHIL 2382

RELS 3413 Augustine's Confessions

CREDIT HOURS: 3

A study of the 13 books of Augustine's Confessions.

CROSSLISTED: CLAS 3413.03

EXCLUSIONS: CLAS 3410.06; CLAS 3411.03; CLAS 3412.03; RELS 3410.06; RELS 3411.03; RELS 3412.03

RELS 3431 St. Augustines On the Trinity Part I

CREDIT HOURS: 3

A study of Books 1-7 of Augustine's *De Trinitate*, in which he establishes what is the orthodox teaching about God through scripture and a consideration of the categories of substance, relation and act.

CROSSLISTED: CLAS 3431.03

RELS 3432 St. Augustine's On the Trinity Part 2

CREDIT HOURS: 3

A study of Books 8-15 of Augustine's *De Trinitate*, in which he attempts to understand what has been shown in the first 7 books (the orthodox teaching about God through Scripture and a consideration of the categories of substance, relation and act) through the distinction of *scientia* and *sapientia*.

CROSSLISTED: CLAS 3432.03

FORMATS: Seminar

RELS 3508 From Lahore to Hyderabad: History of Persian Culture in South Asia, 1000-1800

CREDIT HOURS: 3

This class focuses on the history of South Asia during the medieval and early modern periods (1000-1700), with an emphasis on the various Muslim sultanates and kingdoms which dominated much of the subcontinent. Traditional narratives have historically emphasized the spread of Islamic culture by Turkish dynasties to compete with 'indigenous' Hindu, Jain, and Buddhist cultures. However, recent scholarship has highlighted the idea of a "Persian cosmopolis" wherein Muslim culture in South Asia was especially enamoured with Persian culture and systems of literature, religious thought and philosophy which were better recognized and understood as "Perso-Islamic". This class purports to examine the history of South Asia with such priorities in mind. In addition to political narratives, the class will be dedicated to introducing and discussing important Indo-Persian texts which were produced in this "Persian cosmopolis" which shaped so much of western and south Asia in the medieval period.

CROSSLISTED: HIST 3508

FORMATS: Lecture

RELS 3510 Islamicate Empires, 1300-1700: The Ottomans and Safavids

CREDIT HOURS: 3

Until the devastating Mongol invasions of the 13th century, the principal centers of Islamic power, culture, and thought had been based in Cairo and Baghdad. This course will examine the post-Mongol Islamic world, and how politics and religion were irrevocably changed with the annihilation of the Sunni `Abbasid caliphate. Religious heterodoxy, combined with the power vacuum left by Chingiz Khan and his descendents, allowed for the emergence of a number of unique Turkmen states in Western Asia, the most famous being the Ottoman Turks of Anatolia. By 1500, innovations in military technology and the paper-making industry allowed for the emergence of centralized and bureaucratically-sophisticated 'gunpowder' empires in western and south Asia. This course will discuss the three most significant of these: the Ottoman Turks (based in Istanbul), the Safavid Persians (based in Isfahan), and the Mughal Indians (based in Delhi). Areas of focus will include: issues of political legitimacy, use of military 'slave' corps, orthodox and popular religious movements, tensions between nomadic and sedentary segments of society, innovations in cultural expression (poetry, art, architecture), scientific and philosophical development, and the penetration and impact of the Portuguese, English, Dutch, and French 'world economies' into Asia and the Indian Ocean. This course will also examine different debates regarding the 'decline of the East', and introduce the theoretical implications of how the Islamic world is approached by contemporary scholarship.

CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

PREREQUISITES: HIST 2501.03 or 2502.03 or 2503.03

CROSSLISTED: HIST 3510.03

FORMATS: Lecture | Discussion

RELS 3600 Sanskrit Texts I: Narrative and Epic Selections

CREDIT HOURS: 3

This course provides a transition from first-year Sanskrit grammar to the reading of simple Sanskrit texts in their original form. In the first weeks, the materials selected for reading will be examined slowly and thoroughly as a means of introducing key aspects of grammar not covered in the first year. Students thus will be equipped with the tools for independent reading of simple narrative and epic sources such as the Pañcatantra, Hitopadesa, Kathasaritsagara, Mahabharata, Harivamsa, and Ramayana.

PREREQUISITES: Both RELS 1600.03 and RELS 2600.03, or both CLAS 1600.03 and CLAS 2600.03

CROSSLISTED: CLAS 3600.03

FORMATS: Other (explain in comments)

RELS 3610 Studies in Ancient and Medieval Science

CREDIT HOURS: 3

Topics vary each year. Some of the topics are "Causation", "History of dissection", "Mesopotamian science", "Sciences and cultures in antiquity", "The mangle of praxis", "Ptolemy", "Ancient Method", "Embryology", "Posterior analytics", etc. For descriptions of the current year's studies topics, please contact the History of Science and Technology Programs.

CALENDAR NOTES: Not more than two studies courses (one full credit) and no more than one of each course number, can be taken for credit towards the History of Science and Technology Program.

CROSSLISTED: HSTC 3610.03

FORMATS: Lecture | Discussion

RELS 3661 The Epicureans

CREDIT HOURS: 3

A study of philosophy in the Hellenistic Age. We will investigate the development of Greek and Roman philosophy after Aristotle, focusing on Epicureanism. The course covers the logic, physics, and ethics of Epicurus' school, as well as its religious dimension.

PREREQUISITES: CLAS 2361.03 and 2362.03 or permission of instructor

CROSSLISTED: CLAS 3661.03

FORMATS: Seminar

RELS 3662 Hellenistic Philosophy: From Scepticism to Neoplatonism

CREDIT HOURS: 3

A study of philosophy in the Hellenistic Age. We will investigate the development of Greek and Roman Philosophy, focusing on Pyrrhonian and Academic Scepticism, as well as Middle Platonism. The course covers the logic, physics, and ethics of these philosophical schools, as well as their religious dimension.

PREREQUISITES: CLAS 2361.03 and 2362.03 or permission of instructor

CROSSLISTED: CLAS 3662.03

EXCLUSIONS: RELS 4602.03, CLAS 4602.03

RELS 3850 The End of the World: The Apocalypse in German Thought

CREDIT HOURS: 3

The war, death and destruction that define European history in the 20th century can only begin to explain the obsession with the apocalypse in contemporary German thought. In this seminar we will study the secular appropriation of apocalyptic imagery from the Judeo-Christian tradition. The seminar will be conducted in English. All readings will be in English.

CROSSLISTED: GERM 3850.03

RESTRICTIONS: Restricted to students in second year or above

FORMATS: Lecture | Discussion

RELS 3910 Neoplatonism: Plato and Neoplatonism

CREDIT HOURS: 6

The philosophy of Plotinus and later thinkers considered as the resume of Greek Philosophy; in particular the role of Plato and other older philosophers in the formation of Neoplatonism is a principal interest.

CROSSLISTED: CLAS 3910.06

RELS 4010 Islamic Philosophy: al-Ghazali

CREDIT HOURS: 3

Abu Hamid al-Ghazali (1058-1111) is one of the greatest Muslim thinkers of all time. This course is an introduction to his thought, focusing on al-Ghazali's "two-tier" approach to theology – exoteric theology for the masses and esoteric theology for the select few – and on his attitude to Islamic philosophy and Islamic mysticism (Sufism).

PREREQUISITES: At least one of RELS 1002, RELS 2003.03, Foundation Year Program, or permission of instructor.

CROSSLISTED: CLAS 4010.03, CLAS 5817.03

FORMATS: Seminar

RELS 4011 Jewish Philosophy: Maimonides

CREDIT HOURS: 3

Moses Maimonides (1135-1204) is one of the greatest Jewish thinkers of all time. This course is an introduction to his philosophical and legal writings, with special emphasis on his famous treatise *The Guide of the Perplexed*. Maimonides' stance on such issues as God's incorporeality, creation, and prophecy will be compared to that of other varieties of Judaism.

PREREQUISITES: Students must have completed 5 full credits of university study and RELS 2001.03 or RELS 3382.03/CLAS 3382.03/PHIL 2382.03, or permission of the instructor

CROSSLISTED: CLAS 4011.03

FORMATS: Lecture | Seminar

RELS 4018 Christian Theology in Islamic Lands: John of Damascus

CREDIT HOURS: 3

John of Damascus (d. 749) is one of the greatest Christian theologians of the Patristic age. Though he wrote in Greek, he was probably a Christian Arab (his Arabic name is Mansur ibn Sarjun), who lived under Muslim rule and was employed as a public official in the Umayyad administration in Damascus. The course will focus on his theological works (especially his summa of Christian theology, entitled *On the Orthodox Faith*, and his three treatises in defence of the icons), their Christian sources, and their Islamic context.

PREREQUISITES: At least one of: RELS 1002.03, RELS 2003.03, RELS 2281.03, RELS 3009.03, RELS 3282.03, foundation year program, or permission of the instructor

CROSSLISTED: CLAS 4018.03

FORMATS: Seminar

RELS 4019 Philo Judaeus: Philosophical Religion: Plato and Moses

CREDIT HOURS: 3

Reconciling Jewish Scripture and Plato, Philo culminates Second Temple Jewish thought and founds the Christian treatment of Scripture. He is the most influential Jewish theologian and presents the High Priest as priest of the cosmos so he is crucial both to understand our past and to carry us into the future.

PREREQUISITES: At least one course at the second year or above in CLAS or RELS

CROSSLISTED: CLAS 4019.03

FORMATS: Seminar

RELS 4060 The Consolation of Philosophy

CREDIT HOURS: 3

Boethius's *Consolation* is a strange example of Menippean satire, which is itself a strange genre. This class will consider the poetry, the prose and, most significantly, how these elements are combined in order to achieve the goal of the work, which is to offer consolation to the reader.

PREREQUISITES: Three years of undergraduate Latin or the permission of the instructor

CROSSLISTED: CLAS 4060

FORMATS: Seminar

RELS 4401 Philosophy of the Greek Church Fathers

CREDIT HOURS: 3

This seminar involves the detailed study of a text, or group of texts, from one or more of the Greek Church Fathers. The choice of text varies from year to year, in relation to the needs and interests of students.

PREREQUISITES: At least one of RELS 1002.03, RELS 3283.03, , RELS 3009.03, RELS 3282.03, Foundation Year Program, or permission of instructor.

CROSSLISTED: CLAS 4401.03

EXCLUSIONS: CLAS 4400X/Y.06

FORMATS: Seminar

RELS 4402 Philosophy of the Latin Church Fathers

CREDIT HOURS: 3

This seminar involves the detailed study of a text, or group of texts, from one or more of the Latin Church Fathers. The choice of text varies from year to year, in relation to the needs and interests of students.

PREREQUISITES: At least one of RELS 1002.03, , RELS 3009.03, RELS 3282.03, RELS 3283.03, Foundation Year Program, or permission of instructor.

CROSSLISTED: CLAS 4402.03

EXCLUSIONS: CLAS 4400X/Y.06

FORMATS: Seminar

RELS 4450 Medieval Interpreters of Aristotle

CREDIT HOURS: 6

The course considers Latin philosophical texts of the Middle Ages. Given alternately with CLAS 4500X/Y.06.

CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

CROSSLISTED: CLAS 4450.06

FORMATS: Seminar

RELS 4451 Medieval Interpreters of Aristotle

CREDIT HOURS: 3

This course normally focuses on a single philosophical text by a Latin author of the Middle Ages whose work is engaged with Aristotle and the Greek and Latin commentary traditions.

CROSSLISTED: CLAS 4451

EXCLUSIONS: CLAS 4450X/Y.06; RELS 4450X/Y.06

FORMATS: Seminar

RELS 4500 Seminar on Neoplatonism

CREDIT HOURS: 6

The course considers the origin and nature of Greek Neoplatonism. Given alternately with CLAS 4450X/Y.06.

CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

CROSSLISTED: CLAS 4500

FORMATS: Seminar

RELS 4501 Seminar on Neoplatonism I

CREDIT HOURS: 3

This course considers major texts in the history of Neoplatonism. Normally a single text is chosen from the works of authors from Plotinus to Cusa.

CROSSLISTED: CLAS 4501.03

EXCLUSIONS: CLAS 4500.03, RELS 4500.03

FORMATS: Lecture

RELS 4502 Seminar on Neoplatonism II

CREDIT HOURS: 3

This course considers major texts in the history of Neoplatonism. Normally a single text is chosen from the works of authors from Plotinus to Cusa.

CROSSLISTED: CLAS 4502.03

EXCLUSIONS: RELS 4500.06; CLAS 4500.06

RELS 4577 Books of Wonder, Tales of Amazement: Travel, Fantasy, and Cosmography in the Islamicate Lands, 800-1700

CREDIT HOURS: 3

This class is dedicated to examining how peoples of the Islamicate lands (primarily Muslims, but also including Jews and Christians) interacted with and represented foreign societies and associated myths and legends during the medieval and early modern period. While travel accounts will represent part of the primary source material for this course, students will also be introduced to "wonder books", cosmographical texts which represented the world with a fantastical and supernatural focus. These original texts were written in Arabic, Persian and Ottoman Turkish, but all class material will be translated into English.

CROSSLISTED: HIST 4577

FORMATS: Seminar

RELS 4600 Sanskrit Texts II: Poetry and Drama

CREDIT HOURS: 3

This course continues from RELS/CLAS 3600 the reading of Sanskrit texts in their original form, introducing students to the elemental features and conventions of kavya or courtly poetry and drama. Students will work through short selections of representative works (e.g. Kalidasa, Harsha, Vidyakara, etc.), emphasizing thorough mastery of smaller and representative samples over quantity or exhaustive coverage of entire works.

Introduction

The Russian Studies Department offers courses in Russian language, literature, culture and history. Since Russia plays a crucial role in today's world and makes important contributions in a wide variety of scientific, technical, and humanistic fields, knowledge of its linguistic and cultural backgrounds can prove advantageous in many areas of study. Recent radical shifts in the country have significantly widened opportunities for using Russian in business, law, science, and government.

In the language courses emphasis is placed on gaining a thorough grasp of Russian grammar combined with practical competence in speaking, listening, reading, and writing. Sections are small and intensive. Classroom work is supplemented by computerized audio-visual materials. Study of Russian literature begins with a general survey intended for first or second year students, followed by monograph, period, and genre courses. Literature courses are generally offered in both English and Russian in order to give as many students as possible from other disciplines the opportunity to become acquainted with this important part of Russian life.

Courses in Russian culture and civilization are intended to introduce students to art, architecture, music, religion, and other areas of Russian life which are necessary to understand the language and literature. Films, guest speakers, and evenings of Russian poetry are scheduled periodically. The Dalhousie Association of Russian Students organizes a variety of events throughout the year.

Major or honours students may, with the approval of the Russian Studies Department, take up to one semester (15 credit hours) of work at a university in Russia and receive credit at Dalhousie. Qualified students are urged to participate in the Intensive Russian Program, founded by Dalhousie, which enables Canadian students to study for a semester at St. Petersburg State University.

Degree Programs

Courses in the Russian Studies Department are open to students either (1) as electives in any degree program; (2) as constituents of a major or honours degree in Russian; or (3) with courses in another discipline forming part of a combined honours degree or double major; or (4) as a minor.

All Bachelor degree programs are governed by the general Requirements for Degrees set out in the University Calendar, in addition to the departmental requirements stated below. See [Degree Requirements](#) section.

Staff

Dean

Andrews, J. Hons BA (McGill), MA, PhD (University of Toronto)

Chair

Pifano, D., BA, MA, PhD (Ottawa)

Undergraduate Advisor

Vacant

Professor Emeritus

Pereira, N. G. O., BA (Williams), MA, PhD (UC Berkeley)

Professor

Leving, Y., BA, MA, PhD (Hebrew University)

BA Honours in Russian Studies

Students must meet the Faculty degree requirements which include a minimum of 54 and a maximum of 66 credit hours beyond the 1000 level in Russian Studies, including 18 credit hours beyond the 2000 level.

Departmental requirements

Departmental requirements

2000 level

- RUSN 2002.03: Intermediate Russian I
- RUSN 2003.03: Intermediate Russian II

Plus any other 12 credit hours at the 2000 level offered by the department.

3000 level

- RUSN 3002.03: Advanced Russian I
- RUSN 3003.03: Advanced Russian II

4000 level

- RUSN 4002.03: Structure of Contemporary Standard Russian I
- RUSN 4003.03: Structure of Contemporary Standard Russian II
- Honours Thesis (RUSN 4991.03: Special Topics I and RUSN 4992.03: Special Topics II)

Other required courses

- 18-30 additional credit hours at the 2000 level or above

Honours students are encouraged to take advantage of the opportunity to spend two months in St. Petersburg with the Russian Program Abroad following their second or third year of study, which is equivalent to 15 credit hours at the 3000 or 4000 level.

BA Combined Honours in Russian Studies

Students must meet the Faculty degree requirements which include a minimum of 66 and a maximum of 84 credit hours beyond the 1000 level in two allied subjects. A minimum of 30 and a maximum of 48 credit hours may be completed in each subject, including 18 credit hours beyond the 2000 level in each.

Departmental requirements

Russian Studies as first subject:

Departmental requirements

2000 level

- RUSN 2002.03: Intermediate Russian I
- RUSN 2003.03: Intermediate Russian II

Plus any other 6 credit hours at the 2000 level offered by the department.

3000 level

- RUSN 3002.03: Advanced Russian I

Russian Program Abroad in Saint Petersburg

Introduction

The Russian Program Abroad (the oldest of its kind in Canada), is an inter-disciplinary course of instruction which allows students to undertake an 8 week summer intensive study of the Russian language at St. Petersburg University. This program is offered to students who have successfully (mark of "B") completed one year of Russian or its equivalent.

If students from elsewhere wish to join the program, they may do so after successful completion of application requirements.

Courses at St. Petersburg State University

Students will be placed into one of the following levels based on their application and interview.

1. Elementary

- RUSN 2011.03: Grammar I
- RUSN 2012.03: Grammar II
- RUSN 2031.03: Conversation & Phonetics
- RUSN 2032.03: Translation

- RUSN 2035.03: Literature: Reading & Analysis

2. Intermediate

- RUSN 3011.03: Intermediate Grammar I
- RUSN 3012.03: Intermediate Grammar II
- RUSN 3031.03: Intermediate Conversation & Phonetics
- RUSN 3032.03: Intermediate Translation
- RUSN 3035.03: Intermediate Literature: Reading & Analysis

3. Advanced

- RUSN 4011.03: Advanced Grammar I
- RUSN 4012.03: Advanced Grammar II
- RUSN 4031.03: Advanced Conversation & Phonetics
- RUSN 4032.03: Advanced Translation
- RUSN 4035.03: Advanced Literature: Reading & Analysis

Russian Program in Tallinn, Estonia

This program allows students to undertake intensive study of the Russian language during a summer term at the Tallinn University of Estonia.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions

RUSN 1000 Elementary Russian

CREDIT HOURS: 6

For students who have little or no previous knowledge of the Russian language. Equal emphasis is placed on developing oral, listening, and reading skills with a sound grammatical basis. May be offered in a traditional classroom setting or online.

CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

EXCLUSIONS: RUSN 1002.03, RUSN 1003.03

RUSN 1002 Elementary Russian I

CREDIT HOURS: 3

For students who have little or no previous knowledge of the Russian language. Equal emphasis is placed on developing oral, listening, and reading skills with a sound grammatical basis. May be offered in a traditional classroom setting or online.

EXCLUSIONS: RUSN 1000X/Y.06

EXCLUSIONS: RUSN 2001.06

RUSN 2022 Imperial Russia

CREDIT HOURS: 3

Chronologically covers the imperial period of Russian history, from Peter the Great to the Revolution of 1917.

CROSSLISTED: HIST 2022.03

EXCLUSIONS: HIST 2020.06, RUSN 2021.06

FORMATS: Lecture | Discussion

RUSN 2023 Soviet Russia

CREDIT HOURS: 3

Survey of Soviet Russia from 1917 to the present. Topics discussed will include the Revolution of 1917, the Civil War and War Communism, NEP, Collectivization, the Great Purges, WWII, and the Post-Stalin era.

CROSSLISTED: HIST 2021.03

EXCLUSIONS: HIST 2020.06 or RUSN 2021.06

FORMATS: Lecture | Discussion

RUSN 2029 Conversation

CREDIT HOURS: 3

Development of conversation skills and vocabulary building

COREQUISITES: RUSN 2002.03 or 2003.03 or instructor permission

RUSN 2034 Soviet Science and Techno Utopia

CREDIT HOURS: 3

Conducted in English. An overview of the history of Russian natural science from the foundation of the Russian Academy of Sciences during the reign of Peter the Great to modern times.

FORMATS: Lecture | Discussion

RUSN 2036 Russian Film I

CREDIT HOURS: 3

This course surveys Russian film from the Silent Era to "Thaw" (1900-1960s). Its goal is to develop students' knowledge of cinema in its historical and cultural context through critical watching, reading, thinking, and writing. The course will concentrate on the development of main genres and styles in Russian and official Soviet cinema, major directors and styles. Full versions of films will be screened each Monday night. Later in the week they will be followed by a lecture, discussion, and viewing additional short clips.

CROSSLISTED: THEA 2336.03, FILM 2336.03

FORMATS: Lecture | Discussion

RUSN 2037 Russian Film II

CREDIT HOURS: 3

This course will provide an overview of the most significant trends and periods in the development of Russian cinema since the 1960s until the latest blockbusters. The course will concentrate on the development of main genres and styles, major directors and productions, issues of race, gender, war and violence in Soviet, post-Soviet and new Russian cinema.

CROSSLISTED: THEA 2337.03, FILM 2337.03

FORMATS: Lecture | Discussion

RUSN 2043 How iRead the Eye-Books: Film and Multimedia Adaptations of World Literature

CREDIT HOURS: 3

In this course, we will be reading and watching the world adaptations of international literary classics and popular contemporary works. From analyzing the art of comic strips and Superman sagas to e-books designed for iPads and Android mobile devices, during the semester students will learn to appreciate both the text and its visual renderings using theoretical frameworks of adaptation and textual fidelity, as well as will have an opportunity to practice their skills in the art of film-making and constructing an eBook.

CROSSLISTED: THEA 2043.03, FILM 2043.03, ENGL 2043.03

EXCLUSIONS: RUSN 2045.06, ENGL 2045.06, THEA 2347.06

FORMATS: Lecture

RUSN 2044 How iRead the Eye-Books: Film Adaptations of World Literature II

CREDIT HOURS: 3

In this course, we will be reading and watching the world adaptations of international literary classics and popular contemporary works. From analyzing the art of comic strips and Superman sagas to e-books designed for iPads and Android mobile devices, during the semester students will learn to appreciate both the text and its visual renderings using theoretical frameworks of adaptation and textual fidelity, as well as will have an opportunity to practice their skills in the art of film-making and constructing an eBook.

CROSSLISTED: THEA 2044.03, ENGL 2044.03

EXCLUSIONS: RUSN 2045.06, THEA 2347.06, ENGL 2045.06

FORMATS: Lecture | Discussion

RUSN 2046 East European Cinema: War, Love, and Revolutions

CREDIT HOURS: 3

This course brings post-Berlin Wall European film into the fray of current debates on cultural identity, transnational cinema, and postcolonialism. Despite the state control, the filmmakers of communist Europe were often more bold, honest and provocative than their profit-driven Hollywood counterparts. By drawing on political, cultural, and philosophical discourses, the course will offer pointed analyses of most significant East European films that touch upon issues of ethnicity, gender, and overcoming censorship.

CROSSLISTED: THEA 2346.03, FILM 2346.03

FORMATS: Lecture | Discussion

RUSN 2051 Survey of Russian Literature I

CREDIT HOURS: 3

Conducted in English with section in Russian for majors. Required for majors and honours candidates. An overview of Russian literature from its beginnings through Tolstoy.

EXCLUSIONS: RUSN 2050.06

FORMATS: Lecture | Discussion

RUSN 2052 Masterpieces of Twentieth-Century Russian Literature

CREDIT HOURS: 3

Conducted in English with section in Russian for majors. Required for majors and honours candidates. An overview of Russian literature from Chekhov to the present.

EXCLUSIONS: RUSN 2050.06

FORMATS: Lecture | Discussion

RUSN 2061 Russian Modernism

CREDIT HOURS: 3

Conducted in English. A study of trends in literature and the arts at the turn of the century. Known as “The Silver Age”, this is one of the most innovative and dynamic periods in Russian culture.

EXCLUSIONS: RUSN 2340.03

FORMATS: Lecture | Discussion

RUSN 2062 Literature of Revolution - The 1920s in Russian Literature

CREDIT HOURS: 3

Conducted in English. A study of experiment and submission during one of the most exciting, diverse, and frustrating periods in Russian letters. “Socialist realism” was not yet official doctrine; innovation in literature was tolerated. Writers openly pondered the role of the individual and culture in the new collective society.

EXCLUSIONS: RUSN 3250.03

FORMATS: Lecture | Discussion

RUSN 2070 Russian Literature and Culture since Stalin's Death

CREDIT HOURS: 3

Conducted in English. The literary and cultural history of Russia after Stalin's death in 1953. Among the major issues considered are the significance of Stalin's death, the “Thaw” and de-Stalinization, samizdat and literature since glasnost.

FORMATS: Lecture | Discussion

RUSN 2081 Contemporary Russian Culture - The Seven Deadly Sins

CREDIT HOURS: 3

Conducted in English. The fall of the Soviet Union has allowed a deluge of once 'sinful' excesses, all of which define Russia's accelerated processes of multiculturalism. This course investigates such 'sins' in the following order: pride, covetousness, lust, anger, gluttony, envy and sloth.

RUSN 2091 Madness and Madmen in Russian Culture

CREDIT HOURS: 3

This course will examine intellectual developments in modern Russia, from Peter the Great to the late 20th century. Among the possible topics we will cover are: Russian thought and the West, the Russian intelligentsia and its relationship with the people and the state, Russian Orientalism, the roles of literature, arts, and media in Russian politics and society, the nature of dissent and revolutionary movements, as well as the functions of historical memory in Russian thought and culture. Throughout the course we will approach Russia as a multinational country that developed in constant and close interaction with the outside world.

PREREQUISITES: Some Russian history required; Recommended are HIST 2021.03 or HIST 2022.03.

CROSSLISTED: HIST 3030.03

FORMATS: Lecture | Discussion

RUSN 2151 Witches & Devils: Russian Fairy Tales

CREDIT HOURS: 3

Conducted in English. A broad survey of traditional Russian popular beliefs and practices: proverbs, riddles, and counting rhymes; the rites and rituals of the Russian agricultural year; fairy tales and epic poems (byline); reconstruction of the Slavic pantheon and its evolution.

RUSN 2191 The Enacted Thought: Performance Theories from Russia and Europe

CREDIT HOURS: 3

Conducted in English with a section in Russian for majors. An overview of Russian writing for the theatre, with emphasis on the nineteenth and twentieth centuries.

FORMATS: Lecture | Discussion

RUSN 2270 The Russian “Heroine”

CREDIT HOURS: 3

Conducted in English. The strong spiritual and moral force which Russian women have exerted on their society is richly reflected in literature. The course focuses on the portrayal of several literary heroines and discusses their impact on both the literary imagination and society.

FORMATS: Lecture | Discussion

RUSN 2500 Tolstoy

CREDIT HOURS: 3

Conducted in English. An introduction to the work of this enigmatic spiritual giant of Russian literature. Reading includes *War and Peace*, *Anna Karenina*, and *Resurrection*.

FORMATS: Lecture | Discussion

RUSN 2550 Russian and Eastern European Science Fiction

CREDIT HOURS: 3

This course will provide an introduction to science fiction in the Russian and Eastern European context. Emphasis on the origins from fantastic elements of Russian literature, utopian, socialist, and dystopian impulses, as well as the post-Soviet experience as apocalypse. Authors will include: Gogol, Zamyatin, Capek, Bulgakov, the Strugatskys, Lem, Pelevin.

FORMATS: Lecture | Discussion

RUSN 2750 Dostoevsky and the Russian Idea

CREDIT HOURS: 3

Conducted in English. Dostoevsky's novels are of the highest importance in understanding the fate of Russia and the thoughts of other great Russian authors and thinkers. *Crime and Punishment* and *The Brothers Karamazov* are taken as the basis for discussion. The works of I. Turgenev and Lev Tolstoy are discussed together with the ideas of such great Russian philosophers as V. Solovyev and N. Berdyaev.

FORMATS: Lecture | Discussion

RUSN 2760 Dostoevsky and Western Literature

CREDIT HOURS: 3

Conducted in English. With all his love for Russia, Dostoevsky treasured the West and its literature. It is impossible to understand Dostoevsky and his main novels, including *The Idiot* and *The Devils* without *Hamlet* by Shakespeare, *Don Quixote* by Cervantes, *Faust* by Goethe, some plays by F. Schiller, etc. The course traces the influence of Western ideas on Dostoevsky and his influence on such Western thinkers as Nietzsche and Freud.

FORMATS: Lecture | Discussion

RUSN 3002 Advanced Russian I

CREDIT HOURS: 3

Conducted in Russian. Following a thorough review, this course concentrates on expanding all aspects of the student's knowledge of Russian grammar. Texts are read extensively and intensively. Discussion and compositions are based on the assigned readings.

PREREQUISITES: RUSN 2001.06 or RUSN 2003.03 or instructor permission

EXCLUSIONS: RUSN 3000.06

FORMATS: Lecture | Discussion

RUSN 3003 Advanced Russian II

CREDIT HOURS: 3

As a continuation of RUSN 3002.03, students will continue to expand on all aspects of their knowledge of Russian grammar. Texts are read extensively and intensively. Discussion and compositions are based on the assigned readings.

PREREQUISITES: RUSN 3002.03 or permission of the instructor
EXCLUSIONS: RUSN 3000.06
FORMATS: Lecture | Discussion

RUSN 3004 Intensive Advanced Russian

CREDIT HOURS: 6

RUSN 3004 is a six-credit hour Russian language course offered in one term. It is conducted in Russian. Following a thorough review, this course concentrates on expanding all aspects of the student's knowledge of Russian grammar. Texts are read extensively and intensively. Discussion and compositions are based on the assigned readings.

PREREQUISITES: RUSN 2001.06 or RUSN 2003.03 or instructor permission

EXCLUSIONS: RUSN 3002.03 and RUSN 3003.03

FORMATS: Lecture | Discussion

RUSN 3011 Intermediate Grammar I

CREDIT HOURS: 3

Intensive study of the finer points of Russian grammar. Topics include verbs of motion, aspect, impersonal constructions, government and agreement, and other themes. Language of instruction is Russian. This class is only offered as part of the Russian Program Abroad at St. Petersburg State University.

EXCLUSIONS: RUSN 3010.06

RUSN 3012 Intermediate Grammar II

CREDIT HOURS: 3

Continuation of RUSN 3011.03. Language of instruction is Russian. This class is only offered as part of the Russian Program Abroad at St. Petersburg State University.

EXCLUSIONS: RUSN 3010.06

RUSN 3029 Conversation

CREDIT HOURS: 3

Development of conversational skills and vocabulary building.

COREQUISITES: RUSN 3002.03 or RUSN 3003.03 or instructor permission

EXCLUSIONS: RUSN 3010.06

CREDIT HOURS: 3

Systematic development of conversational ability on everyday themes: transport, city services, theatre, sport, shopping, the library, the educational system, the structure of the government, etc. Language of instruction is Russian. This class is only offered as part of the Russian Program Abroad at St. Petersburg State University.

RUSN 3032 Intermediate Translation

CREDIT HOURS: 3

Work on translation of literary, business and journalistic texts. Language of instruction is Russian. This class is only offered as part of the Russian Program Abroad at St. Petersburg State University.

RUSN 3035 Intermediate Literature: Reading and Analysis

CREDIT HOURS: 3

Reading and analysis of literary texts. Language of instruction is Russian. This class is only offered as part of the Russian Program Abroad at St. Petersburg State University.

RUSN 3060 Special Topics

CREDIT HOURS: 3

The subject of this course -- generally devoted to contemporary Russia and the former Soviet Union -- varies from year to year, depending on shifts in current events in the region or the presence of visiting scholars with particular areas of expertise. Since the topics covered in this course may differ from year to year, students should seek further information from the Department of Russian Studies.

RUSN 3090 Russian Society

CREDIT HOURS: 3

Basic institutions of Russian society are considered in their historical context, with special attention to the role of official culture and literature, the workings of the economy, and social stratification.

CALENDAR NOTES: RECOMMENDED: RUSN 2022.03/2023.03 or HIST 2021.03/2022.03

CROSSLISTED: HIST 3090.03

EXCLUSIONS: HIST 5090.03

FORMATS: Seminar

RUSN 3092 Russian Topics

CREDIT HOURS: 3

Topics to be studied and researched will vary from year to year. They may include the sources of Bolshevism/Leninism, the doctrine of peaceful coexistence, the position of national minorities, the role of literature (official and samizdat) and the press, the Cult of Personality, Khrushchev's "Thaw", Brezhnev, Gorbachev, and Yeltsin.

CALENDAR NOTES: RECOMMENDED: RUSN 2022.03/2023.03 or HIST 2021.03/2022.03

CROSSLISTED: HIST 3092.03

FORMATS: Seminar

RUSN 3096 The History of Ideas in Russia: From Official Nationality to Solzhenitsyn's Neo-Slavophilism

CREDIT HOURS: 3

This course examines some of the main currents in Russian intellectual history from the middle of the nineteenth century through the 1990s. Topics include classical Slavophilism and early Westernism, Populism and Nihilism, Anarchism, Marxism, Leninism, Socialist Realism, anti-Stalinism, Glasnost, neo-Westernism (Sakharov), and neo-Slavophilism (Solzhenitsyn).

CALENDAR NOTES: RECOMMENDED: RUSN 2022.03/2023.03 or HIST 2021.03/2022.03

CROSSLISTED: HIST 3096.03

FORMATS: Lecture | Discussion

RUSN 3102 Black Identity in Pushkin (Russian)

CREDIT HOURS: 3

Conducted in Russian. A close study of the poetry and prose of the father of Russian literature, Aleksandr Sergeevich Pushkin, needs to be grounded in the centrality of his Black Identity for his life and *oeuvre*. Pushkin's unfinished work *Arap Petra Velikogo* serves as the window illuminating his artistic genius and struggle for a mode of expression for his own identity. The silences which shroud Pushkin's blackness are probed to reveal their ideological, historical, legal and human significance, which are then critically assessed. The major narrative and lyric poems, *Eugene Onegin*, the *Little Tragedies*, *Boris Godunov*, the *Tales of Belkin*, the *Queen of Spades*, as well as Pushkin's letters and critical works are revisited in this new light. Students will explore such themes as marginalization, liberty, prescience, aesthetic innovation, and the poet as political symbol and creator of a new literary language. Restoring Pushkin's identity to its proper place is a condition -- *sine qua non*-- for understanding the true meaning of his work for modern literature and its ongoing influence on world culture.

PREREQUISITES: RUSN 2003.03

EXCLUSIONS: RUSN 2100.03

FORMATS: Lecture | Discussion

RUSN 3103 Black Identity in Pushkin (English)

CREDIT HOURS: 3

Conducted in English. A close study of the poetry and prose of the father of Russian literature, Aleksandr Sergeevich Pushkin, needs to be grounded in the centrality of his Black Identity for his life and *oeuvre*. Pushkin's unfinished work *Arap Petra Velikogo* serves as the window illuminating his artistic genius and struggle for a mode of expression for his own identity. The silences which shroud Pushkin's blackness are probed to reveal their ideological, historical, legal and human significance, which are then critically assessed. The major narrative and lyric poems, *Eugene Onegin*, the *Little Tragedies*, *Boris Godunov*, the *Tales of Belkin*, the *Queen of Spades*, as well as Pushkin's letters and critical works are revisited in this new light. Students will explore such themes as marginalization, liberty, prescience, aesthetic innovation, and the poet as political symbol and creator of a new literary language. Restoring Pushkin's identity to its proper place is a condition -- *sine qua non* -- for understanding the true meaning of his work for modern literature and its ongoing influence on world culture.

FORMATS: Seminar

RUSN 3121 19th Century Russian Prose and Poetry

CREDIT HOURS: 3

Conducted in Russian. Students read, translate, and critically interpret representative works of the nineteenth century. Original texts are supplied with vocabularies and grammatical notes.

PREREQUISITES: RUSN 2003.03

EXCLUSIONS: RUSN 3120.03

FORMATS: Lecture | Discussion

RUSN 3122 20th Century Russian Prose and Poetry

CREDIT HOURS: 3

Conducted in Russian. Students read, translate, and critically interpret representative works of the twentieth century. Original texts are supplied with vocabularies and grammatical notes.

PREREQUISITES: RUSN 2003.03

EXCLUSIONS: RUSN 3120.03

FORMATS: Lecture | Discussion

RUSN 3200 Beats and Notes: Russian Music from Baroque to Rock

CREDIT HOURS: 3

Designed for the interested listener who wants to learn about the target culture through its melodic legacy, the course will consider the history of Russian music from its origin to the present day. This course is for non-music majors. Knowledge of musical notation and terminology is not a prerequisite. Knowledge of Russian language is not required, but those with the basic command will be given an option of completing special assignments.

CROSSLISTED: MUSC 3200.03

FORMATS: Lecture | Discussion

RUSN 3330 Masterpieces of Russian Short Fiction

CREDIT HOURS: 3

In-depth analysis of selected masterpieces of Russian nineteenth and twentieth century short fiction, including works by Pushkin, Lermontov, Gogol, Tolstoy, Sologub, Chekhov, Bunin, Nabokov, Krzhizhanovsky, Bulgakov, Babel, Zoshchenko, Kharms, Eppel, Dovlatov, Pelevin, and Sorokin.

FORMATS: Lecture | Discussion

RUSN 3520 Chekhov and Turgenev

CREDIT HOURS: 3

Conducted in English. Close analysis and discussion of the major works of Turgenev, sensitive portrayer of socio-political and psychological issues of the second half of the nineteenth century in Russia, and Chekhov, unequalled short-story writer and radical innovator in modern theatre.

FORMATS: Lecture | Discussion

CREDIT HOURS: 3

Author of "Overcoat," "Nose," *Taras Bulba*, *Dead Souls*, Gogol has been proclaimed "a pathological liar and honest anatomist of the soul, jejune jokester and tragic poet, realist and fantast". An in-depth study of this major writer.

FORMATS: Lecture | Discussion

RUSN 3820 Nabokov

CREDIT HOURS: 3

A close study of selected works by consummate twentieth century prose stylist Vladimir Nabokov -- novelist, poet, critic and translator, author of the notorious *Lolita*.

CROSSLISTED: ENGL 3820.03

FORMATS: Lecture | Discussion

RUSN 4000 The Structure of Contemporary Standard Russian

CREDIT HOURS: 6

This course is offered in Russian. Required for honours candidates. Systematic study of the structure of Russian: analysis of special problems in phonology, morphology, syntax, and stylistics. Tailored to the individual needs of the student, with emphasis on practical applications of linguistic insights.

CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

PREREQUISITES: RUSN 3002.03 and 3003.03 or permission of the instructor

RUSN 4002 Structure of Contemporary Standard Russian I

CREDIT HOURS: 3

This course is offered in Russian. Required for honours candidates. Systematic study of the structure of Russian: analysis of special problems in phonology, morphology, syntax, and stylistics. Tailored to the individual needs of the student, with emphasis on practical applications of linguistic insights.

PREREQUISITES: RUSN 3003.03 or permission of the instructor

EXCLUSIONS: RUSN 4000.06

FORMATS: Lecture | Discussion

RUSN 4003 Structure of Contemporary Standard Russian II

CREDIT HOURS: 3

A continuation of RUSN 4002.03

PREREQUISITES: RUSN 4002.03

EXCLUSIONS: RUSN 4000.06

FORMATS: Lecture | Discussion

RUSN 4011 Advanced Grammar I

CREDIT HOURS: 3

Intensive study of the finer points of Russian grammar. Topics include verbs of motion, aspect, impersonal constructions, government and agreement, and other themes. Language of instruction is Russian. This class is only offered as part of the Russian Program Abroad at St. Petersburg State University.

FORMATS: Lecture

RUSN 4012 Advanced Grammar II

CREDIT HOURS: 3

Continuation of RUSN 4011.03. Language of instruction is Russian. This class is only offered as part of the Russian Program Abroad at St. Petersburg State University.

FORMATS: Lecture

RUSN 4031 Advanced Conversation & Phonetics

CREDIT HOURS: 3

Systematic development of conversational ability on everyday themes: transport, city services, theatre, sports, shopping the library, the educational system, the structure of the government, etc. Language of instruction is Russian. This class is only offered as part of the Russian Program Abroad at St. Petersburg State University.

FORMATS: Lecture

RUSN 4032 Advanced Translation

CREDIT HOURS: 3

Exercises in translation from Russian to English and from English to Russian using various media and excerpts from classical literature. Language of instruction is Russian. This class is only offered as part of the Russian Program Abroad at St. Petersburg State University.

FORMATS: Lecture

RUSN 4035 Advanced Literature: Reading & Analysis

CREDIT HOURS: 3

Reading and analysis of literary texts. Language of instruction is Russian. This class is only offered as part of the Russian Program Abroad at St. Petersburg State University.

FORMATS: Lecture

RUSN 4090 Soviet History Seminar

CREDIT HOURS: 3

This is an advanced seminar on the history of Soviet Russia from 1917 to 1991. We will explore the origins, mechanisms, costs, and outcome of perhaps the most ambitious and tragic historic experiment at creating a modern yet equitable society in a country far from conducive to such an undertaking.

CROSSLISTED: HIST 4090.03
FORMATS: Lecture

RUSN 4100 Artistic Petersburg

CREDIT HOURS: 3

St. Petersburg is one of Russia's most vibrant cities, credited as its key link to the West and modernism. It embodies political, social, and artistic history of Russia of the past three hundred years and gave birth to Russia's greatest writers, painters, and musicians. In this course we will be reading works by Dostoevsky, Bely, Blok, Akhmatova and Nabokov while visiting the homes where they were born and raised; we will be studying particular paintings by visiting museums of fine arts and getting first-hand knowledge about Russia's musical scene by attending the world-class operas and stage adaptations. Whenever possible we will arrange the "behind the scene" meetings with Russian artists to foster authentic dialogue and experience Russian culture as it is possible only in St. Petersburg.

PREREQUISITES: At least 1 year of Russian language studies

FORMATS: Lecture | Discussion

RUSN 4302 Russian Poetry

CREDIT HOURS: 3

Conducted in Russian. A combination of an introduction to the theory of poetry with close analysis of masterpieces of nineteenth and twentieth century Russian poetry chosen to fit the interests of the individual student.

PREREQUISITES: Permission of the instructor

FORMATS: Lecture | Discussion

RUSN 4851 Special Topics

CREDIT HOURS: 3

FORMATS: Lecture

RUSN 4950 Special Topics

CREDIT HOURS: 3

NOTE: Course Details listed here also apply to RUSN 4960/RUSN 4991/RUSN 4992.

PREREQUISITES: Permission of the Instructor

RUSN 4960 Special Topics

CREDIT HOURS: 3

See RUSN 4950.

RUSN 4991 Special Topics I

CREDIT HOURS: 3

See RUSN 4950.

CALENDAR NOTES: This course is the first part of the former full-year course RUSN 4990X/Y.06. This course description reflects the entirety of the pair (RUSN 4991.03 and RUSN 4992.03).

EXCLUSIONS: RUSN 4990X/Y.06

RUSN 4992 Special Topics II

CREDIT HOURS: 3

See RUSN 4950.

CALENDAR NOTES: This course is the second part of the former full-year course RUSN 4990X/Y.06. This course description reflects the entirety of the pair (RUSN 4991.03 and RUSN 4992.03).

Introduction

Dalhousie's Department of Sociology and Social Anthropology offers a unique program of research and teaching that is interdisciplinary, comparative, and critically engaged. We draw on the strengths of our two disciplines – Sociology and Social Anthropology – by recognizing their distinct intellectual and methodological heritages, while emphasizing how they complement each other.

Sociology and Social Anthropology provide a broad and rigorous academic training, which develops knowledge and research skills that can be translated to the job market, future studies, and everyday life.

Sociology

Sociology investigates social processes that are fundamental to how society works, but often invisible and misunderstood. It focuses on how relationships among people shape their experiences. It unpacks deterministic and egocentric understandings in order to offer better accounts of a wide range of pressing social issues, such as the environment, health, crime, inequality, immigration, transnationalism, identity, and social change. Sociology uses a wide range of evidence including interviews, historical sources, and even statistics. Sociological perspectives can be applied to multiple social contexts and scales, from the world all the way down to everyday interactions. Because the discipline challenges commonly held assumptions, sociologists are often on the cutting edge of contemporary debates.

Social Anthropology

Social Anthropology is unique in its global and comparative approach to cultural diversity in the contemporary world. Anthropology focuses on how people and groups shape and are shaped by broad forces of history, cultural symbols and beliefs, and social and political structures. We draw on the rich international anthropological heritage while also actively encouraging a continuous renewal of that tradition, its thoughts and practices. Often living with the communities of people studied for an extended period of time, anthropologists generate first-hand accounts of everyday life to see the world through their eyes. Along the way they discover both vast differences and deep similarities across the varied human experience. Thus, the perspectives anthropologists gain through long-term fieldwork prepare us to engage with people different from ourselves in this increasingly globalized world. Social Anthropology shows that another world and way of life is not only possible, but already exists.

Degree Programs

The Department's BA degree program is offered as a 90 credit hour minor or a 120 credit hour major in Sociology and Social Anthropology. The BA honours degree is offered through more specialized programs of study in Sociology or in Social Anthropology. Dalhousie graduates wishing to upgrade from a 90 credit hour minor may complete an additional 30 credit hours to be awarded the Major Conversion or the Honours Conversion. An honours degree is normally the required preparation for graduate study.

All Bachelors degree programs are governed by the general Requirements for Degrees set out in the University Calendar, in addition to the departmental requirements stated below. See [Degree Requirements](#) for complete details.

NOTE:

1. **No more than six credit hours may be obtained for introductory courses from SOSA 1500.06, SOSA 1002.03, SOSA 1003.03.**
2. For purposes of gaining entry to 2000 and 3000 level SOSA courses, King's Foundation Year satisfies the introductory course prerequisite.
3. If they so elect, King's Foundation Year students may also obtain credit for one introductory course from SOSA 1500.06, SOSA 1002.03 and SOSA 1003.03.

Tastsoglou, E., LLB (Kapodistrian), MA, PhD (Boston), LLM (Dalhousie)
Yoshida, Y., BA (Tsuda College), MA, PhD (McGill)

Concentrated Honours BA Program

The Department's honours programs are designed for students with an interest in, and demonstrated aptitude for, advanced study in either Sociology or Social Anthropology. Admission to these programs is based solely on academic performance. More specifically, the Department requires a grade average of B+ (3.30) or higher on courses above 1000 in SOSA and the minor (or second major) subject. In addition, a minimum cumulative GPA of 2.70 is required. Potential applicants should consult with one of the Department's Undergraduate Advisors, preferably during their second year of study, and should plan to take the 3000 level courses required for honours during their third year. The Advisor will assist the student to design a program of study with a minor in Social Anthropology or Sociology meeting the general Faculty requirements and the specific requirements for each program as set out below. It is important that students have a strong foundation before undertaking the honours thesis, therefore the sociology 2000 bundle (*SOSA 2007 Thinking Sociologically* along with *SOSA 2008 Doing Sociology*) or the social anthropology 2000 bundle (*SOSA 2012 Thinking through Anthropology* along with *SOSA 2013 Anthropology in Practice*), and two of the required 3000 level courses are pre-requisites to the departmental Honours Seminar ([SOSA 4101.03](#) and [SOSA 4102.03](#) or [SOSA 4105.03](#) and 4106.03)

This fulfills the College of Arts and Science Honours Qualifying Examination requirement. Students with the honours concentration in Sociology may not declare Social Anthropology as their secondary subject; students with the honours concentration Social Anthropology may not declare Sociology as their secondary subject.

Departmental Requirements

Courses required in Concentrated Honours in Social Anthropology:

1000 level

- One 1000 level SOSA class or King's Foundation Year Program

2000 level

SOSA 2012.03: Thinking through Anthropology AND SOSA 2013.03: Anthropology in Practice; or SOSA 2007.03: Thinking Sociologically AND SOSA 2008.03: Doing Sociology

- At least six additional 2000 level credit hours

3000 level

- SOSA 3400.03: History of Anthropological Theory
- SOSA 3402.03: Figuring Out Society
- SOSA 3403.03: Qualitative and Field Methods

4000 level

- SOSA 4101.03: Honours Seminar in Social Anthropology (fall term) AND SOSA 4102.03: Honours Seminar in Social Anthropology (winter term)
- SOSA 4003.03: Contemporary Perspectives in Ethnography
- One of: SOSA 4001.03, SOSA 4002.03, SOSA 4004.03, SOSA 4005.03, SOSA 4006.03

In total a minimum of 54 and a maximum of 66 SOSA credit hours beyond the 1000 level are required.

Courses required in Concentrated Honours in Sociology:

1000 level

- One 1000 level SOSA class or King's Foundation Year Program

2000 level

SOSA 2007.03: Thinking Sociologically AND SOSA 2008.03: Doing Sociology; or SOSA 2012.03: Thinking through Anthropology AND SOSA 2013.03: Anthropology in Practice

- At least six additional 2000 level credit hours

3000 level

- SOSA 3401.03: History of Sociological Thought
- SOSA 3402.03: Figuring Out Society
- SOSA 3403.03: Qualitative and Field Methods
- SOSA 3405.03: Contemporary Social Theory

4000 level

- SOSA 4001.03: Quantitative Analysis for the Social Sciences I or SOSA 4003.03: Contemporary Perspectives in Ethnography
- SOSA 4105.03: Honours Seminar in Sociology (fall term) AND SOSA 4106.03: Honours Seminar in Sociology (winter term)
- In addition, one of: SOSA 4001.03, SOSA 4002.03, SOSA 4003.03, SOSA 4004.03, SOSA 4005.03, SOSA 4006.03

In total a minimum of 54 and a maximum of 66 SOSA credit hours beyond the 1000 level are required.

NOTE: Students considering graduate work in Sociology are strongly advised to take SOSA 4002.03: Quantitative Analysis for the Social Sciences II, since intermediate statistical competence is often required as a component of graduate social science programs.

Combined Honours in Sociology or Social Anthropology and another field

To be admitted to any of the Combined Honours programs, students must meet the same GPA requirements as for Concentrated Honours. Specifically, the Department requires a grade average of B+ (3.30) or higher on courses above 1000 in SOSA and the other honours subject. In addition, a minimum cumulative GPA of 2.70 is required.

The requirements noted below normally apply. In some cases a variation may be allowable when approved by honours advisors in both departments, for example when a similar course is required by both departments.

Courses required in Combined Honours with Sociology as the primary subject:

1000 level

- One 1000 level SOSA course or King's Foundation Year Program

2000 level

SOSA 2007.03: Thinking Sociologically AND SOSA 2008.03: Doing Sociology; or SOSA 2012.03: Thinking through Anthropology AND SOSA 2013.03: Anthropology in Practice

3000 level

- SOSA 3401.03: History of Sociological Thought
- SOSA 3402.03: Figuring Out Society
- SOSA 3403.03: Qualitative and Field Methods
- SOSA 3405.03: Contemporary Social Theory

4000 level

- SOSA 4001.03: Quantitative Analysis for the Social Sciences
- SOSA 4105.03/4106.03: Honours Seminar in Sociology
- One of: SOSA 4002.03, SOSA 4003.03, SOSA 4004.03, SOSA 4005.03, SOSA 4006.03

A total of 66 to 84 credit hours beyond the 1000 level in the two honours subjects combined, with a grade of "C" or better. Of this total, at least 36-48 credit hours must be in SOSA courses.

Courses required in Combined Honours with Social Anthropology as the primary subject:

1000 level

- One 1000 level SOSA course or King's Foundation Year Program

2000 level

SOSA 2012.03: Thinking through Anthropology AND SOSA 2013.03: Anthropology in Practice; or SOSA 2007.03: Thinking Sociologically AND SOSA 2008.03: Doing Sociology

3000 level

- SOSA 3400.03: History of Anthropological Theory
- SOSA 3402.03: Figuring Out Society
- SOSA 3403.03: Qualitative and Field Methods

4000 level

- SOSA 4003.03: Contemporary Perspectives in Ethnography
- SOSA 4101.03/4102.03: Honours Seminar in Social Anthropology
- One of: SOSA 4001.03, SOSA 4002.03, SOSA 4004.03, SOSA 4005.03, SOSA 4006.03

A total of between 66 and 84 credit hours beyond the 1000 level in the two honours subjects combined, with a grade of "C" or better. Of this total, 36-48 credit hours must be in SOSA courses.

Courses required in Combined Honours with Sociology or Social Anthropology as the secondary subject:

1000 level

- One 1000 level SOSA course or King's Foundation Year Program

2000 level

SOSA 2007.03: Thinking Sociologically AND SOSA 2008.03: Doing Sociology; or SOSA 2012.03: Thinking through Anthropology AND SOSA 2013.03: Anthropology in Practice

3000 level

- For Sociology: one of SOSA 3401.03, SOSA 3402.03, SOSA 3403.03, or SOSA 3405.03
- For Social Anthropology: one of SOSA 3400.03, SOSA 3402.03, SOSA 3403.03

A total of between 66 and 84 credit hours beyond the 1000 level in the two honours subjects combined, with a grade of "C" or better. Of this total, at least 30 credit hours must be in SOSA courses, including at least 18 credit hours above the 2000 level.

Honours Conversion in Sociology or Social Anthropology

This program permits Dalhousie graduates to undertake an additional 30 credit hours upgrading their qualifications from the 90 credit hour BA to Honours. Students must meet the usual conditions for admission to honours, and complete the full set of Honours requirements in either Sociology or Social Anthropology. Interested students should consult an Undergraduate Advisor. Students with a 120 credit hours major may also upgrade to honours.

BA (120 credit hour) Major in Sociology and Social Anthropology

Departmental requirements

1000 level

- One 1000 level course or King's Foundation Year Program

2000 level

SOSA 2007.03: Thinking Sociologically AND SOSA 2008.03: Doing Sociology; or SOSA 2012.03: Thinking through Anthropology AND SOSA 2013.03: Anthropology in Practice

- At least six additional 2000 level credit hours

3000/4000 level

- Total of 18 SOSA credit hours, including at least three credit hours at the 4000 level

In total a minimum of 36 and a maximum of 54 SOSA credit hours beyond the 1000 level are required.

BA (120 credit hour) Double Major in Sociology and Social Anthropology

Students must obtain at least 60 and no more than 84 credit hours beyond the 1000 level in two allied subjects, with no fewer than 30 and no more than 48 credit hours in either.

Departmental requirements

1000 level

- One 1000 level SOSA course or King's Foundation Year Program

2000 level

SOSA 2007.03: Thinking Sociologically AND SOSA 2008.03: Doing Sociology; or SOSA 2012.03: Thinking through Anthropology AND SOSA 2013.03: Anthropology in Practice

3000/4000 level

- 18 SOSA credit hours at the 3000 level or above

BA (120 credit hour) Major in Sociology and Social Anthropology Conversion

This program permits Dalhousie graduates to undertake an additional year of study upgrading their qualifications from the 90 credit hour BA to the 120 credit hour BA. Students must meet the full set of Major requirements.

BA (90 credit hour) Minor in Sociology and Social Anthropology

Departmental requirements

1000 level

- One 1000 level SOSA course or King's Foundation Year Program

2000 level

- SOSA 2007.03: Thinking Sociologically AND SOSA 2008.03: Doing Sociology; or SOSA 2012.03: Thinking through Anthropology AND SOSA 2013.03: Anthropology in Practice
- At least six additional 2000 level credit hours

3000/4000 level

- Six SOSA credit hours at the 3000 level or above

In total a minimum of 18 and a maximum of 27 SOSA credit hours beyond the 1000 level are required.

Minor in Sociology and Social Anthropology of Critical Health Studies

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

This minor requires a minimum of 18 to a maximum of 27 credit hours above the 1000 level from the list below.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions

Some courses listed may not be offered in a given academic year. Consult the timetable for details. Where prerequisites apply, students requesting exceptions must obtain permission directly from the instructor involved.

Note:

1. Enrolment in 4000 level courses is restricted to Honours and Major students in their fourth year of study.
2. No more than six credit hours may be obtained for introductory courses from SOSA 1000.06, SOSA 1050.06, SOSA 1100.06, SOSA 1200.06, SOSA 1500.06, SOSA 1002.03, SOSA 1003.03.
3. King's Foundation Year Program satisfies the introductory course prerequisite.

Course Descriptions

SOSA 1002 People and Culture: Introduction to Social Anthropology

CREDIT HOURS: 3

This course is an introduction to Social Anthropology. Social anthropologists study cultural diversity in western and non-western societies. Often living among the people they study, anthropologists attempt to understand the structures that shape and constrain peoples' lives, and the ways in which people make sense of their changing circumstances. Classic studies focused on rural people in the developing world (hunter-gatherers, pastoralists, peasants).

Contemporary studies are just as likely to focus on development, migration, artists, boardroom rituals or street gangs. Theories and methods from anthropology can be applied to a wide range of academic and practical settings including development, politics, economics, health, law, art, and human rights.

EXCLUSIONS: SOSA 1050.06 and SOSA 1100.06

FORMATS: Lecture

SOSA 1003 Introduction to Sociology

CREDIT HOURS: 3

This course introduces students to basic sociological concepts, the logic of sociological inquiry, and major theoretical and methodological issues in the field. Substantive topics may include social movements, health, work, gender, religion, racialization, family, and mass media; key sociological concepts covered include social control, socialization, identity, inequity, and social institutions. Emphasis is on the study of contemporary post-industrial societies with special attention given to Canadian society.

EXCLUSIONS: SOSA 1050.06 and SOSA 1200.06

FORMATS: Lecture

SOSA 1500 GPS: Global Politics and Society

CREDIT HOURS: 6

Global politics and society have been remade by processes of globalization, referring to the multiple ways nations, communities, and people are connected and disconnected across traditional boundaries. The dynamics of the Covid-19 pandemic are but one example of these far-reaching processes. This course covers key concepts from political science, sociology and social anthropology with a view to examining how interactions of large scale global processes, politics, and policies resonate in communities, social institutions and people's everyday lives. We will focus upon the changing dynamics of global capitalism as these are manifest in the political, economic, and sociological conditions across and within regions, nations, and communities.

CROSSLISTED: POLI 1500.06

EXCLUSIONS: POLI 1010, POLI 1015, POLI 1020, POLI 1025, POLI 1030, POLI 1035, POLI 1100x/y, POLI 1103x/y SOSA 1050.06, SOSA 1100.06 and SOSA 1200.06

FORMATS: Lecture | Tutorial

SOSA 2005 Introduction to African Canadian Studies: Society, History and Culture

CREDIT HOURS: 3

There has been a presence of African peoples in Canada for over 400 years; however, the rich histories of African-Canadian people have been often ignored. This course examines African Canadian society and culture from the historical to contemporary period. Topics will include patterns of immigration and settlement, slavery, family, continental African and diasporic connections, identity, arts and culture, education, religion, employment, justice and the law, the media, diasporic debates, Black struggles and resistance, and African Canadian achievements. The course will be taught from a critical race and gender perspective, and will include readings about the diverse Black communities across Canada.

CROSSLISTED: CANA 2005

EXCLUSIONS: CANA 2115.03; SOSA 2115.03

FORMATS: Lecture

SOSA 2006 Global Migration: Transnational Lives

CREDIT HOURS: 3

Some observers propose that we are living in an "age of migration" because there are now more international migrants than ever before. Millions of people also migrate within their own countries from rural to urban areas in search of employment and other opportunities that cities are perceived to offer. Migration as a social phenomenon is inextricably linked to important global concerns such as wealth disparities both between countries and within countries between social classes, as certain groups of people are displaced or dispossessed from land-based livelihoods. Global migration also involves major gender and ethnic inequalities, human rights issues, and produces differential access to citizenship.

PREREQUISITES: One SOSA course at the 1000 level or FYP

FORMATS: Lecture

SOSA 2007 Thinking Sociologically

CREDIT HOURS: 3

Sociologists are interested in understanding the social world. They do not rely on preconceived ideas alone to enrich this understanding, but see the need to conduct studies, carry out investigations, make observations, analyze findings, formulate ideas, and construct theories and interpretations about what they find. This course looks at the ways sociologists go about their work. What are some of the dominant ways of thinking current in sociology today? What are the relationships between such ways of thinking and what are seen as questions to investigate? How do sociologists do their research? What are social surveys, interviews, theories, sociological ideas? What is distinctive about a sociological way of looking at a problem?

CALENDAR NOTES: SOSA 2007 and SOSA 2008 must be taken in the same academic year. The combination of SOSA 2007 and SOSA 2008 is equivalent to SOSA 2002. Students who have already completed SOSA 2002 are excluded from SOSA 2007.

PREREQUISITES: One SOSA course at the 1000 level or FYP

EXCLUSIONS: Students who have already completed SOSA 2002 are excluded from SOSA 2007

FORMATS: Lecture

SOSA 2008 Doing Sociology

CREDIT HOURS: 3

This course builds on the foundations and materials introduced in SOSA 2007. Sociologists are interested in understanding the social world. They do not rely on preconceived ideas alone to enrich this understanding, but see the need to conduct studies, carry out investigations, make observations, analyze findings, formulate ideas, and construct theories and interpretations about what they find. This course looks at the ways sociologists go about their work. What are some of the dominant ways of thinking current in sociology today? What are the relationships between such ways of thinking and what are seen as questions to investigate? How do sociologists do their research? What are social surveys, interviews, theories, sociological ideas? What is distinctive about a sociological way of looking at a problem?

CALENDAR NOTES: NOTE: SOSA 2007 and SOSA 2008 must be taken in the same academic year. The combination of SOSA 2007 and SOSA 2008 is equivalent to SOSA 2002. Students who have already completed SOSA 2002 are excluded from SOSA 2008.

PREREQUISITES: One SOSA course at the 1000 level or FYP, plus SOSA 2007

EXCLUSIONS: Students who have already completed SOSA 2002 are excluded from SOSA 2008

FORMATS: Lecture

SOSA 2012 Thinking Through Anthropology

CREDIT HOURS: 3

Social anthropology explores how people and groups shape and are shaped by broad forces of culture, history, and social and political structures. Anthropology uses ethnography to describe and understand how people conduct their lives in a particular time and place. This course examines the challenges, complexity, strengths, and limitations of ethnographic knowledge and writing in Social Anthropology. Students will learn about a number of different ethnographic settings which may vary from year to year. A selection of ethnographies, films, autobiographical writing, and critical commentaries will be used to reveal how social anthropologists generate ethnographic knowledge about past and present societies, and why research priorities shift.

CALENDAR NOTES: SOSA 2012 and SOSA 2013 must be taken in the same academic year. The combination of SOSA 2012 and SOSA 2013 is equivalent to SOSA 2001. Students who have already completed SOSA 2001 are excluded from SOSA 2012.

PREREQUISITES: One SOSA course at the 1000 level or FYP.

EXCLUSIONS: Students who have already completed SOSA 2001 are excluded from SOSA 2012.

FORMATS: Lecture

SOSA 2013 Anthropology in Practice

CREDIT HOURS: 3

This course builds on the foundations and materials introduced in SOSA 2012. Social anthropologists use ethnography to describe and understand how people conduct their lives in a particular time and place. This course examines the challenges, complexity, strengths, and limitations of ethnographic knowledge and writing in Social Anthropology. Students will learn about a number of different ethnographic settings which may vary from year to year. A selection of ethnographies, films, autobiographical writing, and critical commentaries will be used to reveal how social anthropologists generate ethnographic knowledge about past and present societies, and why research priorities, frameworks, and methods shift.

CALENDAR NOTES: SOSA 2012 and SOSA 2013 must be taken in the same academic year. The combination of SOSA 2012 and SOSA 2013 is equivalent to SOSA 2001. Students who have already completed SOSA 2001 are excluded from SOSA 2013.

PREREQUISITES: One SOSA course at the 1000 level or FYP, plus SOSA 2012

EXCLUSIONS: Students who have already completed SOSA 2001 Are excluded from taking SOSA 2013

FORMATS: Lecture

SOSA 2041 Describing Social Inequality

CREDIT HOURS: 3

This course examines inequality in practice. The focus will be on applying understandings of inequality to empirically describe cases of injustices in order to look at measures, practices, and policies regarding inequality. The evidence used to describe inequality will be critically examined through theoretical considerations. Possible topics to be covered in readings and assignments include economic, social, cultural, political and health inequalities among other contemporary issues of social justice.

PREREQUISITES: One SOSA course at the 1000 level or FYP

EXCLUSIONS: SOSA 2040X/Y.06

FORMATS: Lecture

SOSA 2042 Explaining Social Inequality

CREDIT HOURS: 3

This course examines various perspectives on inequality. It will examine how various forms of social inequality emerge and persist. The focus will be on the unequal distribution of wealth and sources of social power. Readings and assignments will focus on theories and explanations of inequality as well as historical and contemporary cases, including class, ethnicity, race, nation, region, gender, orientation and other manifestations of inequality.

PREREQUISITES: One SOSA course at the 1000 level or FYP

EXCLUSIONS: SOSA 2040X/Y.06

FORMATS: Lecture

SOSA 2044 Fashioning selves and social worlds: The meaning, production, and consumption of clothing in contemporary societies

CREDIT HOURS: 3

Clothing and fashion are profoundly social and cultural. We use clothes deliberately to both set ourselves apart and to express our belonging to particular social or cultural groups. People also form ideas about who we are—our economic status, our gender, our ethnicity—that may or may not align with how we see ourselves. Even if we give little thought to what we wear, the options available when we get dressed each day are the product of a global fashion industry, one that is deeply implicated in the current environmental crisis and unethical economic inequality. This course discusses these, and other topics, drawing on key ideas in sociology and anthropology to explore the manifold ways in which fashion and clothing shape selves, societies, and cultures.

PREREQUISITES: One SOSA course at the 1000 level or FYP

FORMATS: Lecture

SOSA 2045 Indian Society: Change and Continuity

CREDIT HOURS: 3

The objective of this half-credit course is to introduce students to the society and culture of India from an interdisciplinary perspective. India presents a

society of enormous complexity and an unbroken living civilization of great antiquity. The focus of the course will be on selected, significant aspects of Indian society with particular emphasis on issues of current relevance. Topics discussed include: a historical background, social structure, political and social constraints to economic development, health issues, major religions and philosophy, development and foreign policy since independence, science and technology, disaster relief and development, and literature. This course counts as a half-credit in Sociology and Social Anthropology towards the IDS established discipline requirement.

CROSSLISTED: INTD 2045.03

EXCLUSIONS: INTD 3045.03

FORMATS: Lecture

SOSA 2051 Chinese Culture

CREDIT HOURS: 3

This course introduces students to the Chinese cultural heritage. It offers an overview of traditional and modern Chinese culture through the lenses of history, sociology, religion, philosophy, literature, art and film. The class offers students an opportunity not only to familiarize themselves with the historical legacies of China, but also to examine modern issues facing Chinese society in the contexts of international relations, society, economics, gender, ethnicity and politics. Nor previous knowledge of Chinese culture or the Chinese language is required.

CROSSLISTED: CHIN 2050.03

FORMATS: Lecture | Discussion

SOSA 2052 Contemporary Issues in Indigenous Studies

CREDIT HOURS: 3

This course offers an interdisciplinary introduction to contemporary challenges faced by Indigenous peoples in Canada. Topics may include language and culture, land rights, economics, governance and treaty relationships, child welfare and education, health, social services, environmental issues, violence, criminal justice and self-determination, political mobilization and resistance, and decolonization.

CROSSLISTED: CANA 2052.03, INDG 2052.03

FORMATS: Lecture | Discussion

SOSA 2101 Environment and Culture

CREDIT HOURS: 3

Concern about the environment is an increasingly widespread phenomenon as more people and confront their relationship to a changing ecology. Environmental issues like pollution, global warming, or resource depletion, have global as well as personal implications. The efforts of cities to deal with environmental pollution, for example, may lead to conflicts with rural regions, and changes in consumption patterns in one country may have consequences for the environment of other countries. This course will explore key relationships between human culture and the physical environment. Topics to be examined may include: environmental knowledge, food and agriculture, environmental ethics, health, resource management and conservation.

PREREQUISITES: One 1000 level SOSA course or FYP

EXCLUSIONS: SOSA 2100.06

FORMATS: Lecture

SOSA 2115 African Canadian Society, Culture, and Resistance

CREDIT HOURS: 3

There has been a presence of African peoples in Canada for over 400 years; however, the rich histories of African-Canadian people have been often ignored. This course examines African Canadian society and culture from the historical to contemporary period. Topics will include historical analyses, slavery, patterns of immigration and settlement, family, continental African and diasporic connections, identity, arts and culture, education, employment, justice and the law, the media, diasporic debates, Black struggles and resistance, and African Canadian achievements. The course will be taught from a critical race and gender perspective, and will include readings about the diverse Black communities across Canada. There has been a presence of African peoples in Canada for over 400 years; however, the rich histories of African-Canadian people have been often ignored. This course examines African Canadian society and culture from the historical to contemporary period. Topics will include historical analyses, slavery, patterns of immigration and settlement, family, continental African and diasporic connections, identity, arts and culture, education, employment, justice and the law, the media, diasporic debates, Black struggles and resistance, and African Canadian achievements. CROSSLISTED: CANA 2115.03

EXCLUSIONS: CANA 2005.03; SOSA 2005.03

FORMATS: Lecture

SOSA 2140 Going Global; Geography, Economy, and Work in the 21st Century

CREDIT HOURS: 3

This course will explore the economic, industrial and organizational transformations which have affected world economies since the 1980s. The spatial reorganization of the international division of labour has led to "world cities", and rural concentration and depopulation, as well as exploitative economic enclaves as endpoints in global commodity chains. The emergence of an increasingly integrated international economic order are associated, in the advanced economies, with a shift from manufacturing, for which automobile production has been the standard example, to a service-dominated economy, ranging from financial services, internet development and movie and music creation, to fast food chains and mass tourism. This industrial transformation has been

accompanied by shifts in organizational structures, whether the emphasis has been on increased operational flexibility, or downsizing, one is continuously faced with the impact of new information technologies on the workplace. Does the electronic storage and transmission of information create acceptable efficiencies, or do they represent new methods for controlling and exploiting an increasingly vulnerable workforce, particularly lower-class women and/or immigrants? This course will employ the relevant portions of a standard Canadian sociological text to evaluate main tendencies, while selected anthropological case studies from different places will help understand the specific dynamics of a new, world economy.

PREREQUISITES: One SOSA course at the 1000 level or FYP

FORMATS: Lecture

SOSA 2141 Why Work?

CREDIT HOURS: 3

Work, as the journalist Studs Terkel once wrote, is a source of “daily meaning as well as daily bread.” It comes in many forms. There are careers, “callings,” or just-for-now jobs, which can be paid or unpaid, permanent or temporary, prestigious or menial, dangerous or boring. For some of us, work is an opportunity to “Do What You Love”; for others, the best part of work is the pay cheque. How we go about making a living is in some ways a personal choice, but it’s also a social and political matter. In this course, students will learn how we make sense of work in all its forms. Topics covered may include: internships and precarious work, (de)industrialization, unions, generations and work, gender and work, labour market trends, professions, leisure, and the future of work.

PREREQUISITES: One SOSA course at the 1000 level or FYP

FORMATS: Lecture

SOSA 2181 Explaining Crime and Criminal Behavior

CREDIT HOURS: 3

What is crime, why do rates of crime vary, why do people commit crimes and how do social, cultural, psychological and biological theories and research findings explain crime as social and behavioral phenomena? Criminology is an interdisciplinary attempt to answer these questions through the social scientific study and analysis of crime and criminal behavior. This course introduces students to a broad variety of critical thinking, disciplinary theories, research studies and social policies, in order to help you understand and explain crime and show how these understandings inform the policies and politics designed to manage and prevent crime. This course provides a general but primarily sociological understanding of crime.

PREREQUISITES: One SOSA course at the 1000 level or FYP

EXCLUSIONS: SOSA 2180X/Y.06

SOSA 2182 Exploring Crime and Criminal Behavior

CREDIT HOURS: 3

This course involves application of sociological theories to questions about crime, deviance, and criminal justice. The course utilizes a diverse range of theoretical and empirical sources to build students’ understanding of how social science can help us understand, and better respond to, serious transgression and willful harms. The course will review major mainstream and critical perspectives on how we define, explain, and respond to crime. The course will involve an exploration of social phenomena including crime rates; interpersonal, institutional, and state violence; gender-based violence; race and crime; ‘new’ crime types such as cybercrime and transnational organized crime; and state and non-state responses to crime, deviance and harm. While not a prerequisite, SOSA 2181 is encouraged prior to taking this course as it involves a more comprehensive review of sociological theories of crime.

CALENDAR NOTES: Approved with Law and Society Minor.

PREREQUISITES: One SOSA course at the 1000 level or FYP

EXCLUSIONS: SOSA 2180X/Y.06

SOSA 2191 Gender Across Cultures

CREDIT HOURS: 3

Applying theoretical perspectives drawn primarily from anthropology, this course considers the social and historical constructions of gender and sexuality in different cultural contexts. The course provides an overview of the anthropological study of gender as a universal yet culturally specific identity and set of relations and expectations. Themes around which the course will be organized will likely include the relationship between gender and the following: identities and markers of social difference, notably sexuality; kinship, reproduction, and the family as cultural institutions; labour, class and the global political economy; and gender politics and power relations. Students taking this course will consider the importance of looking beyond the western experience for understanding questions of gender, sexuality, and power. Approved with International Development Studies.

PREREQUISITES: One 1000 level SOSA course or FYP or a GWST course

CROSSLISTED: GWST 2191.03

EXCLUSIONS: SOSA 2190X/Y.06, GWST 2800X/Y.06

FORMATS: Lecture

SOSA 2192 Gender, Sexuality and Society

CREDIT HOURS: 3

This course introduces students to the sociological study of gender and sexuality. It explores how socio-economic and cultural conditions— particularly in contemporary Canada— shape our understandings and experiences of gender and sexuality and how both intersect with age, ethnicity, class and other markers of identity. Specific topics to be examined may include the interconnected histories of sexuality and gender expectations in western societies, representations of gender and sexuality in the contemporary media, the family as a changing social institution and/or the social organization of intimate relationships, and different forms of gender and sexual activism and the notions of justice that they represent. Students taking this course will gain an in-depth understanding of

gender and sexuality as evolving socially constructed concepts that have real and multiple effects.

CALENDAR NOTES: Note: Given its focus on contemporary Canadian society, this course may not be approved as an IDS class.

PREREQUISITES: One 1000 level SOSA course or FYP or a GWST course

CROSSLISTED: GWST 2192.03

EXCLUSIONS: SOSA 2190X/Y.06, GWST 2800X/Y.06

FORMATS: Lecture

SOSA 2261 Society, Politics, and Culture

CREDIT HOURS: 3

You may not think of yourself as political, but power is a process of everyday life. Although it is often assumed to be located in economic and political institutions, it is also important to consider that “the personal is political” and this too contributes to the negotiation of power. This course will explore how social processes affect and are shaped by material, institutional, and normative pressures. Contemporary examples of the intersection of these social forces will show how sociology and social anthropology can be used to identify otherwise hidden relationships.

PREREQUISITES: One 1000 level SOSA course or FYP

EXCLUSIONS: SOSA 2260.06

FORMATS: Lecture

SOSA 2270 Introduction to Popular Culture

CREDIT HOURS: 3

In this course, we will examine and discuss the various approaches and theories of popular culture in anthropology and sociology. Popular culture has been defined in multiple ways and attached to multiple objects and activities in society. We will consider how human beings take part in popular culture on one hand and how popular culture affects the rest of their lives on the other hand. Related themes include consumption, media, technology, communication, identity, ideology, stratification.

PREREQUISITES: One 1000 level SOSA class or FYP

FORMATS: Lecture

SOSA 2271 Popular Culture in a Global Context

CREDIT HOURS: 3

The course explores many different theories and manifestations of popular culture in a wide range of contexts. Popular culture as it intersects with films, television, Internet, magazines, comics, cartoons, fashion, sports, music, etc., provides a rich platform for consideration of how popular culture influences individuals in their lives while simultaneously being shaped by those same individuals and their cultural contexts. We will also explore how individuals take on different roles in the production and consumption of popular culture.

PREREQUISITES: One 1000 level SOSA course or FYP

SOSA 2292 Goblins, Ghosts, Gods, Gurus I

CREDIT HOURS: 3

Societies and groups within societies differ in terms of what their members believe, how people view the world and their place within it, the sources of knowledge, attitudes toward the supernatural and the sacred, the status and authority of different sources of knowledge and what it all means. What makes religion different from science? What makes them similar? What is common sense? What are magic and witchcraft? What are the relations between belief and actions? What is the status of religious authority and power? What are altered states of consciousness? What are religious groups all about? Why do people belong to them, join them, leave them? What is involved in conversion and commitment? This course considers such questions drawing on a wide variety of societies, cultures, and groups, western and non-western.

CALENDAR NOTES: This course is the first part of the former full-year course SOSA 2291X/Y.06. This course description reflects the entirety of the pair (SOSA 2292.03 and SOSA 2293.03).

CROSSLISTED: RELS 2292.03

EXCLUSIONS: SOSA 2291X/Y.06, RELS 2291X/Y.06

FORMATS: Lecture

SOSA 2293 Goblins, Ghosts, Gods, Gurus II

CREDIT HOURS: 3

FORMATS: Lecture

SOSA 2402 Food and Culture

CREDIT HOURS: 3

We will examine the concept of "food" through time and space so as to understand nutritional science/health, belief/ritual systems, oral/textual histories, ancient productive systems, flora and fauna domestication techniques and their ongoing relevance to food entitlements in the contemporary world. Special emphasis will be on non-Europeans societies, communal tenure systems and a glance at the European commons and their productive systems.

PREREQUISITES: One 1000 level SOSA course or FYP

EXCLUSIONS: SOSA 2401X/Y

SOSA 2403 Food Activism

CREDIT HOURS: 3

In this course we will explore food movements and alternative food practices, especially in relation to the modern food system. We will discuss the key characteristics and critiques of the food system and focus on case studies of cultural practices and food activism from around the world which challenge or provide alternatives to the current food system.

EXCLUSIONS: SOSA 2401X/Y.06

FORMATS: Lecture

SOSA 2502 Biomedicine and the Illness Experience

CREDIT HOURS: 3

This course provides an introduction to the sociology of medicine, patienthood, and practitioner-patient relationships. The course is organized into two sections. The first section analyses the theory and practice of medicine, our society's dominant system for addressing health problems. In the second section, we examine illness and the experience of receiving medical care. We will cover such topics as: the biomedical model; medical school; the experience of chronic illness; medical science and technology; models of the doctor-patient relationship; and mental illness.

EXCLUSIONS: SOSA 2501X/Y.06, SOSA 2500.03

FORMATS: Lecture

SOSA 2503 Health and Society

CREDIT HOURS: 3

This course examines the social foundations of health and illness, community responses to health problems, and the structure of health care in Canada and internationally. Topics to be covered include: morality and health, social inequality and the political economy of health and health care, the multinational pharmaceutical industry, environmental health, and the development of and 'crisis' in the Canadian Medicare system.

PREREQUISITES: One 1000 level SOSA course or FYP, or Med Sci Major or permission from instructor

EXCLUSIONS: SOSA 2501.03

FORMATS: Lecture

SOSA 2505 Sociology of Health and Illness II

CREDIT HOURS: 3

This course provides an introduction to the sociology of health, illness, and healing. We will analyze the theory and practice of medicine, our society's dominant system for addressing health problems; the experience of healthcare and illness from the perspectives of the ill; the social foundations of health and illness; and the structure of healthcare in Canada. Topics include: the historical development of the health professions; the moral regulation of health; social inequality and the political economy of health and healthcare; the patient-practitioner relationship; and the development of and 'crisis' in the Canadian Medicare system. Throughout the course, emphasis will be placed on critical theoretical approaches and concepts used in the field.

CALENDAR NOTES: This course is the second part of the former full-year course SOSA 2501X/Y.06. This course description reflects the entirety of the pair (SOSA 2504.03 and SOSA 2405.03).

PREREQUISITES: SOSA 2504.03

EXCLUSIONS: SOSA 2500.03, SOSA 2501X/Y.06

FORMATS: Lecture

SOSA 2933 Health and Culture

CREDIT HOURS: 3

This course explores health and illness aetiology through culture and time with a focus on ancient and pre-capitalist societies in South Asia, Latin America, Africa, Middle East and Aboriginal gifting economies. Topics may vary from year to year but we will invariably explore global sensibilities of feeling healthy and "well" through an exploration of case studies highlighting ancient science and medicine, health taxonomies, oral history, ethnography, literature, poetry, music, oral genres, pregnancy; birth and rearing of children; senescence and death. The weaknesses and strengths of Canada's increasingly privatized selective healthcare system become clear when compared it with the achievements made in societies that provide/d healthcare as a basic right.

EXCLUSIONS: SOSA 2400X/Y.06
FORMATS: Lecture

SOSA 3002 Native Peoples of Canada

CREDIT HOURS: 3

This course uses an ecological perspective to describe the cultures and peoples occupying Canada at the time Europeans came to this continent. As time permits, some ethnohistory and the situation of contemporary Native peoples is also discussed. Films will be used to supplement lectures and readings. Approved with Canadian Studies.

PREREQUISITES: One 1000 level SOSA course or FYP

EXCLUSIONS: SOSA 2350.03

FORMATS: Lecture

SOSA 3005 Knowledge, Work and Culture in the Contemporary World

CREDIT HOURS: 3

Since the publication of Daniel Bell's book, *The Coming of Postindustrial Society*, studies of the economic structure of the advanced societies have addressed the question of the extent to which we are living through a transition to a new, knowledge-driven economy which may be qualitatively distinguished from the system of industrial capitalism which has characterized North America and western Europe for most of this century. Whether one uses terms like "postindustrialism", "postmaterialism" or "postmodernism", debates have centered on the question of fundamental alterations in the economic, cultural and political organization of technologically advanced societies. Are we witnessing the creation of an "information economy", are we observing the emergence of a new "knowledge class", which rules by virtue of its educational skills and credentials, is there a new underclass being excluded from paid employment of any form, and is government being privatized to facilitate new forms of global economic integration? Are new types of social movements arising in response to basic changes in our society? This course will address the above questions, with particular emphasis being devoted to discuss issues in contemporary political economy.

PREREQUISITES: One 1000 level SOSA course or FYP

FORMATS: Lecture

SOSA 3006 Comparative Perspectives on Gender and Work

CREDIT HOURS: 3

This course will use comparative perspectives to explore a range of topics relating to the gendering of work- wage-work, household-based labour, the informal sector, masculinity and femininity in the work place, occupational segregation, employment policies directed at changing the status quo (such as affirmative action, pay equity), and unionization. The context will be the changing global political economy and its consequences for the strategies of different groups (such as nation states, but also trade unions, feminist groups and employer groups). Approved with International Development Studies.

PREREQUISITES: One 1000 level SOSA course or FYP

CROSSLISTED: GWST 3006.03

FORMATS: Lecture

SOSA 3008 Canadian Society and Politics

CREDIT HOURS: 3

This course about the nature of Canadian society has as its focus the study of structures and events which shape social and political organization in Canada. There is not only one way to understand Canadian society: generations of historians, political scientists and economists have provided valuable insights as to why Canadians have believed or acted or voted in one way or another. Sociology and Social Anthropology have helped to understand Canada in terms of contexts and conditions of life which have shaped the evolution of society as we know it. The course explores issues, events, discontents and groups which have produced the recurrent themes that underlie social life in Canada.

PREREQUISITES: One 1000 level SOSA course or FYP. RECOMMENDED: SOSA 2110 or another course on Canadian society and/or politics.

CROSSLISTED: CANA 3008.03

FORMATS: Lecture

SOSA 3009 Survey Says? Public Opinion and Social Trends

CREDIT HOURS: 3

This course will introduce students to the study of public opinion in Canada and its impact on informed decision making. In particular, the focus will be upon ideas and issues which have been held by groups and been influenced by the media. The lectures will explore the basis of our knowledge about the formation and change of public opinion relative to other forms of collective behaviour. We will present and analyze data relating to the role of public opinion in explaining and predicting political events.

PREREQUISITES: One 1000 level SOSA course or FYP

CROSSLISTED: CANA 3009.03

FORMATS: Lecture

SOSA 3013 Religion in Contemporary Society

CREDIT HOURS: 3

Religion is alive and well in society today; some religious organizations are in decline but others appear to be flourishing. How can these tendencies be accounted for? Do we live in a secular age or is that just a flip expression? What does religion mean to people in contemporary society? Is there a search going on for spiritual growth, spiritual awareness, spiritual expression? If so, what forms does this search take? What can we learn by thinking about religion sociologically? What are the trends in religion telling us about the character of late twentieth century society?

PREREQUISITES: One 1000 level SOSA course or FYP

CROSSLISTED: RELS 3013.03

FORMATS: Lecture

SOSA 3014 Rethinking Culture and Class

CREDIT HOURS: 3

Critical cultural studies has become a vigorous focus of interdisciplinary scholarship drawing on the fields of history, anthropology, sociology, geography, and literary criticism. Researchers in all of these areas are reconsidering the significance of symbolic aspects of social life and how the collective experiencing of cultural forms is related to changes in capitalism and modernity. For example, what is the significance of popular music in different class, gender, and ethnic contexts? How do commitments to kin and community relate to expressions of culture and class consciousness? Are boundaries between work and leisure mutable in terms of class, gender and ethnic processes? Approved with International Development Studies.

PREREQUISITES: One 1000 level SOSA course or FYP

FORMATS: Lecture

SOSA 3015 Popular Memory

CREDIT HOURS: 3

This course considers history-writing as a social and cultural process operating at personal, group and national levels. It examines theoretical, methodological and political questions raised in work on popular memory. Readings and films address the problems of: official history, public history (museums, national monuments), "history from below," and oral history. Cases will be taken from across the globe. Approved with International Development Studies.

PREREQUISITES: One 1000 level SOSA course or FYP

FORMATS: Lecture

SOSA 3016 Colonialism and the Body: Sex and the Practice of Power

CREDIT HOURS: 3

Theorists such as Frantz Fanon and Anne McClintock have argued that the colonial encounter has been a sexual and sexualized undertaking, undergirded by regimes of power. This course Colonialism and the Body uses sex, sexuality, and gender as the starting point from which to interrogate and examine the meanings attached to the bodies of the colonized and colonizer, and the social, spatial, political locations of these bodies during the heyday of European colonization, and further, in this supposedly postcolonial moment. We will examine diverse forms of colonialism (internal, direct, and indirect) in specific locations around the globe, including Canada, the United States, the Caribbean, and in parts of Africa and Asia. Topics include slavery and the slave trade, European contact with indigenous societies, Africville, Oka, sports, racial science, racialization of the African body, and colonial crime and punishment.

PREREQUISITES: One SOSA 1000 level course or FYP

CROSSLISTED: GWST 3017

EXCLUSIONS: SOSA 3186.03

FORMATS: Lecture

SOSA 3031 Social Problems and Social Policy

CREDIT HOURS: 3

This course focuses on the nature of social problems and social policy in advanced industrial societies. It adopts a social movement perspective, exploring the processes whereby agitation on behalf of undesirable but remedial social conditions leads to changes in social policy. Among the areas treated in depth are crime prevention, the quality of work life, race relations, deviance, and poverty and inequality.

PREREQUISITES: One SOSA 1000 level course or FYP

FORMATS: Lecture

SOSA 3033 Happiness, Play, and Celebration

CREDIT HOURS: 3

Sociology and social anthropology often focus on social problems, social pathologies, and social suffering. Yet we can learn just as much about the world by inquiring into the more positive elements of social life – not through rose-tinted glasses, but with a clear, critical approach. This course explores values and practices of happiness, play, and celebration. It addresses questions like: What makes us happy? Is happiness different from pleasure, satisfaction, wellbeing, or joy? Can we quantify happiness, and if so, should we? Why and how do humans play? What does play do for us? How do ideas about play and leisure reflect our societies? What are the defining features of celebrations like life-cycle rituals, religious rituals, or cultural festivals? Can we tell if they are 'authentic' or serving hidden agendas of, say, city-boosting or state-building? The course unfolds in three parts – Happiness, Play, and Celebration – though the three are closely intertwined.

PREREQUISITES: One 1000-level SOSA course or FYP

FORMATS: Lecture

SOSA 3052 Indigenous Social Health and Environmental Issues

CREDIT HOURS: 3

This course offers an interdisciplinary overview of contemporary social, health, and environmental issues impacting Indigenous peoples in Canada. Topics will include an exploration of the human rights of Indigenous peoples, social statistics, food sovereignty, health and well-being in Indigenous communities, connection to place, impact of environmental degradation and land dispossession, Indigenous knowledge and the environment, politics and political activism.

PREREQUISITES: One SOSA 1000 level course or FYP, CANA 2052.03 or SOSA 2052.03 or instructor permission

CROSSLISTED: CANA 3052.03, INDG 3052.03

FORMATS: Lecture

SOSA 3060 Social Change and Development

CREDIT HOURS: 3

This course considers theories of social change and development; approaches to the analysis of rural and urban livelihoods at the micro level; and the examination of community, class, patronage and gender relations in both their economic and cultural aspects. The constructive uses of social analysis in the support and design of development initiatives are also discussed. Approved with International Development Studies.

PREREQUISITES: One SOSA 1000 level course or FYP

FORMATS: Lecture

SOSA 3085 Self and Society

CREDIT HOURS: 3

This course explores the relationship between the self and the larger social context. It considers the dynamic interplay of personal experiences, interpersonal relations, group affiliation, and larger socio-cultural conditions. It examines how such interactions and institutions shape our conceptions of who we should be, who we are, or who we might become. In addition the relationship between changes in society and changes in the self are explored. The course may consider these questions cross-culturally.

PREREQUISITES: One SOSA 1000 level course or FYP

SOSA 3091 The Sociology of Culture

CREDIT HOURS: 3

Does culture permeate all aspects of social life or are there specialized social domains which are “cultural”? What is the connection between societies and “cultures” and the “culture” of music or art? This course explores the question of how one can sociologically study culture. The course reviews classical and contemporary theoretical approaches to the social production, distribution and reception of culture. Broad themes include the discussion of cultural consumption, cultural identity, cultural change, and notions of cultural resistance. Specific “cultural objects” of study may include fashion, sport, class, and social problems. The course concludes with analysis of the intersection of the fields of sociology and cultural studies.

PREREQUISITES: One SOSA 1000 level course or FYP

FORMATS: Lecture

SOSA 3100 Feminist Perspectives in Sociology and Anthropology

CREDIT HOURS: 3

This course will begin with an overview discussing what is feminism? There is no way to come to a definitive answer to this question, therefore the first month of classes will focus on readings and discussion of feminism from an historical perspective. We will investigate the three historical waves of feminism and the diversity of feminism found in the social sciences. After this brief introduction we will concentrate on gender and sex, clearly dominant themes found in feminist works. We will approach this by critically exploring socio cultural constructions of sex and gender, which in turn will shed critical light on feminist perspectives about the relationship between these two concepts.

PREREQUISITES: One SOSA 1000 level course or FYP

CROSSLISTED: GWST 3100

FORMATS: Lecture

SOSA 3105 Media and Society

CREDIT HOURS: 3

This course provides an introductory overview to the theoretical and practical issues that concern media and society. It examines contemporary theories of mass communications and popular culture and engages the political economy of media, their impact on audiences, and the role they play in the political process.

PREREQUISITES: One SOSA 1000 level course or FYP

FORMATS: Lecture

SOSA 3116 Issues in Social Research

CREDIT HOURS: 3

This course consists of the intensive examination of a selected area in social research. The specific topic or research issue will vary from year to year.

Students should check the note on the timetable or contact the department for details.

PREREQUISITES: One SOSA 1000 level course or FYP

FORMATS: Lecture

SOSA 3120 Social Conflict

CREDIT HOURS: 3

This course introduces students to the various analytical perspectives sociologists have employed to understand the patterning and consequences of conflict in society. In this regard particular attention is devoted to the functional, coercion, and Marxian theories of conflict. This course is also concerned with conflict in contemporary society, with special reference to patterns of conflict and change in Canada.

PREREQUISITES: One SOSA 1000 level course or FYP

FORMATS: Lecture

SOSA 3135 The Social Organization of Health Care

CREDIT HOURS: 3

The social organization of medicine and the politics of health are examined. Particular attention is paid to environmental and occupational health issues in light of technological and social change. Epidemiological patterns of morbidity and mortality are assessed. Students are responsible for seminar presentations in areas of interest.

PREREQUISITES: One SOSA 1000 level course or FYP, SOSA 2503 or for MedSci Students

FORMATS: Lecture

SOSA 3141 Society and Mental Health

CREDIT HOURS: 3

This class examines the intersections between society, mental health, and mental illness. The course focuses on the social determinants of mental health and illness, how mental health and illness are defined, and the social consequences of mental health and illness. Topics covered in this class include how race, gender, and class intersect with mental health and illness, debates about what does and does not count as an official mental disorder, how social factors impact our mental health (or mental flourishing), how forms of deviance and everyday experiences become situated as mental disorders, the physiological consequences of psychological stress, and stigmatization.

PREREQUISITES: One 1000 level SOSA course or FYP

FORMATS: Lecture

SOSA 3143 Health, Illness and the World System

CREDIT HOURS: 3

Placing the political economic bases of health and illness in ethnographic context, this course is concerned with the ways that afflictions of poverty become naturalized as biomedical experiences. Core questions pursued are as follows: 1) how is relative health affected by the world market pressures in diverse global contexts? 2) how do afflictions of poverty become naturalized as biomedical experiences? 3) how do patients and communities activate alternative health infrastructures as they resist their marginalization in neo-liberal political agendas? 4) what kinds of illnesses are characteristic of capitalism and wage labour migration (e.g. HIV/AIDS; SARS)? 5) how have market pressures and profit seeking retarded the progress of scientific inquiry into modern illness? We will elucidate these questions by looking at case studies from Canada, South Africa, Sri Lanka, Spain and Brazil.

PREREQUISITES: One SOSA 1000 level course or FYP

FORMATS: Lecture

SOSA 3145 Gender and Health

CREDIT HOURS: 3

This course aims to reflect upon and challenge our taken-for-granted assumptions about the gendered dimensions of health and healthcare. Rather than take the categories of 'women's health' and 'men's health' as its foundation, the course revolves around two main questions: (1) how does the field of health and healthcare define and enforce the very categories of 'women' and 'men'?; (2) how does gender, thus defined and enforced, affect the health, healthcare, and health work of those defined as men, women, or other? We will consider these questions by examining particular health topics that have a strongly gendered component, such as sexual health, reproductive health, and disability. Throughout the course, we will explore the theoretical perspectives used in the field; the two-sex model and challenges to it; the gendering of particular health problems and health professions; the medicalization of womanhood and, more recently, manhood; and the relationships between gender and other forms of social classification (e.g. race, class, sexual orientation). It is recommended that students take SOSA 2501 or SOSA 2400 or SOSA 2503 prior to taking this course.

PREREQUISITES: One SOSA 1000 level course or FYP, SOSA 2503 (Med Sci Students)

CROSSLISTED: GWST 3800.03

FORMATS: Lecture

SOSA 3147 Aging Cross Culturally

CREDIT HOURS: 3

In this online course we will explore the array of beliefs and practices of aging and the life course cross culturally. We will explore the enormous diversity in the aging experience around the world as well as the universals of human aging. Case studies will be examined to provide salient evidence of concepts examined in the course. This course will be useful for students in the social and science and humanities as well as health professionals, nursing, gerontologists, to provide adequate knowledge and skills for culturally appropriate geriatric care. This is an online course using Dalhousie's Blackboard Learning System. You are required to have daily access to a computer with high-speed internet access.

FORMATS: Lecture

SOSA 3148 The Sociology of Addiction: Drugs, Health and Society

CREDIT HOURS: 3

This course explores how the meaning and significance of various drug-taking practices and addictive experiences are shaped by the social, cultural, political and economic contexts in which they take place. It also examines how perceptions of different drugs and addictions have changed over time, and how complex and competing political, cultural and economic forces shape drug law and policy. The general aim of the course is to de-individualize and de-pathologize drug use and addiction, to better understand and address their health consequences.

PREREQUISITES: One SOSA 1000 level course or FYP, or SOSA 2503 for MedSci Students

FORMATS: Lecture

SOSA 3149 Childhood in Cross Cultural Perspective

CREDIT HOURS: 3

This course explores childhood as an important reflection of socialization and thus a nexus of cultural and social values, ideas, and histories. In examining pregnancy, birth, infant development and socialization patterns, we ask: What is universal, what is near universal, and what is indisputably variable? The course tries to maintain a balance among three perspectives: those of the infant; those of the parents; and relevant cultural and historical factors that shape both of these. The course also seeks to maintain a balance between the biological, cultural and social nature of human behavior. Approved with International Development Studies.

PREREQUISITES: One SOSA 1000 level course or FYP

FORMATS: Lecture

SOSA 3150 Sociology and Anthropology of the Body

CREDIT HOURS: 3

This course will consist of a micro-sociological examination of the human body as a socio-cultural construction. Topics include: bodily self image, cultural definitions of physical attractiveness, stigmatization, proxemic behaviour, non-verbal communications, body hygiene and pollution taboos, and cultural aspects of human reproduction and sexuality. Special attention will be paid to class, gender and ethnicity and their relationship to body politics.

PREREQUISITES: One SOSA 1000 level course or FYP

CROSSLISTED: GWST 3150.03

FORMATS: Lecture

SOSA 3165 Peoples and Cultures of the World: Selected Area Studies

CREDIT HOURS: 3

This course examines a specific geographic and/or culture area. The course begins with background material on geography and history. Its focus is on the people themselves, their social organization and political, economic, and cultural systems. How they relate to globalization and development will also be examined. Consult the Department to find which region is to be covered in a particular year. Approved with International Development Studies.

PREREQUISITES: One SOSA 1000 level course or FYP

CROSSLISTED: GEOG 3165.03

FORMATS: Lecture

SOSA 3168 Issues in Latin American Society

CREDIT HOURS: 3

This course introduces students to case studies on contemporary Latin America. The goal of the course is to familiarize students with key social and cultural issues in the region. The focus of the course will change from year to year, and may include a particular country or region, or a theme or topic. Students should contact the department for details on the specific theme of the course in a given year. Approved with International Development Studies.

PREREQUISITES: One SOSA 1000 level course or FYP

FORMATS: Lecture

SOSA 3170 Sport: Why We Play

CREDIT HOURS: 3

If you spend any time in a social environment, read the newspaper, watch television or walk through any community in the world you are well aware of the

ubiquitous nature of sport. It is everywhere. It flavours our national culture and permeates big business, popular culture and politics. Sport has become its own medium of communication and has important ramifications for international and multicultural relationships. But few of us pause to think about the larger questions of history, money, politics, race, sex, culture and commercialization that surround sports everywhere. This class encourages us to do just that.

SOSA 3175 Sociology of Education

CREDIT HOURS: 3

This course is intended to develop students' knowledge about the relationships between schooling and other aspects of society. We will achieve this, in part, by examining the theoretical perspectives and practical implications of knowledge in and outside of schooling as a basis for the development of autonomous and creative individuals. Topics may include: social stratification, cultural demands and constraints, relations between family, community and educational attainment, and the changing social conditions that have had an impact on educational institutions.

PREREQUISITES: One SOSA 1000 level course or FYP

FORMATS: Lecture

SOSA 3180 Special Topics in Sociology and Social Anthropology

CREDIT HOURS: 3

This course consists of an intensive examination of a selected substantive issue within Sociology and Social Anthropology. The specific topic or research problem will vary from year to year. Students should check the note on the timetable or contact the department for details.

PREREQUISITES: One SOSA 1000 level course or FYP

FORMATS: Lecture

SOSA 3181 Special Topics in Sociology and Social Anthropology

CREDIT HOURS: 3

This course consists of an intensive examination of a selected substantive issue within Sociology and Social Anthropology. The specific topic or research problem will vary from year to year. Students should check the note on the timetable or contact the department for details.

PREREQUISITES: One SOSA 1000 level course or FYP

FORMATS: Lecture

SOSA 3182 Special Topics in Sociology and Social Anthropology

CREDIT HOURS: 3

This course consists of an intensive examination of a selected substantive issue within Sociology and Social Anthropology. The specific topic or research problem will vary from year to year. Students should check the note on the timetable or contact the department for details.

PREREQUISITES: One SOSA 1000 level course or FYP

FORMATS: Lecture

SOSA 3183 Special Topics in Sociology and Social Anthropology

CREDIT HOURS: 3

This course consists of an intensive examination of a selected substantive issue within Sociology and Social Anthropology. The specific topic or research problem will vary from year to year. Students should check the note on the timetable or contact the department for details.

PREREQUISITES: One SOSA 1000 level course or FYP

FORMATS: Lecture

SOSA 3184 Special Topics in Sociology and Social Anthropology

CREDIT HOURS: 3

This course consists of an intensive examination of a selected substantive issue within Sociology and Social Anthropology. The specific topic or research problem will vary from year to year. Students should check the note on the timetable or contact the department for details.

PREREQUISITES: One SOSA 1000 level course or FYP

FORMATS: Lecture

SOSA 3185 Issues in the Study of Indigenous Peoples of North America

CREDIT HOURS: 3

This class deals with issues relating to Indigenous peoples, settler-colonialism, and Indigenous-settler relations in North America. Topics covered will vary from year to year, but may include: Treaty negotiations, rights, and responsibilities; social and cultural continuity and change; land use, dispossession and claims; Indigenous sovereignty and nation-to-nation relations with settler governments; social movements such as Idle No More or Water Protectors; colonial policies and their impacts; or the dynamics and limitations of Truth and Reconciliation. Bearing in mind that anthropological and sociological research has both supported and hindered Indigenous peoples' self-determination, this course also explores the challenges of building collaborative research that

foregrounds Indigenous priorities, positionalities, and participation. Approved with International Development Studies and the Law, Justice, and Society minor.

PREREQUISITES: One SOSA 1000 level course or FYP or CANA 2052.03 or SOSA 2052.03

CROSSLISTED: CANA 3185.03

FORMATS: Lecture

SOSA 3186 Special Topics in Sociology and Social Anthropology

CREDIT HOURS: 3

This course consists of an intensive examination of a selected substantive issue within Sociology and Social Anthropology. The specific topic or research problem will vary from year to year. Students should check the note on the timetable or contact the department for details.

PREREQUISITES: One SOSA 1000 level course or FYP

CROSSLISTED: Held with GWST 3186.03

FORMATS: Lecture

SOSA 3187 Special Topics in Sociology and Social Anthropology

CREDIT HOURS: 3

This course consists of an intensive examination of a selected substantive issue within Sociology and Social Anthropology. The specific topic or research problem will vary from year to year. Students should check the note on the timetable or contact the department for details.

PREREQUISITES: One SOSA 1000 level course or FYP

FORMATS: Lecture

SOSA 3188 Special Topics in Sociology and Social Anthropology

CREDIT HOURS: 3

This course consists of an intensive examination of a selected substantive issue within Sociology and Social Anthropology. The specific topic or research problem will vary from year to year. Students should check the note on the timetable or contact the department for details.

PREREQUISITES: One SOSA 1000 level course or FYP

FORMATS: Lecture

SOSA 3189 Special Topics in Sociology and Social Anthropology

CREDIT HOURS: 3

This course consists of an intensive examination of a selected substantive issue within Sociology and Social Anthropology. The specific topic or research problem will vary from year to year. Students should check the note on the timetable or contact the department for details.

PREREQUISITES: One SOSA 1000 level course or FYP

FORMATS: Lecture

SOSA 3190 Social Movements

CREDIT HOURS: 3

The general topic of unstructured group activity encompasses phenomena traditionally classified as collective behaviour incidents, as well as reformist and revolutionary social movements. Although there is considerable overlap, the collective behaviour literature tends to focus on relatively brief and spontaneous activities, such as panics, disasters, and crazes, while work on social movements examines relatively more organized and enduring group activities which still fall outside the realm of normal institutions. This course investigates problems emerging from both areas of concern. Emphasis is given to relevant Canadian materials.

PREREQUISITES: One SOSA 1000 level course or FYP

FORMATS: Lecture

SOSA 3200 Environment and Society

CREDIT HOURS: 3

Humans are aware as never before of their impacts on the environment, and their dependence on the other things and beings with which they coexist. In this course we explore the ways that Social Scientists are rethinking the relationship between humans and the non-humans, whether they are carbon atoms, computers, amphibians, mushrooms or ecosystems.

PREREQUISITES: One 1000 level SOSA or FYP

SOSA 3206 Ethnicity, Nationalism and Race

CREDIT HOURS: 3

This course looks at the social construction and present relevance of the categories "ethnicity", "nation", and "race". The current prevalence of identity

politics and ethnic nationalism suggest the extent to which these categories are both profoundly political and deeply personal. By looking at case studies from Canada and around the world we examine these ideas and their implications. Topics will vary from year to year, but may include Quebec nationalism, multiculturalism, “ethnic” warfare in Rwanda or Bosnia, and race politics. Approved with International Development Studies.

PREREQUISITES: One SOSA 1000 level course or FYP

FORMATS: Lecture

SOSA 3211 Rural Society: Life Outside the City

CREDIT HOURS: 3

Despite localised concerns about shrinking and ageing rural populations, much of the world's population, even today, lives in rural settings. But rurality has changed over the centuries, it varies around the world, and it is interdependent with life in cities. In our digital, global age, living in rural communities does not necessarily mean being isolated. Yet rural communities are still distinctive—they present different challenges for young people looking for new experiences, for elderly people who want to age in place, for policy makers trying to deliver public services. Their economies are often highly dependent on unpredictable global markets, and their livelihoods and cultures can be deeply affected by changes in the natural environment. This course examines continuity and change in a range of rural contexts across several continents including North America, and encourages students to consider the notion of “development” from alternative perspectives. Approved with International Development Studies.

PREREQUISITES: One SOSA 1000 level course or FYP

FORMATS: Lecture

SOSA 3214 Living in a Globalized World

CREDIT HOURS: 3

This course examines various definitions and approaches to globalization as a multidimensional process. Students will discuss topics such as: global culture (identity, migration, hybridity, homogenization, heterogenization), global risks (pollution, health, food, unemployment, poverty), global regulations and norms (international organizations, international regimes, global forums), global technology (computer networks, cyberspace, information age, global media), and global international order (global terrorism, war, security). Students will also explore political movements that demand globalization be made a more equitable process. Finally, while learning more about the complex reality of today’s world, students will engage in critical reflections and debates about some of the most fundamental concepts in social sciences like society, culture, nation, state, territory, space and democracy.

PREREQUISITES: One SOSA 1000 level course or FYP

FORMATS: Lecture

SOSA 3215 Migration and Identity

CREDIT HOURS: 3

This course explores the inter-relating of migration and identity under conditions that are now described as globalization. Migrants become immigrants in particular places. Most depart as citizens of one country seeking temporary refuge, employment, or new citizenship at their destination. As they travel, migrants negotiate the multiple (sometimes competing) demands of kin, employers, and policies set by more than one state. Because commitments and obligations they experience straddle the borders they have crossed, migrants lives are transnational. their ideas of “home” and identity are also reworked as they travel and can be conflicted as their circumstances change. Some writers have concluded contemporary migration is both turbulent and chaotic compared with historical examples. This course begins with review of some historical migration examples and critically reviews how these differ from current globalization flows. However, the main focus is on particular instances of migration as described in ethnographic and sociological case studies. Some key concepts to be discusses in the course are diaspora, transnationalism, and ethnoscape. Approved with International Development Studies.

PREREQUISITES: One SOSA 1000 level course or FYP

FORMATS: Lecture

SOSA 3225 Culture, Rights and Power

CREDIT HOURS: 3

The course examines the interrelation of culture, rights and power cross-culturally. It thus considers how the idea and exercise of rights can vary across cultures. It also addresses the ways in which rights and relations of power make themselves felt in people’s everyday lives. Finally, it considers the variety of experiences and understandings of these issues across societies and social groups. Examples may be drawn from social and cultural groups within or outside of Canada. Approved with International Development Studies and Law and Society minor.

PREREQUISITES: One SOSA 1000 level course or FYP

FORMATS: Lecture

SOSA 3228 Belief Systems: Ritual, Myth, and Magic

CREDIT HOURS: 3

Emphasis will be placed upon how belief systems and their symbolic representations give meaning to the universe and one’s place in it. Topics may include the nature of ritual, the structure of myth, religion and symbols, religion and healing, magic, sorcery, and witchcraft, and how all these phenomena relate to cultural and social change. Approved with International Development Studies.

PREREQUISITES: One SOSA 1000 level course or FYP

FORMATS: Lecture

SOSA 3245 Women and Aging

CREDIT HOURS: 3

As women grow older, the experience of aging is difficult. This course will explore the issues related to socio-economic factors that are major determinants of the well-being of aging women. Topics will include: aging as a process; menopause; violence against older women; older women and housing; self-image and sexuality; health and the aging woman; and older women and poverty.

PREREQUISITES: One SOSA 1000 level course, or FYP or two classes in Gender and Women's Studies

EXCLUSIONS: GWST 3810.03, NURS 4370.03

FORMATS: Lecture

SOSA 3250 Science and Technology Studies

CREDIT HOURS: 3

This course uses the tools of the social sciences to understand the cultural and institutional practices of science and technology. Technology and science both drive and are driven by socioeconomic and cultural change. Little in our lives is unaffected by "technoscience": the toys children play with, the scale of habitus and identity, the substances we eat, entertainment sports, the distribution of our friendships and the sources of our information, the illnesses we get and the treatments they receive, how we make love and how we make war.

PREREQUISITES: One SOSA 1000 level course or FYP

FORMATS: Lecture

SOSA 3260 Deviance and Society: Making Norms, Regulating Difference

CREDIT HOURS: 3

This course examines how social norms are enforced—and what happens when they are broken. So many aspects of our lives are regulated by and measured against socially defined norms and standards, from our weight and sexual behavior, to how we dress and which substances we consume. But social norms get violated, too, and such 'deviance' has long been a preoccupation of sociologists and social anthropologists. What and who counts as deviant and how deviance is managed vary dramatically across historical periods, cultures, and regimes of social control. By applying social theories of deviance and normalization to case studies in health, law/crime, and morality, this course encourages students to think more critically about how and why our society responds to difference. In the first half of the course, we will focus on the concept of norms and on sociological approaches to theorizing deviance from social norms. In the second half of the course, our focus shifts to experiences and techniques of social control—the management of deviants and deviance.

PREREQUISITES: One SOSA 1000 level course or FYP

FORMATS: Lecture

SOSA 3275 Crime and Public Policy

CREDIT HOURS: 3

This course deals with the dynamics of change in the criminal justice system that reflect three major factors namely social movements (e.g. the victims movement, the women's movement), social forces (e.g. aging, multiculturalism), and internal processes (e.g. professionalism, rationalization). The course focuses on how outside pressures modify, and are channelled by, the criminal justice system. Approved with Law and Society minor.

