22. Graduation.....	128
23. Dean’s List.....	129
24. Appeals	129
25. Changes in Regulations.....	129

26. Challenge for Credit.....	130
Minors	130
Bachelor of Arts and Bachelor of Science - 90 credit hour minor	130
Minor in Abrahamic Religions	130
Minor in Actuarial Science	131
Minor in Agricultural Business Management	132
Minor in Agricultural Economics	132
Minor in American Studies	133
Minor in Ancient History.....	134
Minor in Animal Agriculture	135
Minor in Applied Ethics.....	135
Minor in Aquaculture.....	136
Minor in Arabic Studies.....	136
Minor in Biochemistry and Molecular Biology	137
Minor in Bioethics	137
Minor in Bioinformatics.....	138
Minor in Biology.....	141
Minor in Black and African Diaspora Studies	142
Minor in Business	143
Minor in Canadian Studies.....	144
Minor in Chemistry	145
Minor in Chinese Studies.....	145
Minor in Classical Literature	145
Minor in Classics	146
Minor in Classics: Ancient Philosophy.....	146
Minor in Classics: Medieval Philosophy	147
Minor in Community Design	148
Minor in Computer Science	149
Minor in Contemporary Studies.....	149
Minor in Creative Writing.....	149
Minor in Early Modern Studies	150
Minor in Earth Sciences.....	150
Minor in Economics.....	151
Minor in English	151
Minor in Entrepreneurship & Innovation.....	151
Minor in Environment, Sustainability and Society	154

Requirements for Minor in ESS:.....	154
Minor in Environmental Horticulture	154
Minor in Environmental Sciences (Agriculture).....	155
Minor in Environmental Science	155
Minor in Environmental Studies	156
Minor in Equine Science.....	161
Minor in Esoteric and Occult Traditions.....	161
Minor in European Studies	162
Minor in Film Studies	162
Minor in Food Bioscience.....	163
Minor in French	164
Minor in Gender and Women’s Studies.....	164
Minor in Geography.....	164
Minor in German.....	165
Minor in German Studies.....	166
Minor in German Philosophy.....	166
Minor in Health Studies	167
Minor in Hispanic Cultures.....	169
Minor in Hispanic Literature.....	170
Minor in History	170
Minor in History of Science and Technology	170
Minor in Indigenous Studies	170
Minor in Informatics	172
Minor in International Development Studies.....	172
Minor in Italian Studies.....	173
Minor in Journalism Studies	173
Minor in Latin American Studies.....	174
Minor in Law, Justice and Society.....	175
Minor in Management.....	176
Minor in Marine Biology	177
Minor in Mathematics.....	177
Minor in Medieval Studies.....	177
Minor in Microbiology and Immunology	179
Minor in Middle East and South Asian Studies	179
Minor in Music	180
Minor in Musicology	181

Minor in Neuroscience.....	181
Minor in Ocean Sciences	181
Minor in Philosophy	182
Minor in Physics	182
Minor in Plant Science.....	182
Minor in Political Science.....	183
Minor in Popular Culture Studies	183
Minor in Psychology.....	184
Minor in Religious Studies	185
Minor in Russian Studies	185
Minor in Security Studies	186
Minor in Sociology and Social Anthropology	188
Minor in Sociology and Social Anthropology of Critical Health Studies.....	188
Minor in Sociology and Social Anthropology of Economy, Work and Development	189
Minor in Sociology and Social Anthropology of Social Justice and Inequality	189
Minor in Spanish.....	190
Minor in Statistics	191
Minor in Theatre	191
Certificates	192
Certificate in Actuarial and Financial Mathematics.....	193
Certificate in Acute and Critical Care.....	193
Certificate in Animal Behaviour	193
Certificate in Animal Welfare.....	195
Certificate in Applied and Computational Mathematics.....	195
Certificate in Aquaculture and the Environment	196
Certificate in Aquaculture.....	197
Certificate in Art History and Visual Culture	198
Learning Outcomes:.....	198
Certificate in Artificial Intelligence and Intelligent Systems.....	200
Certificate in Biomedical Engineering.....	200
Certificate in Black and African Diaspora Studies	201
Certificate in Cardiac Ultrasound	202
Certificate in Communication Technologies and Cyber Security.....	202
Certificate in Communicating Sustainability	202
Certificate Requirements.....	203
Certificate Learning Outcomes	203

About the College of Sustainability	204
Certificate in Computing in Arts & Social Sciences.....	204
Certificate in Data Analytics.....	205
Certificate in Dance and Movement	206
Certificate in Data Science.....	206
Certificate in Disability Management	207
Certificate in Emergency Health Services Management	208
Certificate in Emergency Health Services Systems Planning.....	209
Certificate in Entrepreneurship and Innovation	210
Certificate in Environment, Sustainability and Society	210
Certificate Requirements.....	210
Certificate Learning Outcomes	211
General Degree Requirements satisfied by SUST courses	211
About the College of Sustainability	211
Certificate in Environmental Biology	211
Certificate in Environmental Impact Assessment.....	212
The Certificate requires a total of 24 credit hours as follows:	212
Table 1. Introductory Courses Checklist (minimum of 3 credit hours from following list)	212
Table 2. Theory-Based Courses Checklist (minimum of 9 credit hours from following list)	213
Certificate in Financial Accounting.....	217
Certificate in Fintech and Financial Innovation.....	218
Certificate in Food Bioscience.....	218
Certificate in Fundamentals of Interdisciplinary Management.....	219
Certificate in Genetics.....	219
Certificate in Genetics and Molecular Biology.....	221
Certificate in Geographic Information Science (GIS)	221
Certificate in Graphics, Gaming, and Media	223
Certificate in Heritage Studies	223
Certificate in Human Physiology.....	224
Certificate in Indigenous Studies	226
Certificate in Information Technology	226
Certificate in Integrated Pest Management.....	227
Certificate in Intercultural Communication	227
Certificate in International Rural Development.....	230
Certificate in Leadership.....	230
Certificate in Leading People and Organizations.....	231

Certificate in Magnetic Resonance Imaging	232
Certificate in Management Accounting	234
Certificate in Managing Data and Information	234
Certificate in Marketing Management	235
Certificate in Materials Science	235
Certificate in Medical Humanities	236
Certificate in Medicinal Chemistry	238
Certificate in Mental Health.....	238
Certificate in Neurotechnology Innovation.....	239
Certificate in Organic Agriculture	241
Certificate in Perinatal and Paediatric Nursing	241
Certificate in Public Health.....	242
Certificate in Public Sector Management	242
Certificate in Quantitative Finance	242
Certificate in Science Communication.....	243
Certificate in Science Communication and Leadership	244
Certificate in Sustainable Development.....	246
Certificate in Sustainable Soil Management	246
Certificate in Technology Education	247
Certificate in Theatre Creation.....	247
Learning Outcomes:.....	247
Certificate in User Experience Design and Evaluation.....	248
Certificate in Vascular Ultrasound.....	248
Certificate in Web and Mobile Development	249
College of Arts and Science.....	249
Introduction.....	249
General Degree Requirements	250
Major/Honours Conversion.....	253
Upgrading of BA or BSc (90 credit hour) to a BA or BSc Major (120 credit hour).....	253
Upgrading of a BA or BSc (90 or 120 credit hour) to a BA or BSc Honours (120 credit hour)	253
BA/BSc (120 credit hour) Programs	253
Major Programs	254
Double Major Programs.....	255
Honours Programs	256
College of Sustainability Degree Programs	259
Minor Programs	259

BA/BSc (90 credit hour) Programs	259
Concurrent Programs	260
Individual Programs	263
Other Degree and Diploma Programs	263
Certificates	263
Certificate in Actuarial and Financial Mathematics.....	263
Certificate in Animal Behaviour	264
Certificate in Applied and Computational Mathematics.....	265
Certificate in Aquaculture and the Environment	266
Certificate in Art History and Visual Culture	267
Learning Outcomes:.....	267
Certificate in Computing in Arts & Social Sciences.....	269
Certificate in Dance and Movement	270
Certificate in Data Analytics.....	271
Certificate in Environmental Impact Assessment	272
The Certificate requires a total of 24 credit hours as follows:	272
Table 1. Introductory Courses Checklist (minimum of 3 credit hours from following list)	272
Table 2. Theory-Based Courses Checklist (minimum of 9 credit hours from following list)	273
Certificate in Genetics.....	277
Certificate in Geographic Information Science (GIS)	279
Certificate in Heritage Studies	280
Certificate in Indigenous Studies	281
Certificate in Information Technology	282
Certificate in Intercultural Communication	282
Certificate in Materials Science	285
Certificate in Medical Humanities	286
Certificate in Medicinal Chemistry.....	288
Certificate in Neurotechnology Innovation.....	288
Certificate in Science Leadership and Communication	290
College of Sustainability	292
Staff.....	293
Deans.....	293
Director	293
Professors.....	293
Assistant Professors	293
Instructors	293

Post-Retirement Lecturer	293
Cross-Appointed Faculty	293
Academic Advisor and Program Manager	294
Manager of Outreach and Partnerships	294
Manager of Finance and Administration	294
Program Secretary	294
Finance and Administration Assistant	294
Front Desk Clerk.....	294
BA Double Major, Environment, Sustainability and Society	294
ESS Requirements	294
Allied Subject Requirements	295
General Degree Requirements satisfied by SUST courses	295
BSc Double Major, Environment, Sustainability and Society	295
ESS Requirements	295
Allied Subject Requirements	296
General Degree Requirements satisfied by SUST courses	296
BA Combined Honours, Environment, Sustainability and Society	296
ESS Requirements	296

BA Required Courses and Electives	754
Courses.....	756
Course Descriptions	756
Music - Fountain School of Performing Arts.....	758
Bachelor of Music (BMus)	760
BA (120 credit hour) Honours in Music	767
BA or BSc (Combined Honours Program)	767
BA (120 credit hour) Major in Music	768
BA or BSc (120 credit hour) Double Major.....	769
1. Music as First Subject:.....	769
2. Music as Second Subject:	769
Minor in Music	769
Minor in Musicology	770
Cooperative Degree Programs with the University of King's College.....	770
Courses.....	771
Course Descriptions	771
Philosophy.....	793
Staff.....	793
BA with Honours in Philosophy	794
BA with Combined Honours.....	795
BA (120 credit hour) Major in Philosophy	796
BA (120 credit hour) Double Major	796
BA (90 credit hour) with a Minor in Philosophy	797
Minor in Applied Ethics.....	797

Minor in Bioethics	798
Minor in Philosophy	798
Courses.....	799
Course Notes.....	799
Course Descriptions	799
Political Science.....	813
Staff.....	817
Professors Emeriti.....	818
BA (120 credit hour) Major in Political Science	818
BA (120 credit hour) Double Major in Political Science.....	818
Honours Program.....	819
Program Requirements.....	819
Required Courses and Grades	820
Honours Essay and Honours Seminar.....	820
Combined Honours	821
Combined Honours with Political Science as Primary Discipline	821
Program Requirements.....	821
Required Courses and Grades	821
Combined Honours with another department as Primary Discipline.....	822
BA (90 credit hour) Minor in Political Science	822
Courses.....	823
Course Descriptions	823
Religious Studies	845
Staff.....	846
BA (120 credit hour) Major in Religious Studies	846
BA (120 credit hour) Double Major in Religious Studies	846
BSc (120 credit hour) Double Major, Second Subject in Religious Studies.....	846
BA (120 credit hour) Combined Honours in Religious Studies.....	847
BSc (120 credit hour) Combined Honours, Second Subject in Religious Studies.....	847
BA (90 credit hour) Minor in Religious Studies.....	847
Minor in Abrahamic Religions	847
Minor in Middle East & South Asian Studies.....	848
Minor in Religious Studies	850
Courses.....	850
Course Notes.....	851
Course Descriptions	851

Russian Studies	864
Staff.....	864
BA Honours in Russian Studies.....	865
BA Combined Honours in Russian Studies	865
BA (120 credit hour) Major in Russian Studies.....	866
BA (120 credit hour) Double Major in Russian Studies	866
BA (90 credit hour) Minor in Russian Studies.....	867
Minor in Russian Studies	867
Russian Program Abroad	868
Courses.....	869
Course Descriptions	869
Sociology and Social Anthropology	878
Staff.....	879
Concentrated Honours BA Program	881
Combined Honours in Sociology or Social Anthropology and another field	882
Honours Conversion in Sociology or Social Anthropology	883
BA (120 credit hour) Major in Sociology and Social Anthropology	883
BA (120 credit hour) Double Major in Sociology and Social Anthropology	884
BA (120 credit hour) Major in Sociology and Social Anthropology Conversion.....	884
BA (90 credit hour) Minor in Sociology and Social Anthropology.....	884
1000 level.....	884
2000 level.....	884
3000/4000 level.....	884
Minor in Sociology and Social Anthropology of Critical Health Studies.....	885
Minor in Sociology and Social Anthropology of Social Justice and Inequality	885
Minor in Sociology and Social Anthropology of Economy, Work and Development	886
Courses.....	887
Course Descriptions	887
Course Descriptions	887
Spanish and Latin American Studies	907
Staff.....	909
BA (120 credit hour) Major in Spanish.....	909
BA (120 credit hour) Double Major in Spanish.....	909
BA with Honours in Spanish	910
BA with Combined Honours.....	910
BA (90 credit hour) Minor in Spanish	911

Minor in Spanish.....	911
Minor in Hispanic Cultures.....	911
Minor in Hispanic Literature.....	912
Minor in Latin American Studies.....	912
Programs and Courses Abroad.....	913
Courses.....	914
Course Descriptions.....	915
Theatre - Fountain School of Performing Arts	922
BA Honours in Theatre (Acting)	923
BA Honours in Theatre (Costume Studies)	924
BA Honours in Theatre (Stage Design and Technical Theatre).....	925
BA Honours in Theatre (Theatre Studies)	926
BA or BSc Combined Honours.....	927
BA (120 credit hour) Major in Theatre	928
BA or BSc (120 credit hour) Double Major in Theatre	929
BA (90 credit hour) Minor in Theatre.....	930
Costume Studies, Diploma in two years	930
Course Descriptions	931
Faculty of Computer Science	953
Staff.....	953
Computer Science	953
Staff.....	954
Bachelor of Applied Computer Science.....	956
Bachelor of Computer Science	958
Bachelor of Science and Bachelor of Arts with Computer Science.....	960
Minor in Computer Science for Non-Computer Science Major BSc.....	961
Certificates in Computer Science.....	961
Certificate in Artificial Intelligence and Intelligent Systems.....	962
Certificate in Communication Technologies and Cyber Security.....	962
Certificate in Data Science.....	962
Certificate in Graphics, Gaming, and Media	963
Certificate in User Experience Design and Evaluation.....	964
Certificate in Web and Mobile Development	964
Courses.....	964
Course Descriptions	965
Faculty of Engineering.....	982

Staff.....	984
Engineering (Year I & II).....	985
Academic Regulations	985
Bachelor of Engineering	987
BSc/BEng.....	988
BA/BEng.....	988
Diploma of Engineering.....	988
Engineering Co-op Program	990
Courses.....	991
Course Descriptions	992
Chemical Engineering.....	993
Staff.....	994
Civil and Resource Engineering	994
Staff.....	995
Civil Engineering	995
Environmental Engineering	998
Mineral Resource Engineering.....	1000
Courses.....	1000
Course Descriptions - Civil Engineering Series.....	1000
Course Descriptions - Environmental Engineering Series.....	1006
Course Descriptions - Mineral Resource Engineering Series	1008
Civil Engineering	1008
Staff.....	1009
Engineering Mathematics and Internetworking	1009
Staff.....	1010
Courses.....	1010
Course Descriptions	1011
Electrical and Computer Engineering	1013
Staff.....	1014
Electrical Engineering Option for Co-op students*	1015
Computer Engineering Option	1016
Co-op Program.....	1017
Non-Co-op Program.....	1017
Technical Electives	1017
ECED 4071.03: Analog Filter Design	1017
Certificate in Biomedical Engineering.....	1018

Courses.....	1018
Course Descriptions	1018
Environmental Engineering	1023
Staff.....	1024
Food Science.....	1024
Staff.....	1025
Industrial Engineering.....	1025
Staff.....	1026
Co-op Program.....	1027
Non Co-op Program.....	1028
Courses.....	1030
Course Descriptions	1030
Mechanical Engineering	1037
Introduction.....	1038
Program Guide	1038
Staff.....	1038
Co-op Program.....	1039
Non Co-op Program.....	1041
Technical Elective Courses.....	1041
Courses.....	1042
Course Descriptions	1042
Mineral Resource Engineering.....	1051
Staff.....	1052
Process Engineering and Applied Science.....	1052
Staff.....	1052
Chemical Engineering.....	1053
Courses.....	1055
Course Descriptions - Biological Engineering Series.....	1055
Course Descriptions - Chemical Engineering Series	1055
Course Descriptions - Food Science Series	1060
Faculty of Health.....	1061
Staff.....	1064
Disability Management.....	1064
Staff.....	1065
Certificate in Disability Management.....	1065
Courses.....	1066

Course Descriptions	1066
Health Administration.....	1067
Staff.....	1067
Diploma in Emergency Health Services Management (DEHSM).....	1068
Diploma in Health Services Administration (DHSA).....	1069
Certificate in Emergency Health Services Management	1070
Certificate in Emergency Health Services Systems Planning.....	1071
Courses.....	1072
Course Descriptions	1072
Health and Human Performance	1073
Staff.....	1076
Bachelor of Health Promotion	1077
Bachelor of Health Promotion with Honours.....	1079
Bachelor of Science (Kinesiology)	1079
Bachelor of Science (Kinesiology) with Honours	1081
Bachelor of Science (Recreation) - Therapeutic Recreation.....	1082
Bachelor of Science (Recreation) with Honours.....	1083
Bachelor of Science (Recreation)/Bachelor of Management.....	1084
Bachelor of Science (Recreation) with Honours/Bachelor of Management.....	1085
Bachelor of Science (Health Promotion)	1086
Bachelor of Science (Health Promotion) with Honours	1088
Certificate in Human Physiology.....	1089
Courses.....	1090
Course Descriptions - Health and Human Performance	1090
Course Descriptions - Health Promotion	1091
Course Descriptions - Kinesiology	1095
Course Descriptions - Leisure.....	1103
Courses.....	1109
Course Descriptions	1109
Health Sciences.....	1110
Staff.....	1110
Bachelor of Health Science Degree Program.....	1110
Regulations	1120
Certificate in Cardiac Ultrasound	1123
Certificate in Magnetic Resonance Imaging.....	1124
Certificate in Vascular Ultrasound.....	1126

Courses.....	1126
DMUT Diagnostic Medical Ultrasound - Course Descriptions	1126
HSCE Health Sciences Education - Course Descriptions	1130
MDLT Medical Lab Technology - Course Descriptions	1133
MRIT Magnetic Resonance Imaging Technology - Course Descriptions	1133
NUMT Nuclear Medicine Technology - Course Descriptions	1134
RADT Radiological Technology - Course Descriptions	1138
RSPT Respiratory Therapy - Course Descriptions	1141
Interprofessional Health Education.....	1146
Courses.....	1146
Course Descriptions	1146
School of Nursing	1147
Staff.....	1147
School of Nursing RegulationsStudents are required to observe the University Regulations and Academic Regulations as described in this calendar.....	1150
Degree Options (admitted Sep 2016 or later)	1151
Bachelor of Science (Nursing) Degree Program (Admitted in Sep 2016 or later).....	1152
Degree Options (admitted prior to Sep 2016).....	1154
Courses.....	1154
Course Descriptions	1154
School of Occupational Therapy.....	1163
Staff.....	1164

Certificate in Human Physiology.....	1276
Certificate in Human Physiology.....	1277
Courses.....	1278
Course Descriptions	1279

Faculty of Science.....	1282
Staff.....	1282
Certificates in Science.....	1283
Certificate in Actuarial and Financial Mathematics.....	1284
Certificate in Animal Behaviour.....	1284
Certificate in Applied and Computational Mathematics.....	1286
Certificate in Aquaculture and the Environment	1286
Certificate in Data Analytics.....	1288
Certificate in Data Science.....	1288
Certificate in Environmental Impact Assessment.....	1289
The Certificate requires a total of 24 credit hours as follows:	1290
Table 1. Introductory Courses Checklist (minimum of 3 credit hours from following list)	1290
Table 2. Theory-Based Courses Checklist (minimum of 9 credit hours from following list)	1290
Certificate in Genetics.....	1295
Certificate in Geographic Information Science (GIS)	1296
Certificate in Human Physiology.....	1298
Certificate in Information Technology	1299
Certificate in Materials Science	1299
Certificate in Medicinal Chemistry.....	1300
Certificate in Neurotechnology Innovation.....	1301
Certificate in Science Communication.....	1303
Certificate in Science Communication and Leadership	1304
Co-operative Education in Science	1305
Actuarial Science	1306
Introduction.....	1306
BSc (120 credit hour) Concentrated Honours in Actuarial Science.....	1306
BSc or BA (120 credit hour) Combined Honours in Actuarial Science and another subject	1308
BSc (120 credit hour) Major in Actuarial Science.....	1310
BSc or BA (120 credit hour) Double Major in Actuarial Science and another subject	1311
Minor in Actuarial Science	1312
Diploma in Actuarial Science	1313
Minors and Certificates for Actuarial Science Students	1313
Course Descriptions	1314
Biochemistry and Molecular Biology	1315
Staff.....	1316
BSc (120 credit hour) Concentrated Honours in Biochemistry and Molecular Biology	1317

BSc (120 credit hour) Combined Honours in Biochemistry and Molecular Biology and another subject	1318
BSc (120 credit hour) Major in Biochemistry and Molecular Biology.....	1319
BSc (120 credit hour) Double Major in Biochemistry and Molecular Biology and another subject.....	1320
BSc (90 credit hour) Minor in Biochemistry and Molecular Biology	1321
Minor in Biochemistry and Molecular Biology	1321
Co-op, Minors, Certificates and Engineering Concurrent Programs for Students	1321
Courses.....	1322
Course Descriptions	1323
Bioinformatics.....	1327
Minor in Bioinformatics.....	1328
Biology.....	1331
Introduction.....	1331
Staff.....	1332
BSc or BA (120 credit hour) Concentrated Honours in Biology	1335
BSc or BA (120 credit hour) Combined Honours in Biology and another subject.....	1336
BSc or BA (120 credit hour) Major in Biology	1337
BSc or BA (120 credit hour) Double Major in Biology and another subject.....	1338
BSc or BA (90 credit hour) Minor in Biology	1339
Minor in Biology.....	1339
Co-op, Minors, Certificates and Engineering Concurrent Programs for Students	1340
Course Selection Guidelines	1341
BIOL-Equivalent Courses.....	1342
Courses.....	1343
Course Descriptions	1344
Chemistry	1361
Staff.....	1362
BSc or BA (120 credit hour) Concentrated Honours in Chemistry	1364
BSc or BA (120 credit hour) Combined Honours in Chemistry and another subject.....	1365
BSc or BA (120 credit hour) Major in Chemistry.....	1366
BSc or BA (120 credit hour) Double Major in Chemistry and another subject.....	1367
BSc or BA (90 credit hour) Minor in Chemistry	1367
Minor in Chemistry	1367
Co-op, Minors, Certificates and Engineering Concurrent Programs for Students	1368

Important Notices

Students are advised that the matters dealt with in this Calendar are subject to continuing review and revision. The content of this calendar is subject to change without notice, other than through the regular processes of Dalhousie University, and every student accepted for registration in the University shall be deemed to have agreed to any such deletion, revision or addition whether made before or after said acceptance. Additionally, students are advised that this calendar is not an all-inclusive set of rules and regulations but represents only a portion of the rules and regulations that will govern the student's relationship with the University. Other rules and regulations are contained in additional publications that are available to the student from the Registrar's Office, and/or the relevant faculty, department or school.

Dalhousie University does not accept any responsibility for loss or damage suffered or incurred by any student as a result of suspension or termination of services, courses or courses caused by reason of strikes, lockouts, riots, weather, damage to university property or for any other cause beyond the reasonable control of Dalhousie University.

Inquiries should be directed to:

Information on programs offered by the Faculties of Dentistry, Law, and Medicine can be found in the [Dentistry, Law, Medicine Calendar](#). Information on Graduate programs can be found in the [Graduate Studies Calendar](#).

Accurate as of March 1, 2023

A Statement of the Aims of Undergraduate Education at Dalhousie

Dalhousie University offers undergraduate education enriched by a longstanding institutional commitment to research and to graduate and professional education. The University tries to assist all its undergraduate students to become independent thinkers and articulate communicators, knowledgeable about their chosen disciplines or professions, conversant with a reasonable body of general knowledge, and committed to learning throughout their lives.

Dalhousie assists its students to learn how to think for themselves. Students in all disciplines and professions can expect to develop skills and attitudes crucial for logical and independent thought. The faculty strives to teach students how to think, rather than what to think, and to enable them to make fair-minded enquiries in their fields of study and into the broader ethical, cultural and social issues that shape our lives. An educated person thinks carefully, reconsiders received ideas, and leads an examined life. The development of these habits of mind is the primary goal of undergraduate study.

Dalhousie assists its students to learn to express themselves, orally and in writing with clarity, precision and style. It does so, not only because communication skills permit the efficient transfer of information, but also because they make possible dialogues which lead to new ideas and to deeper appreciation of existing knowledge. Because a communal effort to exchange ideas and information is at the heart of university life, students in all disciplines and professions need opportunities to develop their skills in writing and in speaking at all levels of the undergraduate curriculum.

Dalhousie assists its students to master a combination of specialized and general knowledge. The specialized knowledge acquired by undergraduates at Dalhousie varies from discipline to discipline and even from student to student. Such knowledge should include, not only data skills, but also an understanding of the theories, structures and processes central to the discipline or profession in question, and an awareness of their practical applications and ethical consequences. Undergraduate students at Dalhousie should become familiar with a significant body of general knowledge as well. All should become acquainted with concepts central to our own culture and those of others. All should acquire basic quantitative skills and some knowledge of the principles of science and technology. All should share a sense of history and an appreciation of achievements in literature, philosophy and the arts. Such general knowledge helps us not only to confront the practical demands of work and life, but also to comprehend more fully our experience of the human condition.

Dalhousie assists its students to develop the capacity for commitment to learning throughout their lives. Their educational experiences within and outside the classroom should be rich and diverse. By providing social, cultural, recreational and other opportunities for student involvement and leadership, Dalhousie acknowledges responsibility for promoting both personal and intellectual growth.

Approved by Senate, September 10, 1990

****Monday, April 8, 2024 and Tuesday, April 9, 2024- Friday classes will be held**

General Information

Definitions

The following definitions are intended to facilitate an understanding of the calendar and not to define all words and phrases used in the calendar which may have specific meanings.

Academic Dismissal

A student's required withdrawal from a program due to unsatisfactory academic performance.

Academic Program

A distinct group of courses and other requirements which lead to eligibility for a degree or other university-awarded credential.

Academic Terms

- Fall term: September - December
- Winter term: January - April
- Summer term: May - August
- Regular term: September - April

Advanced Standing

Students possessing advanced knowledge of a subject will be encouraged to begin their studies in that subject at a level appropriate to their knowledge, as determined by the department/school/college concerned. However, such students must complete, at Dalhousie, the full number of credit hours required for the particular credential being sought.

Audit Student

A student permitted to attend courses but not expected to prepare assignments, write papers, tests or examinations. Credit is not given nor is a mark awarded for courses. Courses appear on the transcript with the notation "Aud". If not already admitted to the University, audit students must apply. Students may register to audit a course only after the first day of courses.

Candidate

The term candidate for a doctoral degree is used to identify a student who has fulfilled all the requirements for the PhD except for the submission and defence of the thesis; thus, a candidate will have successfully completed the residency requirement, all course work, qualifying and comprehensive examinations (as applicable), and the thesis proposal defence (if applicable). This status is equivalent to the common terms "all but the thesis" or "all but dissertation" used at some institutions. The term candidate cannot be employed with regard to a Masters degree student.

Clerkship

See Internship

Clinical Practice

See Internship

Continuing Fees

The tuition fees charged to graduate students who have fulfilled their program fee requirements but have yet to complete all their degree requirements. See [Faculty of Graduate Studies Regulations](#).

Co-operative Education

A program where academic study is combined with career related work experience.

Co-requisite

Requirement which can be fulfilled concurrently with the course being considered.

Course

A unit of study in a subject area. Such a course is identified by a course/subject label, number, credit value and title (e.g. ENGL 1100.03: Writing for University).

Credit

A unit by which University course work is measured. One course is normally worth one half credit or three credit hours.

Credit Hours

One course is normally equal to three credit hours (e.g. ENGL 1100.03: Writing for University = 3 credit hours).

CRN

Each course has a course reference number (CRN) attached to it. This number is to be used when registering for courses.

Crosslisted Courses

Courses are crosslisted based upon course content that deals with more than one subject area in a substantive way. The crosslisting recognizes the interdisciplinary nature of the course.

Email

Email is an authorized means of communication for academic and administrative purposes within Dalhousie. The University will assign all students an official email address. This address will remain in effect while the student remains registered and for one academic term following a student's last registration. This is the only email address that will be used for communication with students regarding all academic and administrative matters. Any redirection of email will be at the student's own risk. Each student is expected to check her or his official email address frequently in order to stay current with Dalhousie communications.

Exclusion

An exclusion is when one course is sufficiently similar to another course that credit will only be given once if both are taken.

Externship

See Internship.

Fieldwork

See Internship.

Full-time Students

Those registered for 18 credit hours for UG, AC, HP level; 12 credit hours for TC level or more in the Regular term OR the equivalent of nine credit hours for UG, AC, HP level; six credit hours for TC level courses or more in either the Summer, Fall or Winter term.

Good Standing

Students who meet the required GPA are considered to be in good academic standing.

Grade Point Average (GPA)

Weighted sum of the grade points earned, divided by the number of credit hours enrolled.

- Term GPA: Courses taken in a single term.
- Cumulative GPA: All courses taken while registered in a level of study.

In the case of a course that has been repeated, only the highest grade is included.

GSIS

Graduate Student Information System. The electronic database used to approve graduate student program requirements and progress.

Graduate Student

A student with a Bachelor's degree, usually with Honours or equivalent, enrolled in a Master's or Doctoral program, or a graduate diploma program.

Internship, Fieldwork, Clinical Practice, Externship, Practicum, Clerkship

These terms are used in programs to describe practical professional educational experiences that are conducted in a non-university setting such as a health or social service agency.

Letter of Permission

A Letter of Permission authorizes a Dalhousie student to take a course(s) at another institution for credit towards a Dalhousie qualification. Such permission must be obtained in advance of taking the course(s).

Level of Study

The following are levels of study:

- TC Technology Diploma - Faculty of Agriculture
- AC Architecture/Engineering (Years 3 and 4)
- HP Health
- UG Agriculture
 - Arts & Social Sciences
 - Computer Science
 - Engineering (Years 1 and 2) and Bachelor of Food Science
 - Management
 - Science

Multi-Term Course

Undergraduate Multi-Term Course: A course that spans multiple terms in an academic year. A final grade is awarded upon successful completion of the course

Graduate Multi-Term Course: A course that spans multiple terms in an academic year. A final grade is awarded upon successful completion of the course.

Graduate In-Progress Course: The grade of “In Progress” (IP) is used to identify and report on-going satisfactory progress in thesis, research projects, and courses/seminars structured to progress over a flexible number of academic terms. Students are expected to register in the course in each term that they are engaged in course-related activities. A final grade will be assigned in the academic term where course requirements are met.

Non-thesis Program

A Master’s program of study based on course work which may also include a research project. This includes many of the professional graduate programs. Some of these programs also offer a thesis option.

Part-time Students

Students registered for fewer than 18 credit hours for UG, AC, HP level; 12 credit hours for TC level OR the equivalent of nine credit hours for UG, AC, HP level; six credit hours for TC level courses in either the Summer, Fall or Winter term.

Part-time Graduate Student (Program Fee)

A part-time graduate student paying program fees is a student who has been approved by the department and the Faculty of Graduate Studies as working part-time on their graduate degree. A part-time graduate student is taking less than nine credit hours per term.

Part-time Student (Per Course Fee)

A student who is taking less than nine credit hours in a term is considered a part-time student.

Per Course Fee

The fees charged to students in a Per-Course Fee Degree. Students pay fees according to the number of courses taken in any given term.

Practicum

See Internship.

Prerequisite

A requirement that must be fulfilled prior to registering in a specific course.

Probation

Warning to students that their academic performance is unsatisfactory and that they will be dismissed from their program unless their performance improves by the end of the next term.

Program Fees

The tuition fees charged to students in a program-fee degree. The program fee is based on total tuition for a specified number of years, varying according to academic program. Students who have not completed their program after the specified number of years are required to pay a continuing fee.

Qualifying Students (Master’s only)

A full-time or part-time student with a Bachelor’s degree or its equivalent in whom a department has expressed an interest as a potential graduate student, but who is without a sufficient GPA or academic background in a particular discipline to be enrolled directly in a Master’s program.

Residency

The period of time that graduate students are expected to be on campus for fulfillment of their formal program requirements. In some programs, part of the residency period may, with permission, include some time off campus (e.g. for fieldwork or research).

Scholarship GPA

See [Awards section](#).

Special Students

Students who are not candidates for a degree or diploma but who wish to take courses which may be allowed for credit. This is not the same as auditing a course. Special students must satisfy normal admission requirements.

Special Student - Graduate Studies (SSGS)

A Student who is not registered in a graduate program but is taking graduate courses. Special students must satisfy normal admission requirements.

Supervisor

The supervisor is a member of Faculty of Graduate Studies who is directly responsible for the supervision of a graduate student's program. In this capacity, the supervisor assists the student in planning a program, ensures that the student is aware of all program requirements, degree regulations, and general regulations of the department and Faculty of Graduate Studies, provides counsel on all aspects of the program, and stays informed about the student's research activities and progress. The supervisor is also charged with ensuring that a student's research is effective, safe, productive and ethical. Specific duties of the supervisor include preparation of a program of study with the student, arrangement of and attendance at all supervisory committee meetings and candidate examinations, while ensuring that these exams are scheduled and held in accordance with Faculty of Graduate Studies and Departmental regulations, and reviewing the thesis both in draft and in final forms.

Thesis Only Fees

See Continuing Fees above.

Thesis Program

A Master's or Doctoral program of study involving a major research component in the form of a written thesis. Some programs offer a non-thesis option.

Transcript

A transcript is a complete history of a student's academic record at Dalhousie. Partial transcripts, e.g. a portion of a student's record pertaining to registration in a particular degree, faculty, or level of study, are not issued.

Transfer Student

A transfer student is one who is awarded credit towards a Dalhousie degree for academic work completed at a previous university or equivalent institution of higher learning.

Undergraduates

Students who are candidates for an undergraduate degree or diploma.

Visiting Student

A person permitted to take courses at Dalhousie for transfer of credit to another university.

Visiting Student Graduate Studies (VSGS)

- a. A person permitted to take courses at Dalhousie for transfer of credit to another university (Letter of Permission required).
- b. A person permitted to work with a Dalhousie researcher for thesis work at another university (Research).

Work Term

Career related work experience required in Co-operative Education programs. Work terms are usually 13-16 weeks in duration.

Writing Intensive

Writing Intensive courses are those which emphasize the process of writing, frequency of writing assignments, and weighting of those assignments in the course grades. A Writing Intensive course is normally taken as a sequel to a Writing Requirement course, but does not satisfy the Writing Requirement.

Course Codes

Numbers

0010-0099 pre university preparation courses

0100-0300 technology level courses

1000 level courses are introductory

2000-4000 level courses are advanced

5000-9000 level are Graduate level (with some exceptions)

Credit Hours—examples only

.06 credit hours = 6 credit hours = 1 full credit UG, AC, HP level

.03 credit hours = 3 credit hours = ½ credit UG, AC, HP level

.02 credit hours = 2 credit hours = ½ credit TC level

Subject Codes

Four letter codes are used to describe the subject area of a particular course. The following list of codes reflects subject areas courses are currently offered in:

ACAD - Academic
ACSC - Actuarial Science
AGRI - Agriculture
AGRN - Agronomy
ANAT - Anatomy & Neurobiology
ANSC - Animal Science
APSC - Applied Science
AQUA - Aquaculture
ARBC - Arabic
ARCH - Architecture
ARTC - Applied Health Services Research
ARTS - Art
ASSC - Arts and Social Sciences Interdisciplinary
BIOA - Biology (Faculty of Agriculture)
BIOC - Biochemistry and Molecular Biology
BIOE - Biological Engineering
BIOL - Biology
BIOT - Bioethics
BMNG - Biomedical Engineering
BUSI - Business Administration
BVSC - Bioveterinary Science
CANA - Canadian Studies
CH&E - Community Health & Epidemiology
CHEE - Chemical Engineering
CHEM - Chemistry
CHIN - Chinese
CHMA - Chemistry (Faculty of Agriculture)
CIVL - Civil Engineering
CLAS - Classics
CMMT - Communications
CNLT - Centre for Learning and Teaching
COMM - Commerce
CPST - Complimentary Studies
CRWR - Creative Writing
CSCA - Computer Science (Faculty of Agriculture)
CSCI - Computer Science
CTMP - Contemporary Studies
DEHY - Dental Hygiene
DENQ - Dentistry Qualifying
DENT - Dentistry
DISM - Disability Management
DMUT - Diagnostic Medical Ultrasound Technology
ECED - Electrical and Computer Engineering
ECMM - Electronic Commerce
EOCA - Economics (Faculty of Agriculture)
ECON - Economics
EGLA - English (Faculty of Agriculture)
EMSP - Early Modern Studies
ENGI - Engineering
ENGL - English
ENGM - Engineering Mathematics
ENGN - Engineering (Faculty of Agriculture)
ENSL - English Language (Continuing Education)

ENVA - Environmental Sciences (Faculty of Agriculture)
ENVE - Environmental Engineering
ENVI - Environmental Studies
ENVS - Environmental Science
ERTH - Earth Sciences
EURO - European Studies
EXTE - Extension Education
FIGA - First Year Interest Groups - Arts and Social Sciences
FIGS - First Year Interest Groups - Science
FILM - Film Studies
FOOD - Food Science (Faculty of Agriculture)
FOSC - Food Science
FREN - French
FRNA - French (Faculty of Agriculture)
GELA - Geology
GEOA - Geography (Faculty of Agriculture)
GEOG - Geography
GENE - Genetics
GERM - German
GWST - Gender and Women's Studies
HAHP - Health and Human Performance
HESA - Health Administration
HINF - Health Informatics
HISA - History (Faculty of Agriculture)
HIST - History
HLTH - Health Professions
HORT - Horticulture
HPRO - Health Promotion
HSCE - Health Sciences Education
HSTC - History of Science and Technology
HUCD - Human Communication Disorders
IAGR - International Development (Faculty of Agriculture)
IDHS - Interdisciplinary Health Studies
INDG - Indigenous Studies
IENG - Industrial Engineering
INFB - International Food Business
INFO - Information Management
INFX - Informatics
INTA - Internship (Faculty of Agriculture)
INTD - International Development Studies
INTE - Interdisciplinary Studies (Graduate)
INWK - Engineering Internetworking
IPHE - Interprofessional Health Education
ITAL - Italian
JOUR - Journalism
KINE - Kinesiology
KING - King's Foundation Year Programme
LARC - Landscape Architecture
LAWS - Law
LEIS - Leisure Studies
LJSO - Law, Justice and Society
MARA - Marine Affairs
MARI - Marine Biology
MATH - Mathematics
MATL - Materials Engineering
MCRA - Microbiology (Faculty of Agriculture)
MDLT - Medical Lab Technology
MECH - Mechanical Engineering
MEDI - Medicine
MEDP - Medical Physics
MEDR - Medical Research

MEDS - Medical Sciences
MGMT - Management
MGTA - Management (Faculty of Agriculture)
MICI - Microbiology & Immunology
MINE - Mineral Resource Engineering
MRIT - Magnetic Resonance Imaging Technology
MTHA - Mathematics (Faculty of Agriculture)
MUSC - Music
NESC - Neuroscience
NUMT - Nuclear Medicine Technology
NURS - Nursing
NUTR - Nutrition
OCCU - Occupational Therapy
OCEA - Oceanography
ORAL - Oral & Maxillofacial Surgery
PATH - Pathology
PEAS - Process Engineering and Applied Science
PERF - Performance Studies
PERI - Periodontics
PETR - Petroleum Engineering
PGMD - Post-Graduate Medicine
PGPH - Post-Graduate Pharmacy
PHAC - Pharmacology
PHAR - Pharmacy
PHDP - PHD Program
PHIL - Philosophy
PHLA - Philosophy (Faculty of Agriculture)
PHYC - Physics and Atmospheric Science
PHYL - Physiology
PHYS - Physics (Faculty of Agriculture)
PHYT - Physiotherapy
PLAN - Planning
PLSC - Plant Science
POLI - Political Science
POLS - Political Science (Faculty of Agriculture)
PROS - Prosthodontics
PSYC - Psychology (Faculty of Agriculture)
PSYO - Psychology
PSYR - Psychiatry
PUAD - Public Administration
RADT - Radiological Technology
REGN - Registration Course - Graduate
RELS - Religious Studies
RESM - Research Methods/Project Seminars
RSPT - Respiratory Therapy
RURS - Rural Studies
RUSN - Russian Studies
SCIE - Science
SLWK - Social Work
SOCI - Sociology (Faculty of Agriculture)
SOIL - Soils
SOSA - Sociology and Social Anthropology
SPAN - Spanish and Latin American Studies
SPEC - Special Topics
SPNA - Spanish (Faculty of Agriculture)
STAA - Statistics (Faculty of Agriculture)
STAT - Statistics
SUST - Sustainability
THEA - Theatre
TYPR - Transition Year Program
VISC - Vision Science

Dalhousie University

Dalhousie University blends the finest academic traditions with innovative thinking and outstanding educational opportunities. Located on Canada's east coast - an area long known for its natural beauty and friendly people - Dalhousie is a warm and welcoming university that attracts students from around the globe.

Dalhousie has been at the heart of Halifax, Nova Scotia - a lively coastal city - for almost 200 years. The university features both a historic, tree-lined urban campus and a rural agricultural campus, located about an hour from the city in Truro/Bible Hill. Dalhousie combines a welcoming atmosphere with the international prestige of a big-name school. With 13 faculties and more than 4,000 classes in over 180 areas of study, the university offers its more than 19,000 students a wealth of choice and innovative degree programs.

Dalhousie encourages student learning through exchange programs, fieldwork, community service and cooperative education. Its collaborative learning environment encourages students to interact with one another and with faculty experts to share ideas and offer new perspectives. A member of the U15, Canada's elite research-intensive universities, Dalhousie features the culture of a more intimate undergraduate college with the opportunities of a larger research institution.

This collaborative spirit also extends off campus. Dalhousie conducts research in partnership with teaching hospitals, professional organizations, businesses and industry, non-profit agencies and other universities. As Atlantic Canada's leading research university, Dalhousie attracts more than \$150 million in external research funding annually. The university serves as the regional hub for health research, has significant expertise in clean technology, and is a world leader in ocean initiatives.

Atlantic Canada's only Faculty of Agriculture, offering programs in areas such as international food business, pre-veterinary medicine and plant sciences, is located at Dalhousie's Agricultural Campus.

The University of King's College, situated adjacent to the Dalhousie campus, is an affiliated institution, and its students in arts and science receive Dalhousie degrees in the name of both institutions.

Dalhousie University is a member of the Association of Universities and Colleges of Canada, the Association of Atlantic Universities and the Association of Commonwealth Universities.

Executive Officers

President and Vice-Chancellor (Acting)

Frank Harvey, BA, MA, PhD

Provost and Vice-President, Academic (Acting)

Kim Brooks, BA, LLB, LLM

Vice-President, Advancement (Acting)

Sheila Blair-Reid, BComm

Vice-President, Finance and Administration

Gitta Kulczycki, CPA, CA, MBA

Vice-President, Government and Global Relations

Matt Hebb, BA, MA

Vice-President, Research and Innovation

Board of Governors

The Board of Governors of Dalhousie University is responsible for the overall conduct, management, administration and control of the property, revenue, business and affairs of the university. The basic responsibility of the board is to represent the interests of the university in directing its affairs and to do so within the statutes relating to Dalhousie University. The Board consists of representatives named by the Government of Nova Scotia, Senate, the alumni, and students.

Chancellor

Scott Brison

Chancellor Emeriti

Rueben Cohen

David Westwood, PhD

President, Dalhousie Faculty Association

University Secretary

John Hope, BA, LLB

Director, Internal Audit Services

Donna Birmingham, BA

Senate

The Senate is the University's senior academic decision-making body. It is responsible for the approval of new programs and academic units and it manages the reviews of Faculties, Centres and Institutes. Senate approves the granting of degrees and diplomas, including the conferral of Honorary Degrees. It is responsible for setting academic regulations which affect the University as a whole, including regulations governing student conduct and discipline, as well as regulations concerning faculty tenure and promotion.

Senate has 96 members - 3 Executive Officers; namely, Chair of Senate, Vice-Chair (Academic Programs) and Vice-Chair (Student Affairs), 62 elected Faculty representatives, 19 academic administrators (President, Provost and Vice-President Academic, Vice-President, Research, University Librarian, and the Deans of each Faculty), 11 students elected by the Dalhousie Student Union (one of whom shall be a graduate student and one who should represent the Agricultural Campus), and a representative from the University of King's College.

Senate normally meets on the second Monday of each month from 3:00 - 5:00 pm. In addition, if there are sufficient items of business, Senate will meet on the fourth Monday of the month, from 3:00 - 5:00pm

Chair of Senate

Louise Spiteri, PhD

Vice-Chair (Academic Programs)

Jamie Blustein

Vice-Chair (Student Affairs)

Maria Pacurar, PhD

Secretary of Senate

John Hope, BA, LLB

Admission Requirements

Equity Ethos Statement

The development of this statement contributes to Dalhousie's strategic vision as a civic university and as a foundation for inclusion and distinction.

Equity, diversity, inclusion, and accessibility are necessary conditions for inclusive excellence, which includes our intentional efforts to attract and support a diverse mix of exceptional learners. Dalhousie University pledges to identify and eliminate barriers within university policies, regulations, procedures, and practices related to the recruitment, admission, retention, and success of historically and currently equity-denied learners. These learners may reflect one or more of the following identities:

- Mi'kmaq, Wolastoqiyik, Peskotomuhkati, and other Indigenous peoples
- African Nova Scotian* and other Black and African peoples
- [Racialized persons](#)
- Persons with (dis)abilities – visible and invisible
- Persons identifying as members of 2SLGBTQ+ communities
- Persons whose gender is under-represented within a particular academic discipline
- Former youth-in-care, and those who continue to experience the long-term effects of adverse childhood events
- Asylum-seekers, refugees, and other learners who have been forcibly displaced due to persecution, violence, conflict, human rights violations; political instability, weak governance, and state repression; or natural hazards, disasters, and man-made environmental crises
- Persons who traditionally have not had opportunity or access for post-secondary education because of economic, social, and cultural reasons; lack of formal education; or residence in non-urban areas

**African Nova Scotians /Indigenous Blacks are a distinct people who descend from free and enslaved Black planters, Black loyalists, Black refugees, Maroons, and other Black people who inhabited the original 52 land-based Black communities in Mi'kma'ki.*

Applicants are encouraged to self-identify upon application for admission to Dalhousie to receive information about academic programming, including unique pathways and access options and any designated scholarships and bursaries. Those who self-identify will be considered on an individual basis, and additional information may be required from the applicant by the applicable faculty,

school, or unit. Where possible, several factors indicative of academic and personal readiness to succeed at Dalhousie will be considered. The academic and institutional culture will be enhanced by the value equity-denied students bring to Dalhousie.

The above ethos statement is meant to reinforce or bolster existing equity-related statements or regulations at the faculty/department level or serve as a reference point in instances where there is no such statement or regulation.

Regulations in all Academic Calendars fall under the jurisdiction of the University Senate as per Dalhousie's constitution.

A non-refundable deposit of \$200 (applicable to tuition fees) is required as indicated in your admission letter.

Dalhousie University reserves the right to rescind any acceptance of an applicant into a program or to rescind an offer of admission of an applicant into a program. Please refer to [University Regulations](#).

PLEASE NOTE: Admission to many programs is limited. Possession of minimum requirements does not guarantee admission.

General Admission Requirements

Applicants must meet the admission requirements as outlined in the appropriate section of this calendar.

Place of Residence

For the purpose of admission to the University, the place of residence of a student is the place of domicile. This is normally presumed to be the place (country, province, etc.) where the parents or guardian's home is located. That place remains unchanged unless the Registrar is satisfied that a place of residence is established elsewhere.

Age Requirement

No person under 16 years of age is admitted to any course except on the specific recommendation of the admissions committee of the relevant Faculty or School, which shall take into account all aspects of the applicant's preparedness for the course or program involved, and which may attach such conditions to the applicant's admission as the committee judges appropriate.

Students from Canadian High Schools

For general admission to most programs, students require grade 12 level university preparatory English and four additional university preparatory courses. Special attention will be paid to grades in English and mathematics. Final grades in mathematics (if required for the program) and English must be at least 65%. Students are expected to have an overall minimum average of 70%. Final grades in individual university preparatory courses other than mathematics and English must be at least 60%.

Any special or pilot course must have been previously approved by Dalhousie if it is to be used as one of the credits needed for admission.

Students from a Community College, College of Applied Arts and Technology (CAAT) or a CEGEP

Applicants who have completed studies in a Community College, College of Applied Arts and Technology (CAAT) or a CEGEP program, may qualify for transfer credits. Applications are considered on an individual basis.

Acceptable High School Courses for Admission

- English
- Biology, Chemistry, French, Geography (or Global Geography), German, History (or Global History), Latin, Mathematics, Physics, Calculus, Comparative Religion, Computer Related Studies, Economics, Environmental Studies, Gaelic, Geology, Journalism, Law, Music, Political Science, Sociology, Spanish, Theatre, Drama and other courses provincially coded as academic or advanced.

For Students from Quebec

Students attending high schools offering Grade 12 must meet the distribution and average requirements outlined for students from the Atlantic provinces, or first year CEGEP with minimum 70% overall average, with no individual academic subject below 65%.

PLEASE NOTE: Fulfillment of admission requirements does not necessarily provide the prerequisite background for all first year courses. Please consult the course description section of this calendar.

Students from Outside Canada

American High School Curriculum Students studying in an American-based curriculum (in the United States, or abroad), are required to present a Grade 12 high school average of “C” or better. In addition, students must present a minimum SAT score of 1100 or an ACT composite score of 23 or better with no individual score of less than 20.

British Curriculum (GCE and GCSE) Students studying in a British-patterned curriculum (GCE) are required to present the General Certificate of Education with at least five subjects. These must include at least two Advanced Level courses (A-levels), or four AS-level courses, with grades of at least “C”. Exceptional candidates may be admitted on O-level results.

Advanced Placement (AP), Baccalauréat (French Baccalauréat), A-level (GCE) and International Baccalaureate (IB) courses are accepted towards meeting admission requirements. Please refer to the General Admission Requirements section of the Calendar for specific admission requirements. Courses may be eligible for transfer credits. Please refer to section 12.

Admission Requirements by Country For most countries, we consider the same academic preparation that is required for university entrance in that country - that is, successful graduation from an academic secondary school program or equivalent. View our Admission Requirements by Country chart at www.dal.ca/admissions/international_students/admissions/requirements-by-country.html for more information.

English Language Proficiency Requirements

English is the language of study at Dalhousie; therefore all applicants whose first language is not English must provide proof of English proficiency. This requirement can be satisfied with one of the following criteria:

- Test of English as a Foreign Language (TOEFL)
 - TOEFL (computer based) - 237 with no band below 21
 - TOEFL (paper based) - 580 with no band below 55
 - TOEFL (iBT) - 90 with no band below 20
- Students must achieve 4.0 or better on the essay or TOEFL Writing Test
- International English Language Testing System (IELTS) - 6.5 with no band below 6.0
- Michigan English Language Assessment Battery (MELAB) - 81
- Canadian Academic English Language Assessment (CAEL) - 70
- Pearson Test of English Academic (PTE Academic) - 61 with no band below 50
- Cambridge English Proficiency (CPE) and Cambridge English Advanced (CAE) - 180 with no band below 170
- IB Higher Level English class A1, A2 with a minimum grade of 5 or English B with a minimum grade of 6
- AP English Examination (Language Composition; Literature and Composition) with a minimum grade of 4
- O-Level GCSE or IGCSE English Language or English Literature course with a minimum grade of B
- CanTest of English for Scholars and Trainees (CanTest) - 4.5
- Student has graduated from a Dalhousie-recognized school which uses English as the primary language of instruction and the student has spent three successful years in the English program
- Student has studied full-time for at least three years (or equivalent in part-time studies) in a secondary school where the language of instruction and examination was English
- Student has studied full-time for at least one year in a recognized university where the language of instruction and examination was English and the course curricula require proficiency in English

The following Web links will provide more information on English Language proficiency tests:

TOEFL - www.ets.org/toefl/

IELTS - www.ielts.org

MELAB - www.cambridgemichigan.org

CAEL - www.cael.ca/

CPE/CAP - www.cambridgeenglish.org

Arrange to have your English Language proficiency test score(s) sent directly by the testing agency to Dalhousie at the following address:

Dalhousie University
Registrar's Office
PO Box 15000
Halifax, NS B3H4R2
Canada
Dalhousie University TOEFL Code: 0915

Language Training

Students who meet the academic admission requirements whose English proficiency minimum test scores are TOEFL PBT 550, CBT 213, or iBT 79 or IELTS 6.0 or MELAB 76 or CanTest 4.0 or CAEL 60 may be offered part-time Dalhousie admission with the co-requisite of completing a full-time approved English training program.

Students with Learning Disabilities

Dalhousie University is committed to providing equal educational opportunities and full participation for students with learning disabilities.

Students with diagnosed learning disabilities who meet the admission requirements for Dalhousie University may follow the current admission procedures. All newly admitted Dalhousie students will receive information about accessibility services, should they require accommodations or special assistance due to a learning disability or any other disability. Students will also have access to contact information for accessibility services so that they can contact an advisor to ascertain the degree to which their needs can be met.

Students with diagnosed learning disabilities who do not meet the current admission requirements or who otherwise wish to have their learning disability considered may apply for special consideration as may all other students who have extenuating circumstances. These requests will be made to the appropriate admissions committee, acting in consultation with the Advisor to Students with Disabilities and other knowledgeable professionals.

The following documentation must be submitted by students who wish to apply for special consideration:

1. Letter(s) of recommendation from the individual(s) most familiar with the applicant's academic performance and/or potential for success at university;
2. A written, oral or electronic statement from the student. In this brief personal statement, students should describe their learning disability, how this affected their grades and the type of assistance they would require while at Dalhousie University;
3. A current (within three years) psychological assessment based on standard diagnostic instruments administered by a registered psychologist documenting the presence of learning disabilities. If a current report is not possible, Dalhousie University may accept an earlier report along with a current opinion (ie. within the past year) expressed in a letter by a registered psychologist (or individual supervised by a registered psychologist) that the student has a learning disability. This letter should specify the nature, extent and rationale for program modifications or accommodations that were deemed appropriate in the student's last two years of schooling.

Mature Students

Applicants who are Canadian Citizens or permanent residents and 21 years of age or older, by the first day of courses, and are not eligible for admission on the basis of regular admission requirements, may apply for admission to some programs as a mature applicant. In order to be eligible, the applicant must either have no university-level study, or have attempted less than one year of transferable coursework. The student cannot have been in full-time university-level study for a minimum period of two years.

Applicants must provide a completed application for admission, high school or post-secondary transcripts, any other relevant documents (e.g. SAT scores, if available), and a letter outlining life and work experience since last attending full-time study. Applicants will be expected to clearly outline their education goals and motivation to succeed at university study. All factors will be considered in the admission decision.

Admission under this policy is restricted to first year of undergraduate programs. Applicants must have completed grade 12 English (or equivalent) with a minimum grade of 65%. Admission to some programs will require completion of other required subjects.

A student admitted on this basis may be restricted in the number of courses he/she can register in during the first year. Otherwise, these students have the same rights, privileges and responsibilities as other students within their program.

Transfer Students

Students wishing to apply for transfer credit should consult [Academic Regulation 7](#), in this calendar. Certified copies of course descriptions from calendars are acceptable in lieu of originals. Certificates in languages other than English or French must be accompanied by certified translations into English. Students applying with one year or less of university work must also submit high school transcripts.

The minimum GPA for admission as a transfer student may vary by program of study. Please contact the Registrar's Office for more information.

Note: Transfer credit will not be awarded for work completed while a student was academically ineligible.

International Baccalaureate (IB), Advanced Placement (AP), Baccalaureat (French Baccalaureat), A-Level (GCE) Courses

Students taking any of these courses, may qualify for advanced placement or transfer credits.

Transfer credits will be awarded based on equivalent Dalhousie courses. Credit may be awarded to students with Higher level IB courses with final grades of 5, 6 or 7 or a TOK score of C or higher. Credits may be awarded for AP national exam results of 4 or 5. For students with a Baccalauréat exam result of 11 or higher on courses with a minimum coefficient of 4, transfer credits may be awarded. Those who have completed A-Level courses with a final grade of C or higher may receive transfer credit.

Students may opt to forgo transfer credit awarded for these programs. To do so, applicants must contact the Registrar's Office (902) 494-2450.

Lists of equivalent Dalhousie credits that have been previously determined can be found on the Registrar's Office website (<http://www.dal.ca/transferecredits>). Transfer credits are evaluated on an individual basis and will vary depending on each student's personal academic program.

International and Exchange students attending Dalhousie as Visiting Students

International students must meet the following requirements:

- Good academic standing at the home institution
- Written academic approval from the appropriate department head, Dean or designate (e.g. Registrar) to undertake coursework at Dalhousie (written approval is usually in the form of a *letter of permission*)
- The required student visa to study in Canada
- Proof of adequate health insurance for the duration of the stay in Canada
- Proof of proficiency in English

PLEASE NOTE: Students studying for less than one full academic year are restricted from taking full-year courses (see Course Codes and Definitions).

Rescission of Acceptance into a Program

Dalhousie University reserves the right to rescind any acceptance of an applicant into a program or to rescind an offer of admission of an applicant into a program. Such rescission shall be in writing and may be made by the President or the Provost and Vice-President, Academic, in consultation with the appropriate Dean, at any time prior to the applicant's registration being confirmed by the Registrar. Any such rescission shall be reported to the Senate in camera.

Canadian and Local Students attending Dalhousie as Visiting Students

All students wishing to attend Dalhousie University on a letter of permission from their home university must submit the following:

- A completed application for admission
- Letter of permission from the home university
- Students applying from Saint Mary's, Mount Saint Vincent, and NSCAD University are not required to pay the application fee, all other applicants are required to pay the application fee.

At the end of each academic session, grades will be forwarded to Saint Mary's, Mount Saint Vincent, and NSCAD University on the student's behalf. Students from all other universities must arrange for transcripts to be sent to the home university.

¹ Late applications may be considered but we cannot guarantee space in programs.

² Information on these programs is included in the appropriate calendar.

³ For students returning to the same undergraduate programs, or attending as Special Students in any faculty.

NOTE: In order to be considered for entrance awards, applications for admission from high school students must be received by March 1 for most programs.

Faculty of Agriculture

Pre University Study

The Faculty of Agriculture offers non-credit introductory studies courses in Math, Chemistry and Physics. Applicants who do not meet the stated admission requirements in Math or Science may still be admitted to a degree program in the Faculty of Agriculture on the condition that they complete the relevant non-credit introductory studies course(s) in their first year prior to entering the degree level required subject.

Bachelor of Science (Agriculture) & Pre-Veterinary Studies

- English 12
- Pre Calculus Math 12
- Three other acceptable university-preparatory courses at the grade 12 level
- Minimum final grades:
 - English 65%
 - Pre Calculus Math 65%
 - Other Subjects 60%
 - Overall Average 75%

It is recommended that applicants also take Biology 12, and where available at the high school level, courses in Agriculture or Food Science.

Bachelor of Science (Bioveterinary Science)

- English 12
- Pre Calculus Math 12
- Three other acceptable university-preparatory course at the grade 12 level
- Minimum final grades:
 - English 65%
 - Pre Calculus Math 65%
 - Other Subjects 60%
 - Overall Average 75%

Bachelor of Agriculture - International Food Business

- English 12
- Academic Math 12
- Three other acceptable university-preparatory courses at the grade 12 level
- Overall average of 75%

Bachelor of Technology - Environmental Landscape Horticulture

Years one and two of the Bachelor of Technology - Environmental Landscape Horticulture program are satisfied by completion of the Diploma in Technology Managed Landscapes or a landscape-related program approved by the Department of Environmental Sciences in the Faculty of Agriculture. Applicants must have a cumulative GPA of at least 2.0 in the Diploma program to gain admission.

Bachelor of Technology - Landscape Architecture

- English 12
- Academic Math 12
- Biology 11
- Three other acceptable university-preparatory courses at the grade 12 level

- Overall average of 70%

Bachelor of Technology - Small Business Management

- Completion of a two-year technology/technical diploma from a recognized community college or university with a minimum cumulative average of 70%

Diploma in Engineering

- English 12
- Pre Calculus Math 12
- Chemistry 12
- Physics 12
- One other acceptable university-preparatory course at the grade 12 level
- Minimum final grades:
 - English, Chemistry, Pre Calculus Math, Physics - 65%
 - Other subjects - 60%
 - Overall average - 70%

Diploma in Technology Business Management

- English 12
- Math 11
- Chemistry 11 or Biology 11 or Agriculture 11
- Science 10
- Four grade 12 level courses at the university-preparatory or general level
- Minimum overall final average of 60%

Applicants to the Equine concentration (*admissions currently suspended*) are expected to be experienced in the care and handling of horses. A Competency Form outlining practical experience and knowledge in the industry is required. This form can be found online at www.dal.ca/applynow

Diploma in Technology Managed Landscapes

- English 12
- Math 12
- Biology 12
- Chemistry 11
- One other acceptable university-preparatory course at the grade 12 level
- Minimum overall final average of 60%

Diploma in Technology Plant Science

- English 12
- Math 11
- Chemistry 11
- Science 10 or Biology 10
- Four grade 12 level courses at the university-preparatory or general level
- Minimum overall final average of 60%

Diploma in Technology Veterinary Technology

- English 12
- Pre-Calculus Math 12 or Academic Math 12 with a 70% or higher
- Chemistry 12
- Biology 12
- One other acceptable university-preparatory course at the grade 12 level

- Minimum overall final average of 60%

Students who are admitted to the Veterinary Technology program must provide proof of vaccination against rabies and tetanus to Dalhousie University **prior** to the start of their program. Students will not be permitted to begin the Veterinary Technology program without proof of these vaccinations.

Faculty of Architecture and Planning

School of Architecture

Bachelor of Environmental Design Studies (BEDS)

Admission Criteria

The Admissions Committee gives priority to applicants with a combination of academic performance and creative ability. Well-rounded personal and academic experience is beneficial, as well as experience in drawing, craft, and computer applications.

Minimum Academic Requirements

The minimum requirements for admission are:

- a portfolio of design work that demonstrates creativity and/or artistic skill;
- two years in a university degree program (10 full-year courses, 20 half-year courses, or a combination), with a 2.5 grade point average (B- average), including the following courses:
 - a full-year course (or two half-year courses), at 1000 level or higher, in a mathematics or science subject: biology, chemistry, computer science, engineering, geology, mathematics, physics, or statistics;
 - a full-year course (or two half-year courses) in humanities or social sciences: e.g. art history, classics, history, literature, music history, philosophy, anthropology, political science, psychology, sociology;
 - a half-year course that emphasizes written composition (often designated by a university as “writing requirement” or “writing intensive”)

Post-Secondary Institutions

The Admissions Committee may grant up to one year of university credit for an applicant who has attended a post-secondary institution that is not considered a university. Two or more years at a college or an institute of technology plus one year of university is normally acceptable.

Mature Students

An application will be considered from a Mature Student – an individual who will be at least 25 years old at the time of registration in the BEDS program and does not meet the minimum academic requirements for admission (two years of university, required courses, 2.5 GPA). All mature students must have completed at least one full year at a university. In the application, a Mature Student should describe related work experience and any other pursuits and skills that may serve as grounds for admission.

Transfer Students

The School of Architecture welcomes applications from transfer students from other architecture schools in Canada and abroad. Admission and level of entry are based on courses completed elsewhere that are equivalent to required courses at Dalhousie; the level of achievement in the design portfolio; and the applicant’s total years of university. To meet professional accreditation standards, the School cannot offer a level of entry that would permit a student to obtain the MArch degree with less than six full years of university, including two years of general studies.

Documents

A BEDS applicant must submit all of the following items before the application can be reviewed:

1. To be submitted to the Registrar’s Office:
Admissions, Registrar’s Office
PO Box 15000
Dalhousie University
Halifax, NS B3H 4R2
 - Undergraduate application form
 - Undergraduate application fee (see [University Fees](#) in this Calendar)

To confirm receipt of the items above, please contact the Registrar's Office: (902) 494-2450.

1. To be submitted to the School of Architecture: arch.office@dal.ca
Admissions, School of Architecture
Dalhousie University
5410 Spring Garden Road
PO Box 15000
Halifax, NS B3H 4R2

- An official academic transcript from all previous post-secondary institutions (PDF and 2 printed copies);
- A portfolio of design work (about 10-15 items) that demonstrates creativity and/or artistic skill (PDF)
- A letter written by the applicant, describing their background and interest in architecture and in the BEDS program; and a résumé (PDF);
- Two letters of recommendation, including at least one from an academic instructor;
- Evidence of competency in English for applicants whose native language is not English (see General University Admission Requirements in this Calendar). For School of Architecture admission, the TOEFL minimum is 92 and the IELTS minimum is 7.0.

To confirm receipt of the items above, please contact the Architecture Office: arch.office@dal.ca or (902) 494-3971. For additional application instructions, please visit <https://tinyurl.com/undergrad-application>.

Application Deadline

The deadline for undergraduate applications from Canada and all other countries is March 1. Transfer applications are reviewed three times each year: in February, June, and October. For an application to be considered, all items must be received by February 1, June 1 or October 1.

School of Planning

Bachelor of Community Design

Admission to the Bachelor of Community Design program is limited. Not all applicants who meet the minimum requirements can be accepted.

Admission to the program is based on academic performance.

High School Applicants

- Satisfactory completion of grade 12 or equivalent with at least five academic university preparatory courses including:
 - English
 - Academic Math
 - One science
 - Two additional university preparatory courses

Biology, geology or geography are recommended courses for students interested in this field. Only applicants with a minimum average of 70% will be considered.

Applicants with Previous Post-Secondary Experience

- Satisfactory completion of the required academic grade 12 subjects as outlined or university level courses in these subject areas.
- Applicants must have a minimum GPA of at least 2.0.
- All applicants, both high school and transfer, are admitted to the first year of the program. Following admission, a limited number of transfer students may be considered for registration in second year planning courses based on availability of space and level of academic preparedness (including number and subject area of course credits transferring from previous post-secondary study).

Faculty of Arts and Social Sciences

Bachelor of Arts

- English 12
- Four other acceptable university-preparatory courses at the grade 12 level
- Minimum final grades:
 - English - 65%
 - Other Subjects - 60%
 - Overall Average - 70%

Bachelor of Music, BA Music and other Music degree programs

- Satisfy the requirements for Bachelor of Arts
- Demonstrate proficiency in applied instrument or voice in an audition/interview
- Demonstrate knowledge of the basic rudiments of music theory (roughly equivalent to Grade II theory, Royal Conservatory of Music in Toronto), aural dictation and keyboard skills. Each is assessed through written diagnostic tests as part of the audition/interview.
- Submit the supplementary application form to the Fountain School of Performing Arts.

It is recommended that students apply early for the purposes of admission, audition, and performing arts scholarship consideration. Audition dates are listed on the supplementary form and all audition procedures should be completed by June 1.

Applicants who, in the estimation of the Auditioning Committee, show considerable musical talent but are in need of more emphasis on preparatory skills will be advised to update skills over the summer months. Applicants who do not meet minimum standards will be advised to seek further preparation through private instruction before reapplying.

Students wishing to transfer from another institution into the second or third year of their chosen Music program must take validation examinations in music theory, aural and keyboard skills, and their applied major instrument before transfer of credits can be considered. Failure to pass an examination will necessitate enrolment in the appropriate first- or second-year course. Validation examinations are normally written at the same time as the audition/interview. Transfer applications are subject to the June 1 deadline.

Diploma in Costume Studies (two years)

The Diploma in Costume Studies is an intensive two-year qualification intended primarily for students who have completed a Bachelor's degree at a recognized university. Students who have completed at least two full years of successful study at a recognized university may be considered for the Diploma on a case-by-case basis.

Applicants are asked to submit a brief letter outlining their interest in the program, their background in sewing, costume study/design and/or the theatre. The letter should be sent as an email attachment to admissions@dal.ca or mailed to:

Admissions
 Dalhousie University
 Henry Hicks Academic Administration Building
 Room 130, 6299 South Street
 PO Box 15000
 Halifax, NS B3H 4R2

Faculty of Computer Science

Bachelor of Computer Science

- English 12
- Pre-Calculus Mathematics 12
- Three other acceptable university-preparatory courses at the grade 12 level
- Minimum final grades:
 - English - 65%
 - Pre-Calculus Mathematics - 75%
 - Other subjects - 60%
 - Overall average - 70%

Bachelor of Applied Computer Science

- English 12

- Academic Mathematics 12
- Three other acceptable university-preparatory courses at the grade 12 level
- Minimum final grades:
 - English and Mathematics - 65%
 - Other subjects - 60%
 - Overall average - 70%

Faculty of Engineering

Bachelor of Engineering

From High School

- English 12
- Pre-Calculus Mathematics 12
- Physics 12
- Chemistry 12
- One other acceptable university-preparatory course at the grade 12 level
- Minimum final grades:
 - English, Chemistry, Mathematics, Physics - 65%
 - Other subject - 60%
 - Overall average - 70%

Transfer Students

Students wanting admission with advanced placement in the BEng degree program are advised that at least one half of the coursework must be completed at Dalhousie including the final two study terms with a full course load.

Associated Universities Transfers

On completion of the Engineering Diploma at an Associated University, a student may be eligible for admission to the Bachelor of Engineering program at Dalhousie. Applicants must complete an Application for Admission form (available from the Registrar's Office), and submit the application plus an official transcript from their Associated University, verifying completion of the program entrance requirements, to the Registrar by the application deadline.

Faculty of Health

Some programs in the Faculty of Health have been established to meet the needs of the Maritime or Atlantic provinces. Admission of applicants outside the preferred region may be limited.

Equitable Admissions Policy

The Faculty of Health recognizes that deliberate Equitable Admissions processes are required to increase the admission of students who self-identify as belonging to historically underrepresented groups: persons of Aboriginal/Indigenous ancestry (especially Mi'kmaq), members of racialized groups, persons of African descent (especially African Nova Scotians), Acadians, persons with dis/Abilities, and persons belonging to minority sexual orientation and/or gender identity (SOGI) groups. Each School/College in the Faculty will develop and implement Equitable Admissions policies and processes consistent with the NS Human Rights Act.

As a matter of priority, the Faculty will develop strategies to identify and create recruitment and support systems, plus complementary policies and practices that create an inclusive, equitable learning and working environment, to attract and support members of under-represented groups to enter and succeed in Faculty of Health Programs.

Statement Regarding Criminal Records Check

The Faculty of Health of Dalhousie University does not require a Criminal Records Check or other screening procedure (e.g. Vulnerable Sector Screen) as a condition of admission into its programs. However, **students should be aware that such record checks or other screening procedures will be required by facilities outside the University used for clinical, fieldwork or co-op placements or experiences related to an academic course assignment which in some instances, may be a requirement for graduation.** It is the student's responsibility to have such procedures completed.

Such facilities may refuse to accept students on the basis of information contained in the record check or other screening procedure. If the student is unable to complete a clinical requirement due to a failure to meet the record check or screening requirements of the facility, or if the student is refused access to the facility on the basis of the information provided, such a student may fail the course, and as a result in some instances, may not be eligible for progression or graduation.

Students should check with their School/College for details concerning any record checks or screening requirements relevant to clinical, fieldwork, or placements in their particular program. Note that facility requirements may change from time to time and are beyond the control of the University.

Students should also be aware that some professional regulatory bodies may require a satisfactory record check as a condition of professional licensure.

Deposit

Due to the large number of applications, a non-refundable deposit of \$200 (applicable to tuition fees) is required on admission. For transfer students, this deposit is payable within three weeks of notification of acceptance.

School of Health and Human Performance

Admission to programs offered by the School of Health and Human Performance is limited. Not all applicants who meet the minimum requirements for admission can be accepted.

Bachelor of Health Promotion

High School Applicants:

Satisfactory completion of grade 12 or equivalent, with a minimum average of 70% in at least five academic university-preparatory courses including:

- English (minimum 70%)
- Four other acceptable university-preparatory courses

Transfer Applicants

- Satisfactory completion of the required grade 12 academic subjects as outlined or university level courses in these subject areas.
- Applicants must have a minimum GPA of at least 2.0 (on a 4.3 scale)
- Experienced persons in the workplace may be admitted as mature students.

Bachelor of Science (Kinesiology)

High School Applicants:

Satisfactory completion of grade 12 or equivalent, with a minimum average of 75% in at least five academic university-preparatory courses including:

- English (minimum 70%)
- Academic Mathematics (minimum 70%)
- Three other acceptable university-preparatory courses
- Students are encouraged to have grade 12 courses in Biology or Chemistry or Physics.

Transfer Applicants

- Satisfactory completion of the required grade 12 academic subjects as outlined or university level courses in these subject areas.
- Applicants must have a minimum GPA of at least 2.3 (on a 4.3 scale)

Bachelor of Science (Recreation)

High School Applicants:

Satisfactory completion of grade 12 or equivalent, with a minimum average of 70% in at least five academic university-preparatory courses including:

- English (minimum 70%)
- Four other acceptable university-preparatory courses

Transfer Applicants

- Satisfactory completion of the required grade 12 academic subjects as outlined or university level courses in these subject areas.
- Applicants must have a minimum GPA of at least 2.0 (on a 4.3 scale)

Bachelor of Science (Recreation)/Bachelor of Management

A five year combined degree program is offered with a primary focus on Recreation Administration.

High School Applicants:

Satisfactory completion of grade 12 or equivalent, with a minimum average of 70% in at least five academic university-preparatory courses including:

- English (minimum 70%)
- Academic Mathematics (minimum 70%)
- Three other acceptable university-preparatory courses

Transfer Applicants

- Satisfactory completion of the required grade 12 academic subjects as outlined or university level courses in these subject areas.
- Applicants must have a minimum GPA of at least 2.0 (on a 4.3 scale)

School of Health Sciences

Bachelor of Health Science (Four-Year Entry-Level Program)

Since all professional streams of the BHSc are limited enrolment programs, these requirements define eligibility. Not all applicants who meet the minimum requirements will be accepted into the program.

Requirements differ based on the previous education and background of the applicant.

Selection criteria

The selection criteria used by the Admissions Committee include:

- Place of residence
- Academic performance
- Non-academic performance

Place of Residence

Priority consideration is given to permanent residents of the Maritime Provinces (NS, NB, PE), then to permanent residents of other Canadian provinces/territories and finally to all other applicants.

Applicants are considered to be from the Maritime Provinces if:

- The principal residence of the applicant's parent(s) or guardian is located in the Maritime provinces; or
- If the applicant is independent of his/her parent(s) or guardian, he/she must have lived and worked on a full-time basis in the Maritime Provinces for a minimum of one full year and not have attended school on a full-time basis.

Assessment of Academic Performance

Assessment of academic performance based on the applicant's transcripts accounts for 80% of the applicant's overall total score.

High School Applicants

- Completion of academic Grade 12 with at least five Grade 12 university preparatory courses, including:
 - English
 - Academic Math
 - Two Sciences:
 - Diagnostic Medical Ultrasound: Biology, Physics
 - Nuclear Medicine Technology: Physics, Chemistry
 - Radiological Technology: Physics and either Biology or Chemistry
 - Respiratory Therapy: Chemistry and either Biology or Physics
 - One other acceptable university-preparatory course
- Overall average of 75% in the five university preparatory courses used to meet admission requirements
- No grade lower than 70% in the five courses

Applicants with Previous Post-Secondary Experience

- Completion of courses in English, Math and two sciences as outlined above for high school applicants. If these courses were not taken as part of post-secondary study, they must be at the academic Grade 12 level with a minimum grade of 70%.
- A minimum grade of C in the required subjects if taken at the post-secondary level.
- Minimum cumulative GPA of 2.75 or in most recent year of full-time studies

Assessment of Non-Academic Performance

Assessment of non-academic performance accounts for 20% of the applicant's overall total score.

A letter of intent and resume (with two contact references) are required.

Forms and detailed instructions can be found on the School of Health Sciences website www.dal.ca/SHS.

Applicants will be assessed on the following non-academic criteria:

- Demonstrated knowledge of the selected health profession
- Leadership
- Community involvement
- Teamwork

Special Circumstances

In exceptional situations, special consideration may be given by the Admissions Committee to applicants who do not meet all admissions requirements. Applicants will be required to submit a letter stating reasons for special consideration.

Personal Suitability

Students in the professional streams included in the BHSc program work with clients who trust them to provide safe and competent care. A criminal records check will be required for only those students accepted into the BHSc program.

Affirmative Action

The School of Health Sciences is committed to increasing the admission of and number of graduates from underrepresented groups: Aboriginal peoples, African Canadians and Persons with (dis)Abilities.

Applicants wishing to apply under the Affirmative Action Policy must indicate on the self-identification section of the application form. Applicants must meet the minimum admission requirements.

Application Submission

Application form, fee and all official transcripts should be sent to the Registrar's Office.

All other supporting documents should be sent directly to the School of Health Sciences.

Application deadline is **February 15**.

Applicants must submit the following:

- Completed application form and fee
- For high school applicants, an official high school transcript
- For other applicants, an official transcript from all previous post-secondary institutions
- Letter of intent
- Resume (with two contact references)

Forms and detailed instructions on the School of Health Science website www.dal.ca/SHS

Notification

Each applicant is notified of the status of their application by email, normally by the end of April. Those applicants who are put on the waiting list may expect to hear about acceptance as late as September.

Deposit Fee

A non-refundable deposit of \$200 (applicable to tuition fees) is required within three weeks of receipt of written notification of acceptance in order to reserve a place in the program. For High School students the \$200 is payable by May 15 in order to reserve a place in the program.

Bachelor of Health Sciences (Post-Diploma Program)

The Bachelor of Health Science, Post-Diploma program, is a configuration of the BHSc developed for practitioners in the following professional streams:

- Diagnostic Medical Ultrasound*
- Emergency Medical Services Management*
- Medical Laboratory Technology
- Nuclear Medicine Technology
- Radiological Technology
- Respiratory Therapy

The objective of the post-diploma program is to provide registered technologists and therapists the opportunity to obtain a degree in health science. It is not intended as an opportunity to merely refresh skills or competencies.

The program comprises 60 credit hours of university study (equivalent to two years full-time study). In recognition of the reality that potential students are likely to be working full-time, the program is available on a part-time basis.

Admission Requirements

- Successful completion of a diploma program in the profession for which you are applying*
- Two years of post-diploma work experience in that profession **
- Evidence of good standing with the applicable Canadian professional association or college.

* For Diagnostic Medical Ultrasound, completion of advanced training in ultrasound following a diploma in another allied health profession, plus at least two years work experience in ultrasound, may be substituted.

* For Emergency Medical Services Management, successful completion of an Advanced Care Paramedic program from an organization accredited by Accreditation Canada (incorporating programs formerly accredited by the Canadian Medical Association).

**For Emergency Medical Services Management, 2 years FTE professional experience as an Advanced Care Paramedic is required.

Documentation Required

- Completed Dalhousie application form plus application fee (see Application for Admission form)
- Official transcript of diploma program, plus official transcripts from any other post-secondary institution attended.
- Applicants must provide proof of successful completion of the relevant Canadian licensing/certification exam
- Current registration number with applicable Canadian professional association or college, or photocopy of current membership card
- Letter of intent
- Resume with two contact references

Guidelines for Letter of Intent

This letter provides the opportunity for applicants to expand upon their experience, any advanced or specialty education they may have and their interest in undertaking university studies.

Information to be included:

- Work experience
- Educational initiatives undertaken since diploma completion
- Other professional activities, e.g. in professional association
- How applicant thinks this program will contribute to her/his professional development
- Personal and professional motivation
- Readiness for university education

Application deadline dates for the Post-Diploma Program are June 15 for September enrollment and October 15 for January enrollment.

School of Health Administration

Diploma in Health Services Administration

Applicants must meet the Dalhousie University undergraduate admission requirements. It is recommended that students not apply directly from High School and have work or volunteer experience in the Health Services industry. A complete application consists of the following documents:

- Application and fee
- An official transcript from High School and previous post-secondary institutions
- One letter of reference
- Resume
- Applicants whose first language is not English must provide proof of English language proficiency. See General Admission Requirements.

Final Dates for receipt of Applications for Admission

- March 1 for September start
- November 15 for January start

Diploma in Emergency Health Services Management

Applicants must meet the Dalhousie University undergraduate admission requirements. It is recommended that students not apply directly from High School and have work or volunteer experience in the Health Services industry. A complete application consists of the following documents:

- Application and fee
- An official transcript from High School and previous post-secondary institutions
- One letter of reference
- Resume
- Applicants whose first language is not English must provide proof of English language proficiency. See General Admission Requirements.

Final Dates for receipt of Applications for Admission

- March 1 for September start
- November 15 for January start
- March 15 for May start

School of Nursing

Bachelor of Science (Nursing)

Admission to the Bachelor of Science Nursing program is limited. Not all applicants who meet the minimum requirements can be accepted.

Requirements differ based on the previous education and background of the applicant.

Selection criteria

The selection criteria used by admission include:

- Place of residence
- Academic performance
- CASPer test

Place of Residence

Owing to the limited enrolment and the large number of applicants, this program primarily serves permanent residents of Nova Scotia but each year a limited number of places are also available for well-qualified residents of other Canadian provinces and international students.

Applicants are considered to be from Nova Scotia if:

- The principal residence of the applicant's parent(s) or guardian is located in Nova Scotia; or
- If the applicant is independent of his/her parent(s) or guardian, he/she must have lived and worked on a full-time basis in Nova Scotia (not attending school on a full-time basis) for a minimum of one full year; or
- The applicant, or his/her parent(s), guardian or spouse does not meet the preceding requirements as the direct result of a recent employment transfer in or out of Nova Scotia.

Academic performance

High School Applicants (Direct Entry - 3 year)

- Satisfactory completion of grade 12 or equivalent with at least five academic university preparatory courses including:
- English
- Biology
- Chemistry
- Academic Math
- One other acceptable university-preparatory course
- A minimum grade of 70% in the required subjects.
- A minimum overall average of 70% in the five university preparatory courses used to meet admission requirements

Applicants with Previous Post-Secondary Experience (Advanced Standing - 2 year)

- A minimum grade of B- in each of the required subjects at the Post-Secondary level:
 - ANAT (Anatomy) 1010.03 or equivalent
 - PHYL (Physiology) 1010.06 or (PHYL 1010.03 and Biological Science .03)
 - STAT (Statistics) 1060.03 or equivalent
 - MICI (Microbiology) 1100.03 or equivalent
 - ENGL (English) 1100.03 or equivalent
 - Science elective .03
 - Open electives .09
- A minimum cumulative GPA of 2.5 based on overall Post-Secondary career or most recent year of studies (30 credit hours)

Please Note: LPN applicants must meet the Advanced Standing admission requirements outlined above. Competitive applications will be assessed within the total pool of applicants each year. No seats will be reserved for LPN applicants. Approved bridging courses may help LPN applicants meet some of the above requirements, however it is the applicant's responsibility to ensure that all requirements are met. Information on approved LPN bridging courses can be found at <https://www.dal.ca/academics/programs/undergraduate/nursing/program-overview/advanced-standing-option.html>.

CASPer Test

In addition to the academic requirements outlined above, all Bachelor of Science (Nursing) applicants must complete the Computer-based Assessment for Sampling Personality Characteristics (CASPer) test and have their results sent to Dalhousie University. CASPer test results will be used in combination with academic performance for admission assessment. More information about the CASPer test requirement can be found at dal.ca/studynursing/casper.

Special Cases

In exceptional circumstances, special consideration may be given by the Admissions Committee to applicants who do not meet all admission requirements. These decisions are at the discretion of the Admissions Committee and are not subject to appeal.

Affirmative Action

The School of Nursing has an Affirmative Action Policy for residents of Nova Scotia who belong to the indigenous Black and Aboriginal population. Applicants wishing to apply under the Affirmative Action Policy must indicate on the self identification section of the application form. Applicants must meet the minimum admission requirements.

Final Date for Receipt of Applications for Admission

February 28

Notification

Each applicant is notified of the status of their application by email, normally by the end of May. Those applicants who are put on the waiting list may expect to hear about acceptance as late as September. Incomplete and late applications will not be considered.

Bachelor of Science (Nursing) (Arctic Nursing)

A program for Inuit is available. Please contact the School of Nursing for information.

Deposit Fee

Due to the large number of applications a non-refundable deposit of \$200 (applicable to tuition fees) is required on admission.

For High School students the \$200 deposit is payable by May 15 in order to reserve a place in the program.

For all other applicants the \$200 deposit is payable within three weeks of receipt of written notification of acceptance in order to reserve a place in the program.

The following guidelines have been established for the School of Nursing: if the deposit is not received by the deadline the place will be offered to another applicant without further notice. Students who have paid their deposits but who have not appeared at the School of Nursing by the first day of the Orientation Program will be considered to have withdrawn from the School unless they have written permission from the Admissions Committee.

College of Pharmacy

Doctor of Pharmacy (PharmD)

For admissions to the College of Pharmacy, you must have successfully completed a minimum of one year full time academic study (30 credit hours over the fall and winter terms).

Applicants must achieve a 70% (B-) in each of the following required pre-requisite courses. Equivalent subjects from other universities will be given equal status for the purposes of determining admission:

Subject	Dalhousie Course
	CHEM 1011.03 & CHEM 1012.03 or
Intro Chemistry	CHEM 1021.03 & CHEM 1022.03 or
	CHMA 1000.03 & CHMA 1001.03 BIOL 1010.03 & BIOL 1011.03 or
Intro Biology	BIOL 1020.03 & BIOL 1021.03 or
	BIOA 1002.03 & BIOA 1003.03
Social Science	6 credit hours of a social science
	MATH 1000.03 or
Intro Calculus	MATH 1215.03 or
	MTHA 1000.03 STAT 1060.03 or
Intro Statistics	STAT 2060.03 or
	STAA 2000.03 ENGL 1030.06 One full year (six credit hours) or any two half-year (three credit hours)

	PHYL 2041.03 & PHYL 2044.03
Electives	6 credit hours of general electives

Applicants must meet the required overall academic performance of 70% (cumulative GPA of 2.70).

Transfer credits will not be granted for students who exceed the minimum admission requirements. The problem-based curriculum which integrates science, pharmaceutical science and pharmacy practice requires that students will complete all coursework in the four year program.

Incomplete applications and applications submitted after the deadline, February 1 (see Application Dates for details), will not be considered.

Selection Criteria

The selection criteria used by the Admissions Committee include:

- Place of residence
- Academic performance
- Assessment of non-academic criteria

A score out of 100%, is calculated for each applicant based on academic performance (60%) and assessment of non-academic criteria (40%).

Place of Residence

This program is only available to Canadian Citizens and Permanent Residents of Canada (with current PR status).

This is the only College of Pharmacy for the Maritimes and therefore preference is given to Maritime applicants. Attendance at a Maritime university does not, by itself, constitute having established residence in the Maritime provinces.

Applicants are considered to be from the Maritimes if:

- The principal residence of the applicant's parent(s) or guardian is located in the Maritime provinces; or
- The applicant (or spouse) has been employed full-time in the Maritime provinces for the preceding 12 consecutive months.

Applicants whose parent(s), guardian or spouse do not meet the residency requirements as a direct result of a recent employment transfer either into or out of the Maritime provinces would not necessarily be expected to conform to the above guidelines.

Exceptions to these guidelines will be considered on an individual basis. Residency will be determined for each applicant on February 1st of the year for which admission is being sought.

A limited number of students from outside the Maritimes are accepted into the first year of the program each year.

Academic Performance

Applicants are chosen for evaluation of non-academic criteria based on an initial screening of academic performance. Academic performance is calculated on cumulative GPA. In the case of academic courses currently in progress, the initial screening will be based on Fall-term grades. The final assessment of academic performance is based on the applicants' grades and accounts for 60% of

the applicants' overall total score. Applicants should note that admission is on a competitive basis so that the ability to obtain consistently better than average grades would be an asset for the applicant. An academic record containing failures or poor grades makes the prospect of admission very unlikely.

Assessment of non-academic criteria

Only those applicants who have obtained a high level of academic performance on the initial screening are invited for evaluation of non-academic criteria. Applicants will be invited to participate in an interview. Applicants will be assessed on the following non-academic criteria:

- Commitment to Care;
- Critical thinking, problem-solving, creativity;
- Ethical reasoning/integrity;
- Responsibility;
- Interpersonal skills;
- Maturity;
- Motivation to be a pharmacist;
- Conflict resolution;
- Team player;
- Self-awareness;
- Oral communication skills.

The assessment of non-academic criteria accounts for 40% of the applicants' overall total score.

Admissions Notification

Applicants will be informed of the status of their applications no later than late July. Those applicants who are put on the waiting list may expect to hear about acceptance as late as September.

Deposit Fee

In addition to the [deposit requirement](#), the following guidelines have been established for the College of Pharmacy: if the deposit is not received, the place will be offered to another applicant without any further notice. Students who have paid their deposits but who have not appeared at the College by the first day of the College of Pharmacy Orientation Program will be considered to have withdrawn from the College unless they have written permission from the Admissions Committee.

Equitable Admissions

The College of Pharmacy has an Equitable Admissions Policy those who belong to historically underrepresented groups, including persons of Aboriginal/Indigenous ancestry (especially Mi'kmaq), members of racialized groups, persons of African descent (especially African Nova Scotians), Acadians, and persons belonging to sexual orientation and/or gender identity (SOGI) minority groups. Applicants wishing to apply under the Equitable Admissions Policy must check self-identify to the Admissions Committee using "yes" on the Dalhousie Pharmacy Supplemental Form.

School of Social Work

Bachelor of Social Work

The study and practice of social work is intellectually, emotionally and physically demanding. It is important for potential applicants to be familiar with the expectations and ethics of the profession before applying to the Bachelor of Social Work program in order to self assess for readiness. This material can be found on the websites for the Canadian Association of Social Workers and the Canadian Association for Social Work Education.

Admission to the Bachelor of Social Work degree is limited. Not all applicants who meet the admission requirements can be accepted. A specified number of places are offered once a year to the most qualified candidates as selected by the School's Admissions Committee. Equal consideration is given to part-time and full-time applications. Applicants indicate if they are applying for on-site or distance study and the applications for each delivery method are given separate consideration. It is not possible to transfer between on-site and online delivery methods.

Required preparation for Social Work

- Academic requirements for the Bachelor of Social Work degree are the same for the on-campus and the on-line distance delivery method.
- The minimum academic requirement is at least one full year of study in which applicants successfully complete five full credits (30 credit hours) with a minimum 2.70 (B-) average on a 4.3 scale in subject areas other than social work.

- Most applicants apply with two years of university study.

There are no specific course pre-requisites for the BSW program. Potential social work applicants are advised to take social science courses (sociology, psychology, women's studies, are a few suggestions) and a full year writing course (English is preferred).

Application Process

Application and all supporting documents must be received by February 15. Please visit www.socialwork.dal.ca for detailed instructions on how to prepare and submit your application.

Applications for admission are assessed once a year and enrolment is in September only. Each applicant is notified by mail in mid-May of the Admissions Committee's final recommendation to the University Registrar.

The BSW application is self-administered. The application can be downloaded including detailed instructions and forms for completing the application process. A full application includes the following: (Note: only two out of the three references are required).

- Dalhousie Undergraduate Application for Admission and Application Fee
- BSW Application Information
- BSW Applicant's Checklist
- BSW Form Personal Statement Cover Sheet
- BSW Form Recommendation 1. Academic
- BSW Form Recommendation 2. Work
- BSW Form Recommendation 3. Volunteer
- BSW Form Work & Volunteer Experience Summary
- Official University transcripts

Affirmative Action

The School of Social Work has an affirmative action policy for applicants who are Acadian, Aboriginal, African Canadian, members of other racially visible groups, persons with (dis)Abilities and for Lesbian, Gay, Bisexual, Transgender, Two-Spirited, Queer and Intersex (LGBTQT) people. The school is committed to admitting and graduating the highest possible number of students who qualify under this policy. Members of these groups who have five general (non social work) university credits that average B- are encouraged to apply under this policy. Applicants make their request in a place provided on the Social Work Statement cover sheet, which is part of the BSW application package. Each candidate is considered individually on the basis of her/his qualification, rather than in relation to other applicants. The admissions prerequisites and selection criteria are otherwise the same for all candidates.

Selection criteria

The selection criteria used by the Admissions Committee include:

- academic achievement
- social work experience, including work and volunteer
- strength of references
- strength of social work statement

Interviews are not part of the admission process unless specifically requested by the Admissions Committee.

In the assessment of applications, priority is given to those who have completed or who are about to complete an undergraduate degree and who have related work/volunteer experience.

Academic Achievement

An initial screening is made on the basis of academic achievement. Grades from the last 60 credit hours attempted (equivalent to two years of full-time study), including failures, are used to determine the cumulative admission average. Repeated courses with lower grades will be excluded from the GPA calculations. Courses from non-university programs, including college level courses, do not qualify for consideration and are not included in the cumulative university average. A minimum cumulative GPA of 2.7 (B- or 70%) is necessary for an application to be considered.

Relevant work and/or volunteer experience

Relevant work and/or volunteer experience in areas of social or human services that bear a direct relationship to social work can contribute meaningfully to the applicant's preparedness for social work practice.

References

The BSW application requires two out of the following three reference forms: (academic, work, volunteer). These assist the Admission Committee in assessing the candidate's personal suitability and readiness for professional education in social work.

Social Work statement

Candidates write a statement that asks them to discuss a current social issue and their motivation to study social work. This also assists the Admission Committee in assessing the candidates' personal suitability and readiness for professional education in social work.

Canadian Residency Requirement for Distance Study

The online (distance delivery) option is only available to residents of Canada as defined by Canada Customs and Revenue Agency.

Studying by Distance Delivery

Taking a social work online distance degree in your own community will give you access to a challenging, top quality, accredited education in social work. You will have access to a well-structured web based learning environment and have opportunities to apply new learning in supervised field work.

Distance study is completed on a pre-determined schedule that includes a two week residency period on the Dalhousie University campus. Courses are delivered by Brightspace. This requires students to post comments on the course discussion boards, to respond to other students' postings, and to work in small groups as required. The web based courses provide the opportunity for a high-level of interactivity amongst students and between students and instructors. Access to a computer with high speed internet is essential for effective interactivity in your courses. For more information on the distance delivery method, including additional course fees associated with this delivery method, please see socialwork.dal.ca.

Faculty of Management

Bachelor of Commerce Co-op

- English 12
- Academic Mathematics 12
- Three other acceptable university-preparatory courses at the grade 12 level
- Minimum final grades:
 - English, Math - 70%
 - Other subjects - 60%
 - Overall Average - 75%

All Commerce Co-op students must understand that, although Management Career Services will assist students in the job search process, it is ultimately the student's responsibility to secure suitable employment for each of the three required co-op work terms.

International students are also responsible for obtaining the necessary permits from the Government of Canada to participate in the Canadian work term search process. Students are able to apply for the Co-op work permit when they apply for their Canadian study permit.

Bachelor of Management

- English 12
- Academic Math 12
- Three other acceptable university-preparatory courses at the grade 12 level
- Minimum final grades:
 - English, Math - 65%
 - Other subjects - 60%
 - Overall Average - 70%

Faculty of Science

Bachelor of Science and Bachelor of Science Co-op

- English 12
- Pre-Calculus Math 12

- Three other acceptable university-preparatory courses at the grade 12 level
- Minimum final grades:
 - English, Math - 65%
 - Other subjects - 60%
 - Overall Average - 75%
- It is recommended that students take two science subjects.

Bachelor of Science (Medical Sciences)

- English 12
- Pre-Calculus Mathematics 12
- Three other acceptable university-preparatory courses at the grade 12 level
- Minimum final grades:
 - English - 80%
 - Pre-Calculus - 80%
 - Overall Average - 80%

Integrated Science Program (DISP)

- Satisfy requirements for Bachelor of Science
- At least one grade 12 science course
- Minimum grades:
 - English 75%
 - Pre-Calculus Mathematics 80%
 - Overall average 80%

Diploma in Meteorology

- For students entering from another university, a 90 credit hour BSc or preferably, a 120 credit hour BSc, in Physics or Mathematics or Chemistry with appropriate Physics courses
- Strong background in Mathematics and Physics
- Courses taken should also include Statistics and Computer Science
- Dalhousie also offers an integrated program that leads to a BSc in Physics (120 credit hours) and the Diploma in Meteorology. (See the [Physics and Atmospheric Science Department entry](#))

Faculties of Dentistry, Law, Medicine, and Graduate Studies

For information concerning admission into these faculties, consult the appropriate calendar, or contact the appropriate faculty office directly.

[Graduate Calendar](#)

[Dentistry Law Medicine Calendar](#)

Application Submission

It is the responsibility of each applicant to ensure that the application file is complete. The following must be submitted by each applicant to the Registrar's Office:

- A completed application form
- The appropriate application fee for the program (refer to Application for Admission form)
- For students applying directly from high school, an official record of high school work
- An official academic transcript from all previous post-secondary institutions (if applicable)
- Evidence of competency in English for applicants whose first language is not English (see [English Language Proficiency Requirements](#))
- Supplementary information as required for specific programs
- Mature applicants should also enclose a letter

Documents, once submitted, become the property of Dalhousie University and cannot be returned.

January Admissions

Admission of first-year students in January is not recommended because the number of introductory courses in the winter term is very limited. Part-time students and transfer students may be admitted for courses beginning in January in BA, BCSc, BACSc, BSc, BEDS, BEng, BMGT and Special Student (Non-Degree) programs. The application deadline for January admission is November 15.

Response to Applications

Dalhousie will respond to your application as promptly as possible and will advise you of any missing documentation. Please notify the Registrar's Office if your address changes.

When documentation is complete, applications are assessed for admission. Although every effort is made to obtain decisions quickly, there will be some delay at times, particularly with limited enrolment programs. There may also be some delay in admission decisions for programs starting beyond the next academic session.

As soon as decisions are made, applicants will be advised by email.

Early acceptance

Applicants currently attending high school, who have good academic records and a competitive admission average may be given early acceptance, conditional on satisfactory completion of work in which they are currently enrolled.

Final acceptance

Applicants must successfully complete high school courses in the required subjects with a minimum average of 70%. An official transcript of final grades must be submitted to the Registrar's Office by August 1st.

University Regulations

General

1. The Senate is charged with the internal regulations of the University, including all matters relating to academic affairs and discipline, subject to the approval of the Board of Governors. Within the general policies approved by Senate, academic requirements are administered by the Faculty concerned.
2. All students must agree to obey all the regulations of the University already made or to be made. Students must also comply with the regulations of the Faculty in which they are registered, and pay the required fees and deposits before entering any course or taking any examinations. Additionally, students are advised that this Calendar is not an all-inclusive set of rules and regulations but represents only a portion of the rules and regulations that will govern the student's relationship with the University. Other rules and regulations are contained in additional publications that are available to the student from the Registrar's Office and/or the relevant Faculty, Department or School.
3. Students are bound by the regulations of the home faculty regardless of the faculty in which the student takes courses.
4. Students should be aware that certain courses at the University involve required laboratory work where potentially hazardous materials are in use. These may include animals, other biological materials which may include crops and products, tissues, fluids, wastes, but also microorganisms and toxins as well as a wide variety of chemicals. Examples of physical hazards may include noise, radioactive isotopes and non-ionizing radiation (e.g. lasers). Since there are potential health risks associated with the improper handling of such materials resulting in exposure, Dalhousie University requires that, as a condition of taking a course where such materials are to be used, students must read and agree to comply with the instructions for the safe handling of such materials. In the event that students do not comply with the instructions for the safe handling of such materials, students will receive no credit for the required laboratory work unless other acceptable alternatives are arranged with the instructor. In many cases, alternate arrangements are not possible and students should consider enrolling in a different course.

Rescission of Acceptance into a Program

Dalhousie University reserves the right to rescind any acceptance of an applicant into a program or to rescind an offer of admission of an applicant into a program. Such rescission shall be in writing and may be made by the President or the Vice-President (Academic) and Provost, in consultation with the appropriate Dean, at any time prior to the applicant's registration being confirmed by the Registrar. Any such rescission shall be reported to the Senate in camera.

Official Examination Regulations

Candidates will not be admitted to the Examination Room more than thirty minutes after the beginning of the examination. Candidates will not be permitted to leave the examination within the first 30 minutes.

1. Candidates are required to present their valid Dalhousie ID card at all examinations scheduled during the official examination periods and sign the signature list when used.
2. No articles such as books, papers, etc. may be taken into the examination room unless provision has been made by the examiner for reference books and materials to be allowed to the students. All electronic computing, data storage, electronic dictionary and communication devices must be turned off, placed and sealed in the opaque storage bag on the exam writing surface. Calculators may be used at the discretion of the instructor.
3. Candidates may not leave their seats during an examination except with the consent of the invigilator.
4. If more than one book is used, the total number should be marked in the space provided above. The other books should be properly marked and placed inside the first book. All books supplied must be returned to the invigilator.
5. Candidates found communicating with one another in any way or under any pretext whatever, or having unauthorized books, papers, electronic computing, data storage, or communication devices in their possession, even if their use be not proved, will be investigated by the Chief Invigilator. A written report will be submitted to the Faculty Academic Integrity Officer.
6. After the first thirty minutes have elapsed, students may hand in their examination book(s) to an invigilator and quietly leave the examination room. Candidates may not leave the examination room during the last 15 minutes of the examination.

Policy in the Event that a Formal Examination Cannot be Completed at the Regularly Scheduled Time

Formal examinations, up to three hours in length, are scheduled by the Registrar each December and April during formal examination periods, as laid out in the Calendar. If, in the unusual event that one of these examinations must be postponed or abandoned at short notice, the following policies will apply.

1. If more than 50 percent of the time allocated for the examination has elapsed, students' work up to the premature end of the examination, but prorated for the actual time written, will lead to the mark to be obtained from the formal examination.
2. If less than 50 percent of the time allocated for any examination has elapsed, the examination will be rewritten as soon as possible, normally on a day when examinations are not scheduled. Students will be informed by the Registrar of the time and place of the rewrite on the Website of the Registrar (see link below).
3. In all cases in which a formal examination cannot be written at its scheduled time and special arrangements must be made, it is essential that faculty ensure that all students in the course are treated fairly and equitably and according to the evaluative criteria in the course description given to students at the beginning of the term. If an examination is terminated as under point #1, any student who feels disadvantaged by not having been able to write an examination for the length specified in the course description, may appeal through the appropriate departmental or school appeal mechanism for an examination of the specified length. Appeals will be in writing and in a timely fashion. If the appeal is granted, arrangements for such a makeup examination will be made between the student and the course professor.
4. If a formal examination cannot be written at its scheduled time, it is the responsibility of students to check the Registrar's Website for when the examination will be rewritten. Announcements will be made as soon as possible after the original time, normally within 24 hours, and rewrites will normally take place within the regular examination period.

<http://www.dal.ca/exams>

Policy for the Scheduling of Courses/Examinations

Normally, the University schedules and conducts courses on weekdays (e.g. Monday to Friday and sometimes Saturday between 8:30am (start time) and 10pm (end time) Atlantic time), and sometimes Saturday, and examinations on weekdays and Saturdays, but not Sundays or statutory Holidays. No examinations or courses should be scheduled on Good Friday, Easter Saturday or Easter Sunday. Otherwise, exams will be scheduled Monday through Saturday between 8:30am and 10pm Atlantic time, and sometimes Sunday between 12 noon and 10pm Atlantic time. However the University reserves the right, in exceptional circumstances and with the approval of Senate, to schedule courses or examinations on Sundays or statutory holidays, as the case may be.

Requests for an Alternative Final Examination Time Policy

A student requesting an alternative time for a final examination will be granted that request only in exceptional circumstances. Such circumstances include illness (with medical certificate) or other mitigating circumstances outside the control of the student, including technology failure in the case of online examinations. Students writing online tests or exams in other time zones may request an

alternative exam time if they are scheduled to write a test or exam during a restricted time period after 10pm or before 8:30am local time. Elective arrangements (such as travel plans) are not considered acceptable grounds for granting an alternative examination time. In cases where it is necessary to make changes to examination arrangements late in the term, or Senate has approved exceptional examination arrangements, a special effort will be made to accommodate difficulties the changes may cause for individual students.

Instructors are expected to accommodate all reasonable requests for alternative examination times although the ultimate decision whether to grant a student's request for an alternative examination time lies with the instructor of the course concerned as does the responsibility for making the alternative arrangements.

This policy may also be applied at the discretion of the instructor to tests and examinations other than final examinations.

Assistance and Support: The Centre for Learning and Teaching (CLT) is available to provide assistance to Instructors in preparing examinations and in considering alternative forms of assessment. Academic Technology Services (ATS) can provide technical support to instructors offering online exams.

Retention of Student Work

Dalhousie University has developed an [Intellectual Property Policy](#) that governs ownership of intellectual property by Dalhousie faculty, staff, and students. The policy is based on applicable legislation and Dalhousie's collective bargaining agreements. The policy also defines and clarifies common ownership scenarios, such as research agreements. As a student, you are the default owner of your intellectual property, including your thesis, but employment contracts or other agreements may ask you to waive your rights or provide permission to use your work. Please contact ipoffice@dal.ca with any questions about your intellectual property rights as a student.

Communication to Students

1. All students must report their local address while attending the University to the Registrar's Office, on registration or as soon as possible thereafter. Subsequent changes must be reported promptly. This may be done through

<http://dalonline.dal.ca>

2. Email is an authorized means of communication for academic and administrative purposes within Dalhousie. The University will assign all students an official email address. This address will remain in effect while the student remains a student and for one academic term following a student's last registration. This is the only email address that will be used for communication with students regarding all academic and administrative matters. Any redirection of email will be at the student's own risk. Each student is expected to check their official email address frequently in order to stay current with Dalhousie communications.

3. Students who change their name while attending Dalhousie must provide proof of name change to the Registrar's Office.

Student Absence Regulation

This regulation applies to all credit-bearing courses and programs.

Schedule A lists the Faculties, Colleges, and Schools whose programs and courses are excluded from this regulation. The Senate Office will add and remove academic units from this list based on direction from the Senate Learning and Teaching Committee (SLTC).

Students experiencing short-term or long-term absences that result in missed or late academic requirements may seek alternate arrangements with their instructors.

Students must review Faculty, College, School, course or instructor-specific syllabi and guidelines, and work-integrated learning handbook policies for the remediation of missed or late academic requirements. Absences may also result in the loss of class participation grades.

Course instructors may approve exceptions to this regulation to provide additional flexibility to students and to support students in successful completion of academic requirements. Faculties, Colleges, and Schools may approve changes to absence reporting timelines and to methods for providing absence information for the academic unit.

Any student who believes they will suffer undue hardship from the application of this academic regulation may [apply](#) for relief by completing an "[Application of a Waiver of an Academic Regulation](#)" form. Students wishing to appeal a decision denying the application for a waiver may appeal to the Academic Appeals Committee of the Faculty, College or School in which they are registered.

Requests for alternate arrangements for missed University-scheduled final exams are handled under a separate University regulation, [“Requests for an Alternative Final Examination Time”](#).

Students who provide false or fraudulent medical or other evidentiary documentation for their absences are subject to University discipline under the [Code of Student Conduct](#).

Information on managing absences may be provided by Dalhousie Student Health Services and Counselling Services and appear in the calendar entry with this regulation. Current information for the calendar appears in Schedule B and may be revised at their discretion.

Schedule A - List of Excluded Faculties, Colleges and Schools

The following academic units have separate regulations to cover short-term and long-term absences that still meet the overall purpose of this regulation:

- Faculty of Dentistry
- Schulich School of Law
- Faculty of Medicine
- College of Pharmacy

Students in these Faculties, Colleges or Schools must refer to their current academic calendars for specific regulations or policies on missed or late academic requirements.

Schedule B – Supplementary information from Student Health and Wellness

Dalhousie Student Health Services and Counselling Services will only provide sick notes or medical certificates to students for short-term absences in the following cases:

1. A student’s Faculty or instructor is not using the “Student Absence Regulation”,
2. The missed or late academic requirement is considered final coursework, or
3. The test or exam falls within the last two weeks of an academic term.

Students are encouraged to stay at home if they have a communicable illness (such as flu-like symptoms) that is manageable at home to prevent further spread of illness to other students, staff or instructors.

For long-term absences, Dalhousie Student Health Services and/or Counselling Services will only provide documentation for students who have been under the care of a physician, registered nurse, social worker, psychologist, counsellor, or psychiatrist during the period of absence and/or for management of long-term or chronic physical or mental health conditions.

The full [Student Absence Regulation](#) is available.

Freedom of Information and Protection of Privacy

The Freedom of Information and Protection of Privacy Act (FOIPOP) provides for the protection of an individual’s right to privacy but also requires that certain records be disclosed upon request unless they are exempted from disclosure. The Act requires that the University not disclose personal information if that information would constitute an unreasonable invasion of personal privacy. Applicants to Dalhousie are advised that information they provide along with other information placed in a student file will be used in conjunction with university practices for internal university use and will not be disclosed to third parties except in compliance with the FOIPOP Act or as otherwise required by law.

Release of Information About Students

The following information is available, without application through the Freedom of Information and Protection of Privacy Act:

I. Disclosure to students of their own records

1. A transcript is a complete history of a student’s academic record at Dalhousie. Partial transcripts, e.g. a portion of a student’s record pertaining to registration in a particular degree, faculty or level of study only, are not issued.
2. Students have the right to inspect their academic record. An employee of the Registrar’s Office will be present during such an inspection.
3. Students will, on submission of a signed request and payment of a fee where appropriate, have the right to receive transcripts of their own academic record. These transcripts will be marked "ISSUED TO STUDENT". Official transcripts

will be sent on a student's request to other universities, or to business organizations, etc. The University will not release copies of transcripts if students owe monies to the University.

4. If transcripts are issued for a student while a senate discipline case is pending and the committee subsequently makes a decision that affects the student's transcript, revised transcripts will be sent to recipients if transcripts are issued while the case was pending.

II. Disclosure to Faculty, Administrative Officers, and Committees of the University

Information on students may be disclosed without the consent of the student to University officials or committees deemed to have a legitimate educational interest.

III. Disclosure to Third Parties

1. The following information is considered public information and may be released without restriction:
 - Name
 - Period of Registration
 - Certificates, Diplomas, Degrees awarded
 - Field of Study (as relates to degree awarded)
 - Hometown and Awards/Distinctions*

*As indicated in the convocation program.
2. Information will be released without student consent to persons in compliance with a judicial order or subpoena or as required by federal or provincial legislation.
3. Necessary information may be released without student consent in an emergency, if the knowledge of that information is required to protect the health or safety of the student or other persons. Such requests should be directed to the Registrar.
4. In compliance with Statistics Canada requirements, a student's national personal identification number assigned by the university or college first attended will routinely appear on a student's transcript of record.
5. The Federal Statistics Act provides the legal authority for Statistics Canada to obtain access to personal information held by educational institutions. The information may be used only for statistical purposes, and the confidentiality provisions of the Statistics Act prevent the information from being released in any way that would identify a student. Students who do not wish to have their information used are able to ask Statistics Canada to remove their identifying information from the national database by contacting us by:

Email: PSIS-SIEP_contact@statcan.gc.ca

Mail: Institutional Surveys Section
Centre for Education Statistics
Statistics Canada Main Building
SC2100-K Tunney's Pasture
Ottawa, ON K1A 0T6

6. Students should also be aware that the Maritime Provinces Higher Education Commission (MPHEC) collects data on behalf of Statistics Canada, and that it uses the data for similar purposes. Statistics Canada will notify the MPHEC of any student choosing to have their personal information removed from the national database, and their information will subsequently be removed from the MPHEC's database. Further information on the use of this information can be obtained from the Statistics Canada Website www.statcan.gc.ca.
1. Other than in the above situations, information on students will be released to third parties only at the written request of the student, or where the student has signed an agreement with a third party, one of the conditions of which is access to the student's record (e.g. in financial aid). This restriction applies to requests from parents, spouses, credit bureaus and police.

Student Accommodation Policy

A. Background and Purpose

This policy forms part of a broader, ongoing commitment to create a fully accessible university community, and acknowledges that, through dialogue, the university can better understand the nature and extent of campus barriers to accessibility. It is the responsibility of every member of the Dalhousie University community to be knowledgeable on institutional policies related to prohibited grounds for discriminatory practices and accessibility.

Pursuant to our obligations under human rights legislation, the purpose of this Policy is to affirm that Dalhousie University will make reasonable efforts to provide accommodations, up to the point of undue hardship, for students experiencing a barrier due a characteristic protected by human rights legislation, and to establish a framework for managing requests by students for accommodation in an appropriate and timely manner.

Accommodations are intended to reduce or eliminate barriers to participation in academic and student life experienced by individual students due to characteristics protected under human rights legislation.

B. Application

This policy applies to academic and non-academic activity engaged in by students at, on behalf of, in connection with or under the auspices of the University.

Affirmative Action measures and programs aimed at correcting historic disadvantage for designated groups fall under distinct programs and do not form part of this policy.

Allegations of discrimination are addressed under the Statement on Prohibited Discrimination and the applicable procedures.

C. Definitions

In this Policy:

"Centre" means the Student Accessibility Centre, Student Affairs;

"Student" means an individual registered in a course at the University, including the College of Continuing Education, but excluding residents in postgraduate medical or dental education programs;

"University activity" means an academic or non-academic activity conducted at, on behalf of, in connection with, or under the auspices of the University.