PREREQUISITES: One SOSA 1000 level course or FYP

FORMATS: Lecture

SOSA 3281 Youth Crime

CREDIT HOURS: 3

This course deals with criminal offenses committed by young persons. Etiologies drawn from various disciplines are examined and evaluated. A secondary focus concerns the criminal justice system as it applies to young offenders. Approved with Law and Society minor.

PREREQUISITES: One SOSA 1000 level course or FYP

FORMATS: Lecture

SOSA 3284 Living in Cities

CREDIT HOURS: 3

A higher proportion of the world's population lives in cities now than at any time in history. What perspectives do anthropology and sociology offer on cities and their inhabitants? This course explores the social dynamics that constitute 'the city' and surveys how social scientists have studied and engaged with cities and city-dwellers. It approaches 'the city' both as a whole and through its constituent parts: people and places. Examples may be drawn from cities large and small, near and far - including Halifax.

PREREQUISITES: One SOSA 1000 level course or FYP or PLAN 2005.03

CROSSLISTED: GEOG 3284.03

FORMATS: Lecture | Seminar

SOSA 3285 Sociology of Law

CREDIT HOURS: 3

This course is a sociological examination of law both as a mechanism of social regulation and as a field of knowledge. It explores classical and contemporary critical and mainstream theoretical contributions to the Sociology of Law, as well as the relationship between social science and law. The primary focus is on law in Canadian society, with some comparative analysis of other state-based, Indigenous, and international legal systems. The course will include specific explorations into topics including the sociology of the courtroom, the sociology of rights, the sociology of law enforcement, and examinations of economic, racial, gendered, and colonial injustices in the structure and practice of law.

PREREQUISITES: One SOSA 1000 level course or FYP or LAWS 2510

FORMATS: Lecture

SOSA 3291 Corrections

CREDIT HOURS: 3

This course provides a sociological and criminological examination of the evolution of corrections and punishment in North America with a focus on the Canadian landscape. It will include the historical development, organization, and administration of correctional institutions, as well as the rehabilitation/treatment and restorative justice models. Students will also learn some of the contemporary issues regarding Canadian corrections and understand how various social structures impact these issues.

PREREQUISITES: One 1000 level SOSA course or FYP.

SOSA 3295 Society and the Police

CREDIT HOURS: 3

The police play an increasingly powerful role in the maintenance of social order in contemporary Canadian society. This course introduces students to sociological theory and research on: (a) the role of police in social development and social control; (b) the historical and political development of public policing; (c) the nature and structure of police work; (d) control and accountability and (e) selected issues in policing such as, policing the family, minorities and the police, community based policing and police discretion. Approved with Law and Society minor.

PREREQUISITES: One SOSA 1000 level course or FYP

FORMATS: Lecture

SOSA 3300 Community Research Workshop

CREDIT HOURS: 3

This course offers students the chance to engage in real, applied research under the close supervision of the instructor. It brings community groups, members, or agencies with an identifiable research request into the classroom so that students can collectively address some clearly defined research need. Tasks assigned for credit might include: delineating a researchable problem, selecting an appropriate methodology, designing research instruments (for example, interview or observation guide or surveys), conducting research, drawing conclusions, and presenting research findings. Students might work in teams on different aspects of the research. The course will close with a presentation of research findings back to the community partner.

PREREQUISITES: Any 1000 level SOSA or FYP and SOSA 2007.03: Thinking Sociologically AND SOSA 2008.03: Doing Sociology; or SOSA 2012.03: Thinking through Anthropology AND SOSA 2013.03: Anthropology in Practice or SOSA 2001.06: Ethnography in a Global Context or SOSA 2002.06: The Sociological Perspective: Thinking and Doing Sociology

FORMATS: Lecture

SOSA 3400 History of Anthropological Theory

CREDIT HOURS: 3

This course considers the foundations and development of social anthropology. Major theoretical schools and the work of prominent anthropologists in those schools are considered, including Cultural Evolution, Historical Particularism, Functionalism, Culture and Personality, Structuralism, Symbolism, Cultural Materialism, and the directions in which contemporary sociocultural anthropology point.

PREREQUISITES: Any 1000 level SOSA or FYP and SOSA 2007.03: Thinking Sociologically AND SOSA 2008.03: Doing Sociology; or SOSA 2012.03: Thinking through Anthropology AND SOSA 2013.03: Anthropology in Practice or SOSA 2001.06: Ethnography in a Global Context or SOSA 2002.06: The Sociological Perspective: Thinking and Doing Sociology

FORMATS: Lecture

SOSA 3401 History of Sociological Thought

CREDIT HOURS: 3

Towards the middle of the nineteenth century, a novel way of thinking about human existence began to emerge: that humans are social beings, their lives and thoughts bounded and patterned by their social environments. This approach formed the basis for a new discipline eventually named Sociology. This course focuses on the ideas of three of the main contributors to the new way of thinking, which remain especially relevant to the canon of sociological theory today: Marx, Durkheim, and Weber. The ways in which other early sociological theorists challenged and contributed to the canon will also be considered.

PREREQUISITES: Any 1000 level SOSA or FYP and SOSA 2007.03: Thinking Sociologically AND SOSA 2008.03: Doing Sociology; or SOSA 2012.03: Thinking through Anthropology AND SOSA 2013.03: Anthropology in Practice or SOSA 2001.06: Ethnography in a Global Context or SOSA 2002.06: The Sociological Perspective: Thinking and Doing Sociology

FORMATS: Lecture

SOSA 3402 Figuring Out Society

CREDIT HOURS: 3

This course provides an introduction to issues of research design, including the relationship of theory to the choice of methodology. Students are exposed to basic tools and procedures which will help them to analyze the numerical tables and graphs they may come across in sociological or anthropological journals. Other relevant issues will be included, such as, whether it is possible to achieve scientific objectivity when studying human behaviour. It is assumed students enrolled in this course possess basic computer skills.

PREREQUISITES: Any 1000 level SOSA or FYP and SOSA 2007.03: Thinking Sociologically AND SOSA 2008.03: Doing Sociology; or SOSA 2012.03: Thinking through Anthropology AND SOSA 2013.03: Anthropology in Practice or SOSA 2001.06: Ethnography in a Global Context or SOSA 2002.06: The Sociological Perspective: Thinking and Doing Sociology

FORMATS: Lecture

SOSA 3403 Qualitative and Field Methods

CREDIT HOURS: 3

Research is a craft requiring many skills. This course focuses on skills complementary to those discussed in SOSA 3402.03 (Figuring out Society). Topics may include- theory and the choice of method; applied social science; field work; ethnography; use of interpreters; interviewing; life histories; note taking; analysis of texts; feminist methodologies.

PREREQUISITES: Any 1000 level SOSA or FYP and SOSA 2007.03: Thinking Sociologically AND SOSA 2008.03: Doing Sociology; or SOSA 2012.03: Thinking through Anthropology AND SOSA 2013.03: Anthropology in Practice or SOSA 2001.06: Ethnography in a Global Context or SOSA 2002.06: The Sociological Perspective: Thinking and Doing Sociology

FORMATS: Lecture | Lab

SOSA 3405 Contemporary Social Theory

CREDIT HOURS: 3

A variety of approaches constitute theory in contemporary sociology. Among them are those called interactionist, ethnomethodological, structuralist, critical, feminist, rational choice, and post-modernist. This course considers the contributions of these approaches to the enterprise of modern sociology. What are the main premises of particular sociological theories? What are their implications for the study and understanding of the social world? What are the issues that evoke debate between different schools of theory?

PREREQUISITES: Any 1000 level SOSA or FYP and SOSA 2007.03: Thinking Sociologically AND SOSA 2008.03: Doing Sociology; or SOSA 2012.03: Thinking through Anthropology AND SOSA 2013.03: Anthropology in Practice or SOSA 2001.06: Ethnography in a Global Context or SOSA 2002.06: The Sociological Perspective: Thinking and Doing Sociology

FORMATS: Lecture

SOSA 4001 Quantitative Analysis for the Social Sciences I

CREDIT HOURS: 3

This course will introduce quantitative analysis. It will engage issues of research design, the relationship between samples and populations, statistics and inference, as well as basic tests of statistical significance. The course will also introduce tabular, graphical, and bi-variate linear analysis, using computer software. It will encourage secondary data analysis of available datasets, evaluation of surveys, and develop skills through a series of class projects.

PREREQUISITES: SOSA 3402.03 and fourth year Major or Honours standing

FORMATS: Seminar

SOSA 4002 Quantitative Analysis for the Social Sciences II

CREDIT HOURS: 3

This course will focus on the use of quantitative methods in social science research. It will introduce students to regression techniques and concentrate on the assumptions motivating quantitative analysis. The course will also look at regression diagnostics and critically weigh options available to researchers when "normal" assumptions are broken. The course will be split into lectures and computer labs using statistical software. The labs will apply methods covered in class and explore potential secondary data resources. The course will develop these skills through a series of class projects.

PREREQUISITES: SOSA 3402.03, SOSA 4001.03 and fourth year Major or Honours standing

FORMATS: Seminar

SOSA 4003 Contemporary Perspectives in Ethnography

CREDIT HOURS: 3

Ethnographies and critical writings which grapple with questions of theory and interpretation in a range of contexts - near and far, familiar and strange, local and global - will be examined in this course. Approved with International Development Studies.

PREREQUISITES: One SOSA 1000 level course or FYP; Any 1000 level SOSA or FYP and SOSA 2007.03: Thinking Sociologically AND SOSA 2008.03: Doing Sociology; or SOSA 2012.03: Thinking through Anthropology AND SOSA 2013.03: Anthropology in Practice or SOSA 2001.06: Ethnography in a Global Context or SOSA 2002.06: The Sociological Perspective: Thinking and Doing Sociology and fourth year Honours standing

RESTRICTIONS: Class: Earned Hours (120 & Over), Earned Hours (90-119) Major: Social Anthropology, Sociology
FORMATS: Seminar

SOSA 4004 Issues in Economy, Work and Development

CREDIT HOURS: 3

Each year, this "advanced issues" course focuses on a different specific topic within the general area. In past years topics have addressed how health is socially and culturally constructed, the differential social and cultural effects of health knowledges and power relationships, and how various perspectives on health are challenged from within and beyond the health professions. Consult Department for the specific topic.

PREREQUISITES: Fourth year Honours standing. Permission to register is subject to the discretion of the Instructor for students who are not SOSA Honours students

RESTRICTIONS: Class: Earned Hours (120 & Over), Earned Hours (90-119) Major: Social Anthropology, Sociology

FORMATS: Seminar

SOSA 4005 Issues in Social Justice and Inequality

CREDIT HOURS: 3

Each year, this "issues" course focuses on a different specific topic within the general area. In past years topics have addressed the social and moral problems of social inequalities of various kinds viewed in a context of global changes. Sample topics include but are not restricted to: gender, minority and class inequalities; struggles over rights; social movements; social scenarios surrounding citizenship, migration and immigration; multiculturalism; and border and security studies. Consult Department for specific topic.

PREREQUISITES: Fourth year Honours standing. Permission to register is subject to the discretion of the Instructor for students who are not SOSA Honours students

RESTRICTIONS: Class: Earned Hours (120 & Over), Earned Hours (90-119) Major: Social Anthropology, Sociology

FORMATS: Seminar

SOSA 4006 Issues in Critical Health Studies

CREDIT HOURS: 3

Each year, this "issues" course focuses on a different specific topic within the general area. In past years topics have addressed how health is socially and culturally constructed, the differential social and cultural affects of health knowledges and power relationships, and how various perspectives on health are challenged from within and beyond the health professions. Consult Department for the specific topic.

PREREQUISITES: Fourth year Honours standing. Permission to register is subject to the discretion of the Instructor for students who are not SOSA Honours students

RESTRICTIONS: Class: Earned Hours (120 & Over), Earned Hours (90-119) Major: Social Anthropology, Sociology

FORMATS: Seminar

SOSA 4012 Issues in Sociology and Social Anthropology

CREDIT HOURS: 3

Each year, this "issues" course focuses on a different specific topic within the general area. In past years topics have addressed how health is socially and culturally constructed, the differential social and cultural affects of health knowledges and power relationships, and how various perspectives on health are challenged from within and beyond the health professions. Consult Department for the specific topic.

PREREQUISITES: One SOSA 1000 level course or FYP and fourth year Major or Honours standing in Sociology and Social Anthropology

FORMATS: Seminar

SOSA 4013 Issues in Sociology and Social Anthropology

CREDIT HOURS: 3

Each year, this "issues" course focuses on a different specific topic within the general area. In past years topics have addressed how health is socially and culturally constructed, the differential social and cultural affects of health knowledges and power relationships, and how various perspectives on health are challenged from within and beyond the health professions. Consult Department for the specific topic.

PREREQUISITES: One SOSA 1000 level course or FYP and fourth year Major or Honours standing

SOSA 4014 Special Topics in Sociology and Social Anthropology

CREDIT HOURS: 3

This course consists of an intensive examination of a selected substantive issue within Sociology and Social Anthropology. The specific topic or research problem will vary from year to year. Students should check the note on the timetable or contact the department for details.

PREREQUISITES: One SOSA 1000 level course, or FYP and fourth year major or honours standing in SOSA

FORMATS: Lecture | Seminar

SOSA 4015 Special Topics in Sociology and Social Anthropology

CREDIT HOURS: 3

This course consists of an intensive examination of a selected substantive issue within Sociology and Social Anthropology. The specific topic or research problem will vary from year to year. Students should check the note on the timetable or contact the department for details.

PREREQUISITES: One SOSA 1000 level course, or FYP and fourth year major OR honours standing in SOSA

CROSSLISTED: INTD 4022.03

FORMATS: Lecture | Seminar

SOSA 4016 Special Topics in Sociology and Social Anthropology

CREDIT HOURS: 3

This course consists of an intensive examination of a selected substantive issue within Sociology and Social Anthropology. The specific topic or research problem will vary from year to year. Students should check the note on the timetable or contact the department for details.

PREREQUISITES: One SOSA 1000 level course, or FYP or fourth year major OR honours standing in SOSA

FORMATS: Lecture | Seminar

SOSA 4017 Special Topics in Sociology and Social Anthropology

CREDIT HOURS: 3

This course consists of an intensive examination of a selected substantive issue within Sociology and Social Anthropology. The specific topic or research problem will vary from year to year. Students should check the note on the timetable or contact the department for details.

PREREQUISITES: One SOSA 1000 level course, or FYP and fourth year major OR honours standing in SOSA

FORMATS: Lecture | Seminar

SOSA 4018 Special Topics in Sociology and Social Anthropology

CREDIT HOURS: 3

This course consists of an intensive examination of a selected substantive issue within Sociology and Social Anthropology. The specific topic or research problem will vary from year to year. Students should check the note on the timetable or contact the department for details.

PREREQUISITES: One SOSA 1000 level course, or FYP and fourth year major or honours standing in SOSA

FORMATS: Lecture

SOSA 4019 Special Topics in Sociology and Social Anthropology

This course consists of an intensive examination of a selected substantive issue within Sociology and Social Anthropology. The specific topic or research problem will vary from year to year. Students should check the note on the timetable or contact the department for details.

PREREQUISITES: One SOSA 1000 level course, or FYP and fourth year major or honours standing in SOSA

SOSA 4101 Honours Seminar in Social Anthropology

CREDIT HOURS: 3

This seminar provides an opportunity for students to engage in sustained investigative scholarship through independent research initiative. The first term concentrates on locating the student's work within a broader set of theoretical and methodological debates in the discipline, while the second term is devoted to students' research and writing activities in preparing the thesis required for honours graduation. In the second term, class time is used for students to make "in progress" reports and presentations about their chosen topics. The course carries two separate grades, one for the course and the other for the thesis, appearing on the transcript as "honours qualifying examination" (a University requirement for all honours students SOSA 8880.00).

CALENDAR NOTES: Credit can only be given for this course if both it and SOSA 4102.03 are completed in consecutive terms.

PREREQUISITES: Honours registration in Social Anthropology and Any 1000 level SOSA or FYP and SOSA 2007.03: Thinking Sociologically AND SOSA 2008.03: Doing Sociology; or SOSA 2012.03: Thinking through Anthropology AND SOSA 2013.03: Anthropology in Practice or SOSA 2001.06:

Ethnography in a Global Context or SOSA 2002.06: The Sociological Perspective: Thinking and Doing Sociology, and two of SOSA 3400.03, SOSA 3402.03 and 3403.03 or permission of the instructor.

FORMATS: Seminar

SOSA 4102 Honours Seminar in Social Anthropology

CREDIT HOURS: 3

This seminar provides an opportunity for students to engage in sustained investigative scholarship through independent research initiative. The first term concentrates on locating the student's work within a broader set of theoretical and methodological debates in the discipline, while the second term is devoted to students' research and writing activities in preparing the thesis required for honours graduation. In the second term, class time is used for students to make "in progress" reports and presentations about their chosen topics. The course carries two separate grades, one for the course and the other for the thesis, appearing on the transcript as "honours qualifying examination" (a University requirement for all honours students SOSA 8880.00).

CALENDAR NOTES: Credit can only be given for this course if both it and SOSA 4101.03 are completed in consecutive terms.

PREREQUISITES: Honours registration in Social Anthropology and Any 1000 level SOSA or FYP and SOSA 2007.03: Thinking Sociologically AND SOSA 2008.03: Doing Sociology; or SOSA 2012.03: Thinking through Anthropology AND SOSA 2013.03: Anthropology in Practice or SOSA 2001.06: Ethnography in a Global Context or SOSA 2002.06: The Sociological Perspective: Thinking and Doing Sociology, and two of SOSA 3400.03, SOSA 3402.03 and 3403.03 or permission of the instructor.

Introduction

Spanish is the most widely spoken language in the world after Chinese and English. In 2015 there were nearly 470 million native speakers of Spanish living in 22 countries. If you add 21 million foreign language students world wide, and those with limited knowledge of Spanish, the number rises to 559 million. In fact, 6.7% of the world's population already speaks Spanish and it is expected that this figure will reach 7.5% by 2030. Within four generations it is expected that 10% of the population will understand Spanish. Furthermore, Spanish is the third most commonly used language online, with 7.9% of Internet users communicating in Spanish.

A degree in Spanish and Latin American Studies from Dalhousie University will allow you to engage with this growing global community. Our courses provide a solid foundation for anyone wanting to experience the diversity of the Hispanic world. We offer language course that cater from beginners to the most advanced, as well as classes in translation, Spanish and Latin American civilization, history, culture, politics, literature and film.

You do not need to major in Spanish in order to take advantage of our program. Many students take out classes to complement degrees in other disciplines. Spanish language skills and knowledge of Latin America's social and political history and culture can be tremendous assets to anyone studying international business or development, as well as anyone interested in working with government agencies or non-profit organizations.

For general information on Bachelor of Arts program requirements, see the [College of Arts and Science](#) section of the Academic Calendar.

Diplomas of Spanish as a Foreign Language (DELEs)

The Diploma of Spanish as a Foreign Language (DELE) is the official accreditation of the degree of fluency of the Spanish language, issued and recognized by the Spanish Ministry of Education, Culture and Sport.

The Instituto Cervantes is in charge of organizing the exams, while the University of Salamanca is in charge of the preparation, correction and final evaluation of all the tests. The exam tests your ability to read, write, speak and understand Spanish. There are six levels of DELEs offered that match the divisions determined by the Common European Framework of Reference for Languages:

Diploma de Español A1

Beginner level: You can understand and use daily expressions frequently used in any part of the Spanish-speaking world, aimed at satisfying immediate needs; asking and giving basic personal information about yourself and daily life, and interacting on a basic level with speakers, whenever they are speaking slowly and clearly and are willing to cooperate.

Diploma de Español A2

Elementary level: You are capable of understanding daily phrases and expressions frequently used related to areas of experience that are particularly relevant to you; basic information about yourself and your family, shopping, places of interest, occupations, etc.

Diploma de Español B1

Pre-intermediate/threshold level: You have sufficient knowledge of the language to allow control in situations which require a basic use of the language.

Diploma de Español B2

Intermediate level: You have the necessary knowledge of the language to allow communication in everyday situations which do not require specialized terms.

Diploma de Español C1

Upper intermediate/proficiency level: You have the ability to cope in common situations of daily life which require a specialized use of the language.

Diploma de Español C2

Mastery/advanced level: You are able to communicate in all situations requiring advanced use of the language and knowledge of cultural background.

The exams are offered in November and May in more than 50 countries around the world. The Department of Spanish and Latin American Studies organizes the examinations at Dalhousie every spring.

For more information about the format of the exam, dates and application deadlines, contact the Spanish Department DELE coordinator.

BA (120 credit hour) Major in Spanish

In addition to the general degree requirements, students need a minimum of 36 credit hours, a maximum of 54 credit hours in Spanish. At least 18 of these credit hours must be at the 3000 level or higher.

Requirements:

- SPAN 2021.03: Intermediate Spanish
- SPAN 2022.03: Advanced Intermediate Spanish
- SPAN 2090.03: Introduction to Hispanic Literary Study (this does not constitute your literature requirement)
- SPAN 3020.03: Translation
- SPAN 3035.03: Advanced Spanish I
- SPAN 3036.03: Advanced Spanish II
- Six credit hours in Spanish or Spanish-American Literature (3000 level or higher)
- Six credit hours of Spanish Civilization, Spanish-American Civilization or Hispanic Culture (this includes SPAN 2040, SPAN 2069, SPAN 2070, SPAN 2100, SPAN 2105, SPAN 2109, SPAN 2110, SPAN 2130, SPAN 2150, SPAN 2155, SPAN 2200)
- Six additional credit hours of Spanish (including three credit hours at the 3000 level or higher)

BA (120 credit hour) Double Major in Spanish

In addition to the general degree requirements, students need a combination of 60 credit hours, with a minimum of 30 and a maximum of 48 credit hours in Spanish. At least 18 of these credit hours must be at the 3000 level or higher.

Requirements:

- SPAN 2021.03: Intermediate Spanish
- SPAN 2022.03: Advanced Intermediate Spanish
- SPAN 2090.03: Introduction to Hispanic Literary Study (this does not constitute your literature requirement)

- SPAN 3020.03: Translation
- SPAN 3035.03: Advanced Spanish I
- SPAN 3036.03: Advanced Spanish II
- Three credit hours in Spanish or Spanish-American Literature (3000 level or higher)
- Three credit hours in Spanish Civilization, Spanish-American Civilization or Hispanic Culture (this includes SPAN 2040, SPAN 2069, SPAN 2070, SPAN 2100, SPAN 2105, SPAN 2109, SPAN 2110, SPAN 2130, SPAN 2150, SPAN 2155, SPAN 2200)
- Six additional credit hours in Spanish at the 3000 level or higher

BA with Honours in Spanish

Potential Honours applicants are encouraged to consult the Department's Undergraduate Advisor during their second year of study. Deadline for application should be three semesters before your graduation.

Students must meet the Faculty degree requirements which include a minimum of 54 and a maximum of 66 credit hours beyond the 1000 level in Spanish, including 18 credit hours at the 3000 level or higher.

Requirements:

- SPAN 2021.03: Intermediate Spanish
- SPAN 2022.03: Advanced Intermediate Spanish
- SPAN 2090.03: Introduction to Hispanic Literary Study (this does not constitute your literature requirement)
- SPAN 3020.03: Translation
- SPAN 3035.03: Advanced Spanish I
- SPAN 3036.03: Advanced Spanish II
- Six credit hours in Spanish or Spanish-American Literature (3000 level or higher)
- Six credit hours of Spanish Civilization, Spanish-American Civilization or Hispanic Culture (this includes SPAN 2040, SPAN 2069, SPAN 2070, SPAN 2100, SPAN 2105, SPAN 2109, SPAN 2110, SPAN 2130, SPAN 2150, SPAN 2155, SPAN 2200)
- SPAN 4980.03: Honours Reading Class. Student must complete an Honours Thesis in Spanish
- 21 additional credit hours in Spanish

BA with Combined Honours

Students must meet the Faculty degree requirements which include a minimum of 66 and a maximum of 84 credit hours beyond the 1000 level in two allied subjects. A minimum of 30 and a maximum of 48 credit hours may be completed in each subject, including 18 credit hours beyond the 2000 level in each.

If Spanish is your primary major, a minimum of 36 credit hours in Spanish is required (including an honour's thesis).

Requirements (if Spanish is your primary major):

- SPAN 2021.03: Intermediate Spanish
- SPAN 2022.03: Advanced Intermediate Spanish
- SPAN 2090.03: Introduction to Hispanic Literary Study (this does not constitute your literature requirement)
- SPAN 3020.03: Translation
- SPAN 3035.03: Advanced Spanish I
- SPAN 3036.03: Advanced Spanish II
- Six credit hours in Spanish or Spanish-American Literature (3000 level or higher)
- Six credit hours of Spanish Civilization, Spanish-American Civilization or Hispanic Culture (this includes SPAN 2040, SPAN 2069, SPAN 2070, SPAN 2100, SPAN 2105, SPAN 2109, SPAN 2110, SPAN 2130, SPAN 2150, SPAN 2155, SPAN 2200)
- SPAN 4980.03: Honours Reading Class. Student must complete an Honours Thesis in Spanish.
- Three additional credit hours in Spanish

Requirements (if Spanish is your secondary major):

- SPAN 2021.03: Intermediate Spanish
- SPAN 2022.03: Advanced Intermediate Spanish

- SPAN 2090.03: Introduction to Hispanic Literary Study (this does not constitute your literature requirement)
- SPAN 3020.03: Translation
- SPAN 3035.03: Advanced Spanish I
- SPAN 3036.03: Advanced Spanish II
- Three credit hours in Spanish or Spanish-American Literature (3000 level or higher)
- Three credit hours in Spanish Civilization, Spanish-American Civilization or Hispanic Culture (this includes SPAN 2040, SPAN 2069, SPAN 2070, SPAN 2100, SPAN 2105, SPAN 2109, SPAN 2110, SPAN 2130, SPAN 2150, SPAN 2155, SPAN 2200)
- Six additional credit hours of Spanish at the 3000 or 4000 level

BA (90 credit hour) Minor in Spanish

See the [Minor in Spanish](#) section of this Calendar

Minor in Spanish

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A BA (90 credit hour) degree program with a minor in Spanish is also available.

Students must complete a minimum of 18 to a maximum of 27 credit hours above the 1000 level.

Requirements:

- SPAN 2021.03: Intermediate Spanish
- SPAN 2022.03: Advanced Intermediate Spanish
- SPAN 3035.03: Advanced Spanish I
- SPAN 3036.03: Advanced Spanish II
- SPAN 3020.03: Translation
- SPAN 3190.03 : Conversation & Expression
- SPAN 2005.03 (taken in the same academic year as SPAN 2021.03 and SPAN 2022.03) or SPAN 3005.03

Contact [Spanish and Latin American Studies](#) for more information.

Minor in Hispanic Cultures

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Requirements

Students must complete a minimum of 18 to a maximum of 27 credit hours above the 1000 level, including:

- SPAN 2100.03: Evolving Spanish
- SPAN 2200.03: Latin American Culture

And any 12 credit hours from:

- SPAN 2040.03: Spanish for Business
- SPAN 2069.03: Mexico and Central America to 1979: From Conquest to Revolution
- SPAN 2070.03: Mexico and Central America since: From Revolution to Drug Wars
- SPAN 2105.03: Catalan Language and Culture
- SPAN 2109.03: Cuba from Colonial Times to 1961
- SPAN 2110.03: Cuba in Revolution, 1961- the Present
- SPAN 2130.03: Latin American dictators: From Fact to Fiction
- SPAN 2150.03: Hispanic Identities Through Film: Memory and Marginalized Communities

- SPAN 2155.03: Hispanic Identities Through Film: Immigration, Exile And Globalization
- SPAN 3095.03: Evolution of Spanish

Contact [Spanish and Latin American Studies](#) for more information.

Minor in Hispanic Literature

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Requirements

Students must complete a minimum of 21 to a maximum of 27 credit hours above the 1000 level, including:

- SPAN 2021.03: Intermediate Spanish
- SPAN 2022.03: Advanced Intermediate Spanish
- SPAN 2090.03: Introduction to Hispanic Literary Study
- SPAN 3505.03: Introduction to Spanish Literature
- SPAN 3515.03: Introduction to Latin American Literature
- SPAN 3215.03: Seminario de literatura latinoamericana or SPAN 3510.03: Literatura hispanoamericana contemporanea
- SPAN 3500.03: Literatura espanola contemporanea or SPAN 3525.03: Historia e historias: la literatura como alternativa

Contact [Spanish and Latin American Studies](#) for more information.

Minor in Latin American Studies

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Requirements

Students seeking a minor in Latin American Studies must complete a minimum of 24 to a maximum of 27 credit hours, including a minimum of 3 credit hours at the 3000 level or above.

Must include:

- SPAN 2021.03: Intermediate Spanish
- SPAN 2022.03: Advanced Intermediate Spanish

List A: six credit hours from the following:

- SPAN 2069.03: Mexico and Central America to 1979. From Conquest to Revolution
- SPAN 2070.03: Mexico and Central America: From Revolution to Drug Wars
- SPAN 2109.03: Cuba from Colonial Times to 1961
- SPAN 2110.03: Cuba in Revolution, 1961-the Present
- SPAN 2130.03: Latin American dictators: From Fact to Fiction
- SPAN 2200.03: Latin American Culture: From the Maya to the 21st Century
- SPAN 3515.03: Intro to Latin American Literature
- SPAN 3510.03: Literatura hispanoamericana contemporanea
- SPAN 3408.03: The Cuban Development Model

List B: 12 credit hours from the following:

- HIST 2381.03: Latin America
- HIST 2386.03: Colonial Latin America
- HIST 2387.03: Latin America Since Independence
- HIST 3390.03: Latin America: Revolution and Repression
- HIST 4300.03: Topics in Latin American History

- INTD 3302.03: Social Development in Cuba
- INTD 3303.03: The Political Economy of Cuba
- INTD 3304.03: Sustainable Development in Cuba
- INTD 3310.06: Cuban Culture and Society
- INTD 3401.03: Seminar in Development Studies
- POLI 3360.03: Politics in Latin America
- SOSA 3168.03/GWST 3168.03: Issues in Latin American Society

Programs and Courses Abroad

The Salamanca Program at the Universidad de Salamanca

The Salamanca Program is a special inter-disciplinary program of instruction designed to allow Dalhousie students to undertake both an intensive study of the Spanish language and courses in Spanish culture. Students must have completed SPAN 2021.03: Intermediate Spanish and SPAN 2022.03: Advanced Intermediate Spanish, or equivalent with at least a standing of B-. The program takes place during the fall, winter, spring or summer term, and is offered at the Universidad de Salamanca in Salamanca, Spain. Dalhousie University will grant 18 credit hours to those students who successfully complete their courses in Spain. Enquires and applications should be addressed to the coordinator of the Program. Students will register via Letter of Permission and will receive grades on a Pass/Fail basis. The courses will be noted on the student's academic record as a transfer credit.

Students must take the equivalent of three full courses.

Compulsory courses:

- Lengua española (nine credit hours)

Students will then select ONE course from each of the following three Options.

Option 1

- Conversación y redacción (three credit hours)
- La mujer en la historia de España (three credit hours)
- Historia de la España contemporánea (three credit hours)

Option 2

- Cultura española (three credit hours)
- Literatura española e hispanoamericana (three credit hours)
- El mundo árabe en el mundo hispánico (three credit hours)
- Destrezas orales y escritas (three credit hours)

Option 3

- Historia del arte español (three credit hours)
- Español de los negocios (three credit hours)
- Cine español e hispanoamericano (three credit hours)

The Cuba Program at FLACSO/Havana

This program is given by FLACSO/Havana and generally takes place in the winter term. All course work is conducted in the Spanish language. Students must have completed SPAN 2021.03: Intermediate Spanish and SPAN 2022.03: Advanced Intermediate Spanish, or equivalent with at least a standing of B-. See course descriptions for INTD 3301.03, INTD 3302.03, INTD 3303.03, INTD 3304.03, and INTD 3306.06 in the International Development Studies Section of this Calendar. Students are able to receive either INTD or SPAN credits. For more information, please contact the [Department of International Development Studies](#).

The Mexico Program at the University of Campeche

This program, designed for students with a minimum of two years' university-level Spanish, is located at the Universidad Autónoma de Campeche, in the southwest of the Yucatán peninsula, in Mexico. Students must have completed SPAN 2021.03: Intermediate Spanish and SPAN 2022.03: Advanced Intermediate Spanish, or equivalent with at least a standing of B-. It started in the Fall of 1998, and is administered by the university's Centro de Español y Maya. Students can be located with Mexican families if they desire. They are also encouraged to travel and see the superb Maya architectural sites in the Yucatán region. The city of Campeche, situated on the Caribbean coast, has a population of approximately 190,000. It was founded in 1540. The cities of Halifax and Campeche twinned in 1998, and there have been several educational, political, and commercial exchanges. This program is offered in the fall semester only.

Students will register for courses via Letter of Permission and will receive grades on a Pass/Fail basis. The courses will be noted on the student's academic record as a transfer credit.

Courses taken at the University of Campeche are:

- Gramática Intensiva (six credit hours)
- Vocabulario Intensivo (six credit hours)
- Historia Mexicana (six credit hours)

The Peru Program at the Pontificia Universidad Católica del Perú

This program takes place during four weeks in July in Lima, at the Pontificia Universidad Católica del Perú (PUCP). Founded in 1917, today it is among the thirty most important universities in Latin America and occupies the first position in Peru. Students will study Spanish and Peruvian culture courses. The program offers four visits to the main cultural attractions in Lima to provide the subject of discussion in the language course. Students will have a PUCP buddy service to help them adapt to the academic and social life at PUCP as well as to the city of Lima and enrich the learning experience of the Spanish language. Students will stay at Peruvian families' homes where they will find every amenity they need and receive breakfast and dinner. All classwork is conducted in Spanish.

Students must have completed SPAN 2021.03: Intermediate Spanish and SPAN 2022.03: Advanced Intermediate Spanish, or equivalent with at least a standing of B-.

Dalhousie University grants up to 9 credit hours to those students who successfully complete their classes in Peru. Students will register via Letter of Permission and grades will be entered on a Pass/Fail basis. Courses will appear on the student's academic record as transfer credits.

Students will register for the following courses for a total of 9 credit hours:

- Gramática español a nivel intermedio o avanzado (three credit hours)
- Conversación en español nivel intermedio o avanzado (three credit hours)
- Introducción a los Estudios Peruanos, solo nivel avanzado (three credit hours)

SPAN 3310.06: Cuban Culture and Society

See course description for INTD 3310.06 in the [International Development Studies](#) section of this calendar.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

Courses Offered on Campus

PLEASE NOTE:

If you have taken two or more years of Spanish in High School or have studied it previously in another institution, you need to take the **Spanish Placement Test (SPT)**.

The **Spanish Placement Test** is a one and a half hour standardized multiple-choice test that is designed to assess your current level in Spanish and place you in the course better suited to your needs. Students who wish to register for a language course before taking this test may do so, but care should be taken in choosing it. Please read the course descriptions below carefully and try not to underestimate your knowledge.

This test is administered online. Please contact our Academic Advisor (spanish.advising@dal.ca) to register for the test. Scores from this test are normally available within a day, and are considered valid for up to a year from the date it was taken.

Students who are taking or have taken any language course at Dalhousie do NOT need to take this test.

Not all courses are offered every year. Please consult the current timetable.

Course Descriptions

SPAN 1015 Spanish on the Go

CREDIT HOURS: 3

SPAN 1015 is a hands-on, practical approach to learning Spanish. Students will gain a working knowledge of Spanish by engaging in communicative activities, role play, and task-based activities. The objective of this class is to facilitate students' functional ability in Spanish and to enable them to participate in various everyday activities when they are in a Spanish-speaking context.

EXCLUSIONS: Cannot be taken for credit after SPAN 1020, SPAN 1021, SPAN 1022, SPAN 1025, or any other 2000-level course.

SPAN 1021 Beginning Spanish I

CREDIT HOURS: 3

In SPAN 1021 students will acquire a general knowledge of Spanish by engaging in communicative and task-based activities that focus on developing speaking, listening, reading and writing skills. This course follows the A1 level of the Common European Framework of Reference for Languages (CEFR). Students will gain competence in grammatical structures, vocabulary, pronunciation and cultural awareness.

RESTRICTIONS: In order to fulfill the Bachelor of Arts Language Requirement, students are required to complete the sequence SPAN 1021/1022 within three semesters. Additionally, neither SPAN 1021 nor 1022 can be combined with courses from another department in order to fulfill the Bachelor of Arts Language Requirement.

EXCLUSIONS: SPAN 1020.06, SPAN 1035.06

FORMATS: Lecture

SPAN 1022 Beginning Spanish II

CREDIT HOURS: 3

This course is the continuation of SPAN 1021, and should be taken sequentially or in cases where students have prior knowledge of the language and have been placed at this level by the Academic Advisor. The course follows the A2 level of the Common European Framework of Reference for Languages (CEFR). Students will gain competence in grammatical structures, vocabulary, pronunciation and cultural awareness through communicative and task-based activities that focus on developing speaking, listening, reading and writing skills.

PREREQUISITES: SPAN 1021 or equivalent

RESTRICTIONS: In order to fulfill the Bachelor of Arts Language Requirement, students are required to complete the sequence SPAN 1021/1022 within three semesters. Additionally, neither SPAN 1021 nor 1022 can be combined with courses from another department in order to fulfill the Bachelor of Arts Language Requirement.

EXCLUSIONS: SPAN 1020.06, SPAN 1025.03, SPAN 1035.06

FORMATS: Lecture

SPAN 1035 Accelerated Beginning Spanish

CREDIT HOURS: 6

SPAN 1035 is a combination of SPAN 1021 and SPAN 1022 into one semester. This course is designed for students with some knowledge of Spanish but whose level of preparation is not sufficient to enroll in SPAN 2021 Intermediate Spanish I. Students with no previous knowledge of Spanish, but highly motivated, can also take this accelerated course as the language instruction starts from the beginning. This course will cover all fundamental aspects of the language and follows the A1/A2 standard levels of the Common European Framework of Reference for Languages (CEFR). Students will gain competence in grammatical structures, vocabulary, pronunciation and cultural awareness through communicative and task-based activities that focus on developing speaking, listening, reading and writing skills. This course fulfills the Bachelor of Arts Language requirement.

EXCLUSIONS: SPAN 1021 and SPAN 1022

FORMATS: Lecture

SPAN 2005 Español Práctico - Nivel Intermedio

CREDIT HOURS: 3

The objective of this course is to continue developing the four language skills in a practical setting. This course is required for the Minor in Spanish Language and should be taken in the same academic year as SPAN 2021 and/or SPAN 2022. Students planning to take any of our programs abroad or the Diploma of Spanish as a Foreign Language (DELE) (B1 level) will find the course particularly useful.

PREREQUISITES: Span 1022, SPAN 1035, equivalent or instructor's permission

RESTRICTIONS: May not be taken after SPAN 2022 or any Spanish 3000 level language course

SPAN 2021 Intermediate Spanish I

CREDIT HOURS: 3

In SPAN 2021 students will acquire an intermediate knowledge of Spanish equivalent to a B1.1 level, by adopting an action-oriented approach and engaging in communicative task based activities. This course follows the system for learning, teaching and assessing languages established by the Common European Framework of Reference for Languages (CEFRL) that defines competencies that students need to master in the following categories: Comprehension (Listening and Reading) and Expression (Interaction, Oral and Writing).

PREREQUISITES: SPAN 1022 or SPAN 1035 or equivalent.

EXCLUSIONS: Students who complete SPAN 2021 may not enrol in 1000-level Spanish language courses.

FORMATS: Lecture

SPAN 2022 Intermediate Spanish II

CREDIT HOURS: 3

This course is the continuation of SPAN 2021, and should be taken sequentially or in cases where students have prior knowledge of the language and have been placed at this level by the Academic Advisor. Students will acquire an advanced intermediate level of knowledge of Spanish equivalent to a B1.2 level, by adopting an action-oriented approach and engaging in communicative task based activities. This course follows the system for learning, teaching and assessing languages established by the Common European Framework of Reference for Languages (CEFRL) that defines competencies that students need to master in the following categories: Comprehension (Listening and Reading) and Expression (Interaction, Oral and Writing).

PREREQUISITES: SPAN 2021 or equivalent knowledge.

RESTRICTIONS: In order to fulfill the Bachelor of Arts Language Requirement, students are required to complete the sequence SPAN 2021/2022 within three semesters. Additionally, neither SPAN 2020 nor 2025 can be combined with courses from another department in order to fulfill the Bachelor of Arts Language Requirement.

EXCLUSIONS: Students who complete SPAN 2022 may not enrol in SPAN 2021.

FORMATS: Lecture

SPAN 2035 Accelerated Intermediate Spanish

CREDIT HOURS: 6

SPAN 2035 is a combination of SPAN 2021 and SPAN 2022 into one semester. This course is designed for students with an elementary knowledge of Spanish but whose level of preparation is not sufficient to enroll in SPAN 3035 Advanced Spanish I. Students with the equivalent of an A2 level, but highly motivated, can also take this accelerated course. This course will cover all aspects of the language and follows the B1 standard level of the Common European Framework of Reference for Languages (CEFR) that defines the competencies the students need to master in the following categories: Comprehension (Listening and Reading) and Expression (Interaction, Oral and Writing). This course fulfills the Bachelor of Arts Language requirement.

PREREQUISITES: SPAN 1022, SPAN 1035 or equivalent.

EXCLUSIONS: SPAN 2021 and SPAN 2022

FORMATS: Lecture

SPAN 2040 Spanish for Business

CREDIT HOURS: 3

Spanish for business and international trade. Introduction to the Spanish of international business and to the social cultural norms of negotiation in Spanish-speaking countries.

PREREQUISITES: SPAN 2022, SPAN 2035, or equivalent

FORMATS: Lecture | Discussion

SPAN 2069 Mexico and Central America to 1979: From Conquest to Revolution

CREDIT HOURS: 3

Events in Central America are frequently covered in our media, causing people to believe that "the unrest" there is recent. This course seeks to examine the historical roots of the conflict from the colonial period until the 1970s. The aim of the course is to provide students with a background knowledge of this area, so that they can better understand current developments there.

PREREQUISITES: No prerequisite. Open to students in all departments. No knowledge of Spanish necessary

CROSSLISTED: HIST 2382.03

FORMATS: Lecture | Discussion

SPAN 2070 Mexico and Central America since: From Revolution to Drug Wars

CREDIT HOURS: 3

Following an examination of the indigenous heritage, and the colonial legacy of the conquistadors, the course deals principally with the contemporary period, examining the Mexican Revolution and its aftermath, Nicaragua under the Sandinistas, the impact of NAFTA, the "democracy" of Mexico, gang wars and narcotics, the U.S. role in the region, the human rights situation in Central America, and probable developments in the region. The course is designed to provide an understanding of the contemporary reality of this volatile region.

PREREQUISITES: No prerequisite. Open to students in all departments. No knowledge of Spanish necessary

CROSSLISTED: HIST 2383.03, GEOG 2070.03

FORMATS: Lecture | Discussion

SPAN 2090 Introduction to Hispanic Literary Study

CREDIT HOURS: 3

This course will introduce students to literary analysis and critical writing in Spanish. Readings will include works from a variety of periods, genres and regions.

CALENDAR NOTES: Does not fulfill the literature requirement for any Spanish degree program.

PREREQUISITES: SPAN 2022, SPAN 2035, equivalent or instructor's permission

FORMATS: Lecture

SPAN 2100 Evolving Spain: History, Culture, Society

CREDIT HOURS: 3

This course provides an overview of the major historical, sociopolitical and cultural elements, from the Middle Ages to the present, that formed contemporary Spain.

PREREQUISITES: No prerequisite. Open to students in all departments. No knowledge of Spanish necessary.

CROSSLISTED: HIST 2065.03

FORMATS: Lecture | Discussion

SPAN 2105 Catalan Language and Culture

CREDIT HOURS: 3

Introduction to Catalan, the Romance language spoken by some 8 million people in northeastern Spain (Catalonia & Valencia), southern France, the Balearic Islands and Sardinia. Elementary Catalan language and an introduction to Catalan culture and history.

PREREQUISITES: Two years' study of any Romance language, or permission of instructor

FORMATS: Lecture | Discussion

SPAN 2109 Cuba from Colonial Times to 1961

CREDIT HOURS: 3

While many people are aware of the impact of the Cuban Revolution of 1959, few are aware of the kind of society that existed in Cuba beforehand. This course seeks to examine the historical roots of the country from the colonial period until the 1960's, with particular attention being paid to socio-cultural aspects. The objective is to provide students with a background knowledge of this country and its current reality.

PREREQUISITES: No prerequisite. Open to students in all departments. No knowledge of Spanish necessary

CROSSLISTED: HIST 2384.03

FORMATS: Lecture | Discussion

SPAN 2110 Cuba in Revolution, 1961- the Present

CREDIT HOURS: 3

Cuba, the only Communist society in the Western Hemisphere, has undergone a dramatic political and economic transformation. The Revolution has also brought about changes in education, the arts, the role of women, race relations, and athletics. The course focuses on the problems and achievements of the Revolution, the peculiarities of Communism in a Caribbean society, and its effect on literature and the arts. Particular attention is spent on the post-1990 period.

PREREQUISITES: No prerequisite. Open to students in all departments. No knowledge of Spanish necessary

CROSSLISTED: HIST 2385.03

FORMATS: Lecture | Discussion

SPAN 2130 Latin American dictators: From Fact to Fiction

CREDIT HOURS: 3

The history of Latin America since Independence has been characterized by the rise to power of countless dictators. Some of the best Latin American novels portray these almost mythical figures who to this day wield absolute power in many countries. The course examines the literature and history of this phenomenon with particular attention to the twentieth century, and attempts to discover its roots in militarism, underdevelopment, and imperialism.

PREREQUISITES: No prerequisite. Open to students in all departments. No knowledge of Spanish necessary

CROSSLISTED: HIST 2388.03

FORMATS: Lecture | Discussion

SPAN 2150 HISPANIC IDENTITIES THROUGH FILM: MEMORY AND MARGINALIZED COMMUNITIES

CREDIT HOURS: 3

This course focuses on the concept of Hispanic Identity, through the study of contemporary and historical sociocultural and geopolitical issues, as manifested in cinema from around the Spanish-speaking world. The study of memory and forgetfulness, marginalized identities and cultural and societal identity and other fundamentals will be central to this course. This course is an intermediate conversation course designed to advance skills in oral communication, intercultural competence, critical thinking skills and film analysis reinforced by grammar review and written assignments.

PREREQUISITES: SPAN 2022, SPAN 2035, or equivalent

FORMATS: Lecture | Discussion

SPAN 2155 HISPANIC IDENTITIES THROUGH FILM: IMMIGRATION, EXILE AND GLOBALIZATION

CREDIT HOURS: 3

This course focuses on the concept of Hispanic Identity, through the study of contemporary and historical sociocultural and geopolitical issues, as manifested in cinema from around the Spanish-speaking world. The study of immigration and exile, globalization and cultural and societal identity and other fundamentals will be central to this course. This course is an intermediate conversation course designed to advance skills in oral communication, intercultural competence, critical thinking skills and film analysis reinforced by grammar review and written assignments.

PREREQUISITES: SPAN 2022, SPAN 2035, or equivalent

FORMATS: Lecture

SPAN 2200 Evolving Latin America

CREDIT HOURS: 3

The aim of this course is to provide basic understanding of this varied and historic area. This course examines the development of Latin America from pre-Columbian times to the present. It also examines the way in which the reality of Latin America has shaped a continental cultural identity.

PREREQUISITES: No prerequisite. Open to students in all departments. No knowledge of Spanish necessary.

FORMATS: Lecture | Discussion

SPAN 3000 Language and Culture Through Telecollaboration

CREDIT HOURS: 3

Connect with native Spanish speakers at the University of València (Spain) using digital communication platforms. Examine issues of social relevance across cultures and share findings through digital storytelling. Participate in a unique intercultural exchange and further oral and written competencies. Explore the practical applications of the transferable and marketable skills you have developed.

PREREQUISITES: SPAN 2020.06, SPAN 2022.03, SPAN 2035.06 or equivalent

FORMATS: Lecture

SPAN 3005 Español Práctico - Nivel avanzado

CREDIT HOURS: 3

The objective of this course is to continue developing the four language skills in a practical setting. This course could be taken as part of the Minor in Spanish Language as well as a 3000 level elective for other Spanish degrees. It should be taken in the same academic year as Span 3035/3036. This course will be particularly useful to students planning to write the Diploma of Spanish as a Foreign Language (DELE)(B2 level)

PREREQUISITES: SPAN 2022, SPAN 2035 or equivalent

FORMATS: Lecture

SPAN 3020 Translation

CREDIT HOURS: 3

Exercises in translation, from Spanish to English. This course assists students to understand the basic strategies of translation.

PREREQUISITES: SPAN 2022, SPAN 2035 or equivalent

FORMATS: Lecture | Discussion

SPAN 3025 Traducción: Inglés-Español

CREDIT HOURS: 3

The objective of this course is to develop basic translation skills through the practice of translating English texts into Spanish. The approach would be methodological and practical: theoretical issues will be discussed to solve translation problems. After establishing the fundamental concepts, the course will progress to examine a series of important aspects of translation; cultural trans-position, phonic, graphic and prosodic problems, grammatical and lexical issues, language variety in texts, etc. Each aspect outlined will have a practical component in which students are given a concrete translation task to solve. Group and class discussions will follow. The aim of the course is to provide students with a general view of the mechanics of translation to then encourage the creative aspects of the process.

PREREQUISITES: SPAN 3035.03 or equivalent

FORMATS: Lecture | Discussion

SPAN 3035 Advanced Spanish I

CREDIT HOURS: 3

The objective of this course is to reinforce and expand students' skills in listening, speaking, reading, writing, integrated with an advanced grammar review and extended vocabulary.

PREREQUISITES: SPAN 2022, SPAN 2035 or equivalent

EXCLUSIONS: SPAN 3010.03, SPAN 3015.03, SPAN 3030.03, SPAN 3060.03

FORMATS: Lecture

SPAN 3036 Advanced Spanish II

CREDIT HOURS: 3

A continuation of SPAN 3035. The objective of this course is to reinforce and further students' skills in listening, speaking, reading, writing, integrated with an advanced grammar review and extended vocabulary.

PREREQUISITES: SPAN 3035.03. or equivalent

EXCLUSIONS: SPAN 3010.03, SPAN 3015.03, SPAN 3030.03, SPAN 3060.03

FORMATS: Lecture

SPAN 3190 Conversation & Expression

CREDIT HOURS: 3

This course is conducted in Spanish and engages students in conversation in a variety of formats toward the goal of further developing oral proficiency. We will aim to improve oral expression, conversation, and listening comprehension. Short essays or videos on topics of current interest are prepared outside of class and serve as the basis for general class discussions. Although the course deals mainly with conversation, many of the exercises will be directed toward oral practice of verb structure and tenses learned in the previous courses. Activities include improvisations and focus on small group and pair work as well as individual presentations. Students will strengthen oral skills and build vocabulary through practice in different types of discourse, including narration, description, critical commentary, debate, roll play, listening to music, reading newspapers and watching the news.

PREREQUISITES: SPAN 3035.03

FORMATS: Seminar | Discussion

SPAN 3215 Seminario de literatura latinoamericana

CREDIT HOURS: 3

This course studies the work of Latin American women writers. It seeks to introduce students to critical approaches and recurring themes in Latin American women's literature. Representative works are studied within their historical and cultural context. Readings include novels, short stories, plays and caricatures.

PREREQUISITES: SPAN 2090.03

FORMATS: Lecture | Discussion

SPAN 3310 Cuban Culture and Society

CREDIT HOURS: 6

See course description for INTD 3310.06 in the International Development Studies section of this calendar.

SPAN 3408 The Cuban Development Model

CREDIT HOURS: 3

This course examines the evolution of the Cuban development model, from the Conquest and colonization by the Spanish to the reforms of the early 21st Century. The objective is to develop an understanding of the various development strategies employed by Cuba, particularly since the revolution of 1959. When asked about the Cuban development model, most people nowadays would say "tourism". Thirty years ago it was sugar--as it had been from the beginning if the 16th Century. In fact Cuba obtains most of its hard currency from medical-related services--mainly from the exportation of medical services, but also from the sale of sophisticated biotechnological products. Cuba's approach has evolved dramatically in the last two decades, and particular attention will be paid to this period.

PREREQUISITES: No prerequisite. Open to students in all departments. No knowledge of Spanish necessary.
CROSSLISTED: INTD 3408.03
FORMATS: Lecture | Discussion

SPAN 3500 Literatura española contemporánea

CREDIT HOURS: 3

This course is a survey of the most important authors of Spanish contemporary literature. Students will study internationally well known writers. Areas of special focus may include the writings of Antonio Muñoz Molina and Eduardo Mendoza, both of whom are considered representative of the Spanish transition period. The aim of this course is to introduce students to a specific area of Spanish literature focusing on the historic context in which the novels are written.

PREREQUISITES: SPAN 2090.03

FORMATS: Lecture | Discussion

SPAN 3505 Introduction to Spanish Literature

CREDIT HOURS: 3

This course is an introduction to Spanish literature presenting selected works of prose, poetry and theater from Spain. This is a survey of literature from the Middle Ages to the 20th century. Entirely conducted in Spanish, normally taken in the second or third year of study, the everyday work in this class involves group discussion and lectures. The aim of this course is to introduce students to general notions of literary history and to the basic concepts involved in reading literary texts with particular emphasis on the development of both oral and written linguistic expression.

PREREQUISITES: SPAN 2090.03

EXCLUSIONS: SPAN 2500.03

FORMATS: Lecture | Discussion

SPAN 3510 Literatura hispanoamericana contemporánea

CREDIT HOURS: 3

This is a panoramic course that studies Latin American literature from the "boom" to the present. It is divided into five sections, each of which will focus on a literary genre: short stories, essays, journalism, theatre and novels.

PREREQUISITES: SPAN 2090.03

FORMATS: Lecture | Discussion

SPAN 3515 Introducción a la literatura latinoamericana (Intro to Latin American Literature)

CREDIT HOURS: 3

This is a panoramic course that surveys Latin American literature. It is based on a selection of prose and poetry from the most representative periods and authors, spanning from pre-Columbian times to the twentieth century.

PREREQUISITES: SPAN 2090.03

EXCLUSIONS: SPAN 2510.03

FORMATS: Lecture | Discussion

SPAN 3520 Topics in Culture & Identity in the Spanish-Speaking World

CREDIT HOURS: 3

A broad outline of the interaction between culture and identity in the Hispanic world. Focus will be on the end of the 19th and the 20th centuries, and the connection between artists and identity in relation to political, culture and social forces. Selected works of artistic expression (art, literature, music, etc.) become the point of departure for understanding the Spanish-speaking world. Specific topics may vary.

PREREQUISITES: SPAN 2090.03

FORMATS: Lecture | Discussion

SPAN 3525 Historia e historias: la literatura como alternativa

CREDIT HOURS: 3

This course is designed for advanced students who have taken the available courses at the 2000 level or equivalent. During this course students will explore the relationship between science and literature, especially subversive representations of History in fictional texts during the 20th and 21st centuries. Lectures will be organized on a chronological basis and will cover different Spanish-speaking cultural areas. The aim of this course is to introduce students to a specific area of Hispanic literature focusing on the historic facts included in novels and essays.

PREREQUISITES: SPAN 2090.03

FORMATS: Lecture | Discussion

SPAN 3905 Estudios hispánicos avanzados

CREDIT HOURS: 6

This course offers the student an opportunity to study aspects of Hispanic culture not already included in other language offerings or in literature courses more narrowly defined by period, genre, etc. It takes advantage of special research interest of staff or the unique expertise of visiting faculty to provide instruction not regularly available here.

PREREQUISITES: SPAN 2022, SPAN 2035 or equivalent

FORMATS: Lecture

SPAN 3920 Spanish in the Community: Experiential Learning

CREDIT HOURS: 3

Experiential learning combines formal learning with practical experience using the Spanish language; students are required to volunteer/intern for a minimum of 60 hours over the term, or approximately 4-5 hours per week. Students will also compile a portfolio under the supervision of the course instructor, to include relevant readings and assignments (these may include reading responses, reports, presentations, essays).

PREREQUISITES: SPAN 2022, SPAN 2035 or equivalent

FORMATS: Discussion

SPAN 3970 Lecturas dirigidas de literatura Hispanoamericana

CREDIT HOURS: 3

PREREQUISITES: SPAN 2090.03

SPAN 3975 Estudios hispánicos dirigidos

CREDIT HOURS: 3

SPAN 3980 Lecturas para especialistas

CREDIT HOURS: 3

SPAN 4510 Golden Age Poetry & Prose

CREDIT HOURS: 3

This course seeks to introduce students to the most important period in the Spanish literature, the Golden age, throughout the artistic work of Miguel de Cervantes, author of the well known Don Quixote, the first modern novel but also a hybrid piece of art which includes all the literary trends of its time: poetry, short stories and more. This course facilitates a close reading of Don Quixote in the artistic and historical context of renaissance and baroque Spain. The question of why Don Quixote is read today will be addressed throughout the course.

FORMATS: Lecture

SPAN 4980 Honours Reading Class

CREDIT HOURS: 3

PREREQUISITES: Only open to students in graduating year of Spanish Honours program.

SPAN 4981 Honours Reading Class I

CREDIT HOURS: 1.5

PREREQUISITES: Only open to students in graduating year of Spanish Honours program.

EXCLUSIONS: SPAN 4980.03 XY

Phone Number: (902) 494-3772
Fax Number: (902) 494-2801
Email Address: fspace@dal.ca
Website: dal.ca/performingarts

Introduction

Dalhousie enables you to study many aspects of theatre within the vibrant context of our multi-disciplinary Fountain School of Performing Arts. Our offerings range from classes in playwriting, directing, and theatre history, to an acting program entered by audition, to hands-on instruction in costume making, set design, props building, and more. Through our programs, students can develop expertise as designers, directors, performers, and audience members, in styles ranging from classical to contemporary.

The Bachelor of Arts in Theatre offers focused studies to prepare graduates for careers or further study in many areas, including acting, theatre studies, stage design, the fashion industry, and more. Through experiential learning, training in theatre teaches poise, discipline, creativity, collaboration, empathy, and the ability to think on one's feet. These transferable skills are excellent preparation for many career paths in and beyond the performing arts.

We offer BA Honours degrees in Acting, Costume Studies, Stage Design & Technical Theatre, and Theatre Studies. These programs can sometimes be completed as a Combined Honours degree with another subject. We offer a two-year Diploma in Costume Studies. You can also pursue more general theatre degrees, including BA Major and Double Major. You can complete a Minor in Theatre to enhance your degree. You can also take courses in Theatre as electives to complement your studies in other disciplines.

The degree programs involve a curriculum of Theatre courses and a selection of other courses in different disciplines. The University has Academic Regulations which specify how these programs must be arranged. These regulations are all listed earlier in this Calendar, and prospective students should refer to them to become aware of the opportunities offered. There are a surprising number of different ways to arrange one's studies; recommended here are the paths you can follow if Theatre is your primary interest.

Facilities

The Fountain School of Performing Arts is located in the Dalhousie Arts Centre. Theatre facilities include one proscenium theatre, two studios, and supporting workshops. Teaching spaces for costume studies are currently located off-campus. The School office is in Room 514 of the Arts Centre.

Because of the work involved, some theatre courses have a limited enrolment. All students wishing to take any practical course in Theatre should, therefore, first consult with the Fountain School.

PLEASE NOTE: Theatre by its nature requires evening work. Students, especially in Acting, Stage Design and Technical Theatre, and Costume courses, are advised not to undertake other evening commitments.

Degree Programs

In addition to the Fountain School requirements listed below, students must satisfy the requirements outlined in the [Degree Requirements](#) section of this calendar.

BA Honours in Theatre (Acting)

The main objective of the Acting Program is to satisfy the needs of those students who have decided to pursue a career as performers in the professional theatre. The program is progressive in nature, culminating in a company of student actors who perform in three theatrical productions in the Fountain School season in their fourth year. Third year students in the Acting Program will participate in the third play of the Fountain School season. Students may secure a spot in the Acting Program by auditioning EITHER directly out of high school before enrolling in their first year at Dalhousie OR upon completion of their first year. In both scenarios, they MUST complete THEA 1801.03 and THEA 1802.03 (or equivalents at another university) in order to be eligible for the next three years of the program. In addition to meeting degree requirements, students must achieve a B in all Acting Program courses, and must also be recommended by the Acting Faculty in order to advance to the next term's/year's course of study. The program provides these students with professional training and the benefits of a liberal-arts education at a major Canadian university. Honours students must maintain an average of at least B+ in all of their advanced Theatre courses.

Year 1

- PERF 1000.03: Writing About Performance
- PERF 1002.03: Writing About Stage and Screen
- THEA 1801.03: Introduction to Acting and Performance a
- THEA 1802.03: Introduction to Acting and Performance b
- 18 elective credit hours

Year 2: The Discovery Year

The second year of the Acting Program introduces students to the fundamental principles of acting through an introduction to devised theatre, classical text work, voice, and movement. Emphasis is placed on the discipline and dedication that is the basis for a career in the professional theatre.

- THEA 2011.03: Ancient and Medieval Theatre
- THEA 2012.03: Early Modern Theatre
- THEA 2801.03: Acting 2a
- THEA 2802.03: Acting 2b
- THEA 2811.03: Voice and Speech 2a
- THEA 2812.03: Voice and Speech 2b
- THEA 2821.03: Dance and Movement 2a
- THEA 2822.03: Dance and Movement 2b
- 6 elective credit hours

Year 3: The Transformation Year

The third year of the Acting Program is structured to build on the knowledge acquired in the previous two years. Students learn how to integrate what they have discovered as they gain further understanding of skills, techniques and creative expression. Third-year students perform in one show of the Fountain School season and may be invited to perform in others, depending upon the needs of the plays chosen and the student's readiness for the performance situation as assessed by the faculty.

- THEA 3801.03: Acting 3a
- THEA 3802.03: Acting 3b
- THEA 3811.03: Voice and Speech 3a
- THEA 3812.03: Voice and Speech 3b
- THEA 3821.03: Dance and Movement 3a
- THEA 3822.03: Dance and Movement 3b
- MUSC 1081.03: Voice Clinic for the Theatre
- 9 elective credit hours

Year 4: the Interpretation and Performance Year

In the final year of the Acting Program, students' studies are geared toward performance and entering the world of professional acting. The company of fourth year Acting Program students will be cast in three Fountain School season shows. Classes are devoted to preparing the student actor for transition into the profession.

- THEA 4801.03: Acting 4a
- THEA 4802.03: Acting 4b
- THEA 4841.03: Advanced Performance Techniques a
- THEA 4842.03: Advanced Performance Techniques b
- THEA 3503.03: Modern Theatre
- Any ONE of the following Theatre History courses: THEA 3911.03 (Gender and Theatre), THEA 3912.03 (Gender Theory and Contemporary Performance), THEA 3915.03 (Stars and Stardom on Stage and Screen), THEA 4501.03 (Canadian Theatre Since 1968), THEA 4701.03 (Special Topics 1), THEA 4921.03 (Special Topics 2), THEA 4702.03 (Special Topics 3), THEA 4735.03 (Advanced Seminar in Baroque Culture), THEA 4922.03 (Topics in Theatre History), THEA 4923.03 (Topics in Dramatic Literature), THEA 4924.03 (Special Topics in Theatre and Cinema), THEA 4925.03 (Puppets: Bringing Objects to Life), THEA 4926.03 (Creative Responses to A Midsummer Night's Dream), THEA 4931.03 (Contemporary Theatre)
- 12 elective credit hours (3 credit hours can be in THEA)

Honours Acting students will be awarded the Honours Qualifying Project upon the satisfactory completion of a professional portfolio.

NOTES:

1. Applications for Honours in Theatre are not considered by the Fountain School of Performing Arts until the winter term of the student's third year. Please enquire at the School for the relevant deadline.
2. For historical reasons, many classes with FILM codes are crosslisted as THEA. However, no such class will count toward any Theatre degree, with the exception of FILM 3915.03/THEA 3915.03 (Stars and Stardom on Stage and Screen), FILM 3314.03/THEA 3314.03 (Shakespeare and his Contemporaries on Film), and FILM 4393.03/THEA 4924.03 (Special Topics in Theatre and Cinema).

BA Honours in Theatre (Costume Studies)

This program combines the academic study and research skills necessary to the understanding of costume in its broadest context with the creative interpretation of design and the applied skills of the costumer whose goal is to work in the theatre, film, museums, or historical animation. Some courses in Costume Studies are open to general BA students; see individual course listings. Honours students must maintain an average of at least B+ in all of their advanced theatre courses. Special accelerated plans for Honours degrees in Costume Studies may be available on an individual, case-by-case basis for students with existing university credits recognized for transfer credit by Dalhousie University.

Year 1

- PERF 1000.03: Writing About Performance
- PERF 1002.03: Writing About Stage and Screen
- THEA 1451.03: Introduction to Costume Studies a
- THEA 1452.03: Introduction to Costume Studies b
- 18 elective credit hours

Year 2

- THEA 2011.03: Ancient and Medieval Theatre
- THEA 2012.03: Early Modern Theatre
- THEA 2401.03: Cave to Castle - Dress from Prehistory to 1450
- THEA 2402.03: Castle to Café - Dress from 1450 to 1700
- THEA 2407.03: The Aesthetics of Contemporary Dress a
- THEA 2408.03: The Aesthetics of Contemporary Dress b
- THEA 2412.03: Language of Design
- THEA 2451.03: Costume in Performance 1
- 6 elective credit hours

Year 3

- THEA 3402.03: Baroque to Bustles - Dress from 1700 to 1900
- THEA 3403.03: Bustles to Boardroom - Modern Fashion from 1900
- THEA 3452.03: Costume in Performance 2a
- THEA 3453.03: Costume in Performance 2b
- THEA 3454.03: Body-Shaping Through Historical Tailoring b
- THEA 3455.03: Body-Shaping Through Historical Tailoring a
- 12 elective credit hours

Year 4

- THEA 3503.03: Modern Theatre
- Any ONE of the following Theatre History courses: THEA 3911.03 (Gender and Theatre), THEA 3912.03 (Gender Theory and Contemporary Performance), THEA 3915.03 (Stars and Stardom on Stage and Screen), THEA 4501.03 (Canadian Theatre Since 1968), THEA 4701.03 (Special Topics 1), THEA 4921.03 (Special Topics 2), THEA 4702.03 (Special Topics 3), THEA 4735.03 (Advanced Seminar in Baroque Culture), THEA 4922.03 (Topics in Theatre History), THEA 4923.03 (Topics in Dramatic Literature), THEA 4924.03 (Special Topics in Theatre and Cinema), THEA 4925.03 (Puppets: Bringing Objects to Life), THEA 4926.03 (Creative Responses to A Midsummer Night's Dream), THEA 4931.03 (Contemporary Theatre)
- THEA 4407.03: The Aesthetics of Historical Dress a
- THEA 4408.03: The Aesthetics of Historical Dress b
- THEA 4450.03: Costume Technology
- THEA 4452.03: The Sculpture of Dress
- 12 credit hours in another subjects

Honours students in Costume Studies will be awarded the Honours Qualifying Project upon successful completion of a project on an aspect of theatrical costume or historical dress.

NOTES:

1. Applications for Honours in Theatre are not considered by the Fountain School of Performing Arts until the winter term of the student's third year. Please enquire at the School for the relevant deadline.
2. For historical reasons, many classes with FILM codes are crosslisted as THEA. However, no such class will count toward any Theatre degree, with the exception of FILM 3915.03/THEA 3915.03 (Stars and Stardom on Stage and Screen), FILM 3314.03/THEA 3314.03 (Shakespeare and his Contemporaries on Film), and FILM 4393.03/THEA 4924.03 (Special Topics in Theatre and Cinema).

BA Honours in Theatre (Stage Design and Technical Theatre)

This degree is designed for students wishing to pursue careers in stage design and technical theatre. This section encompasses all areas of specialization that work together in the production of live performance. Set design, scenic carpentry, scenic painting, lighting, sound, props and stage management are taught through lectures and hands-on labs. Students in the first year of the program are required to work on one Fountain School stage production, and those in second and third years work on four Fountain School stage productions each year. All students must maintain at least a B- average in all Stage Design and Technical Theatre courses to move on to the next year, and Honours students must maintain an average of at least B+ in all their advanced Theatre courses.

Year 1

- PERF 1000.03: Writing About Performance
- PERF 1002.03: Writing About Stage and Screen
- THEA 1051.03: Introduction to Theatre Organization and Stagecraft Part 1
- THEA 1052.03: Introduction to Theatre Organization and Stagecraft Part 2
- 18 elective credit hours

Year 2

- THEA 2011.03: Ancient and Medieval Theatre
- THEA 2012.03: Early Modern Theatre
- THEA 2061.03: Technical Theatre 1a
- THEA 2062.03: Technical Theatre 1b

- THEA 2071.03: Performance Technology 1a
- THEA 2072.03: Performance Technology 1b
- THEA 2412.03: Language of Design
- THEA 2710.03: Stage Design 1
- 6 elective credit hours

Year 3

- THEA 3061.03: Technical Theatre 2a
- THEA 3062.03: Technical Theatre 2b
- THEA 3071.03: Performance Technology 2a
- THEA 3072.03: Performance Technology 2b
- THEA 3711.03 and THEA 3712.03 (Stage Design 2a and 2b) or PERF 3721.03 and PERF 3722.03 (Digital Design for Performance 1 and 2)
- 12 elective credit hours

Year 4

- THEA 3503.03: Modern Theatre
- Any ONE of the following Theatre History courses: THEA 3911.03 (Gender and Theatre), THEA 3912.03 (Gender Theory and Contemporary Performance), THEA 3915.03 (Stars and Stardom on Stage and Screen), THEA 4501.03 (Canadian Theatre Since 1968), THEA 4701.03 (Special Topics 1), THEA 4921.03 (Special Topics 2), THEA 4702.03 (Special Topics 3), THEA 4735.03 (Advanced Seminar in Baroque Culture), THEA 4922.03 (Topics in Theatre History), THEA 4923.03 (Topics in Dramatic Literature), THEA 4924.03 (Special Topics in Theatre and Cinema), THEA 4925.03 (Puppets: Bringing Objects to Life), THEA 4926.03 (Creative Responses to A Midsummer Night's Dream), THEA 4931.03 (Contemporary Theatre)
- THEA 3711.03 and THEA 3712.03 (Stage Design 2a and 2b) or PERF 3721.03 and PERF 3722.03 (Digital Design for Performance 1 and 2)
- THEA 4061.03: Production Techniques 1a
- THEA 4062.03: Production Techniques 1b
- THEA 4071.03: Advanced Production Specialization a
- THEA 4072.03: Advanced Production Specialization b
- 6 elective credit hours

The Honours Qualifying Project in Stage Design and Technical Theatre will be awarded upon the satisfactory completion of a professional portfolio.

NOTES:

1. Applications for Honours in Theatre are not considered by the Fountain School of Performing Arts until the winter term of the student's third year. Please enquire at the School for the relevant deadline.
2. Interested students studying Stage Design and Technical Theatre may find occasional, paid employment with Neptune Theatre, the Rebecca Cohn Auditorium, IATSE Local 680 (International Alliance of Theatrical Stage Employees), and various other local and national, professional institutions with which the Fountain School of Performing Arts has a close connection.
3. For historical reasons, many classes with FILM codes are crosslisted as THEA. However, no such class will count toward any Theatre degree, with the exception of FILM 3915.03/THEA 3915.03 (Stars and Stardom on Stage and Screen), FILM 3314.03/THEA 3314.03 (Shakespeare and his Contemporaries on Film), and FILM 4393.03/THEA 4924.03 (Special Topics in Theatre and Cinema).

BA Honours in Theatre (Theatre Studies)

Theatre Studies explores the entire breadth of theatre. From playwriting to performance analysis, directing to dramaturgy, Theatre Studies offers you the opportunity to examine theatre's rich history, literature, and performance traditions. The academically oriented program of study will sharpen your critical thinking and strengthen your analysis skills. As a Theatre Studies student, you will polish your communication skills through engaged class discussions, creative research presentations, and imaginative writing projects. Theatre Studies graduates have gone on to teach, direct, and write about theatre. This degree will prepare you for a variety of professional and education degrees, and will also provide you with a strong foundation for graduate degrees in Theatre and Drama.

Year 1

- PERF 1000.03: Writing About Performance
- PERF 1002.03: Writing About Stage and Screen
- 6 additional credit hours in THEA at the 1000-level
- 3 elective credit hours

Year 2

- THEA 2011.03: Ancient and Medieval Theatre
- THEA 2012.03: Early Modern Theatre
- THEA 2901.03: Dramaturgy: The Art of Developing Plays
- THEA 2902.03: Play Analysis for Directing
- 18 elective credit hours

Years 3 and 4

- THEA 3201.03: Directing for the Stage
- THEA 3503.03: Modern Theatre
- Any ONE of the following Theatre History courses: THEA 3911.03 (Gender and Theatre), THEA 3912.03 (Gender Theory and Contemporary Performance), THEA 3915.03 (Stars and Stardom on Stage and Screen), THEA 4501.03 (Canadian Theatre Since 1968), THEA 4701.03 (Special Topics 1), THEA 4921.03 (Special Topics 2), THEA 4702.03 (Special Topics 3), THEA 4735.03 (Advanced Seminar in Baroque Culture), THEA 4922.03 (Topics in Theatre History), THEA 4923.03 (Topics in Dramatic Literature), THEA 4924.03 (Special Topics in Theatre and Cinema), THEA 4925.03 (Puppets: Bringing Objects to Life), THEA 4926.03 (Creative Responses to A Midsummer Night's Dream), THEA 4931.03 (Contemporary Theatre)
- THEA 3601.03: The Playwright in the Theatre a
- THEA 3602.03: The Playwright in the Theatre b
- THEA 4501.03: Canadian Theatre Since 1968: Interrogating Identities
- 24 credit hours in advanced electives in THEA
- 6 credit hours in advanced course in dramatic literature from another department (ENGL, CLAS, RUSS, SPAN, FREN, GERM, etc.)
- 12 elective credit hours

Honours students in Theatre Studies will be awarded the Honours Qualifying Project by fulfilling the function of a dramaturge or assistant director on one of the Fountain School stage productions.

NOTES:

1. Applications for Honours in Theatre are not considered by the Fountain School of Performing Arts until the winter term of the student's third year. Please enquire at the School for the relevant deadline.
2. For historical reasons, many classes with FILM codes are crosslisted as THEA. However, no such class will count toward any Theatre degree, with the exception of FILM 3915.03/THEA 3915.03 (Stars and Stardom on Stage and Screen), FILM 3314.03/THEA 3314.03 (Shakespeare and his Contemporaries on Film), and FILM 4393.03/THEA 4924.03 (Special Topics in Theatre and Cinema).

BA or BSc Combined Honours

Dalhousie and University of King's College students can combine their Theatre degrees with a number of other disciplines at the two institutions. For more specific instructions on how to set up a Combined Honours degree in Theatre and another subject, please consult the relevant departments' Undergraduate Advisors.

In principle, a student who wishes to graduate with this degree must complete the following required courses, plus other electives. However, students in the Acting, Costume Studies, or Stage Design & Technical Theatre programs should consult the academic advisor for Theatre, as other requirements may apply.

- THEA 2011.03 (Ancient and Medieval Theatre)
- THEA 2012.03 (Early Modern Theatre)
- THEA 3503.03 (Modern Theatre)
- any ONE of the following electives: THEA 3911.03 (Gender and Theatre), THEA 3912.03 (Gender Theory and Contemporary Performance), THEA 3915.03 (Stars and Stardom on Stage and Screen), THEA 4501.03 (Canadian Theatre Since 1968), THEA 4701.03 (Special Topics 1), THEA 4921.03 (Special Topics 2), THEA 4702.03 (Special Topics 3),

THEA 4735.03 (Advanced Seminar in Baroque Culture), THEA 4922.03 (Topics in Theatre History), THEA 4923.03 (Topics in Dramatic Literature), THEA 4924.03 (Special Topics in Theatre and Cinema), THEA 4925.03 (Puppets: Bringing Objects to Life), THEA 4926.03 (Creative Responses to A Midsummer Night's Dream), THEA 4931.03 (Contemporary Theatre)

Students must have, in the two subjects combined, the required distribution of courses for a BA Combined Honours degree. As a result, the degree will consist of a minimum of 30 and a maximum of 48 credit hours in Theatre beyond the 1000-level. As per Dalhousie's regulations for Combined Honours degrees, grades in these courses must be 'C' or better, otherwise the course will not count toward the degree. They must include at least 18 credit hours beyond the 2000-level. See the [Degree Requirements section](#) of this calendar for other general university requirements.

Note: For historical reasons, many classes with FILM codes are crosslisted as THEA. However, no such class will count toward any Theatre degree, with the exception of FILM 3915.03/THEA 3915.03 (Stars and Stardom on Stage and Screen), FILM/THEA 3314.03 (Shakespeare and his Contemporaries on Film), and FILM 4393.03/THEA 4924.03 (Special Topics in Theatre and Cinema).

BA (120 credit hour) Major in Theatre

A student may take a 120 credit hour Major program in Theatre (Acting, Stage Design and Technical Theatre, or Theatre Studies) following consultation with the Associate Director (Theatre).

120 credit hour Major in Theatre (Costume Studies)

Students wishing to take a 120 credit hour Major in Theatre (Costume Studies) must take the following courses:

Year 1

- PERF 1000.03: Writing About Performance
- PERF 1002.03: Writing About Stage and Screen
- THEA 1451.03: Introduction to Costume Studies a
- THEA 1452.03: Introduction to Costume Studies b
- Plus 18 elective credit hours

Year 2

- THEA 2011.03: Ancient and Medieval Theatre
- THEA 2012.03: Early Modern Theatre
- THEA 2401.03: Cave to Castle - Dress from Prehistory to 1450
- THEA 2402.03: Castle to Cafe - Dress from 1450 to 1700
- THEA 2407.03: The Aesthetics of Contemporary Dress a
- THEA 2408.03: The Aesthetics of Contemporary Dress b
- THEA 2412.03: Language of Design
- THEA 2451.03: Costume in Performance 1
- Plus 6 elective credit hours

Year 3

- THEA 3402.03: Baroque to Bustles - Dress from 1700 to 1900
- THEA 3403.03: Bustles to Boardroom - Modern Fashion from 1900
- THEA 3452.03: Costume in Performance 2a
- THEA 3453.03: Costume in Performance 2b
- THEA 3454.03: Body-Shaping Through Historical Tailoring b
- THEA 3455.03: Body-Shaping Through Historical Tailoring a
- Plus 12 elective credit hours

Year 4

- THEA 3503.03: Modern Theatre
- Any ONE of the following Theatre History courses: THEA 3911.03 (Gender and Theatre), THEA 3912.03 (Gender Theory and Contemporary Performance), THEA 3915.03 (Stars and Stardom on Stage and Screen), THEA 4501.03 (Canadian Theatre Since 1968), THEA 4701.03 (Special Topics 1), THEA 4921.03 (Special Topics 2), THEA 4702.03 (Special Topics 3), THEA 4735.03 (Advanced Seminar in Baroque Culture), THEA 4922.03 (Topics in Theatre History), THEA 4923.03 (Topics in Dramatic Literature), THEA 4924.03 (Special Topics in Theatre and Cinema), THEA 4925.03 (Puppets: Bringing Objects to Life), THEA 4926.03 (Creative Responses to A Midsummer Night's Dream), THEA 4931.03 (Contemporary Theatre)
- THEA 4450.03: Costume Technology

- THEA 4452.03: The Sculpture of Dress
- Plus 18 elective credit hours

120 Credit Hour Major in Theatre (Stage Design and Technical Theatre)

Students wishing to take a 120 credit hour Major in Stage Design and Technical Theatre must take the following courses:

Year 1

- PERF 1000.03: Writing About Performance
- PERF 1002.03: Writing About Stage and Screen
- THEA 1051.03: Introduction to Theatre Organization and Stagecraft Part 1
- THEA 1052.03: Introduction to Theatre Organization and Stagecraft Part 2
- Plus 18 elective credit hours

Year 2

- THEA 2011.03: Ancient and Medieval Theatre
- THEA 2012.03: Early Modern Theatre
- THEA 2061.03: Technical Theatre 1a
- THEA 2062.03: Technical Theatre 1b
- THEA 2071.03: Performance Technology 1a
- THEA 2072.03: Performance Technology 1b
- THEA 2412.03: Language of Design
- THEA 2710.03: Stage Design 1
- Plus 6 elective credit hours

Year 3

- THEA 3061.03: Technical Theatre 2a
- THEA 3062.03: Technical Theatre 2b
- THEA 3071.03: Performance Technology 2a
- THEA 3072.03: Performance Technology 2b
- THEA 3711.03 and THEA 3712.03 (Stage Design 2a and 2b) or PERF 3721.03 and PERF 3722.03 (Digital Design for Performance 1 and 2)
- Plus 12 elective credit hours

Year 4

- THEA 3503.03: Modern Theatre
- Any ONE of the following Theatre History courses: THEA 3911.03 (Gender and Theatre), THEA 3912.03 (Gender Theory and Contemporary Performance), THEA 3915.03 (Stars and Stardom on Stage and Screen), THEA 4501.03 (Canadian Theatre Since 1968), THEA 4701.03 (Special Topics 1), THEA 4921.03 (Special Topics 2), THEA 4702.03 (Special Topics 3), THEA 4735.03 (Advanced Seminar in Baroque Culture), THEA 4922.03 (Topics in Theatre History), THEA 4923.03 (Topics in Dramatic Literature), THEA 4924.03 (Special Topics in Theatre and Cinema), THEA 4925.03 (Puppets: Bringing Objects to Life), THEA 4926.03 (Creative Responses to A Midsummer Night's Dream), THEA 4931.03 (Contemporary Theatre)
- Plus 24 elective credit hours

NOTE: For historical reasons, many classes with FILM codes are crosslisted as THEA. However, no such class will count toward any Theatre degree, with the exception of FILM 3915.03/THEA 3915.03 (Stars and Stardom on Stage and Screen), FILM 2911.03/THEA 3314.03 (Shakespeare and his Contemporaries on Film), and FILM 4393.03/THEA 4924.03 (Special Topics in Theatre and Cinema).

BA or BSc (120 credit hour) Double Major in Theatre

Dalhousie and University of King's College students can combine their Theatre degrees with a number of other disciplines at the two institutions. For more specific instructions on how to set up a Double Major degree in Theatre and another subject, please consult the relevant departments' Undergraduate Advisors.

In principle, a student who wishes to graduate with this degree must complete the following required courses, plus other electives:

- THEA 2011.03 (Ancient and Medieval Theatre)
- THEA 2012.03 (Early Modern Theatre)
- THEA 3503.03 (Modern Theatre)
- any ONE of the following electives: THEA 3911.03 (Gender and Theatre), THEA 3912.03 (Gender Theory and Contemporary Performance), THEA 3915.03 (Stars and Stardom on Stage and Screen), THEA 4501.03 (Canadian Theatre Since 1968), THEA 4701.03 (Special Topics 1), THEA 4921.03 (Special Topics 2), THEA 4702.03 (Special Topics 3), THEA 4735.03 (Advanced Seminar in Baroque Culture), THEA 4922.03 (Topics in Theatre History), THEA 4923.03 (Topics in Dramatic Literature), THEA 4924.03 (Special Topics in Theatre and Cinema), THEA 4925.03 (Puppets: Bringing Objects to Life), THEA 4926.03 (Creative Responses to A Midsummer Night's Dream), THEA 4931.03 (Contemporary Theatre)

In addition, students must have, in the two subjects combined, the required distribution of courses for a BA (120 credit hour) Double Major degree. As a result, the degree will consist of a minimum of 30 and a maximum of 48 credit hours in Theatre beyond the 1000-level. These credits must include at least 18 credit hours beyond the 2000-level in THEA. See the Degree Requirements section of this calendar for other general university requirements.

Note: For historical reasons, many classes with FILM codes are crosslisted as THEA. However, no such class will count toward any Theatre degree, with the exception of FILM 3915.03/THEA 3915.03 (Stars and Stardom on Stage and Screen), FILM/THEA 3314.03 (Shakespeare and his Contemporaries on Film), and FILM 4393.03/THEA 4924.03 (Special Topics in Theatre and Cinema).

BA (90 credit hour) Minor in Theatre

This degree is designed for students who want to take a number of courses in Theatre, would like to acquire a broad and varied knowledge of its various aspects, or prefer not to specialize. Students are encouraged to take PERF 1000.03: Writing About Performance and PERF 1002.03: Writing About Stage and Screen, or equivalent credit hours, and six additional credit hours in THEA at the 1000 level, although these do not count toward the minor.

See the [Minor in Theatre](#) section of this Calendar.

NOTE: For historical reasons, many classes with FILM codes are crosslisted as THEA. However, no such class will count toward any Theatre degree, with the exception of FILM 3915.03/THEA 3915.03 (Stars and Stardom on Stage and Screen), FILM 3314.03/THEA 3314.03 (Shakespeare and his Contemporaries on Film), and FILM 4393.03/THEA 4924.03 (Special Topics in Theatre and Cinema).

Costume Studies, Diploma in two years

The Diploma in Costume Studies is an intensive two-year qualification intended primarily for students who have completed a Bachelor's degree at a recognized university. Students who have completed at least two full years of successful study at a recognized university may be considered for the Diploma on a case-by-case basis. After successful completion of this program, students may upgrade their DCS to a BA in Theatre (Costume Studies) by completing the remaining requirements. Students pursuing the Diploma in Costume Studies are required to combine the courses in the following manner:

Year 1

- PERF 1000.03: Writing About Performance
- PERF 1002.03: Writing About Stage and Screen
- THEA 1451.03: Introduction to Costume Studies a
- THEA 1452.03: Introduction to Costume Studies b
- THEA 2401.03: Cave to Castle - Dress from Prehistory to 1450
- THEA 2402.03: Castle to Café - Dress from 1450 to 1700
- THEA 2407.03: The Aesthetics of Contemporary Dress a
- THEA 2408.03: The Aesthetics of Contemporary Dress b
- THEA 2412.03: Language of Design
- THEA 2451.03: Costume in Performance 1

Year 2

- THEA 3402.03: Baroque to Bustles - Dress from 1700 to 1900
- THEA 3403.03: Bustles to Boardroom - Modern Fashion from 1900
- THEA 3452.03: Costume in Performance 2a
- THEA 3453.03: Costume in Performance 2b
- THEA 3454.03: Body Shaping Through Historical Tailoring b

- THEA 3455.03: Body Shaping Through Historical Tailoring a
- THEA 4407.03: The Aesthetics of Historical Dress a
- THEA 4408.03: The Aesthetics of Historical Dress b
- THEA 4450.03: Costume Technology
- THEA 4452.03: The Sculpture of Dress

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses so designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

Course Descriptions

PERF 1000 Writing About Performance

CREDIT HOURS: 3

What is performance, and who counts as a performer? Why is performance one of the most ancient and durable aspects of human community and interaction? Why do we adore certain performers and despise others? How are performers and their choices shaped by their societies, and vice versa? This course will explore these questions by looking at some of the vital roles fulfilled by theatrical, musical, and cinematic performers in global societies, both ancient and modern. Via readings of articles and plays as well as in-class screenings of film and video performances, it will consider the performer's role in shaping, embodying, and questioning societies' conceptions of beauty, morality, religious faith, gender, race, ethnicity, social class, and more.

CALENDAR NOTES: PERF 1000.03 and PERF 1001.03 or PERF 1000.03 and PERF 1002.03 satisfies the Arts and Science Writing requirement.

EXCLUSIONS: THEA 1000X/Y.06

FORMATS: Lecture | Tutorial

PERF 1001 Writing About Music

CREDIT HOURS: 3

This course is an introduction to the academic study of music. It is designed to help students develop effective research and writing skills and to familiarize them with the sources, methods, repertoires, and debates that have shaped music history and scholarship. Students will develop critical listening and analytical skills, will be challenged to consider music from a variety of perspectives, will become familiar with a number of standard works from various repertoires, and will engage in the issues and debates surrounding various musical cultures.

CALENDAR NOTES: PERF 1000.03 and PERF 1001.03 or PERF 1000.03 and PERF 1002.03 satisfies the Arts and Science Writing requirement.

PREREQUISITES: PERF 1000.03

EXCLUSIONS: MUSC 1352.03

FORMATS: Lecture | Tutorial

PERF 1002 Writing About Stage and Screen

CREDIT HOURS: 3

This course introduces the fundamentals of communication in an academic environment, specifically in relation to writing about stage and screen. It challenges you to improve your ability to describe, persuade, analyze and theorize on paper and aloud, with an emphasis on writing. It also examines the variety of sources used in writing about stage and screen. Writing, editing and revising are difficult; no one ever "finishes" learning to write, but you will improve your writing over the course of the year.

CALENDAR NOTES: PERF 1000.03 and PERF 1001.03 or PERF 1000.03 and PERF 1002.03 satisfies the Arts and Science Writing requirement.

PREREQUISITES: PERF 1000.03

EXCLUSIONS: THEA 1000.03, THEA 1300.03

FORMATS: Lecture | Tutorial

PERF 2412 Language of Design

CREDIT HOURS: 3

This course explores components of costume and set design, offering a discourse on design language, colour theory, structure, and decoration as they relate to design for the theatre. Through lecture and practical application, the student will learn basic techniques and conventions of design, will explore how to interpret scripts, and will develop basic abilities in visual composition and water media. This course may be taken by general BA students and is also a part of the Costume Studies and Stage Design & Technical Theatre Programs.

PREREQUISITES: For BA Theatre (Stage Design & Technical Theatre): PERF 1000.03 and PERF 1002.03 and THEA 1052.03. For BA Theatre (Costume Studies): PERF 1000.03 and PERF 1002.03 and THEA 1452.03.

CROSSLISTED: THEA 2412.03

FORMATS: Lecture | Lab

PERF 2451 Costume in Performance 1

CREDIT HOURS: 3

In this course, the student will apply the knowledge gained in THEA 1451.03 and THEA 1452.03 to research, illustrate, and create designs for modern and historical costume for the stage. In addition, students work on productions in order to understand the integral role played by costume in staging a play, in an actor's character development, and in body image and representation. This course is part of the Costume Studies Program.

COREQUISITES: For Diploma in Costume Studies Students: see course combinations in Calendar For BA Theatre (Costume Studies): THEA 2402.03, THEA 2408.03

PREREQUISITES: For all students: PERF 1000.03 and PERF 1002.03, THEA/PERF 2412.03, permission of the instructor. For BA Theatre (Costume Studies): THEA 1450 or THEA 1451.03 and THEA 1452.03, permission of the instructor.

CROSSLISTED: THEA 2451.03

FORMATS: Lecture | Lab

PERF 2710 Stage Design 1

CREDIT HOURS: 3

In this course, the student develops expertise in text analysis and communication specific to set design, building on the foundations learned in THEA/PERF 2412.03. Through applied projects, students will explore three-dimensional space development, sight lines, model building, and drafting. Students will learn how to read drafting and to create plans in traditional hand drafting as well attaining an introduction to computer-assisted drafting through Vectorworks software.

PREREQUISITES: For BA Theatre (Stage Design & Technical Theatre): THEA/PERF 2412.03

CROSSLISTED: THEA 2710.03

FORMATS: Lecture | Lab

PERF 2901 Dramaturgy - The Art of Developing Plays

CREDIT HOURS: 3

This course introduces students to the dramaturgical work of dramaturges and directors in the theatre. Students will learn skills including the presenting of research, the preparation of playtexts, the adapting of playtexts for new theatrical contexts, and the creation of theatrical seasons and programs.

PREREQUISITES: THEA 1000.06, or PERF 1000.03 and PERF 1002.03 or permission of the instructor

CROSSLISTED: THEA 2901.03

EXCLUSIONS: THEA 2900.06

FORMATS: Lecture | Discussion

PERF 2902 Play Analysis for Directing

CREDIT HOURS: 3

This course introduces students to the director's process in analyzing a dramatic script for performance. Working with plays from a range of periods and genres, students will explore key theoretical approaches to directorial analysis, will learn the director's core vocabulary, and will apply these discoveries to practical scene work.

PREREQUISITES: THEA 1000.06, or PERF 1000.03 and PERF 1002.03 or permission of the instructor

CROSSLISTED: THEA 2902.03

EXCLUSIONS: THEA 2900.06

FORMATS: Lecture | Seminar

PERF 3662 Introduction to Digital Audio Sound Design

CREDIT HOURS: 3

This class introduces the concepts, language, and technology associated with digital audio sound design as it applies to Theatre Sound Design, Film/TV, Immersive and Interactive Experiences, Music Production, and Multi-Media Art. Students will learn to use a digital audio workstation (Logic Pro) to create original short digital audio pieces. Students will also gain knowledge on how audio is made manifest in performances and events through the use of theatrical cueing software (QLab) and sound reinforcement systems.

CALENDAR NOTES: All third or fourth year students may take this course with permission from the instructor, noting that previous music/theatre/media/software knowledge is not mandatory, but will be considered an asset.

PREREQUISITES: Permission of the instructor

CROSSLISTED: MUSC 3662
RESTRICTIONS: Third and fourth year students
FORMATS: Lecture | Lab

PERF 3663 Advanced Digital Audio Sound Design

CREDIT HOURS: 3

Using knowledge and concepts learned in the prerequisite course PERF/MUSC 3662.03 Introduction to Digital Audio Sound Design, this class focuses on varied creative and artistic applications for digital audio sound design in the realms of Theatre, Film/TV, Immersive and Interactive Experiences, Music Production and Performance, and Multi-Media Art. Students will advance their knowledge of audio software (Logic Pro, QLab) and design principles in order to create nuanced sound design elements and a complete theatrical sound design.

PREREQUISITES: PERF 3662 or MUSC 3662

CROSSLISTED: MUSC 3663

FORMATS: Lecture | Lab

PERF 3711 Stage Design 2a

CREDIT HOURS: 3

In Stage Design 2a and 2b, students will: develop complex concepts and practice artistic versatility through examining diverse style and genre; solve in-depth design challenges; develop multi-scene set design; develop skills in scale model building; gain a comprehensive knowledge of 3D modelling and drafting in Vectorworks software, as well as learn how to realize designs through creating digital files for the school's laser cutter, CNC router, and 3D printer. This course cycles every 2nd year with PERF 3721 and PERF 3722, Digital Design for Performance, which focus on projection design.

CALENDAR NOTES: PERF 3711.03/THEA 3711.03 and PERF 3712.03 /THEA 3712.03 must be completed in the same academic year.

PREREQUISITES: General: PERF 2710.03 /THEA 2710.03, PERF 1000.03 and PERF 1002.03. For BA Theatre (Stage Design & Technical Theatre): THEA 2701.03 /PERF 2710.03, THEA 2060 or THEA 2061.03/THEA 2062.03, THEA 2070.03 or THEA 2071.03/THEA 2072.03.

CROSSLISTED: THEA 3711.03

EXCLUSIONS: THEA 3710.03

FORMATS: Lecture | Lab

PERF 3712 Stage Design 2b

CREDIT HOURS: 3

This class is a continuation of THEA3711.03 /PERF 3711.03. In Stage Design 2a and 2b, students will: develop complex concepts and practice artistic versatility through examining diverse style and genre; solve in-depth design challenges; develop multi-scene set design; develop skills in scale model building; gain a comprehensive knowledge of 3D modelling and drafting in Vectorworks software, as well as learn how to realize designs through creating digital files for the school's laser cutter, CNC router, and 3D printer. This course cycles every 2nd year with PERF 3721 and PERF 3722, Digital Design for Performance, which focus on projection design.

CALENDAR NOTES: THEA 3711.03/PERF 3711.03 and THEA 3712.03/PERF 3712.03 must be completed in the same academic year.

PREREQUISITES: THEA 3711.03/PERF 3711.03 and permission of the instructor.

CROSSLISTED: THEA 3712.03

EXCLUSIONS: THEA 3710.03

FORMATS: Lecture | Lab

PERF 3721 Digital Design for Performance 1: Content Creation

CREDIT HOURS: 3

The objective of this course is to identify and respond to the conceptual function of digital projection with live performance, including theatre, music, and dance. In the course of developing a projection sequence, students will gain an introductory knowledge of image manipulation, video editing and image delivery software, which, when used in combination, are the essential tools required to enter the field of Projection Design. Students will learn each element of the software through assigned exercises. This course is required for students in the Technical Theatre programme, but it can also be taken as an elective by students in other disciplines.

FORMATS: Lecture | Lab

PERF 3722 Digital Design for Performance 2: Performance Integration

CREDIT HOURS: 3

This course follows PERF 3721.03 by continuing to teach the conceptual function of digital projection for live performance, including theatre, music, and dance. Students will learn how to develop a concept for integrating projection and create a folio of still and video images that they will then enter into Qlab ready for performance. Throughout, students will learn not only about image creation and manipulation, but also about the art of adding pace and motion to the scenic environment and its impact on the visual dramaturgy of live performance. This course is required for students in the Technical Theatre and Stage Design programme, but it can also be taken as an elective by students in other disciplines. Students must complete PERF 3722 in the same academic year that they complete 3721.03.

PREREQUISITES: PERF 3721.03

FORMATS: Lecture | Lab

PERF 3830 Dance and Movement Composition

CREDIT HOURS: 3

Dance composition is the art of designing and creating a dance. In this course, students will engage in the practical application of dance techniques to create and choreograph performance pieces. The course explores the structuring of ideas and exercises focusing on time, space, and energy.

PREREQUISITES: THEA 1801.03 and 1802.03 and one of the following: (THEA 2821.03 and 2822.03), or (THEA 2021.03 and 2022.03) or THEA 2020.06 (Jazz Dance 1).

FORMATS: Lecture | Seminar

PERF 4250 Artists as Entrepreneurs: From Concept to Creation

CREDIT HOURS: 3

A business course designed for those interested in arts-led entrepreneurial ventures and self-producing theatre, music and film events for public platforms. It is aimed at developing the preparatory skill set needed for entrepreneurial ventures, which can feature creative products, services, and performances. Content will focus on an arts-led approach and how this can define entrepreneurial ventures, operations, and engagement with audiences and customers. Product benefits, customer groups, promotion, branding, distribution, financial and legal concepts, and digital platforms will be examined through the creative arts lens. Finally, audience-building strategies for those leading small performing arts organizations will be explored.

PREREQUISITES: Permission of the instructor

CROSSLISTED: MUSC 4250, THEA 4250

FORMATS: Lecture | Discussion

PERF 4925 Puppets: Bringing Objects to Life

CREDIT HOURS: 3

Please see description for THEA 4925.03.

PREREQUISITES: Permission of the instructor.

CROSSLISTED: THEA 4925.03

FORMATS: Lecture

PERF 4926 Creative Responses to A Midsummer Night's Dream

CREDIT HOURS: 3

Shakespeare's A Midsummer Night's Dream is an ideal play for exploring how one creative work can inspire others. Its tale of lovers and actors lost in a fairy-filled forest still speaks to us about imagination, beauty, transformation, sexuality, gender, dreams, love, rebellion, laughter, art, the environment, and performance. Not only are productions of it still commonplace, but it has also inspired numerous adaptations in theatre, cinema, poetry, music, dance, novels, animations, and songs. In this course, you will read the play closely and examine the creative dreams that it has inspired in other artists over the centuries.

You may also engage in creative projects of your own for credit.

CROSSLISTED: THEA 4926.03, FILM 4926.03

FORMATS: Lecture | Seminar

THEA 1051 Introduction to Theatre Organization and Stagecraft Part 1

CREDIT HOURS: 3

This course is designed to provide a background in the technical aspects of theatre and live performance by taking students behind the scenes to understand how a play is brought to life. The worlds of scenic design, scenic carpentry, props, sound, lighting, and stage management are explored in a lecture-based setting. An understanding of the common language of theatre and the development of an appreciation for the work that happens behind the scenes is the primary focus of this class. NOTE: This class may be taught online.

CALENDAR NOTES: THEA 1051.03 and THEA 1052.03 must be completed within the same academic year.

EXCLUSIONS: THEA 1050

FORMATS: Lecture | Lab

THEA 1052 Introduction to Theatre Organization and Stagecraft Part 2

CREDIT HOURS: 3

Building on the work completed in THEA 1051.03, students will work in the Fountain School theatres and shops for labs in each of the main areas of scenic carpentry, props, sound, lighting, and scenic painting. Students are required to work on one Fountain School stage production which will include some evening and weekend work.

CALENDAR NOTES: THEA 1051.03 and THEA 1052.03 must be completed within the same academic year.

PREREQUISITES: THEA 1051.03 and permission of the instructor.

EXCLUSIONS: THEA 1050.06

FORMATS: Lecture | Lab

THEA 1451 Introduction to Costume Studies a

CREDIT HOURS: 3

This course serves as an introduction to costume in its broadest context, enabling students to acquire a basic understanding of creating costume for the stage. Both modern and historical costume creation techniques are explored and mastered by students in preparation for more advanced study of costume in subsequent years of the Costume Studies Program. This course includes a theatre component. This course is a prerequisite for all other Costume Studies courses.

CALENDAR NOTES: THEA 1451.03 and THEA 1452.03 must be completed within the same academic year.

EXCLUSIONS: THEA 1450

FORMATS: Lecture | Lab

THEA 1452 Introduction to Costume Studies b

CREDIT HOURS: 3

This course is a continuation of THEA 1451.03. This course serves as an introduction to costume in its broadest context, enabling students to acquire a basic understanding of creating costume for the stage. Both modern and historical costume creation techniques are explored and mastered by students in preparation for more advanced study of costume in subsequent years of the Costume Studies Program. This course includes a theatre component. This course is a prerequisite for all other Costume Studies courses.

CALENDAR NOTES: THEA 1451.03 and THEA 1452.03 must be completed within the same academic year.

FORMATS: Lecture | Lab

THEA 1801 Introduction to Acting and Performance a

CREDIT HOURS: 3

This first-year performance course is open to any student, regardless of experience. However, entrance into the next three years of the Acting program is by audition only. Classes are designed to provide the student with an understanding of what it is to act and communicate through words and movement. The approach will be practical, focusing on four major aspects of the craft: Space, Character, Context, and Action. Each unit will be comprised of exercises and scene study, with scripts drawn from classical and contemporary plays. Exercises and explorations in class are centred on group work and collaboration, which will strengthen communication and improvisational skills. Students will challenge themselves physically, vocally, and imaginatively, while working collaboratively in a trusting, dynamic environment.

CALENDAR NOTES: THEA 1801.03 and THEA 1802.03 must be completed in the same academic year. THEA 1801 and THEA 1802 are the prerequisites for entrance into the upper years of the Acting Program and/or the Certificate in Dance and Movement.

EXCLUSIONS: THEA 1800

FORMATS: Lecture | Lab

THEA 1802 Introduction to Acting and Performance b

CREDIT HOURS: 3

This is a continuation of THEA 1801.03. This first year performance course is open to any student, regardless of experience. However, entrance into the next three years of the Acting program is by audition only. Classes are designed to provide the student with an understanding of what it is to act and communicate through words and movement. The approach will be practical, focusing on four major aspects of the craft: Space, Character, Context, and Action. Each unit will be comprised of exercises and scene study, with scripts drawn from classical and contemporary plays. Exercises and explorations in class are centred on group work and collaboration, which will strengthen communication and improvisational skills. Students will challenge themselves physically, vocally, and imaginatively, while working collaboratively in a trusting, dynamic environment.

CALENDAR NOTES: THEA 1801.03 and THEA 1802.03 must be completed within the same academic year with a final grade supplied in the spring. THEA 1801 and THEA 1802 are prerequisites for entrance into the upper years of the Acting Program and/or the Certificate in Dance and Movement.

PREREQUISITES: THEA 1801.03 and permission of the instructor

FORMATS: Lecture | Lab

THEA 2011 Ancient and Medieval Theatre

CREDIT HOURS: 3

This course gives students an opportunity to study the dramatic literature, staging practices, and theoretical foundations of the early history of theatre. Specific topics covered include ancient Greek, Roman, and medieval European performance, as well as classical Asian theatres. Although there is no formal prerequisite for the course, students should normally be in their second year of study. A background in theatre, history, and/or dramatic literature will be an advantage.

FORMATS: Lecture | Seminar

THEA 2012 Early Modern Theatre

CREDIT HOURS: 3

This course is in a sense the sequel to THEA 2011.03, though that course is not a prerequisite. It aims to study the development of dramatic literature, staging practices, and criticism from the Renaissance, Neoclassical, and Romantic eras of theatre. There is no formal prerequisite, but students should normally be in at least the second year of study. A background in history, theatre and/or dramatic literature will be an advantage.

FORMATS: Lecture | Seminar

THEA 2020 Jazz Dance 1 (summer term)

CREDIT HOURS: 6

This course is a practical exploration into the specifics of Jazz Dance technique, incorporating the use of space, rhythm, and correct body alignment, as well as flexibility and strength. Emphasis is on the development of personal expression through the medium of dance. Students are expected to develop an awareness of dance terminology and the appreciation of movement as a practice.

CROSSLISTED: MUSC 2130.06

FORMATS: Lecture | Lab

THEA 2021 Jazz Dance 1a

CREDIT HOURS: 3

This course is a practical exploration into the specifics of Jazz Dance technique, incorporating the use of space, rhythm, and correct body alignment, as well as flexibility and strength. Emphasis is on the development of personal expression through the medium of dance. Students are expected to develop an awareness of dance terminology and the appreciation of movement as a practice.

CALENDAR NOTES: Completion of THEA 2021.03 and THEA 2022.03 satisfy course requirements toward the Certificate in Dance and Movement.

CROSSLISTED: MUSC 2131.03

EXCLUSIONS: THEA 2020XY, MUSC 2130XY

THEA 2061 Technical Theatre 1a

CREDIT HOURS: 3

This course builds on the fundamental knowledge acquired in THEA 1051.03 and THEA 1052.03 and is a companion to THEA 2071.03: Performance Technology 1a. Students begin to explore the variety of elements that make up the world of technical theatre. Labs in each of the main areas of scenic carpentry, props, lighting, sound, scenic painting, and stage management provide the active learning environment required to build skill level in each of these areas.

CALENDAR NOTES: Students should take THEA 2412.03 concurrently with this class. NOTE: THEA 2061.03 and THEA 2062.03 must be completed within the same academic year.

COREQUISITES: THEA 2412.03, THEA 2071.03

THEA 2214 Shakespeare

CREDIT HOURS: 6

An introduction to Shakespeare's career as a playwright, through discussion and interpretation of a dozen or more of his plays.

CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

PREREQUISITES: ENGL 1000X/Y.06; or any two of ENGL 1010.03, ENGL 1020.03 or ENGL 1040.03; or THEA 1000X/Y.06, or PERF 1000.03 and PERF 1002.03; or the King's Foundation Year Program

CROSSLISTED: ENGL 2214.06

FORMATS: Lecture | Discussion

THEA 2215 Young Shakespeare

CREDIT HOURS: 3

This course explores some of the works of William Shakespeare written or performed before 1600. Plays to be studied may include Richard III, Henry IV Parts I and II, Henry V, Titus Andronicus, The Taming of the Shrew, A Midsummer Night's Dream, Love's Labour's Lost, The Merchant of Venice, Romeo and Juliet, Much Ado about Nothing and Hamlet; poetry may include Venus and Adonis, The Rape of Lucrece and some of the sonnets. We will attend to how Shakespeare learned his craft through experimentation and cross-fertilization in the larger context of the rhetorical and theatrical culture of sixteenth-century London.

PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF.

CROSSLISTED: ENGL 2215.03

EXCLUSIONS: ENGL 2214/ THEA 2214

FORMATS: Lecture

THEA 2216 Shakespeare at the Globe

CREDIT HOURS: 3

During the years after the Globe Theatre was built on the banks of the Thames, Shakespeare's company performed some of his best-known theatrical works. Plays to be studied may include Twelfth Night, As You Like It, Troilus and Cressida, Measure for Measure, Othello, King Lear, Antony and Cleopatra, Macbeth, Coriolanus, The Winter's Tale, Cymbeline, and The Tempest. Focusing on Shakespeare's career after 1600, this course explores Shakespeare's mature works in their historical and cultural contexts.

PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF.

CROSSLISTED: ENGL 2217.03

EXCLUSIONS: ENGL 2214.06/THEA 2214.06

FORMATS: Lecture

THEA 2229 Tragedy

CREDIT HOURS: 3

This course studies a representative selection of texts from various historical periods in order to arrive at an understanding of the meaning of tragedy. Various definitions of tragedy will be examined along with such possible questions as: how has tragedy changed over time, and what is tragicomedy.

PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF.

CROSSLISTED: ENGL 2229.03

EXCLUSIONS: ENGL 2226.06

FORMATS: Lecture | Discussion

THEA 2401 Cave to Castle - Dress from Prehistory to 1450

CREDIT HOURS: 3

An introduction to the study of human social behaviour and its relationship to the development of body coverings, this lecture-based survey class begins with the earliest Mediterranean cultures, Ancient Egypt, Greece and Rome, and continues through to the late middle ages in Western Europe. We will look at the evolution of clothing and the intersections of environment, culture and politics that shaped human body adornment and dress practices from the beginning of recorded history through the Crusades and beyond. Our emphasis will be on using primary sources to gain a solid understanding of the social and cultural importance of forms of historical dress alongside the visual and practical components. This course is open to students in any undergraduate program, and it is also part of the Costume Studies Program.

PREREQUISITES: Completion of university writing requirement.

CROSSLISTED: HIST 2401.03

EXCLUSIONS: THEA 2400.06

FORMATS: Lecture | Discussion

THEA 2402 Castle to Café - Dress from 1450 to 1700

CREDIT HOURS: 3

Continuing on from THEA 2401.03, this course is an introduction to the study of human social behaviour and its relationship to the development of body coverings. This lecture-based survey class begins with the transition from the European middle ages to the northern renaissance, and continues through to the end of the seventeenth century. We will examine the evolution of clothing and the intersections of environment, culture and politics that bring us from the rise of corsetry to the arrival of the three-piece suit. The primary focus is on Western Europe, but students will have opportunity to explore other regions of the world in lecture and in the term paper. Our emphasis will be on using primary sources to gain a solid understanding of the social and cultural importance of forms of historical dress alongside the visual and practical components. This course is open to students in any undergraduate program, and it is also part of the Costume Studies Program.

COREQUISITES:

PREREQUISITES: Completion of university writing requirement.

CROSSLISTED: HIST 2402.03

EXCLUSIONS: THEA 2400.06, THEA 4400.06

THEA 2407 Aesthetics of Contemporary Dress a

CREDIT HOURS: 3

By examining the aesthetics of contemporary dress, this course will enable the student to understand established systems used to create clothing, utilizing body image as principal means. Through the study and application of systematic principles, the student will gain a better understanding of people's need to define body image in terms of ornamental self-expression and social identification. This course is part of the Costume Studies Program.

CALENDAR NOTES: THEA 2407.03 and THEA 2408.03 must be completed within the same academic year.

COREQUISITES: THEA/PERF 2412.03

PREREQUISITES: For BA in Theatre (Costume Studies) students: PERF 1000.03 and PERF 1002.03, THEA 1450 or THEA 1451.03 and THEA 1452.03.

For Diploma in Costume Studies: See course combinations in Calendar.

RESTRICTIONS: Costume Studies BA or Diploma students only.

FORMATS: Lecture | Lab

THEA 2408 Aesthetics of Contemporary Dress b

CREDIT HOURS: 3

This is a continuation of THEA 2407.03. By examining the aesthetics of contemporary dress, this course will enable the student to understand established systems used to create clothing, utilizing body image as principal means. Through the study and application of systematic principles, the student will gain a better understanding of people's need to define body image in terms of ornamental self-expression and social identification. This course is part of the Costume Studies Program.

PREREQUISITES: For BA Theatre (Costume Studies): THEA 2407.03 and permission of the instructor. For Diploma in Costume Studies: See course combinations in Calendar.

RESTRICTIONS: Costume Studies BA or Diploma students only

EXCLUSIONS: THEA 2406

FORMATS: Lecture | Lab

THEA 2412 Language of Design

CREDIT HOURS: 3

This course explores components of costume and set design, offering a discourse on design language, colour theory, structure, and decoration as they relate to design for the theatre. Through lecture and practical application, the student will learn basic techniques and conventions of design, how to interpret scripts, and will develop basic abilities in visual composition and water media. This course may be taken by general BA students and is also a part of the Costume Studies and Stage Design & Technical Theatre Programs.

COREQUISITES: For Costume Studies students: THEA 2407.03

PREREQUISITES: For BA Theatre (Stage Design & Technical Theatre): PERF 1000.03 and PERF 1002.03 and THEA 1052.03. For BA Theatre (Costume Studies): PERF 1000.03 and PERF 1002.03 and THEA 1450.06 or THEA 1451.03 and THEA 1452.03

CROSSLISTED: PERF 2412.03

EXCLUSIONS: THEA 2411.03

FORMATS: Lecture

THEA 2451 Costume in Performance 1

CREDIT HOURS: 3

In this course, the student will apply the knowledge gained in THEA 1451.03 and THEA 1452.03 to research, illustrate, and create designs for modern and historical costume for the stage. In addition, students work on productions in order to understand the integral role played by costume in staging a play, in an actor's character development, and in body image and representation. This course is part of the Costume Studies Program.

COREQUISITES: For Diploma in Costume Studies Students: see course combinations in Calendar. For BA Theatre (Costume Studies) students: THEA 2402.03, THEA 2408.03

PREREQUISITES: For all students: PERF 1000.03 and PERF 1002.03, THEA/PERF 2412.03, permission of the instructor. For BA Theatre (Costume Studies): THEA 1450 or THEA 1451.03 and THEA 1452.03. For Diploma in Costume Studies: see course combinations in Calendar.

CROSSLISTED: PERF 2451.03

FORMATS: Lecture | Lab

THEA 2710 Stage Design 1

CREDIT HOURS: 3

In this course, the student develops expertise in text analysis and communication specific to set design, building on the foundations learned in THEA 2412. Through applied projects, students will explore three-dimensional space development, sight lines, model building, and drafting. Students will learn how to read drafting and to create plans in traditional hand drafting as well attaining an introduction to computer assisted drafting through Vectorworks software.

PREREQUISITES: For BA Theatre (Stage Design & Technical Theatre): THEA 2412.03

CROSSLISTED: PERF 2710.03

FORMATS: Lecture | Lab

THEA 2801 Acting 2a

CREDIT HOURS: 3

The second year of the Acting Program introduces students to performance approaches that range from the classical to the contemporary. Students will receive a strong foundation in classical theatre methods through detailed exploration of heightened texts such as those of William Shakespeare. Using these texts, students will uncover performance clues embedded in the playwrights' writing in order to inspire characterization, action, and dramatic context. Students will also receive a foundation in devised theatre creation through exploration of central principles such as collaboration, style, and ensemble. Throughout the course, emphasis is placed on discipline, dedication to craft, and how to become an informed and vital contributor to the creative process.

CALENDAR NOTES: THEA 2801.03 and THEA 2802.03 must be completed within the same academic year.

COREQUISITES: THEA 2011.03, THEA 2821.03

PREREQUISITES: THEA 1801.03, THEA 1802.03, audition, and permission of the Acting faculty.

EXCLUSIONS: THEA 2800

FORMATS: Lecture | Lab

THEA 2802 Acting 2b

FORMATS: Lecture | Lab

THEA 2811 Voice and Speech 2a

CREDIT HOURS: 3

This course focuses on developing the speaking voice. It is an introduction to mind/body/voice awareness, the anatomical and physiological aspects of phonation, and the care of the voice. This introduction includes exploration and drilling of the primary breathing and phonating muscles with the object of releasing the voice and developing an open, flexible sound. Focusing of the mind, alignment of the spine, releasing of unnecessary and habitual tensions, exploration of resonating cavities, pitch, volume/power, and articulation, as well as exploration of a variety of text will all be investigated.

CALENDAR NOTES: THEA 2811.03 and THEA 2812.03 must be completed within the same academic year.

COREQUISITES: THEA 2801.03, THEA 2821.03

PREREQUISITES: THEA 1802.03, audition, and permission of instructor.

EXCLUSIONS: THEA 2810

THEA 2902 Play Analysis for Directing

CREDIT HOURS: 3

This course introduces students to the director's process in analyzing a dramatic script for performance. Working with plays from a range of periods and genres, students will explore key theoretical approaches to directorial analysis, will learn the director's core vocabulary, and will apply these discoveries to practical scene work.

PREREQUISITES: THEA 1000.06, or PERF 1000.03 and PERF 1002.03 or permission of the instructor

CROSSLISTED: PERF 2902.03

EXCLUSIONS: THEA 2900.06

FORMATS: Lecture | Seminar

THEA 3009 Middle English Drama

CREDIT HOURS: 3

This course will study Middle English Drama from its origins through to ca. 1500.

PREREQUISITES: Any course or combination of courses that satisfies the College of Arts and Sciences Writing Requirement.

CROSSLISTED: ENGL 3009

FORMATS: Lecture

THEA 3015 Renaissance Drama

CREDIT HOURS: 3

This course will explore the richness and strangeness of some of the playwrights too often obscured by Shakespeare's shadow. Between the opening of the first professional playhouse in London (1576) and the closing of the theatres by Parliament (1641), the Globe was only one of many venues catering to an avid theatre-going public, and the first English play by a woman was circulated in manuscript. Playwrights to be studied include Christopher Marlowe, Ben Jonson, Thomas Middleton, John Webster, Elizabeth Cary and John Ford.

PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF.

CROSSLISTED: ENGL 3015.03

FORMATS: Lecture | Discussion

THEA 3061 Technical Theatre 2a

CREDIT HOURS: 3

This course builds on the work completed in THEA 2061.03 and THEA 2062.03 and is a companion to THEA 3071.03 (Performance Technology 2a).

Students explore, in greater depth, the variety of elements that make up the world of technical theatre. Labs in each of the main areas of scenic carpentry, props, lighting, sound, scenic painting, and stage management provide the active learning environment required to build skill level in each of these areas.

CALENDAR NOTES: Students should complete THEA 2412.03 and THEA 2710.03 before taking this class. NOTE: THEA 3061.03 and THEA 3062.03 must be completed within the same academic year.

COREQUISITES: THEA 3071.03

FORMATS: Lab | Seminar

THEA 3072 Performance Technology 2b

CREDIT HOURS: 3

This course is the continuation of THEA 3071.03. This is an advanced course in production technology and the practical application of the work completed in THEA 3061.03 and THEA 3062.03. Students work intensively in two main areas of concentration (from scenic carpentry, props, lighting, sound, scenic painting, and stage management) and form the crew for two Fountain School stage productions over the course of the term. Emphasis will be placed on effective leadership, collaboration, craftsmanship, and professionalism. This course will require work outside of class time, on evenings and weekends.

CALENDAR NOTES: NOTE: THEA 3071.03 and THEA 3072.03 must be completed within the same academic year

COREQUISITES: THEA 3062.03

PREREQUISITES: THEA 3071.03 and permission of the instructor

EXCLUSIONS: THEA 3070

FORMATS: Lab | Seminar

THEA 3201 Directing for the Stage

CREDIT HOURS: 3

This course is an organic and practical extension of the work in the second-year level courses THEA 2901 (Dramaturgy: The Art of Developing Plays) and 2902 (Play Analysis for Directors). It assumes that you already understand the basic principles of text analysis for performance. The class content is structured so that it covers all aspects of a typical rehearsal process, including advice on how to interact with actors, designers, and stage technicians. As much of the work as possible will be hands-on and will lead to several practical projects, at least one of which will ideally also be presented to the public.

PREREQUISITES: THEA 2901.03, THEA 2902.03

EXCLUSIONS: THEA 3200.06

FORMATS: Lecture | Seminar

THEA 3314 Shakespeare and his Contemporaries on Film

CREDIT HOURS: 3

This course will study the adaptation of Shakespeare and his contemporaries to the medium of cinema, focusing on the differences between theatre and cinema, the process of textual adaptation, the updating of classic stories to modern settings, and the close analysis of the performer's choices.

PREREQUISITES: Experience in Shakespeare at any level OR experience in Film Studies at any level.

CROSSLISTED: ENGL 3314.03, FILM 3314.03

EXCLUSIONS: THEA 2313.03, ENGL 2313.03

FORMATS: Lecture | Seminar

THEA 3402 Baroque to Bustles - Dress from 1700 to 1900

CREDIT HOURS: 3

This is a mixed lecture and seminar-style survey course which will trace the development of dress through the eighteenth and nineteenth centuries, showing its evolution from the period when the fashion aesthetic was determined by the Courts, to the rise of Victorian dress reform movements and the era of mass-media advertising. Our emphasis will be on using primary sources to gain a solid understanding of the social and cultural importance of forms of historical dress alongside the visual and practical components. This class is open to students in all undergraduate programs, and is also part of the Costume Studies program.

PREREQUISITES: Completion of university writing requirement.

CROSSLISTED: HIST 3402.03

EXCLUSIONS: THEA 3401.06, THEA 4400.06

FORMATS: Lecture | Seminar

THEA 3403 Bustles to Boardroom - Modern fashion from 1900

CREDIT HOURS: 3

This is a mixed lecture and seminar-style survey course which will trace the development of dress through the twentieth and early twenty-first centuries. The lectures follow the evolution of human fashion from corsets and frock coats to the rise of modern subcultures and style tribes. Our emphasis will be on using primary sources to gain a solid understanding of the social and cultural importance of a variety of dress cultures, and the impact that dress had and continues to have in the modern world. This class is open to students in any undergraduate degree program, and it is part of the Costume Studies program.

PREREQUISITES: Completion of university writing requirement.

CROSSLISTED: HIST 3403.03

EXCLUSIONS: THEA 3401.06, THEA 4400.06

FORMATS: Lecture | Seminar

THEA 3452 Costume in Performance 2a

CREDIT HOURS: 3

In this course students will demonstrate their fluency in costume creation with design interpretations for theatrical production. Students will examine problems related to costume as an expression and extension of theatrical character development. Fountain School productions provide a venue for students to develop interpersonal and technical skills. Students work as an integral part of a team. This course is part of the Costume Studies Program.

CALENDAR NOTES: THEA 3452.03 and THEA 3453.03 must be completed within the same academic year.

COREQUISITES: THEA 3402 and 3403, THEA 3454, THEA 3455

PREREQUISITES: For BA in Theatre (Costume Studies) students: PERF 1000.03 and PERF 1002.03, THEA 1450 or THEA 1451.03 and THEA 1452.03, THEA 2011.03, THEA 2012.03, THEA 2401 and THEA 2402, THEA 2406 or THEA 2407.03 and THEA 2408.03, THEA 2412.03, THEA 2451.03. For Diploma in Costume Studies: see course combinations in Calendar.

RESTRICTIONS: Costume Studies BA or Diploma students only.

EXCLUSIONS: THEA 3450, THEA 3451

FORMATS: Lecture | Lab

THEA 3453 Costume in Performance 2b

CREDIT HOURS: 3

This is a continuation of THEA 3452.03. In this course students will demonstrate their fluency in costume creation with design interpretations for theatrical production. Students will examine problems related to costume as an expression and extension of theatrical character development. Fountain School productions provide a venue for students to develop interpersonal and technical skills. Students work as an integral part of a team. This course is part of the Costume Studies Program.

CALENDAR NOTES: THEA 3452.03 and THEA 3453.03 must be completion within the same academic year.

COREQUISITES: THEA 3402.03 and 3403.03, THEA 3454.03, THEA 3455.03

PREREQUISITES: For BA in Theatre (Costume Studies) students: PERF 1000.03 and PERF 1002.03, THEA 1450 or THEA 1451.03 and THEA 1452.03, THEA 2011.03, THEA 2012.03, THEA 2401.03 and THEA 2402.03, THEA 2406 or THEA 2407.03 and THEA 2408.03, THEA 2412.03, THEA 2451.03. THEA 3454 Body-Shaping Through Historical Tailoring 2

CREDIT HOURS: 3

This course introduces the student to the process of tailoring as it originated in the Renaissance and its development down to the twentieth century. Emphasis is placed on the purpose of underpaddings, understructures, and the techniques of fixing them in place. This course is part of the Costume Studies Program.

COREQUISITES: THEA 3402.03, THEA 3403.03, THEA 3452.03, THEA 3453.03, THEA 3455.03.

PREREQUISITES: For BA in Theatre (Costume Studies) students: PERF 1000.03 and PERF 1002.03, THEA 1450 or THEA 1451.03 and THEA 1452.03, THEA 2011.03, THEA 2012.03, THEA 2401.03 and THEA 2402.03, THEA 2406 or THEA 2407.03 and THEA 2408.03, THEA/PERF 2412.03, THEA/PERF 2451.03. For Diploma in Costume Studies: see course combinations in calendar.

RESTRICTIONS: Costume Studies BA or Diploma students only.

FORMATS: Lecture | Lab

THEA 3455 Body-Shaping Through Historical Tailoring 1

CREDIT HOURS: 3

The "Systems" of Pattern Drafting from the early nineteenth century to the twentieth century. Utilizing traditional tailoring techniques, the process of creating professional tailored garments is studied in detail. This course is part of the Costume Studies Program.

COREQUISITES: THEA 3401.03, THEA 3451.03, THEA 3454.03

PREREQUISITES: PREREQUISITES: For BA in Theatre (Costume Studies) students: PERF 1000.03 and PERF 1002.03, THEA 1450 or THEA 1451/1452, THEA 2011.03, THEA 2012.03, THEA 2401.03 and THEA 2402.03, THEA 2406 or THEA 2407.03 and THEA 2408.03, THEA/PERF 2412.03, THEA/PERF 2451.03. For Diploma in Costume Studies: see course combinations in calendar.

RESTRICTIONS: Costume Studies BA or Diploma students only.

FORMATS: Lecture | Lab

THEA 3503 Modern Theatre

CREDIT HOURS: 3

From the 1870s until the 1960s, the theatre underwent a series of radical transformations as artists sought new forms for a rapidly changing world. This course explores the key theatrical movements of this period, including Realism, Naturalism, Symbolism, Epic Theatre, Theatre of Cruelty, and Absurdism. It compares the theories behind them to the plays, stagecraft, and performance techniques they produced, and considers their legacy for the contemporary stage.

PREREQUISITES: THEA 2011.03 and THEA 2012.03 or permission of the instructor

CROSSLISTED: ENGL 3503.03

EXCLUSIONS: THEA 3500.03, THEA 3501.03, THEA 3502.03

THEA 3516 Ancient Comedy

CREDIT HOURS: 3

Ancient Comedy ranges from the boistrous and bawdy plays of Old Comedy through the domestic and romantic "tragicomedies" of Euripides to the boy-meets-girl stories of Greek and Roman New Comedy. This course examines the origins and development of the comic genre in the Greek and Roman world through a study of the plays of Aristophanes, Euripides, Menander, Plautus, and Terence in translation. It considers the nature of comedy and its function within society as well as the basic techniques and conventions of the genre itself. Topics to be studied include the "comic hero," comic stereotypes, types of humour, and the relationship between actor and spectator.

PREREQUISITES: Students must be beyond the first year.

CROSSLISTED: CLAS 3516

EXCLUSIONS: CLAS 3510X/Y.06

FORMATS: Lecture | Discussion

THEA 3601 The Playwright in the Theatre a

CREDIT HOURS: 3

This course studies the play as a vehicle for performance rather than as a literary work. Through weekly writing exercises dealing with specific dramaturgical problems, the craft of play-writing is explored. With this background, the class then writes plays which are revised, critiqued, and given a public presentation.

PREREQUISITES: THEA 2901.03 and THEA 2902.03, or permission of the instructor

EXCLUSIONS: THEA 3600

FORMATS: Lecture | Lab

THEA 3602 The Playwright in the Theatre b

CREDIT HOURS: 3

This course takes alternative approaches to studying the play as a vehicle for performance. Through weekly writing exercises dealing with specific dramaturgical problems, the craft of play-writing is explored. With this background, the class then writes plays which are revised, critiqued, and given a public presentation.

PREREQUISITES: THEA 2901.03 and THEA 2902.03, or permission of the instructor

FORMATS: Lecture | Lab

THEA 3711 Stage Design 2a

CREDIT HOURS: 3

In Stage Design 2a and 2b, students will: develop complex concepts and practice artistic versatility through examining diverse style and genre; solve in-depth design challenges; develop multi-scene set design; develop skills in scale model building; gain a comprehensive knowledge of 3D modelling and drafting in Vectorworks software, as well as learn how to realize designs through creating digital files for the school's laser cutter, CNC router, and 3D printer. This course cycles every 2nd year with PERF 3721 and PERF 3722, Digital Design for Performance, which focus on projection design.

CALENDAR NOTES: THEA 3711.03/PERF 3711.03 and THEA 3712.03/PERF 3712.03 must be completed in the same academic year.

PREREQUISITES: General: THEA 2710.03/PERF 2710.03, PERF 1000.03 and PERF 1002.03; For BA Theatre (Stage Design & Technical Theatre): THEA 2710.03/PERF 2710.03, THEA 2060.03 or THEA 2061.03/THEA 2062.03, THEA 2070.03 or THEA 2071.03/THEA 2072.03.

CROSSLISTED: PERF 3711.03

EXCLUSIONS: THEA 3710

FORMATS: Lecture | Lab

THEA 3712 Stage Design 2b

CREDIT HOURS: 3

A continuation of THEA/PERF 3711. In Stage Design 2a and 2b students will: develop complex concepts and practice artistic versatility through examining diverse style and genre; solve in-depth design challenges; develop multi-scene set design; develop skills in scale model building; gain a comprehensive knowledge of 3D modelling and drafting in Vectorworks software, as well as learn how to realize designs through creating digital files for the school's laser cutter, CNC router, and 3D printer. This course cycles every 2nd year with PERF 3721 and PERF 3722, Digital Design for Performance, which focus on projection design.

THEA 3811 Voice and Speech 3a

CREDIT HOURS: 3

This course is a continuation of 2812.03. Emphasis is on freeing the voice by combining newly developed skills that constitute "good use": releasing the mind and body, aligning the spine, and accessing primary breathing muscles. Attention is paid to vocal support, clarity of the sound, flexibility and range, and the power behind the sound. A voice warm-up is designed and instructed by each student. Ways of accessing oral, nasal, and pharyngeal cavities are explored. Phonetics, speech, and accents/dialects are introduced. Much of the work involves application to a variety of texts.

CALENDAR NOTES: THEA 3811.03 and THEA 3812.03 must be completed within the same academic year.

COREQUISITES: THEA 3801.03, THEA 3821.03

PREREQUISITES: THEA 2801.03, THEA 2802.03, THEA 2811.03, THEA 2812.03, THEA 2821.03, THEA 2822.03, and permission of the Acting faculty.

THEA 3911 Gender in Theatre: A Cross-Cultural Survey

CREDIT HOURS: 3

This course examines the roles gender has played in the shaping of world theatre alongside the roles the theatre has played in the shaping of various cultural conceptions of gender. By exploring plays and performances from Europe, North America, China, Japan, India, Iran and/or other traditions, we will strive to understand the ways in which various forms of representation reflect their cultures' governing images of masculinity and femininity. In the process, we will interrogate the historical and cultural variability of the notion of “gender” itself. The main objective of the course will be to ask how gender determines performers' choices in various cultures, and to see how gender itself can actually be shaped by performance.

CROSSLISTED: GWST 3911.03

FORMATS: Lecture | Discussion

THEA 3912 Gender Theory and Contemporary Performance

CREDIT HOURS: 3

This course offers students an opportunity to encounter some of the most provocative and challenging gender theory of recent years in relation to contemporary theatre, film and performance art. Students will read considerations of the relationship between gender, performance and identity by such authors as Hélène Cixous, Luce Irigaray, Julia Kristeva, Judith Butler, Judith Halberstam, Peggy Phelan and Camille Paglia, among others. Alongside these works, we will examine contemporary performances from the popular to the oppositional. Through this intertextual exploration of theory and performance, we will aim to expand our understanding of the ways in which gender roles are created, maintained, questioned and changed in contemporary culture(s).

CROSSLISTED: GWST 3912.03

FORMATS: Lecture | Discussion

THEA 3913 English Drama 1660-1800

CREDIT HOURS: 3

A survey of plays produced during the Restoration and eighteenth century. Concentrating on the London scene from the first appearance of actresses on the stage to the burning of the Haymarket theatre in 1789, this course introduces students to the period's various dramatic forms, the literary influences and controversies, and the many women and men who penned for the stage.

PREREQUISITES: ENGL 1000X/Y.06; or any two of ENGL 1010.03, ENGL 1020.03, ENGL 1040.03, or THEA 1000X/Y.06 or PERF 1000.03 and PERF 1002.03; or the King's Foundation Year Program

THEA 3914 Topics in Italian Drama and Spectacle

CREDIT HOURS: 3

This course focuses on Italian drama and performance. The topic will vary from year to year and may include topics such as Italian Renaissance theatre, the Commedia dell'arte, Pirandello's productions and contemporary Italian spectacle. The course will examine the selected topic while placing Italian theatre into a broader European context; students will acquire reading strategies for drama and spectacle and learn to consider the works from a theoretical perspective. The course is held in English but Italian majors will be required to read the texts in the original.

CROSSLISTED: ITAL 3700.03

FORMATS: Lecture

THEA 3915 Stars and Stardom on Stage and Screen

CREDIT HOURS: 3

What makes a 'star' actor? How do stars' gifts and idiosyncrasies interact with the possibilities of their media and with market forces to create celebrity? This course explores stage and screen stardom as historical, aesthetic, and economic phenomena that illuminate shifting constructions of beauty, class, gender, sexuality, race, and ethnicity.

THEA 4101 Short Apprenticeship

CREDIT HOURS: 3

Students gain practical, workplace experience with an organization appropriate to their course of study. The Short Apprenticeship will represent approximately 50 – 60 hours of work on an approved project with a sponsoring organization. Positions may be paid when appropriate, but this is not guaranteed.

PREREQUISITES: Permission of the Fountain School

RESTRICTIONS: Students must have completed two years of study in a Minor/Major/Double Major/Honours/Combined Honours Bachelor of Arts program in Theatre or Cinema and Media Studies. Applications for apprenticeships will be evaluated by the Associate Director (Theatre) in consultation with FSPA faculty members, who will have final decision about which apprenticeships can be sponsored by the School.

EXCLUSIONS: There are no exclusions, but students who have completed THEA 4102.06 will not be prioritized if they apply for THEA 4101.03 and vice versa. Approval will not be granted for two apprenticeship credits with the same or similar course content.

THEA 4102 Long Apprenticeship

CREDIT HOURS: 6

Students gain practical, workplace experience with an organization appropriate to their course of study. The Long Apprenticeship will represent approximately 100 – 120 hours of work on an approved project with a sponsoring organization. Positions may be paid when appropriate, but this is not guaranteed.

PREREQUISITES: Permission of the Fountain School

RESTRICTIONS: Students must have completed two years of study in a Minor/Major/Double Major/Honours/Combined Honours Bachelor of Arts program in Theatre or Cinema and Media Studies. Applications for apprenticeships will be evaluated by the Associate Director (Theatre) in consultation with FSPA faculty members, who will have final decision about which apprenticeships can be sponsored by the School.

EXCLUSIONS: There are no exclusions, but students who have completed a Long Apprenticeship will not be prioritized if they apply for a Short Apprenticeship and vice versa. Approval will not be granted for two apprenticeship credits with the same or similar course content.

FORMATS: Experiential Learning

THEA 4103 Long Apprenticeship a

CREDIT HOURS: 3

Students gain practical, workplace experience with an organization appropriate to their course of study. The Long Apprenticeship will represent approximately 100 – 120 hours of work on an approved project with a sponsoring organization, completed over two consecutive academic terms in THEA 4103.03 and THEA 4104.03. Positions may be paid when appropriate, but this is not guaranteed.

PREREQUISITES: Permission of the Fountain School

RESTRICTIONS: Students must have completed two years of study in a Minor/Major/Double Major/Honours/Combined Honours Bachelor of Arts program in Theatre or the Minor in Film Studies. Applications for apprenticeships will be evaluated by the Associate Director (Theatre) in consultation with FSPA faculty members, who will have final decision about which apprenticeships can be sponsored by the School.

EXCLUSIONS: THEA 4102X/Y.06. Also, students who have completed THEA 4103.03 and 4104.03 will not be prioritized if they apply for THEA 4101.03 and vice versa. Approval will not be granted for two apprenticeship credits with the same or similar course content.

FORMATS: Experiential Learning

THEA 4104 Long Apprenticeship b

CREDIT HOURS: 3

Students gain practical, workplace experience with an organization appropriate to their course of study. The Long Apprenticeship will represent approximately 100 – 120 hours of work on an approved project with a sponsoring organization, completed over two consecutive academic terms in THEA 4103.03 and THEA 4104.03. Positions may be paid when appropriate, but this is not guaranteed.

PREREQUISITES: Permission of the Fountain School

RESTRICTIONS: Students must have completed two years of study in a Minor/Major/Double Major/Honours/Combined Honours Bachelor of Arts program in Theatre or the Minor in Film Studies. Applications for apprenticeships will be evaluated by the Associate Director (Theatre) in consultation with FSPA faculty members, who will have final decision about which apprenticeships can be sponsored by the School.

EXCLUSIONS: THEA 5102X/Y.06. Also, students who have completed THEA 4103.03 and THEA 4104.03 will not be prioritized if they apply for THEA 4101.03 and vice versa. Approval will not be granted for two apprenticeship credits with the same or similar course content.

FORMATS: Experiential Learning

THEA 4250 Artists as Entrepreneurs: From Concept to Creation

CREDIT HOURS: 3

A business course designed for those interested in arts-led entrepreneurial ventures and self-producing theatre, music and film events for public platforms. It is aimed at developing the preparatory skill set needed for entrepreneurial ventures, which can feature creative products, services, and performances. Content will focus on an arts-led approach and how this can define entrepreneurial ventures, operations, and engagement with audiences and customers. Product benefits, customer groups, promotion, branding, distribution, financial and legal concepts, and digital platforms will be examined through the creative arts lens. Finally, audience-building strategies for those leading small performing arts organizations will be explored.

PREREQUISITES: Permission of the instructor

CROSSLISTED: PERF 4250, MUSC 4250

FORMATS: Lecture | Discussion

THEA 4407 The Aesthetics of Historical Dress a

CREDIT HOURS: 3

This course examines the aesthetics of historical dress, tracing the evolution of changing silhouettes and historical pattern design throughout the eighteenth and/or nineteenth centuries. The student will learn to carry out material-culture and textual analyses of historical source material with a view to re-creating the characters and dress of the eighteenth and/or nineteenth centuries. This course stresses research and academic skills, along with applied skills. Primary research forms a significant component of this course. This course is part of the Costume Studies Program.

CALENDAR NOTES: THEA 4407.03 and THEA 4408.03 must be completed within the same academic year.

PREREQUISITES: For BA in Theatre (Costume Studies) students: PERF 1000.03 and PERF 1002.03, THEA 1451.03, THEA 1452.03, THEA 2011.03, THEA 2012.03, THEA 2401.03, THEA 2402.03, THEA 2406 or THEA 2407.03 and THEA 2408.03, THEA 2412.03, THEA 2451.03, THEA 3402.03, THEA 3403.03, THEA 3451 or THEA 3452.03 and THEA 3453.03, THEA 3454.03, THEA 3455.03. For Diploma in Costume Studies: see course combinations in calendar. Permission of the instructor is required.

RESTRICTIONS: Costume Studies BA or Diploma students only.

EXCLUSIONS: THEA 3405.06, THEA 4406.06

FORMATS: Lecture | Lab

THEA 4408 The Aesthetics of Historical Dress b

CREDIT HOURS: 3

This is a continuation of THEA 4407.03. This course examines the aesthetics of historical dress, tracing the evolution of changing silhouettes and historical pattern design throughout the eighteenth and/or nineteenth centuries. The student will learn to carry out material-culture and textual analyses of historical source material with a view to re-creating the character and dress of the eighteenth and/or nineteenth centuries. This course stresses research and academic skills, along with applied skills. Primary research forms a significant component of this course. This course is part of the Costume Studies Program.

CALENDAR NOTES: THEA 4407.03 and THEA 4408.03 must be completed within the same academic year.

PREREQUISITES: THEA 4407.03 and permission of the Instructor.

EXCLUSIONS: THEA 3405.06, THEA 4406.06

FORMATS: Lecture | Lab

THEA 4450 Costume Technology

CREDIT HOURS: 3

This course extends the expertise in costume creation developed in THEA 3452.03 and THEA 3453.03 to examine techniques of fine finish as students prepare their costume 'masterpiece' for the final Fountain School production. This course is part of the Costume Studies Program.

COREQUISITES: THEA 4452

PREREQUISITES: For BA in Theatre (Costume Studies) students: PERF 1000.03 and PERF 1002.03, THEA 1450 or THEA 1451.03 and THEA 1452.03, THEA 2011.03, THEA 2012.03, THEA 2401.03 and THEA 2402.03, THEA 2406 or THEA 2407.03 and THEA 2408.03, THEA/PERF 2412.03, THEA/PERF 2451.03, THEA 3402.03 and THEA 3403.03, THEA 3451 or THEA 3452.03 and THEA 3453.03, THEA 3454.03, THEA 3455.03. For Diploma in Costume Studies, see Costume Studies course combinations in Calendar

RESTRICTIONS: Costume Studies BA or Diploma students only.

FORMATS: Lecture | Lab

THEA 4452 The Sculpture of Dress

CREDIT HOURS: 3

Through the study of draping techniques, this course examines sculptural forms in a human context to facilitate modern and historical costume design. The student works directly on the human body or mannequin to gain proficiency in modelling textiles to shape costume. This course is part of the Costume Studies

Program.

COREQUISITES: THEA 4450

PREREQUISITES: For BA in Theatre (Costume Studies) students: PERF 1000.03 and PERF 1002.03, THEA 1450 or THEA 1452.03 and THEA 1452.03, THEA 2011.03, THEA 2012.03, THEA 2401.03, THEA 2402.03, THEA 2406 or THEA 2407.03 and THEA 2408.03, THEA/PERF 2412.03, THEA/PERF 2451.03, THEA 3402.03, THEA 3403.03, THEA 3451 or THEA 3452.03 and THEA 3453.03, THEA 3454.03, THEA 3455.03. For Diploma in Costume Studies, see Costume Studies course combinations in Calendar.

RESTRICTIONS: Costume Studies BA or Diploma students only.

FORMATS: Lecture | Lab

THEA 4500 Canadian Theatre to 1968: Performing the Nation

CREDIT HOURS: 3

Early Canadian theatre offers a fascinating example of a colonial nation's struggle to find its own dramatic voice in the face of powerful outside influences. This seminar course will explore the development of theatre in Canada from its roots in First Nations ritual and performance, to its encounters with British and European models and its eventual search for an independent identity via the Little Theatre movement, the Workers' Theatre movement and the Dominion Drama Festival. The course will close with a consideration of the influential Massey Commission and the birth of the Stratford Festival, Canada's first 'world class' theatre. Over the course of the term, special attention will be paid to the development of diverse dramatic traditions in French and English Canada. Drama by representative playwrights will be studied alongside primary sources in Canadian theatre history to give students an integrated perspective on the complex artistic and political debates that helped to determine the character of performance in Canada.

PREREQUISITES: Permission of the instructor

CROSSLISTED: ENGL 4500.03, CANA 4500.03

FORMATS: Seminar | Discussion

THEA 4501 Canadian Theatre Since 1968: Interrogating Identities

CREDIT HOURS: 3

This seminar course will examine the ongoing emergence of uniquely Canadian forms of theatre in the years since the Massey Commission asserted the need to foster Canada's native talent. Topics to be considered will include: the controversial role of government subsidy and policy-making in Canadian culture; the differing models offered by the Stratford and Shaw Festivals, by the major regional theatres, and by 'alternate' and independent companies; the contrast between First Nations, English- and French-Canadian traditions; and the rise of the current 'Fringe' phenomenon. Drama by representative playwrights will be considered alongside post-colonial theory and primary sources in Canadian theatre history to help students consider what a genuinely 'Canadian' theatre might look like. Above all, the course offers an opportunity to consider the complex relationship between theatre and national identity: who are 'we,' and how might our theatre express or even shape 'us'?

PREREQUISITES: Permission of the instructor

CROSSLISTED: ENGL 4501.03, CANA 4501.03

FORMATS: Seminar | Discussion

THEA 4502 East Asian Animation and its Roots in Performance and Visual Culture

CREDIT HOURS: 3

This course asks how Chinese-language and Japanese performance and visual arts feed into animated film, and how animation today is shaped by but also extends these traditions. With a focus on aesthetics, it is centred around the theoretical question of when/how we can define "animation" in opposition to other arts and technologies, and when/how these overlap. Secondary questions include the concept of "nation" in relation to animation and the extent to which causality can be attributed to connections between aesthetic forms; no doubt additional questions and themes will arise as we discuss. The aim of the course is not to answer these definitively, but to use these as starting points for conversation and analysis. This course does not go deep into any one form or style but rather gives an overview of many in order to enable students to look more closely, in their own research, into those that interest them most.

CROSSLISTED: FILM 4502.03, CHIN 4502.03

FORMATS: Lecture

THEA 4701 Special Topics 1

CREDIT HOURS: 3

In this seminar course, students focus on a particular topic in dramatic literature, film studies, theatre history, dramatic theory, or a related interdisciplinary subject in order to investigate it in great detail. The topic is assigned by the Fountain School at the end of the preceding year and is then posted by the School and in the University's timetable.

FORMATS: Seminar

THEA 4702 Special Topics 3

CREDIT HOURS: 3

In this seminar course, students focus on a particular topic in dramatic literature, film studies, theatre history, dramatic theory, or a related interdisciplinary subject in order to investigate it in great detail. The topic is assigned by the Fountain School at the end of the preceding year and is then posted by the Department and in the University's timetable.

FORMATS: Seminar

THEA 4735 Advanced Seminar in Baroque Culture

CREDIT HOURS: 6

This course offers its students a survey of key aspects of seventeenth and eighteenth-century European history and society along with a first-hand view of some of the most important aspects of baroque style and material culture. It takes place in the town of Cesky Krumlov in the Czech Republic. The course introduces students to the socio-political conditions that led to the birth of Baroque civilization before entering into an exploration of the court life of seventeenth and eighteenth-century Europe. It then examines the cultural and artistic forms most characteristic of this period, with particular emphasis on theatre history and on the role of the 'theatrical' in the Baroque arts. As the course proceeds, students will have an opportunity to consider the connections between course material and the evidence of Baroque culture to be found in the Castle Theatre's scenographic machinery, its stock of original scenery and props, and its collection of historical costumes, as well as to witness an experimental Baroque opera performance. Finally, the course will include visits to Prague and other sites of interest to add to students' understanding of the Baroque and its legacy to subsequent periods.

PREREQUISITES: Permission of the Fountain School of Performing Arts and/or History Department.

CROSSLISTED: HIST 4162.06, MUSC 4360.06

RESTRICTIONS: 3rd and 4th year students only.

FORMATS: Lecture | Lab

THEA 4801 Acting 4a

CREDIT HOURS: 3

The culminating course of the Acting Program focuses on the rehearsal and performance of three Fountain School theatre productions and the development of a creation project. This course also provides students with the opportunity to earn their Honours credit by preparing professional portfolios and audition pieces under the tutelage of the Acting Program faculty. In its twofold function, this course is a bridge to the Acting profession.

CALENDAR NOTES: THEA 4801.03 and THEA 4802.03 must be completed within the same academic year.

COREQUISITES: THEA 4841.03

CALENDAR NOTES: THEA 4841.03 and THEA 4842.03 must be completed within the same academic year.

PREREQUISITES: THEA 4801.03, THEA 4841.03, and permission of the Acting faculty.

EXCLUSIONS: THEA 4800.06

THEA 4921 Special Topics 2

CREDIT HOURS: 3

In this seminar course, students focus on a particular topic in dramatic literature, film studies, theatre history, dramatic theory, or a related interdisciplinary subject, and investigate it in great detail. The topic is assigned by the Fountain School of Performing Arts at the end of the preceding academic year and is then posted at the School and in the Faculty's timetable.

FORMATS: Seminar

THEA 4922 Topics in Theatre History

CREDIT HOURS: 3

In this seminar course, students focus on a particular topic in the field of theatre history and investigate it in great detail. The topic is assigned by the Fountain School of Performing Arts at the end of the preceding academic year and it is then posted at the School and in the Faculty's timetable.

PREREQUISITES: Permission of the instructor

FORMATS: Lecture | Seminar | Discussion

THEA 4923 Topics in Dramatic Literature

CREDIT HOURS: 3

In this seminar course, students focus on a particular topic in the field of dramatic literature and investigate it in a great detail. The topic is assigned by the Fountain School at the end of the preceding academic year and it is then posted at the School and in the Faculty's timetable.

PREREQUISITES: Permission of the instructor

FORMATS: Lecture | Seminar | Discussion

THEA 4924 Special Topics in Theatre and Cinema

CREDIT HOURS: 3

In this seminar class, students focus on a particular topic relevant to the fields of both theatre and cinema and investigate it in great detail. The topic is assigned by the School of Performing Arts at the end of the preceding academic year and it is then posted at the School and in the Academic Timetable.

CROSSLISTED: FILM 4393

FORMATS: Lecture | Seminar

THEA 4925 Puppets: Bringing Objects to Life

CREDIT HOURS: 3

In this class, we will explore the question: what does it mean for an object to come "to life" on stage? We will engage with theories of puppet and object vitality in the written work of puppeteers and scholars, experiment with puppetry techniques, and analyze contemporary puppet productions. At the end of the course, students will be able to test their discoveries in short performances of their own.

PREREQUISITES: Permission of the instructor

FORMATS: Lecture | Seminar

THEA 4926 Creative Responses to A Midsummer Night's Dream

CREDIT HOURS: 3

Shakespeare's *A Midsummer Night's Dream* is an ideal play for exploring how one creative work can inspire others. Its tale of lovers and actors lost in a fairy-filled forest still speaks to us about imagination, beauty, transformation, sexuality, gender, dreams, love, rebellion, laughter, art, the environment, and performance. Not only are productions of it still commonplace, but it has also inspired numerous adaptations in theatre, cinema, poetry, music, dance, novels, animations, and songs. In this course, you will read the play closely and examine the creative dreams that it has inspired in other artists over the centuries.

You may also engage in creative projects of your own for credit.

CROSSLISTED: FILM 4926.03, PERF 4926.03

FORMATS: Lecture | Seminar

THEA 4931 Contemporary Theatre

CREDIT HOURS: 3

This course will deal with the most recent developments in theatre, especially with those post-1970s trends that exercise a broad international influence. Each year, our investigation will begin with a brief look at postmodern theatre and cover topics such as performance art, physical theatre, and postdramatic theatre. The main focus of the course, however, will be dictated by what is currently happening on major stages across the world and may significantly change from one year to another. In the interest of a comprehensive and inclusive approach to the subject, both commercial and experimental theatres will be studied, and we will also examine some relevant works of criticism and theory. Since much of the material required for this course is not yet removed enough from our

time to be accessible in scholarly literature, students should be prepared for alternative methods of research.

Introduction

Computer Science is an academic discipline which pushes the limits of what computing devices can do for society. The Faculty of Computer Science provides high-quality education to our students in all areas of Computer Science with the aim to develop in a student the deep technical, problem-solving and leadership skills needed to create – or leverage – new computing technologies to empower people, organizations and society. From oceans to healthcare, information communications technology to aerospace, our students, professors and alumni are using their skills to make an impact.

Founded in 1997, Dalhousie University's Faculty of Computer Science is the premier research institution in Information Technology in Atlantic Canada. The flexible and multi-disciplinary academic and research programs allow students to combine their studies in unique ways to develop and support the diverse technology talent required for tomorrow's workforce.

The most up-to-date information on ongoing programs and initiatives within the Faculty can be found on our website: www.cs.dal.ca.

Degree Programs

Academic Regulations

For all variations of undergraduate degrees offered by the Faculty of Computer Science:

- of the minimum 57 to maximum 60 credit hours required for all CSCI credit hours required at all levels, at least half must be chosen from Dalhousie CSCI course offerings, and
- of all CSCI credit hours required at the 3000 and 4000 level, at least half must be chosen from Dalhousie CSCI course offerings.

In addition to the regulations below, please see the University's [Academic Regulations](#) section.

Workload

A normal course load is five courses during each study term.

Course Selection

The content of every course that students take to meet degree requirements must represent new material: students may not take courses whose content is largely repetitive of, or more elementary than, a course taken earlier on the same topic, without permission of the Faculty.

Of the 120 credit hours required to complete any CS undergraduate degree, at least 60 must be taken from Dalhousie University.

Courses offered by the Faculty of Computer Science may be cancelled due to low registration in accordance with the FCS Procedures on Course Cancellation.

Computer courses in other departments

Computer courses offered by other departments (e.g., COMM 1502.03, MGMT 1601.03) cannot be taken for credit in the Faculty's degree programs without explicit permission of the Faculty of Computer Science.

Grades

1. Course instructors will describe methods of student evaluation during the first week of each course.
2. Supplementary examinations are not given in Computer Science courses.
3. A grade of at least C is required for a course to satisfy a prerequisite condition for a CSCI/INFX course.
4. A grade of at least C is required in all Computer Science CSCI/INFX core courses to graduate with any Computer Science degree.

Dismissal

A student who meets the conditions for dismissal as outlined in [Section 20, Academic Dismissal](#), of the Academic Regulations will be dismissed from the program. A student who fails more than one co-op work term will be dismissed from the co-op program.

A student in any undergraduate degree program offered by the Faculty of Computer Science, where the first major is Computer Science or Applied Computer Science, who receives a grade lower than C in the same required CSCI course twice, will be dismissed. The required CSCI courses are:

Bachelor of Applied Computer Science: CSCI 1110, CSCI 1120, CSCI 1170, CSCI 1800, CSCI 1801, CSCI 2100, CSCI 2110, CSCI 2134, CSCI 2141, CSCI 2170, CSCI 2201, CSCI 2690, CSCI 2691, CSCI 3101, CSCI 3130, CSCI 3160, CSCI 3171, CSCI 3172, CSCI 3691, CSCI 4163, CSCI 4691

Bachelor of Computer Science: CSCI 1110, CSCI 1120, CSCI 1170, CSCI 1315, CSCI 1800, CSCI 1801, CSCI 2100, CSCI 2110, CSCI 2115, CSCI 2122, CSCI 2134, CSCI 2141, CSCI 3101, CSCI 3110, CSCI 3120, CSCI 3130, CSCI 3137, CSCI 3171

Bachelor of Arts in Computer Science/Bachelor of Science in Computer Science: CSCI 1110, CSCI 1120, CSCI 1170, CSCI 1315, CSCI 1800, CSCI 1801, CSCI 2110, CSCI 2122, CSCI 2134, CSCI 2141, CSCI 3110, CSCI 3120, CSCI 3130, CSCI 3171

An application for readmission to the program may be considered two terms after dismissal. A student who has been dismissed and who has been required to withdraw from the university for one term or more may be readmitted to a program in the Faculty of Computer Science only once. A readmitted student is considered to be on probation.

Minors

Computer Science students doing a minor may not use a 2000+ level course to satisfy both a major requirement and a minor requirement. For each course that is explicitly required by both the major and the minor, the choice of an additional course in the minor subject and at the same level or higher must be used to fulfill the duplicate requirement.

Maguire, F., MA (Oxford), PhD (London)
Malloch, J., BA (Dalhousie), MA, PhD (McGill)

Poitras, E., BA (Moncton), MA, PhD (McGill)
Rahman, M., BSc (Bangladesh), MSc, PhD (Saskatchewan)
Sharma, T., BE (Rajasthan), MS (Ind. Instit. Tech.-Madras), PhD (Athens)
Tang, Y., BEng (Lanzhou Jiotong), MEng (Harbin), PhD (Waterloo)
Wehbe, R., BSc (York), MSc (UOIT), PhD (Waterloo)
Whidden, C., BCS, MCS, PhD (Dalhousie)
Wu, G., BCS (Northwest Normal), MC (Austalian Nat'l), PhD (Toronto)

University Teaching Fellow

Brodsky, A., BMath (Waterloo), MSc, PhD (UBC)
Kalyaniwalla, N., BSc (Bombay), MS, PhD (Rensselaer)

Senior Instructor

Aziz, K., BSc (Lahore), MSc (Singapore), PhD (Vienna Univ of Tech)
Fleming, J., BComm, BA (St. Mary's), MA (Dalhousie)
MacKay, B., BA (Mt. A.), PhD (Dalhousie)
Sampangi, R., BE (Visveswaraya Tech), MTech (Mysore), PhD (Dalhousie)
Siegel, A., BSc (Eckerd), MSC, PhD (Dalhousie)

Instructor

Cochran, A., MEC (Dalhousie)
DeGagne, C., BSc (Brandon), MSc (Bristol), PhD (Dalhousie)
Dey, S., BTech (West Bengal), MTech (Mysore), PhD (Dalhousie)
Goudreault, M., BKI (Waterloo), PGDip (Edinburgh)
Hawkey, R., BCS (Dalhousie)
Heggie, C., BA (Dalhousie)
Marchand, Y., BCS (Belfort), MCS (Paris VIII, Caen), PhD (Campiegne)
Meredith, T., BTech (Ryerson), MMath, PhD (Waterloo)
Mosquera, M., BIT (Clayton), MEC (Dalhousie)
Sukhchandani, Dipl.Eng. (Punjab Tech Ed), BTech (Punjab), MEng (Thapar), PhD (Thapar Inst.)

Bachelor of Applied Computer Science

Faculty Requirements

1000 Level

- CSCI 1110: Introduction to Computer Science
- CSCI 1120: Introduction to Computer Systems
- CSCI 1170: Introduction to Web Design and Development
- CSCI 1800: Society and Technology before Automation
- CSCI 1801: Society and Technology in the Automation Age

2000 Level

- CSCI 2100: Communication Skills: Written and Oral
- CSCI 2110: Data Structures and Algorithms
- CSCI 2134: Software Development
- CSCI 2141: Introduction to Database Systems
- CSCI 2201: Introduction to Information Security
- CSCI 2170: Introduction to Server Side Scripting

- CSCI 2690: Introduction to Software Projects
- CSCI 2691: Introductory Project

3000 Level

- CSCI 3101: Social, Ethical, and Professional Issues in Computer Science
- CSCI 3130: Introduction to Software Engineering
- CSCI 3160: Designing User Interfaces
- CSCI 3171: Network Computing
- CSCI 3172: Web-Centric Computing
- CSCI 3691: Intermediate Project

4000 Level

- CSCI 4163: Human Computer Interaction
- CSCI 4691: Advanced Project
- Three credit hours of an advanced database course at or above the 3000 level, chosen from an approved list:
 - CSCI 4140: Advanced Database Systems
 - CSCI 4141: Information Retrieval
 - CSCI 4144: Introduction to Data Mining and Data Warehousing
 - CSCI 4145: Cloud Computing
 - CSCI 4146: The Process of Data Science
 - CSCI 4147: The Web of Open Linked Data

Other Required Courses:

- MGMT 1301: Interdisciplinary Management I
- MGMT 1302: Interdisciplinary Management II
- MGMT 2303: People, Work, and Organizations: Micro Organizational Behaviour
- six credit hours of Management, Commerce, or Computer Science courses at or above the 3000 level, approved by the Faculty of Computer Science
- 15 credit hours of electives at or above the 1000 level
- 24 credit hours of electives at or above the 2000 level

Other Degree Requirements:

- A maximum of 90 credit hours of Computer Science courses may be taken for the BACS.

Please consult with an advisor in the Faculty of Computer Science when choosing from approved lists. Additional courses may be available but not presently listed above.

Minors for the Bachelor of Applied Computer Science

Students in the Bachelor of Applied Computer Science program may add a Minor in many subjects from the Faculties of Arts and Social Sciences, Management, Science and the College of Sustainability. Available minors are listed [here](#).

The minor requirements are in addition to the normal Bachelor of Applied Computer Science requirements. All 2000+ Computer Science and Management courses used to satisfy BACS requirements may not be counted towards a minor. Students wishing to pursue a minor should consult the relevant department and a Faculty of Computer Science academic advisor.

Co-operative Education Programs

All programs in Computer Science have a [Co-operative Education option](#). This requires the completion of three Co-op work terms.

The Co-op office receives requests from employers for Co-op placements and advertises these to qualifying students. Students apply for these positions and are interviewed by the employer.

Students interested in the Co-op program should apply to register for CSCI 8890.00 at the end of their first year.

Faculty Requirements

Students must complete the following courses before beginning their first work-term:

- CSCI 2100: Communication Skills: Written and Oral
- CSCI 2110: Data Structures and Algorithms
- CSCI 2134: Software Development
- CSCI 2141: Introduction to Databases

Students must successfully complete the followings work-terms as part of the Applied Computer Science Co-op program:

- CSCI 8891.01: Co-op Work Term 1
- CSCI 8892.01: Co-op Work Term 2
- CSCI 8893.01: Co-op Work Term 3

Entry Points to Bachelor of Applied Computer Science

There are multiple entry points into the Bachelor of Applied Computer Science program.

First-Year Entry-Students are advised to apply directly to the Faculty of Computer Science but may take their courses while residing in other Faculties and transfer to Applied Computer Science prior to graduation.

Students in the Bachelor of Computer Science program who transfer to the Applied Computer Science program within the first two years should be able to complete their requirements without requiring additional time.

Students from institutions that have articulation agreements with the University will be granted advanced standing if they meet the requirements set forth in the agreements.

Students who wish to transfer to the Bachelor of Applied Computer Science program from other disciplines may be able to do so, but will have to make up any required courses that are missing.

See also the [Academic Regulations section for the Faculty of Computer Science](#).

Bachelor of Computer Science

The following regulations apply to students starting the program in September 2010 or after.

Faculty Requirements

1000 Level

- CSCI 1110.03: Introduction to Computer Science
- CSCI 1120.03: Introduction to Computer Systems
- CSCI 1170.03: Introduction to Web Design and Development
- CSCI 1315.03: Discrete Mathematics for Computer Science
- CSCI 1800.03: Society and Technology before Automation
- CSCI 1801.03: Society and Technology in the Automation Age

2000 Level

- CSCI 2100.03: Communication Skills: Oral and Written
- CSCI 2110.03: Data Structures and Algorithms
- CSCI 2115.03: Theory of Computer Science
- CSCI 2122.03: Systems Programming
- CSCI 2134.03: Software Development
- CSCI 2141.03: Introduction to Database Systems

3000 Level

- CSCI 3101.03: Social, Ethical and Professional Issues in Computer Science
- CSCI 3110.03: Design and Analysis of Algorithms I
- CSCI 3120.03: Operating Systems
- CSCI 3130.03: Introduction to Software Engineering
- CSCI 3137.03: Principles of Programming Languages
- CSCI 3171.03: Network Computing

Other Required Courses:

- CSCI 1300.03: Calculus in Computer Science or MATH 1000.03: Differential and Integral Calculus I
- MATH 1030.03: Matrix Theory and Linear Algebra I
- CSCI 2360.03: Probability and Statistics for CS or STAT 2060.03: Introduction to Probability and Statistics I
- six credit hours of a science course from the following list
 - CSCI 1107.03: Social Computing
 - CSCI 1108.03: Experimental Robotics
 - CSCI 1109.03: Practical Data Science
 - BIOL 1010.03: Principles of Biology I
 - BIOL 1011.03: Principles of Biology II
 - CHEM 1011.03: Concepts in Chemistry I
 - CHEM 1012.03: Concepts in Chemistry II
 - ENGI 1103.03: Engineering Design I
 - EARTH 1080.03: Geology I
 - PHYC 1190.03: Introduction to Physics
 - PHYC 1290.03: Introduction to Physics
 - PHYC 1310.03: Physics In & Around You I
 - PHYC 1320.03: Physics In & Around You II
 - PSYO 1011.03: Introduction to Psychology and Neuroscience I: From Neuron to Person
 - PSYO 1012.03: Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology
- three credit hours in humanities, social science or sustainability at or above the 1000 level
- six credit hours in business, science, or engineering at or above the 1000 level
- three credit hours in business, science or engineering at or above the 2000 level
- six credit hours of electives of computer science at or above the 3000 level
- nine credit hours of electives of computer science at or above the 4000 level
- six free credit hours of electives at or above the 1000 level
- 18 free credit hours of electives at or above the 2000 level

Bachelor of Computer Science Honours

The purpose of the Honours program is to provide a more challenging degree program that prepares students for graduate school.

To enter the Honours program a student must consult with the Honours Student Advisor and obtain the approval of the Faculty of Computer Science.

Each computer science course at or above the 3000 level must be passed with a grade of at least 2.7 (B-). The cumulative GPA across all courses must be at least 3.0 (B).

The Honours program may be combined with co-op education.

Faculty Requirements

In addition to the normal requirements of the Bachelor of Computer Science degree, course selection must include six courses chosen as follows:

- 15 credit hours of computer science at or above the 4000 level chosen in consultation with the thesis supervisor to ensure that the student has the appropriate background
- CSCI 8873.03 (e.g. successfully complete and present an Honours Thesis)

Students who meet these requirements and who obtain a GPA of 3.7 (A-) or higher in all computer science courses will receive the degree Bachelor of Computer Science with First Class Honours.

Minors for the Bachelor of Computer Science

Students in the Bachelor of Computer Science program may add a Minor in many subjects from the Faculties of Arts and Social Sciences, Management, Science and the College of Sustainability. Available minors are listed [here](#).

The minor requirements are in addition to the normal Bachelor of Computer Science requirements. All 2000+ Computer Science and Math courses used to satisfy Bachelor of Computer Science requirements may not be counted towards a minor. Students wishing to pursue a minor should consult the relevant department and a Faculty of Computer Science academic advisor.

Co-operative Education Programs

All programs in Computer Science have a [Co-operative Education option](#). This requires the completion of three Co-op work terms.

The Co-op office receives requests from employers for Co-op placements and advertises these to qualifying students. Students apply for these positions and are interviewed by the employer.

Students interested in the Co-op program should apply to register for CSCI 8890.00 at the end of their first year.

Faculty Requirements

Students must complete the following courses before beginning their first work-term:

- CSCI 2100: Communication Skills: Written and Oral
- CSCI 2110: Data Structures and Algorithms
- CSCI 2134: Software Development
- CSCI 2141: Introduction to Databases

Students must successfully complete the followings work-terms as part of the Computer Science Co-op program:

- CSCI 8891.01: Co-op Work Term 1
- CSCI 8892.01: Co-op Work Term 2
- CSCI 8893.01: Co-op Work Term 3

Entry Points to Bachelor of Computer Science

There are multiple entry points into the Bachelor of Computer Science program.

First-Year Entry-Students are advised to apply directly to the Faculty of Computer Science but may take their courses within the BSc first year and transfer to Computer Science at the beginning of their second year.

Students who wish to transfer to the Bachelor of Computer Science program from other disciplines may be able to do so, but will have to make up any required courses that are missing.

See also the [Academic Regulations section for the Faculty of Computer Science](#).

Accreditation and the Profession

Of particular importance to the Faculty is the accreditation of the undergraduate program by the Computer Science Accreditation Council (CSAC), which is responsible for accreditation of computer science programs in Canada. Accreditation provides our graduates with an accelerated path towards achieving the professional designation of Information Systems Professional of Canada (I.S.P.).

The Bachelor of Computer Science, Bachelor of Computer Science with Co-op, Bachelor of Computer Science with Honours, and Bachelor of Computer science with Honours and Co-op are accredited by CSAC.

The co-operative program offers work terms to our students, thus providing an additional link between the Faculty and the Profession.

Bachelor of Science and Bachelor of Arts with Computer Science

The Faculty of Computer Science offers Bachelor of Science and Bachelor of Arts degrees with a Major in Computer Science. The programs of study are similar to the Bachelor of Computer Science, but with more flexibility in selection of elective courses. These programs may be of benefit for students who want to use one of them as a basis to enter other professional programs such as Education, Medicine, or Law. However, unlike the Bachelor of Computer Science degree, it does not meet CSAC accreditation requirements.

Faculty Requirements

1000 Level

- CSCI 1110.03: Introduction to Computer Science
- CSCI 1120.03: Introduction to Computer Systems
- CSCI 1170.03: Introduction to Web Design and Development
- CSCI 1315.03: Discrete Mathematics for Computer Science

- CSCI 1800.03: Society and Technology before Automation
- CSCI 1801.03: Society and Technology in the Automation Age

2000 Level

- CSCI 2100.03: Communication Skills: Oral and Written
- CSCI 2110.03: Data Structures and Algorithms
- CSCI 2115.03: Theory of Computer Science
- CSCI 2122.03: Systems Programming
- CSCI 2134.03: Software Development
- CSCI 2141.03: Introduction to Database Systems

3000 Level

- CSCI 3101.03: Social, Ethical and Professional Issues in Computer Science
- CSCI 3110.03: Design and Analysis of Algorithms I or CSCI 3111.03: Numerical Linear Algebra
- CSCI 3120.03: Operating Systems
- CSCI 3130.03: Introduction to Software Engineering
- CSCI 3137.03: Principles of Programming Languages
- CSCI 3171.03: Network Computing

Other Required Courses:

- MATH 1000.03: Differential and Integral Calculus I
- MATH 1030.03: Matrix Theory and Linear Algebra I
- Remaining requirements for a BA or BSc as set out in the [College of Arts and Sciences section](#) of the Undergraduate Calendar.

Double Majors and Combined Honours

The following degree programs are available to students interested in interdisciplinary studies where the larger number of majors credits is Computer Science: Bachelor of Science (120 credit hours) with Double Major, Bachelor of Science (120 credit hours) with Combined Honours, Bachelor of Arts (120 credit hours) Double Major and Bachelor of Arts (120 credit hours) Combined Honours.

Combined Honours

Students interested in taking honours in Computer Science and another subject as a combined program should consult the honours advisor through whom a suitable course of study can be arranged.

A combined honours program may well be an appropriate choice for many students. If a student is contemplating graduate work, it should be borne in mind that the work in either subject of a combined honours program may be insufficient for entry to a regular graduate program, and that a qualifying year may be necessary.

Students who wish to arrange interdisciplinary programs (with fields such as Mathematics, Physics, Psychology, and others) are invited to discuss their interests with the appropriate department and the Undergraduate Chair of the Faculty of Computer Science.

Minor in Computer Science for Non-Computer Science Major BSc

The Minor in Computer Science is available to non-CS students registered in a 120 credit hour major and honours programs. Please see [Minor in Computer Science](#).

Certificates in Computer Science

The following Certificates have been approved for the following Bachelor of Computer Science programs: BCSC, BCSC Co-op, BCSC with Honours, BCSC Honours with Co-op, BCSC Honours Conversion, BCSC Honours Conversion with Co-op:

- Certificate in Artificial Intelligence and Intelligent Systems
- Certificate in Bioinformatics (*admission under review*)

- Certificate in Communication Technologies and Cyber Security
- Certificate in Data Science
- Certificate in Graphics, Gaming, and Media
- Certificate in Web and Mobile Development
- Certificate in User Experience Design and Evaluation

Interested students are advised to enroll early in their programs of study, but enrolment is usually also permitted in the final year of study, provided requirements have been met. To be awarded a Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate in Artificial Intelligence and Intelligent Systems

This certificate is open to currently registered Dalhousie students in all Faculties; it will not be open for direct application.

This certificate requires a student to take one required course and three electives at the fourth year level from a list of elective courses with at least a C in each of them. The required course is:

- CSCI 3151: Foundations of Machine Learning

Elective courses are:

- CSCI 4141: Information Retrieval
- CSCI 4144: Data Mining and Data Warehousing
- CSCI 4152: Natural Language Processing
- CSCI 4155: Machine Learning with Robots
- CSCI 4156: Reinforcement Learning with Gaming Applications

Requirements

Note that to obtain a certificate, the degree requirements must be satisfied. To be awarded a Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate in Communication Technologies and Cyber Security

This certificate is open to currently registered Dalhousie students in all Faculties; it will not be open for direct application.

This certificate requires a student to take two required courses and three electives from a list of elective courses with at least a C in each of them. Required courses are:

- CSCI 3120: Operating Systems
- CSCI 3171: Network Computing

Elective courses are:

- CSCI 3172: Web-Centric Computing
- CSCI 4116: Cryptography
- CSCI 4169: Usable Privacy and Security
- CSCI 4171: Networks and Communications
- CSCI 4174: Network Security
- CSCI 4176: Mobile Computing
- CSCI 4178: Cyber Security and Defense

Requirements

Note that to obtain a certificate, the degree requirements must be satisfied. To be awarded a Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate in Data Science

This certificate is intended for students completing a Bachelor of Computer Science, Bachelor of Science in Computer Science, or a Bachelor of Science in Statistics, but is open to currently registered Dalhousie students in all Faculties; it will not be open for direct application.

This certificate requires a student to take two required courses and four electives from a list of elective courses with at least a C in each of them. Required courses are:

- CSCI 3151: Foundations of Machine Learning or STAT 3450: Statistical learning with R
- CSCI 4146: The Process of Data Science

Elective courses are:

- CSCI 4125: High Performance Computing
- CSCI 4141: Information Retrieval
- CSCI 4144: Introduction to Data Mining and Data Warehousing
- CSCI 4152: Natural Language Processing
- CSCI 4155: Machine Learning
- CSCI 4156: Reinforcement Learning with Gaming Applications
- CSCI 4166: Visualization
- STAT 2080: Statistical methods for Data Analysis and Inference
- STAT 2430: Data Visualization
- STAT 2450: Introduction to Data Mining with R
- STAT 3340: Regression and Analysis of Variance
- STAT 3360: Probability
- STAT 3740: Predictive Analysis
- STAT 4066: Advanced Statistical Theory
- STAT 4130: Bayesian Analysis
- STAT 4350: Multivariate Analysis
- STAT 4370: Stochastic Processes
- STAT 4390: Time Series Analysis
- STAT 4620: Data Analysis
- STAT 4690: Computational Statistics

Requirements

Note that to obtain a certificate, the degree requirements must be satisfied. To be awarded a Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate in Graphics, Gaming, and Media

This certificate is open to currently registered Dalhousie students in all Faculties; it will not be open for direct application.

This certificate requires a student to take three required and two electives from a list of elective courses with at least a C in each of them. Required courses are:

- CSCI 3161: Introduction to Computer Graphics with Animation
- CSCI 3162: Digital Media
- CSCI 4168: Game Design and Development

Elective courses are:

- CSCI 4156: Reinforcement Learning with Gaming Applications
- CSCI 4160: Computer Graphics
- CSCI 4166: Visualization
- CSCI 4167: Advanced Computer Animation

Requirements

Note that to obtain a certificate, the degree requirements must be satisfied. To be awarded a Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate in User Experience Design and Evaluation

This certificate requires a student to complete two compulsory courses, a minimum of one elective course from Group A, and the remaining three elective courses from either Group A or Group B. The minimum number of courses to be completed for this certificate is six and all courses must be completed with a grade of C or better.

Compulsary courses are:

- CSCI 3160.03: Designing User Interfaces
- CSCI 4163.03: Human Computer Interaction

Group A elective courses are:

- CSCI 4126.03: Ubiquitous Computing
- CSCI 4169.03: Usable Privacy and Security
- CSCI 4260.03: Persuasive Computing Design

Group B elective courses are:

- STAT 2080.03: Statistical Methods for Data Analysis and Inference
- CSCI 4166.03: Visualization
- CSCI 4168.03: Game Design and Development
- CSCI 4176.03: Mobile Computing
- CSCI 3190.03: Community Outreach 1 or CSCI 3691.03 Intermediate Project

Note that to obtain a certificate, the degree requirements must be satisfied. To be awarded a Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate in Web and Mobile Development

This certificate requires a student to complete four compulsory and two elective courses with at least a C in each of them.

Required courses are:

- CSCI 3160.03: Designing User Interfaces
- CSCI 3172.03: Web-Centric Computing
- CSCI 4176.03: Mobile Computing
- CSCI 4177.03: Advanced Web Services

Elective courses are:

- CSCI 3151.03: Foundations of Machine Learning
- CSCI 4145.03: Cloud Computing
- CSCI 4169.03: Usable Privacy and Security
- CSCI 4171.03: Networks and Communications
- CSCI 4174.03: Network Security

Note that to obtain a certificate, the degree requirements must be satisfied. To be awarded a Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

General Interest Courses

The Faculty offers a variety of courses that should be of interest to students whose major field of study while at Dalhousie will not be Computer Science.

CSCI 1105.03: Introduction to Computer Programming
CSCI 1107.03: Social Computing
CSCI 1108.03: Introduction to Experimental Robotics
CSCI 1109.03: Practical Data Science
CSCI 1200.03: Introduction to Computing for Non-Majors
CSCI 1206.03: Introduction to Website Creation
CSCI 2201.03: Information Security
CSCI 2202.03: Computer Modeling for Scientists
CSCI 2203.03: Data Science for Everyone
CSCI 3141.03: Foundations of Data Science using R

Course Descriptions

CSCI 1105 Introduction to Computer Programming

CREDIT HOURS: 3

This course provides a general introduction to computer programming. The main focus is on programming skills and how to apply these skills in solving a variety of problems. Procedural programming concepts are stressed.

CALENDAR NOTES: Students who complete CSCI 1110 with a grade of C or greater BEFORE completing CSCI 1105 will not receive credit for taking CSCI 1105.

EXCLUSIONS: CSCI 1100.03, CSCI 1503.03, grade C or higher in CSCI 1110.03

CSCI 1107 Social Computing

CREDIT HOURS: 3

A hands-on course on technologies and the underlying infrastructure for social computing, including digital collaboration media, social networks and visualization, and their social impact. Students will use various applications, such as Twitter, YouTube, and wikis to examine their functionalities, and explore infrastructure technologies including databases, computer networks and Web-servers that facilitate their execution.

CSCI 1108 Introduction to Experimental Robotics

CREDIT HOURS: 3

This course is an introduction to computing in the real world, experimental evaluation, and basic team work and project management. These themes are explored through the study of the challenges and techniques for modeling, designing, and programming robotic systems to perform complex tasks in a changing and uncertain environment.

FORMATS: Lecture

CSCI 1109 Practical Data Science

CREDIT HOURS: 3

This course will provide students with a practical overview of the world of data science research. Through hands-on use of Python's data science libraries and publicly open datasets students will be exposed to the research methods and cutting-edge analyses used to effectively manipulate, process and investigate data from diverse disciplines.

EXCLUSIONS: CSCI 2203.03

CSCI 1110 Introduction to Computer Science

CREDIT HOURS: 3

This course provides a general introduction to computer science and the hardware and software of computers. The main focus is on programming skills and how to apply these skills in solving a variety of problems. Algorithmic concepts, linear data structures are emphasized.

CALENDAR NOTES: This course assumes that the student has some programming experience.

EXCLUSIONS: CSCI 1101.03

FORMATS: Lecture

CSCI 1120 Introduction to Computer Systems

CREDIT HOURS: 3

This course introduces some key concepts in computer systems. Students will learn fundamental systems concepts and apply them to explain how the hardware and software environment affects program behaviour. Topics include data and program representation, program translation, operating systems, software engineering, and networking.

FORMATS: Lecture

CSCI 1170 Introduction to Web Design and Development

CREDIT HOURS: 3

This course introduces students to key web concepts and skills for designing, implementing, and maintaining web content. Topics include introduction to the Web, UI and UX best practices, hypertext markup languages such as HTML, style sheets, client side programming, multimedia foundations, dynamic content and web content organization and maintenance.

CALENDAR NOTES: This course assumes that the student has some programming experience.

EXCLUSIONS: CSCI 1206.03

FORMATS: Lecture

CSCI 1200 Introduction to Computing for Non-Majors

CREDIT HOURS: 3

This is a course of technical computer literacy. Students can expect to learn about computers in a general way and how computers affect the way we live and work. Students will be given an opportunity to become familiar with typical applications of software such as word processors, spreadsheets and database applications. Other topics will include the use of the internet, creation of web pages, and simple programming concepts. No previous computer experience is required. This course is open to Arts and Social Sciences and Health Education students only.

CALENDAR NOTES: This course cannot be counted towards the Bachelor of Commerce or a Minor in Business.

CROSSLISTED: ASSC 1000.03

CSCI 1206 Web Design and Development for Everyone

CREDIT HOURS: 3

If you are curious about how the World Wide Web works, how websites are designed and built, or how web browsers interact with the web, this course is the right one for you. Designed specifically for students with little to no experience in web design and development, this course introduces students to the processes involved in designing and developing websites. From a design perspective, we will explore graphic design principles as applied on the web, web accessibility and usability principles, as well as The Web Standards Project and UX design best practices. From a development perspective, we will focus on the three core languages of web development: HTML for content structure, CSS for styling, and Javascript for adding a dynamic layer to your webpages.

CALENDAR NOTES: This course is only available to Non-CS Majors.

EXCLUSIONS: CSCI 1170

CSCI 1300 Calculus in Computer Science

CREDIT HOURS: 3

This course is an introduction to calculus with a focus on applications to computer science. Students will be exposed to examples from graphics, machine learning, robotics, simulation, and other areas of computer science. Topics covered will include single variable limits, derivatives, integrals, differential equations, and Fourier series.

PREREQUISITES: Nova Scotia Mathematics advanced 11 and 12 or pre-calculus. Pre-calculus is highly recommended.

EXCLUSIONS: MATH 1000, MATH 1215, MATH 1280, MATH 1500

CSCI 1315 Discrete Mathematics for Computer Science

CREDIT HOURS: 3

This course is an introduction to formal reasoning and discrete mathematics with applications to computer science. Students will be introduced to formal notation and reasoning about problems and algorithms. Topics include: sets, sequences, and summations, simple proof techniques, elementary number theory, back-of-the-envelope approximations, combinatorial objects. Applications and relevance of these concepts in computer science will be emphasized.

CALENDAR NOTES: Students should either have some programming experience or be taking an introductory course on programming at the same time as this course.

PREREQUISITES: Nova Scotia Advanced Mathematics 441 or equivalent

EXCLUSIONS: CSCI 2112.03 or MATH 2112.03

CSCI 1503 Programming for Business

CREDIT HOURS: 3

This course provides an introduction to computer programming for business. The focus is on using programming skills to solve business problems related to data cleaning, data entry automation and business data processing. This course takes a case-based approach and is designed to prepare students for the

Bachelor of Management and Bachelor of Commerce programs.
EXCLUSIONS: CSCI 1100, CSCI 1105

CSCI 1615 Concepts in Computing

CREDIT HOURS: 3

This course introduces some key concepts in computing and places them in context with a survey of applications. The skills developed in this course include research, redaction, problem solving and abstraction. The themes covered are the following: Data and storage, operating systems, networking and the Internet, database systems, artificial intelligence and computer graphics. This course is eligible to partially cover the writing requirement for students in the Faculty of Computer Science.

FORMATS: Lecture

CSCI 1616 Applications in Computing

CREDIT HOURS: 3

This course covers professional aspects of the computing industry. The main themes are: project management, software engineering and computer languages. It explores how technological advances impact the workplace for non-technical people. It also includes a module on proofreading and editing. This course is eligible to partially cover the writing requirement for students in the Faculty of Computer Science.

FORMATS: Lecture

CSCI 1800 Computing and Society in History

CREDIT HOURS: 3

This course introduces students to the history of computing from early mechanical devices to the internet. Students will learn to read, write, and discuss scholarly arguments about how computing has shaped society, and how society has shaped computing, over time.

EXCLUSIONS: HSTC 1800.03, HSTC 1200.06, HIST 2074.06 HSTC 2200.06, and SCIE 2000.06

FORMATS: Lecture

CSCI 1801 Case Studies in Computing and Society

CREDIT HOURS: 3

This course introduces students to specific topics in the history of computing. Topics may include algorithms, automation, or information. Students will learn to read, write, and discuss scholarly arguments about how computing has shaped society, and how society has shaped computing, over time.

EXCLUSIONS: HSTC 1801.03, HSTC 1200.06, HIST 2074.06, HSTC 2200.06, SCIE 2000.06

FORMATS: Lecture

CSCI 1900 Academic Foundations for Computer Science Studies

CREDIT HOURS: 3

This course lays the foundations for academic success in computer science studies via development of academic literacies and language skills. In this seminar-style course, students develop the ability to use academic English flexibly, in spoken and written modes, according to the norms of the language practices in computer science studies.

CSCI 2100 Workplace Communications for Computer Science

CREDIT HOURS: 3

This course helps students communicate effectively and with confidence in a variety of workplace settings. Students learn to understand their audience and to deliver accurate, effective messages. Written assignments and oral presentations allow for the development of these skills through practice.

PREREQUISITES: Two of (CSCI 1800.03 or ASSC 1800.03), (CSCI 1801.03 or ASSC 1801.03), and CSCI 1900.03

EXCLUSIONS: COMM 2701.03, COMM 1701.03, COMM 1702.03, MGMT 3602.03

CSCI 2110 Data Structures and Algorithms

CREDIT HOURS: 3

This course provides a comprehensive introduction to data structures and algorithms, including their design, analysis, and implementation. In discussing design and analysis there is a strong emphasis on abstraction. In discussing implementation, general approaches that are applicable in a wide range of procedural programming language are emphasized, in addition to a focus on the details of implementations. Topics include an introduction to asymptotic analysis and a review of basic data structures (stacks, queues, lists, vectors), trees, priority queues, dictionaries, hashing, search trees, sorting (MergeSort, QuickSort, RadixSort) and sets, and graphs (traversals, spanning trees, shortest paths).

PREREQUISITES: CSCI 1101.03 or CSCI 1110.03

CSCI 2112 Discrete Structures I

CREDIT HOURS: 3

See the course description for MATH 2112.03 in the Mathematics section of this calendar.

CROSSLISTED: MATH 2112.03

CSCI 2113 Discrete Structures II

CREDIT HOURS: 3

See the course description for MATH 2113.03 in the Mathematics section of this calendar.

PREREQUISITES: CSCI 1315 or CSCI 2112 or MATH 2112

CROSSLISTED: MATH 2113.03

CSCI 2114 Mathematical Applications in Computing

CREDIT HOURS: 3

This course explores the applications of differential and integral calculus and linear algebra in Computer Science. Examples of application areas include, but are not limited to, computer graphics and animation, digital media, and machine learning.

PREREQUISITES: (CSCI 1300.03 or MATH 1000.03), MATH 1030.03, CSCI 1110.03

CSCI 2115 Theory of Computer Science

CREDIT HOURS: 3

This course introduces students to fundamental ideas in computer science. The first part of the course is an introduction to finite state machines and automata theory and its applications. Students will be introduced to finite automata, push-down automata, Turing machines, and other models of computation, with particular emphasis on finite automata. The second part of the course introduces students to asymptotic notation, complexity, and culminates with an introduction to NP-completeness.

PREREQUISITES: CSCI 1110.03, CSCI 1120.03, and (CSCI 1315.03 or CSCI 2112.03 or Math 2112.03)

EXCLUSIONS: CSCI 3136.03

CSCI 2122 Systems Programming

CREDIT HOURS: 3

This course presents tools, techniques, and concepts for systems programming. Students will be exposed to assembly and will be introduced to the C programming language. The course also discusses memory hierarchies, performance measurement, exception control flow, and performance related issues. Students will be involved in significant amount of low-level programming.

PREREQUISITES: (CSCI 1101.03 or CSCI 1110.03) and CSCI 1120.03

EXCLUSIONS: CSCI 2121.03

CSCI 2133 Rapid Programming Techniques for Innovation

CREDIT HOURS: 3

The goal of this course is to introduce students to advanced programming techniques and practical issues in building and maintaining software systems, with an emphasis on techniques used in rapid prototype building for implementation of innovative ideas. The course also introduces principles of design thinking and designing feasible software systems that address real problems. The students are trained to follow and design requirement specifications, build software systems according to specifications, design testing frameworks, use techniques for system debugging and performance measuring, and improve and maintain such systems. The course evaluation is based on individual assignments, and a team project that involves developing a multi-tier system that solves a real problem. The course is not strongly associated with one programming language, but instead it exposes students to different languages and tools. Intermediate knowledge of C and Java language are assumed.

PREREQUISITES: CSCI 2134 or equivalent programming experience

FORMATS: Lecture

CSCI 2134 Software Development

CREDIT HOURS: 3

This course presents techniques and methodologies for software development with modern tools. It introduces students to the software development life cycle and best practices for source code management, testing, debugging, and building. Particular focus will be on building individual skills in the development and testing phases of the life cycle. Students will be expected to work with existing medium-size code-bases that are implemented in different programming languages. Students will be exposed to a variety of software tools and will be expected to use them throughout the course.

PREREQUISITES: CSCI 1101.03 or CSCI 1110.03

EXCLUSIONS: CSCI 2132.03

CSCI 2141 Introduction to Database Systems

CREDIT HOURS: 3

This course introduces students to the concepts of database management systems and database design. Topics include: Database (DB) components, DB design using entity-relationship (relational and object oriented), SQL, and transactional properties and techniques to support them. The concepts will be reinforced using one or more Database Management Systems.

PREREQUISITES: CSCI 1100.03 or CSCI 1101.03 or CSCI 1105.03 or CSCI 1110.03 or CSCI 1503.03 or CSCI 2202.03

EXCLUSIONS: CSCI 2140.03

CSCI 2170 Introduction to Server Side Scripting

CREDIT HOURS: 3

A server side scripting language is used to create web pages with dynamic content. The course provides the technology necessary for connecting client web pages to web servers and processing and storing information obtained using forms during web sessions.

COREQUISITES: CSCI 2141.03 may be taken as a co-requisite

PREREQUISITES: (CSCI 1206.03 or CSCI 1170.03) and CSCI 2141.03

CSCI 2201 Introduction to Information Security

CREDIT HOURS: 3

Information security is becoming increasingly important in today's networked world, and is impacting every aspect of our lives including finance, healthcare, government, education, arts and entertainment. The objective of this course is to teach the basic principles of information security from the perspective of providing security awareness and its best practices for the real world. Topics include motivation for security, tools and techniques used by adversaries to gather information and launch attacks, Internet security, firewalls, basics of encryption and authentication, virus protection, secure credit card and bank transactions, wireless security, computer forensics, identify theft and protection, anti-phishing and biometric security.

CSCI 2202 Introduction to Programming with Applications for Scientists

CREDIT HOURS: 3

This is an introductory, project based, programming course for science majors. The course focuses on programming techniques useful for students in their scientific pursuits. The course introduces basic programming in Python and then goes on to guide students through using simulations, modelling and data-driven analysis. Examples and projects will be taken primarily from the fields of biology, genetics, neuroscience, psychology, earth sciences, chemistry among others.

PREREQUISITES: Students must have successfully completed a minimum of 3.0 credit hours in Math at the 1000 level.

CSCI 2203 Data Science for Everyone

CREDIT HOURS: 3

This course will provide students with an overview of the world of data science research. It will focus on how the analysis of data from social media and other internet-based sites (e.g. Twitter, YouTube, images, Wikipedia, Google books) can be used to tackle complex and fascinating societal questions (e.g. revealing insights about how happy we are, who we are friends with, how often we lie). This course will survey several exciting research projects in this field and provide students with a general understanding about the research methods and analyses (e.g. machine learning, social network analysis) in a non-technical manner that is accessible to students of various educational backgrounds. The course content will be portrayed through a blend of lectures, multi-media, accessing on-line materials/articles, assignments to enhance critical thinking and discussion-based formats.

EXCLUSIONS: CSCI 1109.03

CSCI 2204 Social Media and Content Creation for Everyone

CREDIT HOURS: 3

In today's world, it is difficult not to think about social media applications as a way to create a business or personal brand. This course explores the relationship between social media applications and the user as a content creator, developer and manager. We explore popular social media applications, their functionality and infrastructure, interface and content design (content creation), search engine optimization and search algorithms(development), and connect them with principles of usability and user experience (management), in order to provide a better understanding of a target users' behavior on the web. By combining theory and application in a hands-on hybrid learning environment, this course aims to provide a fun and creative way of exploring the behind-the-scenes of social media applications and content creation and management. Whether you are interested on podcasting, vodcasting, streaming, video sharing, or other forms of storytelling, you can tailor this course based on your personal goals, and better showcase yourself as an artist, marketer, or influencer, and increase the visibility of your brand.

CSCI 2360 Probability and Statistics for CS

CREDIT HOURS: 3

This course is an introduction to probability theory and statistics with applications to computer science, in particular to data science and experimental computer science. Students will be introduced to the idea of random numbers and the formal language of reasoning with uncertainty as well as with the basic tools and an outlook of advanced tools for experimental investigations in computer science such as HCI. What is a random number, probability mass and

density functions, data analytics, probabilistic reasoning, basic hypothesis testing, sample size estimation, and inter-rater reliability. Applications and relevance of these concepts in computer science will be emphasized.

PREREQUISITES: CSCI 1300 or MATH 1000 or MATH 1280) and (CSCI 1105 or CSCI 1110 or CSCI 1503 or CSCI 2202)

EXCLUSIONS: STAT 2060, ENGM 2032, ECON 2260, MATH 2060

CSCI 2690 Introduction to Software Projects

CREDIT HOURS: 3

Students learn how software projects are planned, implemented, and closed. Topics include plan development, project life cycles, software development life cycles, measurable organizational value, work breakdown structures, scheduling, scope, risk, change requests, conflict resolution, closure, and post-mortems.

FORMATS: Lecture

CSCI 2691 Introductory Project

CREDIT HOURS: 3

Students take junior roles in project teams to solve a real-world information technology problem. Team members are drawn from all years of study. The project gives students an opportunity to develop their technical, management, and professional skills.

PREREQUISITES: CSCI 1170.03 and CSCI 1110.03

FORMATS: Lecture

CSCI 3101 Social, Ethical and Professional Issues in Computer Science

CREDIT HOURS: 3

Computers can enable people to do things that our present laws and policies were not formulated to cover (hacking, sharing files on the internet, and companies sharing data). In such cases, people need to be able to decide for themselves the best course of action, and defend such decisions. This course aims at developing the ethical reasoning skills and sensitivities that computer professionals will need to make good decisions and to justify them. The course includes a general introduction to ethical theories and their use in making and justifying decisions. We then consider various issues and case studies, illustrating the kinds of problems that can arise from the use and misuse of computers and technology: the responsibilities of computing professionals; ethics on the internet (hacking, computer crime, netiquette); privacy and information; intellectual property; social and political issues (digital divide, computers and work, the internet as a democratic technology).

CROSSLISTED: PHIL 2490.03

CSCI 3110 Algorithms I

CREDIT HOURS: 3

This course covers techniques for the design and analysis of efficient algorithms and data structures. Topics include asymptotic analysis, divide and conquer algorithms, greedy algorithms, dynamic programming, data structure design, optimization algorithms, and amortized analysis. The techniques are applied to problems such as sorting, searching, identifying graph structure, and manipulating sets.

PREREQUISITES: CSCI 2110.03 and CSCI 2115.03

CSCI 3120 Operating Systems

CREDIT HOURS: 3

This course includes a review of I/O and interrupt structures. Topics covered include dynamic procedure activation, system structure and evaluation, memory management, process management, process scheduling, recovery procedures, concurrency, deadlocks, resource allocation, protection, and operating systems implementation.

PREREQUISITES: CSCI 2110.03, (CSCI 2121.03 or CSCI 2122.03), and (CSCI 2132.03 or CSCI 2134.03)

CSCI 3121 The Need for Speed: From Pipelines to Massively Parallel Machines

CREDIT HOURS: 3

This course discusses why a modern CPU represents a massive parallel machine and what impact this has on how applications view the CPU. Topics include: evaluation of CPU performance; instruction level parallelism (ILP) and the various consequential complexities such as out-of-order execution, branch prediction, and speculative execution; design of memory hierarchies that support ITP; and complexities of multi-core design, including cache consistency and special purpose processors such as the Graphics Processing Unit.

PREREQUISITES: CSCI 2121.03 or CSCI 2122.03

EXCLUSIONS: ECED 3403.03

CSCI 3130 Introduction to Software Engineering

CREDIT HOURS: 3

The course examines the process of software development, from initial planning through implementation and maintenance. A brief survey of available tools

and techniques will be presented covering the topics of analysis, planning, estimating, project management, design, testing, and evaluation. Particular emphasis will be given to organizing and planning, team participation and management, top-down design and structure charts, system and information flow diagrams, walk-throughs and peer review, and testing and quality control.

PREREQUISITES: CSCI 2110.03 and (CSCI 2132.03 or CSCI 2134.03)

CSCI 3132 Object Orientation and Generic Programming

CREDIT HOURS: 3

This course deals with the fundamental concepts of object-oriented programming: behaviour, inheritance, encapsulation and polymorphism. There is a discussion of the history of object-oriented programming, and introduction to some currently used object-oriented programming languages.

PREREQUISITES: CSCI 2110.03 and (CSCI 2132.03 or CSCI 2134.03)

CSCI 3136 Principles of Programming Languages

CREDIT HOURS: 3

This course provides a comparative study of advanced programming language features. Topics include statement types, data types, variable binding and parameter passing mechanisms. Formal methods for syntactic and semantic description of programming languages are examined.

PREREQUISITES: CSCI 2110.03, (CSCI 1315.03 or CSCI 2112.03), and (CSCI 2132.03 or CSCI 2134.03)

CSCI 3137 Principles of Programming Languages

CREDIT HOURS: 3

This course provides a comparative study of programming language features. It provides a comparison of different programming paradigms, discusses control and data abstractions with a focus on the underlying principles instead of syntax, and investigates some implementation concerns that drive the design choices made in different programming languages. It also provides students with hands-on experience with modern non-object-oriented imperative programming languages, including functional and logic programming. The goal is to broaden the students' understanding of the landscape of programming languages and to enable them to compare the capabilities of different programming languages with the goal of choosing an appropriate language for a given project.

PREREQUISITES: CSCI 2110.03 and CSCI 2122.03

EXCLUSIONS: CSCI 3136.03

CSCI 3141 Foundations of Data Science using R

CREDIT HOURS: 3

The course provides an introduction to the main steps of a typical data science project, using the R language and environment as the illustration tool. The course addresses the theoretical foundations of several key methods and techniques used in data science projects, from data importation and manipulation, going through data visualization and model building, to reporting and deployment. The course is targeted to students without a strong technical background on programming or computer science tools. The theoretical concepts are motivated and introduced through practical case studies with the help of the R environment.

CSCI 3151 Foundations of Machine Learning

CREDIT HOURS: 3

This course aims to introduce the machine learning, deep networks, natural language processing, the process and practice of data science, data mining and data warehousing. The following topics will be introduced: linear regression, optimization by gradient descent, support vector machines, decision tree classifiers, naive Bayes classifiers, multilayer neural networks, clustering, evaluation of classification and clustering algorithms, cross-validation, avoiding overfitting. Students will use a standard machine learning library to apply algorithms to various datasets.

PREREQUISITES: CSCI 2110.03, (CSCI 1315.03 or CSCI 2112.03), CSCI 2141.03, (STAT 2060.03 or CSCI 2360.03), and MATH 1030.03

CSCI 3152 Foundations of Machine Learning II

CREDIT HOURS: 3

This course aims to continue the introduction to machine learning building on CSCI 3151. The course covers: ensemble methods for classification, deep neural networks and their application to structured data, images, and sequences, deep generative models, deep language models, few-shot learning, dimensionality reduction methods, active learning, semi-supervised learning, and Bayesian networks. The course focuses on the underlying mathematical and statistical principles that underpin those methods and how understanding these principles leads to the successful application of machine learning to address practical problems. Students will use standard machine learning libraries to apply algorithms to various datasets.

PREREQUISITES: CSCI 3151.03 and (CSCI 1130 or MATH 2001) and (CSCI 2360 or STAT 2080), each CSCI course with a grade of C or better.

EXCLUSIONS: CSCI 4155

CSCI 3160 Designing User Interfaces

CREDIT HOURS: 3

This course deals with concepts and techniques underlying the design of interactive systems. Both human factors and the technical methods of user interface design are covered. Students will learn how to apply various techniques through the design, creation, and testing of a prototype system.

PREREQUISITES: CSCI 1170.03 or CSCI 1206.03

CSCI 3161 Introduction to Computer Graphics and Animation

CREDIT HOURS: 3

The course provides students with a practical foundation in high-level computer animation programming. Through the development of a significant project using industry standard graphics libraries, students will learn proven techniques that have become common currency in the field of computer animation.

PREREQUISITES: CSCI 2110.03, CSCI 2122.03, and MATH 1030.03

CSCI 3162 Digital Media

CREDIT HOURS: 3

This course covers technical aspects of digital media, including images, video, and sound. Topics covered include digital representation, processing, compression, and multimedia generation.

PREREQUISITES: (CSCI 1300.03 or MATH 1000.03), MATH 1030.03, CSCI 2110.03

EXCLUSIONS: CSCI 4165.03

CSCI 3171 Network Computing

CREDIT HOURS: 3

This course gives students a foundation in computer networks. It presents a top-down view of the layered architectural elements of communication systems, focusing on the Internet and TCP/IP. Topics include client/server systems, packet switching, protocol stacks, queuing theory, application protocols, socket programming, remote service calls, reliable transport, UDP, TCP, and security.

PREREQUISITES: CSCI 2110.03, and (CSCI 2132.03 or CSCI 2134.03)

CSCI 3172 Web-Centric Computing

CREDIT HOURS: 3

This course provides a solid grasp of core WWW technologies and a conceptual framework for understanding the development of the WWW and working with future web technologies. The course explores interactive and non-interactive web applications built using various technologies and architectural models. We explore the significance of web design and programming concepts in terms of accessibility issues both from the perspective of web robots and end-users. Web caching, proxy techniques, and security issues are also discussed.

PREREQUISITES: (CSCI 2132.03 or CSCI 2134.03), CSCI 2141.03 and CSCI 2170.03

CSCI 3190 Community Outreach

CREDIT HOURS: 3

This is a project-oriented course where the result of the project is a real-world implementation that meets the requirements of a community group such as a charity, non-profit organization, or educational institution. Students work in teams on the entire application development life cycle from requirements analysis through to maintenance. Lectures cover a range of topics such as practical application of requirements analysis, systems design, and database design methodological skills developed in prerequisite courses or from prior equivalent experience. This course cannot be counted towards a Bachelor of Informatics degree.

PREREQUISITES: CSCI 2100.03, (CSCI 2132.03 or CSCI 2134.03), and (CSCI 2140.03 or CSCI 2141.03)

CSCI 3691 Intermediate Project

CREDIT HOURS: 3

Students perform design and development roles in project teams to solve a real-world information technology problem. Team members are drawn from all years of study. The project gives students an opportunity to develop their design, technical, management, and professional skills.

PREREQUISITES: CSCI 2134.03, 2141.03, CSCI 2170.03, CSCI 2690.03, CSCI 2691.03

FORMATS: Lecture

CSCI 3901 Software Development Concepts

CREDIT HOURS: 6

This course covers the (i) application of standard abstract data types, fundamental data structures, and commonly used algorithms; (ii) design and implementation of databases; and (iii) the fundamental practice of software engineering.

CALENDAR NOTES: This course is intended to fill in the knowledge gaps that incoming graduate students may have. Students must receive a B- or higher in this course.

COREQUISITES: CSCI 5100.03

RESTRICTIONS: Inclusive GR Level Restriction

CSCI 4101 Privacy & Access for the IT Professional

CREDIT HOURS: 3

This course will discuss the concepts and legislative requirements of privacy and information access as it applies to computer systems in the world of business, public service, NGOs, and research. Students will be introduced to what privacy is (and isn't) and how it is different from security. Students will learn enterprise risk management regarding privacy and access; administration of privacy in computing systems; use of personal information in research and database development; as well as communication with business/program owners as regards technological solutions using personal and sensitive information. The course will also cover topics such as: privacy impact analysis; freedom of information and privacy; privacy in data-mining and data-matching; open data and routine disclosure; privacy issues involving: machine learning, identification/tracking technology, and Artificial Intelligence; and privacy concerns with social media, apps, and emerging technologies. As well as learning the technicalities of privacy and information access, students will learn the ethics and social impacts of this field.

CSCI 4102 Product Management for the Digital World

CREDIT HOURS: 3

The Product Management for the Digital World course explores relevant entrepreneurial principles, theories, and methods for organising and managing significant design and innovation activity when bringing digital products to market successfully. The course seeks to develop students' strategic planning skills and teamworking abilities, while encouraging entrepreneurial thinking. By examining how digital companies are created, why digital products fail, and how risks of failure may be minimized, students develop independent research skills and their ability for critical thinking. The course aims to develop students' capacity to apply knowledge, tools, techniques, project management and leadership principles to the creation of unique business models for the development and management of innovative digital products and services; they will identify appropriate branding and marketing strategies, and communication channels to deliver strategic plans effectively.

PREREQUISITES: CSCI 3160.03 or CSCI 4193.03

CSCI 4103 Digital Humanities

CREDIT HOURS: 3

This seminar brings together students from the Humanities and Social Sciences (HSS) with students from Computer Science (CS) to address critical questions at the intersection of digital technologies and our common humanity. Students will form multidisciplinary teams to tackle problems of common interest. How is the development of Artificial Intelligence shaped by histories of technology, race, gender, and colonialism? How can digital tools be used to analyze critical social questions? Students will learn data visualization tools and discuss the interaction of computing in society, from the past to the present.

PREREQUISITES: CSCI 3101

EXCLUSIONS: HIST 4103

CSCI 4112 Theory of Computation

CREDIT HOURS: 3

This is a course on formal languages and computational models. Topics covered include finite automata, pushdown automata, Turing machines, undecidability and recursive and recursively enumerable functions. Some applications to computer science are also discussed such as compiler design and text processing.

PREREQUISITES: (CSCI 1315.03 or CSCI 2112.03) and (CSCI 2115.03 or CSCI 3136.03)

CROSSLISTED: MATH 4660.03

CSCI 4113 Design and Analysis of Algorithms II

CREDIT HOURS: 3

This course covers advanced techniques for the design and analysis of efficient algorithms. Problems are taken from a wide range of areas including combinatorics, numerical computation, graph algorithms, string matching, approximation algorithms, computational geometry, and NP-Completeness.

PREREQUISITES: CSCI 3110.03

EXCLUSIONS: MATH 4130.03

CSCI 4115 Topics in Graph Theory

CREDIT HOURS: 3

See the course description for MATH 4330 in the Mathematics section of this calendar.

PREREQUISITES: See Mathematics section

CROSSLISTED: MATH 4330.03

CSCI 4116 Cryptography

CREDIT HOURS: 3

See the course description for MATH 4116 in the Mathematics section of this calendar.

PREREQUISITES: See Mathematics section

CROSSLISTED: MATH 4116.03

CSCI 4117 Advanced Data Structures

CREDIT HOURS: 3

Data structures play a central role in many modern applications, and are essential building blocks of efficient algorithms. This course covers classical results and recent advancements on data structures. Topics covered include the $O(\lg n)$ barrier in sorting and searching, online optimization of search structures, fast text retrieval, space efficient data structures for large data sets, and persistent data structures.

PREREQUISITES: CSCI 3110.03

CSCI 4118 Algorithm Engineering

CREDIT HOURS: 3

This course presents techniques and methodologies for Algorithm Engineering. Students will learn best practices for developing efficient algorithms and easy-to-use, well-tested, and high-performance implementations of algorithms for real world use. Practical algorithm concerns include maintaining numerical precision, optimizing for realistic rather than worst case inputs, cache efficient computing for processing big data, analysis of parallel and GPU algorithms, predicting the results of design choices and running experiments to verify those choices. The course includes lectures, hands-on labs exploring each aspect, reading assignments and discussions, and a course project providing the opportunity to gain hands-on experience with algorithm engineering techniques.

PREREQUISITES: CSCI 3110

CSCI 4119 Lossless Data Compression and Compact Data Structures

CREDIT HOURS: 3

The speed at which our humanity generates and gathers data has outpaced even our ability to process and store it. Fortunately, much of this data is compressible — sometimes by several orders of magnitude. In the first part of this course we'll cover the mathematical foundations of lossless compression and on efficient compression algorithms. Those results enable efficient transmission and storage of massive datasets, but often we want to work with those datasets without decompressing them, so the second part of the course will cover compressed data structures and computation over compressed data. The third part of the course will review the development of data structures for pangenomics as a case study in handling massive but highly compressible datasets.

CSCI 4121 Advanced Computer Architecture

CREDIT HOURS: 3

The course will focus on the basic principles of computer architecture with an emphasis on quantitative analysis of the effect of architectural design decisions on system performance and the price/performance trade-offs necessary in real computer design. This includes instruction set design issues (CISC vs. RISC), instruction level parallelism, implementation methods, pipelining, pipeline hazards, interrupts, the relationship with compiler technology, and memory system design. Several representative architectures will be used as examples, with emphasis on modern RISC processors.

PREREQUISITES: CSCI 2122.03

CSCI 4125 High Performance Computing

CREDIT HOURS: 3

This course explores the design, implementation, and evaluation of computer programs for applications in which performance is a central issue. In the sequential computing setting, it explores topics such as profiling, cache effects, I/O performance, floating-point issues, compiler directives and performance tuning. In the parallel computing setting it introduces techniques for the design, implementation and evaluation of programs for both Shared-Memory Multiprocessors (SMPs) and Distributed Memory Multicomputers (clusters). It is recommended that students take CSCI 3121 prior to taking this course.

PREREQUISITES: CSCI 3120.03

CSCI 4126 Ubiquitous Computing

CREDIT HOURS: 3

Ubiquitous Computing moves computing off the desktop and into the fabric of our everyday lives. This course explores both systems and human-centric advances in Ubiquitous Computing, including sensing, middleware, locative applications, smart environments, ambient displays, and tangible interaction. Students will design and implement a Ubiquitous computing application prototype.

PREREQUISITES: CSCI 3160.03 and CSCI 3171.03

CSCI 4130 Applied Machine Learning for Software Engineering Applications

CREDIT HOURS: 3

We are witnessing proliferation of machine learning and deep learning techniques to various domains such as business, education, entertainment, and technology. This course is designed to equip students with knowledge to apply machine learning, including deep learning, techniques for real-world applications. The focus of the course will be on software engineering applications such as software quality assessment and program comprehension. The course will present a pragmatic perspective of problem and solution space and help students solve domain-specific problems with machine-learning techniques.

PREREQUISITES: CSCI 3130.03 and CSCI 3151.03

CSCI 4140 Advanced Database Systems

CREDIT HOURS: 3

This course covers advanced Database (DB) topics including, but not limited to: DB design, normalization query processing and optimization, transaction processing, concurrency control and recovery, and distributed databases. Additional topics may include object-oriented databases, multi-databases, data integration and data warehousing.

PREREQUISITES: CSCI 2141.03 and (CSCI 2170.03 or CSCI 3120.03)

EXCLUSIONS: CSCI 3140.03

CSCI 4141 Information Retrieval

CREDIT HOURS: 3

This course examines information retrieval within the context of full text databases. Topics include the major models of information retrieval, evaluation, searching and clustering, and hypertext.

PREREQUISITES: CSCI 2110.03 and (CSCI 2140.03 or CSCI 2141.03)

CSCI 4144 Introduction to Data Mining and Data Warehousing

CREDIT HOURS: 3

This course reviews main concepts in data mining and data warehouses including objectives, architectures, algorithms, implementations, and applications. The topics covered include operational information process, decision-oriented information process, data warehousing and On-Line Analytical Process (OLAP), characterization mining, association rule mining, classification and predication and clustering. Selected system tools for data mining and data warehousing are introduced.

PREREQUISITES: CSCI 2110.03 and CSCI 2141.03

CSCI 4145 Cloud Computing

CREDIT HOURS: 3

Cloud computing provides users with the ability to access and use computational, storage, and interconnect resources as services offered by cloud providers. This course provides the students with the theoretical foundations of the cloud computing as well as with hands-on experience in using various cloud technologies. Topics covered are related to the types of cloud services, cloud infrastructure, distributed storage models, and programming models offered as general services and also developed for Big Data. Topics will also include underlying technologies, such as virtualization.

PREREQUISITES: CSCI 2141.03, CSCI 3120.03, and CSCI 3171.03

CSCI 4146 The Process of Data Science

CREDIT HOURS: 3

The advent of low-cost storage and processing power coupled with ever increasing amounts of "born digital" data has created the new field of data science. The ability to achieve a specific goal or answer a business question by crunching through very large and complex databases is becoming a competitive advantage for businesses and leads to new discoveries in science and medicine. This course is an overview of the different processes that make up a data science project. While other fields concentrate on finding previously unknown knowledge or searching for a specific pattern, data science focuses on answering deep questions and making the conclusions accessible to the rest of the organization. This course requires the implementation of software and experimental design in order to complete the assignments.

PREREQUISITES: CSCI 3130.03 and CSCI 3151.03

CSCI 4147 The Web of Open Linked Data

CREDIT HOURS: 3

The Web of Linked Data (WLD) is a major step towards making abstractions represented in data into something that can be meaningfully manipulated by computing machines. This experiential-learning project-based course introduces models and technologies for representing, aggregating, and machine reasoning about data using WWW standards (e.g., XML, RDF, OWL, SPARQL, RIF). The course prepares students to build applications and services for open government, eCommerce, OpenStreetMap, etc. The course also explores key issues in the development of the future of linked data.

PREREQUISITES: CSCI 1170.03

CSCI 4148 Applied Research in Health Data Science

CREDIT HOURS: 3

This course is an introduction to the application of data science methods to health data within interdisciplinary research contexts. Students will be introduced to the main types of health data and their principal analysis methods while developing key research skills specific to effectively working at the intersection of medicine and computer science. This will encompass developing technical skills in the robust/reproducible analysis of data from medical databases, radiological imaging, electronic medical records, and physiological time-series data. Students will also gain specific training in developing interdisciplinary health data science research proposals including key considerations such as research ethics, data legislation, knowledge translation, and effective collaboration.

PREREQUISITES: CSCI 2110 and (STAT 2060 or CSCI 2360)

CSCI 4152 Natural Language Processing

CREDIT HOURS: 3

This course presents strategies and techniques for natural language understanding by machines. The course will cover a selection of topics taken from the following three areas: parsing techniques used to represent sentence structure and discover ambiguities, the representation of word meanings and how sentence meaning can be derived from word meanings, and the application of context and world knowledge to the interpretation of language.

PREREQUISITES: CSCI 3151.03

CSCI 4155 Machine Learning

CREDIT HOURS: 3

This course focuses on the theory of learning machines, which are important techniques underlying data mining and many AI applications. The topics include supervised learning, in particular maximum likelihood estimation in stochastic model and probabilistic reasoning, ubiquitous learning machines such as support vector machines and deep neural networks; unsupervised learning which includes generative models, expectation maximization, and Boltzmann machines; and reinforcement learning including Markov decision processes and temporal difference learning. The course includes an introduction to a high level modeling language such as MATLAB or Python and refresher on probability theory and matrix algebra.

PREREQUISITES: CSCI 3151.03

EXCLUSIONS: CSCI 4150.03

CSCI 4156 Reinforcement Learning with Gaming Applications

CREDIT HOURS: 3

This course presents the theory and applications of reinforcement learning by asking: How do we teach computers to play games? Two basic themes will be developed: 1) Markov decision processes, dynamic programming and Monte Carlo Tree search, culminating in the development of the Temporal difference method. 2) Episodic policy search through evolutionary computation. Case studies will consider results from games of complete information (e.g. Backgammon, Chess, Go) and incomplete information (e.g. FPS, StarCraft, Dota2, Poker). The role of self-play will also be considered.

PREREQUISITES: CSCI 3151.03 or CSCI 3154.03

CSCI 4157 Deep Speech Technologies

CREDIT HOURS: 3

This course introduces spoken language technologies, with an emphasis on deep learning and traditional machine learning for automatic speech recognition, speech synthesis, paralinguistic tasks (e.g., affect detection), and dialogue, with applications to digital assistants and conversational agents. The course is designed to give practical and scientific experience in speech language systems using modern technologies.

PREREQUISITES: CSCI 3151

CSCI 4158 Natural Language Processing with Deep Learning

CREDIT HOURS: 3

Natural Language Processing (NLP) is a field of Artificial Intelligence that enables computers to understand human language. It targets various applications such as, dialog systems like Amazon Echo, translation systems like Google translate, text generation like auto-completion feature while writing emails. In recent years, neural network based approaches, particularly deep learning, have substantially improved the performance across various NLP tasks and have become the most common approach to target NLP problems. This course aims at providing students with an in-depth knowledge of solving NLP problems with deep learning. It begins with providing an introduction to neural network models and advances to the latest neural network architectures such as RNNs and Transformers. The students get an opportunity to see the application of deep learning models across major NLP problems and familiarize themselves with peculiarities involving text processing.

PREREQUISITES: CSCI 3151.03

CSCI 4160 Topics in Computer Graphics

CREDIT HOURS: 3

This course presents the theory and mathematical algorithms required to develop and build a graphics package. Emphasis is on either two or three dimensions and the transformations and manipulations necessary to lead to animation. The design platform and language are left as a student choice to ensure immediate

familiarity and future development advantages.

PREREQUISITES: CSCI 3161

CSCI 4163 Human-Computer Interaction

CREDIT HOURS: 3

Human-computer interaction deals with human-computer communication and how to facilitate it. This course begins with a discussion of information processing characteristics important to human-computer interaction and formal models of human-computer interaction. Subsequent topics include dialogue techniques, response times and display rates, information presentation, interaction devices, computer training, help systems, computer supported co-operative work, information search and visualization, hypermedia, and the world wide web.

PREREQUISITES: CSCI 3160.03

CSCI 4166 Visualization

CREDIT HOURS: 3

This course focuses on graphical techniques for data visualization that assist in the extraction of meaning from datasets. This involves the design and development of efficient tools for the exploration of large and often complex information domains. Applications of visualization are broad, including computer science, geography, the social sciences, mathematics, science and medicine, as well as architecture and design. The course will cover all aspects of visualization including fundamental concepts, algorithms, data structures and the role of human perception.

PREREQUISITES: CSCI 3161.03 or CSCI 4160.03

CSCI 4167 Topics in Computer Animation

CREDIT HOURS: 3

The course introduces students to fundamental and advanced techniques and algorithms in Computer Animation. Topics include interpolation based and kinematic techniques, physically based modelling, motion capture, and character animation.

PREREQUISITES: CSCI 3161.03

CSCI 4168 Game Design and Development

CREDIT HOURS: 3

This course covers the fundamentals of digital game design with an emphasis on team-based development. In this course students will produce a significant game using techniques and principles derived from established state-of-the-art industry practices. Topics include an examination of game design theories, programming architectures, audio-visual design and game production.

PREREQUISITES: CSCI 2110.03 and CSCI 3130.03

CSCI 4169 Usable Security and Privacy

CREDIT HOURS: 3

Human factors play an important role in the effectiveness of security and privacy solutions, and it is important for security and privacy experts to have an understanding of how people will interact with the systems they develop. This course is designed to introduce students to a variety of usability and user interface problems related to privacy and security, and to give them experience in designing studies aimed at helping to evaluate usability issues in security and privacy systems. Topics include human threat identification, security warning design, location privacy, privacy policies, web browser privacy and security, phishing, passwords, and secure communication.

PREREQUISITES: CSCI 3160.03

CSCI 4171 Networks and Communication

CREDIT HOURS: 3

The primary objective of this course is to give the student a comprehensive understanding and specialized knowledge in the field of computer networks and communications. The course teaches through a systems approach to networks by examining the hardware and protocol components that comprise a network. The course also examines the interactions and interdependencies between protocols. Topics covered in this course include network principles and concepts, transmission principles, network architecture, routers and routing protocols, direct link networks, wireless networks, internetworking, and emerging network technologies.

PREREQUISITES: (CSCI 2121.03 or CSCI 2122.03) and CSCI 3171.03

CSCI 4174 Network Security

CREDIT HOURS: 3

Security stands out as a critical issue in the design and deployment of information systems in general, and networks in particular. This course will deal with the design of secure information systems with emphasis on secure networking and secure information transfer. It will also include topical and emerging areas in security such as the establishment of an organization-wide security plan and bio-metric identification systems.

PREREQUISITES: CSCI 3171.03

CSCI 4176 Mobile Computing

CREDIT HOURS: 3

This course covers the principles of mobile computing and the concepts and techniques underlying the design and development of mobile computing applications. Mobile computing is discussed from technological, application, and user perspectives. Topics include mobile and wireless communication technologies, development environments, application design for resource limited and failure-prone environments, user interface issues in the mobile computing setting, and the future of mobile computing.

COREQUISITES: CSCI 3171.03 or CSCI3172.03 may be taken as a co-requisite

PREREQUISITES: CSCI 3130.03 and (CSCI 3171.03 or CSCI3172.03)

CSCI 4177 Advanced Web Services

CREDIT HOURS: 3

This course provides a hands-on learning environment for advanced web development techniques, such as HTML5 APIs for the creation of dynamic web graphics as well as adding offline functionality to web applications, and server-side APIs for extending the back-end functionality of web applications. Advanced security, performance monitoring, and testing approaches are also covered to facilitated the creation of efficient and secure web applications. Finally, this hands-on course also highlights the importance of ethical web development principles and documentation.

PREREQUISITES: CSCI 3172.03

CSCI 4178 Cyber Security & Defense

CREDIT HOURS: 3

This course will discuss the concepts behind cyber security and cyber defenses. Students will be introduced to the tools and systems used in vulnerability analysis, penetration testing and other defensive systems. From security agencies to businesses, hackers are an inescapable reality of the cyber world. The goal of this course is to understand the cyber-attacks so that you are able to defend yourself against them.

PREREQUISITES: CSCI 2122 and CSCI 3171

CSCI 4179 Intelligent Wireless Networks and Systems

CREDIT HOURS: 3

This course introduces the fundamentals of wireless networks and machine learning. The students will learn how to apply machine learning principles for the design and optimization of wireless networks and systems. In addition, this course will discuss how wireless networks and systems are being intelligitized and transformed by modern machine learning technologies. Topics include fundamentals of machine learning including reinforcement learning and federated learning, wireless network architecture, wireless networking paradigms (cellular network, Wi-Fi, Bluetooth, wireless sensor network, vehicular ad hoc network, etc.), wireless network design and optimization, applications of intelligent wireless networks in different domains like transportation, IoT, agriculture, healthcare, space, etc.