D. Policy

1. Students experiencing barriers to participation in a University activity due to a characteristic protected under human rights legislation are entitled to accommodation to reduce or eliminate such barriers up to the point of undue hardship, as set out in this Policy.
2. All members of the University community share in the responsibility for compliance with this policy.
3. Students are encouraged to seek accommodation where they believe that they are experiencing a barrier to participation in a University activity, due to a characteristic protected under human rights legislation, which may be reduced or eliminated through accommodation.
4. All requests for accommodation shall be made by the student to the Centre in accordance with the Procedures and with all Guidelines and Protocols published by the Centre.
5. Accommodation requests shall be made prior to the University activity in question. There shall be no "after-the-fact" accommodation except in rare circumstances where significant psychological or mental health issues arise coincident with the activity in question.
6. Accommodation decisions will be reviewed on a regular basis and adjusted to the student's then current circumstances where necessary.
7. Accommodation decisions may be appealed by the student to the Vice-President Academic and Provost or delegate in accordance with the Procedures, and with the Guidelines and Protocols established by the Centre.
8. All documentation relating to a request for accommodation, including supporting documentation, shall be treated as strictly confidential, and shall not be disclosed to other persons without the consent of the student requesting the accommodation, except to the extent that such disclosure is necessary for the effective implementation of the accommodation decision or appeal of that decision.
9. Nothing in this Policy or Procedures shall take away from the student's right to seek the assistance of the applicable Human Rights Commission.

E. Administrative Structure

1. Authority: This Policy and Procedures falls under the authority of the Vice-President Academic and Provost. The Centre is responsible for the day to day administration of this Policy and Procedures.
2. Guidelines and Protocols: Guidelines and Protocols published by the Centre will support the Policy and Procedures and facilitate the Centre's responsibility to administer the Policy.
3. Record-keeping: The Centre shall track and monitor data relating to accommodation requests, accommodation appeals, accommodation plans, and other matters relating to student accommodation.
4. Reporting: The Centre shall deliver an annual report to the Vice-Provost, Student Affairs and the Senate Committee on Learning and Teaching which will include:
 - a. Number of accommodation requests;
 - b. Representation of the nature of the requests and program of study;
 - c. Number of appeals and summary of decisions; and
 - d. Any service challenges or other issues presented.
5. Ongoing Training: Employees involved in administering this Policy and Procedures will participate in regular training on applicable human rights issues by the Human Rights and Equity Advisor, a minimum of once annually.

F. Procedures

1. Request for Accommodation: A request for accommodation shall be made by the student to the Centre prior to the University activity in question in accordance with Guidelines and Protocols established by the Centre.
2. Preliminary Assessment: The Centre shall make a preliminary assessment of the request to determine the nature of the barrier experienced by the student and the connection of that barrier to a characteristic protected by human rights legislation. If both cannot be established then the request shall be denied.
3. Factors to be Considered: Where an accommodation is to be provided, it must be reasonable, up to the point of undue hardship. The relevant factors to be taken into account in determining a reasonable accommodation will include, but are not limited to, the following:
 - a) Linkage – whether the proposed accommodation will have the practical effect of eliminating or reducing the identified barrier;
 - b) Safety – whether the proposed accommodation would pose a safety risk to faculty, staff or other students or to the student seeking accommodation;
 - c) Financial Cost – whether the anticipated expenses (estimated out-of-pocket expenses to put the accommodation in place together with any long-term expenses to sustain the proposed accommodation), are likely to be cost-prohibitive;
 - d) Size and nature of the program or service – whether the proposed accommodation would be exceedingly disruptive to the program or service, taking into consideration the number of students, faculty, staff and others affected as well as the nature and inter- relationships of their roles;
 - e) Impact on academic requirements – whether the proposed accommodation will substantially undermine the academic requirements of the program; and
 - f) Alternatives – where a requested accommodation appears to create an undue hardship based on the above factors, whether an alternative accommodation may be available.
4. Consultation and Decision: Having regard for the factors set out in section F.3, and following consultation, as appropriate to the circumstances, with:
 - a. the student;
 - b. the course instructor in the case of an academic accommodation;
 - c. the clinical coordinator in the case of an accommodation in a clinical placement;
 - d. the administrator responsible for the University activity in question;
 - e. administrators responsible for coordinating accommodations in professional Faculties; and/or
 - f. others that may be warranted by the circumstances; the Centre will decide what accommodation will be provided.
5. Objection to decision: If a student disagrees with the accommodation decision, the student should attempt to resolve the matter through informal discussions with the Centre.
6. Appeal: If the student's objection cannot be resolved, the student may appeal the decision by filing a written appeal to the Vice-President Academic and Provost within 10 calendar days of the date that the Centre made its final decision in accordance with the Guidelines or Protocols established by the Centre. The Vice-President Academic and Provost may designate an Associate Vice-President Academic to act in their place. The Vice-President Academic and Provost or designate may uphold the initial accommodation decision, or may determine that an alternative form of accommodation should be provided. This decision is final, and cannot be appealed further.

Policy on the Submission of Student Papers

Any instructor may require student assignments to be submitted in both written and electronic (computer-readable) form, e.g. a text file or as an email attachment, as defined by the instructor. Use of third-party originality checking software does not preclude

instructor use of alternate means to identify lapses in originality and attribution. The results of such assessment may be used as evidence in any disciplinary action taken by the Senate.

Procedures

If an instructor plans to use originality-checking software in a course, students shall be informed in the course syllabus that their written work may be submitted to a text-matching software service, which is meant to assure students that everyone will be evaluated on the basis of their own work and to warn students that plagiarism is likely to be detected. The planned use of originality-checking software will also be included in the oral presentation of the course syllabus in the initial course meeting.

Students shall also be informed in the course syllabus that they are free, without penalty of grade, to choose an alternative method of attesting to the authenticity of their work.

Students shall inform instructors no later than two weeks after the commencement of courses of their intent to choose an alternate method.

Instructors shall provide students with at least two possible alternatives that are not unduly onerous and that are appropriate for the type of written work. Alternatives shall be chosen from the following:

- a) Submitting copies of multiple drafts demonstrating development of the work;
- b) Submitting an annotated bibliography;
- c) Submitting photocopies of sources; and
- d) Other alternatives devised by the instructor, provided that they are not unduly onerous.

Intellectual Honesty

A university should be a model of intellectual honesty. As such Dalhousie University shares in the academic values of honesty, trust, respect, fairness and responsibility (Centre for Academic Integrity, 1999 - of which Dalhousie University is a member). Failure to meet the University's standards with respect to these values can result in an academic offence. The length of time a student has attended university, the presence of a dishonest intent and other circumstances may all be relevant to the seriousness with which the matter is viewed.

Violations of intellectual honesty are offensive to the entire academic community, not just to the individual faculty member and students in whose course an offence occurs.

Instructors are responsible for setting examinations and assignments as part of the learning process and for evaluating those examinations and assignments, including ensuring that any rules stated for the procedures used in an examination or assignment are followed. Any violation of such stated rules that could result in a student gaining an unfair or unearned advantage may be considered to be an academic offence.

Examples of Academic Offences

There are many possible forms of academic dishonesty. Since it is not possible to list all instances of academic dishonesty, the following list of examples should be considered only as a guide. The omission of a dishonest action from this list does not prevent the University from prosecuting an alleged instance of that action.

A. Plagiarism

Members of academic communities are privileged to share in knowledge generated through the efforts of many. In return, each member of the community has the responsibility to acknowledge the source of the information used and to contribute knowledge that can in turn, be trusted and used by others. Consequently, the University attaches great importance to the contribution of original thought to learning and scholarship. It attaches equal importance to the appropriate acknowledgment of sources from which facts and opinions have been obtained.

Dalhousie University defines plagiarism as the submission or presentation of the work of another as if it were one's own.

Plagiarism is considered a serious academic offence that may lead to the assignment of a failing grade, suspension or expulsion from the University. If a penalty results in a student no longer meeting the requirements of a degree that has been awarded, the University may rescind that degree.

Some examples of plagiarism are:

- failure to attribute authorship when using a broad spectrum of sources such as written or oral work, computer codes/programs, artistic or architectural works, scientific projects, performances, web page designs, graphical representations, diagrams, videos, and images;
- downloading all or part of the work of another from the Internet and submitting as one's own; and
- the use of a paper prepared by any person other than the individual claiming to be the author.

The proper use of footnotes and other methods of acknowledgment vary from one field of study to another. Failure to cite sources as required in the particular field of study in the preparation of essays, term papers and dissertations or theses may, in some cases, be considered to be plagiarism.

Students who are in any doubt about how to acknowledge sources should discuss the matter in advance with the faculty members for whom they are preparing assignments. In many academic departments, written statements on matters of this kind are made available as a matter of routine or can be obtained on request. Students may also take advantage of resources available through the Writing Centre at writingcentre.dal.ca or the Dalhousie Libraries at www.library.dal.ca/services/infolit.

B. Irregularities in the Presentation of Data from Experiments, Field Studies, etc.

Academic research is based on the presentation of accurate information and data that are obtained honestly. The trustworthiness of our findings is essential to building knowledge in and across fields of study. Therefore, the falsification of data in reports, theses, dissertations and other presentations is a serious academic offence, equivalent in degree to plagiarism, for which the penalties may include the assignment of a failing grade, suspension or expulsion from the University or the withdrawal of a degree previously awarded.

C. Other Irregularities

Dalhousie University strives to provide equal opportunities for learners to demonstrate and to be recognized for their abilities. Any behaviour intended to gain unearned advantage over another person violates this principle. A member of the University who attempts, or who assists any other person in an attempt, to fulfill, by irregular procedures, any requirements for a course, commits an academic offence and is subject to a penalty.

In the absence of specific approval from the instructor of a course, all students should assume that every assignment is to be completed independently, without any form of collaboration.

Students should take reasonable precautions to prevent other students from having access, without permission, to their tests, assignments, essays or term papers.

The following are some examples of irregular procedures. The list should be used only as a guide since it is not possible to cover all situations that may be considered by the Senate Discipline Committee to be irregular.

- writing an examination or test for someone else;
- attempting to obtain or accepting assistance from any other person during an examination or test;
- during the time one is writing an examination or test, having material that is not specifically approved by the instructor;
- without authorization, obtaining a copy of an examination or test, topic for an essay or paper, or other work;
- without authorization from the faculty member in charge of that course, submitting any work for academic credit when one is not the sole author or creator;
- without authorization submitting any work that has been previously accepted for academic credit in any other course in any degree, diploma or certificate program, or has been completed as part of employment within the University, for example, as research activity. A repeated course is considered to be a separate course.

D. Aiding in the Commission of an Academic Offence

No student may encourage or aid another student in the commission of an academic offence, for example,

- by lending another student an assignment knowing that the other student may copy it for submission;
- by allowing another student to copy answers during an examination.

E. Misrepresentation

Any person who provides false or misleading information during an investigation of a suspected academic offence is guilty of an offence.

Discipline

Members of the University, both students and staff, are expected to comply with the general laws of the community, within the University as well as outside it.

1. Alleged breaches of discipline relating to student activities under the supervision of the Dalhousie Student Union are dealt with by the Student Union. Alleged breaches of discipline relating to life in the residences are dealt with by the residence discipline policy unless the President determines that some non-residence University interests are involved. Senate is charged with the authority to deal with cases of alleged academic offenses, see examples above, as well as with certain other offenses that are incompatible with constructive participation in an academic community.
2. On report of a serious breach of the law, or a serious academic offence deemed by the President, or in their absence by a Vice-President or the Dean of a Faculty, to affect vital University interests, a student involved may be temporarily suspended and denied admission to courses or to the University by the President, Vice-President or Dean, but any suspension shall be reported to the Senate, together with the reasons for it, without delay.
3. No refund of fees will be made to any student required to lose credit for any course taken, required to withdraw or who is suspended or dismissed from any course or any Faculty of the University.

Academic Dishonesty

Faculty Discipline Procedures Concerning Allegations of Academic Offences

I. Preamble

These procedures deal with allegations of academic offences and do not deal with violations of the student code of conduct. The purpose of these procedures is to delegate assessment of certain allegations of academic offences to the Faculty level.

Guideline for Evaluators

An alleged first or later breach of any academic standard by a student should never be dealt with by an evaluator, but in all instances, should be referred to the Academic Integrity Officer in accordance with these procedures. Any attempt by any person or body other than the Senate, the Senate Discipline Committee, or the Academic Integrity Officers to impose a penalty for an alleged offence is null and void and leaves the student still liable to discipline for that offence. Further, a student remains liable to discipline for a suspected offence notwithstanding a failure on the part of an evaluator to report the allegation in accordance with these procedures.

Where an allegation of a breach of academic standards has been made or is pending, the evaluator should not reveal the mark or grade to anyone until the Vice Chair (Academic Administration) has confirmed the disposition of the matter by the Senate Discipline Committee or the Academic Integrity Officer.

II. Academic Integrity Officers

1. Academic Integrity Officers are associated with the Faculties of Dalhousie University.
2. The Academic Integrity Officer shall act between the student and instructor, and may appear at Hearing Panels of the Discipline Committee or the Discipline Appeals Board to present the case against the student.
3. The Academic Integrity Officer is the Dean of the Faculty. The Dean may further delegate this role to one or more members of their academic staff except those who are Senate Officers, who are otherwise involved in the student discipline process, or who otherwise are in a potential conflict of interest relative to this role. Annually the name of the delegate(s) shall be communicated in writing to the Vice-Chair (Student Affairs) who shall report to Senate.
4. The Academic Integrity Officers shall meet as a group with the Senate Discipline Committee (SDC) at least once a year to discuss relevant policy issues and training requirements with a view to maximizing consistency and predictability in the administration of academic offences across the University. Such meetings will be convened and chaired by the Vice-Chair (Student Affairs).
5. **Penalties:** Penalties shall follow the guidelines contained within the University's Academic Regulations and the Senate Discipline Committee terms of reference set out in Section 10 of the Senate Constitution, which are reproduced below for convenience. "The range of penalties which may be imposed by the Senate Discipline Committee be circumscribed only by the requirement that such penalty or penalties be of an academic nature and, without restricting the generality of the foregoing, may include any one or more of:
 - 1) notation of the fact of discipline on the offender's transcript for a period of one or more years, but not exceed five years;
 - 2) repeat of the assignment that triggered the discipline;
 - 3) a failing grade or mark or assessment in the piece of work triggering the discipline;
 - 4) failure of the course or seminar or program;
 - 5) failure of the academic year;
 - 6) suspension for an academic term or year (to a maximum suspension of three academic years);
 - 7) expulsion from the University;
 - 8) loss of a current or continuing scholarship, or both, or loss of eligibility to receive or to maintain scholarships or prizes or bursaries; and
 - 9) removal from the Dean's List."

6. **Faculty Procedures** When an academic offence is suspected, the instructor shall submit a signed statement outlining the basis for the allegation, together with all relevant supporting evidence, to the Academic Integrity Officer of the Faculty which is responsible for the delivery of the course at issue, or in the case of an allegation in relation to a graduate thesis or other non course graduate materials, to the Academic Integrity Officer of the Faculty of Graduate Studies, within 10 working days of becoming aware of the alleged offence, but in any event no later than the deadline for submission of final grades to the Registrar, except in extraordinary circumstances, as determined by the Academic Integrity Officer.
7. Upon receipt of the material from the instructor, the Academic Integrity Officer shall determine whether or not the material supports a *prima facie* case that the student has committed an academic offence. If no *prima facie* case is made out, no further steps are taken in relation to the allegation, and the instructor and student will be so advised in writing.
8. If a *prima facie* case is established, then the Academic Integrity Officer will take the following further steps:
 - a) Check the academic discipline database maintained by the Senate Office to determine if the student(s) has a record of prior academic offence(s);
 - b) With the exception of cases involving two or more students facing allegations arising from the same fact situation ("common allegation") which shall proceed in accordance with paragraph 9, if the student(s) has a record of prior academic offence(s), forward the allegation to the Senate Discipline Committee;
 - c) If the allegation appears to be a first offence, and in all cases of two or more students facing a common allegation, inform the student(s) in writing of the nature of the allegation, the instructor's statement, the evidence, the procedures to be followed, the possible penalties, and possible sources of advice and support (will be a standard document);
 - d) Convene a meeting with the student(s), the student(s)'s advisor, if any, and the instructor within five working days upon receipt of the allegation by the student, which time may be extended at the request of the student, instructor, or Academic Integrity Officer, in appropriate circumstances.;
 - e) If the meeting does not take place within the time set out above, the Academic Integrity Officer has the discretion to convene another meeting with the student(s), the student(s)'s advisor, if any, and the instructor. The Academic Integrity Officer also has the discretion to convene additional meetings as may be reasonably required. In the event an initial meeting does not occur within a reasonable time after a *prima facie* case is established, the Academic Integrity Officer shall refer the allegation to the Senate Discipline Committee.
9. Notwithstanding paragraph 8b, in the case of two or more students facing allegations arising from the same fact situation ("common allegation"), the Academic Integrity Officer has the authority to convene a meeting with all such students in accordance with paragraphs 8d and 8e and to make findings for all such students under these Procedures, regardless of the fact that one or more of such students may have a record of prior academic offence(s). If the Academic Integrity Officer's assessment is that there is sufficient evidence to support a finding that a student facing a common allegation has committed an academic offence, for any such student who has no record of prior academic offence(s), subject to paragraph 14, the Academic Integrity Officer shall assess an appropriate penalty for the student in accordance with these Procedures; and for any such student who has a record of prior academic offence(s), the Academic Integrity Officer shall forward the matter to the Senate Discipline Committee for assessment of an appropriate penalty.
10. Following the meeting convened in accordance with paragraph 8, the Academic Integrity Officer shall make a preliminary assessment of whether there is sufficient evidence to support a finding that the student has committed an academic offence, and if there is sufficient evidence, make a preliminary assessment of what penalty would be appropriate in the circumstances. In making the latter assessment, the Academic Integrity Officer shall exercise broad discretion in considering possible mitigating circumstances including but not limited to extraordinary personal circumstances and lack of educational experience.
11. If the Academic Integrity Officer's assessment is that there is insufficient evidence to support a finding that the student has committed an academic offence, the Officer shall inform the student in writing with a copy to the Instructor within five working days of the meeting. This does not preclude an Academic Integrity Officer from proceeding with the allegation at a later date, should new evidence become available.
12. If the Academic Integrity Officer's assessment is that there is sufficient evidence to support a finding that the student has committed an academic offence, AND that the appropriate penalty for the student's conduct is any of the penalties described in paragraph 5, above, except those listed in subparagraphs 5 to 9 the Academic Integrity Officer shall provide the student with the option of accepting the finding and the proposed penalty, or of proceeding to the Senate Discipline Committee for a full hearing. The option shall be presented to the student within five working days of the meeting, and the student shall have two working days to respond. In the event that the student elects to accept the finding and proposed penalty, the Academic Integrity Officer shall so advise the Vice-Chair (Student Affairs).
13. Within 14 calendar days of the Vice-Chair (Student Affairs) being advised of the finding and agreed penalty under paragraph 12, the Vice-Chair (Student Affairs), or in their absence, the Chair or Vice-Chair (Academic Programs), and a student Senator appointed by the Dalhousie Student Union shall jointly review the finding and agreed penalty to determine whether the process is consistent with the Faculty Discipline Procedures Concerning Allegations of Academic Offences. If so, they shall ratify the matter on behalf of Senate and the Vice-Chair shall notify the student and the Academic Integrity Officer of such ratification. For ratification to occur, the decision must be unanimous. The finding and agreed penalty shall stand, despite possible insubstantial procedural errors. The Vice-Chair (Student Affairs) shall ensure that the offence is recorded on the Senate Discipline database and that the Registrar and any others are notified of the finding and penalty for immediate implementation. If the Vice-Chair (Academic Administration) and/or the student Senator have any material

concerns about the process, the Vice-Chair (Student Affairs) shall consult with the Academic Integrity Officer to determine whether the concerns can be resolved. If the Vice-Chair (Academic Administration) and the Academic Integrity Officer are unable to resolve any concerns, the matter shall be referred back to the Academic Integrity Officer for further consideration under these Procedures, after which the Vice-Chair (Academic Administration) and a student Senator shall jointly re-consider ratification. Should ratification still not occur, the matter shall be referred to the Senate Discipline Committee for a hearing.

14. If the Academic Integrity Officer's assessment is that there is sufficient evidence to support a finding that the student has committed an academic offence, but that the appropriate penalty for the student's conduct is one of those listed in subparagraphs 5 to 9 of paragraph 5 of these Procedures, the Academic Integrity Officer shall, within five working days of the meeting, notify the student in writing, with a copy to the instructor, that the matter will be forwarded to the Senate Discipline Committee for a full hearing.
15. Should a student request that an allegation be referred back to the Academic Integrity Officer after it has been forwarded to the Senate Discipline Committee, the Academic Integrity Officer has the discretion to grant such a request. A student's request shall be in writing, and delivered to the Vice-Chair (Student Affairs) within five working days of the date the allegation letter is sent to the student by the Vice-Chair (Student Affairs).
16. Prior to a hearing by the Senate Discipline Committee of an allegation against a student, the Academic Integrity Officer shall provide a written allegation to the Senate office identifying the evidence initially presented by the instructor pursuant to paragraph 6 and any additional evidence obtained by the instructor in the course of the assessment of the matter. The written allegation shall not include reference to whether or not any meeting(s) did occur pursuant to paragraph 8d or 8e, any statements that may have been made by the student at such meeting(s), or any alternate versions of the facts and circumstances that may have been presented by one or more students at such meeting(s). The student shall have the opportunity to provide a written submission in response prior to the hearing by the Senate Discipline Committee. Notwithstanding the foregoing, in the event of a statement made by a student at a hearing of the Senate Discipline Committee that is inconsistent with a statement previously made by that student in the meeting(s) with the Academic Integrity Officer, then the Academic Integrity Officer may refer to statements that may have been made by the student at such meeting(s).
17. Confidentiality must be maintained by those involved in each case when an academic offence is suspected and the instructor submits an allegation to the Academic Integrity Officer, except as is reasonably necessary to implement the finding and agreed penalty or as required in subsequent disciplinary proceedings related to the same matter.

Senate Discipline Committee

Jurisdiction of the Senate Discipline Committee

1. The Senate Discipline Committee has jurisdiction to hear:
 - a) Complaints referred to the Senate Discipline Committee under the Code of Student Conduct ("Code Complaints"); and
 - b) Allegations of academic offences referred to the Senate Discipline Committee under the Faculty Discipline Procedures Concerning Allegations of Academic Offences ("Integrity Allegations").
1. For the purpose of these procedures, the following definitions shall apply:
 - a) **Allegation** means a Code Complaint or an Integrity Allegation as the context requires.
 - b) **University Representative** means the President of the University or their designate in the case of Code Complaints, or the Academic Integrity Officer in the case of Integrity Allegations.
1. The Senate Discipline Committee's jurisdiction extends to Allegations against a student who, before or during the course of the disciplinary process involving the student, but prior to adjudication, has:
 - i) been compelled to withdraw academically;
 - ii) chosen to withdraw from the course, the program, or the University prior to being disciplined, or;
 - iii) chosen not to register at the University.
1. In the case of Integrity Allegations, a Hearing Panel of the Senate Discipline Committee may:
 - a) dismiss the allegation; or
 - b) impose any of the following:

- i) notation of the fact of discipline on the offender's transcript for a period of one or more years, but not exceeding five years;
- ii) repeat of the assignment that triggered the discipline;
- iii) a failing grade or mark or assessment in the piece of work triggering the discipline;
- iv) an imposed limit on the grade that can be given for the assignment or course;
- v) failure of the course;
- vi) suspension for an academic term or year (to a maximum suspension of three academic years);
- vii) expulsion from the University;
- viii) any other remedy of an academic nature that is within the power of Senate to grant.

1. In the case of a Code Complaint, a Hearing Panel of the Senate Discipline Committee may:

- a) dismiss the complaint; or
- b) impose any of the penalties set out under the Code of Student Conduct

1. In the case where an Allegation is proven and is not dismissed under section 4(a) or 5(a), the Hearing Panel of the Senate Discipline Committee may consider any mitigating or aggravating circumstances in its determination of the appropriate penalty.

Initiating a Hearing/Pre-Hearing Procedures

1. To initiate a hearing of the Senate Discipline Committee the University Representative shall submit a written request to the Senate Vice-Chair (Student Affairs), or designate. The request shall include a written submission outlining the Allegation together with all supporting evidence, documentation and a list of the witnesses on which the University Representative intends to rely.
2. The Senate Vice-Chair (Student Affairs) shall provide the student with a notice of the Allegation that shall include:
 - a) The material filed by the University Representative under section 7;
 - b) Notice of the deadline for the student to submit a written defence, any supporting evidence and a list of individuals who will attend at the hearing on the student's behalf; and
 - c) Notification of the student's right to be represented.
1. The student shall provide the Senate Vice-Chair (Student Affairs) with a written defence, supporting evidence and a list of the individuals who will also be attending, as well as their capacity (e.g. witness, support person, advocate) no later than the date specified in the notice of allegation. Any evidence or documentation provided after the deadline for submission may be ruled inadmissible by the Hearing Panel at the hearing.
2. The Chair of the Senate Discipline Committee shall constitute a Hearing Panel in a timely manner comprising three faculty and two students. No faculty member who is a current instructor of the accused student may serve as a member of the Hearing Panel. The student member of a Hearing Panel shall not be a member of the course from which the complaint originates. In the event that no student members of the Committee are able to participate on a Hearing Panel due to the provisions of this paragraph, the Dalhousie Student Union shall appoint an ad hoc member to the applicable Hearing Panel. The Committee Chair or an alternate faculty member shall chair the hearing.
3. The Student and University Representative shall be notified of the date, time and location of the hearing, as well as the names of all individuals who will be in attendance, no less than 10 working days in advance of the hearing.
4. Preliminary objections or issues must be raised as far in advance of the hearing as reasonably possible. The Chair of the Hearing Panel has sole discretion to rule on any preliminary issues or objections raised by either party that must be dealt with prior to the commencement of the hearing. The Hearing Panel may rule on any preliminary issues or objections raised at the commencement of the hearing.

Hearing Procedures

1. The Chair of the Hearing Panel shall determine procedures for the hearing in a manner that is consistent with the principles of natural justice and these Procedures.

2. In extenuating circumstances, the Chair of the Hearing Panel may decide to proceed with the hearing in the absence of one faculty member of the Hearing Panel.
3. In the event that the student fails to appear at the hearing, the Hearing Panel shall satisfy itself that reasonable efforts were made to notify the student and may proceed in the student's absence.
4. The student may participate at an oral hearing in person, by way of teleconference, or by such other means approved in advance by the Hearing Panel. The student may waive the right to an oral hearing and choose to proceed solely by written submissions.
5. Hearings shall be in camera.
6. At the commencement of the hearing, the Chair of the Hearing Panel shall explain the procedures to be followed and provide an opportunity for introductions as well as any questions, objections, or opening statements.
7. The University Representative shall present the Allegation and witnesses, if any. The student and any members of the Hearing Panel may question the University Representative and the University Representative's witnesses following the presentation of the Allegation.
8. The student may present their defence and witnesses, if any, following the University Representative's presentation. The University Representative and any members of the Hearing Panel may question the student and any of the student's witnesses following the presentation of the defence.
9. At the discretion of the Chair of the Hearing Panel, the parties may make final arguments following the presentations. The student shall have the last word.
10. At the discretion of the Hearing Panel, any evidence sought to be admitted by either party from witnesses who are not available to give evidence in person may be received in writing or in some other form.
11. The student is considered innocent until the Allegation is proven on a balance of probabilities, the burden of which lies with the University Representative.
12. The decision of the Hearing Panel shall be by majority.
13. The Hearing Panel shall report its decision including reasons for the decision and any penalty imposed, to the Vice-Chair (Student Affairs) who shall forward a copy of the decision to the student and the University Representative.
14. An audio recording of each oral hearing shall be made. The recording and all correspondence and documentary evidence relating to appeal proceedings shall be kept in accordance with the records management policies of the University Secretariat. The student may obtain a copy of the audio recording by making written request to the Senate Vice-Chair (Student Affairs) and may use such recording only for the purpose of an appeal of the decision in question.
15. Appeals from decisions of the Senate Discipline Committee may be made to the Senate Appeals Committee in accordance with the Senate Appeals Committee - Jurisdiction and Appeals Procedures.

16. The Senate shall maintain a confidential database of discipline decisions for the purposes of general reporting and proper adjudication of repeat offences.

University of King's College

The University of King's College Registrar shall notify the Dalhousie Registrar in the event that academic discipline proceedings have been commenced in relation to a Dalhousie student, and shall advise the Dalhousie Registrar of the outcome of such proceedings, including any sanctions imposed against the student. Where the student has been previously sanctioned for academic misconduct, the Dalhousie Registrar will provide the University of King's College Registrar with particulars of the offence and the sanction imposed.

Commentary on Penalties

A. Proactive Measures

Dalhousie University emphasizes education and proactive engagement, therefore a Proactive Measure, which is a form of recommendation, may be prescribed as an educational aid in addition to a Penalty. It may include but not necessarily be restricted to suggesting that the student seek some form of professional help from the Advising and Access Services Centre or Counseling Services or elsewhere which, for example may be time management or stress management, etc., and/or an apology for the infraction. The main purpose of a Proactive Measure is to help the student learn how to reduce the likelihood of future violations of academic integrity. It is important to note that it is the student's responsibility to decide whether or not to follow the Proactive Measure since it is not a formal Penalty but rather a recommendation. Therefore, there is normally no oversight by the University (AIO or SDC) to ensure that a Proactive Measure is followed.

B. Consequence

A Consequence is an outcome of the application of a Penalty. A Consequence is not imposed by the University's academic integrity policies but arises from the University's academic policies. For example the consequences of the Penalty of a failing grade may include but not necessarily be limited to: failure in a program, delay of graduation, loss of full-time student status, change in visa status (for a visa student), loss of eligibility for student aid, removal from the Dean's list. Similarly a notation on a transcript may have serious unforeseen consequences for future opportunities, etc. This list is not intended to be exhaustive. Therefore, while the university's academic integrity procedures (AIO or SDC) may foresee some consequences, ultimately the student bears the responsibility for any consequences of a Penalty.

Code of Student Conduct

Background and Purpose

The University occupies a special place in society as an academic community with a responsibility for the discovery and sharing of knowledge in our diverse community. This aspiration can only be fulfilled with a commitment from all members of the University community to a living, learning and working environment that is free of discrimination, harassment and violence and is also characterized by understanding, respect, trust, openness and fairness.

The University takes responsibility to create and promote this environment with the expectation that all members of the University community, including Students, are committed to upholding it.

The University recognizes the complexity of Student life at a post-secondary institution, and understands that Students may have differing experiences and backgrounds. Nevertheless, Students are responsible for their own actions and interactions with others. Students are required to conduct themselves responsibly in accordance with this [Code of Student Conduct](#) ("the Code") and to be individually responsible for their actions whether acting on their own or in a group.

The primary purpose of the Code is to ensure that appropriate Student behaviour is well understood. This includes transparency and consistency in expectations for conduct and an educational and restorative approach to remedies. Punitive approaches may be deemed applicable in some circumstances.

The Code:

1. Defines Student rights, responsibilities and expectations;
2. Identifies activities and behaviours that constitute non-academic misconduct;
3. Ensures transparency, consistency and predictability in policies and procedures;
4. Identifies the process by which Student non-academic misconduct will be addressed.

For the full Code of Student Conduct please click [here](#).

Protection of Property

Dalhousie University is the owner and/or occupier of the lands and buildings which comprise its campuses. In addition to all other processes set out in this Calendar (including the Code of Student conduct), the University reserves the right to exercise all rights and remedies available to it pursuant to any statute, by-law, regulation, ordinance, order, or otherwise, in order to protect campus property and those who use it.

1. Without limiting the foregoing, Dalhousie University may issue a notice against a student pursuant to the *Protection of Property Act* prohibiting entry to all or part of the campuses or prohibiting a particular activity or activities on all or part of the campuses, where circumstances warrant. Such a notice may be issued either separately or in conjunction with the procedures set out in the Code of Student Conduct. The notice may be in force for the period stated in the notice which will normally be for up to one calendar year. If considered appropriate by the Vice-Provost, Student Affairs, a notice may be renewed for further periods.
2. A notice under the *Protection of Property Act* may also be issued by Dalhousie University in relation to the Student Union Building at the request of the Student Union. In the case of urgent or emergency situations, such a notice may be issued immediately. If the Student Union request is to have a prohibition extend beyond seven days for a registered Dalhousie University student, the Student Union shall make a written request to the Vice-Provost, Student Affairs, providing detailed reasons for the request and the process followed leading up to the request for the notice, including details of when the student was advised that their behaviour or activities were inappropriate and ought to cease, the reasons provided to the student, and whether the student was afforded the opportunity to respond or to rectify behaviors or cease the inappropriate activity.
3. A Dalhousie University student may appeal any notice issued against them under the *Protection of Property Act* in writing to the Vice-Provost, Student Affairs.

Hazing Policy

A. Background & Purpose

Members of the University community share values that are at the center of campus life. Members of the University community are expected to aspire to the highest standards of campus community life based on common principles, including:

- Community
- Respect
- Accountability
- Diversity
- Safety

To help ensure the best possible student experience, University community members share the responsibility for welcoming and orienting new members of the University community in a positive way.

The purpose of this Policy is to identify activities that breach generally accepted standards of conduct when participating in student group activities and provide a process for dealing with allegations of Hazing in an appropriate and timely manner.

B. Application

This Policy applies to participation in Hazing by a member of the University community that occurs:

- (a) on the premises of Dalhousie;
- (b) off of Dalhousie premises in the course of activities sponsored by Dalhousie (or any of its Faculties, Schools, Departments or administrative units) or the Dalhousie Student Union or Dalhousie Student Union societies; or
- (c) where the conduct is alleged to adversely affect, disrupt or interfere with a student's reasonable participation in Dalhousie programs or activities.

C. Definitions

1. In this Policy:
 - a. "Complainant" means an individual who makes an allegation of Hazing under this Policy.
 - b. "Respondent" means an individual against whom an allegation of Hazing is directed or who becomes the subject of an investigation. Respondents may include individuals who planned, implemented or participated (actively, passively or as a

bystander) in Hazing.

c. "Hazing" means any activity expected of a student wishing to join a group (or of a student wishing to gain or maintain full status in a group) which humiliates, degrades, abuses, endangers, or subordinates that student, regardless of the student's apparent willingness to engage in the activity.

d. "Student Leaders" means students involved in a leadership position with a group, which students are not acting as Employees of Dalhousie

e. "Employee(s)" means any person employed by the University and may include students.

f. "Restorative process" refers to processes designed to create meaningful reflection and interaction between respondents and complainants (or others impacted by a Hazing incident) for educational and healing purposes. Use of restorative processes does not preclude other remedies or sanctions.

g. "Unit Head" means:

a. For Varsity Athletics, the Athletics Director.

b. For residences, the applicable Residence Life Manager.

c. For Dalhousie Student Union societies and clubs, the Vice President (Internal) of the Dalhousie Student Union.

d. For intramurals and clubs, the Student Life Manager.

e. For academic student activities, the Dean of the Faculty connected with the impugned activity.

f. For all other student activities not specifically addressed in this definition, the Executive Director, Student Life.

D. Policy

1. No member of the University community shall be involved in planning, implementing, or participating (actively, passively or as a bystander) in Hazing.
2. It is no defence to an allegation of Hazing that:
 - a. Express or implied consent of the student was obtained or participation was voluntary;
 - b. The conduct or activity was not part of an official group or was otherwise sanctioned or approved; or
 - c. The conduct was not an explicit condition or affiliation of membership with the organization or group.
3. Where a member of the University community has reasonable grounds to believe that Hazing is occurring or has occurred, the member is under a positive obligation to take all reasonable steps to stop the Hazing and report Hazing promptly under this Policy.
4. All members of the University community shall cooperate in any investigation process initiated under this Policy.
5. There will be no retaliation against any person on account of an allegation or an expressed intention to make an allegation under this Policy or on account of evidence or assistance given in relation to a proposed allegation under this Policy. Disciplinary action in response to retaliation will be addressed in accordance with applicable disciplinary processes.
6. Any communication or information gathered in any case is confidential except to the extent that disclosure is necessary to effectively implement this Policy or to undertake any disciplinary or remedial steps arising from a decision made under this Policy. Disciplinary action in response to a breach of confidentiality will be addressed in accordance with applicable disciplinary processes.
7. An allegation made in bad faith (with a conscious design to mislead or deceive, or with a malicious or fraudulent intent) may constitute grounds for disciplinary action against the Complainant, which will be addressed in accordance with applicable disciplinary processes.
8. All allegations of Hazing shall be reported in accordance with the terms of this Policy.

E. Administrative Structure

1. Authority: This Policy falls under the authority of the Provost.
2. Executive Director, Student Life: The Executive Director, Student Life is responsible for promoting the objectives of this Policy, receiving allegations of Hazing and determining the appropriate process for investigating allegations of Hazing.
3. Hazing Allegation Investigators: There shall be three Hazing Allegation Investigators who shall be responsible for conducting investigations into allegations of Hazing referred to the Investigation Committee. All Hazing Allegation Investigators shall be appointed by the Vice-Provost, Student Affairs. The Hazing Allegation Investigators shall include the Manager of Student Conflict Resolution, a representative from Security Services and an individual not from those offices who has investigative experience.
4. Hazing Committee: There shall be a Hazing Committee comprising the three Hazing Allegation Investigators, the Executive Director, Student Life, the Manager of Student Conflict Resolution, a representative from Security Services and a representative from Legal Counsel Office who shall meet at least once a year to discuss any issues arising out of this Policy.
5. Conflicts of Interest: Where the Vice-Provost, Student Affairs is unable to discharge their responsibilities under this Policy in relation to a particular allegation due to a potential conflict of interest, as defined by the University Policy on Conflict

of Interest, their responsibilities under this Policy shall be assigned to the Vice-President Academic or designate. Where the Executive Director, Student Life is unable to deal with an allegation of Hazing, their responsibility under this Policy for the purpose of the allegation in question shall be assigned to the Vice-Provost, Student Affairs.

6. Record-keeping: Records of all allegations, investigations, and decisions made under this Policy will be kept separate from all other university records and will be maintained and stored securely and confidentially under the care and control of the Executive Director, Student Life.
7. Annual Reporting to the Vice-Provost, Student Affairs: At the end of each academic year, the Executive Director, Student Life will deliver an annual report to the Vice-Provost, Student Affairs which will include
 - a. The number of allegations received under this Policy;
 - b. A representation of the allegations by kind of outcomes (e.g. dismissal of allegations, departmental resolution, investigation through Code of Student Conduct, etc);
 - c. A representation of the outcomes applied as a result of a finding of Hazing.

F.1 Reporting Procedures

1. Safe Reporting: There may be exceptional situations where an individual has a reasonable concern that their personal safety may be compromised by raising an allegation of Hazing. Such persons may initiate a confidential conversation with the Executive Director, Student Life or submit an anonymous written allegation to the Executive Director, Student Life. Where considered appropriate, the Executive Director, Student Life may accept unwritten anonymous complaints in a form the Executive Director, Student Life, deems appropriate. Whether or not an anonymous allegation can proceed in the absence of an identified Complainant will be determined by the Executive Director, Student Life, in their sole discretion, having regard to all of the circumstances of the case and the evidence available. If the individual does not feel safe reporting to the Executive Director, Student life they may file an allegation through the Office of Human Rights and Equity Services.
2. Confidential Consultation: If a person is uncertain whether an activity or activities constitute Hazing, that person may contact the Executive Director, Student Life to discuss the matter on a confidential basis.
3. Who may make allegations: Allegations of Hazing may be made by any member of the University community who has reasonable grounds to suspect that Hazing is occurring or has occurred.
4. Filing Allegations of Hazing: Other than complaints arising from Varsity Athletics as set out in Section F.2 of this Policy, allegations of Hazing must be made in writing to the Executive Director, Student Life as promptly as possible upon becoming aware of the alleged Hazing. Allegations should include supporting documentation and information where available.
5. Process advice: The Executive Director, Student Life will provide any Complainant with a copy of this Policy and will explain the processes for dealing with allegations under this Policy.
6. Initial Assessment: Within 10 business days of receipt of the allegation, the Executive Director, Student Life shall make an initial assessment of the allegation. The Executive Director, Student Life may request further information from the Complainant or others if required to assist in the assessment. The Executive Director, Student Life may:
 - a. Conclude that the allegation does not establish sufficient evidence to warrant further consideration, and advise the Complainant that the matter will be discontinued.
 - b. Conclude that there is sufficient evidence of possible Hazing to warrant further consideration; or
 - c. Conclude that the allegation(s) may raise an issue of illegal activity and notify the appropriate authorities.
7. Process Determination: In the event the Executive Director, Student Life concludes that there is sufficient evidence of possible Hazing to warrant further consideration they will refer the matter to one of the following processes:
 - a. Allegations shall be referred to the Unit Head in accordance with the terms of this Policy where the alleged Hazing involved no more than one Respondent and where the remedies and sanctions available to a Unit Head are sufficient for a reasonable resolution given the impact of the hazing.
 - b. Allegations shall be referred to the Code of Student Conduct in accordance with the terms of this Policy where the alleged Hazing involved no more than two Respondents and where the remedies and sanctions available to a Unit Head are insufficient for a reasonable resolution given the impact of the hazing.
 - c. Allegations shall be referred to the Investigation Committee where the alleged Hazing involved more than two Respondents.
8. Extraordinary Interim Remedies: In extraordinary circumstances, where the Executive Director, Student Life has reasonable basis to believe that evidence necessary to assess the allegation of Hazing will not be appropriately preserved or that there is a risk of significant continuing harm, the Executive Director, Student Life may, with or without notice to the Respondent(s), cause the appropriate administrative officers to locate, collect, inventory and secure all of the relevant original records, or copies if the originals are unavailable, to prevent the loss, alteration or fraudulent creation of records.
9. Extension of Time Limits: Any time limit set out in this Policy may be extended at the discretion of the Executive Director, Student Life where there is a bona fide reason to do so and where those affected by the allegation will not be unduly prejudiced.

F.2 Reporting Allegations – Varsity Athletics

1. Filing of Allegations – Varsity Athletics:
 - a. Allegations of Hazing in Varsity Athletics which are reported to the Varsity head coach, or which the Varsity head coach becomes aware of, shall be dealt with in the first instance by that head coach.
 - b. Each allegation of Hazing reported to the head coach shall be reported to the Director, Varsity Athletics and the Executive Director, Student Life, including a report of any restorative, remedial and disciplinary action taken by the head coach. The Director, Varsity Athletics shall determine if the matter needs to be referred to the Executive Director, Student Life for further action under this Policy.
 - c. Varsity athletes shall, in all circumstance, be permitted to report instances of Hazing directly to the Executive Director, Student Life.
 - d. In circumstances where the head coach has already taken action, the Executive Director, Student Life shall determine if further action is required under this Policy.

F.3 Procedures for Matters Referred to Unit Heads

1. Referral to the Unit Head: If the Executive Director, Student Life concludes that there is sufficient evidence of possible Hazing to warrant a referral to the Unit Head for assessment the Executive Director, Student Life shall provide the Respondent with a copy of the Allegation, a copy of this Policy and notice of the Procedures under which the allegation will be investigated. A copy of the notice to the Respondent and the allegation will also be forwarded to the Unit Head.
2. Assessment: Within 10 working days of receipt of the referral the Unit Head will assess the allegation in accordance with the following process:
 - a. The Unit Head will meet with Complainant(s) to give them an opportunity to present their allegation and to identify other relevant information and witnesses;
 - b. The Unit Head will then meet with the Respondent (s), to give them an opportunity to address the allegation and identify relevant information and witnesses.
 - c. The Unit Head may meet with any other individuals whom they deem relevant to the allegation, and may request access to, or production of, records or information that they deem relevant to the assessment.
 - d. The Unit Head will document the information provided in each of the meetings set out in subsections (a), (b) and (c) above.
3. Referral Back to the Executive Director, Student Life: If at any point during the assessment process the Unit Head determines that the allegations of Hazing are more severe than initially anticipated, the Unit Head may, in consultation with the Executive Director, Student Life, refer the matter back to the Executive Director, Student Life for a re-determination of the appropriate process.
4. Decision: The Unit Head shall, having regard to all information received during their assessment of the allegation, make a determination of whether there has been Hazing, and if there has been Hazing, what restorative processes, remedies and/or sanctions will be imposed.
5. Restorative Process, Remedial Action and Sanctions: In each case where the Unit Head determines that a student, who is not acting in the student's role as an Employee, has participated in Hazing the Unit Head may impose one or more of the following:
 - a. In conjunction with the advice of the Manager, Student Conflict Resolution, a restorative process to engage respondent(s) in meaningful reflection and action with those impacted by the Hazing incident;
 - b. Temporary removal from a group;
 - c. Temporary loss of access to facilities or support services;
 - d. Participation in educational or remedial programs;
 - e. Community service;
 - f. Any other sanction which does not otherwise permanently impact the individual's privileges.
6. Employees: In a case where the Unit Head determines that an Employee, including a student acting in their role as an Employee, has participated in Hazing, the matter shall be referred to Human Resources to be addressed in accordance with applicable employee disciplinary processes.
7. Communication of Decision: The Unit Head will report in writing the outcome of the case to the Respondent in ways that appropriately address any privacy and security issues. Where the Complainant has a legitimate interest in the outcome of an investigation, the Unit Head will report in writing to the Complainant in ways that appropriately address any privacy or security concerns.
8. Reporting of Decisions: The outcome of each assessment shall be reported to the Executive Director, Student Life, including a report of any sanctions or remedies imposed.

F.4 Procedures for Matters Referred to the Code of Student Conduct

1. Referral to Vice-Provost, Student Affairs: The Executive Director, Student Life shall forward the written allegation to the Vice-President Student Services in accordance with the Code of Student Conduct. Following referral to the Vice-Provost, Student Affairs all issues arising out of the allegation, including appeals, shall be dealt with in accordance with the Code of Student Conduct.

F.5 Procedures for Matters Referred to the Investigation Committee

1. Notifying the Respondent: If the Executive Director, Student Life concludes that there is sufficient evidence of possible Hazing to warrant a referral to the Investigation Committee the Executive Director, Student Life shall provide the Respondent with a copy of the Allegation, a copy of this Policy and notice of the Procedures under which the allegation will be investigated.
2. Representation: Respondents may have representation if they choose.
3. Informal Resolution: Prior to initiating an investigation, the Executive Director, Student Life will explore the possibility of informal resolution. Attempts at informal resolution may be made at any stage of the process. Any informal resolution shall be with the consensus of the Respondent(s) and, where the Complainant has a legitimate interest in the outcome of an investigation, the Complainant.
4. Investigation: If informal resolution is not reached within 10 working days of notifying the Respondent, the Executive Director, Student Life shall initiate an investigation. The investigation shall be concluded (including the delivery of the investigation report set out in section F.5.13) within 60 calendar days of its initiation, in accordance with the following process:
 - a. The Executive Director, Student Life will provide the Respondent(s) 10 working days to provide to the Executive Director, Student Life their written response to the allegation.
 - b. The Executive Director, Student Life will appoint an Investigation Committee comprising two of the Hazing Allegation Investigators.
 - c. The Executive Director, Student Life will provide the Investigation Committee with a copy of the Allegation, the Response, and will provide guidance on the process.
 - d. The Investigation Committee will meet with the Complainant(s) to give them an opportunity to present their allegation and to identify other relevant information and witnesses.
 - e. The Investigation Committee will then meet with the Respondent(s), to give them an opportunity to address the allegation and to identify other relevant information and witnesses.
 - f. The Investigation Committee may meet with any other individuals whom they deem relevant to the allegation, and may request access to, or production of, information or records that they deem relevant to the allegation.
 - g. The Investigation Committee may meet subsequently with the Complainant(s) and/or the Respondent(s) in light of information they have received in the course of the investigation.
 - h. The Investigation Committee will have a note-taker present at all meetings with the Complainant(s), the Respondent(s) or other individuals who are deemed relevant to the allegation.
 - i. Each interview will be summarized in writing by the Investigating Committee in the form of an interview report, which will be forwarded to the interviewee for confirmation that the report fairly summarizes the interview. In the event an interviewee believes that the report does not fairly summarize their interview they may provide written comments to the Investigating Committee which must be provided to the Committee within two working days of receiving the report.
5. Investigation Report: The Investigation Committee will review all of the information gathered in the course of the investigation and submit an investigation report to the Executive Director, Student Life that includes:
 - a. A summary of the allegation(s);
 - b. A summary of the response;
 - c. An analysis of the evidence relevant to the matters raised;
 - d. Findings of fact with respect to the allegation(s) together with supporting reasons;
 - e. A determination of whether there has been Hazing;
 - f. Where Hazing is found, an assessment of the severity of the Hazing and a review of any mitigating factors; and
 - g. Where Hazing is found, recommendations on appropriate restorative processes, remedies and sanctions.
6. Consideration by Vice-Provost, Student Affairs: The Executive Director, Student Life will forward the investigation report to the Vice-Provost, Student Affairs. The Vice-Provost, Student Affairs may request additional information or clarification from the Executive Director, Student Life if necessary to make a determination.
7. Outcomes:
 - a. The Vice-Provost, Student Affairs shall consider the report and, where a finding of Hazing has been made, make and record a decision as to what sanctions or remedies will be imposed.
 - b. In the event that the Vice-Provost, Student Affairs imposes remedies or sanctions which differ from the recommendations of the Investigation Committee, the Vice-Provost, Student Affairs shall also include in the record a summary of the nature and basis of the Investigation Committee's recommendations and the reason(s) forming the basis for the alternate recommendation.

8. Remedies and Sanctions: In each case where the Vice-Provost, Student Affairs determines that a student, who is not acting in their role as an Employee, has participated in Hazing the Vice-Provost may impose one or more of the sanctions and remedies:
 - a. Suspension of some or all individual or group privileges.
 - b. Placing the group or individuals on non-academic probation for a set period of time.
 - c. Removal from a group, including varsity athletic teams.
 - d. Removal from leadership positions with groups (group executive, team captaincy, etc.).
 - e. Loss of access to facilities or support services.
 - f. Mandatory education sessions for executive and/or members.
 - g. Community service.
 - h. Financial restitution and compensation for any loss, damage or injury.
 - i. Any other sanction which is considered appropriate in the circumstances.
9. Employees: In each case where the Vice-Provost, Student Affairs determines that an Employee, including students who are acting in their role as an Employee, has participated in Hazing the matter shall be referred to Human Resources to be addressed in accordance with the applicable employee disciplinary processes.
10. Communication of Decision: The Vice-Provost, Student Affairs will report in writing the outcome of the case to the Respondent in ways that appropriately address any privacy and security issues. Where the Complainant has a legitimate interest in the outcome of an investigation, the Vice-Provost, Student Affairs will report in writing to the Complainant in ways that appropriately address any privacy or security concerns.

F.6 Appeals

1. Unit Head Decisions – All decisions of the Unit Head are final and there is no appeal of those decisions.
2. Varsity Head Coach Decisions - All decisions of the Varsity head coaches are final and there is no appeal of those decisions.
3. Vice President Student Services Decisions
 - a. Decisions made by the Vice-Provost, Student Affairs shall be appealable to the Senate Appeals Committee.
 - b. Appeals must be filed within 30 calendar days of the date the student was notified of the decision.

Senate Appeals Committee

Jurisdiction of the Senate Appeals Committee

1. The Senate Appeals Committee has appellate jurisdiction.
2. The Senate Appeals Committee is not an investigative body.
3. The Senate Appeals Committee does not receive or determine:
 - a) allegations of discrimination, which are addressed under the Statement on Prohibited Discrimination, or
 - b) requests for accommodation, which are addressed under the Accommodation Policy for Students.
4. The Senate Appeals Committee shall consider the following appeals initiated by students:
 - a) Academic appeals from decisions or the refusal to make decisions at the Faculty level regarding academic standards, academic evaluation, academic progression, academic advancement, or the application of other University or Faculty academic regulations.
 - b) Discipline appeals from decisions of the Senate Discipline Committee.
5. An appeal may be initiated on the following grounds:
 - a) the decision under appeal was made without jurisdiction,
 - b) a denial of natural justice, or
 - c) unfairness in the application of the relevant regulations regarding academic standards, academic evaluation, academic progression, academic advancement, or other University or Faculty academic regulations.
6. The Senate Appeals Committee shall not consider appeals:
 - a) by students in an academic appeal who have not exhausted the approved appeal processes of the relevant Faculty,
 - b) by students from the decision of a Faculty regarding professional unsuitability, said appeals falling under the jurisdiction of the Senate Steering Committee,
 - c) by a Faculty or faculty members,
 - d) by applicants for admission to University programs, or
 - e) by applicants for scholarships, awards or bursaries.
7. A Hearing Panel of the Senate Appeals Committee may:
 - a) dismiss the appeal,
 - b) allow the decision under appeal to stand, despite possible insubstantial procedural errors,
 - c) in an academic appeal, allow the appeal, with an appropriate remedy within the authority of Senate,

- d) in a discipline appeal, allow the appeal and:
 - a) quash the decision of the Senate Discipline Committee in its entirety,
 - b) re-hear the matter itself, with the consent of the Appellant and the Faculty, or
 - c) direct a re-hearing on the merits by a newly constituted panel of the Senate Discipline Committee, no members of which were on the hearing panel whose decision was under appeal.
- 8. In an academic appeal, the Hearing Panel shall not conduct a substantive evaluation of the work of a student, but if unfairness in the evaluation procedure is established, the Panel may direct a re-evaluation of the work to be conducted by qualified persons designated by the Panel.

Appeals Procedures

1. An appeal shall be initiated by submitting a written Notice of Appeal to the Senate Vice-Chair (Student Affairs), or designate, containing:
 - a) the name, Banner identification number and mailing address of the Appellant,
 - b) a copy of the decision giving rise to the appeal,
 - c) a description of the matter under appeal,
 - d) the grounds for the appeal, and
 - e) the remedy sought by the Appellant.
2. An academic appeal alleging the refusal to make a decision at the Faculty level shall be submitted with reasonable promptness. All other appeals shall be submitted within 30 calendar days of the date that the decision under appeal was sent to the student. An extension of time to submit an appeal may be permitted by the Senate Vice-Chair (Academic Administration), or designate, if the Appellant establishes reasonable grounds for granting the extension.
3. The parties to an appeal are the student, as Appellant, and the Faculty, as Respondent. In an academic appeal, the Dean of the applicable Faculty shall designate one or more representatives to respond to the appeal. In a discipline appeal, the Academic Integrity Officer of the applicable Faculty, or designate, shall respond to the appeal.
4. Upon receiving notice of an academic appeal, the Senate Vice-Chair (Student Affairs) shall require a statement from the Dean of the applicable Faculty confirming that all appeal processes of the Faculty have been exhausted.
5. For each appeal, the Chair of the Committee shall constitute a Hearing Panel in a timely manner. The Hearing Panel shall consist of four faculty members and one student member of the Committee, and shall choose its own Chair. None of the faculty members of a Hearing Panel shall be a member of the Faculty from which the appeal originally emanates or belong to the department or program in which the student is or was enrolled. The student member of a Hearing Panel shall not be a member of the course, department, program, School or College from which the appeal emanates. In the event neither student member of the Committee is able to participate on a Hearing Panel due to the provisions of this paragraph, the Dalhousie Student Union shall appoint an ad hoc member to the applicable Hearing Panel.
6. The Appellant is entitled to an oral hearing, in accordance with the principles of natural justice. The Appellant may participate at an oral hearing in person, or at their expense, by way of teleconference, or by such other means approved in advance by the Hearing Panel. The Appellant may waive the right to an oral hearing and choose to proceed solely by written submissions.
7. Each party is responsible for presenting to the Hearing Panel all relevant evidence and submissions for the Panel to consider in the determination of the appeal. Written submissions are required from each party and shall contain:
 - a) copies of all documents relevant to the appeal,
 - b) supporting arguments,
 - c) a list of all witnesses for that party and a brief description of their anticipated evidence, and
 - d) the decision and any remedy being sought.
8. Written submissions shall be made:
 - a) by the Appellant, within 15 calendar days of the Senate Vice-Chair (Student Affairs) requesting the submission, and
 - b) by the Respondent, within 15 calendar days of receiving the Appellant's submission.
 but these timelines may be extended or abridged by the Senate Vice-Chair (Student Affairs), or designate, in appropriate circumstances.
9. The hearing of each appeal shall be in camera. The Chair of the Hearing Panel shall determine procedures for the hearing in a manner that is consistent with the principles of natural justice and these Procedures. In extenuating circumstances, the Chair of the Hearing Panel may decide to proceed with the hearing in the absence of one faculty member of the Hearing Panel.
10. The decision of the Hearing Panel shall be by majority. The Hearing Panel shall deliver written reasons for its decision to the Senate Vice-Chair (Student Affairs). The decision of the Hearing Panel shall be final and binding on the parties, with no further appeal.
11. An audio recording of each oral hearing shall be made. The recording and all correspondence and documentary evidence relating to appeal proceedings shall be kept for a period of three calendar years from the date of the decision of the Hearing Panel, in accordance with the policy of the University Secretariat.

Suspension or Dismissal from a Program on the Grounds of Professional Unsuitability Faculty of Health

The Faculty of Health, acting through its Faculty Committee on Student Appeals and in consultation with the Directors and Dean, may suspend or terminate a student from a program if the student is judged to be unsuitable for the profession in which they are studying. Because of the nature of the study and practice of the various health professions, which places care givers in a position of special trust, certain impairments or some types of conduct unbecoming to a member of a health profession may be grounds for suspension or dismissal.

The following list includes examples of behaviors that might indicate unsuitability for the various health professions. The nature of these behaviors is such that, should any of them ever be repeated, grievous harm could be caused to clients. This list should not be considered to be all inclusive:

1. a criminal act (e.g. assault, sexual assault, fraud, and drug trafficking) which according to established Faculty processes was determined to be of such a nature as to bring disrepute to the profession, or by which in the opinion of the Faculty, the student demonstrated poor judgment, lack of integrity or (other) unsuitability for the profession; or evidence that, on the balance of probability, the student had committed such an act;
2. being under the influence of alcohol or drugs while participating in client care, any other professional activity, or any activity related to the practice of the health profession;
3. in accordance with provisions of the Nova Scotia Human Rights Act, the occurrence of a health condition that impairs essential performance required for the health profession;
4. unethical behaviour as specified by the code of ethics/standard of practice of the health profession.

The student's situation will be considered with discretion throughout the investigation of the allegation of unsuitability and these deliberations shall determine whether suspension, dismissal or neither is recommended. The principles of natural justice and due process will be observed in all investigations.

Any member of the University community can bring to the attention of the Director behaviors that are deemed unsuitable. These behaviors will be investigated and allegations heard.

Appeals will follow the appeal procedure for academic matters within the Faculty of Health notwithstanding that the criteria are different. At the University level, appeals will require formation of an *ad hoc* Senate Committee.

Where the rules of a faculty, such as Health, expressly provide that suitability, fitness, or aptitude for the practice of the profession is a requirement for advancement or graduation, or both, and a Faculty determines that a student should be suspended or dismissed or otherwise should not advance or graduate because of unsuitability for the relevant profession, an appeal from the Faculty decision may be made to an ad-hoc appeal committee established by the Senate Steering Committee. The Ad-hoc Appeal Committee shall:(1) hear an appeal by a student from the decision of a Faculty regarding suitability, fitness or aptitude for the practice of the relevant profession when: a) the student has exhausted the approved appeal regulations and procedures of the relevant Faculty; and b) the student alleges that there were irregularities or unfairness in the application of the regulations in question. The Ad-hoc Appeal Committee shall not hear appeals: a) by students on a matter involving a requested exemption from the application of Faculty or University regulations or procedures; b) on substantive aspects of a finding of unsuitability.

Acceptable Use of Information Technology Resources

A. Purpose

The purpose of this policy is to outline appropriate use of Information Technology Resources owned, leased, controlled and/or operated by the University.

B. Application

This policy applies to all individuals who have been granted a NetID and/or Banner account by the University.

This policy does not replace other policies, procedures or guidelines concerning the use of specific IT Resources or data management but rather sets out a minimum standard of acceptable use.

C. Definitions

In this Policy,

"User Account" means a NetID and/or Banner account issued by the University;

"Information Technology Resources", or "IT Resources", means computing equipment, peripherals, facilities, networks or systems owned, leased, controlled or operated by the University, including those purchased through research funds;

"User" means an individual who has been issued a User Account.

D. Policy

1. Accounts

1.1 Authorized access to IT Resources requires a User Account. User Accounts are non-transferable.

1.2 Users are responsible for any and all uses of their User Account and are expected to take reasonable steps to ensure the security of their User Account.

1. Acceptable Use

2.1 Users shall use IT Resources for authorized purposes only.

2.2 No User shall use IT Resources for any disruptive or unauthorized purpose, or in a manner that violates any law, University regulations, policies or procedures. Examples of unacceptable uses of IT Resources include, but are not limited to, the following:

2.2.1 using another person's User Account, or misrepresenting themselves as another User;

2.2.2 disclosing passwords or other access codes assigned to themselves or others;

2.2.3 interfering with the normal operation of IT Resources by, among other things, unauthorized network interception, network traffic, flooding the network with messages, sending chain letters or pyramid solicitations;

2.2.4 copying, removing or distributing proprietary software and/or data without authorization;

2.2.5 breaching terms and conditions of software licensing agreements;

2.2.6 accessing, displaying, transmitting, or otherwise making available information that is discriminatory, obscene, abusive, derogatory, harassing or otherwise objectionable in a university setting;

2.2.7 destroying, misplacing, misfiling, or rendering inoperable any stored information on a University administered computer or other information storage, processing or retrieval system;

2.2.8 unauthorized use of IT Resources for profit or commercial gain; and

2.2.9 attempting to or circumventing security facilities on any system or network.

1. Consequences of Unacceptable Use

3.1 If there is reason to suspect that a User has violated this policy, the Assistant Vice-President, Information Technology Services or the Information Security Manager may temporarily revoke or restrict User Account access privileges of any User, pending further investigation by the Information Security Manager

3.2 To aid in the investigation of a suspected violation of this policy, the Information Security Manager may examine a User's User Account information, including, but not limited to, emails, files, and any other material or data connected with the User Account, provided that they obtain the Assistant Vice-President Information Technology Services' prior written approval. If the User in issue works within the Information Technology Services Department, then approval must be obtained from the President

3.3 If the investigation concludes that a violation of this policy has occurred, the Assistant Vice-President Information Technology Services may restrict, suspend or revoke the User's access to any or all of the University's IT Resources, and may

3.3.1 in the case of students, initiate disciplinary proceedings under the Code of Student Conduct;

3.3.2 in the case of employees, refer the matter for consideration of discipline in accordance with applicable collective agreements or human resource policies, as appropriate.

Academic Regulations

These regulations apply to all students in the College of Arts and Science and the faculties of Agriculture, Architecture and Planning, Computer Science, Engineering, Health and Management. Students in the faculties of Architecture and Planning, Computer Science, Engineering and Health should also consult the regulations specific to their, faculty, school or college found in the appropriate sections of this calendar.

PLEASE NOTE:

A student is governed by the academic regulations in place at the time of initial enrolment as long as the degree is completed within the time permitted (see [Section 15-Duration of Undergraduate Studies](#)), and that subsequent changes in regulations shall apply only if the student so elects. Students applying the old academic regulations should consult the calendar of the appropriate year.

It is the student's responsibility to maintain documentation of registration and subsequent changes. The Registrar's Office will rely solely upon computer records and will not maintain paper records of changes to a student's registration.

1. Definitions

For definitions of some commonly used terms, see [Definitions](#) section.

Within these regulations, reference to the Student Appeals Committee should be interpreted as the Student Affairs Committee in the Faculty of Arts and Social Sciences, as the Committee on Studies and Appeals in the Faculty of Science, the Undergraduate Committee on Studies in the Faculty of Health, the Undergraduate Academic Appeals Committee in the Faculty of Management, the Academic Appeals Committee in the Faculty of Engineering, the Appeals Committee in the Faculty of Computer Science, the Appeals Committee in the Faculty of Agriculture and the dean's office in the Faculty of Architecture and Planning.

2. Course Selection

2.1 Numbering of Courses

Courses are numbered to indicate their general level. Those in the 1000 series are introductory degree level courses at Dalhousie. Courses in the 2000, 3000, 4000 series are usually first available to degree level students in the second, third and fourth year respectively. Often these courses have prerequisites. Some departments, schools, colleges have minimum grade requirements for entry into courses above the 1000 level. Such requirements are listed in the calendar entries for the departments, schools, colleges concerned.

Courses listed in the 0100 series are introductory technology level courses at Dalhousie. Courses in the 0200 series offer more detailed exploration of a discipline at the Technology level. 0200 level courses usually have prerequisites or require background knowledge.

Courses listed in the 0001-0099 series are university preparatory courses.

An example of a course identifier is as follows: CHEM 1011

CHEM	subject code
1011	course number & level

Courses with numbers below 0100 normally do not carry credit.

2.2 Academic Advice

At Dalhousie, academic advice is available to all students prior to registration. To find out who your advisor is, see the advising website (dal.ca/advising) and click on "Where to go for advising."

Academic advisors at Dalhousie strive to enable students to make a successful transition to university, to take responsibility for learning, how to set academic, career and personal goals as well as to develop strategies for achieving them.

Specifically, academic advisors at Dalhousie help students:

- assess and clarify their interests, academic abilities and life goals;
- develop suitable educational plans consistent with their goals;
- select appropriate courses and complementary educational experiences;
- interpret institutional rules and requirements;
- develop decision-making skills;
- resolve academic problems, conflicts and concerns;

- evaluate their progress towards their goals;
- by referring them as necessary to other resources.

3. Workload

3.1 Regular Year

3.1.1 College of Arts and Science

Thirty credit hours per academic year shall be regarded as constituting a normal workload for a student. Students wishing to increase their workload to 18 credit hours in any term and have a sessional GPA greater than 3.00 need to contact the Registrar's Office. Students with a GPA less than 3.00 will need to contact the appropriate Assistant Dean to request permission.

3.1.2 Faculty of Management

Thirty credit hours per academic year shall be regarded as constituting a normal workload for a student. During each work term or internship, the work assignment constitutes the normal workload. BComm Co-op and BMgmt students wishing to exceed the normal allowable credit hours must apply to exceed the normal workload (see below).

Note that the second and third summers are regular academic and workterms for Commerce Co-op students.

Students wishing to increase their workload to 18 credit hours in any academic term who has a cumulative GPA greater than 3.00 can contact the Registrar's Office directly with this request. Students with a cumulative GPA less than 3.00 will need to contact the Undergraduate Advising Office, Suite 2086, Rowe Building. Such permission will not be granted for more than three credit hours per term, nor to any student who is in their first year of study, or who in the preceding academic term earned a term GPA of less than 3.00 on a full load of courses. Students are not permitted to take more than six courses in any single academic term, or one course in addition to the work term or internship.

3.1.3 Faculty of Agriculture

A normal full-time course load for students registered in degree programs in Agriculture is considered to be five courses per semester. A normal full-time course load for students registered in the technology programs is five to six courses per semester, depending on the program. Students wishing to increase their workload to six courses per semester (degree) or seven courses per semester (technology) with a sessional GPA greater than 3.00 should contact the Registrar's Office. Students with a GPA less than 3.00 will need the permission of the faculty advisor and the Assistant Dean - Students.

3.1.4 Faculties of Architecture and Planning, Computer Science, Engineering, Health and Bachelor of Management

For normal workloads, see the individual school or college section of the calendar. Written permission from the school or college Committee on Studies or the Program Administrator for Bachelor of Management is required if the normal workload is to be exceeded. Applications from students who give good reasons for wishing to take an overload will be considered. Such permission will not normally be granted to any student in the first year of study, or to any student who, in the preceding academic term, obtained a grade point average of less than 3.00.

3.2 Summer Session

It is recommended that students take only six credit hours in each of the May - June or July - August parts of term. Students who want to exceed the recommended number of credit hours should speak to an academic advisor in their faculty, school or department.

4. Registration

1. It is a student's responsibility to register. Registration instructions are available on the web at

dal.ca/advising

. Registration for courses is completed using

[Dal online](#)

. The timetable of courses for and registration dates are available in March - June.

2. A student is considered registered after selection of courses. Selection of courses is deemed to be an agreement by the student for

the payment of all assessed fees.

3. All students are required to obtain ID card or validate an existing ID card at the DalCard Office.
4. Space in class. Enrolment is limited in all courses, and admission does not guarantee that space will be available in any course or section. However, no student in a graduating year may be excluded from a course required by that student to meet degree program requirements because of lack of space. This rule does not apply to elective courses or to preferred sections of courses. Any student in a graduating year who encounters such a situation should immediately consult the department chair, school director or dean.
5. Students may be removed from courses for which they do not have prerequisites. Prerequisite waivers can be granted only by the instructor and must be submitted in writing, with the instructor's signature, to the Registrar's Office.

ID cards are mandatory and must be presented to write an officially scheduled examination. In addition, some services such as the issuance of bursary or scholarship cheques, library privileges, Dalplex and Langille Athletic Centre require the presentation of a valid Dalhousie ID card.

5. Course Changes and Withdrawal

5.1 Course Changes

It is recognized that students may wish to revise courses after initial selection has occurred. Students should be aware that dropping or changing courses may have academic and financial impacts and are encouraged to review program requirements, student aid and scholarship eligibility and refund schedules in advance of any course changes. The dates for adding and deleting courses are published in the [Academic Dates](#) section of the applicable calendar. Some programs and courses require modified timelines but normally:

5.1.1 The last day to register and add courses will be two weeks (10 business days) after the first day of class. This provides an appropriate amount of time for students to assess and change courses while still being able to complete course work and assignments.

5.1.2 The last day to drop courses without a transcript notation (drop without a grade of W) will be one-third (20 business days) after the first day of class. This allows students an appropriate amount of time to assess if the course meets their academic needs without incurring academic penalty.

5.1.3 The last day to change between audit and credit will one-third (20 business days) after the first day of class. This allows an appropriate amount of time for changes in the assessment of a course.

5.1.4 The last day to drop courses with a transcript notation (drop with a grade of W) will be two-thirds (40 business days) after the first day of class. This allows for a student to withdraw but given that a significant percentage of the course has occurred, a transcript notation is warranted.

5.1.5 Courses cannot be dropped in the final third of the academic term. Students have completed sufficient course components to merit a final assessment.

5.2 Withdrawal

Non-attendance does not, in itself, constitute withdrawal. Withdrawals are effective when a student withdraws from courses on the Web at www.dal.ca/online or written notification is received at the Registrar's Office.

In the Faculty of Health students who wish to withdraw from the university must obtain written approval from the appropriate school or college and submit the appropriate forms to the Registrar. Students should not discontinue attendance at any course until their withdrawal has been approved.

Students withdrawing voluntarily from the University should consult the individual faculty regulations and the Fees section of this Calendar.

When the work of a student becomes unsatisfactory, or a student's attendance is irregular without sufficient reason, the faculty concerned may require withdrawal from one or more courses, or withdrawal from the Faculty. If a student is required to withdraw from a Faculty such a student may apply to another Faculty. However, in assessing the application, previous performance will be taken into consideration.

6. Counting of Credits for Two Dalhousie Programs

6.1 Undergraduate Degrees

Students who hold one undergraduate degree from Dalhousie and who wish to gain a second undergraduate degree must fulfill the requirements of the second degree and meet the following stipulations:

1. Only credit hours that are applicable to the program for the second degree may be counted for credit.
2. Each credit hour carried forward must have a grade of C or higher.

6.1.1 College of Arts and Science

For the honours degree, a minimum of 60 new credit hours are to be taken, in accordance with "Degree Requirements" listed elsewhere in this calendar.

For the major (120 credit hour) BA degree, a minimum of 60 new credit hours, or the equivalent, must be taken. At least 36 of these are to be beyond the 1000 level in a new major subject, and at least 18 of the 36 must be beyond the 2000 level.

For the major (120 credit hour) BSc degree, a minimum of 60 new credit hours, or the equivalent, must be taken. At least 42 of these are to be beyond the 1000 level in a new major subject, and at least 24 of the 42 must be beyond the 2000 level.

For the 90 credit hour degree, a minimum of 45 new credit hours must be taken. At least 18 of these are to be beyond the 1000 level in a new area of concentration.

Students may obtain a second BSc by completing the above requirements. More than one BA is not awarded.

6.1.2 Management

For the BComm co-op degree a minimum of 60 new credit hours (plus three work terms) must be taken, of which at least 48 must be in the core area and include the three work term credits.

For the BMgmt degree (120 credit hour), a minimum of 60 new credit hours must be taken, and all core requirements met.

6.1.3 Health

For degrees in the Faculty of Health no more than half the credit hours required for an undergraduate degree may be carried forward from an earlier degree.

6.1.4 Architecture and Planning

For the BEDS degree, a minimum of one third of the credit hours required in the third and fourth years must be taken while registered in the BEDS program.

6.1.5 Computer Science and Engineering

For the BACS, BCSc, BINF, and BEng degrees, a minimum of 60 new credit hours must be taken.

6.1.6 Transfer Credits from Dental Hygiene

Students who have completed the Diploma in Dental Hygiene at Dalhousie University may receive 30 credit hours towards a BA or BSc.

6.1.7 Agriculture

For the BSc (Agr) a minimum of 60 new credit hours must be taken.

6.2 Counting of Credit for two Dalhousie Diplomas in Technology Programs

Students who hold one technology diploma from Dalhousie and who wish to gain a second technology diploma must fulfill the requirements of the second diploma and meet the following stipulations:

- a. Only credit hours that are applicable to the program for the second diploma may be counted for credit.
- b. All credit hours carried forward must have a grade of C or higher.
- c. At least half of the credit hours in the second diploma must be new courses.

6.3 Counting of Credit from Diploma in Technology to Undergraduate Programs

Students who have completed technology level courses may be eligible to receive degree level credit for such courses, to a maximum of 60 credit hours, evaluated on a course by course basis with a minimum grade of "C". Students who successfully complete a Technical Diploma program in the Faculty of Agriculture and apply to the Bachelor of Science (Agriculture) program will receive a minimum of 30 credit hours toward the degree.

6.4 Counting of Credit from Continuing Education Courses toward Diploma in Technology Programs

Special permission to complete a limited number of select continuing education courses in the Faculty of Agriculture may be granted to students enrolled in technology diploma programs. These courses must be approved in advance by the Dean or designate. Any student who wishes to explore this option should contact their academic advisor.

7. Transfer Students

7.1 Transfer Credits - All Faculties

At Dalhousie transfer credits may be granted for courses which are offered by a recognized university or equivalent institution of higher learning and which are judged to be comparable to courses offered at Dalhousie and to be appropriate to a student's academic program at Dalhousie. Transfer credit will be granted for any course in which a final mark of C or higher was obtained.

Transfer credits are subject to the approval of the appropriate department/school/college. For courses not within the purview of a Dalhousie department/school/college, the Registrar's Office will assess transfer credits. Students may appeal, in writing, a negative decision and should justify the inclusion of such courses in the student's proposed program. Copies of calendar descriptions are necessary. Such descriptions are not normally included with university transcripts, and it is the student's responsibility to provide them.

Bachelor of Commerce and Bachelor of Management require course syllabi that includes the length of the course, topics covered, evaluation, textbook used, and required reading.

College of Arts and Science and Faculty of Management courses that are more than 10 years old may not be used to fulfill degree requirements unless a waiver is granted. See [Regulation 15](#) for information on other faculties.

Transfer credits may be counted towards fulfilment of the concentration, major or honours or Commerce/Management core area requirement of a bachelor's degree with specific advance approval from the appropriate department/school/college at Dalhousie.

To obtain a first degree or diploma, at least half of the credit hours, including at least half in the field of concentration or major or minor, must normally be taken at Dalhousie.

For the BComm Co-op degree, a minimum of 60 credit hours (plus three workterms) must be taken, of which at least 48 must be in the core area and include the three workterm credits.

For the BMgmt degree, a maximum of 60 credit hours may be counted towards the program.

In the Faculty of Health to obtain a first degree, all or most of the advanced work of the program (e.g. at least half the credit hours taken in the second and subsequent years of study) must be taken at Dalhousie.

Note: Transfer credits will not be awarded for work completed while a student was academically ineligible.

7.2 Architecture and Planning

For the BEDS degree, at least one third of the credits required in the third and fourth years must be taken while registered in the BEDS program at Dalhousie. Courses taken to qualify for admission are not converted to transfer credits unless they are equivalent to BEDS courses. For the Bachelor of Community Design, at least half of the credits must be taken at Dalhousie, including half in the major field.

7.3 Computer Science

For the BCSc, BACSc and BINF degrees, at least half of the credit hours must be taken at Dalhousie. 60 credit hours of CSCI courses, including 36 of the third and fourth year CSCI courses, must be taken at Dalhousie.

7.4 Engineering

For the BEng degree, at least half of the credit hours, including the final two study terms with a full course load, must be taken at Dalhousie. For the Bachelor of Applied Science, at least half of the credit hours for the degree must be taken at Dalhousie, including half in the major field

7.5 Procedures

Once the student's record has been assessed the Registrar's Office will inform the student which transfer credits have been awarded. If more credits have been approved than can be applied to the student's program, the Registrar's Office will decide the appropriate transfer credits. Transfer credits awarded on admission appear on a Dalhousie transcript as credits only; no marks are shown.

If by registration time the student has not received written confirmation of transfer credits, the student should check with the Registrar's Office. Information, although incomplete, may be available and may be helpful in choosing Dalhousie courses.

Before selecting courses the student should consult with the appropriate department/school/college to determine how the transfer credits will fit into the student's specific academic program at Dalhousie.

7.6 Courses Taken at Other Universities on Letter of Permission

A student who wishes to take courses at other institutions while registered at Dalhousie must obtain approval in advance on a form available online at www.dal.ca/lop. A Letter of Permission will be provided if all the following conditions are met:

- the student is in good academic standing, e.g. students who have been academically dismissed or are on probation are not eligible
- the student has not exceeded the allowable number of transfer credits
- the course at the other institution is acceptable for transfer to Dalhousie
- the workload will not exceed Dalhousie's limitations
- the course is not offered at Dalhousie in the term in which the student wishes to take it; or the student has a scheduling conflict; or the course is full; or the student is living outside the local area.

The departments of French, German, Russian Studies, and Spanish and Latin American Studies have special arrangements whereby up to 30 credit hours taken at other universities may be considered as part of a student's program at Dalhousie (see [Regulation 13](#)).

No credit will be given for any courses taken at another university while a student is not in good standing at Dalhousie. See [Definitions section](#) of this calendar for the definition of "good standing".

8. Advanced Standing

Students possessing advanced knowledge of a subject will be encouraged to begin their studies in that subject at a level appropriate to their knowledge, as determined by the department/school/college concerned. However, such students must complete, at Dalhousie, the full number of credit hours required for the particular credential being sought.

9. Part-Time Students

Part-time students are reminded of the university policy that limits programs of study to 10 years from the date of initial registration in the College of Arts and Science, Faculty of Agriculture and the Faculty of Management. See [Regulation 15](#) for details on duration of study. Note also, [Regulation 7](#) above concerning the number of credit hours that must be completed at Dalhousie.

9.1 College of Arts and Science

Part-time students are admitted to most of the programs offered in the College of Arts and Science. Admission requirements and regulations are the same for all students.

9.2 Faculty of Management

The Faculty of Management is committed to providing students the opportunity to obtain a degree/diploma through full-time study and part-time study where the latter is feasible.

9.3 Faculty of Health

Because of the restriction on the duration of undergraduate studies (see [Regulation 15](#)), the opportunity for part-time study is limited in the majority of programs.

The exceptions are the undergraduate programs in the School of Health and Human Performance, and the School of Social Work.

9.4 Faculty of Architecture and Planning

Part-time study is not available in the Bachelor of Environmental Design Studies (BEDS) program. Part-time study is available in the Bachelor of Community Design (BCD) program

9.5 Faculty of Engineering

Because of the restriction on the duration of undergraduate studies, (see [Regulation 15](#)), the opportunity for part-time study is limited.

9.6 Faculty of Computer Science

Part-time students may be admitted to the Bachelor of Computer Science and Bachelor of Applied Computer Science program.

10. Audit of Courses

Students who have been admitted to a faculty may audit many of the courses offered with the permission of the instructor. Registration for an audit is available from the first day of courses until the last day to add a course. Students auditing courses will not be eligible to write examinations in the audited course and will not in any circumstance be granted credit for it. Fees are payable as indicated under [Fees](#). A course may not be changed from credit to audit or from audit to credit status after the last date for dropping courses without 'W' (see the schedule of [Academic Course Add/Drop Dates](#)).

11. Experimental Courses—College of Arts and Science

Experimental courses, on any subject or combination of subjects to which arts or sciences are relevant, and differing in conception from any of the courses regularly listed in departmental offerings, may be formed on the initiative of students or faculty members.

If formed on the initiative of students, the students concerned shall seek out faculty members to take part in the courses.

Whether formed on the initiative of students or on the initiative of faculty members, the faculty members who wish to take part must obtain the consent of their department.

The course may be offered over the regular session or for one term only.

A course shall be considered to be formed when at least one faculty member and at least eight students have committed themselves to taking part in it for its full length.

Courses may be formed any time before the end of the second week of courses in the fall term to run the regular session or fall term, or any time before the end of the second week of courses in the winter term. If they are formed long enough in advance to be announced in the calendar, they shall be so announced, in a section describing the Experimental Program; if they are formed later, they shall be announced (a) in the *Dalhousie Gazette*, (b) in the *Dal News*, (c) on a central bulletin board set aside for this purpose.

One faculty member taking part in each experimental course shall be designated the rapporteur of the course with responsibility for (a) advising the curriculum committee of the formation and content of the course; (b) obtaining from the curriculum committee a ruling as to what requirement or requirements of distribution, concentration, and credit the course may be accepted as satisfying; (c) reporting to the Registrar on the performance of students in the course; (d) reporting to the curriculum committee, after the course has finished its work, on the subjects treated, the techniques of instruction, and the success of the course as an experiment in pedagogy (judged so far as possible on the basis of objective comparisons with more familiar types of courses).

Students may have 30 credit hours of experimental courses (or some equivalent combination of these with half-credit courses) counted as satisfying course for course any of the requirements for the degree, subject to the rulings of the relevant curriculum committee (above) and to the approval of the departments.

12. Summer School

12.1 Summer Session

Dalhousie currently offers a Summer session of approximately 16 weeks, May - August. See [Regulation 3.2](#) for permitted work-load.

13. International Exchange and Study Abroad Programs

A number of programs enable Dalhousie University students to pursue part of their studies in another country and culture. For details regarding courses taken at other universities, see [Regulation 7.6](#).

University-wide programs allow students from a variety of academic departments to take part in a study abroad or exchange program. These are coordinated by the Study Abroad and Exchange Advisor in International Centre, located in the LeMarchant Place (Suite 1200, 1246 LeMarchant Street). Department-specific programs are coordinated by an individual within the department/faculty. Additional information is available at: <http://www.dal.ca/exchange>.

It is important to note that there are application deadlines for these programs; plan to apply up to a year prior to departure.

14. Preparation for Other Programs

Work in the College of Arts and Science is a prerequisite for various programs in other faculties and other institutions. A brief summary of the academic work required for admission to certain programs is given here. Further information may be found later in this calendar, or in the [Faculty of Graduate Studies calendar](#) or the [Dentistry, Law and Medicine calendar](#).

Graduate Studies: The normal requirement for admission to a graduate program is an honours degree or the equivalent.

Students who are registered in an honours program may, with permission from their honours supervisor and the course instructor, be eligible to complete up to six credit hours of study at the graduate level. These credit hours could be used in place of undergraduate degree requirements toward completion of the undergraduate degree. With permission of the program's graduate coordinator and the Faculty of Graduate Studies, such credit hours may also be applied to a subsequent Master's degree in some programs. Please consult the Graduate Calendar, [section 3.7 Advanced Placement](#), for details. Students registering in any graduate level course, regardless of their level of study, will be graded in accordance with the graduate grading scale and must obtain a grade of B- or higher in order to receive credit. For courses that are cross-listed between the undergraduate and graduate level, students who register in the graduate level course may switch to the corresponding undergraduate course by the dates specified in the [Academic Dates](#) listed at the front of the Calendar.

Architecture: Two years of university study are required for entry to the BEDS program in architecture. For details, see the [Architecture section](#).

Dental Hygiene: See the [Dentistry, Law and Medicine calendar](#).

Dentistry: See the [Dentistry, Law and Medicine calendar](#).

Design: Students completing one year in the College of Arts and Science at Dalhousie may be admitted into the second year of the four year program leading to the Bachelor of Design degree in communication design at the NSCAD University.

Law: At least two years of work leading to one of the degrees of BA, BSc, BComm, BMgmt. For details, please see the [Dentistry, Law and Medicine calendar](#).

Medicine: A BA, BSc, BComm, or BMgmt degree. For details, see the [Dentistry, Law and Medicine calendar](#).

Veterinary Medicine: Dalhousie offers [Preveterinary Studies](#) at the Truro campus. The Atlantic Veterinary College offers the Doctor of Veterinary Medicine program for students in the Atlantic region; there are four other programs across Canada. Students must check admission requirements directly with universities offering DVM programs, as they may change without notice.

15. Duration of Undergraduate Studies

15.1 College of Arts and Science/Faculty of Management

Students are normally required to complete their undergraduate studies within 10 years of their first registration, and to comply with the academic regulations in force at the time of that registration. This is also the normal limit for transfer credits. However, the student appeals committee of the appropriate Faculty or School may grant permission to continue studies for a reasonable further period, subject to such conditions as the committee deems appropriate and with the stipulation that the student must meet the degree requirements in force when the extension is granted.

15.2 Faculty of Health

With the exception of the undergraduate programs in the School of Health and Human Performance and the School of Social Work to which Regulation 15.1 applies, students in the Faculty of Health are normally required to complete their undergraduate studies within six years of first registration in professional courses.

15.3 Faculty of Architecture and Planning

Students in the BEDS program are normally required to complete their degree within four years. Students in the Bachelor of Community Design program must complete their degree within 10 years.

15.4 Faculty of Computer Science

Students in the BACSc, BCSc, or BInf degree programs are normally required to complete their degree within eight years.

15.5 Faculty of Engineering

15.5.1 Diploma of Engineering

Students registered in the Diploma of Engineering program are normally required to complete their requirements in a period of time not exceeding four consecutive calendar years from their first date of registration.

15.5.2 Bachelor of Engineering (Upper Division)

Students registered in the upper division component of the BEng program are normally required to complete their degree, including any coop education requirements, in a period of time not exceeding five consecutive calendar years from their first date of registration in Term 5.

15.5.3 Food Science

Students in the BAsC degree program in Food Science are normally required to complete their degree within eight years of their first registration in the program.

15.6 Faculty of Agriculture

Students in the Bachelor of Science (Agriculture) and Bachelor of Science (Bioveterinary Science) are normally required to complete their undergraduate studies within 10 years of their first registration. Students in the Bachelor of Technology and the Diploma in Technology are normally required to complete their studies within six years of their first registration. Students in the Diploma in Engineering are normally required to complete their studies in a period of time not exceeding four consecutive calendar years from their first date of registration.

This is also the normal limit for transfer credits. However, the student appeals committee may grant permission to continue studies for a reasonable further period, subject to such conditions as the committee deems appropriate and with the stipulation that the student must meet the degree requirements in force when the extension is granted.

16. Assessment

16.1 Method

Examinations may be oral, written (closed or open book) under supervision, or take-home.

Students will be provided with a course outline by the instructor at the first meeting of the course. In order to complete a course satisfactorily, a student must fulfill all the requirements as set down in the course outline. Changes to the outline which affect assessment components, the weight of individual assessment components, or examination requirements with a value of 10 percent or more must have the approval of at least two-thirds of enrolled students in order to be valid.

When collaboration is included as part of course expectations as in group projects or group assignments, the instructor will provide in the course outline, a statement of the degree of collaboration permitted in the preparation and submission of assignments.

Within four weeks after the beginning of each term, course outlines will be placed on file with the appropriate faculty/school/college.

Students should be aware that certain courses at the University involve required laboratory work where potentially hazardous materials are in use. These may include animals, other biological materials which may include crops and products, tissues, fluids, wastes, but also microorganisms and toxins as well as a wide variety of chemicals. Examples of physical hazards may include noise, radioactive isotopes and non-ionizing radiation (e.g. lasers). Since there are potential health risks associated with the improper handling of such materials resulting in exposure, Dalhousie University requires that, as a condition of taking a course where such materials are to be used, students must read and agree to comply with the instructions for safe handling of such materials. In the event that students do not comply with the instructions for the safe handling of such materials, students will receive no credit for the required laboratory work unless other acceptable alternatives are arranged with the instructor. In many cases, alternate arrangements are not possible and students should consider enrolling in a different course.

16.1.1 Academic Accommodation for Students with Learning Disabilities

See [Accommodation Policy](#).

16.2 Examinations and Tests

Tests are normally scheduled during course time. Tests scheduled outside course time should not conflict with the regularly scheduled courses. Dates and times must be included in the course syllabus.

Periods of approximately three weeks in the spring and one and one-half weeks in December are set aside for the scheduling of formal written examinations by the Registrar. Instructors wishing to have examinations scheduled by the Registrar for their courses must so inform the Registrar at the beginning of the first week of courses in the fall and winter terms. Instructors may also arrange their own examinations at times and places of their choosing during the formal examination periods, with the understanding that in cases of conflict of examinations for an individual student, the Registrar's examination schedule takes priority.

16.2.1 College of Arts and Sciences, Faculties of Agriculture, Architecture and Planning, Computer Science, Engineering, Health and Management

No written tests or examinations, with the exception of project presentations and major papers, worth more than 25% of the final grade, may be held in the last two weeks of a term, without the explicit approval of the appropriate faculty, school or college. No tests may be held between the end of courses and the beginning of the official examination period with the exception of those activity modules and laboratory courses in the Faculty of Health in which special facilities are required.

Students may contact the dean's/director's office of the appropriate faculty/school/college for assistance if they are scheduled for more than two examinations on the same day.

16.3 Submission of Grades

The date for the submission of Grades is set annually by the Senate Learning and Teaching Committee in conjunction with the Dalhousie Academic Dates for that year and will normally be between seven and ten calendar days from the final day of the exam period. The date will be based on three principles:

1. Transparency and timeliness for Students, to allow for informed Course planning, and registration in future terms before the term starts;
2. Appropriate time for Instructors, to enable the effective and appropriate grading of examinations and term assignments; and,
3. Adequate time to provide necessary services to Students to enable timely academic standing assessments, advising, and convocation approvals.

The final possible date for the submission of Grades will be published along with the Dalhousie Academic Dates for each academic year.

For further details, particularly for the responsibility of course instructors, refer to the [Grading Practices Policy](#).

16.4 Incomplete

Students are expected to complete course work by the prescribed deadlines. Only in special circumstances (e.g. the death of a close relative) may an instructor extend such deadlines. Incomplete work in a course must be completed by:

Fall term courses.....	Feb 1
Winter and regular session (September - April) courses.....	Jun 1
May - June courses.....	Aug 1
May - August courses.....	Oct 1
July - August courses.....	Oct 1

Exceptions to this rule will normally be extended only to courses which require field work during the summer months. At present the list of these courses consists of:

- ENVS 3000, ENVS 3001, ENVS 4901, ENVS 4902;
- HPRO 4495;
- LEIS 4597;
- NURS 2220, NURS 3290 AND NURS 4240;
- PHAR 3000;
- SUST 3002, SUST 3950
- Management Internship
- Courses in the Bachelor of Agriculture - International Food Business

Students taking any of these courses in their final year should note that they will not be able to graduate at the spring convocation.

The Registrar's Office is not permitted to accept a late clearance of INC or late grade changes other than those due to errors. If there are exceptional circumstances, a recommendation should be forwarded to the undergraduate coordinator or the Committee on Studies of the appropriate faculty/school. Unless INC is changed it counts in the GPA and has a grade point value of 0.00 - it is a failing grade.

16.5 Supplementals

Faculties of Engineering and Health

In courses where supplementals are available, a student must have achieved a grade of "FM" in the course in which the supplemental is to be written.

On re-examination the grade awarded for the course will be recorded on the student's transcript along with a notation that the grade was earned by supplemental examination. In the Faculty of Health, the highest grade that can be awarded is "C" for professional courses and "D" for other courses. Only the supplemental grade will be included in the grade point average. Supplemental exams will be administered by the participating faculty/school/ college. Students should check directly with their faculty/school/ college for detailed information on the awarding of FM grades and eligibility for supplemental examinations.

Faculty of Management

Students who receive a final grade of Marginal Failure (FM) in a core Bachelor of Commerce Co-op (COMM) course may have the opportunity to write a supplemental exam. The following terms and conditions apply:

1. The course must offer a final examination with a value of greater than 25% as part of the normal evaluation process.
2. The final grade received for the course must be FM.
3. The supplemental exam will be written within four calendar weeks following the original final exam at a time scheduled by the Undergraduate Advising Office.
4. The supplemental exam grade replaces only the original final exam grade in the calculation of the overall mark. The highest grade that can be awarded is "D", with a notation that the grade was earned by supplemental examination.
5. There is a \$25 non-refundable fee per exam.
6. Students are permitted to write only one supplementary exam at the 2000 level, one at the 3000 level and one at the 4000 level over the duration of their program. First year (1000 level) courses are not eligible for supplemental exams. In cases where students apply to write a supplemental examination and do not attend the exam as scheduled, the exam grade will be recorded as a zero. There will be no further opportunity to apply to write another supplemental examination at the respective course level.

If you have questions about supplementary exams, please contact the Undergraduate Advising Office (uao@dal.ca).

16.6 Correction of Errors in Recorded Grades

Students must request correction in the calculation or recording of final grades by:

Fall term courses.....	Feb 1
Winter and regular session (September - April) courses.....	Jun 1
May - June courses.....	Aug 1
May - August courses.....	Oct 1
July - August courses.....	Oct 1

16.7 Reassessment of a Final Grade

Students who have questions about final grades that are assigned are encouraged to discuss them with the course instructor. In addition, students may consult the chair of the department, director of the school/college, dean of the faculty, an academic advisor or a student advocate. If their concerns cannot be resolved, students may also use the formal process that follows for the re-assessment of final grades, except when such grades are the result of an academic discipline penalty.

Once a final course grade has been submitted to the Registrar, a student who wishes to have a final grade re-assessed should make a written request to the Registrar and pay the requisite fee of \$50 per course. The request must identify the specific component which the student wishes re-assessed and the grounds for the request. Such requests must be made by:

Fall term courses	March 1
Winter and regular session (September - April) courses	July 1
May - June courses	September 1
May - August courses	November 1
July - August courses	November 1

Note: Students should be aware that they may not be able to continue in their course of study if they fail a pre-requisite course. To prevent delays in progressing if a student is successful in their appeal, students are encouraged to submit appeals for grade reassessment as soon as possible.

When such a request is received, the Registrar will forward it to the dean of the faculty or director of the school/college offering the course. The re-assessment will be conducted according to procedures developed for the purpose by the faculty/school/college. These should reflect the nature of the academic disciplines and assessment involved, and should provide for a review of the assessment by a qualified person or persons not responsible for the original evaluation.

The student will be notified, by the Registrar's Office, of the outcome of the re-assessment. If the re-assessment results in the assignment of a grade that is different (higher or lower) from the original one, the new grade will replace the original one and the \$50 will be refunded.

Students who wish information about grade re-assessment procedures should contact their faculty/school/college office.

16.8 Special Arrangements for Examinations, Tests and Assignments

At the discretion of the instructor, alternate arrangements for examinations, tests or the completion of assignments may be made for students who are ill, or in other exceptional circumstances.

The [Student Absence Regulation](#) of the [University Regulations](#) summarizes the documentation and procedures for declaring absences. The [Missed or Late Academic Requirements due to Student Absence](#) regulation contains the complete text on declaring absences.

Following the completion of a course, the deadline for changing a grade of ILL is:

Fall term courses..... Feb 1
 Winter and regular session (September - April) courses.....Jun 1
 May - June courses..... Aug 1
 May - August courses..... Oct 1
 July - August courses.....Oct 1

Requests to change grades after these deadlines must be submitted in writing to the appeals committee of the appropriate school, college or faculty.

NOTE: Any student whose request for special arrangements has been denied and wishes to appeal, should refer to [Appeals](#).

17. Academic Standing

Students' academic standing is normally assessed at the end of each term.

17.1 Grade Scale and Definitions

The official grading system at the University is a letter-grade system.

The following table explains and defines Dalhousie's grading system for undergraduate courses and shows the GPA value that corresponds with each letter Grade.

Grade	Grade Point Value	%	Definition	
A+	4.30	90-100	Excellent	Considerable evidence of original thinking; demonstrated outstanding capacity to analyze and synthesize; outstanding grasp of subject matter; evidence of extensive knowledge base.
A	4.00			
A-	3.70	85-89		
		80-84		
B+	3.30	77-79	Good	Evidence of grasp of subject matter, some evidence of critical capacity and analytical ability; reasonable understanding of relevant issues; evidence of familiarity with the literature.
B	3.00			
B-	2.70	73-76		
		70-72		
C+	2.30	65-69	Satisfactory	Evidence of some understanding of the subject matter; ability to develop solutions to simple problems; benefitting from his/her university experience.
C	2.00			
C-	1.70	60-64		
		55-59		
D	1.00	50-54	Marginal Pass	Evidence of minimally acceptable familiarity with subject matter, critical and analytical skills (except in programs where a minimum grade of 'C' or 'C+' is required).
FM	0.00		Marginal Failure	Available only for Engineering, Health Professions and Commerce.
F	0.00	0-	Inadequate	Insufficient evidence of understanding

of the subject matter; weakness in critical and analytical skills; limited or irrelevant use of the literature.

INC	0.00	Incomplete	
W	Neutral and no credit obtained	Withdrew after deadline	
ILL	Neutral and no credit obtained	Compassionate reasons, illness	
P	Neutral	Pass	
TR	Neutral	Transfer credit on admission	
Pending	Neutral	Grade not reported	
MT	Neutral	Not Graded: Part of Multi-Term Course	The grade assigned temporarily within a single academic year until all requirements of the multi-term course are complete. The final grade obtained in the multi-term course will replace the MT grade in each term.
CR	Neutral	GPA neutral grading option due to extenuating circumstances	Credit obtained (requires a minimum passing grade in the course)
NCR	Neutral	GPA neutral grading option due to extenuating circumstances	No credit obtained

17.1.1 Grade Point Average (GPA)

The Grade Point Average is calculated by summing the values obtained by multiplying the grade points obtained in each course in accordance with the scale in 17.1, by the number of credit hours of each course then dividing that sum by the total credit hours attempted. A Term GPA includes only those courses attempted in a single term and the Cumulative GPA includes all courses attempted while registered in a level of study (see [Definitions](#)). If a course has been repeated, only the highest grade awarded is included.

17.2 Grade Points on Admission

Transfer credits on admission count as credits without grade points, e.g. they are neutral in the calculation of the GPA.

17.3 Grade Points on Letter of Permission

Courses taken on a Letter of Permission at a Canadian university, where a letter grade system is used, the appropriate Dalhousie letter grade and corresponding grade points will be assigned. For institutions not using letter grades, the grade will be translated into a Dalhousie grade and corresponding grade points assigned. For institutions outside of Canada, a grade of P (pass) or F (fail), as appropriate, will be recorded.

17.4 Repeating Courses for which a Passing Grade has been Awarded

With the permission of the department/school/college concerned, a student may repeat any course for which a passing grade has previously been awarded. The original passing grade will nevertheless remain on the transcript and a second entry will be recorded with the new grade and the notation “repeated course”. No additional credit will be given for such a repeated course, and only the highest grade will be included in the calculation of the GPA.

17.5 Credit/No Credit Grading Option

Credit-No Credit (CR/NCR) grading option is designed to provide a GPA-neutral grade for students experiencing exceptional extenuating circumstances when other solutions are not appropriate. To be considered an extenuating circumstance, the situation must be unforeseen or unpredictable, and result in a significant personal crisis for the student, demonstrably impacting their academic

performance. Students wishing to appeal for this grading option must apply for an 'Academic Waiver' through [DalOnline](#). The arguments and expectations of the petitioner must be clearly stated.

18. Good Standing

Students who meet the required GPA are considered to be in good academic standing. In the Faculties of Agriculture, Architecture and Planning, Arts and Social Sciences, Computer Science, Engineering, Health, Management, and Science a cumulative GPA of 2.00 is required.

* except for Bachelor of Science (Nursing). See [Section 19.3](#).

19. Probation

19.1 Faculties of Agriculture, Architecture and Planning, Arts and Social Sciences, Computer Science, Engineering (Lower Division, Years 1 and 2 and Bachelor of Applied Science), Health, Management and Science

19.1.1

Students with a cumulative GPA of less than 2.00 and greater than or equal to 1.70 who have completed at least 24 credit hours at the undergraduate level or 16 credit hours at the technology level will be placed on academic probation.

19.1.2

Students on probation are allowed to continue to register on probation provided their term GPA is at least 2.00. Students will be returned to "good standing" when they achieve a cumulative GPA of 2.00. Students on probation who do not achieve a term GPA of 2.00 will be academically dismissed.

19.1.3

Students require a cumulative GPA of 2.00 to graduate. Therefore, no one will be allowed to graduate while on probation.

19.2 Faculty of Engineering (Upper Division, Years 3 and 4)

19.2.1

Students in the Bachelor of Engineering (Upper Division) with a cumulative GPA of less than 2.00 and greater than or equal to 1.70 who have completed at least 24 credit hours will be placed on academic probation.

19.2.2

Students on probation may continue to register on probation provided their term GPA is at least 2.00. Students will be returned to "good standing" when they achieve a cumulative GPA of 2.00. Students on probation who do not achieve a term GPA of 2.00 will be academically dismissed.

19.2.3

Students require a cumulative GPA of 2.00 to graduate. Therefore, no one will be allowed to graduate while on probation.

19.3 Faculty of Health - Bachelor of Science (Nursing) Degree Program (Admitted in Sept 2016 or later)

19.3.1

Students with a cumulative GPA of less than 2.3 and greater than or equal to 1.7 who have completed at least 24 credit hours will be placed on academic probation.

19.3.2

Students on probation are allowed to continue to register on probation provided their term GPA is at least 2.30. Students will be returned to "good standing" when they achieve a cumulative GPA of 2.30. Students on probation who do not achieve a term GPA of 2.30 will be academically dismissed

19.3.3

Students require a cumulative GPA of 2.30 to graduate. Therefore, no one will be allowed to graduate while on academic probation.

20. Academic Dismissal

20.1 Academic Dismissal - Faculties of Agriculture, Architecture and Planning, Arts and Social Sciences, Computer Science, Engineering (Lower Division, Years 1 and 2 and Bachelor of Applied Science), Health, Management and Science

20.1.1

Students with a cumulative GPA of less than 1.70 who have completed at least 24 credit hours at the undergraduate level or 16 credit hours at the technology level will be academically dismissed for a 12 month period. In the Faculty of Engineering, the duration of academic dismissal is 8 months.

NOTES:

Faculty of Architecture and Planning students who have been academically dismissed may apply for readmission. Bachelor of Environmental Design Studies students applying for readmission to the School of Architecture are required to submit a portfolio and further evidence of academic abilities that will be evaluated with the current BEDS admissions. Readmission is not guaranteed. In evaluating applications for readmission to the Bachelor of Community Design program, the School of Planning will consider evidence regarding the preparedness of the student to succeed academically after resuming studies. Students who have been dismissed twice from either program will not be readmitted.

If a BScNursing student is readmitted, failure in any course (including non-nursing courses, core nursing courses including clinical practica and electives) will result in dismissal from the Nursing program.

BSW students who fail SLWK 4033 or who fail a repeated course, will be dismissed.

BHSC student who fail a required course for a second time will be dismissed.

DDM students who fail the same course twice will be dismissed.

BEng and DipEng students who fail the same course more than once will be dismissed.

BComm (Co-op) students who fail the same required course twice will be dismissed.

BComm (Co-op) students who fail their second attempt at the same work term course (ie. students required to repeat the work component and submit a new academic report) will be dismissed.

BMgmt students who fail the same required course twice will be dismissed.

Students in any undergraduate degree program offered by the Faculty of Computer Science, where the first major is computer science or applied computer science, who receive a grade lower than C in the same required CSCI course twice, will be dismissed.

20.1.2

Students on probation who do not achieve a term GPA of 2.00 or greater will be academically dismissed for a 12 month period (8 months in the Faculty of Engineering).

20.1.3

Students who have been academically dismissed will not be allowed to apply for re-admission for at least 12 months (8 months in the Faculty of Engineering).

20.1.4

Students who have been academically dismissed for the first time and have subsequently been re-admitted after an absence of a 12 month period (8 months in the Faculty of Engineering) may re-register on probation.

20.1.5

Faculty of Arts and Social Science students who have been academically dismissed for the second time will not normally be allowed to apply for re-admission for at least three calendar years. Students may, however, petition the Student Affairs Committee for re-admission after two years provided they have met with the Assistant Dean.

20.1.6

Faculty of Health students who have been academically dismissed twice will not be allowed to apply for re-admission.

20.1.7

Faculty of Engineering students who have been academically dismissed for a second time will not be readmitted to any engineering program at Dalhousie.

20.1.8

Faculty of Computer Science students who have been dismissed and who have been required to withdraw from the university for one term or more may be readmitted to a program in the Faculty of Computer Science only once.

20.1.9

Faculty of Science students who have been required to withdraw for a second time must meet with the Assistant Dean (Student Affairs) who may recommend that they reapply for re-admission after two calendar years or who may refer the matter to the Faculty Committee on Studies and Appeals.

20.1.10

Faculty of Management Students who have been academically dismissed for the second time will not normally be allowed to apply for re-admission for at least three calendar years.

20.1.11

Faculty of Agriculture students who have been academically dismissed for the second time will not normally be allowed to apply for re-admission for at least three calendar years. Students who have been dismissed for either the first or second time may appeal this decision (see section 24 of the academic calendar).

20.2 Faculty of Engineering (Upper Division, Years 3 and 4)

20.2.1

Students with a cumulative GPA of less than 1.70 who have completed at least 24 credit hours will be academically dismissed for an eight month period.

20.2.2

Students on probation who do not achieve a term GPA of 2.00 or greater will be academically dismissed for an eight month period.

20.2.3

Students who have been academically dismissed will not be allowed to apply for readmission for at least eight months.

20.2.4

Students who have been academically dismissed for the first time and have subsequently been re-admitted after an absence of an eight month period, may re-register on probation.

20.2.5

Students who fail the same course more than once will be dismissed.

20.2.6

Students who have been academically dismissed for a second time will not be readmitted to any engineering program at Dalhousie.

20.3 Faculty of Health - Suspension or Dismissal from a Program on the Grounds of Professional Unsuitability

See [University Regulations](#).

20. A Policy on Academic Forgiveness

The Academic Forgiveness policy allows a returning student to apply to the Registrar's Office for academic forgiveness of their prior cumulative grade point average. The policy is designed for undergraduate and technology students who have had a period of absence from their academic program and have demonstrated acceptable academic performance following their return. The Academic Forgiveness policy is subject to the following regulations.

20.A.1 Regulations

1. Academic Forgiveness applies only to returning undergraduate and technology students who have had an absence of at least three calendar years from their program or faculty at Dalhousie University.
2. For undergraduate students, a minimum of 24 credit hours of coursework, or for Diploma in Technology students, a minimum of eight credit hours, with a grade point average of at least 2.0, must be completed after returning before a written request for Academic Forgiveness may be submitted to the Registrar's Office.

3. Academic Forgiveness will affect the student's cumulative grade point average in all courses taken prior to the minimum three year absence. Academic Forgiveness applies to all courses taken at all colleges/universities during the forgiveness period, not only selected courses or terms.

4. No punitive grades resulting from an Academic Discipline decision will be forgiven.

5. A student can have the Academic Forgiveness policy applied to their academic record only one time.

With the approval of the Registrar or designate, in consultation with the Dean, the student will be granted Academic Forgiveness. The student's transcript will remain a record of all coursework completed and original grades obtained. Courses taken prior to the three or more year absence will not be used in computing the student's cumulative grade point average, with the exception of punitive grades awarded as the result of an Academic Discipline decision. Students will be eligible to retain credit for courses in which they received a passing grade. However students will be required to complete at least half the credit hours required for their academic program following Academic Forgiveness before they will be eligible to graduate.

The transcript will have "Academic Forgiveness" noted on it at the end of the last term for which the student receives forgiveness.

21. Graduation Standing

Note that students entering the College of Pharmacy in September 1997 or later should consult the College of Pharmacy for information on graduation and scholarship standing.

21.1 Minimum Cumulative GPA

A minimum cumulative GPA of 2.00 is required for the awarding of an undergraduate degree in the Faculties of Agriculture, Architecture and Planning, Arts and Social Sciences, Computer Science, Engineering, Health, Management and Science.

A minimum cumulative GPA of 2.0 is required for the awarding of Diploma in Technology in the Faculty of Agriculture.

For details on the required standing for graduation in honours programs, see the Degree Requirements section of this calendar for the Faculties of Arts and Social Sciences, Science and the appropriate faculty/school section for honours programs in other faculties.

21.2 Graduation with Distinction

Faculties of Agriculture, Architecture and Planning, Arts and Social Sciences, Computer Science, Engineering, Science and Management

A cumulative GPA of at least 3.70 is required to graduate with distinction. For the purpose of determining whether a student will graduate with distinction, all courses taken while registered in a level of study at Dalhousie, including courses taken on letter of permission, repeated courses, and courses for which non-passing grades were obtained, are included. At least half of the courses must be completed at Dalhousie. The notation "Distinction" will appear on the transcript.

Faculty of Health

A cumulative GPA of at least 3.70 is required to graduate with Distinction from the Faculty of Health programs. For the purpose of determining whether a student will graduate with distinction: credits that are transferred into a degree program from other Dalhousie programs are included in final GPA calculations, credits from programs outside Dalhousie taken prior to program entry are not used in final GPA calculations. Credits taken on Letters of Permission while in the program are used towards Distinction calculations. At least half of the courses must be completed at Dalhousie. Students who have been on the Dean's List for three of the four years of the BSc Pharmacy program and have a cumulative GPA of at least 3.70 or higher will graduate with Distinction

Sexton Distinction List

Students in the Faculties of Architecture and Planning, Computer Science, and Engineering who have achieved a cumulative GPA of 3.85 upon graduation will be placed on the "Sexton Distinction List". The notation "Sexton Distinction" will appear on the transcript.

21.3 Scholarship Standing

Please see [Awards Section, Scholarship GPA](#), for information on the GPA required for scholarship purposes.

22. Graduation

In order to graduate students must submit an Intention to Graduate Form to the Registrar's Office by the deadlines indicated:

Graduation Season	Deadline
Spring	December 1
Fall	July 1

In cases where requests can be accommodated after the deadline, a \$50 fee will be charged.

23. Dean's List

23.1 Eligibility

Full-time students will be assessed for eligibility for the Dean's list at the end of each academic term. Students who take a minimum of nine credit hours in a term and achieve a term GPA of 3.70 will be placed on the Dean's list.

Part-time students will be considered once at the end of each academic year. For this purpose, a part-time student is one who takes at least nine credit hours during the academic year but less than nine credit hours in any one term in the academic year. The student must achieve a GPA of 3.70 in every term in the academic year.

NOTES:

1. The number of students placed on the Dean's list will normally not exceed 15% of the class.
2. Students registered for full year courses, e.g. courses that run from September through April will be considered for the Dean's list when full year course results are available.
3. The notation "Dean's List" will appear on the transcript.

23.2 Sexton Scholar List

Students in the Faculties of Architecture and Planning, Computer Science, and Engineering who have taken a full course load, as determined by the faculty and achieved a term GPA of 3.85 will be placed on the Sexton Scholar List.

24. Appeals

24.1 Appeals for Students with Learning Disabilities

Appeals by students with learning disabilities will follow the usual procedures of the relevant faculty at Dalhousie University. See [Accommodation Policy](#).

24.2 College of Arts and Science/Faculty of Management/Faculty of Agriculture

Any students who believe they will suffer undue hardship from the application of any of the academic regulations may appeal for relief to the academic appeals committee of the faculty or school in which they are registered. Students wishing to appeal a decision based on faculty/school regulations must apply for an 'Academic Waiver' through [DalOnline](#). The arguments and expectations of the petitioner must be clearly stated.

An appeal from a student, arising from an academic dismissal from the faculty should be addressed to the Assistant Dean in the Faculty of Arts and Social Sciences, the Assistant Dean in the Faculty of Science, Academic Director, Undergraduate Programs, in the Faculty of Management, or to the Assistant Dean, Students, in the Faculty of Agriculture, as appropriate.

24.3 Faculty of Architecture and Planning

Appeals should be directed to the [School of Architecture](#) office or the [School of Planning](#) office.

24.4 Faculty of Computer Science

Appeals should be directed to the [Administrator, Dean's Office](#).

24.5 Faculty of Engineering

Appeals should be directed to the Academic Appeals Committee, [Faculty of Engineering](#).

24.6 Faculty of Health

Faculty of Health Student Appeals Process

Please contact the School/College or Faculty of Health Dean's office for the complete Faculty of Health Student Appeals Policy and Procedures.

The Committee has no jurisdiction to hear student appeals on a matter involving a requested exemption from the application of faculty or university regulations or procedures except when irregularities or unfairness in the application thereof is alleged. This means that only procedural issues and not the merits of the case, are subject to appeal.

25. Changes in Regulations

In general, any change to academic regulations which affects a currently registered student adversely will not apply to that student. Any student suffering undue hardship from application of any of the academic regulations may appeal for relief to the appropriate academic appeals committee as in [Section 24](#).

26. Challenge for Credit

Challenge for credit is one means by which the university may assess and attach specific value to a student's prior experiential learning outside of the university environment.

The challenge for credit process provides academic, course-level credit for students' prior learning when that learning is not eligible for consideration as a transfer credit. Challenge for credit relates to learning that overlaps with the stated learning outcomes of existing courses at Dalhousie.

The [policy](#) defines conditions for, and governs the processes for, challenge for credit of Dalhousie credit courses. Each faculty may opt to allow for challenge for credit for none, some, or all of its courses.

1. Dalhousie University permits a challenge for credit process to be implemented by Faculties.
2. Students who are currently enrolled at Dalhousie and in good standing in an undergraduate degree program at the university are eligible to challenge courses for credit.
3. Each Faculty decides which, if any, of its courses can be challenged for credit by registered students. Program accreditation requirements may constrain which courses may be challenged.
4. When a course can be challenged, the Faculty indicates whether the challenge results in a letter grade for the course or a pass/fail grade.
5. Students planning to challenge for credit will be provided with the course syllabus.
6. The ability to challenge a course in a Faculty shall be available to all students regardless of the degree or major of the student.
7. A student may only challenge a given course once.
8. Challenge for credit cannot be used to replace a transfer credit assessment for course credit from another institution.
9. A student may count a maximum of 15 credit hours of challenge for credit recognition toward their degree requirements. Faculties may add additional constraints on the number of allowed credit hours by challenge for credit in their programs.
10. A student wishing to challenge a course may not have received an alternative assessment for the course credit being sought such as a transfer credit assessment, a registration in the course at Dalhousie or another university, or an unsuccessful exemption request for the course. Also, a student who completes a course at Dalhousie may not subsequently challenge its prerequisites for credit.