PREREQUISITES: CSCI 3171.03 with a minimum grade of C.

EXCLUSIONS: CSCI 6711

CSCI 4180 Introduction to Computational Biology and Bioinformatics

CREDIT HOURS: 3

This course introduces biology-related applications of computer science. No background in biology is assumed. The topics covered include the following: introductory molecular biology and evolution, genomics, similarity and homology, multiple sequence alignments, phylogenetics, structural bioinformatics and gene expression. The emphasis is on the applications of computer science to biology.

CSCI 4181 Bioinformatics Algorithms

CREDIT HOURS: 3

The discipline of bioinformatics applies sophisticated computational and statistical techniques to problems in the biological domain. This course will focus on a few biosequence-related challenges in depth, examining the complexity and efficiency of different approaches, the relationship between statistical optimality and biological reality, and the consistency (or lack thereof) among methods.

PREREQUISITES: Permission by instructor

CSCI 4190 Special Topics in Computer Science

CREDIT HOURS: 3

This course examines topics determined by the interests of the students and the instructor.

PREREQUISITES: Permission of the instructor

CSCI 4191 Application Development Project

CREDIT HOURS: 3

This is a project-oriented course for students to participate in distributed software development projects, such as the Undergraduate Capstone Open Source Project (www.ucosp.ca) initiative. Students work as part of a development team on new or existing projects for real-world applications. In this course students learn how to work in large development teams, which may be geographically distributed. Students implement portions of a large software project and give a public presentation on their work. Students work under supervision of a faculty member. A specific development project must be approved by the undergraduate chair in consultation with the instructor.

PREREQUISITES: CSCI 3120.03, CSCI 3130.03 and CSCI 3171.03

CSCI 4192 Directed Studies

CREDIT HOURS: 3

This course is a study of specific academic subject area not covered in another course offered at Dalhousie University, under close supervision of a faculty member. It typically consists of predetermined readings, discussions with the instructor, and a term paper summarizing the studied material. A specific directed studies course must be approved by the undergraduate chair in consultation with the instructor.

PREREQUISITES: CSCI 3110.03, CSCI 3120.03, CSCI 3130.03, (CSCI 3136.03 or CSCI 3137.03), CSCI 3171.03

CSCI 4193 Technology Innovation

CREDIT HOURS: 3

The Technology Innovation combines elements of design thinking, rapid prototyping, and software development that can be used to validate ideas that could yield new technologies and new business models. Over the semester students will work in interdisciplinary teams to address a Design Challenge posed by industry. The ideas advanced by teams will reflect the powerful synergies that exist between software development, design thinking and entrepreneurship.

PREREQUISITES: CSCI 2100.03, CSCI 2110.03, (CSCI 2132.03 or CSCI 2134.03), and CSCI 2141.03

CSCI 4194 Special Topics in Computer Science

CREDIT HOURS: 3

This course examines topics determined by the interests of the students and the instructor.

CSCI 4195 Special Topics in Computer Science

CREDIT HOURS: 3

This course examines topics determined by the interests of the students and the instructor.

CSCI 4196 Special Topics in Computer Science

CREDIT HOURS: 3

This course examines topics determined by the interests of the students and the instructor.

CSCI 4260 Persuasive Computing Design

CREDIT HOURS: 3

Persuasion Technologies (PTs) are interactive systems designed to motivate people to change their behaviours without using coercion or deceit. This course will explore the fundamental theory, principle, and practice in the design, implementation, and evaluation of persuasive systems. Topics include theories of persuasion and behaviour change, persuasive strategies, application of the theories and strategies in persuasive interface/system design, persuasive system evaluation methods, approaches for personalizing and adapting persuasive systems, privacy and ethical issues of persuasive systems. Students will get hands-on experience on persuasive user interface design and evaluation, user studies, behaviour modelling, persuasive affordances of various technological platforms (e.g., mobile, social media, games), and ethics of PT through case analysis, critics, real-world project, project report, and project presentation.

PREREQUISITES: CSCI 3160.03

CSCI 4261 Introduction to Computer Vision

CREDIT HOURS: 3

This course introduces students to the fundamental concepts of computer vision providing an overview of the current methodologies and techniques. Students will explore the theory behind fundamental processing tasks, including segmentation, feature extraction, image classification, and object detection, using a mathematical framework to analyze images as two-dimensional signals. By the end of this course, students will be able to apply the basic principles and tools used in computer vision to solve practical problems in scientific and commercial settings.

PREREQUISITES: (CSCI 1300 or MATH 1000), CSCI 2110, and MATH 1030

CSCI 4262 Augmented and Virtual Reality

CREDIT HOURS: 3

This course will explore augmented and virtual reality from both theoretical and practical lenses. Specific topics will depend in part on class interests and guest lecture content but will include some or all the following: mixed reality, collaboration in AR/VR, immersive analytics, navigation and locomotion in AR/VR, interaction in AR/VR, platforms and toolkits for AR/VR, narrative and gaming, public installations; spatial analysis and related theory, cognitive and psychological aspects including immersion, presence, embodiment, and spatial mental models.

PREREQUISITES: CSCI 2134.03, CSCI 2110.03 and CSCI 3160.03, each with a minimum grade of C.

EXCLUSIONS: CSCI 6615

CSCI 4263 Designing for Vulnerable Populations

CREDIT HOURS: 3

The course's overall goal is to teach students how to design with/for vulnerable populations to develop computational solutions for a particular need. The main outcome will be that students will learn how to design and deploy formative studies, employ accurate methods, found design principles, and suggest an interactive system's design based on the needs of a particular vulnerable group.

PREREQUISITES: CSCI 1110, CSCI 3160, and CSCI 3101, each with a grade of C or better.

CSCI 4691 Advanced Project

CREDIT HOURS: 3

Students take a leadership role in project teams to solve a real-world information technology problem. Team members are drawn from all years of study. The project gives students an opportunity to develop their leadership, management, and professional skills.

PREREQUISITES: CSCI 3130.03, CSCI 3691.03, MGMT 2303.03

FORMATS: Lecture

CSCI 8781 Co-op Work Term 1

CREDIT HOURS: 0

This course is the first work term for students in the Co-operative Education Program. Pass/fail grading applies to this course.

COREQUISITES: CSCI 8791.00

PREREQUISITES: CSCI 8890.00 and CSCI 8791.00

CSCI 8782 Co-op Work Term 2

CREDIT HOURS: 0

This course is the second work term for students in the Co-operative Education Program. Pass/fail grading applies to this course.

COREQUISITES: CSCI 8792.00

PREREQUISITES: CSCI 8781.00, CSCI 8792.00

CSCI 8783 Co-op Work Term 3

CREDIT HOURS: 0

This course is the third work term for students in the Co-operative Education Program. Pass/fail grading applies to this course.

COREQUISITES: CSCI 8793.00

PREREQUISITES: CSCI 8782.00, CSCI 8793.00

CSCI 8784 Co-op Work Term 4

CREDIT HOURS: 0

This course is the optional fourth work term for students in the Co-operative Education Program. Pass/fail grading applies to this course.

PREREQUISITES: CSCI 8783.00, CSCI 8793.01

CSCI 8791 Co-op I

CREDIT HOURS: 1

This course is the first work term academic component for students in the Co-operative Education Program.

COREQUISITES: CSCI 8781.00

PREREQUISITES: CSCI 8890.00, CSCI 8781.00

CSCI 8792 Co-op II

CREDIT HOURS: 1

This course is the second work term academic component for students in the Co-operative Education Program.

COREQUISITES: CSCI 8782.00

PREREQUISITES: CSCI 8782.00, Minimum of a B- in CSCI 8791.01

CSCI 8793 Co-op III

CREDIT HOURS: 1

This course is the third work term academic component for students in the Co-operative Education Program.

COREQUISITES: CSCI 8783.00

PREREQUISITES: CSCI 8783.00, Minimum of B- in CSCI 8792.01

CSCI 8799 Work Term

CREDIT HOURS: 0

The goal of this course is to help students in the Computer Science Work Experience Program get the most out of their work term. Since the work term is a form of work-integrated learning (WIL), the aim of this course is to enable students to form successful work habits; develop employability skills & competencies (i.e. graduate attributes); and leverage the work term to explore their career path. Through the on-line portion of the course, work term assignments will provide students the opportunity to reflect on work experiences with a view to deepen learning in their workplace

PREREQUISITES: CSCI 8890

EXCLUSIONS: CSCI 8781, CSCI 8791, CSCI 8891

CSCI 8873 Honours Seminar

CREDIT HOURS: 3

This is a course through which students complete their Honours Thesis requirements. Honours students in Computer Science must register for this course or CSCI 8871/72. In this course, students complete their thesis research, write their honours theses, and give public presentations of their work. In a normal course sequence, the student should have taken CSCI 4192 under the direction of their thesis supervisor. During this course, the student should have acquired the necessary background knowledge for their thesis research and formulated a research plan for their thesis work. Deviations from this sequence are possible.

PREREQUISITES: Permission of the Honours Coordinator

CSCI 8874 Research Project 1

CREDIT HOURS: 3

Students carry out research and related activities under the supervision of a faculty member. Work done in this course is intended to prepare and contribute to the research to be done when the students enters the Master of Computer Science program. This is a PASS/FAIL course.

CALENDAR NOTES: This course may not be used to satisfy a CS elective requirement for any of the computer science degrees.

PREREQUISITES: CSCI 3101.03, CSCI 3110.03, CSCI 3120.03, CSCI 3130.03, (CSCI 3136.03 or CSCI 3137.03), CSCI 3171.03, a minimum GPA of 3.0, permission of instructor, and permission of the Faculty of Computer Science.

CSCI 8875 Research Project 2

CREDIT HOURS: 3

Students carry out research and related activities under the supervision of a faculty member. Work done in this course is intended to prepare and contribute to the research to be done when the students enters the Master of Computer Science program. This is a PASS/FAIL course.

CALENDAR NOTES: This course may not be used to satisfy a CS elective requirement for any of the computer science degrees. CSCI 8874.03 may be taken at the same time as CSCI 8875.03.

PREREQUISITES: CSCI 3101.03, CSCI 3110.03, CSCI 3120.03, CSCI 3130.03, (CSCI 3136.03 or CSCI 3137.03), CSCI 3171.03, CSCI 8874.03, a minimum GPA of 3.0, permission of instructor, and permission of the Faculty of Computer Science.

CSCI 8890 Co-op Seminar

CREDIT HOURS: 0

Students in the Bachelor of Computer Science Co-operative Education Program must register for this course, which orients students to the co-op system.

Pass/fail grading applies to this course.

PREREQUISITES: Permission of the Faculty of Computer Science

CSCI 8891 Co-op Work Term 1

CREDIT HOURS: 1

In this course students learn about their role in the workplace and to appraise their performance during the work-term. Students are introduced to concept of workplace competencies and identify their own strengths and weaknesses in the workplace. Students are assessed both on their academic and experiential performance.

PREREQUISITES: CSCI 8890.00

EXCLUSIONS: CSCI 8781, CSCI 8791, CSCI 8799

CSCI 8892 Co-op Work Term 2

CREDIT HOURS: 1

In this course students continue to learn about their role in the workplace and to appraise their performance during the work-term. Students engage deeply with an issue in their workplace via a formal report that analyzes the issue and makes recommendations. Students are assessed both on their academic and experiential performance.

PREREQUISITES: CSCI 8891.01

EXCLUSIONS: CSCI 8782, CSCI 8792

CSCI 8893 Co-op Work Term 3

CREDIT HOURS: 1

In this course students continue to learn about their role in the workplace and to appraise their performance during the work-term. Students engage deeply with an issue in their workplace via a formal presentation that analyzes the issue and makes recommendations. Students are assessed both on their academic and experiential performance.

PREREQUISITES: CSCI 8892.01

EXCLUSIONS: CSCI 8783, CSCI 8793

CSCI 8894 Co-op Work Term 4

CREDIT HOURS: 0

PREREQUISITES: CSCI 8893

Engineering as a Profession

Engineering is an important profession. Virtually all aspects of modern life are involved with this fascinating discipline. Engineering education at Dalhousie is demanding, because the engineering profession is demanding. Society expects its technical problem solvers to offer answers to some of the most difficult questions around, questions related to the environment, productivity, information technology, communications, transportation, and more. In general, the engineering enterprise contributes not only to human welfare, but also to the sustainable development of our resources. Engineering education provides great rewards for the engineer of the future. Specifically, there is the personal satisfaction of following a career where one's personal expertise can benefit fellow humans and contribute to the making of a better world.

The Faculty of Engineering at Dalhousie University prepares its students with the problem-solving skills needed for lifelong exploration in a field that answers some of today's most pressing concerns. The Faculty of Engineering has an excellent tradition of providing engineering education for students in the Atlantic Provinces that started in 1907 with the founding of the Nova Scotia Technical College. Our graduates occupy many important positions throughout Canada and in many other countries.

The Faculty of Engineering offers undergraduate curricula leading to the degree of Bachelor of Engineering in the following disciplines:

- Chemical Engineering
- Civil Engineering
- Electrical Engineering
- Environmental Engineering
- Industrial Engineering
- Mechanical Engineering

The Faculty also offers a Bachelor of Applied Science in Food Science (admission suspended, pending review), and post-graduate studies at the master's and doctoral level.

For students who are eligible, the Faculty of Engineering offers a Bachelor of Engineering Co-operative Education program that integrates academic study with university approved industrial experience. Graduation from this program requires satisfactory performance in both areas. The schedule of study and work terms varies according to the discipline, details of which are outlined in Section E of the Engineering curricula in this calendar.

The co-operative education system requires students to alternate periods of study with periods of university approved, full-time, paid employment. The period of employment is called a work term and is normally four months (16 weeks) in length. Some programs combine two or more four month work terms. Work terms have academic requirements that must be completed in addition to the requirements of the employer.

The co-op degree program covers almost five calendar years, comprising eight or nine terms (depending on the area of specialization) each consisting of about four months' duration of university work on campus which are pursued alternately with four-month terms of supervised training in the practical experiences fundamental to the development of the graduate engineer. In a typical program of study, the total time spent in academic study is the same as that encountered in the usual course of four academic years.

Graduation from the University is the beginning of a lifelong learning experience. After completion of formal studies leading to the Bachelor of Engineering degree, and being admitted as an Engineer in Training (EIT) by an Association of Professional Engineers in Canada, four years of suitable experience are required as a condition of admission to the profession of Engineering.

The practice of engineering is regulated, by statute, in all Canadian provinces and territories. To become a Professional Engineer you must satisfy the requirements of the licensing bodies. These requirements include a degree from an accredited program, successful completion of a professional practice (law and ethics) examination, and suitable experience. Accreditation of the degree programs by the CEAB is the mechanism by which graduates qualify for registration as Professional Engineers without the need to undertake additional examinations in specific technical subject areas. The BEng programs described in this calendar have been specifically designed to satisfy the criteria of the Profession and are evaluated regularly by the Canadian Engineering Accreditation Board (CEAB) of Engineers Canada. The Faculty will not graduate any student who does not meet these requirements because this would jeopardize accreditation for the program. The department responsible for the appropriate program will use these requirements in determining the suitability of student elective course selections. The baccalaureate programs in all disciplines are accredited by the Canadian Engineering Accreditation Board.

Degree Programs

Undergraduate

Engineering

Bachelor of Engineering

Students who have successfully completed the academic study program in any of the disciplines will be granted the degree of Bachelor of Engineering.

Bachelor of Engineering with Distinction

Students who have successfully completed the requirements for the degree of Bachelor of Engineering, and have obtained a Cumulative Grade Point average of at least 3.7, will be granted the degree of Bachelor of Engineering with Distinction.

Bachelor of Engineering with Sexton Distinction

Dr. F.H. Sexton was the President of the Nova Scotia Technical College since its establishment in 1909 until his retirement in 1947. To honour his contributions, the Faculty of Engineering awards the designation of Sexton Distinction to each undergraduate student who has taken a full course load and obtained a cumulative Grade Point Average of at least 3.85 or higher with no failed marks during their program beginning in Academic Term 5.

Co-operative Program Designation

Students who have successfully completed the requirements for the degree of Bachelor of Engineering and who, in addition, have successfully completed three four-month work terms, each of a minimum of 14 weeks, with a minimum of 35 hours per week, or equivalent as determined by the Department and the Co-op office, will receive the “Co-operative Education” designation on their degree.

Diploma of Engineering

Students who have successfully completed the academic study program in the first four terms in any of the disciplines will be granted the Diploma of Engineering.

Combined Bachelor of Science/Diploma of Engineering

Students may register in a combined Bachelor of Science/Bachelor of Engineering program. Those who successfully complete the requirements as outlined in the [Concurrent Programs sections](#) will be awarded the Diploma in Engineering and the 90 credit hour Bachelor of Science Degree.

Combined Bachelor of Arts/Diploma of Engineering

Students may register in a combined Bachelor of Arts/Bachelor of Engineering program. Those who successfully complete the requirements as outlined in the [Concurrent Programs sections](#) will be awarded the Diploma in Engineering and the 90 credit hour Bachelor of Arts Degree.

Food Science

Bachelor of Applied Science

This is a standard 120 credit hour curriculum. Consult the [Food Science section](#). This program is currently inactive.

Graduate

Master of Applied Science

Students who have successfully completed the course requirements for the degree and who have submitted and defended orally an acceptable thesis, will be awarded the degree of Master of Applied Science.

Master of Engineering

Students who have successfully completed the course requirements for the degree and submitted an acceptable project report, will be awarded the degree of Master of Engineering.

Master of Engineering (Internetworking)

This is a 10 month plus internship/project interdisciplinary Master’s Degree program focused on the theory and technology of the Internet. This program has been designed to prepare individuals to play an active role in the rapidly expanding field of Internetworking. Students who complete the prescribed ten courses and a project course will be awarded the MEng (Internetworking).

Master of Science

Students who have successfully completed the course requirements for the degree in Engineering Mathematics or Food Science and who have submitted and defended orally an acceptable thesis or project report, shall be awarded the degree of Master of Science.

Doctor of Philosophy

Students who have successfully completed the course requirements for the PhD degree, passed their comprehensive examination, and submitted and defended orally a satisfactory thesis, will be awarded the degree of Doctor of Philosophy.

Staff

Dean

Newhook, J., BEng, MAsC (TUNS), PhD (Dalhousie), PEng

Associate Dean, Undergraduate Studies and Associated Universities

TBD

Assistant Dean, Co-op

Pelot, R., BSc (Ottawa), MSc (Alberta), PhD (Waterloo), PEng

Assistant Dean, Equity Diversity Inclusion
TBD

Assistant Dean, Student Affairs
Bishop, S., BSc, MSc (Dalhousie), PhD (Carleton), PEng

Director, Core Program
Jarjoura, G., BEng (TUNS), MSc, PhD (Dalhousie), PEng

Engineering (Year I & II)

The Associated University Program

Students who have completed the degree requirements for a Diploma of Engineering or a Certificate of Applied Science from one of the Associated Universities are admissible to the Upper Division in the Faculty of Engineering. Admission to specific programs is competitive and is based on the students' academic standing. The Associated Universities are:

Acadia University
Wolfville, Nova Scotia
A. Mitchell, Director
The Ivan Curry School of Engineering

Cape Breton University
Sydney, Nova Scotia
H. Xia, Director
Diploma in Engineering Program

St. Francis Xavier University
Antigonish, Nova Scotia
F. Comeau, Chairman
Department of Engineering

Saint Mary's University
Halifax, Nova Scotia
D. MacNeil, Director
Division of Engineering

Each of the Associated Universities establishes its own entrance requirements. Dalhousie University recognizes all of the Associated Universities and ensures proper standards of achievement by means of the Associated Universities Directors of Engineering Committee. The program at each Associated University contains courses fulfilling the minimum entrance requirements established by the Senate of Dalhousie University. Students who complete the applied science or engineering program at an Associated University may receive a Certificate or Diploma and are normally admitted to the programs in Chemical, Civil, Electrical, Environmental, Industrial, or Mechanical at Dalhousie without examination. Students should ensure that their course selection at the Associated Universities include the discipline specific courses relevant to their program of choice. Not all Associated Universities offer all discipline specific courses, and students should contact the office of the Associate Dean, Faculty of Engineering at the Sexton location, for details. Students who have completed equivalent university studies elsewhere may also be admitted subject to Dalhousie University Regulations.

Please refer to the [Graduate](#) and [Professional](#) Calendar for details of graduate programs offered by the Faculty of Engineering.

Academic Regulations

Students are reminded that the academic regulations stated in the calendar are abridged for reference. In addition to the Academic Regulations section of this calendar and the regulations stated below, the current Faculty of Engineering Working Rules also apply to all students.

Courses on Letters of Permission

The academic program for a student will normally contain a maximum of two courses on a letter of permission.

Course Grades

A student must achieve a grade of D or greater in each course of the curriculum and satisfy the regulations set out herein in order to graduate. Where Faculty regulations permit, a student who achieves a grade of FM in a required course may write a supplementary examination to attempt to raise the grade to D or greater. If the grade is not raised to at least D by means of a supplementary examination or if a supplementary examination is not permitted, the student must repeat the course. See also [Supplementals](#).

The FM grade will be issued to students with numerical marks in the range 46-49.9%, if a supplemental examination is available in the course.

A student is permitted to repeat a failed mandatory course only once. In the case of a failed elective course, a student may choose either to repeat the course or to substitute another elective course in lieu of the failed course. In the case of a substituted course only one such substitution is allowed. A student will be academically dismissed if the grade achieved in the repeated mandatory course or the repeated elective course or the substituted course is less than D.

Readmission After Academic Dismissal

A student who has been academically dismissed only once from their program may apply to be readmitted to the same program after a minimum of eight months from the time of dismissal, or, such a student may apply to be admitted to a different engineering program starting immediately. Readmission may be granted by the Faculty on the recommendation of the Department concerned. A department may readmit a student who has been academically dismissed, subject to special academic conditions set by the department, which are based on an evaluation of the student's academic record. See also [Academic Dismissal](#).

Scholarships

Only those students who are registered for a full load of courses as measured by the curriculum of the program concerned will be eligible for scholarships and awards in the Faculty of Engineering.

Supplementary Examinations

Eligibility:

Supplemental examinations may be offered to students who:

1. Have received a FM grade in the course (see Course Grades).
2. Are on academic probation and have received a course grade less than C, in an attempt to raise the student's term GPA to at least 2.0.

A student who is on Academic Dismissal is not eligible to write a supplemental examination. Only one supplemental examination will be permitted per session.

Marks:

The supplemental examination mark will normally replace the final examination mark in calculating the course grade. The course grade resulting from a supplemental examination will replace the original course grade for all purposes.

Availability:

Supplemental examinations will not necessarily be available for all courses. If a 1000-level or 2000-level course is offered in the Faculty of Engineering, and it that course has a final examination in the formal examination period, the course will offer supplemental examinations for eligible students. For all engineering courses, students will be informed by the instructor, at the beginning of a course, if a supplemental exam is available.

Dates:

Supplemental examinations will normally be held in late August prior to the fall term, early January in the winter term and early May in the summer term.

In the case of 1000-level and 2000-level supplemental examinations, the supplemental examination will be written at the first supplemental examination date following the final examination date. For 3000-level and 4000-level courses which offer supplemental examinations, the exam will be held at the beginning of the next regularly scheduled study term for the student's program. If the next study term is a fall term, the supplemental examinations will be held in late August, prior to the start of term.

Supplemental examinations for a particular course must be written at the first scheduled date, as outlined above, and cannot be postponed or carried forward to a later session.

Repeating Students

If changes are made in the curriculum, repeating students will be required to satisfy the new curriculum.

Auditing a Course

See [definition](#) of “audit student”.

Students who are registered for a degree in the Faculty must have the approval of the Faculty to audit a course. Such approval can be obtained by submitting a written request to the Dean, who will refer the matter to the Faculty for a decision.

Students who are not registering for a degree in the Faculty must obtain the approval of the Department to audit a course.

Reporting of absences from Assessments

1. This policy applies to all courses in the Faculty of Engineering.
2. All reporting of medical excuses, or self-reporting of absences, is to the Associate Dean of Engineering.
3. Every syllabus shall specify how missed work will be accommodated.
4. “Final coursework” is excluded.
5. Medical notes are required for missing any work that is considered “Final Coursework”. When medical notes are required, the following Faculty of Engineering policy shall be followed.

Medical Notes

Students who miss final examinations or final coursework for medical reasons must submit medical notes to the Undergraduate Studies Office for consideration by the Associate Dean of Engineering. This must be done within seven days of the submission deadline or exam date in question. The medical note is verified, and the professor advised if they may submit the grade of ILL before arrangements for special examinations or rewrites may be made. Meanwhile, the student will be given the grade earned in the class, minus the value of the missed examination.

6. A student who misses a deferred examination, shall not be given another deferred examination – in this case, medical evidence can be presented to justify a permanent grade of “ILL”.

Fees

Information pertaining to fees and expenses is given in the “[Fees](#)” section.

Financial Assistance

Information pertaining to Financial Assistance is given in the “[Awards and Financial Aid](#)” section.

Bachelor of Engineering

Introduction

The engineering program is designed for students who have completed senior matriculation (Nova Scotia Grade XII) including mathematics, physics, and chemistry, and rank well in their course. Students may be admitted with advanced placement.

At Dalhousie, students benefit from our unique approach to undergraduate engineering education. Renowned for innovation in education, the unique undergraduate engineering curricula at Dalhousie University provide a sound basis in Mathematics and pure Science and in Engineering Science and Design, that are a foundation for success in any engineering career. A substantial part of the work of the first and second years is common to all programs. The content of many of these courses will change very little over the course of an engineer’s career; they will become a sound basis of life-long learning.

The Faculty of Engineering has five engineering departments and one service department, the Department of Engineering Mathematics and Internetworking. Civil and Resource Engineering administers degree programs in the disciplines of Civil, Environmental and Mineral Resource Engineering. The Department of Process Engineering and Applied Science administers a degree program in the discipline of Chemical Engineering. The Mechanical Engineering department administers degree programs in Mechanical Engineering and Materials Engineering. The remaining departments are Electrical and Industrial.

At the end of Year 1, students apply for discipline placement indicating the order of their preferences. The Faculty of Engineering will inform students who have met the criteria of promotion from Year 1 to Year 2 of their conditional placement in one of the accredited programs. The curriculum for each of the basic programs combines required ‘core’ subjects essential to the field, and ‘elective’ subjects permitting considerable diversity in individual programs of study. An important part of the curriculum is a series of Complementary Studies courses. The curriculum for the first two years of Engineering at Dalhousie is indicated below. **Students should refer to the appropriate departmental chapter of the calendar once a field of specialization has been determined for subsequent years.**

Admission to an Engineering Discipline

A student must apply to be admitted into one of the engineering disciplines. Application must be made by April 30 of any year, for conditional acceptance into year two of a specified engineering program.

Every engineering discipline has a defined maximum enrollment; therefore places are assigned on a competitive basis. The criterion for this competition is the average grade over all credits completed to date in the core curriculum of the Diploma of Engineering.

The procedure is as follows:

1. By April 30, each student must specify ordered preferences for five engineering disciplines. The application is for conditional acceptance into year two of an engineering discipline.
2. Any student who has completed all of the entry requirements for an engineering discipline, with a GPA of 3.50 or better, will be guaranteed a place in that engineering discipline.
3. In a single competition, students with a GPA greater than or equal to 2.00 and less than 3.50 will be assigned conditional places (year two) in engineering disciplines, proceeding in strict order of GPA, subject to discipline capacities.
4. Any student with a GPA of less than 2.00 will not be admitted to a discipline.

Humanities Electives

Some disciplines of engineering require a student to do one or more humanities electives. In such a case, the definition of a humanities elective shall be as follows:

Humanities would normally be in the Faculty of Arts and Social Sciences and may not include significant science, technical or mathematics content, nor may they include economics or language acquisition. Departments which may have suitable courses include: Arabic, Bioethics, Canadian Studies, Chinese, Classics, Contemporary Studies, Creative Writing, Early Modern Studies, English, European Studies, French, Gender and Women's Studies, German, History of Science and Technology, History, International Development Studies, Italian, Journalism, King's Foundation Year Program, Law, Leisure Studies, Music, Philosophy, Political Science, Religious Studies, Russian Studies, Social Work, Sociology and Social Anthropology, Spanish and Latin American Studies, Sustainability, Theatre.

BSc/BEng

Students who meet the admission requirements for the Bachelor of Science program and the Bachelor of Engineering program are eligible to select this concurrent degree option. Students wishing specific advice should consult the Assistant Dean, Faculty of Science and the Associate Dean, Faculty of Engineering. Students accepted will complete the 90 credit hours BSc and the first two years of engineering studies leading to the Diploma in Engineering concurrently in a period of three calendar years. At the end of the three year period, both the degree and the diploma will be awarded to successful candidates. This opportunity should appeal to students with career objectives in multi-disciplinary fields such as Biomedical Engineering, Environmental Science, or Materials Science (among others). It is thus possible to complete the requirements for the Bachelor of Science and Bachelor of Engineering degrees concurrently in a time period of five years in total (or up to six years for Co-op programs).

BA/BEng

Students wishing to do so may complete the 90 credit hours BA degree program and the first two years of engineering studies leading to the Diploma in Engineering concurrently in a period of three calendar years. At the end of the three year period, both the degree and the diploma will be awarded to successful candidates. It is thus possible to complete the requirements for the Bachelor of Engineering and the Bachelor of Arts degrees concurrently in a time period of five years in total (or up to six years for Co-op programs).

Courses in the fourth and fifth years are those required to finish the Bachelor of Engineering degree.

Diploma of Engineering

Students who have successfully completed the academic study program in the first four terms in any of the disciplines may be eligible to apply for the Diploma of Engineering. This means a student must have a minimum GPA of 2.0, and have completed, with a minimum grade of D, the required courses as specified in the discipline curriculum.

Curricula for Terms 1 - 4

Year 1—Term 1 Fall

- ENGI 1103: Engineering Design and Graphics I
- CPST 1103: Technical Communications I
- MATH 1280: Engineering Mathematics I
- ENGM 1081: Computer Programming
- CHEM 1021: Engineering Chemistry I

- PHYC 1190: Introduction to Physics I

Year 1—Term 2 Winter

- ENGI 1203: Mechanics I: Statics
- CPST 1203: Technical Communications II
- MATH 1290: Engineering Mathematics II
- ENGM 1041: Applied Linear Algebra
- CHEM 1022: Engineering Chemistry II
- PHYC 1290: Introduction to Physics II

Year 2—Term 3 Fall

- ENGM 2101: Applied Vector Calculus
- ENGM 2032: Applied Probability and Statistics
- ECED 2000: Electric Circuits
- ENGI 2102: Thermo-Fluid Engineering I
- A three credit hour writing course
- IENG 2005: Engineering Economics

Year 2—Term 4 Winter

- ENGI 2203: Engineering Design II
- ASSC 1971: Engineering & Society
- ENGM 2022: Applied Differential Equations
- Three discipline-specific electives

Discipline-Specific Electives

Chemical Engineering

- CHEE 2201: Fundamentals of Chemical Engineering
- CHEE 2203: Organic Chemistry for Chemical Engineers
- ENGI 2103: Thermo-Fluid Engineering II

Civil Engineering

- ENGI 2204: Mechanics of Materials
- MINE 2200: Introductory Geology for Engineers
- ENGI 2103: Thermo-Fluid Engineering II

Electrical Engineering

- ECED 2001: Circuit Analysis
- ECED 2200: Digital Circuits
- ENGM 2283: Data Structures and Algorithms

Environmental Engineering

- ENGI 2204: Mechanics of Materials
- MINE 2200: Introductory Geology for Engineers
- ENGI 2103: Thermo-Fluid Engineering II

Industrial Engineering

Three electives as follows.

- IENG 2201: Modelling and Optimization for Engineers
- Any **two** of the following:
 - ECED 2001: Circuit Analysis

- ECED 2200: Digital Circuits
- CHEE 2201: Fundamentals of Chemical Engineering
- CHEE 2203: Organic Chemistry for Chemical Engineers
- ENGI 2204: Mechanics of Materials
- ENGI 2103: Thermo-Fluid Engineering II
- MINE 2200: Introductory Geology for Engineers
- ENGI 2400: Mechanics II: Dynamics
- ENGM 2283: Data Structures and Algorithms

Mechanical Engineering

- ENGI 2400: Mechanics II: Dynamics
- ENGI 2103: Thermo-Fluid Engineering II
- ENGI 2204: Mechanics of Materials

The elective choices are summarized in the table below.

Discipline-Specific Electives		Environmental	Chemical	Civil	Electrical	Industrial	Mechanical
ECED 2001	Circuit Analysis				1		*
ECED 2200	Digital Circuits				1		*
CHEE 2201	Fundamentals of Chemical Engineering	1					*
CHEE 2203	Organic Chemistry for Chemical Engineers	1					*
ENGM 2283	Data Structures and Algorithms				1		*
MINE 2200	Geology for Engineers	1		1			*
IENG 2201	Modelling and Optimization for Engineers					1	
ENGI 2103	Thermo-Fluid Engineering II	1	1	1			* 1
ENGI 2204	Mechanics of Materials	1		1			* 1
ENGI 2400	Mechanics II: Dynamics						* 1

* any two

Engineering Co-op Program

The Faculty of Engineering offers a Bachelor of Engineering Co-operative Education program (BEng Co-op) that allows students to alternate career focused work terms with study terms and receive a Co-op degree designation upon graduation. Co-op enables students to apply what they learn in class to real-world work situations and then apply what they learn at work to their classroom studies, thereby enriching their learning. It also helps students to learn more about their career options by test-driving different work environments before they graduate. Graduation from this program requires satisfactory performance in both areas. The schedule of study and work terms varies according to the discipline, details of which are outlined below.

BEng Co-op is a selective program. Students interested in participating must apply, via the [S.I.T.E. Co-op](http://www.dal.ca/faculty/site.html) (<http://www.dal.ca/faculty/site.html>).

The Study and Work Schedule

The co-operative system requires students to alternate periods of study with periods of university approved, full-time, paid employment. The period of employment is called a work term and is normally four months (16 weeks) in length. Some programs combine two or more four-month work terms. Work terms have academic requirements that must be completed in addition to the requirements of the employer.

Each discipline has a specific work and study term schedule which students are required to follow (see the study and work sequence chart below). Work terms do not begin until third year of the program. All programs end on an academic term rather than a work term to allow for the formal integration of workplace and classroom learning.

Study and Work Sequences

Discipline	Fall	Winter	Summer	Fall	Winter	Summer	Fall	Winter
Electrical	Study	Work	Study	Work	Study	Work	Study	
Industrial	Study	Work	Study	Work	Study	Work	Study	Study
Environmental, Civil and Mineral Resource	Study	Study	Work	Work	Off	Work	Study	Study
Chemical, Materials and Mechanical	Work	Study	Work	Study	Work	Work	Study	Study

See [S.I.T.E.](#) for a full description of the Co-op Program. Further details can be obtained from the S.I.T.E. Co-op Office (<http://www.dal.ca/faculty.site.html>).

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

Courses for First 2 Years

Standard Courses for first 2 years of Study:

ECED 2000.03: Electric Circuits
 ECED 2001.03: Circuit Analysis
 ECED 2200.03: Digital Circuits
 ENGI 1103.03: Engineering Design I
 ENGI 1203.03: Mechanics I: Statics
 ENGI 2102.03: Thermo-Fluid Engineering I
 ENGI 2103.03: Thermo-Fluid Engineering II
 ENGI 2203.03: Engineering Design II
 ENGI 2204.03: Mechanics of Materials
 ENGI 2400.03: Mechanics II: Dynamics
 ENGM 1041.03: Applied Linear Algebra
 ENGM 1081.03: Computer Programming
 ENGM 2022.03: Applied Differential Equations
 ENGM 2032.03: Applied Probability and Statistics
 ENGM 2283.03: Data Structures & Algorithms
 ENGM 2101.03: Applied Vector Calculus
 IENG 2005.03: Engineering Economics
 IENG 2201.03: Modeling and Optimization for Engineers
 CHEE 2201.03: Fundamentals of Chemical Engineering
 CHEE 2203.03: Organic Chemistry for Chemical Engineers
 MINE 2200.03: Introductory Geology for Engineers

CPST Series: Complementary Studies Courses

CPST 1103.015: Technical Communications I
 CPST 1203.015: Technical Communications II
 CPST 3030.03: Engineering in Society II

Course Descriptions

CPST 1103 Technical Communications I

CREDIT HOURS: 1.5

Technical writing and presentation skills, study skills, examination skills and an introduction to the variety of disciplines of engineering and academic regulations for engineering.

COREQUISITES: ENGI 1103.03

FORMATS: Lecture

CPST 1203 Technical Communications II

CREDIT HOURS: 1.5

Introduction to the engineering profession, engineering ethics and professional responsibility as well as technical writing and presentation skills.

COREQUISITES: ENGI 1203.03

FORMATS: Lecture

CPST 3030 Engineering in Society II

CREDIT HOURS: 3

The course provides an overview of the concepts and interrelationships among sustainable development, environmental stewardship and public health and safety in relation to engineering practice. These concepts will be examined through historical examples and current theory and practice of the engineering profession. Lectures and discussion will consider global ecosystem functions, human interactions with the environment, methods of reducing human impacts; methods of achieving sustainability, engineering challenges to enhance sustainable development; and factors that influence occupational health and safety from engineering and management viewpoints. Students will be exposed to management methods and tools such as environmental auditing, ISO 14000, risk analysis and WHMIS and will be expected to consider class topics in relation to their own area of engineering specialization.

FORMATS: Lecture

ENGI 1103 Engineering Design I

CREDIT HOURS: 3

The objective of the class is to provide students with conceptual design experience, team work experience, computer drafting experience and to develop skills in engineering free-hand sketching, 3-D visualization, and reading/drafting of engineering drawings. An integral part of the class is the Design Project, focused on design as the essence of engineering, and the process of design and reporting.

COREQUISITES: CPST 1103.03

EXCLUSIONS: ENGI 1101.03

FORMATS: Lecture | Lab

ENGI 1203 Mechanics I: Statics

CREDIT HOURS: 3

This course teaches the basic concepts in engineering mechanics. Topics considered include; Vectors, forces, equilibrium of particles, rigid bodies and structures, internal loadings, centroids and moments of inertia as well as dry friction. An individual design project is a major component of this course.

COREQUISITES: CPST 1203.03

PREREQUISITES: PHYC 1190.03, MATH 1280.03

FORMATS: Lecture | Lab

ENGI 2102 Thermo-Fluid Engineering I

CREDIT HOURS: 3

This courses introduces thermodynamics and fluid mechanics in an integrated manner. A unified approach to energy transfer in thermal and mechanical systems is presented. The course covers properties of fluids with a focus on property tables. It covers work, heat and the basic laws of thermodynamics for closed and open steady state systems through the application of control volume techniques in engineering problems. Power systems are introduced through the study of the basic Rankine and Brayton cycles.

PREREQUISITES: CHEM 1022.03; MATH 1290.03

FORMATS: Lecture | Lab

ENGI 2103 Thermo-Fluid Engineering II

CREDIT HOURS: 3

This course builds on the fluid mechanics introduction presented in Thermo-fluids I to present engineering concepts of fluid mechanics and energy. The course covers dimensional analysis, completes fluid statics from Thermo-Fluids I, puts a large emphasis on the notion of control volume needed to properly solve thermal fluid problems using the conservation laws presented as integral relations, treats flow in ducts putting emphasis on head losses (friction and

minor) and presents a practical theory of turbomachinery. The different concepts studied during the course are brought together at the end in a series of design examples and design problems.

PREREQUISITES: ENGI 2102.03

FORMATS: Lecture | Lab

ENGI 2203 Engineering Design II

CREDIT HOURS: 3

This class provides a project-based exercise in the engineering design process. Students work in teams and as individuals on defined projects which apply knowledge and skills in all areas of engineering studied in semesters 1 to 3. The projects encompass the design method, conceptual design, design selection, detailed analysis, CAD and simulation tools, engineering drawings, safety and preparation of professional technical reports. Discipline-specific projects are assigned. All projects involve evaluation/testing of student designs, depending on the discipline section either through (i) construction and testing of a physical prototype or (ii) development and testing of an engineering simulation model.

PREREQUISITES: ENGI 1103.03, ENGI 1203.03, ENGM 1081.03, CPST 1103.015, CPST 1203.015

ENGI 2204 Mechanics of Materials

CREDIT HOURS: 3

This course teaches the fundamentals of stress, strain and deformation of a solid body subjected to static forces. Topics considered include; stresses and strains under axial, bending, torsional and combined loadings, transformation relations for stresses and strains, Mohr's circle and mechanical properties of materials.

PREREQUISITES: ENGI 1203.03, MATH 1290.03

FORMATS: Lecture | Lab

ENGI 2400 Mechanics II

CREDIT HOURS: 3

This second class in Engineering Mechanics considers the kinematics and kinetics of a single particle and a single rigid body. The class builds on the concepts introduced in ENGI 1400.03 (Mechanics I). Both vector and scalar methods are used. Topics include kinematics of a particle, kinetics of a particle, kinematics of a rigid body in plane motion, and planar kinetics of a rigid body.

PREREQUISITES: ENGM 1081.03; MATH 1290.03; PHYC 1190.03,1290.03

FORMATS: Lecture | Lab | Tutorial

ENGI 8890 Co-op Orientation and Job Competition Preparation

CREDIT HOURS: 0

This on-line course introduces aspects of career development including, self-assessment, resume and cover letter writing, interviewing skills and job search techniques. It provides students with an overview of the graduate attributes, the Pre-Grad EIT work credit, and co-op program policies and procedures. This class is available every term and is a pre-requisite for all engineering co-op classes. It must be completed one term prior to the first work term. The grade will be Pass/Fail.

Introduction

The Chemical Engineering program prepares students for careers in the chemical and process industries and in a variety of related fields. These encompass, among others, the traditional areas of environmental control, plastics and polymers, pulp and paper, instrumentation and process control, petrochemicals, petroleum and natural gas processing, and energy conversion and utilization, as well as the growing fields of biotechnology, food processing, composite materials, corrosion and protective coatings, and manufacture of microelectronic components.

The responsibilities assumed by Chemical Engineers include a wide range of activities such as research and development of novel products and processes, the design, development and operation of process plants, and management of technical operations and sales.

The curriculum is designed to provide the student with a broad background in the underlying sciences of Chemistry, Physics and Mathematics. This is then combined with a detailed knowledge of engineering principles and practice, along with a good appreciation of social and economic factors. Laboratory involvement is considered an important component of the students' education. Emphasis in the laboratory is placed on team work and on the development of problem-identification and problem-solving skills. The Department stresses the preparation of students for independent work and the development of interpersonal skills necessary for professional engineers.

Research opportunities leading to master's and doctoral degrees are offered in a wide range of topics within the Department as well as in conjunction with other departments and a number of research centres on the campus. Detailed information regarding the graduate program can be obtained from the Department.

Undergraduate students have the option of following a co-op program (five years) or a non-co-op program (four years). Additionally, Chemical Engineering students can pursue a [Certificate of Biomedical Engineering](#) alongside their regular degree requirements.

Curriculum and course descriptions

Refer to the Chemical Engineering curriculum and courses in the [Process Engineering and Applied Science section](#).

Co-operative program and schedule

Refer to section [Engineering Co-op Program](#), in the Engineering section.

Admissions

Admission requirements to the Chemical Engineering Program are those specified by the Faculty of Engineering.

Staff

Dean

Newhook, J., BEng, MAsC (TUNS), PhD (Dalhousie), PEng

Department Head, Process Engineering and Applied Science

Kuzak, S. G., BEng, MEng (McGill), PhD (TUNS), PEng

Undergraduate Program Co-ordinator

Brooks, M.S., BTech (Hons) (Massey), PhD(Cambridge), PEng

Civil and Resource Engineering

Location:

"D" Building
5268 DaCosta Row
Room D215
PO BOX 15000
Halifax NS
B3H 4R2

Phone Number: (902) 494-3960

Fax Number: (902) 494-3108

Email Address: civil.resource@dal.ca

Introduction

The Department of Civil and Resource Engineering consists of the Civil Engineering Program and Environmental Engineering Program. The Department currently offers two accredited professional degree programs:

BEng in Civil Engineering, co-op and non co-op programs, along with four certificate programs.

BEng in Environmental Engineering, co-op and non co-op programs.

For additional information on these programs and the nature of the engineering studies involved, the reader is referred to individual program listings in the Faculty of Engineering section of this calendar.

Staff

Dean

Newhook, J., BEng, MAsC (TUNS), PhD (Dalhousie), PEng

Department Head

Liu, Y., BScE, MScE (Xi'an), PhD (UNB), PEng

Professors

Ali, N. A., BSc (Baghdad), MSc, PhD (N Carolina State), PEng

El Nagggar, H., MSc, PhD (UWO), PEng

Gagnon, G. A., BScE (Guelph), PhD (Waterloo), PEng, Dean, Faculty of Architecture and Planning, Director, Centre for Water Resources

Garagash, D., BSc (Moscow), MSc, PhD (Minnesota), PEng - Co-op Advisor - MINE

Jamieson, R., BEng (TUNS), MAsC (Dalhousie), PhD (Guelph), PEng, Undergraduate Environmental Program Coordinator

Lake, C., BEng (TUNS), PhD (UWO), PEng, Undergraduate Civil Program Coordinator

Liu, L., BSc (Nankai), MSc (Peking), PhD (Regina), PEng - Co-op Advisor - CIVL & ENVE

Liu, Y., BScE, MScE (Xi'an), PhD (UNB), PEng

Newhook, J. P., BEng, MAsC, PhD (TUNS), PEng

Walsh, M. E., BEng (TUNS), MEng (McGill), PhD (Dalhousie), PEng

Zou, D. H., BSc (CUMT, China), PhD (UBC), PEng

Associate Professors

Bahrani, N., BSc (Azad Univ), MSc (Alberta), PhD (Laurentian), PEng, Graduate Coordinator

Corkum, A., BEng (TUNS), MEng, PhD (Alberta), PEng, Undergraduate Mineral Program Coordinator

Kurylyk, B., BSc, PhD (UNB), PEng

Sadeghian, P., BSc, MSc (Sharif), PhD (Amirkabir), PEng

Assistant Professors

Oudah, F., BSc (Sharjah) MSc, PhD (UC), PEng

Somers, L., BSc Eng (UNB), PhD (McGill)

Stoddart, A., BEng, PhD (Dalhousie), PEng

Tousignant, K., BAsC, PhD (UT), PEng

Instructors

Balideh, S., BSc (SUT), MSc (TMU), PhD (Alberta), PEng

Boutilier, L., BEng, PhD (Dalhousie), PEng

Cross-Appointed Faculty

Fenton, G.A., (From Engineering Mathematics) BEng, MEng (Carleton), MA, PhD (Princeton), PEng

Habib, M.A., (From the School of Planning) BURP, MURP, (BUET), MAsC, PhD (Toronto)

Price, G., (From Faculty of Agriculture) BSc, (UBC) MSc, PhD (Guelph)

Taheri, F., (From Department of Mechanical Engineering) BEng, MAsC, PhD (TUNS), PEng

Civil Engineering

Years 1 and 2 follow the program as outlined in the Faculty of Engineering section of this calendar. In Terms 7 and 8 students will have the opportunity to select technical elective courses based on their specific interests in Civil Engineering. Students may also choose to complete one of four certificate options available.

Non Co-op Program:

Year	Fall	Winter	Summer
1	Study Term 1	Study Term 2	FREE
2	Study Term 3	Study Term 4	FREE
3	Study Term 5	Study Term 6	FREE

4 Study Term 7 Study Term 8

Co-op Program:

Year	Fall	Winter	Summer
1	Study Term 1	Study Term 2	FREE
2	Study Term 3	Study Term 4	FREE
3	Study Term 5	Study Term 6	Work Term 1
4	Work Term 2	FREE	Work Term 3
5	Study Term 7	Study Term 8	

Civil Engineering

Term 5 (Fall)

- CIVL 3101.03: Soil Mechanics
- CIVL 3300.03: Hydraulics
- CIVL 3451.03: Water Quality & Treatment
- CIVL 3505.03: Structural Systems I-Form and Analysis
- CIVL 3705.03: Mechanics of Structural Materials & Components
- CIVL 3830.03: Surveying & Applied Geomatics

Term 6 (Winter)

- CIVL 3200.03: Transportation Engineering
- CIVL 3310.03: Engineering Hydrology
- CIVL 3515.03: Structural Systems II-Loads & Behaviour
- CIVL 3600.03: Sustainability Concepts for Civil and Environmental Engineers
- CIVL 3725.03: Construction Materials & Methods
- ENGM 3052.03: Applied Numerical Methods

Term 7 (Fall)

- CIVL 4111.03: Geotechnical Engineering
- CIVL 4401.03: Senior Project I
- CIVL 4515.03: Reinforced Concrete Design
- CIVL 4811.03: Project Management and Construction Planning
- Design Elective
- Technical Elective I

Term 8 (Winter)

- CIVL 4402.03: Senior Project II
- CIVL 4840.03: Professional Practice in Civil and Environmental Engineering
- Technical Elective II
- Technical Elective III
- Technical Elective IV

Design Electives:

- CIVL 4100.03: Earth Slopes and Embankments
- CIVL 4114.03: Applied Rock Mechanics
- CIVL 4250.03: Highway Engineering
- CIVL 4431.03: Water Distribution & Sewerage Systems
- CIVL 4525.03: Design of Steel Structures
- CIVL 4560.03: Special Topics in Structural Systems

- ENVE 4440.03: Water & Wastewater Treatment
- ENVE 4460.03: Solid Waste & Landfill Engineering

Technical Electives:

- CIVL 4100.03: Earth Slopes and Embankments
- CIVL 4113.03: Rock Slope Engineering
- CIVL 4114.03: Applied Rock Mechanics
- CIVL 4250.03: Highway Engineering
- CIVL 4350.03: Hydraulic Engineering
- CIVL 4359.03: Form & Process in Alluvial Channels
- CIVL 4431.03: Water Distribution & Sewerage Systems
- CIVL 4525.03: Design of Steel Structures
- CIVL 4542.03: Applications of Finite Element Method in Structural Engineering
- CIVL 4550.03: Timber Design
- CIVL 4560.03: Special Topics in Structural Systems
- CIVL 4816.03: Civil Engineering Research Project
- ENGM 4675.03: Risk Assessment Management
- ENVE 4000.03: Small Watershed Hydrology
- ENVE 4201.03: Biological Treatment Processes
- ENVE 4410.03: Engineering Hydrogeology
- ENVE 4440.03: Water & Wastewater Treatment
- ENVE 4460.03: Solid Waste & Landfill Engineering
- ENVE 4641.03: Contaminant Fate & Transport
- ENVE 4772.03: Environmental Assessment & Management
- MINE 4801.03: Advanced Topics in Rock Mechanics

NOTES:

1. Students must take at least one design elective from the list provided.
2. Design electives can be interchanged with technical electives in the fall/winter terms.
3. Any other course, not listed in the technical elective list, requires Departmental approval.
4. Not all technical elective courses will be offered each year.
5. Many courses have pre-requisites (see section IV following). However, if you feel an equivalent course of study has been completed, a waiver of the pre-requisite requirement can be sought from the instructor.
6. Some courses have co-requisites. A co-requisite can also be completed before the course in question (instead of being completed concurrently).
7. One or more graduate courses may be included as technical electives in Term 8; however, permission of the instructor and department is required. Students require a 3.30 cumulative GPA to take a graduate level course. The Graduate Studies Pass Standards will be applied to any student taking a graduate level course.

The Department of Civil and Resource Engineering offers four Certificate options within the Civil Engineering Program.

Each certificate will provide students enrolled in the Civil Engineering Program at Dalhousie University the opportunity to gain formal recognition of their choice of electives related to the specific area. Students will gain specialty knowledge in this sub-discipline and receive a certificate upon graduation that will allow them to easily demonstrate to potential employers both competence and breadth in this sub-discipline.

Certificate in Environmental Engineering
Requirements

Students must complete the following courses:

- ENVE 4440.03: Water and Wastewater Treatment
- ENVE 4772.03: Environmental Assessment and Management
- CIVL 4401.03: Senior Project I (environmental-based project required)
- CIVL 4402.03: Senior Project II (environmental-based project required)

Students must complete at least two of the following courses:

- ENVE 4201.03: Biological Treatment Processes
- ENVE 4460.03: Solid Waste and Landfill Engineering
- ENVE 4641.03: Contaminant Fate and Transport

Certificate in Geotechnical Engineering

Requirements

Students must complete the following courses:

- CIVL 4114.03: Structural Geology and Rock Mechanics
- CIVL 4100.03: Earth Slopes and Embankments
- CIVL 4111.03: Geotechnical Engineering
- CIVL 4401.03: Senior Project I (geotechnical-based project required)
- CIVL 4402.03: Senior Project II (geotechnical-based project required)

Students must complete at least one of the following courses:

- ENVE 4410.03: Engineering Hydrogeology
- CIVL 4113.03: Rock Slope Engineering
- MINE 4801.03: Advanced Topics in Rock Mechanics

Certificate in Structural Engineering

Requirements

Students must complete the following courses:

- CIVL 4540.03: Timber Design
- CIVL 4542.03: Applications of Finite Element Method in Structural Engineering
- CIVL 4525.03: Steel Structures
- CIVL 4560.03: Special Topics in Structural Systems
- CIVL 4401.03: Senior Project I (structural-based project required)
- CIVL 4402.03: Senior Project II (structural-based project required)

Certificate in Water Resources Engineering

Requirements

Students must complete the following courses:

- ENVE 4410.03: Engineering Hydrogeology
- CIVL 4401.03: Senior Project I (water resource-based project required)
- CIVL 4402.03: Senior Project II (water resource-based project required)

Students must complete at least three of the following courses:

- CIVL 4431.03: Water Distribution and Sewerage Systems
- CIVL 4350.03 Hydraulic Engineering
- CIVL 4359.03: Form and Process in Alluvial Channels
- ENVE 4000.03: Small Watershed Hydrology

Additional requirements for all certificates:

Students must complete the Bachelor of Civil Engineering degree requirements to be eligible for the certificate.

Environmental Engineering

Years 1 and 2 follow the program as outlined in the Faculty of Engineering section of this calendar. In Terms 7 and 8 students will have the opportunity to select technical elective courses based on their specific interests in Environmental Engineering.

Non Co-op Program:

Year	Fall	Winter	Summer
1	Study Term 1	Study Term 2	FREE
2	Study Term 3	Study Term 4	FREE
3	Study Term 5	Study Term 6	FREE

Co-op Program:

Year	Fall	Winter	Summer
1	Study Term 1	Study Term 2	FREE
2	Study Term 3	Study Term 4	FREE
3	Study Term 5	Study Term 6	Work Term 1
4	Work Term 2	FREE	Work Term 3
5	Study Term 7	Study Term 8	

Term 5 (Fall)

- ENVE 3251.03: Environmental & Industrial Microbiology
- ENVE 3461.03: Environmental Measurements and Analysis
- CIVL 3101.03: Soil Mechanics
- CIVL 3300.03: Hydraulics
- CIVL 3451.03 Water Quality & Treatment
- CIVL 3830.03 Surveying & Applied Geomatics

Term 6 (Winter)

- ENVE 3500.03: Air Quality
- ENVE 4410.03: Engineering Hydrogeology
- CIVL 3310.03: Engineering Hydrology
- CIVL 3600.03: Sustainability Concepts for Civil and Environmental Engineers
- ENGM 3052.03: Applied Numerical Methods
- LAWS 2800.03: Intro to Environmental Law

Term 7 (Fall)

- ENVE 4401.03: Design Project for Environmental Engineering
- ENVE 4440.03: Water & Wastewater Treatment
- ENVE 4641.03 Contaminant Fate and Transport
- ENVE 4772.03: Environmental Assessment & Management
- CIVL 4811.03: Project Management and Construction Planning
- Technical Elective I

Term 8 (Winter)

- ENVE 4402.03: Design Project for Environmental Engineering II
- ENVE 4460.03: Solid Waste & Landfill Engineering
- CIVL 4840.03: Professional Practice in Civil and Environmental Engineering
- Design Elective
- Technical Elective II

Technical Electives:

- ENVE 4000.03: Small Watershed Hydrology
- ENVE 4186.03: Environmental Engineering Research Project
- ENVE 4201.03: Biological Treatment Processes
- CIVL 4100.03: Earth Slopes and Embankments
- CIVL 4111.03: Geotechnical Engineering
- CIVL 4114.03: Applied Rock Mechanics
- CIVL 4350.03: Hydraulic Engineering
- CIVL 4359.03: Form and Process in Alluvial Channels
- CIVL 4431.03: Water Distribution & Sewerage Systems
- CHEE 3560.03: Green Engineering

- ENGM 4675.03: Risk Assessment
- ENV5 3601.03: Global Biogeochemical Cycles
- ENV5 3702.03: Sustainable Industries
- ENV5 4004.03: Pathways to Sustainable Energy
- EARTH 3440.03: Geomorphology
- EARTH 3500.03: Geoscience Information Management
- OCEA 3420.03: Geochemistry of Aquatic Environments

Design Electives:

- CIVL 4100.03: Earth Slopes and Embankments
- CIVL 4111.03: Geotechnical Engineering
- CIVL 4114.03: Applied Rock Mechanics
- CIVL 4350.03: Hydraulic Engineering
- CIVL 4359.03: Form & Process in Alluvial Channels
- CIVL 4431.03: Water Distribution & Sewerage Systems

NOTES:

1. Students must take at least one design elective from the list provided.
2. Design electives can be interchanged with technical electives in the fall/winter terms.
3. Any other course, not listed above for technical electives, requires the Department approval.
4. Not all of the technical elective courses will be offered each year.
5. Many courses have pre-requisites (see section IV following). If it is felt, however, that an equivalent course of study has been taken, a waiver of the pre-requisite requirement can be sought from the instructor.
6. Some courses have co-requisites. A co-requisite can also be completed before the course in question (instead of being done concurrently).
7. One or more graduate courses may be included as technical electives in Term 8; however, permission of the instructor and department is required. Students require a 3.30 cumulative GPA to take a graduate level course. The Graduate Studies Pass Standards will be applied to any student taking a graduate level course.
8. The courses listed are approved as technical electives. For non ENVE and CIVL courses, the department has no control over scheduling and offering of these courses.

Mineral Resource Engineering

Note: New admissions to the Bachelor of Engineering program in Mineral Resource Engineering are suspended. This Program will continue to be delivered to any admitted students until all students have graduated or the time allowed for program completion has elapsed. Any student that is dismissed or voluntarily leaves the program during this time will not be readmitted to the program.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions - Civil Engineering Series

CIVL 2200 Introductory Geology for Engineers

CREDIT HOURS: 3

This course deals with the fundamental principles of geology. Topics include mineralogy, rock-forming processes, weathering, erosion, groundwater,

glaciating, mass wasting, running water, deserts, shorelines, geologic structures, tectonism, and Earth's interior. The links between geology, engineering and the environment are explored through case studies. Laboratory exercises covering the identification and interpretation on minerals, rocks, landforms (using topographic maps and remote sensing images) and geologic map structures are an important part of the class.

EXCLUSIONS: MINE2200, EARTH1080, EARTH1090, EARTH1091

FORMATS: Lab

CIVL 3101 Soil Mechanics I

CREDIT HOURS: 3

This course is concerned with the physical and mechanical properties of soils. It includes topics of soil chemistry and soil fabric, soil classification, compaction, hydraulic conductivity, one-dimensional and two-dimensional seepage, soil compressibility, time dependant deformation of soils, and shear strength behaviour of soils. Laboratory sessions involve experimentally evaluating the engineering properties of several different soil types and the application of these results to engineering problems.

FORMATS: Lecture | Lab | Tutorial

CIVL 3200 Transportation Engineering

CREDIT HOURS: 3

This course commences with an introduction to Transportation Engineering in the context of planning, design and operations of urban and rural systems. The course also provides an introduction to route location with special emphasis on Canadian standards and specifications. It also includes detailed study of road design elements, vehicle motion, vehicle/pavement interaction, and principles of roadway capacity.

PREREQUISITES: CIVL 3830.03

FORMATS: Lecture | Lab

CIVL 3300 Hydraulics

CREDIT HOURS: 3

Fluid mechanics principles are applied to practical hydraulic problems involving flow in closed conduits and in open channels. Topics in pipe flow include losses in pipes, pipes in series and parallel, and network analysis. Topics in open channel flow deal with classification of flows, open channels and their properties, energy and momentum principles, uniform flow, design of erodible and non-erodible channels, and gradually varied flow. These aspects are explained in lectures and validated by laboratory measurements and demonstrations.

FORMATS: Lecture | Lab

CIVL 3310 Engineering Hydrology

CREDIT HOURS: 3

The emphasis in this course is on quantitatively describing the relevant physical processes. These include precipitation, evapotranspiration, infiltration, percolation, groundwater movement, surface runoff, and the behaviour of lakes. A hydrologic model based on split unit-hydrographs is developed, and by paired convolution is used to produce an outflow hydrograph. Statistical hydrology, snow hydrology, and the size of engineered detention ponds are also quantitatively considered. A laboratory experiment on infiltration is performed.

PREREQUISITES: CIVL 3300.03

FORMATS: Lecture | Lab

CIVL 3451 Water Quality and Treatment

CREDIT HOURS: 3

The course expands on the student's previous experience in aqueous chemistry and fluid mechanics. The course provides an Engineering perspective on: (i) water quality analysis, specifically on the physical, chemical and biological characteristics of water; (ii) significance and interpretation of water quality properties; (iii) modeling water quality in natural and engineered systems; and (iv) water treatment systems at the introductory level.

EXCLUSIONS: PEAS 2202

FORMATS: Lecture | Lab | Tutorial

CIVL 3505 Structural Systems I: Form and Analysis

CREDIT HOURS: 3

This course begins with a review of the analysis of trusses and shear and moment in beams. Majority of the course covers the calculation of elastic deformations for statically determinate structures and various methods for analyzing statically indeterminate structures focusing on slope deflection method and moment distribution method. The application of matrix analysis in computer modeling using a typical commercially available structural analysis program will be introduced. Also the concept of influence lines for moving loads on statically determinate structures will be discussed.

FORMATS: Lecture | Tutorial

CIVL 3515 Structural Systems II: Loads and Behaviour

CREDIT HOURS: 3

The objective of the course is to provide students with a solid background in the fundamentals of structural design used for typical civil engineering structures such as trusses, building frames and floor systems. The background and application of the National Building Code of Canada provisions for structural design will be emphasized. The student will be able to size basic tension, compression and flexural elements using steel, concrete and timber, for representative structures.

COREQUISITES: CIVL 3725.03

PREREQUISITES: CIVL 3505.03, CIVL 3705.03

FORMATS: Lecture | Lab

CIVL 3600 Sustainability Concepts for Civil and Environmental Engineers

CREDIT HOURS: 3

The objective of this course is to introduce key sustainability concepts required for Civil and Environmental Engineers to consider for decision making for potential future developments. Life cycle assessment (LCA) and sustainable development certification systems, such as Leadership in Energy and Environmental Design (LEED) will be featured, as they relate to Engineers Canada sustainable development guidelines. The format will include lectures, seminars, discussion and guest speakers.

PREREQUISITES: CIVL 3451.03

EXCLUSIONS: CPST 3030.03

FORMATS: Lecture | Tutorial

CIVL 3705 Mechanics of Structural Materials and Components

CREDIT HOURS: 3

The content is focused on the application of the principles of the mechanics of solids in the design and analysis of structural materials and components. Building on engineering skills gained in the first two years, the class will examine general stress analysis, failure criteria, flexure, shear, torsion, compression buckling and plasticity as these aspects apply to structural components constructed of timber, steel, concrete and fibre-reinforced polymers.

FORMATS: Lecture | Lab | Tutorial

CIVL 3725 Construction Materials and Methods

CREDIT HOURS: 3

The purpose of this course is to provide students with knowledge of residential and commercial building techniques and materials. In it, the properties and applications of common construction materials, components, and systems that relate to wood, steel, and concrete-frame structures are examined.

FORMATS: Lecture | Lab

CIVL 3830 Surveying and Applied Geomatics

CREDIT HOURS: 3

An introduction to the principles, calculations and equipment used in surveying and geomatics is presented with focus on their applications to civil and mineral resource engineering. Topics include fundamentals of distance measurement and surveying, leveling, traverses, corrections, GPS and Total Station instruments, coordinate systems and geodetic reductions, Geographic Information Systems, and engineering applications of geomatics with particular focus on common civil engineering and mining construction activities. Laboratory exercises will cover the basics of surveying techniques, building up to an exercise in combining a measured GPS data set to a pre-existing GIS database for engineering design considerations of a facility.

EXCLUSIONS: CIVL 0124 and CIVL 4830

FORMATS: Lecture | Lab | Tutorial

CIVL 4100 Earth Slopes/Embankments

CREDIT HOURS: 3

The focus of this class is the practical application of soil mechanics theory to soil slope stability issues in civil and mining engineering. Methods for soil slope stability analysis of natural slopes, cuts, embankments and, earth and tailings dams are presented. The effects of porewater pressures, and earthquake loadings are considered, as well as stabilization methods for slopes. Seepage through small earth dams, together with measures to control seepage, is considered. The class is focused primarily on the mining environment; however, the concepts are also directly applicable to civil engineering practice. The major topics covered include: soil mechanics and seepage applied to slope stability, modes of slope instability, methods of slope stability evaluation, remediation of unstable slopes, and soil embankments and small dams (tailings).

PREREQUISITES: CIVL 3101.03

FORMATS: Lecture | Tutorial

CIVL 4111 Geotechnical Engineering

CREDIT HOURS: 3

This course is concerned with the geotechnical aspects of temporary and permanent retaining walls for infrastructure or environmental works, deep and

shallow foundations, soil-pipeline interaction, and design/analysis of natural cuts, embankments, and earth dams. The application of these design/analyses to particular infrastructure and environmental structures are emphasized in the laboratory sessions.

PREREQUISITES: CIVL 3101.03

FORMATS: Lecture | Tutorial

CIVL 4112 Structural Geology and Rock Mechanics

CREDIT HOURS: 3

Students will learn about rock structures at different scales as well as deformation and different stress regimes in the lithosphere. Laboratory properties of intact rocks, theoretical and empirical rock failure criteria, engineering rock classifications and their applications for estimating mechanical properties of jointed rock masses and excavation designs are discussed. Laboratories will identify, measure, and describe geological structures, interpret geological maps and explore fundamental concepts of rock mechanics.

PREREQUISITES: MINE 2200.03; CIVL 3101.03

EXCLUSIONS: MINE 3611.03

FORMATS: Lecture | Lab | Tutorial

CIVL 4113 Rock Slope Engineering

CREDIT HOURS: 3

Students will learn to design rock slopes for surface mines, roadway cuts, and foundation excavations. Different topics covered in this course include site investigation and geological data collection, stereographic projection, ground support, anchorage testing techniques, rock fall analysis and mitigation, deterministic and probabilistic rock slope design methods, blast design for surface excavations and ground vibration analysis. Different approaches for rock slope analyses, such as planar, circular, wedge, toppling, buckling, and ploughing failure are discussed.

PREREQUISITES: CIVL 4112

EXCLUSIONS: MINE 4820

FORMATS: Tutorial

CIVL 4114 Applied Rock Mechanics

CREDIT HOURS: 3

Students will learn about the design of surface and underground excavations. Laboratory properties of intact rocks, theoretical and empirical rock failure criteria, engineering rock classifications and their applications for estimating mechanical properties of jointed rock masses and support design will be discussed. Laboratories will identify, measure, and describe geological structures, interpret geological maps and explore fundamental concepts of rock mechanics. Commercial software programs will be used to design ground support for surface and underground excavations.

PREREQUISITES: MINE 2200.03; CIVL 3101.03

EXCLUSIONS: MINE 3611.03; CIVL 4112

FORMATS: Lecture | Lab | Tutorial

CIVL 4200 Transportation Systems

CREDIT HOURS: 3

This course covers urban transportation planning, transportation demand and supply, transportation management. The environmental impact of transportation systems such as noise and air pollution will be examined. Methods to measure, predict, and evaluate impact of transportation modes will be covered.

PREREQUISITES: CIVL 3200.03

FORMATS: Lecture | Tutorial

CIVL 4250 Highway Engineering

CREDIT HOURS: 3

This course provides introduction to route location with special emphasis on Canadian standards and road design elements. It includes a surveying workshop. The purpose of workshop is to expose students to operation and application of surveying instrumentation. It includes topics of vertical and horizontal curves, roadway design elements and classification, alignment and cross section elements, drainage and earthwork operations, highways materials and pavement design.

PREREQUISITES: CIVL 3200.03

FORMATS: Lecture | Tutorial

CIVL 4350 Hydraulic Engineering

CREDIT HOURS: 3

This course deals with the application of hydraulics in civil engineering design. The topics include design of culvert systems, storage dams (gravity dams, arch dams, buttress dams, earth dams and rock-fill dams), overflow and chute spillways with emphasis on design of stilling basins. Hydraulic machinery (pumps and turbines) will be discussed with an emphasis on the selection a machine for a given application. Design of single port and multi-port outfall structures for effluent disposal in rivers and in oceans will also be discussed. Regular lectures and tutorial sessions will be supplemented with expert speakers

from the industry and field trips.
PREREQUISITES: CIVL 3300.03
FORMATS: Lecture | Tutorial

CIVL 4359 Form and Process in Alluvial Channels

CREDIT HOURS: 3

This course will consider various aspects of fluvial geomorphology from a civil engineering point-of-view. This will include discussion of hydraulic resistance based on quantitative estimates of channel roughness, regime concepts for artificial and natural rivers, uses of boundary shear stress and unit stream power in bed-load estimations, the hydraulics and statistics of suspended sediment, numerical versus physical modelling, and a review of case histories of responses of rivers to human activity. The hydraulics of fish habitat assessment is also considered. The application of HEC RAS to a bridged brook is done as a group project.

PREREQUISITES: CIVL 3300.03 and CIVL 3310.03 (minimum), CIVL 4350.03 (preferable)

CROSSLISTED: CIVL 6159.03

EXCLUSIONS: CIVL 6159.03

FORMATS: Lecture | Tutorial

CIVL 4401 Senior Project I

CREDIT HOURS: 3

This course develops the senior project required for CIVL 4402. Topics include introduction to potential senior project topics, case studies of design projects by industry representatives, client meetings to discuss project scopes, project management of design projects, team building, and report writing and oral presentation requirements for various deliverables of CIVL 4401 and CIVL 4402. The deliverable for this course, a formal proposal, must be prepared to a professional standard of engineering practice. Students are also expected to formally present their proposal to the class and faculty.

PREREQUISITES: CIVL 3101.03, CIVL 3300.03, CIVL 3451.03, CIVL 3505.03, CIVL3600.03, CIVL 3705.03, CIVL 3830.03, CIVL 3200.03, CIVL 3310.03, CIVL3515.03, CIVL 3725.03, ENGM 3052.03 or seek approval from the Department of Civil and Resource Engineering.

EXCLUSIONS: CIVL 4702.03

FORMATS: Lecture

CIVL 4402 Senior Project II

CREDIT HOURS: 3

The objective of this course is to provide experience in the application of engineering principles to the solution of specific problems in Civil Engineering. Under the supervision of a faculty member, students execute a project that may include laboratory and/or field experiments, design work, numerical simulations, technical communications on state-of-the-art technologies, or analysis of case histories. Students prepare a formal report according to faculty standards for report preparation and make an oral presentation of their project.

PREREQUISITES: CIVL 4401.03

EXCLUSIONS: CIVL 4703.03

FORMATS: Lecture

CIVL 4431 Water Distribution and Sewerage Systems

CREDIT HOURS: 3

This design-oriented introduction to municipal engineering is concerned with the hydraulic and hydrologic basis for our water-related urban infrastructure. Specifically, the design of potable water distribution systems, wastewater collection systems, and storm water management systems is presented. The minimization of the environmental impacts associated with the construction of a subdivision is also presented, both qualitatively and quantitatively.

PREREQUISITES: CIVL 3300.03, CIVL 3310.03

FORMATS: Lecture | Tutorial

CIVL 4515 Reinforced Concrete Design

CREDIT HOURS: 3

This course will provide students with a basic understanding of the behaviour and analysis of reinforced concrete as a structural material, elementary skills and concepts necessary for designing a variety of common structural elements, and appropriate analysis techniques and code approximations. Current design code provisions related to flexure, shear and compression members will be reviewed leading to practical design examples for one-way floor systems, columns, footings, and cantilever retaining walls.

PREREQUISITES: CIVL 3515.03

FORMATS: Lecture | Tutorial

CIVL 4525 Design of Steel Structures

CREDIT HOURS: 3

This introductory design course emphasizes the behaviour and design of steel members resisting tensile, compressive, and flexural loads and simple

connections of these elements. Members subject to combined loading will also be studied. Upon course completion, the student will be able to design building elements to CSA-S16.1-01. Although most design examples will be based on framed buildings, many of the concepts apply equally to other types of structures; e.g. bridges, towers, and submarine hulls.

PREREQUISITES: CIVL 3515.03

FORMATS: Lecture | Tutorial

CIVL 4542 Applications of Finite Element Method in Structural Engineering

CREDIT HOURS: 3

This introductory course will provide students with basic understanding of the finite element method and its application in structural engineering. An overview of the FE theory is presented followed by providing the students with hands on experience in developing, validating, and analyzing models for basic structural systems using commercial FE software. Advanced topics in FE will be also introduced including structural dynamics and optimization.

PREREQUISITES: CIVL 3515.03, CIVL 3705.03, CIVL3740.03 or ENGM 3052.03

EXCLUSIONS: CIVL4541

FORMATS: Lecture | Lab

CIVL 4550 Timber Design

CREDIT HOURS: 3

This course presents the fundamentals of timber engineering. Topics covered include physical and mechanical properties of wood, structural timber products, and the design of structural timber members, including tension and compression members, flexural members, connections, and lateral load resisting elements.

PREREQUISITES: CIVL 4525

EXCLUSIONS: CIVL 4530

FORMATS: Lecture | Tutorial

CIVL 4560 Special Topics in Structural Systems

CREDIT HOURS: 3

Basic knowledge acquired from introductory design courses will be extended and synthesized in the analysis and design of aggregate systems including two-way concrete floor systems, pre-stressed concrete girders, and composite systems incorporating concrete and steel materials. Basic engineering concepts in the design of masonry structures will be introduced and extended to the design of masonry beams, columns, walls and building systems.

PREREQUISITES: CIVL 3515.03, CIVL 4515.03

FORMATS: Lecture | Tutorial

CIVL 4811 Project Management and Construction Planning

CREDIT HOURS: 3

This course deals with project management, construction administration, bidding procedures, cost controls, planning and execution of Civil and Environmental infrastructure projects. The course also covers planning and scheduling techniques such as MS Project, CPM and PERT. The course also presents basic methods of estimation for infrastructure projects plus emerging technologies relevant to the construction industry.

PREREQUISITES: CIVL 3725.03

EXCLUSIONS: CIVL 4711.02

FORMATS: Lecture | Tutorial

CIVL 4816 Civil Engineering Research Project

CREDIT HOURS: 3

The project allows interested students to carry out supervised research on a suitable topic. The research topic must consist of an original research idea and/or novel application of existing technology. The student must obtain prior approval from a faculty member to act as project supervisor. In addition, the student must obtain approval of the undergraduate coordinator of the department by submitting an outline of the proposed project. The student is required to submit a detailed technical report on the research topic, of appropriate length and format, for assessment. Students must have a cumulative GPA of at least 3.3 at the end of term 6 to be considered for this course.

CALENDAR NOTES: Students to contact the Civil and Resource Engineering Department for registration instructions, as registration is to be completed by override only.

EXCLUSIONS: MINE 4816

FORMATS: Lab

CIVL 4840 Professional Practice in Civil and Environmental Engineering

CREDIT HOURS: 3

This course is designed to provide Civil and Environmental Engineering students with knowledge related to professional practice in Civil and Environmental Engineering. The course is designed to incorporate elements of Engineers Canada National Professional Practice Exam. Lectures and case studies will be used to discuss topics such as professionalism in Civil and Environmental Engineering, ethics, professional practice, law and safety. Oral and written

communication skills will be emphasized through report writing, essays, and presentations.
EXCLUSIONS: CPST 3030.03; CILV 3840.03
FORMATS: Lecture

Course Descriptions - Environmental Engineering Series

ENVE 3251 Environmental and Industrial Microbiology

CREDIT HOURS: 3

The principles of microbial communities are applied to biological systems. Emphasis is placed on microbial populations in air, soil and water. Further investigation includes microorganisms found in food, aquaculture and mining industries. Applications of microbial ecology to agriculture, industry, biotechnology and environment are examined.

FORMATS: Lecture | Lab

ENVE 3452 Soil and Water Conservation Engineering

CREDIT HOURS: 3

The prediction, nature, effects and control of natural surface and sub-surface waters and non-point source pollutants in catchments are considered. Design flood hydrograph, flood routing, porous media flow and soil erosion prediction techniques are presented. Energy dissipating structures used to control flood flows which are discussed include terraces, chutes, drop inlets, grassed waterways, culverts and small earth dams. An earth dam design project extends over the course duration.

FORMATS: Lecture | Lab

ENVE 3461 Environmental Measurement and Analysis

CREDIT HOURS: 3

This course will cover the fundamentals of characterizing and monitoring processes within environmental systems through measurement and analysis. The course will begin with an overview of transducers and the various types of sensors and data acquisition systems typically used in environmental monitoring. Students will learn how to properly measure fluid flow processes and sample for contaminants within surface water and ground water. In addition, the measurement and analysis of contaminants in soil and atmospheric media will be covered. Data presentation and the use of geographical information systems (GIS) and global positioning systems (GPS) will also be covered. Students will gain hands-on experience using environmental monitoring equipment and instrumental methods of analysis during field and laboratory classes. Students taking this class as a core course will be expected to attend a two-day surveying field camp on the Sexton Campus over the first weekend of term.

FORMATS: Lecture | Lab

ENVE 3500 Air Quality

CREDIT HOURS: 3

This course covers sources, the impact on health and the environment, atmospheric chemistry, fate and transport and the measurement and modeling of atmospheric pollutants. The application of regulatory computer models to air quality case studies will be demonstrated in laboratory classes. In addition, field and laboratory classes will provide hands on experience of measuring and characterizing air pollutants. Problem solving sessions are used to illustrate the application of meteorology, measurements and models to determine the sources and impact of air pollutants at various receptors found both outdoors and indoors.

EXCLUSIONS: ENVE 4621.03

FORMATS: Lecture | Lab

ENVE 4000 Small Watershed Hydrology

CREDIT HOURS: 3

Following an overview of the nature of hydraulic data and models, emphasis is placed on deterministic mathematical modelling of component processes and the synthesis of complete hydrographs. Components examined include precipitation, infiltration, evapotranspiration, surface and subsurface flow. The structure and application of selected current models are presented.

PREREQUISITES: A first class in engineering hydrology and microcomputer experience

EXCLUSIONS: CIVL 6001

FORMATS: Lecture | Lab

ENVE 4123 Environmental Biotechnology

CREDIT HOURS: 3

This course outlines the principles and applications of environmental biotechnology. Quantitative tools for describing microbial stoichiometry and kinetics will be examined and related to reactors of interest to environmental engineering. Applications of biological treatment processes will be studied and may include the activated sludge process, lagoons, anaerobic treatment and bioremediation.

PREREQUISITES: ENVE 3251
EXCLUSIONS: ENVE 3432
FORMATS: Lecture | Tutorial

ENVE 4186 Environmental Engineering Research Project

CREDIT HOURS: 3

The project allows interested students to carry out supervised research on a suitable topic. The research topic must consist of an original research idea and/or novel application of existing technology. The student must obtain prior approval from a faculty member to act as project supervisor. In addition, the student must obtain approval of the undergraduate coordinator of the department by submitting an outline of the proposed project. The student is required to submit a detailed technical report on the research topic, of appropriate length and format, for assessment. Students must have a cumulative GPA of at least 3.3 at the end of term 6 to be considered for this course.

EXCLUSIONS: CIVL 4816.03
FORMATS: Lab

ENVE 4201 Biological Treatment Processes

CREDIT HOURS: 3

This course presents the fundamentals and applications of biological treatment processes for water and wastewater treatment. The principles of attached-growth processes and suspended growth processes are presented. Fundamentals of applied environmental microbiology, biochemistry and microbial ecology and their role in biological water and wastewater treatment processes design and operation are presented.

PREREQUISITES: CIVL 3451.03, CIVL 4440.03
FORMATS: Lecture | Tutorial

ENVE 4342 Industrial Biotechnology

CREDIT HOURS: 3

This class introduces students to industrial applications of biotechnology. Basic biochemistry and molecular biology are covered in addition to stoichiometry and kinetics for bioprocesses. Modern tools and approaches of biotechnology are presented, followed by application of biotechnology to diverse areas (e.g. the environment, medicine, agriculture, pharmaceutical and food processing industries). This class is suitable for engineering/science students who may wish to pursue employment in the biotechnology sector with little/no prior knowledge of biotechnology or genetic engineering.

ENVE 4401 Design Project for Environmental Engineers I

CREDIT HOURS: 3

This course develops the senior project required for ENVE 4402. Topics include introduction to potential senior project topics, case studies of design projects by industry representatives, client meetings to discuss project scopes, project management of design projects, team building, and report writing and oral presentation requirements for various deliverables of ENVE 4401 and ENVE 4402. The deliverable for this course, a formal proposal, must be prepared to a professional standard of engineering practice. Students are also expected to formally present their proposal to the class and faculty.

PREREQUISITES: Senior students only
CROSSLISTED: CIVL 4401.03
EXCLUSIONS: CIVL 4702.02
FORMATS: Lecture | Tutorial

ENVE 4402 Design Project for Environmental Engineers II

CREDIT HOURS: 3

This is a continuation of ENVE 4401 leading to a final presentation in both oral and written format. The objective of the course is to provide students with first hand experience in applying engineering design principles, biogeochemical analyses and environmental assessment techniques to the solution of specific environmental problems related to air, soil and water pollution control. Students are expected to display a high level of initiative and ingenuity in carrying out the project.

PREREQUISITES: ENVE 4401.03
CROSSLISTED: CIVL 4402.03
EXCLUSIONS: CIVL 4703.03
FORMATS: Lecture | Tutorial

ENVE 4410 Engineering Hydrogeology

CREDIT HOURS: 3

This quantitative introduction to groundwater engineering covers fundamental hydrogeology topics, including: saturated and unsaturated groundwater flow through porous media and fractured rock, groundwater flow equation solutions, well hydraulics and design, pumping test analysis, groundwater-surface water interactions, and subsurface contaminant transport and attenuation. Course content is addressed in the context of groundwater resources management.

PREREQUISITES: CIVL 3101.03

EXCLUSIONS: CIVL 4410.03
FORMATS: Lecture | Tutorial

ENVE 4440 Water and Wastewater Treatment

CREDIT HOURS: 3

The focus of the course is on design of water treatment and municipal pollution control plants. Lectures and laboratory periods are on physical chemical and microbiological qualities of water and municipal wastewater. Lectures include various unit operations and unit processes of water and domestic wastewater treatment. Field visits to local and water and wastewater treatment plants are included.

PREREQUISITES: CIVL 3451.03

EXCLUSIONS: CIVL 4440.03

FORMATS: Lecture | Lab | Tutorial

ENVE 4460 Solid Waste Management

CREDIT HOURS: 3

This course provides the students with an understanding of the types of solid waste generation, physical and chemical properties of solid waste, solid waste treatment and disposal alternatives, design and operation of a landfill (including landfill components and configuration, landfill siting, liner system, leachate control and treatment, and gas collection and control system).

PREREQUISITES: CIVL 3101.03, CIVL 3451.03

EXCLUSIONS: CIVL 4460.03

FORMATS: Lecture | Lab | Tutorial

ENVE 4641 Contaminant Fate and Transport

CREDIT HOURS: 3

This course focuses on the quantitative analysis of mechanisms that control the fate and transport of contaminants in the environment. The occurrence, movement, and transformation of contaminants in a variety of environmental media, including surface waters, terrestrial environments, and the atmosphere are covered. A 3-d field lab will be held at the beginning of the semester, in which students will gain experience in: (i) sampling environmental media, and (ii) characterizing transport processes in terrestrial and aquatic environments.

PREREQUISITES: ENVE 3452.03/CIVL 3310.03, PEAS 2202.03/CIVL 3450.03, ENGM 3052.03/CIVL 4720.03

FORMATS: Lecture | Lab

ENVE 4772 Environmental Assessment and Management

CREDIT HOURS: 3

This course examines the ecological impacts of human activities with regard to water, air and soil pollution. Ecological theory and practice are reviewed and methods of environmental regulation and management considered in the light of the concepts of sustainability and maintenance of biodiversity. Lectures will include presentations by government and corporate regulators and managers. Tutorials will be devoted to the preparation and presentation of hypothetical environmental impact statements and assessments.

FORMATS: Lecture | Tutorial

Course Descriptions - Mineral Resource Engineering Series

MINE 2200 Introductory Geology for Engineers

CREDIT HOURS: 3

This course deals with the fundamental principles of geology. Topics include mineralogy, rock-forming processes, weathering, erosion, groundwater, glaciating, mass wasting, running water, deserts, shorelines, geologic structures, tectonism, and Earth's interior. The links between geology, engineering and the environment are explored through case studies. Laboratory exercises covering the identification and interpretation on minerals, rocks, landforms (using topographic maps and remote sensing images) and geologic map structures are an important part of the class.

EXCLUSIONS: MINE 3500.03, EARTH 1080.03 and EARTH 1090.03

Introduction

Civil engineering deals with the design, construction, and maintenance of the infrastructure for human civilization. Civil engineers are engaged in addressing two fundamental questions. First, how do we protect our society and its infrastructure from the impacts of the natural environment? Second, what are the impacts of society and its infrastructure on our natural environment? The infrastructure considered may be at the feasibility or the design stage, or already in existence.

First, humans need protection from the elements to thrive on this planet. With the growth of centers of population and highly organized societies, the need for very diverse kinds of ‘shelter’ has also dramatically increased – now routinely including hospitals, schools, skyscrapers, factories, and theatres. Cities and other centres require energy and must be connected, giving rise to the need for such ancillary infrastructure as hydro-dams, road networks, bridges, and airports. The results of the design work of the civil engineer are therefore quite visible and a source of enduring pride. However, nature sometimes deals harshly with our infrastructure, striking it with hurricanes and/or ice storms. Even if the basic designs are sound, a significant maintenance effort by engineers who are knowledgeable about the basis for the original designs is implied.

Second, Civil engineers must recognize that humans are biological entities that consume resources and generate waste. They need water, they generate wastewater. They buy consumer goods, they generate solid waste. How can we ensure that our water is pure, and that it stays pure? How can we ensure that the waste from our cities is handled in such a way that damage to the environment and risks to our own health are minimized, or perhaps even nullified? Nature metes out drought and heat, floods and freezing temperatures. How can we prepare society for such eventualities? The fact that our water and other planetary resources are also finite, can be badly or well-managed, and have been abused in the past all raise additional questions and endeavours that come under the purview of civil engineering. The undergraduate civil engineering program at Dalhousie University is a reflection of the long-standing relevance and importance of the role of Civil engineers in addressing the above questions.

Although civil engineering is only one among many engineering disciplines available at Dalhousie, as an applied science it is characterized by exceptional technical diversity, great breadth and depth of subject matter, and a propensity for proactively addressing the practical needs of society. It is therefore natural that a BEng. in civil engineering is an excellent way to start ‘life in the universe’. It is often used by our graduates as a launching pad for post-graduate studies in very diverse realms of study. Civil engineers are found in all levels of government, in private consulting companies, in public utilities, in global enterprises, and in a wide range of fields that has included technology management and business administration.

The Department of Civil and Resource Engineering has over 125 graduate students. They are involved in a wide-range of projects that will affect engineering practice. Our experienced and diversely-trained faculty members therefore have many research outcomes upon which they can draw when coming to the classroom or the laboratory and in doing so are eminently able to keep the undergraduate program current and modern.

Introduction

The Department provides the Applied Mathematics courses required to support the engineering programs offered by the other departments. It also provides a specialized graduate program in Engineering Mathematics and Internetworking with several specializations offered with the co-operation of Engineering Departments and the Faculty of Computer Science.

The technical subjects offered by the Engineering Departments depend upon a sound knowledge of mathematical principles. Courses in Engineering Mathematics are therefore offered to students in each of the Engineering Departments. Emphasis is placed on the application of mathematical techniques to the description and solution of engineering problems. The lectures are supplemented by tutorial sessions and, when appropriate, are illustrated by application of techniques that require use of the available computing facilities.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions

ENGM 1011 Engineering Mathematics I

CREDIT HOURS: 3

This course covers functions, limits, continuity, differentiation and integration of polynomials, exponential, logarithmic and trigonometric functions, product, quotient and chain rules applications of differentiation to graphing, maximum-minimum problems and related rate problems, definite and indefinite integrals, and the fundamental theorem of Calculus.

FORMATS: Lecture | Lab

ENGM 1012 Engineering Mathematics II

CREDIT HOURS: 3

This course covers applications of integration including areas, volumes, moments, pressure and work, techniques of integration, numerical integration, length of curves, surfaces of revolution, parametric equations, polar coordinates, sequences and series, and Taylor series.

PREREQUISITES: ENGM 1011.03

FORMATS: Lecture | Lab

ENGM 1041 Applied Linear Algebra

CREDIT HOURS: 3

This course covers geometric vectors in three dimensions, dot product, cross product, lines and planes, complex numbers, systems of linear equations, matrix algebra, matrix inverse, determinants, Cramer's rule, introduction to vector spaces, linear independence and bases, rank, linear transformations, orthogonality and applications, Gram-Schmidt algorithm, eigenvalues and eigenvectors.

FORMATS: Lecture | Lab

ENGM 1081 Computer Programming

CREDIT HOURS: 3

This course covers fundamental programming principles including flow control, modularity, and structured programming. The student will implement significant programs in the C language to solve engineering problems.

FORMATS: Lecture | Lab

ENGM 2022 Applied Differential Equations

CREDIT HOURS: 3

This course covers first order linear and non-linear differential equations, differential equations of higher order with constant coefficients, applications to Engineering problems, Laplace transforms, periodic functions, applications of Laplace transforms to linear systems, Fourier Series, the line spectrum.

PREREQUISITES: MATH 1290.03

FORMATS: Lecture | Lab

ENGM 2032 Applied Probability and Statistics

CREDIT HOURS: 3

The topics covered include probability laws and the interpretation of numerical data, probability distributions and probability densities, functions of random variables, joint distributions, inferences concerning mean and variance, tests of hypotheses, and introduction to linear regression. The course emphasizes engineering applications and makes extensive use of statistical computer packages.

PREREQUISITES: MATH 1290.03

FORMATS: Lecture | Lab

ENGM 2101 Applied Vector Calculus

CREDIT HOURS: 3

This course covers space curves, arclength, curvature, functions of several variables, partial derivatives, implicit functions, constrained and unconstrained extrema, multiple integrals, line, surface, and volume integrals, change of variables in multiple integrals, scalar and vector fields, gradient, divergence and curl, Stokes Theorem, the Divergence Theorem, and applications to heat flow, electrostatics and fluid flow. Programming skills are developed using software tools to solve practical problems.

PREREQUISITES: MATH 1290.03

FORMATS: Lecture | Tutorial

ENGM 2283 Data Structures and Algorithms

CREDIT HOURS: 3

This course introduces the student to the fundamentals of software design, implementation, testing, and analysis. Topics covered include data representation, software development environments, libraries, modular programming, basic data structures (stacks, queues, and linked-lists), advanced data structures (trees and graphs), and their associated algorithms, algorithmic complexity, and classic sorting and searching algorithms. The data structures and algorithms are applied to engineering problems.

PREREQUISITES: ENGM 1081.03

FORMATS: Lecture

ENGM 3032 Applied Statistics

CREDIT HOURS: 3

This course deals with some statistical techniques and their application to engineering problems. Topics included are: review of statistical inference, linear regression and correlation, analysis of variance, the design of experiments and nonparametric statistical methods.

PREREQUISITES: ENGM 2032.03

FORMATS: Lecture | Lab

ENGM 3052 Applied Numerical Methods

CREDIT HOURS: 3

This course provides an introduction to Numerical Analysis with emphasis on solution of Engineering problems. The course covers the following topics: a brief review of Computer Programming; concepts of software engineering; approximations and errors; roots of linear and non-linear equations; LU decomposition, Singular value decomposition, condition number; curve fitting; numerical differentiation and integration; and numerical solution of ordinary differential equations.

PREREQUISITES: ENGM 1081.03, ENGM 2022.03, ENGM 2101.03

EXCLUSIONS: ENGM 3356.03

FORMATS: Lecture | Lab

ENGM 3271 Engineering Mathematics V

CREDIT HOURS: 3

This course has three parts. The first is complex analysis, including the residue theorem and its applications. The second part concerns transform theory including Fourier Series, Fourier Transform, the frequency domain representation of signals, impulse response, and transfer function. The third part concerns partial differential equations including the classification of equations and boundary conditions, separation of variables, the wave equation, Laplace's equation, and applications to electrical engineering problems.

PREREQUISITES: ENGM 1041.03, ENGM 2022.03, ENGM 2101.03

CROSSLISTED: ECED 3500.03

FORMATS: Lecture | Lab

ENGM 3282 Data Structures and Numerical Methods

CREDIT HOURS: 3

This course introduces the student to system analysis, and software techniques. Topics covered include objects, stacks, queues, multiple linked lists, searching and sorting algorithms and their implementations in the C++ programming language. The students use linear algebra and numerical methods in engineering examples while learning to implement properly structured solutions.

PREREQUISITES: ENGM 1041.03, ENGM 1081.03

FORMATS: Lecture | Lab

ENGM 3356 Numerical Methods and Partial Differential Equations

CREDIT HOURS: 3

This course provides an introduction to Numerical Analysis and Partial Differential Equations with emphasis on solution of problems related to Mechanical Engineering. The following topics are covered: approximations and errors; roots of non-linear equations; systems of equations, curve fitting; numerical integration and differentiation; numerical solution of ordinary differential equations; partial differential equations, separation of variables, solution of the

equation, wave equation, and Laplace's equation with various boundary conditions; numerical solutions of partial differential equations.

PREREQUISITES: ENGM 1081.03, ENGM 2101.03, ENGM 2022.03

EXCLUSIONS: ENGM 3052.03

FORMATS: Lecture | Lab

ENGM 4620 Python for Engineers

CREDIT HOURS: 3

This course teaches students high-level programming using Python. The course will cover Python programming concepts such as numbers and strings, container data types, variables and assignments, flow control, functions, exception handling and debugging, and object-oriented programming. Additionally, the course will teach students file handling and input/output (I/O), data analytics, scientific programming using NumPy, data visualization, and software revision control. Other selective topics might be covered as needed.

PREREQUISITES: ENGM 1081 - Computer Programming or equivalent

FORMATS: Lecture

ENGM 4675 Risk Assessment and Management

CREDIT HOURS: 3

This course introduces the risk assessment and system reliability methodologies, from classical event trees to simulation. Examples of risk-based decision making analyses will be covered, ranging from oil exploration to environmental site remediation. The student will carry out a risk assessment involving design decisions on a project of their own choosing.

PREREQUISITES: ENGM 2032.03

CROSSLISTED: ENGM 6675.03

FORMATS: Lecture | Lab

ENGM 4676 Machine Learning for Engineers

CREDIT HOURS: 3

The class introduces Machine Learning (ML) for engineers. After a review of linear algebra, calculus, probability, and classic machine learning, the class will focus on deep learning starting with simple multilayer perceptron's and ending with modern convolutional neural networks (CNNs). Datasets for engineering problems will be utilized in this course.

COREQUISITES:

PREREQUISITES: ENGM 1081 - Computer Programming or equivalent & ENGM 2032 - Appld Prob'ty and Stats or equivalent

EXCLUSIONS: Co-located ENGM4676 / ENGM6676

FORMATS: Lecture

ENGM 4680 Ecosystem Modelling of Marine and Freshwater Environments

CREDIT HOURS: 3

Students develop and apply mathematical models of marine and freshwater ecosystems to study biological production, biogeochemical cycling etc. Lectures provide theoretical background for coupling nutrient and plankton dynamics, including parameterizing biological processes and physical effects. Computer sessions provide hands-on modelling experience. Students also learn to critique modelling literature in a journal-club setting.

CROSSLISTED: ENGM 6680.03, OCEA 5680.03

Introduction

No other branch of engineering can claim to have such an impact on modern society as Electrical and Computer Engineering. The ease, speed and precision by which electrical energy and electrical signals can be transmitted, transformed and controlled has influenced not only our daily life, but has also changed the course of many other disciplines. Over only a few decades, Electrical and Computer Engineering has grown to a multi-branch discipline with significant applications in the areas of power systems, communication systems, microelectronics, photonics, computers and biomedical applications. This rapid growth, coupled with major advances in technology and material science, has made the field very dynamic, and poses a challenge to the student, to the educator and to the practicing Electrical and Computer Engineer for the breadth of its activities.

The Electrical and Computer Engineering curriculum is based on the physical and mathematical principles which constitute the unchanging foundation of the discipline. Courses apply these foundational principles to state-of-the-art applications within specialized areas of the field.

In the final year, technical elective courses are provided to enable the student to obtain a deeper, more detailed understanding of current technology in a field of interest. Technical electives may also be chosen from listed courses offered by other Departments. In addition, during the final year, the students work on a senior capstone project in teams of three to four. The project involves analysis, design and implementation to solve a realistic electrical or computer engineering problem. The projects are submitted by professionals in local industry or research facilities who then provide supervision in conjunction with an assigned Faculty Advisor.

Laboratory sessions form an integral part of most Electrical and Computer Engineering courses. These sessions are conducted in laboratories housed on campus.

Students enrolled in the Electrical and Computer Engineering Degree Programs may take part in Co-Operative Education where they can apply for up to three four-month work placements in industry. Students participating in the Co-op Program will require two years and four months to complete their degree while students not in the Co-op Program can finish in one year and eight months.

Students participating in our program may pursue either the Electrical or the Computer options as listed below. Additionally, the Electrical and Computer Engineering Department offers an exciting Specialization in Biomedical Engineering.

Staff

Dean

Newhook, J., BEng, MAsC (TUNS), PhD (Dalhousie), PEng

Department Head

Bousquet, J-F., BEng (Ecole Polytechnique), MSc, PhD (Calgary), PEng

Professor Emeritus

Marble, A. E., BEng, MAsC, PhD (TUNS), PEng

Professors

Cada, M., Dipl. Ing., MSc, PhD (Prague), PEng

Chen, Z., BEng (Fuzhou), MSc (Southeast), PhD (Ottawa), PEng, FIEEE, FCAE, FEIC

El-Masry, E. I., BEng, MSc (Alexandria), PhD (Man), PEng

El-Sankary, K., BEng (LU, Lebanon), MAsC (Univ of Quebec), PhD (Univ of Montreal), PEng

Gu, J., BSc (Hefei), MSc (Shanghai), PhD (Alberta), PEng

Hughes, F. L., BSc (Carleton), MSc, PhD (Newcastle upon Tyne)

Ilow, J., BSc (Poland), MAsC, PhD (Toronto), PEng

Leon, L. J., BSc, MSc, PhD (Dalhousie), PEng

Ponomarenko, S., Dipl. Phys. (Novosibirsk, Russia), PhD (Univ of Rochester)

Associate Professors

Adamson, R., PhD (Toronto)

Bousquet, J-F., BEng (Ecole Polytechnique), MSc, PhD (Calgary), PEng

Brown, J., PhD (Queen's)

Little, T. A., BScEng (UNB), MEng (Memorial), PhD (UNB), PEng

Ma, Y., BSc, MEng (Southeast), MSc, PhD (Alberta), PEng

Sieben, V., PhD, (Alberta), PEng

Trukhachev, D., BSc (St. Petersburg), PhD (LUND)

Assistant Professor

Gonzalez-Cueto, J., BEng, MScE (Cuba), PhD (UNB), PEng **Co-op Advisor**
Koleilat, G., BSc, (Concordia), MAsC, PhD (Toronto)

Adjunct Professors

Aly, H., BEng, MAsC (Egypt), PhD (Dalhousie)
Gregson, P., PhD, F.E.C., PEng (Post-Retirement)
Hanafi, H., PhD (Dalhousie)
Hines, P., BS (Dalhousie), PhD (Univ of Bath)
MacNeill, A., BEng, PhD (Dalhousie)
McIntyre, M., BEng (NSTech), MAsC (Waterloo), PhD (Waterloo)
Nie, H., MEng (Tsinghua), PhD (UBC), PEng
Nguyen-Huu, N., BEng (Vietnam), MEng (France), MEng (Spain), PhD (Taiwan), PEng
Schlegel, C., BEng (Switzerland), MSEE, PhD (Notre Dame, US), FIEEE

Cross Appointment

Freund, M., (From Faculty of Science, Chemistry), PhD
Hill, I., (From Faculty of Science, Physics), BSc, PhD (Queen's)
Seto, M., (From Mechanical Engineering), BSc, MSc, PhD (UBC) PEng

Electrical Engineering Option for Co-op students*

Students in the Electrical Engineering Option must have completed the Diploma in Engineering from Dalhousie or its Associated Universities, with the appropriate course requirements. In year 3, the Electrical Engineering Option is defined as follows:

***For Non-Co-op students, a modified study plan can be defined with the Undergraduate Advisor.**

Study Term 5 (Fall)

- ECED 3003.03: Networks & Systems
- ECED 3102.03: Electromechanics
- ECED 3201.03: Introduction to Electronics
- ECED 3204.03: Microprocessors
- ECED 3300.03: Electromagnetic Fields
- ECED 3500.03: Signal Analysis

Work Term 1 (Winter)

Study Term 6 (Summer)

- ECED 3101.03: Power Systems I
- ECED 3202.03: Analog Electronics
- ECED 3301.03: Electromagnetic Waves and Propagation
- ECED 3511.03: Communication Systems
- ECED 3901.03: Electrical Engineering Design II

Work Term 2 (Fall)

Study Term 7 (Winter)

- ECED 4502.03: Digital Signal Processing
- ECED 4513.03: Communication Networks
- ECED 4602.03: Modern Control Systems
- ECED 4900.03: Senior Year Project I
- Technical Elective I
- Technical Elective II

Work Term 3 (Summer)

Study Term 8 (Fall)

- CPST 3030.03: Engineering in Society II
- ECED 4601.03: Digital Control Systems
- ECED 4901.03: Senior Year Project II
- Humanities Elective**
- Technical Elective III
- Technical Elective IV

****Humanities Elective**

Refer to general Engineering section for details.

Computer Engineering Option

Students in the Computer Engineering Option must have completed the Diploma in Engineering from Dalhousie or its Associated Universities, with the appropriate course requirements. Starting in year 3, the Computer Engineering Option is defined as follows:

***For Non-Co-op students, a modified study plan can be defined with the Undergraduate Advisor.**

Study Term 5 (Fall)

- ECED 3003.03: Networks & Systems
- ECED 3102.03: Electromechanics
- ECED 3201.03: Introduction to Electronics
- ECED 3204.03: Microprocessors
- ECED 3401.03: Systems Analysis
- ECED 3500.03: Signal Analysis

Work Term 1 (Winter)

Study Term 6 (Summer)

- CSCI 3120.03: Operating Systems
- ECED 3202.03: Analog Electronics
- ECED 3403.03: Computer Architecture
- ECED 3511.03: Communication Systems
- ECED 3901.03: Electrical Engineering Design II

Work Term 2 (Fall)

Study Term 7 (Winter)

- ECED 4404.03: Computer Networks & Communications
- ECED 4502.03: Digital Signal Processing
- ECED 4513.03: Communication Networks
- ECED 4602.03: Control Systems
- ECED 4900.03: Senior Year Project I
- Technical Elective I

Work Term 3 (Summer)

Study Term 8 (Fall)

- CPST 3030.03: Engineering in Society II
- ECED 4402.03: Real Time Systems
- ECED 4406.03: Cybersecurity

- ECED 4901.03: Senior Year Project II
- Technical Elective II
- Humanities Elective**

****Humanities Elective**

Refer to general Engineering section for details.

Co-op Program

The students who choose the Co-op Program in either the electrical engineering or computer engineering option will follow the table below:

Year/Term	Fall	Winter	Summer
Year 1	Study Term 1	Study Term 2	FREE
Year 2	Study Term 3	Study Term 4	FREE
Year 3	Study Term 5	Work Term 1	Study Term 6
Year 4	Work Term 2	Study Term 7	Work Term 3
Year 5	Study Term 8		

Non-Co-op Program

The students who choose the **Non Co-op** Program in either the **electrical engineering** option or **computer engineering** option a modified study plan can be defined with the Undergraduate Advisor.

Technical Electives

ECED 4071.03: Analog Filter Design

- ECED 4082.03: MOS Switched-Capacitor Circuits
- ECED 4130.03: Electric Power Systems II
- ECED 4140.03: Power Systems III
- ECED 4260.03: IC Design and Fabrication
- ECED 4350.03: Semiconductor Materials and Devices
- ECED 4360.03: Antenna Theory and Design
- ECED 4421.03: Technology and Applications of Fiber Optics
- ECED 4460.03: Communications Electronics
- ECED 4504.03: Digital Transmission Theory
- ECED 4760.03: Biomedical Engineering

Electrical Engineering Option students can also use courses below as Technical Electives with Instructors' Approval.

- ECED 4402.03: Real Time Systems
- ECED 4404.03: Computer Networks
- ECED 4406.03: Computer Security

Computer Engineering Option students can also use the course below as a Technical Elective with the Instructors' Approval.

- ECED 3101.03: Power Systems I
- ECED 3300.03: Electromagnetic Fields
- ECED 4601.03: Digital Control Systems

Certificate in Biomedical Engineering

Biomedical engineering is a subdiscipline of electrical engineering concerned with the design of engineering solutions that address human health problems. Electrical biomedical engineers have played a key role in the development of much modern medical technology including implanted devices such as pacemakers, hearing aids, diagnostic imaging systems and robotic devices. The field is highly multi-disciplinary and is among the fastest growing areas of engineering.

The requirements for the Certificate in Biomedical Engineering are described in the Certificates section of the Academic Calendar.

Students intending to pursue the Certificate must register for it on DalOnline.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions

ECED 2000 Electric Circuits

CREDIT HOURS: 3

This is an introductory course in electric circuit analysis. The material covered starts with a review of the fundamental circuit variables such as voltage, current, charge, power and energy. Kirchhoff's laws are introduced and developed into node and loop analysis techniques. Terminal behavior and circuit equivalence including Thevenin and Norton circuits are covered. Analysis with controlled sources and energy storage elements is developed including steady state and transient response for first order networks. Phasors and sinusoidal steady state are introduced. Students are introduced to circuit simulation tools such as p-spice.

PREREQUISITES: MATH 1290.03, PHYC 1290.03 or equivalent

FORMATS: Lecture | Lab

ECED 2001 Circuit Analysis

CREDIT HOURS: 3

This course covers advanced circuit analysis techniques, starting with sinusoidal excitation. The concepts of phasors and complex impedance are fully developed. Mutual inductance and magnetically coupled coils are used to introduce transformer behavior and performance. Real and reactive power flow is covered before the introduction of balanced three phase circuits for power distribution. Symmetrical components are introduced as a means of dealing with unbalanced networks. The concepts of grounding and harmonics are also introduced.

PREREQUISITES: ECED 2000.03

FORMATS: Lecture | Lab

ECED 2200 Digital Circuits

CREDIT HOURS: 3

This course includes an introduction to: Boolean algebra, encoders, decoders, shift registers, asynchronous and synchronous counters, together with timing considerations. Design of asynchronous circuits, synchronous sequential circuits, and finite state machines, is covered. Karnaugh mapping techniques and state tables and diagrams are taught. Programmable logic is introduced. Contemporary computer aided design and analysis software is used throughout the course.

PREREQUISITES: ECED 2000.03

FORMATS: Lecture | Lab

ECED 3003 Networks & Systems

CREDIT HOURS: 3

This course provides the basic networks and systems analysis skills required in subsequent courses in the Electrical and Computer Engineering program. It covers topics such as signals and systems modelling concepts; applications of Laplace transform in network analysis, Bode plots, block diagram; state-variable analysis; generalized two-port parameters; properties and analysis of linear time-invariant (LTI) systems, the convolution integral and Eigenfunction and Eigenvalues of LTI systems.

FORMATS: Lecture | Tutorial

ECED 3101 Power Systems I

CREDIT HOURS: 3

This course presents the development of the models of each of the components making up a power system including: transformer behavior (power, control and instrument transformers), synchronous machine behavior (cylindrical rotor and salient pole theory) and transmission line behavior (lumped and distributed parameter). Per unit normalization is covered. The equipment models are compiled to present network models that can be used to study power system operation. Load flow is discussed as well as fault estimation and circuit protection.

FORMATS: Lecture | Lab

ECED 3102 Electromechanics

CREDIT HOURS: 3

This course covers the principles of electromechanical energy conversion and electric motors. A review of magnetic field behavior leads to magnetic circuit calculations and permanent magnet circuit behavior. Energy balance principles are used to develop force and torque relationships for many electromechanical applications including relays, meter movements and motor operation. Basic principles of motor operation such as rotating magnetic fields, efficiency and machine ratings are given as a prelude to an in depth presentation of AC and DC motor behavior. Emphasis is placed on motor control and application.

EXCLUSIONS: ECED 4102.03

FORMATS: Lecture | Lab

ECED 3201 Introduction to Electronics

CREDIT HOURS: 3

The course gives an introduction to semiconductor physics. The theory of operation of semiconductor diodes, bipolar junction transistors (BJTs), and junction and metal oxide field effect transistors (MOSFETs), is covered in detail. The analysis and design of diode, BJT, and MOSFET circuits is covered including voltage multipliers, voltage regulators, and low frequency small signal amplifiers. Contemporary computer aided design and analysis software is applied to the aforementioned circuits.

FORMATS: Lecture | Lab

ECED 3202 Analog Electronics

CREDIT HOURS: 3

This course covers the design and analysis of transistor amplifier circuits. Students are introduced to amplifier circuit designs of increasing complexity, starting with single-transistor circuits and proceeding to large multi-stage circuits such as opamps. Topics covered include biasing circuits, the role of amplifiers in signal amplification and buffering, large and small signal transistor models, high-frequency behaviour of transistors, differential amplification, feedback amplifiers, and power amplifier stages.

PREREQUISITES: ECED 3003.03 and ECED 3201.03

FORMATS: Lecture | Lab

ECED 3204 Microprocessors

CREDIT HOURS: 3

This course introduces a currently available microprocessor system. Topics include microcontrollers as a type of microprocessor, microprocessor architecture, address, data and control buses, allocation of external memory modules, use of decoders, latches, flip-flops and other elements of a microprocessor system, CPU bus cycle, cycle-by-cycle execution, timing diagrams, I/O methods, I/O allocation, asynchronous serial communication, RS-232 standard, parallel port interfacing, handshaking protocols, timers, timer functions, interrupts, interrupt priority, assembly programming, software development and debugging.