Specific information around eligibility, authority, areas of responsibility and procedures is available in the [Challenge for Credit Policy](#) in the University Secretariat repository.

Minors

The purpose of a minor is to attain a significant body of knowledge within a discipline that is outside of the student's major. A minor can be added to many 120 credit hour degree programs at Dalhousie including the Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Applied Computer Science, Bachelor of Management, Bachelor of Music, Bachelor of Science, Bachelor of Science (Agriculture) and Bachelor of Science (Medical Science). The individual minor listing on the right will indicate to which degrees the minor can be added.

Bachelor of Arts and Bachelor of Science - 90 credit hour minor

A 90 credit hour degree requires less specialization in a single subject, and is usually completed in three years. Students graduate with a **Minor** rather than a Major subject.

[Eligible minors within the BA or BSc 90 credit hour degree](#)

Minor in Abrahamic Religions

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Students declaring a Minor in the Abrahamic Religions will complete a minimum of 18 credit hours at the 2000 level or above to a maximum of 27 credit hours, chosen from the lists below. At least three credit hours must be taken from each of the Judaism,

Christianity and Islam lists; RELS 3019: Meetings between Hellenism, Judaism, Christianity and Islam until the Renaissance and RELS 3382: Medieval Philosophy from Arabic and Jewish Thinkers to Aquinas may each be used to satisfy parts of this requirement.

Judaism courses

- RELS 2001.03: Judaism
- RELS 2220.03: Ancient Israel
- RELS 3018.03: Meetings between Hellenism and the East to Philo the Jew
- RELS 4011.03: Jewish Philosophy: Maimonides
- RELS 4019.03: Philo Judaeus

Christianity courses

- RELS 2281.03: Christian Beginnings: The Orthodox and Oriental Churches
- RELS 3009.03: Christianity in the Lands of Islam
- RELS 3282.03: Christian Beginnings: Catholicism
- RELS 3381.03: Medieval Philosophy from Anselm to Augustine
- RELS 3411.03: St. Augustine's Confessions I
- RELS 3412.03: St. Augustine's Confessions II
- RELS 3431.03: St. Augustine's On the Trinity Part I
- RELS 3432.03: St. Augustine's On the Trinity Part II
- CLAS 3841.03: Latin Philosophical Texts: Aquinas Texts
- CLAS 3842.03: Latin Philosophical Texts: Anselm and Bonaventure Texts
- CLAS 4018.03: Christian Theology in Islamic Lands: John of Damascus
- CLAS 4070.03: The Confessions in Latin
- CLAS 4401.03: Philosophy of the Greek Church Fathers
- CLAS 4402.03: Philosophy of the Latin Church Fathers

Islam courses

- RELS 2003.03: Islam
- RELS 2052.03: Cultural Introduction to the Arab World
- RELS 4010.03: Islamic Philosophy: al-Ghazali
- RELS 3012.03: Mystics of the Middle East
- RELS 2503.03: Classical and Medieval History of Islamic Civilization
- RELS 3510.03: Sultans and Shahs: Polity and Religion in the Islamic Gunpowder Age
- CLAS 3602.03: Classical and Medieval History of the Persianate World

Bridging courses

- RELS 2203.03: Philosophy and God
- RELS 3000.03: Topics in Religious Studies
- RELS 3019.03: Meetings between Hellenism, Judaism, Christianity, and Islam until the Renaissance
- RELS 3382.03: Medieval Philosophy from Arabic and Jewish Thinkers to Aquinas
- RELS 3910.06: Neoplatonism: Plato and Neoplatonism
- RELS 4450.06: Medieval Interpreters of Aristotle
- CLAS 4500.06: Seminar on Neoplatonism

Note: Not all courses are offered each year. Please consult with the timetable for courses offered.

Contact [Religious Studies](#) for more information.

Minor in Actuarial Science

(for students in 120 credit hour programs other than Actuarial science)

Students in other 120 credit hour degree programs may choose to include a Minor in *Actuarial science* in their program. Students taking a Minor in *Actuarial science* may also consider to take the Certificate in Actuarial and Financial Mathematics.

Departmental Requirements

A minimum of 18 credit hours in *Actuarial Science* courses at the 2000 level or higher. It is possible to count Mathematics or Statistics courses towards these requirements, so long as they are not counted towards a candidate's Major or Honours subject.

A minor degree in Actuarial Science must include the following courses:

- STAT 2600.03/MATH 2600.03: Theory of Interest
- STAT 3360.03/MATH 3360.03: Probability

Plus at least two of

- ACSC 3703.03/STAT 3703.03: Actuarial Models I
- ACSC 3720.03/STAT 3720.03: Life Contingencies I
- ACSC 4703.03/STAT 4703.03: Actuarial Models II
- ACSC 4720.03/STAT 4720.03: Life Contingencies II

The remaining credit hours can be chosen from any ACSC, STAT or MATH courses at or above the 2000 level.

Minor in Agricultural Business Management

This minor is available to students registered in a 120 credit hour Bachelor of Science (Agriculture), Bachelor of Arts, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

The purpose of this minor is to offer students a body of knowledge related to the disciplines of business and management that is specifically applicable to agri-food sectors.

To be awarded the Agricultural Business Management minor students must complete 18 credit hours, six credit hours of which must be at the 3000 level or higher.

Required Courses:

- MGTA 2002.03: Marketing
- MGTA 2004.03: Financial Accounting

Elective Courses:

In consultation with the Academic Advisor, students may choose from any Faculty of Agriculture MGTA courses at a 2000 level or higher.

The following courses provide knowledge and skills that are highly relevant to business operations in the agri-food sector. Students may count up to six credit hours from the following list:

- ECOA 2003.03: Agricultural Futures and Options
- ECOA 3002.03: Agricultural and Food Policy
- ECOA 4004.03: Trade
- CMMT 3000.03: Communication Theory and Skills
- EXTE 3001.03: Leadership Development and the Social Action Process

Contact [Faculty of Agriculture](#) for more information.

Minor in Agricultural Economics

This minor is available to students registered in a 120 credit hour Bachelor of Science (Agriculture), Bachelor of Arts, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

This minor is not available to student majoring in Economics or Agricultural Economics.

This minor provides students the opportunity to deepen their understanding and expertise in agricultural economics. Areas of study include: applied economic theory, quantitative economics, agricultural commodity futures markets, environmental policy, agricultural policy, trade, production economics, and agricultural markets and prices.

18 credit hours chosen from the following in consultation with the academic advisor.

Required:

- ECOA 2000.03: Intermediate Microeconomics

Students must also take at least six additional credit hours at the 3000 or 4000 level, from the following list of courses:

- ECOA 2001.03: Intermediate Macroeconomics
- ECOA 2003.03: Agricultural Futures and Options
- ECOA 3001.03: Econometrics 1
- ECOA 3002.03: Agricultural and Food Policy
- ECOA 3004.03: Agricultural Markets and Prices
- ECOA 3005.03: Agricultural Production Economics
- ECOA 3008.03: Environmental Economics
- ECOA 4000.03: Advanced Microeconomics
- ECOA 4001.03: Econometrics 2
- ECOA 4004.03: Trade
- ECOA 4005.03: Advanced Macroeconomics

Additional courses approved by the Business & Social Sciences Department Head.

Contact [Faculty of Agriculture](#) for more information.

Minor in American Studies

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Requirements

18 credit hours at the 2000 level or above to a maximum of 27 credit hours to be selected from the list below. Student minoring in American Studies must take at least three credit hours from each of the three different participating programs: English, History, Music, or Political Science. Please note that not all courses are offered each year.

ENGL 2003.03: American Literature

ENGL 2070.03: African American Literature

ENGL 3061.03: American Literature to 1865

ENGL 3062.03: American Literature 1865 - 1914

ENGL 3070.03: 20th Century African American Novel

ENGL 3220.03: American Literature of the Earlier Twentieth Century

ENGL 3221.03: American Literature of the Later Twentieth Century

ENGL 3245.03: Beat Generation

ENGL 3820.03: Nabokov

ENGL 4017.03: William Faulkner and Toni Morrison

ENGL 4022.03: Ellison and Everett

ENGL 4280.03: Hollywood Fiction

ENGL 4281.03: Literature and Television

ENGL 4400.03: Nature and American Culture

ENGL 4405.03: American Gothic

ENGL 4406.03: New York in Fiction and Poetry

ENGL 4456.03: American Literature of the Great Depression

ENGL 4609.03: Moby Dick in Context

ENGL 4803.03: Race and Gender in American Speculative Fiction

HIST 2331.03: Creation of the American Republic

HIST 2332.03: The American Republic, 1840-1990

HIST 2335.03: Modern American Culture

HIST 2340.03: The Cold War

HIST 2350.03: The History Wars

HIST 3358.03: Slavery, Gender and Power: Women in Nineteenth Century America

HIST 3361.03: The American Civil War and Reconstruction

HIST 3365.03: The Vietnam War

HIST 3368.03: America in the 1950s
HIST 3369.03: America in the 1960s
HIST 3370.03: North American Landscape
HIST 3372.03: The Cuban Missile Crisis
HIST 3372.03: Spying on the World: The CIA in American History
HIST 3380.03: Slavery and Freedom in the Americas
HIST 4360.03: Slavery and American Political Culture
HIST 4988.03: The Historiography of American Foreign Relations, Post 1945

MUSC 2019.03: Rock'n Roll Era and Beyond
MUSC 2020.03: History of Jazz
MUSC 3360.03: African American Vernacular Music

POLI 2301.03: Comparative Politics
POLI 2540.03: Canadian-American Relations
POLI 3304.03: Comparative Federalism
POLI 3378.03: US Constitution, Government and Politics
POLI 3431.03: Politics Through Film and Literature
POLI 3440.03: The Politics of Fear
POLI 3525.03: Comparative Foreign Policy Simulation
POLI 3574.03: American Foreign Policy
POLI 4242.03: Politics of Reason, Passion, Biology
POLI 4512.03: The Politics of North America

Contact [English](#) for more information.

Minor in Ancient History

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Students must take 18 credit hours from the following list at the 2000 level or above to a maximum of 27 credit hours.

- CLAS 2209.03: The Roman World from Constantine to Theodosius
- CLAS 2214.03: The Roots of Greek Civilization
- CLAS 2215.03: The Classical Greek World
- CLAS 2216.03: Alexander the Great and the Hellenistic Kings
- CLAS 2220.03: Ancient Israel
- CLAS 2231.03: The Rise of Rome
- CLAS 2232.03: The Fall of Rome
- CLAS 2233.03: Roman Legions and the Barbarians
- CLAS 2234.03: Death, Sex, and Gold in the Ancient World
- CLAS 2281.03: Christian Beginnings: The Orthodox and Oriental Churches
- CLAS 3016.03: Meetings between Hellenism and the East to Philo the Jew
- CLAS 3017.03: Meetings between Hellenism, Judaism, Christianity, and Islam until the Renaissance
- CLAS 3021.03: Ancient Art and Architecture from the Pyramids to the Forum
- CLAS 3205.03: Fall of the Roman Republic
- CLAS 3501.03: Herodotus: Father of History, Father of Lies
- CLAS 3502.03: Thucydides and the Greek World at War
- CLAS 4100.03: Reading and Research in Latin Texts (when appropriate)
- CLAS 4540.03: Ammianus Marcellinus and his World

Language Courses

Not more than six credit hours in ancient language may be counted towards the Minor:

- CLAS 2401.03: Introductory Latin I
- CLAS 2402.03: Introductory Latin II
- CLAS 2505.03: Introductory Ancient Greek I
- CLAS 2506.03: Introductory Ancient Greek II

- CLAS 3701.03: Intermediate Greek I
- CLAS 3702.03: Intermediate Greek II
- CLAS 3803.03: Intermediate Latin I
- CLAS 3804.03: Intermediate Latin II

Note: Not all courses are offered each year. Please consult with the timetable for courses offered.

Contact [Classics](#) for more information.

Minor in Animal Agriculture

This minor is available to students registered in a 120 credit hour Bachelor of Science (Agriculture), Bachelor of Arts, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

The Minor in Animal Agriculture will enable students in majors other than Animal Science to learn more about how we raise and care for livestock, including the science behind good animal practice. Students will gain an appreciation for the businesses and industries that support the healthy rearing of farm animals. They will have an opportunity to explore the biology of farm animals, as well as socio-economic concerns such as regulatory frameworks, animal welfare and environmental impacts of raising animals.

18 credit hours chosen from the following, in consultation with the academic advisor.

Required courses:

- ANSC 2005: Animal Agriculture
- BIOA 2006: Mammalian Physiology
- NUTR 3000: Animal Nutrition
- 6 credit hours from the following courses:
 - ANSC 3001: Animal Health
 - ANSC 3000: Animal Breeding
 - BIOA 3008: Growth, Reproduction and Lactation
 - NUTR 3001: Applied Animal Nutrition
- Plus, at least 3 credit hours from the following list:
 - ANSC 2007: Beef Production and Management
 - ANSC 4003: Avian Production Systems
 - ANSC 4004: Ecology of Milk Production in Ruminants
 - ANSC 4005: Swine Science and Pork Production
 - ANSC 4006: The Science of Modern Sheep Farming
 - ANSC 4007: Pastures in Sustainable Livestock Systems

If any of the required courses for the minor are also required for your major, select additional courses from the list above to attain a total of 18 credit hours for minor.

Contact [Faculty of Agriculture](#) for more information.

Minor in Applied Ethics

The Minor in Applied Ethics is open to students in all disciplines except those already pursuing a Major or Honours in Philosophy.

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Requirements

At least 18 credit hours and no more than 27 credit hours in Philosophy beyond the 1000 level, including at least three credit hours beyond the 2000 level.

Select at least three credit hours from the following:

- PHIL 2130.03: Logic: Deduction
- PHIL 2085.03: Reasoning Skills
- PHIL 2090.03: How to Win an Argument

- PHIL 2660.03: Logic: Understanding of Scientific Reasoning

Select:

- PHIL 3105.03: Ethics

Select at least nine credit hours from the following:

- PHIL 2805.03: Ethics & Health Care: Patient Care
- PHIL 2810.03: Ethics & Health Care: Social Policy
- PHIL 2081.03: Ethics in the World of Business
- PHIL 2680.03: Ethics in Science
- PHIL 2475.03: Justice in Global Perspective
- PHIL 2480.03: Environmental Ethics
- PHIL 2490.03: Social, Ethical and Professional Issues in Computer Science
- PHIL 2720.03: The Good Life: Well-being, Meaning and Happiness
- PHIL 4801.03: Topics in Ethics and Health Care
- PHIL 4125.03: Topics in Ethics

Contact [Philosophy](#) for more information.

Minor in Aquaculture

This minor is available to students registered in a 120 credit hour Bachelor of Science (Agriculture), Bachelor of Arts, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

The Minor in Aquaculture will enable students in majors other than Aquaculture to gain important theoretical knowledge and practical skills in the field of aquaculture. Students will gain an appreciation for the range of species farmed in aquaculture and the production systems required to rear them. They will have an opportunity to explore the biology of aquatic animals, relevant issues pertaining to fish health and the impact of aquaculture on the surrounding environment. The business and socio-economic impacts and the regulations within which the industry is managed will also be included in the curriculum.

18 credit hours chosen from the following, in consultation with the Aquaculture advisor.

Required:

- AQUA 2000.03: Introduction to Aquaculture
- AQUA 4000.03: Finfish Production OR AQUA 4001.03: Shellfish Production

Optional courses:

- AQUA 3000.03: Fish Health
- AQUA 4000.03: Finfish Production
- AQUA 4001.03: Shellfish Production
- BIOA 3005.03: Fish Physiology
- BIOA 3006.03: Aquatic Ecology
- NUTR 3002.03: Fish Nutrition
- APSC 2004.03: Aquacultural Environment
- APSC 3013.03: Aquacultural Systems Technology

Contact [Faculty of Agriculture](#) for more information.

Minor in Arabic Studies

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Students must take 18 credit hours at the 2000 level or above to a maximum of 27 credit hours from the following list:

Required:

- ARBC 2021.03: Intermediate Arabic I
- ARBC 2022.03: Intermediate Arabic II

And 12 credit hours selected from the following:

- ARBC 2030.03: Conversational Arabic: Introduction to Levantine Dialects
- ARBC 2100.03: Cultural Introduction to the Arab World
- ARBC 3030.03: Advanced Arabic I
- ARBC 3031.03: Advanced Arabic II
- ARBC 3040.03: Arabic Philosophical Texts: al-Ghazali or RELS 4010.03 Islamic Philosophy: al-Ghazali
- ARBC 3050.03: Arabic Philosophical Texts: Maimonides or RELS 4011.03 Jewish Philosophy: Maimonides
- ARBC 3100.03: Arabic Pre-Islamic Poetry
- CLAS 2281.03: Christian Beginnings: The Orthodox and Oriental Churches
- CLAS 3017.03: Meetings between Hellenism, Judaism, Christianity, and Islam until the Renaissance
- CLAS 3382.03: Medieval Philosophy from Arabic and Jewish Thinkers to Aquinas
- RELS 2003.03: Islam
- RELS 3003.03: Islam and the Others
- RELS 3009.03: Christianity in the Lands of Islam
- RELS 3012.03: Mystics of the Middle East
- RELS 4018.03: Christian Theology in Islamic Lands: John of Damascus

Note: Not all courses are offered each year. Please consult with the timetable for courses offered.

Contact [Arabic Studies](#) for more information.

Minor in Biochemistry and Molecular Biology

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Requirements

- A minimum of 18 credit hours in Biochemistry (BIOC) courses at the 2000 level or higher to a maximum of 36 credit hours.

Please note that there are prerequisite requirements for entry into upper level Biochemistry (BIOC) courses. Some non-BIOC courses such as BIOL 2020.03: Cell Biology, BIOL 2030.03: Genetics and Molecular Biology, CHEM 2401.03: Introductory Organic Chemistry: Structure, Concepts of Mechanisms and Spectroscopy and CHEM 2402.03: Introductory Organic Chemistry: Reactivity of Functional Groups are required for the Biochemistry and Molecular Biology degree programs. These non-BIOC courses cannot be counted as part of the 18 credits hours in BIOC required for a minor.

Contact [Biochemistry and Molecular Biology](#) for more information.

Minor in Bioethics

The Minor in Bioethics is open to students in all disciplines except those already pursuing a Major or Honours in Philosophy.

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Requirements

At least 18 credit hours and no more than 27 credit hours in Philosophy beyond the 1000 level, including at least three credit hours beyond the 2000 level.

Select:

- PHIL 3105.03: Ethics

Select at least three credit hours from the following:

- PHIL 2130.03: Logic: Deduction
- PHIL 2085.03: Reasoning Skills
- PHIL 2090.03: How to Win an Argument
- PHIL 2660.03: Logic: Understanding Scientific Reasoning

Select at least nine credit hours from the following:

- PHIL 2805.03: Ethics & Health Care: Patient Care
- PHIL 2810.03: Ethics & Health Care: Social Policy
- PHIL 2720.03: The Good Life: Well-being, Meaning and Happiness
- PHIL 3800.03: Philosophy of Medicine
- PHIL 4801.03: Topics in Ethics and Health Care

Contact [Philosophy](#) for more information.

Minor in Bioinformatics

This minor is available to students registered in a 120 credit hour Bachelor of Science or Bachelor of Science (Computer Science) program.

Much of the current research in the biological sciences today requires the handling of “Big Data”. Nowhere is this need more apparent than in the area of genomics, where next generation sequencing techniques are capable of producing, at a relatively low cost, hundreds of gigabytes and even terabytes of DNA sequence data. There is a need for people who have an understanding of molecular and evolutionary genomics (the structure and function of genes and genomes) and the skill set needed to analyze the data. A **Minor in Bioinformatics** provides students with an introduction to molecular genomics and to some of the informatics tools currently available.

To qualify for a Minor in Bioinformatics, students must take **all Required Courses** and enough courses from the **Selectives** list to total 18 credit hours above the 2000 level that count uniquely toward the Minor (e.g. do not also count toward a Major or Honours degree). In addition all students must complete the prerequisite 1000-level courses.

Pathways to obtaining the Minor in Bioinformatics have been designed for students majoring in Computer Science, Biochemistry & Molecular Biology, Biology, Marine Biology, Statistics and Neuroscience. Students in other programs may obtain the Minor by fulfilling the general requirements below, but should be aware that most of the courses listed have prerequisites, and that they may need to complete a number of courses in addition to the required and selective courses.

Irrespective of path, students with a Bioinformatics Minor will end up having taken a common set of courses in Computer Science, Calculus, Statistics, Genetics, and Molecular Biology or Biochemistry. All students will also receive training in use of ACENET.

Minor in Bioinformatics – General requirements

Coordinator: Dr. Daniel Ruzzante (daniel.ruzzante@dal.ca)

Students must take all required courses and enough selective courses to total 18 credit hours. Courses (required or selective) cannot be used toward the Minor if the course is being counted toward a Major or Honours degree.

Required prerequisite courses (don't count toward minor)

- CSCI 1105.03: Introduction to Computer Programming (or CSCI 1100.03)
- CSCI 1110.03: Introduction to Computer Science (or CSCI 1101.03)
- BIOL 1010.03: Principles of Biology Part I or BIOL 1020.03: Introductory Biology I
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus

Required courses

- STAT 2060.03/MATH 2060.03: Introduction to Probability and Statistics
- BIOL 2030.03: Genetics and Molecular Biology
- BIOL 3046.03: Molecular Evolution or BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology

Selectives

- CSCI 2134.03: Software Development (Highly recommended)
- STAT 2080.03/MATH 2080.03: Statistical Methods for Data Analysis and Inference
- BIOL 2040.03: Evolution
- BIOL 3101.03/MARI 3101.03: Microbial Ecology
- BIOL 3042.03/MARI 3042.03: Molecular Ecology
- CSCI 3110.03: Design and Analysis of Algorithms I
- CSCI 4180.03: Intro to Computational Biology and Bioinformatics
- CSCI 4181.03: Bioinformatics Algorithms
- BIOC 4010.03: Bioinformatics
- BIOC 4403.03: Genes and Genomes (Highly recommended)

PATHWAY for Biochemistry & Molecular Biology students

Coordinator: Dr. Claudio Slamovits (claudio.slamovits@dal.ca)

Students must take all required courses and enough selective courses to total 18 credit hours. Courses (required or selective) cannot be used toward the Minor if the course is being counted toward a Major or Honours degree.

Required prerequisite courses (don't count toward minor):

- CSCI 1105.03: Introduction to Computer Programming (or CSCI 1100.03)
- CSCI 1110.03: Introduction to Computer Science (or CSCI 1101.03)
- BIOL 1010.03: Principles of Biology Part I or BIOL 1020.03: Introductory Biology I
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus

Required course:

- STAT 2060/MATH 2060.03: Introduction to Probability and Statistics

Selectives:

- STAT 2080/MATH 2080.03: Statistical Methods for Data Analysis and Inference
- CSCI 2134.03: Software Development (Highly recommended)
- CSCI 4180.03: Intro to Computational Biology and Bioinformatics
- CSCI 4181.03: Bioinformatics Algorithms
- BIOL 3046.03: Molecular Evolution
- BIOC 4010.03: Bioinformatics *
- BIOC 4403.03: Genes and Genomes (Highly recommended) *

* Cannot be used toward the Minor if the course is being counted toward a Major or Honours degree

PATHWAY for Biology or Marine Biology students

Coordinator: Dr. Daniel Ruzzante (daniel.ruzzante@dal.ca)

Students must take all required courses and enough selective courses to total 18 credit hours. Courses (required or selective) cannot be used toward the Minor if the course is being counted toward a Major or Honours degree.

Required prerequisite courses (don't count toward minor):

- CSCI 1105.03: Introduction to Computer Programming (or CSCI 1100.03)
- CSCI 1110.03: Introduction to Computer Science (or CSCI 1101.03)
- BIOL 1010.03: Principles of Biology Part I or BIOL 1020.03: Introductory Biology I
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus

Required courses:

- STAT 2060/MATH 2060.03: Introduction to Probability and Statistics
- BIOL 3046.03: Molecular Evolution * or BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology *

Selectives:

- CSCI 2134.03: Software Development (Highly recommended)
- STAT 2080/MATH 2080.03: Statistical Methods for Data Analysis and Inference
 - BIOL 3101/MARI 3101.03: Microbial Ecology *
 - BIOL 3042/MARI 3042.03: Molecular Ecology *
 - BIOL 3046.03: Molecular Evolution *
 - BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology *
 - CSCI 4180.03: Intro to Computational Biology and Bioinformatics
 - CSCI 4181.03: Bioinformatics Algorithms
 - BIOC 4010.03: Bioinformatics *
 - BIOC 4403.03: Genes and Genomes (Highly recommended) *

* Cannot be used toward the Minor if the course is being counted toward a Major or Honours degree

PATHWAY for Computer Science students

Coordinator: Dr. Robert Beiko (beiko@cs.dal.ca)

Students must take all required courses and enough selective courses to total 18 credit hours. Courses (required or selective) cannot be used toward the Minor if the course is being counted toward a Major or Honours degree.

Required prerequisite courses (don't count toward minor):

- CSCI 1105.03: Introduction to Computer Programming (or CSCI 1100.03)
- CSCI 1110.03: Introduction to Computer Science (or CSCI 1101.03)
- BIOL 1010.03: Principles of Biology Part I or BIOL 1020.03: Introductory Biology
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus

Required courses:

- STAT 2060/MATH 2060.03: Introduction to Probability and Statistics *
 - BIOL 2030.03: Genetics and Molecular Biology
 - BIOL 2040.03: Evolution
 - BIOL 3046.03: Molecular Evolution

Selectives:

- STAT 2080/MATH 2080.03: Statistical Methods for Data Analysis and Inference
- CSCI 2134.03: Software Development *
- CSCI 3110.03: Design and Analysis of Algorithms I *
- CSCI 4180.03: Intro to Computational Biology and Bioinformatics *
 - CSCI 4181.03: Bioinformatics Algorithms *
 - BIOC 4403.03: Genes and Genomes (Highly recommended)

* Cannot be used toward the Minor if the course is being counted toward a Major or Honours degree

PATHWAY for Statistics or Mathematics students

Coordinator: Dr. Hong Gu (hgu@mathstat.dal.ca)

Students must take all required courses and enough selective courses to total 18 credit hours. Courses (required or selective) cannot be used toward the Minor if the course is being counted toward a Major or Honours degree.

Required prerequisite courses (don't count toward minor):

- CSCI 1105.03: Introduction to Computer Programming (or CSCI 1100.03)
- CSCI 1110.03: Introduction to Computer Science (or CSCI 1101.03)
- BIOL 1010.03: Principles of Biology Part I or BIOL 1020.03: Introductory Biology
- MATH 1000.03: Differential and Integral Calculus I or MATH 1500.06 X/Y: Calculus)

Required courses

- BIOL 2030.03: Genetics and Molecular Biology
- BIOL 2040.03: Evolution
- BIOL 3046.03: Molecular Evolution

Selectives

- CSCI 2134.03: Software Development (Highly recommended)
- CSCI 4180.03 :Intro to Computational Biology and Bioinformatics
- CSCI 4181.03 :Bioinformatics Algorithms
- BIOC 4403.03: Genes and Genomes (Highly recommended)

PATHWAY for Neuroscience students

Coordinator: Dr. Tamara Franklin (tamara.franklin@dal.ca)

Students must take all required courses and enough selective courses to total 18 credit hours. Courses (required or selective) cannot be used toward the Minor if the course is being counted toward a Major or Honours degree.

Required prerequisite courses (don't count toward minor):

- CSCI 1105.03: Introduction to Computer Programming (or CSCI 1100.03)
- CSCI 1110.03: Introduction to Computer Science (or CSCI 1101.03)
- BIOL 1010.03: Principles of Biology Part I or BIOL 1020.03: Introductory Biology I
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus

Required courses:

- STAT 2060/MATH 2060.03: Introduction to Probability and Statistics
- BIOL 2030.03: Genetics and Molecular Biology
- BIOL 3046.03: Molecular Evolution or BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology

Selectives:

- CSCI 2134.03: Software Development (Highly recommended)
- STAT 2080/MATH 2080.03: Statistical Methods for Data Analysis and Inference
- BIOL 2040.03: Evolution
- BIOL 3101/MARI 3101.03: Microbial Ecology
 - BIOL 3042/MARI 3042.03: Molecular Ecology
 - CSCI 3110.03: Design and Analysis of Algorithms I
 - CSCI 4180.03: Intro to Computational Biology and Bioinformatics
 - CSCI 4181.03: Bioinformatics Algorithms
 - BIOC 4010.03: Bioinformatics
 - BIOC 4403.03: Genes and Genomes (Highly recommended)

Minor in Biology

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

This minor is not available to students majoring in Marine Biology.

Requirements

- A minimum of 18 credit hours in Biology (BIOL) and/or Marine Biology (MARI) courses at the 2000 level or higher to a maximum of 36 credit hours. A maximum of 6 credit hours may be [BIOL-equivalent](#).

Please note that upper level Biology (BIOL) and Marine Biology (MARI) courses have prerequisite requirements.

A [BSc or BA \(90 credit hour\) degree program with a Minor in Biology](#) is also available to students in the Faculty of Science.

Contact [Biology](#) for more information.

Minor in Black and African Diaspora Studies

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Students must take SOSA 2005.03/CANA 2005.03: Introduction to African Canadian Studies

and one of the following two courses:

- PHIL 2165.03: Philosophy and the Black Experience *or*
- CTMP 2115.03: The Idea of Race in Philosophy, Literature and Art

Students will take the remaining 12 credit hours from the following list:

Contemporary Studies (King's)

- CTMP 2115.03: The Idea of Race in Philosophy, Literature, and Art

English

- ENGL 2070.03: African American Literature
- ENGL 3070.03: Twentieth-Century African American Novel
- ENGL 3086.03: Postcolonial Literature

French

- FREN 3150.03: Aspects de la Francophonie
- FREN 3125.03: The French-Speaking World/Le Monde Francophone
- FREN 3175.03: Topical Issues in Francophonie
- FREN 3811.01: Introduction to African and Caribbean Francophone Literature
- FREN 4811.03: Francophone Poetry

History

- HIST 2006.03: Atlantic World, 1450-1650
- HIST 2007.03: Atlantic World, 1650-1800
- HIST 2425.03: Africa Disclosed: The Patterns of Africa's Early History
- HIST 2426.03: Africa: Disruption and Innovation
- HIST 2280.03: African Nova Scotian History
- HIST 2392.03: Introduction to Caribbean History
- HIST 3361.03: The Civil War
- HIST 3358.03: Slavery, Gender and Power: Women in 19th century America
- HIST 3360.03: Enslavement and Emancipation: African-Americans in the US South to 1900
- HIST 3380.03: Slavery and Freedom in the Americas
- HIST 3394.03: Slavery, War and Piracy in the Early Caribbean
- HIST 3430.03: Making of Colonial Africa, c. 1850-1930
- HIST 3431.03: Struggles in the City: Labour, Migration, and Urban Life in Colonial Africa
- HIST 3435.03: Rise and Fall of African Slavery
- HIST 3451.03: Southern African to 1860
- HIST 3452.03: Apartheid and After: Racial Rule in South Africa
- HIST 3470.03: Wars and Revolutions in Nineteenth-Century Africa
- HIST 3471.03: Wars and Revolutions in 20th Century Africa
- HIST 3513.03: From Cairo to Cape Town: Religious Revival, Identity and Colonialism in Muslim Africa
- HIST 4360.03: Slavery and African Political Culture
- HIST 4400.03: Topics in African History
- HIST 4401.03: State Violence, Communal Conflict and Criminality in Modern South Africa

- HIST 4404.03: Crime and Punishment in Modern Africa
- HIST 4475.03: African Intellectuals and the Modern Experience

Music (Fountain School of Performing Arts)

- MUSC 2018.03: Popular Music until 1960
- MUSC 2019.03: The Rock n Roll Era and Beyond
- MUSC 2020.03: The History of Jazz
- MUSC 3360.03: African American Vernacular Music

Philosophy

- PHIL 2165.03: Philosophy and the Black Experience
- PHIL 4700.03: Philosophy of Race
- PHIL 2450/POLI 2450.03: Democracy, Difference & Citizenship

Political Science

- POLI 3315.03: African Politics

Sociology and Social Anthropology

- SOSA 3016.03/GWST 3017: Colonialism and the Body
- SOSA 3190.03: Social Movements
- SOSA 2111/CANA 2111.03: Is there an Atlantic Canada?
- SOSA 3206.03: Ethnicity, Nationalism and Race

Contact [Dr. Afua Cooper](#) for more information.

Minor in Business

This minor is available to students registered in a 120 credit hour Bachelor of Arts, Bachelor of Computer Science, Bachelor of Music, Bachelor of Science, or Bachelor of Science (Medical Science) program.

Required courses to be completed before 2nd year courses:

- COMM 1010.03: Business in a Global Context
- COMM 1101.03: Introductory Accounting I

To complete the minor in business, students are required to complete any six half credits (18.0 credit hours) chosen from the list below. Note that at least one must be at or above the 3000 level (**some courses may have additional prerequisites required**).

- COMM 2202.03: Finance I
- COMM 2203.03: Finance II
- COMM 2220.03: Introduction to Fintech
- COMM 2303.03: Introduction to Organizational Behaviour
- COMM 2310.03: Business Ethics and Corporate Social Responsibility
- COMM 2401.03: Introduction to Marketing
- COMM 2603.03 Legal Aspects of Business
- COMM 3102.03: Financial Statement Analysis
- COMM 3203.03: Financial Institutions
- COMM 3206.03: Investment and Money Management
- COMM 3303.03: Introduction to Human Resource Management
- COMM 3307.03: New Venture Creation
- COMM 3309.03: Management Skill Development
- COMM 3310.03: Reflections on Leadership
- COMM 3402.03: Marketing Communications
- COMM 3409.03: Personal Selling and Sales Management

- COMM 3511.03: Management Information Systems
- COMM 4512.03: Business Analytics and Data Visualization

Contact [Commerce](#) for more information.

Minor in Canadian Studies

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A BA (90 credit hour) degree program with a minor in Canadian Studies is also available.

Required:

1000 level

- Six credit hours in French (a course in an Indigenous language may be substituted. Must be approved by the Coordinator.)

2000-4000 level

A minimum of 18 and a maximum of 27 credit hours from the list of Canadian Studies electives including:

- CANA 2001.03: The Idea of Canada: Social and Political Perspectives
- CANA 2002.03: The Idea of Canada: Cultural and Literary Perspectives

Note: CANA 3000.03: Interdisciplinary Approaches to Canadian Themes, and CANA 4000.03: Seminar in Canadian Studies, may count towards this requirement.

In addition to the courses listed below, appropriate courses in other departments may be taken as Canadian Studies credits, with the permission of the instructor concerned and the coordinator.

- CANA 1102.03: Halifax and the World: Part One
- CANA 1103.03: Halifax in the World: Part Two
- CANA 2004.03: Canadian Literature
- CANA 2005.03: Introduction to African Canadian Studies: Society, History and Culture
- CANA 2021.03/CANA 2022.03: Language and Culture
- CANA 2050.03: Historical Issues in Indigenous Studies
- CANA 2052.03: Contemporary Issues in Indigenous Studies
- CANA 2111.03: Is there an Atlantic Canada?
- CANA 2207.03: Indigenous Peoples and Empires: Canada's Origins to 1763
- CANA 2208.03: Patriots, Rebels, Refugees: Canada's roots in the Age of Revolution, 1763 to 1860
- CANA 2209.03: Making a Nation: Canada, 1860-1929
- CANA 2211.03: Social History of Canada before 1870
- CANA 2212.03: Social History of Canada since 1870
- CANA 2218.03: Canadian Economy: Policy Issues
- CANA 2231.03: The Making of Modern Canada: Canadian Political History, 1896 to the Present
- CANA 2233.03: Canadian Economic History
- CANA 2235.03: History of Canadian Culture
- CANA 2271.03: Atlantic Canada to Confederation
- CANA 2272.03: Atlantic Canada since Confederation: Regionalism, Identity, and Development, 1867-2000
- CANA 2280.03: African Nova Scotian History
- CANA 3001.03: Topics in Canadian Studies
- CANA 3002.03: Topics in Indigenous Studies
- CANA 3008.03: Canadian Society and Politics
- CANA 3020.03: Canadian Cultural Landscapes
- CANA 3026.03: Le français québécois/ Quebec French
- CANA 3050.03: Indigenous Research Methodology and Knowledge Practices
- CANA 3052.03: Indigenous Social Health and Environmental Issues
- CANA 3185.03: Issues in the Study of Indigenous Peoples of North America
- CANA 3231.03: Modern Canadian Literature

- CANA 3270.03: Contemporary Canadian Literature
- CANA 3400.03: Contemporary Canadian Literature
- CANA 3401.03: Indigenous Representation in Film
- CANA 3568.03: Canada and the World
- CANA 3900.03: CANA 3901.03: La littérature canadienne française/French-Canadian Literature
- CANA 4300.03: Canadian Healthcare Delivery System
- CANA 4362.03: Topics in Canadian Music
- CANA 4500.03: Canadian Theatre to 1968: Performing the Nation
- CANA 4501.03: Canadian Theatre Since 1968: Interrogating Identities

Contact [Canadian Studies](#) for more information.

Minor in Chemistry

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A BSc or BA (90 credit hour) degree program with a Minor in Chemistry is available to students in the Faculty of Science.

Requirements

- A minimum of 18 credit hours in Chemistry (CHEM) courses at the 2000 level or higher to a maximum of 36 credit hours, not including any course that cannot be used toward a Chemistry degree

Please note that entry into upper level Chemistry (CHEM) courses requires completion of six credit hours at the first year level (CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium)

Contact [Chemistry](#) for more information.

Minor in Chinese Studies

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A minimum of 18 credit hours in Chinese Studies above the 1000 level. Within those 18 credit hours, students must include CHIN 2030.06: Intermediate Chinese (Mandarin), or CHIN 2031.03/CHIN 2032.03: Intermediate Chinese (Mandarin) and at least six credit hours above the 2000 level.

Contact [Russian Studies](#) for more information.

Minor in Classical Literature

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Students must take 18 credit hours to a maximum of 27 credit hours from the following list:

- CLAS 2103.03: Gods, Heroes, and Monsters: Ancient Mythology I
- CLAS 2104.03: Gods, Heroes, and Monsters: Ancient Mythology II
- CLAS 2401.03: Introductory Latin I
- CLAS 2402.03: Introductory Latin II
- CLAS 2505.03: Introductory Ancient Greek I
- CLAS 2506.03: Introductory Ancient Greek II
- CLAS 2515.03: Myth into Film I: the Greek World
- CLAS 3701.03: Intermediate Greek I
- CLAS 3702.03: Intermediate Greek II
- CLAS 3803.03: Intermediate Latin I
- CLAS 3804.03: Intermediate Latin II

- CLAS 3515.03: Greek Tragedy
- CLAS 3516.03: Ancient Comedy
- CLAS 3525.03: Ancient Greek Epic
- CLAS 4060.03: Boethius and Prosimetrum: Poetry and Prose in the Consolation of Philosophy
- CLAS 4070.03: The Study of the Latin Text of Augustine's Confessions
- CLAS 4100.03: Reading and Research in Latin Texts
- CLAS 4540.03: Ammianus Marcellinus and his World
- CLAS 4711.03: Greek Texts: Epic I
- CLAS 4712.03: Greek Texts: Epic II
- CLAS 4721.03: Greek Texts: Poetry I
- CLAS 4722.03: Greek Texts: Poetry II
- CLAS 4741.03: Greek Texts: Tragedy I
- CLAS 4742.03: Greek Texts: Tragedy II
- CLAS 4802.03: Latin Texts: Roman Poetry II
- CLAS 4811.03: Latin Texts: Love and Violence
- CLAS 4812.03: Latin Texts: War and Peace
- CLAS 4820.03: Special Topics - Homer
- CLAS 4821.03: Latin Texts: Human and Divine
- CLAS 4822.03: Latin Texts: Myth and History
- CLAS 4851.03: Latin Texts: Friends and Enemies

Note: Not all courses are offered each year. Please consult with the timetable for courses offered.

Contact [Classics](#) for more information.

Minor in Classics

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Students declaring a Minor in Classics will complete between 18 and 27 credit hours in Classics at the 2000 level or higher.

A BA (90 credit hour) degree program with a Minor in Classics is also available.

Contact [Classics](#) for more information.

Minor in Classics: Ancient Philosophy

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Students must take 18 credit hours at the 2000 level or above to a maximum of 27 credit hours from the following list, including a minimum of 9 credit hours chosen from the following:

- CLAS 2365.03: Plato and the Case of Socrates: Philosophy on Trial
- CLAS 2366.03: Gods, Beasts and the Political Animal: Plato, Aristotle, and their Legacy
- CLAS 3403.03: The Dialogues of Plato I
- CLAS 3404.03: The Dialogues of Plato II
- CLAS 3503.03: Aristotle

Philosophy courses

- CLAS 2024.03: Philosophy and God
- CLAS 2025.03: Conceptions of Nature in the Pre-Modern World
- CLAS 2026.03: Paganism
- CLAS 2027.03: Magic, Religion and Philosophy
- CLAS 2320.03: Panpsychism
- CLAS 2361.03: Ancient Philosophy: From Thales to Plato

- CLAS 2362.03: Ancient Philosophy: From Aristotle to Plotinus
- CLAS 2365.03: Plato and the Case of Socrates: Philosophy on Trial
- CLAS 2366.03: Gods, Beasts and the Political Animal: Plato, Aristotle, and their Legacy
- CLAS 3016.03: Meetings between Hellenism and the East to Philo the Jew
- CLAS 3017.03: Meetings between Hellenism, Judaism, Christianity, and Islam until the Renaissance
- CLAS 3404.03: Dialogues of Plato II
- CLAS 3411.03: St. Augustine's Confessions I
- CLAS 3412.03: St. Augustine's Confessions II
- CLAS 3431.03: St. Augustine's On the Trinity Part I
- CLAS 3432.03: St. Augustine's On the Trinity Part II
- CLAS 3503.03: Aristotle
- CLAS 3901.03: Philosophy of Aristotle I
- CLAS 3902.03: Philosophy of Aristotle II
- CLAS 3911.03: Neoplatonism: Plato and Neoplatonism I
- CLAS 3912.03: Neoplatonism: Plato and Neoplatonism II
- CLAS 4060.03: Boethius and Prosimetrum: Poetry and Prose in the Consolation of Philosophy
- CLAS 4019.03: Philo Judaeus
- CLAS 4601.03: Hellenistic Philosophy - Stoics and Epicureans
- CLAS 4602.03: Hellenistic Philosophy - From Scepticism to Neoplatonism

Language Courses

Not more than six credit hours of a language course may be counted towards the Minor:

- CLAS 2401.03: Introductory Latin I
- CLAS 2402.03: Introductory Latin II
- CLAS 2505.03: Introductory Ancient Greek I
- CLAS 2506.03: Introductory Ancient Greek II
- CLAS 3701.03: Intermediate Greek I
- CLAS 3702.03: Intermediate Greek II
- CLAS 3803.03: Intermediate Latin I
- CLAS 3804.03: Intermediate Latin II

Note: Not all courses are offered each year. Please consult with the timetable for courses offered.

Minor in Classics: Medieval Philosophy

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Students must take between 18 and 27 credit hours from the following list, including the listed language courses. Must include 9 credit hours from:

- CLAS 3381.03: Medieval Philosophy from Anselm to Augustine
- CLAS 3382.03: Medieval Philosophy from Arabic and Jewish Thinkers to Aquinas
- ARBC 3040.03: Arabic Philosophical Texts: al-Ghazali (or CLAS 4010.03: Islamic Philosophy: al-Ghazali)
- ARBC 3050.03: Arabic Philosophical Texts: Maimonides (or CLAS 4011.03: Jewish Philosophy: Maimonides)
- CLAS 4018.03: Christian Theology in Islamic Lands: John of Damascus
- CLAS 4451.03: Medieval Interpreters of Aristotle
- CLAS 4452.03: Medieval Interpreters of Aristotle

Philosophy courses

- CLAS 2024.03: Philosophy and God
- CLAS 2027.03: Magic, Religion and Philosophy
- CLAS 3016.03: Meetings between Hellenism and the East to Philo the Jew
- CLAS 3017.03: Meetings between Hellenism, Judaism, Christianity, and Islam until the Renaissance

- CLAS 3381.03: Medieval Philosophy from Anselm to Augustine
- CLAS 3382.03: Medieval Philosophy from Arabic and Jewish Thinkers to Aquinas
- CLAS 3411.03: St. Augustine's Confessions I
- CLAS 3412.03: St. Augustine's Confessions II
- CLAS 3431.03: St. Augustine's On the Trinity Part I
- CLAS 3432.03: St. Augustine's On the Trinity Part II
- CLAS 3841.03: Latin Philosophical Texts: Aquinas Texts
- CLAS 3842.03: Latin Philosophical Texts: Anselm and Bonaventure Texts
- CLAS 3911.03: Neoplatonism: Plato and Neoplatonism I
- CLAS 3912.03: Neoplatonism: Plato and Neoplatonism II
- CLAS 4060.03: Boethius and Prosimetrum: Poetry and Prose in the Consolation of Philosophy
- CLAS 4070.03: The Study of the Latin Text of Augustine's Confessions
- CLAS 4401.03: Philosophy of Greek Church Fathers
- CLAS 4402.03: Philosophy of Latin Church Fathers
- CLAS 4451.03: Medieval Interpreters of Aristotle
- CLAS 4452.03: Medieval Interpreters of Aristotle
- CLAS 4501.03: Seminar on Neoplatonism I
- CLAS 4502.03: Seminar on Neoplatonism II
- CLAS 4602.03: Hellenistic Philosophy - From Scepticism to Neoplatonism

Language Courses

Not more than six credit hours in a language course may be counted towards the Minor:

- ARBC 2021.03: Intermediate Arabic I
- ARBC 2022.03: Intermediate Arabic II
- ARBC 3030.03: Advanced Arabic I
- ARBC 3031.03: Advanced Arabic II
- CLAS 2401.03: Introductory Latin I
- CLAS 2402.03: Introductory Latin II
- CLAS 2505.03: Introductory Ancient Greek I
- CLAS 2506.03: Introductory Ancient Greek II
- CLAS 3701.03: Intermediate Greek I
- CLAS 3702.03: Intermediate Greek II
- CLAS 3803.03: Intermediate Latin I
- CLAS 3804.03: Intermediate Latin II
- CLAS 2901.03: Intermediate Hebrew I
- CLAS 2902.03: Intermediate Hebrew II

Note: Not all courses are offered each year. Please consult with the timetable for courses offered.

Contact [Classics](#) for more information.

Minor in Community Design

The Minor in Community Design is a 24 credit hour minor that can be taken in conjunction with a 120-credit hour major or honours program, or with a double major or combined honours program. When the minor is added to either of these two-subject degree programs, completing the requirements may entail taking slightly more than 120 credit hours for the whole of the degree program.

Required courses:

- PLAN 1001.03: Introduction to Planning
- PLAN 1002.03: Introduction to Community Design
- PLAN 2002.03: Community Design Methods
- PLAN 2009.03: Introduction to Policy-making

Elective requirements:

Select at least 12 more credit hours from among PLAN courses for which the student has prerequisites (with the exception of the courses restricted to Honours BCD students, including PLAN 4035, PLAN 4050, PLAN 4001, PLAN 4002, PLAN 4100, and PLAN 4500). Consult the university timetable and calendar for current offerings.

Note: Space in Community Design courses is limited. Students in the minor are admitted to courses only when space permits following registration of the BCD students; not all courses are offered every year. Students should plan for at least four more semesters after completing PLAN 1001 and PLAN 1002 to complete the requirements.

Contact [School of Planning](#) for more information.

Minor in Computer Science

This minor is available to non-Computer Science students registered in a 120 credit hour Bachelor of Arts, Bachelor of Commerce, Bachelor of Management, Bachelor of Music, Bachelor of Science, or Bachelor of Science (Medical Science) program.

The requirements are as for the appropriate program with the completion of the following courses with a grade of at least C:

- CSCI 2110.03: Data Structures and Algorithms
- CSCI 2134.03: Software Development
- Two of:
 - CSCI 3110.03: Design and Analysis of Algorithms I
 - CSCI 3120.03: Operating Systems
 - CSCI 3130.03: Software Engineering
 - CSCI 3136.03 or CSCI 3137.03: Principles of Programming Languages
 - CSCI 3171.03: Network Computing
- 6 additional CSCI credit hours at or above the 2000 level, excluding CSCI 2100.03: Communication Skills: Oral and Written and CSCI 3101.03: Social, Ethical and Professional Issues in Computer Science

Contact [Computer Science](#) for more information.

Minor in Contemporary Studies

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Requirements

Students seeking a minor in Contemporary Studies must complete between 18 and 27 credit hours at the 2000 level or above. This must include:

1. One of the core course doublets:

CTMP 2001.03 & CTMP 2002.03 (or CTMP 2000.06)

**Both CTMP 2001.03 & CTMP 2002.03 should be taken in the same academic year.*

CTMP 3001.03 & CTMP 3002.03 (or CTMP 3000.06)

**Both CTMP 3001.03 & CTMP 3002.03 should be taken in the same academic year.*

CTMP 4001.03 & CTMP 4002.03 (or CTMP 4000.06)

**Both CTMP 4001.03 & CTMP 4002.03 should be taken in the same academic year.*

2. 6 Credit hours at the 3000 or 4000 level. *CTMP 3001.03 & CTMP 3002.03 (or CTMP 3000.06) **OR** CTMP 4001.03 & CTMP 4002.03 (or CTMP 4000.06) will also fulfil this requirement.

3. 6 Credit hours at any level.

Contact [Contemporary Studies](#) for more information.

Minor in Creative Writing

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

To complete a minor in Creative Writing, students must take:

At least 6 credit hours from:

- CRWR 2001.03 The Creative Process
- CRWR 2002.03 Introduction to Creative Writing
- CRWR 2010.03 The Personal Essay

At least 12 credit hours from:

- CRWR 3010.03/ENGL 3098.03 Creative Writing: Poetry I
- CRWR 3020.03/ENGL 3099.03: Creative Writing: Fiction 1
- CRWR 3011.03 (formerly 3000.03): Creative Writing: Poetry II
- CRWR 3021.03 (formerly 3001.03): Creative Writing: Fiction II
- CRWR 3100.03 Songwriting
- CRWR 3200.03 Spoken Word
- CRWR 3311.03: Editing and Publishing Literature
- CRWR 3410.03: Writing for Children: Picture Books
- THEA 3601.03: The Playwright in the Theatre a
- THEA 3602.03: The Playwright in the Theatre b
- JOUR 3440.03 Creative Non-fiction
- JOUR 3441.03 Advanced Creative Non-fiction
- CRWR 4010.03/4011.03 Advanced Poetry (both courses must be completed)
- CRWR 4020.03/4021.03 Advanced Fiction (both courses must be completed)

Minor in Early Modern Studies

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Requirements

Students seeking a minor in Early Modern Studies must complete between 18 and 27 credit hours at the 2000 level or above. This must include:

1. Any one of the three core course doublets:

- EMSP 2001.03 & EMSP 2002.03 (OR EMSP 2000.06)

Both EMSP 2001.03 & EMSP 2002.03 must normally be taken in the same academic year to meet this requirement.

- EMSP 3001.03 & EMSP 3002.03 (OR EMSP 3000.06)

Both EMSP 3001.03 & EMSP 3002.03 must normally be taken in the same academic year to meet this requirement.

- EMSP 4001.03 & EMSP 4002.03 (OR EMSP 4000.06)

Both EMSP 4001.03 & EMSP 4002.03 must normally be taken in the same academic year to meet this requirement.

2. 6 credit hours at the 3000 or 4000 level. **EMSP 3001.03 & EMSP 3002.03 (or EMSP 3000.06) or EMSP 4001.03 & EMSP 4002.03 (or EMSP 4000.06) will also fulfil this requirement.*

3. 6 credit hours at any level.

Contact [Early Modern Studies](#) for more information.

Minor in Earth Sciences

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A BSc or BA (90 credit hour) degree program with a Minor in Earth Sciences is available to students in the Faculty of Science.

Requirements

- EARTH 1080.03: Geology I and EARTH 1090.03 or EARTH 1091.03: Geology II
- A minimum of 18 credit hours in Earth Sciences courses at the 2000 level or higher, must include at least six credit hours at the 3000 level or higher

Minor in Economics

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A BSc or BA (90 credit hour) degree program with a Minor in Economics is available to students in the Faculty of Science and in the Faculty of Arts and Social Sciences.

Requirements

- ECON 1101.03: Principles of Microeconomics/ECON 1102.03: Principles of Macroeconomics
- Must complete between 18 and 36 credit hours in Economics courses at the 2000 level or higher

Contact [Economics](#) for more information.

Minor in English

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A BA (90 credit hour) degree program with a minor in English is also available.

- Must complete between 18 and 27 credit hours in English at or above the 2000 level. At least 3 credit hours must be 3000 level or above.

Contact [English](#) for more information.

Minor in Entrepreneurship & Innovation

Minor in Entrepreneurship and Innovation

This minor is available to students registered in a 120-credit hour undergraduate program within the following Faculties: Faculty of Arts & Social Sciences, Computer Science, Science and Agriculture who have room in their degree requirements for the required credit hours. Courses cannot normally be double counted for both a Minor and a Major. Please consult your Faculty.

The requirements are:

- MGMT 2902.03 Innovation Management: A Design Thinking Approach
- MGMT 3907.03 / COMM 3907.03: New Venture Creation
- MGMT 4901.03 / COMM 4901.03 Applied Entrepreneurship and Innovation
- 9 credit hours from a list of approved elective courses (see below)

Students will have the opportunity to select their 3 electives from a list provided by the Faculties of Agriculture, Arts and Social Sciences, Computer Science, Management, and Science. The list of electives is divided into three clusters: **Leadership, In Context, and Experiential**. Students will select one elective from each cluster.

Approved elective options from each faculty and cluster are below. Please note:

- Students are responsible for satisfying all pre-requisite requirements for electives.
- Provided students can fulfill the necessary pre-requisite requirements, they can select electives from any Faculty's approved list.

Leadership:

Faculty of Agriculture

- EXTE 3001 Leadership Development and Social Change
- MGTA 2000 Human Resources Management
- MGTA 2009 Customer Relations Management
- MGTA 2012 Leadership and Human Resources
- CMMT 3000 Human Communication and Conflict Resolution

Faculty of Computer Science

- CSCI 2690 Intro. to Software Projects

Faculty of Arts and Social Sciences

- ASSC 3150: Intercultural Communication

Faculty of Management

- MGMT 3309 Management Skills Development
- COMM 3310 Reflections on Leadership
- MGMT 3320 Organizational Theory
- COMM 3303 Human Resource Management
- MGMT 4333 Project Management
- MGMT 3308 Managing the Family Enterprise
- MGMT 2805 Intro to Indigenous Governance

Faculty of Science

- ENVS 3502 Environmental Problem solving II: The campus as a living laboratory
- SCIE 4444 Leadership in Science

In Context:

Faculty of Agriculture

- AGRI 5780 Agriculture, Food and Well Being
- MGTA 3010 Agribusiness Value Chain Management
- MGTA 4006 Issues in Agribusiness Stability
- RURS 3000 Rural Community Economic Development
- ECOA 3002 Agricultural & Food Policy
- ENVA 4006 Air, Climate, and Climate Change
- ECOA 3008 Environmental Economics
- APSC 3020 Energy Production and Utilization
- FOOD 4005 Functional Foods and Nutraceuticals
- FOOD 3002 Impact of Food on Health
- ENVA 3000 Environmental Impact
- ENVA 4005 Geographic Information System
- ANSC 2005 Animal Agriculture
- AQUA 2000 Introduction to Aquaculture
- ANSC 3005 Animal Welfare
- ANSC 2004 Organic Livestock Production
- *MGTA 3011 Marketing Research*
- *MGTA 3009 Financial Management*
- *MGTA 3002 Consumer Behavior*

Faculty of Computer Science

- CSCI 2133: Rapid Programming Techniques for Innovation
- CSCI 2170: Server Side Scripting
- CSCI 4176: Mobile Computing
- CSCI 4168: Game Design and Development
- CSCI 3172: Web Centric Computing
- CSCI 4145: Cloud Computing
- CSCI 4126: Ubiquitous Computing

Faculty of Arts and Social Sciences

- CSCI 2203: Data Science for Everyone
- CANA 2001: The Idea of Canada: Social and Political Perspectives
- CANA 2002: The Idea of Canada: Cultural and Literary Perspectives

Faculty of Management

- MGMT 2200 Fundamentals of the Legal Environment of Management
- MGMT 3511 Information Systems for Managers
- COMM 3401 Consumer Behaviour
- COMM 3402 Marketing Communications
- COMM 3404 Marketing Research
- COMM 3409 Sales Management
- COMM 3410 Service Marketing
- COMM 4501 Business Analytics for Decision-Making
- MGMT 3601 Information in a Networked World
- MGMT 3603 Beyond Google
- MGMT 3802 Public Policy
- MGMT 3810 Government Policy Toward Business

Faculty of Science

- BIOC 4501 Medical Biotechnology
- CHEM 4601 Drug Molecule Design
- ECON 2213 Emerging Giants: Economic Rise of China and India
- ECON 2216 Economics of Global Warming
- ECON 2218 Canadian Economy: Policy Issues
- ECON 2334 Perspectives on Development
- ECON 2326 Money and Banking
- ECON 2336 Regional Development
- ECON/PHYC 2850 The Science and Economics of Climate Change
- ECON 3319 Industrial organization
- ECON 3333 Theories of economic development
- ECON 3335 Environmental economics
- ECON 3800 Financial economics
- ENVS 2410/ERTH 2410 Environmental Issues in Earth Sciences
- ENVS 2310/PHYC 2310 Energy and the Environment
- ENVS 3200 Introduction to Environmental Law
- ENVS 4004 Pathways to sustainable energy
- MATH 2300 Mathematical Modelling

Experiential:

Faculty of Agriculture

- MGTA 4001 Advanced Entrepreneurship
- MGTA 2013 Business Planning
- FOOD 4001 Food Quality & Safety
- HORT 3001 Landscape Project Management

- HORT 2008 Residential Landscape Design and Construction
- LARC 4001 Landscape Architecture Studio I
- LARC 4002 Landscape Architecture Studio II

Faculty of Computer Science

- CSCI 4193: Technology Innovation
- CSCI 4691: Advanced Project
- CSCI 2691: Introductory Project
- CSCI 3691: Intermediate Project
- CSCI 3190: Community Outreach
- CSCI 3191: Community Outreach II

Faculty of Arts and Social Sciences

- CRWR 2001: The Creative Process
- INTD 3107: Experiential Learning Canada
- INTD 3019: Experiential Learning Abroad

Faculty of Management

- MGMT 3701 The Community as a Living Lab
- SUST 3502 The Campus as a Living Lab
- COMM 4510 Corporate Communications
- MGMT 3902 Starting Lean

Faculty of Science

- CHEM 3203 Advanced Analytical Laboratory
- ECON 2211 Economics of Innovation
- ENVS 3502 Environmental Problem solving II: The campus as a living laboratory
- PHYC 3180 Contemporary Physics
- SCIE 4701 Science and Technology Innovation, Commercialization and Entrepreneurship I
- SCIE 4702 Science and Technology Innovation, Commercialization and Entrepreneurship II

Minor in Environment, Sustainability and Society

The Environment, Sustainability and Society (ESS) Minor is available to students registered in a 120 credit hour Bachelor of Arts, Bachelor of Science, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Applied Computer Science, Bachelor of Management, Bachelor of Music, Bachelor of Journalism, or Bachelor of Science (Medical Sciences) program.

A BA (90 credit hour) degree program with a Minor in Environment, Sustainability and Society (ESS) is also available.

Requirements for Minor in ESS:

- any 1000-level SUST course
- a minimum of 18 credit hours and a maximum of 27 credit hours at the 2000 level or above in SUST courses.

Contact [College of Sustainability](#) for more information.

Minor in Environmental Horticulture

This minor is available to Bachelor of Science (Agriculture) students.

This minor enables students in other programs to explore the concept of environmental horticulture with emphasis on turfgrass, landscape maintenance, tree management or landscape installation.

18 credit hours chosen from the following, in consultation with the academic advisor.

Required courses:

- HORT 1000.03: Landscape Plants
- HORT 1003.03: Landscape Horticulture

And, an additional six credit hours from the list below:

- HORT 1002.03: Turfgrass Production and Management
- HORT 1005.03: Landscape Installation
- HORT 2005.03: Design and Construction of Turf Facilities
- HORT 2011.03: Arboriculture
- HORT 2012.03: Landscape Maintenance

Plus, an additional six credit hours at 3000 or 4000 level from the list below

- HORT 3000.03: Environmental Processes and Natural Landscape Functions
- HORT 3001.03: Landscape Project Management
- HORT 3008.03: Horticultural Therapy
- HORT 4000.03: Urban Tree Management

Contact [Faculty of Agriculture](#) for more information.

Minor in Environmental Sciences (Agriculture)

This minor is only available to **Bachelor of Science (Agriculture)** and **Bachelor of Science (Bioveterinary Science)** students.

18 credit hours chosen from the following, in consultation with the academic advisor.

Required courses:

- ENVA 2000.03: Environmental Studies I
- ENVA 2001.03: Environmental Studies II
- HORT 3000.03: Environmental Processes and Natural Landscape Functions
- ENVA 3000.03: Environmental Impact Assessment

At least six credit hours are required from the following approved courses:

- BIOA 3001.03: Ecology
- CHMA 3009.03: Environmental Chemistry
- ENVA 3001.03: Environmental Sampling and Analysis
- APSC 3002.03: Waste and Environmental Management
- ENVA 3021.03: Ecohydrology
- ENVA 3005.03: Geographic Information System
- ENVA 4006.03: Air, Climate and Climate Change
- SOIL 2000.03: Introduction to Soil Science

Contact [Faculty of Agriculture](#) for more information.

Minor in Environmental Science

This Minor is available to students registered in a 120-credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A BSc or BA 90-credit hour degree with Minor in Environmental Science is appropriate for students who want to study some Environmental Science but do not wish to complete the conventional four-year program. The degree is best suited for students who want a general science degree with some specialization in Environmental Science. A 90-credit hour degree program is not suitable for students who wish to pursue graduate studies. With additional study, the degree may be upgraded to a 120-credit hour Major or Honours degree at a later date.

The 90-credit hour BSc or BA in Environmental Science is usually the preferred option for students who wish to combine studies in Environmental Science with a degree in Engineering (see BSc/BEng or BA/BEng Concurrent Program).

Minor requirements:

- ENVS 1100.03: Foundations of Environmental Science and ENVS 1200.03: Current Environmental Challenges
- A minimum of 18 credit hours in Environmental Science (ENVS) courses at the 2000 level or higher to a maximum of 36 credit hours. A maximum of 6 credit hours may be ENVS-equivalent.

*Please note that upper level Environmental Science (ENVS) courses have prerequisite requirements.

Minor in Environmental Studies

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

BA Minor

BA students must take 12 credit hours of required courses and 18 elective credit hours from the list of approved courses below. The following rules apply to the selection of courses for the Minor:

- A maximum of three credit hours in the Major subject (e.g. a course beyond those required for the Major) can count instead toward the Minor.
- At least six credit hours from the Approved Electives list must be in FASS courses and at least six credit hours must be from Science Approved Electives courses.
- In addition to ENVS 3200.03: Introduction to Environmental Law, at least nine credit hours must be at the 3000 level or above.

Required Courses:

- ENVS 1000X/Y.06: Introduction to Environmental Science or ENVS 1100.03: Foundations of Environmental Science and ENVS 1200.03: Current Environmental Challenges
- PHIL 2480.03: Environmental Ethics
- ENVS 3200.03: Introduction to Environmental Law

BA Approved Electives in Environmental Studies:

Additions to the following lists will be made, as relevant courses become available.

Faculty of Science:

- BIOL 2060.03: Introductory Ecology
- BIOL 2601.03: The Flora of Nova Scotia
- BIOL 2605.03: Introduction to Marine Life in Nova Scotia
- BIOL 3060.03: Environmental Ecology
- BIOL 3061.03: Communities and Ecosystems
- BIOL 3225.03: Plants in the human landscape
- BIOL 3226.03: Economic Botany, Plants and Civilization
- BIOL 3601.03: Nature Conservation
- BIOL 3615.03: Methods in Ecology
- BIOL 4065.03: Sustainability and Global Change
- ECON 2336.03: Regional Development
- ECON 3332.03: Resource Economics
- ECON 3335.03: Environmental Economics
- EARTH 2410.03: Environmental and Resource Geology I
- EARTH 3500.03: Geoscience Information Management
- GEOG 2800.03: Climate Change
- MARI 4665.03: Hacking the Blue Planet
- OCEA 2001.03: The Blue Planet I
- OCEA 2002.03: The Blue Planet II

- OCEA 2800.03: Climate Change
- PHYC 2451.03: Astronomy I: The Sky and Planets
- PHYC 2800.03: Climate Change
- ENV5 2100.03: Environmental Informatics
- ENV5 2310.03: Energy and the Environment
- ENV5 3000.03: Environmental Science Internship
- ENV5 3100.03: Environmental Analytics
- ENV5 3210.03: Environmental Law II: Natural Justice and Unnatural Acts
- ENV5 3220.03: International Environmental Law for Scientists
- ENV5 3226.03: Economic Botany, Plants and Civilization
- ENV5 3300.03: Contaminated Site Management
- ENV5 3400.03: Human Health and Sustainability
- ENV5 3501.03: Environmental Problem Solving I
- ENV5 3502.03: Environmental Problem Solving II: The Campus as a Living Laboratory
- ENV5 3702.03: Sustainable Industries
- ENV5 4001.03: Environmental Impact Assessment
- ENV5 4004.03: Pathways to Sustainable Energy
- ENV5 4100.03: Environmental Science Capstone

Faculty of Arts and Social Sciences (FASS):

- CTMP 3000.06: Science and Culture
- CTMP 3150.03: Nature and History
- CTMP 3210.03: Intersecting Bodies, Selves and Environments
- CTMP 3411.03: Studies in Contemporary Science and Technology
- EMSP 2310.03: Women and Gender in Early Modern Science
- EMSP 2330.03: Nature Imagined
- EMSP 3000.06: The Study of Nature in Early Modern Europe
- ENGL 4005.03: Green Reading: Nature, Culture, Canada
- ENGL 4400.03: Nature of America
- HSTC 3000.03: The Scientific Revolution
- HSTC 3202.03: Ecology and Religion
- HSTC 4000.06: Science and Nature in the Modern Period
- HSTC 4300.03: Nature and Romanticism
- HIST 3073.03: History of Marine Sciences
- HIST 3210/CANA 3020/GEOG 3020.03: Canadian Cultural Landscapes
- HIST 3302.03: Technology and History in North America
- HIST 3370.03: North American Landscapes
- HIST 3750.03: History of Seafaring
- HIST 4271.03: The Fisheries of Atlantic Canada - Society and Ecology in Historical Perspective
- HIST 4350.03: People and Things - Material Culture
- INTD 2001.03: Introduction to Development I
- INTD 2002.03: Introduction to Development II
- INTD 3002.03: Seminar in Development: Development Practice
- INTD 3114.03: Environment and Development
- INTD 3304.03: Sustainable Development in Cuba
- INTD 4013.03: Environmental Conflict & Security
- PHIL 2475.03: Justice in Global Perspective
- PHIL 2485.03: Technology and the Environment
- PHIL 3670.03: Philosophy of Science
- PHIL 4120.03: Theory of Rational Decision-Making
- POLI 3585.03: Politics of the Environment
- POLI 4228.03: Interest Groups
- POLI 4380.03: Politics of Climate Change
- RELS 3211.03, Ecology and Religion
- SOSA 2100.06: Environment and Culture
- SOSA 3185.03: Issues in the Study of Indigenous Peoples of North America

- SOSA 3190.03: Social Movements
- SOSA 3200.03: Environment and Society
- SOSA 3220.03: Coastal Communities
- SOSA 4210.03: Tourism and Development
- SPAN 2070.03: Area Studies on Mexico and Central America
- GWST 3310.03: Gender and Development in Africa

Other Electives

- PLAN 2001.03: Landscape Analysis
- PLAN 3001.03: Landscape Ecology
- PLAN 3002.03: Reading the City
- PLAN 3005.03: Cities and the Environment in History
- PLAN 3010.03: Urban Ecology
- PLAN 3020.03: Landscape Design
- PLAN 4106.03: Transportation Planning

BACSc, BSc, BCSc, BInf, BComm, BMgmt Minor

Students in these programs must take 18 credit hours of required courses, plus 12 credit hours from the approved list of elective courses below. Note: In planning their programs students must take into account the prerequisites which apply to many of the elective courses listed below. The following rules apply to the selection of courses for the Minor:

- No course can fulfill a requirement of both the Major or Honours subject and the Minor.
- A maximum of three credit hours in the Major/Honours subject (e.g. a course beyond those required for the Major/Honours) can count toward the Minor.
- At least three credit hours beyond the required courses must be at the 3000 level or above.

Additions to the Electives list will be made as relevant courses become available.

Required Courses:

- ENVS 1000X/Y.06: Introduction to Environmental Science or ENVS 1100.03: Foundations of Environmental Science and ENVS 1200.03: Current Environmental Challenges
- PHIL 2480.03: Environmental Ethics
- ENVS 3501.03: Environmental Problem Solving I
- ENVS 3502.03: Environmental Problem Solving II
- ENVS 3200.03: Introduction to Environmental Law

Electives (12 credit hours from the list):

- BIOL 2601.03: The Flora of Nova Scotia
- BIOL 2605.03: Introduction the Marine Life of Nova Scotia
- BIOL 3063.03 Resource Ecology
- BIOL 3225.03: Plants in the Human Landscape
- BIOL 3226.03: Economic Botany, Plants and Civilization
- BIOL 3601.03: Nature Conservation
- BIOL 3xxx.03: Any ecology-related course at 3000-level or above
- BIOL 4065.03: Sustainability and Global Change
- BIOL 4104.03: Environmental Microbiology
- BIOL 4160.03: Political Ecology
- CHEM 2505.03: Environmental Chemistry I
- CHEM 4203.03: Environmental Chemistry II
- CHEM 4595.03: Atmospheric Chemistry
- CTMP 3210.03: Intersecting Bodies, Selves and Environment
- CTMP 3220.03: The Aesthetics of Nature
- EARTH 2203.03: Sediments and Sedimentary Rocks
- EARTH 2410.03: Environmental and Resource Geology I
- EARTH 3302.03: Quaternary Sedimentary Environments

- EARTH 3400.03: Fundamentals of Hydrogeology
- EARTH 3402.03: Practical Hydrogeology
- EARTH 3410.03: Environmental Geology 2
- EARTH 3420.03: Geochemistry of Aquatic Environments
- EARTH 3440.03: Geomorphology
- EARTH 3500.03: Geoscience Information Management
- EARTH 4450.03: Introduction to Landscape Simulation
- EARTH 4502.03: Micropaleontology and Global Change
- EARTH 4520.03: GIS Applications to Environmental and Geological Sciences
- EARTH 4530.03: Environmental Remote Sensing
- ECON 2210.03: Emerging Giants: the Economic Rise of China and India
- ECON 2216.03: Economics of Global Warming
- ECON 3332.03: Resource Economics
- ECON 3335.03: Environmental Economics
- ENV 2100.03: Environmental Informatics
- ENV 2310.03: Energy and the Environment
- ENV 3000.03: Environmental Science Internship
- ENV 4210.03: Administrative Environmental Law: Natural Justice and Unnatural Acts
- ENV 3220.03: International Law for Environmental Scientists
- ENV 3225.03: Plants in the Human Landscapes
- ENV 3226.03: Economic Botany, Plants and Civilization
- ENV 3300.03: Contaminated Site Management
- ENV 3301.03: Enterprise Sustainability
- ENV 3400.03: Human Health and Sustainability
- ENV 3500.03: Geoscience Information Management
- ENV 3615.03: Methods in Ecology
- ENV 3632.03: Applied Field Methods in Fish Ecology
- ENV 3801.03: Directed Readings in Environmental Science
- ENV 3702.03: Sustainable Industries
- ENV 4001.03: Environmental Impact Assessment
- ENV 4100.03: Environmental Science Capstone

BCD Minor

The Minor in Environmental Studies is a 30 credit hour Minor taken in conjunction with the Bachelor of Community Design Honours (It is not available within the three year BCD program). The Minor in Environmental Studies provides a student with an appreciation of the scientific, cultural, economic, historic, legal and social aspects of environmental issues. The student will have the opportunity to earn an additional credential on the degree to recognize the special concentration of courses in environmental studies. Approval for the program is required from the School of Planning and from the Coordinator of Environmental Programs. Students complete all requirements for their Honours Major in addition to these required courses for the minor. Students may count the course ENVS 1000 towards both the BCD requirements and towards the requirement for the Minor. Other courses cannot be counted towards both sets of requirements.

Required Courses:

- ENVS 1000.06: Introduction to Environmental Studies (or DISP) or ENVS 1100.03: Foundations of Environmental Science and ENVS 1200.03: Current Environmental Challenges
- PHIL 2480.03: Environmental Ethics
- ENVS 3200.03: Environmental Law
- ENVS 3501.03: Environmental Problem Solving I
- ENVS 3502.03: Environmental Problem Solving II

Elective requirements:

12 credit hours of courses from the following list:

- BIOL 2605.03: Introduction to Marine Life of Nova Scotia
- BIOL 3601.03: Nature Conservation
- CHEM 2505.03: Environmental Chemistry I
- CHEM 4203.03: Environmental Chemistry II
- ECON 2216.03: Economics of Global Warming
- ECON 2336.03: Regional Development
- ECON 3332.03: Resource Economics
- ECON 3335.03: Environmental Economics
- ENVS 3000.03: Environmental Science Internship
- ENVS 3200.03: Introduction to Environmental Law
- ENVS 3226.03: Economic Botany, Plants and Civilization
- ENVS 3300.03: Contaminated Site Management
- ENVS 3301.03: Enterprise Sustainability
- ENVS 3220.03: International Environmental Law for Scientists
- ENVS 3400.03: Environment and Human Health
- ENVS 3500.03: Exploring Geographic Information Systems
- ENVS 4001.03: Environmental Impact Assessment
- ESMP 2330.03: Nature Imagined
- ESMP 3000.06: The Study of Nature in Early Modern Europe
- EARTH 3302.03: Quaternary Sedimentary Deposits
- EARTH 3440/GEOG 3440: Geomorphology
- HIST 3370.03: North American Landscapes
- HSTC 3202.03: Ecology and Religion

- INTD 2001.03: Introduction to Development I
- INTD 2002.03: Introduction to Development II
- MARI 4665.03: Hacking the Blue Planet
- OCEA 2001.03: The Blue Planet I
- OCEA 2002.03: The Blue Planet II
- OCEA 2800.03: Climate Change
- OCEA 3001.03: Introduction to Physical Oceanography
- OCEA 3002.03: Introduction to Chemical Oceanography
- PHIL 2485.03: Technology and the Environment
- POLI 3385.03: Politics of the Environment
- POLI 3589.03: Politics of the Sea I
- RELS 3211.03: Ecology and Religion
- SOSA 2100.06: Environment and Culture

- SOSA 4072.03: Naturalistic Approaches to the Social Sciences
- STAT 3345.03: Environmental Risk Assessment

Minor in Equine Science

This minor is available to students registered in a 120 credit hour Bachelor of Science (Agriculture) or Bachelor of Science (Bioveterinary Science) program.

The Minor in Equine Science will enable students to gain theoretical knowledge and practical skills in the field of equine sciences. They will learn more about how we raise and care for horses, including the science behind good equine practice. Students will gain an appreciation for the businesses and industries that support the healthy rearing of horses. They will have an opportunity to explore the biology of horses, relevant issues pertaining to horse health and welfare, genetics and breeding, nutrition, behaviour and facilities management.

Required Courses:

- ANSC 2002.03: Introduction to Equine Science
- ANSC 2008.03: Equine Facilities Management
- ANSC 3008.03: Equine Genetics and Reproductive Management
- ANSC 3009.03: Applied Equine Nutrition
- ANSC 3011.03: Equine Behaviour and Learning
- ANSC 4001.03: Equine Exercise Physiology and Health

Contact [Faculty of Agriculture](#) for more information.

Minor in Esoteric and Occult Traditions

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Any 18 credit hours from the following courses, drawn from at least two different departments or programs, with at least 6 credit hours at the 3000 level:

- SOSA 3228.03: Belief Systems: Symbol, Myth and Meaning
- SOSA 2292.03: Goblins, Ghosts, Gods, Gurus I
- SOSA 2293.03: Goblins, Ghosts, Gods, Gurus II
- CLAS 2027.03: Magic, Religion & Philosophy
- CLAS 3283/RELS 3283.03: Gods in the Flesh: Iamblichus and Anselm
- RELS 3012.03: Mystics of the Middle East
- CLAS 2026.03/RELS 2026.03: Paganism
- EMSP 2320.03/RELS 2420/GWST 2320.03: Witchcraft in Early Modern Europe
- EMSP 2313.03/CTMP 2313.03: The Vampire: Modernity and the Undead

- HSTC 2120.03/EMSP 2360/HIST 2990.03/RELS 2120.03: Magic, Science and the Occult: from Antiquity to Postmodernity
- HSTC 3121.03/EMSP 3321.03/HIST 3990.03/RELS 3121.03: In Search of the Philosopher's Stone: The History of European Alchemy
- HSTC 3320.03: Oracles, Omens, and Astrology in the Ancient World

Contact [History of Science and Technology](#) for more information.

Minor in European Studies

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Requirements

- EURO 2101.03: Europe: Ideas, Culture and Society to 1900
- EURO 2102.03: Europe: Ideas, Culture and Society from 1900 to the present
- EURO 4512.03: European Studies Seminar
- And in addition, 15 credit hours in courses already approved for the European Studies major, including 6 credit hours in a second-year or above language and 3 credit hours in each of the Arts, Humanities and Social Sciences stream

Contact [European Studies](#) for more information.

Minor in Film Studies

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program. It is an inter-University program that allows students to obtain credit hours from any of the participating institutions in addition to Dalhousie: Nova Scotia College of Art and Design University, Saint Mary's University, and the University of King's College.

A minimum of 24 credit hours in Film Studies above the 1000 level are required. Within those 24 credit hours, students must include:

- FILM 2311.03: Film Analysis or SMU ENGL 2511.03: Reading Film
- FILM 2301.03: Film History 1 or NSCAD AHIS 2800.03: Film History and Criticism 1890-1945
- FILM 3301.03: Film History 2 or NSCAD AHIS 2810.03: Film History and Criticism 1945-Present
- 9 credits of electives above the 2000 level

* Students are strongly advised to take the core courses as soon as they declare their film minor.

Electives

- CANA 3401.03/INDG 3401.03/FILM 3401.03: Indigenous Representation in Film
- CHIN 3050.03/FILM 3350.03: Topics in Asian Cinema
- CTMP 3302.03: Film Theory
- CTMP 3304.03/GWST 3304.03/JOUR 3304.03: Through Her Eyes: Women and the Documentary Tradition
- CTMP 3305.03: Modern Film and the Theory of the Gaze
- ENGL 2095.03: Narrative in the Cinema
- ENGL 3300.03: TV: Theory and Criticism
- FILM 2350.03: Studies in Film Directors
- FILM 2360.03: Popular Cinema
- FILM 3314.03/ENGL 3314.03/THEA 3314.03: Shakespeare and his Contemporaries on Film
- FILM 3331.03/GWST 3331.03: Film Theory II: Desire in Cinema
- FILM 3351.03: The Cinema of David Lynch
- FILM 3370.03: Animated Film
- FILM 3915.03/THEA 3915.03: Stars and Stardom on Stage and Screen
- FILM 4101.03: Short Apprenticeship
- FILM 4102.06: Long Apprenticeship

- FILM 4390.03: Special Topics in Film Studies
- FILM 4391.03: Special Topics in Popular Cinema
- FILM 4392.03: Point of View in the Cinema
- FILM 4393.03/THEA 4924.03: Special Topics in Theatre and Cinema
- FILM 4926.03/PERF 4926.03/THEA 4926.03: Creative Responses to A Midsummer Night's Dream
- FREN 2800.03: Cinema: The French Phenomenon I
- FREN 2801.03: Cinema: The French Phenomenon II
- GERM 2040.03/FILM 2040.03: Monsters and Madness in 20th Century German Film
- ITAL 2600.03/FILM 2314.03: Survey of Italian Cinema

- SMU FREN 2300.03: French Film Comedy
- SMU HIST SMU 3450.03: Film and History
- SMU SOSI 3346.03/CRIM 3303.03: Crime and the Media
- SMU SOSI 4452.03: Atlantic Canadian Film and Television

Contact the Fountain School of Performing Arts for more information.

Minor in Food Bioscience

This minor is available to students registered in a 120 credit hour Bachelor of Science (Agriculture), Bachelor of Arts, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

The minor is designed to enhance knowledge, skills and critical thinking of students in food science and technology, food bioactives and health benefits, value-added food manufacturing and bio-processing, nutraceutical sciences and food quality and safety.

18 credit hours chosen from the following, in consultation with the academic advisor.

Required courses:

- CHMA 3011.03: Fundamentals of Food Chemistry
- FOOD 3002.03: Impact of Food on Health
- FOOD 4001.03: Food Quality and Safety OR NUTR 3000.03: Introduction to Nutrition
- FOOD 4005.03: Functional Food and Nutraceuticals
- MCRA 4001.03: Food Microbiology

Three credit hours from the following list:

- ANSC 3003.03: Eggs & Dairy Products
- ANSC 3004.03: Meat Science
- CHMA 4003.03: Instrumental Analysis
- FOOD 4000.03: Directed Studies in Food & Bioproduct Science
- FOOD 4004.03: Directed Studies in Nutriscience

Contact Dr. Vasantha Rupasinghe (vrupasinghe@dal.ca) for more information.

Minor in French

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A minimum of 18 to a maximum of 27 credit hours beyond the 1000-level, including:

- FREN 2020.03: Introduction à la linguistique/Introduction to Linguistics OR FREN 2075.03: Introduction to Linguistics
- and any 15 credit hours from the following:
 - FREN 3017.03: Linguistique différentielle/Differential Linguistics
 - FREN 3021.03: Syntaxe/Syntax
 - FREN 3022.03: Sémantique/Semantics
 - FREN 3026.03: Le français québécois/Québec French
 - FREN 4011.03: Lexicologie/Lexicology
 - FREN 4013.03: Pragmatique/Pragmatics
 - FREN 4014.03: Langue et société/ Language and Society
 - FREN 4017.03: Traduction générale/General Translation

Contact [French](#) for more information.

Minor in Gender and Women's Studies

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A BA (90 credit hour) degree program with a minor in Gender and Women's Studies is also available.

Requirements

- 18 credit hours to a maximum of 27 credit hours beyond the 1000 level in Gender and Women's Studies
- At least three different disciplines shall be represented in a student's selection of cross-listed Gender and Women's Studies courses

Contact [Gender and Women's Studies](#) for more information.

Minor in Geography

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Science) program.

To fulfill the requirements for a Minor in Geography, students must complete 24 credit hours, including the following:

- GEOG 1030.03/ERTH 1030.03: Introduction to Physical Geography
- GEOG 1035.03: Introduction to Human Geography
- GEOG 2000.03: Cartography

Additional 15 credit hours from the following list: at least 6 of which must be at the 3000 level or higher.

- GEOG 1060/ERTH 1060: Natural Disasters
- GEOG 2006.03/PLAN 2006.03: Space, Place, and Geographic Information Systems
- GEOG 2070.03/HIST 2383.03/SPAN 2070.03: Area Studies on Mexico and Central America
- GEOG 2100.06/SOSA 2100.06: Environment and Culture
- GEOG 2201.03/INTD 2001.03: Introduction to Development
- GEOG 2202.03/INTD 2002.03: Introduction to Development II
- GEOG 2206.03/INTD 2106.03: Africa: An Introduction
- GEOG 2336.03/ECON 2336.03: Regional Development
- GEOG 2800.03/PHYC 2800.03/OCEA 2800.03: Climate Change
- GEOG 3102.03/SUST 3102.03: Coastal Change and Adaptation
- GEOG 3106.03/SUST 3106.03: The Canadian North
- GEOG 3165.03/SOSA 3165.03: Peoples and Cultures of the World: Selected Area Studies
- GEOG 3110.03/INTD 3110.03: Migration and Development
- GEOG 3114.03/INTD 3114.03: Agriculture and Development
- GEOG 3284.03/SOSA 3284.03: Living in cities
- GEOG 3400.03/ENVS 3400.03: Human Health and Sustainability
- GEOG 3440.03/ERTH 3440.03: Geomorphology
- GEOG 3500.03/ERTH 3500.03/ENVS 3500.03/ERTH 5600.03: Exploring Geographic Information Systems
- GEOG 3633.03/ENVS 3633.03/BIOL 3633.03: Spatial Information and GIS in Ecology
- GEOG 3700.03/ERTH 3700.03/ENVS 3700.03: Earth resources, sustainability, and society
- GEOG 4440.03/ERTH 4440.03: Geomorphology and Landscape Evolution
- GEOG 4450.03/ERTH 4450.03: Introduction to Landscape Simulation
- GEOG 4520.03/ERTH 4520.03: GIS Applications to Environmental and Geological Sciences
- GEOG 4530.03/ERTH 4530.03: Environmental Remote Sensing
- GEOG 4850.03/SCIE 4850.03/BIOL 4850.03/ENVS 4850.03/ERTH 4850.03: Geographic Information Science Research Project

Note that the following courses are not offered in upcoming terms, but may be counted toward the Minor in Geography if taken previously:

- GEOG 2001.03/PLAN 2001.03: Landscape analysis
- GEOG 3001.03/PLAN 3001.03: Landscape Ecology
- GEOG 3002.03/PLAN 3002.03: Reading the City
- GEOG 3005.03/PLAN 3005.03: Cities and the Environment
- GEOG 3006.03/PLAN 3006.03: Reading the Landscape
- GEOG 3110.03/INTD 3110.03: Migration and Development
- GEOG 3114.03/INTD 3114.03: Agriculture and Development
- GEOG 3210.03/HIST 3210.03/CANA 3020.03: Canadian Cultural Landscapes
- GEOG 3220.03/SOSA 3220.03: Coastal Communities in the North Atlantic
- GEOG 3370.03/HIST 3370.03: North American Landscapes

NOTE: Students in the BCD program may not select PLAN cross-listed courses that are required courses for their degree program

Contact [Geography](#) for more information.

Minor in German

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A BA (90 credit hour) degree program with a minor in German is also available.

Students must complete between 18 and 27 credit hours selected from courses taught in German beyond the 1000 level, at least 6 credit hours of which must be at the 3000 level or higher.

Contact [German](#) for more information.

Minor in German Studies

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Students must complete 24 credit hours beyond the 1000 level.

Requirements

- GERM 2001.03: Intermediate German I
- GERM 2002.03: Intermediate German II

Contact [German](#) for more information.

Minor in German Philosophy

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Students must complete between 18 and 27 credit hours beyond the 1000 level from the following list:

- GERM 2290.03: German: Romanticism: From Goethe to Hegel
- GERM 2451.03: Kant and the History of German Idealism I
- GERM 2452.03: Kant and the History of German Idealism II
- GERM 2551.03: In Pursuit of Freedom from Luther to Nietzsche II
- GERM 2600.03: 'Freiheit'. Freedom in German Literature and Thought I
- GERM 2601.03: 'Freiheit'. Freedom in German Literature and Thought II. 19th and 20th Century
- GERM 2651.03: Modern German Philosophy I
- GERM 2652.03: Modern German Philosophy II
- GERM 3101.03: German Literature and Thought from Reformation to Enlightenment I
- GERM 3102.03: German Literature and Thought from Reformation to Enlightenment II
- GERM 3120.03: Origins of Comparative Religion from Hegel to Nietzsche
- GERM 3450.03: Confronting Fascism
- GERM 3550.03: Germany and the Environment
- GERM 4101.03: Aesthetics and Poetics I
- GERM 4102.03: Aesthetics and Poetics II
- GERM 4201.03: Seminar on Hegel's Phenomenology of Spirit I
- GERM 4202.03: Seminar on Hegel's Phenomenology of Spirit II
- GERM 4251.03: Studies in German Idealism I
- GERM 4252.03: Studies in German Idealism II
- PHIL 2651.03: Modern German Philosophy I
- PHIL 2652.03: Modern German Philosophy II
- PHIL 3630.03: History of Philosophy: Kant
- PHIL 3635.03: History of Philosophy: 19th Century Philosophy
- PHIL 4190.03: Topics in the History of Philosophy I: Wittgenstein

Other courses may be possible with departmental approval. Students must take nine credit hours from the German Department and nine credit hours from the Philosophy department.

Contact [German](#) for more information.

Minor in Health Studies

This minor is available to students registered in a 120 credit hour Bachelor of Arts, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Science) program.

The requirements are as for appropriate degree program including 24 credit hours as described in Health Studies. To count towards the minor, a minimum grade of B- is required.

Required Courses

Students must complete 24 credit hours above the 1000 level from the list of approved elective courses noted below. A minimum of "B-" in these approved elective courses above the 1000 level earns credit toward the Minor.

Elective Requirements

24 credit hours from the approved list below, all above the 1000 level, and 12 credit hours above the 2000 level. These credit hours must include courses from at least two of the following disciplines: Humanities, Social Sciences, Physical/Life Sciences, Engineering, Health Professions. Not all of these courses are offered every year. Some courses require prerequisites.

- ENGL 2030.03: Literature, Health and Healing
- HIST 3108.03: Topics in the Social and Cultural History of England: Madness and Marginality
- INTD 3115.03: Global Health: Challenges of Global Health Equity in the 21st Century
- PHIL 2805.03: Ethics and Health Care: Patient Care
- PHIL 2810.03: Ethics and Health Care: Social Policy
- PHIL 4801.03: Topics in Ethics and Health Care
- POLI 4260.03: The Politics of Health Care
- POLI 4466.03: The Social and Political Construction of Health and Medicine
- SOSA 2400.06: Health and Illness Across Cultures
- SOSA 2501.06: Sociology of Health and Illness
- SOSA 2502.03: Biomedicine and the Illness Experience
- SOSA 2503.03: Health and Society
- SOSA 2933.03: Health and Culture
- SOSA 2966.03: Health and Illness through Culture and Space
- SOSA 3135.03: The Social Organization of Health Care

Minor in Hispanic Cultures

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Requirements

Students must complete a minimum of 18 to a maximum of 27 credit hours above the 1000 level, including:

- SPAN 2100.03: Evolving Spanish
- SPAN 2200.03: Latin American Culture

And any 12 credit hours from:

- SPAN 2040.03: Spanish for Business
- SPAN 2069.03: Mexico and Central America to 1979: From Conquest to Revolution
- SPAN 2070.03: Mexico and Central America since: From Revolution to Drug Wars
- SPAN 2105.03: Catalan Language and Culture
- SPAN 2109.03: Cuba from Colonial Times to 1961
- SPAN 2110.03: Cuba in Revolution, 1961- the Present
- SPAN 2130.03: Latin American dictators: From Fact to Fiction
- SPAN 2150.03: Hispanic Identities Through Film: Memory and Marginalized Communities
- SPAN 2155.03: Hispanic Identities Through Film: Immigration, Exile And Globalization
- SPAN 3095.03: Evolution of Spanish

Contact [Spanish and Latin American Studies](#) for more information.

Minor in Hispanic Literature

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Requirements

Students must complete a minimum of 21 to a maximum of 27 credit hours above the 1000 level, including:

- SPAN 2021.03: Intermediate Spanish
- SPAN 2022.03: Advanced Intermediate Spanish
- SPAN 2090.03: Introduction to Hispanic Literary Study
- SPAN 3505.03: Introduction to Spanish Literature
- SPAN 3515.03: Introduction to Latin American Literature
- SPAN 3215.03: Seminario de literatura latinoamericana or SPAN 3510.03: Literatura hispanoamericana contemporanea
- SPAN 3500.03: Literatura espanola contemporanea or SPAN 3525.03: Historia e historias: la literatura como alternativa

Contact [Spanish and Latin American Studies](#) for more information.

Minor in History

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A BA (90 credit hour) degree program with a minor in History is also available.

- At least 18 and no more than 27 credit hours in History, beyond the 1000 level
- At least 9 of these credit hours must be at or above the 3000 level

Contact [History](#) for more information.

Minor in History of Science and Technology

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science, or Bachelor of Science (Medical Sciences) program.

The Minor in HOST indicates a willingness and ability to approach issues at the crossroad between the sciences and the humanities from an interdisciplinary perspective.

The Minor in HOST requires a minimum of 18 to a maximum of 27 credit hours taken at the 2000 level or above. This must include:

1. Any one of the following three core classes:

- HSTC 2001.03: Ancient and Medieval Science (or equivalent)
- HSTC 3001.03: The Scientific Revolution (or equivalent)
- HSTC 4001.03: Science and Nature in the Modern Period (or equivalent)

2. 6 credit hours at the 3000 or 4000 level.

Contact [History of Science and Technology](#) for more information.

Minor in Indigenous Studies

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Students are required to complete six credit hours of core courses:

- INDG 2050.03/CANA 2050.03/HIST 2205.03: Historical Issues in Indigenous Studies
- INDG 2052.03/CANA 2052.03/SOSA 2052.03: Contemporary Issues in Indigenous Studies

and an additional 12 credit hours of INDG cross-listed or approved coursework:

Faculty of Arts and Social Sciences

- INDG 2901.03: Mi'kmaw Language for Non-Speakers 1
- INDG 2902.03: Mi'kmaw Language for Non-Speakers 2

Minor in Management

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Music, Bachelor of Science, or Bachelor of Science (Medical Science) program.

The requirements are as for the appropriate degree program, with the following credit hours.

Required courses to be taken before 2nd year course:

- MGMT 1301.03: Multidisciplinary Management I
- MGMT 1302.03: Multidisciplinary Management II

Any 18 credit hours chosen from the below list, **three credit hours** of which must be at the 3000 level. **Please note that some MGMT courses have additional prerequisite requirements.**

- MGMT 2200.03: Fundamentals of the Legal Environment
- MGMT 2303.03: Pple, wk & org: Micro Org Behaviour
- MGMT 2304.03: Pple, wk & org: Macro Org Behaviour
- MGMT 2401.03: Introduction to Marketing
- MGMT 2801.03: Government Structure
- MGMT 2805.03: Introduction to Indigenous Governance
- MGMT 3308.03: Managing the Family Enterprise
- MGMT 3309.03: Management Skills Development
- MGMT 3320.03: Organizational Theory
- MGMT 3601.03: Information in a Networked World
- MGMT 3603.03: Beyond Google
- MGMT 3701.03: The Community as a Living Lab
- MGMT 3702.03: Sustainable Industries
- MGMT 3802.03: Public Policy
- MGMT 3810.03: Government Policy Towards Business

Contact [Management](#) for more information.

Minor in Marine Biology

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Science) program.

Requirements

- A minimum of 18 to a maximum of 36 credit hours in Marine Biology (MARI) courses at the 2000 level or higher. A maximum of 6 credit hours may be MARI-equivalent.

Contact [Marine Biology](#) for more information.

Minor in Mathematics

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

BA or BSc (90 credit hour) degree program with a Minor in Mathematics is also available.

Requirements

* A minimum of 18 credit hours in MATH courses at the 2000 level or higher to a maximum of 36 credit hours.

* It is recommended that students take MATH 1010 and MATH 1030. These are prerequisites for many other upper-level MATH courses.

Contact [Mathematics and Statistics](#) for more information.

Minor in Medieval Studies

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Students seeking an interdisciplinary minor in Medieval Studies will be expected to take a minimum of 24 to a maximum of 27 credit hours beyond the 1000 level, including six credit hours in a language course at or above the 2000 level, with at least 12 credit hours at or above the 3000 level, and with courses taken from at least two of the participating departments or programs.

Requirements

Language work - six credit hours in one of the following languages at or above the 2000 level: Arabic, Latin, Greek, French, German, Italian, or Spanish. Courses treating texts in translation do not count. For languages other than Latin and Green, courses taught in English do not count.

And any 18 credit hours selected from the course list below; within these 18 credit hours, courses must be taken from at least two of the participating departments or programs.

- CLAS 2282.03: Catholicism
- CLAS 3381.03: Medieval Philosophy from Augustine to Anselm
- CLAS 3382.03: Medieval Philosophy from Arabic and Jewish Thinkers to Aquinas
- CLAS 3411.03: St. Augustine's *Confessions* Books 1-9
- CLAS 3412.03: St. Augustine's *Confessions* Books 10-13
- CLAS 3431.03: St. Augustine's *On the Trinity* Part 1
- CLAS 3432.03: St. Augustine's *On the Trinity* Part 2
- CLAS 3840X/Y.06: Latin Philosophical Texts
- CLAS 3841.03: Latin Philosophical Texts: Aquinas
- CLAS 3842.03: Latin Philosophical Texts: Anselm and Bonaventure
- CLAS 3910X/Y.06: Neoplatonism: Plato and Neoplatonism
- CLAS 4400X/Y.06: Philosophy of the Church Fathers
- CLAS 4450X/Y.06: Medieval Interpreters of Aristotle
- CLAS 4060.03: Boethius and *Prosimetrum*: Poetry and Prose in the Consolation of Philosophy
- ENGL 2018.03: Arthur
- ENGL 2020.03: Sampling Medieval Literature
- ENGL 3005.03: Canterbury Tales
- ENGL 3007.03: Old English
- ENGL 3203.03: History of the English Language
- ENGL 3008.03: Nordic Saga

Some 4000 level seminars may be counted where content is appropriate (e.g. Medieval Romance, Medieval Outlaws); check with advisor.

- FREN 3300.03: Medieval French Literature
- FREN 4001.03: Histoire du francais - Moyen Age/History of French - The Middle Ages
- FREN 4300.03: Le Roman courtois/Courtly Novels
- FREN 4301.03: La Poesie courtoise/Courtly Poetry
- HIST 2001.03: Early Medieval Europe
- HIST 2002.03: Later Medieval Europe
- HIST 2101.03: Medieval England
- HIST 2153.03: Scotland from the Earliest Times to the Reformation
- HIST 2503.03: From Cordoba to Jakarta, Islamic Civilizations in a Global Perspective (700-1700)
- HIST 3002.03: The Medieval Church
- HIST 3003.03: Celtic Britain and Ireland to 1400
- HIST 3509.03: Caliphs and Khans, Islamic Civilization in the Abbasid and Mongol Age (750-1300)
- HIST 3511.03: Classical and Medieval History of the Persianate World
- HIST 4003.03: Medieval Civilization
- HIST 4004.03: Crime and Society in Post-Conquest England
- HIST 4545.03: Scripture and Statecraft: History of Islamic Political Thought
- HSTC 2000X/Y.06: Ancient and Medieval Science
- HSTC 2202.03: The Beginnings of Western Medicine: The Birth of the Body
- HSTC 3121.03: The Stone and the Elixir: History of Alchemy in the Latin West
- HSTC 3610.03: Studies in Ancient and Medieval Science (topics vary; check with advisor)
- MUSC 4283.03: Early Music Analysis
- MUSC 4358.03: Studies in Medieval Music (topics vary; check with advisor)
- MUSC 4359.03: Studies in Medieval Music (topics vary; check with advisor)

- RELS 4010.03: Islamic Philosophy: al-Ghazali
- RELS 4011.03: Jewish Philosophy: Maimonide

Minor in Microbiology and Immunology

This minor is available to non-Microbiology and Immunology students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Science) program.

A BSc (90 credit hour) degree program with a Minor in Microbiology and Immunology is available to students in the Faculty of Science.

Requirements

A minimum of 18 to a maximum of 36 credit hours in Microbiology and Immunology (MICI) courses

Please note that there are prerequisite requirements for entry into upper level Microbiology courses, including:

- BIOL 2020.03: Cell Biology and BIOL 2030.03: Genetics and Molecular Biology and BIOC 2300.03: Introduction to Biochemistry
- CHEM 2401.03: Organic Chemistry I and CHEM 2402.03: Organic Chemistry II

Contact [Microbiology and Immunology](#) for more information.

Minor in Middle East and South Asian Studies

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Students minoring in Middle East Studies select a minimum of 18 to a maximum of 27 credit hours from the list below. Student are required to take one of the following:

- HIST 2502.03: The Ottoman Empire
- HIST 2503.03/RELS 2503.03: Classical and Medieval History of Islamic Civilization
- HIST 2504.03: History of Modern Middle East
- RELS 2001.03: Judaism
- RELS 2003.03: Islam

At least three credit hours must be at the 3000 or 4000 level. Please note that not all courses are offered each year.

Second Year

- ARBC 2021.03: Intermediate Arabic I
- ARBC 2022.03 Intermediate Arabic II
- ARBC 2100.03//RELS 2052.03: A Cultural Introduction to the Arab World
- RELS 2053.03/GWST 2053.03: Women and Islam
- CLAS 2103.03: Ancient Mythology I
- CLAS 2104.03: Ancient Mythology II
- CLAS 2216.03/HIST 2089.03: Alexander the Great
- CLAS 2220.03/HIST 2520.03/RELS 2220.03: Ancient Israel
- CLAS 2281.03/RELS 2281.03: The Orthodox and Oriental Churches
- CLAS 2900X/Y.06: Intermediate Hebrew
- HIST 2502.03: The Ottoman Empire
- HIST 2503.03/RELS 2503.03: Classical and Medieval History of Islamic Civilization
- HIST 2504.03: History of the Modern Middle East
- HIST 2509.03/RELS 2509.03 Hindu, Muslim, Sikh: Identity, Culture and State in Pre-Colonial South Asia
- HIST 2510.03/RELS 2510.03 Hindu, Muslim, Sikh: Colonial Trauma and Nationalism in Modern South Asia
- INTD 2045.03: Indian Society: Change and Continuity

- MUSC 2023.03: Middle Eastern Music
- RELS 2001.03: Judaism
- RELS 2003.03: Islam
- RELS/CLAS 2600.03: Sanskrit II
- RELS 2011.02: Hinduism

Third Year

- ARBC 3030.03: Advanced Arabic
- ARBC 3031.03: Advanced Arabic II (Readings)
- ARBC 3040.03: Arabic Philosophical Texts (al-Ghazali)
- ARBC 3050.03: Arabic Philosophical Texts (Maimonides)
- ARBC 3100.03: Arabic Pre-Islamic Poetry
- CLAS 3016.03/HIST 3016.03/RELS 3018.03: Meetings between Hellenism and the East to Philo the Jew
- CLAS 3017.03/HIST 3017.03/RELS 3019.03: Meetings between Hellenism, Judaism, Christianity and Islam
- CLAS 3021.03: Ancient Art and Architecture
- CLAS 3382.03: Medieval Philosophy from Arabic and Jewish Thinkers to Aquinas
- CLAS 3501.03: Herodotus
- CLAS 3502.03/HIST 3502.03: Thucydides and the Greek World at War
- HIST 3508.03: History of Perso-Islamic Culture in South Asia, 1000-1800
- HIST 3509.03/CLAS 3601.03: Arab Caliphs, Turkish Commanders, Persian Viziers, 750-1200
- HIST 3510.03/RELS 3510.03: Islamicate Empires, 1300-1700: The Ottoman and Safavid Empires
- HIST 3511.03/CLAS 3602.03: Ancient and Medieval History of the Persianate World
- HIST 3512.03: Modern History of Iran
- HIST 3520.03: Empire, War and Resistance in Sri Lanka
- RELS 3009.03: Christianity in the Lands of Islam
- RELS 3012.03: Mystics of the Middle East
- RELS 3101.03: The Self and the World in Indian Story
- RELS 3111.03: Vishnu and Krishna in the Dark Lord Popular Hindu Religion
- RELS 3112.03: Buddhism in India and Tibet
- RELS 3113.03: The Mahabharata
- RELS 3600.03: Sanskrit Texts I Narrative and Epic Selections

Fourth Year

- CLAS 4011.03/RELS 4011.03: Jewish Philosophy: Maimonides
- CLAS 4018.03/RELS 4018.03: Christian Theology in Islamic Lands: John of Damascus
- CLAS 4019.03/RELS 4019.03: Philo Judaeus
- CLAS 4525X/Y.06/HIST 4525X/Y.06: The World of Herodotus
- HIST 4355.03: Becoming the State
- HIST 4510.03: Topics in Middle Eastern and Islamic History
- HIST 4545.03: Scripture and Statecraft: History of Islamic Political Thought
- HIST 4550.03: Orientalism and Occidentalism
- RELS 4010.03/CLAS 4010.03: Islamic Philosophy: al-Ghazali
- RELS 4600.03: Sanskrit Texts II Myth, Poetry and Drama

Minor in Music

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A BA (90 credit hour) degree program with a minor in Music is also available.

Students must complete a minimum of 18 to a maximum of 27 credit hours in Music beyond the 1000 level. The following courses may not be used to count toward this degree:

- MUSC 2007.06, MUSC 2024.03, MUSC 2025.03: The Guitar: History and Techniques
- MUSC 2022.06, MUSC 2028.03, MUSC 2029.03: The Art and Science of Drumming
- MUSC 2130.06, MUSC 2131.03, MUSC 2132.03: Jazz Dance 1

Contact [Music - Fountain School of Performing Arts](#) for more information.

Minor in Musicology

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Students must complete a minimum of 18 to a maximum of 27 credit hours in Musicology courses as follows:

- MUSC 2354.03: History of Western Music to 1750
- MUSC 2355.03: History of Western Music 1750 to the Present Day
- 12 credit hours chosen from the following, 6 of which must be beyond the 2000-level, including at least 3 at the 4000 level.
 - MUSC 2016.03: Topics in Music and Cinema
 - MUSC 2018.03: The Road to Rock 'n' Roll
 - MUSC 2019.03: The Rock 'n' Roll Era and Beyond
 - MUSC 2020.03: The History of Jazz
 - MUSC 3066.03: Women, Gender and Music
 - MUSC 3314.03: History of Opera
 - MUSC 3370.03: Performance Practice
 - MUSC 4353.03: Music since 1945
 - MUSC 4354.03: Popular Music Analysis
 - MUSC 4355.03: Narrative Strategies
 - MUSC 4356.03: Opera Studies
 - MUSC 4358.03/MUSC 4359.03: Studies in Medieval Music
 - MUSC 4360.06: Advanced Seminar in Baroque Culture
 - MUSC 4361.03/MUSC 4365.03: Topics in Musicology 1
 - MUSC 4362.03: Topics in Canadian Music
 - MUSC 4363.03/MUSC 4367.03: Topics in Musicology 2
 - MUSC 4375.03: African American Popular Music
 - MUSC 4380.03/MUSC 4381.03: Musician Studies

Contact [Music - Fountain School of Performing Arts](#) for more information.

Minor in Neuroscience

This Minor is available to non-Neuroscience/Psychology students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science, or Bachelor of Science (Medical Science) program.

Requirements

- A minimum of 18, to a maximum of 36, credit hours in Neuroscience courses at the 2000 level or higher, with a maximum of 6 credit hours from NESC-equivalent courses (e.g., BIOC 2300.03, BIOL 2030.03).
- Note that NESC 2000.03: Methods in Experimental Psychology and Neuroscience, NESC 2470.03: Systems Neuroscience, and PSYO 2501.03: Statistical Methods I, are restricted to students in a Major/Honours program in Neuroscience or Psychology. However, if a student has completed these courses and switches from a major to a minor, these credits can be used to fulfill the requirements of the minor.

Contact [Neuroscience](#) for more information.

Minor in Ocean Sciences

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Requirements

- A minimum of 18 to a maximum of 36 credit hours in Ocean Sciences courses at the 2000 level or higher.

Please note that there are prerequisite requirements for entry into upper level Ocean Sciences courses (see [Department of Oceanography course listings](#)).

Contact [Ocean Sciences](#) for more information.

Minor in Philosophy

The Minor in Philosophy is open to students in all disciplines except those already pursuing a Major or Honours in Philosophy.

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts (excluding Philosophy), Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A BA (90 credit hour) degree program with a minor in Philosophy is also available.

Requirements

A minimum of 18 to a maximum of 27 credit hours in Philosophy beyond the 1000 level, including at least 3 credit hours beyond the 2000 level.

Select at least three credit hours from the following:

- PHIL 2130.03: Logic: Deduction
- PHIL 2085.03: Reasoning Skills
- PHIL 2090.03: How to Win an Argument
- PHIL 2660.03: Logic: Understanding Scientific Reasoning

Contact [Philosophy](#) for more information.

Minor in Physics

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A BSc or BA (90 credit hour) degree program with a Minor in Physics is available to students in the Faculty of Science.

Departmental Requirements

A minimum of 18 credit hours in Physics (PHYC) courses at the 2000 level or higher, to a maximum of 36 credit hours, not including Physics (PHYC) courses that do not count toward a 120 credit hour degree in Physics.

Contact [Physics and Atmospheric Science](#) for more information.

Minor in Plant Science

This minor is available to students registered in a 120 credit hour Bachelor of Science (Agriculture), Bachelor of Arts, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Students must complete 18 credit hours, at least three of which must be at the 3000 level or higher.

Required Courses:

- BIOA 2002.03: Plant Physiology
- BIOA 2004.03: Structural Botany

12 credit hours from the following list:

- AGRN 2000.03: Organic Field Crop Management
- AGRN 2001.03: Cereal-Based Cropping Systems

- AGRN 2002.03: Forages and Cover Crops
- AGRN 2008.03: Potato Production
- HORT 2000.03: Vegetable Production
- HORT 2001.03: Principles of Organic Horticulture
- HORT 2004.03: Introduction to Viticulture
- HORT 2010.03: Controlled Environment Agriculture I
- HORT 2015.03: Fruit Production
- HORT 3008.03: Horticultural Therapy
- IAGR 3000.03: Tropical Agriculture
- PLSC 2000.03: Specialty Crops
- PLSC 2001.03: Plant Propagation Techniques
- PLSC 4000.03: Plant Breeding
- PLSC 4002.03: Plant Ecophysiology
- BIOA 2005.03: Principles of Plant Pathology
- BIOA 2008.03: Plant Diversity
- BIOA 3002.03: Weed Science
- ENVA 2003.03: Introduction to Urban and Peri-Urban Agriculture
- ENVA 2004.03: Introduction to Integrated Pest Management Techniques

Contact [Faculty of Agriculture](#) for more information.

Minor in Political Science

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A BA (90 credit hour) degree program with a minor in Political Science is also available.

A minimum of 18 to a maximum of 27 credit hours in Political Science at the 2000 level or above is required.

Contact [Political Science](#) for more information.

Minor in Popular Culture Studies

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A minimum of 21 to a maximum of 27 credit hours beyond the 1000 level, with six credit hours at or above the 3000 level, and with no more than nine credit hours taken in a single department. Appropriate courses can be chosen from the following list.

- CRWR 3100.03: Songwriting: Creative Writing for Lyric Forms
- CTMP 2335.03: The Artist and Society
- CTMP 2336.03/CHIN 2052.03: East Meets West in Popular Culture
- CTMP 3305.03: Modern Film and the Theory of the Gaze
- CTMP 3322.03: Representations of the Holocaust: Remembrance
- EMSP 2313.03/CTMP 2313.03: The Vampire
- EMSP 2320.03/GWST 2320.03/RELS 2420.03: Witchcraft in Early Modern Europe
- EMSP 2480.03/HIST 2750.03: The Pirate and Piracy
- ENGL 2006.03: Cultural Studies
- ENGL 2040.03: Mystery and Detective Fiction
- ENGL 2080.03: Cartoons & Comics
- ENGL 2085.03: Video Games: Story, World and Play
- ENGL 2095.03: Narrative in the Cinema
- ENGL 2231.03: Foundations of Science Fiction
- ENGL 2232.03: Contemporary Science Fiction
- ENGL 2235.03: Tolkien: Fantasy & Medievalism
- ENGL 2236.03: Fantasy after Tolkien
- ENGL 2238.03: Children's Literature

- ENGL 3300.03: TV: Theory & Criticism

Minor in Psychology

This Minor is available to non-Psychology/Neuroscience students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science, or Bachelor of Science (Medical Science) program.

A BSc or BA (90 credit hour) degree program with a Minor in Psychology is also available.

Requirements

- A minimum of 18, to a maximum of 36, credit hours in Psychology courses at the 2000 level or higher.
- Note that PSYO 2000.03: Methods in Experimental Psychology and Neuroscience, PSYO 2470.03: Systems Neuroscience, and PSYO 2501.03: Statistical Methods I, are restricted to students in a Major/Honours program in Psychology or Neuroscience. However, if a student has completed these courses and switches from a major to a minor, these credits can be used to fulfill the requirements of the minor.

Please note that entry into upper-level Psychology courses (at the 2000 level or higher) requires completion of six credit hours at the first year level:

- PSYO 1011.03: Introduction to Psychology and Neuroscience I: From Neuron to Person (or equivalent) with a grade of B- or better

- PSYO 1012.03: Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology (or equivalent) with a grade of B- or better
OR
- A grade of B- or better in the Psychology component of SCIE 1506.09 and SCIE 1507.09: Integrated Science Program I and II (or equivalent)

Contact [Psychology](#) for more information.

Minor in Religious Studies

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A BA (90 credit hour) degree program with a minor in Religious Studies is also available.

Students must complete a minimum of 18 to a maximum of 27 credit hours above the 1000 level.

Minimum of 18 credit hours in RELS beyond the 1000 level. At least 6 of these credit hours must be chosen from:

- RELS 2001.03: Judaism
- RELS 2003.03: Islam
- RELS 2011.03: Hinduism
- RELS 2012.03: Chinese & Japanese Religions
- RELS 2013.03: Buddhism
- RELS 2281.03: Christian Beginnings: The Orthodox and Oriental Churches
- RELS 2509.03: Hindu, Muslim, Sikh: Identity, Culture and State in Pre-Colonial South Asia
- RELS 2510.03: Hindu, Muslim, Sikh: Locating the Trauma of Modern South Asia

and at least 6 credit hours must be chosen from:

- RELS 3000.03: Topics in Religious Studies
- RELS 3009.03: Christianity in the Lands of Islam

Certificates

Please see the menu to the right for a full list of undergraduate certificates.

Students can build skills in specialized areas when they complete a certificate. Although in most cases a student will complete a certificate alongside their regular degree requirements, some certificates do not require concurrent enrolment in an undergraduate program.

Certificates vary in their goals and requirements. Many have a research or practicum component. Some are interdisciplinary, requiring work in more than one department, while others focus on a specialization within a single program. Some Certificates are designed for students enrolled in particular programs, while others are broadly applicable to students in any program.