FORMATS: Lecture | Lab

ECED 3300 Electromagnetic Fields

CREDIT HOURS: 3

This course forms an introduction to basic electromagnetic principles upon which Electrical Engineering is based. The laws underlying the theory are presented in integral and differential form. A classical development of electrostatics, steady state current, and magnetostatics will lead to Maxwell's equations. The theory developed is applied to calculating circuit parameters such as resistance, capacitance, and inductance for any electronic or magnetic structure.

FORMATS: Lecture | Tutorial

ECED 3301 Electromagnetic Waves & Propagation

CREDIT HOURS: 3

This course presents the basic theory and applications of propagation of electromagnetic waves. Major topics include: time-varying Maxwell's equations, electromotive force, electromagnetic spectrum, transmission of plane waves, reflection and refraction, polarization, radiation, transmission line theory, standing wave ratio, Smith Chart, impedance matching, guided wave structures, modes and cut-off frequencies.

PREREQUISITES: ECED 3201.03 and ECED 3300.03

EXCLUSIONS: ECED 4301.03

FORMATS: Lecture | Tutorial

ECED 3401 System Analysis

CREDIT HOURS: 3

This course deals with requirement analysis, specifications, concepts of transforming an ill-defined problem into a set of specifications and a software solution. Topics include: functional decomposition and data dictionaries; top-down structured and object-oriented analysis techniques ; software design and management tools; data storage and advanced programming techniques, and design and application of test procedures and documentation. Methods of improving equity, diversity, and inclusion in software solutions will be explored. A set of assignments and a multipart project apply the techniques to create software solutions to a variety of problems.

EXCLUSIONS: ECED 2400.03

FORMATS: Lecture | Lab

ECED 3403 Computer Architecture

CREDIT HOURS: 3

This course deals with controllers, processor instruction sets, and memory systems. The student will study design methods, implementation techniques, modelling techniques, and performance analysis. Reduced instruction set architectures (RISC), pipelining, pipeline hazards, and their implementation for modern high speed applications will be studied. The student project will require a team to design and implement (or simulate) a RISC architecture.

PREREQUISITES: ECED 3401.03 or ECED 3204.03

FORMATS: Lecture | Lab

ECED 3500 Signal Analysis

CREDIT HOURS: 3

This course covers the fundamentals of continuous-time signals and system properties, including: 1) the convolution integral and the properties of linear time invariant systems; 2) the Fourier series representation of periodic signals. 3) the filtering of periodic signals; 4) the Fourier transform synthesis, analysis equations and properties; 5) the filtering of aperiodic signals; 6) the sampling theorem, including aliasing distortion and its prevention; 7) fundamentals of communications, including exponential and sinusoidal amplitude modulation, demodulation and demultiplexing.

FORMATS: Lecture | Tutorial

ECED 3511 Communication Systems

CREDIT HOURS: 3

This course covers transmission of information in the presence of noise. The course combines a rigorous development of the fundamental principles in transceiver implementations with examples of modulation schemes that are used in modern communication systems, such as quadrature modulation, phase and frequency-shift keying, and OFDM. Mathematical foundations of communications are applied to develop state-of-the-art digital modulation.

PREREQUISITES: ECED 3500.03

FORMATS: Lecture | Lab

ECED 3901 Electrical Engineering Design II

CREDIT HOURS: 3

This course covers advanced aspects of design, interdisciplinary design and failure analysis. Students gain experience in the design of complex systems. The course culminates in a design contest in which groups of students design and implement a system to meet design objectives, and present and defend their design in an oral design review. The course will consist of both classroom and lab work. The classroom component will use case studies, design reviews and conventional lectures. The lab component is devoted to the design and implementation of a solution to the contest challenge.

FORMATS: Lecture | Lab

ECED 4071 Analog Filter Design

CREDIT HOURS: 3

This course deals with the theory and design of active filters, for audio-frequency applications, using op amps. It consists, basically, of two phases. Phase I deals with the realization of a given transfer function using cascade of first and/or second-order RC-op amps circuits. In phase II, the transfer functions of filters are studied in combination with frequency-response approximations such as Butterworth, Chebyshev, Inverse-Chebyshev, Caver (or Elliptic) and Bessel-Thompson.

PREREQUISITES: ECED 3003.03 and ECED 3202.03
FORMATS: Lecture | Tutorial

ECED 4130 Electric Power Systems II

CREDIT HOURS: 3

This course presents different techniques used in the analysis of interconnected systems, power flow problem, and iterative methods for its solution. Different power system protection techniques will be introduced and how to design different relays (over and under currents relays, over and under voltages relays, distance relay, etc.). Power system stability will be discussed. Optimal operation of electric power systems and their economic dispatch as well as different new optimization techniques will be introduced.

PREREQUISITES: ECED 3101.03

FORMATS: Lecture | Lab

ECED 4260 IC Design and Fabrication

CREDIT HOURS: 3

Design and modelling of RTL (Register Transfer Level) digital system are introduced using hardware description languages VHDL and Verilog. Subsystem design of arithmetic circuits, ROM, RAM and FSMs will be examined and implemented with Field Programmable Gate Arrays (FPGA) training board DE1-SoC. Performance analysis, optimization, faults, and testability will also be discussed. Extensive use of CAD tools will give students hands-on experience with systems typical of those used in industry. The theory of MOS transistors is reviewed, and their fabrication technologies are presented with an emphasis on CMOS circuit fabrication.

PREREQUISITES: ECED 3201.03

FORMATS: Lecture | Lab

ECED 4350 Semiconductor Materials and Devices

CREDIT HOURS: 3

This course deals with the fundamentals of generation and detection of light in semiconductor materials as they pertain to optoelectronic devices such as light emitting diodes, laser diodes, photo detectors, and optocouplers. Major topics include: review of semiconductor properties; photo detectors such as PIN photodiodes and avalanche photodiodes (APDS); spontaneous emission and injection luminescence in light emitting diodes (LEDS); and stimulated emission and optical gain in laser diodes (LDS). Typical materials, structures, characteristics and parameters of these devices are discussed with relation to various applications in fiber optics, sensing and consumer products.

PREREQUISITES: ECED 3201.03 or MATL 3500.03 or MECH 3505.03

FORMATS: Lecture | Tutorial

ECED 4402 Real Time Systems

CREDIT HOURS: 3

This course reviews system analysis and design techniques and then addresses real time implementation methods. Real time operating system (RTOS) requirements are covered. Topics include message queuing, resource sharing, priority assignments, event flags, interrupts, memory allocation, and typical RTOS configurations. Examples in engineering and networking will be discussed. A significant design and implementation project will be undertaken.

PREREQUISITES: ECED 3401.03 or ECED 3204.03, and CSCI 3120.03

FORMATS: Lecture | Lab

ECED 4404 Computer Networks & Communications

CREDIT HOURS: 3

The course covers the advanced principles, standards, and practices of data communications protocols with emphasis on the TCP/IP protocol suite. The course is structured around three overlapping themes: protocol design and operation, hardware-software interactions and network applications. Through laboratory experiments, the operation of Internet is presented from the Internet service providers' and Internet end-users' points of view.

COREQUISITES: ECED 4513.03

PREREQUISITES: ECED 3403.03

FORMATS: Lecture | Lab

ECED 4406 Computer Security

CREDIT HOURS: 3

Design of secure embedded systems is critical for deploying and connected technology today. This class covers methods used to secure computer systems in general, and then applies them to embedded systems. Many attacks specific to embedded systems are covered, and students will be performing their own tests and development of attacks. Attacks specific to embedded systems including invasive and non-invasive attacks will be covered in detail, both theoretically and in labs.

PREREQUISITES: ECED 3204.03

FORMATS: Lecture | Lab

ECED 4421 Technology and Applications of Fiber Optics

CREDIT HOURS: 3

This course deals with the basic principles and applications of optical fiber communications. Major topics include: ray theory and electromagnetic modes in optical fiber waveguides; step-index and graded-index multimode and single-mode fibers; transmission characteristics of optical fibers such as attenuation (absorption, scattering, bending), dispersion (multipath, waveguide, material, profile), and polarization (random, preserved); optical fiber communication systems (transmitter, receiver, digital and analog system design); advanced systems; non-communications applications.

PREREQUISITES: ECED 3201.03

FORMATS: Lecture | Lab

ECED 4460 Communications Electronics

CREDIT HOURS: 3

This course provides an introduction to the theory and design of electronic circuits for communications systems. Topics include: the realization of passive components for high frequency applications; small signal amplifier design and characterization employing s-parameter techniques; large signal circuit design realization and analysis employing volterra series and harmonic balance nonlinear analysis procedure; the realization and characterization of non-linear circuits as high efficiency power amplifiers, oscillators, frequency converters, and modulator/demodulator subsystems; the integration of appropriate subsystems into analog and digital terrestrial and space borne radio communication systems.

PREREQUISITES: ECED 3201.03

FORMATS: Lecture | Lab | Tutorial

ECED 4502 Digital Signal Processing

CREDIT HOURS: 3

This course introduces the basics of filtering and analysis of discrete time signals and systems. An overview of the sampling theorem is followed by a discussion of the discrete Fourier transform and the z-transform. The analysis of discrete time signals is introduced, and the design and synthesis of digital filters is covered. Contemporary signal processing hardware and design software is introduced.

PREREQUISITES: ECED 3500.03

FORMATS: Lecture | Lab | Tutorial

ECED 4504 Digital Transmission Theory

CREDIT HOURS: 3

Topics covered will include detailed analysis of channel and source coding techniques with derivation of bit error rates for various modulation schemes and power-bandwidth efficiency trade-offs. Design of optimum receivers is examined. Coding gains of error control coding schemes are calculated. Power Spectral Density of communications waveforms is presented. Channel fading and performance degradations are discussed. Information Theory issues are examined. Teletraffic analysis is presented for both circuit and packet switched networks.

PREREQUISITES: ECED 3511.03

FORMATS: Lecture | Tutorial

ECED 4513 Communication Networks

CREDIT HOURS: 3

This course focuses on the fundamentals of data communication networks. It covers the layered architecture of packet networks and their network elements (switches, routers, bridges). The protocols used to enable transmission of packets through the Internet are examined in detail. Analysis and design of protocols to enhance the efficiency of data transmission in the context of information theory is also presented. Students will gain an appreciation of implementing voice over IP, DVB and WiFi transmissions.

PREREQUISITES: ECED 3511.03

FORMATS: Lecture | Lab

ECED 4601 Digital Control Systems

CREDIT HOURS: 3

This course deals with digital control systems analysis and design aspects. Techniques for analyzing the performance of sampled data systems are introduced. Emphasis is on the use of the Z-transform in evaluating system performance indicators including its stability. Tools introduced include frequency response methods, and the root locus. Practical examples involving design of controllers for digital control systems to achieve desired response are discussed.

PREREQUISITES: ECED 3600.03, or ECED 4602.03, or Permission of the Instructor.

FORMATS: Lecture | Lab

ECED 4602 Control Systems

CREDIT HOURS: 3

This course deals with control systems analysis and design aspects. Techniques for analyzing the performance of analog systems are introduced. Emphasis is on the use of the Laplace transform and state space techniques in evaluating system performance indicators including its stability. Tools introduced include frequency response methods, and the root locus. Practical examples involving design of controllers for small systems to achieve desired response are discussed.

PREREQUISITES: ECED 3003.03

EXCLUSIONS: ECED 3600.03

FORMATS: Lecture | Lab

ECED 4760 Biomedical Engineering

CREDIT HOURS: 3

The first half of the course addresses topics in electrophysiology, including the biological effects of electricity, the generation of electrochemical potentials in the body, the generation of action potentials by cells and their propagation in nerve and muscle cells. This leads into a discussion of the applications of bioelectricity including the measurement of biopotentials for diagnostics, electrostimulation of tissues, electrical safety and the functional role of electrophysiology at the organ level in the heart and brain. The second half of the course is devoted to modern medical imaging technologies. Students are introduced to the physics and signal processing techniques used in x-ray, computed tomography (CT), positron-emission tomography (PET), magnetic resonance imaging (MRI) and ultrasound imaging. Course lectures are supplemented by guest lectures from local biomedical scientists and clinicians on current topics and by labs on bioimpedance measurement and electrocardiography.

PREREQUISITES: ECED 3003.03, ECED 3201.03, and ECED 3500.03

FORMATS: Lecture | Lab | Tutorial

ECED 4900 Senior Year Project I

CREDIT HOURS: 3

This course develops the use of fundamental theory in the detailed design of a suitable project selected by the student in consultation with the department. The student is expected to take the project from its preliminary stage through the various design stages to the ultimate completion of the design, which include a detailed report with calculations, drawings, possibly a model and verbal presentation.

PREREQUISITES: Successful completion of a minimum of ten courses from the third year ECED program.

FORMATS: Lecture | Lab

ECED 4901 Senior Year Project II

CREDIT HOURS: 3

This course is a continuation of Senior Year Project I leading to a final report and formal presentation. The presentation will be made to fellow students and departmental staff members.

PREREQUISITES: ECED 4900.03

FORMATS: Lecture | Lab

Introduction

Environmental Engineering is a rapidly growing discipline within the engineering profession. The program is intended to satisfy the needs of interested students and the environmental industry. The curriculum is designed to train professionals in multidisciplinary approaches to environmentally-based design, waste management, water and soil quality, energy conservation and renewables, and air quality.

Sustainable environmental approaches to production and management systems will continue to be required by industry, government and the consulting sector at the provincial, regional, national and international level. Challenging Environmental Engineering career

positions are found in national and international petroleum companies and power utilities, manufacturers of environmental and energy efficient products, environmental consulting companies, provincial and national Government departments such as Natural Resources, Environment, Forestry, Agriculture and Food to name just a few.

Curriculum and course descriptions

For complete course descriptions please see [Civil and Resource Engineering](#).

Co-operative program and schedule

Refer to section [Technical Co-op Program](#), in the Engineering section.

Admissions

- Students who have successfully completed first year engineering at a recognized university will be eligible for admission in Year II of the Environmental Engineering program.
- Students who have completed a first year science program will be considered for admission into Environmental Engineering.
- Students who have completed two or more years of university studies will be considered for admission on the basis of transfer of credits.

Website: foodscience.engineering.dal.ca/

Introduction

Food Science is a discipline that combines a basic knowledge of science and engineering principles in the study of food products and preservation technologies. Food scientists have training in and employ the principles of the basic sciences such as physics, mathematics, chemistry, biology, biochemistry, and microbiology. Food Science is the application of the basic sciences and engineering to food processing, preservation and safety.

A [Minor in Food Science](#) is available to students registered in the BSc 120 credit hour major and honours programs.

Curriculum and course descriptions

Refer to sections IID and IIID, Food Science Program, in the [Process Engineering and Applied Science section](#).

Admissions

Students from Canadian High schools are recommended to take the following subjects in high school: Pre-calculus Math and English and two or more of Physics, Chemistry, Food Science or Biology. The admission requirements are the same as for admission to the

Bachelor of Science program. Many of our students have traditionally been transfer students. Please contact the program chair for advice on this matter.

Introduction

Industrial Engineers design systems to enable people and society to improve productivity, efficiency, effectiveness and quality. All engineers work at planning, designing, implementing and controlling the systems that enable people to use technology. The systems that industrial engineers design are broad and are characterized by a need to integrate both the physical and decision making capabilities of humans with all other aspects of the system design. Problems range from the design of a work method and work station, to the design of a factory layout and methods of controlling the flow of materials on the factory floor, to the design of an overall corporate plan involving materials procurement, production, inventory and distribution. The idea of a factory is also extended to include communications, systems, energy systems, health care systems, municipal systems, transportation systems; in fact all systems that are essential to the functioning of modern society. To facilitate effective decision-making and achieve high performance in areas such as scheduling, inventory and quality control, industrial engineers are often required to design and implement computer based information systems.

Human behaviour and capabilities are key elements in the systems industrial engineers work with. In designing the layout of a production line for an automobile manufacturer, the checkout counter for a supermarket, the organization of work flow for a bank or the materials handling system for a steel plant, the engineer must consider both physical requirements and cost parameters, and the physiological and behavioural performance of the human operators. The industrial engineer has a dual role, both to extend human capability to operate, manage and control the overall production system, and to ensure the safety and well being of those working in the system.

Design and development of these systems requires the unique background of the industrial engineer. The process of engineering always starts with measurement. Where other engineers might measure temperatures, pressures, or loads, the industrial engineer measures the time of a work cycle, dollar value of expenditures, rates of machine failures, and demand for finished goods. Usually the mathematical analysis must take into account risk and uncertainty to a larger extent than in other engineering fields. Computer simulation and optimization are often required. The concepts and techniques found in the Industrial Engineering curriculum have been selected to assist the student to develop the skills that meet the specific challenges of systems which involve managerial activities.

Students begin the Industrial Engineering program with a background in engineering fundamentals studied during their initial two years. In the latter portion of the IE program, they are introduced to the fundamental approaches of work place design and operations research, while at the same time enhancing their mathematical and computer background. Later, more advanced modelling approaches are examined together with courses more directly related to the management process. Production scheduling, inventory control, quality management and plant layout are studied, as are the factors which influence human performance. Students are provided with

the opportunity to study such areas as manufacturing, service systems, or maintenance through the Department's elective course offerings.

In their final year, all students undertake a major design project. Projects are drawn from companies or institutions outside the University and are treated as a consulting assignment. Students are evaluated on their ability to achieve an innovative solution by drawing upon the analytical skills developed throughout their program of studies. They must also, of course, satisfy the practical requirements of the client.

Job opportunities for industrial engineers are both plentiful and widely based. Former graduates are currently practicing industrial engineering in areas ranging from semi-conductor manufacturing and airlines, to utilities and hospitals. Invariably, the work assigned is original in its nature, demanding that the industrial engineer be creative in applying his or her many abilities to achieve the best solution. Managers require such results if they are to keep their costs under control in an increasingly competitive world. This requirement will sustain the high demand for industrial engineers well into the future.

Program Guide

Years 1 and 2 follow the core program outlined in the Engineering section of this calendar.

Staff

Dean

Newhook, J., BEng, MAsC (TUNS), PhD (Dalhousie), PEng

Department Head

Cyrus, J. P., BSc (ENG) (UWI), MAsC, PhD (TUNS), PEng

Professor Emeritus

Das, B., BScEng (Banaras), MSc, PhD (North Carolina State), FIIE, FHFES, FIEE, CEng, PEng. Industrial ergonomics, workstation design, human strength measurement, anthropometric modelling, equipment and hand tool design

Professors

Pelot, R., BAsC (Ottawa), MAsC (Alberta), PhD (Waterloo), PEng, Co-Op Advisor. Risk Analysis, maritime applications, safety and security, environmental modelling

Diallo, C., BEng, MSc, PhD (Laval), PEng. Maintenance 4.0, Sustainability engineering, Cyber-physical systems, Closed-loop supply chains, Planning and scheduling

Venkatadri, U., BTech (IT-BHU), MS (Clemson), PhD (Purdue), PEng

Associate Professors

Blake, J., BAsC, PhD (Toronto), PEng. Industrial Engineering, operational research, health application simulation

Cyrus, J. P., BSc (ENG) (UWI), MAsC, PhD (TUNS), PEng. Vehicle routing and scheduling

Ghasemi, A., BSc, MSc, PhD (Montreal), PEng. Reliability, condition-based maintenance, asset management, planning and scheduling, dynamic programming and stochastic optimization, simulation

MacDonald, C., BEng (TUNS), PhD (Dalhousie), PEng. Work design, production systems

Vanberkel, P., BEng, MAsC (Dalhousie), PhD (Twente), PEng. Operation research, healthcare, simulation stochastic models. Undergraduate Academic Advisor

Assistant Professors

Goerlandt, F., BSc (UGent), MSc (UGent), MSc (UAntwerpen), DSc (Aalto). Risk analysis and management, safety management, marine technology, marine transportation, emergency response, validation

Kamal, N., BSc (UCalgary), MAsC (UBC), PhD (UBC). Health care improvement, health systems, data visualization, Stroke, implementation science, knowledge translation

Saif, A., BSc (Alexandria), MBA (NYIT), MSc (Masdar Institute), PhD (Waterloo). Stochastic optimization, supply chain management, hybrid renewable energy systems. Graduate Coordinator

Instructors

Flemming, S., BSc (UPEI), BEng (Dalhousie), MAsC (Toronto), PEng

Cross-Listed

Carter, A., MD (Western Ontario), MPH (Yale). (Cross appointed with Emergency Medicine)
Chen, J., BSc (Beihang), MSc (Beijing IT), PhD (Western Ontario). Customer returns, supply chain management, revenue management, pricing, game theory (Cross appointed with Rowe School of Business)
Johnston, C. R., BSc, MSc (Alberta), PhD (Calgary). Cardiovascular fluid mechanics, design engineering, sports engineering. (Cross appointed with Mechanical Engineering)
Kozey, J., BSc, MSc (Waterloo), PhD (TUNS). Clinical biomechanics, occupational biomechanics, ergonomics, anthropometry, workstation design, accessibility. (Cross appointed with Heath and Human Performance)
Neyedli, H., BSc (Dalhousie), MAsc, PhD (Toronto). Motor control, neurofeedback, human factors, ergonomics, interface design, combat identification, human-automation interaction (Cross appointed with Heath and Human Performance)
Nguyen-Quang, T., BSc, MSc (National Polytechnic Institute of Grenoble), PhD (Univ of Montreal and Mechanical Institute of Marseille), Transport Phenomenon, Natural patterns and Complex systems, Biological systems Modelling (cross-listed with Agriculture)
Ülku, M.A., BSc (Bilkent), MSc (Çukurova), PhD (Waterloo). Theoretical modeling of service and manufacturing systems, practical logistics policies for green supply chains, behavioural issues in operations management, sustainable consumption, mathematical modeling of societal problems. (Cross appointed with Rowe School of Business)

Adjunct Professors

Barzilai, J., BSc, MSc, DSc, (Technion). Measurement theory, decision analysis, optimization
Black, N., BAsc (Waterloo), MAsc (TUNS), PhD (UNB), PEng. (Univ of Moncton). Ergonomics, musculoskeletal injury prevention, human biomechanical modelling, design for physical disabilities, work study
Comeau, J., BSc, MSc (Moncton), PhD (Dalhousie). Approximate optimization models, optimization in forestry, production management, inventory management
Eiselt, H. A., Dr. rer. pol (Goettingen, Germany), location models, municipal solid waste, decision analysis, mathematical methods in counter terrorism
Khatab, A., MSc, PhD, HDR, Reliability, Maintenance, production, Life-cycle engineering, Sustainability.
Sandblom, C. L., Fil.Kand., Fil.Mag. (Lund), PhD (Birm), Modelling and optimization of linear, nonlinear and stochastic systems
Sarhadi, H., BSc (Iran University of Science and Technology), MSc (Bu-Ali Sina University), PhD (Memorial). Transportation Planning, Scheduling, Railway Optimization
Taghavi, M., BSc (Amir Kabir), MSc (Sharif), PhD (McMaster). Applications of Operations Research in Healthcare, Stochastic Optimization
Tajbakhsh, M., BSc, MSc (Amir Kabir), PhD (Toronto). Supply chain, inventory and production management, scheduling and OR

Co-op Program

The students who choose the Co-op Program follow the schedule below:

Year	Fall	Winter	Summer
1	Study Term 1	Study Term 2	FREE
2	Study Term 3	Study Term 4	FREE
3	Study Term 5	Work Term 1	Study Term 6
4	Work Term 2	Study Term 7	Work Term 3
5	Study Term 8	Study Term 9	

Year 3, Term 5 (Fall)

IENG 3302.03: Processes & Systems
 IENG 3303.03: Ergonomics and Work Design
 IENG 3305.03: Computational Methods and Algorithms for IE
 IENG 3344.03: Operations Research: Linear Models
 IENG 3316.03: Design of Information Management Systems

Year 3, Work Term 1 (Winter)

Year 3, Term 6 (Summer)

IENG 3304.03: Data Management & Analytics
 IENG 3320.03: Analysis and Design of Production Systems

IENG 3334.03: Industrial Statistics

IENG 3337.03: Business Operations and Entrepreneurship

IENG 3345.03: Operations Research: Stochastic and Non-Linear Models

Year 4, Work Term 2 (Fall)

Year 4, Term 7 (Winter)

IENG 4432.03: Simulation of Industrial Systems

IENG 4443.03: Quality Control and Reliability

IENG 4445.03: Facilities Design

IENG 4454.03: Design of Inventory Systems

IENG 4480.03: Industrial Engineering Design

Year 4, Work Term 3 (Summer)

Year 5, Term 8 (Fall)

IENG 4458.03: Project Management and Control

IENG 4565.03: Lean Engineering

IENG 4581X/Y.06: Industrial Engineering Design Project

IE Elective

Year 5, Term 9 (Winter)

- IENG 4529.03: Industrial and Organizational Psychology

IENG 4581X/Y.06: Industrial Engineering Design Project

IE Elective

IE Elective

Industrial Engineering Electives

- IENG 4544.03: Routing and Scheduling
- IENG 4562.03: Maintenance Engineering and Management
- IENG 4564.03: Design and Optimization of Service Systems
- IENG 4571.03: Computer Integrated Manufacturing Systems
- IENG 4573.03: Industrial Biomechanics
- IENG 4574.03: Decision and Risk Analysis
- IENG 4575.03: Stochastic Processes and Queueing
- IENG 4578.03: Organizational Aspects of Quality Management
- IENG 4579.03: Supply Chain Management
- IENG 4580.03: Modelling and Performance Analysis of Computer Networks
- IENG 4599.03: Special Topics in Industrial Engineering

Non Co-op Program

The students who choose the Non Co-op Program follow the schedule below:

Year Fall Winter Summer

- 1 Study Term 1 Study Term 2 FREE
- 2 Study Term 3 Study Term 4 Study Term 6
- 3 Study Term 5 Study Term 7 FREE
- 4 Study Term 8 Study Term 9

Students not wishing to participate in the co-op program are able to structure their academic program over a two-year time period. To do so requires the student to begin the program at the beginning of the summer study term, which commences the first week of May (Study Term 6). The student then completes Study Term 5 in the fall, and then Study Term 7 in the winter. After a summer “off”, the student completes the final two study terms in the same order as students in the co-op program thus completing the five study or academic terms within two calendar years.

Year 3, Term 5 (Fall)

- IENG 3302.03: Processes & Systems
- IENG 3303.03: Ergonomics and Work Design
- IENG 3305.03: Computational Methods and Algorithms for IE
- IENG 3344.03: Operations Research: Linear Models
- IENG 3316.03: Design of Information Management Systems

Year 3, Work Term 1 (Winter)

Year 3, Term 6 (Summer)

- IENG 3304.03: Data Management & Analytics
- IENG 3320.03: Analysis and Design of Production Systems
- IENG 3334.03: Industrial Statistics
- IENG 3337.03: Business Operations and Entrepreneurship
- IENG 3345.03: Operations Research: Stochastic and Non-Linear Models

Year 4, Work Term 2 (Fall)

Year 4, Term 7 (Winter)

- IENG 4432.03: Simulation of Industrial Systems
- IENG 4443.03: Quality Control and Reliability
- IENG 4445.03: Facilities Design
- IENG 4454.03: Design of Inventory Systems
- IENG 4480.03: Industrial Engineering Design

Year 4, Work Term 3 (Summer)

Year 5, Term 8 (Fall)

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions

IENG 2005 Engineering Economics

CREDIT HOURS: 3

This course is designed to provide students with the fundamentals of engineering economics. Engineers must function as managers in the real world of decision making where the criteria include not only technological excellence, but cost. Time value of money, project screening, and a variety of discounting analysis techniques are presented. Make versus buy decisions and repair versus replace decisions are discussed. The tax effects on project cash flow and viability are also presented. This course is designed to introduce students to these fundamentals, and apply them through the use of software and projects.

FORMATS: Lecture | Lab

IENG 2201 Modelling and Optimization for Engineers

CREDIT HOURS: 3

This course will introduce students to operations research models and methodologies to optimize the design, development and operation of engineered systems. The focus of this course will be on formulating, building and solving optimization models primarily using Microsoft Excel. Topics to be covered include linear programming, assignment models, transportation and network models, project management, decision analysis & risk, queueing models, and nonlinear optimization.

PREREQUISITES: ENGM 1081.03, ENGM 2032.03

EXCLUSIONS: ENGM 2201.03

FORMATS: Lecture | Lab

IENG 3302 Processes & Systems

CREDIT HOURS: 3

The purpose of this course is to introduce students to process analysis and systems engineering. Process analysis will include the process charting, value stream mapping, work measurement, and process improvement techniques. Systems engineering topics include an introduction to the general concepts of systems, classical linear systems theory, and how industrial engineering design can be viewed as a control system problem.

EXCLUSIONS: IENG 3301, IENG 3348

FORMATS: Lecture | Lab

IENG 3303 Ergonomics and Work Design

CREDIT HOURS: 3

Ergonomics is the science of applying knowledge of the capabilities and limitations of humans into the design of products, work spaces and systems we use every day. Topics in this course include the musculoskeletal system, anthropometry, manual material handling, work physiology, the effect of work environment on performance, human/machine interaction, cognition and information processing. Design principles based on this knowledge will be presented. This course will include labs and final design project.

CROSSLISTED: KINE 3476.03

EXCLUSIONS: IENG 3313.03, IENG 3347.03

FORMATS: Lecture | Lab

IENG 3304 Data Management & Analytics

CREDIT HOURS: 3

In this course you will learn methods of data exploration, visualization, manipulation, and analysis with the goal of using this work to inform the strategy and operations of a particular organization. Specific visualization tools available in R Studio will be taught as well as supervised and unsupervised statistical techniques such as classification, cross-validation, and clustering. The course includes a final project in which students will be given data sets from industry or government and expected to find patterns and form conclusions in order to help the client better understand their operations and inform their policies. As stated, students will be using the software package R Studio.

EXCLUSIONS: IENG 3301, IENG 3348

FORMATS: Lecture | Lab

IENG 3305 Computational Methods and Algorithms for IE

CREDIT HOURS: 3

An overview of advanced programming methods is presented with an introduction to algorithms used in industrial engineering applications. Topics covered include sorting searching, data structures, shortest paths, random number generation, simulated annealing, matrix operations, curve fitting and geometric algorithms. Theta notation (used for measuring the efficiency of algorithms is introduced, as well as analytical and empirical measurement techniques. Techniques for writing and debugging large program, and controlling numerical errors are taught. The VBA programming language will be used for implementation.

FORMATS: Lecture | Lab

IENG 3316 Design of Information Management Systems

CREDIT HOURS: 3

Techniques used in the design of information management systems to support decision making are taught. This includes the principles of systems analysis, software engineering and requirements analysis. The design of relational database systems, user interfaces and documentation are covered. Current technologies for computer hardware, software, networking and communications are reviewed. Students are taught how to program database applications in a fourth generation environment. Software development projects will be assigned.

FORMATS: Lecture | Lab

IENG 3320 Analysis and Design of Production Systems

CREDIT HOURS: 3

This course provides the student with an introduction to issues in planning and control of production systems and scheduling techniques used in production environments. Topics include line balancing models, performance measurement, materials requirements planning, production lot-sizing, just-in-time (JIT) models and other pull control systems, and job shop/flow shop scheduling and sequencing. Programs currently practiced in industry, such as Lean Manufacturing and Six-Sigma, will also be introduced.

FORMATS: Lecture | Lab

IENG 3334 Industrial Statistics

CREDIT HOURS: 3

This course covers hypothesis testing, chi-square tests and nonparametric techniques, analysis of variance and experimental design, as well as simple and multiple linear regression. Numerical examples are solved by straightforward calculation as well as by computer software, and various applications are presented.

FORMATS: Lecture | Lab

IENG 3337 Business Operations & Entrepreneurship

CREDIT HOURS: 3

The purpose of this course is to introduce the student to the management and operation of small and large businesses. Topics include the business environment in Canada, entrepreneurship, small business startup and financing, organizational theory, management cycle, human resources, industrial relations, managerial accounting, and marketing & sales. A team project centered on the creation of a business plan is an integral part of this course.

EXCLUSIONS: IENG 4547

FORMATS: Lecture | Lab

IENG 3344 Operations Research: Linear Models

CREDIT HOURS: 3

This course is an introduction to linear programming and its applications to industrial engineering design. The simplex method and duality theory are covered in detail. Formulation, solution algorithms, and applications of several problem classes are presented including network models and integer programs.

Through a class project, students are introduced to the process of developing an optimization model, including the ideas of database, matrix generators, and report writers.

FORMATS: Lecture | Lab

IENG 3345 Operations Research: Stochastic and Non-Linear Models

CREDIT HOURS: 3

This course consists of an analysis of important probabilistic and nonlinear models in operational research. These include dynamic programming, queuing models and metaheuristics. Aspects of Markov processes and nonlinear programming are introduced. Application of these methods is reinforced through a term project.

FORMATS: Lecture | Lab

IENG 4432 Simulation of Industrial Systems

CREDIT HOURS: 3

This course covers discrete event systems simulation. Model development includes validation and verification methods, the generation of pseudo-random numbers from continuous and discrete distributions, selection of probability distributions and variance reduction techniques. Statistical output analysis and inference are studied for effective interpretation of results. Applications in areas such as manufacturing, service operations, project management and system design are reviewed. Simulation software is used throughout the course.

PREREQUISITES: IENG 3305.03, IENG 3302.03, IENG 3334.03, IENG 3345.03

EXCLUSIONS: IENG 3432.03

FORMATS: Lecture | Lab

IENG 4443 Quality Control and Reliability

CREDIT HOURS: 3

This course evaluates aspects of production to ensure that products meet specifications. Statistical quality control, which is used to determine process capability and to detect process changes, involves the design and use of different types of control charts. Sampling inspection, which is used to separate good lots from poor lots, covers the design of sampling plans. Reliability is concerned with the design of products and reliability testing.

PREREQUISITES: IENG 3334.03

EXCLUSIONS: IENG 3443.03

FORMATS: Lecture

IENG 4445 Facilities Design

CREDIT HOURS: 3

This course in facilities planning and design covers topics in flow and space planning, relationship diagrams, facilities layout organizations, layout design algorithms, material handling systems, and warehouse planning. This course has a final project in which students have to design an industrial facility in teams integrating the elements of flow, personnel, layout, and material handling.

PREREQUISITES: IENG 3344.03

CROSSLISTED: IENG 6908

RESTRICTIONS: Minimum of 30 credit hours

FORMATS: Lecture | Lab

IENG 4454 Design of Inventory Systems

CREDIT HOURS: 3

This course introduces a number of quantitative methods for the analysis and of inventory systems. These include deterministic and probabilistic economic order quantity (EOQ) models and variants, single and multiple period inventory models, exchange curves, and other advanced inventory models. Forecasting algorithms applicable to inventory systems are also covered.

PREREQUISITES: IENG 3302.03, IENG 3320.03, IENG 3334.03, IENG 3345.03

FORMATS: Lecture | Lab

IENG 4458 Project and Management Control

CREDIT HOURS: 3

This course identifies the common aspects and peculiarities of projects and then illustrates the application of analytical approaches to meet the challenges of achieving effective project management. The following topics are covered: feasibility studies, project planning, cost estimation, bidding, use of professional engineering and other types of consultants, organization and control, resource allocation and project life cycle concepts. The role of the professional engineer in society and the impact that engineering in all its forms makes on the environmental, social, economic and cultural aspirations of society are discussed.

PREREQUISITES: 3344.03

EXCLUSIONS: IENG 4558

FORMATS: Lecture | Lab

IENG 4480 Industrial Engineering Design

CREDIT HOURS: 3

This is a project-based course designed to prepare students for their senior capstone design project. Students will receive instruction in areas such as expectations of project deliverables, common pitfalls, data collection, design reviews, time management, effective presentation & writing skills, and professionalism. The focus of this course will be a major team project for an actual industry client.

PREREQUISITES: IENG 3302.03, IENG 3303.03, (IENG 3304.03 or IENG 3305.03 or IENG 3316.03), (IENG 3344.03 or IENG 3345.03)

RESTRICTIONS: Minimum of 30 credit hours

FORMATS: Lecture | Lab

IENG 4500 Operations Research Methods for Systems Engineering

CREDIT HOURS: 3

This course will introduce non-industrial engineering students to operations research models and methodologies to optimize the design, development and operation of engineered systems. The objectives of this course will be to provide students with the skills to solve a variety of linear and non-linear models and the ability to recognize how such models can be applied in a wide variety of engineering disciplines. Topics to be covered include linear programming, integer programming, network models, decision analysis, dynamic programming, queuing models, and non-linear optimization. Applications will focus on diverse areas of engineering including mining, transportation, and environmental management.

PREREQUISITES: ENGM 2032.03

IENG 4529 Industrial and Organizational Psychology

CREDIT HOURS: 3

Individual behaviour and group processes are reviewed, particularly as they relate to activities in organizations. Perception, learning, motivation and attitudes are covered. The implications of different personality types at work are taught. Organizational issues such as group dynamics, communication, power and conflict are studied. Applications include job analysis, team effectiveness, personnel selection and training, job enrichment, leadership and career management.

PREREQUISITES: IENG 3302.03, IENG 3303.03, IENG 3337.03

RESTRICTIONS: Minimum of 30 credit hours

FORMATS: Lecture | Lab

IENG 4544 Routing and Scheduling

CREDIT HOURS: 3

Optimization techniques for solving vehicle routing and scheduling problems are covered. Elementary concepts and notation for graphs, networks, maps and geographic information systems (GIS) are presented. Specific issues include NP-complete problems, shortest paths and travelling salesperson problems. Vehicle routing and scheduling with capacity constraints, time windows, pick-up and delivery constraints are also discussed. Applications in manufacturing and transportation are reviewed.

PREREQUISITES: IENG 3305.03, IENG 3304.03, 3344.03

RESTRICTIONS: Minimum of 30 credit hours

FORMATS: Lecture | Lab

IENG 4545 Topics in Applied Analytics

CREDIT HOURS: 3

This course exposes students to a variety of operations research, simulation and data analytics applications and introduces to them the challenges inherent in implementing these tools in real-life situations. Topics will be chosen from areas such as: manufacturing, services, logistics, finance, healthcare and engineering, with the primary goal of understanding the underlying models and methods to allow generalization to other contexts.

PREREQUISITES: IENG 3304, IENG 3344, and IENG 4432.

FORMATS: Lecture | Tutorial

IENG 4547 Company Operations and Management

CREDIT HOURS: 3

The purpose of this course is to introduce the student to the management and operation of large and small businesses. Topics include the business environment in Canada, entrepreneurship, small business startup and financing, organizational theory, management cycle, managing projects, human resources, industrial relations, management finance, marketing and sales. A term project is an integral part of this course.

PREREQUISITES: For students entering Upper Division in 2017/18: IENG 2005.03 For students entering Upper Division prior to 2017/18: IENG 3301.03, IENG 3303.03, IENG 3305.03, IENG 3316.03, IENG 3344.03, IENG 3320.03, IENG 3321.03, IENG 3334.03 or STAT 2080.03, IENG 3345.03, IENG 3348.03 or IENG 4548.03

RESTRICTIONS: Minimum of 30 credit hours

FORMATS: Lecture | Lab

IENG 4558 Project Management and Control

CREDIT HOURS: 3

This course identifies the common aspects and peculiarities of projects and then illustrates the application of analytical approaches to meet the challenges of achieving effective project management. The following topics are covered: feasibility studies, project planning, cost estimation, bidding, use of professional engineering and other types of consultants, organization and control, resource allocation and project life cycle concepts. The role of the professional engineer in society and the impact that engineering in all its forms makes on the environmental, social, economic and cultural aspirations of society are discussed.

FORMATS: Lecture | Lab

IENG 4562 Maintenance Engineering and Management

CREDIT HOURS: 3

The course deals with basic maintenance systems of equipment and buildings, maintenance job planning and scheduling, maintenance work measurement/universal maintenance standard (UMS), breakdown versus preventive maintenance, total productive maintenance (TPM), budgets and cost control, computerized maintenance management information system, reliability measurement based on the Weibull distribution, maintainability measures and managing maintenance.

PREREQUISITES: IENG 3305.03, IENG 3344.03, IENG 3304.03, IENG 3320.03, IENG 3334.03, IENG 3345.03, IENG 4443.03

RESTRICTIONS: Minimum of 30 credit hours

FORMATS: Lecture | Lab

IENG 4564 Design and Optimization of Health Care Systems

CREDIT HOURS: 3

This course focuses on the design and optimization of health care systems, Canada's largest industry. It illustrates how industrial engineering techniques can be applied to health care systems. Topics include an overview of Canadian and international health care systems, measurement and data in health care, quality control and improvement, process mapping, lean/six-sigma, demand and capacity planning, resource allocation, scheduling, supply chain management, and simulation.

PREREQUISITES: IENG 3302.03, IENG 3345.03, IENG 4432.03

RESTRICTIONS: Minimum of 30 credit hours

FORMATS: Lecture | Lab

IENG 4565 Lean Engineering

CREDIT HOURS: 3

Lean Six Sigma is a process improvement methodology used in several organizations, including manufacturing, service industries, healthcare, government and retail. This course will cover the Lean Six Sigma fundamental principles of eliminating waste and providing value to customers. We will explore the DMAIC approach, including developing a problem statement, stakeholder analysis, value stream mapping, Gamba, A3, data collection plans, root cause analysis and change management.

PREREQUISITES: IENG 3304.03, IENG 3320.03, IENG 3334.03, IENG 3337.03

FORMATS: Lecture | Lab

IENG 4567 Engineering Risk Management

CREDIT HOURS: 3

The course introduces risk management in engineering systems, focusing on industrial safety, while also considering wider aspects of societal risk governance. The course addresses fundamental concepts and theories in risk analysis, organizational risk management, risk governance, risk perception, risk communication, and stakeholder involvement. Emphasis is on principles, methods, and techniques for risk assessment and risk-informed decision making, covering the risk identification, analysis, and evaluation stages. Analytical, quantitative risk and decision analysis techniques are in focus.

PREREQUISITES: For students entering Upper Division after 2017/2018: IENG 3302.03, IENG 3303.03, IENG IENG3304.03, 3305.03, IENG 3316.03, IENG 3344.03, IENG 3320.03, IENG 3334.03, IENG 3337.03, IENG 3345.03. For students entering Upper Division prior to 2017/2018: IENG 3301.03, IENG 3303.03, IENG 3305.03, IENG 3316.03, IENG 3344.03, IENG 3320.03, IENG 3321.03, IENG 3334.03 or STAT 2080.03, IENG 3345.03, IENG 3348.03 or IENG 4548.03.

RESTRICTIONS: Minimum of 30 credit hours

FORMATS: Lecture | Lab

IENG 4568 Quantitative Project Management

CREDIT HOURS: 3

This class covers basic and advanced topics in project management. Mixed integer linear programming models for planning and monitoring industrial project operations will be presented. Topics covered include scheduling of large-scale projects, multi-mode resource-constrained project scheduling (RCPS), critical chain project management (CCPM), resource buffers and resource levelling. Several software packages are presented and used to solve assignments, case studies and the term project.

PREREQUISITES: IENG 3344

EXCLUSIONS: IENG 4558

FORMATS: Lecture | Lab

IENG 4570 Project Management for Industrial Engineers

CREDIT HOURS: 3

This course identifies the common aspects and peculiarities of projects and then illustrates the application of analytical approaches to meet the challenges of achieving effective project management. The following topics are covered: feasibility studies, project planning, cost estimation, bidding, use of professional engineering and other types of consultants, organization and control, resource allocation and project life cycle concepts. The role of the professional engineer in society and the impact that engineering in all its forms makes on the environmental, social, economic and cultural aspirations of society are discussed.

PREREQUISITES: For students entering Upper Division in 2017/18: IENG 3344.03 For students entering Upper Division prior to 2017/18: IENG 3301.03, IENG 3303.03, IENG 3305.03, IENG 3316.03, IENG 3344.03, IENG 3320.03, IENG 3321.03, IENG 3334.03 or STAT 2080.03, IENG 3345.03, IENG 3348.03 or IENG 4548.03

EXCLUSIONS: IENG 4558.03

FORMATS: Lecture | Lab

IENG 4571 Computer Integrated Manufacturing Systems

CREDIT HOURS: 3

Techniques are introduced for the analysis and design of computer integrated manufacturing systems. The architecture of CIM systems is discussed, including machining stations, material handling, robotics, computer control and information systems. Specific topics include manufacturing simulation, automated material handling, warehouse management, robotics, manufacturing planning and control, just-in-time systems, group technology, cellular manufacturing, flexible manufacturing systems, concurrent engineering, computer aided process planning and information system design.

PREREQUISITES: IENG 3320.03, IENG 3321.03, IENG 4432.03

FORMATS: Lecture | Lab

IENG 4573 Industrial Biomechanics

CREDIT HOURS: 3

The course primarily deals with the functioning of the structural elements of the human body and the effects of external and internal forces on the body. Due emphasis is given to the biomechanical approach to job design. This takes into account human motor capabilities and limitations, work physiology, task demands, equipment and workplace characteristics in an integrated manner. Use of bioinstrumentation and applications of biomechanics in work, industry and rehabilitation are discussed.

FORMATS: Lecture | Lab

IENG 4574 Decision and Risk Analysis

CREDIT HOURS: 3

This course teaches the principles and applications of decision analysis. The cognitive processes involved with information acquisition, judgment, value assessment, and decision-making are presented. Methods for scoping a decision-making problem, decomposing it into elements, establishing criteria, and

evaluating the options are discussed. Probability assessment under uncertainty, decision trees, value of information, utility theory, and multiple-agent contexts are explored to address increasingly complex scenarios.

PREREQUISITES: For students entering Upper Division in 2017/18: IENG 3302.03, IENG 3303.03, IENG 3305.03, IENG 3316.03, IENG 3344.03, IENG 3304.03, IENG 3320.03, IENG 3334.03, IENG 3337.03, IENG 3345.03 For students entering Upper Division prior to 2017/18: IENG 3301.03, IENG 3303.03, IENG 3305.03, IENG 3316.03, IENG 3344.03, IENG 3320.03, IENG 3321.03, IENG 3334.03 or STAT 2080.03, IENG 3345.03, IENG 3348.04 or IENG 4548.03

RESTRICTIONS: Minimum of 30 credit hours

FORMATS: Lecture | Lab

IENG 4575 Stochastic Processes and Queueing

CREDIT HOURS: 3

This course covers the analysis of stochastic models. After a review of the relevant aspects of probability theory, the course examines discrete-time Markov chains, Poisson processes, continuous-time Markov chains, and renewal theory. The course also touches on applications of the theory to queueing, inventory, and reliability.

PREREQUISITES: IENG 3344.03, IENG 3345.03

RESTRICTIONS: Minimum of 30 credit hours

FORMATS: Lecture | Lab

IENG 4578 Organizational Aspects of Quality Management

CREDIT HOURS: 3

In this course, quality is investigated as a strategic initiative for organizations. The concept of quality is described in relation to the philosophies of Shewart, Deming, and Juran. The organizational structures needed to support Total Quality Management (TQM) programs are described. Tools for process analysis and improvement are discussed, as is the concept of change management. The course concludes with an evaluation of current quality certification protocols, particularly the ISO 9000 series of standards.

RESTRICTIONS: Minimum of 30 credit hours

FORMATS: Lecture | Lab

IENG 4579 Supply Chain Management

CREDIT HOURS: 3

This course covers the design, analysis and operational control of manufacturing supply chain systems. Models of the supply chain at the strategic, tactical and operational levels are examined as well as the incorporation of these models in a variety of decision support systems. The role of information technology, including enterprise resource planning software, is studied in the supply chain context.

PREREQUISITES: IENG 3344.03, IENG 3320.03, IENG 4454.03

RESTRICTIONS: Minimum of 30 credit hours

FORMATS: Lecture | Lab

IENG 4580 Modeling and Performance Analysis of Computer Networks

CREDIT HOURS: 3

The fundamentals of computer network operation and design are covered. Topics include protocols, wide area networks, local area networks, internetworks, performance measurement, and data network simulation. A network design project will be assigned.

PREREQUISITES: IENG 4432.03

RESTRICTIONS: Minimum of 30 credit hours

FORMATS: Lecture | Lab

IENG 4582 Industrial Engineering Design Project

CREDIT HOURS: 3

In this course, the students work in groups on an actual industrial engineering design problem in an organization. The problem may be in a manufacturing plant, a consulting firm, or a service industry. The ability to solve problems and communicate with the client organizations and with professional Industrial Engineers is stressed. Students are required to maintain a professional log, to prepare an interim report, and to demonstrate their presentation skills.

CALENDAR NOTES: Credit can only be given for this course if both IENG 4582 and IENG 4583 are completed in consecutive terms and partial credit cannot be given for a single term.

PREREQUISITES: IENG 4432.03, IENG 4443.03, IENG 4445.03, IENG 4454.03, IENG 4480.03

EXCLUSIONS: IENG 4581

FORMATS: Lecture | Lab

IENG 4583 Industrial Engineering Design Project

CREDIT HOURS: 3

In this course, the students work in groups on an actual industrial engineering design problem in an organization. The problem may be in a manufacturing plant, a consulting firm, or a service industry. The ability to solve problems and communicate with the client organizations and with professional Industrial Engineers is stressed. Students are required to maintain a professional log, to prepare an interim report, and to demonstrate their presentation skills.

CALENDAR NOTES: Credit can only be given for this course if IENG 4582 and IENG 4583 are completed in consecutive terms; partial credit cannot be given for a single term.

PREREQUISITES: IENG 4432.03, IENG 4443.03, IENG 4445.03, IENG 4454.03, IENG 4480.03

EXCLUSIONS: IENG 4581

FORMATS: Lecture | Lab

IENG 4598 Special Topics in Industrial Engineering II

CREDIT HOURS: 3

This senior year elective course will include special topics in Industrial Engineering that are not included in the regular offerings of the department. The course will be a lecture course, not directed studies. Topics may vary each year, and therefore students should consult with the department for more information before registering.

PREREQUISITES: IENG 3302.03, IENG 3303.03, IENG 3305.03, IENG 3316.03, IENG 3344.03, IENG 3304.03, IENG 3320.03, IENG 3334.03, IENG 3337.03, IENG 3345.03

FORMATS: Lecture | Lab

IENG 4599 Special Topics in Industrial Engineering

CREDIT HOURS: 3

This senior year elective course will include special topics in Industrial Engineering that are not included in the regular offerings of the department. The course will be a lecture course, not directed studies. Topics may vary each year, and therefore students should consult with the department for more information before registering.

PREREQUISITES: IENG 3302.03, IENG 3303.03, IENG 3305.03, IENG 3316.03, IENG 3344.03, IENG 3304.03, IENG 3320.03, IENG 3334.03, IENG 3337.03, IENG 3345.03

RESTRICTIONS: Minimum of 30 credit hours

FORMATS: Lecture | Lab

IENG 8891 Co-op Work-Term I

CREDIT HOURS: 0

PREREQUISITES: IENG 8890

IENG 8892 Co-op Work-Term II

CREDIT HOURS: 0

PREREQUISITES: IENG 8891

IENG 8893 Co-op Work-Term III

Mechanical Engineering

Location:

Sexton Campus

5269 Morris Street

Building C1 - Room 360

PO BOX 15000

Halifax NS

B3H 4R2

Phone Number: (902) 494-3989

Fax Number: (902) 423-6711

Introduction

Mechanical Engineering covers a very broad field of professional activity in such areas as land, sea, air, and space transportation; primary and secondary manufacturing industries; energy supply, conversion and utilization; environmental control; and industrial management. In these areas, the Mechanical Engineer may become involved with design, construction, operation, development, research, planning, sales and management.

The curriculum is designed to develop an understanding of the fundamental principles of Mechanical Engineering through lecture, tutorial, and laboratory activities. Well-instrumented laboratories in: thermofluids, energy conversion, stress analysis, vibrations, control systems, and materials, provide experience in measurements and applications, to ensure a thorough understanding and appreciation of the subject matter. Courses in mathematics, and various non-technical subjects are offered to broaden the student's outlook and understanding of the profession.

Laboratory involvement is considered an important component of mechanical engineering students' education. Emphasis in the laboratory is placed on project work in which design, development and testing are combined in term projects. The laboratory facilities include extensive equipment which is available for use by both undergraduate and graduate students. Measurement techniques and interpretation of test data are emphasized in the laboratories.

Most undergraduate laboratories use high-speed PC-based digital data acquisition and control systems with graphical interfaces for lab experiments and computations, and the Department has several advanced computer graphics systems.

A design project is an integral part of the senior year curriculum. This involves the student in the original design of a machine or system. Generally, the material learned in several courses must be applied in an imaginative way to achieve the required objective. Non-credit machine-shop practice courses are available to aid the design and construction of projects. Many design projects are sponsored by industry. Most projects involve hardware and typically result in construction and testing of prototypes.

Postgraduate studies in the Department are concentrated in the areas of renewable energy, conversion and storage, stress analysis, heat transfer, multi-phase flow, fluid and thermal power, robotics, MEMS and computer aided design, materials, systems, oceans and manufacturing. Research and project master's degrees as well as the doctoral degree are offered.

Program Guide

Mechanical Engineering offers two versions of the BEng Program:

1. Co-op Program
2. Non Co-op Program

Staff

Dean

Newhook, J., BEng, MAsC (TUNS), PhD (Dalhousie), PEng

Department Head

Groulx, D., BSc, PhD (Sherbrooke), PEng, FCSME

Professors Emeriti

Hancock, H., BAsC, MAsC, PhD (Toronto), PEng

Kalamkarov, A. L., BSc, MAsC, PhD (Moscow State), DSc (Acad Sci, USSR), PEng

Russell, L. T., BEng (TUNS), MSc (Queen's), PhD (Car), PEng

Professors

Allen, P. L., BSc (Mt. A), BEng (TUNS), MEng (UWO), PhD (TUNS), PEng

Bauer, R. J., BSc (Waterloo), PhD (Toronto), FEC, PEng. Graduate Program Co-ordinator

Bishop, D. P., BEng, MAsC, PhD (TUNS), PEng

Corbin, S. F., BEng, MAsC (TUNS), PhD (McMaster), PEng. NSERC/Pratt and Whitney Canada Industrial Research Chair in

Structural Brazing and Processing of Power Metallurgy Superalloys

Farhat, Z., BAsC, MAsC, PhD (Windsor), PEng

Groulx, D., BSc, PhD (Sherbrooke), PEng, FCSME

Hubbard, T., BSc (Dalhousie), BEng (TUNS), PhD (NUS, Singapore), PEng, FASME, FEIC

Pan, Y.J., BEng (Yanshan, China), MEng (Zhejiang, China), PhD (NUS, Singapore), PEng, FASME, FEIC

Plucknett, K. P., BSc, PhD (Warwick), Izaak Walton Killam Memorial Research Chair in Engineering Materials and Advanced Manufacturing

Swan, L., BSc (CalPoly), MAsC, PhD (Dalhousie), PEng

Taheri, F., BEng, MAsC, PhD (TUNS), PEng

Ugursal, V. I., BSc (Bogazici), MEng, PhD (TUNS), PEng, FCSME. Co-op Co-ordinator

Warkentin, A., BEng Mgt, MEng (McMaster), PhD (Waterloo), PEng.

Yemenidjian, N. B., BEng, PhD (Concordia), PEng

Associate Professors

Doman, D. A., BAsC, MAsC (Waterloo), PhD (Dalhousie), PEng

Johnston, C. R., BSc, MSc (Alberta), PhD (Calgary), PEng, FCEEA, NSERC Chair in Design Engineering, Undergraduate Co-ordinator

Seto, M., BSc, MSc, PhD (UBC), PEng, Irving Shipbuilding Chair in Marine Engineering and Autonomous Systems

Assistant Professors

Nasiri, A. BSc, MSc (SUT, Iran), PhD (Waterloo), Canada Research Chair II in Ocean Engineering

Senior Instructor

Warner, R. A., BEng (TUNS), PEng

Instructor

Pharoah, H., BSc (Univ of Calgary), MAsC (Dalhousie), PEng

Cross Appointment

Jarjoura, G., D.Eng (NTUA), MAsC, PhD (UoT), Post Doc. (MIT)

Adjunct Professors

Caley, W. F., BSc (Eng), MSc (Eng) (Queen's), PhD (Toronto), PEng

Dahn, J. R., BSc (Dalhousie), MSc, PhD (UBC)

Donaldson, I., BSc (Univ of Michigan), MSc (Worcester Polytechnic Institute)

Hougan, G., MDes (Calgary), BES (Waterloo)

Islam, A., BAsC (BUET), MAsC, PhD (Dalhousie)

Joseph, A., BSc (St. FX), MSc (NSAC), PhD (Dalhousie)

Kalamkarov, A. L., BSc, MAsC, PhD (Moscow State), DSc (Acad Sci, USSR), PEng

Kipouros, G. J., DiplEng (NTU Athens), MAsC, PhD (Toronto), PEng

Mahallati, A., BEng (Marine Eng), MAsC (Dalhousie), PhD (Carleton)

Nolting, A., BAsC (Waterloo), MAsC (Royal Military College), PhD (Royal Military College)

Swingler, A., Dip Tech (NSCC), BEng (Lakehead), PhD (UBC)

Co-op Program

The students who choose the Co-op Program follow the schedule below:

Year	Fall	Winter	Summer
1	Study Term 1	Study Term 2	FREE
2	Study Term 3	Study Term 4	FREE
3	Work Term 1	Study Term 5	Work Term 2
4	Study Term 6	Work Term 3	Work Term 4
5	Study Term 7	Study Term 8	

Years 1 and 2 follow the lower division core program outlined in the Engineering section of this calendar.

FOR STUDENTS starting upper division in Year 3 from Fall 2022 onward, the program is presented below:

Year 3, Work Term 1 (Fall)

Year 3, Study Term 5 (Winter)

- MECH 3010.03: Machine Design: Loading of Component
- MECH 3100.03: Material Engineering: Controlling Mechanical Properties
- MECH 3500.03: Dynamics of Machines
- MECH 3810.03: Mechanical Engineering Thermodynamics
- MECH 3905.03: Introduction to Mechatronics
- CPST 3030.03: Engineering in Society II

Year 3, Work Term 2 (Summer)

Year 4, Study Term 6 (Fall)

- MECH 3020.03: Machine Design: Power Components
- MECH 3200.03: Material Engineering: Structure-Porosity Relationships
- MECH 3305.03: Fluid Mechanics
- MECH 3705.03: Heat Transfer
- MECH 3900.03: Systems I
- Humanities Course*

Year 4, Work Term 3 (Winter)

Year 4, Work Term 4 (Summer)

Year 5, Study Term 7 (Fall)

- MECH 4015.05: Design Project I
- MECH 4600.03: Engineering Measurements
- MECH 4665.03: Finite Element Methods or MECH 4865.03: Computational Fluid Dynamics
- Technical Elective I
- Technical Elective II

Year 5, Study Term 8 (Winter)

- MECH 4025.05: Design Project II
- MECH 4300.03: Stress Analysis
- MECH 4900.03: Systems II
- Technical Elective III
- Technical Elective IV

FOR STUDENTS **already in upper division**, prior to Fall 2022, continue in the program they were accepted in as follows:

Year 3, Work Term 1 (Fall)

Year 3, Study Term 5 (Winter)

- MECH 3010.03: Machine Design: Loading of Components
- MECH 3500.03: Dynamics of Machines
- MECH 3805.03: Mechanical Engineering Thermodynamics
- CPST 3030.03: Engineering in Society II
- ENGM 3356.03: Numerical Methods and Partial Differential Equations
- MATL 3500.03: Materials Engineering

Year 3, Work Term 2 (Summer)

Year 4, Study Term 6 (Fall)

- MECH 3020.03: Machine Design: Power Components
- MECH 3305.03: Fluid Mechanics
- MECH 3660.03: Finite Element Method in Mechanical Design
- MECH 3705.03: Heat Transfer
- MECH 3900.03: Systems I
- Humanities Course*

Year 4, Work Term 3 (Winter)

Year 4, Work Term 4 (Summer)

Year 5, Study Term 7 (Fall)

- MECH 4015.05: Design Project I
- MECH 4300.03: Stress Analysis
- MECH 4600.03: Engineering Measurements
- MECH 4805.03: Thermo-Fluid Engineering III
- Technical Elective I

Year 5, Study Term 8 (Winter)

- MECH 4025.05: Design Project II
- MECH 4500.03: Vibrations
- MECH 4900.03: Systems II
- Technical Elective II
- Technical Elective III

The list of technical elective available is presented in the Technical Elective Courses portion of this calendar.

*Humanities Course

Refer to general Bachelor of Engineering - Introduction section for details.

Non Co-op Program

The students who choose the Non Co-op Program follow the schedule below:

Year	Fall	Winter	Summer
1	Study Term 1	Study Term 2	FREE
2	Study Term 3	Study Term 4	FREE
3	Study Term 6	Study Term 5	FREE
4	Study Term 7	Study Term 8	

Non co-op students take the same academic program as the co-op students. (Refer to Co-op Program for the list of courses per term). Non Co-op Students may take Study Term 6 before Study Term 5, if desired, to complete their degree in a total of four years.

Technical Elective Courses

- MECH 4000.03: Manufacturing
- MECH 4110.03: Ferrous Alloys
- MECH 4115.03: Non Ferrous Alloys
- MECH 4120.03: Metal Working Processes
- MECH 4130.03: Failure Analysis

- MECH 4140.03: Materials and Process Selection
- MECH 4190.03: Introduction to Ceramic and Glass Materials
- MECH 4210.03: Introduction to Additive Manufacturing
- MECH 4230.03: Materials Science for Metal Additive Manufacturing
- MECH 4270.03: Welding Metallurgy
- MECH 4280.03: Solidification
- MECH 4290.03: Corrosion and Degradation of Materials
- MECH 4321.03: 3D Printing
- MECH 4340.03: Energy Management I
- MECH 4440.03: Principles of Marine Craft Design
- MECH 4444.03: Mechatronics
- MECH 4450.03: Marine Craft Design and Construction
- MECH 4510.03: Mechanics of Composite Materials
- MECH 4521.03: Applied Dynamics
- MECH 4540.03: Aerodynamics
- MECH 4550.03: Vehicle Dynamics
- MECH 4560.03: Space Systems
- MECH 4631.03: CAD/CAM
- MECH 4640.03: Robotics
- MECH 4650.03: Biomechanical Engineering
- MECH 4670.03: Finite Element Simulation Techniques
- MECH 4720.03: Advanced Heat Exchanger Design
- MECH 4760.03: Optical Components and Instruments
- MECH 4820.03: Energy from Renewable Resources
- MECH 4850.03: Solar Energy Engineering
- MECH 4851.03: Heating, Ventilating & Air Conditioning
- MECH 4880.03: Introduction to Nuclear Engineering
- MECH 4950.03: Advanced Control Engineering

NOTES:

1. Not all of these courses will be offered every year.
2. Seniors may take one graduate course as a technical elective with the permission of the undergraduate advisor of the Mechanical Engineering department and the professor offering the course.
3. Seniors may take one technical elective from another engineering department at Dalhousie with the permission of the undergraduate advisor of the Mechanical Engineering department and the professor offering the course.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions

MECH 2400 Dynamics

CREDIT HOURS: 3

Dynamics considers the kinematics (displacement, velocity, acceleration) and kinetics (forces, energy, momentum) of a single particle (mass without volume), a rigid body (distributed mass) and composite bodies. The course builds on the concepts introduced in Statics, by expanding from a force neutral free body diagram to one with non-zero net forces causing a second mass-acceleration diagram. The engineering techniques are applied to practical examples such as

vehicles, rockets and machine mechanisms.
PREREQUISITES: ENGI 1203, ENGM 2101
EXCLUSIONS: ENGI 2400.03
FORMATS: Lecture | Tutorial

MECH 3010 Machine Design I: Loading of Components

CREDIT HOURS: 3

The application of basic methods and concepts of strength of materials to machine design including design concepts, stress, and theories of failure is developed. Topics include: load analysis, materials, static stresses, strain and deflection, failure, impact, fatigue, surface damage. Applications include: screw fastenings, springs.

FORMATS: Lecture | Tutorial

MECH 3020 Machine Design II: Power Components

CREDIT HOURS: 3

The use of engineering principles in the design of machine power components is developed. Topics include: Lubrication and sliding bearings, roller bearings, spur gears, helical, bevel and worm gears, shafts, clutches and brakes, power transmissions such as belts and chains.

FORMATS: Lecture | Lab

MECH 3100 Material Engineering: Controlling Mechanical Properties

CREDIT HOURS: 3

This course introduces fundamental concepts of crystallographic defects, diffusion and phase diagrams. It describes how these concepts influence the microstructure of a material and the means through which this can be controlled to achieve a targeted combination of mechanical properties in a finished product

EXCLUSIONS: MATL 3500.03

FORMATS: Lecture | Lab

MECH 3150 Materials Engineering

CREDIT HOURS: 3

This course correlates properties of engineering materials with their structure. Laboratory objectives include preparation of reports in publication format and illustration of lecture material. Basic concepts of crystallography, chemical bonding and binary phase diagrams are introduced. These are used to describe properties of metallic and nonmetallic materials and how these may be controlled by engineers. Materials discussed include ferrous and nonferrous metals and alloys, ceramics, composites and semiconductors.

FORMATS: Lecture | Lab

MECH 3200 Material Engineering: Structure–Property Relationships

CREDIT HOURS: 3

This course introduces students to the structure of atoms, atomic bonding, and crystallography. These topics are conveyed in the context of various material systems with an emphasis on how they correlate to material properties (physical, chemical, etc.).

EXCLUSIONS: MECH 3660

FORMATS: Lecture | Lab

MECH 3305 Fluid Mechanics

CREDIT HOURS: 3

This course presents the dynamic governing equations of fluid flow in differential forms: continuity, Navier-Stokes and energy. Concepts of stream function, vorticity and velocity potential are also introduced. The physics and modeling of Turbulence in fluid systems is shown. The boundary layer theory is shown and flow past immersed bodies are studied: concepts of drag and lift forces are presented. Compressible flow is introduced: speed of sound, nozzle and diffuser, shock waves, Rayleigh and Fanno flow are all studied.

FORMATS: Lecture | Lab | Tutorial

MECH 3500 Dynamics of Machines

CREDIT HOURS: 3

The course focuses on design of mechanism, their motion, static and dynamic loads, and power transmission. It includes planar and spatial 4-bar and 6-bar linkages, cam mechanisms, gear trains, rotor systems, and manipulators. Linkage inversion, transformation, and synthesis are used for design of new mechanisms. Graphic, analytical, computer, and physical modeling techniques are used. Many real life mechanisms are analyzed.

FORMATS: Lecture | Tutorial

MECH 3660 Finite Element Method in Mechanical Design

CREDIT HOURS: 3

This course deals with the application of the finite element method to stress analysis problems encountered in mechanical design. Introduction to the finite element method is followed by extensive applications to the design of machine and structural components. Mechanical and thermal stresses in trusses, beams, axisymmetric, shell, and 3D solid elements are considered. Professional finite element modeling best practices are discussed. A finite element pre-processor, code, post-processor are introduced and used in the course assignments.

FORMATS: Lecture | Lab | Tutorial

MECH 3705 Heat Transfer

CREDIT HOURS: 3

This course is an introduction to the three modes of heat transfer: conduction, convection and radiation. Topics covered are: conduction including steady-state and transient, in one and multi-dimensional system, and the study of extended surfaces; force and free convection for internal and external flows; and the fundamentals of radiation heat transfer including blackbody radiation, gray surfaces and radiation exchange between surfaces. Applications to heat exchanger design are covered.

FORMATS: Lecture | Lab | Tutorial

MECH 3805 Mechanical Engineering Thermodynamics

CREDIT HOURS: 3

This course builds on the thermodynamics concepts presented in Thermo-Fluid Engineering I. Introductory concepts of cycles, processes, heat and work are reviewed. The first and second law of thermodynamics are applied to open and closed systems, both steady-state and transient processes. Availability and exergy analysis are presented. Vapour and gas power and refrigeration cycles are studied; absorption refrigeration cycles and refrigerants are also discussed.

FORMATS: Lecture | Tutorial

MECH 3810 Thermodynamics

CREDIT HOURS: 3

This course builds on the thermodynamic concepts presented in Thermo-Fluid Engineering I. Introductory concepts of cycles, processes, heat and work are reviewed. The first and second law of thermodynamics are applied to open and closed systems, both steady-state and transient processes. Availability and exergy analysis are presented. Vapour, gas power and refrigeration cycles are studied. Non-reacting mixtures, psychrometry, combustion and chemical equilibrium are also covered.

PREREQUISITES: Remove Prerequisites: ENGI 2102.03 and 2103.03

EXCLUSIONS: Add Exclusion: MECH 3805.03

FORMATS: Lecture | Tutorial

MECH 3900 Systems I

CREDIT HOURS: 3

The course deals with the analysis of dynamic physical systems. Ordinary-differential-equation models are developed for mechanical, thermal, fluid and electrical systems. System equations are solved using classical methods and Laplace-transform techniques. S-plane characteristics are introduced, as are block-diagram & state-space representations. Systems are simulated by digital computer in the laboratory portion.

FORMATS: Lecture | Lab | Tutorial

MECH 3905 Introduction to Mechatronics

CREDIT HOURS: 3

Mechatronics is a multi-disciplinary field that involves mechanical, electrical, computer and control engineering. This course introduces the fundamentals of programming microcontrollers and interfacing with various sensors and actuators. Topics include number systems, microcontroller architecture, programming, communication protocols, input/output device interfacing, measurement and control. Hands-on labs as well as a design project enable students to apply the concepts being taught

EXCLUSIONS: ENGM 3356.03

FORMATS: Lecture | Lab

MECH 4000 Manufacturing

CREDIT HOURS: 3

The course starts with a manufacturing process overview and a detailed process study in the following areas: manual assembly, machining, injection molding, thermoforming and casting. A relationship between process and design is examined and design for manufacturing methodologies is introduced. Quality control and quality assurance issues are overviewed. The principles of cell design for assembly and machining are introduced and part redesign for process

and system is studied.

PREREQUISITES: MECH 3020.03

FORMATS: Lecture | Tutorial

MECH 4015 Design Project I

CREDIT HOURS: 5

This course provides a project-based exercise in the engineering design process in a real world engineering context. Students work in teams and are expected to take the project from its preliminary stage through the design stages to the ultimate completion of the design including: technical reports with calculations, engineering drawings, peer evaluation, oral presentations and possibly a physical prototype or model.

PREREQUISITES: MECH 3010.03 or MECH 3020.03

FORMATS: Lecture | Lab | Tutorial

MECH 4025 Design Project II

CREDIT HOURS: 5

This course is a direct continuation of Design Project I leading to the implementation of the student team design. All projects involve evaluation/testing of student designs, this is usually done via a constructed physical prototype or a model. Students produce a final technical report, conduct peer evaluations and give a formal presentation.

PREREQUISITES: MECH 4015.05

FORMATS: Lecture | Lab

MECH 4110 Ferrous Alloys

CREDIT HOURS: 3

The course reviews the iron-carbon system, including the transformation products of austenite, alloying elements and thermo-mechanical treatments. Specific classes of steels, ranging from the simple plain carbon steels to the duplex stainless steels, are considered. Steels selection in different applications is covered.

PREREQUISITES: MATL 3500.03 OR MECH 3100.03 & MECH 3200.03

FORMATS: Lecture | Tutorial

MECH 4115 Non-Ferrous Alloys

CREDIT HOURS: 3

The objective of this course is to introduce students to the structure, properties, and processing of different types of non-ferrous alloys. Alloys of principal interest include those that are premised on aluminum, copper, nickel, and titanium. Select applications for these industrially-important material are also reviewed.

PREREQUISITES: MATL 3500.03 OR MECH 3100.03 & MECH 3200.03

FORMATS: Lecture | Lab

MECH 4120 Metal Working Processes

CREDIT HOURS: 3

The fundamentals of metal working in relation to rolling, forging, extrusion, and drawing are studied. In each scenario the physical and mechanical metallurgy principals involved are considered as in the role of tribology. Case studies for a variety of processes are considered.

PREREQUISITES: MATL 3500.03 OR MECH 3100.03 & MECH 3200.03

FORMATS: Lecture | Tutorial

MECH 4130 Failure Analysis

CREDIT HOURS: 3

The course reviews various aspects related failure of mechanical components and identifies fundamental sources of failures. Failures due to various mechanisms, such as, ductile and brittle fractures, creep, fatigue, corrosion and wear will be studied. Fractography and microstructural analysis of failed components is examined. Common techniques and tools used in failure analysis, as well as, procedure of sample collection, preparation and preservation will be considered. Case studies of failures in different industries will be covered.

PREREQUISITES: MATL 3500.03 OR MECH 3100.03 & MECH 3200.03

FORMATS: Lecture | Tutorial

MECH 4140 Materials and Process Selection

CREDIT HOURS: 3

This course will introduce methods for choosing materials, and the processes used to produce them, for mechanical design. Selection using a wide range of materials and properties important for engineering performance will be emphasized. Cost, environmental impact, life cycle and sustainable

materials/processes will be included in the selection process.
PREREQUISITES: MATL 3500.03 OR MECH 3100.03 & MECH 3200.03
FORMATS: Lecture | Tutorial

MECH 4190 Introduction to Ceramic and Glass Materials

CREDIT HOURS: 3

This course includes a description of the chemical and structural characteristics of various common non-metallic materials (specifically ceramics and glasses), as well as their manufacturing methods. A number of engineering applications for such materials are considered, including their use in composite systems. The chemistry of multi-component systems are also discussed. The laboratory experiments are designed to illustrate the lecture material.

PREREQUISITES: MATL3500.03 or MECH3100.03 & MECH3200.03
FORMATS: Lecture | Lab

MECH 4210 Introduction to Additive Manufacturing

CREDIT HOURS: 3

This course is designed to give students a fundamental understanding of additive manufacturing (also known as 3D printing). Lectures will cover the complete flow path from foundational design concepts to the inspection of a finished component. An emphasis will be placed on metallic materials. Practical aspects of the technology will be illustrated through case studies of commercial products and hands-on laboratories dedicated to feedstock systems as well as component fabrication using multiple additive manufacturing technologies.

PREREQUISITES: MATL 3500.03 OR MECH 3100.03 & MECH 3200.03
FORMATS: Lecture | Lab

MECH 4230 Materials Science for Metal Additive Manufacturing

CREDIT HOURS: 3

This course is focused on the metallurgy and performance analysis of a wide range of additively manufactured (AM) metals. AM process-structure-properties relationships, processing issues and defects, solidifications and thermal cycles associated with metal AM, and AM challenges, trends and applications will be covered in this course.

PREREQUISITES: MATL 3500.03 OR MECH 3100.03 & MECH 3200.03
FORMATS: Lecture | Lab | Tutorial

MECH 4270 Welding Metallurgy

CREDIT HOURS: 3

This course will cover the effect of mass and heat flow, for the various joining processes, on the metallurgical properties of the parent and weld metal. The processes will include brazing, soldering, solid phase welding and fusion welding for the major classifications of metals such as carbon and alloy steels and non-ferrous metals. This course will include laboratory periods designed to reinforce lecture material.

PREREQUISITES: MATL 3500.03 OR MECH3100.03 & MECH 3200.03
EXCLUSIONS: MATL 6014.03
FORMATS: Lecture | Lab

MECH 4280 Solidification & Casting

CREDIT HOURS: 3

The fundamental principles of solidification and practical applications in the casting industry are dealt within this course. The topics covered are nucleation processes, the growth of single crystals, plane front, cellular and dendritic solidification in single and polyphase alloys, solidification of castings, ingot moulding and core making processes, moulding sands, design of risers and gates, and the melting of metals.

PREREQUISITES: MATL 3500.03 OR MECH 3100.03 & MECH 3200.03
FORMATS: Lecture | Lab

MECH 4290 Corrosion and Degradation of Materials

CREDIT HOURS: 3

This course introduces the students to the basic theory of corrosion as well as the basic principles of hydrometallurgy. Students will also be introduced to the different types of corrosion and the practices of corrosion prevention and remediation.

PREREQUISITES: MATL 3500.03 OR MECH 3100.03 & MECH 3200.03
FORMATS: Lecture | Lab

MECH 4300 Stress Analysis

CREDIT HOURS: 3

Course topics include: general state of stress, equilibrium equations, stress-strain-temperature relations, plane stress, axisymmetrical stress problems, thick cylindrical pressure vessels, rotating disks, bending of rectangular and circular plates, torsion of non-circular members, membrane analogy, thin-walled hollow sections, non-symmetrical bending, properties of cross-sections, shear center, composite beams, plastic hinge. Energy Methods, Castigliano's theorems, statically indeterminate problems.

FORMATS: Lecture | Lab | Tutorial

MECH 4321 3D Printing

CREDIT HOURS: 3

This is a hands-on project based introduction to 3D printing and Rapid Prototyping. Polymer 3D printing technologies such as filament based fused deposition modeling and optical based stereolithography will be introduced. Strength of materials, material properties and material selection will be discussed. Specific topics include: machine components and configurations, advantages and disadvantages of 3D printing technologies, printing flaws and limitations of the technologies, and CAD. A physical prototype is a requirement of this course.

PREREQUISITES: MECH 3010.03, MECH 3020.03

FORMATS: Lecture | Lab

MECH 4340 Energy Management I

CREDIT HOURS: 3

The purpose of this course is to introduce the concepts and techniques of energy management and conservation. The subjects that will be discussed are energy supply and demand, energy pricing, scope of the energy problem and approaches to provide solutions; energy auditing; improving energy utilization in space conditioning, and steam, hot water and compressed air systems; insulation; and electrical energy conservation. An interdisciplinary approach will be employed in this course to provide a wider understanding of the subject.

PREREQUISITES: MECH 3305.03 or MECH 3705.03 or MECH 4805.03

CROSSLISTED: MECH 6340.03

FORMATS: Lecture | Tutorial

MECH 4440 Principles of Marine Craft Design

CREDIT HOURS: 3

This course covers the fundamentals of hydrostatics and hydrodynamics of marine craft. Topics include: hydrostatics and stability calculations for marine craft; dimensional analysis and modelling of marine systems; resistance estimation of low-speed and high-speed craft; sail power, marine propellers and jet propulsion; directional stability and control and wave theory and motion in waves.

PREREQUISITES: MECH 3305.03

FORMATS: Lecture | Lab | Tutorial

MECH 4444 Mechatronics

CREDIT HOURS: 3

This course deals with the integration of mechanical, electrical, computer and control engineering which is increasingly becoming an important part of engineering design. Topics include Mechanical and Electrical Actuation Systems, Sensors, and Signal Conditioning, Microprocessors and Programming and Control. A major part of the course is project-based enabling students to apply the concepts studies in the course.

PREREQUISITES: MECH 3900.03, MECH 3020.03

EXCLUSIONS: BIOE 4312.03

FORMATS: Lecture | Lab | Tutorial

MECH 4450 Marine Craft Design and Construction

CREDIT HOURS: 3

This course deals with design and construction methods for marine craft. Each student completes a preliminary design of a small marine vessel. Topics include: engineering and economic principles governing selection of dimensions and coefficients for marine craft, computer-aided design, design and generation of hull forms, performance and operability in the ocean environment, construction methods for glass-fibre, wood, aluminum and steel marine craft, and structural analysis and design.

PREREQUISITES: MECH 4440.03

FORMATS: Lecture | Lab | Tutorial

MECH 4500 Vibrations

CREDIT HOURS: 3

Single and multiple degree of freedom lumped parameter systems subjected to harmonic and transient excitation are examined. Analytical as well as numerical solutions are covered. Vibrations of continuous systems such as beams and shafts are introduced. Laboratory experiments deal with vibration of lumped parameter physical models as well as vibrations of rotating machinery. Vibration control in industrial applications is emphasized and the effects of

whole body vibration on humans is treated as a safety issue.
PREREQUISITES: MECH 3500.03, MECH 3900.03
FORMATS: Lecture | Lab | Tutorial

MECH 4510 Mechanics of Composite Materials

CREDIT HOURS: 3

The course introduces classification of composite materials, fabrication processes and applications of composites; the basic relations of elasticity of anisotropic materials, and the macro- and micromechanical modeling of composites. The elastic behaviour of laminated and fibre-reinforced composites is studied; the effective moduli theory and the strength of composite materials are considered. Smart composite structures and their constituents are introduced.
PREREQUISITES: MECH 3010.03
CROSSLISTED: MECH 6530.03
FORMATS: Lecture | Lab | Tutorial

MECH 4521 Applied Dynamics

CREDIT HOURS: 3

This course begins with a review of planar kinematics and kinetics of rigid bodies. These concepts are extended to kinematics and kinetics of rigid bodies undergoing general three dimensional motion. Euler's Equations are applied to a wide range of engineering problems including vehicular and gyroscopic dynamics. Energy methods for bodies undergoing three dimensional motion are applied to multi-degree-of-freedom systems. Single-degree-of-freedom systems subjected to random and shock inputs are analyzed.
CROSSLISTED: MECH 6521.03
FORMATS: Lecture | Lab | Tutorial

MECH 4540 Aerodynamics

CREDIT HOURS: 3

The course deals with the fundamentals of aerodynamics and the theory of flight. Material covered includes: the standard atmosphere; airfoil coefficients and section properties; finite wings and induced drag; airplane performance - power required, rate of climb, range and endurance; basics of stability and control.
PREREQUISITES: MECH 3305.03
FORMATS: Lecture | Lab | Tutorial

MECH 4550 Vehicle Dynamics

CREDIT HOURS: 3

This course will cover the fundamental and design aspects governing vehicle motion. Topics include tires mechanics, weight transfer and road loads, vehicle aerodynamics, acceleration performance, braking performance, suspension systems, steering systems, cornering, rollover and ride characteristics.
PREREQUISITES: MECH 3500.03, MECH 3010.03, MECH 3020.03
FORMATS: Lecture | Tutorial

MECH 4560 Space Systems

CREDIT HOURS: 3

This course deals with the engineering design and analysis of space systems and their interrelationships. Topics include orbital mechanics, satellite perturbations, satellite actuator and sensor systems, satellite access and coverage.
PREREQUISITES: MECH 3900.03
CROSSLISTED: MECH 6560.03
FORMATS: Lecture | Tutorial

MECH 4600 Engineering Measurements

CREDIT HOURS: 3

The static and dynamic characteristics of first and second order transducers and measurement systems are examined. The experimental versus theoretical approach to engineering problems is studied. Topics include data acquisition, analysis, and presentation, including the probabilistic nature of engineering measurements. The course is laboratory intensive covering measurements of force, strain, temperature, pressure, velocity, and fluid flow. Computers are used extensively in the laboratory experiments.
FORMATS: Lecture | Lab | Tutorial

MECH 4631 CAD/CAM - Computer Aided Design/Computer Aided Manufacturing

CREDIT HOURS: 3

The student is introduced to the concept of automation with application to design, production, and manufacturing systems. The use of digital computers is

considered in design, including peripheral equipment and types of languages. Other topics include numerical control manufacturing systems such as Direct Numerical Control (DNC), Computer Numerical Control (CNC), Adaptive Control and Industrial Robots. Due to the diverse nature of the course content, various personnel from both the academic and industrial community aid in the class presentation.

PREREQUISITES: MECH 3020.03

FORMATS: Lecture | Lab | Tutorial

MECH 4640 Robotics

CREDIT HOURS: 3

The prime objective of the course is to provide a survey of the state-of-the-art in robotics. A large portion of the course is focused on the robot hardware. However, robotics is an inherently interdisciplinary field and the course will also involve robotics control and application. Topics covered include kinematics and dynamics of the robot arm and gripper, drives, robot position measuring systems, external sensors and feeding, storage, changing position and clamping devices, all of which, together with the robot itself, constitute a “robotized” workplace.

PREREQUISITES: MECH 3500.03, MECH 3900.03

FORMATS: Lecture | Lab | Tutorial

MECH 4650 Biomechanical Engineering

CREDIT HOURS: 3

Engineering analysis of biological systems provides novel insight into evolutionary design of animals and plants and into the intelligent design of medical devices. This course examines the structure and function of the cardiovascular, pulmonary, and musculoskeletal systems using tools from solid and fluid mechanics. Topics include the heart as a pump, blood flow, arterial pulse propagation, the mechanics of breathing lung elasticity, muscle contraction, tissue mechanics, basic skeletal design, locomotion, and engineering of surgical implants.

FORMATS: Lecture | Lab | Tutorial

MECH 4665 Finite Element Methods I

CREDIT HOURS: 3

This course will introduce the finite-element method for analyzing the static response of both mechanical and thermomechanical systems. Various elements' formulations (i.e., rods, beams, CST, and 2D and 3D isoparametric elements) will be covered. Practical modelling aspects will be emphasized using a widely-used commercial finite-element software. The students will learn various modeling techniques and best practice through assignments.

PREREQUISITES: MECH 3010.03

EXCLUSIONS: MECH 3660.03, MECH 4865.03

FORMATS: Lecture | Tutorial

MECH 4670 Finite-Element Simulation Techniques

CREDIT HOURS: 3

This course builds on MECH 3660. It deals with the applications of the finite-element method to analyze practical problems in mechanical design and delves into the associated fundamental numerical aspects. Robust modelling concepts such as plane stress, plane strain and axisymmetric techniques will be discussed, as well as the use of beam, plates and shell elements in modelling of more complex system. The course will consider static and dynamic analyses and elastic-plastic analysis.

PREREQUISITES: MECH 3660.03 or equivalent

EXCLUSIONS: MECH 6660.03

FORMATS: Lecture | Lab | Tutorial

MECH 4720 Advanced Heat Exchanger Design

CREDIT HOURS: 3

This course deals with the design of heat exchangers. Topics include the thermodynamics, fluid mechanics and heat transfer fundamentals associated with heat exchangers, the various types and applications of heat exchangers, and in particular the design of heat exchangers that rely on natural convection/natural circulation on one or both sides of the heat exchanger.

PREREQUISITES: MECH 3705.03, MECH 3305.03

FORMATS: Lecture | Tutorial

MECH 4760 Optical Components and Instruments

CREDIT HOURS: 3

This course deals with light, optical components and optical instruments. Emphasis will be placed on practical engineering applications. Topics include: light, light sources, reflection and refraction, geometric optics, lens, microscopes, telescopes, polarization, diffraction and interference.

FORMATS: Lecture | Lab

MECH 4805 Thermo-Fluid Engineering III

CREDIT HOURS: 3

This class combines and builds on the knowledge and experiences gained from earlier Thermodynamics, Fluid Mechanics and Heat Transfer courses. The concepts of ideal gas mixtures and psychrometric applications, combustion and chemical equilibrium are introduced. Heat exchanger are studied, using the LMTD and the effectiveness-NTU methods. Numerical modeling of thermo-fluid phenomena are presented using computational fluid dynamics and computational heat transfer: the finite volume method and the finite element method are both used and applied.

PREREQUISITES: MECH 3705.03, MECH 3305.03, MECH 3805.03

FORMATS: Lecture | Lab | Tutorial

MECH 4820 Energy from Renewable Resources

CREDIT HOURS: 3

This course concentrates on the theoretical and practical aspects of solar, wind, tidal and wave sources of energy with particular emphasis on their availability and use in the Atlantic Provinces. Design feasibility studies are undertaken on particular aspects of energy conversion from these sources. The impact of the environment of consumption of conventional energy forms is investigated. The nature and magnitude of energy consumption world-wide and locally is considered.

PREREQUISITES: MECH 3705.03

FORMATS: Lecture | Lab | Tutorial

MECH 4850 Solar Energy Engineering

CREDIT HOURS: 3

This course deals with solar energy conversion and utilization with emphasis on its availability and use in Canada. Topics included solar heating of domestic and process hot water, solar space heating, the direct conversion of solar energy into electricity (photovoltaics), passive solar heating, solar cooling and solar thermal electric power. The nature and magnitude of energy supply and demand are also discussed.

PREREQUISITES: MECH 3705.03, MECH 3305.03

FORMATS: Lecture | Tutorial

MECH 4851 Heating, Ventilating and Air Conditioning

CREDIT HOURS: 3

This is an introduction to the design of thermal systems for indoor climate control. The major topics include: human comfort requirements, outdoor climate variables, heating and dehumidification loads, cooling and dehumidification loads, ventilation requirements and criteria, central system types and selection, energy sources and costs, piping, pumps, ducts, fans, and control systems. Computer programs will be introduced for design calculations involving heating and cooling load, piping, ducting and energy consumption.

COREQUISITES: MECH 4805.03

PREREQUISITES: MECH 3705.03 and MECH 3810.03

FORMATS: Lecture | Tutorial

MECH 4865 Computational Fluid Dynamics

CREDIT HOURS: 3

This course serves as an introduction to Computational Fluid Dynamics (CFD) through the application of the finite volume method (FVM) to fluid and thermal problems encountered in mechanical design. The required conservation equations will be reintroduced. The FVM will be applied to diffusion and diffusion-convection problems, under both steady and unsteady conditions. Boundary conditions and solution methods to the velocity-pressure coupling will be presented. A commercial CFD software will be used for complex problems.

PREREQUISITES: MECH 3305.03 and MECH 3705.03

EXCLUSIONS: MECH 4665.03

FORMATS: Lecture | Lab

MECH 4880 Introduction to Nuclear Engineering

CREDIT HOURS: 3

The purpose of this course is to introduce the concepts of nuclear engineering and the resulting applications. The subjects that will be discussed are the fundamentals of particle physics: proton, neutron, electron, photon and neutrino, and the atomic model; radioactivity and radiation detection, protection and shielding; principle of nuclear energetic: fission and fusion; nuclear reactor kinetics and control; nuclear reactor design and cooling; nuclear propulsion, nuclear waste disposal.

PREREQUISITES: MECH 3705.03, MECH 3810.03

FORMATS: Lecture | Tutorial

MECH 4900 Systems II

CREDIT HOURS: 3

Response characteristics of open loop and feedback control systems are studied. Various controller types and their uses are analyzed. Techniques such as root-locus diagrams and Bode & Nichols plots are used for stability and performance evaluation. Digital simulations and experiments on computer-based control systems are done in the laboratory portion.

PREREQUISITES: MECH 3900.03

FORMATS: Lecture | Lab | Tutorial

MECH 4950 Advanced Control Engineering

CREDIT HOURS: 3

The course develops the students' capabilities in system simulation and feed forward/feedback control-system design and implementation. Topics include: system-parameter identification, control-system hardware, computer-based control systems, design techniques for multiple-input multiple-output systems, and adaptive control. The course is supported by computer-based simulation activities and design procedures, and by hands-on laboratory experience.

PREREQUISITES: MECH 3900.03

CROSSLISTED: MECH 6950.03

FORMATS: Lecture | Lab | Tutorial

Introduction

The Department of Process Engineering and Applied Science prepares students for professional careers in a wide range of fields related to the process industries. Process engineers and scientists research and develop new materials and processes to meet a specific need or create a value-added product. In an industrial setting, they optimize systems and processes so that they are not only environmentally sustainable, but are also inherently safe, produce high-quality products, and are cost effective.

Process Engineering graduates are actively being employed in many different industries related to bioprocess engineering (e.g. food, beverage, fiber, fermentation, biomedical and pharmaceutical products), petrochemical process engineering (e.g. oil, gas, plastics), energy engineering (e.g. energy efficiency, renewable sources), and materials process engineering (e.g. metals, ceramics, composites), as well as many others.

The Department of Process Engineering and Applied Science offers one undergraduate degree: a B.Eng. in Chemical Engineering with both co-op and non-co-op options.

There is also the opportunity to pursue a Certificate in Biomedical Engineering alongside their regular degree requirements.

There is ongoing research in the Department that provides opportunities for graduate studies leading to master's and doctoral degrees. Consult the Graduate Calendar, Dalhousie University for more details on these graduate programs.

Chemical Engineering

Chemical Engineering offers two versions of the BEng Program:

1. Co-op Program
2. Non Co-op Program

Co-op Program

Year	Fall	Winter	Summer
1	Study Term 1	Study Term 2	FREE
2	Study Term 3	Study Term 4	FREE
3	Work Term 1	Study Term 5	Work Term 2
4	Study Term 6	Work Term 3	Work Term 4
5	Study Term 7	Study Term 8	

Years 1 and 2 follow the core program outlined in the Engineering section.

Year 3, Work Term 1 (Fall)

Year 3, Term 5 (Winter)

- CHEE 3501.03: Unit Ops Lab
- CHEE 3522.03: Mechanical Unit Operations
- CHEE 3525.03: Separation Processes
- CHEE 3530.03: Chemical Engineering Thermodynamics
- CHEE 3540.03: Law & Ethics
- CHEE 3560.03: Green Engineering

Year 3, Work Term 2 (Summer)

Year 4, Term 6 (Fall)

- CHEE 3600.03: Transport Phenomena
- CHEE 3601.03: Thermal Unit Operations
- CHEE 3602.03: Computational Methods
- CHEE 3634.03: Chemical Reaction Engineering
- MECH3150.03: Materials Engineering
- Complementary Studies Elective

Year 4, Work Term 3 (Winter)

Year 4, Work Term 4 (Summer)

Year 5, Term 7 (Fall)

- CHEE 4703.03: Process Dynamics & Control
- CHEE 4704.03: Separation Processes II
- CHEE 4705.03: Pilot Scale Operations
- CHEE 4741.03: Process and Product Design I
- CHEE 4730.03: Bioprocess Engineering
- Technical Elective I

Year 5, Term 8 (Winter)

- CHEE 4842.03: Process and Product Design II
- CHEE 4844.03: Design Course
- CHEE 4873.03 Process Safety
- Technical Elective II
- Technical Election III

Technical Electives

This list is not exhaustive, nor does it imply that each course will be offered every year. Students should check with the Undergraduate Program Co-ordinator.

- BIOE 4391.03 : Polymeric Biomaterials
- CHEE 4123.03: Environmental Biotechnology
- CHEE 4791.03: Research Project I
- CHEE 4803.03: Oil and Gas Processing
- CHEE 4885.03: Polymers
- CHEE 4892.03: Research Project II
- ECED 4350.03: Semiconductor Materials and Devices
- ENVE 3251.03: Envir and Ind Microbiology
- ENVE 3500.03: Air Quality
- ENVE 4772.03: Environmental Assessment and Management
- ENVE 4872.03: Air Pollution
- FOOSC 4070.03: Food Processing
- FOOSC 4081.03: Brewing Science

- IENG 4547.03: Company Operations and Management
- IENG 4558.03: Project Management and Control
- IENG 4574.03: Decision and Risk Analysis

[\[SLB1\]](#)Include hyperlink

[\[SLB2\]](#)Include hyperlink

Notes:

1. Students may take ONE 3000-level course as a Technical Elective
2. Undergraduate students in their final year of study may take a postgraduate course as a Technical Elective with the approval of the Undergraduate Program Coordinator and the professor offering the course.
3. Not all technical electives are available each year and other elective courses may be available. Please check with the department prior to registration.

Non Co-op Program

Year	Fall	Winter	Summer
1	Study Term 1	Study Term 2	FREE
2	Study Term 3	Study Term 4	FREE
3	Study Term 6	Study Term 5	FREE
4	Study Term 7	Study Term 8	

Non co-op students take the same academic program as the co-op students; however, Term 6 may be taken before Term 5 if desired. In this way, the program can be done in a total of four years.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions - Biological Engineering Series

BIOE 4391 Polymeric Biomaterials

CREDIT HOURS: 3

This course provides an introduction to the characterization, fabrication and use of synthetic and naturally-derived polymeric materials to replace or regenerate tissues and organs in the human body. Classes will include a discussion of natural and synthetic macromolecular structure, properties (chemical, physical, mechanical), synthesis, and interactions with the human body. The design and application of polymeric materials in tissues engineering, drug delivery, and prosthetics will also be discussed using specific examples including: blood vessel replacement, artificial pancreas, skin substitutes, and nerve regeneration.

FORMATS: Lecture

Course Descriptions - Chemical Engineering Series

CHEE 2201 Fundamentals of Chemical Engineering

CREDIT HOURS: 3

The main objective of this course is to develop the student's ability to perform mass and energy balances on non-reactive and reactive processes. Introductory topics include systems of units and a study of process variables such as temperature, pressure and flow rate. Also covered are fundamental properties of

multiphase systems, including phase equilibrium, vapour pressure, and Raoult's and Henry's Laws. Emphasis is placed on developing problem solving skills and adopting a consistent approach to the analysis of process systems.

PREREQUISITES: ENGI 2102.03, CHEM1022.03

EXCLUSIONS: PEAS 2201.03

FORMATS: Lecture

CHEE 2203 Organic Chemistry for Chemical Engineers

CREDIT HOURS: 3

Students will first develop an understanding of structure and bonding in organic compounds. With this background, the chemical and physical properties of the major functional groups will be introduced, with a focus on applications relevant to process engineers. Specifically, the synthesis and chemical reactions of commercially important molecules will be highlighted. Physical separations (i.e., distillation, crystallization) used in organic synthesis and spectroscopic methods of analysis will also be described.

PREREQUISITES: CHEM 1021.03, CHEM 1022.03

EXCLUSIONS: PEAS 2203.03, PEAS 3203.03

CHEE 3501 Unit Operations Lab

CREDIT HOURS: 3

In this class students will gain practical experience on equipment common to process engineering through equipment operation and virtual simulations. Emphasis is based on practical operation of mechanical equipment, relation of operational characteristics to fundamental theory, the introduction of simulation tools applied to unit operations, and interpretation and reporting of experimental results.

FORMATS: Lecture | Lab

CHEE 3522 Mechanical Unit Operations

CREDIT HOURS: 3

This course introduces the student to the principles and practices involved in contacting, conveying, separating and storing single-phase and multiphase systems. It includes the flow of incompressible and compressible fluids in conduits and past immersed bodies, as well as the transportation, metering, and mixing of fluids. Unit operations involved in the contacting and separation of phases, such as fluidization, sedimentation and centrifugation, are also studied.

FORMATS: Lecture | Tutorial

CHEE 3525 Separation Processes

CREDIT HOURS: 3

This course provides an introduction to cascade theory and develops fundamentals for design and analysis of staged operations such as leaching, liquid-liquid extraction and distillation. Topics include single-stage operations, multi-stage, counter-current cascade with and without reflux, and binary and multi-component distillation.

FORMATS: Lecture | Tutorial

CHEE 3530 Chemical Engineering Thermodynamics

CREDIT HOURS: 3

The course deals with theory and practice of chemical thermodynamics. A brief review is given of concepts in physical chemistry: partial molal quantities and vapour-liquid equilibria in ideal and non-ideal systems including miscible and partially miscible components. The course also deals with thermophysical properties of pure liquids, properties of solutions, and a comprehensive study of vapour-liquid equilibrium and equilibrium constants in chemical reactions.

FORMATS: Lecture | Tutorial

CHEE 3540 Law and Ethics for Chemical Engineers

CREDIT HOURS: 3

This course will provide students with the legal and ethical framework for the practice of engineering. The section on ethics will introduce ethical theories and demonstrate how these theories are embodied in various engineering codes of ethics. It will also show how these theories, as well as the codes of ethics, can be used to address real ethical dilemmas that can arise in the practice of engineering. Case studies will be used extensively to guide students through this. Class discussions are part of this learning process. These are geared to facilitate development and effective oral communication of student understanding and insights, as well as reasoning on issues of professional ethics. The course will also introduce the subject of law in its relation to the practice of engineering. It will cover the basics of what the students should know about contract law, professional liability and tort law and intellectual property law. Students will be assessed through a final exam on the law part and written assignments on ethics. The assignments are designed to develop good writing skills. Tutorials will offer additional help with substantive materials, assistance regarding assignments and preparation for the final law exam.

EXCLUSIONS: PEAS 3700

FORMATS: Lecture | Tutorial

CHEE 3560 Green Engineering

CREDIT HOURS: 3

This course introduces the framework required to assess the environmental impact of products and processes, and provides the foundation for environmentally conscious engineering design. Major sustainability challenges associated with the release of chemicals into the environment will be reviewed. Economic, environmental and social indicators of sustainability, and the criteria for evaluation of sustainable materials and green processes will be covered. Students will evaluate the green attributes of alternative products and processes by applying sustainability metrics.

FORMATS: Lecture | Tutorial

CHEE 3600 Transport Phenomena

CREDIT HOURS: 3

This course covers the physical, chemical and thermal factors affecting the mechanisms of heat and mass transfer in biological, chemical and physical systems. The principles of physical and mathematical modeling are demonstrated and applied to real applications in the fields of interest to chemical engineers. Problem solving sessions are used to illustrate the application of the above concepts.

EXCLUSIONS: PEAS 3600.03

FORMATS: Lecture | Tutorial

CHEE 3601 Thermal Unit Operations

CREDIT HOURS: 3

In this course students will learn how to apply the fundamental concepts of momentum and energy transfer to the design of thermal processing unit operations. Examples include double pipe heat exchanger, shell and tube heat exchanger, plate heat exchangers, air cooled heat exchangers, cooling towers, condensers, and boilers.

FORMATS: Lecture | Tutorial

CHEE 3602 Computational Methods for Chemical Engineers

CREDIT HOURS: 3

This course introduces the use of computers and numerical methods to solve problems in chemical engineering. Upon completing this course, students will be expected to understand the different numerical methods available to solve common engineering problems, their theoretical principles, and how to choose one method over another. All methods will be implemented in MATLAB.

EXCLUSIONS: PEAS 3601.03

CHEE 3634 Chemical Reaction Engineering

CREDIT HOURS: 3

This course introduces the subject of chemical reaction engineering. Classical reaction kinetics concerning rates, mechanisms, temperature effects and multiple reactions are studied. The concepts of batch, continuous stirred-tank and plug flow reactors are introduced for the ideal case. Non-isothermal reactors and non-ideal flow are considered in the design of chemical reactor systems. Heterogeneous reactors and catalysis are also discussed. Emphasis is placed on computational techniques for reactor problem solutions.

FORMATS: Lecture | Tutorial

CHEE 4123 Environmental Biotechnology

CREDIT HOURS: 3

This course outlines the principles and applications of environmental biotechnology. Quantitative tools for describing microbial stoichiometry and kinetics will be examined and related to reactors of interest to environmental engineering. Applications of biological treatment processes will be studied and may include the activated sludge process, lagoons, anaerobic treatment and bioremediation.

EXCLUSIONS: ENVE 3432.03, ENVE 4123.03

FORMATS: Lecture

CHEE 4703 Process Dynamics and Control

CREDIT HOURS: 3

This course deals with the control and mathematical modeling of chemical processes. The dynamical behaviour of processes is analyzed through transfer functions and ordinary differential equations. The means for designing and determining the dynamic performance of closed-loop control systems are explained. The focus is on modeling, stability, closed-loop response, design techniques, and single-input/single-output models. Nonlinear and multi-input/multi-output models are also introduced.

PREREQUISITES: CHEE 3501, CHEE 3525, CHEE 3634

FORMATS: Lecture | Lab | Tutorial

CHEE 4704 Separation Processes II

CREDIT HOURS: 3

This course serves as an extension of CHEE 3525: Separation Processes, covering four fundamental separation processes: liquid-liquid extraction, leaching, adsorption, and drying. Emphasis is placed on understanding the design choices that go into each unit process and solving common sizing/operation problems by applying standard mass and heat balance relations.

PREREQUISITES: CHEE 3600; CHEE 3525; CHEE 3530

FORMATS: Lecture | Tutorial

CHEE 4705 Pilot Scale Operations

CREDIT HOURS: 3

This class builds on CHEE 3501, focusing on equipment with increasing complexity and integrated operations. Emphasis is placed on experimental design, operation of integrated systems, process control/safety and the analysis and reporting of data.

PREREQUISITES: CHEE 3501

FORMATS: Lecture

CHEE 4730 Bioprocess Engineering

CREDIT HOURS: 3

This course involves the application of chemical engineering approaches to biologically-based systems. These bioprocesses can be used to produce pharmaceuticals, specialty chemicals and genetically engineered products. Topics include an overview of cell biology, kinetics of enzymatic and cellular processes, bioreactor design and operation, and an overview of downstream processes. Students will be exposed to recent research publications as part of their term project.

PREREQUISITES: PEAS 3600.03 or CHEE 3600.03 or instructor permission

CHEE 4741 Process and Product Design I

CREDIT HOURS: 3

This course, in conjunction with CHEE4842, provides students with a capstone design project analogous to that of a consulting engineer. Through the solution of client-based problems and application of concepts and theory learned during the undergraduate curriculum, this course provides an opportunity for students to take leadership roles and demonstrate independence in proposing and exploring engineering solutions to process and product design requests.

PREREQUISITES: CHEE 3522.03, CHEE 3525.03, CHEE 3634.03, CHEE 3601.03

CHEE 4760 Fundamentals of Combustion

CREDIT HOURS: 3

This course is an introduction to the principles of combustion processes. The properties of premixed gas flames are examined. Diffusion flames and the burning of liquid and solid fuels are studied. Ignition phenomena and spontaneous combustion, with particular reference to safety in the chemical process industries, are examined.

FORMATS: Lecture | Lab

CHEE 4791 Research Project I

CREDIT HOURS: 3

The course objective is to provide experience in the application of engineering principles to the solution of a specific problem in Chemical Engineering. A research project is chosen in collaboration with a particular faculty member. The student then prepares a work plan, carries out a literature search pertinent to the problem, designs an experimental setup, if needed, and arranges for the acquisition of necessary equipment. Interim and final progress reports are required in both written and oral formats.

CHEE 4803 Oil and Gas Processing

CREDIT HOURS: 3

This course provides an overview of the oil and gas industry as a whole, introducing the typical technologies, processes and unit operations. Topics covered include: natural gas recovery and purification; and the properties of bitumen, its recovery, and subsequent refinement. Specific emphasis is placed on detailed design of unit operations for petroleum upgrading and the interrelation between processing steps for optimized petrochemical fuels production.

PREREQUISITES: CHEE 3601.03, CHEE 3634.03 or instructor approval

CHEE 4842 Process and Product Design II

CREDIT HOURS: 3

This course builds on the work completed in CHEE 4741, providing students with a capstone design project analogous to that of a consulting engineer. Focusing on the solution of client-based problems through application of concepts and theory from the undergraduate curriculum, this course provides an

opportunity for students to take leadership roles and demonstrate independence in proposing and exploring engineering solutions to process and product design requests.

PREREQUISITES: CHEE 4741.03

CHEE 4844 Process Simulation and Plant Design

CREDIT HOURS: 3

This course requires students to synthesize processing elements into an integrated plant that is capable of meeting stated design criteria. Emphasis is placed on flow sheet adaptation into suitable forms for simulation and design, design of specific unit operations using available software, process performance characterization and optimization, process safety systems, equipment costing and economic evaluation of multi-year projects.

PREREQUISITES: CHEE 3525.03, CHEE 3634.03

CHEE 4862 Fundamentals of Combustion Engineering

CREDIT HOURS: 3

In this course, the principles of combustion processes (studied in Fundamentals of Combustion) are applied to industrial applications. The properties of solid, liquid and gaseous fuels are discussed. Various burner systems and the importance of combustion aerodynamics in boilers, furnaces and kilns are studied. The method of determining boiler and furnace efficiency and an introduction to pollution control are presented.

PREREQUISITES: CHEE 4760.03

CHEE 4873 Process Safety

CREDIT HOURS: 3

The objective of this course is to develop an appreciation for, and understanding of, process safety concepts aimed at the prevention and mitigation of process fires, explosions, and toxic releases in the process industries. Topics covered in the course include loss causation models; process safety management systems and elements such as incident investigation, training, and emergency preparedness; inherently safer design and a hierarchical, barrier-based approach to process safety; hazard identification and risk assessment and management; and fire and explosion fundamentals. Case histories drawn from the process and other high-hazard industries are utilized throughout to illustrate concept application.

PREREQUISITES: CHEE 3540.03

EXCLUSIONS: CHEE 6701.03

CHEE 4885 Polymer Engineering

CREDIT HOURS: 3

Polymers are ubiquitous materials used in a diversity of fields such as plastics, adhesives, biomedical, surface coatings, textiles. This course is intended for Chemical Engineering students to get an introduction of the major steps in this industry. The course covers the following topics: the chemical and physical structures of polymers, the mechanisms of polymer formation and the industrial processes used, the properties of polymers and applications, methods of processing polymers, and polymer modification and additives.

CHEE 4890 Practical Chemistry for Engineers

CREDIT HOURS: 3

This class will provide students with hands-on experience with common chemistry laboratory techniques, equipment and instrumentation. The focus will be on lab exercises involving characterization of synthesized products or natural materials to provide students with experience in typical methods of chemical separation (partitioning, precipitation, filtration, etc) and quantification. Topics reviewed will include extraction, basic chromatography, absorption spectroscopy, potentiometric methods and calibration techniques.

PREREQUISITES: This course will build on concepts developed in CHEM 1021 and CHEM 1022: Engineering Chemistry I and II and CHEM 2203 Organic Chemistry for Process Engineers. Those courses or their equivalents are thus necessary as pre-requisites.

CHEE 4892 Research Project II

CREDIT HOURS: 3

This course is a continuation of Research Project I. The student conducts the planned research work, analyses the data obtained and critically evaluates the findings. Written and oral progress reports are required at mid-term. A written report and an oral presentation are required at the end of the term.

PREREQUISITES: CHEE 4791.03

CHEE 4895 Principles and Applications of Colloids

CREDIT HOURS: 3

A colloid is a type of mixture where minute particles in the size range of 1-1000 nm stay suspended but distinct from, another phase. The minute substance is referred to as the colloidal particle, and it must not settle when left undisturbed. It is also referred to as the dispersed phase, with the substance holding the colloid is the continuous phase. The phases can be solid, liquid or gas. The fact that colloidal particles have such small dimensions is the reason that a huge

surface (interfacial) area is created. Their high interfacial area is the reason why colloidal systems have special properties and also why we study colloids and interfaces together. Colloidal systems are used in a wide variety of industries including chemical manufacturing, food and consumer products, pharmaceuticals and environmental management.

CALENDAR NOTES: This class is offered in the fall term

PREREQUISITES: CHEE 3530

RESTRICTIONS: This course is restricted to Chemical Engineering Students

FORMATS: Lecture | Tutorial

CHEE 8891 Co-op Work-Term I

CREDIT HOURS: 0

CHEE 8892 Co-op Work-Term II

CREDIT HOURS: 0

CHEE 8893 Co-op Work-Term III

CREDIT HOURS: 0

CHEE 8894 Co-op Work-Term IV

CREDIT HOURS: 0

Course Descriptions - Food Science Series

FOSC 3010 Food Chemistry

CREDIT HOURS: 3

This course will examine the molecular behaviour of basic constituents common to food products and relate this behaviour to the structure and properties of food constituents. Topics covered will include water, carbohydrates, proteins and lipids and micro nutrients such as vitamins and minerals, pigments and flavours. Chemical processes such as browning, enzyme reactions and emulsification will also be examined. The function of ingredients, additives and nutraceuticals will be examined.

PREREQUISITES: CHEM 2441 or CHEM 2401

CROSSLISTED: FOSC 6328

FORMATS: Lecture | Lab

FOSC 3020 Food Analysis

CREDIT HOURS: 3

This course will cover the theory and practice used in modern food analysis. The analysis of proteins, lipids and carbohydrates will be presented. As well, the principles of spectroscopy, titration, electrophoresis and chromatography will be discussed and demonstrated using various foods. Other analytical techniques specific to foods such as reflective colorimetry, texture profile analysis and water activity measurement will be presented.