Certificates are one way that recognizes graduating students have achieved a level of proficiency or specialization in a particular area or subject. Certificates will be recorded on the student's academic transcript and completion of the requirements are confirmed in June and October. Certificates are not conferred during Convocation but are included with any other degree parchment. Certificates awarded as a stand-alone credential are available for pick up from the Registrar's Office. Please refer to the [Dates section of the Convocation website](#) for the date your certificate will be available.

To add a certificate program concurrent with a degree, submit the Declare Major/Minor/Certificate form in [Dal Online](#) under Admissions. For stand-alone certificates, submit an [Admissions Application](#) and consult the certificate coordinator for advice. A separate application to graduate is required.

A list of [Graduate Certificates is listed here](#), or you can go to the [Faculty of Graduate Studies](#) website.

Certificate in Actuarial and Financial Mathematics

Offered by: Mathematics & Statistics

Coordinator: Dr. Toby Kenney (tkenney@mathstat.dal.ca) Mathematics and Statistics

This program provides many of the learning objectives and fundamental mathematical and statistical skills required to complete the classes (and examinations) of the Society of Actuaries accreditation program. Students who are interested in a career in actuarial science should consult the Basic Education Catalogue on the Society of Actuaries web page (www.soa.org) or the Syllabus of Basic Education on the Casualty Actuaries website (www.casact.org). This program also prepares students for employment in general financial institutions where modelling, quantitative risk analysis, management of investment instruments, asset and liability management, life contingencies and insurance assessment, and other complex financial calculations are required.

Admission to Certificate

To enrol in the *Certificate in Actuarial and Financial Mathematics*, students must declare the certificate through Dal Online (<https://dalonline.dal.ca>>Web for Students > Admissions > Declare Major/Minor/Certificate).

To graduate with the Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate Requirements:

1. Completion of a 120 credit hour Major or Honours program in Mathematics and/or Statistics
2. Completion of the following mathematics courses: MATH 1000, MATH 1010, MATH 1030 or 2030, MATH 2001, MATH 2002, MATH 2600
3. Completion of the following statistics courses: STAT 2060, STAT 2080, STAT 2450, STAT 3340 and STAT 3360
4. Completion of either:

Financial Option: MATH 2120, MATH 3300, and MATH 3900

OR

Actuarial Option: STAT 3703, STAT 3720, and STAT 4390

Certificate in Acute and Critical Care

- a. Nursing 4471 (Fall 2020): Emergency Preparedness: A Nursing Perspective: This course focuses on preparation of future nurses for various hazards using an "all hazards" approach. Local, provincial and national disaster response systems, in the event of a mass casualty, are explored, and the ability to care for victims and responders of all types of hazards is emphasized.
- b. Nursing 4472 (Winter Fall (DE) and Winter (AS)): Acute and Critical Care Nursing: With the focus on acute and critical care nursing in the intensive care and emergency room areas, students will further develop, critically analyze and apply knowledge gained in previous courses with a focus on the management of critically ill clients. Emphasis includes working with clients across the lifespan and inter-professional relationships within specialty practice.

Certificate in Animal Behaviour

Offered by: Biology, Psychology and Neuroscience

Coordinator: Dr. Simon Gadbois (Psychology and Neuroscience) simon.gadbois@dal.ca

The Certificate in Animal Behaviour provides students with an opportunity to specialize in Animal Behaviour through a set of courses and a research project.

Admission to Certificate

Students should enrol in the Certificate in Animal Behaviour in their third year of studies, when they are seeking approval from the Certificate Coordinator for the independent research component. To enrol, students must declare the certificate through Dal Online (<https://dalonline.dal.ca> >Web for Students>Admissions>Declare Major/Minor/Certificate), and notify the Certificate Coordinator by e-mail. To qualify for this certificate, students must complete all course requirements, and must receive approval for the research component of the certificate prior to the start of the research course.

To graduate with the certificate, students must apply to Graduate with a Certificate at the time they apply to graduate from their degree program

Certificate requirements:

1. A minimum grade of B- is required in each of four mandatory courses:

- PSYO 2160.03/NESC 2160.03: Animal Behaviour
- PSYO 2501.03: Statistical Methods or STAT 2080.03: Statistical Methods for Data Analysis Inference
- BIOL 3062.03: Behavioural Ecology or PSYO 3162.03/NESC 3162.03: Advanced Animal Behaviour
- BIOL 3630.03: Field Methods in Animal Behaviour or NESC 3161.03/PSYO 3161.03: Measuring Behaviour or NESC 3165.03/PSYO 3165.03: Neuroethology

2. A grade of at least B- in all of 12 additional credit hours of courses chosen from the following list. Courses taken as one of the four mandatory classes cannot also be used to fulfill this requirement. Six credit hours must be at the 3000/4000 level.

2000 level

- ANSC 2003.03: Companion Animal Behaviour
- PSYO 2140.03/NESC 2140.03: Learning
- PSYO 2470.03/NESC 2470.03: Systems Neuroscience

3000 level

- ANSC 3002.03: Domestic Animal Behaviour
- BIOL 3062.03: Behavioural Ecology (if not used to fulfill Requirement 1 above)
- BIOL 3080.03/MARI 3080.03: Ecology and Evolution of Fishes
- BIOL 3327.03: Entomology
- BIOL 3622.03: Ornithology
- BIOL 3626.03: Field Studies of Marine Mammals
- BIOL 3628.03/MARI 3628.03: Marine Ornithology
- BIOL 3630.03: Field Methods in Animal Behaviour (if not used to fulfill Requirement 1 above)
- BIOL 3640.06: Tropical Ecology and Biodiversity (with Animal Behaviour project: counts for three credit hours only)
- BIOL 3632.03: Applied Field Methods in Fish Ecology
- BIOL 3639.03: Herpetology
- MARI 3090.03: Marine Mammalogy
- PSYO 3000.06/NESC 3000.06: Independent Research in Modern Psychology (Animal Behaviour topic)
- PSYO 3001.03/NESC 3001.03: Directed Research Project in Psychology or Neuroscience (Animal Behaviour topic)
- PSYO 3043.03/NESC 3043.03: Neurobiology of Learning
- PSYO 3044.03/NESC 3044.03: Laboratory Methods of Learning and Conditioning
- PSYO 3161.03/NESC 3161.03: Measuring Behaviour
- PSYO 3162.03/NESC 3162.03: Advanced Animal Behaviour (if not used to fulfill Requirement 1 above)
- PSYO 3165.03/NESC 3165.03: Neuroethology (if not used to fulfill Requirement 1 above)
- PSYO 3170.03/NESC 3170.03: Hormones and Behaviour
- PSYO 3180.03/NESC 3180.03: Psychoneuroimmunology/Ecological Immunology
- PSYO 3670.03/NESC 3670.03: Genes, Brain and Behaviour

4000 level

- BIOL 4323.03/MARI 4323.03: Biologging in Ecology
- BIOL 4800.06: Special Topics (Animal Behaviour topic)
- BIOL 4806.03/MARI 4806.03, BIOL 4807.03/MARI 4807.03, BIOL 4808.03/MARI 4808.03, BIOL 4810.03: Special Topics (Animal Behaviour topic)
- BIOL 4510.03 Cultural Evolution
- BIOL/MARI 4900.06: Honours Research and Thesis or BIOL 4901.03/MARI 4901.03 BIOL 4902.03/MARI 4902.03: Honours Research and Thesis I and II (with approved Animal Behaviour topic)
- MARI 4090.03: Evolutionary Ecology of Marine Mammals
- PSYO 4140.03 or NESC 4140.03: Animal Learning Topics
- PSYO 4160.03/NESC 4160.03: Topics in Behavioural Biology

- PSYO 4500.06/NESC 4500.06: Honours Research (with approved Animal Behaviour topic)

3. A grade of B- in 3 credit hours or more of independent research in Animal Behaviour.

The course used to fulfil this requirement can also be counted toward the courses that fulfil Requirement 2 above.

Students must obtain approval of their research topic from a Certificate Coordinator prior to the start of the research course. Animal behaviour research projects may be completed through one or more of PSYO 3100.03/NESC 3100.03 or PSYO 3101.03/NESC 3101.03, PSYO 3001.03/NESC 3001.03, PSYO 4500.06/NESC 4500.06, BIOL 4800.06, BIOL 4806.03/MARI 4806.03, BIOL 4807.03/MARI 4807.03, BIOL 4808.03/MARI 4808.03 or BIOL 4900.06.

Honours students may fulfill this requirement by conducting their honours thesis research on a topic in Animal Behaviour. Students are encouraged to further develop their study design and analysis skills by taking additional courses such as BIOL 4061.03 (Design of Biological Experiments) or BIOL 4062.03 (Analysis of Biological Data).

Certificate in Animal Welfare

The Certificate in Animal Welfare aims to help students gain specialized knowledge on the well-being of animals managed ethically by humans. The certificate provides a range of theory, evaluation of scientific literature, and its application surrounding the use of animals.

This program prepares students for careers in animal health and welfare by giving them expertise specific to this field. In completing five courses as part of this certificate program, students will understand ethical concepts surrounding animal use and will develop the skills required to assess specific situations and make sound recommendations for improvements in livestock care, handling, transportation and slaughter. As well, students will observe, measure and document a variety of animal behaviors by working hands-on in our Ruminant Animal Centre.

This certificate is open to students eligible for admission to or enrolled in a BSc or BSc (Agr) program at either of Dalhousie's Halifax or Truro campuses.

Certificate Requirements

Total of 15 credit hours required to be completed within 5 years (maximum).

Required Courses

ANSC 3002.03: Domestic Animal Behaviour

ANSC 3005.03: Animal Welfare

BIOA 4004.03: Animal Adaptation and Stress

PHLA 3001.03: Animal Ethics (Agricultural Campus) or PHIL 3106.03 (Halifax Campus)

Optional Courses

Any **ONE** from the list below:

ANSC 3001.03: Animal Health

ANSC 3007.03: African Wildlife Ecology

AQUA 3000.03: Fish Health

ANSC 4009.03: Directed Studies in Animal Science (if in area of animal welfare)

RESM 4014.03: Honours Thesis I/RESM 4015.03: Honours Thesis II (if in area of animal welfare)

To inquire further about the requirements for the Certificate in Animal Welfare, please contact Program Coordinator, Miriam Gordon (miriam.gordon@dal.ca).

Certificate in Applied and Computational Mathematics

Offered by: Mathematics & Statistics

Coordinator: Dr. P. Selinger mathdirector@mathstat.dal.ca

This program is concerned with the development of the core mathematical and computational skills required in science, government and industry. Areas of application include everything from mathematical modeling to operations research to cryptography to software development.

Admission to Certificate

To enrol in the *Certificate in Applied and Computational Mathematics*, students must declare the certificate through Dal Online (<https://dalonline.dal.ca> >Web for Students>Admissions>Declare Major/Minor/Certificate), and notify the Certificate Coordinator by e-mail.

To graduate with the Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate Requirements:

1. Completion of the 120 credit hour Major or Honours program in Mathematics or an equivalent program
2. Completion of the following mathematics courses: MATH 1000, MATH 1010, MATH 1030 (or MATH 2030), MATH 2001, MATH 2002, MATH 2040, MATH 2110 (or MATH/CSCI 2112), MATH 2120
3. Completion of at least four of: MATH 3120, MATH 3210, MATH 3260, MATH 3300, MATH 3330, MATH 3400
4. Completion of at least two of: MATH 4116, MATH 4220, MATH 4230, MATH 4250, MATH 4320

Additional recommended courses: MATH 2300, STAT 2060, STAT 2080

Certificate in Aquaculture and the Environment

Offered by: Faculty of Science

Coordinator: Dr. Diego Ibarra Diego.ibarra@dal.ca (Biology)

Eligibility: The certificate is open to any Dalhousie undergraduate student. Non-degree Dalhousie students may qualify for the certificate if they fulfill all course requirements at Dalhousie.

Overview: The *Certificate in Aquaculture and the Environment* consists of courses that include lectures, laboratories, and visits to coastal and land-based aquaculture sites. It is designed to provide students with knowledge of, and experience with general aspects of the cultivation of aquatic species. The emphasis is on understanding aquaculture - environment interactions, and acquiring the knowledge, skills and quantitative tools needed to assess and reduce the environmental footprint of aquaculture operations.

Admission to Certificate

To enrol in the *Certificate in Aquaculture and the Environment*, students must declare the certificate through Dal Online (<https://dalonline.dal.ca> >Web for Students>Admissions>Declare Major/Minor/Certificate), and notify the Certificate Coordinator by e-mail. To qualify for the certificate, students must complete the course requirements, and have received approval from the Certificate Coordinator if a course other than MARI 3604 is used to fulfil subject area F.

To graduate with the Certificate, students must Apply to Graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate Requirements

To obtain the *Certificate in Aquaculture and the Environment*, students must take one course from each of six subject areas (A to F), with a minimum of B- in each course. Note that most of these courses may also count toward a Major, Minor or Honours program in Biology or Marine Biology.

A. Introduction to aquaculture

- MARI 3602.03: Introduction to Aquaculture

B. Practical skills in aquaculture

- MARI 3603.03: Practical Aquaculture

C. Biology of aquatic organisms

One of

- MARI 3074.03 (or BIOL 3078.03): Physiology of Marine Animals Part I
- MARI 3076.03 (or BIOL 3079.03): Physiology of Marine Animals Part II

- MARI 3221.03 (or BIOL 3221.03): Diversity of Algae
- MARI 3301.03 (or BIOL 3301.03): Invertebrate Biology
- MARI 4080.03 (or BIOL 4080): Laboratory Studies of Fishes
- BIOL 4662.03/MARI 4662.03/OCEA 4230.03: Biology of Phytoplankton

D. Aquaculture and the environment

- MARI 4600.03: Ecosystem modelling for Aquaculture

E. Aquaculture management

One of

- OCEA 4401.03: Marine Management I
- OCEA 4402.03: Marine Management II
- BIOL 4001.03: Environmental Impact Assessment
- ENVS 3200.03: Introduction to Environmental Law
- ECON 3335.03: Environmental Economics
- SUST 3101.03: Food Systems and Sustainability: Feeding the 10 billion

F. Industry-relevant knowledge and experience

** One of

- MARI 3604.03: Field Aquaculture
- * MARI 3800.03 (or BIOL 3800.03): Experiential Learning
- * MARI 4806.03: Special Topics Independent Research
- * MARI 4901.03 and MARI 4902.03 (or MARI 4900.06): Honours Thesis
- * BIOL 4901.03 and BIOL 4902.03 (or BIOL 4900.06): Honours Thesis
- * MARI 8891.00 (or MARI 8892.00 or MARI 8893.00) Co-op work term
- * ENVS 3000.03: Environmental Science Internship
- * ENVS 8891.00 (or ENVS 8892.00 or ENVS 8893.00) Co-op work term
- * SUST 3002.03: ESS Engagement Project
- * SCIE 4701.03 and SCIE 4702.03 Science and Technology Innovation, Commercialization and Entrepreneurship I and II

* These courses must be pre-approved (prior to start of the course) by the certificate coordinator as having a focus on aquaculture

** Some alternatives used to fulfil **Requirement F** are not available to students in all programs. For example, MARI 4900 is open only to students in the Marine Biology Honours program, MARI 8891 and ENVS 8891 are open only to students in Marine Biology or Environmental Science Co-op programs.

Certificate in Aquaculture

The Certificate in Aquaculture provides an opportunity for students to take a set of courses that will provide them an aquaculture specialization with opportunity to explore a range of aquatic species and the production system required to rear them, and understand their role in global food security. Students will gain awareness of, and demonstrated competency in, safe and humane handling of aquatic animals.

The certificate is open to students eligible for admission to or enrolled in a BSc or BSc (AGR) program at Dalhousie, except those majoring or minoring in Aquaculture.

Certificate Requirements

Total of 15 credit hours required to be completed within 5 years (maximum).

Required Courses

AQUA 2000.03: Introduction to Aquaculture

AQUA 3000.03: Fish Health

NUTR 3002.03: Fish Nutrition

BIOA 3005.03: Fish Physiology

AQUA 4000.03: Finfish Production or AQUA 4001.03: Shellfish Production

To inquire further about the requirements for the Certificate in Aquaculture, please contact Program Coordinators, Dian Patterson (dian.patterson@dal.ca) or Audrie-Jo McConkey (amconkey@dal.ca).

Certificate in Art History and Visual Culture

This certificate is open to currently registered Dalhousie and King's students in all Faculties.

Contact/Coordinator: Dr. Lisa Binkley, History Department (lbinkley@dal.ca)

The Certificate in Art History and Visual Culture is designed for students in the arts, social sciences, and sciences who are interested in advancing their visual literacy. The ability to interpret meaning from images and objects is critical in our increasingly image-saturated culture. This certificate program will provide students with solid training in visual analysis, art history methodologies, research, and communication.

A Certificate in Art History and Visual Culture would be most obviously beneficial to students considering graduate studies or careers in Art History, Museum Studies, Museum Education, Arts Administration, Conservation, Cultural Studies, etc. However, the importance of developing visual literacy is being recognized much more broadly in today's digital, image-based world (for example, courses in art history are now required at several top medical schools). Indeed, in many fields visual thinking is considered as crucial as verbal thinking. A Certificate in Art History and Visual Culture would therefore provide a sound complement to any area of studies in the humanities, sciences, or social sciences.

Learning Outcomes:

- Students will cultivate visual literacy - the ability to interpret works of arts & visual culture both as formal structures and in relation to social, political, and cultural contexts - and develop a working knowledge of the vocabulary of art history and criticism.
- Students will learn to effectively use objects as primary sources and to articulate the relevance of art as both evidence of, and stimulus for, historical, social, political, and intellectual movements.
- Students will develop the ability to communicate their knowledge of visual culture both orally and in writing by learning how to synthesize a wide range of primary and secondary sources.

Students will be able to count credit earned in these courses toward their undergraduate major, minor, or distribution requirements, unless otherwise specified in their program's regulations.

Requirements:

This certificate is a **12 credit hour certificate** with one required 3 credit hour course (HIST 2900.03/GWST 2900.03). The remainder of the courses will be selected from a list of 3 credit hour electives. Students have the option to take one of their 3 credit hour electives at NSCAD University.

- HIST 2900.03: Ways of Seeing: An Introduction to Art History and Visual Culture (Cross-listed GWST 2900.03)

And nine additional credit hours drawn from the following list of electives:

Department of Classics:

- CLAS 2214.03: The Roots of Greek Civilization (held every two years)
- CLAS 3021.03: Ancient Art and Architecture from the Pyramids to the Agora

Contemporary Studies Programme:

- CTMP 2316.03: The "Pictorial Turn" in Recent Thought, Art and Theory
- CTMP 2340.03: Theories of the Avant-Garde
- CTMP 3305.03: Modern Film and Theory of the Gaze
- CTMP 3330.03: Art and Atrocity: Contemporary Contexts, Gendered Perspectives

Early Modern Studies Programme:

- EMSP 2215.03: Violence and Wonder: Baroque Art
- EMSP 2230.03: Picture and Poetry in Early Modern Culture
- EMSP 2415.03: The Art of Global Encounters in the Early Modern Period
- EMSP 2510.06: Early Modern Art, Literature, and Politics in Florence, Italy (Summer Study Abroad)
- EMSP 3280.03: Love, lust, and desire in Italian Renaissance Art (Cross-listed GWST 3280.03)
- EMSP 3270.03: Leonardo da Vinci: Between Art and Science (cross-listed HSTC 3270.03)
- EMSP 3290.03: The Renaissance Print and Cross-Cultural Exchange
- EMSP 3350.03: Art, Optics, and Technologies of Illusion (cross-listed HSTC 3350.03)
- EMSP 3640.03: Studies in Early Modern Aesthetics
- EMSP 4501.03: Honours Seminar in Early Modern Studies: The Development of Aesthetic Theory in the Early Modern Period I
- EMSP 4502.03: Honours Seminar in Early Modern Studies: The Development of Aesthetic Theory in the Early Modern Period II
- EMSP 4640.03: Special Topics in Early Modern Aesthetics

Department of English:

- ENGL 2080.03: Cartoons and Comics
- ENGL 2088.03: Images and Texts
- ENGL 3301.03: Graphic Novels
- ENGL 4890.03: Indigenous Graphic Novels

Fountain School of Performing Arts:

- THEA 2401.03: Caves to Castles: Costume and Identity from Antiquity to the High Middle Ages
- THEA 2402.03: Castle to Café: Costume and Identity from 1450 to 1700
- THEA 2412.03: Language of Design
- THEA 3402.03: Baroque to Bustles: Costume from 1700 to 1900
- THEA 3403.03: Bustles to Boardrooms: Costume and Identity from 1900- Present Day

Film

- FILM 2301.03: Film History I
- FILM 2311.03 Film Analysis
- FILM 3301.03: Film History 2
- FILM 3370.03: Animated Film: Technologies, Characters and Society

Department of History:

- HIST 2042.03: Capital of Europe: Paris in the Nineteenth Century
- HIST 2900.03: Introduction to Art History and Visual Culture
- HiST 3212.03: A History of Indigenous Visual and Material Culture
- HIST 3215.03: Indigenous Textiles: Tourism, Industry, Globalization
- HIST 3303.03: De-Colonizing Modernism: Critiquing the Legacy of Modern Art (Cross-listed GWST 3303.03)
- HIST 4162xy.06: Advanced Seminar in Baroque Culture (taught in the Czech Republic)
- HIST 4175.03: Bella Figura: Display Behaviours in Baroque Europe
- HIST 4210.03: Museums, Archives, and Material Culture (cross-listed INDG 4210)
- HIST 4303.03: The Birth of Pop: How Victorian Visual Culture Makes Meaning (Cross-listed GWST 4303.03)

History of Science and Technology Programme:

- HSTC 4120.03: Artefacts: The Material Culture of Science and Technology

Indigenous Studies:

- INDG 3400.03: Contemporary Indigenous Art (Cross-listed CANA 3400.03)

Department of Philosophy:

- PHIL 2260.03: Philosophy of Art

Certificate in Artificial Intelligence and Intelligent Systems

Certificate in Artificial Intelligence and Intelligent Systems

This certificate is open to currently registered Dalhousie students in all Faculties; it will not be open for direct application.

This certificate requires a student to take one required course and three electives at the fourth year level from a list of elective courses with at least a C in each of them. The required course is:

- CSCI 3151: Foundations of Machine Learning

Elective courses are:

- CSCI 4141: Information Retrieval
- CSCI 4144: Data Mining and Data Warehousing
- CSCI 4152: Natural Language Processing
- CSCI 4155: Machine Learning with Robots
- CSCI 4156: Reinforcement Learning with Gaming Applications

Requirements

Note that to obtain a certificate, the degree requirements must be satisfied. To be awarded a Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate in Biomedical Engineering

Certificate in Biomedical Engineering

This certificate is open to currently registered Dalhousie students in the Faculty of Engineering enrolled in Electrical and Computer Engineering, Mechanical Engineering, Materials Engineering, Chemical Engineering or Industrial Engineering; it will not be open for direct application.

Certificate requirements

The certificate requires a total of 15 credit-hours

1. The student must complete a minimum of 9 credit-hours consisting of the courses listed below and obtain a minimum grade of C in each course. Registration in these courses is subject to meeting pre-requisites.

a. PHYL 1001 Human Physiology or ANAT 1010 Basic Human Anatomy. These courses are both offered as distance learning courses.

b. One discipline-specific core course related to Biomedical Engineering, one of:

- CHEE 4730 Bioprocess engineering
- ECED 4502 Digital Signal Processing
- IENG 4443 Quality Control and Reliability
- MECH 3010 Machine Design I: Loading of Components

c. At least one additional Biomedical Engineering-related course from the list below:

- ECED 4760 Biomedical Engineering
- BIOE 4391 Polymeric Biomaterials
- IENG 3303/KINE 3476 Ergonomics and Work Design

- IENG 4564 Design and Optimization of Service Systems
- IENG 4573 Industrial Biomechanics
- MECH 4650 Biomechanical Engineering
- Other courses with content relevant to biomedical engineering of at least at least 3 credit-hours may be used to meet this requirement with written approval from the certificate coordinator. This may include courses offered in the Faculties of Engineering, Dentistry, Medicine, Science and Health.

2. The student must complete 6 credit-hours and obtain a minimum grade of B- in their discipline's Senior Year Project course and the selected project must be designated as being on a Biomedical Engineering topic by their department's senior year project coordinator.

3. All requirements for the certificate must be met within 36 months of registering for the certificate.

Credits counted towards the Certificate in Biomedical Engineering may not be counted towards any other certificate program.

Requirements

Note that to obtain a certificate, the degree requirements must be satisfied.

Certificate in Black and African Diaspora Studies

Certificate in Black and African Diaspora Studies

The Certificate in Black and African Diaspora Studies provides learners with an overview of current and historical experiences, philosophies, and cultures of Black people in Canada and the wider African diaspora. Students will develop awareness and understanding of the Black experience through core courses dedicated to topics in Black and African Diaspora Studies and a selection of interdisciplinary elective courses. Learners do not need to be enrolled in a degree program to take this certificate. This certificate is 15 credit hours.

Admission requirements/eligibility

This certificate is open to current students in any undergraduate degree program **and** to non-degree students who meet the standard undergraduate admission requirements for Dalhousie as an undergraduate Non-Degree or Special Student in the Faculty of Arts and Social Sciences (both embedded and stand-alone).

To enroll in the Black and African Diaspora Studies Certificate, students must declare the certificate through Dal Online and notify the Certificate Coordinator.

Students must complete all course requirements and use the "apply to graduate" portal to obtain their certificate. Students completing a concurrent degree program should do this when they apply to graduate from their degree program.

Requirements

Students must take 15 credit hours including:

- BAFD 1000.03: Introduction to Black and African Diaspora Studies

AND

12 credit hours of approved electives, including:

A minimum of 3 credit hours from

- BAFD 2005.03: Introduction of African Canadian Studies
- BAFD 2280.03 African Nova Scotia History

AND

- The remaining credit hours must be chosen from the list of approved selectives (lists A, B, C) for the Major in Black and African Diaspora Studies (BAFD) program

Certificate in Cardiac Ultrasound

Fourth-year and post-diploma students in Diagnostic Medical Ultrasound Technology may complete a 15 credit hour program leading to a Certificate in Cardiac Ultrasound. Working Diagnostic Sonographers who meet post-diploma requirements might also be eligible to complete the Certificate as a stand-alone credential. The 15 credit hour certificate requires successful completion of the following Dalhousie courses:

Certificate in Cardiac Ultrasound

DMUT 4020.03: Cardiac Ultrasound

DMUT 4000.12: Specialty Practice (Cardiac Ultrasound)

Admission Requirements:

- Successful completion of a diploma program in Diagnostic Medical Ultrasound.
- Evidence of good standing with professional association.
- Two years of post-diploma work experience in Diagnostic Medical Ultrasound (for post-diploma applicants).

Upon approval from the DMUT Advisor, students must enrol in the Certificate in Cardiac Ultrasound. To enrol, students must declare the certificate through Dal Online (<https://dalonline.dal.ca> > Web for Students > Admissions > Declare Major/Minor/Certificate).

To graduate with the Certificate, students must apply to graduate with a Certificate per the timelines determined by the Registrar's Office.

Contact the School for further details.

Certificate in Communication Technologies and Cyber Security

Certificate in Communication Technologies and Cyber Security

This certificate is open to currently registered Dalhousie students in all Faculties; it will not be open for direct application.

This certificate requires a student to take two required courses and three electives from a list of elective courses with at least a C in each of them. Required courses are:

- CSCI 3120: Operating Systems
- CSCI 3171: Network Computing

Elective courses are:

- CSCI 3172: Web-Centric Computing
- CSCI 4116: Cryptography
- CSCI 4169: Usable Privacy and Security
- CSCI 4171: Networks and Communications
- CSCI 4174: Network Security
- CSCI 4176: Mobile Computing
- CSCI 4178: Cyber Security and Defense

Requirements

Note that to obtain a certificate, the degree requirements must be satisfied. To be awarded a Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate in Communicating Sustainability

The Certificate in Communicating Sustainability is open to current undergraduate students from any Faculty at Dalhousie.

The Certificate in Communicating Sustainability is a credential to develop and recognize expertise in how to communicate Sustainability concepts, principles and practices. Students will learn and apply communications theory frameworks; learn to effectively communicate sustainability concepts, issues, and opportunities to a variety of audiences; develop skills in constructive communication and negotiation of conflict; and gain experience to conceive, develop and refine effective sustainability communications in a variety of media, from first ideas through to delivery to an audience.

The Certificate is founded on a required interdisciplinary course, SUST 3107.03 *Communicating Sustainability: Media and Messaging*. This course (offered in collaboration with other Dal units including SRES and Journalism) provides foundational knowledge of communications theory and analysis; explores the relationships between academic and journalistic communication, and the challenges of communicating with the general public; and offers hands-on experience of developing effective text and multimedia stories for the general public, grounded in academic sources.

Students are also required to take SUST 2105.03 *Introductory Conflict Management for Sustainability* or SUST 4125.03 *Conflict Negotiation and Sustainability*. While both courses offer students the opportunity to build skills in conflict management and communication, SUST 2105.03 focuses on interpersonal conflict management while SUST 4125.03 focuses on negotiation in professional contexts. Students may take one or both of these courses.

Certificate Requirements

Certificate Grade Requirements:

The cumulative GPA in Certificate courses must be 3.0 (B) or better, with no individual Certificate course grade less than C.

Certificate Course Requirements:

A. Certificate Core Courses

At least one SUST course at 1000-level (minimum 3 credit hours). Select from:

- SUST 1400.03 Exploring Sustainability
- SUST 1000.06 What is Sustainability?
- SUST 1001.06 A Sustainable Future

3 credit hours required course:

- SUST 3107.03 Communicating Sustainability: Media and Messaging

3 credit hours chosen from:

- SUST 2105.03 Introductory Conflict Management for Sustainability
- SUST 4125.03 Conflict Negotiation and Sustainability

Both SUST 2105 and SUST 4125 may be taken. If so, one of them will count as 3 credit hours toward the 9 credit hours of Certificate Electives.

B. Certificate Elective Courses

9 credit hours chosen from:

- SUST 2105.03 Introductory Conflict Management for Sustainability
- SUST 3103.03 Effective Argument in Sustainability
- SUST 3104.03 Sustainability and the Non-profit Sector
- SUST 3106.03 The Canadian North
- SUST 4125.03 Conflict Negotiation and Sustainability
- INTD 3021.03 Communicating Development and Environment: Critical Debates and Alternative Strategies

Courses that are cross-listed with Certificate courses are equivalent and may be taken for the Certificate.

Certificate Learning Outcomes

A student who completes the Certificate in Communicating Sustainability will be able to:

1. Demonstrate a working knowledge of contemporary sustainability challenges and problem-solving approaches.

2. Understand the theoretical and analytic frameworks of communication and apply these to existing sustainability communications.
3. Effectively communicate sustainability concepts, issues and opportunities to a variety of audiences, including those familiar with sustainability and those new to the topic.
4. Conceive, develop and refine effective sustainability communications in a variety of media, from conception through to delivery to an audience.
5. Understand the goals, characteristics, the ethical principles and practices of both journalistic and academic expression.
6. Conduct analysis of sustainability stories and communications strategies to discern fact, opinion, evidence, media frames, intentions and effects.
7. Analyze and debate diverse views on sustainability issues and to communicate these to a wider audience.
8. Develop constructive conflict and compromise skills in negotiating sustainability issues.
9. Develop practical writing skills: media release, news article, longer-form popular academic-based article, journalism, policy writing.
10. Develop non-textual media skills: video/audio presentations, podcasts, social media posts, posters, infographics, visual arts.
11. Develop oral communication skills, as both communicator and listener: presentations, pitches, formal negotiations, lobbying, mediation, and debate.
12. Articulate the value of learning and implementing sustainability communication skills for (a) personal development and (b) sustainability-related goals that span disciplines and fields.

About the College of Sustainability

Dalhousie University's College of Sustainability is a leader in post-secondary sustainability education, the first of its kind in Canada. The curriculum provides an interdisciplinary, student-focused forum for collaborative teaching and learning driven by the pressing concerns of our time. The faculty in our ESS program are drawn from across the academic spectrum.

Contact: Kaarin Tae, ESS Academic Advisor. ess.advising@dal.ca

Certificate in Computing in Arts & Social Sciences

This certificate is open to currently registered Dalhousie undergraduate students in the Faculty of Arts and Social Sciences; it will not be open for direct application.

Designed for students in the arts, social sciences, and humanities, this certificate program is intended to develop participants' digital literacy. Students will develop and apply technical computing skills and also explore key social and intellectual issues in an increasing digital world. This program will give students important skills for future employment and will impart the tools they will need to understand and navigate a rapidly changing society.

This certificate can be completed by students in any BA program, in addition to the students' regular program requirements, and will appear on the students' transcripts. Note, too, that courses completed for this certificate can also count toward regular degree requirements for a student's major or minor, depending on the subject.

Students can enrol in the certificate by logging in to [Dal Online](#): under "Web for Students", click on 'Admissions' then 'Declare a Major or Minor', and at the bottom of that screen, click on the appropriate link in the drop-down list of certificate options.

Requirements:

12 credit hours:

- Students will complete the following 9 credit hours:
 - CSCI 1105: Introduction to programming
 - CSCI 1170: Introduction to Website development
 - CSCI: 2203: Data Science for Everyone
- plus 3 credit hours from the following list of applied skills courses:
 - CSCI 1107.03: Social Computing
 - CSCI 1109.03: Practical Data Science
 - PHIL 2490: Social, Ethical and Professional Issues in Computer Science
 - CSCI 2201.03: Introduction to Information Security
 - CSCI 2670.03: Introduction to Server-Scripting
 - ENGL 3310.03: Writing in a Digital Age
 - MGMT 2601.03: Knowledge Management
 - MGMT 3601.03: Information in a Networked World
 - MGMT 3603.03: Beyond Google
 - MGMT 4540.03: Data Management

- MGMT 4620.03: Web Design and Architecture

Learning Outcomes:

- Students will become familiar with simple programming concepts and apply them.
- Students will become familiar with and use typical software applications such as word processors, spreadsheets, and database applications.
- Students will become familiar with and practice web page creation.
- Students will critically appraise scholarly literature on ethical and intellectual issues with computing as it exists today.

Questions? Contact the Associate Dean Academic of the Faculty of Arts and Social Sciences at fassadac@dal.ca or at 902.494.1254.

Certificate in Data Analytics

Offered by: Faculty of Science

Coordinator: Dr. Theodore Kolokolnikov, Mathematics and Statistics (tkolokol@mathstat.dal.ca)

Eligibility: Open to Dalhousie undergraduate students

Overview: Data Analytics is an interdisciplinary field aimed at extracting knowledge from data of various forms. The techniques of data analytics draw heavily from the fields of statistics, computer science, and mathematics. Students completing the certificate will understand distinctions among data, information and knowledge, will be able to use the Structured Query Language (SQL) to manipulate relational databases, the R programming language to model data using a variety of machine learning and statistical models, and will be able to assess the performance of predictive models.

Admission to Certificate

To enrol in the *Certificate in Data Analytics*, students must declare the certificate through Dal Online (<https://dalonline.dal.ca>) > Web for Students > Admissions > Declare Major/Minor/Certificate), and notify the Certificate Coordinator by email.

To graduate with the Certificate, students must apply to Graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate requirements:

- MATH 1000: Differential and Integral Calculus I (or MATH 1215 or MATH 1280)
- MATH 1030: Matrix Theory and Linear Algebra I
- MATH 2040: Matrix Theory and Linear Algebra II (or MATH 2135)
- STAT 1060: Introduction to Statistics (or STAT 2060)
- STAT 2450: Introduction to Data Mining with R
- CSCI 2202: Computer Modeling for Scientists (or CSCI 1105 or CSCI 1110)
- CSCI 2141: Introduction to Database Systems
- One of
 - BIOC 4010: Bioinformatics
 - BIOL 4062: Analysis of biological data
 - CHEM 4205: Chemometrics
 - CSCI 4146: The process of data science
 - ECON 4440: Time series analysis in economics
 - ENVS 3100: Environmental analytics
 - EARTH 4520: GIS applications
 - MARI 4600: Ecosystem modelling for aquaculture
 - OCEA 4210/STAT 4390: Time series analysis in oceanography and meteorology
 - PHYC 3250: Computational methods in physics
 - PHYC 4250: Topics in numerical computing
 - STAT 4130: Bayesian data analysis
 - STAT 4350: Applied multivariate analysis
 - STAT 4550: Longitudinal data analysis
 - STAT 4620: Data analysis
 - STAT 4100: Survival analysis

Certificate in Dance and Movement

Certificate in Dance and Movement

This Certificate is open to currently registered Dalhousie and King's students in all Faculties.

Contact / Coordinator: Associate Director, Theatre (fspa.theatre@dal.ca)

The Certificate in Dance and Movement introduces students to the broad context of dance as a performance art and to the various skills that encompass movement and dance techniques. Through both practical and theoretical studies, students will develop an understanding of dance composition and movement for the stage, and will develop the vocabularies necessary to communicate in the field of dance and movement. This Certificate will be of interest to any Dalhousie or King's student who wishes to expand their knowledge of Dance and Movement, gain foundational performance skills, and improve physical wellness.

Learning Outcomes:

Upon completion of the Certificate, students will:

- Achieve proficiency in the basic skills of the performing artist: interaction with the performing space, creation of character through movement and gesture, collaboration, and ensemble-building.
- Understand the broad vocabularies of dance and movement techniques.
- Learn a variety of dance and movement techniques through practical application.
- Gain a foundation in dance composition and be able to create choreographic sequences.
- Develop confidence as performers by participating in a range of in-class and public performance opportunities.
- Improve physical skills and wellness through exploration of alignment, healthy movement, and mind-body connection.
- Gain an appreciation for, and be able effectively to explain both orally and in writing, the historical development of various dance styles and their importance to the cultures in which they developed.

Students can count credit earned in these courses toward their undergraduate major, minor, or distribution requirements, unless otherwise specified in their program's regulations.

Requirements:

This Certificate is a 15-credit-hour certificate. All students must complete:

- THEA 1801.03 and THEA 1802.03
- EITHER:
 - THEA 2821.03 and 2822.03 **OR**
 - THEA 2020.06 **OR**
 - THEA 2021.03 and THEA 2022.03
- PERF 3830.03

NOTE: Students who wish to do so may also apply to take THEA 4201.03 (Short Apprenticeship); THEA 4202.06 (Long Apprenticeship, one term); or THEA 4903.03 (Long Apprenticeship a) and THEA 4904.03 (Long Apprenticeship b) as higher-level electives to add a further component of Experiential Learning to their Certificate in Dance and Movement. Students who wish to add one of these classes to their Certificate must apply to the Fountain School of Performing Arts (FSPA) via an application form available from the FSPA Main Office, the Associate Director for Theatre, or the Certificate Coordinator. Entrance into these classes is by application only, and approval is given on a case-to-case basis. These electives are optional and are **not** required for completion of the Certificate.

Certificate in Data Science

Certificate in Data Science

This certificate is intended for students completing a Bachelor of Computer Science, Bachelor of Science in Computer Science, or a Bachelor of Science in Statistics, but is open to currently registered Dalhousie students in all Faculties; it will not be open for direct application.

This certificate requires a student to take two required courses and four electives from a list of elective courses with at least a C in each of them. Required courses are:

- CSCI 3151: Foundations of Machine Learning or STAT 3450: Statistical learning with R
- CSCI 4146: The Process of Data Science

Elective courses are:

- CSCI 4125: High Performance Computing
- CSCI 4141: Information Retrieval
- CSCI 4144: Introduction to Data Mining and Data Warehousing
- CSCI 4152: Natural Language Processing
- CSCI 4155: Machine Learning
- CSCI 4156: Reinforcement Learning with Gaming Applications
- CSCI 4166: Visualization
- STAT 2080: Statistical methods for Data Analysis and Inference
- STAT 2430: Data Visualization
- STAT 2450: Introduction to Data Mining with R
- STAT 3340: Regression and Analysis of Variance
- STAT 3360: Probability
- STAT 3740: Predictive Analysis
- STAT 4066: Advanced Statistical Theory
- STAT 4130: Bayesian Analysis
- STAT 4350: Multivariate Analysis
- STAT 4370: Stochastic Processes
- STAT 4390: Time Series Analysis
- STAT 4620: Data Analysis
- STAT 4690: Computational Statistics

Requirements

Note that to obtain a certificate, the degree requirements must be satisfied. To be awarded a Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate in Disability Management

The School of Occupational Therapy offers a Certificate in Disability Management (CDM) Program specifically designed to educate and engage students in the elements of disability management. Disability management team members provide effective, efficient and safe co-ordination of services needed to help injured or ill individuals achieve their maximum level of functioning, and facilitate their ability to remain at or return to work. Graduates of the CDM Program will typically work as disability case managers, insurance case managers, return to work facilitators, vocational rehabilitation consultants, vocational counsellors, or employee wellness program administrators.

People in the field of disability management come from many different professional backgrounds such as education, human resources, kinesiology, nursing, occupational therapy, physiotherapy, and social work. More and more organizations are recognizing the important role that disability management can play, with benefits of an effective disability management program including reducing cost due to less work disruptions, enhanced employee morale and sense of belonging, as well as improved manpower consistency. Practical applications of disability management have been made in different sectors of occupational activity such as administrative, industrial, service provision, technical and business. With so many multi-faceted aspects characterizing the field of disability management, the Dalhousie program draws on many bodies of knowledge spanning theoretical and practical application.

Program Overview

The overall goal of the CDM Program is to educate individuals with integrated knowledge and skills necessary to provide quality disability management services, through recognizing and understanding the dynamic interaction between disability and work

performance. Upon completion of the CDM Program, students will be able to demonstrate and apply skills and competencies in the areas of:

1. Foundations of Disability Management
2. Communication and Professional Relationships
3. Return to Work and Case Management
4. Policies, Ethics and Legal Issues

The CDM Program is made up of four academic undergraduate three credit hours courses that are taught completely online. These courses are normally taken as electives by students currently enrolled in an academic program at Dalhousie or another Canadian University. However, students not enrolled in a university program can pursue the CDM by applying as a Special Student Undergraduate. Any student interested in taking courses in the CDM Program must register through the Registrar's Office. Admission requirements vary based on previous education and the intended program of study at Dalhousie. The Registrar's Office can help guide students as to the eligibility for admission to specific Dalhousie programs.

Certificate in Emergency Health Services Management

The School of Health Administration offers an undergraduate **Certificate in Emergency Health Services Management (CEHSM)**. The certificate is designed for professionals seeking domain-specific knowledge in Emergency Health Services management.

The objective of the certificate is to assist individuals working in emergency health services organizations to more effectively manage community needs and resources. The certificate aims to:

- Assist in developing effective community-based programs through adverse outcome reduction
- Assist in the development of program-based budget and accounting controls
- Guide students in formulating effective communication and awareness at the community level.

The **Certificate in Emergency Health Services Management (CEHSM)** is also designed in a manner that allows the interested individual to continue on with more advanced training.

Admission Requirements

You must meet the Dalhousie University [undergraduate admission requirements](#) to be considered for this program. This certificate program does not typically accept people applying directly from high school. It is recommended that you have work or volunteer experience in the health services industry before applying for the program.

A complete application consists of the following documents:

- A completed [application form](#) and fee
- An official transcript of the record of academic work completed to date
- One letter of reference (academic or professional)
- Resume/curriculum vitae
- Applicants whose first language is not English must provide proof of English proficiency. See General Admission Requirements.

Application deadlines are:

- March 1 for September start
- November 15 for January start
- March 15 for May start

Curriculum

The one-year certificate features both academic and results-oriented curriculum. Students accepted into the **Certificate in Emergency Health Services Management (CEHSM)** take the following classes:

- **Fall Semester - Required Course**
HESA 4005: Healthcare Financial Management
- **Winter Semester - Required Course**
HESA 4020: Quality Improvement in Emergency Health Services
- **Summer Semester - Required Course**
HESA 4040: Principles of Community Based Emergency Health Services

Program Delivery

The **Certificate in Emergency Health Services Management (CEHSM)** is fully online offering flexible study options. The certificate is conducted through the Internet and web-based conferencing tool within the Dalhousie e-Learning platform. The Dalhousie e-Learning platform consists of a well-established suite of tools, which provide mechanisms for interactive exercises, such as group discussions, presentations, and information sharing. The certificate uses on-line learning technology for recommended readings, lessons, and course activities (e.g. assignments, tests, self-tests, etc.).

Certificate in Emergency Health Services Systems Planning

The School of Health Administration offers an undergraduate **Certificate in Emergency Health Services System Planning (CEHSP)**. The certificate is designed for professionals seeking domain-specific knowledge in Emergency Health Services management.

The objective of the certificate is to assist individuals working in emergency health services organizations to more effectively manage community needs and resources. The certificate aims to:

- Help emergency and disaster health services managers to design an efficient pre-hospital care system through community-based emergency health need assessment with regard to people, time, and place
- Enable managers to design an Emergency Health Services system that meets the needs of community by integrating the elements of planning cycle and unique specification of Emergency Health Services system structure

The **Certificate in Emergency Health Services System Planning (CEHSP)** is also designed in a manner that allows the interested individual to continue on with more advanced training.

Admission Requirements

You must meet the Dalhousie University [undergraduate admission requirements](#) to be considered for this program. This certificate program does not typically accept people applying directly from high school. It is recommended that you have work or volunteer experience in the health services industry before applying for the program.

A complete application consists of the following documents:

- A completed [application form](#) and fee
- An official transcript of the record of academic work completed to date
- One letter of reference (academic or professional)
- Resume/curriculum vitae
- Applicants whose first language is not English must provide proof of English proficiency. See General Admission Requirements.

Application deadlines are:

- March 1 for September start
- November 15 for January start
- March 15 for May start

Curriculum

The one-year certificate features both academic and results-oriented curriculum. Students accepted into the **Certificate in Emergency Health Services System Planning (CEHSP)** take the following half credit classes:

- **Fall Semester - Required Course** HESA 4004: Healthcare Planning
- **Winter Semester - Required Course**
HESA 4200: Epidemiology for Managers
- **Summer Semester - Required Course**
HESA 4030: Emergency Health Services Systems Design

Program Delivery

The **Certificate in Emergency Health Services System Planning (CEHSP)** is fully online offering flexible study options. The certificate is conducted through the Internet and web-based conferencing tool within the Dalhousie e-Learning platform. The Dalhousie e-Learning platform consists of a well-established suite of tools, which provide mechanisms for interactive exercises, such as group discussions, presentations, and information sharing. The certificate uses on-line learning technology for recommended readings, lessons, and course activities (e.g. assignments, tests, self-tests, etc.).

Certificate in Entrepreneurship and Innovation

Eligibility: The Certificate is open to any Dalhousie undergraduate student. Non-degree Dalhousie students may qualify for the Certificate if they fulfill all course requirements at Dalhousie

Overview: The Entrepreneurship and Innovation Certificate will provide students with an opportunity to learn and develop skills related to innovation and entrepreneurship, starting with ideation (innovation, creativity, design thinking), continuing with launching a new venture, and ending with managing a new venture.

Admission to Certificate

To enrol in the Certificate, students must declare the Certificate through Dal Online (<https://dalonline.dal.ca>>Web for Students>Student Records>Declare Major/Minor/Certificate).

Certificate requirements

9 credit hours:

MGMT 2902 Innovation: An Introduction to Design Thinking

MGMT 3907 New Venture Creation

MGMT 4901 Applied Entrepreneurship and Innovation

All required courses for the Certificate must be completed at Dalhousie. Students must obtain a minimum grade of (B-) for all courses counted toward the Certificate.

To graduate with the Certificate, students must apply to graduate with a Certificate per the timelines determined by the Registrar's Office.

Certificate in Environment, Sustainability and Society

The Certificate in Environment, Sustainability and Society (ESS) is open to current undergraduate students from any Faculty at Dalhousie, excluding those who have declared ESS as a Major or Minor subject.

The ESS Certificate allows students from multiple disciplines to engage meaningfully with issues of Environment, Sustainability and Society. Over the duration of 15 credit hours, you will explore many current sustainability issues and have the opportunity to focus on specific areas of interest. Topics of study include food, energy, resources, climate change, governance, and conflict resolution through courses offered by the College of Sustainability and other departments across the university. With many course options to choose from, the ESS Certificate is designed to support your own sustainability interests and goals.

Certificate Requirements

Certificate Grade Requirements

The cumulative GPA in ESS Certificate courses must be 3.0 (B) or better, with no individual ESS Certificate course grade less than C.

Certificate Course Requirements

At least one SUST course at 1000-level (minimum 3 credit hours) chosen from:

- SUST 1400.03 *Exploring Sustainability*
- SUST 1000.06 *What is Sustainability?*
- SUST 1001.06 *A Sustainable Future*

A minimum of 12 credit hours at 2000-level or above including:

- 6 credit hours [SUST courses](#) at 2000 level or above
- 6 credit hours [ESS Electives](#) or [SUST courses](#) at 2000-level or above

"ESS Electives" are courses offered by any department at Dalhousie. They focus on the relation between environment, sustainability and society, or incorporate issues of environment, sustainability and society as a significant module or significant assignment. ESS Electives are reviewed and approved by the College of Sustainability Council.

N.B. SUST 1400 and SUST 1000 are Exclusions – credit will be granted for one or the other, not both.

Certificate Learning Outcomes

A student who completes the ESS Certificate will be able to:

1. Recognize sustainability challenges as complex issues that require interdisciplinary thought and action.
2. Identify the interactions between complex sustainability challenges by interpreting current issues of environment, sustainability, and society.
3. Locate diverse ideas and sources of information about sustainability issues, critically analyze arguments, generate conclusions based on evidence and communicate effectively.
4. Identify how (a) their own disciplinary method is used to engage in sustainability issues and (b) how other disciplines/fields engage with and contribute to sustainability
5. Develop self-awareness and describe their own subjective position in the world with respect to sustainability issues and practice respect for diverse perspectives in discussing sustainability understandings and solutions.
6. Work effectively, independently and in group situations, to contribute to problem solving on sustainability issues

General Degree Requirements satisfied by SUST courses

- SUST 1000.06 satisfies the full University Writing Requirement.
- SUST satisfies “Social Science” Subject Grouping for BSc students.
- SUST satisfies “Life and Physical Science” Subject Grouping for BA students.
- SUST satisfies “Social Science” and “Life and Physical Science” Subject Groupings for BCD students.

About the College of Sustainability

Dalhousie University’s College of Sustainability is a leader in post-secondary sustainability education, the first of its kind in Canada. The curriculum provides an interdisciplinary, student-focused forum for collaborative teaching and learning driven by the pressing concerns of our time. The faculty in our ESS program are drawn from across the academic spectrum.

Certificate in Environmental Biology

Please note that new admissions to this program are suspended.

Post-Baccalaureate Certificate Programs are catered to people who have already completed a BSc in Biological Sciences and who wish to gain new skills in a specialized area for the purpose of advancing in their career or pursuing graduate studies.

The Post-Baccalaureate Certificate in Environmental Biology digs deep into how living organisms interact with their environment. It emphasizes learning about biodiversity, conservation, ecological processes, adaptation, and teaches you how to assess and provide skills and solutions to meet future environmental challenges.

This program prepares you for careers in environmental biology, environmental management and environmental services by giving you skills, training and expertise specific to this field. In completing this program, you will understand and describe the concepts relating to ecology, diversity, conservation, plant and animal adaptation to various environments.

This certificate is open to students who possess a Bachelor of Science or similar degree in biological sciences or related field with a minimum CGPA of 3.0 in the last two years of undergraduate studies. Student who have taken any courses listed in their undergraduate program shall receive a maximum of six credit hours waiver to complete the certificate.

Certificate Requirements

Total of 27 credit hours required to be completed within 5 years (maximum).

Required Courses

- ENVA 2000.03: Environmental Sciences I
- ENVA 2001.03: Environmental Sciences II
- ENVA 3000.03: Environmental Impacts and Assessment
- BIOA 3001.03: Ecology
- BIOA 2008.03: Plant Diversity
- BIOA 4002.03: Conservation Biology

- PLSC 4002.03: Plant Ecophysiology

Optional Courses

Any **ONE** from the list below:

- BIOA 2005.03: Principles of Plant Pathology
- BIOA 3000.03: General Entomology
- BIOA 3002.03: Weed Science

Any **ONE** of the following:

- SOIL 3000.03: Soil Fertility and Nutrient Management
- BIOA 3006.03: Aquatic Ecology
- BIOA 4004.03: Animal Adaptation and Stress

To inquire further about the requirements for the Post-Baccalaureate Certificate in Environmental Biology, please contact Program Coordinator, Raj Lada (raj.lada@dal.ca).

Certificate in Environmental Impact Assessment

Offered by: Faculty of Science

EIA Certificate Coordinator: Patricia Lane (Biology), patricia.lane@dal.ca

The **Certificate in Environmental Impact Assessment** is for students who are interested in, or majoring in environmental areas, and who wish to pursue additional training in EIA. This certificate is available to students in the Faculty of Science, Faculty of Agriculture, Faculty of Architecture and Planning, Faculty of Arts and Social Sciences, Faculty of Management, and the College of Sustainability.

Students will learn to:

1. Apply a Project EIA Framework in the preparation of a Nova Scotia - based EIA.
2. Demonstrate an understanding of relevant federal and provincial (Nova Scotia) legislation.
3. Design a meaningful stakeholder participation program.
4. Use environmental impact and risk methodologies to accurately predict project impacts.
5. Design an Environmental Management Plan that includes: mitigation, enhancement, compensation, monitoring, residual impacts and project accountability.
6. Prepare a comprehensive project EIA for a physical project
7. Prepare a Strategic Environmental Assessment (SEA) for a federal policy.

Disclaimer: This EIA Certificate was developed within Dalhousie University and it is not designed to fulfill any governmental and/or professional requirements outside of the university, in Canada or abroad.

The Certificate requires a total of 24 credit hours as follows:

1. Required EIA course: BIOL 4001.03/ENVS 4001.03 (3 credit hours) to be taken in fourth year. Note: transfer or online courses are not acceptable substitutes for this requirement.
2. Introductory Science, SUST, Agriculture, or FASS course (minimum 3 credit hours) from Table 1.
3. Environmental courses with theoretical content from Table 2 (minimum 9 credit hours).
4. Methods courses with field, laboratory, statistical, or modelling experience from Table 3 (minimum 3 credit hours).
5. Supplementary courses in Major or Related Disciplines from Table 4 (minimum 6 credit hours).

Students must obtain a minimum grade of B for all courses counted toward the certificate.

Classes cannot be substituted from one table to another. Please note that many classes are cross-listed, but only listed once for the department offering the class below. Students can use any one of the cross-listings.

Table 1. Introductory Courses Checklist (minimum of 3 credit hours from following list)

BIOL 2060.03: Introductory Ecology **OR** BIOA 3001.03: Ecology
ENVA2000.03/APSC2012.03: Environmental Studies I
ENVA2001.03: Environmental Studies II
ENVS 1100.03: Foundations of Environmental Science
ENVS 1200.03: Current Environmental Challenges: Analysis and Solutions
ERTH 2410.03/ENVS 2410.03: Environmental Issues in Earth Science
GEOG 2100.06/SOSA 2100.06: Environment and Culture
INTD 2001.03/GEOG 2201.03: Introduction to Development 1
INTD 2002.03/GEOG 2202.03: Introduction to Development 2
OCEA 2001.03 and OCEA 2002.03: The Blue Planet
SUST 2000.06: Local Governance, Citizen Engagement, and Sustainability
SUST 2001.06: Global Environmental Governance

Table 2. Theory-Based Courses Checklist (minimum of 9 credit hours from following list)

AQUA2000.03: Introduction to Aquaculture
APSC 2000.03 Environmental Impacts and Resource Management
APSC2004.03/AQUA2004.03: Aquacultural Environment

Certificate in Financial Accounting

The Financial Accounting Certificate will investigate financial statements and annual reports to understand the overall health of the organization. Students will develop an understanding of basic financial accounting methodologies and develop analytical and

procedural skills. Topics include analysis of financial statements, MD&A, pensions, deferred taxes, corporate investments, and cash flow.

Note – this certificate is not available to those majoring in Accounting

Required courses:

COMM 1101.03 or MGMT 1101.03(Introductory Accounting I (Financial)
COMM 1102.03 or MGMT 1102.03 (Introductory Accounting II (Management)
COMM 3102.03 Financial Statement Analysis

***Students must obtain a minimum grade of B- for all courses counted toward the certificate. All required courses must be completed at Dalhousie.**

Students must apply to graduate with a Certificate per the timelines determined by the Registrar's Office.

Certificate in Fintech and Financial Innovation

The FinTech and Financial Innovation Certificate will appeal to students who are interested in the rapidly developing field of FinTech and the associated innovations in the delivery of financial services. In particular, students will develop skills and knowledge in the areas of innovation and adapting technology for scalable mass-market applications.

Note – this certificate is not available to those majoring in Finance

Required Courses (9 credit hours):
MGMT 3201 Financial Management
COMM 2220 Introduction to FinTech
COMM 3203 Financial Institutions*

*Students will be required to complete MGMT 3201 with a minimum grade of B- before registering for COMM 3203.

Students must obtain a minimum grade of B- for all courses counted toward the certificate. All required courses must be completed at Dalhousie.

To graduate with the FinTech and Financial Innovation Certificate students must apply to graduate per the timelines determined by the Registrar's Office.

Contact uao@dal.ca for more information

Certificate in Food Bioscience

The Post-Baccalaureate Certificate in Food Bioscience will allow you to become specialized in the area of food and food components. You will study the chemical, microbiological, health, and regulatory aspects of foods, food ingredients, and nutraceuticals.

Having an initial bachelor's degree, the specialization at the post-baccalaureate level will position you to contribute to commercial and research organizations developing, producing, marketing and analyzing novel food and nutraceutical products. There has never been a greater time in Canada to get involved in this industry and gain skills and knowledge related to emerging areas of food and nutraceutical sciences for the 21st century. The certificate will also complement and facilitate those who wish to explore postgraduate studies in a wide range of disciplines

This certificate is open to students who possess a Bachelor of Science or similar degree in any natural science or applied life science field with a minimum CGPA of 3.0 in the last two years of undergraduate studies. Students who have taken any courses listed in their undergraduate program shall receive a maximum of six credit hours waiver to complete the certificate.

Certificate Requirements

Total of 27 credit hours required to be completed within 5 years (maximum).

Required Courses

CHMA 2002.03: Introduction to Biochemistry *
CHMA 3011.03: Fundamentals of Food Chemistry
CHMA 4003.03: Instrumental Analysis

FOOD 3002.03: Impact of Food on Health
FOOD 4001.03: Food Quality and Safety
FOOD 4005.03: Functional Foods and Nutraceuticals
MCRA 2000.03: Microbiology *
MCRA 4001.03: Food Microbiology

*For both Introduction to Biochemistry and Microbiology, if the student has already earned a credit in an equivalent course (3 credits) during the past five years, the required course(s) can be replaced with elective course(s) from the list below.

Optional Courses

Any **ONE** from the list below:

AGRI 4001.03: Agriculture, Food and Well-being
ANSC 3003.03: Eggs and Dairy Products
ANSC 3004.03: Meat Science
FOOD 4000.03: Directed Studies in Food and Bioproduct Sciences
FOOD 4004.03: Directed Studies in Nutriscience
MCRA 4002.03: Microbiomes in Agriculture
NUTR 3000.03: Introduction to Nutrition

To inquire further about the requirements for the Post-Baccalaureate Certificate in Food Bioscience, please contact Dr. Vasantha Rupasinghe (vrupasinghe@dal.ca).

Certificate in Fundamentals of Interdisciplinary Management

Eligibility: The certificate is open to any Dalhousie undergraduate student. Non-degree Dalhousie students may qualify for the certificate if they fulfill all course requirements at Dalhousie.

Overview: The Fundamentals of Interdisciplinary Management Certificate aims to help students gain an interdisciplinary view of management. Students completing the certificate will be introduced to the definition of management and how people and process vary across the disciplines. Students will examine the interactions among the environment, technology, society, organizations and people, in a world with limited resources. Students will be exposed to key knowledge, behaviors, skills, competencies and attitudes considered critical to managerial success, and learn how to apply these to ensure they understand effective management practice.

Admission to Certificate

To enrol in the Certificate, students must declare the Certificate through Dal Online (<https://dalonline.dal.ca>>Web for Students>Student Records>Declare Major/Minor/Certificate).

Certificate requirements

9 credit hours:

MGMT 1301 Interdisciplinary Management I
MGMT 1302 Interdisciplinary Management II
MGMT 3309 Management Skills Development*

*Note that MGMT 3309 requires that students have completed COMM 2303.03 (Organizational Behavior) or both MGMT 2303.03 and MGMT 2304.03 (respectively, Micro and Macro Organizational Behavior).

All required courses for the Certificate must be completed at Dalhousie. Students must obtain a minimum grade of (B-) for all courses counted toward the Certificate.

To graduate with the Certificate, students must apply to graduate with a Certificate per the timelines determined by the Registrar's Office.

Certificate in Genetics

Offered by: Biochemistry & Molecular Biology, Biology, Microbiology & Immunology

Coordinators:

Dr. Claudio Slamovits claudio.slamovits@dal.ca (Biochemistry & Molecular Biology)

Debra Grantham grantham@dal.ca (Biology)

Dr. Ian Weaver ian.weaver@dal.ca (Medical Sciences, Psychology, Neuroscience)

Dr. Zhenyu Cheng zhenyu.cheng@dal.ca (Microbiology & Immunology - Until December 2020)

Dr. Lois Murray lois.murray@dal.ca (Microbiology & Immunology - As of January 2021)

The Certificate in Genetics provides students with an opportunity to complete a set of courses and research that will accord them recognition of specialization in genetics.

Admission to Certificate

Students should enrol in the Certificate in Genetics in their third year of studies, when they are seeking approval of the independent research component from the Certificate Coordinator for their degree program. To enrol in the *Certificate in Genetics*, students must declare the certificate through Dal Online (<https://dalonline.dal.ca> >Web for Students>Admissions>Declare Major/Minor/Certificate), and notify the Certificate Coordinator. To qualify for the certificate students must complete all course requirements, **and** have received approval for the research component prior to the start of the research course.

To graduate with the Certificate, students must apply to graduate with a certificate at the time they apply to graduate from their degree program.

Certificate requirements:

1. A minimum grade of a B- in four mandatory courses:

- BIOL 2020.03: Cell Biology
- BIOL 2030.03: Genetics and Molecular Biology
- BIOC 2300.03: Introduction to Biochemistry
- BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology

2. A minimum grade of B- in 12 credit hours chosen from the following list. At least 6 credit hours must be at the 4000 level.

2000 level

- BIOL 2040.03: Evolution

3000 level

- BIOL 3036.03: Transgenic Organisms
- BIOL 3037.03: Life Rewritten: Applications and Implications of Gene Editing and Synthetic Biology
- BIOL 3042.03/MARI 3042.03: Molecular Ecology
- BIOL 3044.03: Ecological Genetics
- BIOL 3046.03: Molecular Evolution
- BIOL 3102.03: Microbial Eukaryotes: Biodiversity and Evolution
- MICI 3114.03: Virology
- MICI 3119.03: Physiology of the Prokaryotic Cell
- NESC 3670.03/PSYO 3670.03: Genes, Brain and Behaviour

4000 level

- BIOC 4010.03: Bioinformatics
- BIOC 4027.03/MICI 4027.03: Molecular Mechanisms of Cancer
- MICI 4033.03: Advanced Microbial Genetics
- MICI 4114.03: Advanced Topics in Molecular and Medical Virology
- BIOC 4403.03: Genes and Genomes
- BIOC 4404.03: Gene Expression
- BIOC 4501.03: Medical Biotechnology
- BIOC 4835.03/BIOL 4035.03: Human Genetics
- NESC 4670.03: Behavioral Neuro(epi)genetics and Genomics

3. Other required courses (prerequisites for BIOC 3400.03)

- CHEM 2441.03, or CHEM 2401.03 and CHEM 2402.03

4. A minimum grade of B- in three credit hours or more of independent research on a topic involving microbial genetics, molecular genetics, transmission genetics or population genetics. Co-op Work Terms are not applicable. The research topic must be pre-approved by the Department's Certificate Coordinator prior to the start of the research course.

- BIOC 4001.03
- BIOC 4604.03
- BIOC 4605.03
- BIOL 4806.03/MARI 4806.03
- BIOL 4807.03/MARI 4807.03
- BIOL 4900.06/MARI 4900.06
- BIOL 4901.03/MARI 4901.03
- BIOL 4902.03/MARI 4902.03
- MICI 4703.03 and MICI 4704.03 (or MICI 4700X/Y.06)
- MICI 4701.03
- MICI 4702.03
- MICI 4901.03 and MICI 4902.03 (or MICI 4900X/Y.06)
- MICI 4901.03
- MICI 4902.03
- NESC 4501.03 and NESC 4502.03 OR PSYO 4501.03 and PSYO 4502.03 (or NESC 4500X/Y.06/PSYO 4500X/Y.06)
- SCIE 4101.03 and SCIE 4102.03 (or SCIE 4100X/Y.06)
- SCIE 4901.03 and SCIE 4902.03 (or SCIE 4900X/Y.06)

Certificate in Genetics and Molecular Biology

The Certificate in Genetics & Molecular Biology provides a range of genetic and molecular biology theory and techniques for those interested in expanding their knowledge and skills beyond the introductory level or pursuing graduate studies.

This program prepares students to explain the importance of genetic diversity, propose genetic solutions to constraints in plant or animal production systems and argue the pros and cons of genetic engineering.

This certificate is open to students eligible for admission to or enrolled in a BSc or BSc (Agr) program at either of Dalhousie's Halifax or Truro campuses.

Certificate Requirements

Total of 15 credit hours required to be completed within 5 years (maximum).

Required Courses

ANSC 3000.03: Animal Breeding OR PLSC 4000.03: Plant Breeding

GENE 2000.03: Genetics I

GENE 3000.03: An Introduction to Molecular Genetics

Optional Courses

Any **TWO** from the list below:

GENE 4003.03: Biotechnology

GENE 4005.03: Applied Genomics and Bioinformatics

GENE 4006.03: Advanced Studies in Molecular and -Omics Techniques

MCRA 4002.03: Microbiomes in Agriculture

To inquire further about the requirements for the Certificate in Genetics & Molecular Biology, please contact Program Coordinator, Nancy McLean (nancy.mclean@dal.ca).

Certificate in Geographic Information Science (GIS)

Offered by: Earth Sciences, Environmental Sciences, Biology

Coordinators:

Dr. C.S Greene csgreene@dal.ca (Earth and Environmental Sciences)

Dr. D. Tittensor Derek.Tittensor@dal.ca (Biology)
Dr. E. Rapaport eric.rapaport@dal.ca (School of Planning)

The GIS Certificate program provides training and experience in geographic information science as part of an undergraduate degree program, usually in Earth Sciences, Environmental Science or Biology, and prepares students for further study or employment in the area. The Certificate requires the completion of GIS-related courses and completion of a major project that involves work with geographic information systems and geomatics.

Admission to Certificate

It is recommended that students enrol in the GIS Certificate in their second or third year of studies, and that they contact the Certificate Coordinator at that time. To enrol, students must declare the Certificate through Dal Online (<https://dalonline.dal.ca> >Web for Students>Admissions>Declare Major/Minor/Certificate). To qualify for the Certificate, students must complete all course requirements, *and* have received approval for the research component (project) from the Certificate Coordinator if intending to use an alternative to the Geographic Information Science Research course to satisfy the research component of the certificate.

To graduate with the Certificate, students must apply to graduate with a certificate at the time they apply to graduate from their degree program.

Certificate Requirements:

1. A minimum grade of B- in each of the following courses:

- ENV5 3500.03/ERTH 3500.03/GEOG 3500.03: Geoscience Information Management
- ERTH 4520.03/GEOG 4520.03: GIS Applications to Environmental and Geological Science

2. A minimum grade of B- in a minimum of two of the following courses:

- GEOG 2000.03: Cartography
- GEOG 2006.03: Space, Place and GIS
- BIOL 3633.03/ENV5 3633.03/GEOG 3633.03: Spatial Information and GIS in Ecology
- ERTH 4530.03/GEOG 4530.03: Environmental Remote Sensing
- ENV5 2100.03: Environmental Informatics
- ENV5 3100.03: Environmental Analytics
- ENV5 3400.03/GEOG 3400.03: Environment and Human Health

3. Completion of a research project with an emphasis in geographic information science via one of the following sets of courses (minimum grade of B-). Research topics must be pre-approved by the Certificate Coordinator

Set 1

- SCIE 4850.03/BIOL 4850.03/ENV5 4850.03/GEOG 4850.03: Geographic Information Science Research Project

Set 2

- BIOL 4901.03 and BIOL 4902.03 or MARI 4901.03 and MARI 4902.03: Honours Thesis (or the former BIOL 4900.06/MARI 4900.06)
- ENV5 4901.03/ENV5 4902.03: Honours Thesis ERTH 4101.03 and ERTH 4102.03: Research Project (or ERTH 4100.06)
- ERTH 4201.03 and ERTH 4202.03: Honours Thesis (or ERTH 4200.06)
- SUST 4800.03: Independent Study
- SUST 4901.03 and SUST 4902.03: Honours Thesis (or SUST 4900.06)

Research Project Guidelines for the Certificate in Geographic Information Science

Students should learn how to design, manage and complete a research project that emphasizes the use of a geographic information system (GIS). Students will identify a suitable research problem and work to solve it through acquiring, organizing, analyzing and presenting data using GIS. A substantive analytical component involving GIS must be included. Projects should be undertaken after all or most of the coursework is completed, e.g. students should already be familiar with GIS concepts and functions, and be proficient in the use of at least one GIS package. Supervision and evaluation of research projects must include input from a professor or GIS technician competent in geographic information science, methods and technologies.

Students enrolled in an undergraduate program other than Biology, Environmental Science, Earth Sciences or the College of Sustainability, may be able to complete the project through a directed readings or honours thesis course listed within their home department. The project must be pre-approved by a Certificate Coordinator. Non-thesis students, or honours students who wish to complete the certificate through a project that is not part of their thesis, who are in Biology, Earth Sciences or Environmental Science should complete the project through SCIE 4850: Geographic Information Science Research Project.

Certificate in Graphics, Gaming, and Media

Certificate in Graphics, Gaming, and Media

This certificate is open to currently registered Dalhousie students in all Faculties; it will not be open for direct application.

This certificate requires a student to take three required and two electives from a list of elective courses with at least a C in each of them. Required courses are:

- CSCI 3161: Introduction to Computer Graphics with Animation
- CSCI 3162: Digital Media
- CSCI 4168: Game Design and Development

Elective courses are:

- CSCI 4156: Reinforcement Learning with Gaming Applications
- CSCI 4160: Computer Graphics
- CSCI 4166: Visualization
- CSCI 4167: Advanced Computer Animation

Requirements

Note that to obtain a certificate, the degree requirements must be satisfied. To be awarded a Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate in Heritage Studies

The Certificate in Heritage Studies (CHS) affords students an added dimension to their undergraduate degree, exposing them to professional settings and ways of applying historical knowledge through experiential, community-engaged and work-integrated learning. The purpose of the certificate is to provide students with theoretical knowledge and practical experience in the heritage sector. Upon completion, students will benefit from a certificate that will accompany their degree and illustrate their added knowledge, skills, and experience to potential employers and institutions.

The Certificate in Heritage Studies is a 12- credit hour certificate, comprised of course work and an institution-focused project. Students must have completed their first year of university (or 30 credit hours) and be in good academic standing, with an average of B or better, to enroll in the certificate program.

Requirements:

1. HIST 2950.03, Introduction to Heritage Studies and Public Humanities
2. Six credit hours from a list of approved electives to provide additional historical context and/or theoretical engagement with public uses of history and heritage, to prepare them to make best use of the capstone experience.
3. HIST 4710.03, Heritage Studies: Capstone. This will be a final, three credit hour seminar requiring students to apply the skills and knowledge gathered from the program to an institution-focused project. Each student will develop a project that will necessitate them drawing on the resources of a particular local institution (e.g., Pier 21, Nova Scotia Museum sites, Dalhousie Archives, etc.) without having to be hired or formally placed. The certificate coordinator will guide students through this capstone project seminar, usually in the fall semester of their final year of study.

Electives (Note that not all courses on this list are offered each year):

Department of Sociology and Social Anthropology:

SOSA 2052.03 Contemporary Issues in Indigenous Studies

SOSA 2111.03 Is there an Atlantic Canada?

SOSA 2115.03 African Canadian Society, Culture, and Resistance

SOSA 2191.03 Gender Across Cultures

SOSA 3015.03 Popular Memory

SOSA 3185.03 Issues in the Study of Indigenous Peoples of North America

SOSA 3284.03 Living in Cities

Department of History:

HIST 2205.03 Historical Issues in Indigenous Studies

HIST 2210.03 Many Canadas: Canada, 1930 to the present

HIST 2235.03 History of Canadian Culture

HIST 2272.03 Atlantic Canada since Confederation: Regionalism, Identity, and Development

HIST 2280.03 African Nova Scotian History

HIST 2900.03 Ways of Seeing: An Introduction to Art History & Visual Culture

HIST 3210.03 Canadian Cultural Landscapes

HIST 3215.03 Indigenous Textiles in Canada: Tourism, Industry, Identity

HIST 3274.03 Nova Scotia: Post-Confederation

HIST 3282.03 Public History

HIST 3302.03 Technology and History in North America

HIST 4250.03 Popular Culture in the Atlantic World, 1650-1850

HIST 4210.03 Museums, Archives, and Material Culture

HIST 4162.03/THEA 4360.03/MUSC 4360.03, Advanced Seminar in Baroque Culture [taught at the UNESCO World Heritage Site, the State Castle in Cesky Krumlov]

Indigenous Studies:

INDG 3050.03 Indigenous Research Methodologies and Knowledge Practices

INDG 3401.03 Indigenous Representation in Film

Department of Political Science:

POLI 2215.03 Canadian Aboriginal Politics: An Institutional Perspective

Department of English:

ENGL 2006.03 Cultural Studies

Contemporary Studies Programme:

CTMP 2316.03 The “Pictorial Turn” in Recent Thought, Art and Theory

CTMP 3322.03 Representations of the Holocaust: Remembrance

Canadian Studies Program:

CANA 2002.03 The Idea of Canada: Cultural and Literary Perspectives

Certificate in Human Physiology

Offered by: Physiology & Biophysics, Psychology & Neuroscience, Biology, Kinesiology

Coordinators: Dr. Derek Kimmerly (Kinesiology students) dskimmerly@dal.ca
Dr. Nathan Crowder (Neuroscience & Psychology) Nathan.Crowder@dal.ca
Dr. Stefan Krueger (Medical Sciences & other programs) stefan.krueger@dal.ca

Eligibility: This certificate is open to currently registered Dalhousie students.

Overview: The Certificate in Human Physiology provides students with an opportunity to specialize in physiological studies through courses offered in the Medical Sciences, Biology, Neuroscience, and Kinesiology undergraduate programs, as well as experiential learning opportunities. The learning outcomes will vary between students and depend on their main area of undergraduate studies, as well as on individual interests. Concentrating on one or more cross-cutting themes, students enrolled in the certificate program may choose to:

- Examine the function and role of particular organ systems in human performance and disease.
- Analyze the function of the nervous and endocrine systems to appreciate how they regulate bodily functions and behaviour.
- Explore physiological mechanisms at molecular and cellular levels to develop a more thorough understanding of physiological and pathophysiological processes at a higher organizational level.

Admission to Certificate: Students should enrol in the Certificate Program in Human Physiology in their third year of studies. To enrol, students must declare the certificate through Dal Online (<https://dalonline.ca> >Web for Students>Admissions>Declare Major/Minor/Certificate) and notify the Certificate Coordinator by e-mail.

To graduate with the Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate Requirements:

1. A minimum grade of at least B- is required in 6 credit hours of the following core courses:

- PHYL 2041 Human Neurophysiology and PHYL 2044 Systems Physiology or
- BIOL 3078/MARI 3078 Animal Physiology I and BIOL 3079/MARI 3079 Animal Physiology II or
- NESC 2470 Systems Neuroscience and PHYL 2044 Systems Physiology or
- KINE 2310 Physiology of Exercise and KINE 2430 Motor Control & Learning

2. A grade of at least B- required in 15 elective credit hours chosen from the list of courses below. Courses can only be counted towards elective credits if they have not been used to fulfill core course requirements. No more than one 2000-level course can be used towards elective credits. A maximum of 9 credit hours from any one stream (PHYL, NESC, BIOL, KINE) can be used.

- PHYL 3120 Exercise Physiology
- PHYL 3320 Human Cell Physiology
- PHYL 3520 Core Concepts in Medical Physiol
- PHYL 3620 Human Physiology Lab
- PHYL 4000 Synaptic Function
- PHYL 4324 Endocrine Function
- PHYL 4504 Respiratory Physiology
- PHYL 4680 Cardiovascular Physiology

- NESC 2150 Perceptual Processes
- NESC 2570 Cellular Neuroscience
- NESC 3051 Methods in Sensation and Perception
- NESC 3170 Hormones & Behaviour
- NESC 3670 Genes, Brain & Behaviour
- NESC 3970 Molecular Neuroscience
- NESC 4070 Chemical Neurobiology

- BIOL 3430 Intro Human Histology
- BIOL 4020 Advanced Cell Biology

- KINE 3419 Appl Physiology Principles Human Performance
- KINE 3250 Human Nutrition
- KINE 3440 Sensory and Motor Function
- KINE 4704 Cardiorespiratory Dynamics in Exercise

3. At least 6 credit hours of experiential learning or independent research. Research projects have to be conceptually or methodologically related to Physiology and be approved by the certificate program committee. Suitable courses for this requirement include **PHYL 3600, NESC 3001, NESC 3100, NESC 3101, NESC 4501, NESC 4502, SCIE 3100, SCIE 4101, SCIE 4102, SCIE 4901, SCIE 4902, BIOL 3800, BIOL 4806, BIOL 4807, BIOL 4901, BIOL 4902, KINE 4801, KINE 4802, and KINE 4900X/Y.**

Certificate in Indigenous Studies

This certificate is open to currently registered Dalhousie students in all Faculties; it is not yet open for direct application.

The Certificate in Indigenous Studies is a 9 credit hour certificate with two core 3 credit hour courses and a choice of one of three 3 credit hour courses.

Requirements:

- HIST 2205.05/INDG 2050.03/CANA 2050.03: Historical Issues in Indigenous Studies
- INDG 2052.03/CANA 2052.03/SOSA 2052.03: Contemporary Issues in Indigenous Studies
- Plus one of the following three courses:
 - INDG 3050.03/CANA 3050.03: Indigenous Research Methodology & Knowledge Practices
 - INDG 3052.03/CANA 3052.03/SOSA 3052.03: Indigenous Social, Health, and Environmental Issues
 - IPHE 2201: Introduction to Aboriginal Peoples' Health and Healing

Students will be able to count credit earned in these courses toward their undergraduate major, minor, or distribution requirements, unless otherwise specified in their program's regulations.

Learning Outcomes:

- Students will become familiar with Indigenous perspectives on historical and contemporary political, social, and economic issues.
- Students will learn about the Indian Residential School system and the implications of the Truth and Reconciliation Commission of Canada's Calls to Action.
- Students will become familiar with Indigenous models of research.
- Students will attain basic competencies in protocols of working with Indigenous groups or in Indigenous communities.

Contact [Indigenous Studies](#) for more information.

Certificate in Information Technology

Offered by: Physics

Coordinator: Dr. Philip Bennett philip.bennett@dal.ca

The goal of this certificate is to recognize students who have completed courses with a substantial Information Technology (IT) component, and to provide these students with a document to present to potential employers who seek graduates with IT skills. Depending on the program of study, students may work with symbolic calculation packages such as MATLAB or MAPLE, statistical packages such as R or S-Plus, numerical computation or programming languages. Others develop proficiency in web design, or use of database, drawing (e.g. CAD) or GIS software. Experience with a variety of hardware and operating systems experience may further round out the set of skills.

The Certificate in IT is a discipline-based program available to students majoring in Physics.

Admission to Certificate

To enrol in the *Certificate in Information Technology*, students must declare the certificate through Dal Online (<https://dalonline.dal.ca> > Web for Students > Admissions > Declare Major/Minor/Certificate), and notify the Certificate Coordinator by e-mail.

To graduate with the Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate Requirements (Physics):

- Completion of a 120 credit hour Major or Honours degree program in Physics
- Two of PHYC 2050.03, PHYC 3250.03, PHYC 4250.03
- One additional course which may be a CSCI or INFX course, ENGM 1081.03 or MATH 2300.03

Certificate in Integrated Pest Management

The Certificate in Integrated Pest Management explores the importance of managing many different kinds of pests – insects, weeds, and pathogens - that affect our natural and agricultural ecosystems. It will emphasize learning about the ecosystem characteristics that favour the presence of pests and students will design and develop management plans to prevent and address a variety of pests using physical, mechanical, cultural, biological and chemical approaches.

This program prepares students for careers in environmental management by giving them expertise specific to this field. In completing five courses as part of this certificate program, students will understand the social and environmental impacts of pests in modern society. The Faculty of Agriculture is home to faculty and staff who have expertise in pest management so students can expect to gain learning from first-hand experience and research.

This certificate is open to students eligible for admission to or enrolled in a BSc or BSc (Agr) program at either of Dalhousie's Halifax or Truro campuses.

Certificate Requirements

Total of 15 credit hours required to be completed within 5 years (maximum).

Required Courses

BIOA 3002.03: Weed Science

BIOA 3000.03: Entomology

BIOA 2005.03: Plant Pathology

ENVA 4008.03: Directed Studies in Pest Management

Optional Courses

Any **ONE** from the list below:

APSC 2011.03: Technology for Precision Agriculture

ENVA 2004.03: Introduction to Integrated Pest Management Techniques

To inquire further about the requirements for the Certificate in Integrated Pest Management, please contact Program Coordinator, Scott White (scott.white@dal.ca).

Certificate in Intercultural Communication

The Certificate in Intercultural Communication is open to students from any Faculty at Dalhousie, and welcomes both Canadian and International students. It offers the globally-minded student an opportunity to combine academic and experiential learning in order to understand and communicate more effectively with people from cultures different from their own.

Contact Person: Dr. Rebecca Babcock

Location: McCain 3030

Contact information: (902) 494-1440 CIC@dal.ca

Website: dal.ca/cic

Academic Components

(graduate students may receive advance standing for these components)

1. One full academic credit focusing on the understanding of culture, chosen from the list below.
2. Foreign/second language at or beyond the 2000 level or equivalent N.B. This requirement is satisfied:

1. by taking foreign/second language courses at Dalhousie at the second-year level
2. if the student is a native speaker of a language other than English and studying at Dal
3. by non-credit community-based learning of such languages as Mi'kmaq or American Sign Language

N.B. Approval of the advisor is required for those students wishing to satisfy this requirement by options (II) or (III) above.

Extended Experiential Component

1. Minimum one semester work or study abroad (or at Dalhousie for international students)
OR
2. Minimum (75 hours) volunteering or working in an intercultural context within Canada

N.B. Students may satisfy this requirement by a blending of work/study abroad for less than one full semester and a local volunteer or work placement. Students wishing to satisfy this requirement by a volunteer or work placement, or a blend of study abroad and work/volunteer placement, need the approval of the advisor.

Theoretical and practical understanding of issues in intercultural communication (three credit hours required: ASSC 3150.03).

Courses satisfying the Academic credit (six credit hours required):

- ARBC 2100.03/RELS 2052.03: A Cultural Intro to Arab World
- CANA 1102.03/INTD 1102.03: Halifax and the World I
- CANA 1103.03/INTD 1103.03: Halifax and the World II
- CANA 2050.03/HIST 2205.03: Historical Issues in Indigenous Studies
- CANA 2052.03/SOSA 2052.03 Contemporary Issues in Indigenous Studies

Certificate in International Rural Development

The Certificate in International Rural Development explores the importance of rural issues in a globalized context, especially the role of agriculture and rural communities. It will emphasize learning about small-scale agricultural systems, rural development, economic trends, and leadership processes in farming & rural communities.

This program prepares students for careers in international rural development by giving them expertise specific to this field. In completing five courses as part of this certificate program, students will understand the importance of rural issues in a global context, especially the role of agriculture and rural communities in the global south (broadly, South America, Asia, and Africa). The Faculty of Agriculture is home to faculty and staff who have expertise in rural studies and international agriculture so students can expect to gain learning from first-hand experience and research.

This certificate is open to students eligible for admission to or enrolled in a BSc or BSc (Agr) program at either of Dalhousie's Halifax or Truro campuses.

Certificate Requirements

Total of 15 credit hours required to be completed within 5 years (maximum).

Required Course

IAGR 3002: International Rural Development (H)

Optional Courses

Any **FOUR** from the list below:

SPEC 2001: Topics in International Development (A)
 RURS 3000: Rural Community Economic Development (H)
 PHLA 3000: Environmental and Agricultural Ethics (H)
 IAGR 3000: Tropical Agriculture (A)
 EXTE 3001: Leadership Development in the Social Action Process (H)
 HISA 3000: Rural History (H)
 ANSC 3007: African Wildlife Ecology (A) (*involves a trip component*)
 IAGR 4000: Global Seminar on Rural Sustainability (A)
 AGRI 4000: Contemporary Issues in Agriculture (A)
 AGRI 4001: Agriculture, Food and Well Being (AH)
 ECOA 4004: Trade (AH)

*note that some courses have pre-requisites

To inquire further about the requirements for the Certificate in International Rural Development, please contact Program Coordinator, Greg Cameron (gregory.cameron@dal.ca).

Certificate in Leadership

Please be advised that the Certificate in Leadership will be replacing the Certificate in Leading People and Organizations.

Eligibility: The Certificate is open to any Dalhousie undergraduate student. Non-degree Dalhousie students may qualify for the Certificate if they fulfill all course requirements at Dalhousie.

Overview: The Certificate in Leadership develops students' knowledge of leadership theories, addresses how the student can incorporate these theories into practice, and positions students to take the appropriate and useful organizational action. Skills learned are applicable to public, private, and not-for-profit organizations.

A focus on understanding the human resource management function within the organization will complement students' knowledge of selecting, training, and equipping personnel, while ensuring positive labour relations and maintaining health and safety. Students will have the ability to articulate their own personal strengths and weaknesses to improve interpersonal relationships.

Admission to Certificate

To enrol in the Certificate, students must declare the Certificate through Dal Online (<https://dalonline.dal.ca>>Web for Students>Student Records>Declare Major/Minor/Certificate).

Certificate requirements

Bachelor of Management

12 credit hours

MGMT 2303.03 People, Work, and Organizations: Micro Behaviour*

MGMT 2304.03 People, Work, and Organizations: Macro Behaviour

MGMT 3309.03 Management Skills Development

COMM 3310.03 Reflections in Leadership

*Students will be required to complete both MGMT 1301.03 and MGMT 1302.03 before registering for this course.

Bachelor of Commerce

9 credit hours

COMM 2303.03 Introduction to Organizational Behaviour*

COMM 3309.03 Management Skills Development

COMM 3310.03 Reflections in Leadership

*Students will be required to complete COMM 1010.03 before registering for this course.

All required courses for the Certificate must be completed at Dalhousie. Students must obtain a minimum grade of (B-) for all courses counted toward the Certificate.

To graduate with the Certificate, students must apply to graduate with a Certificate per the timelines determined by the Registrar's Office.

Certificate in Leading People and Organizations

Please be advised that the Certificate in Leading People and Organizations has been replaced by the [Certificate in Leadership](#).

Eligibility: The Certificate is open to any Dalhousie undergraduate student. Non-degree Dalhousie students may qualify for the Certificate if they fulfill all course requirements at Dalhousie.

Overview: The Leading People and Organizations Certificate will help students understand the range of differences in people and their perspectives, and how these differences affect workplace management. Students completing this certificate will be able to recognize different conflict resolution and negotiation strategies. A focus on understanding the human resource management function within the organization will complement students' knowledge of selecting, training, and equipping personnel, while ensuring positive labour relations and maintaining healthy and safety. Students will have the ability to articulate their own personal strengths and

weaknesses to improve interpersonal relationships.

Admission to Certificate

To enrol in the Certificate, students must declare the Certificate through Dal Online (<https://dalonline.ca>>Web for Students>Student Records>Declare Major/Minor/Certificate).

Certificate requirements

9 credit hours:

MGMT 2303 People, Work, and Organizations: Micro Behaviour*
MGMT 2304 People, Work, and Organizations: Macro Behaviour
COMM 3303 Introduction to Human Resource Management

*Students will be required to complete MGMT 1301.03 and MGMT 1302.03 before registering for these courses.

All required courses for the Certificate must be completed at Dalhousie. Students must obtain a minimum grade of (B-) for all courses counted toward the Certificate.

To graduate with the Certificate, students must apply to graduate with a Certificate per the timelines determined by the Registrar's Office.

Certificate in Magnetic Resonance Imaging

The School of Health Sciences offers a second-discipline 27-credit hour certificate in Magnetic Resonance Imaging (MRI). The MRI certificate program is accredited with Accreditation Canada. It is available to:

Current entry level School of Health Science (SHS) students in their fourth year in Diagnostic Medical Ultrasound, Nuclear Medicine Technology and Radiological Technology;

Post diploma SHS students in the medical imaging fields (Diagnostic Medical Ultrasound, Nuclear Medicine Technology, or Radiological Technology) pursuing the MRI certificate as part of their BHSc degree;

School of Health Sciences Alumni from programs of Diagnostic Medical Ultrasound, Nuclear Medicine Technology and Radiological Technology;

Graduates of Canadian accredited degree programs in Radiological Technology and Nuclear Medicine Technology. (*Applications from current Canadian entry level students in the final year of their degree program in Nuclear Medicine Technology or Radiological Technology may be considered on condition of proof of successful completion prior to the beginning of classes in the MRI Certificate program.*);

- Canadian certified/licensed Imaging Technologists in Diagnostic Medical Ultrasound, Nuclear Medicine Technology or Radiological Technology who may choose to complete the certificate in magnetic resonance imaging as a stand-alone certificate.

The 27 credit hour certificate program requires successful completion of:

- HSCE 2050.03: Cross Sectional Anatomy for Multimodality Imaging
- MRIT 4100.03: MRI Physics
- MRIT 4110.03: Advanced MRI Physics
- MRIT 4120.03: MRI Instrumentation, Safety and Contrast Media
- MRIT 4130.03: MRI Techniques and Applications
- DMUT 4000.12, NUMT 4000.12, or RADT 4000.12: Specialty Practice in MRI
- Venipuncture competency (this is a non-credit requirement)

Clinical Requirements

Clinical site criteria must be met as a requirement of admission. Students enrolled in this program must meet School pre-enrollment and clinical requirements. Enrollment is limited by clinical site availability; preference is given to current School of Health Science students and alumni.

Information

Current BSHc students (entry level) who pursue the MRI certificate will complete courses/credit hours in addition to their normal degree requirements. (Entry level students in NUMT and RADT will complete 12 credit hours beyond the degree requirement and DMUT students will complete three credit hours beyond the degree requirement.)

Upon approval from the MRI Advisor/Admissions committee, students must enroll in the Certificate in Magnetic Resonance Imaging. To enroll, students must declare the certificate through Dal Online (<https://dalonline.dal.ca> > Web for Students > Admissions > Declare Major/Minor/Certificate)

School of Health Sciences' Alumni and external applicants who have been accepted into the program, but are not currently enrolled with Dalhousie, are also required to submit an application for admission to the University as a "Special Undergraduate" under the Faculty of Health before declaring the certificate through DalOnline.

To graduate with the Certificate, students must apply to graduate with a Certificate per the timelines determined by the Registrar's Office.

Admissions Requirements

Students enrolled in the BSHc programs in Diagnostic Medical Ultrasound, Nuclear Medicine Technology or Radiological Technology may apply internally to the School through the MRI advisor. Current BSHc students must have:

- Cumulative GPA of 3.3
- B+ or higher in discipline specific-physics (HSCE 2020 or DMUT 2020)
- Approval of a completed safety screening form
- Proof of current CPR-HCP and Standard First-Aid

Certified/licensed Imaging Technologists should also apply directly to the School of Health Sciences MRI advisor. Admission requirements are:

- External applicants and students enrolled in the SHS post-diploma program must contact the MRI advisor prior to submitting an application to determine if a Prior Learning Assessment (PLA) is required.
- Successful completion of program accredited through Accreditation Canada in a medical imaging discipline of diagnostic medical ultrasound, nuclear medicine technology, or radiological technology. (*Applications from current Canadian entry level students in the final year of their degree program in Nuclear Medicine Technology or Radiological Technology may be considered, on condition of proof of successful completion prior to the beginning of classes in the MRI Certificate program.*)
- Currently licensed to practice by the Canadian Association of Medical Radiation Technologists (CAMRT) in the fields of nuclear medicine technology or radiological technology,

---or---

Licensed/registered in good standing with provincial college/regulatory body within Canada in the medical imaging field of diagnostic medical ultrasound

Documentation required:

- Official transcript of diploma or degree program and/or licensure;
 - Current registration number with CAMRT or applicable provincial college (or copy of license/certification);
 - Letter of Intent;
 - Resume
- (contact references may be requested after review of application)

Guidelines for Letter of Intent: This letter provides the opportunity for applicants to expand upon their experience, any advanced or specialty education they may have and their interest in undertaking university studies or pursuing a certificate in MRI. Information to include:

- Work experience and/or education;

- Educational initiatives undertaken since diploma/degree completion (if applicable);
- How applicant thinks this program will contribute to the professional development;
- Personal and professional motivation;
- Readiness for university education in MRI studies;

Application deadline date for the MRI Certificate program is March 1st for the program start in late June.

Please contact the School of Health Sciences' MRI advisor for more information regarding the MRI certificate program.

Certificate in Management Accounting

The Management Accounting Certificate is designed to support students who wish to develop a deeper understanding of key topics in cost/managerial accounting and their management control implications.

Note – this certificate is not available to those majoring in Accounting

Required courses:

COMM 1101.03 or MGMT 1101.03 (Introductory Accounting I (Financial))
 COMM 1102.03 or MGMT 1102.03 (Introductory Accounting II (Management))
 COMM 3116.03 Cost Management

***Students must obtain a minimum grade of B- for all courses counted toward the certificate. All required courses must be completed at Dalhousie.**

Students must apply to graduate with a Certificate per the timelines determined by the Registrar's Office.

For more information, email uao@dal.ca

Certificate in Managing Data and Information

Eligibility: The Certificate is open to any Dalhousie undergraduate student. Non-degree Dalhousie students may qualify for the Certificate if they fulfill all course requirements at Dalhousie.

Overview: The Managing Data and Information Certificate will provide students with a broader understanding of how data can be used to address diverse, real-world problems in multiple sectors and disciplines. It will prepare students to use data to inform evidence-based decision making, and provide a broader understanding of current trends of information production. Students will understand the importance of information management in supporting decision-making, and be prepared to effectively leverage information systems to meet business needs.

Admission to Certificate

To enrol in the Certificate, student must declare the Certificate through Dal Online (<https://dalonline.dal.ca>>Web for Students>Student Records>Declare Major/Minor/Certificate).

Certificate requirements

9 credit hours:

MGMT 2605 Data Literacy*
 MGMT 3601 Information in a Networked World
 MGMT 3511 Management Information Systems*

*Students will be required to complete MGMT 1301.03 and MGMT 1302.03 before registering for these courses.

All required courses for the Certificate must be completed at Dalhousie. Students must obtain a minimum grade of (B-) for all courses counted toward the Certificate.

To graduate with the Certificate, students must apply to graduate with a Certificate per the timelines determined by the Registrar's Office.

Certificate in Marketing Management

Eligibility: The Certificate is open to any Dalhousie undergraduate student. Non-degree Dalhousie students may qualify for the Certificate if they fulfill all course requirements at Dalhousie.

Overview: The Certificate in Marketing Management will help students understand the marketing environment and consumers' needs and expectations. Students completing this certificate will have a clear understanding of how to approach marketing: understanding the market, setting goals, and establishing, managing, and executing a marketing plan. Students will have the ability to articulate challenges marketers have in the non-profit sector, and contrast these with marketing in the for-profit sector.

Admission to Certificate

To enrol in the Certificate, students must declare the Certificate through Dal Online (<https://dalonline.dal.ca>>Web for Students>Student Records>Declare Major/Minor/Certificate).

Certificate requirements

9 credit hours

MGMT 2401 Introduction to Marketing*
MGMT 2402 Marketing for the Not-for-profit Sector
COMM 3402 Marketing Communications

*Students will be required to complete MGMT 1301.03 and MGMT 1302.03 before registering for these courses.

All required courses for the Certificate must be completed at Dalhousie. Students must obtain a minimum grade of (B-) for all courses counted toward the Certificate.

To graduate with a Certificate, students must apply to graduate with a Certificate per the timelines determined by the Registrar's Office.

Certificate in Materials Science

Offered by: Faculty of Science

Coordinator: Dr. Mita Dasog (Chemistry) mita.dasog@dal.ca

The Certificate in Materials Science provides recognition for students who have had significant training in the breadth and depth of materials science within their 120 credit hour Honours or Major program. It is particularly suited for students in Chemistry, Earth Sciences and Physics programs.

Admission to Certificate

To enrol in the Certificate in Materials Science, students must declare the certificate through Dal Online (<https://dalonline.dal.ca> > Web for Students > Admissions > Declare Major/Minor/Certificate), and notify the Certificate Coordinator by e-mail. Students may enrol in the second, third or fourth year of their programs, but early enrolment is advised.

To graduate with the Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate Requirements

1. At least four of the following courses, with a minimum grade of B- in each:

CHEM 3305.03/PHYC 3303 (or CHEM 3303.03): Materials Science

CHEM 4302.03: Intro to Surface Science

CHEM 4502.03: Polymer Science

CHEM 4311.03: Fundamental and Applied Electrochemistry

CHEM 4105.03: Inorganic Materials Synthesis

ERTH 2001.03: Earth Materials Science I

ERTH 2002.03: Earth Materials Science II

PHYC 3900.03: Introduction to Soft Condensed Matter Physics

PHYC 4230.03: Introduction to Condensed Matter

BIOE 4391.03: Polymeric Biomaterials

BMNG 5110.03: Biocompatibility and Biomaterials Design

2. Students must complete a research project with a materials emphasis (pre-approved by the Certificate Coordinator) via one of the following sets of courses, with a minimum grade of B-:

- CHEM 4801.03 and CHEM 4802.03
- CHEM 4902.03 and CHEM 4903.03 (or CHEM 4901.06)
- EARTH 4201.03 and EARTH 4202.03 (or EARTH 4200.06)
- EARTH 4101.03 and EARTH 4102.03 (or EARTH 4100.06)
- PHYC 4800.03 and PHYC 4850.03

Certificate in Medical Humanities

This Certificate is open to currently registered Dalhousie and King's students in all Faculties, as well as to Special Undergraduate students who meet the entrance requirements for the Bachelor of Arts degree.

Contact / Coordinator: Sharon Brown (sharon.brown@ukings.ca)

The field of studies described in scholarly literature by the names “Medical Humanities” or “Health Humanities” is a wide-ranging, interdisciplinary field that explores the complex relationships between medicine, health, society, and culture across a range of times and places. The Dalhousie / King's Certificate in Medical Humanities is designed for anyone who wishes to learn more about the ways in which global human societies have constructed and engaged with health, wellness, medicine, illness, healing, and the body in the past; it also invites students to explore the means by which human societies might deepen their comprehension of these crucial concepts in the future.

This certificate will be of interest to students who are considering entering Medicine or the Health Professions and who wish to expand their knowledge of medicine's interactions with human societies and forms of cultural expression. It will help these students to think critically about medicine's past and future roles in human life, about changing definitions of health and illness, and about the interactions that affect the patient experience. It will also be of interest to students in the Arts, Social Sciences, and Sciences who wish to engage more thoughtfully and critically with the constructions of health and illness that shape our everyday lives, as well as with the health-related challenges that face contemporary civil society. Finally, the program will be of interest to members of the general public who wish to deepen their understanding of the past, present, and future of medicine, health, and healing in human cultures.

Learning Outcomes:

Upon completion of the Certificate, students will be able to:

- Recognize and apply multiple definitions of key medical and health-related concepts, understanding their relationship to wider social, cultural, and historical contexts,
- Situate the theory and practice of modern medicine within diverse historical contexts,
- Understand conceptions of health that have shaped non-Western as well as Western societies, having completed at least one course that includes a substantial focus on non-Eurocentric material,
- Formulate conceptions of contemporary medical and health-related practices grounded in a critical understanding of key social and/or political factors that have shaped the construction and experience of medicine and health in past and present cultures,

- Approach the experiences and roles of patients, caregivers, and health professionals in a more informed and respectful manner thanks to a deepened knowledge of the ways these roles have been considered and represented in philosophical, literary, and/or artistic works across time,
- Ask vital questions about the ethical and social implications of health policy, practice, and decision-making, and
- Express their critical thinking about these concepts orally, in writing, and through visual forms of communication in order to engage effectively not only with academic audiences but also with the wider public (eg, patients, political and governmental bodies, online audiences, etc) about questions of medicine, illness, health, and wellness.

Students can count credit earned in these courses toward their undergraduate major, minor, or distribution requirements, unless otherwise specified in their program's regulations.

Requirements:

This Certificate is a 12-credit-hour certificate. Its requirements are as follows:

Core Area 1: History of Medicine

All students **must** take the following course:

- HSTC 2102.03: History of Modern Medicine

Core Area 2: Medicine and Social Sciences

Students are required to choose **one** 3-credit-hour course from the following options:

- INTD 3115.03: Global Health: Challenges of Global Health Equity in the 21st Century
- SOSA 2502.03: Biomedicine and the Illness Experience
- SOSA 2503.03: Health and Society
- SOSA 2933.03: Health and Culture
- SOSA 3143.03: Health, Illness, and the World System
- SOSA 3145.03: Gender and Health
- POLI 4260.03: The Politics of Health Care
- POLI 4466.03: The Social and Political Construction of Health and Medicine

Core Area 3: Medicine and the Humanities

Students are required to choose **one** 3-credit-hour course from the following options:

- ENGL 2030.93: Literature, Health and Healing
- ENGL 3320.03: Literature and Medicine
- HSTC 2202.03: The Beginnings of Western Medicine: The Birth of the Body
- PHIL 2805.03: Ethics and Health Care: Patient Care
- PHIL 2810.03: Ethics and Health Care: Social Policy

Elective Courses

Students are required to choose **one** 3-credit-hour elective course from the following options:

- CANA 4300.03: Canadian Healthcare Delivery System
- CTMP 2301.03: Pain
- CTMP 2203.03/HSTC2206.03: Biopolitics: Human Nature in Contemporary Thought
- CTMP 2330.03: Reflections on Death
- CTMP 3130.03: The Thought of Michel Foucault
- CTMP 4301.03: Freud, Lacan, and the Critique of Psychoanalysis
- ECON 2231: Perspectives in Health Economics
- ECON 3231: Topics in Health Economics
- EMSP / GWST / HSTC 2310.03: Women and Gender in Early Modern Science
- EMSP / HSTC 2350.03: The Body in Early Modern Europe

- EMSP / HSTC 3310.03: Hidden Worlds: Microscopy in Early Modern Europe
- FREN 3400.03: Love and Death
- GWST 2412.03: Human Sexuality
- HSTC 3101.03/CTMP 3204.03: Human Experiments
- HSTC 3121/ EMSP 3321/ RELS 3121/ HIST 3990:
In Search of the Philosopher's Stone: The History of European Alchemy
- HSTC 4301.03: History of Neuroscience
- INDG 3052.03: Indigenous Social, Health, and Environmental Issues
- PHIL 3800.03: Philosophy of Medicine
- PHIL 4801.03: Topics in Ethics and Health Care
- PSYO 3581: History of Psychology I
- PSYO 3582: History of Psychology II
- SOSA 3135.03: The Social Organization of Health Care
- SOSA 3147.03: Aging Cross-Culturally
- SOSA 3148.03: The Sociology of Addiction: Drugs, Health and Society
- SOSA 3150.03: Sociology and Anthropology of the Body
- SOSA 3245.03: Women and Aging
- SOSA 4006.03: Issues in Critical Health Studies

Certificate in Medicinal Chemistry

Offered by: Faculty of Science

Coordinator: Dr. Alison Thompson alison.thompson@dal.ca (Chemistry)

The Department of Chemistry offers a Certificate in Medicinal Chemistry in conjunction with its Major and Honours programs. This certificate is intended to reflect that the student has completed a course of study in chemistry that is appropriate for employment or further study related to pharmaceutical development and production.

Admission to Certificate

To enrol in the *Certificate in Medicinal Chemistry*, students must declare the certificate through Dal Online (<https://dalonline.dal.ca> > Web for Students > Admissions > Declare Major/Minor/Certificate), and notify the Certificate Coordinator by e-mail.

To graduate with the Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate Requirements:

- Completion of a 120 credit hour program in Chemistry (Honours, Combined Honours, Major, Double Major)
- CHEM 2101.03, CHEM 2201.03, CHEM 2301.03, CHEM 2304.03, CHEM 2401.03, CHEM 2402.03
- CHEM 3203.03, CHEM 3401.03, CHEM 3404.03, CHEM 3601.03
- CHEM 4401.03, CHEM 4601.03
- Any two of: CHEM 3301.03, CHEM 4205.03, CHEM 4206.03, CHEM 4301.03, CHEM 4402.03

Recommended Electives: BIOC 2300.03, BIOC 2610.03, BIOC 3700.03, BIOC 4701.03

Certificate in Mental Health

a. NURS 4371 (Winter 2021) Addictions Nursing Practice: This nursing elective introduces major concepts associated with addiction nursing practice. It provides a foundation for students pursuing careers in addiction-related care. Within a primary healthcare perspective, students critique models and theories of addiction, consider the interplay between social, gender, cultural environments and addictions and become knowledgeable of a variety of treatment approaches. Universal, selective, and prevention activities at an individual, family and community level are explored

b. NURS 4372 (Fall 2020) Mental Health Nursing: Students will gain insight into individuals' experiences of mental health problems, mental disorders/psychiatric illnesses, and addictions over the life course. Multiple perspectives, including biological, nursing, sociological, philosophical and political, will guide the analysis. Treatment modalities will be critiqued. The association between nurses' relational practices and individuals' quests for life fulfillment will be examined.

Certificate in Neurotechnology Innovation

Offered by: Faculty of Science

Coordinator: Dr. Aaron Newman, Department of Psychology and Neuroscience (aaron.newman@dal.ca)

Overview Neurotechnology is an area of research and application involving technologies that measure and/or modulate brain function. Technologies include hardware, software, and drugs, and have applications in several areas including clinical diagnosis and treatment, health promotion and maintenance (including cognitive health), entertainment, and forensics. The undergraduate certificate in Neurotechnology Innovation is designed to provide foundational knowledge in this multi-disciplinary area. The certificate will also provide an understanding of how neurotechnologies can be translated into applications that are available to patients and consumers - through training in innovation, design, and commercialization. The Neurotechnology Innovation certificate provides students with knowledge in:

- Basic neuroscience
- Neurotechnology
- Clinical and cognitive neuroscience
- Computer science
- Entrepreneurship
- Innovation and product design
- Intellectual property

Eligibility The Certificate is oriented toward undergraduate students majoring in Neuroscience, but is open to students in other programs. Students from outside the Faculty of Science (Arts & Social Sciences, Computer Science, Engineering, Management) are welcome, but should consult with an advisor from their home program prior to enrolling.

Admission To enrol in the *Certificate in Neurotechnology Innovation*, students must declare the certificate through Dal Online (<https://dalonline.dal.ca> > Web for Students > Admissions > Declare Major/Minor/Certificate).

To graduate with the Certificate, students must apply to Graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate Requirements

The certificate requires completion of 18 credit hours of coursework, in addition to the prerequisites that any of the required courses have. The certificate will be awarded based on successful completion of all of the student's degree requirements, as well as the following courses required for the certificate. Students should consult the University Calendar and departmental requirements for their major regarding the limitations that may be imposed upon the number of credit hours taken outside of the Faculty in which they are majoring, as well as prerequisites for the courses required for the certificate

1. Successful completion of courses from each of the three following sections, as detailed below (or courses deemed equivalent by the Certificate Coordinator):

(a) NESC 2470 Systems Neuroscience or

PSYO 2770 Brain and Behaviour

(b) At least one of

NESC/PSYO 3505 Neural Data Science

CSCI 1105 Introduction to Programming

CSCI 1110 Introduction to Computer Science

CSCI 2202 Introduction to Programming with Applications for Scientists

CSCI 2203 Data Science for Everyone

PHYC 2050 Computer Simulation in Science

(c) SCIE 4701 and SCIE 4702 Science and Technology Innovation, Commercialization and Entrepreneurship

2. Completion of at least three credit hours (one course) from each of the two topic areas listed below. Courses used to satisfy the requirements below cannot also be used to satisfy Requirement 1 above. Note that many of these courses have additional prerequisites; students are responsible for identifying and fulfilling any such prerequisites and/or obtaining special permission from the instructor.

(a) Neuroscience/Neurotechnology

PHYC 2250 Physics of Biological and Medical Technology

NESC/PSYO 3137 Research Methods in Cognitive Neuroscience

NESC/PSYO 3227 Principles of Human Neuropsychology

NESC/PSYO 3237 Drugs and Behaviour

NESC 4070 Chemical Neurobiology

NESC 4177 Theoretical Neuroscience

NESC 4185 Synaptic Function and Plasticity

PHAC 3001 Pharmacology I

PHAC 4403 Systems Pharmacology I

(b) Computer and Data Science

Note that not all courses are available to non-Computer Science majors every year. Please consult with the Faculty of Computer Science regarding enrolment in these courses

NESC/PSYO 3505 Neural Data Science

CSCI 1107 Social Computing

CSCI 1108 Experimental Robotics

CSCI 1110 Introduction to Computer Science

CSCI 1120 Introduction to Computer Systems

CSCI 2110 Data Structures and Algorithms

CSCI 2134 Software Development

CSCI 2141 Intro to Database Systems

CSCI 2202 Introduction to Programming with Applications for Scientists

CSCI 2203 Data Science for Everyone

CSCI 3141 Foundations of Data Science Using R

PHYC 2050 Computer Simulation in Science

STAT 2450 Introduction to Data Mining Using R

Notes on the Computer Science course options:

- CSCI 1105 and 1110 are mutually-exclusive options for an introductory computer science course. You should take CSCI 1105 if you have no prior computer programming/coding experience, or CSCI 1110 if you have previous programming experience (e.g., a past high school or university class in programming, or independent programming experience). Students with some programming experience who are unsure which course to register for, should consult with an advisor in the Computer Science program.

- CSCI 2202 *Computer Modelling for Scientists* and CSCI 2203 *Data Science for Everyone* have no prerequisites, and do not assume prior programming experience. If you choose to take CSCI 2202 first, you should not take CSCI 1105 after, as the content will be redundant. However, taking both CSCI 2202 and CSCI 1110 in either order is acceptable.
- Likewise, if you take NESC/PSYO 3505 first, you should not take CSCI 1105 after, as the content will be redundant.

Certificate in Organic Agriculture

The Certificate of Specialization in Organic Agriculture initiative provides students with an opportunity to specialize in the expanding area of organic agriculture. The Certificate of Specialization in Organic Agriculture enables students to approach agriculture from their area of interest, to know they can be recognized for this accomplishment, and to continue to take other courses in agriculture toward a degree. Any student who has successfully completed four of the eligible organic agriculture credit courses and has an overall GPA of at least 2.0 in these courses can apply to receive a Certificate of Specialization in Organic Agriculture. Two of the courses may be substituted with approved organic agriculture courses offered by external institutions (see below). A Letter of Permission is required for these alternative courses.

Eligible Courses

AGRI 2000: Introduction to Organic Agriculture
 AGRN 2000: Organic Field Crop Management
 ANSC 2004: Organic Livestock Production
 APSC 2003: Composting and Compost Use
 HORT 2001: Principles of Organic Horticulture

Note: Students will not be required to take the courses in any particular order. AGRI 2000, ENVA 2002, and HORT 2001 are currently offered in the Fall semester. AGRN 2000 and ANSC 2004 are currently offered in the Winter semester.

All courses in the Certificate of Specialization in Organic Agriculture program are offered only through web-based distance education. Other institutions offering web-based courses that are approved for the certificate program:

- McGill University (Organic Soil Fertilization)
- Université Laval [French translation of courses AGRI 2000, AGRN 2004, ANSC 2004, and ENVA 2002]*
- University of British Columbia (Key Indicators of Agroecosystem Sustainability)
- University of Guelph (Organic Marketing)
- University of Manitoba (Organic Crop Production on the Prairies)
- University of Saskatchewan (Weed Control in Organic Agriculture)

* A student cannot receive credit for the same course in both French and English.

All requirements for this certificate must be completed within 3 years.

Certificate in Perinatal and Paediatric Nursing

All undergraduate nursing students must complete 6 credit hours of nursing electives (taken in Semester 6 & 7).

Certificates are an option for undergraduate nursing students wanting to explore specialty areas of nursing and be recognised for their efforts upon graduation. Students do not require a nursing certificate to graduate. NURS 4715.06 is a co-requisite with these electives to obtain a certificate.

Required courses:

NURS 4410.03 – Perinatal Nursing Across the Childbearing Continuum

Students build upon core curriculum knowledge of the perinatal experience. The nature of the childbearing experience is critically analyzed from multiple perspectives, while evidence-informed nursing care for childbearing families with health complexities is appraised. Theory underlining processes of maternal transformation, person-centered care, relational practice and parent-infant attachment overlay these analyses.

NURS 4420.03 – Paediatric Nursing

Recognizing the unique health needs of children, this course focuses on the synthesis of knowledge and the partnership between the nurse, child, family and interprofessional team. Students will integrate developmentally supportive, family-centred care and

application of nursing management with the paediatric population experiencing serious episodic and persistent illness and hospitalization.

NURS 4715.06 – Exploratory Nursing Practice

Students engage in a broad range of clinical, research or theoretical activities, under the direction of faculty or clinical preceptor/facilitator to complete a project relevant to nursing practice. These learning experiences will assist the student to understand the complexity of the integrated nursing role across a range of settings.