PREREQUISITES: CHEM 2441 or CHEM 2401 or PEAS 3203

CROSSLISTED: FOSC 6329

FORMATS: Lecture | Lab

FOSC 4070 Food Processing

CREDIT HOURS: 3

This course will examine various unit operations in food processing. Topics examined will include low temperature processes (chilling and freezing); thermal processing including commercial blanching, pasteurization and sterilization; drying and non-thermal processes including high pressure processes and irradiation. The unit operations of various food and seafood commodities will be examined in detail.

PREREQUISITES: Permission of instructor

CROSSLISTED: FOSC 6325

FOSC 4081 Brewing Science

CREDIT HOURS: 3

This course will examine unit operations employed during the production of malt and beer. Brewing, fermentation, maturation, and packaging aspects of beer production as well as brewing quality assurance, colloidal, flavour and haze stability will be discussed. Practical experience in brewing beer and in quality analysis will be provided in the Labs.

Faculty of Health

Location:

Burbidge Building
5968 College Street
3rd Floor
PO BOX 15000
Halifax NS
B3H 4R2

Phone Number: (902) 494-3327

Fax Number: (902) 494-1966

Email Address: health@dal.ca

Website: www.dal.ca/faculty/health.html

Introduction

The Faculty of Health consists of the School of Health and Human Performance, School of Health Administration, School of Communication Sciences and Disorders, School of Social Work, School of Nursing, School of Occupational Therapy, School of Physiotherapy, College of Pharmacy, and the School of Health Sciences. The various undergraduate programs are described in the College, School, and other program sections of this Calendar. Details of the graduate programs in the Clinical Vision Science program and offered in the Schools are described in the Calendar of the Faculty of Graduate Studies.

In addition to the policies listed, please refer to the following other student related policies at <http://healthprofessions.dal.ca>:

- Allegation of Professional Unsuitability Policy
- FHP Immunization Policy
- Occupational Health and Infectious Diseases: Pre-clinical Placement Requirements for Health Care Worker Students
- Suspension or Dismissal from a Program on the Grounds of Professional Unsuitability
- Guidelines for Personal Safety in Fieldwork Placements

Policy Statement on Affirmative Action

The Faculty of Health recognizes that Affirmative Action is required to increase the admission of and number of graduates from underrepresented groups; Aboriginal peoples, African Canadians and Persons with (dis)Abilities. The constituent Units of the Faculty will develop and implement Affirmative Action policies that are consistent with the Human Rights Commission.

As a matter of priority, the Faculty will develop strategies to identify and create recruitment and support systems that will encourage and support members of these underrepresented groups to apply to and graduate from the Faculty of Health.

Policy Statement on Interprofessional Health Education

Students in the Faculties of Dentistry, Health and Medicine are required to participate in interprofessional health education activities. These activities, together with specific program requirements, are currently evolving and in transition and are integrated into the curricula of individual programs. Participation is mandatory. The objective of interprofessional education in the Faculty of Health include developing:

- knowledge and understanding of, and respect for, the expertise, roles and values of other health and human service professionals.
- understanding the concept and practice of patient/client/family-centred care.
- effective communication, teamwork and leadership skills applied in interprofessional contexts.
- positive attitudes related to the value of collaboration and teamwork in health and human service contexts.

- an understanding, from a multi-disciplinary perspective, of the Canadian health and social systems, the legal and regulatory foundation of professional practice, how health and human service institutions are organized and operate, and how different health and human service professions contribute to the systems and institutions.

Students in the entry-to-practice programs in the Faculty of Health, are required to maintain enrolment in IPHE 4900 (see calendar section on [Health Professions Interprofessional Health Education](#)) for the duration of their studies. Successful completion of this course is a requirement for graduation in these programs, and will be recognized further with the awarding of a special Certificate in Interprofessional Collaboration; to be presented by the Faculty of Health. For more information, students should contact their specific school/college.

Statement Regarding Criminal Records Check

The Faculty of Health of Dalhousie University does not require a Criminal Records Check or other screening procedure (e.g., Vulnerable Sector Screen) as a condition of admission into its programs. However, **students should be aware that such record checks or other screening procedures may be required by facilities outside the University used for clinical, fieldwork or co-op placements or experiences related to an academic class assignment, which, in some instances, may be a requirement for graduation.** It is the student's responsibility to have such procedures completed.

Such facilities may refuse to accept students on the basis of information contained in the record check or other screening procedures. If the student is unable to complete a clinical requirement due to a failure to meet the record check or screening requirements of the facility, or if the student is refused access to the facility on the basis of the information provided, such a student may fail the class, and as a result, in some instances, may not be eligible for progression or graduation.

Students should check with their School/College for details concerning any record checks or screening requirements relevant to clinical, fieldwork, or placements in their particular program. Note that facility requirements may change from time to time and are beyond the control of the University.

Students should also be aware that some professional regulatory bodies may require a satisfactory record check as a condition of professional licensure.

Practicum/Fieldwork Placements Outside Halifax

Students enrolled in programs of study in the Faculty of Health (Health Sciences, Nursing, Health and Human Performance, Social Work and Pharmacy) are advised that they may have to do some or all of their required clinical education/fieldwork at sites outside Halifax, and hence may have to incur additional personal expenses for travel and temporary accommodation.

In some situations, sites may require a payment to the site for support of clinical education/fieldwork supervision, and some sites may require separate disability insurance in lieu of eligibility for Worker Compensation coverage. Such costs are the responsibility of the student.

Student Disclosure of Health Information

Faculty of Health

Students registered in this Faculty are encouraged to inform both the School/College and the field work learning sites if they have a health concern that has the potential to compromise client, student and/or agency personnel safety and/or has the potential for limiting their ability to learn and perform their role as learner.

For the purposes of this policy, the term health concern refers to any cognitive, affective, and/or physical health problem, injury, or condition that may place the student and/or others at risk and/or inhibit the student's learning ability and performance.

Guidelines for Disclosure

The student has the right to decide if disclosure of health information is appropriate. The method, timing, and extent of the disclosure is at the student's discretion (for consultation options, see below). Early disclosure of the following information regarding the health concern may be helpful to students in the academic and/or field work sites.

To disclose this information:

1. Clearly describe the nature of the health concern and the potential limitations with regard to the learning tasks expected in either the academic or field work site. Appropriate verification of the information may be required.
2. List any adaptations, modifications, and/or safety procedures that may be required in planning the student's learning experiences in either setting.
3. Provide clear and appropriate advice regarding the management of this health concern.

If the disclosure of health information in field work and/or academic sites produces difficulties, students are encouraged to report these difficulties immediately to the appropriate person(s) within both the field work site and/or within their educational program (see below). Discrimination in any form will not be tolerated.

Students are advised to make the initial contact with the person with whom they are most comfortable from the lists below. These individuals would be available for consultation/advocacy:

- Academic /faculty advisor
- Field work coordinator(s)
- Director of the School or College where student is enrolled
- Dean of the Faculty of Health
- Advisor to Students with Disabilities, Dalhousie University
- Dalhousie/King's Association of Students with Disabilities
- Human Rights Commission

College of Pharmacy

- Preceptor
- Site coordinator
- Externship administrator

School of Nursing

- Clinical instructor
- Class professor
- Associate Director, Undergraduate Student Affairs
- Nurse Practitioner/Arctic Nursing Program Coordinator

School of Occupational Therapy

- Preceptor
- Field site director
- Provincial or Atlantic Region fieldwork education coordinators

School of Physiotherapy

- Clinical Instructor
- Centre Coordinator of Clinical Education
- Provincial Coordinator

School of Social Work

- Agency field instructor
- Program coordinator
- Faculty field instructor

School of Health Administration

- Preceptor

School of Communication Sciences and Disorders

- Clinical Educator

School of Health and Human Performance

- Student Services Administrator

School of Health Sciences

- Clinical Education Coordinator

Regulations

Students registered in the courses of the Disability Management Certificate Program (CDM) are bound by the University and Faculty regulations in the same manner as all Dalhousie students. The University and Faculty of Health regulations are found in the University Regulations section of the Dalhousie University Calendar. Academic regulations are found in the Academic Regulations section of the Calendar. It is the responsibility of each CDM student to become familiar with both the University and Faculty of Health regulations.

Please make note of the “Acceptable Use Policy” found in the University Regulations section of the Dalhousie Calendar. Because of the distance learning component of this Program, students should pay particular attention to regulations designed to respect the rights of other computer users.

Course Grades

The minimum passing grade for all of the CDM courses is 50%. A course may be repeated only once, with a maximum of two repeated courses permitted. A student who fails the same course twice will not be awarded the Certificate.

Appeals

On occasion, conflict or disagreement on final grades or evaluative procedures may arise. All students are expected to familiarize themselves with the processes available to them for academic appeals. Timeliness is of the essence for presentation and consideration of all appeals and, in all instances, the first level of appeal will be at the informal level.

Formal appeals of a final grade or a procedural problem must follow the regulations as stated in the University Calendar and such appeals will only be considered after failure to resolve the issue at the informal level has occurred. Students who do not follow these procedures will automatically forfeit their right to further consideration of their appeal and the original decision will remain in effect.

Informal Process

For each instance, the student and instructor, with guidance for the CDM Program Coordinator, are expected to attempt to resolve the matter informally within 15 days of the matter giving rise to the appeal.

Formal Process

If the matter cannot be resolved informally, the student may initiate a formal appeal by following the procedures set down in the University Calendar (see Regulation 16.7 of the Academic Regulations section for appeals of grades, and the Academic Regulations section for the Faculty of Health appeals process).

Note that both the Dalhousie University Calendar and the Faculty of Health policies appear on the Dalhousie University website.

Certificate in Disability Management

The School of Occupational Therapy offers a Certificate in Disability Management (CDM) Program specifically designed to educate and engage students in the elements of disability management. Disability management team members provide effective, efficient and safe co-ordination of services needed to help injured or ill individuals achieve their maximum level of functioning, and facilitate their ability to remain at or return to work. Graduates of the CDM Program will typically work as disability case managers, insurance case managers, return to work facilitators, vocational rehabilitation consultants, vocational counsellors, or employee wellness program administrators.

People in the field of disability management come from many different professional backgrounds such as education, human resources, kinesiology, nursing, occupational therapy, physiotherapy, and social work. More and more organizations are recognizing the important role that disability management can play, with benefits of an effective disability management program including reducing cost due to less work disruptions, enhanced employee morale and sense of belonging, as well as improved manpower consistency. Practical applications of disability management have been made in different sectors of occupational activity such as administrative, industrial, service provision, technical and business. With so many multi-faceted aspects characterizing the field of disability management, the Dalhousie program draws on many bodies of knowledge spanning theoretical and practical application.

Program Overview

The overall goal of the CDM Program is to educate individuals with integrated knowledge and skills necessary to provide quality disability management services, through recognizing and understanding the dynamic interaction between disability and work

performance. Upon completion of the CDM Program, students will be able to demonstrate and apply skills and competencies in the areas of:

1. Foundations of Disability Management
2. Communication and Professional Relationships
3. Return to Work and Case Management
4. Policies, Ethics and Legal Issues

The CDM Program is made up of four academic undergraduate three credit hours courses that are taught completely online. These courses are normally taken as electives by students currently enrolled in an academic program at Dalhousie or another Canadian University. However, students not enrolled in a university program can pursue the CDM by applying as a Special Student Undergraduate. Any student interested in taking courses in the CDM Program must register through the Registrar's Office. Admission requirements vary based on previous education and the intended program of study at Dalhousie. The Registrar's Office can help guide students as to the eligibility for admission to specific Dalhousie programs.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions

DISM 3010 Introduction to Disability and Disability Management

CREDIT HOURS: 3

This course provides an overview of Disability Management theories, terminology and processes. Particular emphasis is on introduction to the practice of Disability Management, comprehending the relationship between occupation and disability, and, understanding the dynamic impact of disability on return to work.

<http://www.bookstore.dal.ca/Course/campus>

CROSSLISTED: KINE 3010.03

FORMATS: Online Delivery

DISM 4010 Case Management and Return-to-Work

CREDIT HOURS: 3

This course will focus on the return-to-work process, with emphasis on the components of Disability Management that are critical for successful return-to-work outcomes. Appraisal of case management strategies, vocational rehabilitation, and ethical and legal implications of the return-to-work process will be highlighted.

<http://www.bookstore.dal.ca/Course/campus>

PREREQUISITES: DISM 3010.03

FORMATS: Online Delivery

DISM 4040 Understanding the Relationship between Health and Work

CREDIT HOURS: 3

This course will distinguish issues that span the continuum of health and work performance, and examine the complex interaction between health conditions and ability and/or capacity to work. Concepts presented will include acute illness and injury, chronic health conditions, and workplace health promotion and prevention.

<http://www.bookstore.dal.ca/Course/campus>

PREREQUISITES: DISM 3010.03

FORMATS: Online Delivery

DISM 4050 Communication and Professional Relationships in Disability Management

CREDIT HOURS: 3

This course identifies and analyzes key components that are part of the Disability Management communication toolkit. Application of strategies to enhance the professional relationships frequently encountered in the Disability Management process will be emphasized.

Diploma in Emergency Health Services Management (DEHSM)

The School of Health Administration offers an undergraduate diploma program in Emergency Health Services Management (DEHSM). The program meets the need for an educational program for students interested in emergency health services management and for mid-career managers working in the Emergency Health Services systems in Canada. The academic objectives of the program are to provide education in emergency health services management for potential managers of emergency health services organizations, and to provide access to further education in Health Services Administration and Emergency Health Services for such individuals.

The program is designed for professionals working in emergency and/or first responder settings. Students may complete the DEHSM on a full-time or part-time basis.

The program is conducted through the Dalhousie e-learning. The Dalhousie e-learning platform consists of a suite of tools which provide mechanisms for interactive exercises, such as group discussions, presentations, and information sharing.

NOTE: Courses offered through the e-learning format are assessed a per course Distance Education Fee (DEF) in addition to the course-based tuition.

A. Application Procedure

Applicants must meet the university's undergraduate admission requirements to be considered for admission into the program. Applicants require university preparation (you may not apply from high school). Prospective students should submit a letter outlining their work experience and other activities with their application, fee and academic transcripts. In addition, students are required to submit a current resume and at least one letter of reference with their application to the diploma program.

Students may be considered for advanced placement if they have completed courses equivalent to the required or elective courses. Application for advanced placement must be made in writing after an applicant has been accepted to the program.

Further information on the Diploma in Emergency Health Management program may be obtained from:

School of Health Administration, Dalhousie University
Sir Charles Tupper Medical Building
5850 College Street, 2nd floor
PO Box 15000
Halifax, NS B3H 4R2
902-494-7097
healthadmin@dal.ca

Application forms are available online at www.dal.ca/admissions/apply. Deadline for September admission is March 1, November 15 for January admission and March 15 for May admission.

B. Curriculum

Fall term

- HESA 4000.03: Canadian Healthcare Delivery System
- HESA 4004.03: Healthcare Planning
- HESA 4005.03: Healthcare Financial Management
- HESA 4400.03: Introduction to Healthcare Economics
- HLTH 4040.03: Health Law for Non-Lawyers

Winter term

- HESA 4010.03: Management Process and Human Resource Issues in EHS
- HESA 4020.03: Quality Improvement in EHS
- HESA 4200.03: Epidemiology for Managers

Summer term

- HESA 4030.03: EHS System Design
- HESA 4040.03: Principles of Community-Based EHS

Diploma in Health Services Administration (DHSA)

The Diploma in Health Services Administration (DHSA) program is designed to prepare students for a career in healthcare at the managerial level. It meets the needs of students interested in health services administration and of those currently employed in the healthcare sector in a managerial capacity in health facilities, and employees in community health, long-term care, primary care, multi-service centres, and community health boards.

The program provides a conceptual background for the increasingly complex managerial tasks performed in health institutions, agencies, and health-related government departments. Every effort is made to balance political, social, economic, cultural, medical, and ethical approaches to understanding the healthcare delivery system with those of the management sciences.

All students must observe the [University](#) and [Academic Regulations](#) described in the calendar.

Students may complete the DHSA on a full-time or part-time basis.

The program is conducted through the Dalhousie e-learning. The Dalhousie e-learning platform consists of a suite of tools which provide mechanisms for interactive exercises, such as group discussions, presentations, and information sharing.

NOTE: Courses offered through the e-learning format are assessed a per course Distance Education Fee (DEF) in addition to the course-based tuition.

Application Procedure

Applicants must meet the Dalhousie University undergraduate admission requirements to warrant consideration into this program. Applicants require university preparation (you may not apply from high school). In addition to transcripts, students are required to submit a current resume and at least one letter of reference with their application to the Diploma program. Mature students must also include a letter outlining their activities since high school.

Applications should be submitted as early as possible, and not later than March 1 for September admission, and November 15th for January admission.

Students may be considered for advanced placement if they have completed courses equivalent to the required or elective courses. Application for advanced placement must be made in writing after an applicant has been accepted to the program.

Further information on the Diploma in Health Services Administration program may be obtained from:

School of Health Administration
Dalhousie University
Sir Charles Tupper Medical Building
5850 College Street, 2nd floor
PO Box 15000
Halifax, NS B3H 4R2
902-494-7097
healthadmin@dal.ca

Application forms are available online at www.dal.ca/admissions/apply.html

Curriculum

The one-year program features both an academic and outcome-oriented curriculum. Students accepted into the DHSA program take the following three credit hour courses:

Fall term

- HESA 4000.03: Canadian Healthcare Delivery System
- HESA 4004.03: Healthcare Planning
- HESA 4005.03: Healthcare Financial Management
- HESA 4400.03: Introduction to Healthcare Economics

- HLTH 4040.03: Health Law for Non-Lawyers

Winter term

- HESA 4001.03: Management Roles and Competencies
- HESA 4002.03: Health Human Resource Management
- HESA 4003.03: Quality Management
- HESA 4200.03: Epidemiology for Managers

One three credit hour elective, as approved by the School, is also required. The elective may be taken in the fall, winter, or summer term.

Certificate in Emergency Health Services Management

The School of Health Administration offers an undergraduate **Certificate in Emergency Health Services Management (CEHSM)**. The certificate is designed for professionals seeking domain-specific knowledge in Emergency Health Services management.

The objective of the certificate is to assist individuals working in emergency health services organizations to more effectively manage community needs and resources. The certificate aims to:

- Assist in developing effective community-based programs through adverse outcome reduction
- Assist in the development of program-based budget and accounting controls
- Guide students in formulating effective communication and awareness at the community level.

The **Certificate in Emergency Health Services Management (CEHSM)** is also designed in a manner that allows the interested individual to continue on with more advanced training.

Admission Requirements

You must meet the Dalhousie University [undergraduate admission requirements](#) to be considered for this program. This certificate program does not typically accept people applying directly from high school. It is recommended that you have work or volunteer experience in the health services industry before applying for the program.

A complete application consists of the following documents:

- A completed [application form](#) and fee
- An official transcript of the record of academic work completed to date
- One letter of reference (academic or professional)
- Resume/curriculum vitae
- Applicants whose first language is not English must provide proof of English proficiency. See General Admission Requirements.

Application deadlines are:

- March 1 for September start
- November 15 for January start
- March 15 for May start

Curriculum

The one-year certificate features both academic and results-oriented curriculum. Students accepted into the **Certificate in Emergency Health Services Management (CEHSM)** take the following classes:

- **Fall Semester - Required Course**
HESA 4005: Healthcare Financial Management
- **Winter Semester - Required Course**
HESA 4020: Quality Improvement in Emergency Health Services
- **Summer Semester - Required Course**
HESA 4040: Principles of Community Based Emergency Health Services

Program Delivery

The **Certificate in Emergency Health Services Management (CEHSM)** is fully online offering flexible study options. The certificate is conducted through the Internet and web-based conferencing tool within the Dalhousie e-Learning platform. The Dalhousie e-Learning platform consists of a well-established suite of tools, which provide mechanisms for interactive exercises, such as group discussions, presentations, and information sharing. The certificate uses on-line learning technology for recommended readings, lessons, and course activities (e.g. assignments, tests, self-tests, etc.).

Certificate in Emergency Health Services Systems Planning

The School of Health Administration offers an undergraduate **Certificate in Emergency Health Services System Planning (CEHSP)**. The certificate is designed for professionals seeking domain-specific knowledge in Emergency Health Services management.

The objective of the certificate is to assist individuals working in emergency health services organizations to more effectively manage community needs and resources. The certificate aims to:

- Help emergency and disaster health services managers to design an efficient pre-hospital care system through community-based emergency health need assessment with regard to people, time, and place
- Enable managers to design an Emergency Health Services system that meets the needs of community by integrating the elements of planning cycle and unique specification of Emergency Health Services system structure

The **Certificate in Emergency Health Services System Planning (CEHSP)** is also designed in a manner that allows the interested individual to continue on with more advanced training.

Admission Requirements

You must meet the Dalhousie University [undergraduate admission requirements](#) to be considered for this program. This certificate program does not typically accept people applying directly from high school. It is recommended that you have work or volunteer experience in the health services industry before applying for the program.

A complete application consists of the following documents:

- A completed [application form](#) and fee
- An official transcript of the record of academic work completed to date
- One letter of reference (academic or professional)
- Resume/curriculum vitae
- Applicants whose first language is not English must provide proof of English proficiency. See General Admission Requirements.

Application deadlines are:

- March 1 for September start
- November 15 for January start
- March 15 for May start

Curriculum

The one-year certificate features both academic and results-oriented curriculum. Students accepted into the **Certificate in Emergency Health Services System Planning (CEHSP)** take the following half credit classes:

- **Fall Semester - Required Course** HESA 4004: Healthcare Planning
- **Winter Semester - Required Course**
HESA 4200: Epidemiology for Managers
- **Summer Semester - Required Course**
HESA 4030: Emergency Health Services Systems Design

Program Delivery

The **Certificate in Emergency Health Services System Planning (CEHSP)** is fully online offering flexible study options. The certificate is conducted through the Internet and web-based conferencing tool within the Dalhousie e-Learning platform. The Dalhousie e-Learning platform consists of a well-established suite of tools, which provide mechanisms for interactive exercises, such as group discussions, presentations, and information sharing. The certificate uses on-line learning technology for recommended readings, lessons, and course activities (e.g. assignments, tests, self-tests, etc.).

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions

HESA 4000 Canadian Healthcare Delivery System

CREDIT HOURS: 3

The course is designed to provide an overview of healthcare in Canada, and more specifically in Nova Scotia, where the health reform process will be addressed. Aimed specifically at supervisors, middle management, and administrators the existing trends in healthcare from a national and provincial perspective will be reviewed. The goal of this course is to provide the student with a snapshot view of the existing healthcare system, its past development, and future direction.

CROSSLISTED: CANA 4300.00

HESA 4001 Management Roles and Competencies

CREDIT HOURS: 3

This course seeks to help students to examine what managers do to add value to their organizations. As a starting point we will briefly explore the evolution of management theories, comparing the founding theories with more recent literature. We will also examine the role of managers in public organizations such as hospitals. Finally, we will examine specific skills and duties of healthcare managers including: leadership, power, motivation, decision making, communication, teamwork, conflict resolution, organizational change, and others. Learning is facilitated through a mix of individual study and group discussions, and direct feedback from the instructor.

HESA 4002 Health Human Resource Management

CREDIT HOURS: 3

This course will provide the student with a working knowledge of the day to day operational management of human resources. The course will focus on the requirements of a manager to mentor, lead and manage the organization's human resources. The interaction and interdependencies between the manager and the human resource department will be examined. Topics include labor management relations; human rights and labor related legislation; recruitment and selection; performance development and management; professional development and training; compensation related issues; collective bargaining and dealing with special employment related issues. Approved with Canadian Studies.

CROSSLISTED: HESA 4010.03

HESA 4003 Quality Management

CREDIT HOURS: 3

This course will provide an introduction to the concept of quality improvement. Students will be exposed to the various methods to measure and assess quality in healthcare and be provided exposure with tools and techniques utilized in practice. A focus on safety and risk, patient satisfaction, team leadership as well as accreditation will be undertaken to ensure students gain practical understanding of the drivers of quality in Canadian healthcare. Approved with Canadian Studies.

CROSSLISTED: HESA 4020.03

HESA 4004 Healthcare Planning

CREDIT HOURS: 3

This course will use lectures, readings and case discussion to explore issues and methods related to health planning and evaluation. Emphasis will be placed on learning how to apply theory to practice at the system, organization, and service levels.

HESA 4005 Healthcare Financial Management

CREDIT HOURS: 3

This course will introduce the student to financial management concepts. The key concepts of financial resource management will be explored with particular emphasis on implementation in the healthcare sector. Introduction of the basic components will enable the student to understand the concepts within the larger framework of strategic and organizational resource planning and utilization. Topics covered include preparing, managing, and evaluating department budgets, payment systems, and fiscal accountability.

HESA 4010 Management Process and Human Resource Issues in Emergency Management Services

CREDIT HOURS: 3

The course is designed to introduce methodologies used within the Human Resources Industry to help the emergency medical services manager support organizational goals while managing employees. Topics focus on providing a strategic overview of ways managers can influence employees through a career life cycle that supports both employee and organizational needs. In this on-line course; readings, learning activities and assignments, will encourage the learner to build upon basic human resource management concepts successfully used within organizations, to the specifics of the emergency medical services environment

CROSSLISTED: HESA 4002.03

HESA 4020 Quality Improvement in Emergency Medical Services

CREDIT HOURS: 3

The course is designed to introduce the emergency medical services manager to the concepts and practices of quality management used within the health care setting. Topics focus on utilization of a systems approach to develop tools and methodologies for monitoring, measuring, evaluating, and reporting on organizational effectiveness. In this on-line course, readings, learning activities and assignments, will encourage the learner to examine how a culture of quality improvement and accountability can be implemented within the emergency medical services environment.

CROSSLISTED: HESA 4003.03

HESA 4030 Emergency Medical Services (EMS) System Design

CREDIT HOURS: 3

The online course prepares students for a challenging career as a professional EMS system manager in designing/modifying an EMS system. It first considers the determinants of a system, then examines both internal and external environmental factors in designing an EMS system. Next, human resource management and performance evaluation components are presented. Finally, the course will analyze how the system prepares for disasters and its countermeasures.

HESA 4040 Principles of Public Relations and Marketing in Emergency Medical Services

CREDIT HOURS: 3

The course is designed to examine the benefits of applying standard industry concepts to public relations and marketing to the emergency medical services environment. Topics focus on marketing and public relations terminology and concepts, marketing within the healthcare setting, public relations, risk and crisis communications, and integrated strategic communications planning as they apply within the emergency medical services environment. In this on-line course, readings, learning activities and assignments, will encourage the learner to implement the concepts of successful public relations and marketing strategies to promote and advance emergency medical services within the community context.

HESA 4200 Epidemiology for Managers

CREDIT HOURS: 3

This course is a general, introductory course in the principles of epidemiology. Discussion will concentrate on the occurrence of disease and injuries in human populations, examine methods of determining the causes of illness and death, and analyze conclusions which have been gained through the application of epidemiological studies.

HESA 4400 Introduction to Healthcare Economics

CREDIT HOURS: 3

This course is an introduction to the principle of health economics. Starting with basic concepts of opportunity cost, trade-offs and the benefits of trade, the course focuses on understanding economic concepts such as demand, supply, costs, revenue, profit and market structure. The course then covers issues related to market failures such as imperfect competition in health care sector. The final section of the course provides an overview on health technology assessment.

Introduction

Our Vision

Physical and Mental Wellness for All

Our Mission

Through effective teaching, innovative research and meaningful partnerships, we develop, apply and advance knowledge in health promotion, kinesiology, and leisure studies.

Our Values

As a community of students, scholars, practitioners, researchers and lifelong learners, we:

- Value broad perspectives of health and wellness
- Respect all voices by committing to integrity, equity and inclusion
- Embrace innovation and change
- Strive for meaningful collaborations
- Champion scholarship and critical inquiry

Limited Enrolment

All programs offered by the School of Health and Human Performance have enrolment limits.

Interprofessional Health Education

Students are required to maintain enrolment in IPHE 4900.00 (see calendar section on Health, Interprofessional Health Education) for the duration of their studies. **Please register in IPHE 4900.00 (section 2).** Successful completion is a requirement for graduation, and will be recognized further with the awarding of a special Certificate in Interprofessional Collaboration to be presented by the Faculty of Health. Students are asked to consult with their individual school/college to determine the specific guidelines and expectations regarding the required portfolio.

Equitable Admissions Policy

Purpose of the Policy

This policy is intended to create opportunities to increase the support and admission, and graduation of students who self-identify as belonging to historically underrepresented groups: Persons of Aboriginal/Indigenous ancestry (especially Mi'kmaq), members of racialized groups, persons of African descent (especially African Nova Scotians), Acadians, persons with (dis)ability, and persons belonging to minority sexual orientation and/or gender identity (SOGI) groups.

Eligibility

Persons eligible to be considered under this policy must self-identify. Although the School of Health and Human Performance is committed to supporting eligible students from across Canada, preference will be given to those who are a resident of Atlantic Canada or who have a parent residing in Atlantic Canada at the time of application.

Consideration for admission under this policy is optional. Applicants wishing to be considered under this policy must identify on the undergraduate application form.

Requirements

To be considered for admission under this policy, the following criteria must be met:

1. Those applying directly from high school must have attained a minimum grade of 65% in each of the prerequisites listed for the program of choice. Transfer students (e.g. individuals having completed post secondary courses) must have achieved a minimum overall GPA of 2.3 (C+).
2. The applicant would otherwise not have been admitted through the regular admission process.
3. The application and a written statement outlining their motivation for applying must be submitted to the Registrar's Office no later than March 15.

Support Services

Once admitted to the School, students wishing to access the following support services must identify their need to the Student Services Administrator, or the course professor.

School of Health and Human Performance:

1. The Student Services Administrator will meet regularly with students to assist with advising, administrative needs, and other concerns.
2. Faculty members will facilitate extra support or instruction for their course content if necessary.
3. Faculty members who are members of the designated groups, or who are closely affiliated with those groups, will be asked to provide academic mentorship if required.
4. Faculty whose office is in a building that might be inaccessible to students with a physical disability will arrange an alternative, more accessible, space for meeting with those students.

Dalhousie University offers a variety of services to students

For further information go to www.dal.ca/campus_life/student_services.html

School of Health and Human Performance Regulations

1. All students must observe the University and Academic Regulations described in this Calendar.

2. Attendance

All students must attend the classes of their prescribed course regularly and punctually. When the work of a student becomes unsatisfactory or attendance is irregular, the student may be required to discontinue the course concerned.

3. Workload

The maximum course load for any fall or winter term is 15 credit hours (five half-credits). Students wishing to exceed the maximum course load must receive permission from the academic advisor within the School. Permission will not normally be granted to any student in their first year of study or to any student who does not have a cumulative GPA of 3.00 or above. Other requests based on extenuating circumstances will be considered.

4. Grade Point Average Requirements

The grade point average system is described in the Academic Regulations.

5. Supplemental Examinations

The School of Health and Human Performance does not offer supplemental examinations in any of its programs.

6. Academic Appeals Procedures

Students may follow the Appeals process as outlined in Academic Regulation 24.6 - Faculty of Health Student Appeals Process. <https://www.dal.ca/faculty/health/current-students/student-resources.html>

7. Bereavement Leave

When an immediate family member dies, the student is entitled to up to seven consecutive calendar days away from the School. Immediate family is defined as the student's spouse or common-law partner; the student's father and mother and the spouse or common-law partner of the father or mother; the student's child(ren) and the child(ren) of the student's spouse or common-law partner; the student's grandchild(ren); the student's brothers and sisters; the grandfather and grandmother of the student; the father and mother of the spouse or common-law partner of the student and the spouse or common-law partner of the father or mother; and any relative of the student who resides permanently with them or with whom the student permanently resides.

“Common-law partner”: means a person who has been cohabiting with an individual in a conjugal relationship for at least one year, or who had been so cohabiting with the individual for at least one year immediately before the individual's death.

Non-family member funeral leave: Students may take one to three days off to attend the funeral of a close, non-family member.

Verification: Students should contact the Student Services Advisor (SSA), Stairs House, 6230 South Street (494-3809, htb@dal.ca) as soon as possible to allow her to contact necessary course instructors. Students will be required to provide evidence of the death of the family member to the SSA. If the leave is to extend beyond 7 consecutive calendar days, the student should once again contact the SSA to determine whether arrangements can be made to miss additional time. The student may also need to consult with individual course instructors on whether or not it is feasible to miss additional time and still be successful in the course(s). In cases where a student will be/has been absent for longer than a week, it may be advisable for the student to consider withdrawing from the term's classes. In this case, the student should discuss their options with the SSA.

Degree Programs

The School offers the following programs:

- Bachelor of Health Promotion
- Bachelor of Health Promotion with Honours*
- BSc (Health Promotion) - Admission to this program is suspended
- BSc (Health Promotion) with Honours* - Admission to this program is suspended
- BSc (Kinesiology)
- BSc (Kinesiology) with Honours*
- BSc (Recreation)**
- BSc (Recreation) with Honours*
- BSc (Recreation)/Bachelor of Management***
- BSc (Recreation) with Honours*/Bachelor of Management***

* Application is made to the Honours Coordinator by November 15 for Bachelor of Health Promotion, BSc (Recreation) and BSc (Recreation)/BManagement and April 1 for BSc (Kinesiology), of the student's third year. BSc (Recreation)/B Management students apply by November 15 of their fourth year. Consult department for further information.

** The BSc (Recreation) is a degree in Therapeutic Recreation.

***This is a five-year combined degree in which the student will graduate with both a Bachelor of Science (Recreation) and Bachelor of Management degree.

NOTE 1: Students entering into any of the above degree programs from high school should refer to the Admission Requirements section of this calendar.

NOTE 2: Students who are transferring into any of the above degree programs with previous academic work will formulate a program of study with the Student Services Administrator, based on previous work. Students transferring into the BSc (Health Promotion), BSc (Recreation) and BSc (Recreation)/BManagement programs should note that the internship experiences required in the final year of these programs are normally only offered in the fall and winter terms.

Staff

Director

Rehman, L., BHK, MA (UBC), PhD (Waterloo)

Professors Emeriti

Lyons, R. F., BA (Dalhousie), MEd (Xavier), PhD (Oregon)

Singleton, J., BA (Waterloo), MS (Pennsylvania State), PhD (Maryland)

Professors

Gahagan, J., BA, BA (Hons) (Carleton), MA (Windsor), PhD (Wayne State)

Jackson, L. A., BA, MA, PhD (Toronto)

Keats, M., BSc (Calgary), MSc (Alberta), PhD (Calgary)

Kirk, S., BSc (Hons) (Leeds Metropolitan), PhD (Leeds)

Rehman, L. A., BHK, MA (UBC), PhD (Waterloo)

Westwood, D. A., BSc, MA, PhD (Waterloo)

Associate Professors

Grandy, S., BSc, MSc, PhD (Dalhousie)

Hutchinson, S. L., BA (Victoria), MA (Dalhousie), PhD (Georgia)

Kimmerly, D., BSc (Hons) (Waterloo), MSc, PhD (Western Ontario)

Martin, D., BRec (Memorial), MA, PhD (Dalhousie)
Neyedli, H., BSc (Dalhousie), MASc, PhD (Toronto)
Numer, M., BA (Robert Morris), MEd (California), PhD (Dalhousie)
Rainham, D., BES (Waterloo), MSc (Alberta), PhD (Ottawa)
Robinson, L. M., BSc (Hons) (UViC), MA, PhD (Simon Fraser)
Truong, S., BSc (Dalhousie), MA (Alberta), Postgrad Cert. (East London), PhD (Alberta)

Assistant Professors

Dithurbide, L., BA (SMU), MA (Brock), PhD (Michigan State)
Frayne, R., (BScH (Guelph), MSc, PhD (Western Ontario)
Gallant, K., BSc (Hons) (Mt. A), BJourn (King's), MSc (Guelph), PhD (Waterloo)
Hamilton-Hinch, B., BSc, MA, PhD (Dalhousie)
Ladouceur, M., BSc, MSc (Sherbrooke), PhD (McGill)
Moore, S., BRLS, MSc (Brock), PhD (UBC)
Stone, M., BPHE, BSc (Queen's), MSc (Saskatchewan), PhD (Exeter)
Welch, J., BA, BSc Honours (Carleton), MSc (Alberta), PhD (Purdue)

Instructors

Huybers, B., BSc (MSVU), MA, PhD (Dalhousie)
Spencer, B., BSc, MA, PhD (Dalhousie)
Stevens, D., BSc (Hons) (Wolverhampton), MSc (Cardiff), PhD (Exeter)
Woodford, K., BA, BRec (Memorial), MA (MSVU)
Zahavich, J., BSc, (Dalhousie), MSc (Calgary), PhD (Dalhousie)

Cross-Appointed Faculty

Blanchard, C., BA (Hons) (UPEI), MA, PhD (Alberta), major appointment with Department of Medicine
Boe, S., BPhEd (Brock), PhD, MPT (Western Ontario), major appointment with School of Physiotherapy
Dechman, G., BSc (Queens), PhD (McGill), major appointment with School of Physiotherapy
Hajizadeh, M., BA, MSc (Iran), PhD (Queensland), major appointment with School of Health Administration
Karabanow, J., BA (Hons), MA (McGill), PhD (Wilfred Laurier), major appointment with Social Work
Rutherford, D., BScH (Western Ontario), BSc (U of Toronto), MSc, PhD (Dalhousie), major appointment with the School of Physiotherapy and School of Biomedical Engineering
Wong, I., BScH (Acadia), MD (Dalhousie), major appointment with Department of Surgery

Adjunct Appointees

Arthur, M., BA (Carleton), BSc (Ottawa), MSc (Dalhousie)
McSweeney-Flaherty, J., BA (St. Mary's), MA, PhD (Dalhousie)
Meisner, B., HBSc (Toronto), MSc, PhD (York)
Steeves, D., BEd (UNB), MSc (Dalhousie)
Thornley, L., BSc (Brighton), MSc (Dalhousie)
Willgress, S., BSc, MSc (Calgary)

Bachelor of Health Promotion

The Bachelor of Health Promotion is a four-year undergraduate degree program aligned with, and accredited through, the International Union of Health Promotion and Education (IUHPE). Health promotion is focused on achieving population health and wellbeing. The discipline of health promotion involves planning institutional, political, community, and education initiatives aimed at improving health and living conditions to support health and wellbeing. Health promotion values respect, inclusion, equity, sustainability, and social justice.

Core competencies for health promotion practitioners include enabling change, advocating for health, mediating partnerships, communication, and leadership. Responsibilities of health promotion practitioners include assessments of needs and assets, planning and implementing health promotion interventions, and conducting evaluation and research.

The Bachelor of Health Promotion program guides students in attaining: (1) knowledge, attitudes and practices conducive to supporting health and wellbeing; (2) professional preparation for a career in health promotion; and (3) academic preparation for advanced study and research in health promotion of health-related fields.

Program of Study

NOTE: On admission into the Bachelor of Health Promotion program, all students will be issued a Program of Studies Form. It is the responsibility of the student to ensure that all of the requirements for the degree as outlined on the form are completed for graduation.

Required Courses - Bachelor of Health Promotion

Required HAHP Courses

Courses	Credit Hours
HAHP 1000	3
HAHP 1200	3
HAHP 2000	3
HAHP 3100	3

Required HPRO Courses

Courses	Credit Hours
HPRO 1195	3
HPRO 2110	3
HPRO 2120	3
HPRO 2361	3
HPRO 3397	3
HPRO 3422	3
HPRO 4110	3
HPRO 4495	15

Other Required Courses

Courses	Credit Hours
SOSA 1003	3
HSCE 1020	3
HSCE 1030	3
STAT 1060	3
Writing Requirement*	3

Required Electives:

Courses	Credit Hours
HAHP/HPRO Electives**	21
Health Related Electives***	12
Open Electives****	24

NOTE: All students must register in IPHE 4900 every semester and must complete this requirement to graduate. Upon completion of the degree, students will receive a Certificate in Interprofessional Collaboration.

*Writing Requirement: See list of Writing Requirement course options under Degree Requirements section under the College of Arts and Science in the academic calendar.

**HAHP/HPRO Electives – students must select 21 credit hours from courses included in the following list:

Courses	Credit Hours
HAHP 3000	3
HPRO 2255	3
HPRO 3250	3

HPRO 3325	3
HPRO 3351	3
HPRO 3360	3
HPRO 4101	3
HPRO 4412	3
HPRO 4450	3
HPRO 4595	3
HPRO 4701	3

(NOTE: For students completing an honours degree, HPRO 4102 may be counted in this category)

*** **Health Related Electives:** Students must select 12 credit hours of course work at Dalhousie that has a primary focus on health content. Generally, any course from the Faculty of Health or any course with health in the title will count in this category. Other courses are considered as well – please see an advisor for consultation if you are uncertain.

**** **Open Electives:** These can be chosen from any available course at Dalhousie. Twelve (12) of the 24 credit hours of open electives must be 2000 level or higher.

Bachelor of Health Promotion with Honours

The Honours Program is part of the 120 credit hours required for the Bachelor of Health Promotion degree. Students must complete HPRO 4101.03 and HPRO 4102.03 to meet Honours degree requirements. These courses may be applied to count as HAHP/HPRO Electives, Health-Related Electives or Open Electives.

Students wishing to be considered for entrance into the Honours Program must meet the minimum requirements listed below. *Acceptance to the program after meeting these requirements will depend on a faculty member being willing to supervise the honours thesis.*

1. Completed a minimum 75 credit hours towards their undergraduate degree.
2. Obtained a GPA of 3.70 based on the previous 45 credit hours of academic work. Students whose GPA falls between 3.50 and 3.70, who still wish to apply to the Honours program, have the option to provide a written statement with their application describing the special circumstances that suggest they will be able to competently complete the Honours program although they do not meet the GPA requirement for admission.
3. Completed HAHP 3100 with a minimum grade of B.

Application is made by November 15th of the student's third year.

Students accepted into the Honours program are required to attend an Honours seminar weekly for the first two months, and then monthly.

Honours Conversion

Students who have graduated with a Bachelor of Health Promotion degree can apply for the Honours Conversion program. Before taking HPRO 4101.03 and HPRO 4102.03, they must have satisfied the admission requirements for the Honours Program. With the approval of the Honours Coordinator, it may be possible to take certain prerequisite courses concurrently with HPRO 4101.03 and HPRO 4102.03. Acceptance into the Honours Conversion program can only be considered provided a faculty member has agreed to supervise the project. Interested students should contact a Student Services Administrator in the School of HAHP for application information.

Bachelor of Science (Kinesiology)

Program Description

Kinesiology is the study of the structure and function of the human body within the context of human movement and with a focus on the maintenance and enhancement of health and well-being. Students may elect to concentrate in one of three professional areas - ergonomics; fitness and lifestyle; or coaching science* - or follow a more general stream with a focus on research or other professional areas in which human movement and health are central. The School offers a four-year BSc (Kinesiology) degree as well as a four-year [honours degree in Kinesiology](#).

* See stream requirements under Program of Study below.

The goals of these degrees are to provide students with:

1. A broad background in various subdisciplines of Kinesiology, including anatomy, physiology, neurophysiology, biomechanics, movement control and psychology of performance;
2. An exposure to several science disciplines which are prerequisite and/or complementary to the kinesiology subdisciplines (e.g. biology, physics, psychology, mathematics);
3. An introduction to the discipline of health promotion and an appreciation of the role kinesiology plays in health and well-being concerns of the individual;
4. An exposure to some aspects of the humanities and social sciences, as a means of enhancing the liberal education of the student and addressing social concerns in relation to health promotion;
5. A solid foundation in research methodology and statistics, including opportunities for independent research if the student should so choose;
6. An understanding of the principles and tools necessary to evaluate human movement from a variety of perspectives and in a variety of settings, as well as hands-on experience in several evaluative procedures;
7. Professional preparation in the areas of fitness and lifestyle; ergonomics; or coaching sciences;
8. Experiences in active and problem-based learning;
9. The necessary background to enable the student to pursue graduate work in kinesiology or other related fields.

Program of Study

On admission into the BSc (Kinesiology) program, all students will be issued a Program of Studies Form. It is the responsibility of the student to ensure that all of the course requirements for the degree as outlined on the form are completed for graduation.

Required Courses - BSc (Kinesiology)

• ENGL 1100.03	3
• HAHP 2000.03	3
• HAHP 3100.03	3
• ANAT 1020.03	3
• PHYC 1310.03	3
• PHYL 1011.03	3
• PHYL 1012.03	3
• KINE 1102.03	3
• KINE 1104.03	3
• KINE 1106.06	3
• KINE 1108.03	3
• KINE 3250.03	3
• KINE 2310.03	3
• KINE 2320.03	3
• KINE 2430.03	3
• KINE 2465.03	3
• KINE 3200.03	3
• KINE 3500.03	3
• MATH 1060.03 /STAT 1060.03	3

Kinesiology Electives*	21
Science Electives**	12
Open Electives***	30

* 6 credit hours of Kinesiology electives must be at the 4000 level; the remaining 15 credit hours must be either at the 3000 or 4000 level.

**12 credit hours of science electives must be selected from the following list:

- BIOL 1010.03 or BIOL 1020.03: Principles of General Biology I
- BIOL 1011.03 or BIOL 1021.03: Principles of General Biology II
- PHYC 1320.03: Physics In and Around You
- CHEM 1011.03: General Chemistry Part I
- CHEM 1012.03: General Chemistry Part II
- MATH 1000.03: Differential & Integral Calculus or MATH 1215.03
- MATH 1010.03: Differential & Integral Calculus
- PSYO 1011, PSYO 1021.03 or PSYO 1031.03: Introduction to Psychology and Neuroscience I
- PSYO 1012 or PSYO 1022.03 or PSYO 1032.03: Introduction to Psychology and Neuroscience II

*** Open electives must include at least 15 credit hours at the 2000 level or above.

Students considering applying for the Honours degree should refer to [Bachelor of Science \(Kinesiology\) with Honours](#) to view honours degree admission and completion requirements.

Stream Requirements

Students interested in focusing on Ergonomics; Fitness and Lifestyle; or Coaching Science at an advanced level will be guided into one of three specialty streams. A maximum of 12 students/year/stream will be selected, primarily on the basis of GPA. Students wishing to complete a stream should consult the student advisor.

The following is a list of required courses for each stream. Any courses over the 18 credit hours of required KINE electives can be counted as open electives:

Ergonomics Stream

- KINE 3414.03: Exercise Testing and Prescription for Healthy Populations
- KINE 3476.03: Principles of Ergonomics
- KINE 3482.03: Care & Prevention of Injuries
- KINE 4466.03: Advanced Biomechanics
- KINE 4577.03: Cognitive Ergonomics
- KINE 4578.03: Physical Ergonomics
- KINE 4588.03: Clinical and Occupational Kinesiology

Fitness and Lifestyle Stream

- KINE 3414.03: Exercise Testing and Prescription for Healthy Populations
- KINE 3419.03: Application of Physiological Principles to Human Performance
- KINE 3485.03: Psychology of Sport **OR**
- LEIS 3492.03: Counselling for Health and Well-being
- KINE 4108.03: Mind/Body Connections and Well-being
- KINE 4412.06: Advanced Exercise Testing and Prescription for Clinical Populations

Coaching Science Stream

- KINE 3320.03: Anatomical Basis of Human Movement
- KINE 3419.03: Application of Physiological Principles to Human Performance
- KINE 3430.03: Principles of Skill Acquisition
- KINE 3482.03: Care and Prevention of Injuries
- KINE 3485.03: Psychology of Sport
- KINE 3740.03: Coaching Science Seminar
- KINE 3741.03: Coaching Science Practicum
- KINE 4740.03: Advanced Coaching Science Seminar
- KINE 4741.03: Advanced Coaching Science Practicum
- MGMT 2401.03: Introduction to Marketing

Bachelor of Science (Kinesiology) with Honours

Students who wish to complete the Honours Program may apply by April 1st of their third year of study. *Acceptance into the honours program is contingent upon the willingness of a faculty member to serve as the honours thesis advisor.* To be considered for admission into the program, students must have fulfilled the following requirements:

1. Obtained an overall GPA of 3.5 on the previous 60 credit hours;
2. Completed HAHF 3100.03 (Research Methods) with a minimum grade of B;
3. Completed MATH 1060 / STAT 1060 and an additional 3 credit hours of MATH/STAT. The additional 3 credit hours can be chosen from any MATH/STAT course at Dalhousie except for MATH 1115.03 nor MATH 1315.03;
4. Completed an upper level Kinesiology course (at the 3000 level or above) in the area in which the research will be undertaken (e.g. ergonomics, biomechanics, exercise physiology, neuromuscular physiology) with a minimum grade of B.

Application is made through the Honours Coordinator by April 1st of the student's third year.

Students accepted into the Honours program are required to attend an Honours seminar weekly for the first two months, and then monthly.

Students accepted into the Honours program must complete KINE 4901.03 and 4902.03. This requirement is in lieu of six credit hours of Open Electives listed as part of the requirements for the BSc (Kinesiology).

Honours Conversion

Students who have graduated with a Bachelor of Science (Kinesiology) degree can apply for the Honours Conversion program. Before taking KINE 4901.03 and 4902.03, they must have satisfied the requirements for the Honours Program. With the approval of the Honours Coordinator, it may be possible to take certain prerequisite courses concurrently with KINE 4901 and 4902. Application is made through the Honours Coordinator (details in the BSc (Kinesiology) with Honours section). Acceptance into the Honours Conversion program can only be considered provided a faculty member has agreed to supervise the project.

Bachelor of Science (Recreation) - Therapeutic Recreation

Program Description

Therapeutic Recreation involves the delivery of change-oriented services to individuals with disabilities, illness and other limitations, with the focus on increasing quality of life through leisure and recreation involvement. Graduates of the Therapeutic Recreation degree will be skilled in the areas of: disability and illness, leisure theory, assessment, planning (program and client planning), program implementation and evaluation, and documentation. Graduates will find employment in both traditional clinical settings such as rehabilitation facilities, psychiatric hospitals and nursing homes, and in community settings such as community mental health centres or associations for community living, etc.

Vision

Well-being through Recreation and Leisure

Mission

We are intentional about:

1. Linking teaching, research and community.
2. Cultivating diverse and inclusive communities.
3. Preparing conscientious leaders.

Objectives

The general objectives of the program are:

1. To provide the student with a broad educational exposure to various social science and humanities disciplines (e.g. Psychology, Sociology, Economics, Political Science, Anthropology, History);
2. To familiarize students with current social science-based research methods and statistics;
3. To provide the student with the necessary skills and knowledge for entry into the roles of leadership, advocacy, constancy and education in recreation and leisure services;
4. To provide the necessary background to enable students to pursue graduate work in leisure studies, management studies or the social sciences and humanities.

Program of Study

On admission into the BSc (Recreation) program, all students will be issued a Program of Study Form. It is the responsibility of the student to ensure that all of the course requirements for the degree as outlined on the form are completed for graduation.

Required Courses BSc (Recreation) - Therapeutic Recreation

- HAHP 2000.03 3
- HAHP 3000.03 3
- HAHP 3100.03 3
- HSCE 1020.03 3
- HSCE 1030.03 3
- LEIS 1127.03 3
- LEIS 2127.03 3
- LEIS 1130.03 3
- LEIS 2296.03 3
- LEIS 2361.03 3

- LEIS 2385.03 3
- LEIS 3127.03 3
- LEIS 3426.03 3
- LEIS 3427.03 3
- STAT 1060.03/MATH 1060.03 3
- LEIS 3492.03 3
- LEIS 4365.03 3
- LEIS 4563.03 3
- LEIS 4598.15 15

Required Arts and Social Science Courses

- PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03 3
- PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03 3
- PSYO 2220.03 3
- SOSA 1002.03 3
- SOSA 1003.03 3

Therapeutic Recreation Electives

Two of the following:

- LEIS 4482.03 3
- LEIS 4512.03 3
- LEIS 4540.03 3

Electives

- LEIS Elective 3
- Open Electives* 27

*12 of the 27 credit hours of Open Electives must be 2000 level or above.

NOTE: Students should consult the NCTRC website (<http://www.NCTRC.org>) for CTRS Certification requirements.

Bachelor of Science (Recreation) with Honours

Students wishing to be considered for entrance into the Honours Program must meet the minimum requirements listed below. Acceptance to the program after meeting these requirements will depend on a faculty member being willing to supervise the honours thesis.

1. Completed a minimum of 75 credit hours towards the Bachelor of Science (Recreation) degree. Normally students will have completed five semesters prior to beginning the honours component of the program.
2. Obtained a GPA of 3.70 based on the previous 45 credit hours of work. Students whose GPA falls between 3.50 and 3.70, based on the previous 45 credit hours of academic work, who wish to apply to the Honours program, have the option to provide a written statement with their application describing the special circumstances that suggest they will be able to competently complete the Honours program although they do not meet the GPA requirement for admission.
3. Completed HAHF 3100 - Research Methods with a minimum grade of B.

Application is made by November 15th of the student's third year.

NOTE: Students accepted into the Honours program must complete LEIS 4101.03 and LEIS 4102.03. These six credit hours may be attributed as open electives or as MGMT/LEIS electives.

The Honours Program is part of the 120 credit hours required for the Bachelor of Science (Recreation) degree.

Students accepted into the Honours program are required to attend an Honours seminar weekly for the first two months, and then monthly.

Honours Conversion

Students who have graduated with a Bachelor of Science (Recreation) degree can apply for the Honours Conversion program. Before taking LEIS 4101.03 and LEIS 4102.03, they must have satisfied the admission requirements for the Honours Program. With the approval of the Honours Coordinator, it may be possible to take certain pre-requisite courses concurrently with LEIS 4101.03 and LEIS 4102.03. Interested applicants should contact a Student Services Administrator in the School of HAHP for application information.

Bachelor of Science (Recreation)/Bachelor of Management

Program Description

The curriculum of this combined program was developed in response to guidance from alumni and practicing professionals in the field — it was clear that while graduates entering the field of recreation administration needed the strong grounding in the recreation discipline, they also needed more management skills. The Faculty of Management's Bachelor of Management degree emphasizes an orientation to management in the public and non-profit sector. This combined degree program enhances career options of future recreation students.

The Bachelor of Science (Recreation)/Bachelor of Management is a five-year program comprising 150 credit hours. Upon completion of this program, the successful student graduates with a Bachelor of Science (Recreation) degree and a Bachelor of Management degree.

Vision

Well-being through Recreation and Leisure

Mission

We are intentional about:

1. Linking teaching, research and community.
2. Cultivating diverse and inclusive communities.
3. Preparing conscientious leaders.

Objectives

1. To provide the student with a broad educational exposure to various social science and humanities disciplines (e.g., Psychology, Sociology, Economics, Political Science, Anthropology, History);
2. To familiarize students with current social science-based research methods and statistics;
3. To provide the student with the necessary skills and knowledge for entry into the professional roles of leadership, advocacy, education and service delivery in recreation.
4. To provide the necessary background to enable students to pursue graduate work in leisure studies, management studies, or the social sciences and humanities.

Required Courses - Bachelor of Science (Recreation)/Bachelor of Management

Required Health and Human Performance Courses

- HAHP 2000.03 3
- HAHP 3000.03 3
- HAHP 3100.03 3
- LEIS 1127.03 3
- LEIS 1167.03 3
- LEIS 2127.03 3
- LEIS 2296.03 3
- LEIS 2361.03 3
- LEIS 2385.03 3
- LEIS 3127.03 3
- LEIS 3360.03 3
- LEIS 3362.03 3
- LEIS 3370.03 3
- LEIS 4362.03 3
- LEIS 4597.15 15

- MGMT 1301.03 3
- MGMT 1302.03 3
- MGMT 1501.03 3
- MGMT 1601.03 3
- MGMT 1101.03 3
- MGMT 2303.03 3
- MGMT 2304.03 3
- MGMT 2305.03 3
- MGMT 2401.03 3
- MGMT 2801.03 3
- MGMT 3001.03 3
- MGMT 3201.03 3
- MGMT 3501.03 3
- MGMT 3602.03 3
- MGMT 4003.03 3

Other Required Courses

- ECON 1101.03
- ECON 1102.03
- SOSA 1002.03 and SOSA 1003.03
- Writing Requirement (6)*
- Open Electives (21)**
- MGMT/LEIS electives (09)***

*Students must complete a six credit hour writing requirement. This can be completed by choosing six credit hours from the list of Writing Courses within the College of Arts and Science Degree requirements.

ELECTIVES

**Open Electives: The equivalent of 21 credit hours chosen from all courses offered in the University. Twelve of the 21 credit hours must be 2000 level or above.

***MGMT/LEIS Electives: The equivalent of 9 credit hours must be chosen from any MGMT or LEIS course not already required. Of the 30 credit hours of electives (21 credit hours open and 9 credit hours MGMT/LEIS), students may not exceed 12 credit hours at the 1000 level.

Bachelor of Science (Recreation) with Honours/Bachelor of Management

Students wishing to be considered for entrance into the Honours Program must meet the minimum requirements listed below. Acceptance to the program after meeting these requirements will depend on a faculty member being willing to supervise the honours thesis.

1. Completed a minimum of 105 credit hours towards the Bachelor of Science (Recreation)/Bachelor of Management degree. Normally students will have completed seven semesters prior to beginning the honours component of the program.
2. Obtained a GPA of 3.70 based on the previous 75 credit hours of work. Students whose GPA falls between 3.50 and 3.70 based on the previous 75 credit hours of academic work, and who wish to apply to the Honours program, have the option to provide a written statement with their application describing the special circumstances that suggest they will be able to competently complete the Honours although they do not meet the GPA requirement for admission.
3. Completed HAHP 3100 - Research Methods with a minimum grade of B.

Application is made by November 15th of the student's fourth year.

NOTE: Students accepted into the Honours program must complete LEIS 4101.03 and LEIS 4102.03. These six credit hours may be attributed as open electives or as MGMT/LEIS electives.

The Honours Program is part of the 150 credit hours required for the Recreation Management program.

Students accepted into the Honours program are required to attend an Honours seminar weekly for the first two months, and then monthly.

Honours Conversion

Students who have graduated with a Bachelor of Science (Recreation)/Bachelor of Management degree can apply for the Honours Conversion program. Before taking LEIS 4101.03 and LEIS 4102.03, they must have satisfied the admission requirements for the Honours Program. With the approval of the Honours Coordinator, it may be possible to take certain pre-requisite courses concurrently with LEIS 4101.03 and LEIS 4102.03. Interested applicants should contact a Student Services Administrator in the School of HAHP for application information.

Bachelor of Science (Health Promotion)

*****The Bachelor of Science (Health Promotion) is no longer accepting new students as the program has been revised and is now being offered as the [Bachelor of Health Promotion](#), starting in September 2022. Students who were previously admitted to the BScHP should continue to follow the curriculum as outlined in the BScHP. Students admitted for September 2022 will find degree and curriculum details listed under the [Bachelor of Health Promotion](#) listing in the calendar.*****

The Bachelor of Science (Health Promotion) is a four-year degree program. The goal of health promotion is to educate health promotion professionals in promoting, maintaining and improving the health and well-being of individuals, families and communities. As a profession, Health Promotion is principally devoted to employing health promotion processes and to fostering healthy behaviors.

The responsibilities of health promoters include: assessing health promotion needs; planning, conducting and evaluating health promotion programs; coordinating health promotion activities and resources; promoting health throughout the community; and professional development.

The BSc (Health Promotion) program guides students in attaining: (1) knowledge, attitudes and practices conducive to a healthy lifestyle; (2) professional preparation for a career in community health promotion; and (3) academic preparation for advanced study and research in health promotion or health-related fields.

Program of Study

NOTE: On admission into the BSc (Health Promotion) program, all students will be issued a Program of Studies Form. It is the responsibility of the student to ensure that all of the requirements for the degree as outlined on the form are completed for graduation.

Required Courses - BSc (Health Promotion)

Stream Requirements

Common Year One

HPRO 1000.03 3
HPRO 1195.03 3
ANAT 1020.03 3
ENGL 1100.03 3
STAT 1060.03 3
PHYL 1011.03 3
PHYL 1012.03 3

SOSA 1002.03 3
3

SOSA 1003.03

Open Elective ** 3

After the common first year, students will choose either the Community Health Promotion stream or the Health Promotion Research and Policy stream, and will follow the requirements as outlined below.

Community Health Promotion Stream

Year Two

HAHP 2000.03	3
HPRO 2110.03	3
HPRO 2120.03	3
HPRO 2361.03	3
One from List A***	
HPRO 2255.03, HPRO 4412.03, HPRO 4365.03	3
PSYO 1011 or PSYO 1021 and PSYO 1012 or PSYO 1022	6
Language and Humanities Elective*	3
Writing Requirement*****	6

Year Three

HAHP 3000.03	3
HAHP 3100.03	3
HPRO 3397.03	3
HPRO 3325.03	3
One from List B***	
HPRO 3335.03, HPRO 3345.03, HPRO 3351.03	3
Open Electives**	9
Health Related Elective(s)*****	6

Year Four

One from List A***	
HPRO 2255.03, HPRO 4412.03, HPRO 4365.03	3
One from List B***	
HPRO 3335.03, HPRO 3345.03, HPRO 3351.03	3
HPRO 4450.03	3
Open Elective(s)**	6
HPRO 4495.15	15

Health Promotion Research and Policy Stream

Year Two

HAHP 2000.03	3
HPRO 2110.03	3
HPRO 2120.03	3
HPRO 2361.03	3
PSYO 1011 or PSYO 1021 and PSYO 1012 or PSYO 1022	6
Language and Humanities Elective*	3
Writing Requirement*****	6
Open Elective**	3

Year Three

HAHP 3000.03	3
HAHP 3100.03	3
HPRO 3397.03	3
HPRO 4101.03	3
One from List C***	
HPRO 3360.03, HPRO 3370.03	3
Open Elective**	3

Health Related Electives**** 12

Year Four

Health Related Elective**** 9

Open Elective(s)** 6

HPRO 4495.15 15

* Language/Humanities Elective - see list under Degree Requirements Section in the Academic Calendar.

** Open Electives can be chosen from any available course at Dalhousie

***Students in the Research and Policy Stream must take one course from List C: HPRO 3360 or HPRO 3370. Students in the Community Health Promotion Stream must complete: Two courses from List A: HPRO 2255, HPRO 4412, or HPRO 4365; Two courses from List B: HPRO 3335, HPRO 3345, or HPRO 3351.

**** Health Related Electives - To ensure the courses you select fill this requirement, please check with an advisor.

***** See list of writing requirement courses under Degree Requirements Section in the Academic Calendar.

At graduation, valid Standard First Aid and CPR Level C Certification are required.

Bachelor of Science (Health Promotion) with Honours

*****The Bachelor of Science (Health Promotion) with Honours is no longer accepting new students as the program has been revised and is now being offered as the [Bachelor of Health Promotion with Honours](#), starting in September 2022. Students who were previously admitted to the BScHP should continue to follow the curriculum as outlined in the BScHP. Students admitted for September 2022 will find degree and curriculum details listed under the [Bachelor of Health Promotion with Honours](#) listing in the calendar.*****

The Honours Program is part of the 120 credit hours required for the Bachelor of Science (Health Promotion) degree. For the Community Stream, HPRO 4101.03 and HPRO 4102.03 may be applied as open electives or as health-related electives on the Program of Studies form (see the School's Student Services Administrator). For the Research and Policy Stream, HPRO 4101.03 is required and HPRO 4102.03 can be applied as an open or health-related elective on the Program of Studies form (see the School's Student Services Administrator).

Students wishing to be considered for entrance into the Honours Program must meet the minimum requirements listed below. *Acceptance to the program after meeting these requirements will depend on a faculty member being willing to supervise the honours thesis.*

1. Completed a minimum 75 credit hours towards their undergraduate degree.
2. Obtained a GPA of 3.70 based on the previous 45 credit hours of academic work. Students whose GPA falls between 3.50 and 3.70, who still wish to apply to the Honours program, have the option to provide a written statement with their application describing the special circumstances that suggest they will be able to competently complete the Honours program although they do not meet the GPA requirement for admission.
3. Completed HAHF 3100 with a minimum grade of B.

Application is made by November 15th of the student's third year.

NOTE: Students accepted into the Honours program must complete HPRO 4101.03 and HPRO 4102.03

Students accepted into the Honours program are required to attend an Honours seminar weekly for the first two months, and then monthly.

Honours Conversion

Students who have graduated with a Bachelor of Science (Health Promotion) degree can apply for the Honours Conversion program. Before taking HPRO 4101.03 and HPRO 4102.03, they must have satisfied the admission requirements for the Honours Program. With the approval of the Honours Coordinator, it may be possible to take certain prerequisite courses concurrently with HPRO 4101.03 and HPRO 4102.03. Acceptance into the Honours Conversion program can only be considered provided a faculty member has agreed to supervise the project. Interested students should contact a Student Services Administrator in the School of HAHF for application information.

Certificate in Human Physiology

Offered by: Physiology & Biophysics, Psychology & Neuroscience, Biology, Kinesiology

Coordinators: Dr. Derek Kimmerly (Kinesiology students) dskimmerly@dal.ca
Dr. Nathan Crowder (Neuroscience & Psychology) Nathan.Crowder@dal.ca
Dr. Stefan Krueger (Medical Sciences & other programs) stefan.krueger@dal.ca

Eligibility: This certificate is open to currently registered Dalhousie students.

Overview: The Certificate in Human Physiology provides students with an opportunity to specialize in physiological studies through courses offered in the Medical Sciences, Biology, Neuroscience, and Kinesiology undergraduate programs, as well as experiential learning opportunities. The learning outcomes will vary between students and depend on their main area of undergraduate studies, as well as on individual interests. Concentrating on one or more cross-cutting themes, students enrolled in the certificate program may choose to:

- Examine the function and role of particular organ systems in human performance and disease.
- Analyze the function of the nervous and endocrine systems to appreciate how they regulate bodily functions and behaviour.
- Explore physiological mechanisms at molecular and cellular levels to develop a more thorough understanding of physiological and pathophysiological processes at a higher organizational level.

Admission to Certificate: Students should enrol in the Certificate Program in Human Physiology in their third year of studies. To enrol, students must declare the certificate through Dal Online (<https://dalonline.ca> >Web for Students>Admissions>Declare Major/Minor/Certificate) and notify the Certificate Coordinator by e-mail.

To graduate with the Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate Requirements:

1. A minimum grade of at least B- is required in 6 credit hours of the following core courses:

- PHYL 2041 Human Neurophysiology and PHYL 2044 Systems Physiology or
- BIOL 3078/MARI 3078 Animal Physiology I and BIOL 3079/MARI 3079 Animal Physiology II or
- NESC 2470 Systems Neuroscience and PHYL 2044 Systems Physiology or
- KINE 2310 Physiology of Exercise and KINE 2430 Motor Control & Learning

2. A grade of at least B- required in 15 elective credit hours chosen from the list of courses below. Courses can only be counted towards elective credits if they have not been used to fulfill core course requirements. No more than one 2000-level course can be used towards elective credits. A maximum of 9 credit hours from any one stream (PHYL, NESC, BIOL, KINE) can be used.

- PHYL 3120 Exercise Physiology
- PHYL 3320 Human Cell Physiology
- PHYL 3520 Core Concepts in Medical Physiol
- PHYL 3620 Human Physiology Lab
- PHYL 4000 Synaptic Function
- PHYL 4324 Endocrine Function
- PHYL 4504 Respiratory Physiology
- PHYL 4680 Cardiovascular Physiology

- NESC 2150 Perceptual Processes
- NESC 2570 Cellular Neuroscience
- NESC 3051 Methods in Sensation and Perception
- NESC 3170 Hormones & Behaviour
- NESC 3670 Genes, Brain & Behaviour
- NESC 3970 Molecular Neuroscience

- NESC 4070 Chemical Neurobiology
- BIOL 3430 Intro Human Histology
- BIOL 4020 Advanced Cell Biology
- KINE 3419 Appl Physiology Principles Human Performance
- KINE 3250 Human Nutrition
- KINE 3440 Sensory and Motor Function
- KINE 4704 Cardiorespiratory Dynamics in Exercise

3. At least 6 credit hours of experiential learning or independent research. Research projects have to be conceptually or methodologically related to Physiology and be approved by the certificate program committee. Suitable courses for this requirement include **PHYL 3600, NESC 3001, NESC 3100, NESC 3101, NESC 4501, NESC 4502, SCIE 3100, SCIE 4101, SCIE 4102, SCIE 4901, SCIE 4902, BIOL 3800, BIOL 4806, BIOL 4807, BIOL 4901, BIOL 4902, KINE 4801, KINE 4802, and KINE 4900X/Y.**

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions - Health and Human Performance

HAHP 1000 Introduction to Health Systems

CREDIT HOURS: 3

This course introduces students to the philosophical and practical scope of the School's unique perspective on health and health systems. The historical foundations and current workings of the Canadian health system are explored. Students will gain a broad perspective on comparative health systems and the Canadian health system to build capacity in the field of health promotion.

RESTRICTIONS: Restricted to Health Promotion, Kinesiology and Leisure Studies Students. Others with permission of instructor.

EXCLUSIONS: HPRO 1000.03

FORMATS: Lecture

HAHP 2000 Human Growth and Development

CREDIT HOURS: 3

This course is designed to provide an overview of the human life course through physiological, emotional, social and psychological perspectives. This course explores various perspectives and influences that contribute to human development. Students will engage in class discussions, writing and research assignments to develop critical thinking skills.

COREQUISITES: IPHE 4900.00

RESTRICTIONS: Restricted to students in the School of Health and Human Performance and the School of Nursing. Others may be admitted if open seats exist at the start of the term.

FORMATS: Lecture

HAHP 3000 Community Development

CREDIT HOURS: 3

This course examines the nature and process of community development, and reviews differing interpretations and approaches to community development. Through group discussions, reflective activities, and assignments, students will develop skills to catalyze and engage in the process of community development. The class will investigate current Canadian initiatives and projects that encourage the practice of community development, and to provide the

opportunity to witness and become involved in local health-related projects that foster the principles of community development.

COREQUISITES: IPHE 4900.00

RESTRICTIONS: Restricted to students in the School of Health and Human Performance.

FORMATS: Lecture | Tutorial | Discussion

HAHP 3100 Introduction to Research Methods

CREDIT HOURS: 3

This course introduces students to the fundamentals of research in the fields of health and human performance. The course provides an overview of the broad approaches to research including qualitative and quantitative designs. Ethics associated with research, research design, issues in measurement, sampling, data collection strategies, data analysis and report writing are also covered. Through written assignments and other forms of evaluation, students will learn how to collect, review and appraise relevant data, information and literature to inform best practice and decision-making.

COREQUISITES: IPHE 4900.00

RESTRICTIONS: Restricted to students in the School of Health and Human Performance.

EXCLUSIONS: HSCE 3010.03

FORMATS: Lecture | Discussion

Course Descriptions - Health Promotion

HPRO 1195 Introduction to Health Promotion

CREDIT HOURS: 3

This course introduces students to the basic tenets of health promotion as a field and discipline, including health inequalities, health of communities, and health promotion ethics. This course will provide students with an opportunity to explore and critically analyze contemporary applications of health promotion. Students will also be introduced to the process of scholarly writing and research. The course will introduce students to the principles of health advocacy in relation to inequities and marginalized populations.

COREQUISITES: IPHE 4900

RESTRICTIONS: Restricted to Health Promotion students. Others by permission of instructor with priority to Health Professions students.

FORMATS: Lecture | Tutorial

HPRO 2110 Determinants of Health

CREDIT HOURS: 3

This course will provide an overview and introduction to the social and structural determinants of health in Canada. The course will include the examination of how health and health inequities are shaped by social and structural determinants of health, including income, employment, education, social exclusion, race, and gender, and the interactions between determinants will be examined. Through class discussions, critical reflections, and written assignments, students will develop an understanding on how the determinants of health influence the health of populations.

COREQUISITES: IPHE 4900

PREREQUISITES: HPRO 1195.03/HEED 1195.03

RESTRICTIONS: Restricted to Health Promotion students. Others by permission of instructor with priority to Health Professions students.

HPRO 2120 Health Promotion Policy

CREDIT HOURS: 3

This course will introduce students to the principles of health promotion policy. Students will learn how policy is developed, approved, and changed, on the basis of research and evidence. Students will explore processes and tools to influence public sector and political decision-making. Students will critically analyze existing health promotion issues and policies, and examine how policy interpretation, implementation, and compliance occur at the national, provincial, and local levels. Students will be asked to critically analyze existing health promotion policies and understand issues related to policy interpretation, application and compliance at national, provincial, and local levels for health promotion action.

COREQUISITES: IPHE 4900

PREREQUISITES: HPRO 1195.03/HEED 1195.03

RESTRICTIONS: Restricted to Health Promotion students. Others by permission of instructor with priority to Health Professions students.

HPRO 2255 Substance Use, Drug Policy and Harm Reduction

CREDIT HOURS: 3

This course explores substance use from a perspective that considers the complex human, social, cultural, economic, political, and environmental factors that have a role in contemporary substance use. Effective health promotion strikes a balance between people and their environments and focuses attention beyond individuals to consider the social, economic, and environmental factors that impact attitudes, decisions, and behaviours. Students will engage in class discussions, written assignments, and case studies to explore the systems, the policies and the harm reduction approaches for ethical substance use and treatment programs.

RESTRICTIONS: Restricted to School of Health and Human Performance students. Others by permission of instructor, with priority to Health Professions students.

FORMATS: Lecture

HPRO 2361 Program Planning and Evaluation

CREDIT HOURS: 3

This course will introduce students to designing, planning, implementing, and evaluating programs in leisure and health promotion. Both disciplines develop programs to enhance wellbeing and quality of life for individuals, groups, and communities. The planning process will include issues such as targeting specific populations, scanning for needs and assets, partnering, managing stakeholder relationships, and evaluation. Students will apply what they are learning in a culminating practical service-learning project.

COREQUISITES: IPHE 4900

PREREQUISITES: HPRO 1195.03/HEED 1195.03 or LEIS 1127.03

CROSSLISTED: LEIS 2361.03

RESTRICTIONS: Restricted to Recreation and Health Promotion students

FORMATS: Lecture | Discussion

HPRO 3250 Interdisciplinary Class in Human Nutrition

CREDIT HOURS: 3

This course focuses on the science of nutrition and the role of nutrition in health. We study how the body responds to different nutrients including protein, carbohydrate, fat, vitamins, minerals, and water. Current knowledge and controversies regarding the role of diet in disease and optimal health will be explored.

RESTRICTIONS: Restricted to students in 2nd year or higher.

EXCLUSIONS: HPRO 2250 KINE 3250.03, NURS 4800.03, KINE 5990.03

FORMATS: Lecture

HPRO 3325 Mental Health Promotion

CREDIT HOURS: 3

This course examines concepts and issues related to mental health through an examination of related theories, research, writings, and practices. Emphasis is placed on promoting mental health for communities and populations. Students are provided the opportunity to engage with mental health issues and to explore how the social and structural determinants of health intersect with mental health promotion.

COREQUISITES: IPHE 4900

PREREQUISITES: HAHP 2000 or permission of instructor

RESTRICTIONS: Restricted to School of Health and Human Performance students; others by permission of instructor.

FORMATS: Seminar

HPRO 3335 Introduction to Disease Prevention

CREDIT HOURS: 3

This course will consider the concept of disease, the study of disease, and the causes of disease from the perspective of prevention. Primary, secondary and tertiary prevention strategies and methods will be examined, along with the role of the health promotion specialist. Selected communicable diseases will be used to illustrate these concepts.

COREQUISITES: IPHE 4900

PREREQUISITES: ANAT 1020.03 or ANAT 1010.03, HPRO 1195.03/HEED 1195.03, PHYL 1010X/Y.06 or PHYL 1000X/Y.06 or PHYL 1011.03 and PHYL 1012.03, or PHYL 1001.03 and PHYL 1002.03, or PHYL 2030X/Y.06, or permission of instructor

RESTRICTIONS: Restricted to School of Health and Human Performance students; others by permission of instructor, with priority to Health Professions students

FORMATS: Lecture | Discussion

HPRO 3351 Injury Prevention and Safety Education

CREDIT HOURS: 3

This course will introduce the concept of safety, the causes and effects of injuries, and strategies for reducing injuries through education, engineering and legislation. Specific study of injuries, their causes, and preventive measures and programs is reviewed, as well as community orientations to injury prevention. Through class work and group work, students will examine how injury prevention is an integral component of health promotion.

COREQUISITES: IPHE 4900

RESTRICTIONS: Restricted to School of Health and Human Performance students; others by permission of instructor, with priority to Health Professions students

FORMATS: Lecture | Discussion

HPRO 3360 Multicultural Health Promotion Research and Policy

CREDIT HOURS: 3

This course will provide students with an opportunity to explore the distinct and integrated influence of research and policy on the health of non-dominant,

ethno-cultural populations within the Canadian context. In particular, this course will assist students in developing a critical understanding of the intersection of multi-cultural health with politics and power. Through engagement with multi-disciplinary perspectives, students will examine health research and policy issues pertaining specifically to diverse groups of people and historically marginalized populations.

COREQUISITES: IPHE 4900

PREREQUISITES: HPRO 1195.03/HEED 1195.03, HPRO 2110.03

RESTRICTIONS: Restricted to Health Promotion students. Others by permission of instructor with priority to Health Professions students.

HPRO 3370 International Health Promotion Research and Policy

CREDIT HOURS: 3

The main goal of the course is to introduce students to the ways in which health promotion research questions, methods and ethics, as well as health policies, vary depending upon the specific international context (local and national). A comparative analysis will be undertaken of the disparities in health/well-being between (and within) developed and developing countries while considering the historical development of underdevelopment. Each year the students will choose from a number of cases two that will be examined in-depth by the class. Students will choose from among a variety of key global health issues (e.g. tobacco addiction, health issues for migrant workers, HIV/AIDS and nutrition). Focus will be placed on the social determinants of these health issues/problems, and the types of health promotion research and policy issues needed to address these health problems within particular geographical contexts/countries. One of the central tenets of the course is how societies are organized, and the way in which resources are invested and whose interests the investments serve, affect the health of individuals and populations within the society.

COREQUISITES: IPHE 4900

PREREQUISITES: HPRO 1195.03/HEED 1195.03, HPRO 2110.03

RESTRICTIONS: Restricted to Health Promotion students. Others by permission of instructor with priority to Health Professions students.

HPRO 3397 Community Health Promotion Strategies

CREDIT HOURS: 3

This course provides students with an overview of the broad range of community health promotion strategies used to enhance and encourage health in diverse populations. This course examines issues related to designing effective community health promotion strategies, including healthy community policies, social marketing, health advocacy, health communication, health literacy, and health-related theories and models. Students will complete a community Health Promotion Strategies Project to gain in depth knowledge about developing and refining a theory-driven, community-based health promotion strategy aimed at enhancing the health of a particular community.

COREQUISITES: IPHE 4900

PREREQUISITES: HPRO 1195.03/HEED 1195.03, HPRO 2361.03/HEED 2361.03

RESTRICTIONS: Restricted to School of Health and Human Performance students; others by permission of instructor with priority to Health Professions students

FORMATS: Lecture

HPRO 3422 Environmental Health

CREDIT HOURS: 3

This course emphasizes the importance of the physical and social environments to the work of health promoters and other health professionals. The environment that we live in is a contributing factor of individual health and well-being. The course examines the influence of climate change, economic and cooperate determinants of health and the role of governmental policies in the disparities of health and well-being from a global perspective. Through in-class activities, written assignments, and presentations, students will explore the research aimed at understanding the impact of various global and climate determinants on the health on individuals and the health of communities. Students will explore strategies to maintain and enhance health and well-being locally, nationally, and internationally.

COREQUISITES: IPHE 4900

RESTRICTIONS: Restricted to School of Health and Human Performance Students; others by permission

EXCLUSIONS: HPRO 4422.03

FORMATS: Lecture | Lab

HPRO 4101 Advanced and Applied Research Methods

CREDIT HOURS: 3

The purpose of this course is to provide students with an opportunity to develop their understanding of research methodologies and apply their knowledge to a specific health promotion topic through the development of a research proposal. This course forms the first half of the HPRO honours program but is open to other students electively as well.

COREQUISITES: IPHE 4900

PREREQUISITES: HPRO 1195.03/HEED 1195.03, HAHP 3100.03

RESTRICTIONS: Restricted to Health Promotion students. Others by permission of instructor with priority to Health Professions students.

HPRO 4102 Honours Thesis

CREDIT HOURS: 3

The purpose of the course is to develop research skills by completing a major independent research project and writing a formal research report in the form of a thesis. By way of their research, students will demonstrate skills, knowledge and ability in literature research, research design, data collection/analysis and

formal academic writing. This course is the second part of the honours thesis program.

COREQUISITES: IPHE 4900

PREREQUISITES: HAHP 3100.03 and HPRO 4101.03 with a grade of B or better in each, and ethical approval by August 1.

RESTRICTIONS: Restricted to Health Promotion honours student.

HPRO 4110 Critical Approaches to Health Promotion

CREDIT HOURS: 3

This course is designed to introduce students to critical and social theories, such as social constructivism, structural/poststructuralism, critical race, feminist and queer theories. This course will provide students with an opportunity to explore the philosophical underpinnings of each theory and to understand how critical and social theories are aligned with ethical principles of health promotion and social justice. Through class discussions, written assignments, and presentations, students will learn how critical and social theories can be applied to health research and health promotion.

COREQUISITES: IPHE 4900

RESTRICTIONS: Restricted to Health Promotion students; others by permission of instructor.

FORMATS: Lecture

HPRO 4365 Health: A Biopsychosocial Approach

CREDIT HOURS: 3

Health is increasingly recognized as multiply determined by the complex interactions of biological, psychological, and social systems and determinants. Research into these interactions is advancing rapidly. Students in this course are expected to develop an understanding of these processes, be aware of the most recent research and be capable of seeking out new research in the future and applying this knowledge to health problems in Canada.

PREREQUISITES: HPRO 3335.03 or HPRO 3345.03

RESTRICTIONS: Restricted to Health Promotion students. Others by permission of instructor with priority to Health Professions students.

HPRO 4412 Human Sexuality

CREDIT HOURS: 3

This course will introduce students to the broad domain of human sexuality. The course will examine how social and cultural forces influence beliefs, values and practices related to human sexuality. Four themes are threaded throughout the course: diversity in gender and sex, behaviours and customs, critical thinking, and sexual health. The course is designed to support positive integration of sexuality into people's lives and foster healthy sexuality throughout the life-course.

CROSSLISTED: GWST 2412.03

FORMATS: Lecture | Discussion

HPRO 4450 Comprehensive School Health Promotion

CREDIT HOURS: 3

This course will provide students with an overview of the components of a comprehensive health promotion program in the public school system from a community health promotion perspective. The school health curriculum, school health services, and the healthy school environment - and how a community health promoter might interact with the school system will comprise the content of the course. Through seminars, group projects, and personal reflections, students will learn approaches for planning Health Promotion action within public-school settings.

COREQUISITES: IPHE 4900

PREREQUISITES: HPRO 1195.03

RESTRICTIONS: Restricted to Health Promotion students in their final year of study.

FORMATS: Lecture

HPRO 4495 Health Promotion Internship

CREDIT HOURS: 15

This course is an extended professional development internship during the final year of study. It requires completion of a 14-week, 40 hours per week internship in a health promotion agency. The agency will provide a primary representative to act as a full-time supervisor who will participate in the evaluation of the student intern. The internship involves a special service project for the agency, as well as several other academic projects.

COREQUISITES: IPHE 4900

PREREQUISITES: Completion of all other program requirements and approval of the Student Services Administrator. Standard First Aid and Level C CPR Certification are required to be up to date prior to internship start date.

RESTRICTIONS: Restricted to Bachelor of Health Promotion students in their final term.

FORMATS: Other (explain in comments)

HPRO 4595 Advanced Program Planning and Evaluation

CREDIT HOURS: 3

This course examines how health promotion programs can be improved through evaluation. Students will be introduced to both quantitative and qualitative

approaches to measurement and evaluation, in ways that have meaning to health professionals whose primary business is practice. By applying what is learned to selected health promotion programs, students are encouraged to become practitioners who evaluate.

COREQUISITES: IPHE 4900.00

PREREQUISITES: HPRO 1195.03, HPRO 2110.03, HPRO 2361.03

RESTRICTIONS: Restricted to Health Promotion students in their final year of study.

FORMATS: Seminar

HPRO 4701 Advanced Special Topics

CREDIT HOURS: 3

This course consists of an intensive examination of a selected timely and substantive issue in Health Promotion. Specific topics will vary from year to year. Students are advised to consult the department prior to registration.

COREQUISITES: IPHE 4900.00

PREREQUISITES: HPRO 1195.03, HPRO 2110.03

RESTRICTIONS: Restricted to Health Promotion students in their final year of study.

FORMATS: Seminar

HPRO 4800 Independent Study

CREDIT HOURS: 6

NOTE: Course Details listed here also apply to HPRO 4801/HPRO 4802.

CALENDAR NOTES: Students may take no more than a total of 6 credit hours of independent studies.

COREQUISITES: IPHE 4900.00

PREREQUISITES: Fourth year status; a GPA of at least 3.00; a "B" grade in an earlier class in the area of study (where appropriate); consent of advisor; consent of tutor. Intention to register for an Independent Study should be confirmed with the undergraduate secretary by April 1st of the preceding academic year.

RESTRICTIONS: Restricted to School of Health and Human Performance students; others by permission of instructor, with priority to Health Professions students

FORMATS: Tutorial

HPRO 4801 Directed Study

CREDIT HOURS: 3

See HPRO 4800.

COREQUISITES: IPHE 4900.00

HPRO 4802 Directed Study

CREDIT HOURS: 3

See HPRO 4800.

COREQUISITES: IPHE 4900.00

Course Descriptions - Kinesiology

KINE 1102 Physical Activity and Health

CREDIT HOURS: 3

This course is designed to introduce students to the connection between exercise and health. The lecture portion explores how exercise affects the most prevalent diseases currently afflicting our society. The laboratory portion is designed to help students develop a progressive exercise program for themselves based on their current fitness and strength levels as well as physical activity preferences.

COREQUISITES: IPHE 4900

RESTRICTIONS: Restricted to Kinesiology students only

FORMATS: Lecture | Lab

KINE 1104 Foundations in Kinesiology

CREDIT HOURS: 3

The objective of this course is to introduce students to Kinesiology as a discipline and for them to learn about the sub-disciplines and content areas that contribute to the general body of knowledge in Kinesiology. In addition to understanding what these sub-disciplines are, students will gain an understanding of the interrelationships among these sub-disciplines and the types of careers that students can enter. Students will be exposed to discipline content as well as the methods of measurement and evaluation and the technology involved in each of the disciplines. Problem Based Learning (PBL) will be used as the course instruction method.

COREQUISITES: IPHE 4900.00
RESTRICTIONS: Restricted to Kinesiology students
FORMATS: Lecture | Lab

KINE 1106 Philosophy and Ethics for Kinesiologists

CREDIT HOURS: 3

Physical activity figures prominently in many aspects of society and culture. Kinesiologists are in a unique position to bridge the gap between the scientific study of physical activity and the implementation of physical activity programs in public and professional contexts. This course develops core principles in philosophy and ethics to help the aspiring kinesiologist think about and evaluate their role in society. Debate and critical analysis will figure prominently in the course.

COREQUISITES: IPHE 4900

RESTRICTIONS: Restricted to Kinesiology students only

FORMATS: Lecture | Tutorial

KINE 1108 Psychology and Physical Activity

CREDIT HOURS: 3

Physical inactivity is widely recognized as a lifestyle associated with considerable health risk. The challenge of increasing the level of physical activity in the population requires an in-depth understanding of the individual and environmental factors that either promote or inhibit regular activity. Accordingly, this introductory course will provide students with the fundamental knowledge of how psychological concepts are related to physical activity participation and health. The main focus is to provide (a) a basic understanding of various social-psychological concepts and principles involved in health and exercise psychology, and (b) to see how these concepts and principles might be translated into promoting health and wellness via physical activity participation. Core concepts include the basics of psychology research, theories, motivation, adherence, and behaviour modification.

COREQUISITES: IPHE 4900

RESTRICTIONS: Priority given to Kinesiology students

FORMATS: Lecture | Lab

KINE 2310 Physiology of Exercise

CREDIT HOURS: 3

This is an introductory course for students with a basic knowledge of anatomy and physiology. It concentrates on the respiratory, cardiovascular and neuromuscular systems in terms of their involvement during exercise, their adaptation to different types of training and how they limit performance during exercise in different environmental conditions.

COREQUISITES: IPHE 4900.00

PREREQUISITES: ANAT 1020.03 or ANAT 1010.03, PHYL 1010.06 or PHYL 1000.06 or PHYL 1011.03 and PHYL 1012.03 or PHYL 1001.03 and PHYL 1002.03 or PHYL 2030.06

RESTRICTIONS: Restricted to Kinesiology students

FORMATS: Lecture | Lab

KINE 2320 Kinesiological Anatomy

CREDIT HOURS: 3

Neuroanatomical and musculoskeletal structures are presented and discussed in order to establish the understandings necessary for an in-depth analysis of human movement.

COREQUISITES: IPHE 4900.00

PREREQUISITES: ANAT 1020.03 or ANAT 1010.03 and PHYL 1010.06 or PHYL 1000.06 or PHYL 1011.03 and PHYL 1012.03 or PHYL 1001.03 and PHYL 1002.03 or PHYL 2030.06.

RESTRICTIONS: Restricted to Kinesiology students

FORMATS: Lecture | Lab

KINE 2430 Motor Control and Learning

CREDIT HOURS: 3

This course deals with efficiency in completing movements to achieve a desired goal. It involves systematic changes in perception of the environment, decisions about what movements to make, as well as changes in how these movements are carried out. This course covers what is known about these processes as well as how this information can be applied.

COREQUISITES: IPHE 4900

RESTRICTIONS: Restricted to Kinesiology students

FORMATS: Lecture | Lab

KINE 2465 Introductory Biomechanics

CREDIT HOURS: 3

The purpose of this course is to introduce students to the area of biomechanics in human motion analysis. Students will be exposed to the concepts of kinematic and kinetic analysis of motion as well as muscle forces and moments of force as applied to the human system.

COREQUISITES: IPHE 4900.00

PREREQUISITES: PHYC 1300.06 or PHYC 1310.03

RESTRICTIONS: Restricted to Kinesiology students

EXCLUSIONS: PHYC 2610.03

FORMATS: Lecture | Lab

KINE 3010 Introduction to Disability and Disability Management

CREDIT HOURS: 3

This course provides an overview of Disability Management theories, terminology and processes. Particular emphasis is on introduction to the practice of Disability Management, comprehending the relationship between occupation and disability, and, understanding the dynamic impact of disability on return to work.

COREQUISITES: IPHE 4900

CROSSLISTED: DISM 3010.03

KINE 3200 Sociocultural Issues in Physical Activity

CREDIT HOURS: 3

This course will provide students with an introduction to social theory, culture, and social psychology as applied to physical activity and sport. While recognizing that physical activity does not take place in a social vacuum, and that social content often influences how physical activity and sport are experienced, this course explores participation in, and perceptions of physical activity and sport according to gender, social class, age, sexual orientation, ethnic group and nationality. The meaning of physical activity and sport in society, the role of Canadian public policy in promoting and facilitating participation in physical activity, and sport as an agent for social change will also be explored.

COREQUISITES: IPHE 4900

PREREQUISITES: KINE 1106.03 or PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03 or PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03 or SOSA 1002.03 or SOSA 1003.03 or SOSA 1200.06 or SOSA 1050.06 or SOSA 1100.06 or PHIL 1000.06 or PHIL 1010.06 or permission of the instructor

FORMATS: Lecture

KINE 3250 Interdisciplinary Class in Human Nutrition

CREDIT HOURS: 3

This course focuses on the science of nutrition and the role of nutrition in health. We study how the body responds to different nutrients including protein, carbohydrate, fat, vitamins, minerals, and water. Current knowledge and controversies regarding the role of diet in disease and optimal health will be explored.

RESTRICTIONS: Restricted to students in 2nd year or higher.

EXCLUSIONS: KINE 2250 HPRO 3250.03, NURS 4800, KINE 5990

FORMATS: Lecture

KINE 3320 Anatomical Basis of Human Movement

CREDIT HOURS: 3

The purpose of this course is to integrate information from movement sciences in order to analyze a broad spectrum of human activities, from simple single contractions to complex patterns of both fine motor and gross motor activities. Industrial, recreational, sport and fitness movements will be examined using an integrated digital video/8 channel EMG approach.

COREQUISITES: IPHE 4900

PREREQUISITES: ANAT 1020.03 or ANAT 1010.03, PHYL 1010.06 or PHYL 1000.06 or PHYL 1011.03 and PHYL 1012.03 or PHYL 1001.03 and PHYL 1002.03 or PHYL 2030.06, KINE 1104.03, KINE 2310.03, KINE 2320.03, KINE 2430.03, KINE 2465.03

RESTRICTIONS: Restricted to Kinesiology students. Others by permission of instructor, with priority to Health Professions students.

FORMATS: Lecture

KINE 3384 Physical Activity for Persons with Disabilities

CREDIT HOURS: 3

The etiology and effects of the more prevalent disabling conditions form the bases of strategies for teaching, coaching and rehabilitating those affected. Emphasis is placed on the physical components of disability and the adaptation of the environment and equipment to facilitate learning of ADL skills and sport. A practicum is required.

COREQUISITES: IPHE 4900

PREREQUISITES: KINE 2320.03

FORMATS: Lecture

KINE 3414 Exercise Testing and Prescription for Healthy Populations

CREDIT HOURS: 3

The class will cover basic exercise testing techniques required to assess physical fitness as well as the knowledge required to design physical activity/exercise programs for healthy populations (children and youth, adults and older adults). Techniques to assess aerobic fitness, body composition, muscular endurance and flexibility will be covered in laboratory sessions.

COREQUISITES: IPHE 4900

PREREQUISITES: KINE 2310.03

RESTRICTIONS: Restricted to Kinesiology students. Others by permission of instructor, with priority to Health Professions students.

FORMATS: Lecture | Lab

KINE 3419 Application of Physiological Principles to Human Performance

CREDIT HOURS: 3

This course focuses on physiological adaptations made by the body to different kinds of physical training. How selected factors can influence these adaptations is also examined. Students apply their knowledge of exercise physiology to athletic performance in a research project.

COREQUISITES: IPHE 4900

PREREQUISITES: KINE 2310.03

RESTRICTIONS: Restricted to Kinesiology students. Others by permission of instructor, with priority to Health Professions students.

FORMATS: Lecture | Lab

KINE 3430 Principles of Skill Acquisition

CREDIT HOURS: 3

This course will provide students with experience in applying the theoretical concepts of motor control and learning. Variables that impact on skill acquisition, practice and instruction will be examined and applied. Real world settings will be used to illustrate the application of the principles of skill acquisition.

COREQUISITES: IPHE 4900

PREREQUISITES: KINE 2430.03

RESTRICTIONS: Restricted to Kinesiology students. Others by permission of instructor, with priority to Health Professions students.

FORMATS: Lecture

KINE 3440 Neural Basis of Sensory and Motor Function

CREDIT HOURS: 3

This course will provide students with a comprehensive understanding of the neural systems that mediate sensory and motor functions in the human. Proprioception, vision, somatosensation and vestibular sense will be explored in detail. Spinal reflexes, supraspinal pathways and cortical systems will be analyzed in detail, using case studies to illustrate key principles. Students will learn about the major classes of neurological movement disorders, from assessment to intervention. The course will build upon introductory courses in neural basis of behaviour.

COREQUISITES: IPHE 4900

PREREQUISITES: KINE 2430 or PSYO/NESC 2470

RESTRICTIONS: Restricted to Kinesiology students. Others by permission of instructor, with priority to Health Professions students.

FORMATS: Lecture | Tutorial

KINE 3476 Principles of Ergonomics

CREDIT HOURS: 3

This course applies health and human performance concepts in kinesiology to the workplace. The course content includes identifying characteristics of work environments and the effect on performance and health, the design of effective workplaces and the use of training and educational programs to increase productivity and to reduce injuries.

COREQUISITES: IPHE 4900

PREREQUISITES: KINE 2310.03; KINE 2320.03; KINE 2430.03; KINE 2465.03

CROSSLISTED: IENG 3303.03

RESTRICTIONS: Restricted to Kinesiology students. Others by permission of instructor, with priority to Health Professions students.

FORMATS: Lecture | Lab

KINE 3482 Prevention and Care of Injuries

CREDIT HOURS: 3

An introduction into the fields of Sports Medicine and work-related musculo-skeletal disorders, specifically the basic injury mechanisms, early recognition, care and prevention, pathology, tissue healing, emergency care, and basic principles of therapeutic exercise and modalities.

COREQUISITES: IPHE 4900

PREREQUISITES: ANAT 1020.03 or ANAT 1010.03, PHYL 1010.06 or 1000.06 or PHYL 1011.03 and PHYL 1012.03 or PHYL 1001.03 and PHYL 1002.03 or PHYL 2030.06, KINE 2320.03

RESTRICTIONS: Restricted to School of Health and Human Performance students. Others by permission of instructor, with priority to Health Professions students.

KINE 3485 Psychology of Sport

CREDIT HOURS: 3

This course offers an awareness and understanding of the phenomena involved in mental preparation in sport. It will systematically analyze, investigate and assess psychological skills, attributes and preparation in this area, and their application in other environments. Emphasis will also be placed upon personal experience and practical application.

PREREQUISITES: PSYO 1011.03, 1021.03 or 1031.03 and PSYO 1012.03 or 1022.03 or permission of instructor

FORMATS: Lecture

KINE 3500 Principles of Measurement and Evaluation

CREDIT HOURS: 3

An introduction to the fundamentals involved in measurement and evaluation, including writing objectives, designing and administering tests, organizing and analyzing test results. Tests used to measure physical fitness, specific motor skills and health knowledge are investigated.

COREQUISITES: IPHE 4900

PREREQUISITES: KINE 1104.03, ANAT 1020.03 or 1010.03, PHYL 1010.06 or PHYL 1000.06 or PHYL 1011.03 and PHYL 1012.03 or PHYL 1001.03 and PHYL 1002.03 or PHYL 2030.06, STAT 1060.03

RESTRICTIONS: Restricted to Kinesiology students. Others by permission of instructor, with priority to Health Professions students.

FORMATS: Lecture | Lab

KINE 3740 Coaching Science Seminar

CREDIT HOURS: 3

The purpose of this course is to provide students with the opportunity to learn about the fundamental principles and concepts of effective coaching planning and practice. Students will explore the role of the coach; the philosophical approaches to coaching pedagogy; the holistic attainment of individual potential; as well as the coaching code of ethics. Identification of issues related to risk management; developmental age; skill analysis and development; and physical preparation will also prepare students to meet the requirements for the Part A and Part B of the Theory component of the National Coaching Certification Program (NCCP).

COREQUISITES: IPHE 4900

PREREQUISITES: HAHP 2000, KINE 1104, KINE 2310, KINE 2320, KINE 2430, KINE 2465

FORMATS: Lecture

KINE 3741 Coaching Science Practicum

CREDIT HOURS: 3

The purpose of this course is to provide students with the opportunity to observe, identify, apply and evaluate the fundamental principles and methodologies of coaching that are associated with the creation of an effective practice, and training environment, for the developing athlete. This will be facilitated through the completion of a twelve week placement with a school, or club, mentor coach.

COREQUISITES: IPHE 4900

PREREQUISITES: KINE 3740.03

KINE 4108 Mind/Body Connections and Well-being

CREDIT HOURS: 3

The connection of mind and body as it relates to well-being is addressed through a survey of complementary (or alternative) healthcare practices including mind/body medicine (e.g., relaxation, meditation), therapeutic systems (e.g., chiropractic, homeopathy), herbology, bodywork techniques (e.g., massage, pressure point therapies), movement therapies and exercises (e.g. Alexander, yoga) and integrated medical systems (e.g., Chinese medicine, Ayurveda). Theoretical and scientific bases of each are covered and controversies surrounding these practices are addressed. This course is not designed to train students to be practitioners of any technique.

COREQUISITES: IPHE 4900

PREREQUISITES: HAHP 3100.03

RESTRICTIONS: Restricted to students enrolled in their final year of study in the School of Health and Human Performance or by permission of instructor

FORMATS: Lecture

KINE 4412 Advanced Exercise Testing and Prescription for Clinical Populations

CREDIT HOURS: 6

This class will cover advanced exercise testing techniques (e.g. graded exercise testing, ECG, etc.) required to assess physical fitness in clinical populations as well as the theory required to design exercise programs for these populations Pathophysiology and basic pharmacology will also be discussed. Disease topics covered include cardiovascular, pulmonary, metabolic and autoimmune diseases. SIGNATURE REQUIRED

COREQUISITES: IPHE 4900

PREREQUISITES: ANAT 1020.03 or 1010.03, PHYL 1010.06 or PHYL 1000.06 or PHYL 2030.06, KINE 2310.03, KINE 3414.03, KINE 3419.03, CPR
RESTRICTIONS: Restricted to Kinesiology students. Others by permission of instructor, with priority to Health Professions students.
FORMATS: Lecture | Lab

KINE 4417 Advanced Exercise Testing and Prescription for Clinical Populations 1

CREDIT HOURS: 3

This class will cover advanced exercise testing techniques (e.g. graded exercise testing, ECG, etc.) required to assess physical fitness in clinical populations as well as the theory required to design exercise programs for these populations Pathophysiology and basic pharmacology will also be discussed. Disease topics covered include cardiovascular, pulmonary, metabolic and autoimmune diseases.SIGNATURE REQUIRED

CALENDAR NOTES: Students must register in and complete 4417 (Part 1) and 4418 (Part 2) in consecutive terms. Credit will not be granted for either half if not completed consecutively.

COREQUISITES: IPHE 4900

PREREQUISITES: ANAT 1020.03 or 1010.03, PHYL 1010.06 or PHYL 1000.06 or PHYL 2030.06 or PHYL 1011.03 and PHYL 1012.03, KINE 2310.03, KINE 3414.03, KINE 3419.03

RESTRICTIONS: Restricted to Kinesiology students. Others by permission of instructor, with priority to Health Professions students.

EXCLUSIONS: KINE 4412.06 XY

FORMATS: Lecture

KINE 4418 Advanced Exercise Testing and Prescription for Clinical Populations 2

CREDIT HOURS: 3

This class will cover advanced exercise testing techniques (e.g. graded exercise testing, ECG, etc.) required to assess physical fitness in clinical populations as well as the theory required to design exercise programs for these populations Pathophysiology and basic pharmacology will also be discussed. Disease topics covered include cardiovascular, pulmonary, metabolic and autoimmune diseases.SIGNATURE REQUIRED

CALENDAR NOTES: Students must register in and complete KINE 4417 and KINE 4418 in consecutive terms . Credit will not be granted if both courses are not completed consecutively.

COREQUISITES: IPHE 4900

PREREQUISITES: ANAT 1020.03 or 1010.03, PHYL 1010.06 or PHYL 1000.06 or PHYL 2030.06, or PHYL 1011.03 and PHYL 1012.03, KINE 2310.03, KINE 3414.03, KINE 3419.03, KINE 4417.03, CPR

RESTRICTIONS: Restricted to Kinesiology students. Others by permission of instructor, with priority to Health Professions students.

EXCLUSIONS: KINE 4412.06 XY

FORMATS: Lecture

KINE 4466 Advanced Biomechanics

CREDIT HOURS: 3

This course takes a quantitative approach to understanding human movement from a mechanical perspective. Concepts presented in the course will be illustrated with examples taken from the areas of sport, exercise, activities of daily living, and ergonomics. Students will be introduced to several techniques used in biomechanics research.

COREQUISITES: IPHE 4900

PREREQUISITES: KINE 2465.03

RESTRICTIONS: Restricted to Kinesiology students. Others by permission of instructor, with priority to Health Professions students.

FORMATS: Lecture | Lab

KINE 4577 Cognitive Ergonomics

CREDIT HOURS: 3

This course examines the role of cognition in human system performance . The course generally takes an information processing and a systems engineering approach to consider the various topics and related issues. The course requirements include written tests on the content, a project and presentations.

COREQUISITES: IPHE 4900.00

PREREQUISITES: KINE 3476.03 or IENG 3303.03

RESTRICTIONS: Restricted to Kinesiology students and Industrial Engineering Students. Others by permission of instructor, with priority to Health Professions students.

FORMATS: Lecture | Seminar

KINE 4578 Physical Ergonomics

CREDIT HOURS: 3

This advanced level course examines the application of the physical sciences in the productivity, health and safety of the workplace. The course will consider the design of work and the workplace from a physical science perspective. Due emphasis will be placed on the importance of the understanding of, and designing for, the capacity and capabilities of the human operator. When possible, the course will consider the present national and international standards in health and safety related to the content areas. The course requirements include a written test on the content, a project and a class presentation.

COREQUISITES: IPHE 4900

PREREQUISITES: STAT 1060.03 or STAT 2060, KINE 2310.03, KINE 2320.03, KINE 2465.03, KINE 3476.03

RESTRICTIONS: Restricted to Kinesiology students. Others by permission of instructor, with priority to Health Professions students.
FORMATS: Lecture | Lab

KINE 4588 Clinical and Occupational Kinesiology

CREDIT HOURS: 3

This advanced level course examines the role that Kinesiology can play in clinical and occupational settings. In particular, the course will expose the student to an integrated approach in human motion analysis with a primary focus on the use of electromyography and its relationship to other biomechanical and physiological measures. Due emphasis will be placed on the importance of understanding the strengths and weaknesses of present laboratory and field measures of human motion. The course requirements include a written test on the content, a project and a class presentation.

COREQUISITES: IPHE 4900

PREREQUISITES: KINE 3414.03, KINE 4466.03

RESTRICTIONS: Restricted to Kinesiology students. Others by permission of instructor, with priority to Health Professions students.

FORMATS: Lecture | Lab

KINE 4600 Practicum in Kinesiology

CREDIT HOURS: 3

Students take part in a supervised practical experience that links classroom knowledge to professional practice. Under the supervision of a kinesiologist, fitness or training professional, physical or occupational therapist, ergonomist or other related professional, students gain hands-on experience in a fitness/wellness/allied health field. Students document and critically evaluate their experiences.

COREQUISITES: IPHE 4900

PREREQUISITES: KINE 1104.03, KINE 2310.03, KINE 2320.03, KINE 2430.03, KINE 2465.03, HAHP 2000.03, HAHP 3100.03, KINE 3500.03, and at least three 3000 or 4000 level kinesiology courses.

RESTRICTIONS: Restricted to Kinesiology students enrolled in their final year of study in the School of Health and Human Performance.

FORMATS: Seminar

KINE 4700 Senior Seminar

CREDIT HOURS: 6

NOTE: Course Details listed here also apply to KINE 4701/KINE 4702.

CALENDAR NOTES: Students taking KINE 4700 must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

COREQUISITES: IPHE 4900

RESTRICTIONS: Restricted to Kinesiology students in their final year of study.

FORMATS: Seminar

KINE 4701 Senior Seminar

CREDIT HOURS: 3

See KINE 4700.

COREQUISITES: IPHE 4900

KINE 4702 Senior Seminar

CREDIT HOURS: 3

See KINE 4700.

COREQUISITES: IPHE 4900

KINE 4740 Advanced Coaching Science Seminar

CREDIT HOURS: 3

The purpose of this course is to provide students with the opportunity to learn about the advanced principles and concepts of effective coaching planning and practice. Students will design, quantify and monitor a season training plan using PLAN software, addressing the performance factors of speed, strength, suppleness, stamina and skill appropriate to the maturational level of the athlete, as well as the integration of psychological preparation and competitive strategies. The course will also prepare students to meet the requirements for Level Three of the Theory component of the national Coaching Certification Program (NCCP).

COREQUISITES: IPHE 4900

PREREQUISITES: KINE 3740.03 and KINE 3741.03, Level 1 Technical, National Coaching Certification Programme. (Students are required, at their own expense, to pursue this certification externally.)

FORMATS: Lecture

KINE 4741 Advanced Coaching Science Practicum

CREDIT HOURS: 3

The purpose of this course is to provide students with the opportunity to observe, identify, apply and evaluate the advanced principles and methodologies of coaching that are associated with the creation of an effective practice, and training environment, for the developing athlete. This will be facilitated through the completion of a twelve week placement with a varsity, school, or club, mentor coach. Students will also apply an intervention strategy developed to enhance a controllable specific performance factor in a sport of choice.

COREQUISITES: IPHE 4900

PREREQUISITES: KINE 4740.03

KINE 4800 Independent Study

CREDIT HOURS: 6

NOTE: Course Details listed here also apply to KINE 4801/KINE 4802.

CALENDAR NOTES: Students may take no more than a total of 6 credit hours of independent studies

COREQUISITES: IPHE 4900.00

PREREQUISITES: The same as those for experimental research independent studies described under FORMAT I above, except that classes in research methods and statistics are not required

RESTRICTIONS: Restricted to Kinesiology students. Others by permission of instructor, with priority to Health Professions students.

KINE 4801 Directed Study

CREDIT HOURS: 3

See KINE 4800.

COREQUISITES: IPHE 4900.00

KINE 4802 Directed Study

CREDIT HOURS: 3

See KINE 4800.

COREQUISITES: IPHE 4900.00

KINE 4900 Honours Thesis

CREDIT HOURS: 6

Students carry out an independent piece of original research in the respective field of expertise of their supervisor. Students become familiar with the experimental procedures involved in data collection, analysis, literature searches and scientific writing.

CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

COREQUISITES: IPHE 4900

RESTRICTIONS: Restricted to Kinesiology honours students.

KINE 4901 Kinesiology Honours 1

CREDIT HOURS: 3

Students carry out an independent piece of original research in the respective field of expertise of their supervisor. Students become familiar with the experimental procedures involved in data collection, analysis, literature searches and scientific writing.

CALENDAR NOTES: Students must take both Kinesiology Honours 1 and 2 (6 credit hours total) to meet the honours course requirement for the Kinesiology Honours degree.

COREQUISITES: IPHE 4900.00

RESTRICTIONS: Restricted to Kinesiology honours students.

EXCLUSIONS: KINE 4900.06 XY

KINE 4902 Kinesiology Honours 2

CREDIT HOURS: 3

Students carry out an independent piece of original research in the respective field of expertise of their supervisor. Students become familiar with the experimental procedures involved in data collection, analysis, literature searches and scientific writing.

CALENDAR NOTES: Students must take both Kinesiology Honours 1 and 2 (6 credit hours total) to meet the honours course requirement for the Kinesiology Honours degree.

COREQUISITES: IPHE 4900.00

RESTRICTIONS: Restricted to Kinesiology honours students.

EXCLUSIONS: KINE 4900.06 XY

Course Descriptions - Leisure

LEIS 1127 Foundations of Recreation

CREDIT HOURS: 3

An understanding of the place and potential of leisure for individual Canadians and Canadian society is essential if we are to move beyond the conviction that only labor is to be valued. This course introduces students to concepts including play, sport, recreation and leisure; how they are viewed and valued in our society; and how they relate to health and well-being. The content provides an overview of leisure service delivery, public access to leisure opportunities, variations in leisure involvement due to social and cultural differences, and issues that are important for future leisure service professionals. Students will have the opportunity to increase writing, verbal communication and computer skills, and learn how to use the library effectively. Participation in a professional conference is a component of the learning experience of this course. The students are required to participate in an Orientation to the recreation program that will provide the environment that will create a learning community for the next three to four years of their education experience. Students are also required to join a recreation professional group while enrolled in this course.

COREQUISITES: IPHE 4900

RESTRICTIONS: Restricted to Bachelor of Science (Recreation) students. Others by permission of instructor, with priority to Health Professions students.

FORMATS: Lecture | Discussion

LEIS 1130 Foundations and Concepts of Therapeutic Recreation

CREDIT HOURS: 3

This course provides the conceptual foundation for the study of therapeutic recreation. Philosophical, conceptual and historical issues related to the delivery of therapeutic recreation services will be discussed in terms of health and health promotion. The course will also involve the examination of professional issues such as standards of practice, ethics, quality assurance, etc.; the scope of therapeutic recreation service delivery; and service delivery settings. Finally, students will be exposed to the variety of therapeutic recreation settings through site visits and observation. Students are required to join a therapeutic recreation professional group or provide the instructor with documentation on their current membership in a therapeutic recreation organization.

COREQUISITES: IPHE 4900.00

PREREQUISITES: LEIS 1127.03

RESTRICTIONS: Restricted to Bachelor of Science (Recreation) students. Others by permission of instructor, with priority to Health Professions students.

LEIS 1167 Introduction to the Recreation Management Professions

CREDIT HOURS: 3

The course will expose students to management functions within the recreation sector, providing a foundation for identifying skills and options for a career in recreation management. The course will provide networking opportunities to meet current professionals and recent alumni involved in various occupations related to the recreation management profession.

COREQUISITES: IPHE 4900

PREREQUISITES: LEIS 1127

RESTRICTIONS: Restricted to students in BScR/BM program. Others by permission of instructor.

FORMATS: Lecture | Discussion

LEIS 2127 Leisure Theory

CREDIT HOURS: 3

This course will provide an introductory analysis of leisure in modern society from sociological, psychological, and social psychological perspectives. The role of leisure in the everyday life of individuals will be discussed in terms of social relationships, life stage, gender, the family, work, attitudes and motivations, etc. In addition, since the role and function of leisure is affected by political, economic, and cultural systems, a main-level perspective on leisure will also be provided by focusing on such topics as the influence of modern technology, the commercialization of leisure, the influence of social institutions and of the mass media.

COREQUISITES: IPHE 4900

PREREQUISITES: SOSA 1002.03 and 1003.03 or SOSA 1200.06 or PSYO 1011.03, 1021.03, or 1031.03 and PSYO 1012.03 or 1022.03; LEIS 1127.03

RESTRICTIONS: Restricted to School of Health and Human Performance students. Others by permission of instructor, with priority to Health Professions students.

FORMATS: Lecture | Discussion

LEIS 2130 Foundations and Concepts of Therapeutic Recreation

CREDIT HOURS: 3

This course provides the conceptual foundation for the study of therapeutic recreation. Philosophical, conceptual and historical issues related to the delivery of therapeutic recreation services will be discussed in terms of health and health promotion. The course will also involve the examination of professional issues such as standards of practice, ethics, quality assurance, etc.; the scope of therapeutic recreation service delivery; and service delivery settings. Finally, students will be exposed to the variety of therapeutic recreation settings through site visits and observation. Students are required to join a therapeutic recreation professional group or provide the instructor with documentation on their current membership in a therapeutic recreation organization.

COREQUISITES: IPHE 4900.00

PREREQUISITES: LEIS 1127.03

RESTRICTIONS: Restricted to Bachelor of Science (Recreation) students. Others by permission of instructor, with priority to Health Professions students.

FORMATS: Lecture | Discussion

LEIS 2296 Leadership and Group Dynamics

CREDIT HOURS: 3

This course will focus primarily on the function of leadership and the process of small group dynamics, as applied to recreation and health education service delivery. Emphasis will be placed on the achievement of individual and group goals in health related settings. In addition, effective leadership of individuals and groups within a community, through direct experience and observation, will be emphasized.

COREQUISITES: IPHE 4900

PREREQUISITES: LEIS 1127.03 or HPRO 1195.03

RESTRICTIONS: Restricted to Health Promotion and Recreation students.

EXCLUSIONS: LEIS 3296.03

FORMATS: Lecture | Discussion

LEIS 2361 Program Planning

CREDIT HOURS: 3

Designing, planning, implementing and evaluating programs is fundamental to both leisure services and health education. Both disciplines develop programs to enhance the quality of life for individuals, groups and communities. This course reviews the principles of program planning, various program planning models, and examples of programs that are pertinent to leisure services and health education/promotion. The planning process will include issues such as targeting specific populations, scanning for needs and assets, partnering, managing stakeholder relationships, and evaluation.

COREQUISITES: IPHE 4900

PREREQUISITES: LEIS 1127.03

CROSSLISTED: HPRO/HEED 2361.03

RESTRICTIONS: Restricted to Bachelor of Science (Recreation), Bachelor of Science (Recreation)/Bachelor of Management and Bachelor of Science (Health Promotion) students or with permission of the instructor.

FORMATS: Lecture | Discussion

LEIS 2384 Leisure and Individuals with Disabilities

CREDIT HOURS: 3

An introduction of current philosophy, issues and practices relating to leisure opportunities for persons who, due to physical, mental, and social conditions, have difficulty gaining access to community services. An analysis of leisure behaviours, attitudes and attitudinal development, barriers, and needs of individuals with various disabilities and members of the community will be provided throughout the course. Issues related to mainstreaming, integration and normalization will be themes throughout the course. A practicum is required in order to facilitate hands-on experience with individuals with disabilities.

COREQUISITES: IPHE 4900

PREREQUISITES: LEIS 1127.03

RESTRICTIONS: Restricted to School of Health and Human Performance students. Others by permission of instructor, with priority to Health Professions students.

FORMATS: Lecture | Discussion

LEIS 2385 Inclusive Recreation Service Delivery

CREDIT HOURS: 3

This course introduces principles of equity, diversity and inclusion and their application in recreation, leisure and sport settings and programs. Practical approaches for adapting and modifying activities, programs and environments to reduce barriers to access and to increase participation and social inclusion will be learned. A practicum is required.

COREQUISITES: IPHE 4900

PREREQUISITES: LEIS 1127.03

RESTRICTIONS: Restricted to Recreation students. Others by permission of instructor, with priority to School of Health and Human Performance students.

FORMATS: Lecture | Discussion

LEIS 3127 Leisure Education

CREDIT HOURS: 3

This course is designed to provide students with the knowledge and skills required to facilitate leisure education interventions designed to bring about desired changes in the leisure behaviour of individuals with disabilities. While the focus of the course is on leisure education, the overarching concepts of health, wellness, and health promotion will be incorporated into the course material. The course will address the following three broad areas: a) concepts and models of leisure education, b) content related to specific skills required for leisure involvement [leisure awareness, values clarification, social skills development, friendship development, stress management, assertiveness, leisure resources, decision making, etc.] and c) instructional and interactional techniques used in leisure education. In addition, students will have the opportunity to plan and facilitate leisure education experiences in class.

COREQUISITES: IPHE 4900

PREREQUISITES: LEIS 1127.03; LEIS 2361.03; LEIS 2384.03 or LEIS 2385.03

RESTRICTIONS: Restricted to Recreation students. Others by permission of instructor, with priority to Health Professions students.
FORMATS: Lecture | Lab | Discussion

LEIS 3360 Analysis of Leisure Service Delivery Settings

CREDIT HOURS: 3

Reflections on the twentieth century reveal tremendous changes in the way people live. These changes have impacted work, family structure, and mental and physical well-being, and signal the importance and need of opportunities for leisure pursuits. Leisure is one of life's greatest gifts — an important dimension influencing the quality of an individual's life. Similarly, leisure enhances the quality of life available to a society or culture. The growth of the leisure industry reflects the ever increasing value that individuals are placing upon leisure in their lives. It is essential for the student of recreation management to know and understand that leisure delivery and life satisfaction are dependent upon effective organizational analysis and the quality of services provided. This course presents historical and contemporary concepts of the diverse types of agencies and institutions providing leisure services in North America. It will review the nature and effectiveness of services provided by various leisure service agencies in the private, private non-profit, commercial recreation, travel and tourism sectors of the leisure industry. It will seek to (a) evaluate the political, social, physical and economic impact on each of the sectors, (b) determine ways of assessing the assurance of quality service delivery, and (c) find ways of motivating improvements in the identifying and meeting of consumers' leisure needs, today and in the future. Consideration is also given to organizational structure and governance within leisure service settings, and the incorporation of the "benefits based approach" to leisure service delivery.

COREQUISITES: IPHE 4900

PREREQUISITES: LEIS 1127.03, LEIS 2127.03, LEIS/HPRO/HEED 2361.03, MGMT 2801.03

RESTRICTIONS: Restricted to Bachelor of Science (Recreation)/Bachelor of Management students. Others by permission of instructor, with priority to Health Professions students.

FORMATS: Lecture | Discussion

LEIS 3362 Financial Management and Fundraising

CREDIT HOURS: 3

This course builds on previous functions of management such as program planning and analysis of leisure services by further focusing on the budgeting process, cost analysis, pricing of services, resource inventory and management, fundraising and grant writing. Strategic analysis of economic trends in understanding financial management, purchasing, inventory control, fiscal policy and accountability, and financial auditing will also be examined. Course content will be presented through lecture, case study analysis, budget, and grant proposal development. Such information will be applicable to management of public, private, commercial and/or community non-governmental recreation, health, and/or sport organizations.

COREQUISITES: IPHE 4900

PREREQUISITES: LEIS/HPRO/HEED 2361.03, MGMT 2101.03

RESTRICTIONS: Restricted to Bachelor of Science (Recreation)/Bachelor of Management students. Others with permission of the instructor.

EXCLUSIONS: LEIS 4361.03

LEIS 3370 Recreation Facility Design and Operations Management

CREDIT HOURS: 3

This course will emphasize the management functions of planning, organizing, and coordinating as it looks at the role of the manager in effectively managing recreation physical facilities and environmental resources. The course will review the new and emerging trends in facility design and cover the management process in the planning, and construction of indoor and outdoor recreation facilities, parks, playgrounds and pools. The course content will also focus on the core operational management competencies essential for the management of recreational facilities: namely, organizational structure and staffing; facility operations and maintenance, control and security; risk management and litigation; equipment procuring and inventory control.

COREQUISITES: IPHE 4900

PREREQUISITES: LEIS 1127.03, LEIS 2127.03, LEIS 2361.03/HPRO 2361.03/HEED 2361.03, MGMT 1601.03, MGMT 2303.03 and MGMT 2304.03

RESTRICTIONS: Restricted to Bachelor of Science (Recreation)/Bachelor of Management students. Others by permission of instructor, with priority to Health Professions students.

FORMATS: Lecture

LEIS 3426 Assessment, Planning and Documentation in Therapeutic Recreation Service Delivery

CREDIT HOURS: 3

This course will focus on issues related to the delivery of therapeutic recreation services. In particular, the following topics will be addressed: documentation in therapeutic recreation; client assessment issues; therapeutic recreation program planning (identifying client needs, selecting appropriate interventions, planning change-oriented programs, writing behavioural objectives, etc.).

COREQUISITES: IPHE 4900.00

PREREQUISITES: LEIS 1127.03, LEIS 1130 or LEIS 2130, LEIS/HPRO/HEED 2361.03, LEIS 2384.03 or 2385

RESTRICTIONS: Restricted to Bachelor of Science (Recreation) students. Others by permission of instructor, with priority to Health Professions students.

FORMATS: Lecture | Discussion

LEIS 3427 Therapeutic Recreation Facilitation, Implementation and Evaluation

CREDIT HOURS: 3

The focus of this course will relate to the therapeutic recreation service delivery components of program implementation, facilitation, and evaluation. Topics

will include: individual and group facilitation; therapeutic recreation modalities; evaluation and documentation of therapeutic recreation programming, client progress in response to program, and writing client discharge/transition summaries.

PREREQUISITES: LEIS 1127; LEIS 1130 or LEIS 2130.03; LEIS 3127; LEIS 3426

FORMATS: Lecture

LEIS 3492 Counselling Techniques in Therapeutic Recreation

CREDIT HOURS: 3

This course is designed to provide students with the knowledge and skills required to utilize effective communication and helping behaviours which are designed to facilitate change in the leisure behaviour of individuals with disabilities or other health problems. While the focus of the course is on facilitation techniques, the overarching concepts of quality of life, health, and health promotion will be incorporated into the course material. The course will address four broad topical areas: a) concepts of quality of life, health, health promotion, and lifestyle; b) concepts and models of helping; c) communication skills and therapeutic techniques; d) lifestyles issues related to health and well-being. Finally, students will have the opportunity to practice counselling techniques through role playing and simulations.

COREQUISITES: IPHE 4900

PREREQUISITES: LEIS 1127.03; LEIS 1130.03 or 2130.03

RESTRICTIONS: Restricted to Bachelor of Science (Recreation) students. Others by permission of instructor, with priority to Faculty of Health students.

FORMATS: Lecture | Lab | Discussion

LEIS 4101 Advanced Research Methods

CREDIT HOURS: 3

The purpose of this course is to provide students with an opportunity to develop their understanding of research methodologies and apply their knowledge to a specific recreation/leisure studies topic. Theories and methodologies will be discussed with relevance to leisure studies. The students will develop an honours thesis and ethics proposal as part of the course requirements.

COREQUISITES: IPHE 4900

PREREQUISITES: LEIS 1127.03, HAHP 3100.03

RESTRICTIONS: Restricted to Recreation honours students.

LEIS 4102 Honours Thesis

CREDIT HOURS: 3

The purpose of this course is to develop research skills by conducting an independent research project and writing a formal research report based on the findings. Students will demonstrate their knowledge and ability in research methodologies, data collection, analysis, and formal academic writing.

COREQUISITES: IPHE 4900

PREREQUISITES: HAHP 3100.03 and LEIS 4101.03 with a grade of B or better in each, and ethical approval by August 1.

RESTRICTIONS: Restricted to Recreation honours students.

LEIS 4362 Recreation Entrepreneurship and Special Events

CREDIT HOURS: 3

Through lecture, discussion, and case study analysis, this course will provide the student with advanced insight and applied experience in selective people-based management concepts and functions of directing, coordinating and staffing that will be useful to the potential or practicing manager in sport administration, community, or commercial leisure and health service delivery agencies. In particular, a focus will be directed towards special event management and planning, and marketing and business plan development.

COREQUISITES: IPHE 4900

PREREQUISITES: LEIS/HPRO/HEED 2361.03, LEIS 3362.03, MGMT 2303.03, MGMT 2401.03

RESTRICTIONS: Restricted to Bachelor of Science (Recreation)/Bachelor of Management students. Others with permission of the instructor.

EXCLUSIONS: LEIS 3361.03

LEIS 4365 Administrative Concepts in Therapeutic Recreation

CREDIT HOURS: 3

This course emphasizes the essentials of management that are pertinent to being an effective practicing therapeutic recreation manager in either a clinical setting, a healthcare facility, or a community-based leisure or health service setting. After introducing the student to the theory and discipline of management and related ethical perspectives, the course will examine selective administrative functions in each of the areas of (a) *Operational Management*, i.e. budgeting and financial management, sources of revenue generation and grant writing, decision making, problem solving and conflict management, etc.; (b) *Human Services Management*, i.e., staff recruiting and selection, staff training and development, effective communication, motivation, performance appraisal, and volunteer management, etc. (c) *Consumer Management*, i.e., quality service management, practitioner performance, legal liability and risk management, etc.

COREQUISITES: IPHE 4900

PREREQUISITES: LEIS 1127.03, LEIS 1130.03 or LEIS 2130.03, LEIS 3127.03, LEIS 3426.03

RESTRICTIONS: Restricted to Bachelor of Science (Recreation) students. Others by permission of instructor, with priority to Health Professions students.

FORMATS: Lecture | Discussion

LEIS 4482 Therapeutic Recreation Specialization: Youth at Risk

CREDIT HOURS: 3

Youth as a sector of society and as a stage in human development is of great significance in the study of leisure. Particularly relevant is the issue of unemployment and underemployment which has created a number of problems such as low self-worth, alcohol abuse, teenage suicide, etc. There are programs being developed to address these problems, many of which are experientially based, e.g., Outward Bound, study service, service learning and national service. This course will study the phenomenon of youth development in the light of experiential educational approaches. During the course there will be an expectation that the students will meet and interact with a variety of youth. A practicum is included.

COREQUISITES: IPHE 4900

PREREQUISITES: LEIS 1127.03, LEIS 2127.03, LEIS 1130.03 or LEIS 2130.03, LEIS 2384.03 or LEIS 2385.03, LEIS 3127.03, LEIS 3426.03, LEIS 3492.03, PSYO 2220.03

RESTRICTIONS: Bachelor of Science (Recreation) students in their final two years of study.

FORMATS: Lecture | Discussion

LEIS 4512 Therapeutic Recreation Specialization: Physical and Developmental Disabilities

CREDIT HOURS: 3

This course is an upper level therapeutic recreation specialization course which takes the concepts and skills learned in the previous therapeutic recreation courses and applies them specifically to clients with physical and developmental disabilities. Initially, issues related to etiology, characteristics, and treatment needs of clients with various physical and developmental disabilities will be discussed. The implications of these characteristics for therapeutic recreation services and the various service settings in which therapeutic recreation services are provided will then be examined. Finally, the therapeutic recreation service delivery issues specific to physical and developmental disabilities will be examined, including assessment procedures, program intervention techniques, etc. Site visits, observations, and simulations will be used to facilitate the application of this material.

COREQUISITES: IPHE 4900

PREREQUISITES: LEIS 1127.03, LEIS 2127.03, LEIS 1130.03 or LEIS 2130.03, LEIS 2384.03 or LEIS 2385.03, LEIS 3127.03, LEIS 3426.03, LEIS 3492.03

RESTRICTIONS: Restricted to Bachelor of Science (Recreation) students in their final two years of study. Others by permission of instructor, with priority to Health Professions students.

FORMATS: Lecture | Discussion

LEIS 4540 Therapeutic Recreation for Mental Health and Wellbeing

CREDIT HOURS: 3

This senior-level specialization course applies therapeutic recreation models, concepts and competencies within the context of service delivery for people living with mental illness and/or addictions to support mental health promotion and recovery across the life course. The course explores mental health as a continuum, a holistic understanding of mental wellbeing, and the interrelationships among physical, social, and mental health. Experiential learning activities may include guest speakers, observations, case studies, simulations, and community service-learning.

COREQUISITES: IPHE 4900

PREREQUISITES: LEIS 1127.03, LEIS 2127.03, LEIS 1130.03 or LEIS 2130.03, LEIS 2384.03 or LEIS 2385.03, LEIS 3127.03, LEIS 3426.03, LEIS 3492.03, PSYO 2220.03

RESTRICTIONS: Restricted to Bachelor of Science (Recreation) students in their final two years of study. Others by permission of instructor, with priority to Health Professions students.

FORMATS: Lecture | Discussion

LEIS 4563 Therapeutic Recreation Specialization: Aging and Lifestyle

CREDIT HOURS: 3

This course is an upper level therapeutic recreation specialization course which takes the concepts and skills learned in the previous therapeutic recreation courses and applies them specifically to older adults. Initially, issues related to theories of aging, characteristics of older adults and pre-retirement planning will be discussed. The implications of these characteristics for therapeutic recreation services and the various service settings in which therapeutic recreation services are provided will then be examined. Finally, the therapeutic recreation service delivery issues specific to older adults will be examined, including assessment procedures, program intervention techniques, documentation and efficacy of therapeutic recreation service delivery for this population. Site visits, observations, and simulations will be used to facilitate the application of this material.

COREQUISITES: IPHE 4900

PREREQUISITES: LEIS 1127.03, LEIS 2127.03, LEIS 1130.03 or LEIS 2130.03, LEIS 2384.03 or LEIS 2385.03, LEIS 3127.03, LEIS 3426.03, LEIS 3492.03, PSYO 2220.03

RESTRICTIONS: Restricted to Bachelor of Science (Recreation) students in their final two years of study. Others by permission of instructor, with priority to Health Professions students.

FORMATS: Lecture | Discussion

LEIS 4597 Recreation Management Internship

CREDIT HOURS: 15

This course is an extended professional development internship during the final year of study. It requires the completion of a minimum 16-week internship in

a recreation service delivery agency. The internship involves an in-depth agency analysis and the completion of a special service project for the agency, as well as several other academic projects. Details of the goals and specific procedures for the internship are contained in the current Internship Handbook.

COREQUISITES: IPHE 4900

PREREQUISITES: Completion of all other program requirements and approval of the Student Services Administrator. Standard First Aid and Level C CPR certifications. Minimum cumulative GPA of 2.0.

RESTRICTIONS: Restricted to Bachelor of Science (Recreation), and Bachelor of Science (Recreation)/Bachelor of Management students in their final term.

LEIS 4598 Therapeutic Recreation Internship

CREDIT HOURS: 15

CALENDAR NOTES: This course is an extended professional development internship during the final year of study. It requires the completion of a minimum 16 week, 35 hours per week internship in a recreation service delivery agency. The internship involves an in-depth agency analysis and the completion of a special service project for the agency, as well as several other academic projects. Details of the goals and specific procedures for the internship are contained in the current Internship Handbook.

COREQUISITES: IPHE 4900

PREREQUISITES: Completion of all other program requirements and approval of the Student Services Administrator. Standard First Aid and Level C CPR certifications. Minimum cumulative GPA of 2.0.

RESTRICTIONS: Restricted to Bachelor of Science (Recreation) students in their final term.

LEIS 4599 Recreation Internship

CREDIT HOURS: 7.5

COREQUISITES: IPHE 4900

LEIS 4700 Senior Seminar

CREDIT HOURS: 6

NOTE: Course Details listed here also apply to LEIS 4701/LEIS 4702.

COREQUISITES: IPHE 4900

RESTRICTIONS: Restricted to Recreation students in their final year of study

FORMATS: Seminar

LEIS 4701 Senior Seminar

CREDIT HOURS: 3

See LEIS 4700.

COREQUISITES: IPHE 4900

LEIS 4702 Senior Seminar

CREDIT HOURS: 3

See LEIS 4700.

COREQUISITES: IPHE 4900

PREREQUISITES:

LEIS 4800 Independent Study

CREDIT HOURS: 6

NOTE: Course Details listed here also apply to LEIS 4801/LEIS 4802.

CALENDAR NOTES: Students taking 4800X/Y.06 must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

COREQUISITES: IPHE 4900

PREREQUISITES: A GPA of at least 3.00, a "B" grade in an earlier class in the area in which the project will be conducted (where applicable), consent of advisor, consent of faculty. Intention to register for an Independent Study should be confirmed with the undergraduate secretary by April 1st of the preceding academic year. NOTE: Students may take no more than 6 credit hours of independent studies.

LEIS 4801 Directed Study

CREDIT HOURS: 3
See LEIS 4800.
COREQUISITES: IPHE 4900.00

LEIS 4802 Directed Study

CREDIT HOURS: 3
See LEIS 4800.
COREQUISITES: IPHE 4900.00

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions

HLTH 2000 Centring Black Canadian Health

CREDIT HOURS: 3

This course introduces learners to Black Canadian communities, particularly the history and unique experiences of African Nova Scotians. Learners will explore the historical and generational trauma and impacts of racism and discrimination on Black Canadians' health and wellness, through analysis of the social/structural determinants of health and topics of access, mental health, and chronic disease.

PREREQUISITES: required to be second year students

FORMATS: Lecture

HLTH 3010 Introduction to Research Methods

CREDIT HOURS: 3

This interprofessional collaborative learning course provides students with knowledge, skills, and experience in critiquing and integrating health research into practice. Students will learn about the philosophical underpinnings of research, research ethics, design, issues in measurement, sampling, data collection strategies, data analysis and report writing including qualitative, quantitative, and mixed-methods approaches.

RESTRICTIONS: Bachelor of Science (Health Promotion) Bachelor of Health Promotion Bachelor of Science (Kinesiology) Bachelor of Science (Recreation) Bachelor of Science (Recreation) / Bachelor of Management Bachelor of Health Science Bachelor of Science (Nursing)

EXCLUSIONS: HSCE 3010, HAHP 3100, NURS 2760

FORMATS: Lecture | Discussion | Online Delivery

HLTH 4040 Health Law for Non-Lawyers

CREDIT HOURS: 3

The objective of this course is to provide the non-law student with an overview of significant legal issues that arise in the healthcare context. The first part of the course covers an introduction to the Canadian legal system, the Canadian healthcare system from a legal perspective, and the nature of legal proceedings. The second part focuses on issues of particular relevance in the provision of health services; these issues may include: practice management; confidentiality and disclosure of information, including whistle blowing; consent to treatment, including issues regarding minors and those lacking capacity; mental health law; and the regulation of drugs. Finally, the third part addresses contemporary issues in health law such as cost containment, issues of care at the end of life, and the impact of human rights legislation on healthcare services and delivery.

RESTRICTIONS: Health Profession students only

Williams, J.

Bachelor of Health Science Degree Program

BHSc programs are four-year degree programs that provide integrated courses of study including both theory and practice. There is also a post-diploma offering for practicing professionals. (See section on Post-Diploma)

The School of Health Sciences offers degrees in five professional disciplines:

- BHSc in Diagnostic Medical Ultrasound
- BHSc in Nuclear Medicine Technology
- BHSc in Radiological Technology

- BHSc in Respiratory Therapy
- BHSc in Emergency Medical Services Management (post diploma only)
- BHSc in Medical Laboratory Technology (post diploma only)

Students follow an integrated curriculum that includes core, interdisciplinary and discipline-specific courses. Clinical practica are included in each year of study requiring a full-time commitment in the Spring/Summer time period.

In order to accommodate all third year Respiratory Therapy students in required clinical rotations, courses for this group only will begin on August 28, 2023.

Dalhousie University confers a Diploma in Health Science (for Diagnostic Medical Ultrasound, and Respiratory Therapy only) and a Bachelor of Health Science (Specific Discipline) degree. The active programs leading to these credentials are accredited. The University *does not* determine eligibility for certification/ registry exams. Rather, through accreditation, the University ensures that graduates of its programs meet the eligibility criteria set by the professional associations. Diagnostic Medical Ultrasound (General, Cardiac and Vascular), Nuclear Medicine, Radiological Technology, and Respiratory Therapy are accredited by Accreditation Canada.

For the professions of Diagnostic Medical Ultrasound, and Respiratory Therapy

Students are eligible to write the certification/registry exam upon successful completion of Year 3, when all requirements for a diploma exit have been met. They are eligible even if they choose not to exit with a diploma. Students should check with faculty concerning examination dates.

Following degree completion, students in Diagnostic Medical Ultrasound may be eligible to write certification/registry exams in the specialized areas of cardiac and vascular sonography.

For the professions of Nuclear Medicine Technology and Radiological Technology

Students are eligible to write the CAMRT certification exam upon successful completion of the Bachelor of Health Science degree.

The Professions

Diagnostic Medical Ultrasound

The Diagnostic Medical Sonographer utilizes high frequency sound waves, specialized equipment, and other diagnostic techniques to collect detailed information on the anatomical, physiological and pathological state of the patient. This health professional is able to produce and evaluate ultrasound images and related data that are used by specialized physicians to render a medical diagnosis. Sonographers typically provide technical expertise in abdomen, superficial structures, obstetrics/gynecology, vascular and cardiac applications.

Nuclear Medicine Technology

A nuclear medicine technologist is a health professional responsible for performing diagnostic and therapeutic nuclear medicine procedures. The technologist administers radiopharmaceuticals to the patient most often by way of an intravenous injection while adhering to proper drug preparation techniques, radiation protection guidelines and patient care practices.

The technologist operates a variety of radiation detection equipment, one of which is the gamma camera, in order to provide an assessment of the distribution of the radiopharmaceutical within the patient. By using various computer programs, the technologist analyzes the data to obtain the best information from the study which is then interpreted by a nuclear medicine physician.

Optimum operation of all equipment used in the practice of nuclear medicine is accomplished by the technologist, through the accurate implementation of a quality control program involving the assessment of radiation detection equipment, gamma cameras, and computers.

Radiological Technology

The radiological technologist is a health professional who utilizes radiation to produce images of patient's anatomical structures. The quality of the image is critical as it will assist the physician in the diagnosis/treatment of the disease or injury.

The technologist must be knowledgeable and skilled in a wide variety of procedures as all body systems are imaged. Responsibilities include (but are not limited to) positioning the patient for radiologic procedures, care of the patient, appropriate choice and use of equipment, image manipulation, selection of radiation exposure factors, implementation of radiation protection techniques and critique of the radiograph. Whatever the procedure, the technologist must be adaptable to meet challenges presented by the patient's physical or psychological state.

Respiratory Therapy

A respiratory therapist is a health professional who assists in the diagnosis, treatment and health promotion of patients with cardio-respiratory disorders through therapeutic means. Respiratory therapists provide cardio-pulmonary support, including cardio-

pulmonary resuscitation, mechanical ventilation support, administration of medical gases, aerosolized medications, humidity therapy and airway management. The respiratory therapist also performs respiratory assessments of patients, tests and monitors cardio-pulmonary function, assists with the transport of high-risk patients and participates in home care programs.

The therapist plays an important role in the education of patients, families and hospital staff. The therapist is also involved in the maintenance, repair, testing and evaluation of respiratory equipment. The therapist must be able to provide competent assistance in cardio-pulmonary research.

Pre-Enrolment and Clinical Requirements

Immunization (current detailed version of policy can be found at www.dal.ca/health (current students, Policies and Procedures, clinical placement-immunization forms))

1. It is a regulation of the Faculty of Health and affiliated health care agencies that all students must be immunized. This has been instituted to protect patients as well as to protect students and employees.
2. Upon entering the program students must show certification for current immune status against tetanus, diphtheria, measles, mumps, rubella, rubeola and varicella (chickenpox). Evidence of tuberculin testing (Mantoux – two step method) must also be shown. Annual Mantoux testing is also required. It is recommended that students be immunized for influenza on an annual basis.
3. The Hepatitis-B vaccination is required for all students. It is a series of three injections: the second and third shots are administered one month and six months after the first injection. The vaccination lasts for several years. This cost (approximately \$105, subject to change) must be paid by the student.
4. Additional immunizations or health screening may be required based on clinical site policies.

Criminal Record Check

- All BHSc students must provide a criminal record check and a vulnerable sector survey (obtained within the previous six months) prior to attendance at any NSHA or IWK facility. An additional check may be required depending on clinical site requirements for subsequent placements.

BLS-HCP Certification

All BHSc students must present proof of certification in CPR (Health Care Provider Level) and Standard First Aid certification prior to entry into the program. CPR (Health Care Provider Level) must be current and recertified at a minimum biannually (or in compliance with the healthcare facility in which a student may be completing a clinical placement). A cardio-pulmonary resuscitation (CPR) course and standard first-aid course are the student's responsibilities in time and cost. Access to clinical settings will be denied if certification is not current.

First Aid Certification

- All BHSc students must show proof of current Standard First Aid certification prior to entry into the program. In order to be eligible for clinical practicum, Standard First Aid must not expire prior to August 31 of each academic year.

N95 Mask Fit Testing

- All BHSc students must be mask fit tested for a particulate respirator according to clinical site requirements. This must be recertified every two years, and may need to be recertified annually, depending on the mask in use at your clinical site.

Additional Costs

There are additional costs associated with all professional streams of the BHSc program, including but not limited to Standard First Aid and BLS-HCP certification, immunization, uniforms, membership in professional associations, equipment, fees for writing registry exams, N95 mask-fit testing, criminal record check, and travel to clinical sites. These additional costs are the responsibility of the student. A detailed list is available from the School.

Intellectual, Emotional and Physical Demands

The health professions included in the Bachelor of Health Science program are intellectually, emotionally and physically demanding. It is important that students become familiar with the profession before entering the program so that they are able to function at an acceptable standard. It is common to have to lift and move heavy equipment, position patients, wear lead aprons, manipulate valves and knobs on equipment, remain on your feet for extended periods of time and move frequently from one clinical area to another. It is also common to have to view information displayed on computer monitors or on slides under a microscope. It might be necessary to

distinguish fine gradations of color and to respond to alarms and buzzers. There may be emergency situations that arise in the health care setting that require students to respond immediately. Shift work may be required, including rotating 12-hour shifts. Latex gloves are in wide use and chemicals are used in a variety of settings. Refer to <http://www.dal.ca/shs> (Admissions) for Statements of Fitness required for each profession. Students who have concerns about fitness should contact the School for further information.

Program Outline

Four-Year Entry-Level Program

The curriculum is comprised of four years of full-time study with each year including core, interdisciplinary, discipline-specific, health professional and basic science courses.

Fourth-year BHSc students must meet the School's clinical skills maintenance requirements and complete the "Record of Clinical Practice for Year 4" each term, until the 4th-year classwork is completed. Students should contact the School for full details.

Diagnostic Medical Ultrasound

Year 1

- DMUT 1000.03: Fundamentals of Sonography I
- DMUT 1010.03: Principles and Instrumentation of Diagnostic Medical Ultrasound I
- DMUT 1020.03: Fundamentals of Sonography II
- DMUT 1500.03: Clinical Practicum I in Diagnostic Medical Ultrasound
- HSCE 1000.03: Foundations of Health Care Practice
- HSCE 1010.03: Clinical Skills for Health Sciences
- HSCE 1020.03: Human Anatomy and Physiology I
- HSCE 1030.03: Human Anatomy and Physiology II
- HSCE 2050.03: Cross Sectional Anatomy for Multimodality Imaging
- IPHE 4900.00 (section 3): Interprofessional Health Education Portfolio
- PHYC 1310.03: Physics In and Around You I
- PHYC 1320.03: Physics In and Around You II

Year 2

- DMUT 2000.03: Sonography of the Abdomen/Superficial Structures I
- DMUT 2020.03: Principles and Instrumentation of Diagnostic Medical Ultrasound II
- DMUT 2030.03: Sonography of the Abdomen/Superficial Structures II
- DMUT 2040.03: Sonography in Obstetrics I
- DMUT 2050.03: Sonography of the Reproductive System
- DMUT 2060.03: Cardiac Sonography I
- DMUT 2500.03: Clinical Practicum II in Diagnostic Medical Ultrasound
- HSCE 2000.03: Health Care Ethics
- HSCE 2040.03: Pathophysiology for Health Sciences
- HSCE 3000.03: Culture, Diversity and Health
- IPHE 4900.00 (section 3): Interprofessional Health Education Portfolio
- STAT 1060.03: Introductory Statistics for Science and Health Sciences

Year 3

- DMUT 3000.03: Sonography in Obstetrics II
- DMUT 3200.03: Abdominal Imaging
- DMUT 3210.03: Obstetrical Imaging
- DMUT 3220.03: Gynecological Imaging
- DMUT 3230.03: Superficial Structure Imaging
- DMUT 3240.03: Application of Ultrasound Instrumentation
- DMUT 3260.03: Cardiac Imaging
- DMUT 3500.03: Clinical Practicum III in Diagnostic Medical Ultrasound
- DMUT 4010.03: Vascular Ultrasound
- HESA 4000.03: Canadian Healthcare Delivery System

- HLTH 3010.03: Introduction to Health Methods
- IPHE 4900.00 (section 3): Interprofessional Health Education Portfolio
- MRIT 4100.03 (if enrolled in MRIT certificate program)

Year 4

Required:

- HLTH 4040.03: Health Law for Non-Lawyers
- HSCE 4030.03: Leadership in Health Care
- HSCE 4200.03: Foundations in Clinical & Professional Education
- HSCE 4220.03: Critical Research Appraisal and Practices
- IPHE 4900.00 (section 3): Interprofessional Health Education Portfolio
- Students must select 12 credit hours from the Faculty of Health. These courses can be of any Faculty of Health course, which may or may not include a discipline-specific specialty practice. A Suggested Faculty of Health Electives list will be provided to the student by their academic advisor.

** Note - students who take all 4 DISM courses receive an additional Disability Management Certificate along with their BHSc degree.

- Open elective (6 credit hours)*

* some courses may require the approval of the applicable department/faculty

Or, for an MRI certificate:

Required:

- HSCE 2050.03: Cross Sectional Anatomy for Multimodality Medical Imaging
- DMUT 4000.12: Specialty Practice I/Specialty Practice II
- MRIT 4110.03: Advanced MRI Physics
- MRIT 4120.03: MRI Instrumentation, Safety and Contrast Media
- MRIT 4130.03: MRI Techniques and Applications

NOTE: Because of equivalencies to required courses the following courses (along with their equivalencies) are excluded from elective options:

ANAT 1010, PHYL 1001 (OR PHYL 1000x/y), PHYL 1002, (OR PHYL 1000x/y), PHYL 1011 (or PHYL 1010xy), PHYL 1012 (or PHYL 1010xy), HAHP 1000

Nuclear Medicine Technology

Year 1

- HSCE 1000.03: Foundations of Health Care Practice
- HSCE 1010.03: Clinical Skills for Health Sciences
- HSCE 1020.03: Human Anatomy and Physiology I
- HSCE 1030.03: Human Anatomy and Physiology II
- HSCE 2020.03: Radiation Physics
- HSCE 2030.03: Radiation Biology and Protection
- IPHE 4900.00 (section 3): Interprofessional Health Education Portfolio
- NUMT 1000.03: Fundamentals of Nuclear Medicine
- NUMT 1020.03: Nuclear Medicine Clinical Procedures I
- NUMT 1500.03: Nuclear Medicine Clinical Practicum I
- PHYC 1310.03: Physics In and Around You I
- PHYC 1320.03: Physics In and Around You II

Year 2

- HSCE 2000.03: Health Care Ethics
- HSCE 2040.03: Pathophysiology for Health Sciences

- HSCE 2050.03: Cross Sectional Anatomy for Multimodality Medical Imaging
- HLTH 3010.03: Introduction to Research Methods
- HESA 4000.03: Canadian Healthcare Delivery System
- IPHE 4900.00 (section 3): Interprofessional Health Education Portfolio
- NUMT 1010.03: Nuclear Medicine Instrumentation I
- NUMT 2000.03: Radiopharmacy
- NUMT 2010.03: Nuclear Medicine Clinical Procedures II
- NUMT 2020.03: Nuclear Medicine Clinical Procedures III
- NUMT 2500.03: Nuclear Medicine Practicum II
- STAT 1060.03: Introductory Statistics for Science and Health Sciences

Year 3

- HLTH 4040.03: Health Law for Non-Lawyers
- HSCE 3000.03: Culture, Diversity and Health
- HSCE 3020.03: Computed Tomography Instrumentation and Applications
- HSCE 4030.03: Leadership in Health Care
- IPHE 4900.00 (section 3): Interprofessional Health Education Portfolio
- MRIT 4100.03 (if enrolled in MRIT certificate program)
- NUMT 3020.03: Positron Emission Tomography
- NUMT 3200.03: Radiopharmacy
- NUMT 3220.03: General Imaging I
- NUMT 3222.03: General Imaging II
- NUMT 3230.03: Cardiac Imaging
- NUMT 3500.03: Clinical Practicum in Nuclear Medicine Technology III
- Open elective (three credit hours)

Year 4

Required:

- HSCE 4200.03: Foundations in Clinical & Professional Education
- HSCE 4220.03: Critical Research Appraisal and Practices
- IPHE 4900.00 (section 3): Interprofessional Health Education Portfolio
- NUMT 3210.03: Non-Imaging Procedures
- NUMT 3240.03: Pediatric Imaging
- NUMT 4210.03: Professional Practice in Nuclear Medicine Technology I
- NUMT 4220.03: Professional Practice in Nuclear Medicine Technology II
- Students must select 6 credit hours from the Faculty of Health. These courses can be of any Faculty of Health course, which may or may not include a discipline-specific specialty practice. A Suggested Faculty of Health Electives list will be provided to the student by their academic advisor.
** Note - a student can take no more than 5 HESA courses (HESA 4000 and HLTH 4040 are required courses, therefore allowing a maximum of 3 additional HESA electives).
- Open electives (6 credit hours)*

* some courses may require the approval of the applicable department/faculty

Or, for an MRI certificate:

Required:

- MRIT 4110.03: Advanced MRI Physics
- MRIT 4120.03: MRI Instrumentation, Safety and Contrast Media
- MRIT 4130.03: MRI Techniques and Applications
- NUMT 4000.12: Special Practice Nuclear Medicine
- Open elective (three credit hours)

NOTE: Because of equivalencies to required courses the following courses (along with their equivalencies) are excluded from elective options:

- ANAT 1010, PHYL 1001 (OR PHYL 1000x/y), PHYL 1002, (OR PHYL 1000x/y), PHYL 1011 (or PHYL 1010xy), PHYL 1012 (or PHYL 1010xy), HAHP 1000

Radiological Technology

Year 1

- HSCE 1000.03: Foundations of Health Care Practice
- HSCE 1010.03: Clinical Skills for Health Sciences
- HSCE 1020.03: Human Anatomy and Physiology I
- HSCE 1030.03: Human Anatomy and Physiology II
- IPHE 4900.00 (section 3): Interprofessional Health Education Portfolio
- PHYC 1310.03: Physics In and Around You I
- PHYC 1320.03: Physics In and Around You II
- RADT 1000.03: Skeletal Radiography
- RADT 1010.03: Imaging Fundamentals
- RADT 1020.03: Skeletal and Systems Radiography
- Open elective (three credit hours)
- RADT 1500.03: Clinical Practicum I in Radiological Technology

Year 2

- HSCE 2000.03: Health Care Ethics
- HSCE 2020.03: Radiation Physics
- HSCE 2030.03: Radiation Biology and Protection
- HSCE 2040.03: Pathophysiology for Health Sciences
- HSCE 2050.03: Cross Sectional Anatomy for Multimodality Medical Imaging
- HLTH 3010.03: Introduction to Research Methods
- IPHE 4900.00 (section 3): Interprofessional Health Education Portfolio
- RADT 2000.03: Advanced Skeletal & Systems Radiography
- RADT 2020.03: Adaption Radiography
- RADT 2010.03: Imaging Equipment
- RADT 2500.03: Clinical Practicum II in Radiological Technology
- STAT 1060.03: Introductory Statistics for Science and Health Sciences

Year 3

- HESA 4000.03: Canadian Healthcare Delivery System
- HSCE 3000.03: Culture, Diversity and Health
- HSCE 3020.03: Computed Tomography Instrumentation and Applications
- HSCE 4030.03: Leadership in Health Care
- IPHE 4900.00 (section 3): Interprofessional Health Education Portfolio
- RADT 3000.03: Applied Pathology in Radiological Technology
- RADT 3210.03: CT and Interventional Imaging
- RADT 3220.03: Fluoroscopic Imaging and Special Procedures
- RADT 3240.06: General/Adaption Radiography
- RADT 3500.03: Clinical Practicum III
- MRIT 4100.03 (if enrolled in MRIT certificate program)
- open elective (3 credit hours)

Year 4

Required:

- HLTH 4040.03: Health Law for Non-Lawyers
- HSCE 4200.03: Foundations in Clinical & Professional Education
- HSCE 4220.03: Critical Research Appraisal and Practices
- IPHE 4900.00 (section 3): Interprofessional Health Education Portfolio
- RADT 4200.03: Pediatric Radiology

- RADT 4220.03: Professional Practice in Radiological Technology
- In year 4 of the BHSc, students must select 9 credit hours from the Faculty of Health. These courses can be any Faculty of Health course, which may or may not include a discipline-specific specialty practice. A suggested Faculty of Health Electives list will be provided to the student by their academic advisor.

* Note - students who take all 4 DISM courses receive an additional Disability Management Certificate along with their BHSc degree.

- Open electives (6 credit hours)*

* some courses may require the approval of the applicable department/faculty

Or, for an MRI certificate:

Required:

- MRIT 4110.03: Advanced MRI Physics
- MRIT 4120.03: MRI Instrumentation, Safety and Contrast Media
- MRIT 4130.03: MRI Techniques and Applications
- RADT 4000.12: Specialty Practice I
- Faculty of Health Professions (FHP) Electives (3 credit hours)*

* some courses may require the approval of the applicable department

NOTE: Because of equivalencies to required courses, the following courses (along with their equivalencies) are excluded from elective options:

- ANAT 1010, PHYL 1001 (OR PHYL 1000x/y), PHYL 1002, (OR PHYL 1000x/y), PHYL 1011 (or PHYL 1010xy), PHYL 1012 (or PHYL 1010xy), HAHP 1000

Respiratory Therapy

Year 1

- HSCE 1000.03: Foundations of Health Care Practice
- HSCE 1010.03: Clinical Skills for Health Sciences
- HSCE 1020.03: Human Anatomy and Physiology I
- HSCE 1030.03: Human Anatomy and Physiology II
- IPHE 4900.00 (section 3): Interprofessional Health Education Portfolio
- RSPT 1000.03: Respiratory Therapy Instrumentation and Techniques
- RSPT 1020.03: Respiratory Therapy Clinical Assessment and Techniques
- RSPT 1030.03: Cardiopulmonary Physiology I
- RSPT 2030.03: Cardiopulmonary Physiology II
- RSPT 1500.03: Clinical Practicum I
- STAT 1060.03: Introductory Statistics for Science and Health Sciences
- Open elective (three credit hours)

Year 2

- HSCE 2000.03: Health Care Ethics
- HSCE 3000.03: Culture, Diversity and Health
- HLTH 3010.03: Introduction to Research Methods
- IPHE 4900.00 (section 3): Interprofessional Health Education Portfolio
- RSPT 2000.03: Principles of Mechanical Ventilation
- RSPT 2020.03: Application of Mechanical Ventilation
- RSPT 2050.03: Health Practice for Respiratory Therapy
- RSPT 2063.03: Respiratory Disease & Therapeutics I
- RSPT 2065.03: Respiratory Disease & Therapeutics II
- RSPT 2070.03: Human Pregnancy and Fetal/Newborn Development

- RSPT 2500.03: Clinical Practicum II
- Open elective (three credit hours)

Year 3

- IPHE 4900.00 (section 3): Interprofessional Health Education Portfolio
- RSPT 3001.03, RSPT 3002.03: Anesthesia Instrumentation and Clinical Techniques (I & II)
- RSPT 3011.03, RSPT 3012.03: Neonatal and Pediatric Therapeutics (I & II)
- RSPT 3021.03, RSPT 3022.03: Cardiac and Pulmonary Diagnostics (I & II)
- RSPT 3231.03 , RSPT 3232.03: Critical Care Instrumentation and Clinical Techniques (I & II)
- RSPT 3251.03, RSPT 3252.03; Health Practice (I & II)
- RSPT 3500.03: Clinical Practicum III

Note: Fall term start date for RSPT year three is August 28, 2023.

Year 4

Required:

- HESA 4000.03: Canadian Healthcare Delivery System
- HLTH 4040.03: Health Law for Non-Lawyers
- HSCE 4030.03: Leadership in Health Care
- HSCE 4200.03: Foundations in Clinical & Professional Education
- HSCE 4220.03: Critical Research Appraisal and Practices
- IPHE 4900.00 (section 3): Interprofessional Health Education Portfolio
- In year 4 of the BHSc, students must select 9 credit hours from the Faculty of Health. These courses can be of any Faculty of Health course, which may or may not include a discipline-specific specialty practice. A Suggested Faculty of Health Electives list will be provided to the student by their academic advisor.
 - ** Note - students who take all 4 DISM courses receive an additional Disability Management Certificate along with their BHSc degree.
- Open electives (6 credit hours)*

* some courses may require the approval of the applicable department/faculty

A note about Open Electives: Open electives in both the BHSc and BHSc-Post Diploma programs can be any Dalhousie course at any level, or any course that Dalhousie accepts as a Transfer Credit.

** Note - a student can take no more than 5 HESA courses (HESA 4000 and HLTH 4040 are required courses, therefore a maximum of 3 additional HESA electives are allowed).

** Note - student who take all 4 DISM courses receive an additional Disability Management Certificate along with their BHSc degree.

NOTE: Because of equivalencies to required courses the following courses (along with their equivalencies) are excluded from elective options:

- ANAT 1010, PHYL 1001 (OR PHYL 1000x/y), PHYL 1002, (OR PHYL 1000x/y), PHYL 1011 (or PHYL 1010xy), PHYL 1012 (or PHYL 1010xy), HAHP 1000

BHSc Degree Completion Program

This program requires 30 credit hours of university study. It is available only to students who have successfully completed the Dalhousie diploma portion of the BHSc degree program in the professional stream for which you are applying.

For Admission Requirements see [Admission Requirements](#) under Faculty of Health, School of Health Sciences (BHSc Degree Completion Program).

Post Diploma Program

The School of Health Sciences offers a post diploma program leading to a Bachelor of Health Science in any of: Diagnostic Medical Ultrasound (DMUT), Emergency Medical Services Management (EMSM), Medical Laboratory Technology (MDLT), Nuclear Medicine Technology (NUMT), Radiological Technology (RADT) and Respiratory Therapy (RSPT). The program has been developed to meet the needs of practicing technologists, sonographers, advanced paramedics, and respiratory therapists who have expressed an interest in the opportunity to complete a baccalaureate degree as a means of pursuing life long learning and increasing career opportunities.

Through a guided selection process, students will choose courses that contribute to their professional growth and interest. Students will be provided the opportunity to broaden their knowledge and scope of the Canadian health care system as well as to enhance leadership abilities and to equip themselves for participation in a rapidly changing health care environment.

The post-diploma BHSc curriculum is equivalent to two years of full time university study (60 credit hours). Courses may be completed in the sequence best suited for the student; however, attention must be paid to the course pre-requisites. To accommodate the working professional the post diploma program is available on a full time or part-time basis and most of the courses are delivered via Online Web Learning (OWL). There are university regulations concerning the maximum length of time allowed for degree completion. Refer to [Academic Regulation 15.2](#) (Duration of Undergraduate Studies).

NOTE: The BSHc Emergency Medical Services Management stream for Advanced Paramedics follows a slightly different curriculum.

Required Courses (30 credit hours)~for post diploma BHSc in DMUT, MDLT, NUMT, RADT, or RSPT

- STAT 1060.03: Introductory Statistics for Science and Health Sciences
- HSCE 1000.03: Introduction to Health Professional Practice
- HSCE 2000.03: Health Care Ethics
- HSCE 3000.03: Culture, Diversity and Health
- HLTH 3010.03: Introduction to Research Methods
- HSCE 4030.03: Leadership in Healthcare
- HESA 4000.03: Canadian Health Care Delivery
- HSCE 4200.03: Foundations in Clinical and Professional Education
- HLTH 4040.03: Health Law for Non-Lawyers
- HSCE 4220.03: Critical Research Evaluation

Faculty of Health electives (15 credit hours)

- Students may choose 5 electives from the Faculty of Health. The Post-Diploma Advisor will provide a list of suggested courses for Faculty of Health Electives. Consult the academic timetable for details regarding the academic term and course information.
** Note - students who take all 4 DISM courses receive an additional Disability Management Certificate along with their post diploma degree.

Open elective courses (15 credit hours)*

- Students may choose 5 electives from Dalhousie University. Consult the academic timetable for details regarding the academic term and course information.

** Note - a student cannot repeat any courses they completed in their diploma. If a student does take a course that was completed in their diploma it will not be counted towards their health science degree. Consult the Post-Diploma advisor on any questions regarding electives.

* some courses may require the approval of the applicable department/faculty

NOTE: Because of equivalencies to required courses the following courses (along with their equivalencies) are excluded from elective options:

ANAT 1010, PHYL 1001 (OR PHYL 1000x/y), PHYL 1002, (OR PHYL 1000x/y), PHYL 1011 (or PHYL 1010xy), PHYL 1012 (or PHYL 1010xy), HAHP 1000

Additional Options:

There are additional options (such as discipline-specific specialty practice, independent study courses, etc) available. Consult the Post-Diploma Advisor for approvals and information on restrictions."

Required Courses (42 credit hours)~for post diploma BHSc in Emergency Medical Services Management

- HSCE 2000.03: Healthcare Ethics
- HSCE 3000.03: Culture, Diversity and Health

- HLTH 3010.03: Introduction to Research Methods
- HSCE 4030.03: Leadership in Healthcare
- HSCE 4200.03: Foundations in Clinical and Professional Education
- HSCE 4220.03: Critical Research Appraisal and Practices
- STAT 1060.03: Introductory Statistics for Science and Health Sciences
- HESA 4000.03: Canadian Healthcare Delivery
- HLTH 4040.03: Health Law for Non-Lawyers
- HESA 4005.03: Healthcare Financial Management
- HESA 4010.03: Management Processes and HR Issues in EMS
- HESA 4020.03: Quality Improvement in EMS
- HESA 4030.03: EMS Systems Design
- HESA 4040.03: Principles of Public Relations and Marketing in EMS

Elective Courses (18 credit hours)

- Students may choose 6 electives from Dalhousie University. Consult the academic timetable for details regarding the academic term and course information.

** Note - a student cannot repeat any courses they completed in their diploma. If a student does take a course that was completed in their diploma it will not be counted towards their health science degree. Consult the Post-Diploma advisor on any questions regarding electives.

* some courses may require the approval of the applicable department/faculty

NOTE: Because of equivalencies to required courses the following courses (along with their equivalencies) are excluded from elective options:

ANAT 1010, PHYL 1001 (OR PHYL 1000x/y), PHYL 1002, (OR PHYL 1000x/y), PHYL 1011 (or PHYL 1010xy), PHYL 1012 (or PHYL 1010xy), HAHP 1000

[Certificate in Magnetic Resonance Imaging \(MRI\)](#)

Certificate in Anaesthesia Assistant has been suspended until further notice.

[Certificate in Cardiac Ultrasound](#)

[Certificate in Vascular Ultrasound](#)

Regulations

All students are required to observe the University Regulations and Academic Regulations as described in this calendar.

Academic

Workload

The normal workload is 30 credit hours per year during the regular academic session (September - April). In addition, a 6 to 8 week clinical practicum worth three credit hours takes place in May - August following Years 1, 2, and 3 of the BHSc program:

Fall Term	15 credit hours
Winter Term	15 credit hours
Spring/Summer Term (May-August)	3 credit hours

Normally, only a full-time course of studies (30 credit hours during the regular academic year and a three credit-hour practicum in the May-August time period) can be taken in the first three years of the four-year entry-level program. Interruption of studies will only be granted for leave of absence or voluntary withdrawal. The fourth year can be pursued on a part-time basis, subject to Academic Regulation 15.2, which regulates duration of undergraduate studies.

It is the responsibility of each individual student to ensure they are enrolled in the courses required to complete the BHSc program of study. Therefore students are expected to meet with their academic advisors to seek counselling in this regard, to ensure that course selections and course load are appropriate, and will not cause difficulties later on in the program.

The BHSc post-diploma program is available on a part time basis.

Permission to carry more than a normal workload

A workload exceeding these credit hours in any given term will be considered an *Overload*.

- Students who wish to take on an overload must have the approval from the School of Health Sciences Academic Regulations Officer. Any student applying for an increased workload (overload) must apply at least four weeks in advance of the start of the semester or year in question.
- In their request, students should include their reasons for seeking an overload and include supporting arguments and evidence, such as their academic record and any other relevant considerations.
- Applications from students who give good reasons for wishing to take an overload will be considered. Such permission will not normally be granted to any student in the first year of study, or to any student who, in the preceding academic term, obtained a grade point average of less than 3.00.
- During Clinical Practicum and/or Clinical Education Courses no additional courses will be permitted without prior approval from the Academic Regulations Officer.
- Such requests require student completion of a Waiver of Academic Regulation Application, available from your academic advisor, or the Registrar's Office.
- Students who exceed the normal workload per academic term without the Academic Regulations Officer's approval, will be required to withdraw from the course.

Attendance at Courses

Regular and punctual attendance at courses is required; students are expected to notify instructors if they are going to miss a course component. When the work of a student becomes unsatisfactory or attendance is irregular, the student may be required to withdraw from the school.

Grade Requirements

A student must receive a grade of C+ in each course with a course number in the School of Health Sciences (HSCE, DMUT, MDLT, MRIT, NUMT, RADT, RSPT) in order for that course:

- to be counted as a credit towards the Bachelor of Health Science or Diploma in Health Science
- to be considered as a prerequisite for another course

Since most professional courses are prerequisites for more advanced courses and for clinical practica, the student's academic progress will be severely impacted by a failure. Students must seek academic advice.

Any student failing a required course for the second time must withdraw from the School of Health Sciences. Such a failure will be deemed an academic dismissal. See Regulation 20.2 for information on applying for readmission following an academic dismissal.

Students are reminded of [Academic Regulations](#) 18, 19.2 and 20.2 governing good standing, probation and academic dismissal.

Grade Point Average

A description of the grade point average (GPA) is found in Regulation 17.1.1 in the Dalhousie Undergraduate Calendar. The grade scale and definitions are found in Regulation 17.1.

Grading of Clinical Courses

Clinical education and specialty practice courses are graded on a letter grade basis.

Students who have been removed from any course due to unsafe or unsatisfactory clinical performance will receive a failing (F) grade.

Supplemental Exams

In courses with a course number in the School of Health Sciences, supplemental privileges may be granted only at the discretion of the course professor to a student with a final grade of FM (Regulation 16.5, Dalhousie Undergraduate Calendar). Each course outline will state the conditions that must be met in order to be eligible. The supplemental may be practical, written or combined practical/written exam at the discretion of the professor. Students who receive a grade of F are ineligible for supplemental privileges and will be required to repeat the course.

The date and time of the supplemental exam will be negotiated between the student and course professor within the following guidelines: For Fall Term courses, the supplemental exam must be completed before the end of the first week of classes of the Winter Term. For Winter Term courses, the supplemental exam must be passed before the student can begin their clinical placement. In no case will a clinical placement be delayed for more than two weeks.

No more than two supplemental exams for courses with course numbers in the School of Health Sciences will be allowed in one year. Only one supplemental exam is allowed per course.

Voluntary Withdrawal

Students who voluntarily withdraw from the School of Health Sciences, having satisfactorily completed courses toward the BHSc (specific discipline) degree, with the intention of returning at a later date are advised that re-acceptance is contingent upon there being an available place.

Leave of Absence

1. Students who apply for a leave of absence (LOA) from their program of study must do so in writing to the School of Health Sciences Academic Regulations Officer. If possible, such applications should be made in advance of the term or year for which a LOA is being requested.
2. A request for Leave of Absence may be for a duration of one term to a maximum of one year in length. Students are eligible for a maximum of one such leave for the duration of their program.
3. Following approval of the application for LOA, the Academic Regulations Officer will notify the following individuals:
 - a) The student;
 - b) Dalhousie University Registrar's Office;
 - c) Students Services office at the School; and
 - d) Student's academic advisor
4. Students may apply to return to the program prior to the designated end of the LOA. At the time students return to the program, the LOA is considered ended.
5. At least two to three months prior to returning to the program, students granted LOA will inform the following, in writing, of their intent to resume their studies:
 - a) Academic Regulations Officer; and
 - b) Student's academic advisorStudents should also initiate discussion with his/her academic advisor to discuss plans for resumption of courses and required remedial action plan.
6. The Academic Regulations Officer will notify the Dalhousie Registrar's Office and the Student Services office at the School of the student's planned return date to the program.
7. It is important to note that for the duration of a leave of absence, the clock stops on the six year rule for discipline-specific courses, and the 10 year rule for all other courses.
8. No academic credit will be granted towards BHSc course requirements for work completed at another institution during a LOA.
9. If a leave of absence is granted, students must ensure they formally withdraw from courses in accordance with Dalhousie University regulations.
10. Students on approved leave of absence will be considered in abeyance from regular academic programming, and therefore not a student at Dalhousie University, until such time that they reactivate their student status through the Registrar's Office.

Policy on Students at Risk

The School of Health Sciences is committed to providing students every opportunity for success in their program. Although the responsibility lies with the student, processes are in place at the School to identify, and assist students at academic risk.

The School of Health Sciences Students at Risk Policy aims to identify students at risk and recommend a course of academic and/or clinical remediation to ensure students are provided the opportunity to achieve academic and clinical success.

Re-Admission of Academically Dismissed Students Policy

The primary goal of the School of Health Sciences and Dalhousie University is to ensure students are successful in their chosen profession while maintaining integrity of the program. [Academic Regulation](#) Section 20.1.3 allows for students who have been academically dismissed to apply for readmission to the University. Decisions on readmission to a program in the School of Health Sciences are made in consultation with the individual stream, clinical coordinator, and the Admissions Committee and will include, but not be limited to, consideration of availability of clinical placements.

Appeal

Students who wish to appeal a decision based on school or university regulations should consult the Program Officer or their Advisor concerning the correct procedure. Contact the School main office for complete terms of reference for the Faculty of Health Student Appeals Committee and the application regarding academic appeals.

Clinical Education Components of Health Sciences

Health Sciences education encompasses a broad spectrum of learning experiences that together prepare caring, competent and ethical practitioners able to function in a rapidly changing health care environment. The BHSc program is delivered through an integrated curriculum and students receive clinical education logically sequenced within core, interdisciplinary, discipline-specific, and clinical education courses and clinical practica. Clinical education components enable students to integrate theory with practice, master

clinical competencies, develop critical reasoning skills and demonstrate professional behavior in a variety of settings with a diversity of patients.

Successful completion of all clinical components of the program is mandatory. Clinical practica and clinical education courses are required courses in the program of study and it is not possible to exercise the diploma exit option or to receive a BHSc degree without successfully completing these courses. In addition, each of the clinical experiences is a prerequisite for further progress in the program. Course outlines provide specific information about criteria for successful completion and opportunities for remediation.

In preparation for clinical practicum, all students must participate in a workshop dedicated to professional behavior. The specific date is available from the School of Health Sciences.

Three elements of clinical education are:

Clinical Practicum

The program includes three clinical practica scheduled during the May - August time period following Years 1, 2, and 3. The Clinical Practicum is designed to provide students with opportunities to develop the knowledge, skills and professional attitudes necessary to function as competent entry-level practitioners within a variety of settings and with a broad range of patients. Students are assigned to various clinical sites, based on their level within the program, the expected learning outcomes of their professional stream, and the availability of appropriate sites.

Clinical placements will be arranged by the Clinical Coordinator for the School of Health Sciences. Students may be assigned to clinical sites located within the Halifax region, throughout the Atlantic provinces, and in various sites across Canada. All expenses related to clinical placement are the responsibility of the student. Students are scheduled in a clinical setting for 6-to-8 consecutive weeks, and are supervised by preceptors. The normal student/preceptor ratio is one-to-one. Evaluation may include, but is not limited to, assessment of skills competencies, demonstration of professional behaviors, and application of theory to practice. Students monitor their personal and professional growth through introspection and reflection by maintaining journals, recording experiences in skills log books, successfully passing examinations or presenting case studies.

Clinical Education Courses

These courses provide students with an opportunity to gain hands-on experience in a specific area of clinical practice. Scheduling requires full-time rotations in the clinical setting and, depending on the area, may require shift work and/or off-site rotation. Students may be required to travel to a site outside Halifax in order to meet their clinical learning objectives. Preceptors supervise and guide students through this period of study and skills practice. Faculty continue to support students by facilitating seminars/tutorials, conducting assessments, providing constructive feedback and structuring learning experiences to further develop critical reasoning skills. Medical specialists and practitioners may be invited to share their expertise with students. There may be interprofessional learning experiences designed to enhance students' understanding of the team approach to health care. Evaluation methods may include, but are not limited to, a written examination to assess knowledge of subject matter, and practical assessments to confirm that clinical skills and professional behavior are readily applied at the expected level of performance. Clinical Education Courses are taken in Year 3 at all programs. In addition, Clinical Education Courses are a required part of the Year 4 curriculum for students in Nuclear Medicine Technology and Radiological Technology.

Specialty Practice Courses

Specialty practice affords students the opportunity to attain additional competence and knowledge in a specialty practice area. There are three components to specialty practice: clinical, contextual and theoretical. This course can be six or twelve credit hours depending on the nature of the specialty practice. Specialty practice is arranged through consultation with the discipline specific program/post diploma advisor.

Interprofessional Health Education

Students are required to maintain enrolment in IPHE 4900 (see calendar section on Health Professions, Interprofessional Health Education) for the duration of their studies. **Please register in IPHE 4900.00 section 3.** Successful completion of this course is a requirement for graduation and will be recognized further with the awarding of a special Certificate in Interprofessional Collaboration to be presented by the Faculty of Health Professions. Students are asked to consult with their individual school/college to determine the specific guidelines and expectations regarding the required portfolio.

Certificate in Cardiac Ultrasound

Fourth-year and post-diploma students in Diagnostic Medical Ultrasound Technology may complete a 15 credit hour program leading to a Certificate in Cardiac Ultrasound. Working Diagnostic Sonographers who meet post-diploma requirements might also be eligible to complete the Certificate as a stand-alone credential. The 15 credit hour certificate requires successful completion of the following Dalhousie courses:

Certificate in Cardiac Ultrasound

DMUT 4020.03: Cardiac Ultrasound

DMUT 4000.12: Specialty Practice (Cardiac Ultrasound)

Admission Requirements:

- Successful completion of a diploma program in Diagnostic Medical Ultrasound.
- Evidence of good standing with professional association.
- Two years of post-diploma work experience in Diagnostic Medical Ultrasound (for post-diploma applicants).

Upon approval from the DMUT Advisor, students must enrol in the Certificate in Cardiac Ultrasound. To enrol, students must declare the certificate through Dal Online (<https://dalonline.dal.ca> > Web for Students > Admissions > Declare Major/Minor/Certificate).

To graduate with the Certificate, students must apply to graduate with a Certificate per the timelines determined by the Registrar's Office.

Contact the School for further details.

Certificate in Magnetic Resonance Imaging

The School of Health Sciences offers a second-discipline 27-credit hour certificate in Magnetic Resonance Imaging (MRI). The MRI certificate program is accredited with Accreditation Canada. It is available to:

Current entry level School of Health Science (SHS) students in their fourth year in Diagnostic Medical Ultrasound, Nuclear Medicine Technology and Radiological Technology;

Post diploma SHS students in the medical imaging fields (Diagnostic Medical Ultrasound, Nuclear Medicine Technology, or Radiological Technology) pursuing the MRI certificate as part of their BHSc degree;

School of Health Sciences Alumni from programs of Diagnostic Medical Ultrasound, Nuclear Medicine Technology and Radiological Technology;

Graduates of Canadian accredited degree programs in Radiological Technology and Nuclear Medicine Technology. (*Applications from current Canadian entry level students in the final year of their degree program in Nuclear Medicine Technology or Radiological Technology may be considered on condition of proof of successful completion prior to the beginning of classes in the MRI Certificate program.*);

- Canadian certified/licensed Imaging Technologists in Diagnostic Medical Ultrasound, Nuclear Medicine Technology or Radiological Technology who may choose to complete the certificate in magnetic resonance imaging as a stand-alone certificate.

The 27 credit hour certificate program requires successful completion of:

- HSCE 2050.03: Cross Sectional Anatomy for Multimodality Imaging
- MRIT 4100.03: MRI Physics
- MRIT 4110.03: Advanced MRI Physics
- MRIT 4120.03: MRI Instrumentation, Safety and Contrast Media
- MRIT 4130.03: MRI Techniques and Applications
- DMUT 4000.12, NUMT 4000.12, or RADT 4000.12: Specialty Practice in MRI
- Venipuncture competency (this is a non-credit requirement)

Clinical Requirements

Clinical site criteria must be met as a requirement of admission. Students enrolled in this program must meet School pre-enrollment and clinical requirements. Enrollment is limited by clinical site availability; preference is given to current School of Health Science students and alumni.

Information

Current BSHc students (entry level) who pursue the MRI certificate will complete courses/credit hours in addition to their normal degree requirements. (Entry level students in NUMT and RADT will complete 12 credit hours beyond the degree requirement and DMUT students will complete three credit hours beyond the degree requirement.)

Upon approval from the MRI Advisor/Admissions committee, students must enroll in the Certificate in Magnetic Resonance Imaging. To enroll, students must declare the certificate through Dal Online (<https://dalonline.dal.ca> > Web for Students > Admissions > Declare Major/Minor/Certificate)

School of Health Sciences' Alumni and external applicants who have been accepted into the program, but are not currently enrolled with Dalhousie, are also required to submit an application for admission to the University as a "Special Undergraduate" under the Faculty of Health before declaring the certificate through DalOnline.

To graduate with the Certificate, students must apply to graduate with a Certificate per the timelines determined by the Registrar's Office.

Admissions Requirements

Students enrolled in the BSHc programs in Diagnostic Medical Ultrasound, Nuclear Medicine Technology or Radiological Technology may apply internally to the School through the MRI advisor. Current BSHc students must have:

- Cumulative GPA of 3.3
- B+ or higher in discipline specific-physics (HSCE 2020 or DMUT 2020)
- Approval of a completed safety screening form
- Proof of current CPR-HCP and Standard First-Aid

Certified/licensed Imaging Technologists should also apply directly to the School of Health Sciences MRI advisor. Admission requirements are:

- External applicants and students enrolled in the SHS post-diploma program must contact the MRI advisor prior to submitting an application to determine if a Prior Learning Assessment (PLA) is required.
- Successful completion of program accredited through Accreditation Canada in a medical imaging discipline of diagnostic medical ultrasound, nuclear medicine technology, or radiological technology. (*Applications from current Canadian entry level students in the final year of their degree program in Nuclear Medicine Technology or Radiological Technology may be considered, on condition of proof of successful completion prior to the beginning of classes in the MRI Certificate program.*)
- Currently licensed to practice by the Canadian Association of Medical Radiation Technologists (CAMRT) in the fields of nuclear medicine technology or radiological technology,

---or---

Licensed/registered in good standing with provincial college/regulatory body within Canada in the medical imaging field of diagnostic medical ultrasound

Documentation required:

- Official transcript of diploma or degree program and/or licensure;
 - Current registration number with CAMRT or applicable provincial college (or copy of license/certification);
 - Letter of Intent;
 - Resume
- (contact references may be requested after review of application)

Guidelines for Letter of Intent: This letter provides the opportunity for applicants to expand upon their experience, any advanced or specialty education they may have and their interest in undertaking university studies or pursuing a certificate in MRI. Information to include:

- Work experience and/or education;
- Educational initiatives undertaken since diploma/degree completion (if applicable);
- How applicant thinks this program will contribute to the professional development;
- Personal and professional motivation;
- Readiness for university education in MRI studies;

Application deadline date for the MRI Certificate program is March 1st for the program start in late June.

Please contact the School of Health Sciences' MRI advisor for more information regarding the MRI certificate program.

Certificate in Vascular Ultrasound

Fourth-year and post-diploma students in Diagnostic Medical Ultrasound may complete a 15 credit hour program leading to a Certificate in Vascular Ultrasound. Working Diagnostic Sonographers who meet post-diploma requirements may also complete the Certificate as a stand-alone credential. The 15 credit hour certificate requires successful completion of the following Dalhousie courses:

Certificate in Vascular Ultrasound

DMUT 4010.03: Vascular Ultrasound

DMUT 4000.12: Specialty Practice (Vascular Ultrasound)

Admission Requirements:

- Successful completion of a diploma program in Diagnostic Medical Ultrasound.
- Evidence of good standing with professional association.
- Two years of post-diploma work experience in Diagnostic Medical Ultrasound (for post-diploma applicants).

Upon approval from the DMUT Advisor, students must enrol in the Certificate in Vascular Ultrasound. To enrol, students must declare the certificate through Dal Online (<https://dalonline.dal.ca> > Web for Students > Admissions > Declare Major/Minor/Certificate).

To graduate with the Certificate, students must apply to graduate with a Certificate per the timelines determined by the Registrar's Office.

Contact the School for further details.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

DMUT Diagnostic Medical Ultrasound - Course Descriptions

DMUT 1000 Fundamentals of Sonography I

CREDIT HOURS: 3

This course provides a general overview of organs and structures within the thoracic and abdominopelvic cavity which are fundamental to sonography. It includes concepts of relational sectional anatomy and basic ultrasound scanning principles. Also included is a historical perspective and discussions involving the national competency profile for the profession of Diagnostic Medical Ultrasound

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

FORMATS: Lecture | Lab

DMUT 1010 Principles and Instrumentation of Diagnostic Medical Ultrasound I

CREDIT HOURS: 3

This course provides the student with the basic knowledge of the physical principles of ultrasound. It examines how diagnostic ultrasound works (how it is generated and how it interacts with tissues). Also covered in this course is the instrumentation used to transmit, receive and present echo information and the application of these to the practice of Diagnostic Medical Ultrasound.

COREQUISITES: PHYC 1320.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

FORMATS: Lecture

DMUT 1020 Fundamentals of Sonography II

CREDIT HOURS: 3

This course provides a general overview of the normal sonographic appearance of organs and structures of the thoracic and abdominopelvic cavities which are fundamental to sonography. Where applicable, the sonographic application and normal variants of specific organs and structures within the cavities are also discussed. Included are reference charts highlighting other common diagnostic tests, normal measurements, and laboratory values associated with each organ and structure of interest.

PREREQUISITES: DMUT 1000.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

FORMATS: Lecture | Lab

DMUT 1500 Clinical Practicum I in Diagnostic Medical Ultrasound

CREDIT HOURS: 3

This clinical practicum introduces students to Diagnostic Medical Ultrasound. Within the Diagnostic Imaging and Cardiac Departments, students will develop a knowledge of departmental procedures, an ability to interpret and utilize requisitions and demonstrate proficiency in equipment selection and instrumentation. Students will develop clinical skills in performing abdominal, pelvic and cardiac ultrasound examinations. Students will apply health professional practice skills when interacting with patients and healthcare professionals.

PREREQUISITES: DMUT 1010.03, DMUT 1020.03, HSCE 1010.03, PHYC 1320.03, HSCE 1020.03, HSCE 1030.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

DMUT 2000 Sonography of the Abdomen/Superficial Structures I

CREDIT HOURS: 3

This is the first of two courses related to abdomen and superficial structures. This course will focus on the pathology of the vascular system, liver, biliary system and the gastrointestinal system, as well as Interventional procedures commonly performed under ultrasound guidance. This course will provide further opportunity to develop skills and integrate knowledge from all discipline specific first year courses. The etiology, incidence, laboratory testing, sonographic presentation, differential diagnosis and treatment modalities will be examined. Documented ultrasound images with relevant pathology will be challenged, analyzed, and reviewed in a simulated clinical laboratory environment. This simulated environment will further provide an opportunity for students to integrate their knowledge of anatomy and pathology to formulate sonographic scanning strategies.

PREREQUISITES: DMUT 1500.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

FORMATS: Lecture | Lab

DMUT 2020 Principles and Instrumentation of Diagnostic Medical Ultrasound II

CREDIT HOURS: 3

This course builds on knowledge and experience gained in DMUT 1010. This course provides the student with principles and instrumentation of continuous-wave/ pulsed-wave Doppler spectral analysis and color-flow imaging. Imaging artifacts, quality assurance, and bioeffects/safety are investigated thoroughly. Application of this knowledge and the development of skills and competence needed in the clinical practice of Diagnostic Medical Ultrasound will be included in this course.

PREREQUISITES: DMUT 1500.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

FORMATS: Lecture

DMUT 2030 Sonography of the Abdomen/ Superficial Structures II

CREDIT HOURS: 3

This is the second course related to Abdomen and Superficial Structures. The course will focus on the pathology of the: pancreas, adrenals, retroperitoneum, lymphatic system, urinary tract, thyroid and parathyroid glands. Etiology, incidence, laboratory testing, sonographic presentation, differential diagnosis and treatment modalities related to these body systems will be examined. Students will be challenged to analyze, formulate sonographic scanning strategies, and diagnose appropriately relevant pathology viewed in a hospital clinical environment. The course will provide students with the opportunity to integrate skills and concepts learned in previous courses and continue development of professional skills in Diagnostic Medical Ultrasound.

PREREQUISITES: DMUT 2000.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

FORMATS: Lecture | Lab

DMUT 2040 Sonography in Obstetrics I

CREDIT HOURS: 3

This course provides the learner with a comprehensive study of normal and abnormal first trimester and normal second trimester obstetrical ultrasound

examinations. Critical evaluation of first trimester pregnancy complications and the sonographic appearances in a second trimester obstetrical patient essential to continuing study in DMUT 3000. Multiple gestations, infertility and assisted reproductive technologies are also explored in detail. The study of embryology is an important focus of this course and the sonographic appearance associated with the growing fetus. Ethical issues related to obstetrical ultrasound will be examined and discussed.

PREREQUISITES: DMUT 1500.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

FORMATS: Lecture | Lab

DMUT 2050 Sonography of the Reproductive System

CREDIT HOURS: 3

This course focuses on the anatomy, physiology, congenital anomalies and pathologies of the female and male reproductive system. It provides an opportunity for the students to enhance their knowledge of the pathological processes that affect patients with an emphasis on ovarian, uterine, testicular and breast abnormalities. Critical evaluation of these pathologies and their sonographic characteristics will be fully explored. Students will develop sonographic scanning techniques specific to transabdominal pelvic ultrasounds as well as practice transvaginal, scrotal and breast imaging techniques in a simulated environment.

This course will focus on providing care to diverse patient populations to include transgender patients and patients with intersex conditions. This course also provides the opportunity for students to develop leadership skills through mentorship of first year ultrasound students.

PREREQUISITES: DMUT 1500.03

RESTRICTIONS: BHSc DMUT students

EXCLUSIONS: DMUT 2010

FORMATS: Lecture

DMUT 2060 Cardiac Sonography I

CREDIT HOURS: 3

This course provides the learner with a comprehensive study of normal cardiac anatomy, physiology, hemodynamics, and common pathology relating to cardiac ultrasound. General principles of echocardiography, normal echo examination techniques and standard views will be covered including two-dimensional imaging, M-mode and Doppler measurements. The lab component allows students to build upon their previous knowledge of cardiac sonography.

PREREQUISITES: DMUT 1500.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

FORMATS: Lecture | Lab

DMUT 2500 Clinical Practicum II in Diagnostic Medical Ultrasound

CREDIT HOURS: 3

Practicum II provides students with the opportunity to continue skill development in abdominal and pelvic ultrasound examinations including the recognition, identification and documentation of pathologies. In addition, students will develop clinical skills in performing first and second trimester obstetrical ultrasound examinations. This clinical practicum requires the student to travel to clinical sites outside the Halifax Regional Municipality. Students will be responsible for travel and accommodation arrangements.

PREREQUISITES: DMUT 2020.03, DMUT 2030.03, HSCE 2040.03, DMUT 2040.03, DMUT 2050.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

DMUT 3000 Sonography in Obstetrics II

CREDIT HOURS: 3

This course provides a comprehensive study of the normal and abnormal second and third trimester ultrasound examinations. Critical evaluation of fetal pathologies and sonographic characteristics associated with these pathologies will be fully explored. Maternal complications associated with pregnancy and antenatal testing will also be covered.

PREREQUISITES: DMUT 2500.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

FORMATS: Lecture | Lab

DMUT 3200 Abdominal Imaging

CREDIT HOURS: 3

This clinical education course allows the student to integrate and consolidate knowledge, concepts and skills developed and maintained from previous courses. The expectation is that the student will be able to recognize, identify and document normal and abnormal sonographic images of the abdomen under indirect supervision. This experience will enhance the student's ability to make independent decisions and to critically evaluate images of abdominal organs and related structures. Students are expected to assume responsibility for their actions and decisions. Students are expected to interact effectively with patients and all healthcare team professionals while maintaining accepted professional practice standards in an ultrasound environment.

PREREQUISITES: DMUT 4010.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

FORMATS: Lecture | Lab

DMUT 3210 Obstetrical Imaging

CREDIT HOURS: 3

Building on experience developed in Clinical Practicum II and knowledge and concepts learned in Sonography in Obstetrics and Gynecology I and II, this obstetrical ultrasound clinical education course enhances the student's ability to recognize, identify and document normal and abnormal obstetrical ultrasound examinations. This course provides the opportunity to reflect on their own clinical and professional skills in dealing with the obstetrical patient. Assuming responsibility for their actions and decisions in the clinical setting, the student becomes competent in performing obstetrical sonographic examinations.

PREREQUISITES: DMUT 3000.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

DMUT 3220 Gynecological Imaging

CREDIT HOURS: 3

This clinical course allows the student to integrate knowledge, concepts and skills developed in previous courses and enhance their independent decision making skills. The expectation is for the student to achieve competency in recognizing, identifying, and documenting normal and abnormal sonographic images of the female pelvis under indirect supervision. The student will experientially reflect on their own skills and assume responsibility for their actions and decisions in the clinical setting.

PREREQUISITES: DMUT 2500.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

DMUT 3230 Superficial Structure Imaging

CREDIT HOURS: 3

This clinical education course allows the student to integrate and consolidate knowledge, concepts and skills developed and maintained from previous courses. The expectation is that the student will be able to recognize, identify and document normal and abnormal sonographic images of superficial structures under indirect supervision. This clinical experience will enhance the student's ability to make independent decisions and to critically evaluate images of superficial structures. Students are expected to assume responsibility for their actions and decisions. Students are expected to interact effectively with patients and all healthcare professionals while maintaining accepted professional practice standards in an ultrasound environment.

PREREQUISITES: DMUT 4010.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

FORMATS: Experiential Learning

DMUT 3240 Application of Ultrasound Instrumentation

CREDIT HOURS: 3

This clinical education course further expands the student's ability to analyze and process data. Integrating knowledge, concepts and skills developed in previous courses, the student will enhance their independent decision making skills. The expectation is for the student to achieve competency in their utilization of ultrasound instrumentation in a variety of ultrasound examinations. The student will experientially reflect on their own skills in their application of theory to practice.

PREREQUISITES: DMUT 2500.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

DMUT 3260 Cardiac Imaging

CREDIT HOURS: 3

Building on experience developed in Clinical Practicum II and knowledge and concepts learned in Cardiac Sonography I, this cardiac ultrasound clinical education course enhances the student's ability to recognize, identify and document normal and abnormal echocardiograms. This course provides the opportunity to reflect on their own clinical and professional skills in dealing with the cardiac patient. Assuming responsibility for their actions and decisions in the clinical setting, the student becomes more competent in performing normal echocardiograms.

PREREQUISITES: DMUT 2500.03

RESTRICTIONS: Restricted to Bachelor of Health Sciences students in the professional stream of Diagnostic Medical Ultrasound Technology

FORMATS: Lecture

DMUT 3500 Clinical Practicum III in Diagnostic Medical Ultrasound

CREDIT HOURS: 3

Practicum III provides students with the clinical exposure to various specialties which include: related imaging modalities, vascular technology, echocardiography and fetal assessment (biophysicals, amniocentesis etc.). This clinical practicum will provide the student with the opportunity to correlate ultrasound imaging with other imaging specialties. This clinical practicum also allows the student to gain clinical exposure to specialty practice areas which they may choose to pursue in the fourth year.

PREREQUISITES: Successful completion of all other third year DMUT courses

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

DMUT 4000 Specialty Practice I/Specialty Practice II

CREDIT HOURS: 12

NOTE: Course Details listed here also apply to DMUT 4100.

PREREQUISITES: DMUT 3500.03 for entry level students; Post diploma students must consult with the post diploma advisor to ensure the necessary prerequisites have been met.

RESTRICTIONS: Restricted to Bachelor of Health Science students in DMUT. Enrolment may be limited due to clinical site availability.

DMUT 4010 Vascular Ultrasound

CREDIT HOURS: 3

This course builds on knowledge and experience gained in DMUT 2020 (Principles and Instrumentation of Diagnostic Medical Ultrasound II) and DMUT 2000/2030 (Sonography of the Abdomen/Superficial Structures III). An integration of previously acquired knowledge and clinical skills will be applied to a more advanced level of theoretical and clinical application using Doppler ultrasound technology, including discussion of pathologic findings related to the vascular system. The student will review hemodynamics, physics and instrumentation, spectral analysis, color flow imaging and the use of contrast agents in vascular sonography. Applications in both vascular sonography as well as non-imaging physiologic assessments will be covered, to include: examinations of the intracranial and extracranial cerebral vessels, arteries and veins of the upper and lower extremities and vasculature of the abdominal and pelvic vessels.

PREREQUISITES: DMUT 2500.03

RESTRICTIONS: Restricted to Bachelor of Health Sciences students in the professional stream of Diagnostic Medical Ultrasound. Post diploma students by permission of instructor

FORMATS: Lecture | Lab

DMUT 4020 Cardiac Ultrasound

CREDIT HOURS: 3

This course builds on knowledge and experience gained in DMUT 2020 (Principles and Instrumentation of Diagnostic Medical Ultrasound II) and HSCE 2040 (Pathophysiology for Health Sciences). This course provides a comprehensive study of the normal and abnormal cardiac ultrasound examinations. The student will review anatomy and physiology and hemodynamics of the heart and relate theory to echocardiography. General principles of cardiac ultrasound, normal echo examination techniques and standard views will be covered including: two-dimensional, M-mode and Doppler. Clinical indications for echocardiography examinations will be covered as well as congenital and acquired cardiac disease processes evaluated with echocardiography.

PREREQUISITES: DMUT 3500.03

RESTRICTIONS: Restricted to Bachelor of Health Sciences students in the professional stream of Diagnostic Medical Ultrasound. Post diploma students by permission of instructor

FORMATS: Online Delivery

DMUT 4100 Specialty Practice Diag Med Ultras II

CREDIT HOURS: 6

See DMUT 4000.

PREREQUISITES: DMUT 3500.03

HSCE Health Sciences Education - Course Descriptions

HSCE 1000 Foundations of Health Care Practice

CREDIT HOURS: 3

This course introduces students in the five BHSc professions to the Canadian Health Care System and the role of the health professional within that system. The course compares the Canadian system to systems from other countries and covers diverse healthcare models such as primary care, palliative care, long term care, etc. The role of the health professional is explored through the study of professionalism, scope of practice, and risk management in an interprofessional context. The course will allow students the opportunity to develop/improve essential skills to help them study and work in a multi-disciplinary system including critical thinking, writing skills, communication and teamwork.

RESTRICTIONS: Restricted to Bachelor of Health Science students or by permission of instructor

FORMATS: Lecture

HSCE 1010 Clinical Skills for Health Sciences

CREDIT HOURS: 3

This course will further the students' understanding of working within a healthcare environment as they learn the skills required to provide patient-centered care. The course provides academic knowledge and laboratory experiences for students to develop clinical skills essential in all five professional streams of the BHSc program.

PREREQUISITES: HSCE 1000.03 and one discipline specific course

RESTRICTIONS: Restricted to Bachelor of Health Science students
FORMATS: Lecture | Lab

HSCE 1020 Human Anatomy and Physiology I

CREDIT HOURS: 3

This course, along with HSCE 1030, is designed to provide the student with an understanding of the cellular, organ, and system levels of organization of the human body. It includes a comprehensive study of facts pertaining to the covering, support and movement of the human body. Topics covered will include: organization of the body, the integumentary, skeletal and muscular systems.

RESTRICTIONS: None, however priority is given to Health Sciences students.

EXCLUSIONS: ANAT 1010, ANAT 1020, PHYL 1000, PHYL 1001, PHYL 1002, PHYL 1010, PHYL 1011, PHYL 1012

FORMATS: Online Delivery

HSCE 1030 Human Anatomy and Physiology II

CREDIT HOURS: 3

This course studies the systems that serve in maintaining the human body and ensuring its continuity. Topics covered will include: cardiovascular, immune, respiratory, digestive, urinary and reproductive systems. This course will provide students with an appreciation of the complexities of the human function and form, and set the stage for understanding the integration of organ system functions.

PREREQUISITES: HSCE 1020.03

RESTRICTIONS: None, however priority is given to Health Sciences students

EXCLUSIONS: ANAT 1010, ANAT 1020, PHYL 1000, PHYL 1001, PHYL 1002, PHYL 1010, PHYL 1011, PHYL 1012

FORMATS: Online Delivery

HSCE 2000 Health Care Ethics

CREDIT HOURS: 3

This is an introductory course in healthcare ethics. Students will be provided with an overview of moral theory and principles; a chance to reflect upon and discuss contemporary ethical issues in healthcare; and an opportunity to acquire the conceptual and practical tools required to make competent ethical decisions in their own practice. Teaching methods will include lecture, group instruction and case analysis.

RESTRICTIONS: None, however priority is given to Health Sciences students

FORMATS: Online Delivery

HSCE 2020 Radiation Physics

CREDIT HOURS: 3

The purpose of this course is to build on the basic principles of the science of radiation physics with a focus on the concepts that directly apply to the medical radiation fields of nuclear medicine technology and radiological technology. Topics of study include atomic physics, radioactivity and electromagnetic radiation. The course will explain radiation interaction with matter in relation to attenuation, absorption and dosimetry. X-ray production, as well as fission and reactor production of radioactive materials used in nuclear medicine will be investigated. Students will be provided an opportunity to investigate the newest modalities connected with their fields.

COREQUISITES: PHYC 1310.03

RESTRICTIONS: Restricted to students enrolled in the Bachelor of Health Science; students in the professional streams of Nuclear Medicine Technology and Radiological Technology programs

FORMATS: Lecture | Lab

HSCE 2030 Radiation Biology and Protection

CREDIT HOURS: 3

This course provides a theoretical overview of the bioeffects of radiation. This knowledge is linked to radiation physics principles as applied to the practice of medical radiation technology. Current regulations regarding radioactive substances and imaging and survey equipment will be presented. Emphasis will be placed on practical means of radiation protection for the technologist, the patient and the general public.

PREREQUISITES: HSCE 2020.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional streams of Nuclear Medicine Technology and Radiological Technology

FORMATS: Lecture

HSCE 2040 Pathophysiology for Health Sciences

CREDIT HOURS: 3

This course is intended to provide a concentrated study of the biological and behavioural interactions of the human body in disease. Emphasis will be placed on the examination of the Pathophysiology of diseases prevalent in Canada. This course will examine various therapeutic strategies used in treating these diseases and their implications for patient care.

PREREQUISITES: HSCE 1020.03, HSCE 1030.03

RESTRICTIONS: None, however priority is given to the Health Sciences students

FORMATS: Lecture

HSCE 2050 Cross Sectional Anatomy for Multimodality Medical Imaging

CREDIT HOURS: 3

This course is intended to provide students with a foundational knowledge base of cross sectional anatomy for multiple imaging modalities. Cross sectional diagrams and images from Magnetic Resonance, Nuclear Medicine, Radiological Technology and Ultrasound will be used to identify anatomical structures of each system in different planes.

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional streams of Diagnostic Cytology, Diagnostic Medical Ultrasound, Medical Lab Technology, Nuclear Medicine Technology, Radiological Technology, and Respiratory Therapy.

FORMATS: Online Delivery

HSCE 3000 Culture, Diversity and Health

CREDIT HOURS: 3

Community development, community advocacy, social justice and primary healthcare will be the theoretical frameworks for exploring the Health Science practitioner's role and practice in the context of working with populations in high risk environments. The emphasis is on understanding the issues, collaborating with those involved, and building individual and group capacities to enhance and promote the health and well-being of specific populations.

RESTRICTIONS: None, however priority is given to the Health Sciences students

FORMATS: Online Delivery

HSCE 3010 Introduction to Health Research

CREDIT HOURS: 3

HSCE 3010 is designed to help students make sense of the research they can be expected to encounter in their professional practices. By focusing on the role of research in contemporary health professional practice this course will provide the student with a sound basis in the principles underlying research theory, measurement issues, experimental, exploratory and descriptive research designs, data analysis and communication skills.

RESTRICTIONS: None, however priority is given to Health Sciences students

EXCLUSIONS: HAHF 3100.03

FORMATS: Online Delivery

HSCE 3020 Computed Tomography Instrumentation and Applications

CREDIT HOURS: 3

This course is designed to provide students with knowledge of CT instrumentation, procedures and common pathologies. CT Image acquisition, processing and quantitative image analysis will be explored in detail. Processing and post-processing of CT data will be explored and contrasted to CT data acquisition and manipulation in multi-modality instrumentation. Opportunity to apply and expand upon the knowledge gained through tutorials will be provided through clinical exposure and self directed learning sessions

PREREQUISITES: HSCE 2050.03, NUMT 2500.03 or RADT 2500.03

RESTRICTIONS: Restricted to students enrolled in the Bachelor of Health Science Program, in the professional stream of Nuclear Medicine Technology or Radiological Technology

EXCLUSIONS: NUMT 3100.03, RADT 3010.03

HSCE 3115 Directed Studies in Health Sciences

CREDIT HOURS: 15

This course is for exchange students at the School of Health Sciences.

RESTRICTIONS: Special authorization from the relevant department is required.

FORMATS: Lecture

HSCE 3600 Clinical Elective

CREDIT HOURS: 1

This clinical elective is available for visiting students only, in the health professions of diagnostic medical ultrasound, diagnostic cytology, nuclear medicine technology, radiological technology, or respiratory therapy. Contact department for details.

HSCE 4030 Leadership In Health Care

CREDIT HOURS: 3

This course will consider various elements of leadership in a complex, multi-professional and rapidly changing healthcare system, and will enable students to

assess and strengthen their own leadership style. An understanding of current trends and issues in healthcare will provide a basis for the development of leadership skills. Critical thinking, decision-making processes and other leadership behaviours will be examined.

RESTRICTIONS: None, however priority is given to Health Sciences students

FORMATS: Online Delivery

HSCE 4040 Independent Study

CREDIT HOURS: 3

The student will carry out an independent study or complete a project related to health sciences. Facilitation is provided by faculty or a course supervisor and is dependent upon the nature of the course of study. Students wishing to pursue HSCE 4040.03 must consult with the program/post diploma advisor for approval a minimum of three months prior to the beginning of the term in which they hope to enrol in the course. This course may not be offered every year and will be contingent upon the availability of faculty.

HSCE 4041 Independent Study

CREDIT HOURS: 3

The student will carry out an independent study or complete a project related to health sciences. Facilitation is provided by faculty or a course supervisor and is dependent upon the nature of the course of study. Students wishing to pursue HSCE 4041.03 must consult with the program/post diploma advisor for approval a minimum of three months prior to the beginning of the term in which they hope to enroll in the course. This course may not be offered every year and will be contingent upon the availability of faculty.

HSCE 4200 Foundations in Clinical & Professional Education

CREDIT HOURS: 3

Using an adult education theoretical perspective, this course introduces students to elements of program design, objective setting, selection of instructional methods and assessment strategies for application to their roles as preceptors, patient educators, and lifelong students. This course will discuss a variety of teaching, learning and delivery methods as well as their appropriateness to clinical and professional education.

RESTRICTIONS: Restricted to students within the Faculty of Health Professions

FORMATS: Online Delivery

HSCE 4220 Critical Research Appraisal and Practices

CREDIT HOURS: 3

This course is designed to give students and practicing professionals the opportunity to further develop and practice those skills essential to the competent translation of knowledge into clinical practice. Through evaluation and use of evidence-informed decision making and change management processes students will be prepared to assist their future workplaces in staying at the forefront of clinical practice.

PREREQUISITES: HAHP 3100 or HSCE 3010 or equivalent

RESTRICTIONS: Restricted to 4th Year Health Professions students.

MDLT Medical Lab Technology - Course Descriptions

MDLT 4000 Specialty Practice I

CREDIT HOURS: 12

NOTE: Course Details listed here also apply to MDLT 4100 .

PREREQUISITES: Post diploma students must consult with the post diploma advisor to ensure the necessary prerequisites have been met.

RESTRICTIONS: Restricted to BHSc students MDLS; Enrollment may be limited due to clinical site availability.

MDLT 4100 Specialty Practice II

CREDIT HOURS: 6

See MDLT 4000.

MRIT Magnetic Resonance Imaging Technology - Course Descriptions

MRIT 4100 MRI Physics

CREDIT HOURS: 3

The physical principles involved with Magnetic Resonance Imaging (MRI) are introduced. The course covers topics such as basic principles, image weighting and contrast, image acquisition and reconstruction, data collection and image formation, and a detailed study of MRI pulse sequences.

RESTRICTIONS: Restricted to 3rd and 4th year BHSC DMUT, NUMT or RADT students. Permission to register must be obtained by the School of Health Sciences.

MRIT 4110 Advanced MRI Physics

CREDIT HOURS: 3

Advanced MRI Physics builds on the foundations established in MRIT 4100. This course includes a comprehensive study of the artifacts encountered in magnetic resonance imaging as well as flow phenomena. The physics behind advanced imaging techniques are presented including: vascular, cardiac, functional, diffusion, perfusion, spectroscopy, interventional and breast MR. Image post processing techniques are also introduced.

PREREQUISITES: MRIT 4100.03

RESTRICTIONS: Restricted to 4th year BHSc DMUT, NUMT or RADT students.

MRIT 4120 MRI Instrumentation, Safety and Contrast Media

CREDIT HOURS: 3

MRI Instrumentation, Safety and Contrast Media presents instrumentation and equipment, RF coil technology, quality control methods, patient monitoring, site planning for new MRI sites and new advances in MRI technology. This course will focus on the study of MRI safety as well as composition, safety, and applications of MRI contrast media in current practice.

PREREQUISITES: MRIT 4110.03

RESTRICTIONS: Restricted to 4th year BHSc DMUT, NUMT or RADT students.

MRIT 4130 MRI Techniques and Applications

CREDIT HOURS: 3

MRI Techniques and Applications expands on the physics and theory of MRI introduced in MRIT 4100.03 and introduces students to the practice of MRI scanning. Positioning techniques, coil selection, pulse sequences, protocol development, anatomy, pathology and artifacts imaged with MRI will be discussed to prepare students for clinical practice.

PREREQUISITES: MRIT 4110.03, HSCE 2050.03

RESTRICTIONS: Restricted to 4th year BHSC DMUT, NUMT and RADT students

NUMT Nuclear Medicine Technology - Course Descriptions

NUMT 1000 Fundamentals of Nuclear Medicine

CREDIT HOURS: 3

This course will provide students with an introduction to nuclear medicine technology through the exploration of how radiation and detection equipment are used to perform clinical procedures. The course is divided into sections with progressively building content. Covered concepts include an introduction to radiation, detectors used for measuring radiation, and how radiation is used to create clinical images. There will be a focus on gamma camera components, acquisition techniques, Single Photon Emission Computed Tomography (SPECT) reconstruction, and quality control. Additional content on scintillation detectors, semiconductors, and survey meters will also be covered.

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

FORMATS: Lecture | Lab

NUMT 1010 Nuclear Medicine Instrumentation I

CREDIT HOURS: 3

This course will provide students with the opportunity to expand upon their knowledge of instrumentation and quality control in nuclear medicine. Methods of acquisition, image enhancement and reconstruction, motion and attenuation correction, post-acquisition processing, and qualitative image analysis will be explored in detail. Emphasis will be placed on gamma camera instrumentation as well as Single Photon Emission Computed Tomography (SPECT) theory, practical applications, and quality control procedures. In addition, students will gain the ability to design and critique a nuclear medicine quality assurance program.

PREREQUISITES: NUMT 1500.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

FORMATS: Lecture | Lab | Online Delivery

NUMT 1020 Nuclear Medicine Clinical Procedures I

CREDIT HOURS: 3

This course will provide students with their first introduction to nuclear medicine clinical procedures. Students will gain the knowledge and clinical skills

required to perform skeletal, genitourinary, and tumour/inflammatory procedures in nuclear medicine. With a patient-centered focus, students will learn image critique and interpretation, radiopharmaceutical distribution, appropriateness, protocol review, data analysis, relevant pathologies, the effects of pharmacologic agents, and procedural troubleshooting. In addition, students will be introduced to the clinical environment which will enable them to observe, develop, and practice these skills.

PREREQUISITES: NUMT 1000.03, HSCE 1000.03, HSCE 2020.03, HSCE 1020.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

FORMATS: Lecture

NUMT 1500 Nuclear Medicine Clinical Practicum I

CREDIT HOURS: 3

This clinical practicum will introduce students to the dynamics of a nuclear medicine and diagnostic imaging department through a full-time, immersive, eight-week clinical placement. Students will gain familiarity with departmental procedures and will be able to apply previously learned professional practice skills and procedural theory. Emphasis will be placed on the development of clinical skills in skeletal, genitourinary, and tumor/inflammatory systems and professional skills when interacting with patients and healthcare professionals. Students will also strive to achieve increased proficiency in communication, patient care, image acquisition and assessment, instrumentation, and quality control.

PREREQUISITES: HSCE 1010.03, HSCE 2030.03, NUMT 1020.03, HSCE 1030.03, PHYC 1320.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

NUMT 2000 Radiopharmacy

CREDIT HOURS: 3

This course will provide students with an introduction to all aspects of radiopharmaceutical preparation as it relates to nuclear medicine practice. Classification of radiopharmaceuticals, the production of nuclides, generator construction and elution, labeling methods, radiopharmaceutical reconstitution, and pharmaceutical standards will be explored in detail. Emphasis will be placed on preparing, assaying, dispensing, calculating, safe handling and storage of radiopharmaceuticals and pharmacologic agents. A comprehensive overview of quality assurance will be covered with a focus on radiopharmaceutical and equipment quality control. In addition, this course will provide a review of relevant radiation safety regulations, record keeping, and safe practices as well as an introduction to diagnostic and therapeutic isotopes and their clinical applications.

PREREQUISITES: NUMT 1010.03, NUMT 2010.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

FORMATS: Lecture | Lab

NUMT 2010 Nuclear Medicine Clinical Procedures II

CREDIT HOURS: 3

This course will provide students with the knowledge and clinical skills required to perform central nervous, respiratory, and gastrointestinal procedures in nuclear medicine. With a patient-centered focus, students will learn image critique and interpretation, radiopharmaceutical distribution, appropriateness, protocol review, data analysis, relevant pathologies, the effects of pharmacologic agents, and procedural troubleshooting. In addition, students will spend time in the clinical environment which will enable them to observe, develop, and practice these skills.

PREREQUISITES: NUMT 1500.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

FORMATS: Lecture | Lab | Tutorial

NUMT 2020 Nuclear Medicine Clinical Procedures III

CREDIT HOURS: 3

This course will provide students with the knowledge and clinical skills required to perform endocrine and cardiovascular procedures in nuclear medicine. With a patient-centered focus, students will learn image critique and interpretation, radiopharmaceutical distribution, appropriateness, protocol review, data analysis, relevant pathologies, the effects of pharmacologic agents, and procedural troubleshooting. In addition, students will spend time in the clinical environment which will enable them to observe, develop, and practice these skills.

PREREQUISITES: NUMT 1010.03, NUMT 2010.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

FORMATS: Lecture | Tutorial

NUMT 2500 Nuclear Medicine Practicum II

CREDIT HOURS: 3

This clinical practicum will enable students to integrate patient care principles and previously acquired core and discipline-specific theory into clinical practice through a full-time, immersive, eight-week clinical placement. Students will consolidate concepts, theories, and skills in performing a variety of nuclear medicine procedures. They will be exposed to image evaluation, patient management/care, radiopharmaceutical preparation, and quality control. Students will be provided with the opportunity to take an active role in clinical rotations and gain independence and competence in patient interviews, injections, and a variety of nuclear medicine imaging procedures.

PREREQUISITES: NUMT 2000.03, NUMT 2020.03

RESTRICTIONS: RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

NUMT 3020 Positron Emission Tomography

CREDIT HOURS: 3

This course will provide students with knowledge and understanding of Positron Emission Tomography (PET) physics, instrumentation, and quality control. The clinical applications of PET/CT in oncology, neurology, cardiology, infection/inflammation, and pediatrics will be covered in detail. In addition, a variety of PET radiopharmaceuticals will be discussed along with their corresponding clinical applications. Students will be introduced to radiation safety practices in PET/CT and how they differ from general nuclear medicine. Cyclotron physics, generators, and radiopharmaceutical synthesis will also be explored. PET radiopharmaceutical production and quality control, scanner instrumentation, equipment quality control, and imaging techniques will be covered with an emphasis on 18F FDG imaging, including clinical indications, normal bio-distribution, variants, artifacts, and pathological findings.

PREREQUISITES: HSCE 3020.03, NUMT 3220.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

FORMATS: Tutorial

NUMT 3200 Radiopharmacy

CREDIT HOURS: 3

This clinical education course will provide students with exposure to the daily operations and skills related to radiopharmacy practice in the clinical environment. Students will integrate radiopharmacy theory and practice through an immersive three-week clinical placement. Generator elution, product preparation, and performance of quality control procedures will be practiced. Record keeping and documentation of daily operations will be expanded upon from NUMT 2000. Emphasis will be placed on efficiency and organization in order to respond to the dynamic nature of a nuclear medicine department. Students will also gain exposure to non-routine radiopharmacy responsibilities such as: dilutions, stock solutions, radiopharmacy research, and quality improvement. Quality control procedures, evaluation, and troubleshooting techniques will be used to optimize outcomes and ensure validity of results.

PREREQUISITES: NUMT 2500.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

NUMT 3210 Non-Imaging Procedures

CREDIT HOURS: 3

This clinical education course will provide students with the opportunity to apply theory to clinical practice through an immersive three-week clinical placement focused on non-imaging, therapeutic, and emerging theranostic procedures in nuclear medicine. Students will be required to achieve competency in white blood cell labelling, thyroid uptakes, radioiodine treatments, glomerular filtration rates, and small equipment quality control. Proper lab technique and radiation safety will be emphasized, in addition to professional interactions with patients and interprofessional health care providers. Students will assess, modify, and apply instrumentation applications for each procedure performed. Quality control procedures, evaluation, and troubleshooting techniques will be used to optimize outcomes and ensure validity of results.

PREREQUISITES: NUMT 3500.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

NUMT 3220 General Imaging I

CREDIT HOURS: 3

This clinical education course will provide students with the opportunity to expand upon their knowledge and understanding of all nuclear medicine practices and procedures. Students will apply theory to practice through an immersive clinical placement, with an emphasis on the application and evaluation of general imaging procedures as they relate to patient management. Prior to the completion of this course, students will be required to obtain a minimum number of general imaging clinical competencies, achieved through assessment by faculty and preceptors. Students will assess, modify, and apply instrumentation applications for each procedure performed. Quality control procedures, evaluation, and troubleshooting techniques will be used to optimize outcomes and ensure validity of results.

PREREQUISITES: NUMT 2500

RESTRICTIONS: Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

NUMT 3222 General Imaging II

CREDIT HOURS: 3

This clinical education course will provide students with the opportunity to expand upon their knowledge and understanding of all nuclear medicine practices and procedures. Students will apply theory to practice through an immersive clinical placement, with an emphasis on the application and evaluation of general imaging procedures as they relate to patient management. Prior to the completion of this course, students will be required to obtain a minimum number of general imaging clinical competencies, achieved through assessment by faculty and preceptors. Students will assess, modify, and apply instrumentation applications for each procedure performed. Quality control procedures, evaluation, and troubleshooting techniques will be used to optimize outcomes and ensure validity of results.

PREREQUISITES: NUMT 3220.03, HSCE 3020.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology.

NUMT 3230 Cardiac Imaging

CREDIT HOURS: 3

Students will apply theory to clinical practice by performing procedures involving the cardiovascular system. Application and evaluation of acquisition and processing of nuclear cardiology procedures with a focus on stress imaging (treadmill and medication induced) and wall motion imaging will be emphasized. Students will be able to assess, modify and apply instrumentation applications for each procedure performed. Quality Control procedures, evaluation and trouble-shooting techniques will be utilized to optimize efficiency and validate results.

PREREQUISITES: NUMT 2500.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

NUMT 3240 Pediatric Imaging

CREDIT HOURS: 3

This clinical education course will provide students with the opportunity to enhance their knowledge and understanding of nuclear medicine practice in the care of pediatric patients and their families. Students will further develop their radiopharmacy, radiation safety and patient care skills through an immersive three-week clinical placement in a pediatric nuclear medicine department. Emphasis will be placed on the role of nuclear medicine in the diagnosis and management of pediatric-specific pathologies and conditions. Students will assess, modify, and apply instrumentation applications for each procedure performed. Quality control procedures, evaluation, and troubleshooting techniques will be used to optimize outcomes and ensure validity of results.

PREREQUISITES: NUMT 3500.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

NUMT 3500 Clinical Practicum In Nuclear Medicine Technology III

CREDIT HOURS: 3

This clinical practicum will provide students with the opportunity to achieve competency in nuclear medicine practice through a full-time, immersive, eight-week clinical placement. Students will be required to consolidate and apply all previously acquired core and discipline-specific theory and clinical skills into practice. Emphasis will be placed on achieving competency in all general and non-imaging nuclear medicine procedures, as well as CT, radiopharmacy, and when available, PET/CT. Students will be provided with the opportunity to expand upon their knowledge and understanding of the broader healthcare system through observational learning experiences in affiliated clinical departments.

PREREQUISITES: NUMT 3200.03, NUMT 3222.03, NUMT 3230.03, NUMT 3020.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

NUMT 4000 Spec Practice Nuclear Medicine

CREDIT HOURS: 12

FORMATS: Lecture

NUMT 4001 SP NUCLEAR MEDICINE part I

CREDIT HOURS: 6

CALENDAR NOTES: Students taking this course must register in and complete NUMT 4001.06 and NUMT 4002.06 in consecutive terms; credit will not be granted if courses are not completed consecutively.

RESTRICTIONS: Restricted to students in Nuclear Medicine Technology

EXCLUSIONS: NUMT 4000XY.12

FORMATS: Lecture

NUMT 4002 SP NUCLEAR MEDICINE part II

CREDIT HOURS: 6

CALENDAR NOTES: Students taking this course must register in and complete NUMT 4001.06 and NUMT 4002.06 in consecutive terms; credit will not be granted if courses are not completed consecutively.

RESTRICTIONS: Restricted to students in Nuclear Medicine Technology

EXCLUSIONS: NUMT 4000XY.12

FORMATS: Lecture

NUMT 4100 Specialty Practice I/Specialty Practice II

CREDIT HOURS: 6

Specialty practice affords students the opportunity to attain additional competence and knowledge in a specialty practice area. There are three components to specialty practice: clinical, contextual and theoretical. Specialty Practice is arranged through consultation with the program advisor.

PREREQUISITES: NUMT 3500.03 for entry level students; Post diploma students must consult with the post diploma advisor to ensure the necessary prerequisites have been met.
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology. Enrolment may be limited due to clinical site availability.

NUMT 4210 Professional Practice in Nuclear Medicine Technology I

CREDIT HOURS: 3

This clinical education course will provide students with the opportunity to assume clinical responsibility and further develop professionalism skills in nuclear medicine technology. Students will be scheduled in a variety of diagnostic imaging areas where they will be responsible, with remote supervision, for functioning as an integral member of an interprofessional health care team. This course will also provide the opportunity for students to practice professional advocacy, act as mentors, and engage in continuing professional development. Students will be required to obtain all remaining competencies as required by the CAMRT National Competency Profile.

CALENDAR NOTES: Students cannot be registered in NUMT 4210.03 and NUMT 4220.02 concurrently.