Certificate in Public Health

a. NURS 4381.03 (Fall 2020): Public Health Nursing: This course provides an opportunity for students to advance their introductory knowledge of public health nursing principles, roles, and functions. Public health nursing integrates knowledge from public health and nursing science to promote, protect, improve and restore the health of populations. The focus will be on advancing their understanding and application of population health, priority setting and planning approaches, partnerships, public policy literacy and health equity.

b. NURS 4380.03 (Winter 2021): Introduction to Epidemiology Methods in Nursing Practice: This introductory course is intended to provide students at both the undergraduate and graduate level with a working knowledge and understanding of the basic concepts and methods of epidemiology. The main focus of this course will be to learn to analyse and interpret information about disease (i.e. both acute and chronic) and other health related occurrences at a population level (e.g. risk factors, diversity, determinants of health) within a Public and Community Health Nursing context. This course will also provide an introduction to the concepts for developing, implementing and evaluating public health programs and, for independent inquiry and decision making around public health policy. There are no prerequisites for this course though students are required to have completed their second year of their undergraduate program or have permission from the course instructor. A clinical background and a basic understanding of statistics for the Graduate students are essential but not necessary for Undergraduate students.

Certificate in Public Sector Management

Eligibility: The Certificate is open to any Dalhousie undergraduate student. Non-degree Dalhousie students may qualify for the Certificate if they fulfill all course requirements at Dalhousie.

Overview: The certificate in Public Sector Management will introduce students to the organizing principles and structures of the three levels of government: federal, provincial, and municipal. Students completing this certificate will have a deeper understanding of the public policy process. Students will understand the relationship between government and businesses in Canada.

Admission to Certificate

To enrol in the Certificate, students must declare the Certificate through Dal Online (<https://dalonline.dal.ca>>Web for Students>Admissions>Declare Major/Minor/Certificate).

Certificate requirements

9 credit hours:

MGMT 2801 Government Structure*

MGMT 3802 Public Policy

MGMT 3810 Government Policy Towards Business

*Students will be required to complete MGMT 1301.03 and MGMT 1302.03 before registering for these courses.

All required courses for the Certificate must be completed at Dalhousie. Students must obtain a minimum grade of (B-) for all courses counted toward the Certificate.

To graduate with the Certificate, students must apply to graduate with a Certificate per the timelines determined by the Registrar's Office.

Certificate in Quantitative Finance

The certificate in Quantitative Finance will help students leverage quantitative skills within the financial markets. Students will appreciate the tradeoffs between risk and return in relation to pricing models.

Note – this certificate is not available to those majoring in Finance

Required Courses (9 credit hours):

MGMT 3201 Financial Management

COMM 3206 Portfolio and Money Management*

COMM 4202 Derivatives

*Students will be required to complete MGMT 3201 with a minimum grade of B- before registering for COMM 3206.

Students must obtain a minimum grade of B- for all courses counted toward the certificate. All required courses must be completed at Dalhousie.

To graduate with the Certificate, students must apply to graduate per the timelines determined by the Registrar's Office.

Contact uao@dal.ca for more information

Certificate in Science Communication

Offered by: Faculty of Science

Coordinator: Dr. Leanne Stevens, Leanne.stevens@dal.ca

Description: The focus of the Certificate in Science Communication is to develop the communication skills of science students, through courses focused on understanding the history of science in the media, ethics in science, and communicating science to non-scientists. This certificate is open to any student pursuing a Bachelor of Science degree (BSc or BSc(MedSci)) in the Faculty of Science.

Eligibility: Students currently registered in a Bachelor of Science degree offered by the Faculty of Science (BSc, BSc(Medical Sciences)).

Admission to Certificate: To enrol in the *Certificate in Science Communication*, students must declare the certificate through Dal Online (<https://dalonline.dal.ca> > Web for Students > Admissions > Declare Major/Minor/Certificate) and notify the Certificate Coordinator.

To qualify for the Certificate, students must complete all course requirements, and the Portfolio of Science Communication.

To graduate with the Certificate, students must apply to Graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate Requirements

The certificate requires completion of 15 credit hours of coursework, in addition to the prerequisites that any of the required courses have. The certificate will be awarded based on successful completion of all the student's degree requirements, as well as the following courses (and portfolio) required for the certificate (all with minimum grades of B).

1) **Core requirements:** Students must complete all three core requirements (9 credit hours total), with a grade of B or better in each.

- HSTC 2400.03 /JOUR 2400.03 Science and the Media
- PHIL 2680.03/PHIL 1050.03 Ethics in Science (*preferred*) *Accepted alternates:* PHIL 2480.03 Environmental Ethics, PHIL 2810.03 Ethics in Health Care: Social Policy
- SCIE 3211.03 Communicating Science to Non-Scientists

2) **Topics in Communication:** Students must complete at least **6-credit hours** of communications-focused courses, with a grade of B or better in each, from the list below:

- ASSC 3150.03 Intercultural Communication I
- BIOL 4880.03 / MARI 4880.03 Communicating Science for Societal Impact
- CMMT 3000.03 Human Communication
- HSTC 2500.03 Science Fiction in Film
- INTD 3021.03 Communicating Development and Environment
- JOUR 1002.03 Foundations in Journalism I
- MGMT 3602.03 Professional Communication Skills
- MGMT 4041.03 Environmental Education

- NESC 3011.03/NESC 3012.03 / PSYO 3011.03/PSYO 3012.03 Experiential Learning in Science Communication
- SCIE 3333.03 Science Education

3) **Portfolio in Science Communication** (SCIE 4211.03): Students are required to register for this zero-credit hour course in the semester that they are submitting their completed portfolio for evaluation (typically, the final semester of their degree).

The portfolio is a record that can be shared with future employers and built upon into the future. It will include and document, at a minimum:

- Two exemplary pieces of science communication. These pieces can be in any format and from courses or extracurricular activities, but *cannot* be from any of the three required courses (HSTC 2400, PHIL 2680, or SCIE 3211): written, blog post, infographic, podcast, video, etc. Students must provide a reflection/explanation of the pieces and describe how they effectively communicate science.
- Evidence of at least one public engagement in science communication, paired with a short essay outlining skills used in the engagement, challenges faced, and solutions achieved, and constructive self-criticism of the student's performance. Examples include Soapbox Science, Let's Talk Science, Science Slam Canada, etc.
- Reflection and critique of the courses completed as part of the certificate – outlining how each course contributed to their learning, skills learned, and areas for further growth and development related to science communication.

OPTIONAL: Students who have completed the coursework for the Certificate in Science Communication (items 1 & 2 in Certificate Requirements), have the option to convert to the ***Certificate in Science Communication & Leadership***. Students wishing to switch to the Science Communication & Leadership certificate must consult with the coordinators for BOTH certificates. At least six additional credit hours must be completed, including the SCIE 4444.03 Science Leadership capstone course. Consult the Academic Calendar for more information and full details on the Science Communication & Leadership certificate.

NOTE: Students can only receive ONE of the Science Communication or Science Communication & Leadership certificates. The two certificates are considered exclusionary.

Certificate in Science Communication and Leadership

Offered by: Faculty of Science

Coordinator: asscdean.science@dal.ca

The focus of the Certificate in Science Communication and Leadership is to develop basic leadership and communication skills specifically in and through the sciences, to enable Dalhousie Science graduates to better understand the nature and context of science, to consider the process of change, and to have the skills to communicate and lead effectively. The Certificate is available to any undergraduate student in the Faculty of Science. **The Certificate in Science Communication and Leadership builds on the content of the Science Communication Certificate:** students can only receive credit for either the Science Communication Certificate or the Science Communication and Leadership Certificate, but not both.

The Certificate in Science Communication and Leadership replaces the Science Leadership and Communication Certificate. Students who enrolled in the Science Leadership and Communication Certificate prior to Fall 2022 should consult the Calendar for 2021-22 for details on completion of this Certificate.

Admission to the Certificate

Students may enroll in the Certificate in Science Communication and Leadership at any point during their undergraduate program. Students must contact the Certificate Coordinator when seeking permission to enroll in the Portfolio of Learning non-credit course required for completion of this Certificate (SCIE 4445). To enroll in the Certificate, students must declare the Certificate through Dal Online and notify the Certificate Coordinator by email that they have done so.

To graduate with the Certificate, students must apply to graduate with the Certificate at the time they apply to graduate from their degree program.

Certificate Requirements:

1. Leadership: Core required course

SCIE 4444.03: Leadership in Science

2. Communicating Science: Core required course

SCIE 3211.03: Communicating Science

3. Science communication elective: One and no more than 2 of the following Topics in Communication: with a grade of B or better

- ASSC 3150.03 Intercultural Communication I
- BIOL 4880.03/MARI 4880.03 Communicating Science for Societal Impact
- CMMT 3000.03 Human Communication
- HSTC 2500.03 Science Fiction in Film
- INTD 3021.03 Communicating Development and Environment
- JOUR 1002.03 Foundations in Journalism I
- MGMT 3602.03 Professional Communication Skills
- MGMT 4041.03 Environmental Education
- NESC 3011.03/NESC 3012.03 / PSYO 3011.03/PSYO 3012.03 Experiential Learning in Science Communication
- SCIE 3333.03 Science Education

4. Understanding the nature and context of science

HSTC 2400.03: Science and the Media

5. Ethics in Science: One of the following required courses

- PHIL 2680.03: Ethics in Science
- PHIL 1050.03: Ethics in Science
- (NOTE: CREDIT WILL NOT BE GIVEN FOR BOTH PHIL 2680 and PHIL 1050)
- PHIL 2480.03: Environmental Ethics
- PHIL 2810.03: Ethics in Health Care: Social Policy

6. Discipline-specific course: Note that one of these courses may replace the second Topics in Science Communication requirement (#3 above)

- BIOL 2040.03: Evolution
- ECON 2850.03/PHYC 2850.03: Science and Economics of Climate Change
- ENV5 3501.03: Environmental Problem-solving I
- EARTH 3001.03: Field school
- BIOL 4664.03/MARI 4664.03: History of Marine Science*
- NESC 2007.03: Neuroscience Principles and Methods
- PSYO 2000.03: Methods in Experimental Psychology
- PSYO 3581.03: History of Psychology I
- PSYO 3582.03: History of Psychology II
- BIOC 4501.03: Medical Biotechnology I
- MICI 2400.03: Laboratory Methods in Microbiology and Immunology
- OCEA 2020.03: Tools and Concepts in Ocean Sciences I

Other courses may be considered. Please consult a coordinator.

* Cross-listed as OCEA 4331.03, HIST 3073.03, HSTC 3331.03, SCIE 4000.03

7. Portfolio of leadership development (SCIE 4445.00). Only register for this zero-credit hour course in the semester that you are submitting your completed portfolio for evaluation, once all other components are completed (or in the final stages of completion).

The portfolio is a record that can be shared with future employers, and built upon in the future. It will document, at a minimum:

- The activities undertaken in each of the above 6 components of the Certificate
- Evidence of your development as a leader and communicator in science throughout the Certificate
- Reflections on how each component fits into leadership and communication development in your discipline / science more broadly

Certificate in Sustainable Development

This certificate program is designed for senior undergraduate university students or graduate students who are interested in the research and practices in sustainable development. Building on the context of industrialization and globalization, as well as its related environmental and social problems, this program particularly focuses on viable business strategies, community development, and economic development policies at national and regional levels. The program will be offered through flexible in-class/online settings to study the principles and practice of sustainable development. To supplement the required courses, another program feature is a 10-day study tour in Beijing (optional course) with a focus on issues that are particularly relevant to developing and emerging economies.

This certificate is open to 3rd or 4th year undergraduate students who are registered in the Dalhousie University Faculty of Agriculture with good academic standing, and, interested individuals who meet the Faculty of Agriculture admission requirements and the prerequisites for the required courses.

Required Courses:

- ECOA 3008: Environmental Economics
- MGTA 4006: Issues in Agribusiness Sustainability
- IAGR 3002: International Rural Development

Optional Courses:

Students must successfully complete at least one of the following:

- SPEC 4015: Topics in Sustainable Development - An International Perspective
- AGRI 4001: Agriculture, Food and Well-being
- PHLA 3000: Environmental and Agricultural Ethics

Certificate in Sustainable Soil Management

Offered by: Department of Plant, Food, and Environmental Sciences, Faculty of Agriculture

This certificate is open to all students eligible for admission to the BSc. (Agr) program.

Knowledge of soil management is important in supporting learning outcomes in various Dalhousie programs, from understanding the fundamental properties and characteristics of soil systems to understanding how soil management impacts food and energy production, water quality, waste management, climate change and biodiversity. The certificate will support these learning outcomes, enhance students' ability to formulate well-rounded solutions, and provide students with documentation of these acquired skills. SDGs

To graduate with a Certificate, students must apply to graduate with the Certificate at the time they apply to graduate from their degree program.

Certificate Requirements:

A total of 12 credit hours in Soil Science related courses are required.

Required Courses

SOIL 2000.03: Introduction to Soil Science (A)
SOIL 3000.03: Soil Fertility and Nutrient Management (A)

Optional Courses

6 Credit hours from the list below:

AGRN 2000.03: Organic Field Crop Management (A)
HORT 3000.03: Environmental Processes and Landscape Functions
ENVA 3000.03: Environmental Impact Assessment
ENVA 3003.03: Environmental Studies Field Course
ENVA 3005.03: Geographic Information Systems (A)
ENVA 3021.03: Ecohydrology (A)
SOIL 4001.03: Directed Studies in Soil Science (A)
MCRA 4002.03: Microbiomes in Agriculture

AGRI 5250.03: Soil Microbiology
AGRI 5450.03: Environmental Soil Chemistry

To inquire further about the requirements for the Certificate in Sustainable Soil Management, please contact Program Coordinator, David Burton (dburton@dal.ca).

Certificate in Technology Education

The Certificate in Technology Education Program is intended to upgrade and diversify the technology background of Technology Education teachers presently working in Nova Scotia schools. It is approved in Nova Scotia by the Minister of Education for teaching license upgrading. This program is an innovative collaboration between the Faculty of Agriculture and Nova Scotia's Technology Education Teachers Association, the Nova Scotia Department of Education, and Acadia University. The program provides a variety of hands-on experiences and teaching methodologies that strengthen traditional skills and introduce new technologies to better meet the demand for qualified technology educators for the public school system.

Instruction is conducted outside regular school hours, in evening or summer sessions.

Students must complete 30 credit hours of approved courses with a cumulative GPA of 2.0. Twenty four credit hours must be from the Faculty of Agriculture course list; the remaining six credit hours are teaching methodology courses offered by Acadia University. The program must be completed in a maximum of six years. Courses can be taken in any sequence. The offering of this program is subject to sufficient enrolment.

Required Courses (eight required)

ENGN 1001.03: Engineering Design I
APSC 1003.03: Practices and Mechanics of Materials
APSC 1004.03: Wood Construction Technology
APSC 1005.03: Metal Construction Technology
APSC 2000.03: Environmental Impacts and Resource Management
APSC 2007.03: Fluid Power Technology
APSC 2008.03: Digital Electronics and Computer Interfacing
APSC 3001.03: Electrotechnology
APSC 3018.03: Technology Modules
APSC 3019.03: Communications Technology

Acadia Courses

EDUC 5053: Problems in Education: Technological Education and Sustainability
EDUC 5873: Technology & Curriculum: Technology Studies

Note: It is the responsibility of individual teachers to ensure that they comply with the requirements of the NS Department of Education for continuing education and upgrades. For more information, see certification.ednet.ns.ca/approval-upgrading-programs.

Certificate in Theatre Creation

This certificate is open to currently registered Dalhousie and King's students in all Faculties.

Contact/Coordinator: Associate Director, Theatre (fspa.theatre@dal.ca)

The Certificate in Theatre Creation offers students opportunities to study playwriting, theatre directing, dramaturgy, and other skills associated with the creation of theatrical works. Through both practical and theoretical studies, students will develop an understanding of the basics of play analysis and dramaturgy before continuing to advanced electives enabling them to specialize by developing practical skills important to the work of playwrights and/or theatre directors. All courses offer experiential learning through practical creative exercises. This Certificate will be of interest to any Dalhousie or King's student who wishes to acquire foundational skills in creating theatrical works.

Learning Outcomes:

Upon completion of the certificate, students will:

- Understand the key methodologies for conducting preparatory analytical work on a playtext before rehearsals begin
- Understand the principles underlying the structuring of dramatic texts
- Understand the typical rehearsal process, including how to interact with actors, designers, and stage technicians
- Understand the theory and terminology of playwriting
- Understand the theory and terminology of theatre directing

- Understand audience-building activities, such as outreach and promotion
- Have applied theoretical discoveries to practical and creative dramaturgical and playwriting exercises
- Have applied theoretical exercises to practical exercises in theatre directing

Students will be able to count credit earned in these courses toward their undergraduate major, minor, or distribution requirements, unless otherwise specified in their program's regulations.

Requirements:

This certificate is a **12 credithour certificate**.

All students must complete the following two required courses:

- THEA 2901.03 (Dramaturgy: The Art of Developing Plays)
- THEA 2902.03 (Play Analysis for Directors)

Students must also choose TWO of the following electives:

- THEA 3201.03 (Directing for the Stage)
- THEA 3601.03 (The Playwright in the Theatre A)
- THEA 3602.03 (The Playwright in the Theatre B)
- THEA/PERF/MUSC 4250.03 (Artists as Entrepreneurs: From Concept to Creation)
- THEA 4925.03 (Puppets: Bringing Objects to Life)

Note: THEA 3201.03, THEA 3601.03 and THEA 3602.03 all require completion of the two required courses as prerequisites; the other two electives do not.

Certificate in User Experience Design and Evaluation

This certificate requires a student to complete two compulsory courses, a minimum of one elective course from Group A, and the remaining three elective courses from either Group A or Group B. The minimum number of courses to be completed for this certificate is six and all courses must be completed with a grade of C or better.

Compulsory courses are:

- CSCI 3160.03: Designing User Interfaces
- CSCI 4163.03: Human Computer Interaction

Group A elective courses are:

- CSCI 4126.03: Ubiquitous Computing
- CSCI 4169.03: Usable Privacy and Security
- CSCI 4260.03: Persuasive Computing Design

Group B elective courses are:

- STAT 2080.03: Statistical Methods for Data Analysis and Inference
- CSCI 4166.03: Visualization
- CSCI 4168.03: Game Design and Development
- CSCI 4176.03: Mobile Computing
- CSCI 3190.03: Community Outreach 1 or CSCI 3691.03 Intermediate Project

Note that to obtain a certificate, the degree requirements must be satisfied. To be awarded a Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate in Vascular Ultrasound

Fourth-year and post-diploma students in Diagnostic Medical Ultrasound may complete a 15 credit hour program leading to a Certificate in Vascular Ultrasound. Working Diagnostic Sonographers who meet post-diploma requirements may also complete the Certificate as a stand-alone credential. The 15 credit hour certificate requires successful completion of the following Dalhousie courses:

Certificate in Vascular Ultrasound

DMUT 4010.03: Vascular Ultrasound

DMUT 4000.12: Specialty Practice (Vascular Ultrasound)

Admission Requirements:

- Successful completion of a diploma program in Diagnostic Medical Ultrasound.
- Evidence of good standing with professional association.
- Two years of post-diploma work experience in Diagnostic Medical Ultrasound (for post-diploma applicants).

Upon approval from the DMUT Advisor, students must enrol in the Certificate in Vascular Ultrasound. To enrol, students must declare the certificate through Dal Online (<https://dalonline.dal.ca> > Web for Students > Admissions > Declare Major/Minor/Certificate).

To graduate with the Certificate, students must apply to graduate with a Certificate per the timelines determined by the Registrar's Office.

Contact the School for further details.

Certificate in Web and Mobile Development

This certificate requires a student to complete four compulsory and two elective courses with at least a C in each of them.

Required courses are:

- CSCI 3160.03: Designing User Interfaces
- CSCI 3172.03: Web-Centric Computing
- CSCI 4176.03: Mobile Computing
- CSCI 4177.03: Advanced Web Services

Elective courses are:

- CSCI 3151.03: Foundations of Machine Learning
- CSCI 4145.03: Cloud Computing
- CSCI 4169.03: Usable Privacy and Security
- CSCI 4171.03: Networks and Communications
- CSCI 4174.03: Network Security

Note that to obtain a certificate, the degree requirements must be satisfied. To be awarded a Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

College of Arts and Science

Introduction

Arts and Social Sciences

Science

The College of Arts and Science, established in 1988, consists of the [Faculty of Arts and Social Sciences](#) and the [Faculty of Science](#). The College of Arts and Science meets to discuss matters of concern common to its units, in particular those relating to academic programs and regulations. The Dean of Arts and Social Sciences and the Dean of Science alternate, year by year, as Provost of the College. The Provost chairs College meetings and prepares the agenda for those meetings. Administrative responsibility for what is decided in College meetings remains in the two Faculties. Undergraduate degrees are offered through one School, eleven

Departments and several programs in the Faculty of Arts and Social Sciences, and ten Departments and three programs in the Faculty of Science. There are several interdisciplinary programs of instruction in the College, the responsibility for which is shared among members from different Departments.

The College of Arts and Science is responsible for the curriculum of Bachelor of Arts, Bachelor of Science, and Bachelor of Music degree programs, and for diploma programs in Meteorology and Costume Studies. The College is also responsible for the establishment of academic regulations governing students registered in its programs.

The College of Arts and Science consists of several groups: some 6,100 undergraduate students who typically spend three or four years in the College, nearly 450 full-time teaching and research faculty and staff as well as a number of part-time teachers and teaching assistants, and a support staff of administrative assistants and technicians. The student's academic role is to learn from teachers, from laboratory experience, from books, from other students, and from solitary contemplation. Students learn not only facts but concepts, and what is most important, they learn how to learn.

Through intellectual interaction with other members of the academic community, undergraduate students should gain the background knowledge, the ability and the appetite for independent discovery. Their acquisition of these components of liberal education is marked formally by the award of a Bachelor's degree. The academic faculty has two equally important roles: to teach the facts, concepts, and methods that the student must learn; and to contribute to the advancement of human knowledge through research and through scholarly or artistic activity.

The goal of the Bachelor's degree is to produce educated persons with competence in one or more subjects. Such competence includes not only factual knowledge but, more importantly, the ability to think critically, to interpret evidence, to raise significant questions, and to solve problems. A BA or a BSc degree often plays a second role as a prerequisite to a professional program of study.

BA and BSc degree programs in the College are of three types: the four year or 120 credit hour degree with Honours; the four year or 120 credit hour degree with a Major; and the three year or 90 credit hour degree with a minor.

The College is particularly proud of the Honours programs that it offers in most subjects to able and ambitious students. The BA or BSc with Honours is distinguished from the BA or BSc Major (120 credit hours) or the BA or BSc (90 credit hours) in that a higher standard of performance is expected, a greater degree of concentration of credit hours in one or two subjects is required, and at the conclusion of the program each student must receive a grade which is additional to those for the required 120 credit hours. Frequently, Honours students obtain this grade by successfully completing an original research project under the supervision of a faculty member. Completion of a BA or BSc with Honours is an excellent preparation for graduate study at major universities throughout the world. Dalhousie is distinguished among Canadian universities in offering BA programs with Honours in most subjects in which it also provides BSc Honours programs and in providing BA and BSc degree programs with Combined Honours in an Arts and a Science subject.

Provost of the College

Harvey, F., BA, MA, PhD (McGill)

Macdonald, C.L.B, PhD (Dalhousie)

General Degree Requirements

Following is a list of the faculty requirements needed to satisfy degree programs in the College of Arts and Science. Details of these requirements can be found on the pages following these lists. Departmental requirements can be found in the appropriate department/faculty listing in this calendar. Please note that students must satisfy both department and faculty requirements. Before registering for the second year, each student in the College of Arts and Science should declare a subject of concentration and obtain program advice from a faculty advisor in the appropriate department.

Requirements for degree programs other than College of Arts and Science can be found in the appropriate department/school/college/faculty listing.

Subject Groupings

Course offerings within the College of Arts and Science are placed into three subject groupings: (1) Languages and Humanities, (2) Social Sciences and (3) Life and Physical Sciences. All BA and BSc programs must include a minimum of six credit hours from each of the three subject groupings.

1. Languages and Humanities

Arabic, Black and African diaspora studies, Canadian studies, Chinese (Mandarin), cinema and media studies, classics, comparative religion, contemporary studies, creative writing, early modern studies, English, European studies, French, gender and women's studies, German, Greek, history, history of science and technology, indigenous studies, Italian studies, King's Foundation Year, Latin, music, Performance Studies, philosophy, religious studies, Russian, Spanish, and theatre.

2. Social Sciences

Black and African diaspora studies, Canadian studies, contemporary studies, early modern studies, European studies, economics, gender and women's studies, history, history of science and technology, indigenous studies, international development studies, King's Foundation Year, law, justice and society, political science, psychology, sociology and social anthropology, and sustainability (for BSc only).

3. Life Sciences and Physical Sciences

Biochemistry and molecular biology, biology, chemistry, computer science, earth sciences, economics, engineering, environmental science, human physiology* (for BA only), informatics, marine biology, mathematics, microbiology and immunology, neuroscience, oceanography, physics, psychology, science, statistics, and sustainability (for BA only).

* Offered by the Faculty of Medicine. See **Electives** section below, for limit on courses from other Faculties.

PLEASE NOTE:

1. In cases where a subject is listed in more than one of the groupings, any credit taken in that subject may be used to satisfy only one of the grouping requirements. A second credit in the same subject cannot be used to satisfy another subject grouping requirement. The exceptions are the Dalhousie Integrated Science Program and King's Foundation Year Program. **King's Foundation Year Program** (KING 1000.24, KING 1100.18) satisfies the humanities-language and social science groupings and students must take six credit hours in a single life/physical sciences subject to complete the subject grouping requirements. The **Integrated Science Program** satisfies the life sciences and physical sciences and social sciences subject groupings. Integrated Science students are required to take another three credit hours of Languages and Humanities in addition to PHIL 1050.03 to satisfy the Languages and Humanities requirement.

2. The subject groupings requirement should normally be completed in the first 60 credit hours.

Writing Course Requirements

An approved writing course or set of courses is required for all BA and BSc degrees. Courses and course combinations that can be used to fulfill the writing requirement are listed below. It is recommended that students complete the writing requirement early in their programs, preferably in their first year of studies.

- CLAS 1011.03: Ancient Greece and Rome, and CLAS 1012.03: Ancient History
- CLAS 1103.03: Gods, Heroes, and Monsters: Ancient Mythology I and CLAS 1104.03: Gods, Heroes, and Monsters: Ancient Mythology II (both must be completed)
- ENGL/CRWR 1030.06: Reading and Writing Stories
- Any two of ENGL 1005.03: Literature: Global Perspective, ENGL 1015.03: Literature: How it Works, ENGL 1025.03: Literature: Why it Matters, ENGL 1040.03: Reading Popular Culture: Writing Requirement, ENGL 1050.03: Pulp Fiction: Writing Requirement, ENGL 1060.03: Reading Literature and Science, ENGL 1100.03: Writing for University
- GERM 1026.03: German Fiction in Novel and Film I and GERM 1027.03: German Fiction in Novel and Film II (both must be completed)
- GERM 1080X/Y.06: German Folk and Fairy Tales
- HIST 1022.03: Introduction to European History Part I (Writing Requirement) and HIST 1023.03: Introduction to European History Part II (Writing Requirement) (both must be completed)
- HIST 1510.06: The History of the Future: How Visions of the Future Have Shaped History Around the World
- Any two of HIST 1503.03: The Black Death, Silk, and the Mongols - Shock, Culture, and Awe in Medieval Eurasia (12-15th Centuries): Comparative Global History, HIST 1504.03: Origins of Modern Global Society, HIST 1006.03: The Idea of the Past and the Making of the Present
- HSTC 1800.03: Technology and Engineering: From the Stone Age to the Industrial Age and HSTC 1801.03: Technology and Engineering: From the Industrial Age to the Cybernetic Age (both must be completed)
- JOUR 1002.03: Foundations of Journalism I and JOUR 1003.03: Foundations of Journalism II *
- Integrated Science Program (SCIE 15XX)
- King's Foundation Year (KING 1XXX)
- OCEA 1001.03: Conversations with Ocean Scientists I and OCEA 1002.03: Conversations with Ocean Scientists II (both must be completed)
- PERF 1000.03: Writing About Performance and one of PERF 1001.03: Writing About Music OR PERF 1002.03: Writing About Stage and Screen
- PHIL 1810.03: Introduction to Philosophy, 1 and PHIL 1820.03: Introduction to Philosophy, 2
- POLI 1001.03: Introduction to Government and Politics I and POLI 1002.03: Introduction to Government and Politics II
- RELS 1201.03 : Gods, Heroes, and Monsters: Ancient Mythology I and RELS 1202.03: Gods, Heroes, and Monsters: Ancient Mythology II (both must be completed)

- RUSN 1020.03: Russian Culture and Civilization under the Tsars and RUSN 1070.03: Modern Russian Culture and Civilization (both must be completed)
- SCIE 1111.03: Writing for the Sciences (satisfies writing requirement for BSc students only)
- SUST 1000.06: Introduction to Environment, Sustainability and Society I

* Offered by the School of Journalism. See **Electives** section below, for limit on courses from other Faculties.

The Writing Course may also be used to satisfy one of the subject groupings.

Mathematics Requirement (Bachelor of Science)

A minimum of six credit hours in mathematics or statistics other than MATH 1001.03, MATH 1002.03, MATH 1003.03, MATH 1110.03, MATH 1120.03, MATH 1115.03 or MATH 1315.03, are required for all BSc programs. A course taken to satisfy the mathematics requirement may not be used to also satisfy the subject groupings requirement.

Students may also satisfy this requirement by passing the test which is administered by the [Department of Mathematics and Statistics](#). Such students must nevertheless complete 90 or 120 credit hours in order to graduate.

Language Course (Bachelor of Arts)

Students should consider becoming fluent in French. BA students are required to obtain six credit hours from the following language courses:

- ARBC 1021.03: Introduction to Arabic I and ARBC 1022.03: Introduction to Arabic II (both must be completed)
- CHIN 1030X/Y.06: Introduction to Chinese (Mandarin)
- CHIN 1031.03: Introduction to Chinese (Mandarin) Pt 1 and CHIN 1032.03: Introduction to Chinese (Mandarin) Pt 2 (both must be completed)
- CLAS 2401.03: Introduction to Latin I and CLAS 2402.03: Introduction to Latin II; CLAS 1901.03: Introductory Classical Hebrew I and CLAS 1902.03: Introduction to Classical Hebrew II; CLAS 2505.03: Introductory Ancient Greek I and CLAS 2506.03: Introductory Ancient Greek II
- [FREN](#) (any course taught in French)
- GERM 1003.03 and GERM 1004.03: German for Beginners, GERM 2046.03 and GERM 2047.03: German for Reading
- INDG 2901.03: Mi'kmaw Language for Non-Speakers I and INDG 2902.03: Mi'kmaw Language for Non-Speakers II
- ITAL 1000.03: Italian for Beginners Part 1 and ITAL 1001.03: Italian for Beginners Part 2
- RELS 1600.03/CLAS 1600.03: Introductory Sanskrit I and RELS 2600.03/CLAS 2600.03: Introductory Sanskrit II (both must be completed)
- RUSN 1000X/Y.06: Elementary Russian
- RUSN 1002.03: Elementary Russian I and RUSN 1003.03: Elementary Russian II (both must be completed)
- SPAN 1021.03: Beginning Spanish and SPAN 1022.03: Advanced Beginning Spanish (both must be completed)
- SPAN 1035.06: Intensive Beginning Spanish

For students with advanced language skills, upper-level language courses may be substituted. Consult the Registrar's Office if you require further information. **A course taken to satisfy this requirement cannot also satisfy the requirement of a course from section 1.**

Students may satisfy this requirement by passing one of the tests administered by the language departments. Such students must nevertheless complete 90 or 120 credit hours in order to graduate.

BA students who choose to major in economics, philosophy, law, justice and society, political science, psychology or sociology and social anthropology may substitute for a language course at least six credit hours in mathematics or statistics taught by the Department of Mathematics and Statistics, other than MATH 1001.03, MATH 1002.03, MATH 1003.03, MATH 1110.03, MATH 1120.03, or MATH 1115.03, to meet this requirement; or they may meet it by passing the test administered by the Department of Mathematics and Statistics.

A course taken to satisfy this requirement cannot also satisfy the requirement of a course from [Life Sciences and Physical Sciences](#).

Electives

Students may choose electives from any of the courses offered by teaching units within the College of Arts and Science, College of Sustainability, Faculty of Agriculture and the Faculty of Computer Science. In addition, without prior permission, electives are permitted as follows provided prerequisites are met and the consent of the instructor(s) is obtained when necessary:

Bachelor of Arts

- *18 credit hours from courses offered outside the Faculty of Arts & Social Science, Faculty of Science, College of Sustainability, Faculty of Computer Science or Faculty of Agriculture, plus up to 12 credit hours in Commerce*

Please note that BA students registered for minors in Business, Law and Society, Health Studies, Community Design, Journalism or other minors approved for students within the College of Arts and Science are permitted to take the courses necessary to satisfy the requirements for the minor. In addition, 12 credit hours from courses offered in other faculties are permitted.

BA/BEng

Students may count as electives a total of 36 engineering credit hours. In addition 12 credit hours from courses offered in other faculties are permitted.

Bachelor of Science

- *18 credit hours from courses offered outside the Faculty of Arts & Social Science, Faculty of Science, College of Sustainability, Faculty of Computer Science or Faculty of Agriculture, plus up to 12 credit hours in Commerce OR*
- *30 credit hours in Engineering or Food Science courses and 18 credit hours from courses offered in other faculties*

Please note that BSc students registered for any approved [minor](#) are permitted to take the courses necessary to satisfy the requirements for the minor. In addition, 12 credit hours from courses offered in other faculties are permitted.

BSc/BEng

Students may count as electives a total of 36 engineering credit hours and in addition 12 credit hours from courses offered in other faculties.

Any additional elective credit hours outside the College of Arts and Science will require explicit permission, to be obtained by application to the appropriate Dean's Office. Permission to count a requested course for degree credit will only be granted to students who demonstrate clearly, in a written submission, how a desired course will enhance the objectives of the BA or BSc program in progress. In this regard, a written statement of support from an academic advisor in the department of concentration is desirable.

Students seeking to enrol in courses beyond the above provisions as a means of preparing to transfer to a program of study outside the College of Arts and Science will be given approval to do so by the appropriate dean's office if admission to the course(s) has been granted by the instructor(s) concerned. In such cases, however, it will be explicitly stated that the courses will not count for credit towards a BA or BSc degree.

Cross-listed Courses

Please note that cross-listed courses will count as one subject only for the purpose of satisfying degree requirements, e.g. ECON 2260.03 cross-listed with MATH 2060.03 may count either as a mathematics course or economics course but not both.

Major/Honours Conversion

Upgrading of BA or BSc (90 credit hour) to a BA or BSc Major (120 credit hour)

A person who holds a Dalhousie BA or BSc (90 credit hour) degree may apply through the Registrar's Office for admission to a major program. On completion of the required work with proper standing, a conversion parchment will be awarded which has the effect of upgrading the degree to major status.

Upgrading of a BA or BSc (90 or 120 credit hour) to a BA or BSc Honours (120 credit hour)

A person who holds a Dalhousie BA or BSc (90 or 120 credit hour) degree may apply through the Registrar's Office with the appropriate department advisor(s) approval, to an Honours program. On completion of the required work with proper standing, a parchment will be awarded which has the effect of upgrading the degree to honours status.

BA/BSc (120 credit hour) Programs

The 120 credit hour degree is the standard BA or BSc degree. There are a variety of programs within the 120 credit hour degree. Each is designed to develop some level of concentration of knowledge and expertise.

Major Programs

A major program focuses a student's studies, but not to the extent that an honours program does. Unlike the honours degree, the major degree may not be adequate for admission to graduate programs. Students interested in a major program are advised to seek detailed information from the department in which they wish to concentrate their studies.

BA (120 credit hour)

- First Year
No more than 18 credit hour equivalents of the first 30 credit hours taken may be in a single subject
- **EITHER** ASSC 1300.03 (Intro to the Humanities) **OR** ASSC 1400.03 (Intro to the Social Sciences), to be taken during the first 30 credit hours of the degree
- 6 credit hours in an approved [writing course](#)
- 6 credit hours in one or more language/humanities subjects (see Section 1 of [Subject Groupings](#)).
- 6 credit hours in one or more social science subjects (see Section 2 of [Subject Groupings](#)).
- 6 credit hours in one or more life or physical science subjects (see Section 3 of [Subject Groupings](#)).
- 6 credit hours in a **single** language subject (see [Language Course section](#))
- A minimum of 30, maximum of 54 credit hours in the major subject beyond the 1000 level, including 18 credit hours beyond the 2000 level.
- Within the last 90 credit hours, complete 6 credit hours in each of two subjects other than the major
- Total credit hours required above 1000 level - 72
- Total credit hours required for degree - 120
- Required GPA for graduation - 2.00
- Graduation with distinction - 3.70
- May be combined with minor(s)

Bachelor of Arts major subjects: cinema & media studies, classics, English, european studies, French, German, gender & women's studies, history, international development studies, law, justice & society, music, philosophy, political science, religious studies, Russian studies, sociology & social anthropology, Spanish, theatre, or any of the BSc major subjects.

BSc (120 credit hour)

- an approved [writing course](#)
- 6 credit hours in one or more language/humanities subjects (see Section 1 of [Subject Groupings](#)).
- 6 credit hours in one or more social science subjects (see Section 2 of [Subject Groupings](#)).
- 6 credit hours in math (see [Math Requirement](#)).
- A minimum of 30, maximum of 60 credit hours in the major subject beyond the 1000 level, including 18 credit hours beyond the 2000 level.
- Total credit hours required above 1000 level - 72
- Total credit hours required for degree - 120
- Required GPA for graduation - 2.00
- Graduation with distinction - 3.70
- May be combined with minor(s)

Bachelor of Science major subjects: Actuarial Science, Biochemistry and Molecular Biology, Biology, Chemistry, Earth Sciences, Economics, Environmental Science, Marine Biology, Mathematics, Microbiology and Immunology, Neuroscience, Ocean Sciences, Physics, Psychology, or Statistics.

BSc Major (120 credit hour) Science Co-operative Education

Requirements are as for the major program with the addition of the following:

- A minimum of three co-op work terms

The following departments currently offer co-op programs: Biochemistry and Molecular Biology, Biology, Chemistry, Earth Sciences, Marine Biology, Microbiology and Immunology, and Physics and Atmospheric Science. For details on these programs,

consult the calendar entries for the departments and the [Science, Information Technology and Engineering \(S.I.T.E.\) Cooperative Education](#) section.

Double Major Programs

The double major program allows study in two disciplines of equal or comparable interest.

BA Double Major (120 credit hour)

- First Year
No more than 18 credit hour equivalents of the first 30 credit hours taken may be in a single subject
- **EITHER** ASSC 1300.03 (Intro to the Humanities) **OR** ASSC 1400.03 (Intro to the Social Sciences), to be taken during the first 30 credit hours of the degree
- 6 credit hours in a [writing course](#)
- 6 credit hours in one or more language/humanities subjects (see Section 1 of [Subject Groupings](#)).
- 6 credit hours in one or more social science subjects (see Section 2 of [Subject Groupings](#)).
- 6 credit hours in one or more life or physical science subjects (see Section 3 of [Subject Groupings](#)).
- 6 credit hours in a **single** language subject for (see [Language Course section](#))
- A minimum of 60, maximum of 84 credit hours in the major subject beyond the 1000 level are to be in the two allied subjects, with no more than 48 credit hours and no fewer than 30 credit hours in either, including 18 credit hours beyond the 2000 level in each of the two major subjects. The major subject with the most advanced credits appears first on the record.
- Within the last 90 credit hours, complete six credit hours in a single subject other than the two major subjects
- Total credit hours required above 1000 level - 72
- Total credit hours required for degree - 120
- Required GPA for graduation - 2.00
- Graduation with distinction - 3.70
- May be combined with minor(s)

Bachelor of Arts Double Major subjects: Choose both subjects from the Bachelor of Arts and Bachelor of Science major subjects, or Computer Science (as a second subject only); or combine one BA major subject with Environment, Sustainability and Society. In addition to the BA major subjects listed in the [BA \(120 credit hour\) section](#), Canadian studies, music and creative writing are also available as one of the subjects in a double major. European Studies is not available in the double major program.

BSc Double Major (120 credit hour)

- an approved [writing course](#)
- 6 credit hours in one or more language/humanities subjects (see Section 1 of [Subject Groupings](#)).
- 6 credit hours in one or more social science subjects (see Section 2 of [Subject Groupings](#)).
- 6 credit hours in approved mathematics/statistics courses (see [Math Requirement](#)).
- Minimum of 60 and a maximum of 84 credit hours in the two major subjects beyond the 1000 level, with no more than 54 credit hours and no fewer than 30 credit hours in either, including at least 18 credit hours beyond the 2000 level in each of the two major subjects.
- The major subject with the most advanced credit hours appears first on the record.
- If a BSc major subject is combined with a BA major subject, the BSc subject must have more credit hours than the BA subject
- Total credit hours required above 1000 level - 72
- Total credit hours required above the 2000 level - 36
- Total credit hours required for degree - 120
- Required GPA for graduation - 2.0
- Graduation with distinction - 3.70
- May be combined with minor(s)

BSc Double Major subjects:

- Choose two BSc major subjects (Actuarial Science, Biochemistry and Molecular Biology, Biology, Chemistry, Earth Sciences, Economics, Environmental Science, Marine Biology, Mathematics, Microbiology and Immunology, Neuroscience, Ocean Sciences, Physics, Psychology, or Statistics)

- Combine one BSc major subject with Computer Science or Environment, Sustainability and Society. Either subject may have the greater number of credit hours.
- Combine one BSc major subject with one of the BA major subjects (except European Studies) or with Canadian Studies, Creative Writing, or Music. The BSc subject must have the greater number of credit hours.

Honours Programs

Honours programs require a higher quality of work than is required by the other undergraduate programs of the college (such as the 90 credit hour degree and 120 credit hour major). Able and ambitious students are urged to enter these programs. There are two types of honours programs in the BA (concentrated and combined) and three types in the BSc (concentrated, combined, and multidisciplinary). Applications for admission to honours programs must be made to the departments concerned on forms available in departments, at the Registrar's Office or online at dal.ca/honours.

Students should apply in their second year. If application is made later, it may be necessary to make up some work not previously taken.

For each individual student the entire honours program, including elective credit hours, is subject to supervision and approval by the department or departments concerned, or in the case of multidisciplinary honours, by an interdisciplinary committee.

NOTE: The last day to apply to an honours program is September 19.

BA Concentrated Honours (120 credit hour)

- First Year
 - No more than 18 credit hour equivalents of the first 30 credit hours taken may be in a single subject
- EITHER ASSC 1300.03 (Intro to the Humanities) OR ASSC 1400.03 (Intro to the Social Sciences), to be taken during the first 30 credit hours of the degree
- 6 credit hours in a [writing course](#)
- 6 credit hours in one or more language/humanities subjects (see Section 1 of [Subject Groupings](#)).
- 6 credit hours in one or more social science subjects (see Section 2 of [Subject Groupings](#)).
- 6 credit hours in one or more life or physical science subjects (see Section 3 of [Subject Groupings](#)).
- 6 credit hours in a **single** language subject for (see [Language Course section](#))
- A minimum of 54, maximum of 66 credit hours beyond the 1000 level in the honours subject, grade must be "C or better", otherwise, course will not count toward degree.
- Within the last 90 credit hours, complete 6 credit hours in each of two subjects other than the major
- Total credit hours required above 1000 level - 72
- Total credit hours required for degree - 120
- Required GPA for graduation - 2.00
- Honours Qualifying Examination: At the conclusion of an honours program a student's record must show a grade which is additional to the grades for the courses taken to obtain the required 120 credit hours. This grade may be obtained through a comprehensive examination, the presentation of a research paper (which may be an extension of one of the courses), or such other method as may be determined by the committee or department supervising the student's program. The method by which this additional grade is obtained is referred to as the Honours Qualifying Examination. Departments may elect to use a pass-fail grading system for this examination. Unless pass/fail grading is employed, the grade must be "B-" or better for honours, and "A-" or better for first class honours.
- Required standing for graduation: Arts and Social Sciences subjects require a GPA of 2.70 (3.70 for first class) on courses in the honours subject. Science subjects (see below) require a GPA of 3.00 (3.70 for first class) in the honours subject.
- May be combined with minor(s)

Note: If the student has a minor, courses in the honours subject and the minor are included in the GPA.

Bachelor of Arts concentrated honours subjects: Classics, English, European Studies, French, German, History, International Development Studies, Music, Philosophy, Political Science, Religious Studies, Russian Studies, Social Anthropology, Sociology, Spanish, and Theatre or any of the BSc honours subjects.

BSc Concentrated Honours (120 credit hour)

- an approved [writing course](#)
- 6 credit hours in one or more language/humanities subjects (see Section 1 of [Subject Groupings](#)).

- 6 credit hours in one or more social science subjects (see Section 2 of [Subject Groupings](#)).
- 6 credit hours in math (see [Math Requirement](#)).
- Minimum of 54 credit hours with a grade of C or better, maximum of 66 credit hours beyond the 1000-level in the honours subject
- Total credit hours required for degree - 120
- Total credit hours required above 1000 level - 72
- Required GPA for graduation - 2.00
- Honours Qualifying Examination: At the conclusion of an honours program a student's record must show a grade which is additional to the grades for the courses taken to obtain the required 120 credit hours. This grade may be obtained through a comprehensive examination, the presentation of a research paper (which may be an extension of one of the courses), or such other method as may be determined by the committee or department supervising the student's program. The method by which this additional grade is obtained is referred to as the Honours Qualifying Examination. Departments may elect to use a pass-fail grading system for this examination. Unless pass/fail grading is employed, the grade must be "B-" or better for honours, and "A-" or better for first class honours.
- Required standing for graduation:
GPA 3.00 (3.70 for first class) on courses in the honours subject.
- May be combined with minor(s)

Bachelor of Science concentrated honours subjects: Actuarial Science, Biochemistry and Molecular Biology, Biology, Chemistry, Computer Science, Earth Sciences, Economics, Environmental Science, Marine Biology, Mathematics, Microbiology and Immunology, Neuroscience, Ocean Sciences, Physics, Psychology and Statistics.

BA Combined Honours (120 credit hour)

- First Year
No more than 18 credit hour equivalents of the first 30 credit hours taken may be in a single subject
- EITHER ASSC 1300.03 (Intro to the Humanities) OR ASSC 1400.03 (Intro to the Social Sciences), to be taken during the first 30 credit hours of the degree
- 6 credit hours in a [writing course](#)
- 6 credit hours in one or more language/humanities subjects (see Section 1 of [Subject Groupings](#)).
- 6 credit hours in one or more social science subjects (see Section 2 of [Subject Groupings](#)).
- 6 credit hours in one or more life or physical science subjects (see Section 3 of [Subject Groupings](#)).
- 6 credit hours in a **single** language subject for (see [Language Course section](#))
- Total credit hours required above 1000 level - 72
- Total credit hours required for degree - 120
- Required GPA for graduation - 2.00
- Minimum of 66, maximum of 84 credit hours beyond the 1000 level in two allied subjects, not more than 48 credit hours nor fewer than 30 credit hours being in either of them. Grade must be "C" or better, otherwise, course will not count toward degree. The honours subject with the most advanced credit hours appears first on the record.
- Within the last 90 credit hours, 6 to 24 - depending on the number selected in the honours subjects - elective credit hours.
- Honours Qualifying Examination: see concentrated honours program above for details.
- Required standing for graduation:
Arts and Social Sciences subjects require a GPA of 2.70 (3.70 for first class) on courses in the honours subjects.
Science subjects (see below) require a GPA of 3.00 (3.70 for first class) in courses in the honours subjects.
- May be combined with minor(s)

Note: If the student has a minor, courses in the honours subjects and the minor are included in the honours GPA.

Bachelor of Arts combined honours subjects: Canadian Studies, Cinema & Media Studies, Classics, Contemporary Studies, Creative Writing, Early Modern Studies, English, French, Gender and Women's Studies, German, History, History of Science & Technology, International Development Studies, Law, Justice & Society, Music, Philosophy, Political Science, Religious Studies, Russian Studies, Social Anthropology, Sociology, Spanish, Theatre and Computer Science, Environment, Sustainability & Society or any of the BSc honours subjects.

BSc Combined Honours (120 credit hour)

- an approved [writing course](#)
- 6 credit hours in one or more language/humanities subjects (see Section 1 of [Subject Groupings](#)).

- 6 credit hours in one or more social science subjects (see Section 2 of [Subject Groupings](#)).
- 6 credit hours in approved mathematics/statistics courses (see [Math Requirement](#)).
- Minimum of 66, maximum of 84 credit hours beyond the 1000 level in two subjects, not more than 54 credit hours nor fewer than 30 credit hours being in either, including at least 18 credit hours above the 2000 level in each subject. Grades in honours subject courses must be C or better.
- The honours subject with the most advanced credit hours appears first on the record.
- If a BSc honours subject is combined with a BA honours subject, the BSc subject must have more credit hours than the BA subject.
- Total credit hours required above the 1000 level - 72
- Total credit hours required above the 2000 level - 36
- Total credit hours required for degree - 120
- Required GPA for graduation - 2.00
- Honours Qualifying Examination: see concentrated honours program above for details.
- Required standing for graduation:
GPA of 3.00 (3.70 for first class) on courses in the honours subjects.
- May be combined with minor(s)

Bachelor of Science combined honours subjects:

- Choose two BSc honours subjects (Actuarial Science, Biochemistry and Molecular Biology, Biology, Chemistry, Earth Sciences, Economics, Environmental Science, Marine Biology, Mathematics, Microbiology and Immunology, Neuroscience, Ocean Sciences, Psychology and Statistics)
- Combine one BSc honours subject with Computer Science or Environment, Sustainability and Society.
- Combine one BSc honours subject with one of the BA honours subjects (except European Studies), or with Canadian Studies, Cinema & Media studies, Creative Writing, Law, Justice & Society or Music. The larger number of honours credit hours must be in the BSc subject.

BSc Multidisciplinary Honours (120 Credit Hour)

- an approved [writing course](#)
- 6 credit hours in one or more language/humanities subjects (see Section 1 of [Subject Groupings](#)).
- 6 credit hours in one or more social science subjects (see Section 2 of [Subject Groupings](#)).
- 6 credit hours in math (see [Math Requirement](#)).
- A total of 72 credit hours beyond the 1000 level in three or more subjects. A minimum of 18 and a maximum of 30 in each of three subjects. Grades must be "C" or better.
- Total credit hours required for degree - 120
- 18 elective credit hours
- Honours Qualifying Examination: See Concentrated Honours program above for details.
- Required standing for graduation:
GPA of 3.00 (3.70 for First Class) on courses in the honours subjects.
- May be combined with minor(s)

Bachelor of Science multidisciplinary honours subjects - at least 54 credit hours of the 120 selected must be from the following subjects: biochemistry, biology, chemistry, computer science, earth sciences, economics, environmental science, mathematics, microbiology and immunology, neuroscience, physics, psychology and statistics.

BSc Honours Science Co-op (120 Credit Hour)

Requirements are as for appropriate honours program (described above) with the addition of the following:

- A minimum of three co-op work terms

Joint Honours: Dalhousie University - Mount Saint Vincent University

Special arrangements exist under which students may be permitted to pursue an honours program jointly at Dalhousie and Mount Saint Vincent universities. Interested applicants should consult the appropriate department of their own university at the beginning of the second year. Prospective joint honours students must be accepted by the honours departments concerned at both institutions. These departments supervise the entire program of study of accepted applicants. Students should be aware that not all courses available for

credit at Mount Saint Vincent University can be given credit at Dalhousie and vice versa. In order for students to gain a joint honours degree they must satisfy all requirements of both institutions.

College of Sustainability Degree Programs

The College of Sustainability offers a Double Major and Combined Honours program with any subject in the College of Arts and Science. For complete details about the College, its programs, major/honours requirements and courses please see the [College of Sustainability section](#) of the Calendar.

Minor Programs

Minor programs comprise a minimum of 18 and a maximum of 27 credit hours in a defined subject area, above the 1000 level. Students minoring in a Faculty of Science subject may take up to 36 credit hours in the minor subject. Minors can be added to any 120 credit hour BA, BMus, or BSc degree. If a minor is added to a double major or a combined honours program, students may find that they need to take more than 120 credit hours to complete all of their degree requirements. For BA students, when a minor subject is taken in conjunction with an honours program, grades in the minor subject must be "C" or better. Please note that a course cannot be used to satisfy both the major or honours subject requirement and the minor requirement.

[List of Minors](#)

BA/BSc (90 credit hour) Programs

BA with Minor

- First Year
No more than 18 credit hour equivalents of the first 30 credit hours taken may be in a single subject
- **EITHER** ASSC 1300.03 (Intro to the Humanities) **OR** ASSC 1400.03 (Intro to the Social Sciences), to be taken during the first 30 credit hours of the degree
- 6 credit hours in a [writing course](#)
- 6 credit hours in one or more language/humanities subjects (see Section 1 of [Subject Groupings](#)).
- 6 credit hours in one or more social science subjects (see Section 2 of [Subject Groupings](#)).
- 6 credit hours in one or more life or physical science subjects (see Section 3 of [Subject Groupings](#)).
- 6 credit hours in a **single** language subject for (see [Language Course section](#))
- A minimum of 18, maximum of 27 credit hours in the minor subject at the 2000 level or higher.
- Within the last 90 credit hours, complete 6 credit hours in each of two subjects other than the minor
- Total credit hours required above 1000 level - 42
- Total credit hours required for degree - 90
- Required GPA for graduation - 2.00
- Graduation with distinction - 3.70

Bachelor of Arts minor subjects for the 90 credit hour degree: any of the following approved minors in either the Faculty of Arts and Social Sciences or the Faculty of Science:

- [Biochemistry and Molecular Biology](#)
- [Biology](#)
- [Canadian Studies](#)
- [Chemistry](#)
- [Classics](#)
- [Earth Science](#)
- [Economics](#)
- [English](#)
- [Environment, Sustainability and Society](#)
- [Environmental Science](#)
- [French](#)
- [Gender and Women's Studies](#)
- [German](#)
- [History](#)

- [International Development Studies](#)
- [Law, Justice and Society](#)
- [Mathematics](#)
- [Music](#)
- [Philosophy](#)
- [Physics](#)
- [Political Science](#)
- [Psychology](#)
- [Religious Studies](#)
- [Russian Studies](#)
- [Sociology and Social Anthropology](#)
- [Spanish](#)
- [Statistics](#)
- [Theatre](#)

BSc with Minor

- an approved [writing course](#)
- 6 credit hours in one or more language/humanities subjects (see Section 1 of [Subject Groupings](#)).
- 6 credit hours in one or more social science subjects (see Section 2 of [Subject Groupings](#)).
- 6 credit hours in math (see [Math Requirement](#)).
- Minimum of 18, maximum of 36 credit hours in the minor subject at the 2000 level or higher.
- Total credit hours required above 1000 level - 42
- Total credit hours required for degree - 90
- Required GPA for graduation - 2.00
- Graduation with distinction - 3.70

BSc (90 credit hour) degrees are available with the following Faculty of Science minors:

- [Biochemistry and Molecular Biology](#)
- [Biology](#)
- [Chemistry](#)
- [Earth Science](#)
- [Environmental Science](#)
- [Economics](#)
- [Mathematics](#)
- [Microbiology and Immunology](#)
- [Physics](#)
- [Psychology](#)
- [Statistics](#)

Concurrent Programs

The Faculty of Engineering, the Faculty of Science, and the Faculty of Arts & Social Sciences (FASS) offer students the opportunity to combine their BEng degree with a BSc or BA degree. Students must meet the admission requirements for the BEng and the BSc or BA programs to be eligible for the concurrent degree option. Students must consult the Assistant Dean, Science, or the Assistant Dean, FASS, and the Associate Dean, Engineering, for assistance in developing a plan for their concurrent program.

Students normally complete the 90 credit hour BSc or BA, and the first two years of engineering studies that lead to the Diploma in Engineering (DEng), over a period of three calendar years. The BSc or BA degree and the Diploma are thus awarded to successful candidates at the end of the three year period.

To meet the BSc or BA 90 credit hour Minor requirements, **students complete 30 credit hours in addition to their Engineering requirements**: a minimum of 18 credit hours in an approved Minor subject at or above the 2000 level, and an additional 12 credit hours in Science or FASS courses. Students must select their courses such that they fulfill the *subject, language and writing requirements* for a BSc or BA degree.

Concurrent BEng/BSc or BEng/BA (Major or Honours) programs can also be designed for interested students. Consult with the Associate Dean, Engineering, and the Assistant Dean, Science or FASS.

BSc/BEng

A BEng/BSc degree provides students with knowledge and credentials in Engineering and a Science subject, and may appeal to students with career objectives in multi-disciplinary fields such as biomedical engineering, environmental remediation, resource extraction industries, materials science, green technology, pharmaceuticals and other areas of applied physics or chemistry, or to students who want to further develop their expertise in project cost/benefit analysis and economic policy.

To meet the BSc 90 credit hour Minor requirements, students complete a minimum of 18 credit hours in an approved Science Minor subject at or above the 2000 level, and an additional 12 credit hours in Science/FASS courses, of which 6 credit hours must be social science/humanities subject courses.

The following general plan is appropriate for most BEng/BSc (90 credit hour) concurrent degrees. Subject-specific guidelines are available in Departmental calendar sections for some programs (Chemistry, Economics, Mathematics, Physics).

Fall

Winter

Registered in BEng

Year 1	CHEM 1021 Chemistry I	CHEM 1022 Chemistry II
	MATH 1280 Engineering Math I	MATH 1290 Engineering Math II
	ENGI 1103 Engineering Design I	ENGI 1203 Engineering Mechanics I: Statics
	PHYC 1190 Physics I	PHYC 1290 Physics II
	ENGM 1081 Computer Programming	ENGM 1041 Applied Linear Algebra
	CPST 1103 Technical Communications I	CPST 1203 Technical Communications II

Apply for admission into concurrent BEng/BSc ^a

Year 2	ENGM 2101 Applied Vector Calculus	ENGM 2022 Applied Differential Equations
	ENGM 2032 Applied Probability & Statistics	HSTC 1801 History of Engineering II
	^b Writing course (Humanities)	^c One Engineering elective
	One Social Science course ^c	One Social Science or Humanities course ^c
	Two Science/FASS courses ^d	Two Science/FASS courses ^d
Year 3	IENG 2005 Engineering economics	ENGI 2203 Engineering design
	ECED 2000 Electric circuits	^e Two Engineering electives
	ENGI 2102 Thermo-Fluid Engineering I	Two Science/FASS courses ^d
	Two Science/FASS courses ^d	

Graduate with Diploma in Engineering and BSc 90 credit degree

Year 4 Continue in BEng program

Year 5 Complete BEng program

^a To complete BSc degree requirements within 3 years, students choosing one of the following BSc programs should consider taking the relevant first year science courses in the summer prior to Year 2.

- Biochemistry & Molecular Biology: BIOL 1020/BIOL 1021
- Biology or Marine Biology: BIOL 1020/BIOL 1021
- Microbiology & Immunology: BIOL 1020/BIOL 1021
- Earth Sciences: EARTH 1080/ERTH 1091
- Psychology or Neuroscience: PSYO 1030/PSYO 1031

^b Writing requirement: choose from eligible writing courses in the humanities (CLAS, ENGL, GERM, HIST, PERF, PHIL, RELS, or RUSN) to fulfill writing and humanities requirements [College of Arts and Science]

^c Choose from eligible **social science** courses and **humanities** courses [College of Arts and Science]

^d Science and FASS courses must be selected such that they fulfill the requirements for a Minor subject. Eligible Minor subjects for a BSc 90 credit hour degree, and their requirements, can be found [here](#)

^e See Discipline-specific electives in the Engineering section of the calendar for details

BA/BEng

A BEng/BA degree may appeal to students who want to complement their Engineering degrees with a deeper understanding of a humanities or social science subject, or who would like to put their engineering knowledge into a broader societal context.

To meet the BA 90 credit hour Minor requirements, students complete a minimum of 18 credit hours in an approved Minor subject at or above the 2000 level, and an additional 12 credit hours in FASS or Science courses. Students must select their courses such that they fulfill the language, humanities, social science, and writing requirements for a BA degree.

The following general plan is appropriate for most BEng/BA (90 credit hour) concurrent degrees.

Fall

Winter

Registered in BEng

Year 1	CHEM 1021 Chemistry I	CHEM 1022 Chemistry II
	MATH 1280 Engineering Math I	MATH 1290 Engineering Math II

Year 2	ENGM 2101 Applied Vector Calculus	ENGM 2022 Applied Differential Equations
	ENGM 2032 Applied Probability & Statistics	HSTC 1801 History of Engineering II
	Writing course	^b One Engineering elective
	Three FASS/Science courses ^a	Three FASS/Science courses ^a
Year 3	IENG 2005 Engineering economics	ENGI 2203 Engineering design
	ECED 2000 Electric circuits	^b Two Engineering electives
	ENGI 2102 Thermo-Fluid Engineering I	Two FASS/Science courses ^a
	Two FASS/Science courses ^a	

Graduate with Diploma in Engineering and BA 90 credit degree

Year 4 Continue in BEng program

Year 5 Complete BEng program

^a FASS and Science courses must be selected such that they fulfill the requirements for a Minor subject. Eligible Minor subjects for a BA 90 credit hour degree, and their requirements, can be found [here](#)

^b See Discipline-specific electives in the Engineering section of the calendar for details

Individual Programs

In cases where students feel their academic needs are not satisfied under the above requirements, individual programs may be submitted to the Academic Development Committee of the Faculty of Arts and Social Sciences or to the curriculum committee of the Faculty of Science prior to or during the student's second academic year. The Dean shall act as advisor for such students.

Other Degree and Diploma Programs

Bachelor of Music

For the requirements of this degree, see the entry for the [Fountain School of Performing Arts](#).

Diploma in Costume Studies

Study for this credential is entirely within the [Fountain School of Performing Arts](#). See the entry for that department for detailed information.

Diploma in Meteorology

Details of the requirements for this diploma may be found in the entry of the [Department of Physics and Atmospheric Science](#).

Certificates

The certificates listed at the right are specific to the Faculty of Arts and Social Science and Faculty of Science.

Certificates are one way that Dalhousie recognizes graduating students who have achieved a level of proficiency or specialization in a particular area or subject. Certificates are awarded upon graduation from a degree program and will be recorded on the student's academic transcript.

Certificates vary in their goals and requirements. Many have a research or practicum component. Some are interdisciplinary, requiring work in more than one department, while others focus on a specialization within a single program. Some Certificates are designed for students enrolled in particular programs, while others are broadly applicable to students in any program.

Certificate in Actuarial and Financial Mathematics

Offered by: Mathematics & Statistics

Coordinator: Dr. Toby Kenney (tkenney@mathstat.dal.ca) Mathematics and Statistics

This program provides many of the learning objectives and fundamental mathematical and statistical skills required to complete the classes (and examinations) of the Society of Actuaries accreditation program. Students who are interested in a career in actuarial science should consult the Basic Education Catalogue on the Society of Actuaries web page (www.soa.org) or the Syllabus of Basic Education on the Casualty Actuaries website (www.casact.org). This program also prepares students for employment in general financial institutions where modelling, quantitative risk analysis, management of investment instruments, asset and liability management, life contingencies and insurance assessment, and other complex financial calculations are required.

Admission to Certificate

To enrol in the *Certificate in Actuarial and Financial Mathematics*, students must declare the certificate through Dal Online (<https://dalonline.dal.ca>>Web for Students > Admissions > Declare Major/Minor/Certificate).

To graduate with the Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate Requirements:

1. Completion of a 120 credit hour Major or Honours program in Mathematics and/or Statistics
2. Completion of the following mathematics courses: MATH 1000, MATH 1010, MATH 1030 or 2030, MATH 2001, MATH 2002, MATH 2600
3. Completion of the following statistics courses: STAT 2060, STAT 2080, STAT 2450, STAT 3340 and STAT 3360
4. Completion of either:

Financial Option: MATH 2120, MATH 3300, and MATH 3900

OR

Actuarial Option: STAT 3703, STAT 3720, and STAT 4390

Certificate in Animal Behaviour

Offered by: Biology, Psychology and Neuroscience

Coordinator: Dr. Simon Gadbois (Psychology and Neuroscience) simon.gadbois@dal.ca

The Certificate in Animal Behaviour provides students with an opportunity to specialize in Animal Behaviour through a set of courses and a research project.

Admission to Certificate

Students should enrol in the Certificate in Animal Behaviour in their third year of studies, when they are seeking approval from the Certificate Coordinator for the independent research component. To enrol, students must declare the certificate through Dal Online (<https://dalonline.dal.ca> >Web for Students>Admissions>Declare Major/Minor/Certificate), and notify the Certificate Coordinator by e-mail. To qualify for this certificate, students must complete all course requirements, and must receive approval for the research component of the certificate prior to the start of the research course.

To graduate with the certificate, students must apply to Graduate with a Certificate at the time they apply to graduate from their degree program

Certificate requirements:

1. A minimum grade of B- is required in each of four mandatory courses:

- PSYO 2160.03/NESC 2160.03: Animal Behaviour
- PSYO 2501.03: Statistical Methods or STAT 2080.03: Statistical Methods for Data Analysis Inference
- BIOL 3062.03: Behavioural Ecology or PSYO 3162.03/NESC 3162.03: Advanced Animal Behaviour
- BIOL 3630.03: Field Methods in Animal Behaviour or NESC 3161.03/PSYO 3161.03: Measuring Behaviour or NESC 3165.03/PSYO 3165.03: Neuroethology

2. A grade of at least B- in all of 12 additional credit hours of courses chosen from the following list. Courses taken as one of the four mandatory classes cannot also be used to fulfill this requirement. Six credit hours must be at the 3000/4000 level.

2000 level

- ANSC 2003.03: Companion Animal Behaviour
- PSYO 2140.03/NESC 2140.03: Learning
- PSYO 2470.03/NESC 2470.03: Systems Neuroscience

3000 level

- ANSC 3002.03: Domestic Animal Behaviour

- BIOL 3062.03: Behavioural Ecology (if not used to fulfill Requirement 1 above)
- BIOL 3080.03/MARI 3080.03: Ecology and Evolution of Fishes
- BIOL 3327.03: Entomology
- BIOL 3622.03: Ornithology
- BIOL 3626.03: Field Studies of Marine Mammals
- BIOL 3628.03/MARI 3628.03: Marine Ornithology
- BIOL 3630.03: Field Methods in Animal Behaviour (if not used to fulfill Requirement 1 above)
- BIOL 3640.06: Tropical Ecology and Biodiversity (with Animal Behaviour project: counts for three credit hours only)
- BIOL 3632.03: Applied Field Methods in Fish Ecology
- BIOL 3639.03: Herpetology
- MARI 3090.03: Marine Mammalogy
- PSYO 3000.06/NESC 3000.06: Independent Research in Modern Psychology (Animal Behaviour topic)
- PSYO 3001.03/NESC 3001.03: Directed Research Project in Psychology or Neuroscience (Animal Behaviour topic)
- PSYO 3043.03/NESC 3043.03: Neurobiology of Learning
- PSYO 3044.03/NESC 3044.03: Laboratory Methods of Learning and Conditioning
- PSYO 3161.03/NESC 3161.03: Measuring Behaviour
- PSYO 3162.03/NESC 3162.03: Advanced Animal Behaviour (if not used to fulfill Requirement 1 above)
- PSYO 3165.03/NESC 3165.03: Neuroethology (if not used to fulfill Requirement 1 above)
- PSYO 3170.03/NESC 3170.03: Hormones and Behaviour
- PSYO 3180.03/NESC 3180.03: Psychoneuroimmunology/Ecological Immunology
- PSYO 3670.03/NESC 3670.03: Genes, Brain and Behaviour

4000 level

- BIOL 4323.03/MARI 4323.03: Biologging in Ecology
- BIOL 4800.06: Special Topics (Animal Behaviour topic)
- BIOL 4806.03/MARI 4806.03, BIOL 4807.03/MARI 4807.03, BIOL 4808.03/MARI 4808.03, BIOL 4810.03: Special Topics (Animal Behaviour topic)
- BIOL 4510.03 Cultural Evolution
- BIOL/MARI 4900.06: Honours Research and Thesis or BIOL 4901.03/MARI 4901.03 BIOL 4902.03/MARI 4902.03: Honours Research and Thesis I and II (with approved Animal Behaviour topic)
- MARI 4090.03: Evolutionary Ecology of Marine Mammals
- PSYO 4140.03 or NESC 4140.03: Animal Learning Topics
- PSYO 4160.03/NESC 4160.03: Topics in Behavioural Biology
- PSYO 4500.06/NESC 4500.06: Honours Research (with approved Animal Behaviour topic)

3. A grade of B- in 3 credit hours or more of independent research in Animal Behaviour.

The course used to fulfil this requirement can also be counted toward the courses that fulfil Requirement 2 above.

Students must obtain approval of their research topic from a Certificate Coordinator prior to the start of the research course. Animal behaviour research projects may be completed through one or more of PSYO 3100.03/NESC 3100.03 or PSYO 3101.03/NESC 3101.03, PSYO 3001.03/NESC 3001.03, PSYO 4500.06/NESC 4500.06, BIOL 4800.06, BIOL 4806.03/MARI 4806.03, BIOL 4807.03/MARI 4807.03, BIOL 4808.03/MARI 4808.03 or BIOL 4900.06.

Honours students may fulfill this requirement by conducting their honours thesis research on a topic in Animal Behaviour. Students are encouraged to further develop their study design and analysis skills by taking additional courses such as BIOL 4061.03 (Design of Biological Experiments) or BIOL 4062.03 (Analysis of Biological Data).

Certificate in Applied and Computational Mathematics

Offered by: Mathematics & Statistics

Coordinator: Dr. P. Selinger mathdirector@mathstat.dal.ca

This program is concerned with the development of the core mathematical and computational skills required in science, government and industry. Areas of application include everything from mathematical modeling to operations research to cryptography to software development.

Admission to Certificate

To enrol in the *Certificate in Applied and Computational Mathematics*, students must declare the certificate through Dal Online (<https://dalonline.dal.ca> >Web for Students>Admissions>Declare Major/Minor/Certificate), and notify the Certificate Coordinator by e-mail.

To graduate with the Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate Requirements:

1. Completion of the 120 credit hour Major or Honours program in Mathematics or an equivalent program
2. Completion of the following mathematics courses: MATH 1000, MATH 1010, MATH 1030 (or MATH 2030), MATH 2001, MATH 2002, MATH 2040, MATH 2110 (or MATH/CSCI 2112), MATH 2120
3. Completion of at least four of: MATH 3120, MATH 3210, MATH 3260, MATH 3300, MATH 3330, MATH 3400
4. Completion of at least two of: MATH 4116, MATH 4220, MATH 4230, MATH 4250, MATH 4320

Additional recommended courses: MATH 2300, STAT 2060, STAT 2080

Certificate in Aquaculture and the Environment

Offered by: Faculty of Science

Coordinator: Dr. Diego Ibarra Diego.ibarra@dal.ca (Biology)

Eligibility: The certificate is open to any Dalhousie undergraduate student. Non-degree Dalhousie students may qualify for the certificate if they fulfill all course requirements at Dalhousie.

Overview: The *Certificate in Aquaculture and the Environment* consists of courses that include lectures, laboratories, and visits to coastal and land-based aquaculture sites. It is designed to provide students with knowledge of, and experience with general aspects of the cultivation of aquatic species. The emphasis is on understanding aquaculture - environment interactions, and acquiring the knowledge, skills and quantitative tools needed to assess and reduce the environmental footprint of aquaculture operations.

Admission to Certificate

To enrol in the *Certificate in Aquaculture and the Environment*, students must declare the certificate through Dal Online (<https://dalonline.dal.ca> >Web for Students>Admissions>Declare Major/Minor/Certificate), and notify the Certificate Coordinator by e-mail. To qualify for the certificate, students must complete the course requirements, and have received approval from the Certificate Coordinator if a course other than MARI 3604 is used to fulfil subject area F.

To graduate with the Certificate, students must Apply to Graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate Requirements

To obtain the *Certificate in Aquaculture and the Environment*, students must take one course from each of six subject areas (A to F), with a minimum of B- in each course. Note that most of these courses may also count toward a Major, Minor or Honours program in Biology or Marine Biology.

A. Introduction to aquaculture

- MARI 3602.03: Introduction to Aquaculture

B. Practical skills in aquaculture

- MARI 3603.03: Practical Aquaculture

C. Biology of aquatic organisms

One of

- MARI 3074.03 (or BIOL 3078.03): Physiology of Marine Animals Part I
- MARI 3076.03 (or BIOL 3079.03): Physiology of Marine Animals Part II

- MARI 3221.03 (or BIOL 3221.03): Diversity of Algae
- MARI 3301.03 (or BIOL 3301.03): Invertebrate Biology
- MARI 4080.03 (or BIOL 4080): Laboratory Studies of Fishes
- BIOL 4662.03/MARI 4662.03/OCEA 4230.03: Biology of Phytoplankton

D. Aquaculture and the environment

- MARI 4600.03: Ecosystem modelling for Aquaculture

E. Aquaculture management

One of

- OCEA 4401.03: Marine Management I
- OCEA 4402.03: Marine Management II
- BIOL 4001.03: Environmental Impact Assessment
- ENVS 3200.03: Introduction to Environmental Law
- ECON 3335.03: Environmental Economics
- SUST 3101.03: Food Systems and Sustainability: Feeding the 10 billion

F. Industry-relevant knowledge and experience

** One of

- MARI 3604.03: Field Aquaculture
- * MARI 3800.03 (or BIOL 3800.03): Experiential Learning
- * MARI 4806.03: Special Topics Independent Research
- * MARI 4901.03 and MARI 4902.03 (or MARI 4900.06): Honours Thesis
- * BIOL 4901.03 and BIOL 4902.03 (or BIOL 4900.06): Honours Thesis
- * MARI 8891.00 (or MARI 8892.00 or MARI 8893.00) Co-op work term
- * ENVS 3000.03: Environmental Science Internship
- * ENVS 8891.00 (or ENVS 8892.00 or ENVS 8893.00) Co-op work term
- * SUST 3002.03: ESS Engagement Project
- * SCIE 4701.03 and SCIE 4702.03 Science and Technology Innovation, Commercialization and Entrepreneurship I and II

* These courses must be pre-approved (prior to start of the course) by the certificate coordinator as having a focus on aquaculture

** Some alternatives used to fulfil **Requirement F** are not available to students in all programs. For example, MARI 4900 is open only to students in the Marine Biology Honours program, MARI 8891 and ENVS 8891 are open only to students in Marine Biology or Environmental Science Co-op programs.

Certificate in Art History and Visual Culture

This certificate is open to currently registered Dalhousie and King's students in all Faculties.

Contact/Coordinator: Dr. Lisa Binkley, History Department (lbinkley@dal.ca)

The Certificate in Art History and Visual Culture is designed for students in the arts, social sciences, and sciences who are interested in advancing their visual literacy. The ability to interpret meaning from images and objects is critical in our increasingly image-saturated culture. This certificate program will provide students with solid training in visual analysis, art history methodologies, research, and communication.

A Certificate in Art History and Visual Culture would be most obviously beneficial to students considering graduate studies or careers in Art History, Museum Studies, Museum Education, Arts Administration, Conservation, Cultural Studies, etc. However, the importance of developing visual literacy is being recognized much more broadly in today's digital, image-based world (for example, courses in art history are now required at several top medical schools). Indeed, in many fields visual thinking is considered as crucial as verbal thinking. A Certificate in Art History and Visual Culture would therefore provide a sound complement to any area of studies in the humanities, sciences, or social sciences.

Learning Outcomes:

- Students will cultivate visual literacy - the ability to interpret works of arts & visual culture both as formal structures and in relation to social, political, and cultural contexts - and develop a working knowledge of the vocabulary of art history and criticism.
- Students will learn to effectively use objects as primary sources and to articulate the relevance of art as both evidence of, and stimulus for, historical, social, political, and intellectual movements.
- Students will develop the ability to communicate their knowledge of visual culture both orally and in writing by learning how to synthesize a wide range of primary and secondary sources.

Students will be able to count credit earned in these courses toward their undergraduate major, minor, or distribution requirements, unless otherwise specified in their program's regulations.

Requirements:

This certificate is a **12 credit hour certificate** with one required 3 credit hour course (HIST 2900.03/GWST 2900.03). The remainder of the courses will be selected from a list of 3 credit hour electives. Students have the option to take one of their 3 credit hour electives at NSCAD University.

- HIST 2900.03: Ways of Seeing: An Introduction to Art History and Visual Culture (Cross-listed GWST 2900.03)

And nine additional credit hours drawn from the following list of electives:

Department of Classics:

- CLAS 2214.03: The Roots of Greek Civilization (held every two years)
- CLAS 3021.03: Ancient Art and Architecture from the Pyramids to the Agora

Contemporary Studies Programme:

- CTMP 2316.03: The “Pictorial Turn” in Recent Thought, Art and Theory
- CTMP 2340.03: Theories of the Avant-Garde
- CTMP 3305.03: Modern Film and Theory of the Gaze
- CTMP 3330.03: Art and Atrocity: Contemporary Contexts, Gendered Perspectives

Early Modern Studies Programme:

- EMSP 2215.03: Violence and Wonder: Baroque Art
- EMSP 2230.03: Picture and Poetry in Early Modern Culture
- EMSP 2415.03: The Art of Global Encounters in the Early Modern Period
- EMSP 2510.06: Early Modern Art, Literature, and Politics in Florence, Italy (Summer Study Abroad)
- EMSP 3280.03: Love, lust, and desire in Italian Renaissance Art (Cross-listed GWST 3280.03)
- EMSP 3270.03: Leonardo da Vinci: Between Art and Science (cross-listed HSTC 3270.03)
- EMSP 3290.03: The Renaissance Print and Cross-Cultural Exchange
- EMSP 3350.03: Art, Optics, and Technologies of Illusion (cross-listed HSTC 3350.03)
- EMSP 3640.03: Studies in Early Modern Aesthetics
- EMSP 4501.03: Honours Seminar in Early Modern Studies: The Development of Aesthetic Theory in the Early Modern Period I
- EMSP 4502.03: Honours Seminar in Early Modern Studies: The Development of Aesthetic Theory in the Early Modern Period II
- EMSP 4640.03: Special Topics in Early Modern Aesthetics

Department of English:

- ENGL 2080.03: Cartoons and Comics
- ENGL 2088.03: Images and Texts
- ENGL 3301.03: Graphic Novels
- ENGL 4890.03: Indigenous Graphic Novels

Fountain School of Performing Arts:

- THEA 2401.03: Caves to Castles: Costume and Identity from Antiquity to the High Middle Ages
- THEA 2402.03: Castle to Café: Costume and Identity from 1450 to 1700
- THEA 2412.03: Language of Design
- THEA 3402.03: Baroque to Bustles: Costume from 1700 to 1900
- THEA 3403.03: Bustles to Boardrooms: Costume and Identity from 1900- Present Day

Film

- FILM 2301.03: Film History I
- FILM 2311.03 Film Analysis
- FILM 3301.03: Film History 2
- FILM 3370.03: Animated Film: Technologies, Characters and Society

Department of History:

- HIST 2042.03: Capital of Europe: Paris in the Nineteenth Century
- HIST 2900.03: Introduction to Art History and Visual Culture
- HiST 3212.03: A History of Indigenous Visual and Material Culture
- HIST 3215.03: Indigenous Textiles: Tourism, Industry, Globalization
- HIST 3303.03: De-Colonizing Modernism: Critiquing the Legacy of Modern Art (Cross-listed GWST 3303.03)
- HIST 4162xy.06: Advanced Seminar in Baroque Culture (taught in the Czech Republic)
- HIST 4175.03: Bella Figura: Display Behaviours in Baroque Europe
- HIST 4210.03: Museums, Archives, and Material Culture (cross-listed INDG 4210)
- HIST 4303.03: The Birth of Pop: How Victorian Visual Culture Makes Meaning (Cross-listed GWST 4303.03)

History of Science and Technology Programme:

- HSTC 4120.03: Artefacts: The Material Culture of Science and Technology

Indigenous Studies:

- INDG 3400.03: Contemporary Indigenous Art (Cross-listed CANA 3400.03)

Department of Philosophy:

- PHIL 2260.03: Philosophy of Art

Certificate in Computing in Arts & Social Sciences

This certificate is open to currently registered Dalhousie undergraduate students in the Faculty of Arts and Social Sciences; it will not be open for direct application.

Designed for students in the arts, social sciences, and humanities, this certificate program is intended to develop participants' digital literacy. Students will develop and apply technical computing skills and also explore key social and intellectual issues in an increasing digital world. This program will give students important skills for future employment and will impart the tools they will need to understand and navigate a rapidly changing society.

This certificate can be completed by students in any BA program, in addition to the students' regular program requirements, and will appear on the students' transcripts. Note, too, that courses completed for this certificate can also count toward regular degree requirements for a student's major or minor, depending on the subject.

Students can enrol in the certificate by logging in to [Dal Online](#): under "Web for Students", click on 'Admissions' then 'Declare a Major or Minor', and at the bottom of that screen, click on the appropriate link in the drop-down list of certificate options.

Requirements:

12 credit hours:

- Students will complete the following 9 credit hours:
 - CSCI 1105: Introduction to programming
 - CSCI 1170: Introduction to Website development
 - CSCI: 2203: Data Science for Everyone
- plus 3 credit hours from the following list of applied skills courses:
 - CSCI 1107.03: Social Computing
 - CSCI 1109.03: Practical Data Science
 - PHIL 2490: Social, Ethical and Professional Issues in Computer Science
 - CSCI 2201.03: Introduction to Information Security
 - CSCI 2670.03: Introduction to Server-Scripting
 - ENGL 3310.03: Writing in a Digital Age
 - MGMT 2601.03: Knowledge Management
 - MGMT 3601.03: Information in a Networked World
 - MGMT 3603.03: Beyond Google
 - MGMT 4540.03: Data Management
 - MGMT 4620.03: Web Design and Architecture

Learning Outcomes:

- Students will become familiar with simple programming concepts and apply them.
- Students will become familiar with and use typical software applications such as word processors, spreadsheets, and database applications.
- Students will become familiar with and practice web page creation.
- Students will critically appraise scholarly literature on ethical and intellectual issues with computing as it exists today.

Questions? Contact the Associate Dean Academic of the Faculty of Arts and Social Sciences at fassadac@dal.ca or at 902.494.1254.

Certificate in Dance and Movement

Certificate in Dance and Movement

This Certificate is open to currently registered Dalhousie and King's students in all Faculties.

Contact / Coordinator: Associate Director, Theatre (fspa.theatre@dal.ca)

The Certificate in Dance and Movement introduces students to the broad context of dance as a performance art and to the various skills that encompass movement and dance techniques. Through both practical and theoretical studies, students will develop an understanding of dance composition and movement for the stage, and will develop the vocabularies necessary to communicate in the field of dance and movement. This Certificate will be of interest to any Dalhousie or King's student who wishes to expand their knowledge of Dance and Movement, gain foundational performance skills, and improve physical wellness.

Learning Outcomes:

Upon completion of the Certificate, students will:

- Achieve proficiency in the basic skills of the performing artist: interaction with the performing space, creation of character through movement and gesture, collaboration, and ensemble-building.
- Understand the broad vocabularies of dance and movement techniques.
- Learn a variety of dance and movement techniques through practical application.
- Gain a foundation in dance composition and be able to create choreographic sequences.
- Develop confidence as performers by participating in a range of in-class and public performance opportunities.
- Improve physical skills and wellness through exploration of alignment, healthy movement, and mind-body connection.
- Gain an appreciation for, and be able effectively to explain both orally and in writing, the historical development of various dance styles and their importance to the cultures in which they developed.

Students can count credit earned in these courses toward their undergraduate major, minor, or distribution requirements, unless otherwise specified in their program's regulations.

Requirements:

This Certificate is a 15-credit-hour certificate. All students must complete:

- THEA 1801.03 and THEA 1802.03
- EITHER:
 - THEA 2821.03 and 2822.03 **OR**
 - THEA 2020.06 **OR**
 - THEA 2021.03 and THEA 2022.03
- PERF 3830.03

NOTE: Students who wish to do so may also apply to take THEA 4201.03 (Short Apprenticeship); THEA 4202.06 (Long Apprenticeship, one term); or THEA 4903.03 (Long Apprenticeship a) and THEA 4904.03 (Long Apprenticeship b) as higher-level electives to add a further component of Experiential Learning to their Certificate in Dance and Movement. Students who wish to add one of these classes to their Certificate must apply to the Fountain School of Performing Arts (FSPA) via an application form available from the FSPA Main Office, the Associate Director for Theatre, or the Certificate Coordinator. Entrance into these classes is by application only, and approval is given on a case-to-case basis. These electives are optional and are **not** required for completion of the Certificate.

Certificate in Data Analytics

Offered by: Faculty of Science

Coordinator: Dr. Theodore Kolokolnikov, Mathematics and Statistics (tkolokol@mathstat.dal.ca)

Eligibility: Open to Dalhousie undergraduate students

Overview: Data Analytics is an interdisciplinary field aimed at extracting knowledge from data of various forms. The techniques of data analytics draw heavily from the fields of statistics, computer science, and mathematics. Students completing the certificate will understand distinctions among data, information and knowledge, will be able to use the Structured Query Language (SQL) to manipulate relational databases, the R programming language to model data using a variety of machine learning and statistical models, and will be able to assess the performance of predictive models.

Admission to Certificate

To enrol in the *Certificate in Data Analytics*, students must declare the certificate through Dal Online (<https://dalonline.dal.ca>>Web for Students > Admissions > Declare Major/Minor/Certificate), and notify the Certificate Coordinator by email.

To graduate with the Certificate, students must apply to Graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate requirements:

- MATH 1000: Differential and Integral Calculus I (or MATH 1215 or MATH 1280)
- MATH 1030: Matrix Theory and Linear Algebra I
- MATH 2040: Matrix Theory and Linear Algebra II (or MATH 2135)
- STAT 1060: Introduction to Statistics (or STAT 2060)
- STAT 2450: Introduction to Data Mining with R
- CSCI 2202: Computer Modeling for Scientists (or CSCI 1105 or CSCI 1110)
- CSCI 2141: Introduction to Database Systems
- One of
 - BIOC 4010: Bioinformatics
 - BIOL 4062: Analysis of biological data
 - CHEM 4205: Chemometrics
 - CSCI 4146: The process of data science
 - ECON 4440: Time series analysis in economics
 - ENVS 3100: Environmental analytics

- EARTH 4520: GIS applications
- MARI 4600: Ecosystem modelling for aquaculture
- OCEA 4210/STAT 4390: Time series analysis in oceanography and meteorology
- PHYC 3250: Computational methods in physics
- PHYC 4250: Topics in numerical computing
- STAT 4130: Bayesian data analysis
- STAT 4350: Applied multivariate analysis
- STAT 4550: Longitudinal data analysis
- STAT 4620: Data analysis
- STAT 4100: Survival analysis

Certificate in Environmental Impact Assessment

Offered by: Faculty of Science

EIA Certificate Coordinator: Patricia Lane (Biology), patricia.lane@dal.ca

The **Certificate in Environmental Impact Assessment** is for students who are interested in, or majoring in environmental areas, and who wish to pursue additional training in EIA. This certificate is available to students in the Faculty of Science, Faculty of Agriculture, Faculty of Architecture and Planning, Faculty of Arts and Social Sciences, Faculty of Management, and the College of Sustainability.

Students will learn to:

1. Apply a Project EIA Framework in the preparation of a Nova Scotia - based EIA.
2. Demonstrate an understanding of relevant federal and provincial (Nova Scotia) legislation.
3. Design a meaningful stakeholder participation program.
4. Use environmental impact and risk methodologies to accurately predict project impacts.
5. Design an Environmental Management Plan that includes: mitigation, enhancement, compensation, monitoring, residual impacts and project accountability.
6. Prepare a comprehensive project EIA for a physical project
7. Prepare a Strategic Environmental Assessment (SEA) for a federal policy.

Disclaimer: This EIA Certificate was developed within Dalhousie University and it is not designed to fulfill any governmental and/or professional requirements outside of the university, in Canada or abroad.

The Certificate requires a total of 24 credit hours as follows:

1. Required EIA course: BIOL 4001.03/ENVS 4001.03 (3 credit hours) to be taken in fourth year. Note: transfer or online courses are not acceptable substitutes for this requirement.
2. Introductory Science, SUST, Agriculture, or FASS course (minimum 3 credit hours) from Table 1.
3. Environmental courses with theoretical content from Table 2 (minimum 9 credit hours).
4. Methods courses with field, laboratory, statistical, or modelling experience from Table 3 (minimum 3 credit hours).
5. Supplementary courses in Major or Related Disciplines from Table 4 (minimum 6 credit hours).

Students must obtain a minimum grade of B for all courses counted toward the certificate.

Classes cannot be substituted from one table to another. Please note that many classes are cross-listed, but only listed once for the department offering the class below. Students can use any one of the cross-listings.

Table 1. Introductory Courses Checklist (minimum of 3 credit hours from following list)

BIOL 2060.03: Introductory Ecology **OR** BIOA 3001.03: Ecology

ENVA2000.03/APSC2012.03: Environmental Studies I

ENVA2001.03: Environmental Studies II

ENVS 1100.03: Foundations of Environmental Science

ENVS 1200.03: Current Environmental Challenges: Analysis and Solutions

ERTH 2410.03/ENVS 2410.03: Environmental Issues in Earth Science

GEOG 2100.06/SOSA 2100.06: Environment and Culture

INTD 2001.03/GEOG 2201.03: Introduction to Development 1

INTD 2002.03/GEOG 2202.03: Introduction to Development 2

OCEA 2001.03 and OCEA 2002.03: The Blue Planet

SUST 2000.06: Local Governance, Citizen Engagement, and Sustainability

SUST 2001.06: Global Environmental Governance

Table 2. Theory-Based Courses Checklist (minimum of 9 credit hours from following list)

AQUA2000.03: Introduction to Aquaculture

APSC 2000.03 Environmental Impacts and Resource Management

APSC2004.03/AQUA2004.03: Aquacultural Environment

APSC 3020.03 Energy Production and Utilization

Certificate in Genetics

Offered by: Biochemistry & Molecular Biology, Biology, Microbiology & Immunology

Coordinators:

Dr. Claudio Slamovits claudio.slamovits@dal.ca (Biochemistry & Molecular Biology)

Debra Grantham grantham@dal.ca (Biology)

Dr. Ian Weaver ian.weaver@dal.ca (Medical Sciences, Psychology, Neuroscience)

Dr. Zhenyu Cheng zhenyu.cheng@dal.ca (Microbiology & Immunology - Until December 2020)

Dr. Lois Murray lois.murray@dal.ca (Microbiology & Immunology - As of January 2021)

The Certificate in Genetics provides students with an opportunity to complete a set of courses and research that will accord them recognition of specialization in genetics.

Admission to Certificate

Students should enrol in the Certificate in Genetics in their third year of studies, when they are seeking approval of the independent research component from the Certificate Coordinator for their degree program. To enrol in the *Certificate in Genetics*, students must declare the certificate through Dal Online (<https://dalonline.dal.ca> >Web for Students>Admissions>Declare Major/Minor/Certificate), and notify the Certificate Coordinator. To qualify for the certificate students must complete all course requirements, **and** have received approval for the research component prior to the start of the research course.

To graduate with the Certificate, students must apply to graduate with a certificate at the time they apply to graduate from their degree program.

Certificate requirements:

1. A minimum grade of a B- in four mandatory courses:

- BIOL 2020.03: Cell Biology
- BIOL 2030.03: Genetics and Molecular Biology
- BIOC 2300.03: Introduction to Biochemistry
- BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology

2. A minimum grade of B- in 12 credit hours chosen from the following list. At least 6 credit hours must be at the 4000 level.

2000 level

- BIOL 2040.03: Evolution

3000 level

- BIOL 3036.03: Transgenic Organisms
- BIOL 3037.03: Life Rewritten: Applications and Implications of Gene Editing and Synthetic Biology
- BIOL 3042.03/MARI 3042.03: Molecular Ecology
- BIOL 3044.03: Ecological Genetics
- BIOL 3046.03: Molecular Evolution
- BIOL 3102.03: Microbial Eukaryotes: Biodiversity and Evolution
- MICI 3114.03: Virology
- MICI 3119.03: Physiology of the Prokaryotic Cell
- NESL 3670.03/PSYO 3670.03: Genes, Brain and Behaviour

4000 level

- BIOC 4010.03: Bioinformatics
- BIOC 4027.03/MICI 4027.03: Molecular Mechanisms of Cancer
- MICI 4033.03: Advanced Microbial Genetics
- MICI 4114.03: Advanced Topics in Molecular and Medical Virology
- BIOC 4403.03: Genes and Genomes
- BIOC 4404.03: Gene Expression
- BIOC 4501.03: Medical Biotechnology
- BIOC 4835.03/BIOL 4035.03: Human Genetics
- NESL 4670.03: Behavioral Neuro(epi)genetics and Genomics

3. Other required courses (prerequisites for BIOC 3400.03)

- CHEM 2441.03, or CHEM 2401.03 and CHEM 2402.03

4. A minimum grade of B- in three credit hours or more of independent research on a topic involving microbial genetics, molecular genetics, transmission genetics or population genetics. Co-op Work Terms are not applicable. The research topic must be pre-approved by the Department's Certificate Coordinator prior to the start of the research course.

- BIOC 4001.03
- BIOC 4604.03
- BIOC 4605.03
- BIOL 4806.03/MARI 4806.03

- BIOL 4807.03/MARI 4807.03
- BIOL 4900.06/MARI 4900.06
- BIOL 4901.03/MARI 4901.03
- BIOL 4902.03/MARI 4902.03
- MICI 4703.03 and MICI 4704.03 (or MICI 4700X/Y.06)
- MICI 4701.03
- MICI 4702.03
- MICI 4901.03 and MICI 4902.03 (or MICI 4900X/Y.06)
- MICI 4901.03
- MICI 4902.03
- NESC 4501.03 and NESC 4502.03 OR PSYO 4501.03 and PSYO 4502.03 (or NESC 4500X/Y.06/PSYO 4500X/Y.06)
- SCIE 4101.03 and SCIE 4102.03 (or SCIE 4100X/Y.06)
- SCIE 4901.03 and SCIE 4902.03 (or SCIE 4900X/Y.06)

Certificate in Geographic Information Science (GIS)

Offered by: Earth Sciences, Environmental Sciences, Biology

Coordinators:

Dr. C.S Greene csgreene@dal.ca (Earth and Environmental Sciences)

Dr. D. Tittensor Derek.Tittensor@dal.ca (Biology)

Dr. E. Rapaport eric.rapaport@dal.ca (School of Planning)

The GIS Certificate program provides training and experience in geographic information science as part of an undergraduate degree program, usually in Earth Sciences, Environmental Science or Biology, and prepares students for further study or employment in the area. The Certificate requires the completion of GIS-related courses and completion of a major project that involves work with geographic information systems and geomatics.

Admission to Certificate

It is recommended that students enrol in the GIS Certificate in their second or third year of studies, and that they contact the Certificate Coordinator at that time. To enrol, students must declare the Certificate through Dal Online (<https://dalonline.dal.ca> >Web for Students>Admissions>Declare Major/Minor/Certificate). To qualify for the Certificate, students must complete all course requirements, *and* have received approval for the research component (project) from the Certificate Coordinator if intending to use an alternative to the Geographic Information Science Research course to satisfy the research component of the certificate.

To graduate with the Certificate, students must apply to graduate with a certificate at the time they apply to graduate from their degree program.

Certificate Requirements:

1. A minimum grade of B- in each of the following courses:

- ENVS 3500.03/ERTH 3500.03/GEOG 3500.03: Geoscience Information Management
- ERTH 4520.03/GEOG 4520.03: GIS Applications to Environmental and Geological Science

2. A minimum grade of B- in a minimum of two of the following courses:

- GEOG 2000.03: Cartography
- GEOG 2006.03: Space, Place and GIS
- BIOL 3633.03/ENVS 3633.03/GEOG 3633.03: Spatial Information and GIS in Ecology
- ERTH 4530.03/GEOG 4530.03: Environmental Remote Sensing
- ENVS 2100.03: Environmental Informatics
- ENVS 3100.03: Environmental Analytics
- ENVS 3400.03/GEOG 3400.03: Environment and Human Health

3. Completion of a research project with an emphasis in geographic information science via one of the following sets of courses (minimum grade of B-). Research topics must be pre-approved by the Certificate Coordinator

Set 1

- SCIE 4850.03/BIOL 4850.03/ENVS 4850.03/GEOG 4850.03: Geographic Information Science Research Project

Set 2

- BIOL 4901.03 and BIOL 4902.03 or MARI 4901.03 and MARI 4902.03: Honours Thesis (or the former BIOL 4900.06/MARI 4900.06)
- ENVS 4901.03/ENVS 4902.03: Honours Thesis
- EARTH 4101.03 and EARTH 4102.03: Research Project (or EARTH 4100.06)
- EARTH 4201.03 and EARTH 4202.03: Honours Thesis (or EARTH 4200.06)
- SUST 4800.03: Independent Study
- SUST 4901.03 and SUST 4902.03: Honours Thesis (or SUST 4900.06)

Research Project Guidelines for the Certificate in Geographic Information Science

Students should learn how to design, manage and complete a research project that emphasizes the use of a geographic information system (GIS). Students will identify a suitable research problem and work to solve it through acquiring, organizing, analyzing and presenting data using GIS. A substantive analytical component involving GIS must be included. Projects should be undertaken after all or most of the coursework is completed, e.g. students should already be familiar with GIS concepts and functions, and be proficient in the use of at least one GIS package. Supervision and evaluation of research projects must include input from a professor or GIS technician competent in geographic information science, methods and technologies.

Students enrolled in an undergraduate program other than Biology, Environmental Science, Earth Sciences or the College of Sustainability, may be able to complete the project through a directed readings or honours thesis course listed within their home department. The project must be pre-approved by a Certificate Coordinator. Non-thesis students, or honours students who wish to complete the certificate through a project that is not part of their thesis, who are in Biology, Earth Sciences or Environmental Science should complete the project through SCIE 4850: Geographic Information Science Research Project.

Certificate in Heritage Studies

The Certificate in Heritage Studies (CHS) affords students an added dimension to their undergraduate degree, exposing them to professional settings and ways of applying historical knowledge through experiential, community-engaged and work-integrated learning. The purpose of the certificate is to provide students with theoretical knowledge and practical experience in the heritage sector. Upon completion, students will benefit from a certificate that will accompany their degree and illustrate their added knowledge, skills, and experience to potential employers and institutions.

The Certificate in Heritage Studies is a 12- credit hour certificate, comprised of course work and an institution-focused project. Students must have completed their first year of university (or 30 credit hours) and be in good academic standing, with an average of B or better, to enroll in the certificate program.

Requirements:

1. HIST 2950.03, Introduction to Heritage Studies and Public Humanities
2. Six credit hours from a list of approved electives to provide additional historical context and/or theoretical engagement with public uses of history and heritage, to prepare them to make best use of the capstone experience.
3. HIST 4710.03, Heritage Studies: Capstone. This will be a final, three credit hour seminar requiring students to apply the skills and knowledge gathered from the program to an institution-focused project. Each student will develop a project that will necessitate them drawing on the resources of a particular local institution (e.g., Pier 21, Nova Scotia Museum sites, Dalhousie Archives, etc.) without having to be hired or formally placed. The certificate coordinator will guide students through this capstone project seminar, usually in the fall semester of their final year of study.

Electives (Note that not all courses on this list are offered each year):

Department of Sociology and Social Anthropology:

SOSA 2052.03 Contemporary Issues in Indigenous Studies

SOSA 2111.03 Is there an Atlantic Canada?

SOSA 2115.03 African Canadian Society, Culture, and Resistance

SOSA 2191.03 Gender Across Cultures

SOSA 3015.03 Popular Memory

SOSA 3185.03 Issues in the Study of Indigenous Peoples of North America

SOSA 3284.03 Living in Cities

Department of History:

HIST 2205.03 Historical Issues in Indigenous Studies

HIST 2210.03 Many Canadas: Canada, 1930 to the present

HIST 2235.03 History of Canadian Culture

HIST 2272.03 Atlantic Canada since Confederation: Regionalism, Identity, and Development

HIST 2280.03 African Nova Scotian History

HIST 2900.03 Ways of Seeing: An Introduction to Art History & Visual Culture

HIST 3210.03 Canadian Cultural Landscapes

HIST 3215.03 Indigenous Textiles in Canada: Tourism, Industry, Identity

HIST 3274.03 Nova Scotia: Post-Confederation

HIST 3282.03 Public History

HIST 3302.03 Technology and History in North America

HIST 4250.03 Popular Culture in the Atlantic World, 1650-1850

HIST 4210.03 Museums, Archives, and Material Culture

HIST 4162.03/THEA 4360.03/MUSC 4360.03, Advanced Seminar in Baroque Culture [taught at the UNESCO World Heritage Site, the State Castle in Cesky Krumlov]

Indigenous Studies:

INDG 3050.03 Indigenous Research Methodologies and Knowledge Practices

INDG 3401.03 Indigenous Representation in Film

Department of Political Science:

POLI 2215.03 Canadian Aboriginal Politics: An Institutional Perspective

Department of English:

ENGL 2006.03 Cultural Studies

Contemporary Studies Programme:

CTMP 2316.03 The “Pictorial Turn” in Recent Thought, Art and Theory

CTMP 3322.03 Representations of the Holocaust: Remembrance

Canadian Studies Program:

CANA 2002.03 The Idea of Canada: Cultural and Literary Perspectives

Certificate in Indigenous Studies

This certificate is open to currently registered Dalhousie students in all Faculties; it is not yet open for direct application.

The Certificate in Indigenous Studies is a 9 credit hour certificate with two core 3 credit hour courses and a choice of one of three 3 credit hour courses.

Requirements:

- HIST 2205.05/INDG 2050.03/CANA 2050.03: Historical Issues in Indigenous Studies
- INDG 2052.03/CANA 2052.03/SOSA 2052.03: Contemporary Issues in Indigenous Studies
- Plus one of the following three courses:
 - INDG 3050.03/CANA 3050.03: Indigenous Research Methodology & Knowledge Practices
 - INDG 3052.03/CANA 3052.03/SOSA 3052.03: Indigenous Social, Health, and Environmental Issues
 - IPHE 2201: Introduction to Aboriginal Peoples' Health and Healing

Students will be able to count credit earned in these courses toward their undergraduate major, minor, or distribution requirements, unless otherwise specified in their program's regulations.

Learning Outcomes:

- Students will become familiar with Indigenous perspectives on historical and contemporary political, social, and economic issues.
- Students will learn about the Indian Residential School system and the implications of the Truth and Reconciliation Commission of Canada's Calls to Action.
- Students will become familiar with Indigenous models of research.
- Students will attain basic competencies in protocols of working with Indigenous groups or in Indigenous communities.

Contact [Indigenous Studies](#) for more information.

Certificate in Information Technology

Offered by: Physics

Coordinator: Dr. Philip Bennett philip.bennett@dal.ca

The goal of this certificate is to recognize students who have completed courses with a substantial Information Technology (IT) component, and to provide these students with a document to present to potential employers who seek graduates with IT skills. Depending on the program of study, students may work with symbolic calculation packages such as MATLAB or MAPLE, statistical packages such as R or S-Plus, numerical computation or programming languages. Others develop proficiency in web design, or use of database, drawing (e.g. CAD) or GIS software. Experience with a variety of hardware and operating systems experience may further round out the set of skills.

The Certificate in IT is a discipline-based program available to students majoring in Physics.

Admission to Certificate

To enrol in the *Certificate in Information Technology*, students must declare the certificate through Dal Online (<https://dalonline.dal.ca> > Web for Students > Admissions > Declare Major/Minor/Certificate), and notify the Certificate Coordinator by e-mail.

To graduate with the Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate Requirements (Physics):

- Completion of a 120 credit hour Major or Honours degree program in Physics
- Two of PHYC 2050.03, PHYC 3250.03, PHYC 4250.03
- One additional course which may be a CSCI or INFX course, ENGM 1081.03 or MATH 2300.03

Certificate in Intercultural Communication

The Certificate in Intercultural Communication is open to students from any Faculty at Dalhousie, and welcomes both Canadian and International students. It offers the globally-minded student an opportunity to combine academic and experiential learning in order to understand and communicate more effectively with people from cultures different from their own.

Contact Person: Dr. Rebecca Babcock
Location: McCain 3030
Contact information: (902) 494-1440 CIC@dal.ca
Website: dal.ca/cic

Academic Components

(graduate students may receive advance standing for these components)

1. One full academic credit focusing on the understanding of culture, chosen from the list below.
2. Foreign/second language at or beyond the 2000 level or equivalent N.B. This requirement is satisfied:
 1. by taking foreign/second language courses at Dalhousie at the second-year level
 2. if the student is a native speaker of a language other than English and studying at Dal
 3. by non-credit community-based learning of such languages as Mi'kmaq or American Sign Language

N.B. Approval of the advisor is required for those students wishing to satisfy this requirement by options (II) or (III) above.

Extended Experiential Component

1. Minimum one semester work or study abroad (or at Dalhousie for international students)
OR
2. Minimum (75 hours) volunteering or working in an intercultural context within Canada

N.B. Students may satisfy this requirement by a blending of work/study abroad for less than one full semester and a local volunteer or work placement. Students wishing to satisfy this requirement by a volunteer or work placement, or a blend of study abroad and work/volunteer placement, need the approval of the advisor.

Theoretical and practical understanding of issues in intercultural communication (three credit hours required: ASSC 3150.03).

Courses satisfying the Academic credit (six credit hours required):

- ARBC 2100.03/RELS 2052.03: A Cultural Intro to Arab World
- CANA 1102.03/INTD 1102.03: Halifax and the World I
- CANA 1103.03/INTD 1103.03: Halifax and the World II
- CANA 2050.03/HIST 2205.03: Historical Issues in Indigenous Studies
- CANA 2052.03/SOSA 2052.03 Contemporary Issues in Indigenous Studies
- CANA 3001.03/INDG 3400.03: Contemporary Indigenous Art
- CANA 3401.03/INTD 3401.03: Indigenous Representation in Film
- CANA 3050.03/INDG 3050.03: Indigenous Research Methodology & Knowledge Practices
- CANA 3052.03/INDG 3052.03/SOSA 3052.03: Indigenous Social Health and Environmental Issues
- CHIN 2050.03/SOSA 2051.03: Chinese Culture
- CHIN 2052.03/CTMP 2336.03: East Meets West in Popular Culture
- CHIN 2080.03/EMSP 2450.03: The East is Read: Early Modern Concepts of Asian Thought

Certificate in Materials Science

Offered by: Faculty of Science

Coordinator: Dr. Mita Dasog (Chemistry) mita.dasog@dal.ca

The Certificate in Materials Science provides recognition for students who have had significant training in the breadth and depth of materials science within their 120 credit hour Honours or Major program. It is particularly suited for students in Chemistry, Earth Sciences and Physics programs.

Admission to Certificate

To enrol in the Certificate in Materials Science, students must declare the certificate through Dal Online (<https://dalonline.dal.ca> > Web for Students > Admissions > Declare Major/Minor/Certificate), and notify the Certificate Coordinator by e-mail. Students may enrol in the second, third or fourth year of their programs, but early enrolment is advised.

To graduate with the Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate Requirements

1. At least four of the following courses, with a minimum grade of B- in each:

CHEM 3305.03/PHYC 3303 (or CHEM 3303.03): Materials Science

CHEM 4302.03: Intro to Surface Science

CHEM 4502.03: Polymer Science

CHEM 4311.03: Fundamental and Applied Electrochemistry

CHEM 4105.03: Inorganic Materials Synthesis

ERTH 2001.03: Earth Materials Science I

ERTH 2002.03: Earth Materials Science II

PHYC 3900.03: Introduction to Soft Condensed Matter Physics

PHYC 4230.03: Introduction to Condensed Matter

BIOE 4391.03: Polymeric Biomaterials

BMNG 5110.03: Biocompatibility and Biomaterials Design

2. Students must complete a research project with a materials emphasis (pre-approved by the Certificate Coordinator) via one of the following sets of courses, with a minimum grade of B-:

- CHEM 4801.03 and CHEM 4802.03
- CHEM 4902.03 and CHEM 4903.03 (or CHEM 4901.06)
- EARTH 4201.03 and EARTH 4202.03 (or EARTH 4200.06)
- EARTH 4101.03 and EARTH 4102.03 (or EARTH 4100.06)
- PHYC 4800.03 and PHYC 4850.03

Certificate in Medical Humanities

This Certificate is open to currently registered Dalhousie and King's students in all Faculties, as well as to Special Undergraduate students who meet the entrance requirements for the Bachelor of Arts degree.

Contact / Coordinator: Sharon Brown (sharon.brown@ukings.ca)

The field of studies described in scholarly literature by the names “Medical Humanities” or “Health Humanities” is a wide-ranging, interdisciplinary field that explores the complex relationships between medicine, health, society, and culture across a range of times and places. The Dalhousie / King's Certificate in Medical Humanities is designed for anyone who wishes to learn more about the ways in which global human societies have constructed and engaged with health, wellness, medicine, illness, healing, and the body in the past; it also invites students to explore the means by which human societies might deepen their comprehension of these crucial concepts in the future.

This certificate will be of interest to students who are considering entering Medicine or the Health Professions and who wish to expand their knowledge of medicine's interactions with human societies and forms of cultural expression. It will help these students to think critically about medicine's past and future roles in human life, about changing definitions of health and illness, and about the interactions that affect the patient experience. It will also be of interest to students in the Arts, Social Sciences, and Sciences who wish to engage more thoughtfully and critically with the constructions of health and illness that shape our everyday lives, as well as with the health-related challenges that face contemporary civil society. Finally, the program will be of interest to members of the general public who wish to deepen their understanding of the past, present, and future of medicine, health, and healing in human cultures.

Learning Outcomes:

Upon completion of the Certificate, students will be able to:

- Recognize and apply multiple definitions of key medical and health-related concepts, understanding their relationship to wider social, cultural, and historical contexts,
- Situate the theory and practice of modern medicine within diverse historical contexts,
- Understand conceptions of health that have shaped non-Western as well as Western societies, having completed at least one course that includes a substantial focus on non-Eurocentric material,
- Formulate conceptions of contemporary medical and health-related practices grounded in a critical understanding of key social and/or political factors that have shaped the construction and experience of medicine and health in past and present cultures,
- Approach the experiences and roles of patients, caregivers, and health professionals in a more informed and respectful manner thanks to a deepened knowledge of the ways these roles have been considered and represented in philosophical, literary, and/or artistic works across time,
- Ask vital questions about the ethical and social implications of health policy, practice, and decision-making, and
- Express their critical thinking about these concepts orally, in writing, and through visual forms of communication in order to engage effectively not only with academic audiences but also with the wider public (eg, patients, political and governmental bodies, online audiences, etc) about questions of medicine, illness, health, and wellness.

Students can count credit earned in these courses toward their undergraduate major, minor, or distribution requirements, unless otherwise specified in their program's regulations.

Requirements:

This Certificate is a 12-credit-hour certificate. Its requirements are as follows:

Core Area 1: History of Medicine

All students **must** take the following course:

- HSTC 2102.03: History of Modern Medicine

Core Area 2: Medicine and Social Sciences

Students are required to choose **one** 3-credit-hour course from the following options:

- INTD 3115.03: Global Health: Challenges of Global Health Equity in the 21st Century
- SOSA 2502.03: Biomedicine and the Illness Experience
- SOSA 2503.03: Health and Society
- SOSA 2933.03: Health and Culture
- SOSA 3143.03: Health, Illness, and the World System
- SOSA 3145.03: Gender and Health
- POLI 4260.03: The Politics of Health Care
- POLI 4466.03: The Social and Political Construction of Health and Medicine

Core Area 3: Medicine and the Humanities

Students are required to choose **one** 3-credit-hour course from the following options:

- ENGL 2030.93: Literature, Health and Healing
- ENGL 3320.03: Literature and Medicine
- HSTC 2202.03: The Beginnings of Western Medicine: The Birth of the Body
- PHIL 2805.03: Ethics and Health Care: Patient Care
- PHIL 2810.03: Ethics and Health Care: Social Policy

Elective Courses

Students are required to choose **one** 3-credit-hour elective course from the following options:

- CANA 4300.03: Canadian Healthcare Delivery System
- CTMP 2301.03: Pain
- CTMP 2203.03/HSTC2206.03: Biopolitics: Human Nature in Contemporary Thought
- CTMP 2330.03: Reflections on Death
- CTMP 3130.03: The Thought of Michel Foucault
- CTMP 4301.03: Freud, Lacan, and the Critique of Psychoanalysis
- ECON 2231: Perspectives in Health Economics
- ECON 3231: Topics in Health Economics
- EMSP / GWST / HSTC 2310.03: Women and Gender in Early Modern Science
- EMSP / HSTC 2350.03: The Body in Early Modern Europe
- EMSP / HSTC 3310.03: Hidden Worlds: Microscopy in Early Modern Europe
- FREN 3400.03: Love and Death
- GWST 2412.03: Human Sexuality
- HSTC 3101.03/CTMP 3204.03: Human Experiments
- HSTC 3121/ EMSP 3321/ RELS 3121/ HIST 3990:
In Search of the Philosopher's Stone: The History of European Alchemy
- HSTC 4301.03: History of Neuroscience
- INDG 3052.03: Indigenous Social, Health, and Environmental Issues

- PHIL 3800.03: Philosophy of Medicine
- PHIL 4801.03: Topics in Ethics and Health Care
- PSYO 3581: History of Psychology I
- PSYO 3582: History of Psychology II
- SOSA 3135.03: The Social Organization of Health Care
- SOSA 3147.03: Aging Cross-Culturally
- SOSA 3148.03: The Sociology of Addiction: Drugs, Health and Society
- SOSA 3150.03: Sociology and Anthropology of the Body
- SOSA 3245.03: Women and Aging
- SOSA 4006.03: Issues in Critical Health Studies

Certificate in Medicinal Chemistry

Offered by: Faculty of Science

Coordinator: Dr. Alison Thompson alison.thompson@dal.ca (Chemistry)

The Department of Chemistry offers a Certificate in Medicinal Chemistry in conjunction with its Major and Honours programs. This certificate is intended to reflect that the student has completed a course of study in chemistry that is appropriate for employment or further study related to pharmaceutical development and production.

Admission to Certificate

To enrol in the *Certificate in Medicinal Chemistry*, students must declare the certificate through Dal Online (<https://dalonline.dal.ca> > Web for Students > Admissions > Declare Major/Minor/Certificate), and notify the Certificate Coordinator by e-mail.

To graduate with the Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate Requirements:

- Completion of a 120 credit hour program in Chemistry (Honours, Combined Honours, Major, Double Major)
- CHEM 2101.03, CHEM 2201.03, CHEM 2301.03, CHEM 2304.03, CHEM 2401.03, CHEM 2402.03
- CHEM 3203.03, CHEM 3401.03, CHEM 3404.03, CHEM 3601.03
- CHEM 4401.03, CHEM 4601.03
- Any two of: CHEM 3301.03, CHEM 4205.03, CHEM 4206.03, CHEM 4301.03, CHEM 4402.03

Recommended Electives: BIOC 2300.03, BIOC 2610.03, BIOC 3700.03, BIOC 4701.03

Certificate in Neurotechnology Innovation

Offered by: Faculty of Science

Coordinator: Dr. Aaron Newman, Department of Psychology and Neuroscience (aaron.newman@dal.ca)

Overview Neurotechnology is an area of research and application involving technologies that measure and/or modulate brain function. Technologies include hardware, software, and drugs, and have applications in several areas including clinical diagnosis and treatment, health promotion and maintenance (including cognitive health), entertainment, and forensics. The undergraduate certificate in Neurotechnology Innovation is designed to provide foundational knowledge in this multi-disciplinary area. The certificate will also provide an understanding of how neurotechnologies can be translated into applications that are available to patients and consumers - through training in innovation, design, and commercialization. The Neurotechnology Innovation certificate provides students with knowledge in:

- Basic neuroscience
- Neurotechnology
- Clinical and cognitive neuroscience
- Computer science
- Entrepreneurship
- Innovation and product design
- Intellectual property

Eligibility The Certificate is oriented toward undergraduate students majoring in Neuroscience, but is open to students in other programs. Students from outside the Faculty of Science (Arts & Social Sciences, Computer Science, Engineering, Management) are welcome, but should consult with an advisor from their home program prior to enrolling.

Admission To enrol in the *Certificate in Neurotechnology Innovation*, students must declare the certificate through Dal Online (<https://dalonline.dal.ca> > Web for Students > Admissions > Declare Major/Minor/Certificate).

To graduate with the Certificate, students must apply to Graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate Requirements

The certificate requires completion of 18 credit hours of coursework, in addition to the prerequisites that any of the required courses have. The certificate will be awarded based on successful completion of all of the student's degree requirements, as well as the following courses required for the certificate. Students should consult the University Calendar and departmental requirements for their major regarding the limitations that may be imposed upon the number of credit hours taken outside of the Faculty in which they are majoring, as well as prerequisites for the courses required for the certificate

1. Successful completion of courses from each of the three following sections, as detailed below (or courses deemed equivalent by the Certificate Coordinator):

(a) NESC 2470 Systems Neuroscience or

PSYO 2770 Brain and Behaviour

(b) At least one of

NESC/PSYO 3505 Neural Data Science

CSCI 1105 Introduction to Programming

CSCI 1110 Introduction to Computer Science

CSCI 2202 Introduction to Programming with Applications for Scientists

CSCI 2203 Data Science for Everyone

PHYC 2050 Computer Simulation in Science

(c) SCIE 4701 and SCIE 4702 Science and Technology Innovation, Commercialization and Entrepreneurship

2. Completion of at least three credit hours (one course) from each of the two topic areas listed below. Courses used to satisfy the requirements below cannot also be used to satisfy Requirement 1 above. Note that many of these courses have additional prerequisites; students are responsible for identifying and fulfilling any such prerequisites and/or obtaining special permission from the instructor.

(a) Neuroscience/Neurotechnology

PHYC 2250 Physics of Biological and Medical Technology

NESC/PSYO 3137 Research Methods in Cognitive Neuroscience

NESC/PSYO 3227 Principles of Human Neuropsychology

NESC/PSYO 3237 Drugs and Behaviour

NESC 4070 Chemical Neurobiology

NESC 4177 Theoretical Neuroscience

NESC 4185 Synaptic Function and Plasticity

PHAC 3001 Pharmacology I

PHAC 4403 Systems Pharmacology I

(b) Computer and Data Science

Note that not all courses are available to non-Computer Science majors every year. Please consult with the Faculty of Computer Science regarding enrolment in these courses

NESC/PSYO 3505 Neural Data Science

CSCI 1107 Social Computing

CSCI 1108 Experimental Robotics

CSCI 1110 Introduction to Computer Science

CSCI 1120 Introduction to Computer Systems

CSCI 2110 Data Structures and Algorithms

CSCI 2134 Software Development

CSCI 2141 Intro to Database Systems

CSCI 2202 Introduction to Programming with Applications for Scientists

CSCI 2203 Data Science for Everyone

CSCI 3141 Foundations of Data Science Using R

PHYC 2050 Computer Simulation in Science

STAT 2450 Introduction to Data Mining Using R

Notes on the Computer Science course options:

- CSCI 1105 and 1110 are mutually-exclusive options for an introductory computer science course. You should take CSCI 1105 if you have no prior computer programming/coding experience, or CSCI 1110 if you have previous programming experience (e.g., a past high school or university class in programming, or independent programming experience). Students with some programming experience who are unsure which course to register for, should consult with an advisor in the Computer Science program.
- CSCI 2202 *Computer Modelling for Scientists* and CSCI 2203 *Data Science for Everyone* have no prerequisites, and do not assume prior programming experience. If you choose to take CSCI 2202 first, you should not take CSCI 1105 after, as the content will be redundant. However, taking both CSCI 2202 and CSCI 1110 in either order is acceptable.
- Likewise, if you take NESC/PSYO 3505 first, you should not take CSCI 1105 after, as the content will be redundant.

Certificate in Science Leadership and Communication

Offered by: Faculty of Science

Coordinator: asscdean.science@dal.ca

The focus of the Certificate in Science Communication and Leadership is to develop basic leadership and communication skills specifically in and through the sciences, to enable Dalhousie Science graduates to better understand the nature and context of science, to consider the process of change, and to have the skills to communicate and lead effectively. The Certificate is available to any undergraduate student in the Faculty of Science. **The Certificate in Science Communication and Leadership builds on the content of the Science Communication Certificate:** students can only receive credit for either the Science Communication Certificate or the Science Communication and Leadership Certificate, but not both.

The Certificate in Science Communication and Leadership replaces the Science Leadership and Communication Certificate. Students who enrolled in the Science Leadership and Communication Certificate prior to Fall 2022 should consult the Calendar for 2021-22 for details on completion of this Certificate.

Admission to the Certificate

Students may enroll in the Certificate in Science Communication and Leadership at any point during their undergraduate program. Students must contact the Certificate Coordinator when seeking permission to enroll in the Portfolio of Learning non-credit course

required for completion of this Certificate (SCIE 4445). To enroll in the Certificate, students must declare the Certificate through Dal Online and notify the Certificate Coordinator by email that they have done so.

To graduate with the Certificate, students must apply to graduate with the Certificate at the time they apply to graduate from their degree program.

Certificate Requirements:

1. Leadership: Core required course

SCIE 4444.03: Leadership in Science

2. Communicating Science: Core required course

SCIE 3211.03: Communicating Science

3. Science communication elective: One and no more than 2 of the following Topics in Communication: with a grade of B or better

- ASSC 3150.03 Intercultural Communication I
- BIOL 4880.03/MARI 4880.03 Communicating Science for Societal Impact
- CMMT 3000.03 Human Communication
- HSTC 2500.03 Science Fiction in Film
- INTD 3021.03 Communicating Development and Environment
- JOUR 1002.03 Foundations in Journalism I
- MGMT 3602.03 Professional Communication Skills
- MGMT 4041.03 Environmental Education
- NESC 3011.03/NESC 3012.03 / PSYO 3011.03/PSYO 3012.03 Experiential Learning in Science Communication
- SCIE 3333.03 Science Education

4. Understanding the nature and context of science

HSTC 2400.03: Science and the Media

5. Ethics in Science: One of the following required courses

- PHIL 2680.03: Ethics in Science
- PHIL 1050.03: Ethics in Science
- (NOTE: CREDIT WILL NOT BE GIVEN FOR BOTH PHIL 2680 and PHIL 1050)
- PHIL 2480.03: Environmental Ethics
- PHIL 2810.03: Ethics in Health Care: Social Policy

6. Discipline-specific course: Note that one of these courses may replace the second Topics in Science Communication requirement (#3 above)

- BIOL 2040.03: Evolution
- ECON 2850.03/PHYC 2850.03: Science and Economics of Climate Change
- ENV5 3501.03: Environmental Problem-solving I
- EARTH 3001.03: Field school
- BIOL 4664.03/MARI 4664.03: History of Marine Science*
- NESC 2007.03: Neuroscience Principles and Methods
- PSYO 2000.03: Methods in Experimental Psychology
- PSYO 3581.03: History of Psychology I
- PSYO 3582.03: History of Psychology II
- BIOC 4501.03: Medical Biotechnology I
- MICI 2400.03: Laboratory Methods in Microbiology and Immunology
- OCEA 2020.03: Tools and Concepts in Ocean Sciences I

Other courses may be considered. Please consult a coordinator.

* Cross-listed as OCEA 4331.03, HIST 3073.03, HSTC 3331.03, SCIE 4000.03

7. Portfolio of leadership development (SCIE 4445.00). Only register for this zero-credit hour course in the semester that you are submitting your completed portfolio for evaluation, once all other components are completed (or in the final stages of completion).

The portfolio is a record that can be shared with future employers, and built upon in the future. It will document, at a minimum:

- The activities undertaken in each of the above 6 components of the Certificate
- Evidence of your development as a leader and communicator in science throughout the Certificate
- Reflections on how each component fits into leadership and communication development in your discipline / science more broadly

College of Sustainability

Location:

Mona Campbell Building
1459 LeMarchant Street
Room 1401
PO BOX 15000
Halifax NS
B3H 4R2

Phone Number: (902) 943-2193

Fax Number: (902) 494-8923

Email Address: sustainability@dal.ca

Website: www.dal.ca/faculty/sustainability.html

Introduction

Dalhousie's College of Sustainability provides an interdisciplinary forum for collaborative teaching and learning to address global issues in sustainability. The College of Sustainability is co-governed by four Faculties: Arts and Social Science, Science, Management, and Architecture and Planning. As a result, the Environment, Sustainability and Society (ESS) curriculum is integrated with a broad range of Dalhousie degrees and programs, providing a rigorous disciplinary basis for responsive, issues-oriented study. Professors in the College of Sustainability and many other Dalhousie departments are joined by guest speakers from business, government and community groups to offer energetic, problem-based courses and experiential learning opportunities. The College's vibrant community of students, teachers and community leaders fosters an ongoing exchange of ideas, expertise and passions. The College provides a common place at the centre of the Dalhousie community for the study of sustainability challenges and opportunities, and hosts an exciting range of public lectures, seminars and other activities.

Academic Programs

Environment, Sustainability and Society (ESS) can be studied with any undergraduate degree at Dalhousie. This diversity of options gathers students from many disciplines to study together and learn from each other.

- Bachelor of Arts (BA):
 - Double major or combined honours degree in ESS with any major/honours subject in the Faculty of Arts and Social Science or the Faculty of Science (Work-Integrated Learning options available)
 - Minor in ESS with 120 credit hour degree with other major/honours subject(s)
 - 90 credit-hour degree with Minor in ESS
 - BEng/BA Concurrent degree with Minor in ESS
- Bachelor of Science (BSc):
 - Double major or combined honours degree in ESS with any major/honours subject in the Faculty of Science or the Faculty of Computer Science (Work-Integrated Learning options available)
 - Minor in ESS with 120 credit hour degree
- Bachelor of Management (BMgmt):
 - Major in ESS
 - Minor in ESS
- Bachelor of Community Design (BCD):
 - Double major in Community Design and Sustainability
 - Honours double major in Community Design and Sustainability
 - Minor in ESS
- Bachelor of Journalism (BJH):
 - Combined honours in Journalism and ESS
 - Minor in ESS
- Bachelor of Computer Science (BCS): Minor in ESS

- Bachelor of Applied Computer Science (BACS): Minor in ESS
- Bachelor of Commerce (BComm): Minor in ESS
- Bachelor of Music (BMus): Minor in ESS
- Bachelor of Science (Medical Sciences): Minor in ESS
- Bachelor of Engineering: BEng/BA Concurrent degree with Minor in ESS
- Certificate in Environment, Sustainability and Society (with any Dalhousie undergraduate degree, excluding ESS Major/Honours/Minor)
- Certificate in Communicating Sustainability (with any Dalhousie undergraduate degree)

Admission Requirements

Admission requirements of the Faculty offering the chosen degree apply. For example, for BSc Double Major, prospective students would be subject to the admission requirements of the Faculty of Science. See Admission Requirements section of the Academic Calendar for each Faculty.

Staff

Deans

Andrews, J., BA (Hons) (McGill), MA, PhD (Toronto) - Dean, Faculty of Arts and Social Science
 Gagnon, G. A., BScE (Guelph), PhD (Waterloo), PEng - Dean, Faculty of Architecture and Planning
 Macdonald, C. L. B., BSc (Hons), PhD (Dalhousie), Professor (Chemistry) - Dean, Faculty of Science
 Smit, M., BSc (Hons), MSc (Dalhousie), PhD (Alberta), PDF (York) - Dean (Acting), Faculty of Management

Director

To be determined.

Professors

Mannell, S., BES, BArch (Waterloo), NSAA, FRAIC - Faculty of Architecture and Planning

Assistant Professors

Langford, W., BA, MA (UBC), PhD (Queens) - Jointly appointed with the Department of History
 Medeiros, A., BSc (Brock), MES, PhD (York) - Jointly appointed with School for Resource and Environmental Studies

Instructors

Bergel, A., BA (Columbia), MSc (New York University), PhD(c) (Dalhousie)
 Klein, G., PhD (Bremen/Alfred-Wegener Institute)
 Patten, S., MSc (Calgary)
 Schut, L., MES (Dalhousie)

Post-Retirement Lecturer

Mushkat, P., BA (Trent), BA (Dalhousie), Post-Grad Diploma (Guildhall), LLB (Dalhousie)

Cross-Appointed Faculty

Adams, M., BEng, MSc (Royal Military College), PhD (Dalhousie) - School for Resource and Environmental Studies
 Bingham, J., BA (UNB), MA (Toronto), PhD (York) – Department of History
 Black, D. R., BA (Trent), MA, PhD (Dalhousie) – Department of Political Science
 Cameron, J., BA (Vind), MA (SFU), PhD (York) – Department of International Development Studies
 Colombo, S., BSc (Guelph), MA (Dalhousie), PhD (Newfoundland) – Department of Animal Science and Aquaculture, Faculty of Agriculture
 Fitting, E., BA (Toronto), MA, PhD (New School) – Department of Sociology and Social Anthropology
 Gagnon, G. A., BScE (Guelph), PhD (Waterloo), PEng – Department of Civil and Resource Engineering
 Hammermeister, A. M., BSc (Agr) (Saskatchewan), MSc, PhD (Alberta) – Faculty of Agriculture; Organic Agriculture Centre of Canada
 Hayden, A., BA (McGill), MES (York), PhD (Boston College) – Department of Political Science
 Hughes, F. L., BSc (Carleton), MSc, PhD (Newcastle upon Tyne) – Department of Electrical and Computer Engineering
 Karabanow, J., BA, MA (McGill), PhD (Wilfrid Laurier) – School of Social Work
 Lahey, W., BA (Mt. A), BA (Oxford), LLB, LLM (Toronto) – Schulich School of Law; University of King's College
 Lynch, D., BSc (Agr), MSc (Agr) (McGill), PhD (Guelph) – Faculty of Agriculture, Dept. of Plant, Food & Environmental Science

Macedo, J., BArch (Universidade Federal do Parana, MCP (Cincinnati) PhD (Florida) – Faculty of Architecture and Planning
Manning, P., BSc (Dalhousie), PhD (Oxford) – Department of Plant, Food and Environmental Sciences, Faculty of Agriculture
Perrot, T. S., BSc, PhD (Western) – Department of Psychology and Neuroscience
Plug, L., BA (Hons) (McGill), PhD (Alaska) – Department of Earth and Environmental Sciences
Rainham, D., PhD (Ottawa) – School of Health and Human Performance, Faculty of Health
Schnurr, M. A., BSc (Hons) (Queen’s), MA (School of Oriental and African Studies), PhD (UBC) – Department of International Development Studies
Sherren, K., BES (Hons) (Waterloo), PhD (ANU) - School for Resource and Environmental Studies
Siegel, A., BSc (Hons) (Eckerd College), MA, PhD (Dalhousie) - Faculty of Computer Science
Stec, D., BPE (Manitoba), MBA (McGill), PhD (HEC Montreal) – Rowe School of Business
Truong, S., BSc (Dalhousie), MA (Alberta), PhD (Alberta)
Tyedmers, P. H., BSc (Hons) (Waterloo), LLB, PhD (UBC) - School for Resource and Environmental Studies
Walker, T., BSc (Hons) (Portsmouth), MA (Essex), PhD (Nottingham) – School for Resource and Environmental Studies
Whitehead, H., MA, PhD (Cambridge) – Department of Biology and Marine Biology
Williams, K., BSc (Dalhousie), MA, PhD (Royal Roads) – Rowe School of Business, Faculty of Management
Wranik, D., B.A., M.A., PhD (University of Manitoba)
Wright, T., PhD (Alberta) – Department of Earth and Environmental Sciences
Zurba, M., BSc (Winnipeg), MNRM, PhD (Manitoba)- School for Resource and Environmental Studies

Academic Advisor and Program Manager

Tae, K., BSc (McGill), MSc (Alaska)

Manager of Outreach and Partnerships

Ross, D., BA (Ottawa), MA (USC)

Manager of Finance and Administration

Elliott, S.

Program Secretary

Chakraborty, N.

Finance and Administration Assistant

Briand, H., BBA (MSVU)

Front Desk Clerk

Howcroft, R.

BA Double Major, Environment, Sustainability and Society

The BA Double Major degree program allows students to combine a study of Environment, Sustainability and Society (ESS) with another subject (Allied Subject). The Allied Subject may be any Major subject from the Faculty of Arts and Social Sciences or the Faculty of Science. It is recommended that students enrolled in a Double Major program consult with academic advisors in both subject areas. This degree may also be combined with Minor(s) and Certificate(s).

In addition to fulfilling the 120 credit hour degree requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections, students in a BA Double Major program in ESS and another subject must complete the following:

ESS Requirements

1000-level requirements

- SUST 1000.06: *What is Sustainability?* or SUST 1400.03 *Exploring Sustainability* (online)
- SUST 1001.06: *A Sustainable Future*
- With **Foundation Year Program (FYP)** or **Dalhousie Integrated Science Program (DISP)**: Any 1000-level SUST course (minimum 3 credit hours)

Upper-level requirements

- SUST 2000.06: *Local Governance, Citizen Engagement and Sustainability*
- SUST 2001.06: *Global Environmental Governance*
- SUST 3000.03: *Environmental Decision Making*
- SUST 4001.03: *Environment, Sustainability and Society Capstone Part 1*
- SUST 4002.03: *Environment, Sustainability and Society Capstone Part 2**
- 3 more credit hours SUST at 3000 level or above
- 6 more credit hours SUST or ESS Electives at 3000 level or above
- The courses listed above fulfill the minimum requirements of 30 credit hours at 2000-level or above and 18 credit hours at 3000-level or above
- Students may take up to 18 more credit hours in SUST/ESS Electives at 2000-level or above, to a maximum of 48 credit hours

* SUST 4001 and SUST 4002 must be taken in consecutive Fall and Winter terms. Credit will not be granted for SUST 4001 until completion of SUST 4002.

Allied Subject Requirements

Please consult the Calendar and Academic Advisor for your Allied Subject.

General Degree Requirements satisfied by SUST courses

- SUST 1000.06 satisfies the 6 credit hours Writing Requirement (SUST 1400.03 and SUST 1001.06 do not satisfy the Writing Requirement).
- For BA students either SUST 1000.06 or SUST 1001.06 satisfy the Life and Physical Sciences requirement.
- For BSc students either SUST 1000.06 or SUST 1001.06 satisfies the Social Science requirement.
- For all General Degree Requirements please see [College of Arts and Science Degree Requirements](#).

BSc Double Major, Environment, Sustainability and Society

The BSc Double Major degree program allows students to combine a study of Environment, Sustainability and Society (ESS) with another subject (Allied Subject). The Allied Subject may be any Major subject from the Faculty of Science or the Faculty of Computer Science. It is recommended that students enrolled in a Double Major program consult with academic advisors in both subject areas. This degree may also be combined with Minor(s) and Certificate(s).

In addition to fulfilling the 120 credit hour degree requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections, students in a BSc Double Major program in ESS and another subject must complete the following:

ESS Requirements

1000-level requirements

- SUST 1000.06: *What is Sustainability?* or SUST 1400.03 *Exploring Sustainability* (online)
- SUST 1001.06: *A Sustainable Future*
- With **Foundation Year Program (FYP)** or **Dalhousie Integrated Science Program (DISP)**: Any 1000-level SUST course (minimum 3 credit hours)

Upper-level requirements

- SUST 2000.06: *Local Governance, Citizen Engagement and Sustainability*
- SUST 2001.06: *Global Environmental Governance*
- SUST 3000.03: *Environmental Decision-Making*
- SUST 4001.03: *Environment, Sustainability and Society Capstone Part 1*

- SUST 4002.03: *Environment, Sustainability and Society Capstone Part 2*
- 3 more credit hours SUST at 3000 level or above
- 6 more credit hours SUST or ESS Electives at 3000 level or above
- The courses listed above fulfill the minimum requirements of 30 credit hours at 2000-level or above and 18 credit hours at 3000-level or above
- Students may take up to 18 more credit hours in SUST/ESS Electives at 2000-level or above, to a maximum of 48 credit hours

* SUST 4001 and SUST 4002 must be taken in consecutive Fall and Winter terms. Credit will not be granted for SUST 4001 until completion of SUST 4002.

Allied Subject Requirements

Please consult the Calendar and Academic Advisor for your Allied Subject.

General Degree Requirements satisfied by SUST courses

- SUST 1000.06 satisfies the 6 credit hours Writing Requirement (SUST 1400.03 and SUST 1001.06 do not satisfy the Writing Requirement).
- For BA students either SUST 1000.06 or SUST 1001.06 satisfy the Life and Physical Sciences requirement.
- For BSc students either SUST 1000.06 or SUST 1001.06 satisfy the Social Science requirement.
- For all General Degree Requirements please see [College of Arts and Science Degree Requirements](#).

BA Combined Honours, Environment, Sustainability and Society

The BA Combined Honours degree program allows students to combine a study of Environment, Sustainability and Society (ESS) with another subject (Allied Subject). The Allied Subject may be any Honours subject from the Faculty of Arts and Social Sciences or the Faculty of Science. An Honours Thesis is completed in either ESS or in the Allied Subject. Students intending to complete a Combined Honours program must consult with academic advisors in both subject areas. This degree may also be combined with Minor(s) and Certificates(s).

In addition to fulfilling the 120 credit hour degree requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections, students in a BA Combined Honours program in ESS and another subject must complete the following:

ESS Requirements

1000-level requirements

- SUST 1000.06: *What is Sustainability?* **or** SUST 1400.03 *Exploring Sustainability* (online)
- SUST 1001.06: *A Sustainable Future*
- With **Foundation Year Program (FYP)** or the **Dalhousie Integrated Science Program (DISP)**: Any 1000-level SUST course (minimum 3 credit hours)

Upper-level requirements

- SUST 2000.06: *Local Governance, Citizen Engagement and Sustainability*
- SUST 2001.06: *Global Environmental Governance*
- SUST 3000.03: *Environmental Decision Making*
- 9 more credit hours SUST at 3000 level or above (SUST 4001.03 and SUST 4002.03 *ESS Capstone* recommended)

ESS as primary subject in BA Combined Honours:

- 6 more credit hours SUST or ESS Electives at **2000 level or above**
- SUST 4901.03 and SUST 4902.03: *ESS Honours Thesis* (see below for admission requirements)

ESS as secondary subject in BA Combined Honours:

- 6 more credit hours SUST or ESS Electives at **3000 level or above**
- The courses listed above fulfill the minimum requirements of 30 credit hours at 2000-level or above and 18 credit hours at 3000-level or above
- Students may take no more than 48 credit hours in SUST/ESS Electives at 2000-level or above

Allied Subject Requirements

Please consult the Academic Calendar and Academic Advisor for your Allied Subject. If ESS is the secondary subject, the Honours Thesis is typically completed in the Allied (primary) Subject. Even if ESS is the primary subject, there may be additional course requirements for the Allied Subject to satisfy their Combined Honours degree requirements.

Admission to ESS Honours

Students wishing to complete the Honours Thesis in ESS must apply for admission to the ESS Honours Program by completing the “Intent to Register for ESS Honours Thesis” form before the end of the winter term prior to starting the Honours Thesis course. A cumulative GPA of 3.3 is required in all SUST and ESS Elective courses at 2000 level or above, with no individual grade less than C. Students must also complete the Dalhousie Honours Application Form before the deadline in September of their Honours year.

BA Combined Honours Graduation Requirements

Students must fulfill the requirements for the 120 credit hour BA Combined Honours degree outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections. Arts and Social Science subjects require a GPA of 2.7 on courses in the Honours subjects at 2000 level or above, with no individual grade less than C. Science subjects require a GPA of 3.0 on courses in the Honours subjects at 2000 level or above, with no individual grade less than C.

General Degree Requirements satisfied by SUST courses

SUST 1000.06 satisfies the 6 credit hours Writing Requirement (SUST 1400.03 and SUST 1001.06 do not satisfy the Writing Requirement). For BA students either SUST 1000.06 or SUST 1001.06 satisfy the Life and Physical Sciences requirement. For BSc students either SUST 1000.06 or SUST 1001.06 satisfy the Social Science requirement. For all General Degree Requirements please see [College of Arts and Science Degree Requirements](#).

BSc Combined Honours, Environment, Sustainability and Society

The BSc Combined Honours degree program allows students to combine a study of Environment, Sustainability and Society (ESS) with another subject (Allied Subject). The Allied Subject may be any Honours subject from the Faculty of Science or the Faculty of Computer Science. An Honours Thesis is completed in either ESS or in the Allied Subject. Students intending to complete a Combined Honours program must consult with academic advisors in both subject areas. This degree may also be combined with Minor(s) and Certificate(s).

In addition to fulfilling the 120 credit hour degree requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections, students in a BSc Combined Honours program in ESS and another subject must complete the following:

ESS Course Requirements

1000-level Requirements

- SUST 1000.06: *What is Sustainability?* **or** SUST 1400.03 *Exploring Sustainability* (online)
- SUST 1001.06: *A Sustainable Future*

- With **Foundation Year Program (FYP)** or **Dalhousie Integrated Science Program (DISP)**: Any 1000-level SUST course (minimum 3 credit hours)

Upper-level requirements:

- SUST 2000.06: *Local Governance, Citizen Engagement and Sustainability*
- SUST 2001.06: *Global Environmental Governance*
- SUST 3000.03: *Environmental Decision Making*
- 9 more credit hours SUST at 3000 level or above (SUST 4001.03 and SUST 4002.03 *ESS Capstone* recommended)

ESS as primary subject in BSc Combined Honours:

- 6 more credit hours SUST or ESS Electives at **2000 level or above**
- SUST 4901.03 and SUST 4902.03: *ESS Honours Thesis* (see below for admission requirements)

ESS as secondary subject in BSc Combined Honours:

- 6 more credit hours SUST or ESS Electives at **3000 level or above**
- The courses listed above fulfill the minimum requirements of 30 credit hours at 2000-level or above and 18 credit hours at 3000-level or above
- Students may take no more than 54 credit hours in SUST/ESS Electives at 2000-level or above

Allied Subject Requirements

Please consult the Academic Calendar and Academic Advisor for your Allied Subject. If ESS is the secondary subject, the Honours Thesis is typically completed in the Allied (primary) Subject. Even if ESS is the primary subject, there may be additional course requirements for the Allied Subject to satisfy their Combined Honours degree requirements.

Admission to ESS Honours Thesis

Students wishing to complete the Honours Thesis in ESS must apply for admission to the ESS Honours Thesis by completing the “Intent to Register for ESS Honours Thesis” form before the end of the winter term prior to starting the ESS Honours Thesis course. A cumulative GPA of 3.3 is required in all SUST and ESS Elective courses at 2000 level or above, with no individual grade less than C. Students must also complete the Dalhousie Honours Application Form before the deadline in September of their Honours year.

BSc Combined Honours Graduation Requirements

Students must fulfill the requirements for the 120 credit hour degree requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections. A cumulative GPA of 3.0 is required in all Honours Subject courses at 2000 level or above, with no individual grade less than C.

General Degree Requirements satisfied by SUST courses

- SUST 1000.06 satisfies the 6 credit hours writing requirement (SUST 1400.03 and SUST 1001.06 do not satisfy the Writing Requirement).
- For BSc students either SUST 1000.06 or SUST 1001.06 satisfy the Social Science requirement.
- For BA students either SUST 1000.06 or SUST 1001.06 satisfy the Life and Physical Sciences requirement.
- For all General Degree Requirements please see [College of Arts and Science Degree Requirements](#).

BCD Double Major in Community Design and Sustainability

The Bachelor of Community Design (BCD) is offered by the School of Planning in the Faculty of Architecture and Planning. Students with a particular interest in sustainability and the design of communities may choose to complete the BCD Double Major in Community Design and Sustainability. This is a 120 credit hour (4-year) degree.

Community Design Requirements

See [School of Planning](#) for specific requirements

Sustainability Requirements

- SUST 1000.06: *What is Sustainability?* or SUST 1400.03 *Exploring Sustainability* (online)
- SUST 1001.06: *A Sustainable Future*
- SUST 2000.06: *Local Governance, Citizen Engagement and Sustainability*
- SUST 2001.06: *Global Environmental Governance*
- SUST 3000.03: *Environmental Decision-Making*
- SUST 4001.03: *Environment, Sustainability and Society Capstone Part 1*

- SUST 4002.03: *Environment, Sustainability and Society Capstone Part 2**

- 3 more credit hours SUST at 3000-level or above
- 6 more credit hours SUST or [ESS electives](#), outside PLAN

- SUST 1000.06 satisfies the BCD English writing requirement. SUST 1400.03 does NOT satisfy the Writing Requirement.
- SUST 1000.06 and SUST 1001.06 both satisfy the science requirement and social science requirement for BCD students

* SUST 4001.03 and SUST 4002.03 must be taken in consecutive Fall and Winter terms. Credit will not be granted for SUST 4001 without completion of SUST 4002.

BCD Honours, Double Major in Community Design (Environmental Planning or Urban Design and Planning) and Sustainability

The Bachelor of Community Design (BCD) is offered by the School of Planning in the Faculty of Architecture and Planning. Students with a particular interest in sustainability and the design of communities may choose to complete the BCD Double Major in Community Design and Sustainability.

Students with high academic standing may apply for the BCD Honours program. The BCD Honours program is a first professional degree recognized by the Canadian Institute of Planners, BCD Honours students select a Major in Environmental Planning or Urban Design and Planning. The Honours degree can also be completed as a Double Major with Sustainability.

Community Design Requirements

See [School of Planning](#) for specific requirements

Sustainability Requirements

- SUST 1000.06: *What is Sustainability?* or SUST 1400.03: *Exploring Sustainability* (online)
- SUST 1001.06: *A Sustainable Future*
- SUST 2000.06: *Local Governance, Citizen Engagement and Sustainability*
- SUST 2001.06: *Global Environmental Governance*
- SUST 3000.03: *Environmental Decision-Making*
- 3 more credit hours SUST at 3000-level or above

- SUST 1000.06 satisfies the BCD English writing requirement. SUST 1400.03 does not satisfy the Writing Requirement.
- SUST 1000.06 and SUST 1001.06 both satisfy the science requirement and social science requirement for BCD students

BMgmt Major in Environment, Sustainability and Society

The Bachelor of Management (BMgmt) prepares students to formulate and implement strategies to effectively manage organizations and human activities. Through the Major in Environment, Sustainability and Society (ESS) students gain a broad understanding and gain experience with solving problems related to sustainability.

See Faculty of Management, [Bachelor of Management](#) Degree program for complete degree requirements.

ESS Major Requirements for BMgmt

- SUST 1000.06: *What is Sustainability?* (or SUST 1001.06: *A Sustainable Future*) *
- SUST 2000.06: *Local Governance, Citizen Engagement and Sustainability* **or** SUST 2001.06: *Global Environmental Governance*
- SUST 3000.03: *Environmental Decision-Making* **or** SUST 3702.03: *Sustainable Industries*
- SUST 4001.03: *Environment, Sustainability and Society Capstone Part 1*

- SUST 4002.03: *Environment, Sustainability and Society Capstone Part 2***

- 6 more credit hours SUST at 3000-level or above
- 3 more credit hours SUST or [ESS electives](#) at 3000 level or above

* SUST 1000 or SUST 1001 satisfy the first year ESS Major requirement, however, SUST 1000 also satisfies the BMgmt writing requirement. SUST 1001 does not satisfy the BMgmt Writing Requirement.

** SUST 4001.03 and SUST 4002.03 must be taken in consecutive Fall and Winter terms. Credit will not be granted for SUST 4001 without successful completion of SUST 4002.

Eligibility for Minors and Certificates

Minors and Certificates may be added to this degree.

The [list of approved Minors](#) indicates to which degrees the minor can be added. Courses counted toward a Major subject may not be used to fulfill the requirements of a Minor program. Students with ESS as Major subject may not complete the ESS Minor.

Each [Certificate](#) indicates to which degree the Certificate can be added. Courses counted toward a Major or Minor subject may be used to fulfill the requirements of a Certificate Program. Students in the BMgmt ESS Major may also take the Certificate in Communicating Sustainability and the [RBC Sustainability Leadership Certificate](#) (a non-credit Certificate, details on College website), but they may not take the Certificate in ESS.

BJH Combined Honours in Journalism and Environment, Sustainability and Society

The Bachelor of Journalism Honours (BJH) is offered by the School of Journalism at the University of King's College. Students interested in multimedia communication of sustainability issues may pursue the BJH Combined Honours in Journalism and Environment, Sustainability and Society (ESS).

See [University of Kings College, Bachelor of Journalism](#) program for general degree requirements.

ESS Requirements

1000-level requirements

- SUST 1000.06: *What is Sustainability?* **or** SUST 1400.03 *Exploring Sustainability* (online)
- SUST 1001.06: *A Sustainable Future*

- With **Foundation Year Program (FYP)** or **Dalhousie Integrated Science Program (DISP)**: Any 1000-level SUST course (minimum 3 credit hours, SUST 1400.03 is recommended)

Upper-level requirements:

- SUST 2000.06: *Local Governance, Citizen Engagement and Sustainability*
 - SUST 2001.06: *Global Environmental Governance*
 - SUST 3000.03: *Environmental Decision Making*
 - 9 more credit hours SUST at 3000-level or above
 - 6 more credit hours SUST or ESS Electives at 3000 level or above
- The courses listed above fulfill the minimum requirements of 30 credit hours at 2000-level or above and 18 credit hours at 3000-level or above
 - Students may take up to 18 more credit hours in SUST/ESS Electives at 2000-level or above, to a maximum of 48 credit hours

Bachelor of Engineering/Bachelor of Arts Concurrent Degree with Minor in Environment, Sustainability and Society

BEng/BA Concurrent Degree with Minor in ESS

Students interested in combining their interest in ESS with a degree in Engineering may choose a BEng/BA Concurrent Degree Program with a Minor in ESS, normally completed in a five-year period. Students gain a better understanding of the complexity of sustainability challenges and develop interdisciplinary problem-solving and communication skills.

To meet the BA 90 credit-hour ESS Minor requirements, students complete a minimum of 18 credit hours in SUST courses at or above the 2000 level, and an additional 12 credit hours in FASS or Faculty of Science courses. Students must select their courses such that they fulfill the language, humanities, social science, and writing requirements for a BA degree. Typically, students complete these requirements and a Diploma of Engineering in their first three years of study. Two more years of engineering studies are then required to obtain a BEng. However it is possible to embark on the BA portion of the concurrent degree at any time during the Engineering program. Interested students should see an undergraduate advisor from ESS and from the Faculty of Engineering, ideally in their first year of study.

Work-Integrated Learning Programs in Sustainability

The College of Sustainability offers two “Work-Integrated Learning” programs for BA and BSc students with ESS as a Major or Honours subject.

Sustainability Co-operative Education

Sustainability Co-op is a program where academic study in ESS is combined with paid career-related work experiences. Students undertake three paid work-terms alternating with their academic study terms. Students in Sustainability Co-op apply their knowledge directly in three sustainability-related jobs, providing opportunity for progression of skill development and exposure to different careers. Students graduate with meaningful work experiences that inform career choices and facilitate employment post graduation.

Sustainability Co-op is available to students in 120 credit-hour BA and BSc Double Major and Combined Honours programs with ESS as a Major/Honours subject. A minimum cumulative GPA of 3.00 is required for admission and for continuation in the Co-op program. Students must be eligible to work in Canada.

Admission to Sustainability Co-op

Interested students must complete the first year ESS program requirements and apply in the **spring of their first year** in ESS. It is recommended that interested students contact the ESS Academic Advisor in Winter term of their first year. Students must complete the Sustainability Co-op Orientation Seminar ([SUST 8890.00](#)) in the Fall term of second year and both SUST 2000.06 and SUST 2001.06 prior to the first work term which is typically in the summer after second year.

Sustainability Work Experience Program

The Sustainability Work Experience Program (WEP) involves a single paid work term in the third year of the ESS program. Students in Sustainability WEP develop professional skills and competencies and explore a career option in an applied experiential learning context. Students graduate with a meaningful work experience that informs career choices and facilitates employment post graduation.

Sustainability WEP is available to students in 120 credit-hour BA and BSc Double Major and Combined Honours programs with ESS as a Major/Honours subject. A minimum cumulative GPA of 3.00 is required for admission and for continuation in the program. Students must be eligible to work in Canada.

Admission to Sustainability WEP

Interested students must complete the second year ESS program requirements and apply in the **spring of their second year** in ESS. It is recommended that interested students contact the ESS Academic Advisor during their second year. Students must complete the Sustainability Co-op Orientation Seminar ([SUST 8890.00](#)) and SUST 3000.03 prior to the first work term which is typically in Winter or Summer of third year.

More Information

Details are available from the ESS Academic Advisor and from the Co-operative Education office http://www.dal.ca/academics/cooperative_education.html.

For more information on Sustainability Work-Integrated Learning: <https://www.dal.ca/faculty/sustainability/programs/ess/co-op.html>

Other Experiential Learning Opportunities in Sustainability

The College of Sustainability offers other courses whose primary focus is Experiential Learning:

SUST 3002.03 ESS Engagement Project

SUST 4001.03 and SUST 4002.03 ESS Capstone (Parts 1 and 2, both must be taken sequentially)

Minor in Environment, Sustainability and Society

The Environment, Sustainability and Society (ESS) Minor is available to students registered in a 120 credit hour Bachelor of Arts, Bachelor of Science, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Applied Computer Science, Bachelor of Management, Bachelor of Music, Bachelor of Journalism, or Bachelor of Science (Medical Sciences) program.

A BA (90 credit hour) degree program with a Minor in Environment, Sustainability and Society (ESS) is also available.

Requirements for Minor in ESS:

- any 1000-level SUST course
- a minimum of 18 credit hours and a maximum of 27 credit hours at the 2000 level or above in SUST courses.

Contact [College of Sustainability](#) for more information.

Certificate in Communicating Sustainability

The Certificate in Communicating Sustainability is open to current undergraduate students from any Faculty at Dalhousie.

The Certificate in Communicating Sustainability is a credential to develop and recognize expertise in how to communicate Sustainability concepts, principles and practices. Students will learn and apply communications theory frameworks; learn to effectively communicate sustainability concepts, issues, and opportunities to a variety of audiences; develop skills in constructive communication and negotiation of conflict; and gain experience to conceive, develop and refine effective sustainability communications in a variety of media, from first ideas through to delivery to an audience.

The Certificate is founded on a required interdisciplinary course, SUST 3107.03 *Communicating Sustainability: Media and Messaging*. This course (offered in collaboration with other Dal units including SRES and Journalism) provides foundational knowledge of communications theory and analysis; explores the relationships between academic and journalistic communication, and the challenges of communicating with the general public; and offers hands-on experience of developing effective text and multimedia stories for the general public, grounded in academic sources.

Students are also required to take SUST 2105.03 *Introductory Conflict Management for Sustainability* or SUST 4125.03 *Conflict Negotiation and Sustainability*. While both courses offer students the opportunity to build skills in conflict management and communication, SUST 2105.03 focuses on interpersonal conflict management while SUST 4125.03 focuses on negotiation in professional contexts. Students may take one or both of these courses.

Certificate Requirements

Certificate Grade Requirements:

The cumulative GPA in Certificate courses must be 3.0 (B) or better, with no individual Certificate course grade less than C.

Certificate Course Requirements:

A. Certificate Core Courses

At least one SUST course at 1000-level (minimum 3 credit hours). Select from:

- SUST 1400.03 Exploring Sustainability
- SUST 1000.06 What is Sustainability?
- SUST 1001.06 A Sustainable Future

3 credit hours required course:

- SUST 3107.03 Communicating Sustainability: Media and Messaging

3 credit hours chosen from:

- SUST 2105.03 Introductory Conflict Management for Sustainability
- SUST 4125.03 Conflict Negotiation and Sustainability

Both SUST 2105 and SUST 4125 may be taken. If so, one of them will count as 3 credit hours toward the 9 credit hours of Certificate Electives.

B. Certificate Elective Courses

9 credit hours chosen from:

- SUST 2105.03 Introductory Conflict Management for Sustainability
- SUST 3103.03 Effective Argument in Sustainability
- SUST 3104.03 Sustainability and the Non-profit Sector
- SUST 3106.03 The Canadian North
- SUST 4125.03 Conflict Negotiation and Sustainability
- INTD 3021.03 Communicating Development and Environment: Critical Debates and Alternative Strategies

Courses that are cross-listed with Certificate courses are equivalent and may be taken for the Certificate.

Certificate Learning Outcomes

A student who completes the Certificate in Communicating Sustainability will be able to:

1. Demonstrate a working knowledge of contemporary sustainability challenges and problem-solving approaches.
2. Understand the theoretical and analytic frameworks of communication and apply these to existing sustainability communications.
3. Effectively communicate sustainability concepts, issues and opportunities to a variety of audiences, including those familiar with sustainability and those new to the topic.
4. Conceive, develop and refine effective sustainability communications in a variety of media, from conception through to delivery to an audience.
5. Understand the goals, characteristics, the ethical principles and practices of both journalistic and academic expression.
6. Conduct analysis of sustainability stories and communications strategies to discern fact, opinion, evidence, media frames, intentions and effects.
7. Analyze and debate diverse views on sustainability issues and to communicate these to a wider audience.
8. Develop constructive conflict and compromise skills in negotiating sustainability issues.

9. Develop practical writing skills: media release, news article, longer-form popular academic-based article, journalism, policy writing.
10. Develop non-textual media skills: video/audio presentations, podcasts, social media posts, posters, infographics, visual arts.
11. Develop oral communication skills, as both communicator and listener: presentations, pitches, formal negotiations, lobbying, mediation, and debate.
12. Articulate the value of learning and implementing sustainability communication skills for (a) personal development and (b) sustainability-related goals that span disciplines and fields.

About the College of Sustainability

Dalhousie University's College of Sustainability is a leader in post-secondary sustainability education, the first of its kind in Canada. The curriculum provides an interdisciplinary, student-focused forum for collaborative teaching and learning driven by the pressing concerns of our time. The faculty in our ESS program are drawn from across the academic spectrum.

Contact: Kaarin Tae, ESS Academic Advisor. ess.advising@dal.ca

Certificate in Environment, Sustainability and Society

The Certificate in Environment, Sustainability and Society (ESS) is open to current undergraduate students from any Faculty at Dalhousie, excluding those who have declared ESS as a Major or Minor subject.

The ESS Certificate allows students from multiple disciplines to engage meaningfully with issues of Environment, Sustainability and Society. Over the duration of 15 credit hours, you will explore many current sustainability issues and have the opportunity to focus on specific areas of interest. Topics of study include food, energy, resources, climate change, governance, and conflict resolution through courses offered by the College of Sustainability and other departments across the university. With many course options to choose from, the ESS Certificate is designed to support your own sustainability interests and goals.

Certificate Requirements

Certificate Grade Requirements

The cumulative GPA in ESS Certificate courses must be 3.0 (B) or better, with no individual ESS Certificate course grade less than C.

Certificate Course Requirements

At least one SUST course at 1000-level (minimum 3 credit hours) chosen from:

- SUST 1400.03 *Exploring Sustainability*
- SUST 1000.06 *What is Sustainability?*
- SUST 1001.06 *A Sustainable Future*

A minimum of 12 credit hours at 2000-level or above including:

- 6 credit hours [SUST courses](#) at 2000 level or above
- 6 credit hours [ESS Electives](#) or [SUST courses](#) at 2000-level or above

"ESS Electives" are courses offered by any department at Dalhousie. They focus on the relation between environment, sustainability and society, or incorporate issues of environment, sustainability and society as a significant module or significant assignment. ESS Electives are reviewed and approved by the College of Sustainability Council.

N.B. SUST 1400 and SUST 1000 are Exclusions – credit will be granted for one or the other, not both.

Certificate Learning Outcomes

A student who completes the ESS Certificate will be able to:

1. Recognize sustainability challenges as complex issues that require interdisciplinary thought and action.
2. Identify the interactions between complex sustainability challenges by interpreting current issues of environment, sustainability, and society.
3. Locate diverse ideas and sources of information about sustainability issues, critically analyze arguments, generate conclusions based on evidence and communicate effectively.
4. Identify how (a) their own disciplinary method is used to engage in sustainability issues and (b) how other disciplines/fields engage with and contribute to sustainability
5. Develop self-awareness and describe their own subjective position in the world with respect to sustainability issues and practice

respect for diverse perspectives in discussing sustainability understandings and solutions.

6. Work effectively, independently and in group situations, to contribute to problem solving on sustainability issues

General Degree Requirements satisfied by SUST courses

- SUST 1000.06 satisfies the full University Writing Requirement.
- SUST satisfies “Social Science” Subject Grouping for BSc students.
- SUST satisfies “Life and Physical Science” Subject Grouping for BA students.
- SUST satisfies “Social Science” and “Life and Physical Science” Subject Groupings for BCD students.

About the College of Sustainability

Dalhousie University’s College of Sustainability is a leader in post-secondary sustainability education, the first of its kind in Canada. The curriculum provides an interdisciplinary, student-focused forum for collaborative teaching and learning driven by the pressing concerns of our time. Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions

SUST 1000 What is Sustainability?

CREDIT HOURS: 6

Learning to live sustainably is humanity's greatest and most exciting challenge. The first step is seeing ourselves clearly – our histories, perceptions, intentions, and impacts – as integral to life on Earth. Using an interdisciplinary approach, we investigate the many conceptual frameworks that inform our understanding of sustainability. Through topics such as energy, water, land use, food, urbanization and social equity, we explore what sustainability means in our lives and to the planet.

CALENDAR NOTES: One full credit in fall term.

EXCLUSIONS: SUST 1400.03

FORMATS: Lecture | Tutorial

SUST 1001 A Sustainable Future

CREDIT HOURS: 6

We explore pathways towards living in a sustainable world. Drawing from diverse perspectives and applying a sustainability lens, we analyse and assess assumptions and practices in the past and present, in order to propose new approaches and solutions to the environmental, economic, cultural and societal challenges of the future.

CALENDAR NOTES: One full credit in winter term.

FORMATS: Lecture | Tutorial

SUST 1400 Exploring Sustainability

CREDIT HOURS: 3

This online course explores ideas of sustainability using many, sometimes conflicting, perspectives and frameworks. Academics, change-makers in the community, politicians, farmers, and non-profit leaders share their stories with us. We explore the three pillars of sustainability and hear from individuals in Halifax and beyond.

CALENDAR NOTES: Online course with lecture videos, readings, discussion board, quizzes, hands-on assignment and written assignments.

EXCLUSIONS: SUST 1000.06

FORMATS: Online Delivery

SUST 2000 Local Governance, Citizen Engagement and Sustainability

CREDIT HOURS: 6

People make decisions that influence the way the world changes and the way in which it stays the same. This course is about people and how their roles and actions affect social and natural environments at the local level. We explore the roles and actions of individuals as consumers, citizens and as activists, and groups of people who work in local government, the legal system, the corporate and entrepreneurial sectors and with non-governmental organizations. The course uses a Problem Based Learning (PBL) approach to help us think critically as we explore the connections between people, their actions, and the complex issues associated with environmental and social sustainability.

CALENDAR NOTES: Six credit hours in fall term.

PREREQUISITES: Any 1000-level SUST course or permission of the instructor.

FORMATS: Lecture | Tutorial

SUST 2001 Global Environmental Governance

CREDIT HOURS: 6

The course examines the interface between global governance, political economy, and the environment. Various theories explore links between: international law and institutions, globalization, financial markets, consumption, population growth, conflict, and civil society. Issues are framed to explore efforts towards global sustainability, ending in a simulated international negotiation.

CALENDAR NOTES: One full credit in winter term.

PREREQUISITES: Any 1000-level SUST course or INTD 2001.03 or SOSA/POLI 1500.06 or ECON 1102.03

FORMATS: Lecture | Tutorial

SUST 2105 Introductory Conflict Management for Sustainability

CREDIT HOURS: 3

Working towards sustainability requires collaboration between multiple stakeholders, disciplines, and fields, which can lead us to disagreement and conflict. This course explores tools and models for developing interpersonal conflict management and communication skills so that we might transform our conflicts to opportunities for transformation and greater understanding.

CROSSLISTED: MGMT 2105

RESTRICTIONS: Second year status or above

FORMATS: Other (explain in comments)

SUST 2106 Climate Change and Sustainability

CREDIT HOURS: 3

This course introduces quantitative methods for understanding our environment and calculating change. Our natural environment is influenced by multiple natural and anthropogenic factors that can influence the trajectory of our ecosystems through time. Fundamentally, we must understand the past such that we can compare and understand the current context of global warming into perspective. This course focuses on the quantitative science behind understanding the Quaternary period, which represents the last 2.6 million years of the earth's history. Topics will include the physical basis of climate change as well as the human activities that have influenced this change. A focus on research methods, including quantitative analysis of data, will enable students to understand how we know what we do about our past, and what it means for our future.

CROSSLISTED: MGMT 2106

RESTRICTIONS: Second year status or above

EXCLUSIONS: SUST 2950 (offered in Fall 2022 only)

FORMATS: Lecture | Tutorial

SUST 2950 Topics in Environment, Sustainability and Society

CREDIT HOURS: 3

This course addresses current interdisciplinary issues in sustainability with topics varying each semester. The course is taught by Dalhousie faculty, and/or visiting scholars. Please consult Academic Timetable for current offerings.

CALENDAR NOTES: This class is restricted to students in the Environment, Sustainability and Society (ESS) program, or with permission from the Academic Advisor in the College of sustainability.

RESTRICTIONS: ESS Major, Minor or Certificate. Completed 30 credit hours.

FORMATS: Other (explain in comments)

SUST 3000 Environmental Decision Making

CREDIT HOURS: 3

The world is a product of countless individual and collective choices. Making decisions for a sustainable future requires that these decisions account for the uncertainty and complexity inherent to human development and be sensitive to ecological constraints and associated, often competing, human values. This course explores the key challenges and tools associated with environmental decision making.

PREREQUISITES: SUST 2000.06 or SUST 2001.06

FORMATS: Lecture | Tutorial

SUST 3002 ESS Engagement Project

CREDIT HOURS: 3

Students gain hands-on experience while addressing a question of personal and academic interest relevant to the field of environment and sustainability.

Students work as interns for 6-8 hours per week over one semester on an approved project with a sponsoring agency.

CALENDAR NOTES: Offered in Fall, Winter and Summer terms. Instructor approval required for registration.

PREREQUISITES: SUST 2000.06 or SUST 2001.06 Cumulative GPA 3.0 or better. Must be in ESS program.

FORMATS: Experiential Learning

SUST 3039 Indigenous Perspectives on Resource and Environmental Management

CREDIT HOURS: 3

This course explores Indigenous peoples' relationships with natural resources and settler populations within a broad socio-political-environmental context. We review legislation affecting Indigenous participation and leadership in resource and environmental management, and consider approaches to Indigenous community-partnered research. Course includes guest lectures by Elders and Indigenous leaders, readings by Indigenous scholars, and a field trip.

CROSSLISTED: MGMT 4039

RESTRICTIONS: Third year status or above, or permission of instructor.

EXCLUSIONS: SUST 3955.03 (Offered in Winter 2019), ENVI 5039.03

FORMATS: Lecture | Seminar | Discussion

SUST 3101 Food Systems and Sustainability: Feeding the 10 Billion

CREDIT HOURS: 3

This course explores the biophysical demands of feeding humanity and the known global-scale impacts. The complexities and trade-offs of major food systems are evaluated via tools such as LCA and Dietary Scenario Analyses. Strategies to effect change are explored, including alternative production methods, shifting diets, and more.

RESTRICTIONS: Third year status or above

EXCLUSIONS: ENVI 5101.03 and SUST 3950 (2018/19 and 2019/20) and ENVI 5051 (2018/19 and 2019/20)

FORMATS: Lecture | Discussion

SUST 3102 Coastal Change & Adaptation

CREDIT HOURS: 3

Human activities alter coastal environments directly and by influencing natural processes. We analyse the drivers of change and impacts on environment, economy and society. Mitigation and management strategies for sustainable adaptation are investigated. Lectures are integrated with student presentations, guest lectures and discussion of current coastal and marine research.

PREREQUISITES: Must be third year standing or above

CROSSLISTED: GEOG 3102.03

EXCLUSIONS: SUST 3952.03 (winter 2016 and winter 2017)

FORMATS: Lecture | Discussion

SUST 3103 Effective Argument in Sustainability

CREDIT HOURS: 3

This collaborative seminar challenges students to engage in argument and persuasion. Learn about the argumentative process and how to separate facts from opinions. Discussion topics emerge from the ESS Lecture Series. Contemplate multiple views on these controversial issues and become more confident and comfortable responding to the views of others.

PREREQUISITES: SUST 2000.06 or SUST 2001.06

FORMATS: Lecture | Seminar

SUST 3104 Sustainability and the Non-Profit Sector

CREDIT HOURS: 3

This course introduces the Canadian non-profit sector and its role in driving social change towards sustainability, equity and social justice at local, regional, national and international levels. It examines the particular role and contributions of NGOs in relation to state and private actors, in achieving social, economic and ecological sustainability.

PREREQUISITES: SUST 2000.06 or MGMT 2304.03 or INTD 2002.03 or permission of instructor.

CROSSLISTED: MGMT 3104

FORMATS: Lecture | Experiential Learning

SUST 3106 The Canadian North: Environmental Change and Challenges

CREDIT HOURS: 3

This course introduces the Canadian North through an examination of the challenges faced by northern peoples. Emphasis is placed on the causes and consequences of global environmental change, and interactions with ecological processes and challenges for the human environment. Inuit perspectives of ecological knowledge will complement discussions on planning and development in a warming future. Principles of ecosystem management and emergent challenges for a sustainable future will also be addressed.

PREREQUISITES: Third year status or above, or permission of instructor.

CROSSLISTED: GEOG 3106.03

EXCLUSIONS: ENVI 5106, ENVI 5052 (W19, W20, F20, W21), SUST 3956 (W19)

FORMATS: Lecture

SUST 3107 Communicating Sustainability: Media and Messaging

CREDIT HOURS: 3

Sustainability is one of the most crucial news topic of our time. Through a workshop-driven approach, this course will encourage students to read these stories through a critical lens, produce journalism that is true to the science, and work with journalists on this topic. Each week, students will identify and critique pieces from legacy media, such as radio, TV, newspapers, and magazines; online sources including social media, podcasts and vlogs; and even current academic journal articles. We will consider these stories from the perspective of subject specialists, media consumers, and journalists. We'll look at what makes a story effective, the credibility of its sources and evidence, and how to responsibly communicate complex issues to a general audience. In parallel with this analysis, students will pitch their own media project ideas to an 'editorial board' of students and instructors, who will offer feedback. Students will then work in interdisciplinary teams to develop a media work from a pool of refined project pitches.

RESTRICTIONS: Restricted from 0-59 credit hours

EXCLUSIONS: SUST 3953.03, JOUR 3575.03 (taken in Winter 2022 and Winter 2023), ENVI 5052.03 (taken in Winter 2022 and Winter 2023)

SUST 3108 Green Finance & Environment, Social, and Governance Investing

CREDIT HOURS: 3

This course explores rapidly growing markets Green Finance and Environmental Social and Governance investing. The class begins with an overview of general approaches to financial investing, combined with an examination of how ESG investing fits into these markets. The course also explores project evaluation, allowing students to better understand which offer the best opportunities for investment while creating the greatest ESG impact. Students will then practically apply these skills in two semester long projects. The first is to design, implement, and trade their own ESG investment portfolios. The second is to design, scope, outline, and budget an ESG project.

CROSSLISTED: MGMT 3108

RESTRICTIONS: Third year standing or above

EXCLUSIONS: SUST 3954 (taken in Winter 2022)

SUST 3301 Local Approaches to Sustainability

CREDIT HOURS: 3

This locally-based field course offers collaborative learning opportunities to critically investigate and explore multi-faceted approaches to local sustainability issues. Excursions to community partners are combined with on-campus activities. We explore concepts of resiliency, community, and innovation.

CALENDAR NOTES: Field course including day field trips, lectures, and in-class activities.

PREREQUISITES: SUST 2000.06 or SUST 2001.06

EXCLUSIONS: SUST 3951

FORMATS: Other (explain in comments)

SUST 3302 Measuring Food Sustainability

CREDIT HOURS: 3

Why is measuring food sustainability important? We are becoming increasingly aware of the impacts that our food systems have on natural environments, biodiversity, the livelihoods of our food producers, and equitable accessibility for individuals. Integrating the expertise of numerous faculty and community leaders, this field course explores how food sustainability is measured and evaluated across different disciplines. Daily hands-on, active, and experiential learning is emphasized throughout the course. The course activities and assessments range from agricultural biodiversity monitoring via beetle surveys to a summative design challenge exploring a possible solution to a food sustainability measurement challenge.

CALENDAR NOTES: This is a two-week intensive course with time split between Dal's Halifax campus (five days) and Truro campus (five days). As part of the course auxiliary fee, course transportation and accommodation at Dalhousie Residences will be provided for students for the week they are away from

their home campus; however, food and meals are not included, and students will be responsible for their own food expenses.

CROSSLISTED: AGRI 3302.03

RESTRICTIONS: Third year status or above

FORMATS: Experiential Learning

SUST 3502 The Campus as a Living Laboratory

CREDIT HOURS: 3

In this course the campus serves as a living laboratory for identifying, evaluating and assessing indicators of progress toward greater campus sustainability. Working in groups, students apply problem solving models to case studies using qualitative and quantitative research methods and make recommendations for improvements on campus based on their analyses.

CALENDAR NOTES: SUST 3701.03/MGMT 3701.03 is considered equivalent to SUST 3502 and satisfies the same degree requirement.

PREREQUISITES: SUST 2000.06 or SUST 2001.06

CROSSLISTED: ENVS 3502.03

EXCLUSIONS: MGMT 3701.03/SUST 3701.03

FORMATS: Lecture | Tutorial

SUST 3701 The Community as a Living Laboratory

CREDIT HOURS: 3

This course introduces students to research, concepts and methods for analyzing community sustainability across a spectrum of perspectives. In this course, the Halifax community serves as a living laboratory for identifying, evaluating and assessing indicators of progress toward greater environmental, social and economic sustainability. Working in groups, students apply problem-solving models to case studies using qualitative and quantitative research methods to help community-based organizations grapple with real world problems. A variety of tools may be used including systems analysis, environmental audits, field surveys, questionnaires, interviews, and statistical analysis. Students then draw conclusions and make recommendations for improvements on the basis of their analysis.

CALENDAR NOTES: SUST 3502.03 is considered equivalent to SUST 3701.03 and satisfies the same degree requirement

PREREQUISITES: MGMT 1700.06 or ENVI 1100.06 or ENVS 1000.06 or SUST 2000.06 or SUST 2001.06 or (MGMT 1702.03 and MGMT 2702.03)

CROSSLISTED: MGMT 3701.03

EXCLUSIONS: SUST 3502.03/ENVS 3502.03

FORMATS: Lecture

SUST 3702 Sustainable Industries

CREDIT HOURS: 3

The course introduces students to concepts and methods for analyzing industrial sustainability through an interdisciplinary lens that highlights the necessity of including economic, social and environmental considerations. It also intends to deepen their understanding of: a) the business case (short term and long term) for industrial/corporate sustainability; b) the tools, techniques and strategies necessary to decouple economic growth of our business sectors from resource use and environmental degradation; and c) the key role that business and industry play in the sustainable development agenda. Using examples from various industrial settings, a range of management and policy mechanisms for ensuring resource sustainability are explored.

PREREQUISITES: SUST 2000.06 or SUST 2001.06 or (MGMT 1301.03 and MGMT 1302.03) or (MGMT 1702.03 and MGMT 2702.03) or (ENVS 1100.03 and ENVS 1200.03) or ENVS 1000.06

CROSSLISTED: MGMT 3702 and ENVS 3702

SUST 3950 Topics in Environment Sustainability and Society

CREDIT HOURS: 3

This course addresses current interdisciplinary issues in sustainability with topics varying each semester. The course is taught by Dalhousie faculty, and/or visiting scholars. Please consult Academic Timetable for current offerings.

PREREQUISITES: This class is restricted to students in the Environment, Sustainability and Society (ESS) program, or with permission from the Academic Advisor in the College of sustainability.

RESTRICTIONS: Must have third year status or above

SUST 3953 Topics in Environment, Sustainability and Society

CREDIT HOURS: 3

This course addresses current interdisciplinary issues in sustainability with topics varying each semester. The course is taught by Dalhousie faculty, and/or visiting scholars. Please consult Academic Timetable for current offerings.

PREREQUISITES: This class is restricted to students in the Environment, Sustainability and Society (ESS) program, or with permission from the Academic Advisor in the College of sustainability.

RESTRICTIONS: Must have third year status or above

FORMATS: Lecture

SUST 3954 Topics in Environment, Sustainability and Society

CREDIT HOURS: 3

This course addresses current interdisciplinary issues in sustainability with topics varying each semester. The course is taught by Dalhousie faculty, and/or visiting scholars. Please consult Academic Timetable for current offerings.

COREQUISITES: N/A

PREREQUISITES: This class is restricted to students in the Environment, Sustainability and Society (ESS) program, or with permission from the Academic Advisor in the College of sustainability.

CROSSLISTED: N/A

RESTRICTIONS: Must have third year status or above.

EXCLUSIONS: SUST 3104 (only for SUST 3954 taken in Summer 2017)

FORMATS: Lecture | Experiential Learning

SUST 4001 Environment, Sustainability and Society Capstone Part 1

CREDIT HOURS: 3

Students work in multidisciplinary groups, with community partner organizations to identify real problems and develop meaningful strategies to address them. Groups work with advisors and experts to create detailed plans of action based on strong research and analysis, working in a studio environment.

CALENDAR NOTES: Students taking this course must register in and complete SUST 4001 and SUST 4002 in consecutive fall-winter terms. Credit will not be granted for SUST 4001 until completion of SUST 4002.

PREREQUISITES: SUST 3502.03/ENVS 3502.03 or SUST 3701.03/MGMT 3701.03 or SUST 2000.06 or permission of instructor

EXCLUSIONS: SUST 4000X/Y.06

FORMATS: Lecture | Tutorial | Experiential Learning

SUST 4002 Environment, Sustainability and Society Capstone Part 2

CREDIT HOURS: 3

Students work in multidisciplinary groups, with community partner organizations to identify real problems and develop meaningful strategies to address them. Groups work with advisors and experts to create detailed plans of action based on strong research and analysis, working in a studio environment.

CALENDAR NOTES: Students taking this course must register in and complete SUST 4001.03 and SUST 4002.03 in consecutive fall-winter terms. Credit will not be granted for SUST 4001.03 until completion of SUST 4002.03.

PREREQUISITES: SUST 4001.03

EXCLUSIONS: SUST 4000X/Y.06

FORMATS: Lecture | Tutorial | Experiential Learning

SUST 4004 Pathways to Sustainable Energy

CREDIT HOURS: 3

Students gain a practical understanding of how to move towards a low-carbon energy future. Students learn about international, national, and subnational policies that drive adoption of renewable energy, energy efficiency, and carbon capture and storage technologies and how the technologies work. The technological barriers to their widespread adoption and how to overcome these barriers are also discussed.

PREREQUISITES: ECON 1101.03 or ECON 1102.03 or SUST 2001.06 and be a 4th year student or permission of instructor.

CROSSLISTED: ENVS 4004.03

FORMATS: Lecture

SUST 4047 Biodiversity Conservation System Design

CREDIT HOURS: 3

Conservation systems that protect biodiversity are increasingly necessary as human activities dominate the landscape, seascape and freshwater systems. Precise prescriptions for conservation design are evolving. The theory and practice of conservation system design are explored through lectures, presentations, discussions, and exercises, as an active learning module involving students, the instructor and the broader community. Topics include representation of ecological systems, focal species, population viability, habitat suitability, landscape ecology, connectivity, road ecology, and planning for species shifts in response to climate change.

CROSSLISTED: MGMT 4047

RESTRICTIONS: Restricted from 0-59 credit hours

EXCLUSIONS: ENVI 5047

FORMATS:

SUST 4103 Climate Change and Human Health

CREDIT HOURS: 3

Climate change and the drivers of climate change threaten to undermine the last 50 years of gains in public health. Extreme weather events (heatwaves, floods, droughts), and pollution exacerbate chronic and infectious diseases, poverty and mental ill-health. Crucially, the response to climate change brings immense benefits for human health, with cleaner air, healthier diets, and more liveable cities. This course builds an understanding of the human health and equity impacts of climate change and its related environmental crises. Students examine how forced migration, infectious diseases, food insecurity, conflict, poverty, and mental anxiety are exacerbated by climate change. Students also explore concepts of “one health,” “ecohealth,” and “planetary health” and

implications for action at an individual and societal level in relation to our shared natural, social and physical world.

RESTRICTIONS: Restricted to students in fourth year (completion of at least 90 credit hours)

FORMATS: Lecture | Seminar

SUST 4125 Conflict Negotiation & Sustainability

CREDIT HOURS: 3

This course looks at local and global conflicts driven by: climate, politics, resource extraction, land use, and development. The class offers preparatory lectures followed by team-based simulated negotiations. Students learn techniques related to de-escalation, negotiation and debate tactics, through assuming and advocating various stakeholder perspectives.

CROSSLISTED: MGMT 4125, PLAN 4125

RESTRICTIONS: Third year status or above

EXCLUSIONS: PLAN 6125.03

FORMATS: Lecture | Discussion

SUST 4800 Environment Sustainability and Society Independent Study

CREDIT HOURS: 3

This Independent study course allows fourth-year students to study a topic in Environment, Sustainability and Society not covered in other courses, or in more depth. Student must first consult with a faculty member to arrange the topic of study. An outline of the Independent Study must be approved by the Director of the College of Sustainability.

PREREQUISITES: This class is restricted to fourth-year students in the Environment, Sustainability and Society (ESS) program, or with permission from the Director of the College of Sustainability.

RESTRICTIONS: Must have completed 90 credit hours, permission required

SUST 4801 Environment, Sustainability and Society Independent Study

CREDIT HOURS: 3

This Independent study course allows fourth-year students to study a topic in Environment, Sustainability and Society not covered in other courses, or in more depth. Student must first consult with a faculty member to arrange the topic of study. An outline of the Independent Study must be approved by the Director of the College of Sustainability.

CALENDAR NOTES: Available to students who have completed SUST 4800 and wish to complete a second ESS Independent Study.

PREREQUISITES: This class is restricted to fourth-year students in the Environment, Sustainability and Society (ESS) program, or with permission from the Director of the College of Sustainability.

RESTRICTIONS: Must have completed 90 credit hours, permission required

SUST 4901 Honours Thesis Project Part 1

CREDIT HOURS: 3

Independent research project carried out under the supervision of an approved faculty member or affiliated professional.

CALENDAR NOTES: Students taking this course must register in and complete SUST 4901.03 and SUST 4902.03 in consecutive terms. Credit will not be granted for SUST 4901 until completion of SUST 4902.

PREREQUISITES: SUST 3000.03

RESTRICTIONS: Permission of Instructor required.

EXCLUSIONS: SUST 4900X/Y.06

FORMATS: Seminar

SUST 4902 Honours Thesis Project Part 2

CREDIT HOURS: 3

Independent research project carried out under the supervision of an approved faculty member or affiliated professional.

CALENDAR NOTES: Students taking this course must register for and complete SUST 4901.03 and SUST 4902.03 in consecutive terms. Credit will not be granted for SUST 4901 until completion of SUST 4902.

PREREQUISITES: SUST 4901.03

RESTRICTIONS: Permission of instructor required.

EXCLUSIONS: SUST 4900XY.06

FORMATS: Seminar

SUST 4950 Advanced Topics in Environment Sustainability and Society

CREDIT HOURS: 3

This course addresses current interdisciplinary issues in sustainability with topics varying each semester. The course is taught by Dalhousie faculty, and/or visiting scholars. Please consult Academic Timetable for current offerings.

PREREQUISITES: SUST 2000.06 OR SUST 2001.06 or with permission from the Academic Advisor in the College of Sustainability.
RESTRICTIONS: Must have third year status or above

Faculty of Agriculture

Location:
Cumming Hall
62 Cumming Drive
Dalhousie Agricultural Campus
PO BOX 550
Truro NS
B2N 5E3

Phone Number: (902) 893-6600
Fax Number:
Email Address: dean.agriculture@dal.ca
Website: www.dal.ca/faculty/agriculture.html

Introduction

The Faculty of Agriculture was established in 1905 as the Nova Scotia Agricultural College and merged with Dalhousie University in 2012.

Students in the Faculty of Agriculture study a range of undergraduate degree programs including animal science, agricultural business, agricultural economics, aquaculture, environmental landscape horticulture, environmental science, integrated environmental management, international food business, plant science and pre-veterinary medicine.

The Faculty offers diploma and technical programs in business management, engineering, managed landscapes, plant science and veterinary technology, as well as a variety of certificate programs.

Dalhousie's beautiful Agricultural Campus, located just outside Truro in Bible Hill, Nova Scotia, is home to the Faculty of Agriculture's more than 950 students. The campus is well equipped with a range of student services, residences, food and athletic facilities, clubs and societies; all of which lend to a rich and personable student experience. Hands-on learning in the classroom, the lab and the field, give students practical experience and prepare them well for careers on a local, national and global scale.

Challenge for Credit

Students registered in a Faculty of Agriculture program who have acquired competency in material covered by a Faculty of Agriculture course may obtain credit for the course by means of a course challenge. A maximum of six credit hours can be accumulated from challenges for credit.

Procedures:

- Application for challenge for credit is made to the Registrar and a fee of 50% of the course tuition is irrespective of the results of the challenge.
- The academic department must confirm that the student has a reasonable basis for requesting a challenge, such as previous work experience or educational experience.
- Normally the challenge will be in the form of a comprehensive examination, but for a course with an accompanying laboratory or project(s) the department may require demonstration of appropriate skills as a prerequisite to, or as a part of, the challenge for credit examination.
- The challenge for credit examination must be completed and the grade submitted prior to the last date for adding a course for the term in which the particular course is offered.
- Challenge for credit examinations will be graded as either Pass or Fail. This grade is final and cannot be appealed.
- No student may challenge for credit a course that appears on their academic record.
- A student must be in good academic standing to request a challenge for credit.
- A student may not challenge for credit more than once in any course.

Honours Conversion

Upgrading of BSc (Agriculture) to BSc (Agriculture) Honours, and Updating of BSc (Bioveterinary Science) to BSc (Bioveterinary Science) Honours

A person who holds a Dalhousie BSc (Agriculture) or BSc (Bioveterinary Science) degree may apply through the Registrar's Office, with the appropriate department advisor(s) approval, to an Honours program. On completion of the required work with proper standing, a parchment will be awarded which has the effect of upgrading the degree to Honours status.

Bachelor of Agriculture - International Food Business

** a dual degree awarded with a Bachelor of Administration (Honours) from Aeres University of Applied Sciences in The Netherlands*

Dalhousie University and Aeres University of Applied Sciences in the Netherlands have partnered to offer a four-year, dual-degree program. Graduates will be awarded a Bachelor of Agriculture in International Food Business from Dalhousie University and a Bachelor of Administration in International Food Business (Honours) from Aeres University of Applied Sciences.

This exciting dual degree program offers a year of international study and two work terms: one in North America and one in Europe. In year one, North American students will study at Dalhousie University, and European students will study at Aeres University of Applied Sciences. Year two is offered in The Netherlands when both groups of students will study together and experience a work placement in Europe. This continues in year three when both groups of students study on Dalhousie's Agricultural Campus in Truro, NS. Followed by a North American work placement. Students complete year four at their home university.

This four-year degree emphasizes its international focus by beginning with a one-week orientation in an international placement such as Iceland or Scotland. European and North American students get to know one another while exploring the local food industry. This unique program will appeal to students who enjoy studying independently, have an interest in business and are keen to explore the world.

Program Design and Delivery

The Bachelor of Agriculture in International Food Business is a modularized, competency-based program of study. The academic courses are integrated into a series of 10 modules throughout the first three years of the program. The module titles are listed below:

Year 1 Theme: International Business Essentials

Semester 1

Module 1.

Acquiring Knowledge of International Food Systems

Module 2.

Analyzing Business Processes

Year 2 Theme: Innovation and Marketing

Semester 1

Module 5.

Innovating and Entrepreneurship in Food Business

Semester 2

Module 3.

Analyzing Food Value Chains

Module 4.

Developing External Communication Strategies

Semester 2

Module 7.

Performing Market Research

Module 6.

European Placement

Marketing Management

Year 3 Theme: Leadership, Finances and Business Planning

Semester 1

Semester 2

Module 8.

Module 10.

Performing as a Leader and Manager

Developing Business Plans

Module 9.

North American Placement

Analyzing and Realizing Financial and Managerial Information and Forecasts

Students who complete all modules plus year 4 will receive credit in the following courses to meet the core requirements of the program:

ECO A 1000.03: Principles of Microeconomics

ECO A 1001.03: Principles of Macroeconomics

EGLA 1000.03: Composition

FOOD 1000.03: Food Safety and Quality Assurance

INFB 1000.03: International Food Policy and Environment

INFB 1001.03: International Food Business Project I

INFB 1002.03: International Food Business Project II

INFB 2000.03: International Food Business Project III

INFB 3000.03: International Food Business Project IV

MGTA 1002.03: Food Value Chain Management

MGTA 1004.03: Introduction to Business

MGTA 2002.03: Marketing

MGTA 2004.03: Financial Accounting

MGTA 2006.03: Advertising and Promotion

MGTA 2011.03: International Marketing Research

MGTA 2012.03: Leadership and Human Resources

MGTA 2013.03: Business Planning

MGTA 2016.03: Food Law and Consumer Affairs

MGTA 2017.03: Political Economy of the EU

MGTA 2018.03: International Entrepreneurship

MGTA 2019.03: Organizational Behaviour

MGTA 3000.03: Management Accounting

MGTA 3003.03: European Placement I

MGTA 3004.03: European Placement II

MGTA 3005.03: New Product Development

MGTA 3006.03: International Food Logistics

MGTA 3009.03: Financial Management

MGTA 3010.03: Agribusiness Value Chain Management

MGTA 4001.03: Advanced Entrepreneurship

MGTA 4002.03: North American Placement I

RESM 4004.03: Research Methods for Economics and Business

RESM 4005.03: Project-Seminar for Economics and Business

eight electives (including three specializations)

Year 1

Semester I

ECO A 1000.03: Principles of Microeconomics

EGLA 1000.03: Composition

INFB 1000.03: International Food Policy and Environment

MGTA 4002.03: North American Placement I

Year 4

Semester IX

RESM 4004.03: Research Methods for Economics and Business
Elective (First Specialization)
Elective (First Specialization)
Elective (Second Specialization)
Elective (Third Specialization)

Semester X

RESM 4005: Project-Seminar for Economics and Business
Elective (First Specialization)
Elective (Second Specialization)
Elective (Second Specialization)
Elective (Third Specialization)

In year four, students must take two, three-course specializations and one, two-course specialization. The following is a list of Specializations students can choose in consultation with the International Food Business Coordinator:

- Development Studies
- Leadership Studies
- Environmental Studies
- Economic Studies
- Horticultural Studies
- Management Studies
- Organic Studies
- Consumer Studies
- other

Bachelor of Science (Agriculture)

Dalhousie offers a four-year Bachelor of Science in Agriculture program. Students in the program who successfully complete the prescribed courses with a cumulative GPA at or above the minimum required (2.0), and who are in good standing, will be granted the degree of Bachelor of Science in Agriculture, BSc (Agr). Graduates meet the formal educational requirements for Professional Agrologists in the provincial Institutes of Agrologists in Canada.

Normally, students select a major during their first year and continue in that field of study until they graduate.

- 120 credit hours
- six credit hours of approved Languages and Humanities/Social Sciences electives from the list, of which three credit hours must be at the 3000 level or above
- 18 credit hours at the 3000 level or above
- 36 credit hours of approved agricultural courses from the list below
- Specific Major Requirements as follows

Majors

Agricultural Business, Agricultural Economics, Animal Science, Aquaculture, Environmental Sciences, Integrated Environmental Management, Plant Science. See specific degree requirements listed below.

Double Major

Students wishing to complete a double major must satisfy all of the degree requirements for the BSc (Agr) and the program specific requirements of each major. Students must complete a minimum of 24 credit hours in the second major that are not included in the first major. A degree with a second major may take longer to complete than a single degree major due to scheduling challenges.

Approved Agricultural Courses

Courses with an 'A' designation focus on one or more aspects of the agri-food system – the production, management, processing, and marketing of crops and livestock and their products. Other courses may use agricultural examples, but are not designated 'A' because their main focus is not on the agri-food system.

- AGRI 1000.03, AGRI 2000.03, AGRI 3001.03, AGRI 4000.03, AGRI 4001.03

Approved Languages and Humanities/Social Sciences Electives

Courses in the following subject areas, and the additional specific courses listed below, meet the Languages and Humanities/Social Sciences elective requirements:

- Languages and Humanities: EGLA (English), ARTS (Art), HISA (History), FRNA (French), SPNA (Spanish), PHLA (Philosophy)
- Social Sciences: ECOA (Economics)*, EXTE (Extension Education), CMMT (Communications), GEOA (Geography), HISA (History), PSYC (Psychology), POLS (Political Science), RURS (Rural Studies), SOCI (Sociology)
- AGRI 3001.03: Issues in Agricultural Health and Safety
- AGRI 4000.03: Contemporary Issues in Agriculture
- AGRI 4001.03: Agriculture, Food and Well-being
- APSC 4005.03: Watershed Management and Environmental Restoration
- ENVA 2003.03: Introduction to Urban and Peri-Urban Agriculture
- HORT 3008.03: Horticultural Therapy
- IAGR 3002.03: International Rural Development
- SPEC 4009.03: Special Topics in Rural Studies

*Students taking majors or minors in Agricultural Business or Agricultural Economics cannot use ECOA courses for completion of their Languages and Humanities/Social Sciences Electives.

BSc (Agr) - Agricultural Business

Required Courses & Suggested Schedule

Year I: Semester I

AGRI 1000.03: Agricultural Ecosystems

BIOA 1002.03: Biology I

ECOA 1000.03: Principles of Microeconomics or EGLA *

MTHA 1000.03: Introductory Calculus I

three credit hours of electives

Year I: Semester II

BIOA 1003.03: Biology II

ECOA 1000.03: Principles of Microeconomics or EGLA *

MGTA 1004.03: Introduction to Business

MTHA 1001.03: Introductory Calculus II

three credit hours of electives

*ECOA 1000.03: Principles of Microeconomics can be taken in either semester and should be alternated with the choice of EGLA 1000.03: Composition, EGLA 1002.03: Nature in Literature, or EGLA 1004.03: English Studies in Science and Technology.

Year II: Semester III

MGTA 2002.03: Marketing

MGTA 2004.03: Financial Accounting

MGTA 2019.03: Organizational Behavior

six credit hours of electives

Year II: Semester IV

ECOA 1001.03: Principles of Macroeconomics
MGTA 2000.03: Human Resource Management
STAA 2000.03: Introduction to Statistics
six credit hours of electives

Year III: Semester V

MGTA 3001.03: International Marketing or three credit hours of electives **
MGTA 3009.03: Financial Management
MGTA 3011.03: Marketing Research
six credit hours of electives

Year III: Semester VI

ECOA 3002.03: Agricultural & Food Policy
MGTA 3000.03: Management Accounting
MGTA 3002.03: Consumer Behaviour or three credit hours of electives **
MGTA 3010.03: Agribusiness Value Chain Management
RESM 3000.03: Research Methods in Agriculture

Year IV: Semester VII

MGTA 4006.03: Issues in Agribusiness Sustainability
12 credit hours of electives

Year IV: Semester VIII

MGTA 4000.03: Strategic Management
MGTA 4001.03: Advanced Entrepreneurship
nine credit hours of electives

Electives must include:

- six credit hours of [Languages and Humanities/Social Science Courses](#) which cannot be from the ECOA designation and three credit hours of these must be at the 3000 level or above.
- six credit hours of approved [Agricultural Courses](#), unless MGTA 3002.03 is chosen, in which case only three credit hours are required.

** Students must complete either MGTA 3001.03 or MGTA 3002.03

BSc (Agr) - Agricultural Economics

Required Courses & Suggested Schedule

Year I: Semester I

AGRI 1000.03: Agricultural Ecosystems
BIOA 1002.03: Biology I
ECOA 1000.03: Principles of Microeconomics or EGLA *
MTHA 1000.03: Introductory Calculus I
three credit hours of electives

Year I: Semester II

BIOA 1003.03: Biology II
ECOA 1000.03: Principles of Microeconomics or EGLA *
MTHA 1001.03: Introductory Calculus II
six credit hours of electives

*ECOA 1000.03: Principles of Microeconomics can be taken in either semester and should be alternated with the choice of EGLA 1000.03: Composition, EGLA 1002.03: Nature in Literature, or EGLA 1004.03: English Studies in Science and Technology.

Year II: Semester III

ECOA 2000.03: Intermediate Microeconomics
ECOA 2003.03: Agricultural Futures and Options
MGTA 2002.03: Marketing
MGTA 2004.03: Financial Accounting
three credit hours of electives

Year II: Semester IV

ECOA 1001.03: Principles of Macroeconomics
ECOA 3005.03: Agricultural Production Economics
ECOA 3008.03: Environmental Economics
STAA 2000.03: Introduction to Statistics
three credit hours of electives

Year III: Semester V

ECOA 2001.03: Intermediate Macroeconomics
ECOA 3001.03: Econometrics 1
MGTA 3009.03: Financial Management
six credit hours of electives

Year III: Semester VI

ECOA 3002.03: Agricultural & Food Policy
ECOA 3004.03: Agricultural Markets & Prices
ECOA 4004.03: Trade
RESM 3000.03: Research Methods in Agriculture
three credit hours of electives

Year IV: Semester VII

15 credit hours of electives

Year IV: Semester VIII

15 credit hours of electives

Electives must include:

- six credit hours of [Languages and Humanities/Social Science Courses](#) which cannot be from the ECOA designation and three credit hours must be at the 3000 level or above.
- three credit hours of approved [Agricultural Courses](#).

BSc (Agr) - Animal Science

Required Courses & Suggested Schedule

Year I: Semester I

AGRI 1000.03: Agricultural Ecosystems
BIOA 1002.03: Biology I
CHMA 1000.03: General Chemistry I
ECOA 1000.03: Principles of Microeconomics or EGLA *
MTHA 1000.03: Introductory Calculus I

Year I: Semester II

BIOA 1003.03: Biology II
CHMA 1001.03: General Chemistry II
ECOA 1000.03: Principles of Microeconomics or EGLA*
MTHA 1001.03: Introductory Calculus II
three credit hours of electives

*ECOA 1000.03: Principles of Microeconomics can be taken in either semester and should be alternated with the choice of EGLA 1000.03: Composition, EGLA 1002.03: Nature in Literature, or EGLA 1004.03: English Studies for Science and Technology.

Year II: Semester III

ANSC 2005.03: Animal Agriculture
CHMA 2000.03: Organic Chemistry I
GENE 2000.03: Genetics
STAA 2000.03*: Introduction to Statistics
three credit hours of electives

Year II: Semester IV

BIOA 2006.03: Mammalian Physiology
CHMA 2002.03: Introduction to Biochemistry
PHYS 1000.03: Physics for Life Sciences I*
six credit hours of electives

Year III: Semester V

BIOA 3008.03: Growth, Reproduction and Lactation

NUTR 3000.03: Animal Nutrition

nine credit hours of electives

Year III: Semester VI

ANSC 3000.03: Animal Breeding

NUTR 3001.03: Applied Animal Nutrition

nine credit hours of electives****

Year IV: Semester VII

RESM 3000.03: Research Methods in Agriculture

12 credit hours of electives****

Year IV: Semester VIII

15 credit hours of electives ****

Electives must include:

- six credit hours of [Languages and Humanities/Social Science courses](#) of which three credit hours must be at the 3000 level or above.
- 12 credit hours of approved [Agricultural Courses](#).
- 12 credit hours of approved Animal Science electives at the 3000 or 4000 level from the following list:
- ANSC 3001.03, ANSC 3002.03, ANSC 3003.03, ANSC 3004.03, ANSC 3005.03, ANSC 3006.03, ANSC 3007.03, ANSC 3008.03, ANSC 3009.03, ANSC 3011.03, ANSC 4001.03, ANSC 4003.03, ANSC 4004.03, ANSC 4006.03, ANSC 4007.03, ANSC 4008.03, ANSC 4009.03
- AQUA 3000.03, AQUA 4000.03, AQUA 4001.03
- BIOA 3003.03, BIOA 3005.03, BIOA 3006.03, BIOA 4000.03, BIOA 4004.03
- BVSC 3000.03, BVSC 3001.03, BVSC 4000.03
- GENE 4005.03, GENE 4006.03
- NUTR 3002.03, NUTR 4000.03
- RESM 4012.03
- SPEC 4000.03

* Physics - Students must complete either PHYS 1000.03 or PHYS 1002.03 but not both for credit.

BSc (Agr) - Aquaculture**Required Courses & Suggested Schedule****Year I: Semester I**

AGRI 1000.03: Agricultural Ecosystems

BIOA 1002.03: Biology I

CHMA 1000.03: General Chemistry I

ECOA 1000.03: Principles of Microeconomics or EGLA *

MTHA 1000.03: Introductory Calculus I

Year I: Semester II

BIOA 1003.03: Biology II

CHMA 1001.03: General Chemistry II

ECOA 1000.03: Principles of Microeconomics or EGLA *

MTHA 1001.03: Introductory Calculus II

three credit hours of electives

*ECOA 1000.03: Principles of Microeconomics can be taken in either semester and should be alternated with the choice of EGLA 1000.03: Composition, EGLA 1002.03: Nature in Literature, or EGLA 1004.03: English Studies in Science and Technology.

Year II: Semester III

AQUA 2000.03: Introduction to Aquaculture

CHMA 2000.03: Organic Chemistry I

GENE 2000.03: Genetics

STAA 2000.03: Introduction to Statistics

three credit hours of electives

Year II: Semester IV

CHMA 2002.03: Introduction to Biochemistry
APSC 2004.03: Aquacultural Environment
MCRA 2000.03: Microbiology
PHYS 1000.03: Physics for the Life Sciences I *
MGTA 1004.03: Introduction to Business

Year III: Semester V

BIOA 3005.03: Fish Physiology
BIOA 3006.03: Aquatic Ecology
nine credit hours of electives

Year III: Semester VI

ANSC 3000.03: Animal Breeding
AQUA 3000.03: Fish Health
APSC 3013.03: Aquacultural Systems Technology
NUTR 3002.03: Fish Nutrition
three credit hours of electives

Year IV: Semester VII

AQUA 4000.03: Finfish Production
RESM 3000.03: Research Methods in Agriculture
nine credit hours of electives

Year IV: Semester VIII

AQUA 4001.03: Shellfish Production
12 credit hours of electives

* Physics - Students must complete either PHYS 1000.03 or PHYS 1002.03 but not both for credit.

Electives must include:

- six credit hours of [Languages and Humanities/Social Science Courses](#) of which three credit hours must be at the 3000 level or above.
- six credit hours of approved [Agricultural Courses](#).

BSc (Agr) - Environmental Sciences

Required Courses & Suggested Schedule

Year I: Semester I

AGRI 1000.03: Agricultural Ecosystems
BIOA 1002.03: Biology I
CHMA 1000.03: General Chemistry I
ECOA 1000.03: Principles of Microeconomics or EGLA *
MTHA 1000.03: Introductory Calculus I

Year I: Semester II

BIOA 1003.03: Biology II
CHMA 1001.03: General Chemistry II
ECOA 1000.03: Principles of Microeconomics or EGLA *
MTHA 1001.03: Introductory Calculus II
three credit hours of electives

ECOA 1000.03: Principles of Microeconomics can be taken in either semester and should be alternated with the choice of EGLA 1000.03: Composition, EGLA 1002.03: Nature in Literature, or EGLA 1004.03: English Studies for Science and Technology.

Year II: Semester III

CHMA 2000.03: Organic Chemistry I
ENVA 2000.03: Environmental Studies I
SOIL 2000.03: Introduction to Soil Science
STAA 2000.03: Introduction to Statistics
three credit hours of electives

Year II: Semester IV

CHMA 2002.03: Introduction to Biochemistry or
CHMA 3009.03: Environmental Chemistry
ENVA 2001.03: Environmental Studies II
MCRA 2000.03: Microbiology
STAA 3000.03: Introduction to Planned Studies: Surveys & Experiments
three credit hours of electives

Year III: Semester V

BIOA 3001.03: Ecology
ENVA 3005.03: Geographic Information Systems (GIS) or Elective**
ENVA 3001.03: Environmental Sampling & Analysis
six credit hours of electives

Year III: Semester VI

CHMA 4003.03: Instrumental Analysis of Elective**
APSC 3002.03: Waste and Environmental Management
PHYS 1000.03: Physics for the Life Sciences I*
six credit hours of electives

Year IV: Semester VII

ENVA 2004.03: Introduction to Integrated Pest Management Techniques
ENVA 4006.03: Air, Climate and Climate Change
HORT 3000.03: Environmental Processes & Natural Landscape Functions
RESM 3000.03: Research Methods in Agriculture
three credit hours of electives

Year IV: Semester VIII

ENVA 3000.03: Environmental Impact Assessment
12 credit hours of electives

* Physics - Students must complete either PHYS 1000.03 or PHYS 1002.03 but not both for credit.

** Students must complete one of either CHMA 4003.03 OR ENVA 3005.03.

Electives must include:

- six credit hours of [Languages and Humanities/Social Science courses](#) of which three credit hours must be at the 3000 level or above.
- Students who complete CHMA 4003.03 must include nine credit hours of approved [Agricultural Courses](#). Students who complete ENVA 3005.03 must include six credit hours of approved [Agricultural Courses](#).

BSc (Agr) - Integrated Environmental Management

Required Courses & Suggested Schedule

Year I: Semester I

AGRI 1000.03: Agricultural Ecosystems
BIOA 1002.03: Biology I
CHMA 1000.03: General Chemistry I
ECOA 1000.03: Principles of Microeconomics or EGLA *
MTHA 1000.03: Introductory Calculus I

Year I: Semester II

12 credit hours of electives

Year IV: Semester VIII

APSC 4004.03: Energy Conversion & Assessment
APSC 4005.03: Watershed Management and Environmental Restoration
nine credit hours of electives

* Physics - Students must complete either PHYS 1000.03 or PHYS 1002.03 but not both for credit.

Electives must include:

- six credit hours of [Languages and Humanities/Social Science Courses](#) of which three credit hours must be at the 3000 level or above.

BSc (Agr) - Plant Science

Required Courses & Suggested Schedule

Year I: Semester I

AGRI 1000.03: Agricultural Ecosystems
BIOA 1002.03: Biology I
CHMA 1000.03: General Chemistry I
ECOA 1000.03: Principles of Microeconomics or EGLA *
MTHA 1000.03: Introductory Calculus I

Year I: Semester II

BIOA 1003.03: Biology II
CHMA 1001.03: General Chemistry II
ECOA 1000.03: Principles of Microeconomics or EGLA *
MTHA 1001.03: Introductory Calculus II
three credit hours of electives

*ECOA 1000.03: Principles of Microeconomics can be taken in either semester and should be alternated with the choice of EGLA 1000.03: Composition, EGLA 1002.03: Nature in Literature, or EGLA 1004.03: English Studies in Science and Technology.

Year II: Semester III

BIOA 2000.03: Cell Biology
BIOA 2008.03: Plant Diversity
CHMA 2000.03: Organic Chemistry I
GENE 2000.03: Genetics
SOIL 2000.03: Introduction to Soil Science

Year II: Semester IV

BIOA 2002.03: Plant Physiology
BIOA 2004.03: Structural Botany
CHMA 2002.03: Introduction to Biochemistry
MCRA 2000.03: Microbiology
three credit hours of electives

Year III: Semester V

BIOA 3000.03: General Entomology
BIOA 3002.03: Weed Science
RESM 3000.03: Research Methods in Agriculture
STAA 2000.03: Introduction to Statistics
three credit hours of electives

Year III: Semester VI

BIOA 2005.03: Principles of Plant Pathology
SOIL 3000.03: Soil Fertility & Nutrient Management
nine credit hours of electives

Year IV: Semester VII

PLSC 4002.03: Plant Ecophysiology
12 credit hours of electives

Year IV: Semester VIII

15 credit hours of electives

Electives must include:

- six credit hours of [Languages and Humanities/Social Science Courses](#) of which three credit hours must be at the 3000 level or above.
- six credit hours Plant Science Production courses from the following list: AGRN 2000.03, AGRN 2001.03, AGRN 2002.03, AGRN 2008.03, HORT 2000.03, HORT 2001.03, HORT 2004.03, HORT 2010.03, HORT 2014.03, HORT 2015.03, PLSC 1000.03, PLSC 2000.03, PLSC 2001.03

Bachelor of Science (Agriculture) Honours

The BSc (Agr) Honours program provides an innovative research experience for academically strong students that will prepare them for a research-driven employment opportunity or admission to graduate study. Students who take the Honours program will be able to apply scientific methods in an individual research project, research a scientific question, design and conduct experiments to address a scientific question, develop a critical synthesis of scientific results and communicate experimental concepts effectively both in writing and orally.

Admission to Honours

Students must apply for admission to the Honours programs. Students considering Honours should consult with an academic advisor early in their studies. To enter the program, students enrolled in the BSc (Agr) program must:

- have a cumulative GPA of 3.3 or higher after their second year of study
- identify and gain the support of a thesis supervisor at the start of their third year of studies

Course Requirements

To graduate with Honours, in addition to fulfilling the BSc (Agr) degree requirements, students must earn a minimum of a B- in the Honours Thesis I and II courses (RESM 4014.03 and RESM 4015.03), achieve a cumulative GPA of at least 3.0, and complete any additional major requirements listed in the table below as defined by the major:

Program	Honours Requirements
Agricultural Business	All courses required for the core and major plus: RESM 4014.03: Honours Thesis I RESM 4015.03: Honours Thesis II
Agricultural Economics	All courses required for the core and major plus: EOCA 4000.03: Advanced Microeconomics EOCA 4005.03: Advanced Macroeconomics RESM 4014.03: Honours Thesis I RESM 4015.03: Honours Thesis II
Aquaculture	All courses required for the core and major plus: STAA 3000.03: Intro to Planned Studies RESM 4014.03: Honours Thesis I RESM 4015.03: Honours Thesis II
Animal Science	All courses required for the core and major plus: STAA 3000.03: Intro to Planned Studies RESM 4014.03: Honours Thesis I RESM 4015.03: Honours Thesis II
Environmental Sciences	All courses required for the core and major plus: RESM 4014.03: Honours Thesis I RESM 4015.03: Honours Thesis II
Integrated Environmental Management	All courses required for the core and major plus: STAA 3000.03: Intro to Planned Studies RESM 4014.03: Honours Thesis I RESM 4015.03: Honours Thesis II
Plant Science	All courses required for the core and major plus: STAA 3000.03: Intro to Planned Studies RESM 4014.03: Honours Thesis I RESM 4015.03: Honours Thesis II

Year 3 and 4 Recommended Course Sequencing

BSc (Agr) - Agricultural Business

Year III: Semester V

MGTA 3001.03: International Marketing or or three credit hours of electives **
 MGTA 3009.03: Financial Management
 MGTA 3011.03: Marketing Research
 six credit hours of electives

Year III: Semester VI

EOCA 3002.03: Agricultural & Food Policy
 MGTA 3000.03: Management Accounting
 MGTA 3002.03: Consumer Behaviour or three credit hours of electives **
 MGTA 3010.03: Agribusiness Value Chain Management
 RESM 3000.03: Research Methods in Agriculture

Year IV: Semester VII

MGTA 4006.03: Issues in Agribusiness Sustainability
 RESM 4014.03: Honours Thesis I
 nine credit hours of electives

Year IV: Semester VIII

MGTA 4000.03: Strategic Management
MGTA 4001.03: Advanced Entrepreneurship
RESM 4015.03: Honours Thesis II
six credit hours of electives

Electives must include:

- six credit hours of [Languages and Humanities/Social Science courses](#) which cannot be from the ECOA designation and three credit hours of these must be at the 3000 level or above.
- six credit hours of approved [Agricultural Courses](#), unless MGTA 3002.03 is chosen, in which case only three credit hours are required.

** Students must complete either MGTA 3001.03 or MGTA 3002.03.

BSc (Agr) - Agricultural Economics

Year III: Semester V

ECOA 2001.03: Intermediate Macroeconomics
ECOA 3001.03: Econometrics 1
MGTA 3009.03: Financial Management
six credit hours of electives

Year III: Semester VI

ECOA 3002.03: Agricultural & Food Policy
ECOA 3004.03: Agricultural Markets & Prices
ECOA 3005.03: Agricultural Production Economics
RESM 3000.03: Research Methods in Agriculture
three credit hours of electives

Year IV: Semester VII

ECOA 4000.03: Advanced Microeconomics
ECOA 4001.03: Econometrics 2
RESM 4014.03: Honours Thesis I
six credit hours of electives

Year IV: Semester VIII

ECOA 4004.03: Trade
ECOA 4005.03: Advanced Macroeconomics
RESM 4015.03: Honours Thesis II
six credit hours of electives

Electives must include:

- six credit hours of [Languages and Humanities/Social Science courses](#) which cannot be from the ECOA designation and three credit hours must be at the 3000 level or above.

BSc (Agr) - Animal Science

Year III: Semester V

BIOA 3008.03: Growth, Reproduction and Lactation
NUTR 3000.03: Animal Nutrition
nine credit hours of electives

Year III: Semester VI

ANSC 3000.03: Animal Breeding
NUTR 3001.03: Applied Animal Nutrition
RESM 3000.03: Research Methods in Agriculture
STAA 3000.03: Introduction to Planned Studies
three credit hours of electives

Year IV: Semester VII

RESM 4014.03: Honours Thesis I
12 credit hours of electives

Year IV: Semester VIII

RESM 4015.03: Honours Thesis II

12 credit hours of electives

Electives must include:

- six credit hours of [Languages and Humanities/Social Science courses](#) of which three credit hours must be at the 3000 level or above.
- six credit hours of approved [Agricultural Courses](#).
- 12 credit hours of approved Animal Science electives at the 3000 or 4000 level from the following list: ANSC 3001.03, ANSC 3002.03, ANSC 3003.03, ANSC 3004.03, ANSC 3005.03, ANSC 3006.03, ANSC 3007.03, ANSC 3008.03, ANSC 3009.03, ANSC 3011.03, ANSC 4001.03, ANSC 4003.03, ANSC 4004.03, ANSC 4006.03, ANSC 4007.03, ANSC 4008.03, ANSC 4009.03, AQUA 3000.03, AQUA 4000.03, AQUA 4001.03, BIOA 3003.03, BIOA 3005.03, BIOA 3006.03, BIOA 4000.03, BIOA 4004.03, BVSC 3000.03, BVSC 3001.03, BVSC 4000.03, GENE 4005.03, GENE 4006.03, NUTR 3002.03, NUTR 4000.03, RESM 4012.03, SPEC 4000.03

BSc (Agr) – Aquaculture**Year III: Semester V**

BIOA 3005.03: Fish Physiology

BIOA 3006.03: Aquatic Ecology

RESM 3000.03: Research Methods in Agriculture

six credit hours of electives

Year III: Semester VI

ANSC 3000.03: Animal Breeding

AQUA 3000.03: Fish Health

APSC 3013.03: Aquacultural Systems Technology

NUTR 3002.03: Fish Nutrition

STAA 3000.03: Introduction to Planned Studies

Year IV: Semester VII

AQUA 4000.03: Finfish Production

RESM 4014.03: Honours Thesis I

nine credit hours of electives

Year IV: Semester VIII

AQUA 4001.03: Shellfish Production

RESM 4015.03: Honours Thesis II

nine credit hours of electives

Electives must include:

- six credit hours of [Languages and Humanities/Social Science courses](#) of which three credit hours must be at the 3000 level or above.

BSc (Agr) - Environmental Sciences**Year III: Semester V**

BIOA 3001.03: Ecology

CHMA 4003.03: Instrumental Analysis or Elective

ENVA 3005.03: Geographic Information Systems (GIS)

ENVA 3001.03: Environmental Sampling & Analysis

RESM 3000.03: Research Methods in Agriculture

three credit hours of electives

Year III: Semester VI

APSC 3002.03: Waste and Environmental Management

PHYS 1000.03: Physics for the Life Sciences I

RESM 4014.03: Honours Thesis I

six credit hours of electives

Year IV: Semester VII

ENVA 2004.03: Introduction to Integrated Pest Management Techniques
ENVA 4006.03: Air, Climate and Climate Change
HORT 3000.03: Environmental Processes & Natural Landscape Functions
RESM 4015.03: Honours Thesis II
three credit hours of electives

Year IV: Semester VIII

ENVA 3000.03: Environmental Impact Assessment
12 credit hours of electives

*Physics - Students must complete either PHYS 1000 or PHYS 1002.03 but not both for credit.

Electives must include:

- six credit hours of [Languages and Humanities/Social Science](#) courses of which three credit hours must be at the 3000 level or above.
- Students who complete CHMA 4003.03 must include three credit hours of approved [Agricultural Courses](#). Students who complete ENVA 3005.03 do not need additional credit hours of approved Agriculture electives.

BSc (Agr) - Integrated Environmental Management

Year III: Semester V

APSC 2013.03: Machinery & Building Technology
APSC 3020.03: Energy Production & Utilization
ENGN 3016.03: Engineering Economy
RESM 3000.03: Research Methods in Agriculture
three credit hours of electives

Year III: Semester VI

APSC 3015.03: Irrigation and Drainage
APSC 3002.03: Waste and Environmental Management
MGTA 1004.03: Introduction to Business
RESM 4014.03: Honours Thesis I
STAA 3000.03: Introduction to Planned Studies

Year IV: Semester VII

APSC 4006.03: Wastewater Management
RESM 4015.03: Honours Thesis II
nine credit hours of electives

Year IV: Semester VIII

APSC 4004.03: Energy Conversion & Assessment
APSC 4005.03: Watershed management and Environmental Restoration
nine credit hours of electives

- six credit hours of [Languages and Humanities/Social Science courses](#) of which three credit hours must be at the 3000 level or above.

BSc (Agr) - Plant Science

Year III: Semester V

BIOA 3000.03: General Entomology
BIOA 3002.03: Weed Science
RESM 3000.03: Research Methods in Agriculture
STAA 2000.03: Introduction to Statistics
three credit hours of electives

Year III: Semester VI

BIOA 2005.03: Principles of Plant Pathology
RESM 4014.03: Honours Thesis I
SOIL 3000.03: Soil Fertility & Nutrient Management

STAA 3000.03: Introduction to Planned Studies
three credit hours of electives

Year IV: Semester VII

PLSC 4002.03: Plant Ecophysiology
RESM 4015.03: Honours Thesis II
nine credit hours of electives

Year IV: Semester VIII

15 credit hours of electives

Electives must include:

- six credit hours of [Languages and Humanities/Social Science courses](#) of which three credit hours must be at the 3000 level or above.
- six credit hours Plant Science Production courses from the following list: AGRN 2000.03, AGRN 2001.03, AGRN 2002.03, AGRN 2008.03, HORT 2000.03, HORT 2001.03, HORT 2004.03, HORT 2010.03, HORT 2014.03, HORT 2015.03, PLSC 1000.03, PLSC 2000.03, PLSC 2001.03.

Bachelor of Science (Bioveterinary Science)

The BSc (Bioveterinary Science) program is the starting point for your animal-related career of choice. This four-year Bachelor of Science program at Dalhousie University's Faculty of Agriculture gives you the foundation for a career in veterinary medicine – and opens up a world of other exciting options. The program is especially designed for students looking for a head start in veterinary medicine. You will be eligible to apply to any of a number of veterinary schools after just two years. Completing a four-year degree in Bioveterinary Science positions you for success as a post-graduate student in programs like animal science, aquaculture, veterinary science and human medicine. Other exciting potential careers include animal health, food safety, veterinary sales, wildlife conservation and biotechnology.

Students in the Bioveterinary Science program who successfully complete the prescribed 120 credit hours of courses with a cumulative GPA at or above the minimum required (2.0), and who are in good standing, will be granted the degree of Bachelor of Science (Bioveterinary Science), BSc (BVS). The program includes elective courses in several relevant fields.

Requirements of program:

- 120 credit hours
- 60 credit hours of required courses outlined below
- 3 credit hours of approved Languages and Humanities/Social Science electives which must be at 3000 level or above*
- 39 credit hours of general electives
- 18 credit hours of electives chosen from the list below, including at least 6 credit hours at the 4000 level

Required Courses and Suggested Schedule

Year I Semester I

BIOA 1002.03: Biology I
CHMA 1000.03: General Chemistry I
EGLA 1000.03: Composition or EGLA 1004.03: English Studies in Science & Technologies
MTHA 1000.03: Calculus I
three credit hours of electives

Year I Semester II

BIOA 1003.03: Biology II
BVSC 1000.03: Overview of Animal Health Sciences
CHMA 1001.03: General Chemistry II
PHYS 1000.03: Physics for Life Sciences
three credit hours of electives

Year II Semester III

BIOA 2000.03: Cell Biology
CHMA 2000.03: Organic Chemistry
GENE 2000.03: Genetics

BIOA 3003.03: Comparative Vertebrate Anatomy
three credit hours of electives

Year II Semester IV

MCRA 2000.03: Microbiology
STAA 2000.03: Introductory Statistics
BIOA 2006.03: Mammalian Physiology
CHMA 2002.03: Introduction to Biochemistry
three credit hours of electives

After two years, students could have all of the courses required to apply for entrance to any Canadian college of veterinary medicine.

Year III Semester V

BVSC 3000.03: Veterinary Immunology
NUTR 3000.03: Animal Nutrition
nine credit hours of electives

Year III Semester VI

BVSC 3001.03: Veterinary Epidemiology
ANSC 3001.03: Animal Health
nine credit hours of electives

Year IV Semester VII

15 credit hours of electives

Year IV Semester VIII

15 credit hours of electives

Students must choose 18 credit hours of electives from the following list, including at least six credit hours at the 4000 level:

- ANSC 3000.03: Animal Breeding
- ANSC 3002.03: Domestic Animal Behaviour
- ANSC 3005.03: Animal Welfare**
- ANSC 3006.03: Companion Animal Biology
- ANSC 3011.03: Equine Behavior and Learning
- ANSC 4001.03: Equine Exercise Physiology and Health
- ANSC 4008.03: Carnivore Biology
- AQUA 3000.03: Fish Health
- BIOA 3000.03: General Entomology
- BIOA 3005.03: Fish Physiology
- BIOA 3008.03: Growth, Reproduction and Lactation
- BIOA 4000.03: Avian Biology
- BIOA 4004.03: Animal Adaptation and Stress**
- BVSC 4000.03: Ecology of Zoonotic Diseases
- GENE 4005.03: Applied Genomics and Bioinformatics
- GENE 4006.03: Advanced Studies in Molecular and -Omics Techniques
- PHLA 3001.03: Animal Ethics
- RESM 4012.03: Animal Research Methods

* [One 3000 or 4000 level Humanities or Social Sciences course is required in the program.](#)

** Available by distance

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with a Bioveterinary Science undergraduate academic advisor.

Bachelor of Science (Bioveterinary Science) Honours

The BSc (Bioveterinary Science) Honours program provides an innovative research experience for academically strong students that will prepare them for a research-driven employment opportunity or admission to graduate study. Students who take the Honours program will be able to apply scientific methods in an individual research project, research a scientific question, design and conduct

experiments to address a scientific question, develop a critical synthesis of scientific results and communicate experimental concepts effectively both in writing and orally.

Admission to Honours

Students must apply for admission to the Honours programs. Students considering Honours should consult with an academic advisor early in their studies. To enter the program, students enrolled in the BSc (Bioveterinary Science) Major program must:

- have a cumulative GPA of 3.3 or higher after their second year of study
- identify and gain the support of a thesis supervisor at the start of their third year of studies

Course Requirements

To graduate with Honours, in addition to fulfilling the BSc (Bioveterinary Science) Major degree requirements, students must:

- complete RESM 4012.03: Animal Research Methods
- earn a minimum of a B- in the Honours Thesis I and II courses (RESM 4014.03 and RESM 4015.03)
- achieve a cumulative GPA of at least 3.0

Year 4 Recommended Course Sequencing

Year IV: Semester VII

RESM 4012.03: Animal Research Methods

RESM 4014.03: Honours Thesis I

nine credit hours of electives

Year IV: Semester VIII

RESM 4015.03: Honours Thesis II

12 credit hours of electives

Electives: For more information on electives, please refer to the BSc (Bioveterinary Science) Major program.

Diploma in Engineering

The Diploma in Engineering program on Dalhousie's Agricultural campus can be the starting point for your degree of Bachelor of Engineering on the Sexton campus in Halifax.

Engineering is a structured program requiring that all disciplines take the same courses during the first year of study. During the second year, students take a mix of core and discipline-specific courses. Courses that are common to all disciplines (core) include Computer Science, Engineering Design, Electric Circuits, Physics, Calculus and Statistics. Discipline-specific courses include Digital Circuits, Dynamics, Bioresource Processing and Thermofluids II.

Students who complete their Diploma in Engineering on the Agricultural campus are not required to re-apply to the Sexton campus to complete the degree of Bachelor of Engineering.

Required Courses & Suggested Schedule

Year I Semester I

CHMA 1000.03: General Chemistry I

CSCA 2000.03: Computer Science

ENGN 1001.03: Engineering Design I

ENGN 1006.03: Technical Communications in Professional Engineering

MTHA 1000.03: Introductory Calculus I

PHYS 1002.03: Physics I

Year I Semester II

CHMA 1001.03: General Chemistry II

ENGN 1002.03: Engineering I

MTHA 1001.03: Introductory Calculus II

MTHA 3000.03: Applied Linear Algebra

PHYS 1003.03: Physics II

STAA 2001.03: Probability & Statistics for Engineering

Year II Semester III

EGLA 1004.03: English Studies for Science and Technology

ENGN 3000.03: Electric Circuits

ENGN 3002.03: Thermo-fluids I

ENGN 3016.03: Engineering Economy

MTHA 2000.03: Multivariable Calculus

* Writing elective / Discipline - specific elective (Chemical Engineering only)

Year II Semester IV

ENGN 3017.03: Engineering Design II

MTHA 2001.03: Differential Equations

* Writing elective (Chemical Engineering only) / Discipline - specific electives

*** Required Discipline-specific courses:**

Semester III:

Chemical: CHMA 2000.03: Organic Chemistry

Semester IV

Chemical: ENGN 2014.03.03 & ENGN 3011.03

Civil: ENGN 3006.03, ENGN 3011.03 & GELA 2000.03

Electrical: CSCA 2001.03, ENGN 3004.03 & ENGN 3008.03

Environmental: ENGN 3006.03, ENGN 3011.03 & GELA 2000.03

Industrial: CSCA 2001.03, ENGN 2201.03 & ENGN 3006.03

Mechanical: ENGN 2005.03, ENGN 3006.03 & ENGN 3011.03

Mineral Resources: ENGN 3006.03, ENGN 3011.03 & GELA 2000.03

All students must take a 3 credit hour writing elective (EGLA 1000.03, EGLA 1002.03, GEOA 1000.03 or SOCI 1000.03) in addition to EGLA 1004.03, and 9 credit hours of discipline - specific electives as outlined above.

Pre-Veterinary Medicine Studies

The Faculty of Agriculture offers the courses needed to apply to any Doctor of Veterinary Medicine (DVM) program in Canada. The universities that offer those programs are:

- Atlantic Veterinary College, University of Prince Edward Island
- Ontario Veterinary College, University of Guelph
- Western College of Veterinary Medicine, University of Saskatchewan
- Faculty of Veterinary Medicine, University of Calgary
- Faculté de médecine vétérinaire, Université de Montréal

In Canada, a student will apply to the DVM program in their home region, but can prepare for those programs here at Dalhousie University. All DVM programs in Canada require a minimum of 20 undergraduate single semester courses (60 credit hours) which can normally be completed in 2 years. Although the admission requirements for the different DVM programs vary slightly, all can be completed at Dalhousie. Both the BSc (Agr) (majors in Animal Science or Aquaculture) and the BSc (Bioveterinary Science) programs at the Agricultural Campus are designed to facilitate completion of the preveterinary requirements.

The Faculty of Agriculture offers many benefits to Pre-Vet students. Students will be exposed to animals such as sheep, dairy cattle, poultry, mink and aquaculture species. Students can take part in the active Pre-Vet student club and volunteer to help with lambing, milking, animal care, or aquaculture research on the Agricultural Campus.

Students intending to apply to Veterinary Medicine may register in the Bachelor of Science (Agriculture) with an undeclared major in Pre-Veterinary Studies. Students should meet regularly with an academic advisor throughout their studies to monitor the requirements for both their Dalhousie program and the DVM program for which they intend to apply.

The following is the schedule of recommended courses in first year.

Year I Semester I

AGRI 1000.03: Agricultural Ecosystems

BIOA 1002.03: Biology I

CHMA 1000.03: General Chemistry I

EGLA 1000.03: Composition
MTHA 1000.03: Introductory Calculus I

Year I Semester II

BIOA 1003.03: Biology II
CHMA 1001.03: General Chemistry II
BVSC 1000.03: Overview of the Animal Health Sciences
MTHA 1001.03: Introductory Calculus II
Three credit hours of electives

During first year, students should consult one of our experienced Pre-Vet advisors to select second year courses that best suit their needs and interests.