PREREQUISITES: NUMT 4220.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

NUMT 4220 Professional Practice in Nuclear Medicine Technology II

CREDIT HOURS: 3

This clinical education course will provide students with the opportunity to assume clinical responsibility and further develop professionalism skills in nuclear medicine technology. Students will be scheduled in a variety of diagnostic imaging areas where they will be responsible, with remote supervision, for functioning as an integral member of an interprofessional health care team. This course will also provide the opportunity for students to practice professional advocacy, recommend evidence-based changes to current practice, and engage in activities to support and promote the nuclear medicine profession. Students will be required to obtain all remaining competencies as required by the CAMRT National Competency Profile.

CALENDAR NOTES: Students cannot be registered in NUMT 4210.03 and 4220.03 concurrently.

PREREQUISITES: NUMT 3500.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

RADT Radiological Technology - Course Descriptions

RADT 1000 Skeletal Radiography

CREDIT HOURS: 3

This course provides the student with the knowledge required to perform basic skeletal radiography examinations. Aspects studied include: patient positioning, alignment of the radiation field, and radiation exposure factors. Radiographic images are analyzed with a focus on structures demonstrated, evaluation criteria, and modifications required to improve sub-optimal images. Students have the ability to develop radiographic skills for positioning and image analysis in lab/tutorial sessions.

COREQUISITES: RADT 1010.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

FORMATS: Lecture | Lab | Tutorial

RADT 1010 Imaging Fundamentals

CREDIT HOURS: 3

This course offers an introduction to the processes involved in the production of x-radiation and use of radiation for diagnostic imaging. The basic principles and equipment involved in radiography and fluoroscopy are studied as well as an introduction to the controlling parameters for image production. A major emphasis of the course is an analysis of the radiographic image and the factors that influence its quality. Students have the opportunity to use imaging equipment during lab sessions.

COREQUISITES: RADT 1000.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

FORMATS: Lecture | Lab

RADT 1020 Skeletal and Systems Radiography

CREDIT HOURS: 3

Skeletal and Systems Radiography provides the student with the knowledge required to perform radiological imaging procedures of the vertebral column, craniofacial structures, body organs and systems. Elements of the course include patient positioning, alignment of the radiation field, patient management, use of contrast media, and image analysis. Images are assessed with a focus on structures demonstrated, evaluation criteria, and modifications required to improve image quality. Students have the opportunity to practice and demonstrate the radiographic positions in a tutorial/simulation setting. Clinical lab sessions are included in this course to link theory to practice and to provide the student with an orientation to the Diagnostic Imaging Department, including the emergency room, fluoroscopy and mobile imaging.

PREREQUISITES: RADT 1000.03, RADT 1010.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

RADT 1500 Clinical Practicum I in Radiological Technology

CREDIT HOURS: 3

This clinical practicum introduces students to radiological technology and a Diagnostic Imaging department. Students will have the opportunity to experience a wide variety of procedures and interact with healthcare professionals and patients. Students will develop skills in skeletal/systems radiography, image evaluation, and patient management/care.

PREREQUISITES: RADT 1020.03, HSCE 1010.03, HSCE 1030.03, PHYC 1320.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

RADT 2000 Advanced Skeletal & Systems Radiography

CREDIT HOURS: 3

This course provides the students with the knowledge of advanced skeletal examinations, and imaging examinations of the gastrointestinal, genitourinary, biliary, reproductive, cardiovascular, and central nervous systems. Learning labs in which the students reinforce their knowledge of anatomy, physiology, image quality, and radiographic criteria support this course. Clinical labs and tutorial sessions prepare the students to challenge advanced patient examinations.

PREREQUISITES: RADT 1500

RESTRICTIONS: Restricted to the Bachelor of Health Science students in the professional stream of Radiological Technology

FORMATS: Lecture | Lab | Tutorial

RADT 2010 Imaging Equipment

CREDIT HOURS: 3

This course covers the structure, operating principles, and quality control of the equipment involved in radiological technology. It includes a comprehensive study of x-ray generators, tubes, fluoroscopic, and processing equipment with a focus on technical parameters and clinical applications. This course also covers quality control concepts, equipment used for quality control testing and testing procedures for the imaging equipment in radiological technology.

COREQUISITES: RADT 2020.03

PREREQUISITES: RADT 1500.03, HSCE 2020.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

FORMATS: Lecture | Lab

RADT 2020 Adaption Radiography

CREDIT HOURS: 3

The Adaption Radiography course provides the student with the knowledge required to adapt imaging procedures for unique clinical situations including trauma, mobile, and operating room examinations, and for patients with special needs (pediatric, geriatric, and disabled). Selected radiographic projections and procedures related to the topics are also studied and pertinent radiographic images are analyzed. Students will have the opportunity to develop radiographic adaption skills in clinical/learning lab sessions and clinical simulation sessions.

COREQUISITES: RADT 2010.03

PREREQUISITES: RADT 2000.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

FORMATS: Lecture | Lab | Tutorial

RADT 2500 Clinical Practicum II in Radiological Technology

CREDIT HOURS: 3

This practicum provides students with the opportunity to continue skill development in the clinical examinations/procedures introduced in RADT 1500. In addition, an introduction to specialized clinical procedures is provided, including operating room imaging, computed tomography, and pediatric radiography.

PREREQUISITES: RADT 2010.03, 2020.03, HSCE 2030.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

RADT 3000 Applied Pathology in Radiological Technology

CREDIT HOURS: 3

This course provides the student with the fundamental knowledge to recognize the radiographic appearances of specific pathologies. This knowledge is directly applicable to the clinical component of the program. The course is presented by lecture and through clinical lab sessions and learning labs where the student studies a variety of images related to pathologic processes. Studies from related diagnostic modalities are reviewed when appropriate.

PREREQUISITES: RADT 2500.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology.

FORMATS: Lecture | Lab

RADT 3210 CT and Interventional Imaging

CREDIT HOURS: 3

This course provides the students with the opportunity to experience the clinical practice of computed tomography and angiography/interventional imaging. Under the direction of a preceptor, students will meet the competencies required in these imaging areas. This class allows students to apply the theory from the CT Instrumentation and Applications course (HSCE 3020.03) and promotes further development of professional skills and behaviors.

PREREQUISITES: RADT 3000.03, HSCE 3020.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

RADT 3220 Fluoroscopic Imaging and Special Procedures

CREDIT HOURS: 3

This clinical education course will prepare students for the clinical practice of radiological technology that involve fluoroscopic imaging and other special procedures. These include gastrointestinal, genitourinary and operating room imaging as well as mammography. Under the direction of a preceptor, students will apply acquired knowledge and skills to radiological procedures. The students will develop their skills in providing a high standard of patient care, producing and evaluating images, problem solving and collaboration. FORMAT: Clinical Education Course

PREREQUISITES: RADT 2500.03 and RADT 3000.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

RADT 3240 General/Adaptation Radiography

CREDIT HOURS: 6

This course provides the student with the opportunity to further develop general radiography skills. Under appropriate direction from a preceptor, students will apply the knowledge and skills acquired in previous courses/practica and adapt routine imaging procedures for challenging clinical situations and patients with special needs. Students will be scheduled to a variety of imaging areas where radiographic adaptation is typically required: emergency, and in-patient/mobile procedures. Clinical experience on evening, night, and weekend shifts is provided in this course.

PREREQUISITES: RADT 2500.03, RADT 3000.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

RADT 3500 Clinical Practicum III

CREDIT HOURS: 3

Clinical Practicum III provides students with an opportunity to integrate skills and concepts from previous courses, clinical practica and the clinical education courses. Under appropriate levels of supervision, the student will assume the responsibilities of a radiological technologist and demonstrate competency in radiography and computed tomography. This practicum takes place in a Diagnostic Imaging Department outside the QEII Health Sciences Centre.

PREREQUISITES: RADT 3210.03, RADT 3220.03, RADT 3240.06

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

RADT 4000 Specialty Practice I

CREDIT HOURS: 12

NOTE: Course Details listed here also apply to RADT 4100.

PREREQUISITES: RADT 3500.03 for entry level students; Post diploma students must consult with the post diploma advisor to ensure the necessary prerequisites have been met.

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology. Enrolment may be limited due to clinical site availability.

RADT 4100 Specialty Practice II

CREDIT HOURS: 6

See RADT 4000.

PREREQUISITES: RADT 3500.03

RADT 4200 Pediatric Radiography

CREDIT HOURS: 3

This course provides students with the opportunity to meet the competencies required in pediatric radiography. A wide variety of clinical experiences are scheduled at the IWK Health Centre, including mobile and operating room imaging, gastrointestinal and urinary system examinations, and general imaging. Under the direction of preceptors, students will apply theoretical principles and further develop professional skills and behaviours. Students will also have the opportunity to attend pediatric radiology rounds and observe related imaging procedures.

PREREQUISITES: RADT 3500.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

RADT 4210 Professional Skill Development in Radiological Technology

CREDIT HOURS: 3

This clinical education course provides students with an opportunity to integrate skills/concepts from previous courses, clinical practica, and clinical education courses and continue development of professional skills in radiological technology. Through reflection and self-evaluation, students will develop learning contracts, and under appropriate levels of supervision will perform general radiologic imaging procedures. Various themes of professionalism will also be explored.

PREREQUISITES: RADT 3500.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

RADT 4220 Professional Practice in Radiological Technology

CREDIT HOURS: 3

This clinical education course provides the student with the opportunity to strengthen radiological technology skills while increasing confidence and independence in clinical practice. Under appropriate direction from a preceptor, students will apply the knowledge and skills acquired in previous courses/practica to further develop clinical judgement and self-confidence. To demonstrate competence, students must successfully complete a summative clinical assessment and comprehensive competency based written examinations. Students will also plan, design, and deliver a professional development research project for to faculty, technologists, and stakeholders.

PREREQUISITES: RADT 3500.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

RSPT Respiratory Therapy - Course Descriptions

RSPT 1000 Respiratory Therapy Instrumentation and Techniques

CREDIT HOURS: 3

Respiratory Therapy Instrumentation and Techniques introduces students to the technical components, skills competencies, and basic assessment skills for Respiratory Therapy. Clinical skills competency through lab simulation is required.

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Respiratory Therapy

FORMATS: Lecture | Lab

RSPT 1020 Respiratory Therapy Clinical Assessment and Techniques

CREDIT HOURS: 3

RSPT 1020.03 builds on the knowledge, concepts, and competencies acquired in RSPT 1000.03. Students will gain foundational knowledge and competencies necessary for understanding the physical principles and concepts associated with the safe handling and efficient operation of respiratory therapy equipment. Students will develop patient assessment skills, skills competency practice and therapeutic decision-making using lab simulation. Skills competency testing will be completed in preparation for Clinical Practicum I (RSPT 1500.03). Limited clinical opportunities may be provided. Clinical skills competency testing through lab simulation is required.

PREREQUISITES: RSPT 1000.03, HSCE 1000.03, RSPT 1030.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Respiratory Therapy

FORMATS: Lecture | Lab | Tutorial

RSPT 1030 Cardiopulmonary Physiology I

CREDIT HOURS: 3

The course presents a modular approach to developing a thorough understanding of normal and abnormal cardiopulmonary function in the human body and is considered a foundation course for all RSPT specific courses in the program.

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Respiratory Therapy

FORMATS: Lecture

RSPT 1500 Clinical Practicum I

CREDIT HOURS: 3

Clinical Practicum I introduces students to clinical practice in the patient care (hospital) environment. Students will have the opportunity to apply theory to skills practice at the defined competency level.

CALENDAR NOTES: Full-time rotations in clinical settings with assigned preceptors. Shift work and weekends may be required. Students will be required to travel to clinical sites outside the Halifax Regional Municipality. Students will be responsible for travel and accommodation.

PREREQUISITES: RSPT 1020.03, HSCE 1010.03, HSCE 1030.03, RSPT 2030.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Respiratory Therapy

FORMATS: Experiential Learning

RSPT 2000 Principles of Mechanical Ventilation

CREDIT HOURS: 3

This course will introduce the students to the delivery of mechanical ventilation by learning the terminology, physical principles and physiologic concepts associated with the application of mechanical ventilation. Equipment operation, function and troubleshooting will be investigated in the lab and clinical setting.

PREREQUISITES: RSPT 1500.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Respiratory Therapy

FORMATS: Lecture | Lab

RSPT 2020 Application of Mechanical Ventilation

CREDIT HOURS: 3

Students will be introduced to the background knowledge necessary for understanding the physical principles and concepts governing the operation of mechanical ventilators and adjunct respiratory therapy equipment to ensure the safe and effective delivery of therapy. Clinical skills testing is required.

PREREQUISITES: RSPT 2000.03, RSPT 2030.03, RSPT 2063.03, RSPT 2070.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Respiratory Therapy

FORMATS: Lecture | Lab

RSPT 2030 Cardiopulmonary Physiology II

CREDIT HOURS: 3

This course is a continuation of the physiological concepts introduced in RSPT 1030 and will examine the intricate chemical and physiological processes of fluid and electrolyte balance, pulmonary function testing, and the cardiopulmonary response to unusual and changing environments. Case study presentations and patient scenarios will complement the learning environment and assist the student in integrating previous knowledge.

PREREQUISITES: RSPT 1030.03, RSPT 1000.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Respiratory Therapy

FORMATS: Lecture

RSPT 2050 Health Practice for Respiratory Therapy

CREDIT HOURS: 3

This course consists of classroom work, clinical skills testing, guest presentations, and a community project. The learning environment will enhance the understanding of the role of the respiratory therapist in hospitals, healthcare facilities and the community. Basic competency level in the skills required for RSPT 2500 will be achieved through practicing the clinical skills in the lab. Students will be challenged to evaluate and integrate knowledge and skills.

PREREQUISITES: RSPT 2000.03, RSPT 2030.03, RSPT 2070.03, RSPT 2063.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Respiratory Therapy

FORMATS: Lecture | Lab

RSPT 2063 Respiratory Disease & Therapeutics I

CREDIT HOURS: 3

The proper assessment, and treatment of clients with conditions and diseases affecting the cardio-respiratory system are vital to the role of a respiratory therapist. The purpose of this course is for students to gain knowledge and understanding of the incidence, etiology, clinical manifestations, pathophysiology, and differential diagnosis of pathologies treated by respiratory therapists in the acute and home care environments. While studying each individual disease, the evidence-based treatment and prevention strategies, including pharmacology, will be examined.

PREREQUISITES: RSPT 1500.03

FORMATS: Lecture

RSPT 2065 Respiratory Disease & Therapeutics II

CREDIT HOURS: 3

The proper assessment and treatment of clients with conditions and diseases affecting the cardio-respiratory system are vital to the role of a respiratory therapist. The purpose of this course is for students to gain knowledge and understanding of the incidence, etiology, clinical manifestations, pathophysiology, and differential diagnosis of pathologies treated by respiratory therapists in the acute, and home care environments. While studying each individual disease, the evidence-based treatment and prevention strategies, including pharmacology, will be examined.

PREREQUISITES: RSPT 2063.03

FORMATS: Lecture

RSPT 2070 Human Pregnancy and Fetal/Newborn Development

CREDIT HOURS: 3

This course contains background information and assessment skills necessary for the progression to more advanced assessment, skills and competency levels in respiratory care of the neonate and child. The integration of this and additional required courses will allow the student to learn and to challenge the competency component of the program as it relates to neonatal/pediatric therapeutics and instrumentation, pathophysiology, applications of mechanical ventilation, pharmacology, and Neonatal Resuscitation Program (NRP).

PREREQUISITES: RSPT 1500.03

RESTRICTIONS: Restricted to Bachelor of Health Science students enrolled in the professional stream of Respiratory Therapy

FORMATS: Lecture

RSPT 2500 Clinical Practicum II

CREDIT HOURS: 3

This clinical practicum provides students with the opportunity to continue clinical skill competency development and achieve defined skills by performing in a clinical patient environment. Students will have the opportunity to rotate through assigned clinical placements through day and night shifts including weekends, depending upon the placement requirements.

PREREQUISITES: RSPT 2020.03, RSPT 2050.03, RSPT 2065.03, RSPT 2070.03, HSCE 2000.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Respiratory Therapy

RSPT 3001 Anesthesia Instrumentation and Clinical Techniques

CREDIT HOURS: 3

This course will consist of two modules; the first being a seminar/lecture series during the first few weeks of the Fall semester and the second being two weeks of full-time clinical application program in the operating room. Students will be precepted by an anesthetist with focus on airway management skills and patient monitoring. Students will also attend an intensive 2-day workshop in management of the difficult airway. Depending on availability of clinical sites, students may be expected to travel outside the metro area at their own expense.

CALENDAR NOTES: Students taking this course must register in and complete RSPT 3001.03 and RSPT 3002.03 in consecutive terms; credit will not be granted if courses are not completed consecutively.

PREREQUISITES: RSPT 2500.03

RESTRICTIONS: Restricted to Bachelor of Health Science students enrolled in the professional stream Respiratory Therapy

EXCLUSIONS: RSPT 3000.06

FORMATS: Lecture

RSPT 3002 Anesthesia Instrumentation and Clinical Techniques

CREDIT HOURS: 3

RSPT 3011 Neonatal and Pediatric Therapeutics

CREDIT HOURS: 3

This course will consist of two modules; the first being a seminar/lecture series during the first few weeks of the Fall semester and the second being a five week full-time clinical application program. Students will integrate and apply theories and skills in the neonatal and pediatric environment under the guidance of skilled preceptors. Students will be assigned to diverse clinical areas including Neonatal Intensive Care I and II, Pediatric Intensive Care, Birth Unit, and General Wards. Students may be assigned to clinical experiences during twelve hour day or night shifts. Students may be required to travel outside the metro area at their own expense.

CALENDAR NOTES: Students taking this course must register in and complete RSPT 3011.03 and RSPT 3012.03 in consecutive terms; credit will not be granted if courses are not completed consecutively.

PREREQUISITES: RSPT 2500.03

RSPT 3021 Cardiac and Pulmonary Diagnostics

CREDIT HOURS: 3

This course will consist of two modules; the first being a seminar/lab series during the first few weeks of the Fall semester and the second being a three week full-time clinical application program in the adult and pediatric pulmonary function, arterial blood gas analysis, electrocardiography and sleep laboratories. Students will integrate and apply theories and skills in specialized diagnostic environments. Students will be precepted and evaluated by certified technologists. This course will enable students to become proficient in performing cardio-pulmonary diagnostic testing including spirometry. Students will have exposure to bronchoprovocation testing and exercise stress testing. Students may be required to travel outside the metro area at their own expense.

CALENDAR NOTES: Students taking this course must register in and complete RSPT 3021.03 and RSPT 3022.03 in consecutive terms; credit will not be granted if courses are not completed consecutively.

RSPT 3231 Critical Care Instrumentation and Clinical Techniques I

CREDIT HOURS: 3

This class will consist of two modules; the first being a seminar/lecture series during the first few weeks of the fall semester and the second being a five week full-time clinical application program in diverse critical care areas. Students will be presented with the concepts and theories relevant to the respiratory care of the critical patient. Students will recall and apply theories and concepts learned in previous courses in order to integrate this knowledge with new information presented. The clinical application program will provide the students with the opportunity to integrate theories and procedures learned in the seminar/lecture series. Students may be assigned to any of the following critical care areas: medical, surgical, neurosurgical, cardiovascular and coronary care. Depending on availability of clinical sites, students may be expected to travel outside the Metro area at their own expense.

CALENDAR NOTES: Students taking this course must register in and complete RSPT 3231.03 and RSPT 3232.03 in consecutive terms; credit will not be granted if courses are not completed consecutively.

RSPT 3251 Health Practice

CREDIT HOURS: 3

This course enables students to apply theories, practice clinical skills and integrate previous learning experiences acquired throughout the three years of the BHSc program. Students will be assigned to a rotating clinical schedule at various clinical sites. Clinical experiences in this course may occur on weekends or night shifts. Students will be evaluated by preceptors at the assigned clinical sites in consultation with faculty. Students may be required to travel outside the HRM area at their own expense.

CALENDAR NOTES: Students taking this course must register in and complete RSPT 3251.03 and RSPT 3252.03 in consecutive terms; credit will not be granted if courses are not completed consecutively.

PREREQUISITES: RSPT 2500.03

RESTRICTIONS: Restricted to Bachelor of Health Science students enrolled in the professional stream Respiratory Therapy

RSPT 3500 Clinical Practicum III

CREDIT HOURS: 3

This course enables students to integrate theories and skills acquired throughout the previous three years of the program; including theory, clinical and clinical education courses. Students will be evaluated on skills proficiency, time management, organizational skills, and decision-making at an elevated level of independence. Students will be assigned to diverse clinical areas and patient populations. Clinical experiences in this course will occur during day and night shifts, including weekends. Students may be required to travel outside the HRM metro area at their own expense.

PREREQUISITES: RSPT 3002.03, RSPT 3012.03, RSPT 3022.03, RSPT 3232.03, RSPT 3252.03

RESTRICTIONS: Restricted to Bachelor of Health Science students enrolled in the professional stream Respiratory Therapy

RSPT 4010 Anaesthesia Technology and Related

CREDIT HOURS: 3

The course will provide advanced knowledge of the function, operation, set-up and quality assurance issues regarding anaesthesia and related equipment. The student will be provided with the knowledge necessary to work with anaesthesia equipment in operating room and related settings.

PREREQUISITES: RSPT 3500.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in Respiratory Therapy or by permission of instructor

FORMATS: Online Delivery

RSPT 4020 Anaesthesia Medication Delivery

CREDIT HOURS: 3

This course will provide in depth knowledge of the modes of delivery and action and interaction of anesthesia pharmacology. The student will be provided with knowledge regarding common medications related to the delivery of anaesthesia and monitoring their effect in the operating room and related settings.

PREREQUISITES: RSPT 3500.03 or equivalent

RESTRICTIONS: Restricted to Bachelor of Health Science students in Respiratory Therapy or by permission of instructor

FORMATS: Online Delivery

RSPT 4030 Clinical Anaesthesia

CREDIT HOURS: 3

This course will provide in-depth knowledge of evaluation, monitoring and interventions for patients receiving anaesthesia under varying conditions. The student will be provided with the knowledge necessary to anticipate the needs of the patient and the assistance required by the anaesthetist during different aspects of the anaesthetic process.

PREREQUISITES: RSPT 3500.03 or equivalent

RESTRICTIONS: Restricted to Bachelor of Health Science students in Respiratory Therapy or by permission of instructor

FORMATS: Online Delivery

RSPT 4100 Specialty Practice I

CREDIT HOURS: 6

Specialty practice affords students the opportunity to attain additional competence and knowledge in a specialty practice area. There are three components to specialty practice: clinical, contextual and theoretical. Specialty practice is arranged through consultation with the program advisor.

CALENDAR NOTES: PREREQUISITES: RSPT 3500.03 for entry level students. Post diploma students must consult with the post diploma advisor to ensure the necessary prerequisites have been met. RESTRICTIONS: Restricted to Bachelor of Health Science students in Respiratory Therapy. Enrolment may be limited due to clinical site availability

Interprofessional Health Education

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

Course Descriptions

IPHE 2201 Introduction to Aboriginal Peoples' Health and Healing

CREDIT HOURS: 3

This course provides students the opportunity to learn about Aboriginal perspectives regarding health, as well as the multiple and complex challenges facing Aboriginal peoples with respect to key health issues, such as health and social inequities, the epidemiology of disease and culturally appropriate service provision.

IPHE 4900 Interprofessional Health Education Portfolio

CREDIT HOURS: 0

This course is intended to prepare students to work in a collaborative and patient/client/community/family-centered work environments. Students in Faculty of Health undergraduate programs are required to maintain registration in this course for the duration of their studies. The student will be required to have completed, by the end of their program of study, a total number of different, meaningful and relevant interprofessional collaborative learning experiences (as determined and approved by the School/College) equal to two times the number of years or part of years of study in the program. At least one of these

experiences will be in a practice setting (which could include a simulated practice setting). In the event there are no students from other professions in any of the student's practice settings, credit may be granted for interactions with non-student professionals which follow an approved structured format. The experiences will include interactions with undergraduate and/or graduate students from a total of at least 4 different related professions with which there are natural affinities or linkages in the professional environment, some professions of which are outside the student's home School/College. In accordance with the guidelines/requirements of the home School/College, students will prepare a portfolio (or comparable document/process) which maps their interprofessional collaborative learning experiences on to the specific requirements of the School/College. The portfolio will be graded by the School/College on a Pass/Fail basis. Successful completion of this course is a requirement for graduation in all programs, and will be recognized further with the awarding of a special Certificate in Interprofessional Collaboration to be presented by the Faculty of Health.

CALENDAR NOTES: Students must ensure they are registered for the correct section that corresponds with their school/college and should check the timetable for the appropriate section for their discipline. Health and Human Performance: section 02. Health Sciences: section 03

COREQUISITES: IPHE 4900.00

RESTRICTIONS: Health students only

Keys, E., BSc, BN, PhDN(UoC), PDF (Dalhousie)
Murphy, A., BSc Pharm (Dalhousie), PhD Pharm (UBC)

Preceptors

Many nurses and persons in other disciplines, and settings, provide valuable assistance in the education of nursing students. Names can be obtained by contacting the School of Nursing.

School of Nursing Regulations

students are required to observe the University Regulations and Academic Regulations as described in this calendar.

1. Students are assessed in each year on their aptitude and fitness for nursing. Students who, in the judgment of the faculty, fail to attain a satisfactory standard in this assessment may be required to withdraw from the School.
2. Students are responsible for ensuring that they are registered in appropriate courses throughout the program. Incorrect registration, at any time, could cause conflicts in a student's year-to-year progression and/or graduation.
3. Students in the Baccalaureate Program are responsible for (a) the purchase of uniforms including shoes and a watch with a sweep hand or a digital watch with seconds display, (b) cost of accommodation and travel while on clinical experiences. Additional expenses are incurred by students in the Basic Baccalaureate Program for field experience, books, first aid course, CPR course, graduation pin, equipment, and nurse registration examinations and recommended and/or required immunizations and/or testing. Each student must also purchase a name tag from the University.
4. Because of enrolment limits on class size, part-time students who wish to change to full-time status must present this request in writing to the Assistant Director, Undergraduate Studies by March 1.
5. Students are assigned to a faculty member from the Undergraduate Student Affairs Committee to help them plan their academic program and to discuss academic progress or difficulties.
6. Students are permitted to repeat any course (non-nursing, core nursing courses including clinical practice and electives) in the BScN program only once. A second failure in any course (whether the second failure occurs in a previously failed course, or in a course taken for the first time in the program) will result in dismissal from the program for 1 year. Students are permitted to reapply to the program. Readmission to the program is not guaranteed and the applicant must demonstrate their preparation to return to studies.
7. Students wishing to appeal a decision based on faculty regulations or decisions should follow the School of Nursing Appeal Procedure outlined in the Nursing Student Guide.
8. Supplemental exams will not be available in any nursing courses.
9. Because of the nature of the study and practice of Nursing which places Nursing students in a position of special trust, applicants will be asked to complete a screening question related to past criminal convictions which might affect the applicant's suitability for the practice of nursing. Students accepted into the nursing program who provide false information will be disciplined by the university. It is the student's responsibility to inform the Assistant Director (Undergraduate Studies) of any new criminal conviction which could affect the student's suitability for practice.
10. Once enrolled in the Nursing Program it is the students' continuing responsibility to inform the Assistant Director Undergraduate Studies of any criminal conviction or any significant personal circumstance which would adversely affect their ability to continue with their studies or which would make them ineligible for registration within CRNNS upon graduation.
11. Progression in the program requires a C (minimum 60%) in each non-nursing course and C+ (minimum 65%) or Pass (P) in each nursing course. Progression in the program requires a GPA of 2.30 or greater (semester to semester) for all years of the program. F and INC are failing grades. ILL and W are considered neutral.

School of Nursing Appeal Procedure

The University has established a system which allows students to appeal academic decisions made by faculty. Appeals can be heard at different levels within the University: At the School and at Senate. Appeals are heard in the School by the Student Appeals Committee and at Senate level by the Senate Academic Appeals Committee.

Procedure for Undergraduate Appeals

Undergraduate appeals are heard by the Student Appeals Committee of the School of Nursing. Procedures for the undergraduate appeal process are available from the School.

Interprofessional Health Education

Students are required to maintain enrolment in IPHE 4900 (see calendar section on Health Professions, Interprofessional Health Education) for the duration of their studies. Successful completion of this course is a requirement for graduation and will be recognized further with the awarding of a special Certificate in Interprofessional Collaboration to be presented by the Faculty of

Health Professions. Students are asked to consult with their individual school/college to determine the specific guidelines and expectations regarding the required portfolio.

Degree Options (admitted Sep 2016 or later)

Bachelor of Science (Nursing) (Arctic Nursing)

The Arctic Nursing Program, developed collaboratively between Nunavut Arctic College and Dalhousie University, is a four-year program that focuses on nursing in Nunavut. This program is designed for Nunavut residents. The curriculum emphasizes awareness and respect for Inuit culture and will prepare Inuit nurses to be leaders in the health-care system of Nunavut.

To apply or learn more about the program <http://www.dal.ca/faculty/healthprofessions/nursing/programs/arctic-nursing.html>.

Graduate Programs

For details of the Master of Nursing, the joint Master of Nursing/Master of Health Administration programs and the PhD (Nursing) program, please consult the [Faculty of Graduate Studies calendar](#).

Bachelor of Science (Nursing)

Degree Requirements

Throughout the undergraduate program students must: obtain a minimum sessional and cumulative GPA of 2.30; accumulate a minimum of 120 credit hours; successfully complete all compulsory courses, as well as the necessary number of elective courses; and, complete the degree within six years of commencing nursing courses. Credit will be given for non-nursing courses that are up to ten years old by the date the degree is completed.

Grade Point Average Standards (GPA)

The grade point average system is described in the Academic Regulations.

Grades

The following letter-grade system is used to evaluate performance. Pass in nonnursing courses: A+, A, A-, B+, B, B-, C+, C, and P. In nursing courses students must attain a minimum of C+ in both theory and clinical/laboratory components: FM, F, and INC are failing grades. ILL and W are considered neutral.

Requirements for Promotion

Besides meeting the GPA requirements, progression in the program requires minimum C in each non-nursing course and minimum C+ or PASS in each nursing course. Progression in the program requires a GPA of 2.30 or greater (semester to semester) for all years of the program.

Normal Workload

The program consists of 120 credit hours; Students can register for a maximum of 15 credit hours per term.

Prerequisite for Course Admissions

There are a number of courses that require prerequisites (see [course descriptions](#)). Students must successfully complete the required prerequisites for each course or obtain approval from the Committee on Studies prior to registration.

Direct Entry Students

This entry option is for students coming directly from high school or who do not have the required prerequisites for the Advanced Standing option (see below). It is made up of 8 semesters over a 3-year period.

Semester 1 runs September to December and Semester 2 runs January to April. Upon completion of Semester 1 and 2, students will enter Semester 3 (May to July in Halifax, Sept to Nov in Yarmouth) of the Bachelor of Science (Nursing) Program; see Course of Study. Students will complete 3 semesters per year; Fall Semester is September to November; Winter Semester is January to March; Summer Semester is May to July. Students will have a one month break between each semester. Graduation: Halifax Direct Entry students will graduate in May, with eligibility to practice as a graduate nurse and apply to write the NCLEX-RN Licensure Examination in April; Yarmouth students will graduate in October, with eligibility to practice as a graduate nurse and to apply to write the NCLEX-RN Licensure Examination in August.

Advanced Standing Students

Advanced standing students have all of the required non-nursing courses (equivalent to semesters 1 and 2) completed with at least 30 credit hours, and will enter the program at Semester 3 in September. It consists of 6 semesters over a 2-year period. Semesters 3 to 8 are exclusively nursing courses. Fall Semester is September to November; Winter Semester is January to March; Summer Semester is

May to July. Students will have a one month break between each semester. Graduation: October, with eligibility to practice as a graduate nurse and apply to write the NCLEX-RN Licensure Examination in August.

Final Exams

Final exams for the new modified BSc Nursing program will be administered in the last week of each semester: November for Fall Semester; March for Winter Semester and July for Summer Semester.

Bachelor of Science (Nursing) Degree Program (Admitted in Sep 2016 or later)

In response to a health care system based on principles of primary health care, the Bachelor of Science (Nursing) Program prepares nurses to work in partnerships with individuals, families, groups and communities to promote, maintain and strengthen health. Graduates are prepared to respond to a range of health and illness needs in a variety of settings and organizational health care infrastructures. The curriculum is designed to enable graduates to meet the standards of nursing practice in Canada and be eligible for registration in Nova Scotia.

In addition to the Dalhousie Campus, students may complete a BScN degree on site in Yarmouth. Students interested in this option should contact the School for further information.

Program Objectives

The Bachelor of Science (Nursing) graduate will:

1. Demonstrate application of people-centred nursing art and science through critical inquiry, commitment to life-long learning and informed practice.
2. Practice competently by applying the principles of primary health care with diverse *clients in a variety of health care contexts and by responding to emerging trends, technology and concepts in health.
3. Communicate, collaborate and partner with *clients, and other members of the health care team to increase capacity and enhance health of populations.
4. Demonstrate ethical, legal and professional accountability in the practice of nursing and remain committed to professional competence through life-long learning.
5. Influence nursing and health care through a social and political analysis of current health care issues and application of leadership skills.

*(individuals, family, groups, community and/or populations)

Bachelor of Science (Nursing) (for students entering in Sep 2016)

The Bachelor of Science in Nursing degree is a 120 credit hour program. Graduates are eligible to write examinations for membership in the College of Registered Nurses of Nova Scotia.

Before commencing semester 3 all students must have the following completed:

Immunization

Students are responsible for having complete and current immunizations against diphtheria, polio, tetanus, pertussis, measles, mumps, rubella, Hepatitis B and a 2-step Mantoux. Access to clinical agencies will be denied if immunizations are not current and complete.

CPR, (HCP) and Standard First Aid Certification

Students must have CPR (Health Care Provider Level) and Standard First Aid certification. CPR (Health Care Provider Level) must be recertified biannually (or in compliance with the healthcare facility in which a student may be completing a clinical practicum). A cardio-pulmonary resuscitation (CPR) course and standard first-aid course are the student's responsibilities in time and cost. Access to clinical settings will be denied if certification is not current.

Criminal Record Check/Vulnerable Sector Search

Students are responsible for completing a criminal record check (CRC) and Vulnerable Sector Search (VSS). Access to clinical agencies will be denied if these checks are not current.

Course of Study

The Program is offered at both the Halifax and Yarmouth sites. The following is an outline of courses that are taken in each semester. Advanced standing students commence in Semester 3.

Program requirements may change with ongoing curricular revisions.

Semester 1

- PHYL 1010X.03: Human Physiology
- ANAT 1010.03: Basic Human Anatomy
- ENGL 1100.03: Writing for University
- Open elective (3 credit hours)
- Open elective (3 credit hours)

Semester 2

- PHYL 1010Y.03: Human Physiology
- BIOC 1420.03: Introductory Biochemistry for Nursing Students (recommended; or 3 credit hour Science elective)
- STAT 1060.03: Introductory Statistics for Science and Health Sciences
- HAHP 2000.03: Human Growth and Development (recommended; or 3 credit hour open elective)
- MICI 1100.03: Health Science Microbiology

Semester 3

- NURS 2710.06: Nursing and Community Health
- NURS 2715.03: Clinical Integration I
- NURS 2720.03: Health and Healing I: Pathophysiology and Therapeutics
- NURS 2730.03: Foundation of Nursing Practice

Semester 4

- NURS 2725.03: Clinical Integration II
- NURS 2740.06: Nursing and Family Health
- NURS 2750.03: Health and Healing II: Pathophysiology and Therapeutics
- NURS 2760.03: Nursing Research and Evidence Informed Practice

Semester 5

- NURS 3710.06: Nursing and Episodic Illness: Preventative Care and Intervention
- NURS 3715.06: Clinical Integration III
- NURS 3720.03: Professional Formation of Nursing Practice: Leadership Perspectives

Semester 6

- NURS 3725.06: Clinical Integration IV
- NURS 3730.06: Nursing in the Context of Persistent Illness: Prevention and Recovery
- Nursing elective (3 credit hours)

Semester 7

- NURS 4710.03: Relational Practice and Advanced Clinical Reasoning
- NURS 4715.06: Exploratory Nursing Practice
- NURS 4720.03: Professional formation: Nursing and Social Responsibility
- Nursing elective (3 credit hours)

Semester 8

- NURS 4725.15: Transition to Practice

Course of Study

With the help of a Year Program Coordinator, an individual course of study is determined. Course of study may be affected by the actual courses offered in an academic year. Certain courses may have prerequisites as noted in the course descriptions. Part-time students are encouraged to complete most of the required non-nursing courses before starting nursing courses. The course of study varies considerably when the student applies transfer credits toward the degree. Transfer credit regulations are outlined under the Academic Regulations section of the University Calendar.

Degree Options (admitted prior to Sep 2016)

Bachelor of Science (Nursing) (Arctic Nursing)

The Arctic Nursing Program, developed collaboratively between Nunavut Arctic College and Dalhousie University, is a four-year program that focuses on nursing in Nunavut. This program is designed for Nunavut residents. The curriculum emphasizes awareness and respect for Inuit culture and will prepare Inuit nurses to be leaders in the health-care system of Nunavut.

To apply or learn more about the program <http://www.dal.ca/faculty/healthprofessions/nursing/programs/arctic-nursing.html>.

Graduate Programs

For details of the Master of Nursing, the joint Master of Nursing/Master of Health Administration programs and the PhD (Nursing) program, please consult the [Faculty of Graduate Studies calendar](#).

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions

NURS 2710 Population Health Nursing

CREDIT HOURS: 6

The structures and relationships we live in are fundamental to the development of human potential and nursing practice. Mental and physical health concerns that have significant impact on health and social wellbeing are explored. Population health concepts essential for a healthy society are introduced. This course includes a 40 hr. Community Practice Experience

PREREQUISITES: PHYL 1011.03, PHYL 1012.03, ANAT 1010.03, STAT 1060.03 or MATH 1060.03, MICI 1100, ENGL 1100, PHYL 1000X/Y.06 plus an additional 15 credit hours totaling 30 credit hours of study

FORMATS: Lecture | Tutorial

NURS 2715 Clinical Integration 1

CREDIT HOURS: 3

Integration of foundational nursing skills and practices, such as health history and assessment, safety, infection control, communication and relational inquiry occurs in clinical application settings. Students use multiple learning modalities to master fundamentals of nursing practice.

COREQUISITES: IPHE 4900.00

PREREQUISITES: PHYL 1010X/Y.06, ANAT 1010.03, STAT 1060.03 or MATH 1060.03, MICI 1100.03, ENGL 1100.03, PHYL 1000X/Y.06 plus an additional 15 credit hours totalling 30 credit hours of study

FORMATS: Lab

NURS 2720 Health and Healing I: Pathophysiology and Therapeutics

CREDIT HOURS: 3

Fundamentals of health and disease patterns, the role of genetics, developmental biology and environment are explored. Cellular mechanisms, inflammatory and infectious responses and cellular biology of cancer are investigated. Diagnosis and therapeutic concepts including preventative therapies and pharmacological and non-pharmacological interventions with consideration of age and cultural variations are introduced.

PREREQUISITES: PHYL 1010X/Y.06, ANAT 1010.03, STAT 1060.03, MICI 1100.03, PHYL 1000X/Y.06, and ENGL 1100.03 plus an additional 15 credit hours totaling 30 credit hours of study

FORMATS: Lecture | Tutorial

NURS 2725 Clinical Integration 2

CREDIT HOURS: 3

Population health, family and perinatal theoretical concepts and evidence are utilized in a variety of practice settings. Family health assessments across various family life stages including focused fetal/newborn/child and parental care in dynamic interprofessional settings enable students to apply theory to practice.

COREQUISITES: IPHE 4900.00

PREREQUISITES: NURS 2710.03 and NURS 2720.03 and NURS 2730.03 and NURS 2715.03

FORMATS: Lab

NURS 2730 Foundation of Nursing Practice

CREDIT HOURS: 3

Ethical, professional, legal concepts and theories guiding professional nursing practice are examined. Professional identity, collaboration, compartment, and reasoning related to nursing practices are developed. Theories and frameworks are used to investigate health and social care constructs and the impact of hierarchical structures on individual, communal and global health.

COREQUISITES: NURS 2710.03

PREREQUISITES: PHYL 1010X/Y.06, ANAT 1010.03, STAT 1060.03 or MATH 1060.03, MICI 1100, PHYL 1000X/Y.06, ENGL 1100, plus an additional 15 credit hours totalling 30 credit hours of study

FORMATS: Lecture | Seminar | Online Delivery

NURS 2740 Nursing and Family Health

CREDIT HOURS: 6

Nurses combine knowledge from primary health care and public health, social and nursing sciences, recognizing the uniqueness and diversity in family systems to support transitions that occur across the life course. Understanding health promotion, protection and prevention of illness in the context of family development is the focus.

PREREQUISITES: NURS 2710.03 and NURS 2720.03 and NURS 2730.03 and NURS 2715.03

FORMATS: Lecture | Seminar

NURS 2750 Health and Healing II: Pathophysiology and Therapeutics

CREDIT HOURS: 3

Integrating knowledge of disease, diagnosis and person-centred management is key to successful nursing practice. Specific disease processes related to body systems are described and mechanisms of therapeutic options for management are evaluated. Evidence to support use of pharmacological, non-pharmacological, alternative and complimentary treatments is evaluated

PREREQUISITES: NURS 2710.03 and NURS 2720.03 and NURS 2730.03 and NURS 2715.03

FORMATS: Lecture

NURS 2760 Nursing Research and Evidence-Informed Practice

CREDIT HOURS: 3

Examines the methods used to generate, evaluate and apply knowledge in nursing and health care focusing on the basic processes of quantitative and qualitative research. The emphasis is on analysis, synthesis and evaluation of research and the implications for theory and evidence-informed nursing practice. Collaboration with Interprofessional research teams is described.

PREREQUISITES: NURS 2710.03 and NURS 2720.03 and NURS 2730.03 and NURS 2715.03

FORMATS: Lecture | Seminar

NURS 3381 Culture Caring and Health

CREDIT HOURS: 3

This nursing elective promotes students awareness of the international/global impact of culture on health beliefs and client access to healthcare systems. Students explore their own attitudes and approaches to international/global cultures. Through this exploration, students identify strategies for international/global healthcare practices.

PREREQUISITES: NURS 3725.03, NURS 3730.03

EXCLUSIONS: NURS 3080.03

FORMATS: Online Delivery

NURS 3710 Nursing and Episodic Illness: Preventative Care and Interventions

CREDIT HOURS: 6

Collaborating with clients across the life course during the acute phase of physical or mental illness requires a focus on preventative and curative care strategies. Utilization of evidence and application of nursing and inter-professional collaborative care and informed decision-making is examined within the context of person, family and society.

PREREQUISITES: NURS 2740.03, NURS 2725.03, NURS 2750.03, and NURS 2760.03
FORMATS: Lecture | Seminar

NURS 3715 Clinical Integration 3

CREDIT HOURS: 6

Using simulation and clinical experiential learning students apply knowledge related to caring for clients with acute, episodic illnesses from birth to death. Interprofessional practice and evaluation of the impact of collaborative care will be a focus.

COREQUISITES: IPHE 4900.00

PREREQUISITES: NURS 2740.03, NURS 2725.03, NURS 2760.03, and NURS 2750.03

FORMATS: Lab | Experiential Learning

NURS 3720 Professional Formation of Nursing Practice: Leadership Perspectives

CREDIT HOURS: 3

Leadership is integral to the practice of every nurse. Examining and applying leadership theories and behaviours enable effective practices to be evaluated. The nursing role in conflict resolution, crisis intervention and therapeutic communication to manage complex situations using multiple perspectives is examined.

PREREQUISITES: NURS 2740.03, NURS 2750.03, NURS 2760.03, and NURS 2725.03

FORMATS: Lecture | Seminar

NURS 3725 Clinical Integration 4

CREDIT HOURS: 6

Students apply theoretical and practical knowledge in caring for individuals and families from conception to death focusing on chronic and/or terminal illness. Significant issues related to life threatening illness, dying, and the promotion of quality of life using a collaborative care model will form the basis for practice

COREQUISITES: IPHE 4900.00

PREREQUISITES: NURS 3710.03, NURS 3715.03 and NURS 3720.03

FORMATS: Lab

NURS 3730 Nursing in the Context of Persistent Illness: Prevention and Recovery

CREDIT HOURS: 6

Using nursing and other theoretical frameworks, students focus on clients/families living with chronic and life altering diseases across the life course. Students use the nursing process, relational practice, critical inquiry and evidence to apply principles of disease management and advanced communication with a person-centred, Interprofessional approach.

PREREQUISITES: NURS 3710.03, NURS 3715.03 and NURS 3720.03

FORMATS: Lecture | Seminar

NURS 4330 Self-Directed Learning

CREDIT HOURS: 3

Students may carry out independent studies or projects related to the theory or practice of nursing, under the direction of a faculty facilitator. Students are encouraged to systematically identify, plan, execute and evaluate a learning project that is relevant to nursing practice.

PREREQUISITES: NURS 3710.03; NURS 3715.03; NURS 3720.03

EXCLUSIONS: NURS 5950.03

NURS 4331 Self-Directed Learning

CREDIT HOURS: 3

Students may carry out independent studies or projects related to the theory or practice of nursing, under the direction of a faculty facilitator. Students are encouraged to systematically identify, plan, execute and evaluate a learning project that is relevant to nursing practice.

PREREQUISITES: NURS 4330.03

NURS 4353 Multi-dimensional Aspects of Cancer

CREDIT HOURS: 3

Building on Exploring Concepts in Oncology, this course will challenge learners to consider the comprehensive care of a range of health and illness needs of individuals at risk for or living with cancer within a dynamic and changing system. The course reflects a critical analysis of the existing theoretical and evidence-informed perspectives influencing health related behaviours within the context of cancer at the individual, organizational and global levels.

PREREQUISITES: NURS 4352.03

RESTRICTIONS: BScN

FORMATS: Online Delivery

NURS 4370 Women and Aging

CREDIT HOURS: 3

This interdisciplinary nursing elective explores the issues related to socio-economic factors that are major determinants of the well-being of aging women. Topics include; aging as a process; menopause, violence against older women, older women and housing; self-image and sexuality; health and the aging woman; and older women and poverty.

PREREQUISITES: NURS 3710.03, NURS 3715.03, NURS 3720.03

CROSSLISTED: SOSA 3245.03/5245.03, GWST 3810.03, NURS 5850.03

FORMATS: Lecture | Seminar | Discussion

NURS 4371 Addictions Nursing Practice

CREDIT HOURS: 3

This nursing elective introduces major concepts associated with addiction nursing practice. It provides a foundation for students pursuing careers in addiction-related care. Within a primary healthcare perspective, students critique models and theories of addiction, consider the interplay between social, gender, cultural environments and addictions and become knowledgeable of a variety of treatment approaches. Universal, selective, and prevention activities at an individual, family and community level are explored.

CALENDAR NOTES: Students who complete NURS 4371 must also complete NURS 4372

PREREQUISITES: NURS 3710.03, NURS 3720.03 and NURS 3715.03

CROSSLISTED: NURS 5871.03

FORMATS: Online Delivery

NURS 4372 Mental Health Nursing

CREDIT HOURS: 3

Students will gain insight into individuals' experiences of mental health problems, mental disorders/psychiatric illnesses, and addictions over the life course. Multiple perspectives, including biological, nursing, sociological, philosophical and political, will guide the analysis. Treatment modalities will be critiqued. The association between nurses' relational practices and individuals' quests for life fulfillment will be examined.

PREREQUISITES: NURS 4371.03, NURS 3710.03, NURS 3720.03 & NURS 3715.03

FORMATS: Online Delivery

NURS 4380 Introduction to Epidemiology Methods in Nursing Practice

CREDIT HOURS: 3

This introductory course is intended to provide students at both the undergraduate and graduate level with a working knowledge and understanding of the basic concepts and methods of epidemiology. The main focus of this course will be to learn to analyse and interpret information about disease (i.e. both acute and chronic) and other health related occurrences at a population level (e.g. risk factors, diversity, determinants of health) within a Public and Community Health Nursing context. This course will also provide an introduction to the concepts for developing, implementing and evaluating public health programs and, for independent inquiry and decision making around public health policy. There are no prerequisites for this course though students are required to have completed their second year of their undergraduate program or have permission from the course instructor. A clinical background and a basic understanding of statistics for the Graduate students are essential but not necessary for Undergraduate students.

PREREQUISITES: NURS 3710.03; NURS 3720.03; NURS 3715.03

FORMATS: Online Delivery

NURS 4381 Public Health Nursing

CREDIT HOURS: 3

This course provides an opportunity for students to advance their introductory knowledge of public health nursing principles, roles, and functions. Public health nursing integrates knowledge from public health and nursing science to promote, protect, improve and restore the health of populations. The focus will be on advancing their understanding and application of population health, priority setting and planning approaches, partnerships, public policy literacy and health equity.

CALENDAR NOTES: NURS 4381 being taught by St. FX for the Fall 2020 semester

PREREQUISITES: NURS 3710.03; NURS 3720.03; NURS 3715.03

FORMATS: Online Delivery

NURS 4410 Perinatal Nursing across the Childbearing Continuum

CREDIT HOURS: 3

Students build upon core curriculum knowledge of the perinatal experience. The nature of the childbearing experience is critically analyzed from multiple perspectives, while evidence-informed nursing care for childbearing families with health complexities is appraised. Theory underlining processes of maternal transformation, person-centered care, relational practice and parent-infant attachment overlay these analyses.

PREREQUISITES: NURS3710, NURS3720, NURS3715
RESTRICTIONS: Only for BScN UG Students
FORMATS: Online Delivery

NURS 4420 Paediatric Nursing

CREDIT HOURS: 3

Recognizing the unique health needs of children, this course focuses on the synthesis of knowledge and the partnership between the nurse, child, family and interprofessional team. Students will integrate developmentally supportive, family-centred care and application of nursing management with the paediatric population experiencing serious episodic and persistent illness and hospitalization.

PREREQUISITES: NURS3710, NURS3720, NURS3715
RESTRICTIONS: Only for BScN UG Students
FORMATS: Online Delivery

NURS 4471 Emergency Preparedness: A Nursing Perspective

CREDIT HOURS: 3

This course focuses on preparation of future nurses for various hazards using an "all hazards" approach. Local, provincial and national disaster response systems, in the event of a mass casualty, are explored, and the ability to care for victims and responders of all types of hazards is emphasized.

PREREQUISITES: NURS 3710.03; NURS 3715.03 & NURS 3720.03
EXCLUSIONS: NURS 2390
FORMATS: Online Delivery

NURS 4472 Acute and Critical Care Nursing

CREDIT HOURS: 3

With the focus on acute and critical care nursing in the intensive care and emergency room areas, students will further develop, critically analyze and apply knowledge gained in previous courses with a focus on the management of critically ill clients. Emphasis includes working with clients across the lifespan and inter-professional relationships within specialty practice.

PREREQUISITES: NURS 3710.03, NURS 3715.03, NURS 3720.03, NURS 4471.03
EXCLUSIONS: NURS 3320.03
FORMATS: Online Delivery

NURS 4710 Relational Practice and Advanced Clinical Reasoning

CREDIT HOURS: 3

Students engage in relational inquiry, clinical reasoning and multiple ways of knowing related to health and social care. Evaluation of evidence in the context of person centred care forms the basis for reflective practice that promotes health and wellness and supports management of complex situations.

PREREQUISITES: NURS 3730.03 and NURS 3725.03

NURS 4715 Exploratory Nursing Practice

CREDIT HOURS: 6

Students engage in a broad range of clinical, research or theoretical activities, under the direction of faculty or clinical preceptor/facilitator to complete a project relevant to nursing practice. These learning experiences will assist the student to understand the complexity of the integrated nursing role across a range of settings.

COREQUISITES: IPHE 4900
PREREQUISITES: NURS 3730.03 and NURS 3725.03
FORMATS: Experiential Learning

NURS 4720 Professional Formation: Nursing and Social Responsibility

CREDIT HOURS: 3

Collaborating with and across professions, theoretical frameworks are critiqued and applied to gain insight into the nursing role that influences policies and practices in health care. Evaluation of the processes that influence and support change, as well as system inertia, will assist in developing strategies to improve health for society.

PREREQUISITES: NURS 3730.03 and NURS 3725.03
FORMATS: Lecture | Seminar

NURS 4725 Transition to Practice

CREDIT HOURS: 15

Students consolidate nursing knowledge and entry-to-practice competencies through intensive, reflective, mentored practice. Emphasizing the professional nursing role, collaboration, interprofessional teamwork, advocacy, time management, priority setting and leadership are key components of relational practice. Peer-to-peer mentoring and self-directed lifelong learning skill development support preparation for National Licensure examination and ongoing professional development.

COREQUISITES: IPHE 4900

PREREQUISITES: NURS 4710.03, NURS 4715.03, NURS 4720.03

FORMATS: Experiential Learning

NURS 4800 Interdisciplinary Class in Human Nutrition

CREDIT HOURS: 3

The interdisciplinary nursing elective is an interdisciplinary study of the basic principles of nutrition needs throughout the life cycle. Physiological, psychological, socio-economic, physical, educational and cultural determinants are explored to explain why the nutritional status of Canadians can vary and how this variation affects the development of chronic disease. Special emphasis is given to community nutrition in the Atlantic Region.

PREREQUISITES: BIOL 1000.06 or by faculty permission

CROSSLISTED: PHAR 4950.03, PHYT 3090.03, HPRO 2250.03, NURS 5990.03

FORMATS: Lecture

NURS 4810 Aboriginal Psychology: Indigenous Mental Health and Healing

CREDIT HOURS: 3

Introduces the theories and findings of Aboriginal psychologists, as well as (a) standard, central tenets of First Peoples' worldviews on holistic health, how they compare to a Euro-American perspective, and the problem of pan-Indianism, (b) the psychological effects of colonization, residential schools and intergenerational trauma on the Indigenous communities, (c) how mainstream psychology contributed to this oppression but more recently is becoming a supportive ally of Indigenous communities, and (d) Indigenous healing programs and resilience.

FORMATS: Seminar

NURS 4811 Indigenous Perspectives of Health and Healing

CREDIT HOURS: 3

Indigenous peoples often experience greater health challenges and increased health disparities than non-Indigenous populations globally. Finding ways to enhance and expand the health and well-being of Indigenous populations through culturally-sensitive, culturally-appropriate, and culturally-safe healthcare should be a priority for those working in the healthcare sectors. This course will examine understandings of health and healing from a variety of Indigenous perspectives, with a specific focus on the Mi'kmaq of Cape Breton, in order to increase cultural awareness of how different Indigenous cultures understand and conceptualize wellness. This course will be framed around experiential hands-on learning opportunities, and will have a strong presence of guest speakers from various Indigenous perspectives and various health professionals. Planned activities are cultural talking circles, medicine walks, sweat lodges, Elder teachings, and tours of Mi'kmaq health centres on Cape Breton Island.

NURS 4812 Wound Care Science: Skin Integrity

CREDIT HOURS: 3

Skin integrity is integral to overall health; when altered, damaged or compromised, health is challenged. Skin wounds result from underlying disease, disorders and/or trauma. This online course will focus on the contextual and comprehensive assessment and planning phases of wound care, infection identification, documentation requirements and other issues.

CALENDAR NOTES: NURS4812 (offered through CBU)

PREREQUISITES: NURS 3710.03, NURS 3715.03, NURS 3720.03

RESTRICTIONS: Only offered to current BScN students

FORMATS: Lecture | Online Delivery

NURS 4813 Wound Care Science II – Best Practice in Wound Care Science

CREDIT HOURS: 3

NURS4813: Wound care, including prevention, assessment, treatment and management in a variety of contexts and environments, is examined in this course. Health care team dynamics within wound care management are explored, as are the use of technologies to augment comprehensive and collaborative team approaches for documenting and tracking outcomes.

CALENDAR NOTES: NURS 4812 is a prerequisite for NURS 4813

PREREQUISITES: N4812

CROSSLISTED: NRS 3202 CBU

RESTRICTIONS: Only offered to current BScN students

FORMATS: Lecture

NURS 4820 Challenges in Aging

CREDIT HOURS: 3

Using nursing and sociological perspectives on aging, students will explore holistic care of the older client, including current gerontological issues and trends, and their implications for nursing. This course may be used as an open or NURS elective by third- or fourth-year B.Sc.Nursing students

NURS 4821 Aging and the Older Adult

CREDIT HOURS: 3

This course covers the process of growing older with reference to theories on universal aging. Students will learn to improve the function, quality of life, and self-care abilities of the elderly well, to assist them in maintaining independence. Topics include aging-related changes; the role of the family and other aggregates; how elderly adults define and promote their health; the use of community resources.

NURS 4822 Hospice Palliative Care Nursing

CREDIT HOURS: 3

Provides an overview of theories, current practices, and relevant issues in the field of palliative care, with a focus on the nurse's role. In line with the philosophy of nursing at StFX, students will explore concepts of self-care and health promotion as they relate to quality of life issues. Restricted to third- and fourth-year B.Sc. Nursing students and post-RN students

NURS 4823 Forensic Nursing

CREDIT HOURS: 6

This course will examine the application of nursing science, combined with the bio-physical-social education of the registered nurse, to the investigation and treatment of trauma, death, violent or criminal activity, and the traumatic accidents within the clinical or community institution.

FORMATS: Seminar

NURS 8110 Teaching and Learning

CREDIT HOURS: 3

Students will critically analyze and integrate the teaching-coaching domain of nursing practice through examination of the developmental, sociocultural and motivational conditions that affect teaching and learning. Principles and theories of learning are used to develop health education strategies for diverse populations. Students will develop communication and teaching skills.

RESTRICTIONS: NURS 8110 is reserved for BScN students attending the Arctic College only.

NURS 8111 Foundations of Nursing Practice

CREDIT HOURS: 3

Ethical, professional, legal concepts and theories guiding professional nursing practice are examined. Professional identity, collaboration, compartment, and reasoning related to nursing practices are developed. Theories and frameworks are used to investigate health and social care constructs and the impact of hierarchal structures on individual, communal and global health.

RESTRICTIONS: NURS 8111 is reserved for BScN students attending the Arctic College only.

NURS 8115 Clinical Integration I

CREDIT HOURS: 3

Integration of foundational nursing skills and practices, such as health history and assessment, safety, infection control, communication and relational inquiry occurs in clinical application settings. Students use multiple learning modalities to master fundamentals of nursing practice.

RESTRICTIONS: NURS 8115 is reserved for BScN students attending the Arctic College only.

NURS 8210 Health & Healing I: Pathophysiology and Therapeutics

CREDIT HOURS: 3

Fundamentals of health and disease patterns, the role of genetics, developmental biology and environment are explored. Cellular mechanisms, inflammatory and infectious responses and cellular biology of cancer are investigated. Diagnosis and therapeutic concepts including preventative therapies and pharmacological and non-pharmacological interventions with consideration of age and cultural variations are introduced.

RESTRICTIONS: NURS 8210 is reserved for BScN students attending the Arctic College only.

NURS 8211 Community and Mental Health Nursing

CREDIT HOURS: 3

The structure and relationships in our existence are fundamental to the development of human potential and nursing practice. Community concepts for a healthy society in the context of northern communities will be introduced. Mental, spiritual, and physical health concerns that impact on health and social well-being in communities will be explored.

RESTRICTIONS: NURS 8211 is reserved for BScN students attending the Arctic College only.

NURS 8212 Contemporary Issues in Health Care

CREDIT HOURS: 3

The changing patterns of health care delivery and increasing complexity in all practice environments are examined. The nurses' role requires exploration of clients' unique biopsychosocial spiritual and cultural needs and advocacy of health choices and decisions. Ethical decision making and reasoning related to nursing practices are developed.

RESTRICTIONS: NURS 8212 is reserved for BScN students attending the Arctic College only.

NURS 8215 Clinical Integration II

CREDIT HOURS: 3

Through clinical application (using simulation & clinical experiential learning) students will integrate nursing process, critical thinking, relational practice and evidence-informed decision making in caring for clients with acute and chronic alterations in health to achieve optimal functioning.

RESTRICTIONS: NURS 8215 is reserved for BScN students attending the Arctic College only.

NURS 8220 Health & Healing II: Pathophysiology and Therapeutics

CREDIT HOURS: 3

Integrating knowledge of disease, diagnosis and person-centred management is key to successful nursing practice. Specific disease processes related to body systems are described and mechanisms of therapeutic options for management are evaluated. Evidence to support use of pharmacological, non-pharmacological, alternative and complimentary treatments is evaluated.

RESTRICTIONS: NURS 8220 is reserved for BScN students attending the Arctic College only.

NURS 8221 Nursing Research, Epidemiology & Evidence Informed Practice

CREDIT HOURS: 3

Examines the methods used to generate, apply and evaluate knowledge in nursing and health care focusing on the basic processes of quantitative, qualitative and epidemiological research. The emphasis is on analysis, synthesis and evaluation of research and the implications for theory and evidence-informed nursing practice. Collaboration with inter-professional research teams is described.

RESTRICTIONS: NURS 8221 is reserved for BScN students attending the Arctic College only.

NURS 8222 Foundations of Clinical Nursing Practice

CREDIT HOURS: 3

Collaborating with adults across the life course who experience acute and/or chronic physical or mental illness requires a focus on preventative and curative care strategies. Utilization of evidence and application of nursing and interprofessional collaborative care and informed decision-making is examined within the context of person, family, and society.

RESTRICTIONS: NURS 8222 is reserved for BScN students attending the Arctic College only.

NURS 8225 Clinical Integration III – Medical Surgical Nursing in Acute and Chronic Settings

CREDIT HOURS: 6

Using simulation and clinical experiential learning students apply knowledge related to caring for clients with acute, episodic illnesses from birth to death. Interprofessional practice and evaluation of the impact of collaborative care will be a focus.

RESTRICTIONS: NURS 8225 is reserved for BScN students attending the Arctic College only.

NURS 8310 Professional Formation: Leadership Perspectives

CREDIT HOURS: 3

Leadership is integral to the practice of every nurse. Examining and applying leadership theories and behaviours enable effective practices to be evaluated. The nursing role in conflict resolution, crisis intervention and therapeutic communication to manage complex situations using multiple perspectives is examined.

RESTRICTIONS: NURS 8310 is reserved for BScN students attending the Arctic College only.

NURS 8311 Nursing Concepts for the Aging Adult Population

CREDIT HOURS: 3

Guided by the principles of Primary Health Care students focus on the psychosocial, cultural, cognitive, and spiritual health of adults and on nursing practices that promote health in adults at specific developmental stages. Issues of determinants of health are specifically addressed. Strategies to promote healthy aging at the individual, family, and community level are explored.

RESTRICTIONS: NURS 8311 is reserved for BScN students attending the Arctic College only.

NURS 8312 Nursing Concepts for Childbearing Families

CREDIT HOURS: 3

Focuses on the concepts of health related to childbearing families including assessment during pregnancy, birth and post-partum. Approaches to perinatal care and the role of midwifery in northern communities are explored. Theories and concepts in caring for the family as client are utilized

RESTRICTIONS: NURS 8312 is reserved for BScN students attending the Arctic College only.

NURS 8315 Clinical Integration IV

CREDIT HOURS: 3

Population health, family and perinatal theoretical concepts and evidence are utilized in a variety of practice settings. Family health assessments across various family life stages including focused fetal/newborn/child and parental care in dynamic inter-professional settings enable students to apply theory to practice.

RESTRICTIONS: NURS 8315 is reserved for BScN students attending the Arctic College only.

NURS 8320 Nursing Concepts for Children, Adolescents and Young Adults

CREDIT HOURS: 3

Principles of Primary Health Care are applied to health promotion, risk reduction, disease prevention, and common health problems experienced by infants, children, young adults, and their families in rural and remote settings. Concepts of healthy development, illness, and disability, related to the health of the child, adolescent, young adult and family unit are explored.

COREQUISITES: NURS8325.06

PREREQUISITES: NURS8110.03, NURS8222.03, NURS8225.03

FORMATS: Lecture

NURS 8321 Community and Population Health

CREDIT HOURS: 3

Students focus on integration of community, public health theory and nursing practice as it applies to primary health care within a population health context. The philosophical basis, roles, settings and functions of community health nursing will be examined and used to explore evidence-informed nursing care delivery to persons, families and populations in community settings.

CALENDAR NOTES: 3 Hour Lecture, 1 Tutorial/week

PREREQUISITES: NURS8211.03, NURS8222.03, NURS8225.03

FORMATS: Lecture | Tutorial

NURS 8325 Clinical Integration V: Children, Adolescents and Young Adults

CREDIT HOURS: 6

Students participate in the care of children, adolescents, young adults and families along a continuum from prevention to specialized care. Through project work students develop an understanding of health equity using principles of primary health care and social determinants of health to positively influence the health profiles of the pediatric population living in the North.

CALENDAR NOTES: 6CR, 220 hours Lab/Sim/Clinical Practice

COREQUISITES: NURS8320.06

PREREQUISITES: NURS8222.03, NURS8225.03

FORMATS: Lab | Experiential Learning

NURS 8335 Clinical Integration VI: Nursing Care of Clients Experiencing Episodic and Persistent Illness

CREDIT HOURS: 6

Students apply the principles of Primary Health Care through the integration and application of nursing knowledge and theory to collaborate with clients experiencing episodic and persistent alterations of health, and assist them to meet their optimal level of functioning. Students will work with clients through a continuum of care. Clinical practice will occur in a variety of settings focusing on health issues in urban settings. 220 hours Clinical Practice

PREREQUISITES: NURS8211.03, NURS8222.03, NURS8225.03

FORMATS: Experiential Learning

NURS 8410 Relational Practice and Advanced Clinical Reasoning

CREDIT HOURS: 3

Students engage in relational inquiry, clinical reasoning and multiple ways of knowing related to health and social care. Evaluation of evidence in the context of person-centred care forms the basis for reflective practice that promotes health and wellness and supports management of complex situations.

PREREQUISITES: NURS 8335

FORMATS: Lecture | Lab | Tutorial | Online Delivery

NURS 8411 Professional Formation: Nursing and Social Responsibility

CREDIT HOURS: 3

Collaborating with and across professions, theoretical frameworks are critiqued and applied to gain insight into the nursing role that influences policies and practices in health care. Evaluation of the processes that influence and support change, as well as system inertia, will assist in developing strategies to improve health for society

PREREQUISITES: NURS 8335

FORMATS: Lecture | Lab | Tutorial | Online Delivery

NURS 8415 Relational Practice and Advanced Clinical Reasoning

CREDIT HOURS: 3

Students engage in relational inquiry, clinical reasoning and multiple ways of knowing related to health and social care. Evaluation of evidence in the context of person-centred care forms the basis for reflective practice that promotes health and wellness and supports management of complex situations.

PREREQUISITES: NURS 8335

FORMATS: Lecture | Lab | Tutorial | Online Delivery

NURS 8425 Transition to Practice in the North I

CREDIT HOURS: 6

Students synthesize their nursing knowledge and refine entry-to practice competencies through integration of theory and practice in concentrated clinical mentorship programs. Through intensive engagement in application of evidence-informed and person-centered care, students are able to develop and refine skills to enhance future nursing practice that is specific to northern nursing.

PREREQUISITES: NURS 8415

FORMATS: Experiential Learning

NURS 8435 Transition to Practice in the North II

CREDIT HOURS: 6

Students consolidate nursing knowledge and entry-to-practice competencies through intensive, reflective, mentored practice. Emphasizing the professional nursing role, collaboration, interprofessional teamwork, advocacy, time management, priority-setting and leadership are key components of relational practice. Peer-to-peer mentoring and self-directed lifelong learning skill development support preparation for National Licensure examination and ongoing professional development.

PREREQUISITES: NURS 8415

FORMATS: Experiential Learning

School of Occupational Therapy

Location:

Forrest Building

5869 University Avenue

Room 215

PO BOX 15000

Halifax NS

B3H 4R2

Phone Number: (902) 494-8804

Fax Number: (902) 494-1229

Email Address: occupational.therapy@dal.ca

Website: www.occupationaltherapy.dal.ca

Introduction

Located within the Faculty of Health, the Atlantic School of Occupational Therapy was established in 1982. The regional orientation of the School fosters collaborative teaching, research and professional activities linking those at the university with service providers,

government workers, related disciplines and citizens in the four Atlantic Provinces. This regional mandate is combined with an international perspective linking Dalhousie with universities and communities for fieldwork and research. The School of Occupational Therapy offers two MSc degrees: 1) an in-person clinical degree to become an occupational therapist and 2) a fully online degree in occupational science, with coursework-only or thesis-based options.

Occupational Therapy: Occupational therapy is a regulated *health profession* concerned with promoting participation in meaningful and desired daily life occupations (e.g., caring for the self or home, engaging in leisure pursuits, working, studying). Occupational therapists work to promote justice and equity so that all persons have the opportunity and ability to engage in meaningful daily occupations. Within occupational therapy, health is viewed broadly as having the ability, opportunity and resources, for quality of life with meaningful engagement in desired activities in supportive environments.

As a regulated health profession, occupational therapists use their unique and diverse knowledge and skills to enable individuals, groups, and organizations to overcome obstacles that limit their ability to do the things they need and want to do. Obstacles addressed by occupational therapists may include illness, injury, physical or mental disability, developmental delay, social disadvantage, old age, and environmental barriers within the home, community and workplace. The focus of occupational therapy is to enhance occupational performance and engagement through enabling individual change, occupational change and/or enabling change in physical and social environments, policies or legislation. Strategies may facilitate change in skills, attitudes, routines, design of buildings, use of assistive technology, policies, etc.

The role of an occupational therapist is varied and challenging. Occupational issues are never the same because no two people or environments are ever exactly the same. The challenge for occupational therapists is to plan and implement the “just right” program or strategy for each and every client so that everyone can achieve just opportunities to participate in society.

Occupational Science: Occupational Science is an interdisciplinary field in the social, health and behavioral sciences that studies the nature and function of human occupation (the things people do in their everyday lives) as it relates to the health and well-being of individuals, communities and societies. Occupation in this field of study is viewed broadly to include everything we do to “occupy” ourselves such as enjoying life, looking after ourselves and others, and contributing to the social and economic productivity of our communities. Simply put, occupations are all the things we want, need, or have to do. Occupational Science explores what people do and why, as well as the meanings ascribed to doing, by individuals and the broader society. Not only does occupational science provide foundational research that can inform occupational therapy, the science of doing can inform and build on work in many different fields. The MSc in Occupational Science is an online graduate degree, involving a thesis or major project, that teaches students to complete research related to the science of doing, with a particular focus on critical thinking, research methodologies and social change. An MSc in Occupational Science provides a foundation for further research or work that guides change in organizational, health, accessibility, or public/social policy that can support improvements in human and social capital. Such research and work can contribute to industry, government and the private sector across multiple fields and disciplines, such as, but not limited to: policy studies, accessibility and inclusion, critical health or disability studies, disability management, mental health, occupational health and safety, occupational therapy, leisure and recreation, organizational management and planning, to name a few. Please note that although an MSc in Occupational Science would provide an excellent foundation for study in occupational therapy, this degree does NOT lead to becoming an occupational therapist, a regulated health professional.

Degrees Offered

In concert with national standards and requirements for occupational therapy education, the School of Occupational Therapy at Dalhousie University only offers graduate level degree programs. For further information on our occupational therapy degree programs, please refer to the Graduate Calendar.

We do offer undergraduate courses in Occupational Science (see courses for more information). For further information on our Occupational Therapy and Occupational Science Masters degree programs, please refer to the Graduate Calendar.”

Certificate in Disability Management

The School of Occupational Therapy offers a Certificate Program in Disability Management to students currently enrolled in an academic program at Dalhousie or another Canadian university. The Certificate Program is built around the philosophy of disability management and early assistance as the most effective means by which to assist injured and ill workers to attain their maximum level of functioning and ability to return to work. Disability Management is designed to benefit injured workers through its participatory and proactive problem-solving process incorporating strategies that ensure workers timely and safe return to work. All courses in the Certificate Program are offered completely on-line.

Please refer to the [Disability Management section](#) in this calendar for additional information.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

Note

The School does not currently offer an undergraduate degree.

We offer undergraduate courses for continuing professional development, refresher education and/or to advance one's knowledge of occupational science. Not all courses are offered each year. Please contact the School for the current course offerings and enrollment in single course.

Course Descriptions

OCCU 2000 Occupation and Daily Life

CREDIT HOURS: 3

This introductory course for students in any field of study is designed to explore the meaning of occupation in everyday life. Typically, the term "occupation" refers to categories of paid work. This course will explore a broader understanding of occupation as a framework for daily living; namely what we need to do, want to do, or have to do daily, and over time. Students will be exposed to a broad range of literature on occupation, including personal and environmental factors that influence, and are influenced by, occupation. Students will gain a deeper understanding of occupation as the foundation of everyday life through a range of perspectives and experiential activities.

RESTRICTIONS: None. This course is OPEN to non-Occupational Therapy students

FORMATS: Lecture

OCCU 2207 Occupational Development Across the Life Span

CREDIT HOURS: 3

Theories and processes that explain the complexity and dynamics of occupational development across the lifespan are introduced. The course explores typical patterns of physical, cognitive, and psychosocial development and their occupational implications, as well as contexts for occupational development including roles and environments.

PREREQUISITES: Instructor permission

OCCU 3500 Human Occupations Across the Lifespan

CREDIT HOURS: 3

Designed for students from any discipline, this course builds on basic concepts in occupational science. We explore how human development from infancy through late adulthood shapes access to participation in occupations that are the building blocks of occupational identities. Far beyond employment, "occupation" refers to those things we want to do, need to do, and have to do, in our daily lives and throughout the lifespan.

FORMATS: Lecture

OCCU 4402 Program Design and Evaluation for Enabling Occupation

CREDIT HOURS: 3

This course enables students to critically assess, plan and design an evaluation for occupational therapy programs in a variety of settings. Students will be

provided with the basic knowledge and skills of: strategic planning; program development; resource management; and program evaluation. As part of this course, students will complete a novice consulting project. This project will provide students with the opportunity to explore the provision of occupational therapy in a non-traditional setting.

PREREQUISITES: Instructor permission

OCCU 4420 Fieldwork III

CREDIT HOURS: 0

This eight week fieldwork placement introduces students to occupational therapy practice outside the Atlantic region. There are a limited number of opportunities for International options outside Canada and expanded fieldwork with an off-site occupational therapist preceptor within Atlantic Canada. Students develop competence and increased independence in integrating theoretical knowledge and skills through the full process of Occupational Therapy practice. Under supervision, students assume responsibility for a case load of approximately 40-60% of that of an entry level therapist. All expenses are the responsibility of the student including a placement fee, travel, accommodations, etc.

PREREQUISITES: Instructor permission

OCCU 4422 Fieldwork Level III (Continued)

CREDIT HOURS: 0

During this six week fieldwork experience students focus on refining professional competencies and seeking new challenges with minimum guidance from a preceptor. Students are expected to develop the capacity to carry 75% or more of the responsibilities of an entry-level occupational therapist by the completion of this fieldwork education placement.

PREREQUISITES: Instructor permission

OCCU 4500 To Do or Not to Do: Social Sanctioning of Occupations

CREDIT HOURS: 3

This course provides a forum for students from any field of study to critically examine, discuss and understand sanctioned and non-sanctioned occupations within the context of individual, community, cultural and societal influences. Students will also critically examine debates and concepts in occupational science.

History

Formal pharmacy education in the Maritime provinces began in 1908, with evening classes in pharmacy and chemistry conducted in the Nova Scotia Technical College. Success of these courses encouraged the Nova Scotia Pharmaceutical Society to establish the Nova Scotia College of Pharmacy in 1911. The College was affiliated with Dalhousie University in 1912.

The New Brunswick Pharmaceutical Society and the Prince Edward Island Pharmaceutical Association were admitted to affiliation with the College in 1917 and 1950, respectively. With the affiliation of the former society, the College was renamed the Maritime College of Pharmacy.

In 1961, the Maritime College of Pharmacy was admitted into Dalhousie University as the College of Pharmacy, a constituent part of the new Faculty of Health Professions. A four-year baccalaureate program was introduced.

In 1966, a Master's program was established, followed by a Doctor of Philosophy program in 1977.

In 1972, a twelve-month pharmacy residency program was initiated by Camp Hill Hospital in cooperation with the College of Pharmacy. Programs were initiated at the Halifax Infirmary in 1974, at the Victoria General Hospital in 1981 and at the Saint John Regional Hospital in 1982.

In the fall of 1968, the College of Pharmacy moved into the George A. Burbidge Pharmacy Building. This building, the former Medical Sciences Building was renamed in honour of the first Dean of the College, in recognition of his contribution to pharmacy education in the Maritimes. Present facilities accommodate approximately 360 undergraduate students.

College of Pharmacy Mission Statement

Mission

Enhancing health and wellness through pharmacy education, research and community service. Through our work, we support the conscientious use of medications in society.

Vision

The College of Pharmacy leads the profession's evolution. Our expertise, programs and graduates are sought after and valued.

Accreditation

The Bachelor of Science in Pharmacy program of the College of Pharmacy at Dalhousie University has been awarded Accreditation Status by the Canadian Council for Accreditation of Pharmacy Programs for a four year term ending June 30, 2024.

The Doctor of Pharmacy Program of the College of Pharmacy at Dalhousie University has been awarded Provisional Accreditation Status by the Canadian Council for Accreditation of Pharmacy Programs.

PEP Associates

Throughout the Maritime provinces pharmacist preceptors in community and hospital pharmacies participate in structured practice experience programs (PEP). The College of Pharmacy would like to acknowledge the valuable and essential contribution that preceptors make to the education process. Sincere thanks and appreciation is extended to all preceptors for the time and energy they devote to students.

The PEP is administered by the College with the support of the provincial pharmacy regulatory authorities in the Maritimes. First, second, and fourth year students demonstrate their knowledge and professional competency in practice rotations in community pharmacy, collaborative patient care, and elective sites.

College of Pharmacy Regulations

All students are required to observe the University Regulations and Academic Regulations as described in this Calendar. The academic performance of each student in the College is assessed by the Student Promotions Committee.

Academic Requirements

Workload

Students are required to successfully complete all practice experience rotations. These placements may be outside the Halifax/Dartmouth area. Students are responsible for any travel, accommodation and any other costs associated with practice experience rotations.

The curriculum is composed of problem-based learning (PBL) and other courses, which may include tutorials, lectures, labs, practice experience and other components. (See IV. Programs offered).

PharmD

To satisfy the requirements for the degree of Doctor of Pharmacy (PharmD), a student must achieve a grade of Pass in each prescribed component. Each academic year totals 48, 43, 38 or 32 credit hours, with the program total being 161 credit hours.

Students who began the program starting in Fall 2021

The curriculum is composed of problem-based learning (PBL) and other courses, which may include tutorials, lectures, labs, practice experience and other components.

Excluding practice experience courses, pharmacy courses occur in condensed blocks of learning or as longitudinal courses throughout the term and are weighted between 1 and 9 credit hours per course. The workload for each academic year is:

Class of 2024:

Year 1- 48 credit hours

Year 2- 43 credit hours

Year 3- 38 credit hours

Year 4- 32 credit hours

The program total being 161 credit hours.

Class of 2025 and onward:

Year 1- 45 credit hours

Year 2- 43 credit hours

Year 3- 41 credit hours

Year 4- 32 credit hours

The program total being 161 credit hours.

Students are required to complete practice experience placements as part of the curriculum. These placements may be outside the Halifax/Dartmouth area. Students are responsible for any travel, accommodation and any other costs associated with practice experience rotations.

Students who began the program PRIOR to Fall 2021

To satisfy the requirements for the degree of Bachelor of Science in Pharmacy, a student must achieve a grade of Pass in each prescribed component. PBL courses vary in length from three to seven weeks, and are weighted as either 1.5, 3, or 6 credit hours. Each academic year totals 27, 31.5, or 33 credit hours, with the program total being 123 credit hours.

Attendance

Students who began the program starting in Fall 2021

Attendance at the tutorials, skills laboratory and pharmacy practice experience courses is mandatory. Absence must be supported with a valid reason, such as illness, with appropriate documentation, or other reason approved by the Undergraduate Education Committee. Unapproved absences will be reported to the Student Promotions Committee and may be reason for failure.

Students who began the program PRIOR to Fall 2021

Refer to Assessment, Regulation 6.

Academic Recognition

Awards

The College of Pharmacy Awards Committee administers a number of awards, each with defined criteria. Selection of award recipients described as the “student who excels” is based on a combination of performance in knowledge assessments and in tutorials. Eligibility for in-course Scholarships is determined on the basis of knowledge assessments alone.

Students who began the program starting in Fall 2021

Dean’s List

Dean’s List Standing will be awarded **each term** to students in the top 15% of the class by term GPA, where the term GPA must be greater than or equal to 3.7, as described in Academic Regulation 23.

Distinction

Distinction will be awarded to graduating students who have achieved a cumulative GPA greater than or equal to 3.7 throughout the Doctor of Pharmacy program, as described in Academic Regulation 21.2.

Students who began the program PRIOR to Fall 2021

Dean's List

Students will be assessed for Dean's List based on their knowledge assessments and class standing in the annual "Progress Exam." No student who has obtained a failing grade (FM or F) will be eligible for the Dean's List in the year in question.

Distinction

Students who have been on the Dean's List for three of the four years of the Pharmacy Program and a cumulative GPA of 3.70 or higher will graduate with Distinction.

Assessment

Students who began the program starting in Fall 2021

To satisfy the requirements for promotion within the program and completion of the Doctor of Pharmacy degree, a student must achieve the minimum required grade in each prescribed course as described below.

Minimum Grade Required to receive credit for promotion and degree completion:

Minimum grade of C/60%

Year 1: PHAR 1040.06, PHAR 1051.06, PHAR 1052.06, PHAR 1061.03, PHAR 1062.03, PHAC 1471.03, PHAC 1472.03

Year 2: PHAR 2051.09, PHAR 2052.09, PHAR 2041.01, PHAR 2042.01, PHAR 2063.03, PHAR 2064.03

Year 3: PHAR 3041.01, PHAR 3051.09, PHAR 3052.09, PHAR 3061.03, PHAR 3062.03, Pharmacy Elective.03

Minimum grade of C+/65%

Year 1: PHAR 1073.03, PHAR 1074.03, PHAR 1075.03, PHAR 1011.02

Year 2: PHAR 2013.02, PHAR 2014.02, PHAR 2073.03, PHAR 2074.03

Year 3: PHAR 3013.02, PHAR 3014.03, PHAR 3073.03, PHAR 3074.02, PHAR 3075.03

Minimum grade of Pass-

Year 1: PHAR 1183.00, PHAR 1283.00, PHAR 1083

Year 2: PHAR 2083

Year 4: IPHE 4900, PHAR 4081.12, PHAR 4082.12, PHAR 4083.08

Other:

MICI 3115.03 – as indicated in course syllabus

All students must have passed all courses of the year in which they are registered in in order to register for and begin any courses included within the next year's courses. Also, all students must have passed any pre-requisite courses before being able to register for and begin a course.

1. Grading criteria, including mandatory requirements to earn a passing grade, will be described in the syllabus for each course.
2. With respect to all PBL courses, a student must pass both the student tutorial performance assessment and the course knowledge assessments.
3. Student performance will be assessed during and at the end of each PBL course. Assessment will be of both the learning process and the knowledge/skills achieved. Tutors will provide informal assessment of the student's learning process throughout a PBL course and a formal assessment (student tutorial performance assessment) at the completion of a course. Knowledge/skills will be assessed as described in the syllabus provided for each course.
4. A student who earns a grade in a single course below the required minimum, described in assessment section 1 above, will be required to meet with the Associate Director, Student Affairs to discuss remediation, supplemental assessment, and support. A student who fails to achieve other minimum requirements within a course, as described in the course syllabus, will be assigned the earned letter grade to a maximum of one letter grade below the required minimum passing grade.
5. The Student Promotions Committee of the College of Pharmacy is responsible for monitoring the academic progress of students and providing recommendations to College of Pharmacy Full Faculty Committee regarding promotion and graduation of students. Students who seek redress for the application of the regulations of the College of Pharmacy should refer to the appeals process described in Appeals section below.

Students who began the program PRIOR to Fall 2021

1. Grading is on a Pass/Fail basis, and grades recorded on the official University transcript are “Pass”, "Marginal Fail" or “Fail” (P, FM, F). Students must pass all components of the year in which they are registered to proceed to the next year. The passing grade for knowledge assessments is 60% unless otherwise indicated.
2. Student performance will be assessed during and at the end of each PBL course. Assessment will be of both the learning process and the knowledge/skills achieved. Tutors will provide informal assessment of the student’s learning process throughout a PBL course and a formal assessment (student tutorial performance assessment) at the completion of a course. Knowledge/skills will be assessed as described in the syllabus provided for each course.
3. To pass a PBL course, a student must pass both the student tutorial performance assessment and the course knowledge assessment.
4. A student who fails no more than one academic course will be assigned a grade of marginal failure (FM) in that course. The student must meet with the Associate Director, Student Affairs to discuss remediation and/or support. More than one failure will result in all failed course being assigned the grade of Fail (F).
5. The Student Promotions Committee of the College of Pharmacy is responsible for monitoring the academic progress of students and providing recommendations to faculty regarding promotion and graduation of students. Students who seek redress for the application of the regulations of the College of Pharmacy should refer to the appeals process described in Appeals section below.
6. Attendance at the tutorials, skills laboratory and practice experience program (PEP) is mandatory. Absence must be supported with a valid reason, such as illness with a medical certificate or other reason approved by the Undergraduate Education Committee. Other absences will be reported to the Student Promotions Committee and may be reason for failure.

Reassessment of a Grade

Students who began the program starting in Fall 2021

See [Academic Regulation 16.7](#). In all cases of reassessment, the calculations used to arrive at the final grade will be checked. In those courses where the student has had ample time to consider marks obtained for all work done, except for the final examination, reassessment in such courses shall be done on the final examination only. For other courses, a reassessment shall include the results from all work not previously available to the student during the term.

Students who began the program PRIOR to Fall 2021

See [Academic Regulation 16.7](#). In all cases of reassessment, the calculations used to arrive at the final grade will be checked. In those courses where the student has had ample time to consider marks obtained for all work done, except for the final examination, reassessment in such courses shall be done on the final examination only. For other courses, a reassessment shall include the results from all work not previously available to the student during the term.

Supplemental Assessment

Students who began the program starting in Fall 2021

1. A student who fails no more than one course is eligible for remedial work and supplemental assessment in that course. Eligibility for supplemental assessment will be determined at the end of the winter semester.
2. A student who fails one PBL student tutorial performance assessment must undertake remedial work during the following course, organized by the Associate Director, Student Affairs, in collaboration with the course coordinator. If the failure occurs in the final course of the year, remediation will occur during the summer. The student must successfully complete the remedial work and supplemental assessment to achieve a Pass.
3. A student who fails to meet the minimum required grade or mandatory requirements of a course as outlined in the syllabus will be required to complete remedial work and must pass a supplemental assessment. This work will be scheduled by the course coordinator in consultation with the Associate Director, Student Affairs and the students involved, and must be completed by June 30th of the academic year in question.
4. If a student successfully complete the remedial work and supplemental assessment, the earned grade will be reported on the transcript with a notation that the grade was earned by supplemental assessment.

Students who began the program PRIOR to Fall 2021

1. A student who receives a grade of FM is eligible for remedial work and supplemental assessment.
2. A student who fails one PBL student tutorial performance assessment must undertake remedial work during the following course, organized by the Associate Director, Student Affairs. If the failure occurs in the final course of the year, remediation will occur during the summer. The student must successfully complete the remedial work and supplemental assessment to achieve a Pass.

3. A student who fails the knowledge assessment or other requirement outlined in the syllabus of a PBL or non-PBL course will be required to do remedial work and must pass a supplemental assessment, which will be scheduled by the course coordinator in consultation with the Associate Director, Student Affairs and the students involved.
4. If a student fails one PBL or non-PBL course, the grade will be recorded as "FM" on the student's transcript. Failure to pass the remedial work and supplemental assessment will lead to conversion of the grade to "F". If the student successfully completes the remedial work and supplemental assessment, the passing grade will then be added to the transcript and recorded as "P" with a notation that the grade was earned by supplemental assessment.
5. Failure in a second course (either a PBL or non-PBL course) will negate a pass that may have been achieved by supplemental assessment in the first failed course. (See F.1.a below.)

Repeating Courses

Students who began the program starting in Fall 2021

1. Subject to eligibility, a student will be required to repeat courses if:
 - a) the student has failed any two courses or
 - b) the student has failed one course and has not successfully completed the prescribed remedial work and supplemental assessment or
 - c) the final assigned grade in the course(s) was INC or ILL.
2. A student will not be permitted to participate in Pharmacy Practice Experience Placements if:
 - a) they have a grade of INC or ILL in one or more courses in the current year or
 - b) they have failed two courses in the current year or
 - c) they have failed one course and they have not successfully completed required supplemental assessment.
3. Application to repeat courses must be made in writing to the Associate Director, Student Affairs, by July 31.
4. No student will be allowed to repeat a course more than once during the undergraduate program. All students who repeat course(s) will be assessed on performance in the repeated course(s). Courses that had not commenced prior to a leave of absence, dismissal, or withdrawal as well as courses where students have received a grade of ILL will not be considered repeat courses in application of regulations.

Students who began the program PRIOR to Fall 2021

1. Subject to eligibility, a student will be required to repeat the year if:
 - a) the student has failed any two courses (PBL or non-PBL courses) or
 - b) the student has failed one course and has not successfully completed the prescribed remedial work and supplemental assessment.
2. To be eligible to repeat a year, a student who has failed two courses must satisfactorily complete all other year requirements except the Practice Experience Program. However, a student with two failures will not be eligible to register in the Practice Experience Program.
3. Application to repeat the year must be made in writing to the Associate Director, Student Affairs by a predetermined date.
4. Any student who withdraws voluntarily, due to illness or other personal circumstances, and is allowed to repeat the year, will be considered a student in a repeat year unless the student withdraws before the last day of the first PBL course of the academic year, or the student tutorial performance assessment, if the two do not coincide.
5. No student will be allowed more than one repeat year during the undergraduate program. All students who repeat the year will be assessed on performance in the repeated year.

Leave of Absence and Withdrawal

Students who began the program starting in Fall 2021

A student who needs to take leave from the pharmacy program must apply to the Director to do so. A leave of absence must be approved in advance by the Director of the College of Pharmacy. A leave of absence will be limited to one leave period and will not normally exceed one academic year. A leave of absence will not count towards time in the Pharmacy program.

Students who wish to withdraw from the pharmacy program as asked to notify the College of Pharmacy in writing of their intent.

A student who is absent from the College of Pharmacy without prior permission for an extended period (four weeks or greater) will be presumed to have withdrawn.

Students who began the program PRIOR to Fall 2021

A student who needs to take leave from the pharmacy program must apply to the Director to do so. A leave of absence must be approved in advance by the Director of the College of Pharmacy. Normally, a student who absents himself/herself from the College of

Pharmacy without prior permission for an extended period (four weeks or greater) will be presumed to have withdrawn and will have to re-apply for admission to the College of Pharmacy. A leave of absence will be limited to one leave period and will not normally exceed one academic year. A leave of absence will not count towards time in the Pharmacy program.

Dismissal from the Study of Pharmacy

In addition to the University Regulations pertaining to dismissal (Academic Regulations 19.1.1 and 20.1.1), students in the following circumstances will be dismissed from the College of Pharmacy.

Students who began the program starting in Fall 2021

1. Any student who fails to earn the minimum passing grades in more than two courses of the curriculum in one year will be dismissed from the study of pharmacy.
2. A student who is repeating a course and does not obtain the minimum passing grade will be dismissed. The normal regulation allowing remedial work and supplemental assessment in one course will apply.
3. Students are also referred to University Regulations: Suspension or Dismissal from a Program on the Grounds of Professional Unsuitability - Faculty of Health.

Students who began the program PRIOR to Fall 2021

1. Any student who fails more than two courses (PBL or non-PBL courses) of the curriculum in one year will be dismissed from the study of pharmacy.
2. A student in a repeat year who does not meet the criteria for promotion will be dismissed. The normal regulation allowing remedial work and supplemental assessment in one course will apply.
3. Students are also referred to University Regulations: Suspension or Dismissal from a Program on the Grounds of Professional Unsuitability - Faculty of Health Professions.

Appeals

Students who began the program starting in Fall 2021

Students wishing to initiate a formal appeal should follow the appeals process described in the Student Appeals Policy for the Faculty of Health, available on the Faculty of Health website. <https://www.dal.ca/faculty/health/current-students/student-policies-and-procedures.html>

Students who began the program PRIOR to Fall 2021

Students who wish to raise questions or to register complaints in matters of academic appeal are advised to communicate informally with their instructor within 10 working days of the alleged unfairness or irregularity. If no resolution arises from this (these) meeting(s), the student may initiate a formal appeal.

Students wishing to initiate a formal appeal should follow the appeals procedures as set out by the College of Pharmacy, Undergraduate Student Appeals Committee, Faculty of Health Professions. These procedures are available online, Faculty of Health Professions website, "For current students", Student Policies and Procedures. Application for a formal appeal should be made to the College of Pharmacy Chair, Undergraduate Student Appeals Committee within 20 working days of the matter giving rise to the appeal.

Re-Admission

Students who began the program starting in Fall 2021

1. An application for readmission to the program may be considered 12 months after dismissal. A student who has been dismissed may be readmitted to the pharmacy program only once.
2. Students who have withdrawn may apply for readmission in the next academic year. A student who has withdrawn may be readmitted to the pharmacy program only once.
3. Applications for readmission must be received by the College of Pharmacy Admissions Committee no later than June 30th for the year in which readmission is sought.
4. Application for readmission will be considered for a period of 3 years after dismissal or withdrawal.
5. Conditions of readmission, if granted, may include a requirement to re-take previously completed courses.

Programs Offered

The undergraduate program has a patient-oriented curriculum integrating clinical pharmacy with the pharmaceutical sciences. The curriculum utilizes an integrated problem-based learning (PBL) format as well as a wide-variety of other learning methods.

PharmD

The College offers an entry-to-practice PharmD program beginning in September 2020. Pre-requisites include one year of general sciences and one year of biomedical sciences and other courses. The first 3 years of the program include courses in pharmaceutical sciences, social, behavioural and administrative pharmacy, therapeutics, pharmacoepidemiology, pharmacoeconomics, pharmaceutical care, communications, interprofessional relations, law and ethics, and the role of pharmacy in the health care system. Practice experiences in community and hospital pharmacy take place in the summers following first and second year. The final year, beginning immediately at the end of the third year of the program, consists of practice experience rotations in community, collaborative care and elective placement sites.

Pharmacy Residency Program

The College participates with the Nova Scotia Health Authority (Central Zone), Halifax, NS; the Horizon Health Network, Saint John and Moncton, NB; and the IWK Health Centre, Halifax, NS, in providing a Canadian Pharmacy Residency Board (CPRB) accredited twelve-month post graduate hospital pharmacy residency program.

Through structured rotations in various areas of pharmacy practice, the program aims to prepare pharmacists for exemplary pharmacy practice. Areas of rotation include patient care, drug information, drug distribution, pharmacy administration, a research project and in-service and education. The emphasis is on providing exemplary patient care. Practitioner role models/preceptors are utilized throughout the program to mentor the necessary skills, knowledge and values required to be a pharmacist for application by the resident. A stipend is provided and a certificate is presented to candidates successfully completing the program.

Undergraduate Curriculum Structure

The PBL curriculum, within the College of Pharmacy, may be scheduled past the posted exam periods. Students are responsible for all costs associated with expenses during this time (e.g. meal plan expiration, residence closure, etc.).

Problem-Based Learning (PBL) Courses

A minimal number of classes explain difficult concepts and summarize case material.

Tutorials

The principal feature of the curriculum is PBL. Students learn together in tutorial groups of eight to ten.

Each group is facilitated by a trained non (content)-expert tutor who may be faculty, sessional tutors, practitioners or graduate students.

Two-hour tutorials are held three times a week. In tutorial sessions students are presented with a situation for which they must identify their own prior knowledge and set specific learning objectives. Students use the time between tutorial sessions for self-directed learning of the objectives that they have set. Subsequent tutorials consist of discussion and application of knowledge.

Non-PBL Courses

There are some courses in each year that may be lecture based, assignment based, or case based.

Skills Laboratory

The skills laboratory focuses on practical skill development and application of knowledge acquired in the PBL curriculum and critical appraisal series. Activities required for successful completion of the practical experience program are introduced and practiced. Content includes but is not limited to: extemporaneous compounding, prescription filling and assessment, written and verbal communication skills, patient education, device training, injection training, and jurisprudence.

A cardiopulmonary resuscitation (CPR) level HCP and standard first aid course are the students' responsibility in cost.

Practice Experience Program (PEP)

PharmD

Year 1 – Practice Experience Program

Introduction to Pharmacy Practice Experience: Community (4 weeks)

PHAR 1083.04

This four-week introductory rotation is completed during the summer following first year and provides pharmacy students with an opportunity to contribute to patient care in a community pharmacy setting. Pharmacy students will build upon the knowledge, skills and abilities they have developed during the first year of the Doctor of Pharmacy program. Opportunity will be provided to help pharmacy students cultivate their patient care skills and begin to gain personal clinical experiences working with patients and other members of the healthcare team encountered in a community pharmacy. Students will begin to make health care decisions with the help and guidance of a pharmacist preceptor. The Pharmacist's Patient Care Process, pharmacy law and ethics, medication coverage in Canada, the operation of a community pharmacy, case presentations, drug information, quality assurance and interprofessional practice are key areas of this rotation.

Year 2 – Practice Experience Program

Introduction to Pharmacy Practice Experience: Hospital (4 weeks)

PHAR 2083.04

This four-week introductory rotation is completed during the summer following second year and provides students with an opportunity to actively participate in pharmacy patient care within a hospital pharmacy practice setting. Pharmacy students will build upon the knowledge, skills and abilities they have developed during the first two years of the Doctor of Pharmacy program. Opportunity will be provided to allow pharmacy students to continue to cultivate their patient care skills and gain personal clinical experiences working with patients and other members of the healthcare team within a hospital setting. Students will begin to make healthcare decisions with the help and guidance of a pharmacist preceptor. Specific units will focus on: the role of the hospital pharmacist as part of the healthcare team; understanding the patient chart; documentation of patient care; applying the Pharmacist's Patient Care Process; ordering and interpreting lab values as required for the management of drug therapy; case presentations; drug information; medication safety; and interprofessional practice.

Year 4 – Practice Experience Program

Advanced Pharmacy Practice Experience: Collaborative Health Care Setting (12 weeks)

PHAR 4081.12

This twelve-week clinical rotation focuses on the provision of patient focused pharmacy care in a collaborative healthcare practice setting e.g. hospital, long-term care, ambulatory or primary care sites. Pharmacy students will apply the knowledge, skills and abilities they have developed during the past three years of the Doctor of Pharmacy program to further refine their clinical skills in preparation to enter independent practice. Students will serve as an active member of the healthcare team incorporating professional, legal and ethical principles; identifying and resolving drug related problems; providing drug information and patient education. Using the Pharmacist's Patient Care Process learned at the College of Pharmacy students will gain clinical experience providing safe and effective, patient focused and evidence-informed care to patients with acute and chronic conditions; across the lifespan; and across all levels of care offered within the institution as well as for patients in the transitions between levels of care.

Advanced Pharmacy Practice Experience: Community Setting (12 weeks)

PHAR 4082.12

This twelve-week clinical rotation focuses on the provision of patient focused pharmacy care in a community pharmacy practice setting. Pharmacy students will complete rotations at community pharmacy practice sites offering an expanded scope of pharmacy practice. Pharmacy students will build upon the knowledge, skills and abilities they have developed during the first three years of the Doctor of Pharmacy curriculum to further refine their clinical skills in preparation to enter independent practice. Students will serve as an active member of the healthcare team and provide safe and effective care under the supervision of a pharmacist preceptor to patients presenting with chronic and acute conditions across the lifespan.

PHAR 4083.08

This eight-week advanced pharmacy practice rotation will focus on an area of pharmacy practice or research that is of personal interest to the pharmacy student. Rotations may be completed in a direct or non-direct patient care setting. Preceptors may be pharmacists, other health professionals or suitable supervisors who are committed to learning and teaching with a fourth-year pharmacy student. Students will explore and/or develop both traditional and non-traditional roles of pharmacists within either a Canadian or global health care context. Pharmacy students will contribute meaningfully and productively to the patient care and/or professional activities of the rotation site. Students will be required to design, develop and complete a project for the rotation site.

All rotation sites and preceptors are recruited by the College of Pharmacy. For each rotation, from year 1 through to year 4, students are required to travel to sites outside of the Halifax/Dartmouth area and will be responsible for any costs incurred as a result of the program.

Students should note that there are very limited PEP rotation sites outside the Maritime Provinces. All PEP rotations must be completed in Canada with the possible exception of PHAR4083.08 elective rotation course. Students must be prepared to complete all PEP rotations within the Maritimes.

Prescribed Courses – PharmD

Year 1

- PHAC 1471.03: Pharmacology for Pharmacy 1
- PHAC 1472.03: Pharmacology for Pharmacy 2
- PHAR 1011.02: Critical Appraisal Series 1
- PHAR 1040.06: Pharmaceutical Sciences
- PHAR 1051.06: Integrated PBL 1
- PHAR 1052.06: Integrated PBL 2
- PHAR 1061.03: Social Behavioural and Administrative Pharmacy 1
- PHAR 1062.03: Social Behavioural and Administrative Pharmacy 2
- PHAR 1073.03: Skills Lab 1
- PHAR 1074.03: Skills Lab 2
- PHAR 1075.03: Skills Lab 3
- PHAR 1083.04: Introductory Pharmacy Practice Experience: Community

Year 2

- MICI 3115.03 Immunology
- PHAR 2013.02: Critical Appraisal Series 2A
- PHAR 2014.02: Critical Appraisal Series 2B
- PHAR 2041.01: Special Considerations in Pharmacotherapeutics: Pregnancy, Lactation and Pediatrics
- PHAR 2042.01: Special Considerations in Pharmacotherapeutics: Substance Use Disorders
- PHAR 2051.09: Integrated PBL 3
- PHAR 2052.09: Integrated PBL 4
- PHAR 2063.03: Social, Behavioural, and Administrative Pharmacy 3
- PHAR 2064.03: Social, Behavioural, and Administrative Pharmacy 4
- PHAR 2073.03: Skills Lab 4
- PHAR 2074.03: Skills Lab 5
- PHAR 2083.04: Introductory Pharmacy Practice Experience: Hospital

Year 3

- PHAR 3013.02: Critical Appraisal Series 3A
- PHAR 3014.03: Critical Appraisal Series 3B
- PHAR 3041.01: Special Considerations in Pharmacotherapeutics: Geriatrics
- PHAR 3051.09: Integrated PBL 5
- PHAR 3052.09: Integrated PBL 6
- PHAR 3061.03: Social, Behavioural, and Administrative Pharmacy 5
- PHAR 3062.03: Social, Behavioural, and Administrative Pharmacy 6
- PHAR 3073.03: Skills Lab 6
- PHAR 3074.02: Skills Lab 7
- PHAR 3075.03: Skills Lab 8
- PHAR 3001.03, PHAR 3002.03, PHAR 3003.03, PHAR 3004.03, PHAR 3005.03: Pharmacy Elective 1, 2, 3, 4, 5

Year 4

- PHAR 4081.12: Advanced Pharmacy Practice Experience: Collaborative Health Care Setting
- PHAR 4082.12: Advanced Pharmacy Practice Experience: Community Setting
- PHAR 4083.08: Advanced Pharmacy Practice Experience: Elective

Interprofessional Health Education

Students are required to maintain enrolment in IPHE 4900 (see calendar section on Health Professions, Interprofessional Health Education) for the duration of their studies. **Please register in IPHE 4900.00 (section 5).** Successful completion of this course is a requirement for graduation, and will be recognized further with the awarding of a special Certificate in Interprofessional Collaboration to be presented by the Faculty of Health. Students are asked to consult with their individual school/college to determine the specific guidelines and expectations regarding the required portfolio.

General Information

Immunization

Students must show proof* of current immunization against tetanus, diphtheria, pertussis, polio, measles, mumps, rubella, Hepatitis B, varicella (if non-immune) and a negative two-step Mantoux (TB) test prior to admission to the College.

Evidence of a negative two-step tuberculin testing (Mantoux) is required before all hospital rotations. Students are responsible for the cost of all tests and immunizations.

*Students must complete the Faculty of Health Professions' infectious disease and immunization checklist.

Each student is required to maintain their personal immunization record, and submit a copy by a set deadline for their student file. Individual sites may require students to present immunization records prior to acceptance at a practice site. Individual clinical practice sites may have additional immunization requirements. Failure to provide this information may result in a student being denied access to a placement site.

Career Opportunities

Pharmacy is a health profession in which pharmacists provide care for their patients as one member of the health care team. This care focuses on the patient from the perspective of drug therapy. The pharmacist is responsible to identify, prevent and resolve patient drug therapy problems. Specific activities include: taking medication histories, identifying goals for drug therapy, providing recommendations and education to patients regarding self-medication, providing recommendations to other health care providers on drug therapy, in some cases prescribing drug therapy, working with patients to maximize benefits and minimize adverse effects of drug therapy, maintaining patient drug profiles, counseling patients on prescribed medication, monitoring drug interactions, adverse drug reactions and patient compliance with their drug treatment, and monitoring patient outcomes. Other activities include the provision of information on drugs to patients and other health professionals, the preparation of suitable materials for use as medicines from natural and synthetic sources, the compounding of drugs and the dispensing of suitable medication.

Pharmacy graduates have a wide range of career opportunities. The majority enter community pharmacy practice. Hospital pharmacy also provides an interesting challenge for pharmacists, particularly in view of their expanding role within the clinical setting. The pharmaceutical industry provides opportunities for pharmacists in the fields of sales and marketing, production, research and quality control.

The increased role of federal and provincial governments in public health provides opportunities for pharmacists in analytical laboratories and in administrative position as consultants, government inspectors and health officers. Opportunities may also be available in universities as teachers and researchers.

An entry-to-practice pharmacy degree is necessary for those who wish to practice as licensed pharmacists. For those who wish to enter research or teaching, a Master of Science degree or further postgraduate study is usually required.

Practice Requirements

1. License in Pharmacy

The College of Pharmacy, being purely educational, has no jurisdiction in matters related to licensing or to registration as a Pharmacist or pharmacy student. These functions are entirely under the control of the provincial regulatory authority concerned; a period of practical training or apprenticeship is required by the provincial regulatory authority before a graduate in pharmacy is licensed as a pharmacist. Information regarding licensing or registration in each province may be obtained from the respective provincial regulatory authority: New Brunswick College of Pharmacists; Prince Edward Island College of Pharmacists; Nova Scotia College of Pharmacists.

2. Pharmacy Examining Board of Canada (PEBC)

The Pharmacy Examining board of Canada was created by Federal Statute on December 21, 1963, to establish qualifications for pharmacists acceptable to participating pharmacy provincial regulatory authorities. The Board provides for annual examinations and issues a certificate to the successful candidate, which may be filed with a Canadian provincial regulatory authority in connection with

an application for license to practice pharmacy under the laws of that province. Entry-to-practice graduates from Faculties of Pharmacy accredited by the Canadian Council for Accreditation of Pharmacy Programs are eligible to write these examinations. Successful completion of these examinations is a prerequisite to licensure in Canada.

Individuals who are not graduates of an accredited Canadian Faculty of Pharmacy must first complete the PEBC Qualifying Exam.

Student Pharmacy Society

The basic aims of the Student Pharmacy Society are to promote a closer liaison with the other societies on campus, to give the pharmacy students a strong position with regard to Student Council activities, to provide a means of communications between students and their respective provincial regulatory authorities in the Maritimes, and to provide an organizational body which plans and finances the various unique Pharmacy Society activities.

Membership in the Pharmacy Society includes membership in the Canadian Association of Pharmacy Students and Interns and membership in the Canadian Pharmacists Association.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions

PHAR 1011 Critical Appraisal Series 1

CREDIT HOURS: 2

This is the introductory course to the series of critical appraisal courses completed throughout the undergraduate pharmacy program. In this course, the concepts of evidence-based practice, critical appraisal, and critical thinking are introduced as central principles to pharmacy training and practice. Students are introduced to credible primary, secondary, and tertiary drug and health information resources including specific texts, bibliographic databases, journals, and other resources. Activities, assignments, and assessments are designed to promote student abilities in the evaluation and strategic use of these resources as an integral component of patient care.

FORMATS: Lecture | Lab | Other (explain in comments)

PHAR 1040 Pharmaceutical Sciences

CREDIT HOURS: 6

This lecture-based course is comprised of three core pharmaceutical science subject areas: medicinal chemistry, pharmaceuticals and biopharmaceuticals and pharmacokinetics that will be taught concurrently. The course will provide students with a strong foundational knowledge in the core pharmaceutical sciences, which will support further integrated learning and application of pharmaceutical sciences principles as it relates to therapeutic topics and practical experience training during the remainder of the curriculum.

FORMATS: Lecture

PHAR 1051 Integrated PBL 1: Foundation, Nutrition, Eye and Ear, Integration

CREDIT HOURS: 6

Integrated PBL-1, is the introductory Problem-based (PBL) learning course and the first of 6 PBL courses in the curriculum. Students will learn to use the pharmacy specific problem-solving process and will be introduced to lab values, physical assessment and effective feedback techniques, all of which will be used throughout the other Integrated PBL courses. In the nutrition portion of the course, students will learn about nutritional needs of healthy clients and special populations. The roles, the daily requirements and sources of various vitamins, and pathological consequences of dietary deficiencies will be addressed. Special nutritional challenges in pregnancy, infancy, elderly, and grave illness will be examined. In the Eye and Ear portion, students learn the medicinal chemistry, pharmaceuticals, biopharmaceuticals and pharmacokinetics, and pharmacology, as well as the pathophysiology and pharmacotherapeutic principles pertaining to the problems and products discussed. Common problems of the eye and ear, including those of an infectious and non-infectious nature will be examined. Students will apply cumulative knowledge to a complex patient case.

PHAR 1052 Integrated PBL 2: Dermatology, Respiratory, Gastrointestinal, Integration

CREDIT HOURS: 6

Integrated PBL 2 deals with common dermatological problems seen by pharmacists and the management of these problems. Students will learn about non-infectious respiratory complaints and gastrointestinal ailments and their management. Students will learn the medicinal chemistry, pharmaceuticals, biopharmaceuticals and pharmacokinetics, and pharmacology, as well as the pathophysiology and pharmacotherapeutic principles pertaining to the problems and products discussed. Students will apply cumulative knowledge to a complex patient case.

FORMATS: Lecture | Tutorial

PHAR 1061 Social, Behavioural, and Administrative Pharmacy 1

CREDIT HOURS: 3

This course is the first course in a series that focus on the social, behavioural, and administrative responsibilities of a pharmacist. Each course will include learning about the principles of professionalism, ethics, and leadership. In this course students will learn about the Canadian Health Care System, global health and the history of pharmacy.

FORMATS: Lecture | Lab

PHAR 1062 Social, Behavioural, and Administrative Pharmacy 2

CREDIT HOURS: 3