Bachelor of Technology - Environmental Landscape Horticulture

Please note that new admissions to this program are suspended.

Required Courses & Suggested Schedule

The Bachelor of Technology Environmental Landscape Horticulture is designed to prepare students for a career in the landscape horticulture profession. It will prepare students to work successfully in the diverse landscape industry or to create their own business within the industry. Years one and two of the program are satisfied by the successful completion of the Diploma of Technology - Managed Landscapes or a two year landscape-related program approved by the Department of Environmental Sciences. Students who wish to pursue graduate studies should take RESM 4006.03 and RESM 4007.03.

Year III: Semester V

BIOA 2008.03: Plant Diversity
CHMA 1000.03: General Chemistry I
APSC 3019.03: Communications Technology
ENVA 2000.03: Environmental Studies I
HORT 3000.03: Environmental Processes & Natural Landscape Functions

Year III: Semester VI

ENVA 2001.03: Environmental Studies II
MGTA 1004.03: Introduction to Business
PLSC 3000.03: Theory & Practice of Plant Propagation
six credit hours of electives

Year IV: Semester VII

ENVA 2004.03: Introduction to Integrated Pest Management Techniques
ENVA 3005.03: Geographic Information Systems (GIS)
HORT 3001.03: Landscape Project Management
HORT 4000.03: Urban Tree Management
three credit hours of electives

Year IV: Semester VIII

APSC 3015.03: Irrigation & Drainage or three credit hours of electives
HORT 2005.03: Design & Construction of Turf Facilities
HORT 3008.03: Horticultural Therapy
six credit hours of electives

* Students who have not met the Soil Science requirements of the Diploma of Technology - Managed Landscapes will be required to take SOIL 2000.03.

Bachelor of Technology - Landscape Architecture

The Bachelor of Technology in Landscape Architecture program focuses on designing and creating functional spaces, using an interdisciplinary approach that includes horticultural and engineering skills and applies ecological and environmental knowledge to provide site-specific solutions. This program encourages students to be in tune with natural ecosystems and apply a creative mindset to tackle various environmental and design challenges. Students will be prepared to challenge, innovate and make a difference in the

environment. The foundation of the program is the idea of sustainability as a key part of landscape development. This is a multi-disciplinary education and training, which includes engineering, horticulture, architectural design and the environment.

Year 1 Semester I

EGLA 0101.02: Writing for Business
HORT 1000.03: Landscape Plants I
HORT 1002.03: Turfgrass Production and Management
HORT 1003.03: Landscape Horticulture I
SOIL 2000.03: Introduction to Soil Science
ENGN 1001.03: Engineering Design I

Semester II

APSC 0101.02: Horticultural Technology
HORT 1001.03: Landscape Plants II
HORT 1005.03: Landscape Installation
HORT 2012.03: Landscape Maintenance
three credit hours of electives

Year 2 Semester III

ARTS 2000.03: Nature's Image: A Survey of Landscape Art
APSC 0100.02: Surveying
HORT 1006.03: Landscape Plants III
HORT 2011.03: Arboriculture
HORT 2013.03: Landscape Horticulture II

Semester IV

HORT 2008.03: Residential Landscape Design and Construction
LARC 2000.03: Landscape CAD I
MGTA 1004.03: Introduction to Business
three credit hours of electives

Year 3 Semester V

ENVA 2000.03: Environmental Studies I
HORT 3000.03: Environmental Processes and Natural Landscape Functions
ENVA 3005.03: Geographic Information Systems
APSC 3019.03: Communications Technology
LARC 3000.03: Landscape CAD II: Introduction to 3D

Semester VI

ENVA 2001.03: Environmental Studies II
CMMT 3000.03: Human Communications and Conflict Resolution
LARC 2001.03: History of Landscape Architecture
LARC 3001.03: Landscape Presentation Techniques
HORT 2005.03: Design and Construction of Turf Facilities

Year 4 Semester VII

ENVA 3021.03: Ecohydrology
LARC 4000.03: Construction and Detailing
LARC 4001.06: Landscape Architecture Studio I
HORT 4000.03: Urban Tree Management
three credit hours of electives

Semester VIII

HORT 3001.03: Landscape Project Management
HORT 3008.03: Horticulture Therapy
LARC 4002.06: Landscape Architecture Studio II
APSC 3015.03: Irrigation and Drainage

Bachelor of Technology - Small Business Management

The Bachelor of Technology in Small Business Management is a two-year, post-diploma degree program for diploma graduates who have studied a technical (primarily non-business) area at college, community college, polytechnic, or similar tertiary level institution. This degree provides students with the management, communication, and leadership skills necessary to manage a business. Careers in marketing, sales, or service are options.

Students in the Bachelor of Technology in Small Business Management who successfully complete the prescribed 60 credit hours of courses with a minimum GPA of 2.00, and are in good standing, will be granted the degree.

Requirements of the program:

- 60 credit hours
- 54 credit hours of required courses outlined below
- six credit hours of approved electives outlined below
- 30 credit hours is the maximum allowable for introductory (level 1000 and 2000) courses
- Completion of degree within 6 years

Required courses and suggested schedule:

Year I Semester I

ECO A 1000.03: Principles of Microeconomics
MGTA 2002.03: Marketing
MGTA 2004.03: Financial Accounting
MGTA 2019.03: Organizational Behaviour
EGLA 1000.03: Composition

Year I Semester II

ECO A 1001.03: Principles of Macroeconomics
MGTA 2000.03: Human Resource Management
CMMT 3000.03: Human Communications and Conflict Resolution
MGTA 1004.03: Introduction to Business
MGTA 3000.03: Management Accounting

Year II Semester III

MGTA 3009.03: Financial Management
MGTA 3001.03: International Marketing
MGTA 3011.03: Marketing Research
EXTE 3001.03: Leadership Development and the Social Action Process
three credit hours of electives

Year II Semester IV

MGTA 4001.03: Advanced Entrepreneurship
MGTA 2001.03: Introduction to Business Law
MGTA 3002.03: Consumer Behaviour
MGTA 4000.03: Strategic Management
three credit hours of electives

In consultation with the Academic Advisor, students must choose six credit hours of electives, three of which must be at the 3000 or 4000 level.

Diploma in Technology - Business Management

The Diploma in Technology - Business Management is a program designed to provide the fundamentals of business management and at the same time allow students to concentrate in one of the following areas: Agriculture, Dairy Farming, and Equine Studies. This two-year diploma provides students with the management, communication, and leadership skills necessary to manage a business. Careers in marketing, sales, or service are options.

This diploma is a unique mix of technical-credit courses, degree-credit courses and those designated as workplace readiness courses (non-credit). The workplace readiness courses develop the practical skills and knowledge required to work in business and in the area of concentration. The workplace readiness courses common to all the options include: career preparation, public speaking, first aid, Occupational Health and Safety (OHS), Workplace Hazardous Materials Information System (WHMIS), business ethics, and professionalism. Specialty workplace readiness courses are specific to the area chosen, e.g. Hazard Analysis and Critical Control Point (HACCP) and livestock medicines for the Dairy Farming and Agriculture options. Some of these courses will be scheduled throughout the semester, and others will be offered at the beginning of the semester. Students may be required to bring protective clothing and footwear, depending on the option chosen.

One of the options - Agriculture - has an internship requirement for the spring and summer semesters. Students will be expected to obtain employment in their area of specialty and complete a designated list of competencies. The employer will be expected to complete an assessment of the student's performance. See the course descriptions for more details.

Students who graduate from the Diploma in Technology Business Management program have the option of continuing their studies in the Bachelor of Science (Agriculture) program. Students who graduate from the Diploma in Technology Business Management program are awarded a minimum of 30 credit hours toward the BSc (Agriculture) degree, provided all other program requirements are met. In addition, in consultation with the academic advisor, DBM students may identify additional elective courses that are available to transfer for credit towards the BSc (Agriculture) program. Diploma in Technology Business Management students interested in exploring or developing a pathway to the BSc (Agriculture) are strongly encouraged to meet with their academic advisor early in their program.

Diploma in Technology - Business Management Concentrations

Agriculture

Students planning to operate/manage a farm or who wish to work in the agricultural industry in sales or service should choose this specialization. Along with the primary emphasis on business, students pick and choose among a number of livestock, field crop, or horticulture electives to develop a program best suited to their long-term career interests.

Required Courses

Year I Semester I

ACAD 0020.00: Skills for Academic Success*
ANSC 0112.02: Animal Biology and Management or
PLSC 1001.03: Introduction to Plant Science
ECOA 0100.02: Introductory Microeconomics
EGLA 0101.02: Writing For Business
MTHA 0100.02: Business Math
MGTA 0100.02: Accounting
SOIL 2000.03: Introduction to Soil Science

Year I Semester II

AGRN 2002.03: Forages and Cover Crops
CMMT 0020.00: Career and Employment Skills*
MGTA 0101.02: Applied Accounting & Taxation
MGTA 1004.03: Introduction to Business
Elective**
Elective**
Elective**

Year I Semester III (Spring/Summer)

INTA 0100.02: Internship

Year II Semester IV

APSC 0200.02: Environmental Management
MGTA 0020.00: Business Leadership, Ethics, and Professionalism*
MGTA 0204.02: Financial Management
MGTA 0209.02: Agricultural Manager I
Elective**
Elective**
Elective**

Year II Semester V

CMMT 0021.00: Introduction to Public Speaking*
MGTA 0210.02: Agricultural Manager II
MGTA 0201.02: Business Project
MGTA 2000.03: Human Resource Management
MGTA 2001.03: Introduction to Business Law
Elective**
Elective**

Required Workplace Readiness certificates:

WHMIS, First Aid, OHS, Farm Safety, On-farm HACCP or QA, Livestock Medicines course (for students interested in livestock production)

* Workplace Readiness course

** Students can choose their elective courses from a number of subjects (diploma level courses and degree courses at the 1000 and 2000 level, provided prerequisites are met). Of the (8) elective courses required, (4) are restricted to courses offered in the following

subject fields: Agriculture (AGRI), Agronomy (AGRN), Animal Science (ANSC), Applied Science (APSC), Biology (BIOA), Horticulture (HORT), and Plant Science (PLSC). It is strongly advised that students meet with their academic advisor for guidance in selecting elective courses.

Dairy Farming

This specialization is designed for students interested in a career in the dairy industry, whether it is operating their own dairy farm, working as a herdsman, or employed in sales or service for the dairy industry.

Required Courses

Year I Semester I

ACAD 0020.00: Skills for Academic Success*
ANSC 0020.00: Dairy Industry I*
ANSC 0112.02: Animal Biology and Management
ECO 0100.02: Introductory Microeconomics
EGLA 0101.02: Writing For Business
MTHA 0100.02: Business Math
MGTA 0100.02: Accounting
SOIL 2000.03: Introduction to Soil Science

Year I Semester II

AGRN 2002.03: Forages and Cover Crops
ANSC 0021.00: Dairy Industry II*
ANSC 0113.02: Principles of Animal Welfare & Husbandry
ANSC 0114.02: Animal Feed and Nutrition Management
ANSC 0205.02: Optimizing Bovine Reproductive and Genetic Performance
BIOA 0103.02: Weed Science
CMMT 0020.00: Career and Employment Skills*
MGTA 0101.02: Applied Accounting & Taxation

Year II Semester III

AGRN 2001.03: Cereal-Based Cropping Systems
ANSC 0206.02: Managing Dairy Milking Systems and Housing Facilities
APSC 0200.02: Environmental Management
APSC 0201.02: Machinery and Building Technology
MGTA 0020.00: Business Leadership, Ethics, and Professionalism*
MGTA 0204.02: Financial Management
MGTA 0209.02: Agricultural Manager I

Year II Semester IV

ANSC 0204.02: Dairy Herd Health and Nutrition Management
BIOA 0101.02: Plant Pathology
CMMT 0021.00: Introduction to Public Speaking*
MGTA 0210.02: Agricultural Manager II
MGTA 2001.03: Introduction to Business Law
MGTA 0201.02: Business Project
MGTA 2000.03: Human Resource Management

Required Workplace Readiness certificates and experience:

WHMIS, First Aid, OHS, Farm Safety, On-farm HACCP, Dairy Medicines course, Dairy Skills experience**

* Workplace Readiness course

** Students will be expected to complete two weeks of work experience at the Agricultural Campus dairy farm as part of the requirements for the program. This work experience normally is completed in the first year.

Equine Studies

Please note that new admissions to this program are suspended.

This concentration is designed specifically for those students interested in owning or managing an equine-related business. It provides students who have a passionate interest in horses the opportunity to study something they love and at the same time receive a solid business education that is directly transferable to any type of business operation.

Required Courses

Year I Semester I

ACAD 0020.00: Skills for Academic Success*
ANSC 0022.00: Equine Industry*
ANSC 0112.02: Animal Biology and Management
ECOA 0100.02: Introductory Microeconomics
EGLA 0101.02: Writing For Business
MTHA 0100.02: Business Math
MGTA 0100.02: Accounting
SOIL 2000.03: Introduction to Soil Science

Year I Semester II

AGRN 2002.03: Forages and Cover Crops
ANSC 0113.02: Principles of Animal Welfare and Husbandry
ANSC 0114.02: Animal Feed and Nutrition Management
CMMT 0020.00: Career and Employment Skills*
MGTA 0101.02: Applied Accounting & Taxation
MGTA 1004.03: Introduction to Business
MGTA 2001.03: Introduction to Business Law

Year II Semester III

ANSC 0213.02: Equine Growth & Nutrition
APSC 0200.02: Environmental Management
MGTA 0020.00: Business Leadership, Ethics, and Professionalism*
MGTA 2009.03: Customer Relations Management
MGTA 0204.02: Financial Management
MGTA 2002.03: Marketing

Year II Semester IV

CMMT 0021.00: Introduction to Public Speaking*
MGTA 0201.02: Business Project
MGTA 2000.03: Human Resource Management
MGTA 2006.03: Advertising and Promotion

Required Workplace Readiness certificates:

WHMIS, First Aid, OHS, Work Safety, Equine Medicines course
* Workplace Readiness course

Diploma in Technology Managed Landscapes

The Diploma in Technology Managed Landscapes is a two-year program which helps prepare students for careers with landscaping firms, planning agencies, recreational parks, or institutions, or in self-employed roles as landscape horticultural technologists.

The Diploma in Technology Managed Landscapes is a fully approved Certified Horticultural Technician integrated educational program, recognized by the International Certification Council (ICC) and the Certification Committee of the Canadian Nursery Landscape Association (CNLA). Interested students can apply for a Passport to Certification that enables modular training and testing toward international recognition as a Certified Horticultural Technician. The curriculum fully encompasses the requirements for certification in various industry sectors.

Students who successfully complete the Diploma in Technology Managed Landscapes with a cumulative average of at least 2.0 are eligible for admission to the two-year Bachelor of Technology Environmental Landscape Horticulture program, as years one and two of the BTech Environmental Landscape Horticulture program are satisfied by the successful completion of the Diploma.

Required Courses**Year I Semester I**

EGLA 0101.02 Writing for Business
HORT 1000.03: Landscape Plants I
HORT 1002.03: Turfgrass Production and Management
HORT 1003.03: Landscape Horticulture I
SOIL 2000.03: Introduction to Soil Science

Year I Semester II

CMMT 0021.00 Introduction to Public Speaking

Diploma in Technology Plant Science

The two-year Diploma in Technology Plant Science program prepares graduates for exciting careers in the dynamic plant-based industries of the future. Emerging information and technology related to bio-energy, nutrition, health, environmental protection, and plant genetics will make a plant science education a valuable asset. This program provides an innovative approach to the production and use of plant resources, with emphasis on responsible environmental and social stewardship, commercialization of ideas and strong practical skills in horticultural or agronomic plant production techniques, entrepreneurship, problem-solving, communication, and decision-making, all built on a solid foundation in the bio-sciences.

Studies begin with a first year of required courses that allow students to build their knowledge in the bio-sciences, plant production, and business, and to develop their interests. The program then provides the opportunity in the second year to select from a wide variety of courses to give each student the flexibility to match courses to their interests and career goals. With the help of a knowledgeable program advisor, students can choose from courses in edible horticulture, ornamental horticulture, agronomy, plant science, business, or engineering.

Students who graduate from the Diploma in Technology Plant Science program have the ability to make significant progress towards the completion of the BSc (Agriculture) major in Plant Science degree program. Students who graduate from the technology program are awarded a minimum of 30 credit hours toward the BSc (Agriculture) degree, provided all other program requirements are met. In addition, in consultation with the Plant Science Technology Academic Advisor, students can identify additional elective courses that will transfer for credit toward the BSc (Agriculture) major in Plant Science degree program. Plant Science students interested in exploring a pathway from the Diploma to the BSc (Agriculture) are strongly encouraged to meet with their academic advisor early in their program.

Required Courses

Year I Semester I

Elective

In year two, students take three elective courses in each semester chosen in consultation with an Academic Advisor.

Recommended Electives

The following courses are suggested as electives in the study areas related to the Diploma in Technology Plant Science. Courses not on the list may also be eligible as electives; students may choose either technical-level courses or degree courses at the 1000 and 2000 level. Consultation with the program advisor is recommended. Many of these courses have prerequisites; it is the student's responsibility to ensure that these requirements are met.

Fall

AGRN 2001.03: Cereal-Based Cropping Systems
HORT 2000.03: Vegetable Production
HORT 2010.03: Controlled Environment Agriculture I
HORT 2004.03: Viticulture
PLSC 1000.03: Farm Woodlot Management

Diploma in Technology Veterinary Technology

The Veterinary Technology (VT) Program prepares graduates with the skills and knowledge required to enter veterinary practice as technical assistants to veterinarians. Veterinary technicians have also made successful careers in a variety of other fields, including the

management of animal shelters; research with animals in universities and for private companies; sales for veterinary supply companies; and employment with zoos and in wildlife rehabilitation.

The Veterinary Technology Program is a two-year program with four standard semesters and an intersession after the first year. In addition to on-campus learning there are off-campus externships at the Atlantic Veterinary College and in general veterinary practices. To reflect the major employment opportunities in Atlantic Canada, the program is oriented mainly towards companion animals. The modest large-animal content is appropriate for graduates entering mixed practice and for those who wish to further develop their livestock or equine competence. Under the supervision of veterinarians and veterinary technicians in the VT program's Boulden Animal Clinic, students learn the skills and tasks required of them in companion animal practice.

***Note:** Students who are admitted to the program must provide proof of vaccination against rabies and tetanus to Dalhousie University prior to the start of their program. Students will not be permitted to begin the Veterinary Technology Program without these vaccinations.*

The successful completion of all first year veterinary technology courses is required prior to entrance into the intersession (summer session - VTEC 0131.02: Internship in Veterinary Technology, VTEC 0224.02: Fundamentals in Veterinary Technology IV and VTEC 0133.02: Externship in General Veterinary Practice).

Successful completion of VTEC 0131.02 is required prior to entrance into VTEC 0133.02.

The successful completion of all first year veterinary technology program courses in addition to the summer intersession courses (VTEC 0131.02, VTEC 0133.02) is required prior to entrance into the second year courses in veterinary technology.

The Veterinary Technology Program is accredited by the Canadian Veterinary Medical Association. The animal facilities are approved for teaching by the Canadian Council on Animal Care. The Animal Clinic is accredited by the Nova Scotia Veterinary Medical Association.

Required Courses

Year I Semester I

EGLA 0101.02: Writing for Business
VTEC 0111.02: Animal Medicine and Nursing I
VTEC 0112.02: Clinical Exercises I
VTEC 0113.02: Veterinary Clinical Pathology I
VTEC 0114.02: Fundamentals in Veterinary Technology I
VTEC 0115.02: Anatomy-Physiology-Pathophysiology I

Year I Semester II

ANSC 2003.03: Companion Animal Behaviour
VTEC 0121.02: Animal Medicine and Nursing II
VTEC 0122.02: Clinical Exercises II
VTEC 0123.02: Veterinary Clinical Pathology II
VTEC 0124.02: Fundamentals in Veterinary Technology II
VTEC 0125.02: Anatomy-Physiology-Pathophysiology II

Year I Semester III

VTEC 0131.02: Internship in Veterinary Technology
VTEC 0133.02: Externship in General Veterinary Practice
VTEC 0224.02: Fundamentals in Veterinary Technology IV

Year II Semester IV

VTEC 0211.02: Animal Medicine and Nursing III
VTEC 0212.02: Clinical Exercises III
VTEC 0213.02: Veterinary Clinical Pathology III
VTEC 0214.02: Fundamentals in Veterinary Technology III
VTEC 0215.02: Livestock and Equine Principles
Elective*

Year II Semester V

VTEC 0132.02: Externship at the Atlantic Veterinary College
VTEC 0221.02: Animal Medicine and Nursing IV
VTEC 0222.02: Clinical Exercises IV
VTEC 0223.02: Veterinary Clinical Pathology IV

VTEC 0225.02: Lab Animal & Alternative Pet Medicine
Elective*

* Electives are selected by approval of the Program Coordinator, from the Registry of Approved Continuing Education of the American Association of Veterinary State Boards.

Minors

The purpose of a minor is to attain a significant body of knowledge within a specific discipline that is outside of the student's major or substantially exceeds what a student would obtain through studies in their major. Students may take a minor in one of the areas listed below as part of the BSc (Agr) degree program. Students who wish to take a minor must meet the requirements for a major in their chosen discipline.

Minor in Agricultural Business Management

This minor is available to students registered in a 120 credit hour Bachelor of Science (Agriculture), Bachelor of Arts, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

The purpose of this minor is to offer students a body of knowledge related to the disciplines of business and management that is specifically applicable to agri-food sectors.

To be awarded the Agricultural Business Management minor students must complete 18 credit hours, six credit hours of which must be at the 3000 level or higher.

Required Courses:

- MGTA 2002.03: Marketing
- MGTA 2004.03: Financial Accounting

Elective Courses:

In consultation with the Academic Advisor, students may choose from any Faculty of Agriculture MGTA courses at a 2000 level or higher.

The following courses provide knowledge and skills that are highly relevant to business operations in the agri-food sector. Students may count up to six credit hours from the following list:

- ECOA 2003.03: Agricultural Futures and Options
- ECOA 3002.03: Agricultural and Food Policy
- ECOA 4004.03: Trade
- CMMT 3000.03: Communication Theory and Skills
- EXTE 3001.03: Leadership Development and the Social Action Process

Contact [Faculty of Agriculture](#) for more information.

Minor in Agricultural Economics

This minor is available to students registered in a 120 credit hour Bachelor of Science (Agriculture), Bachelor of Arts, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

This minor is not available to student majoring in Economics or Agricultural Economics.

This minor provides students the opportunity to deepen their understanding and expertise in agricultural economics. Areas of study include: applied economic theory, quantitative economics, agricultural commodity futures markets, environmental policy, agricultural policy, trade, production economics, and agricultural markets and prices.

18 credit hours chosen from the following in consultation with the academic advisor.

Required:

- ECOA 2000.03: Intermediate Microeconomics

Students must also take at least six additional credit hours at the 3000 or 4000 level, from the following list of courses:

- ECOA 2001.03: Intermediate Macroeconomics
- ECOA 2003.03: Agricultural Futures and Options
- ECOA 3001.03: Econometrics 1
- ECOA 3002.03: Agricultural and Food Policy
- ECOA 3004.03: Agricultural Markets and Prices
- ECOA 3005.03: Agricultural Production Economics
- ECOA 3008.03: Environmental Economics
- ECOA 4000.03: Advanced Microeconomics
- ECOA 4001.03: Econometrics 2
- ECOA 4004.03: Trade
- ECOA 4005.03: Advanced Macroeconomics

Additional courses approved by the Business & Social Sciences Department Head.

Contact [Faculty of Agriculture](#) for more information.

Minor in Animal Agriculture

This minor is available to students registered in a 120 credit hour Bachelor of Science (Agriculture), Bachelor of Arts, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

The Minor in Animal Agriculture will enable students in majors other than Animal Science to learn more about how we raise and care for livestock, including the science behind good animal practice. Students will gain an appreciation for the businesses and industries that support the healthy rearing of farm animals. They will have an opportunity to explore the biology of farm animals, as well as socio-economic concerns such as regulatory frameworks, animal welfare and environmental impacts of raising animals.

18 credit hours chosen from the following, in consultation with the academic advisor.

Required courses:

- ANSC 2005: Animal Agriculture
- BIOA 2006: Mammalian Physiology
- NUTR 3000: Animal Nutrition
- 6 credit hours from the following courses:
 - ANSC 3001: Animal Health
 - ANSC 3000: Animal Breeding
 - BIOA 3008: Growth, Reproduction and Lactation
 - NUTR 3001: Applied Animal Nutrition
- Plus, at least 3 credit hours from the following list:
 - ANSC 2007: Beef Production and Management
 - ANSC 4003: Avian Production Systems
 - ANSC 4004: Ecology of Milk Production in Ruminants
 - ANSC 4005: Swine Science and Pork Production
 - ANSC 4006: The Science of Modern Sheep Farming
 - ANSC 4007: Pastures in Sustainable Livestock Systems

If any of the required courses for the minor are also required for your major, select additional courses from the list above to attain a total of 18 credit hours for minor.

Contact [Faculty of Agriculture](#) for more information.

Minor in Aquaculture

This minor is available to students registered in a 120 credit hour Bachelor of Science (Agriculture), Bachelor of Arts, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

The Minor in Aquaculture will enable students in majors other than Aquaculture to gain important theoretical knowledge and practical skills in the field of aquaculture. Students will gain an appreciation for the range of species farmed in aquaculture and the production systems required to rear them. They will have an opportunity to explore the biology of aquatic animals, relevant issues pertaining to fish health and the impact of aquaculture on the surrounding environment. The business and socio-economic impacts and the regulations within which the industry is managed will also be included in the curriculum.

18 credit hours chosen from the following, in consultation with the Aquaculture advisor.

Required:

- AQUA 2000.03: Introduction to Aquaculture
- AQUA 4000.03: Finfish Production OR AQUA 4001.03: Shellfish Production

Optional courses:

- AQUA 3000.03: Fish Health
- AQUA 4000.03: Finfish Production
- AQUA 4001.03: Shellfish Production
- BIOA 3005.03: Fish Physiology
- BIOA 3006.03: Aquatic Ecology
- NUTR 3002.03: Fish Nutrition
- APSC 2004.03: Aquacultural Environment
- APSC 3013.03: Aquacultural Systems Technology

Contact [Faculty of Agriculture](#) for more information.

Minor in Environmental Horticulture

This minor is available to Bachelor of Science (Agriculture) students.

This minor enables students in other programs to explore the concept of environmental horticulture with emphasis on turfgrass, landscape maintenance, tree management or landscape installation.

18 credit hours chosen from the following, in consultation with the academic advisor.

Required courses:

- HORT 1000.03: Landscape Plants
- HORT 1003.03: Landscape Horticulture

And, an additional six credit hours from the list below:

- HORT 1002.03: Turfgrass Production and Management
- HORT 1005.03: Landscape Installation
- HORT 2005.03: Design and Construction of Turf Facilities
- HORT 2011.03: Arboriculture
- HORT 2012.03: Landscape Maintenance

Plus, an additional six credit hours at 3000 or 4000 level from the list below

- HORT 3000.03: Environmental Processes and Natural Landscape Functions
- HORT 3001.03: Landscape Project Management
- HORT 3008.03: Horticultural Therapy
- HORT 4000.03: Urban Tree Management

Contact [Faculty of Agriculture](#) for more information.

Minor in Environmental Sciences (Agriculture)

This minor is only available to **Bachelor of Science (Agriculture)** and **Bachelor of Science (Bioveterinary Science)** students.

18 credit hours chosen from the following, in consultation with the academic advisor.

Required courses:

- ENVA 2000.03: Environmental Studies I
- ENVA 2001.03: Environmental Studies II
- HORT 3000.03: Environmental Processes and Natural Landscape Functions
- ENVA 3000.03: Environmental Impact Assessment

At least six credit hours are required from the following approved courses:

- BIOA 3001.03: Ecology
- CHMA 3009.03: Environmental Chemistry
- ENVA 3001.03: Environmental Sampling and Analysis
- APSC 3002.03: Waste and Environmental Management
- ENVA 3021.03: Ecohydrology
- ENVA 3005.03: Geographic Information System
- ENVA 4006.03: Air, Climate and Climate Change
- SOIL 2000.03: Introduction to Soil Science

Contact [Faculty of Agriculture](#) for more information.

Minor in Equine Science

This minor is available to students registered in a 120 credit hour Bachelor of Science (Agriculture) or Bachelor of Science (Bioveterinary Science) program.

The Minor in Equine Science will enable students to gain theoretical knowledge and practical skills in the field of equine sciences. They will learn more about how we raise and care for horses, including the science behind good equine practice. Students will gain an appreciation for the businesses and industries that support the healthy rearing of horses. They will have an opportunity to explore the biology of horses, relevant issues pertaining to horse health and welfare, genetics and breeding, nutrition, behaviour and facilities management.

Required Courses:

- ANSC 2002.03: Introduction to Equine Science
- ANSC 2008.03: Equine Facilities Management
- ANSC 3008.03: Equine Genetics and Reproductive Management
- ANSC 3009.03: Applied Equine Nutrition
- ANSC 3011.03: Equine Behaviour and Learning
- ANSC 4001.03: Equine Exercise Physiology and Health

Contact [Faculty of Agriculture](#) for more information.

Minor in Food Bioscience

This minor is available to students registered in a 120 credit hour Bachelor of Science (Agriculture), Bachelor of Arts, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

The minor is designed to enhance knowledge, skills and critical thinking of students in food science and technology, food bioactives and health benefits, value-added food manufacturing and bio-processing, nutraceutical sciences and food quality and safety.

18 credit hours chosen from the following, in consultation with the academic advisor.

Required courses:

- CHMA 3011.03: Fundamentals of Food Chemistry
- FOOD 3002.03: Impact of Food on Health
- FOOD 4001.03: Food Quality and Safety OR NUTR 3000.03: Introduction to Nutrition

- FOOD 4005.03: Functional Food and Nutraceuticals
- MCRA 4001.03: Food Microbiology

Three credit hours from the following list:

- ANSC 3003.03: Eggs & Dairy Products
- ANSC 3004.03: Meat Science
- CHMA 4003.03: Instrumental Analysis
- FOOD 4000.03: Directed Studies in Food & Bioproduct Science
- FOOD 4004.03: Directed Studies in Nutriscience

Contact Dr. Vasantha Rupasinghe (vrupasinghe@dal.ca) for more information.

Minor in Plant Science

This minor is available to students registered in a 120 credit hour Bachelor of Science (Agriculture), Bachelor of Arts, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Students must complete 18 credit hours, at least three of which must be at the 3000 level or higher.

Required Courses:

- BIOA 2002.03: Plant Physiology
- BIOA 2004.03: Structural Botany

12 credit hours from the following list:

- AGRN 2000.03: Organic Field Crop Management
- AGRN 2001.03: Cereal-Based Cropping Systems
- AGRN 2002.03: Forages and Cover Crops
- AGRN 2008.03: Potato Production
- HORT 2000.03: Vegetable Production
- HORT 2001.03: Principles of Organic Horticulture
- HORT 2004.03: Introduction to Viticulture
- HORT 2010.03: Controlled Environment Agriculture I
- HORT 2015.03: Fruit Production
- HORT 3008.03: Horticultural Therapy
- IAGR 3000.03: Tropical Agriculture
- PLSC 2000.03: Specialty Crops
- PLSC 2001.03: Plant Propagation Techniques
- PLSC 4000.03: Plant Breeding
- PLSC 4002.03: Plant Ecophysiology
- BIOA 2005.03: Principles of Plant Pathology
- BIOA 2008.03: Plant Diversity
- BIOA 3002.03: Weed Science
- ENVA 2003.03: Introduction to Urban and Peri-Urban Agriculture
- ENVA 2004.03: Introduction to Integrated Pest Management Techniques

Contact [Faculty of Agriculture](#) for more information.

Certificates

Certificates in Agriculture

Certificates, listed at the right, are available within the Faculty of Agriculture.

Certificate in Animal Behaviour

Offered by: Biology, Psychology and Neuroscience

Coordinator: Dr. Simon Gadbois (Psychology and Neuroscience) simon.gadbois@dal.ca

The Certificate in Animal Behaviour provides students with an opportunity to specialize in Animal Behaviour through a set of courses and a research project.

Admission to Certificate

Students should enrol in the Certificate in Animal Behaviour in their third year of studies, when they are seeking approval from the Certificate Coordinator for the independent research component. To enrol, students must declare the certificate through Dal Online (<https://dalonline.dal.ca> >Web for Students>Admissions>Declare Major/Minor/Certificate), and notify the Certificate Coordinator by e-mail. To qualify for this certificate, students must complete all course requirements, and must receive approval for the research component of the certificate prior to the start of the research course.

To graduate with the certificate, students must apply to Graduate with a Certificate at the time they apply to graduate from their degree program

Certificate requirements:

1. A minimum grade of B- is required in each of four mandatory courses:

- PSYO 2160.03/NESC 2160.03: Animal Behaviour
- PSYO 2501.03: Statistical Methods or STAT 2080.03: Statistical Methods for Data Analysis Inference
- BIOL 3062.03: Behavioural Ecology or PSYO 3162.03/NESC 3162.03: Advanced Animal Behaviour
- BIOL 3630.03: Field Methods in Animal Behaviour or NESC 3161.03/PSYO 3161.03: Measuring Behaviour or NESC 3165.03/PSYO 3165.03: Neuroethology

2. A grade of at least B- in all of 12 additional credit hours of courses chosen from the following list. Courses taken as one of the four mandatory classes cannot also be used to fulfill this requirement. Six credit hours must be at the 3000/4000 level.

2000 level

- ANSC 2003.03: Companion Animal Behaviour
- PSYO 2140.03/NESC 2140.03: Learning
- PSYO 2470.03/NESC 2470.03: Systems Neuroscience

3000 level

- ANSC 3002.03: Domestic Animal Behaviour
- BIOL 3062.03: Behavioural Ecology (if not used to fulfill Requirement 1 above)
- BIOL 3080.03/MARI 3080.03: Ecology and Evolution of Fishes
- BIOL 3327.03: Entomology
- BIOL 3622.03: Ornithology
- BIOL 3626.03: Field Studies of Marine Mammals
- BIOL 3628.03/MARI 3628.03: Marine Ornithology
- BIOL 3630.03: Field Methods in Animal Behaviour (if not used to fulfill Requirement 1 above)
- BIOL 3640.06: Tropical Ecology and Biodiversity (with Animal Behaviour project: counts for three credit hours only)
- BIOL 3632.03: Applied Field Methods in Fish Ecology
- BIOL 3639.03: Herpetology
- MARI 3090.03: Marine Mammalogy
- PSYO 3000.06/NESC 3000.06: Independent Research in Modern Psychology (Animal Behaviour topic)
- PSYO 3001.03/NESC 3001.03: Directed Research Project in Psychology or Neuroscience (Animal Behaviour topic)
- PSYO 3043.03/NESC 3043.03: Neurobiology of Learning
- PSYO 3044.03/NESC 3044.03: Laboratory Methods of Learning and Conditioning
- PSYO 3161.03/NESC 3161.03: Measuring Behaviour
- PSYO 3162.03/NESC 3162.03: Advanced Animal Behaviour (if not used to fulfill Requirement 1 above)
- PSYO 3165.03/NESC 3165.03: Neuroethology (if not used to fulfill Requirement 1 above)
- PSYO 3170.03/NESC 3170.03: Hormones and Behaviour

- PSYO 3180.03/NESC 3180.03: Psychoneuroimmunology/Ecological Immunology
- PSYO 3670.03/NESC 3670.03: Genes, Brain and Behaviour

4000 level

- BIOL 4323.03/MARI 4323.03: Biologging in Ecology
- BIOL 4800.06: Special Topics (Animal Behaviour topic)
- BIOL 4806.03/MARI 4806.03, BIOL 4807.03/MARI 4807.03, BIOL 4808.03/MARI 4808.03, BIOL 4810.03: Special Topics (Animal Behaviour topic)
- BIOL 4510.03 Cultural Evolution
- BIOL/MARI 4900.06: Honours Research and Thesis or BIOL 4901.03/MARI 4901.03 BIOL 4902.03/MARI 4902.03: Honours Research and Thesis I and II (with approved Animal Behaviour topic)
- MARI 4090.03: Evolutionary Ecology of Marine Mammals
- PSYO 4140.03 or NESC 4140.03: Animal Learning Topics
- PSYO 4160.03/NESC 4160.03: Topics in Behavioural Biology
- PSYO 4500.06/NESC 4500.06: Honours Research (with approved Animal Behaviour topic)

3. A grade of B- in 3 credit hours or more of independent research in Animal Behaviour.

The course used to fulfil this requirement can also be counted toward the courses that fulfil Requirement 2 above.

Students must obtain approval of their research topic from a Certificate Coordinator prior to the start of the research course. Animal behaviour research projects may be completed through one or more of PSYO 3100.03/NESC 3100.03 or PSYO 3101.03/NESC 3101.03, PSYO 3001.03/NESC 3001.03, PSYO 4500.06/NESC 4500.06, BIOL 4800.06, BIOL 4806.03/MARI 4806.03, BIOL 4807.03/MARI 4807.03, BIOL 4808.03/MARI 4808.03 or BIOL 4900.06.

Honours students may fulfill this requirement by conducting their honours thesis research on a topic in Animal Behaviour. Students are encouraged to further develop their study design and analysis skills by taking additional courses such as BIOL 4061.03 (Design of Biological Experiments) or BIOL 4062.03 (Analysis of Biological Data).

Certificate in Animal Welfare

The Certificate in Animal Welfare aims to help students gain specialized knowledge on the well-being of animals managed ethically by humans. The certificate provides a range of theory, evaluation of scientific literature, and its application surrounding the use of animals.

This program prepares students for careers in animal health and welfare by giving them expertise specific to this field. In completing five courses as part of this certificate program, students will understand ethical concepts surrounding animal use and will develop the skills required to assess specific situations and make sound recommendations for improvements in livestock care, handling, transportation and slaughter. As well, students will observe, measure and document a variety of animal behaviors by working hands-on in our Ruminant Animal Centre.

This certificate is open to students eligible for admission to or enrolled in a BSc or BSc (Agr) program at either of Dalhousie's Halifax or Truro campuses.

Certificate Requirements

Total of 15 credit hours required to be completed within 5 years (maximum).

Required Courses

ANSC 3002.03: Domestic Animal Behaviour

ANSC 3005.03: Animal Welfare

BIOA 4004.03: Animal Adaptation and Stress

PHLA 3001.03: Animal Ethics (Agricultural Campus) or PHIL 3106.03 (Halifax Campus)

Optional Courses

Any **ONE** from the list below:

ANSC 3001.03: Animal Health

ANSC 3007.03: African Wildlife Ecology

AQUA 3000.03: Fish Health

ANSC 4009.03: Directed Studies in Animal Science (if in area of animal welfare)
RESM 4014.03: Honours Thesis I/RESM 4015.03: Honours Thesis II (if in area of animal welfare)

To inquire further about the requirements for the Certificate in Animal Welfare, please contact Program Coordinator, Miriam Gordon (miriam.gordon@dal.ca).

Certificate in Aquaculture

The Certificate in Aquaculture provides an opportunity for students to take a set of courses that will provide them an aquaculture specialization with opportunity to explore a range of aquatic species and the production system required to rear them, and understand their role in global food security. Students will gain awareness of, and demonstrated competency in, safe and humane handling of aquatic animals.

The certificate is open to students eligible for admission to or enrolled in a BSc or BSc (AGR) program at Dalhousie, except those majoring or minoring in Aquaculture.

Certificate Requirements

Total of 15 credit hours required to be completed within 5 years (maximum).

Required Courses

AQUA 2000.03: Introduction to Aquaculture
AQUA 3000.03: Fish Health
NUTR 3002.03: Fish Nutrition
BIOA 3005.03: Fish Physiology
AQUA 4000.03: Finfish Production or AQUA 4001.03: Shellfish Production

To inquire further about the requirements for the Certificate in Aquaculture, please contact Program Coordinators, Dian Patterson (dian.patterson@dal.ca) or Audrie-Jo McConkey (amconkey@dal.ca).

Certificate in Environmental Biology

Please note that new admissions to this program are suspended.

Post-Baccalaureate Certificate Programs are catered to people who have already completed a BSc in Biological Sciences and who wish to gain new skills in a specialized area for the purpose of advancing in their career or pursuing graduate studies.

The Post-Baccalaureate Certificate in Environmental Biology digs deep into how living organisms interact with their environment. It emphasizes learning about biodiversity, conservation, ecological processes, adaptation, and teaches you how to assess and provide skills and solutions to meet future environmental challenges.

This program prepares you for careers in environmental biology, environmental management and environmental services by giving you skills, training and expertise specific to this field. In completing this program, you will understand and describe the concepts relating to ecology, diversity, conservation, plant and animal adaptation to various environments.

This certificate is open to students who possess a Bachelor of Science or similar degree in biological sciences or related field with a minimum CGPA of 3.0 in the last two years of undergraduate studies. Student who have taken any courses listed in their undergraduate program shall receive a maximum of six credit hours waiver to complete the certificate.

Certificate Requirements

Total of 27 credit hours required to be completed within 5 years (maximum).

Required Courses

- ENVA 2000.03: Environmental Sciences I
- ENVA 2001.03: Environmental Sciences II
- ENVA 3000.03: Environmental Impacts and Assessment
- BIOA 3001.03: Ecology
- BIOA 2008.03: Plant Diversity
- BIOA 4002.03: Conservation Biology
- PLSC 4002.03: Plant Ecophysiology

Optional Courses

Any **ONE** from the list below:

- BIOA 2005.03: Principles of Plant Pathology
- BIOA 3000.03: General Entomology
- BIOA 3002.03: Weed Science

Any **ONE** of the following:

- SOIL 3000.03: Soil Fertility and Nutrient Management
- BIOA 3006.03: Aquatic Ecology
- BIOA 4004.03: Animal Adaptation and Stress

To inquire further about the requirements for the Post-Baccalaureate Certificate in Environmental Biology, please contact Program Coordinator, Raj Lada (raj.lada@dal.ca).

Certificate in Food Bioscience

The Post-Baccalaureate Certificate in Food Bioscience will allow you to become specialized in the area of food and food components. You will study the chemical, microbiological, health, and regulatory aspects of foods, food ingredients, and nutraceuticals.

Having an initial bachelor's degree, the specialization at the post-baccalaureate level will position you to contribute to commercial and research organizations developing, producing, marketing and analyzing novel food and nutraceutical products. There has never been a greater time in Canada to get involved in this industry and gain skills and knowledge related to emerging areas of food and nutraceutical sciences for the 21st century. The certificate will also complement and facilitate those who wish to explore postgraduate studies in a wide range of disciplines

This certificate is open to students who possess a Bachelor of Science or similar degree in any natural science or applied life science field with a minimum CGPA of 3.0 in the last two years of undergraduate studies. Students who have taken any courses listed in their undergraduate program shall receive a maximum of six credit hours waiver to complete the certificate.

Certificate Requirements

Total of 27 credit hours required to be completed within 5 years (maximum).

Required Courses

- CHMA 2002.03: Introduction to Biochemistry *
- CHMA 3011.03: Fundamentals of Food Chemistry
- CHMA 4003.03: Instrumental Analysis
- FOOD 3002.03: Impact of Food on Health
- FOOD 4001.03: Food Quality and Safety
- FOOD 4005.03: Functional Foods and Nutraceuticals
- MCRA 2000.03: Microbiology *
- MCRA 4001.03: Food Microbiology

*For both Introduction to Biochemistry and Microbiology, if the student has already earned a credit in an equivalent course (3 credits) during the past five years, the required course(s) can be replaced with elective course(s) from the list below.

Optional Courses

Any **ONE** from the list below:

- AGRI 4001.03: Agriculture, Food and Well-being
- ANSC 3003.03: Eggs and Dairy Products
- ANSC 3004.03: Meat Science
- FOOD 4000.03: Directed Studies in Food and Bioproduct Sciences
- FOOD 4004.03: Directed Studies in Nutriscience
- MCRA 4002.03: Microbiomes in Agriculture
- NUTR 3000.03: Introduction to Nutrition

To inquire further about the requirements for the Post-Baccalaureate Certificate in Food Bioscience, please contact Dr. Vasantha Rupasinghe (vrupasinghe@dal.ca).

Certificate in Genetics and Molecular Biology

The Certificate in Genetics & Molecular Biology provides a range of genetic and molecular biology theory and techniques for those interested in expanding their knowledge and skills beyond the introductory level or pursuing graduate studies.

This program prepares students to explain the importance of genetic diversity, propose genetic solutions to constraints in plant or animal production systems and argue the pros and cons of genetic engineering.

This certificate is open to students eligible for admission to or enrolled in a BSc or BSc (Agr) program at either of Dalhousie's Halifax or Truro campuses.

Certificate Requirements

Total of 15 credit hours required to be completed within 5 years (maximum).

Required Courses

ANSC 3000.03: Animal Breeding OR PLSC 4000.03: Plant Breeding

GENE 2000.03: Genetics I

GENE 3000.03: An Introduction to Molecular Genetics

Optional Courses

Any **TWO** from the list below:

GENE 4003.03: Biotechnology

GENE 4005.03: Applied Genomics and Bioinformatics

GENE 4006.03: Advanced Studies in Molecular and -Omics Techniques

MCRA 4002.03: Microbiomes in Agriculture

To inquire further about the requirements for the Certificate in Genetics & Molecular Biology, please contact Program Coordinator, Nancy McLean (nancy.mclean@dal.ca).

Certificate in Integrated Pest Management

The Certificate in Integrated Pest Management explores the importance of managing many different kinds of pests – insects, weeds, and pathogens - that affect our natural and agricultural ecosystems. It will emphasize learning about the ecosystem characteristics that favour the presence of pests and students will design and develop management plans to prevent and address a variety of pests using physical, mechanical, cultural, biological and chemical approaches.

This program prepares students for careers in environmental management by giving them expertise specific to this field. In completing five courses as part of this certificate program, students will understand the social and environmental impacts of pests in modern society. The Faculty of Agriculture is home to faculty and staff who have expertise in pest management so students can expect to gain learning from first-hand experience and research.

This certificate is open to students eligible for admission to or enrolled in a BSc or BSc (Agr) program at either of Dalhousie's Halifax or Truro campuses.

Certificate Requirements

Total of 15 credit hours required to be completed within 5 years (maximum).

Required Courses

BIOA 3002.03: Weed Science

BIOA 3000.03: Entomology

BIOA 2005.03: Plant Pathology

ENVA 4008.03: Directed Studies in Pest Management

Optional Courses

Any **ONE** from the list below:

APSC 2011.03: Technology for Precision Agriculture

ENVA 2004.03: Introduction to Integrated Pest Management Techniques

To inquire further about the requirements for the Certificate in Integrated Pest Management, please contact Program Coordinator, Scott White (scott.white@dal.ca).

Certificate in Organic Agriculture

The Certificate of Specialization in Organic Agriculture initiative provides students with an opportunity to specialize in the expanding area of organic agriculture. The Certificate of Specialization in Organic Agriculture enables students to approach agriculture from their area of interest, to know they can be recognized for this accomplishment, and to continue to take other courses in agriculture toward a degree. Any student who has successfully completed four of the eligible organic agriculture credit courses and has an overall GPA of at least 2.0 in these courses can apply to receive a Certificate of Specialization in Organic Agriculture. Two of the courses may be substituted with approved organic agriculture courses offered by external institutions (see below). A Letter of Permission is required for these alternative courses.

Eligible Courses

AGRI 2000: Introduction to Organic Agriculture
AGRN 2000: Organic Field Crop Management
ANSC 2004: Organic Livestock Production
APSC 2003: Composting and Compost Use
HORT 2001: Principles of Organic Horticulture

Note: Students will not be required to take the courses in any particular order. AGRI 2000, ENVA 2002, and HORT 2001 are currently offered in the Fall semester. AGRN 2000 and ANSC 2004 are currently offered in the Winter semester.

All courses in the Certificate of Specialization in Organic Agriculture program are offered only through web-based distance education. Other institutions offering web-based courses that are approved for the certificate program:

- McGill University (Organic Soil Fertilization)
- Université Laval [French translation of courses AGRI 2000, AGRN 2004, ANSC 2004, and ENVA 2002]*
- University of British Columbia (Key Indicators of Agroecosystem Sustainability)
- University of Guelph (Organic Marketing)
- University of Manitoba (Organic Crop Production on the Prairies)
- University of Saskatchewan (Weed Control in Organic Agriculture)

* A student cannot receive credit for the same course in both French and English.

All requirements for this certificate must be completed within 3 years.

Certificate in Sustainable Development

This certificate program is designed for senior undergraduate university students or graduate students who are interested in the research and practices in sustainable development. Building on the context of industrialization and globalization, as well as its related environmental and social problems, this program particularly focuses on viable business strategies, community development, and economic development policies at national and regional levels. The program will be offered through flexible in-class/online settings to study the principles and practice of sustainable development. To supplement the required courses, another program feature is a 10-day study tour in Beijing (optional course) with a focus on issues that are particularly relevant to developing and emerging economies.

This certificate is open to 3rd or 4th year undergraduate students who are registered in the Dalhousie University Faculty of Agriculture with good academic standing, and, interested individuals who meet the Faculty of Agriculture admission requirements and the prerequisites for the required courses.

Required Courses:

- ECOA 3008: Environmental Economics
- MGTA 4006: Issues in Agribusiness Sustainability
- IAGR 3002: International Rural Development

Optional Courses:

Students must successfully complete at least one of the following:

- SPEC 4015: Topics in Sustainable Development - An International Perspective
- AGRI 4001: Agriculture, Food and Well-being
- PHLA 3000: Environmental and Agricultural Ethics

Certificate in Sustainable Soil Management

Offered by: Department of Plant, Food, and Environmental Sciences, Faculty of Agriculture

This certificate is open to all students eligible for admission to the BSc. (Agr) program.

Knowledge of soil management is important in supporting learning outcomes in various Dalhousie programs, from understanding the fundamental properties and characteristics of soil systems to understanding how soil management impacts food and energy production, water quality, waste management, climate change and biodiversity. The certificate will support these learning outcomes, enhance students' ability to formulate well-rounded solutions, and provide students with documentation of these acquired skills. SDGs

To graduate with a Certificate, students must apply to graduate with the Certificate at the time they apply to graduate from their degree program.

Certificate Requirements:

A total of 12 credit hours in Soil Science related courses are required.

Required Courses

SOIL 2000.03: Introduction to Soil Science (A)

SOIL 3000.03: Soil Fertility and Nutrient Management (A)

Optional Courses

6 Credit hours from the list below:

AGRN 2000.03: Organic Field Crop Management (A)

HORT 3000.03: Environmental Processes and Landscape Functions

ENVA 3000.03: Environmental Impact Assessment

ENVA 3003.03: Environmental Studies Field Course

ENVA 3005.03: Geographic Information Systems (A)

ENVA 3021.03: Ecohydrology (A)

SOIL 4001.03: Directed Studies in Soil Science (A)

MCRA 4002.03: Microbiomes in Agriculture

AGRI 5250.03: Soil Microbiology

AGRI 5450.03: Environmental Soil Chemistry

To inquire further about the requirements for the Certificate in Sustainable Soil Management, please contact Program Coordinator, David Burton (dburton@dal.ca).

Certificate in Technology Education

The Certificate in Technology Education Program is intended to upgrade and diversify the technology background of Technology Education teachers presently working in Nova Scotia schools. It is approved in Nova Scotia by the Minister of Education for teaching license upgrading. This program is an innovative collaboration between the Faculty of Agriculture and Nova Scotia's Technology Education Teachers Association, the Nova Scotia Department of Education, and Acadia University. The program provides a variety of hands-on experiences and teaching methodologies that strengthen traditional skills and introduce new technologies to better meet the demand for qualified technology educators for the public school system.

Instruction is conducted outside regular school hours, in evening or summer sessions.

Students must complete 30 credit hours of approved courses with a cumulative GPA of 2.0. Twenty four credit hours must be from the Faculty of Agriculture course list; the remaining six credit hours are teaching methodology courses offered by Acadia University. The program must be completed in a maximum of six years. Courses can be taken in any sequence. The offering of this program is subject to sufficient enrolment.

Required Courses (eight required)

ENGN 1001.03: Engineering Design I
APSC 1003.03: Practices and Mechanics of Materials
APSC 1004.03: Wood Construction Technology
APSC 1005.03: Metal Construction Technology
APSC 2000.03: Environmental Impacts and Resource Management
APSC 2007.03: Fluid Power Technology
APSC 2008.03: Digital Electronics and Computer Interfacing
APSC 3001.03: Electrotechnology
APSC 3018.03: Technology Modules
APSC 3019.03: Communications Technology

Acadia Courses

EDUC 5053: Problems in Education: Technological Education and Sustainability
EDUC 5873: Technology & Curriculum: Technology Studies

Note: It is the responsibility of individual teachers to ensure that they comply with the requirements of the NS Department of Education for continuing education and upgrades. For more information, see certification.ednet.ns.ca/approval-upgrading-programs.

Extended Learning

A variety of courses and programs, including credit and non-credit certificates, online programs, professional development and skills training are offered through Extended Learning. Our education is outcome-based, and with formats and scheduling that work for the students. Extended Learning offers on-site training, including the block release sections of the Farm Technician Apprenticeship Program held on Prince Edward Island.

For information on courses and programs visit www.dal.ca/agriculture or call (902) 893-6666.

Professional Organizations for Agrologists

Agrology is "the profession of applying science and scientific principles to the business and art of agriculture". University graduates who are skilled in the science and business of agriculture are encouraged to join their provincial Institute of Agrologists. Provincial Institutes offer the opportunity to get to know and exchange ideas with other professional agrologists in the province and in other parts of Canada through membership in the Agricultural Institute of Canada. Membership in an Institute of Agrologists provides an element of fellowship in the profession, as well as opportunities to attend scientific conferences and educational tours and to receive newsletters and technical publications. Membership in an Institute is required by provincial statute to practice agrology in most provinces.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

Academic Courses

Course Descriptions

ACAD 0020 Skills for Academic Success

CREDIT HOURS: 0

The objective of this course is to facilitate the successful transition from high school or the workplace to university life. This course will expose students to the functions of various student services on campus, encourage the development of good study skills, and explore the life management skills necessary to achieve success at university.

CALENDAR NOTES: This is a Workplace Readiness course required for the Diploma in Business Management.

FORMATS: Lecture

ACAD 1050 Foundations in Academic Study & Research

CREDIT HOURS: 3

This course introduces participants to university culture and helps them to enhance academic performance. Course experiences build a practical understanding of the learning process at the university level, enabling students to develop strategies to be more effective learners. Topics include performance expectations, conventions of academic critical reading and writing, research methods, academic literature review and analysis, discipline-specific learning strategies, goal setting, and effective use of university resources.

Agriculture Courses

Course Descriptions

AGRI 1000 Agricultural Ecosystems (A)

CREDIT HOURS: 3

This course is an introduction to agriculture and food systems. The principles of agricultural production as studied in the disciplines of animal science, plant science, agricultural engineering, and soil science will be integrated to give a comprehensive view of agricultural ecosystems. Course work will include lectures, laboratories, problem-solving exercises, and small-group work. The course will expose students to issues and raise questions to be considered during the remainder of their undergraduate careers. The goals of this course are to provide students with knowledge of the application of science to agriculture, and to assist students to understand the integrated nature of agriculture and food systems in both regional and global contexts. Associated course goals are to develop communication and independent learning skills and the ability to function effectively in team situations, and to stimulate students to think critically, logically, and quantitatively while respecting the values and ideas of others.

CALENDAR NOTES: Fall semester

FORMATS: Lecture | Lab | Tutorial

AGRI 2000 Introduction to Organic Agriculture (A)

CREDIT HOURS: 3

This course is recommended for students looking for an introduction to organic agriculture. The course consists of five modules: What is organic agriculture?, Organic Certification, The agroecosystem farm, Introduction to organic crop production, and Introduction to organic livestock production. Students will be encouraged to participate in group discussions throughout the course.

FORMATS: Online Delivery

AGRI 2001 Internship

CREDIT HOURS: 3

The main objective of the undergraduate internship course is to help facilitate the development of the skills, knowledge, and experiences necessary to be successful in a workplace related to the student's area of study. The spring/summer internship hosted by an agricultural enterprise (other than a home farm or business), a government agency, or other relevant employer, is designed to enhance student learning by allowing the students to gain supervised, on-the-job work experience in a field of employment that matches the student's career interests. Students are to analyze the tasks and operations that are a function of the business or operation and detail the activities, skills, knowledge and understanding that provide evidence of competent performance of those operations. The course coordinator will assist in finding appropriate placements; however, the student is responsible for applying for and obtaining the internship placement. Students, in collaboration with their employer and course coordinator, will also set personal learning objectives and workplace performance objectives that will strengthen their skill-set and enhance leadership skills. This Internship is available to students in Undergraduate and Technology programs in the Faculty of Agriculture after the successful completion of one year of study.

FORMATS: Experiential Learning

AGRI 3001 Issues in Agricultural Health and Safety (A, H)

CREDIT HOURS: 3

This course describes the health and safety situation in agriculture with a particular focus on explaining the underlying reasons for the high rates of injury, illness, and death in the farming industry. Health behaviour theories are used to identify factors that may lead farm workers to engage in actions that place them at elevated risk to experience an accident or disease. Potential mechanisms to reduce the incidence of injury, illness, and death through educational programs, engineering solutions, regulatory and policy initiatives and social change programming are also examined.

PREREQUISITES: Third-year standing

FORMATS: Online Delivery

AGRI 3302 Measuring Food Sustainability

CREDIT HOURS: 3

Why is measuring food sustainability important? We are becoming increasingly aware of the impacts that our food systems have on the sustainability of our planet, the livelihoods of our food producers, and equitable accessibility for individuals. Integrating the expertise of numerous faculty and community leaders, this field course explores how food sustainability is measured and evaluated across different disciplines. Daily hands-on, active, and experiential learning is emphasized throughout the course. The course activities and assessments range from agricultural biodiversity monitoring via beetle surveys to a summative design challenge exploring a possible solution to a food sustainability measurement challenge.

CALENDAR NOTES: This is a two-week intensive course with time split between Dal's Halifax campus (five days) and Truro campus (five days). As part of the course auxiliary fee, course transportation and accommodation at Dalhousie Residences will be provided for students for the week they are away from their home campus; however, food and meals are not included, and students will be responsible for their own food expenses.

CROSSLISTED: SUST 3302.03

RESTRICTIONS: Third year status or above

EXCLUSIONS: SUST 3302.03

FORMATS: Experiential Learning

AGRI 4000 Issues in Agriculture, Rural Society, and Environment (A, H)

CREDIT HOURS: 3

This course allows senior students in all disciplines to discuss current topics of interest to agricultural professionals. These topics could include soil degradation, integrated pest management, antibiotics in feed, the occupation of farming, animal welfare, etc. Students will be given weekly required readings.

CALENDAR NOTES: This course has limited enrollment.

PREREQUISITES: Third-year standing

FORMATS: Seminar

AGRI 4001 Agriculture, Food and Well-being (A & H)

CREDIT HOURS: 3

This case-based course investigates local, regional, and global issues related to agriculture, food, and well-being. Learners will work together to develop practical solutions for real life cases thus enhancing their understanding of global economic and political forces shaping agriculture. This course will help students enhance their critical thinking skills and systems analysis capacity. Students will explore how agriculture and food are related to, interconnected with or impacted by people, the land and environment, and ultimately social/economic well-being. The course is team taught with faculty from the following disciplines: animal science, plant science, environment science, engineering, food science and social sciences. Industry leaders also are involved as mentors.

PREREQUISITES: Third-year standing

CROSSLISTED: AGRI 5780.03

FORMATS: Online Delivery

Agronomy Courses

Degree Level Course Descriptions

AGRN 2000 Organic Field Crop Management (A) DE

CREDIT HOURS: 3

This course will introduce students to organic principles and practices applied to the production and management of field crops. The criteria for optimum yield and quality of field crops are presented within the context of organic farming principles, sustainable soil and nutrient management, and the requirements

for organic certification. Five stand-alone modules provide a framework for study: *Soil and Field Management Practices: methods used in organic farming to build and maintain soil fertility, preserve soil structure, conserve and recycle nutrients, reduce weed pressure, and reduce outbreaks of pest and disease; *Nutrient Management Planning: how to optimize the efficiency of nutrient cycling, improve resource utilization, and minimize nutrient loss on the farm; *Forages: organic methods of production for pasture, hay, silage, cover crops, or green manure; *Row Crops: organic methods of production of cereal row crops (corn, sorghum), root crops (carrots, potatoes), seed legumes (soybean, peas, beans), and others (e.g., hemp); and *Small Grains and Oilseeds: organic methods of production of winter-seeded grains (winter wheat, winter rye), spring-seeded grains (spring wheat, oats, and barley), oilseeds (canola, flax), and others.

FORMATS: Online Delivery

AGRN 2001 Cereal-Based Cropping Systems (A)

CREDIT HOURS: 3

This course takes a systems approach to the study of crop and soil management in rotations involving the growing of the principal cereals, oilseeds, pulses, and other grains, and their relationship to other crops in a rotation. Through a whole-farm approach over time, it studies environmentally and economically sustainable methods for grain cash crops and grain-based animal feed production. It stresses soil and water conservation and an understanding of the principles and processes of the nutrient cycles, which are critical to improving the food production environment. Students will gain knowledge of grains as they relate to people and the environment, from soil to shelf, both in a Maritime temperate climate and in an international context.

FORMATS: Lecture | Lab

AGRN 2002 Forages and Cover Crops (A)

CREDIT HOURS: 3

This course deals with the production and use of forages and cover crops in Atlantic Canada. The course examines the importance of forages and cover crops in agriculture and the environment. Individual species, as well as combinations of different species, will be highlighted. Other topics include forage crop establishment, management, growth physiology, winter survival, feed quality, use (pasture, hay and silage), soil fertility, and weed control. An introduction to cover crops includes benefits, types, selection and management.

FORMATS: Lecture | Lab

AGRN 2008 Potato Production (A)

CREDIT HOURS: 3

History, biosystematics, and eco-physiology of the crop are emphasized. Production practices for seed, table, and processing stock and marketing in the Atlantic Provinces are examined. Soil fertility, crop health management strategies, and nutritional qualities and storage are covered in detail. Some commercial operations are visited.

FORMATS: Lecture | Lab

Animal Science Courses

Degree Level Course Descriptions

ANSC 2002 Introduction to Equine Science (A)

CREDIT HOURS: 3

This course is an introduction to the behaviour, anatomy, nutrition, and history of horses. What behavioural principles underlie horse training? How is their performance influenced by their conformation? What is unique about their digestive system? How did horses evolve? The course will include discussion of sources and treatment of illness and disabilities, and the biology and control of common parasites; demonstrations of English and Western riding (students will not be taught to ride); visits to the Truro Raceway; study of the importance of shoeing to the working horse; and exposure to the use of horses as draft animals.

PREREQUISITES: second-year standing or equivalent, in any program

FORMATS: Lecture | Lab | Online Delivery

ANSC 2003 Companion Animal Behaviour

CREDIT HOURS: 3

In this course, students will study the fundamentals of animal learning and how those principles affect success in training and behaviour modification. Attention will be given to understanding and solving behaviour problems (e.g., separation anxiety, dominance aggression, fighting, inappropriate urination, and behavioural stereotypies). The focus is on companion animals – dogs and cats, and to some extent horses. The normal development of behaviour in those

species will be covered.
FORMATS: Lecture

ANSC 2004 Organic Livestock Production (A) DE

CREDIT HOURS: 3

This course provides information on organic livestock production in general, as well as more detailed analyses of organic beef and sheep, dairy, and swine and poultry production. An in-depth study of organic approaches to livestock health is included. The course is divided into five stand-alone modules: Introduction to Organic Livestock Production, Organic Beef and Sheep Production, Organic Dairy Production, Organic Swine and Poultry Production, and Health Management in an Organic Livestock System. Students will be required to participate in discussion forums and make use of the organic information resources available on the Internet. Evaluation will be based on participation, module quizzes, written assignments, and a final exam.

ANSC 2005 Animal Agriculture (A)

CREDIT HOURS: 3

Through a mixture of classroom lectures and exercises at Faculty of Agriculture, Dalhousie, this course will enable students to recognize common breeds of farm animals, to describe livestock production cycles and methods, and to understand the place of farm animals in the world food system. The course will provide introduction to subject matter covered in more senior animal science courses, such as nutrition, reproduction, behavior and welfare, animal anatomy, and environmental physiology. The interaction of livestock production with our environment will be examined.

PREREQUISITES: AGRI 1000

FORMATS: Lecture | Lab

ANSC 2007 Beef Production and Management (A)

CREDIT HOURS: 3

This course will focus on the management of commercial beef farms, ranging from cow/calf to stocker/feeder operations. Components of breeding, nutrition, and behaviour will be discussed. A systems approach to the management of the farm will be undertaken. The role of the manager in optimizing production is an important component. A historical perspective on the Atlantic beef industry along with coverage of emerging trends will be part of the course. Key beef industry issues such as the impact of BSE, animal welfare, and beef marketing will be discussed.

FORMATS: Lecture | Lab

ANSC 2008 Equine Facilities Management (A)

CREDIT HOURS: 3

Students examine behavioural and environmental considerations important in designing an equine facility, and explore the options available for ensuring high standards of animal welfare in the facility. The course will enable students to design and implement protocols for managing the facility and for ensuring compliance with regulatory requirements or industry standards. Students participate in tours to view a variety of facility options. Some of these tours may be conducted outside of class time.

PREREQUISITES: ANSC 2002.03

EXCLUSIONS: ANSC 0215

FORMATS: Lecture | Lab

ANSC 3000 Animal Breeding (A)

CREDIT HOURS: 3

The course covers variation in animal performance and the techniques whereby genetic superiority can be recognized and improved. Goals and programs of improvement are discussed with reference to commercial farm species. The emphasis is on programs in current use but applications of new technologies are included. Labs deal primarily with data collection, analysis, and computer applications.

PREREQUISITES: GENE 2000, STAA 2000

FORMATS: Lecture | Lab

ANSC 3001 Animal Health (A)

CREDIT HOURS: 3

This course seeks to impart an understanding of animal health and its importance in livestock production enterprises. Students are taught to recognize signs of health and ill health and to understand the principles and practices of disease prevention and treatment. Conditions of disease and ill health common in Atlantic Canada are studied. The need for veterinary collaboration is emphasized, and the circumstances in which this should be sought are discussed.

PREREQUISITES: Any of BIOA 2006, BIOA 3005, BIOL 3078, DENT 1119, MARI 3074, PHYL 1000 & PHYL 1010, PHYL 1400, PHYL 2032

FORMATS: Lecture | Lab

ANSC 3002 Domestic Animal Behaviour (A)

CREDIT HOURS: 3

This course studies the behaviour of farm animals and presents information that is relevant to the care and management of animals. Topics covered include domestication, animal communication, social behaviour, reproductive and maternal behaviour, development of behaviour, genetics of behaviour, and the influence of management systems and practices on behavioural characteristics. Considerable attention is also given to welfare issues in animal agriculture.

PREREQUISITES: Any one of: BIOA 2006, BIOA 3005, BIOL 3078, DENT 1119, MARI 3074, PHYL 1000, PHYL 1010, PHYL 1400, PHYL 2032

FORMATS: Lecture | Lab | Online Delivery

ANSC 3003 Eggs and Dairy Products (A)

CREDIT HOURS: 3

This course deals with the nature and composition of eggs and milk and their products such as cheese and yogurt; hygiene; processing; and storage.

FORMATS: Lecture | Lab

ANSC 3004 Meat Science (A)

CREDIT HOURS: 3

This course covers growth of meat animals and the nature of muscle, bone, and fat; conversion of muscle to meat; quality and grading of fresh meat; hygiene and storage; meat processing, meat products, and by-products.

FORMATS: Lecture | Lab

ANSC 3005 Animal Welfare (A)

CREDIT HOURS: 3

This course deals with the well-being of animals, with emphasis on farm animals. Issues include what we mean by animal welfare, what the animal welfare issues are in modern agriculture and in modern society, and how we use ethology and physiology to assess animal welfare. The course outlines the international efforts to improve on farm animal welfare. There is a term project in which students attempt to assess animal welfare in a particular farm (or other) environment, and all students will participate in class debates on current issues in animal welfare.

CALENDAR NOTES: Winter semester

PREREQUISITES: At least third-year standing

FORMATS: Lecture | Lab

ANSC 3006 Companion Animal Biology

CREDIT HOURS: 3

This course focuses on digestive and reproductive physiology, nutritional, genetic, and breeding programs, and the importance of these for management of companion animals. The emphasis is on domestic dogs and cats, with other companion animals included as the topic permits. Laboratory sessions include evaluation of diets and dietary supplements, reproductive and digestive anatomy, simulation of breeding programs, and guest lecturers or field trips to companion animal facilities.

PREREQUISITES: BIOA 3008, GENE 2000

FORMATS: Lecture | Lab

ANSC 3007 African Wildlife Ecology

CREDIT HOURS: 3

This course will give students an understanding and appreciation of ecological principles and the complexities of conservation through observation and experience of both the natural and social environments in South Africa. Students will travel to a South African game reserve, where they will observe the animals and plants in South Africa's unique vegetation zones. Both biotic and abiotic factors will be used to determine South Africa's unique vegetation zones, particularly with respect to the role of large mammals. The focus will be on the manner in which the structure and composition of vegetation influences the community structure of small and large mammals, birds, reptiles and insects. A thorough understanding of South African (sub Saharan) ecology and how the unique natural and social history of South Africa has contributed will help prepare students for the general ecological and conservation issues.

PREREQUISITES: BIOA 1002.03 and BIOA 1003.03 or equivalent

FORMATS: Other (explain in comments)

ANSC 3008 Equine Genetics and Reproductive Management (A)

CREDIT HOURS: 3

Students examine in detail the processes of reproduction and lactation in horses, as well as the requirements for care and management of the mare during breeding, parturition, and lactation. Students also study the growth and development of the foal and the requirements for care of the foal. The common breeds of horses and the genetics of coat colour, conformation, and performance will be discussed. The course will enable the students to evaluate the genetic merit of sires and dams, and to plan matings and genetic strategies to meet the genetic goals of their operation. Finally, students will obtain a basic knowledge of health care and disease prevention, and be able to address issues related to biosecurity.

PREREQUISITES: ANSC 2002.03 and GENE 2000.03

FORMATS: Lecture | Lab

ANSC 3009 Applied Equine Nutrition (A)

CREDIT HOURS: 3

Students will study the anatomy and physiology of the equine digestive tract and examine changes in the requirements for specific nutrients at different stages of growth and development. Students will also engage in comprehensive study of common digestive disorders, metabolic diseases, endocrine disorders and their nutrition. Analysis of different types of feeds, dietary management with health and welfare implications will be covered; nutrition troubleshooting and formulation of diets based on life stage and level of activity will also be conducted.

PREREQUISITES: ANSC 2002.03 and CHMA 2002.03

EXCLUSIONS: ANSC 0213.03

FORMATS: Lecture | Lab

ANSC 3010 Equitation Science

CREDIT HOURS: 3

This course will explore and examine the behaviour of horses and the influence of humans on the animal's learning and training. By applying scientific methods, students will learn how to assess the overall health and welfare of the horse during interactions with humans. Topics covered will include equine behaviour and cognition, types of learning, learning theories and their application, biomechanics of equine movement and the influence of the rider, and assessment of equine welfare during training and riding.

PREREQUISITES: BIOA 2006.03 and ANSC 2002.03

FORMATS: Lecture | Lab

ANSC 3011 Equine Behaviour and Learning

CREDIT HOURS: 3

Equine behaviour in both feral and domesticated horses will be examined and the influence of humans on the animal's learning and behaviour. Students will learn to recognize and interpret equine body language and its practical applications within current training and husbandry practices. Type and causation of various abnormal equine behaviours and methods of behavioural rehabilitation will be covered. Students will examine equine perception and principles of learning and how application of these principles can improve training and behaviour. The human-horse relationship will also be explored.

PREREQUISITES: BIOA 2006.03 and ANSC 2002.03

EXCLUSIONS: ANSC 0219.03

FORMATS: Lecture | Lab

ANSC 4001 Equine Exercise Physiology and Health (A)

CREDIT HOURS: 3

The objective of this course is to examine the anatomy and physiology of the horse with special attention to the respiratory, skeletal, muscular and cardiovascular systems at different life stages. The course will enable students to analyze how the horse's health and soundness is affected by their environment, level of fitness and condition.

PREREQUISITES: ANSC 3009.03 and ANSC 3010.03

EXCLUSIONS: ANSC 0216.03

FORMATS: Lecture | Lab

ANSC 4003 Avian Production Systems (A)

CREDIT HOURS: 3

This course will focus on management of commercial poultry, from hatching to the production of value-added products. The course material will require the application of the sciences of nutrition, genetics, physiology, and behavior to understand the key aspects of growth, reproduction, and health of commercial poultry species.

PREREQUISITES: ANSC 2005, NUTR 3000

FORMATS: Lecture | Lab

ANSC 4004 Ecology of Milk Production in Ruminants (A)

CREDIT HOURS: 3

Milk is a highly prized food, the efficient forage-based production of which has been a major economic phenomenon in agriculture for millennia. Four main species – cattle, buffalo, goats and sheep – have been selected to produce milk for humans. All are from the Bovidae Family (Suborder Ruminantia) of cudchewers. Chosen initially because they didn't compete for the scarce food supplies of our ancestors, ruminants, especially cows, have been selected intensively for milk-yielding characteristics and conformation. The objectives of this course are to examine the production of milk, from provision of feed for the animals to processing the milk into products, and the important contribution made by the dairy industry in providing sustainable food security for society. This course will challenge perceptions of students who will become future dairy farmers or consumers and thus will influence future policy.

PREREQUISITES: ANSC 2005

FORMATS: Lecture | Lab

ANSC 4005 Swine Science and Pork Production (A)

CREDIT HOURS: 3

Globally, pork production is a significant source of animal protein. Swine science provides the tools to accomplish pork production. This course will cover aspects of pork production including nutrition, management, breeding, housing, health and post-farmgate opportunities. The science of swine will be discussed, including biology and the role of swine as models for human studies.

PREREQUISITES: ANSC 2005, ANSC 3000, BIOA 2006, NUTR 3001

FORMATS: Lecture | Lab

ANSC 4006 The Science of Modern Sheep Farming (A)

CREDIT HOURS: 3

Sheep were among the first animals to be domesticated and since then, sheep have been bred for different roles: wool, meat, milk. In the Maritimes, the importance of sheep in the rural economy is on the increase. This course will guide students through the science of sheep production. Nutrition, pasture management, breeding, lambing and flock health will be covered. The traditional roles of sheep for meat and wool production will be emphasized, but also newer uses in Canada such as dairy sheep production will be explored.

PREREQUISITES: BIOA 3008, NUTR 3000

FORMATS: Lecture | Lab

ANSC 4007 Pastures in Sustainable Livestock Systems (A)

CREDIT HOURS: 3

An advanced course that provides students with an overview of current sustainable pasture management practices in northern latitudes, with a focus on grassland ecology, the environmental impacts of livestock production, and applied pasture management. In addition to attending lectures and presenting material in class, students will participate in lab sessions on practical grazing management techniques as well as participate in investigative tours of local pasture producers.

PREREQUISITES: AGRI 1000, AGRN 2002

FORMATS: Lecture | Lab

ANSC 4008 Carnivore Biology

CREDIT HOURS: 3

This is an advanced-level course in mammalian biology focusing on species in the Order Carnivora. The specialized features of the biology of mammalian carnivores will be reviewed, emphasizing seasonal breeding and reproduction, nutrition and physiology, and health and disease. Species discussed will include livestock, companion and zoo animals, and wildlife. The practical aspects of the course will use the mink as a model animal.

PREREQUISITES: BIOA 3008, NUTR 3000

FORMATS: Lecture | Lab

ANSC 4009 Directed Studies in the Animal Sciences

CREDIT HOURS: 3

This course permits senior students, under the direction of faculty members, to pursue their interest in areas not covered, or not covered in depth, by other courses.

PREREQUISITES: Permission of the Department/Program Advisor; students must obtain consent of an instructor who is willing to be a supervisor

EXCLUSIONS: Note: ANSC 4009 cannot duplicate subject matter covered through regular course offerings.

Technology Level Course Descriptions

ANSC 0020 Dairy Industry I

CREDIT HOURS: 0

Students participate in an examination of the structure of the dairy industry and of the supply management system in which dairy farms operate. They will also be required to identify current issues facing the industry and to examine their potential impact on sustainability and opportunities in the Atlantic Canadian industry.

CALENDAR NOTES: This is a Workplace Readiness course required for the Dairy Farming option in the Diploma in Business Management.

FORMATS: Lecture

ANSC 0021 Dairy Industry II

CREDIT HOURS: 0

A continuation of the topics in ANSC 0020. Students extend their examination of the issues facing the dairy industry in a series of lectures presented by speakers from a variety of fields.

CALENDAR NOTES: This is a Workplace Readiness course required for the Dairy Farming option in the Diploma in Business Management.

FORMATS: Lecture

ANSC 0022 Equine Industry

CREDIT HOURS: 0

This course enables students to examine the structure of the equine industry and to discuss the issues, challenges, and opportunities facing the industry.

Speakers from the equine industry are invited to discuss relevant topics, and students participate in the discussion and write summaries of the discussion.

CALENDAR NOTES: This is a Workplace Readiness course required for the Equine Specialty option in the Diploma in Business Management.

FORMATS: Lecture

ANSC 0112 Animal Biology and Management

CREDIT HOURS: 2

Students examine production cycles, reproduction, and genetics in farm animals, with a focus on care and management during breeding, parturition, growth, and lactation. Lectures cover the principles that are common to all species, and the labs and tutorial sessions focus on more specialized topics that are relevant to the management of bovine, equine, and other ruminant species.

FORMATS: Lecture | Lab

ANSC 0113 Principles of Animal Welfare & Husbandry

CREDIT HOURS: 2

Students examine the biological basis for animal behaviour, animal welfare, environmental physiology, and animal health. They also examine the role and importance of legislation and voluntary codes of practice in animal welfare and animal health. The course will enable the student to analyze and select handling practices, housing options, biosecurity, and disease prevention options that meet the needs of the animal and the enterprise. Lectures cover the principles that are common to all species, and the labs and tutorial sessions focus on more specialized topics that are relevant to the management of bovine, equine, and other ruminant species.

FORMATS: Lecture | Lab

ANSC 0114 Animal Feed and Nutrition Management

CREDIT HOURS: 2

Students examine in detail the biology of digestion and nutrient metabolism and the assessment of feedstuff quality in forage-based feeding systems. The course will enable the students to analyze strategies for meeting nutrient requirements and avoiding nutritional problems, and to assess feed efficiency and feed costs for the enterprise. Lectures cover the principles that are common to all species, and the labs and tutorial sessions focus on more specialized topics that are relevant to the management of bovine, equine, and other ruminant species.

FORMATS: Lecture | Lab

ANSC 0116 Companion Animal Enterprise

CREDIT HOURS: 2

This course will enable the student to oversee the routine care of animals in a companion animal facility and to develop some of the basic workplace communication skills necessary in such an enterprise. Students examine the structure of the companion animal industry and discuss the issues, challenges, and opportunities facing the industry. The basic care component covers mainly dogs and cats, with some coverage of other species, and a portion of this will be conducted outside class time. The industry overview component covers all species represented by the industry, as well as the different segments of the industry.

FORMATS: Lab

ANSC 0117 Companion Animal Growth, Development, and Nutrition

CREDIT HOURS: 2

Students examine the biology of growth and development in companion animals and analyze the requirements for care and management throughout the life cycle. They also examine the biology of nutrition and the nutritional requirements throughout the life cycle, and relate this to information on specific products, supplements, and feeding regimes. The course will enable the student to work with a nutritionist or veterinarian in establishing and implementing feeding and nutritional programs, and to interpret the legal and other limitations to providing foods and nutrition products and services for companion animals. The course covers mainly dogs and cats, with some coverage of other species.

PREREQUISITES: ANSC 0116.02

FORMATS: Lab

ANSC 0204 Dairy Herd Health and Nutrition Management

CREDIT HOURS: 2

Students participate in an in-depth examination of the health and nutrition requirements of the individual dairy cow, and of the requirements for maintaining high standards of health and optimal nutrition in the dairy herd. The course will enable the students to use herd records and on-site evaluations to troubleshoot health and nutrition problems and to identify solutions to those problems. The course will also enable the student to use a variety of technical and human resources in meeting future challenges in health and nutrition.

PREREQUISITES: ANSC 0112.02, ANSC 0113.02, ANSC 0114.02

FORMATS: Lecture | Lab

ANSC 0205 Optimizing Bovine Reproductive and Genetic Performance

CREDIT HOURS: 2

Half of the course is devoted to an in-depth examination of bovine reproduction and of the requirements for maintaining high success rates in heat detection and AI procedures. Students will use herd records and on-site evaluations to troubleshoot breeding problems and to identify solutions to those problems, and use a variety of technical and human resources in meeting future challenges in breeding management. In the other half of the course, students participate in an in-depth examination of dairy genetics and of the tools and systems used for evaluating performance and genetic merit in the dairy industry. Students will use herd records and on-site evaluations to identify breeding goals for the herd and to select sires and dams that will help the herd achieve these goals. The course will enable students to use a variety of technical and human resources in meeting future challenges in dairy genetics. Applications to the beef industry will be discussed as well.

PREREQUISITES: ANSC 0112.02

FORMATS: Lecture | Lab

ANSC 0206 Managing Dairy Milking Systems and Housing Facilities

CREDIT HOURS: 2

Students examine in detail the management of the milking system and evaluate current and future options in milking systems technology. They also examine current and future options for housing and equipment, and analyze the ability of those options to meet the financial, environmental, and animal welfare goals of the operation. Tours and field trips give the students an opportunity to view a variety of housing and milking systems. Some of the tours or field trips may be conducted outside scheduled class time.

PREREQUISITES: ANSC 0113.02

FORMATS: Lecture | Lab

ANSC 0208 Biology and Care of Aquarium Fish and Reptiles

CREDIT HOURS: 2

Students examine the biology of growth and development in aquarium fish and reptilian species, and analyze the requirements for care and management throughout the life cycle, including the requirements for nutrition and health care. A considerable portion of the course is devoted to the selection and set-up of aquarium and terrarium systems and to troubleshooting problems. The course will enable the student to ensure high standards of health and nutrition for fish in aquarium systems and for reptiles.

PREREQUISITES: ANSC 0116.02

FORMATS: Lecture | Lab

ANSC 0209 Biology and Care of Pet Birds and Small Mammals

CREDIT HOURS: 2

Students examine the biology of growth and development in avian and small animal species and analyze the requirements for care and management throughout the life cycle, including the requirements for nutrition and health care. The selection and set-up of housing systems are important components of the course. The course will enable the student to ensure high standards of health, nutrition, and care for birds and small animals.

PREREQUISITES: ANSC 0116.02

FORMATS: Lecture | Lab

ANSC 0210 Introduction to Companion Animal Health

CREDIT HOURS: 2

Students examine the causes and predisposing factors of diseases common to companion animals, and of the principles of disease management and prevention as they apply to companion animal facilities. The course will enable students to establish and implement biosecurity and health management protocols, and to interpret the legal and other limitations to providing health care products and services in consultation with the facility veterinarian. The course covers mainly dogs and cats, with some coverage of other species.

PREREQUISITES: ANSC 0117.02

FORMATS: Lecture | Lab

ANSC 0212 Companion Animal Genetics and Reproduction

CREDIT HOURS: 2

Students examine the processes of reproduction and lactation in companion animals, and analyze the requirements for care and management during mating, parturition, and lactation. They also study the common breeds and the genetics of colour and conformation, and examine the requirements for choosing breeders and planning matings that meet the objectives of the breeding program. The course covers mainly dogs and cats, with some coverage of other species.

PREREQUISITES: ANSC 0116.02

FORMATS: Lecture | Lab

Applied Science Courses

Degree Level Course Descriptions

APSC 1003 Practices and Mechanics of Materials

CREDIT HOURS: 3

This course deals with the practices of selecting and working with materials, including considerations for green practices. Selection of materials is based on many properties depending on the application; usually strength, workability, durability, and costs are key concerns. Green practices during the construction of machines, structures and buildings will include traditional properties and their environmental and resource efficiency including their deconstruction. Using green materials and products promotes conservation of dwindling non renewable resources and helps to reduce the environmental impacts associated with the extraction, transport, processing, fabrication, installation, reuse, recycling, and disposal of these source materials.

FORMATS: Lecture | Lab

APSC 1004 Wood Construction Technology I

CREDIT HOURS: 3

This is an introductory course in the selection, operation, and maintenance of woodworking hand and power tools. The principles of selection, operation, and maintenance of workshop tools in the modern woodworking shop are studied. Students will be required to present seminars on various fabrication techniques and construction tools. Occupational Health and Safety issues pertaining to wood shop work procedures will be covered.

FORMATS: Lecture | Lab

APSC 1005 Metal Construction Technology I

CREDIT HOURS: 3

This is an introductory course to familiarize students with common metal construction technologies, machines, and tools used in a metal fabrication shop. The principles of welding and welding applications will be emphasized. Students will be required to present demonstrations on the use of various metal hand and power tools, as well as present a seminar on some form of metal fabrication technology. Occupational Health and Safety issues pertaining to metal shop work procedures will be covered.

FORMATS: Lecture | Lab

APSC 2000 Environmental Impacts and Resource Management (A)

CREDIT HOURS: 3

This course is an introduction to environmental engineering and technology, emphasizing a quantitative engineering approach. The course addresses the issues associated with the safe and ecologically appropriate handling, processing, storage, and utilization of organic wastes arising from human activities, including agricultural and bio-resource production systems. Topics covered will include: growth models for populations of living organisms, as well as models for depletion and replenishment of natural resources; the concept of mass and energy balances applied to quantify changes in environmental systems; physical, chemical, and biological unit operations for treatment and reduction of solid, liquid, and gaseous wastes; and reduction of pollution impacts on air and water resources.

PREREQUISITES: BIOA 1002.03, CHMA 1001.03

FORMATS: Lecture | Lab

APSC 2002 Bioresource Systems Analysis (A)

CREDIT HOURS: 3

This course introduces the concepts of systems theory and systems analysis. Natural and engineered systems function on the basis of different inputs triggering throughput processes that result in a range of outputs. The emphasis will be on the use of systems analysis on managing current bioresource, environmental, and technological issues affecting our world. Students will work through case studies, specific example datasets, and contemporary world

issues using a systems analysis framework as an integrated problem-solving tool. Real-world systems will be examined through application driven problems, discussions, and case study analysis.

FORMATS: Lecture | Lab | Other (explain in comments)

APSC 2003 Composting and Compost Use (A) DE

CREDIT HOURS: 3

Composting and the utilization of organic matter produced on the farm provide the basis for soil fertility in organic systems; however, potential benefits derived from compost use are often limited by the supply and quality of composts produced on-farm. The objective of this web-based course is to teach composting primarily by providing students with the opportunity to make their own compost over a period of 13 weeks. Students learn through five stand-alone modules: Composting of Organic Materials; Composting Process; On-Farm Composting; Compost Quality; and Compost Utilization and Marketing.

CALENDAR NOTES: Making compost and completing all five modules will be a requirement for students who are taking the course for credit.

FORMATS: Online Delivery

APSC 2004 Aquacultural Environment (A)

CREDIT HOURS: 3

Principles necessary for understanding and providing optimal aquatic environments for aquaculture production are reviewed. Topics in water habitat management will be emphasized, including: water properties of both fresh- and salt-water systems; water quality and reconditioning techniques; maintenance of dissolved oxygen and removal of metabolic wastes in aquaculture rearing systems; and evaluation of water resource requirements for aquaculture.

FORMATS: Lecture | Lab

APSC 2008 Digital Electronics and Computer Interfacing

CREDIT HOURS: 3

This course covers the theory and applications of digital electronics technology and the control of digital devices by computers and programmable logic controllers (PLCs). Digital technology has become the dominant method of communication, control, sensing, computation, and amusement in modern society. This course will provide the foundation to better understand current and future digital systems. Digital logic circuits, data forms, and applications are studied. Computers in the laboratory are used to interface with and control a variety of digital devices such as computer numerical controlled (CNC) machines, robotics, cameras, scanners, lab equipment, etc. Students are introduced to Visual Basic programming for interfacing with computer ports and analog input devices. Hands on projects are completed to control real-world applications such as traffic lights, process control and experimentation equipment.

FORMATS: Lecture | Lab

APSC 2009 Metal Construction Technology II

CREDIT HOURS: 3

This is an advanced course in metal construction technologies using power machines (including CNC) and tools used in a metal fabrication shop. Advanced principles of welding and welding applications will be emphasized. Students will be required to present demonstrations on the use of various power machines, and to design and construct a major metal project using the skills learned in both Metal Construction Technology courses.

PREREQUISITES: APSC 1005

FORMATS: Lecture | Lab

APSC 2010 Wood Construction Technology II

CREDIT HOURS: 3

An advanced course in the operation and maintenance of woodworking hand and power tools, and shop machinery. Students will learn about specialized machinery and advanced joinery technologies. The operation, maintenance, and repair of workshop tools in the modern woodworking shop are studied, with emphasis on re-alignment and setting up for accessories and jigs. Written work safety procedures will be reviewed. Individual projects are undertaken by students with the skills acquired in both Wood Construction Technology courses, utilizing the shop equipment.

PREREQUISITES: APSC 1004

FORMATS: Lecture | Lab

APSC 2011 Technology for Precision Agriculture (A)

CREDIT HOURS: 3

Principles and application of precision agriculture technologies including: GPS, GIS, sensors, digital photographic techniques, controllers, variable rate applicators for site-specific application of inputs (pesticide, fertilizer, irrigation etc.), auto guidance system, data acquisition and management, and precision agriculture equipment management.

FORMATS: Lecture | Lab

APSC 2013 Machinery and Building Technology (A)

CREDIT HOURS: 3

Two keys to the success of utilizing biomaterials are selection of appropriate machines and designing effective facilities to manage the production/processing system. In the first half of the course, students are introduced to the types of equipment, their productivity, and methods of selection for efficient operation. This will include machinery for soil preparation, planting, crop care, and harvesting. The machines and their unit operation are analyzed with respect to functions, work rates, material flow and power usage. The importance of monitoring machine performance relating to work quality and environmental effects of machine operation will be studied. The labs will emphasize safety, basic maintenance, adjustment, calibration and performance testing. The second half of the course provides an introduction to the planning process of structures and various topics related to the use of building materials, particularly “green” materials. Functional layouts and ventilation principles of storage and production buildings are considered. Field trips supplement the lecture material. A term paper is required.

FORMATS: Lecture | Lab

APSC 3001 Electrotechnology (A)**CREDIT HOURS: 3**

Electricity is integral to our society, and this course reviews application of AC and DC electricity. Safety and measurements are practised during hands-on lab sessions. Common sensors, measurements and control systems are discussed and applied to improve energy management.

PREREQUISITES: PHYS 1000 or PHYS 1002

FORMATS: Lecture | Lab

APSC 3002 Waste and Environmental Management**CREDIT HOURS: 3**

A variety of wastes are produced across residential, commercial, and industrial sectors around the world. Solid and liquid waste management are integral to maintaining healthy environments. The focus of this course will be on solid waste management, with an introduction to wastewater technologies, under municipal, industrial, and agricultural contexts. Topics to be covered include: solid and liquid waste treatment and disposal technologies, bioresource conversion technologies, environmental impacts, and valorization of wastes. Agricultural wastes and biomass related by-products will be emphasized throughout the course.

PREREQUISITES: ENVA 2000

FORMATS: Lecture | Lab

APSC 3013 Aquacultural Systems Technology (A)**CREDIT HOURS: 3**

Support facilities, equipment, and systems for aquatic production will be examined. Topics studied will include: selection of component materials and structures suitable for confinement, protection, and growth of aquaculture species; principles of design and selection of equipment for recirculation systems for aquaculture; and the principles of water flow and handling in open and closed conduits.

FORMATS: Lecture | Lab

APSC 3018 Technology Modules**CREDIT HOURS: 3**

This course deals with the operating concepts of CNC machines, plastics forming and construction technology, and transportation technology in a modular format. Approximately 4 weeks will be allocated to the study of each module area. The students will be able to perform operations in each technology area upon completion of the appropriate module. Practical hands-on laboratory and shop experiences are emphasized, as are associated aspects of Occupational Health and Safety. Students will also make presentations to the class regarding specific features and operations of the technologies studied.

FORMATS: Lecture

APSC 3019 Communications Technology**CREDIT HOURS: 3**

This course addresses issues, systems, and methodology in computer-related communications technology. Among the topics studied are desktop publishing, digital photography and image editing, video production, web page design, and presentation software usage. Supplementary classes in graphic design and screen printing will be available as time allows. Emphasis is placed on practical production techniques and individual design situations.

FORMATS: Lecture | Lab

APSC 3020 Energy Production and Utilization**CREDIT HOURS: 3**

This lecture-based course provides an overview of the whole energy system, focusing on selected attributes of energy. The assessment, management and remediation of energy production is a global issue, which will ultimately impact all walks of life, business, industry and future infrastructure. It includes an introduction to the energy supply chain, transmission and distribution systems, energy use, energy policy and the environment and methods of generation. It also includes an overview of renewable energy assessment techniques and feasibility tools.

PREREQUISITES: MTHA 1001, preparatory: PHYS 1000 or PHYS 1002

APSC 4001 Water Quality Issues (A)

CREDIT HOURS: 3

Current environmental water quality issues such as contamination of surface and ground water are discussed. Emphasis is placed on providing solutions to the water quality problems. Agricultural water quality models will also be examined.

FORMATS: Lecture

APSC 4004 Energy Conversion and Assessment (A)

CREDIT HOURS: 3

This lecture-based course focuses on selected attributes of existing and renewable energy options, including the reserves and consumption of oil, coal and gas; fossil energy technologies for power generation; fundamental principles, applications and status of solar energy, biomass energy, wind energy and hydro-power; and outlook and evaluation of renewable energy.

PREREQUISITES: APSC 3020

FORMATS: Lecture | Lab

APSC 4005 Watershed Management and Environmental Restoration (A) (H)

CREDIT HOURS: 3

This lecture-based, non-quantitative course focuses on the citizen (bottom-up) and governmental (top-down) management of watersheds and theoretical debates concerning environmental restoration, both in rural and (sub)urban environments. Topics to be covered include: watershed atlases, water sensitive planning, land-use systems analysis, community-based monitoring and management, nature-culture interactions, restorative redevelopment, and the post-industrial regeneration of damaged sites for ecotourism and environmental education. Broad latitude will be permitted in the subject areas of the assignments in order to appeal to individuals' interests and career aspirations in environmental science, landscape architecture, international development, and environmental governance and sociology.

FORMATS: Online Delivery

APSC 4006 Wastewater Management (A)

CREDIT HOURS: 3

This course gives an overview of sources of water pollution, particularly in the rural situation, and standard methods of treatment. Alternative approaches such as wetlands and filters will be discussed. Laboratory sessions will include field trips, methods of sampling, and some testing of water.

CALENDAR NOTES: Environmental Sciences

PREREQUISITES: At least third-year standing

FORMATS: Lecture | Lab

Technology Level Course Descriptions

APSC 0100 Surveying

CREDIT HOURS: 2

An introduction to surveying principles and recording techniques. Students are given lectures and assignments to assist in understanding the principles employed in surveying, and they practise these during the labs by conducting various surveying exercises. Practice is gained in the proper use of surveying instruments (tape, level, and transit) through exercises involving measurements of horizontal and vertical distances and angles. These include chaining, stadia, benchmark, profile and contour leveling, triangulation and traverse exercises, and construction surveying, with emphasis on their application to farm construction projects.

CALENDAR NOTES: Fall semester

FORMATS: Lecture | Lab

APSC 0101 Horticultural Technology

CREDIT HOURS: 2

Small gasoline engine structure and operating theory are studied, with emphasis on engine maintenance and troubleshooting. This course includes basic hydraulic theory, emphasizing the operation of common systems in use today. A wide range of horticultural machinery is studied, as well as the principles of mixing, placing, and curing concrete, fence making, and chainsaw operation.

CALENDAR NOTES: Winter semester

FORMATS: Lecture | Lab

APSC 0200 Environmental Management

CREDIT HOURS: 2

Students examine the major environmental issues and risks in agricultural production. The emphasis is on how agricultural activities impact the environment and how environmental issues, regulations, and programs impact the way agricultural activities are carried out. The course will enable the student to identify the legal and other requirements for reducing the environmental risks associated with production activities, and to work with an engineer or environmental specialist in determining ways to minimize environmental risk.

CALENDAR NOTES: Fall semester

FORMATS: Lecture | Lab

APSC 0201 Machinery and Building Technology

CREDIT HOURS: 2

Two keys to the success of utilizing biomaterials are selection of appropriate machines and designing effective facilities to manage the production/processing system. In the first half of the course, students are introduced to the types of equipment, their productivity, and methods of selection for efficient operation. This will include machinery for soil preparation, planting, crop care, and harvesting. The machines and their unit operation are analyzed with respect to functions, work rates, material flow and power usage. The importance of monitoring machine performance relating to work quality and environmental effects of machine operation will be studied. The labs will emphasize safety, basic maintenance, adjustment, calibration and performance testing. The second half of the course provides an introduction to the planning process of structures and various topics related to the use of building materials, particularly green materials. Functional layouts, ventilation principles of storage, and production buildings are considered. Field trips supplement the lecture material. A term paper is required.

CALENDAR NOTES: Fall semester

FORMATS: Lecture | Lab

Aquaculture Courses

Course Descriptions

AQUA 2000 Introduction to Aquaculture (A)

CREDIT HOURS: 3

The history and the current status of world aquaculture production are discussed, with emphasis on species with potential in Atlantic Canada. Advances in freshwater or marine finfish and shellfish culture are included. Aquatic plant production is discussed. Business aspects of aquaculture are introduced. The course includes field trips to aquaculture and related facilities.

FORMATS: Lecture | Lab

AQUA 3000 Fish Health (A)

CREDIT HOURS: 3

This course outlines concepts of disease with special reference to fish. Diseases of various etiological types are considered, with emphasis on those in the aquaculture environment. The relationships of management and economics to disease in cultured fish are detailed, and public health concerns are addressed. Diagnostic, prophylactic, and treatment methods are outlined and practised.

PREREQUISITES: Preparatory: BIOA 3005

FORMATS: Lecture | Lab

AQUA 4000 Finfish Production (A)

CREDIT HOURS: 3

Aspects of breeding and genetics, fish management, financial management, economics, marketing, housing systems, and water management are presented in an integrated approach to provide a sound understanding of this aspect of aquaculture. Management of finfish throughout the life cycle is presented. The course includes a weekend field trip to commercial farms; attendance is obligatory.

PREREQUISITES: AQUA 2000, BIOA 3005

FORMATS: Lecture | Lab

AQUA 4001 Shellfish Production (A)

CREDIT HOURS: 3

Factors affecting profitable production of shellfish are discussed in the context of developing a sound industry with potential to address future opportunities. A

survey of culture techniques used in shellfish production is undertaken.

PREREQUISITES: AQUA 2000

FORMATS: Lecture | Lab

Art Courses

Course Descriptions

ARTS 2000 Nature's Image: A Survey of Landscape Art (H)

CREDIT HOURS: 3

This course will provide an introduction to the history of art forms depicting landscape, with the major focus being on landscape painting. The course will consist of art history lectures and a studio component in which drawing techniques, collage, and colour theory will be explored. Students will develop skills in composition and will gain an increased appreciation for landscape art traditions.

FORMATS: Lecture | Studio

Biology Courses

Degree Level Course Descriptions

BIOA 0050 Preparatory Biology

CREDIT HOURS: 0

BIOA 0050 is a preparatory course for university-level biology. This course provides basic and fundamental knowledge of how scientists approach a problem and analyze it scientifically within the field of biology. Topics covered include: types of cells; organelles structure and function; DNA, RNA, and Protein synthesis; gene expression; cellular processes genetics; Evolution, Diversity and unit of life; and classification of the kingdoms.

BIOA 1002 Biology I

CREDIT HOURS: 3

This is the first of a two-semester course sequence exploring various general principles common to the biological sciences. The biological significance of cell structure and function, metabolism, the cell cycle, sexual reproduction, Mendelian genetics and basic gene structure are among the topics to be considered in the lecture sessions. The labs reinforce and enhance the learning of selected topics discussed in the lectures.

FORMATS: Lecture | Lab

BIOA 1003 Biology II

CREDIT HOURS: 3

This is the second of a two-semester course sequence exploring various general principles common to the biological sciences. In addition to evolutionary processes and patterns, the fundamental systematics and diversity of prokaryotes, protists, plants, fungi and animals are emphasized in the lecture sessions. The laboratory continues to reinforce and enhance the learning of selected topics discussed in the lectures.

PREREQUISITES: BIOA 1002

FORMATS: Lecture | Lab

BIOA 2000 Cell Biology

CREDIT HOURS: 3

An introduction to cell biology. Topics include cell metabolism, the structure and function of organelles of the eucaryotic cell, cell growth, cell movement, and the prokaryotic cell. Specialized cell functions will also be discussed.

FORMATS: Lecture | Lab

BIOA 2002 Plant Physiology

CREDIT HOURS: 3

A study of the different functions of the plant, including growth, photosynthesis, mineral nutrition, water relations and translocation of solutes, and plant orientation, development, and reproduction.

FORMATS: Lecture | Lab

BIOA 2004 Structural Botany

CREDIT HOURS: 3

The basic morphology and anatomy of the seed plants are presented from a developmental perspective. The structural aspects of the various modes of plant reproduction are also included. Emphasis is placed on obtaining an understanding of plant structure that will complement crop physiology, weed biology, and plant pathology.

FORMATS: Lecture | Lab

BIOA 2005 Principles of Plant Pathology (A)

CREDIT HOURS: 3

This course deals with the principles of plant pathology and the control of diseases caused by bacteria, fungi, mycoplasma-like organisms, viruses, and nematodes. Labs deal with basic techniques used in plant pathology, such as fungal, bacterial, and nematode isolation, identification, and inoculation.

PREREQUISITES: BIOA 1003, MCRA 2000

FORMATS: Lecture | Lab

BIOA 2006 Mammalian Physiology

CREDIT HOURS: 3

An introduction to the body systems and how they function. The student should develop a basic understanding of physiological processes and how they are regulated and integrated by the nervous and endocrine systems. Topics covered include: homeostasis; the nervous, muscular, endocrine, cardiovascular, respiratory, renal, and digestive systems; and an introduction to environmental physiology.

PREREQUISITES: CHMA 2000

FORMATS: Lecture | Lab

BIOA 2008 Plant Diversity

CREDIT HOURS: 3

This course emphasizes the biology, evolution, and diversification of the major phyla of the Kingdom Plantae. The lectures illustrate the fundamental reproductive unity underlying the diversity of all land plants, using examples from both fossil and living species. In addition to exploring the major plant groups and their subdivisions in the laboratory, students learn to use the appropriate resources to identify specific plants.

PREREQUISITES: Preparatory: BIOA 1003

FORMATS: Lecture | Lab

BIOA 3000 General Entomology (A)

CREDIT HOURS: 3

An introduction to the science of entomology from an agricultural perspective. Insect anatomy, physiology, and taxonomy are considered; also included are discussions on insect behaviour, reproduction, life cycles, and population ecology. Basics of monitoring techniques and population dynamics are illustrated. Students will be required to prepare and submit an insect collection.

PREREQUISITES: Preparatory: BIOA 1003

FORMATS: Lecture | Lab

BIOA 3001 Ecology

CREDIT HOURS: 3

An introduction to the principles and general concepts of ecosystem structure and function is presented. The dynamics of populations and community interactions are considered in relation to various biotic and abiotic environmental influences. The laboratory reinforces topics covered in the lectures and readings by emphasizing the importance of field observation and interpretation.

PREREQUISITES: BIOA 1002, BIOA 1003

FORMATS: Lab | Online Delivery

BIOA 3002 Weed Science (A)

CREDIT HOURS: 3

This course deals with the principles of weed science. Included are discussions on weed recognition, and chemical and non-chemical approaches to controlling weeds in various agricultural crops and in lawns and non-crop areas. The selection, safe use, handling, and storage of herbicides are stressed, along with the environmental impact of the different methods of weed control.

PREREQUISITES: BIOA 1002, preparatory: BIOA 2002

FORMATS: Lecture | Lab

BIOA 3003 Comparative Vertebrate Anatomy

CREDIT HOURS: 3

An introduction to comparative anatomy. Emphasis is placed on analyzing vertebrate structure. Comparisons of form and function within the Vertebrata are discussed with an evolutionary perspective. This is supplemented in the laboratory by detailed dissections of representative vertebrates.

PREREQUISITES: BIOA 1003

FORMATS: Lecture | Lab

BIOA 3005 Fish Physiology (A)

CREDIT HOURS: 3

The form, function, physiological integration, and behaviour of major types of aquatic animals is considered. Emphasis is placed on Classes of organisms, using commercially important species as primary examples.

PREREQUISITES: BIOA 1003

FORMATS: Lecture | Lab

BIOA 3006 Aquatic Ecology

CREDIT HOURS: 3

The biology of aquatic species in marine and freshwater environments is discussed, with emphasis on biological systems involving farmed species, and organism interdependencies and interactions are examined. An introduction to the principles of ecology at the community and ecosystem level of integration is included.

PREREQUISITES: BIOA 1003

FORMATS: Lecture | Lab

BIOA 3008 Growth, Reproduction and Lactation (A)

CREDIT HOURS: 3

A continuation of BIOA 2006, emphasizing physiological systems relevant to animal production. Major topics include growth and development as it applies to meat and brood animal production, and the physiology and management of reproduction and lactation in domestic species.

PREREQUISITES: BIOA 2006

FORMATS: Lecture | Lab

BIOA 4000 Avian Biology (A)

CREDIT HOURS: 3

This course is a study of topics in biology of special relevance to the commercial use of avian species. Physiological, biochemical, and genetic control and manipulation of such processes as reproduction, growth and development, and immunity are examined.

PREREQUISITES: BIOA 2006 or BIOA 3005

FORMATS: Lecture | Lab

BIOA 4002 Conservation Biology

CREDIT HOURS: 3

This course will examine the ecological concepts underlying current issues in conservation biology. Topics covered include effects of agricultural habitat fragmentation on wildlife, conservation of biodiversity, stability and resilience of ecosystems, optimal design of nature reserves, and habitat heterogeneity. This is a discussion-style course concentrating on current published scientific papers chosen by the students. Students will also learn to read and critically evaluate scientific papers, and to apply this ability to writing literature reviews.

PREREQUISITES: 60 credit hours

FORMATS: Lecture

BIOA 4004 Animal Adaptation and Stress

CREDIT HOURS: 3

This is an advanced-level course in the comparative physiology of animal adaptation and stress. The concepts of allostasis, homeostasis and the physiological stress response will be reviewed, and the role of endocrine regulation in animal adaptation under changing external (environmental) and internal (life-history) demands will be discussed. Special emphasis will be placed on mammalian and avian adaptation in response to changes in the internal, physical, and social environments. Species discussed may include livestock, companion and zoo animals, and wildlife.

PREREQUISITES: Any one of BIOA 2006, BIOA 3005, BIOL 3078, DENT 1119, MARI 3074, PHYL 1000, PHYL 1010, PHYL 1400, PHYL 2032

FORMATS: Online Delivery

Technology Level Course Descriptions

BIOA 0101 Plant Pathology

CREDIT HOURS: 2

This course deals with the diagnosis of plant diseases caused by fungi, bacteria, phytoplasmas, viruses, and nematodes. Students will develop skills to differentiate plant diseases caused by microbial pathogens from those caused by abiotic factors. Principles of plant disease management will be covered. Labs deal with basic techniques used in plant pathology, such as fungal, bacterial, and nematode isolation, identification, and inoculation.

FORMATS: Lecture | Lab

BIOA 0103 Weed Science

CREDIT HOURS: 2

This course deals with the principles of weed science. Included are discussions on weed recognition, and chemical and non-chemical approaches to controlling weeds in various agricultural crops and in lawns and non-crop areas. Selection, safe use, handling, and storage of herbicides are stressed.

CALENDAR NOTES: r

FORMATS: Lecture | Lab

BIOA 0200 Entomology

CREDIT HOURS: 2

An introduction to the study of the phylum Arthropoda, with particular reference to the class Hexapoda (Insecta), emphasizing insect pests of the northeast. Anatomy, physiology, taxonomy, behaviour, and ecology of insects are considered during lectures and laboratory work. Discussions on the relationship of insects to humans, basics of insect control methods, and pesticide safety are included. Students will be required to prepare and submit an insect collection.

FORMATS: Lecture | Lab

Bioveterinary Courses

Courses

Below are courses offered in Biology by the Faculty of Agriculture. Please see the Biology Section in the Faculty of Science for courses offered on the Halifax campuses.

Degree Level Course Descriptions

BVSC 1000 Overview of the Animal Health Sciences

CREDIT HOURS: 3

This course is an orientation to current issues and challenges related to animal health and disease in a global context; an interdisciplinary overview of the role and importance of animal health and welfare in modern society and its relationship to food safety and human health. Causes of disease and the principles of maintaining health animals will be discussed, as will implications of animal diseases and drug therapy for product safety and public health. The history and development of animal health professions and their roles will be covered. Through the completion of real-world case studies, students will examine the issues faced by the animal health and welfare sector. The variety of career paths that students can pursue will also be part of the course.

FORMATS: Lecture

BVSC 3000 Veterinary Immunology

CREDIT HOURS: 3

An introduction to the basic aspects of humoral and cell-mediated immunity, the role of immunological reactions in infectious disease pathogenesis, hypersensitivity, and autoimmune disease. Students will study the principles of immunity to bacteria, viruses and parasites and the fundamentals of vaccination. Students will also be familiarized with diagnostic techniques for assessing the immune system and for diagnosis of immune mediated disease. In addition, an overview of comparative immunology will be explored, i.e., how immune systems of avian and aquatic species compare to mammalian systems. Vaccine safety and efficacy and application of basic immunology to the science of vaccine use and production will be discussed.

PREREQUISITES: BIOA 2006.03

FORMATS: Lecture | Tutorial

BVSC 3001 Veterinary Epidemiology

CREDIT HOURS: 3

Epidemiology is the study of patterns of diseases in populations. In this course you will learn how to describe the magnitude of a health problem and determine the relative importance of risk factors, and to assess with increased confidence and comfort the overall quality of research papers in epidemiology. Students will learn basic epidemiological skills; to apply appropriate epidemiologic tools in animal disease surveillance/survey systems in order to conduct valid risk analyses. Emphasis will be placed on analysis and interpretation of field data, and diagnostic test results.

PREREQUISITES: BVSC 3000

FORMATS: Lecture | Tutorial

BVSC 4000 Ecology of Zoonotic Diseases

CREDIT HOURS: 3

Wild animals have always been valued as part of the natural world, and domestic animals as a source of food, fibre, work and companionship. That has not changed, but we now know that we and other animals share a microbial world, and that many of those microbes are pathogenic and are evolving to include humans as host. Most emerging infectious diseases are animal origin, known as zoonoses. Avian flu, Swine flu, HIV, SARS, West Nile and others, have spilled over from animal reservoirs to humans. Many zoonotic diseases and human pathogens result from our intimate contacts with domesticated animals, a process that has continued since the early days of domestication. What is the relationship among humans, non-human animals, and the environment we have in part created? What do we predict will happen over the next few decades? The purpose of this course is to better understand and attempt to answer these questions by examining the ecology of zoonotic diseases.

CALENDAR NOTES: Winter semester

PREREQUISITES: ANSC 3001

FORMATS: Lecture

Chemistry Courses

Courses

Below are courses offered in Chemistry by the Faculty of Agriculture. Please see the Chemistry Section in the Faculty of Science for courses offered on the Halifax campuses.

Course Descriptions

CHMA 0050 Preparatory Chemistry

CREDIT HOURS: 0

This non-credit course is designed for students who satisfy all other requirements for admission but lack the Grade 12 Chemistry course. The course will cover the basic material necessary for entrance into CHMA 1000, including review of the periodic table, nomenclature, chemical reactions, aqueous solutions, chemical bonding, and other topics as determined by a review of the class. CHMA 0050 is not intended to duplicate or replace Grade 12 Chemistry.

FORMATS: Online Delivery

CHMA 1000 General Chemistry I

CREDIT HOURS: 3

This course is designed to help students understand chemical equations, reactions, and calculations. The chemistry of aqueous media is highlighted (properties of water, ionization of weak electrolytes, buffers). In addition to the traditional classroom interaction, students will be exposed to problem-based learning and co-operative learning. Students will learn the proper use of various analytical equipment and apparatus. The laboratory work will focus on the development of practical lab skills applicable to the agricultural and environmental industries.

PREREQUISITES: High School Chemistry equivalent to the Nova Scotia 12 level. Students not having a chemistry credit equivalent to Nova Scotia Grade 12

Chemistry are strongly advised to take CHMA0050 which is available in the summer and winter terms.

FORMATS: Lecture | Lab

CHMA 1001 General Chemistry II

CREDIT HOURS: 3

This second semester of General Chemistry will include a theoretical understanding of atomic and molecular structures. An understanding of physical equilibria will be extended to practical applications of chromatographic analyses.

PREREQUISITES: CHMA 1000

FORMATS: Lecture | Lab

CHMA 2000 Organic Chemistry I

CREDIT HOURS: 3

This course provides an introduction to the structure and reactions of organic compounds. The course is approached from a mechanistic point of view and has particular emphasis on appropriate spectroscopy (IR and MS). The topics covered in this course include chemical bonding, isomerism, acid–base properties and the isolation and purification of organic compounds. The classes of organic compounds covered will include alkanes, alkenes, alkynes, simple aromatics, organohalides, alcohols, and related compounds. Laboratory work will include introductory techniques of organic chemistry and both HPLC and gas chromatography.

PREREQUISITES: CHMA 1001

FORMATS: Lecture | Lab

CHMA 2002 Introduction to Biochemistry (A)

CREDIT HOURS: 3

The major focus of this course will be on the biochemical pathways and activities that account for the synthesis (anabolism) and degradation (catabolism) of the major macromolecules in living cells. These molecules include proteins, carbohydrates, lipids and nucleic acids. Catalytic and regulatory strategies used by living cells in intermediary metabolism will also be discussed, with emphasis on carbohydrate metabolism. The final topic will be to examine and understand how metabolism consists of highly interconnected biochemical pathways. Students will also gain basic investigative skills through hands-on experience in the laboratory section.

PREREQUISITES: CHMA 2000

EXCLUSIONS: CHMA 3001

FORMATS: Lecture | Lab

CHMA 3009 Environmental Chemistry

CREDIT HOURS: 3

In this course students will undertake an in-depth study of the chemical processes involved in the pollution of the environment. Chemical pollution of the atmosphere, hydrosphere, and lithosphere will each be studied in depth. In each case, chemical solutions to these problems will be considered. Chemical processes such as dissolution, coordination, ion exchange, hydrolysis, ionization, and freezing point depression will be covered.

PREREQUISITES: CHMA 2000

FORMATS: Lecture

CHMA 3011 Fundamentals of Food Chemistry (A)

CREDIT HOURS: 3

An introductory study of the chemistry of food and food components. The emphasis will be on water, fats, proteins, and carbohydrates (and related compounds) with an overview of vitamins, minerals, and additives. Methods of analysis will be discussed in detail and this will be augmented by hands-on laboratory experiences with these analytic procedures.

PREREQUISITES: CHMA 2000

EXCLUSIONS: This course may not be taken for credit by students who have credit for CHMA 3012 or FOOD 3012.

FORMATS: Lecture | Lab

CHMA 4001 Directed Studies in Chemistry

CREDIT HOURS: 3

Directed studies involve a suitable combination of directed reading, written assignments, individual study or laboratory research projects in the area of chemistry. Classes are organized and scheduled by appropriate faculty via a course coordinator. Students should approach potential instructors directly with their requests.

PREREQUISITES: CHMA 2000 and 60 credit hours

CHMA 4003 Instrumental Analysis

CREDIT HOURS: 3

This course will equip the non-chemistry major with an understanding of the principles of chromatography, spectroscopy and electrochemistry, and their application in the analysis of agricultural, environmental and food samples. Students will be introduced to the method selection criteria used by scientists to evaluate an analytical method or to troubleshoot and develop new ones. Students will also have a hands-on experience on the use of analytical instruments including liquid chromatography (HPLC), gas chromatography, atomic absorption spectrophotometry, and UV-visible spectrophotometry. Laboratory sections will involve sample preparation and analysis, data interpretation and proper laboratory techniques with these analytical instruments.

PREREQUISITES: CHMA 2000.03

EXCLUSIONS: CHMA 3010.03

FORMATS: Lecture | Lab

Communications Courses

Degree Level Course Descriptions

CMMT 3000 Human Communications and Conflict Resolution (H)

CREDIT HOURS: 3

This course is designed to provide students with the opportunity to enhance their communication skills and knowledge. Since a key requirement of today's job market is the ability to communicate effectively, students will be exposed to the theory and the practice of communication. An important component of the course will be the emphasis on the practical application of communication knowledge.

PREREQUISITES: At least second-year standing

Technology Level Course Descriptions

CMMT 0020 Career and Employment Skills

CREDIT HOURS: 0

This course is designed to provide an introduction to job searching and hiring strategies. Through class discussion students will explore the world of work today, the hiring process, and the development of a personal career plan. Assignments will include resumé and cover letter writing, a networking exercise, and interview preparation. Restricted to students in the Diploma in Business Management program.

CALENDAR NOTES: Winter semester– This is a Workplace Readiness course required for all options in the Diploma in Business Management program.

FORMATS: Lecture

CMMT 0021 Introduction to Public Speaking

CREDIT HOURS: 0

The objective of this course is to enhance the student's ability to prepare and deliver different types of presentations: informative, persuasive, and impromptu. Topics covered will include assessing audience needs, developing a strong focus, outlining different styles of presentations, and writing effective introductions and conclusions. Students will learn how to evaluate a presentation and make recommendations on how to increase its effectiveness. Tips for presenting ideas visually will also be discussed.

CALENDAR NOTES: Winter semester– This is a Workplace Readiness course required for all options in the Diploma of Business Management program.

FORMATS: Lab

CMMT 0030 English for Academic Purposes

CREDIT HOURS: 0

This course will focus on enhancing English language skills (reading, speaking, writing, listening), critical thinking, and presentation skills required to be successful in an English university setting. Students who successfully complete CMMT 0030 will be considered to have met their English language requirement and are eligible to continue full-time studies at Faculty of Agriculture, Dalhousie.

CALENDAR NOTES: Fall semester

PREREQUISITES: Dalhousie/FAFU 2+2 program student who meets all of the Dalhousie B.Sc.(Agr.) admission requirements, has achieved a minimum score of 6 on the IELTS, and has been recommended by the FAFU Overseas Education College as a strong candidate

Computer Science Courses

Courses

Below are courses offered in Computer Science by the Faculty of Agriculture. Please see the Computer Science Faculty Section for courses offered on the Halifax campuses.

Degree Level Course Descriptions

CSCA 1000 Computer Methods

CREDIT HOURS: 3

A course to develop problem-solving and decision-making abilities and computational skills using computer software. Problems of a scientific and managerial nature will be chosen from a variety of agricultural fields. The course will cover word processing, spreadsheets, databases, programming, statistics, communications, graphics, and process control. Industry-leading software will be used.

FORMATS: Lecture | Lab

CSCA 2000 Computer Science

CREDIT HOURS: 3

Introduction to problem-solving methods and algorithm development. Emphasis is on designing, coding, debugging, and documenting programs, using C.

FORMATS: Lecture | Lab

CSCA 2001 Data Structures

CREDIT HOURS: 3

This course introduces the student to the fundamentals of software design, implementation, testing, and analysis. Topics covered include data representation, software development environments, libraries, modular programming, basic data structures (stacks, queues, and linked-lists), advanced data structures (trees and graphs), and their associated algorithms, algorithmic analysis, and classic sorting and searching algorithms. The data structures and algorithms are applied to engineering problems.

PREREQUISITES: CSCA 2000.03

FORMATS: Lecture | Lab

Economics Courses

Courses

Below are courses offered in Economics by the Faculty of Agriculture. Please see the Economics Section in the Faculty of Science for courses offered on the Halifax campuses.

Degree Level Course Descriptions

ECO 1000 Principles of Microeconomics (A)

CREDIT HOURS: 3

A course in comprehensive principles of microeconomic theory, covering the market system, producer and consumer theory, environmental and resource economics, and international trade policy. Emphasis in this course is on the application of economics to issues and problems facing many countries and their citizens today. The approach is practical and “real-world,” using microeconomic theory to develop an understanding of the issues and problems being discussed and the policy choices facing governments in dealing with these matters.

CALENDAR NOTES: Also offered as a web-based distance education course.

FORMATS: Lecture

ECOA 1001 Principles of Macroeconomics (H)

CREDIT HOURS: 3

This course introduces the student to basic macroeconomic concepts and to both short-term and long-term macroeconomic analysis. The basic macroeconomic concepts include economy-wide output, price level and inflation, asset prices and interest rates, international exchange rates among currencies, and the international balance of payments. The introduction to short-term macroeconomic analysis, or business-cycle analysis, is based on John Maynard Keynes' work on the 1929–33 Great Depression. The introduction to long-term macroeconomic analysis is based on Robert Solow's work on economic growth. Throughout the course macroeconomics is related to the historical experience of farmers and to contemporary macroeconomic forces affecting the agri-food sector.

PREREQUISITES: ECOA 1000

FORMATS: Lecture | Tutorial

ECOA 2000 Intermediate Microeconomics (H)

CREDIT HOURS: 3

A course in microeconomics at the intermediate level. Topics include the theory of the firm, consumer theory, markets and market structure, and externalities and public goods. All major concepts are presented graphically and some are studied using basic mathematics as well.

PREREQUISITES: ECOA 1000

FORMATS: Lecture | Lab

ECOA 2001 Intermediate Macroeconomics (H)

CREDIT HOURS: 3

This course extends the Principles of Macroeconomics course to the intermediate level. Short-term, or business-cycle, macroeconomics is progressed from the introductory Keynesian income determination model to the IS-LM model, and then to the Aggregate Demand/Aggregate Supply model. The long-term macroeconomic content advances the introductory economic growth model in considering the relative importance of the factors determining the overall rate of economic growth. Throughout the course macroeconomic theory is related to macroeconomic policy goals, stabilizing the economy in the short term and promoting improvement in economic well-being in the long term.

PREREQUISITES: ECOA 1001

FORMATS: Lecture

ECOA 2003 Agricultural Futures and Options (AH)

CREDIT HOURS: 3

The course begins with an introduction to agricultural futures markets. This leads into a study of fundamental and technical analyses of futures markets. This part of the course concludes with a consideration of price risk management using futures markets. Following is an introduction to options markets and price risk management using options. The course concludes with a topic of importance when exporting or importing agricultural commodities internationally: managing exchange-rate risk using futures and options.

PREREQUISITES: ECOA 1000

FORMATS: Lecture

ECOA 3001 Econometrics 1 (H)

CREDIT HOURS: 3

This course is a first class in Econometrics. The linear regression model will be studied. Topics include: Simple Regression; Correlation; Multiple Regression; Multicollinearity; Heteroscedasticity; Autocorrelation; and Discrete Regression models. Examples studied will be drawn from the field of Agricultural Economics. Students will use a commonly available statistical package in applications.

PREREQUISITES: STAA 2000

EXCLUSIONS: ECOA 3006

FORMATS: Lecture | Lab

ECOA 3002 Agricultural and Food Policy (AH)

CREDIT HOURS: 3

This course introduces students to the structure of the agri-food industry and the process of policy and implementation. A critical assessment of the institutions (organizations, programs, and policies) in agriculture is the main focus of the course. Through guest speakers, students' presentations, interactive class discussions, and lectures, students will learn how policies are developed and who is involved in the policy development process. An historical appreciation for agricultural policy in Canada will be pursued with a critical assessment of these policies. In reviewing policy problems affecting the agri-food industry, students will examine possible solutions to these issues. Topics covered include: reasons for government intervention; historical development of agri-food policy in Canada; the policy process; players in agriculture and food policy; structure of provincial, federal, and cost-shared programs; consumers and food policy; resource and environmental policy; international agricultural and food policies; trade agreements; and agribusiness involvement in agriculture and food policy.

PREREQUISITES: ECOA 1000 and at least second-year standing

FORMATS: Lecture | Lab

ECOA 3004 Agricultural Markets and Prices (AH)

CREDIT HOURS: 3

An introduction to agricultural market and price analysis as a field of study within agricultural economics. An applied microeconomics approach is taken to studying agricultural supply and demand, price discovery, and market structure for crop and livestock products. In addition to cash (spot) markets, agricultural futures and options markets are studied, including managing agricultural commodity price risk by hedging.

PREREQUISITES: ECOA 2000

FORMATS: Lecture

ECOA 3005 Agricultural Production Economics (A, H)

CREDIT HOURS: 3

This course is designed as a first class in Agricultural Production economics. Topics will include: The production function, total, average and marginal products. Stages of production. Isoquants and factor substitution. Homothetic functions, homogeneous functions and returns to scale. Elasticity of substitution. Profit maximization and profit functions, factor demands, output supply and their properties. Cost minimization and cost functions, conditional factor demands, marginal cost function and their properties. Interrelated properties of production functions, profit functions, costs functions using illustrative functional forms. Multiple outputs, production possibilities frontier and economies of scope. All topics will specialize the discussion to agricultural production functions and agricultural factors of production.

PREREQUISITES: ECOA 2000, MTHA 1000

EXCLUSIONS: ECOA 3000

FORMATS: Lecture | Lab

ECOA 3008 Environmental Economics (A)

CREDIT HOURS: 3

This course is designed to apply economic theory to the analysis of environmental problems, issues and policy. Students will learn how economic theory can be applied to mitigate the harmful effects of pollution and the inappropriate use of resources. The efficiency and efficacy of market versus non-market solutions will be discussed. Frameworks for measuring environmental costs and benefits will also be developed. The impact of environmental and resource issues on the agri-food industry at all levels in the marketing chain will be examined. Application will include air and water pollution, biodiversity preservation and global environmental problems, including climate change.

PREREQUISITES: ECOA 2000

FORMATS: Online Delivery

ECOA 4000 Advanced Microeconomics (H)

CREDIT HOURS: 3

This course is intended to give students an advanced treatment of Microeconomics. It is strongly recommended for those students wishing to undertake graduate work in economics, agricultural economics, or resource and environmental economics. Topics will include production economics, profit functions, cost functions, supply functions, and factor demand. An advanced treatment of demand theory will also be presented, including Hicksian and Marshallian demands, derived via Slutsky's equation. Both primal and dual approaches will be discussed.

PREREQUISITES: ECOA 2000, ECOA 3000

FORMATS: Lecture | Lab

ECOA 4001 Econometrics 2

CREDIT HOURS: 3

This course is designed to give the students a class in the advanced treatment of the linear regression model. Topics will include the least squares estimators, maximum likelihood estimation, generalized least squares, seemingly unrelated regression, two stage least squares, three stage least squares and panel econometrics models. Additional topics could also be taught, depending on the interests of students and as time permits. Throughout, examples of concepts will be drawn from the literature so that students can apply concepts to data. Software used in the class will include commonly used statistical packages such as GRETL.

PREREQUISITES: ECOA 3001

EXCLUSIONS: ECOA 4006

FORMATS: Lecture | Lab

ECOA 4004 Trade (AH)

CREDIT HOURS: 3

This course will provide students with an understanding of the factors that influence the exchange of products, with particular emphasis on trade interventions and institutions. Students will be introduced to trade theory, which they will use to evaluate trade policy issues. Students will learn how various government policy instruments and institutions affect international and interregional trade. Also, the complex set of rules and regulations governing international trade, such as the WTO, will be analyzed. The consequences of, and linkages among, international trade, the environment, and economic development will also be

pursued.

PREREQUISITES: ECOA 2000 and third-year standing

FORMATS: Lecture

ECOA 4005 Advanced Macroeconomics (H)

CREDIT HOURS: 3

This course provides a concise, mathematical coverage of classic issues in macroeconomic theory. The course starts with the classical model of a closed economy. A reconsideration of the labour market leads to the Keynesian model. An alternative treatment of the capital market underlies Tobin's dynamic aggregative model. The role of inflation expectations is explored under the contrasting cases of economic agents having adaptive expectations and perfect foresight. By integrating macroeconomic thinking and mathematical reasoning in the context of non-stochastic models, the course is also preparatory to graduate studies in economics.

PREREQUISITES: ECOA 1001, ECOA 2001

FORMATS: Lecture

Technology Level Course Descriptions

ECOA 0100 Introductory Microeconomics

CREDIT HOURS: 2

An introduction to the theory of the firm. The course examines the theory of demand and supply, distribution of income, forms of business organizations in Canada, and the levels of competition in the agricultural industry. Application of the various theories to explain the agricultural industry is stressed.

CALENDAR NOTES: Fall semester

FORMATS: Lecture

Engineering Courses

Courses

Below are courses offered in Engineering by the Faculty of Agriculture. Please see the Faculty of Engineering Section for courses offered on the Halifax campuses.

Course Descriptions

ENGN 1001 Engineering Design I

CREDIT HOURS: 3

Students are introduced to the concept of Engineering Design and the design process. Procedures and conventions for the preparation of engineering drawings and technical reports are presented. Students develop skills in manual drawing and computer aided drafting.

FORMATS: Lecture | Lab

ENGN 1002 Engineering I

CREDIT HOURS: 3

Students are introduced to the history of engineering up to the modern-day professional societies. The fundamental theory for engineers begins with statics, which teaches the concepts of particle and rigid body equilibrium. Students will apply vector algebra to work with position and force vectors, moments of forces, couple moments, and equilibrium of 2- and 3- dimensional bodies. Structural applications, such as 2-dimensional trusses, frames and simple machines, shear forces and bending moments in beams are presented. Coulomb friction, centroids and centres of mass, as well as area moments and products of inertia, are also included.

FORMATS: Lecture | Lab

ENGN 1006 Technical Communications in Professional Engineering

CREDIT HOURS: 3

The main focus of this course is technical communications as used in the engineering profession, emphasizing soft skills necessary to be a successful engineer. This course will cover topics related to engineering document types and development, presentation and networking skills, business world and

engineering connections, time management, problem solving and teamwork. Students will be introduced to engineering disciplines, the history of engineering, the design process, project scheduling and engineering ethics.

FORMATS: Lecture

ENGN 2005 Dynamics

CREDIT HOURS: 3

The dynamics course represents the second course in the study of engineering mechanics. Topics include kinematics, kinetics, work and energy, and linear and angular impulse momenta of a single particle and of rigid bodies in planar motion. There will be some computer applications wherever appropriate.

PREREQUISITES: MTHA 1001, PHYS 1000 or PHYS 1002

FORMATS: Lecture | Lab

ENGN 2014 Bioresource Processing (A)

CREDIT HOURS: 3

This course deals with the technologies of converting biomass into upgraded fuels as well as direct combustion. Students are introduced to biomass conversion; physical conversion of biomass (drying, dewatering, densification); thermo-chemical conversion of biomass (torrefaction, pyrolysis, gasification, combustion); heat and power applications; biogas production (digester design and kinetic considerations); ethanol and bio-diesel conversion technologies; and environmental impacts.

FORMATS: Lecture | Lab

ENGN 2201 Modeling and Optimization for Engineers

CREDIT HOURS: 3

This course will introduce students to operations research models and methodologies to optimize the design, development and operation of engineered systems. The focus of this course will be on formulating, building and solving optimization models primarily using Microsoft Excel. Topics to be covered include linear programming, assignment models, transportation and network models, project management, decision analysis and risk, queuing models, and nonlinear optimization.

CROSSLISTED: IENG 2201.03

FORMATS: Lecture | Tutorial

ENGN 3000 Electric Circuits

CREDIT HOURS: 3

This course covers the fundamentals of electric circuit analysis using Kirchoff's current and voltage laws, Thevenin's, Norton's, superposition, and source transformation for DC and AC circuits. Circuit components include resistors, capacitors, inductors, voltage, and current sources. PSPICE simulation software, multimeters, and oscilloscope are used in lab exercises to familiarize students with circuits analysis.

PREREQUISITES: PHYS 1003

FORMATS: Lecture | Lab

ENGN 3002 Thermo-Fluids I

CREDIT HOURS: 3

Thermodynamics is a study of energy and energy transfers in the form of work and heat, and the effect these transfers have on the properties of selected substances. First and second law analyses are covered, including entropy, availability, and efficiencies.

PREREQUISITES: PHYS 1000 or PHYS 1002

FORMATS: Lecture | Lab

ENGN 3004 Digital Circuits

CREDIT HOURS: 3

This course includes an introduction to Boolean algebra, encoders, decoders, shift registers, and asynchronous and synchronous counters, together with timing considerations. Design of asynchronous circuits, synchronous sequential circuits, and finite state machines is covered. Karnaugh mapping techniques and state tables and diagrams are taught. Programmable logic is introduced. Contemporary computer-aided design and analysis software is used throughout the course.

FORMATS: Lecture | Lab

ENGN 3006 Engineering II

CREDIT HOURS: 3

This course teaches the concept of stress, strain and deformation of a solid body subjected to static forces. Topics considered include: stresses and strains under axial, bending, torsional and combined loadings; transformation relations for stresses and strains; Mohr's circle for stress and strain; strain gauges; mechanical properties of materials; and failure theories.

COREQUISITES: MTHA 1001
PREREQUISITES: PHYS 1000 or PHYS 1002
FORMATS: Lecture | Lab

ENGN 3008 Electrical Circuits II

CREDIT HOURS: 3

This course covers advanced circuit analysis techniques, starting with sinusoidal excitation. The concepts of phasors and complex impedance are fully developed. Mutual inductance and magnetically coupled coils are used to introduce transformer behaviour and performance. Real and reactive power flow is covered before the introduction of balanced three-phase circuits for power distribution. Symmetrical components are introduced as a means of dealing with unbalanced networks. The concepts of grounding and harmonics are also introduced.

FORMATS: Lecture | Lab

ENGN 3011 Thermo-Fluids II

CREDIT HOURS: 3

This course builds on the introduction to fluid mechanics in ENGN 3002 to present engineering concepts of fluid mechanics and energy. The course completes fluid statics from ENGN 3002; covers dimensional analysis; emphasizes the notion of control volume needed to properly solve thermal fluid problems using the conservation laws presented as integral relations; treats flow in ducts, putting emphasis on head losses (friction and minor); and presents a practical theory of turbomachinery. The different concepts studied during the course are brought together at the end in a series of design examples and design problems.

PREREQUISITES: ENGN 3002.03

FORMATS: Lecture | Lab

ENGN 3016 Engineering Economy

CREDIT HOURS: 3

This course deals with the economics of decision-making. After introducing fundamental concepts and cash-flow diagrams, interest factors are dealt with in some detail. A variety of discounted cash-flow techniques are covered, including rate-of-return calculations. Inflation, accounting, tax, and risk are also among the topics considered.

FORMATS: Lecture | Lab

ENGN 3017 Engineering Design II

CREDIT HOURS: 3

This course provides a project-based exercise in the engineering design process. Students work on defined projects which apply knowledge and skills from their first three semesters. The projects encompass design method, conceptual design, design selection, detailed analysis, CAD and simulation tools, engineering drawings, safety, and preparation of professional technical reports. Discipline-specific projects are assigned. All projects involve evaluation/testing of student designs, depending on the discipline section, either through construction and testing of a physical prototype or development and testing of an engineering simulation model.

PREREQUISITES: ENGN 1001.03

FORMATS: Lecture | Lab

English Courses

Courses

Below are courses offered in English by the Faculty of Agriculture. Please see the English Section in the Faculty of Arts and Social Sciences for courses offered on the Halifax campuses.

Degree Level Course Descriptions

EGLA 1000 Composition (H)

CREDIT HOURS: 3

This writing-intensive course has two main objectives: to introduce what is involved in essay, literature review, and other university-level writing tasks, and to facilitate improvement of students' critical thinking, reading, and writing skills. Students will be engaged in reading, research, and the processes of writing

through composing, revising, editing, and proofreading. The course employs an approach that involves writing across the disciplines.
FORMATS: Lecture

EGLA 1002 Nature in Literature (H)

CREDIT HOURS: 3

This writing-intensive course explores the ways in which nature is represented in fiction, non-fiction and poetry. Works by Margaret Atwood, Wendell Berry, John Clare, Dorothy Wordsworth, Henry David Thoreau, Nathaniel Hawthorne, and others will form the literary foundations for explorations of how humanity and the natural world intersect, have been perceived by writers and/or as part of literary movements.

FORMATS: Lecture

EGLA 1004 English Studies in Science and Technology

CREDIT HOURS: 3

Science and technology shape how we understand ourselves, our relationship to our planet, and our place in the universe. This English course balances writing skills and strategies, rhetoric, and text-based research with an exploration of literary and non-literary readings related to technology and science. Topics of discussion include the Industrial Revolution and mechanisation; technology and the human; sustainability and our ecological footprint; plants, animals, and the welfare of non-human life; our relationship with AI and machines; equity and diversity in science and technology; and Indigenous futurisms.

FORMATS: Lecture | Discussion

EGLA 1005 Academic Writing – International Students (H)

CREDIT HOURS: 3

The chief objective of this course is to help students develop the skills necessary to write papers and reports at a university level as well as enhancing their capacity to write in the English language. Designed specifically for students whose first language is one other than English, the course will focus on the process of writing from the development of a thesis or objective for a writing task, to the revision, editing, and proofreading of final documents. Course material may include selecting different types and styles of papers and reports, researching and presenting appropriate academic documentation, organizing material, preparing the initial draft, and editing and proofreading.

CALENDAR NOTES: Students whose first language is English are not eligible to take this course.

FORMATS: Lecture | Tutorial

Technology Level Course Descriptions

EGLA 0050 Preparatory English

CREDIT HOURS: 0

This non-credit course is designed for students who do not meet the Grade 12 English entrance requirement. The course will provide the foundation necessary for first year Writing Requirement courses, and prepare students for success in academic writing. This course is not intended to duplicate or replace Grade 12 English.

FORMATS: Lecture

EGLA 0101 Writing for Business

CREDIT HOURS: 2

The objective of this course is to develop the reading and writing skills necessary to write at a technical level and to develop appropriate writing strategies for business documents. The course will focus on the process of writing from the development of a thesis, researching for information, and writing the initial draft through to proofreading and editing. Typical business documents to be discussed include: proposals, letters, e-mails/memos, and reports. Some of the topics include: tailoring writing to the audience, selecting templates for documents, researching and presenting documentation, using word processing packages to create professional documents, and proofreading and editing.

FORMATS: Lecture

Environmental Sciences Courses

Courses

Below are courses offered in Environmental Sciences by the Faculty of Agriculture. Please see the Environmental Sciences Section in the Faculty of Science for courses offered on the Halifax campuses.

Course Descriptions

ENVA 2000 Environmental Studies I (A)

CREDIT HOURS: 3

This is the first of a two-semester course sequence that deals with environmental issues from both an agricultural and a socio-economic basis. The scientific principles of each issue will first be outlined and explained, and then the agricultural and socio-economic aspects of the issue will be examined. The topics to be emphasized in this course will include issues associated with population growth, the atmosphere, and the hydrosphere. Students will be expected to show their understanding of the interplay between agriculture and environmental issues by writing a major term paper.

PREREQUISITES: 8 technical or degree course credits

EXCLUSIONS: APSC 2012

FORMATS: Lecture

ENVA 2001 Environmental Studies II (A)

CREDIT HOURS: 3

This is the second of a two-semester course sequence that deals with environmental issues from both an agricultural and a socio-economic basis. All aspects of the issues will be integrated to provide an overall view of each issue. The topics to be emphasized in this course will include issues associated with biodiversity, the lithosphere, waste management, and legal aspects of the environment. Students will be expected to show their understanding of the interplay between agriculture and environmental issues by writing a major term paper.

PREREQUISITES: ENVA 2000

FORMATS: Lecture

ENVA 2003 Introduction to Urban and Peri-Urban Agriculture (A) (H)

CREDIT HOURS: 3

Long considered a sustenance necessity in the Global South, peri-urban and urban agriculture (UA) is experiencing a resurgence in popularity in developed nations, with thousands of projects being implemented in cities across North America, Europe, and Asia. This course will provide an introduction and overview to the science, society, design, and development of UA projects around the world. Topics to be considered include historical precedents (e.g. allotments and community gardens), foundations (e.g. food systems and food literacy, urban regeneration, aesthetics and design), and technical elements (e.g. soil and water management, municipal planning). This course will be taught on-line with weekly 'lab' meetings in which students are interlinked via the inter-campus AV networking system (so that no travel is required). Assignments will have enough latitude to appeal to students who are interested in any or all of the agriculture and food, sustainability and planning, international development and urban regeneration, and individual health and social well-being.

FORMATS: Online Delivery

ENVA 2004 Introduction to Integrated Pest Management Techniques (A)

CREDIT HOURS: 3

Emphasis will be placed on pest identification, monitoring pest populations and determination of appropriate thresholds for management, pest life cycles and life-cycle specific considerations for pest management. The course will also provide an overview of the broad categories of pest management available for weed, insect, and pathogen pests, and examples of pest management strategies for specific pest life cycles and cropping systems. This course will consist of 3 modules, each dedicated to a specific pest group.

EXCLUSIONS: ENVA 3004

FORMATS: Lecture | Lab

ENVA 3000 Environmental Impact Assessment

CREDIT HOURS: 3

An introduction to the study and assessment of environmental toxicity and ecotoxicology as they are used to predict the environmental impact of agricultural, industrial, and other xenobiotics and associated processes. The laboratory portion of the course will deal primarily with bioassay and assessment techniques.

PREREQUISITES: ENVA 2000.03, ENVA 2001.03

FORMATS: Lecture | Lab

ENVA 3001 Environmental Sampling and Analysis

CREDIT HOURS: 3

This course will introduce students to the proper methods of sampling and experimental design for biological and chemical analyses, as well as for environmentally oriented surveys. Emphasis will be given to the actual collection of samples and their subsequent analysis.

PREREQUISITES: STAA 3000

FORMATS: Lecture | Lab

ENVA 3003 Environmental Studies Field Course

CREDIT HOURS: 3

This 12-day course is designed to provide students with an opportunity to pursue a holistic approach to solve real environmental problems. It will be held at (an) environmentally significant site(s). Students will be expected to pre-plan and to perform on-site analyses to identify any environmental problems. An interim report of findings will be required during the course. After completion of the field work, students are expected to write a report of their findings with appropriate recommendations regarding solutions to identified problems. Students should contact the course instructor prior to October 15 in the preceding Fall semester for scheduling information about the course. Expenses associated with the course are the responsibility of the student. The course is offered subject to enrollment.

PREREQUISITES: 30 degree credits, including ENVA 2000 and ENVA 2001

ENVA 3005 Geographic Information Systems (GIS) (A)

CREDIT HOURS: 3

The objective of this course is to provide both a theoretical and a practical understanding of GIS concepts and GIS application skills as it relates to ESRI ArcGIS® software. Practical training and application skills will be acquired doing laboratory sessions, whereas GIS foundations and concepts will be provided during lectures. The application of GIS technologies will focus on data sets derived from environmental science, soil science, or agriculture generally. A component of this class will be the application of GIS technologies to a student-defined problem or issue.

PREREQUISITES: At least third-year standing

EXCLUSIONS: ENVA 4005.03, ENV5 3500.03, EARTH 3500.03, GEOG 3500.03

FORMATS: Lecture | Lab

ENVA 3021 Ecohydrology (A)

CREDIT HOURS: 3

This course deals with the emerging green infrastructure tool of ecohydrology for water resource protection. The emphasis is on best management practices (BMPs) that combine environmental engineering and landscape design to mitigate against damage caused by urban and rural development. Topics to be covered include: waterscape ecology, non-point source pollution, soil erosion, and the BMPs of buffer strips., stormwater treatment wetlands, runoff bioswales, rain gardens, and green ecoroofs in Canadian and international settings.

FORMATS: Online Delivery

ENVA 4006 Air, Climate and Climate Change (A)

CREDIT HOURS: 3

This course examines the composition of our atmosphere, how it functions to create weather and climate, and its role in agricultural production. A fundamental understanding of chemistry and physics of atmospheric processes will provide the basis for an examination of micro-, regional- and global-scale meteorological processes. The expression of these meteorological processes will be examined over time and space as a means of examining climate and climate change. The role of weather and climate in agricultural production will be discussed. The global debate surrounding anthropogenic greenhouse gas emissions and climate change will be considered from scientific, social and political perspectives. Agricultural adaptation to climate change, both regionally and globally, will be considered. The laboratory portion of the class will examine the tools for measuring the composition of the atmosphere, the physical state of the atmosphere, the transfer of heat and mass to and within the atmosphere, and the use of weather and climate data in agricultural decision-making.

PREREQUISITES: ENVA 2000

FORMATS: Lecture | Lab

ENVA 4007 Directed Studies in Environmental Science

CREDIT HOURS: 3

Directed studies involve a suitable combination of directed reading, written assignments, individual study or laboratory research projects in the area of environmental sciences. Classes are organized and scheduled by appropriate faculty via a course coordinator. Students should approach potential instructors directly with their requests.

PREREQUISITES: ENVA 2000, ENVA 2001, and 60 credit hours

ENVA 4008 Directed Studies in Pest Management (A)

CREDIT HOURS: 3

Directed studies involve a suitable combination of directed reading, written assignments, individual study or laboratory research projects in the area of pest management. Classes are organized and scheduled by appropriate faculty via a course coordinator. Students should approach potential instructors directly with their requests.

CALENDAR NOTES: Extension Education

PREREQUISITES: One of BIOA 2005, BIOA 3000, BIOA 3002 (as per topic chosen) and 60 credit hours

Extension Education Courses

Course Descriptions

EXTE 3001 Leadership Development and Social Change (H)

CREDIT HOURS: 3

Students will be looking at leadership development from a number of angles: current theories, leader identification, and leadership skills. The roll of leadership and ways to engage community in social change will be analyzed. Students will have the opportunity to enhance personal leadership skills through discussion and practice.

PREREQUISITES: At least third-year standing

FORMATS: Lecture

Food Science Courses

Degree Level Course Descriptions

FOOD 1000 Food Safety and Quality Assurance

CREDIT HOURS: 3

This course provides an introduction to food safety and quality assurance issues and developments. The course examines various strategies used by food businesses to ensure product quality and safety, technical aspects of food safety and quality assurance as well as related regulations and certification.

FORMATS: Lecture

FOOD 3002 Impact of Food on Health

CREDIT HOURS: 3

This course introduces students to topics related to the relationship between food, human nutrition and health. Topics to be covered include biochemistry of foods, dietary food intake, energy balance and body weight and personalized nutrition. Emphasis will be made on the role of food in the development of health conditions including obesity, diabetes, cardiovascular disease, food allergies and celiac disease. This course also introduces students to food and nutrient requirements across the human life cycle, and consumer food choices that impact health.

PREREQUISITES: CHMA 2002

EXCLUSIONS: FOOD 4003

FORMATS: Lecture

FOOD 4000 Directed Studies in Food and Bioproduct Science (A)

CREDIT HOURS: 3

Directed studies involve a suitable combination of directed reading, written assignments, individual study or laboratory research projects in the area of food and bioproduct science. Classes are organized and scheduled by appropriate faculty via a course coordinator. Students should approach potential instructors directly with their requests.

PREREQUISITES: CHMA 2000 and 20 degree credits; students taking FOOD 4000 are strongly encouraged to take CHMA 3011 or FOOD 3012

FOOD 4001 Food Quality and Safety (A)

CREDIT HOURS: 3

The various aspects and considerations of food safety will be discussed and contrasted with aesthetic, nutritional, convenience, economics quality attributes. An integrated understanding of the various regulatory and industry approaches to ensuring the safety and quality of food will highlight HACCP, TQM, ISO standards, SPQC as well as hygienic and sanitation practices. Emerging trends, both national and international, will be included in class discussions. An overview of approaches and consideration in product development will be included. Students will apply this knowledge by designing a QA program for a new food product.

FORMATS: Lecture

FOOD 4004 Directed Studies in Nutriscience

CREDIT HOURS: 3

This course introduces students to topics on how individual human genetic differences interact with absorption, bioactivity, metabolism and elimination of dietary components (nutrigenomics) and consequent impact on the function of the human body. There will be class discussions on how gene-nutrient interaction affects the sensory system, food selection, disease and overall health status. The course will be based on lectures, discussions, student presentations and a critical review of the literature on selected topics.

FORMATS: Lecture

FOOD 4005 Functional Foods and Nutraceuticals (A)

CREDIT HOURS: 3

Consumer awareness and interest in the interaction of biologically-active food compounds (bioactives) and health is rapidly growing. Functional foods and nutraceuticals (FFN) has emerged as a new frontier of the agri-food and nutrition industry worldwide. This course provides a basic scientific knowledge on bioactives present in FFN. Emphasis will be given to bioactive phytochemicals and their biosynthesis, classification, sources, analysis, bioavailability, and mechanism(s) of action in relation to enhanced health or reduced risk of chronic and metabolic disorders. The course also introduces global consumer trends, government regulations, concepts in FFN manufacturing and current and future directions of FFN industry.

PREREQUISITES: CHMA 2002

EXCLUSIONS: FOOD 3001

FORMATS: Other (explain in comments)

French Courses

Courses

Below are courses offered in French by the Faculty of Agriculture. Please see the French Section in the Faculty of Arts and Social Sciences for courses offered on the Halifax campuses.

Course Descriptions

Genetics Courses

Course Descriptions

GENE 2000 Genetics

CREDIT HOURS: 3

This course studies heredity and variation in plants and animals, including man, and the relationships of genetics to evolution and breeding practices.

FORMATS: Lecture | Lab

GENE 3000 An Introduction to Molecular Genetics

CREDIT HOURS: 3

The objective of this course is to provide students with a general foundation in molecular genetics and recombinant DNA technology. Replication, transcription, protein synthesis, recombinant DNA, and the regulation of gene expression in prokaryotes and eukaryotes will be studied in detail. Ethical and legal issues related to the production, testing, and ownership of genetically engineered organisms will be discussed. In the laboratory, students will be exposed to a range of molecular genetic techniques, including isolation and restriction site mapping of bacterial plasmids, bacterial transformation, isolation and restriction enzyme digestion of genomic DNA, and PCR amplification. Students completing this course will be able to read original research papers in the molecular genetic literature, and will be prepared for advanced training in molecular biology, plant breeding, or animal breeding.

PREREQUISITES: GENE 2000, preparatory: one course in biochemistry

FORMATS: Lecture | Lab

GENE 4003 Biotechnology

CREDIT HOURS: 3

Biotechnology includes the generation of new medicine, generation of biofuel, new chemicals and materials, removal of pollutants, and production of better and safer foods. The objective of this course is to provide students with general information on the theory and technologies that are currently used in biotechnology. Course topics will include gene identification, transformation and expression regulations, tissue culture and cell culture techniques, and other genomics-related agricultural applications. Nutraceutical and pharmaceutical applications will be addressed.

PREREQUISITES: GENE 2000

CROSSLISTED: AGRI 5750

FORMATS: Lecture

GENE 4005 Applied Genomics and Bioinformatics (A)

CREDIT HOURS: 3

Genetics and analysis of quantitative traits in farm animals and crop plants. Detecting, locating and measuring the effects of quantitative trait loci (QTL). Recent developments in QTL mapping and genomic selection. The course is designed to provide students with the depth of knowledge and specialized skills required to apply bioinformatics tools to practical problems in the life sciences. The laboratory sessions include hands on experience in using commonly used software for analyzing data from breeding and genomics experiments. While not required, a course in Animal or Plant Breeding is helpful preparation for this course.

CALENDAR NOTES: Winter semester

PREREQUISITES: GENE 3000 and STAA 2000

FORMATS: Lecture | Lab

GENE 4006 Advanced Studies in Molecular and -Omics Techniques (A)

CREDIT HOURS: 3

Advanced understanding and application of the most innovative techniques used in the field of molecular biology and -omics (genomics, transcriptomics and proteomics techniques) in agriculture and aquaculture systems. By having an advanced understanding of the biochemistry of DNA, RNA and protein, students will learn how these molecules can be manipulated for research purposes. Students will leave the course with the ability to modify and manipulate target molecules using a wide scope of techniques including: PCR, Rt-qPCR, Rad-Seq, CRISPR, ELISA and other technologies for the purpose of marker assisted selection, measuring gene expression, metagenomics, gene knock outs, gene silencing, protein function and structure analysis in the fields of agriculture and aquaculture. Students will also learn the international standards for publication of each technique to ensure that experiments meet international standards like MIQUE and ENCODE Guidelines. The lecture portion will ensure students have the theoretical knowledge to understand how each technique manipulates molecules so that students can modify these techniques for their own purpose. The laboratory portion will ensure students have hands on experience with the most innovative technology analyzing DNA, RNA and protein in breeding, genomics, transcriptomics and proteomic studies in the fields of agriculture and aquaculture.

PREREQUISITES: GENE 3000.03

FORMATS: Lecture | Lab

Geography Courses

Courses

Below are courses offered in Geography by the Faculty of Agriculture. Please see the Geography Section in the Faculty of Science for courses offered on the Halifax campuses.

Undergraduate Degree Level Course Descriptions

GEOA 1000 Introductory Human Geography (H)

CREDIT HOURS: 3

This course is an introduction to the field of Human Geography. The objectives of the course are to present the spatial point of view on human/land interactions. Lectures, readings, and assignments consider geographical patterns, processes, and problems in rural and urban settings. Some emphasis will be given to the Canadian and Atlantic region contexts.

FORMATS: Seminar

GEOA 3000 Rural Geography (H)

CREDIT HOURS: 3

This course focuses on rural geographic problems in Canada and the Atlantic region. Discussion will include, for example, rural land use issues, settlement dynamics, rural resource problems, urban/rural interaction, agricultural change, rural well-being, and rural planning. The geographic perspective emphasizes spatial variability and human/land interactions.

PREREQUISITES: GEOA 1000

FORMATS: Lecture | Lab

Geology Courses

Courses

Below are courses offered in Geology by the Faculty of Agriculture. Please see the Geology Section in the Faculty of Science for courses offered on the Halifax campuses.

Undergraduate Degree Level Course Descriptions

GELA 2000 Introduction to Geology

CREDIT HOURS: 3

This course introduces the student to the basic concepts of Earth Science and Physical Geology. Geology, as a subject matter area in the Earth Sciences, is closely related to soil science. This course will examine the nature of Earth materials as well as Earth processes, both internal and surface. Minerals, rocks, earthquakes, streams, and groundwater are just some of the areas investigated in this course. Many geological processes are of importance to the Environmental Sciences because an understanding of Earth processes is fundamental for the understanding of human impacts on our landscape.

FORMATS: Lecture | Lab

History Courses

Courses

Below are courses offered in History by the Faculty of Agriculture. Please see the History Section in the Faculty of Arts and Social Sciences for courses offered on the Halifax campuses.

Undergraduate Degree Level Course Descriptions

HISA 1000 Introduction to Canadian History I 1000–1867 (H)

CREDIT HOURS: 3

This course introduces students to the theory and practice of history through a general historical survey of Canadian history for the period from approximately 1000 CE [Common Era] to about the mid- 19th century. Historical theories and methodologies will be introduced in this course. A social and/or cultural approach is emphasized, with focus on Aboriginal peoples and Contact; Acadia and New France; and British North America to Confederation.

FORMATS: Lecture

HISA 1001 Introduction to Canadian History II 1867–Present (H)

CREDIT HOURS: 3

This course will examine the problems of modernity, through an exploration of Canadian history from the mid- 19th century through to the present. Political, social, and cultural developments and transformations will be emphasized. In addition to the exploration of Canadian history from Confederation to the present, students will be introduced (or, in the case of those who have previously taken HISA 1000, reintroduced) to concepts, theories, and methodologies employed in historical study.

FORMATS: Lecture

HISA 3000 Rural History (H)

CREDIT HOURS: 3

This course will introduce students to selected problems in the study of rural history. Problems to be considered in at least two time periods may include the following: the problem of change in rural society vis à vis industrialization; the intersection of national, ethnic, and other “identity” with rurality; the changing nature of work in rural societies; rural political movements; idealizations or distortions related to the concept of rural; agriculture and other “cultures” in the rural context of the past.

PREREQUISITES: HISA 1000 or HISA 1001

FORMATS: Lecture

Horticulture Courses

Undergraduate Degree Level Course Descriptions

HORT 1000 Landscape Plants I

CREDIT HOURS: 3

Herbaceous and woody plants are studied with respect to their identification, landscape value, and use. Special groups of plants to be studied include plants with fall interest, shade-loving plants, groundcovers, and vines, as well as many other plants suited to Atlantic landscapes, all of which are plants required for Landscape Industry Certification. The lab involves the study of plant families, plant morphology, use of plant keys, plant collecting, and digital herbarium specimens.

FORMATS: Lecture | Lab

HORT 1001 Landscape Plants II

CREDIT HOURS: 3

Herbaceous, woody, and aquatic plants are studied with respect to their identification, landscape value, and use. Special plant groups covered in the course include interior plants, culinary herbs, plants with special growth habits, native plants, and bog and marginal plants for aquatic gardens, in addition to many other plants for Atlantic landscapes. The recognition of deciduous woody plants by their winter wood characteristics is included.

FORMATS: Lecture

HORT 1002 Turfgrass Production and Management

CREDIT HOURS: 3

A study of cool-season turfgrasses, their characteristics, and proper usage. The establishment, maintenance, and renovation of turfgrass will be studied. Cultural topics covered will emphasize proper fertilizing, watering, and pest control.

FORMATS: Lecture | Lab

HORT 1003 Landscape Horticulture I

CREDIT HOURS: 3

An introduction to plants in landscape horticulture, focusing on managed and natural landscapes where students develop a basic understanding of plant-environment interactions. The functional relationships between plant growth and landscapes are documented, analyzed and discussed. Appropriate horticultural techniques to manage plants and vegetation in the landscape are practiced.

FORMATS: Lecture | Lab

HORT 1005 Landscape Installation

CREDIT HOURS: 3

This course provides theoretical and practical training in landscape construction and installation. Skills and standards identified by the Canadian Nursery and Landscape Association and tested through the Canadian Certified Horticultural Technician Program are considered minimum in levels of information presented in a modular format. Topics include plan reading, construction drawings, and site grading.

FORMATS: Lecture | Lab

HORT 1006 Landscape Plants III

CREDIT HOURS: 3

Herbaceous, woody, and aquatic plants are studied with respect to their identification, use, and value in landscape settings. Special plant groups in the course include woodland plants, container plants, xeric plants, submerged and floating aquatic plants, in addition to many other plants for Atlantic landscapes. The recognition of woody plants by their winter wood characteristics is included.

EXCLUSIONS: HORT 1004 XY

FORMATS: Lecture

HORT 2000 Vegetable Production (A)

CREDIT HOURS: 3

Production technology for the major vegetables grown in the Atlantic region is studied in detail, including botanical and horticultural characteristics, soil and fertility requirements, cultivar selection, pest management, and harvest and storage requirements. Commercial vegetable enterprises are visited.

FORMATS: Lecture | Lab

HORT 2001 Principles of Organic Horticulture (A) DE

CREDIT HOURS: 3

Study of the principles that form the basis for organic production of horticultural crops. Special attention is given to regulations, soil fertility, organic soil amendments, compost and mulches, crop rotation, plant health, management of diseases and pests, and companion planting. Students will apply their knowledge through an instructor-approved project that will be presented on-line using an appropriate multi-media venue.

PREREQUISITES: Preparatory: AGRI 1000 or PLSC 0100

HORT 2004 Introduction to Viticulture (A)

CREDIT HOURS: 3

Note: Students taking this course must be 19 years of age or older. This course on viticulture in the Atlantic region will initially examine the taxonomy, morphology, physiology, and biochemistry of grapevine growth and fruit maturation. Emphasis will be placed on the environmental regulation of grapevine growth, development, yield and composition, and management strategies to optimize grape production in cool-climate viticulture production areas. Included will be an examination of the importance of site selection, soil management, grapevine cultivars, rootstocks, clones, production systems, and vineyard establishment. Cultural management practices including pruning, training, canopy management, crop control, and mechanization will be discussed, and an overview of pest pressures and other environmental concerns including winter hardiness will be covered. Lastly, the harvesting and vinification of wine grapes will be examined with the inclusion of "hands-on" laboratory sessions at a commercial vineyard and winery. Successful completion of the course should prepare students for upper-division courses in viticulture and oenology.

FORMATS: Lecture | Lab

HORT 2005 Design & Construction of Turfgrass Facilities

CREDIT HOURS: 3

Students develop design and construction plans for various horticultural complexes such as golf courses, sports fields, parks, and play grounds. Students learn to evaluate the differences between management of public or private facilities and will explore synthetic alternatives to various landscape features.

FORMATS: Lecture | Lab

HORT 2008 Residential Landscape Design and Construction

CREDIT HOURS: 3

This course introduces a systematic process for developing residential landscape designs. Emphasis is placed upon maximizing the usefulness of the property and developing it in an environmentally sound and sustainable manner. Grade changes, on-site storm water management, and the engineering use of plants in design is included. Students work with a residential design client from the development of the design brief to the final presentation. Studio exercises will utilize the computer as a design tool as well as manual graphic techniques.

PREREQUISITES: HORT 2013.03

FORMATS: Lecture | Lab

HORT 2010 Controlled Environment Agriculture I (A)

CREDIT HOURS: 3

Topic include: site selection, types of greenhouses, heating systems, ventilation; relative humidity; automatic controls; soils and planting media; benches, beds and containers; propagation facilities; lighting; atmosphere modification; water; nutrition; chemical growth regulators; and the culture of cut flowers, potted floral crops, greenhouse vegetables, herbs and bedding plants. There is a particular emphasis on new plant introductions for gardening (hanging baskets and deck/patio planters); and marketing aspects such as capitalizing on plant, colour and landscaping trends and 'destination' marketing. Outdoor cut flower (both fresh and dried) production is also discussed.

FORMATS: Lecture | Lab

HORT 2011 Arboriculture

CREDIT HOURS: 3

Emphasis is placed on arboriculture theory and practice. Tree problems arising from pest and disease injury, as well as environmental and non-parasitic injury of trees, will be addressed. The course will focus on the tree in an urban environment. Laboratory exercises concentrate on specific arboriculture skills and techniques.

FORMATS: Lecture | Lab

HORT 2012 Landscape Maintenance

CREDIT HOURS: 3

Landscape techniques and standards are discussed, as they pertain to modern landscape maintenance. Experience is gained in documenting activities in existing landscapes. The course provides skills and knowledge to produce accurate schedules for maintaining landscapes including Sustainable Sites.

PREREQUISITES: HORT 0102/HORT 1002, HORT HORT 0103/HORT 1003

FORMATS: Lecture | Lab

HORT 2013 Landscape Horticulture II

CREDIT HOURS: 3

This course introduces students to landscape design principles and elements through the exploration of noteworthy designers and their work. The role of environmental psychology theory in design, plant associations, site analysis, and client interaction in the development of the design brief and subsequent design is developed through a series of prescribed design exercises. Hand rendering skills are acquired in this course.

FORMATS: Lecture | Lab

HORT 2014 Controlled Environment Agriculture II (A)

CREDIT HOURS: 3

In this course, students will learn the various concepts relating to indoor farming, vertical farming, urban farming technologies for production of various crops. Students will be exposed to design, development and management of indoor farms and vertical farms, and controlled environment manipulations for production of various crops starting from seedlings and transplants production, controlled environment manipulation, water and nutrient management, crop production, harvest, packing, packaging, quality control, controlled environment operating systems, logistics.

PREREQUISITES: HORT 2010.03

FORMATS: Lecture | Lab

HORT 2015 Fruit Production (A)

CREDIT HOURS: 3

The course will provide an introduction to the different fruit species grown in Atlantic Canada. The management technologies and cultural practices used in bringing a fruit crop to harvest will be explored including apples, pears, cherries, peaches, blueberries, cranberries, strawberries, raspberries, grapes, currants, haskap, and Saskatoon berries. Content will include site selection and management, fruit structure and composition characteristics, cultivar selection, fruit production systems, nutrient management, integrated pest management, harvest considerations, and postharvest and value-added opportunities.

FORMATS: Lecture | Lab

HORT 3000 Environmental Processes and Natural Landscape Functions

CREDIT HOURS: 3

The structure, functions, and dynamics of landscapes that are altered by human design are discussed. Key ecological processes and their disruption, landscape modification, and landscape planning and management will be examined. Students are expected to participate in field work, and to engage in self-directed study.

FORMATS: Lecture | Lab

HORT 3001 Landscape Project Management

CREDIT HOURS: 3

This is an advanced course in reading and interpreting landscape plans, materials take-off, grading, estimating, and construction. The building of multidisciplinary teams and team cooperation is an important part of the course. Principles and processes for cost estimating will be studied, using actual landscape projects and considering local building codes and regulations. Students are required to complete their assigned landscape project before the end of the semester.

PREREQUISITES: A previous course in landscape design (HORT 0209/HORT 2013 or equivalent) and landscape installation (HORT 0210/HORT 1005 or equivalent)

FORMATS: Lecture | Lab

HORT 3008 Horticultural Therapy (H)

CREDIT HOURS: 3

This course introduces students to the profession, theories, principles and practice of Horticultural Therapy, and its application in different settings. Students are introduced to the various horticultural therapy programs both indoors and outdoors, and the many cognitive, social, emotional and physical benefits for different groups of people. It outlines client assessment, documentation and treatment plans using the appropriate horticultural therapy activities.

PREREQUISITES: Second-year standing

FORMATS: Lecture | Lab

HORT 4000 Urban Tree Management

CREDIT HOURS: 3

This course focuses on the management of the urban forest. Tree inventory systems, planning the urban forest, rhizosphere management, site reclamation, the valuation of urban trees, and trees and the law will be included. Lab exercises will include tree assessment techniques, tree inventory exercises, use of tree inventory software, new techniques for hazard tree assessment, new techniques for managing pests and diseases in urban trees, and site assessment and remediation. Tree pruning exercises will emphasize preservation of tree structure, quality of cuts, and work efficiency and safety.

PREREQUISITES: HORT 2011 or a previous course in arboriculture, or permission of the instructor

FORMATS: Lecture | Lab

Technology Level Course Descriptions

International Development Courses

Courses

Below are courses offered in International Development by the Faculty of Agriculture. Please see the International Development Studies Section in the Faculty of Arts and Social Sciences for courses offered on the Halifax campuses.

Undergraduate Degree Level Course Descriptions

IAGR 2004 Agri - Food Systems in India

CREDIT HOURS: 3

Examines the agri-food and environmental issues of tropical and dryland farming in southern India (Tamil Nadu) Students must attend pre-Departure travel at the Agricultural Campus, submit a mini-research paper prior to departure, participate actively in the agri-food tours, and write a second paper after the trip. Travel costs, in addition to tuition, are associated with this study abroad course.

IAGR 3000 Tropical Agriculture (A)

CREDIT HOURS: 3

This course will introduce the student to food production, storage, and handling systems in tropical and subtropical countries. The sustainability of these systems and issues that limit the use of the environment for long-term food production will be identified. Farming systems and the role of national/international research centres are examined. The instruction will include resource people from several disciplines.

FORMATS: Lecture

IAGR 3002 International Rural Development (H)

CREDIT HOURS: 3

This course explores the history, defining characteristics, and diversity of developing societies, with a focus on the people and issues of rural communities. Students will explore the main issues facing rural communities in developing regions, as well as the many cultural, social, political and economic factors that can impact the success of development projects and initiatives at the community level. Students will be expected to develop an understanding of a variety of perspectives on international community development and also to develop an appreciation for the opportunities and challenges of sustainable development in different societies and cultures.

EXCLUSIONS: IAGR 2002.03

FORMATS: Online Delivery

IAGR 4000 Global Seminar on Rural Sustainability (A)

CREDIT HOURS: 3

An international course which brings together students from around the world to investigate and discuss local and global issues. The course will consist of a number of case studies, and the students must choose four in which to participate. Students will work in groups to research the topic using e-mail and discussion forums, and present their findings to the class using electronic classroom technology. Together the students will participate in a truly global seminar course.

FORMATS: Lecture

International Food Business Course

Undergraduate Degree Level Course Descriptions

INFB 1000 International Food Policy & Environment (A)

CREDIT HOURS: 3

Students will successfully complete a series of practical tasks/assignments while learning about the global food environment. Topics will include study of emerging country markets, policy formulation, and multilateral agreements.

INFB 1001 International Food Business Project I (INFB)

CREDIT HOURS: 3

This course is part of an underlying theme of the first year of the International Food Business Program. It allows students to integrate the work of the entire first year into a series of assignments and tasks embedded in international consumer behaviour and entrepreneurship. Students will learn about consumer behaviour applied to a new food product from Iceland and be tasked with preparing a Webpage highlighting the opportunities in both Europe and North America for the product. This is a year-long project concluding in International Food Business Project II.

CALENDAR NOTES: Module #1 & #2 INFB

INFB 1002 International Food Business Project II (INFB)

CREDIT HOURS: 3

This course is part of an underlying theme of the first year of the International Food Business Program. It allows students to integrate the work of the entire first year into a series of assignments and tasks embedded in international consumer behaviour and entrepreneurship. Students will learn about consumer behaviour applied to a new food product from Iceland and be tasked with preparing a Webpage highlighting the opportunities in both Europe and North America for the product. This is a year-long project originating in International Food Business Project I. This course is taught in the Netherlands.

CALENDAR NOTES: Module #1 & #2 INFB

INFB 2000 International Food Business Project III (INFB)

CREDIT HOURS: 3

This seminar course involves students working in groups on a variety of learning tasks (assignments) within the three, second year modules including marketing management, innovating and entrepreneurship, and market research. These experiences, along with integrating and applying knowledge acquired from first and second year IFB courses, leads to independent completion of two proofs of proficiency in marketing management/research and innovating and entrepreneurship/research. This course is taught in The Netherlands

CALENDAR NOTES: Modules #5, 6, 7 IFB

INFB 3000 International Food Business Project IV

CREDIT HOURS: 3

This course is part of an underlying theme of the third year of the International Food Business Program. It allows students to integrate the work of the third year into a series of assignments and tasks embedded in leadership, finance, and business planning. Students will demonstrate achievement of learning outcomes by establishing a not-for-profit organization.

RESTRICTIONS: Restricted to INFB Students

FORMATS: Lecture | Other (explain in comments)

Internship Courses

Technology Level Course Descriptions

INTA 0100 Internship

CREDIT HOURS: 2

The student will be required to work under contract with an approved employer in their chosen field for a period of at least 12 weeks (480 hours). Contract details will be relevant to the student's area of study and will be negotiated between the student, the employer, and the course coordinator. Assessment will be based on this contract and will be carried out jointly by the employer and the course coordinator.

PREREQUISITES: Successful completion of the first year in the Diploma in Business Management, plus Workplace Readiness courses

Landscape Architecture

Course Descriptions

LARC 2000 Landscape CAD I

CREDIT HOURS: 3

This course is a comprehensive introduction to AutoCAD to produce 2D drawings. The course is delivered in a variety of modes, including theory, demonstrations and practical work. Participants gain hands on experience of AutoCAD through a series of practical exercises.

LARC 2001 History of Landscape Architecture

CREDIT HOURS: 3

This course introduces students to the history of landscape architecture from Mesopotamia and Egypt through to modern landscape development. The focus is on the cultural, social and political processes, and design theories and techniques, in shaping the design of gardens and public spaces. Non-western cultures, including China, Japan and the Islamic world are included as an influence on the changing preferences within western landscape design. Interaction of physical and biological landscape processes have shaped our interpretation of world landscape influences, and will be discussed in that context. This course is designed to place landscape architecture in a broad cultural and social context and develop skills in critical thinking and writing.

LARC 3000 Landscape CAD II: Introduction to 3D

CREDIT HOURS: 3

The language of design and its translation into visual communication will be introduced and examined. In the course of exploring the constructed landscape, students will learn to transform experiences and observances, at site and city scales, into visual modes of representation. A series of weekly exercises will give students an opportunity to practice the techniques and cultivate relationships between observing, conceptualizing, constructing and communicating.

PREREQUISITES: LARC 2000

LARC 3001 Landscape Presentation Techniques

CREDIT HOURS: 3

This course will look at professional portfolio creation skills for both print and interactive media, in addition the use of topographic maps, air photographs and remote sensing imagery. The course also covers advanced techniques for modelling/materials/lighting and rendering using Vectorworks and Google Sketchup, as well as post-production concepts using Adobe Photoshop and Illustrator to create high quality professional Architectural presentation media. Enrolment is limited to BTech LA students.

LARC 4000 Construction and Detailing

CREDIT HOURS: 3

This course explores the three major concerns of the landscape architecture detailer—function, ease of construction, and aesthetics. It provides a framework for analyzing existing details and devising new ones related to aesthetics, water drainage and movement, structures, construction assemblies, sustainable resources, and more. Landscape architects provide design services for the entire project including deck, fence & screen design, exterior furniture and fireplace

design, and the design of functional features including irrigation, lighting and services. The calculation and preparation of grading plans is an important component of the course. Enrolment is limited to BTech LA students.

PREREQUISITES: ENGN 1001, LARC 2000, LARC 3000

LARC 4001 Landscape Architecture Studio I

CREDIT HOURS: 6

Studio projects involve analytical, critical, and creative thinking. While the scale and topic of studio projects varies from year to year, all studio projects involve a site and a program. Studios engage students in a design process involving drawing, model construction, digital media, researching, writing, oral presentations, and a critique of one's own and others' studio work. Studio courses are weighted at 6 credits. Enrolment is limited to BTech LA students.

PREREQUISITES: HORT 2013, HORT 2008, ENGN 1001, LARC 2000, LARC 3000

LARC 4002 Landscape Architecture Studio II

CREDIT HOURS: 6

Studio projects involve analytical, critical, and creative thinking. While the scale and topic of studio projects varies from course to course, all studio projects involve a site and a program. Studio II emphasizes design implementation, materials and methods of construction, principles of stormwater management, construction specifications and graphic communication using computer applications. (Studio courses are weighted at 6 credits.) Enrolment is limited to BTech LA students.

PREREQUISITES: HORT 2013, HORT 2008, ENGN 1001, LARC 2000, LARC 3000, LARC 4001

Management Courses

Courses

Below are courses offered in Management by the Faculty of Agriculture. Please see the Faculty of Management Section for courses offered on the Halifax campuses.

Undergraduate Degree Level Course Descriptions

MGTA 1002 Food Value Chain Management

CREDIT HOURS: 3

This course provides students with an introduction to food supply chain management issues and developments. Topics include value chain development, consumer orientation, changing actors and factors, and logistics and distribution.

FORMATS: Lecture

MGTA 1004 Introduction to Business

CREDIT HOURS: 3

This course provides students with an overview of small business management theory and practice presented from an entrepreneurial perspective. Topic areas discussed include identifying and evaluating new business opportunities; financing the business, marketing management, human resources, and financial management. Upon successful completion of the course, students will understand the elements of business planning required for successful small businesses today.

EXCLUSIONS: MGTA0104.03, MGTA1000.03

FORMATS: Lecture

MGTA 2000 Human Resource Management (A)

CREDIT HOURS: 3

An introduction to the human side of business organizations. The course focuses on the challenges of motivation, recruitment and selection, performance evaluation, compensation, and labour management relations.

FORMATS: Lecture

MGTA 2001 Introduction to Business Law

CREDIT HOURS: 3

An introduction to general principles of law relating to the management of a business. Major areas studied are torts and contracts. Specialized topics include forms of business organizations, sale of goods, conditional sales, real property, mortgages, insurance, and wills.

FORMATS: Lecture

MGTA 2002 Marketing (A)

CREDIT HOURS: 3

This course will familiarize students with fundamental marketing principles and provide students with hands-on decision making and analytical skills that are essential for marketing practice. Working in teams, students will conceptually develop innovative products that clearly address the needs of target markets.

Around the product, students will gather relevant information and create marketing plans that includes product, pricing, promotion, and distribution strategies.

FORMATS: Lecture

MGTA 2004 Financial Accounting

CREDIT HOURS: 3

A study of the basic principles and procedures relevant to the accounting function of a business firm. Topics discussed include recording transactions, making adjusting entries, and preparing financial statements; accounting for a merchandising concern; computerized accounting software; accounting for cash, credit sales, and accounts receivable; inventories and cost of goods sold; and plant and equipment.

FORMATS: Lecture | Lab

MGTA 2006 Advertising and Promotion

CREDIT HOURS: 3

Students examine the process of planning, implementing, and evaluating advertising and promotional strategies for small businesses. Topics include an evaluation of conventional advertising media and web-based advertising, the preparation of customer profiles and target marketing, the creation of advertising copy, and the evaluation and monitoring of the advertising program. Case studies and class projects are essential elements of the course.

FORMATS: Lecture

MGTA 2008 Managing Retail Operations and Physical Resources

CREDIT HOURS: 3

This course is designed to train students in the daily office, sales, and inventory operations important in managing a small business. The course also covers the requirements for the siting and layout of a retail facility, and the factors important in designing a retail space. The maintenance, safety, and security requirements for the retail operation are also considered.

PREREQUISITES: MGTA 2004

FORMATS: Lecture

MGTA 2009 Customer Relations Management

CREDIT HOURS: 3

The objective of this course is to provide students with a practical approach to the provision of exceptional customer service for a small business. Students are expected to identify the various factors that affect the provision of quality service and to identify ways to ensure client satisfaction. The course also provides training in point-of-sale techniques and complaint management.

FORMATS: Lecture

MGTA 2011 International Marketing Research (INFB)

CREDIT HOURS: 3

This course is part of Module 7A of the International Food Business program - Performing Market Research. It provides students with an introduction to marketing research in an international setting. Topics include the research process, primary and secondary data collection, and analyzing data. This course is taught in The Netherlands.

CALENDAR NOTES: Module #7A INFB

MGTA 2012 Leadership and Human Resources

CREDIT HOURS: 3

This course examines current leadership and practice and has students reflect on their own leadership style. Concepts cover the evolution of leadership theory, personality traits that characterize effective leaders, communication and conflict management, and managing change.

PREREQUISITES: MGTA 1004

FORMATS: Lecture

MGTA 2013 Business Planning (INFB)

CREDIT HOURS: 3

This course is part of Module 10A of the International Food Business program - Developing Business Plans. It provides students with an introduction to business planning from an international perspective. Topics include starting a new business, alternative start-up methods, managing growth, and business succession.

CALENDAR NOTES: Module 10 INFB

MGTA 2016 Food Law and Consumer Affairs (IFB)

CREDIT HOURS: 3

The importance and complexity of food law continues to grow as a global trade in food increases. At the same time consumers are demanding more safety and health from the food system. This course introduces students to European food law and consumer rights in a global context. This course is taught in The Netherlands.

CALENDAR NOTES: Modules #5 IFB

MGTA 2017 Political Economy of the EU (IFB)

CREDIT HOURS: 3

The core business of the European Union is the creation of an integrated European market. The EU includes a wide variety of nations with a heavy reliance on non-market institutions to govern and coordinate economic activity. This course introduces students to the food business system in the EU and the expanding role of Corporate Social Responsibility. As a part of this course, students will attend a study tour to Brussels the capital of the European Union. This course is taught in The Netherlands.

CALENDAR NOTES: Modules #5 IFB

MGTA 2018 International Entrepreneurship

CREDIT HOURS: 3

Starting, developing, and managing a global venture requires knowledge and skills beyond those required for domestic entrepreneurship. This course exposes students to key differences between international and domestic entrepreneuring. Students will also enhance their personal and professional skills. This course is taught in The Netherlands.

CALENDAR NOTES: Modules #5 IFB

MGTA 2019 Organizational Behavior

CREDIT HOURS: 3

This course focuses on both the micro and macro aspects of organizational behavior. On the micro side, students are exposed to the importance of the individual to the organization including topics such as: learning, human needs and motivation, perception personality, attitudes, job satisfaction, ethics, emotions, diversity, and attribution. On the macro side, students develop an understanding of the role of the organization in the experience of the individual for example: how formal and informal groups interact with and within organizations; identifying the fundamental concepts of organizational structure and design, formalization and centralization and how they impact upon organizational effectiveness; and, explaining the meaning and importance of leadership and how it differs from management.

FORMATS: Lecture

MGTA 3000 Management Accounting

CREDIT HOURS: 3

This course introduces students to the use of accounting information in making effective management decisions. Topics include cost control and analysis, cost/volume/profit analysis, break-even analysis, differential analysis, and capital investment analysis.

PREREQUISITES: MGTA 2004.03

FORMATS: Lecture | Lab

MGTA 3001 International Marketing

CREDIT HOURS: 3

This course provides an introduction to international marketing and the international trading system. Students will be exposed to the unique aspects of international market research, selection, entry, pricing, and communications that differentiate them from their domestic equivalents. In addition, the international trading system will be examined with an emphasis on institutions such as the WTO and the IMF and on international commodity agreements, which directly impact the movement of goods and services. Cases are used extensively in the course and class participation is vital.

PREREQUISITES: MGTA 2002

FORMATS: Lecture

MGTA 3002 Consumer Behaviour (A)

CREDIT HOURS: 3

The course introduces the student to the basics of consumer behaviour and then applies this knowledge to the food marketing system. Topics covered include external influences on consumer behaviour, motivation, perception, learning, and decision-making. Historical and recent trends in product marketing, pricing, and advertising also form part of the course. Cases are used extensively and class participation is vital.

PREREQUISITES: MGTA 2002

FORMATS: Lecture

MGTA 3003 European Placement I (INFB)

CREDIT HOURS: 3

Students will broaden their experience of European business management by participating in a planned learning experience in an approved business or entrepreneurial venture. Based on their area of interest students will find placements in suitable businesses or other organizations and submit a work plan to the course coordinator and the host organization. Students will be required to keep a journal of the placement experience and to submit a report upon completion of the placement. The host organizations will evaluate students on their development of critical skills and abilities. Placements may be volunteer or paid positions, and cover three months at the end of the second year in The Netherlands.

MGTA 3004 European Placement II (INFB)

CREDIT HOURS: 3

Students will broaden their experience of European business management by participating in a planned learning experience in an approved business or entrepreneurial venture. Based on their area of interest students will find placements in suitable businesses or other organizations and submit a work plan to the course coordinator and the host organization. Students will be required to keep a journal of the placement experience and to submit a report upon completion of the placement. The host organizations will evaluate students on their development of critical skills and abilities. Placements may be volunteer or paid positions, and cover three months at the end of the second year in The Netherlands.

MGTA 3005 New Product Development (INFB)

CREDIT HOURS: 3

This course is part of Module 5B of the International Food Business program which is taught in The Netherlands. It provides students with an introduction to new product development from an international perspective. Topics include new product development process, packaging, and managing the development team.

CALENDAR NOTES: Module #5B INFB

MGTA 3006 International Food Logistics (INFB)

CREDIT HOURS: 3

This course is part of Module 6B of the International Food Business program - marketing management which is taught in The Netherlands. It provides students with an introduction to retail management from an international perspective. Topics include: overview of strategic management, location and layout, merchandise management, and retail strategy.

CALENDAR NOTES: Module #6B INFB

MGTA 3009 Financial Management (A)

CREDIT HOURS: 3

Principles and methods of organizing and analyzing financial businesses are examined. Practical problems associated with financial analysis, planning, capital budgeting, resource use, and credit acquisition are included. The role of the financial manager is identified throughout.

PREREQUISITES: MGTA 2004.03

CROSSLISTED: MGTA 0204.03

FORMATS: Lecture

MGTA 3010 Agribusiness Value Chain Management (A)

CREDIT HOURS: 3

This course provides students with an understanding of the agri-food value chain which is a system of linked agricultural production, processing and marketing activities undertaken by business committed to efficiently delivering food products that respond to consumer needs while equitably distributing the benefits of doing so in relation to where consumer value is created in the chain. This course will provide students with an understanding of the theory and practice of value chain formation, management and performance in context of globally competitive agribusiness firms.

PREREQUISITES: MGTA 1004.03 and MGTA 2002.03

FORMATS: Lecture

MGTA 3011 Marketing Research

CREDIT HOURS: 3

This course aims to provide students with a foundation in methods and issues related to conducting marketing research, including problem definition, qualitative and quantitative data collection and analysis, and methods of presentation and evaluation. This course will emphasize the need for marketing research to be effective and efficient, and that the outcomes of the research can deliver meaningful business results. Students will learn the principles of when to use research, what data to collect, which analytical tools to employ, and most importantly, how to integrate the research approaches to achieve real market insights and support business decisions. Knowledge of these topics will enable students to both implement and evaluate marketing research during their professional careers.

PREREQUISITES: MGTA 1004.03, MGTA 2002.03

FORMATS: Lecture

MGTA 4000 Strategic Management

CREDIT HOURS: 3

This is a capstone course that will integrate all the business disciplines (marketing, finance, accounting, etc.) and prepare the student to formulate and implement strategy in an agribusiness setting. Students will be expected to gain a full understanding of the complexity and interrelationships of modern managerial decision-making and apply this knowledge to real managerial problems. Lectures, case studies, projects, and guest speakers will be utilized.

PREREQUISITES: MGTA 2002.03, MGTA 2019.03, MGTA 3009.03 and STAA 2000.03 or STAA 2001.03

FORMATS: Lecture

MGTA 4001 Advanced Entrepreneurship (A)

CREDIT HOURS: 3

This course will apply the concepts of entrepreneurship to creating and managing a small business. Students will investigate opportunities for new agribusinesses and develop business plans that consider management structure, financing, production, marketing, and taxation. Lectures, case studies, guest speakers, and project assignments will be utilized.

PREREQUISITES: MGTA 2002, MGTA 3009, and at least third-year degree standing

FORMATS: Lecture

MGTA 4002 North American Placement I (INFB)

CREDIT HOURS: 3

Students will broaden their experience of North American business management by participating in a planned learning experience in an approved business or entrepreneurial venture. Based on their area of interest students will find placements in suitable businesses or other organizations and submit a work plan to the course coordinator and the host organization. Students will be required to keep a journal of the placement experience and to submit a report upon completion of the placement. The host organizations will evaluate students on their development of critical skills and abilities. Placements may be volunteer or paid positions, and cover three months at the end of the third year in Canada.

MGTA 4004 International Placement I

CREDIT HOURS: 3

North Americans with documented work experience in North America, will broaden their exposure to international business management by participating in a planned learning experience in an approved international (outside of Europe or North America) food business organization. Based on their area of interest, students will find placements in suitable organizations and submit a work plan to the course coordinator and host organization. Students will be required to submit regular reports on their placement experience and to submit a final report upon completion of the placement. The host organizations will evaluate students on their development of critical skills and abilities. Placements may be volunteer or paid positions, and cover three months at the end of the third year of study at Dalhousie University in Canada. This placement is equivalent to two full-semester courses.

CALENDAR NOTES: IFB

FORMATS: Experiential Learning

MGTA 4006 Issues in Agribusiness Sustainability (A)

CREDIT HOURS: 3

This course provides students with an understanding that the agribusiness sector faces a number of challenges in meeting the food and beverage demands of a growing world population. Coping with climate change, reduced arable land and water availability, coupled with increased input costs requires a shift in current practices if the agribusiness industry is to compete in both domestic and global markets. The challenge for the agribusiness sector is to be able to profitably produce more food in environmentally and socially responsible ways so that all consumers have access to the food they need at reasonable prices. This course is an opportunity to integrate discipline skills learnt in specialist courses and to analyze specific applications of sustainable management practices in the field of agribusiness.

PREREQUISITES: AGRI1000.03, MGTA1004.03, MGTA2002.03

FORMATS: Online Delivery

Technology Level Course Descriptions

MGTA 0020 Business Leadership, Ethics, and Professionalism

CREDIT HOURS: 0

Students explore the ethical and professional context in which individual enterprises operate, and develop effective strategies for professional participation and leadership in their industry. They also develop the team skills necessary for participation in seminars, conferences, and other special events. This module course requires the development and presentation of a proposal for a business plan, which will be completed in MGTA 0201.

CALENDAR NOTES: This is a Workplace Readiness course required for all options in the Diploma in Business Management

FORMATS: Lecture

MGTA 0100 Accounting

CREDIT HOURS: 2

An introduction to accounting topics useful to managers. Topics include recording transactions, forms of business organization, cash and accrual bases of accounting, financial statements, internal control, payrolls, bank reconciliation, and types of accounting systems, with an introduction to microcomputer applications.

FORMATS: Lecture

MGTA 0101 Applied Accounting and Taxation

CREDIT HOURS: 2

The basic principles and procedures relevant to the accounting function of a business. Topics discussed include recording business transactions, year-end adjustments, and preparation of financial statements. Considerable time will be spent on Canadian income tax and a computerized accounting project.

PREREQUISITES: MGTA 0100

FORMATS: Lecture | Lab

MGTA 0201 Business Project

CREDIT HOURS: 2

An opportunity to examine, in detail, enterprise management topics. Projects are organized and carried out by the students under the supervision of various staff members. Projects started in MGTA 0020 will be completed in this course.

PREREQUISITES: MGTA 0020 and MGTA 0204

FORMATS: Lab

MGTA 0204 Financial Management

CREDIT HOURS: 2

Principles and methods of organizing and analyzing financial businesses are examined. Practical problems associated with financial analysis, planning, capital budgeting, resource use, and credit acquisition are included. The role of the financial manager is identified throughout.

PREREQUISITES: MGTA 0100

FORMATS: Lecture | Lab

MGTA 0209 Agricultural Manager I

CREDIT HOURS: 2

Students will examine the structure of the agri-food industry and the context in which individual enterprises operate. The course will provide an overview of basic marketing principles and then discuss these principles in the context of the marketing of agricultural commodities. The trade and policy issues affecting the marketing and selling of agricultural products will be examined. The various government and industry organizations influencing the regulation and sale of agricultural products will be studied. Finally, students will identify key issues in decision-making and managing risk on farms and other agricultural enterprises.

CALENDAR NOTES: Fall Semester - First offered Fall 2017

PREREQUISITES: ECOA 0100 Introductory Microeconomics

FORMATS: Lecture

MGTA 0210 Agricultural Manager II

CREDIT HOURS: 2

Students will examine decision-making strategies and tools to assess performance and make management decisions. Students will assess record keeping options for farms and use records to analyze key aspects of farm performance and profitability, incorporating knowledge acquired over the course and their

program into their decision-making processes. They will also use case studies and financial data to benchmark performance and to analyze a farm's ability to meet production targets.

PREREQUISITES: MGTA 0204.03

FORMATS: Lecture

Mathematics Courses

Courses

Below are courses offered in Mathematics by the Faculty of Agriculture. Please see the Mathematics Section in the Faculty of Science for courses offered on the Halifax campuses.

Undergraduate Degree Level Course Descriptions

MTHA 0050 Functions

CREDIT HOURS: 0

This is a one-semester non-credit course designed for those who do not have the requisite skills for the first-year mathematics courses but have shown sufficient basic mathematical ability to warrant a one semester course to make up for the deficiencies. This course will emphasize the study of the basic functions used in the sciences. Topics to be covered include linear, exponential, logarithmic, and trigonometric functions. Emphasis is placed on use of a graphing calculator. MTHA 0050 is not intended to duplicate or replace Grade 12 Pre-Calculus Mathematics.

FORMATS: Online Delivery

MTHA 1000 Introductory Calculus I

CREDIT HOURS: 3

Topics will include functions and their inverses, limits, differentiation of polynomial, trigonometric, exponential and logarithmic functions, product and quotient rules, and implicit differentiation, with applications to curve sketching, maxima and minima problems, and velocity and acceleration problems. This course also includes an introduction to anti-derivatives and applications of the definite integral to a variety of problems.

PREREQUISITES: Grade 12 PreCalculus Mathematics or MTHA 0050

FORMATS: Lecture | Tutorial

MTHA 1001 Introductory Calculus II

CREDIT HOURS: 3

A continuation of the study of calculus with topics including both the definite and indefinite integral: techniques of integration, with applications to areas, volumes, arc length, surface areas, elementary differential equations and their applications. The course may also include parametric equations and polar coordinates, and sequences and series and their applications.

PREREQUISITES: MTHA 1000

FORMATS: Lecture | Tutorial

MTHA 2000 Multivariable Calculus

CREDIT HOURS: 3

This course covers functions of several variables: vectors, dot product, cross product, differentiation and integration of vector-valued functions, space curves, partial derivatives, optimization, multiple integrals and their applications, vector fields, line integrals, flux integrals, divergence and curl, Stokes Theorem, and the Divergence Theorem.

PREREQUISITES: MTHA 1001

FORMATS: Lecture | Lab

MTHA 2001 Differential Equations

CREDIT HOURS: 3

This course introduces the basic theory of differential equations, considers various techniques for their solution, and looks at various applications. Topics include First Order Linear and Non-Linear differential equations; differential equations of higher order; Laplace Transforms; Series solutions; systems of equations; and Fourier Series. Topics from Linear Algebra are included as required to solve systems of differential equations, Linear Algebraic equations, matrices and vectors, eigenvalues and eigenvectors, and solutions to both homogeneous and nonhomogeneous systems.

PREREQUISITES: MTHA 1001
FORMATS: Lecture | Tutorial

MTHA 3000 Applied Linear Algebra

CREDIT HOURS: 3

This course covers geometric vectors in three dimensions, dot product, lines and planes, complex numbers, systems of linear equations, matrix algebra, matrix inverse, determinants, Cramer's rule, introduction to vector spaces, linear independence and bases, rank, linear transformations, orthogonality and applications, Gram-Schmidt algorithm, eigenvalues and eigenvectors.

FORMATS: Lecture | Lab

MTHA 4000 Agricultural Modelling

CREDIT HOURS: 3

The aim of the course is to teach agricultural students when and how to attempt to express their ideas mathematically, and how to solve the resulting mathematical model and compare its predictions to experimental data. Topics include techniques of creating a model, techniques of solving models, testing and evaluating models, growth models, and a directed study project of an example of a model used in the agricultural sciences.

PREREQUISITES: MTHA 1001 and at least third-year standing

CROSSLISTED: AGRI 5770

FORMATS: Lecture | Tutorial

Technology Level Course Descriptions

MTHA 0100 Business Math

CREDIT HOURS: 2

This course introduces the basic mathematical skills needed to understand, analyze, and solve mathematical problems encountered in business, finance, and investment decision-making. Students are expected to be able to understand and perform arithmetic and algebraic operations.

FORMATS: Lecture | Tutorial

Microbiology Courses

Courses

Below are courses offered in Microbiology by the Faculty of Agriculture. Please see the Microbiology and Immunology Section in the Faculty of Science for courses offered on the Halifax campuses.

Undergraduate Degree Level Course Descriptions

MCRA 2000 Microbiology

CREDIT HOURS: 3

A general introduction to microbiology. Topics include history, morphology, structure, cultivation, reproduction, metabolism, genetics, classification, and control of microorganisms. The importance of microorganisms to soil productivity, foods, industry, veterinary science, public health, and sanitation is discussed. Students are required to have laboratory coats.

CALENDAR NOTES: Winter semester

PREREQUISITES: Preparatories: BIOA 1002, BIOA 1003

FORMATS: Lecture | Lab

MCRA 4001 Food Microbiology (A) DE

CREDIT HOURS: 3

This course is designed to teach students basic and advanced aspects of the microbiology of foods. A combination of lectures and laboratory exercises will be used to provide students with a theoretical and practical knowledge of food microbiology. The focus will be on the role of microorganisms in quality, safety, preservation and shelf life of food products. The occurrence and prevalence of food-borne pathogenic microorganisms will be examined. Food associated microbiomes and emerging food pathogens will be discussed. Methods to detect food related microorganisms will be compared and quality assurance and

sanitation strategies to control the microbiological quality and safety of foods will be discussed. Laboratory portion of the course will incorporate molecular biology techniques for detection of food-related microorganisms and fermentation processes including wine and soft cheese preparation. Discussion of specific examples of microbial processes in food will be incorporated.

PREREQUISITES: MCRA 2000.03 or equivalent

EXCLUSIONS: AGRI 5660.03, FOSC 3080.03, MCRA 3000.03

FORMATS: Online Delivery

MCRA 4002 Microbiomes in Agriculture

CREDIT HOURS: 3

This course is to provide students with an understanding of diversity and function of microbial communities in soil, water and food. Students will be introduced to various concepts of plant - and animal - microbiomes and the role of microbial populations in host health and fitness. Application of microbiomes in food industry will be discussed. The theory of metagenomics approaches to culture independent microbial community profiling will be discussed.

PREREQUISITES: CHMA 2000 or equivalent

FORMATS: Lecture

Nutrition Courses

Undergraduate Degree Level Course Descriptions

NUTR 3000 Introduction to Nutrition (A)

CREDIT HOURS: 3

A study of the principles of nutrition, including the digestion, absorption, and metabolism of nutrients. Content is applicable to humans and animals with a focus on domestic and companion animal species. Functions of protein, lipids, carbohydrates, vitamins, and minerals are studied.

CALENDAR NOTES: Fall semester

PREREQUISITES: CHMA 2002 or VTEC 0125

FORMATS: Lecture | Lab

NUTR 3001 Applied Animal Nutrition (A)

CREDIT HOURS: 3

Classification and characteristics of feedstuff and regulations governing their use are described. Methodology for evaluating the relative merits of typical feedstuffs is discussed. The principles of nutrition are applied in the formulation of rations for monogastric, avian, and ruminant species.

PREREQUISITES: NUTR 3000

FORMATS: Lecture | Lab

NUTR 3002 Fish Nutrition (A)

CREDIT HOURS: 3

Nutrients required by finfish, shellfish, crustaceans, and molluscs are discussed in context with current and future sources of these nutrients. Digestive physiology and specific feeding problems of aquatic species are addressed. Diet formulations and feeding strategies for maintenance, growth, and reproductive performance of fish are covered.

FORMATS: Lecture | Lab

NUTR 4000 Ruminant Digestive Physiology and Metabolism

CREDIT HOURS: 3

This course is designed to provide an intensive study of food intake and digestion, and nutrient absorption and metabolism, in the ruminant animal. The course details current knowledge and focuses on aspects of future research interest. Students are expected to contribute to discussions and present reviews to the class on various aspects of the subject.

CALENDAR NOTES: Fall semester

PREREQUISITES: BIOA 2006, NUTR 3000

CROSSLISTED: AGRI 5620

FORMATS: Lecture | Lab

Philosophy Courses

Courses

Below are courses offered in Philosophy by the Faculty of Agriculture. Please see the Philosophy Section in the Faculty of Arts and Social Sciences for courses offered on the Halifax campuses.

Undergraduate Degree Level Course Descriptions

PHLA 3000 Environmental and Agricultural Ethics (H)

CREDIT HOURS: 3

This course offers a general introduction to environmental ethics with emphasis on agricultural issues. Students will be introduced to modern ethical theory and to techniques of philosophical reasoning, and will be provided with a general context for overall discussion by examining the origins of the modern world view (the rise of modern science, market economics, and liberalism). Students will be evaluated on class participation and a series of short weekly essays based upon directed readings and field experience. Essay-style midterm and final exams are required.

PREREQUISITES: Third-year standing

FORMATS: Seminar

PHLA 3001 Animal Ethics (H)

CREDIT HOURS: 3

This course will survey the main ethical approaches to the human treatment of non-human animals. It will apply these approaches to human interactions with food animals, companion animals, laboratory animals, zoo animals, and wild animals. The course will look at the capacities of various species of animals for sentience, emotion, conation, cognition, self-consciousness and cooperation as a way of giving appropriate ethical consideration to the interests of different types of animals. Students will discuss case studies, complete projects, or make presentations concerning the treatment of animals in agriculture, scientific research, and veterinary practice.

PREREQUISITES: Third-year standing

CROSSLISTED: PHIL 3106

FORMATS: Online Delivery

Physics Courses

Courses

Below are courses offered in Physics by the Faculty of Agriculture. Please see the Physics Section in the Faculty of Science for courses offered on the Halifax campuses.

Undergraduate Degree Level Course Descriptions

PHYS 0050 Introductory Physics

CREDIT HOURS: 0

An introductory non-credit course for entering students who do not have the equivalent of NS Grade 12 Physics. Course topics include one-dimensional kinematics, vector theory, Newton's Laws, equilibrium, kinetic energy and work, and other topics as determined by a review of the class. PHYS 0050 is not intended to duplicate or replace Grade 12 Physics.

FORMATS: Online Delivery

PHYS 1000 Physics for the Life Sciences I

CREDIT HOURS: 3

In this course an understanding of physics is acquired by exploring the physical principles that underlie complex biological structures. The nature of materials and the forces that act on them is introduced through a series of topic examples taken from evolution, mammalian physiology, plant structure, and others.

PREREQUISITES: High School Physics equivalent to the Nova Scotia 12 level. Students not having a physics credit equivalent to Nova Scotia Grade 12 Physics are strongly advised to take PHYS0050 which is available in the summer and winter terms.

EXCLUSIONS: Students may take either PHYS1000 or PHYS1002, but not both, for credit.

FORMATS: Lecture | Lab | Tutorial

PHYS 1001 Physics for the Life Sciences II

CREDIT HOURS: 3

In this course the physical principles underlying perception throughout the animal kingdom are introduced. The examples chosen emphasize adaptation and strategies (e.g., echolocation and noctuid moths) and represent a wide range of forms (e.g., eyes of the common scallop pecten, electric location by the fish *Gymnarchus niloticus*).

PREREQUISITES: PHYS 1000 or PHYS 1002

FORMATS: Lecture | Lab | Tutorial

PHYS 1002 Physics I

CREDIT HOURS: 3

Fundamental physical principles that are necessary for the understanding of the agricultural sciences form the core material of this course. Classical physics topics include vector analysis, dynamics, statics, fluid mechanics, acoustics, and heat. Concepts derived from modern physics are added in order to complete the classical theories. Weekly student laboratory sessions allow for direct investigation of the theories studied in the course.

PREREQUISITES: Grade 12 Physics or PHYS 0050, Prerequisite/Corequisite: MTHA 1000

EXCLUSIONS: Students may take either PHYS 1000 or PHYS 1002, but not both, for credit.

FORMATS: Lecture | Lab | Tutorial

PHYS 1003 Physics II

CREDIT HOURS: 3

A continuation of PHYS 1002. The course mainly deals with electromagnetic theory, including such topics as electric charges, fields, potential, magnetic theory, induction, and Maxwell's Equations. Fundamental wave theory and optics are also studied, together with an introduction to nuclear physics. The laboratory provides an opportunity to investigate the theories in a hands-on environment.

PREREQUISITES: PHYS 1002

FORMATS: Lecture | Lab

Plant Science Courses

Undergraduate Degree Level Course Descriptions

PLSC 1000 Farm Woodlot Management (A)

CREDIT HOURS: 3

This course will focus on the importance of privately owned woodlands to the landowner, the forest industry, and the agricultural sector. It will examine forest ecology, tree identification, forest measurement, aerial photo interpretation, and forest management practices including silviculture. The course will review Christmas tree and maple syrup production. The role of appropriate equipment and machinery in the woods will also be discussed. A field lab will be held weekly. Steeltoed boots and hard hats are required.

FORMATS: Lecture | Lab

PLSC 1001 Introduction to Plant Science (A)

CREDIT HOURS: 3

Using an integrated systems approach, students are introduced to the principles and practices involved in production of crop plants. The key topics include plant structure and function, growth and development, factors influencing responses to the environment and crop production technologies.

EXCLUSIONS: PLSC 0100.03

FORMATS: Lecture | Lab

PLSC 2000 Specialty Crops (A)

CREDIT HOURS: 3

This course will examine opportunities for specialty crop production, using an entrepreneurial approach. A core group of specialty crops will be examined. Production requirements, production and marketing potential, end use, and value adding will be studied. Students will have optional crop choices to reflect individual interest. A major project is required.

FORMATS: Lecture | Lab

PLSC 2001 Plant Propagation Techniques (A)

CREDIT HOURS: 3

This course will introduce students to the general principles and practices of plant propagation utilized in modern horticultural and agronomic plant industries. Propagation techniques and practical skills are emphasized and will be practiced and applied to a wide variety of crops. Control factors in propagation environment, facilities and stock plant maintenance will be studied. Seed germination, production, testing as well as vegetative propagation by cuttings, grafting and micro propagation methods are major components.

EXCLUSIONS: PLSC 3000.03, PLSC 0200.02

FORMATS: Lecture | Lab

PLSC 4000 Plant Breeding (A)

CREDIT HOURS: 3

An introduction to the principles and practices of plant breeding, including the genetics of agriculturally important traits, germplasm conservation, breeding bio-technology, and the structure of the Canadian seed industry.

PREREQUISITES: GENE 2000, STAA 2000, one crop production subject

FORMATS: Lecture | Lab

PLSC 4002 Plant Ecophysiology (A)

CREDIT HOURS: 3

This course is designed to stimulate interest, critical thinking, and investigative processes for the understanding of growth, development, distribution, acclimation, and adaptation of crop plants that are influenced by their physiological ecology; the interaction with the climatological, physical, chemical, and biological environments; and the ecophysiological responses that are modulated by input and crop management factors. This course will also enhance knowledge of crop stress diagnostics, physiological mechanisms of acclimation, and adaptation to various challenging abiotic and biotic stress factors. Agricultural practices and agroecosystem management will be related to the economic and environmental responsibilities. This course will use several "Participatory Learning" techniques.

PREREQUISITES: BIOA 2002, one crop production course

FORMATS: Lecture | Lab

PLSC 4003 Problem Solving in Plant Science (A)

CREDIT HOURS: 3

The objective of this course is to review and integrate material from prerequisite courses in crop production, environment, business, soils, climate, and basic sciences into a comprehensive understanding of crop management systems. Students will work with each other and the instructor to develop group and individual study plans and learning contracts to address individual needs to fill gaps in knowledge and skills in Plant Science. Activities and assignments will be tailored to the needs of the group and the individuals.

PREREQUISITES: Fourth-year standing in Plant Science major or minor

FORMATS: Lecture

Technology Level Course Descriptions

PLSC 0201 Technology Project

CREDIT HOURS: 2

This project provides an opportunity for the student to study in detail a Plant Science topic of special interest. The topic may build on other aspects of the study program. The student pursues studies under a project supervisor. The project plan developed with the advisor must include the purpose of the study, the procedures and materials used, a time schedule for the work involved, the method in which the information will be collected, the way in which comparisons and conclusions will be developed, and the format for the final report. Both a written and an oral report will be required.

CALENDAR NOTES: Students register in the fall semester and complete the project in the winter semester

FORMATS: Lecture

Political Science Courses

Courses

Below are courses offered in Political Science by the Faculty of Agriculture. Please see the Political Science Section in the Faculty of Arts and Social Sciences for courses offered on the Halifax campuses.

Undergraduate Degree Level Course Descriptions

POLS 2000 Global Politics of Agriculture and Conservation (A) (H)

CREDIT HOURS: 3

Students will study the legislative and executive aspects of the Canadian state in relation to the major global institutions and multi-national organizations connected to food, agriculture and natural resources. This course will further provide students with the basic knowledge of how the agri-food system operated internationally and historically. Specific themes to be covered include governance issues, the rise of global food corporations, the WTO trade regime, agricultural subsidies, political economy of tenure and property rights (e.g., for land, forest, genetic resources), debates surrounding, for example, food security and food sovereignty, technology and GMOs. Animal conservation issues will also be covered including natural resource conservation, issues in world wildlife preservation and community and international responses to these issues.

FORMATS: Lecture

Psychology Courses

Courses

Below are courses offered in Psychology by the Faculty of Agriculture. Please see the Psychology Section in the Faculty of Science for courses offered on the Halifax campuses.

Undergraduate Degree Level Course Descriptions

PSYC 1000 Introductory Psychology I (H)

CREDIT HOURS: 3

This course will introduce students to the mental processes that underlie human behaviour. Topics covered include brain function, the nervous system, sensation, perception, states of consciousness, learning, memory and cognition. The course will be taught primarily through lecture and in-class demonstrations and activities.

FORMATS: Lecture

PSYC 1001 Introductory Psychology II (H)

CREDIT HOURS: 3

This course will introduce students to important elements that describe, explain, predict, and influence human behaviour. Topics covered include human development, emotion, social influences, personality, health, psychological disorders, and therapy. The course will be taught primarily through lecture and in-class demonstrations and activities.

CALENDAR NOTES: Winter semester

FORMATS: Lecture

Research Methods/Project Seminars Courses

Undergraduate Degree Level Course Descriptions

RESM 3000 Research Methods in Agriculture (A)

CREDIT HOURS: 3

This course is designed to enhance and stimulate student interest and understanding of the process of scientific investigation, project development and communication of research findings in the context of agricultural research. Emphasis will be given on the development of a conceptual framework for scientific inquiry and research with the development of practical research skills.

PREREQUISITES: Students in third year standing in a BSc (Agr) Major or consent of the coordinator

FORMATS: Lecture | Lab

RESM 4000 Integrated Environmental Management Project Seminar I (A)

CREDIT HOURS: 3

Students will study an operation (information gathering) and review management of technological, human, financial, and environmental resources. A group report and individual oral and poster presentations are required.

PREREQUISITES: Integrated Environmental Management student in third year, or consent of the coordinator

FORMATS: Seminar

RESM 4001 Integrated Environmental Management Project Seminar II (A)

CREDIT HOURS: 3

This is a continuation of RESM 4000, with a study and examination of identified problems within the operation. Working with industry representatives, the course will identify alternatives to solve current problems. Written and oral reports are presented to class and industry.

PREREQUISITES: RESM 4000; Integrated Environmental Management student in final year or consent of the coordinator

FORMATS: Lab

RESM 4004 Research Methods for Economics and Business (A)

CREDIT HOURS: 3

The lectures cover general methodological issues within business and social sciences research, as well as considering specific research techniques. Students undertaking fourth-year projects within the Department of Business and Social Sciences begin their projects, under faculty supervision, through this course's project development process. Other students may instead write one or more papers on research methodology.

PREREQUISITES: Third-year standing

FORMATS: Lecture

RESM 4005 Project-Seminar for Economics and Business (A)

CREDIT HOURS: 3

Under the supervision of faculty, students complete the research projects begun in RESM 4004. Each student is required to submit the first draft for evaluation by faculty. The student presents a final report and participates in peer evaluation of the presentations of the other students.

PREREQUISITES: RESM 4004

FORMATS: Lecture

RESM 4012 Animal Research Methods (A)

CREDIT HOURS: 3

This course is designed for students who are, or expect to be, working in Animal or the Bioveterinary Sciences, or who have an interest in the methodology and ethics of animal research. The course will include consideration of some of the common or promising laboratory, experimental and field methods associated with animal research, ethics of animal research, and the statistical analysis, interpretation, and reporting of results. Students will be expected to participate in exercises, to contribute to discussions, and to present reviews on various aspects.

PREREQUISITES: STAA 2000.03 and any two of ANSC 3000.03, BIOA 3005.03, BVSC 3001.03, NUTR 3000.03, NUTR 3002.03 or permission of the instructor.

EXCLUSIONS: AGRI 5350.03

FORMATS: Lecture | Tutorial

RESM 4014 Honours Thesis I (A)

CREDIT HOURS: 3

The two course honours thesis sequence is designed for students who wish to learn the process of conducting original research from the development of a research question or hypothesis to the final reporting of the results in an academic paper and presentation. Students will begin the process of conducting a research project under the supervision of a faculty member at the Faculty of Agriculture. This course along with RESM 4015 (Honours Thesis II) is part of a two course honours project sequence, and both are required for students wishing to receive an honours designation for their degree. In the first course,

students determine a research topic, conduct a literature review and begin the process of data collection. In the second course, students analyze their data and present their results in a public research conference.

CALENDAR NOTES: Students are only allowed to register for this course if they have received permission from the Chair of the Honours Advisory Committee in the Department where their major is situated.

PREREQUISITES: Admission into Honours program

FORMATS: Lecture | Online Delivery

RESM 4015 Honours Thesis II (A)

CREDIT HOURS: 3

The two course honours thesis sequence is designed for students who wish to learn the process of conducting original research from the development of a research question or hypothesis to the final reporting of the results in an academic paper and presentation. Students will begin the process of conducting a research project under the supervision of a faculty member at the Faculty of Agriculture. This course along with RESM 4014 (Honours Thesis I) is part of a two course honours project sequence, and both are required for students wishing to receive an honours designation for their degree. In the first course, students determine a research topic, conduct a literature review and begin the process of data collection. In the second course, students analyze their data and present their results in a public research conference.

PREREQUISITES: RESM 4014

FORMATS: Lecture | Online Delivery

Rural Studies Courses

Undergraduate Degree Level Course Descriptions

RURS 3000 Rural Community Economic Development (H)

CREDIT HOURS: 3

This course examines the evolution of key paradigms, theories and principles in the field of rural community development studies, and explores the economic and social contexts in which rural community development has emerged. It also examines the community development process and the organizations, processes and strategies associated with rural community organization and development. A key aspect of the course will be an exploration of the defining characteristics of rural communities (e.g. co-operatives), as well as their diversity in current and historical social and economic contexts.

PREREQUISITES: At least third-year standing

FORMATS: Lecture

Sociology Courses

Courses

Below are courses offered in Sociology by the Faculty of Agriculture. Please see the Sociology and Social Anthropology Section in the Faculty of Arts and Social Sciences for courses offered on the Halifax campuses.

Undergraduate Degree Level Course Descriptions

SOCI 1000 Introductory Sociology (H)

CREDIT HOURS: 3

An introduction to the field of modern sociology. Themes addressed in the course are sociological theory and method, social process, social organization, social institutions, social differentiation, and social change. Discussion will include social issues, e.g., rural/urban conflict, an aging society, and family changes. Some emphasis will be given to rural social problems.

FORMATS: Lecture

SOCI 1001 Introductory Sociology II (H)

CREDIT HOURS: 3

The study of social issues uses sociological theory and research to examine social dynamics and social consequences associated with various current concerns. The topics covered will vary from year to year, but may well include problems such as gender and race relations, child and spousal abuse, substance abuse, poverty, work and alienation, and environmental issues. There will be a focus on issues of interest to rural Canada.

FORMATS: Lecture

Soils Courses

Undergraduate Degree Level Course Descriptions

SOIL 2000 Introduction to Soil Science (A)

CREDIT HOURS: 3

Soil is a dynamic living entity upon which all terrestrial life depends. This course will examine the general principals of soil science relating to the origin, development, and classification of soils; and the biological, physical, and chemical properties of soils and their relation to proper soil management, land use, and soil conservation.

EXCLUSIONS: SOIL 0201.02

FORMATS: Lecture | Lab

SOIL 3000 Soil Fertility and Nutrient Management (A)

CREDIT HOURS: 3

The study of the soil chemical environment as it affects crop production. The course investigates the biogeochemical cycling of nitrogen, phosphorus, potassium, calcium, magnesium, sulphur, and micronutrients in crop production. It considers the use and management of supplemental nutrients in both conventional and certified organic production. Soil pH and other factors that influence soil fertility, directly or indirectly, are also discussed. Labs take the form of problem-solving tutorials on nutrient management.

PREREQUISITES: SOIL 2000; preparatory: BIOA 2002

FORMATS: Lecture | Lab

SOIL 3001 Soil Conservation in Agriculture (A)

CREDIT HOURS: 3

A study of the processes of soil degradation and its prevention or amelioration. A major part of the course concerns the erosion of agricultural soils and its control. Other topics include soil compaction and soil acidification, soil reclamation, use of soil in waste recycling, and the role of soil in water conservation. Lab periods may be used for field trips, tutorials, or seminars.

PREREQUISITES: AGRI 1000

FORMATS: Lecture | Lab

SOIL 4001 Directed Studies in Soil Science (A)

CREDIT HOURS: 3

Directed studies involve a suitable combination of directed reading, written assignments, individual study or laboratory research projects in the area of soil science. Classes are organized and scheduled by appropriate faculty via a course coordinator. Students should approach potential instructors directly with their requests.

PREREQUISITES: SOIL 2000 and 60 degree credit hours

Technology Level Course Descriptions

Spanish Courses

Courses

Below are courses offered in Spanish by the Faculty of Agriculture. Please see the Spanish Section in the Faculty of Arts and Social Sciences for courses offered on the Halifax campuses.

Undergraduate Degree Level Course Descriptions

SPNA 1000 Basic Spanish I (H)

CREDIT HOURS: 3

This course is designed to offer an initial competency in spoken and written Spanish. Comprehension, reading, writing, and conversation are encouraged throughout the course. An introduction to basic grammar is offered. Anglophone, francophone, and International students are encouraged to take this course. Students whose first language is Spanish will not be eligible.

FORMATS: Lecture

SPNA 1001 Basic Spanish II (H)

CREDIT HOURS: 3

This course is designed for anglophone, francophone and International students. It is a continuation of SPNA 1000, with emphasis on comprehension, conversation, reading, and writing.

PREREQUISITES: SPNA 1000

FORMATS: Lecture

Special Topics Courses

Undergraduate Degree Level Course Descriptions

SPEC 2000 Topics in Economics and Business Management (A)

CREDIT HOURS: 3

An opportunity for students throughout the University to study introductory topics defined by an individual student, a group of students, or faculty. The course is conducted by classes, tutorials, assigned readings, assignments and/or other appropriate activities. Topics must be supervised by a faculty member and approved by the department head.

PREREQUISITES: 10 degree or diploma courses

SPEC 2001 Topics in International Development (A)

CREDIT HOURS: 3

An opportunity for students to study introductory topics in international development, with a focus on agriculture and rural development. Topics may be defined by the individual student, a group of students, or faculty. The course is conducted by classes, tutorials, assignments, readings, and/or other appropriate activities. Students are encouraged to use international travel or study opportunities as a focus for the course, but this is not required. Topics must be supervised by a faculty member in the proposed area of interest, and approved by the Department Head of Business and Social Sciences. Students must apply to the Department Head at least six weeks before the semester start date.

PREREQUISITES: Second-year standing

SPEC 4000 Special Topics in Animal Science or Aquaculture

CREDIT HOURS: 3

This is an opportunity to study a special topic in the area of animal science or aquaculture as defined by an individual student, group of students or faculty. The course is conducted by tutorials, assigned readings, assignments, field trips and/or other appropriate activities. The special topics would normally be supervised by a faculty or staff member associated with the Animal Science program or the Aquaculture program and approved by the department head.

PREREQUISITES: Two years of full-time study at a post-secondary institution (normally 60 degree credit hours), and permission of the instructor

SPEC 4005 Special Topics in Agricultural Economics and Business I (A)

CREDIT HOURS: 3

An opportunity to study a special topic in the area of agricultural economics and business as defined by an individual student, a group of students, or faculty. The course is conducted by tutorials, assigned readings, assignments, and/or other appropriate activities. Special topics must be supervised by a faculty member and approved by the department head.

PREREQUISITES: 90 degree credit hours

SPEC 4007 Special Topics in Environmental Studies (A)

CREDIT HOURS: 3

This is an opportunity to study a special topic in the area of agricultural, environmental or environmental horticultural studies as defined by an individual student, a group of students, or faculty. The course is conducted by tutorials, assigned readings, assignments, and/or other appropriate activities. Special topics would normally be supervised by a faculty member associated with either the Environmental Sciences or Environmental Landscape Horticulture program, and must be approved by the coordinator.

PREREQUISITES: 60 degree, technology or technical credit hours, including ENVA 2000 and ENVA 2001, and permission of the coordinator

SPEC 4009 Special Topics in Rural Studies (H)

CREDIT HOURS: 3

This is an opportunity to study a special topic in the area of rural studies as defined by an individual student, a group of students, or faculty. The course will consist of tutorials, assigned readings, writing assignments, and/or other appropriate activities. Special topics must be supervised by a Faculty member and approved by the Business and Social Sciences department head.

PREREQUISITES: At least third-year standing

FORMATS: Lecture

SPEC 4010 Special Topics in Plant Science I (A)

CREDIT HOURS: 3

An opportunity to study a special topic in the area of plant science as defined by an individual student, a group of students, or faculty. The course is conducted by tutorials, assigned readings, assignments, and/or other appropriate activities. Special topics must be supervised by a faculty member and approved by the department head.

PREREQUISITES: 60 degree credit hours or enrollment in the B.Tech (Env. Hort.) program

SPEC 4011 Special Topics in Plant Science II (A)

CREDIT HOURS: 3

A second special topics course provides additional opportunity for students to individualize the program with in-depth study of an approved topic. Although the second topic selected may be in a similar area of interest to that studied in SPEC 4010, it must be sufficiently distinct to warrant additional study. Special topics must be supervised by a faculty member and approved by the department head.

PREREQUISITES: 60 degree credit hours or enrollment in the B.Tech (Env. Hort.) program

SPEC 4012 Directed Studies in Agricultural Engineering I (A)

CREDIT HOURS: 3

Independent studies are developed through literature review or laboratory or field research on topics pertinent to agricultural engineering. Topics must be supervised by a faculty member and approved by the department head.

SPEC 4014 Directed Studies in Agricultural Engineering II (A)

CREDIT HOURS: 3

Independent studies are developed through literature review or laboratory or field research on topics pertinent to agricultural engineering. Lectures may be required depending on the instructors' and students' needs. Topics must be supervised by a faculty member and approved by the department head.

PREREQUISITES: 60 degree credit hours

SPEC 4015 Special Topics in Sustainable Development - An International Perspective

CREDIT HOURS: 3

This course is designed for senior undergraduate university students or graduate students who are interested in the research and practices in sustainable development. Taught in English, this course is a 10-day study tour in Beijing, China to study issues that are particularly relevant to developing and emerging economies. Building on the context of industrialization and globalization, as well as its related environmental and social problems, this course focuses on viable business strategies and economic development policies at international, national and regional levels. Students will apply the principles of sustainable development to analyze specific problems, cases, and explore business, economic and policy solutions for emerging economies, particularly China.

PREREQUISITES: ECOA 3008, MGTA 4006 and IAGR 3002

FORMATS: Seminar | Discussion | Experiential Learning

Statistics Courses

Courses

Below are courses offered in Statistics by the Faculty of Agriculture. Please see the Statistics Section in the Faculty of Science for courses offered on the Halifax campuses.

Undergraduate Degree Level Course Descriptions

STAA 2000 Introduction to Statistics

CREDIT HOURS: 3

Graphical presentation of data; descriptive statistics; normal, binomial, t and F distributions; sampling distributions and the central limit theorem; estimation and hypothesis testing of a single mean and the difference between two means; and introduction to correlation, regression and analysis of variance for simple experimental designs.

FORMATS: Lecture | Lab | Tutorial

STAA 2001 Probability and Statistics for Engineering

CREDIT HOURS: 3

This calculus-based first course in probability and statistics is designed to interact with the major disciplines within engineering. Topics include descriptive statistics, mathematics of probability, random variables and probability distributions, estimation, hypothesis testing, linear regression and correlation, and introduction to analysis of variance. Problem-solving skills in material related to engineering will be emphasized.

FORMATS: Lecture | Lab | Tutorial

STAA 3000 Introduction to Planned Studies: Surveys and Experiments

CREDIT HOURS: 3

This course is a continuation of STAA 2000. Topics covered include sampling techniques, simple and multiple linear regression, analysis of variance for completely randomized and randomized block designs, nonparametric tests, and introduction to categorical data analysis.

PREREQUISITES: STAA 2000 or STAT 1060, or equivalent

FORMATS: Lecture | Lab | Tutorial

STAA 4000 Intermediate Statistical Methods

CREDIT HOURS: 3

Analysis of single-factor experiments, randomized blocks, latin squares, and factorial and two-level fractional factorial designs.

PREREQUISITES: STAA 3000.03

CROSSLISTED: AGRI 5630.03

FORMATS: Lecture | Lab

Veterinary Technology Courses

Technology Level Course Descriptions

VTEC 0034 Externship in Specialty Field

CREDIT HOURS: 2

This course is designed to encourage the student to pursue the practical application of special interests in Veterinary Technology that would not be addressed in the externships in general practice or at the Atlantic Veterinary College. The externship is customized to the venue and contracted in a manner similar to the general practice externship.

CALENDAR NOTES: Typical institutions that sponsor this optional externship are farm animal or equine veterinary practices, intensive care and emergency clinics, specialty veterinary clinics, zoos, humane societies, and research facilities.

VTEC 0111 Animal Medicine and Nursing I

CREDIT HOURS: 2

This is the first in a stream of medicine and nursing courses designed to enable the student to grasp cognitively the principles and practices of veterinary medical, surgical, and related topics. In conjunction with other courses in the Veterinary Technology Program and the related internship and externships, these courses equip the graduate to perform entry-level clinical tasks in the veterinary practice workplace. Topics include medical terminology, immunology; preventive health topics; vaccine-preventable diseases, vaccines and vaccination of companion animals; and zoonotic diseases potentially encountered in the clinical environment.

FORMATS: Lecture

VTEC 0112 Clinical Exercises I

CREDIT HOURS: 2

This is the first in a stream of clinical exercises courses designed to enable the student to practise medical, surgical, and related clinical skills. In conjunction with other courses in the Veterinary Technology Program and the related internship and externships, these courses equip the graduate to perform entry-level clinical tasks in the veterinary practice workplace. Animal care and maintenance duties are in addition to the scheduled hours in this course. Task areas included in this course are animal and facilities maintenance, drug administration, common clinical equipment, anaesthesiology, surgical preparation, and radiography.

FORMATS: Lecture | Lab

VTEC 0113 Veterinary Clinical Pathology I

CREDIT HOURS: 2

This is the first in a stream of theory and practical clinical pathology courses designed to enable the student to perform, and cognitively grasp the principles of, essential tasks in the in-house veterinary practice laboratory. In conjunction with other courses in the Clinical Pathology stream and the related internship and externships, these courses equip the graduate to perform entry-level laboratory diagnostic tasks in the veterinary practice workplace. Task areas and topics included in this course are microscopy, practical parasitology, urinalysis, the microhaematocrit, haemoglobin and the red blood cell, and initial blood film assessment.

FORMATS: Lecture | Lab

VTEC 0114 Fundamentals in Veterinary Technology I

CREDIT HOURS: 2

This is the first in a stream of courses designed to address discrete topics in veterinary technology. These topics may not warrant full course status; they may require attention at specific times in the syllabus; they may need to be addressed at several levels. Topics in this first fundamentals course are: orientation to the profession and to the program; first-aid training; WHMIS; workplace safety; and an introduction to zoonotic disease, animal husbandry, cleaning and disinfection, nutrition, animal behaviour, records in veterinary medicine, and veterinary medical terminology.

FORMATS: Lecture

VTEC 0115 Anatomy–Physiology–Pathophysiology I

CREDIT HOURS: 2

This is the first of two courses designed to enable the student to apply the principles of anatomy, physiology, and pathophysiology to animal nursing and medicine. Clinical applications are stressed, and progress through this course is coordinated with other courses in the semester. This course addresses the general topics of cell, tissue, organ, and system plus terms and processes in anatomy, physiology, and disease generally. It then deals with the anatomy, physiology, and typical disease processes in the major body systems. Systems in this course include musculoskeletal, cardiovascular, respiratory, and urinary/excretory.

VTEC 0121 Animal Medicine and Nursing II

CREDIT HOURS: 2

This is the second in a stream of medicine and nursing courses designed to enable the student to grasp cognitively the principles and practices of veterinary medical, surgical, and related topics. In conjunction with other courses in the Veterinary Technology program and the related internship and externships, these courses equip the graduate to perform entry-level clinical tasks in the veterinary practice workplace. Topics included in this course are: anaesthesiology, surgical preparation and assisting, radiography exposure and positioning, clinical calculations, fluid therapy, blood sampling, common infectious diseases of companion animals, feeding in disease states, and introduction to dental disease and treatment.

PREREQUISITES: VTEC 0111, VTEC 0112

FORMATS: Lecture

VTEC 0122 Clinical Exercises II

CREDIT HOURS: 2

This is the second in a stream of clinical exercises courses designed to enable the student to perform medical, surgical, and related clinical skills. In conjunction with other courses in the Veterinary Technology program and the related internship and externships, these courses equip the graduate to perform entry-level clinical tasks in the veterinary practice workplace. Animal care and maintenance duties are in addition to the scheduled hours in this course. Task areas included in this course are animal and facilities maintenance, drug administration, general nursing, anaesthesiology, surgical preparation, radiography, fluid therapy, sampling for the laboratory, and dental equipment and supplies.

PREREQUISITES: VTEC 0111, VTEC 0112

FORMATS: Lecture | Lab

VTEC 0123 Veterinary Clinical Pathology II

CREDIT HOURS: 2

This is the second in a stream of theory and practical clinical pathology courses designed to enable the student to perform, and cognitively grasp the principles of, essential tasks in the in-house veterinary practice laboratory. In conjunction with other courses in the Clinical Pathology stream and the related internship and externships, these courses equip the graduate to perform entry-level laboratory diagnostic tasks in the veterinary practice workplace. Task areas and topics included in this course are all prior topics, plus white blood cell development and assessment, total white blood cell counts, the differential count, toxic white cells, QBCÆ evaluation, various blood film stains, UnopetteÆ counting systems, RBC indices, microscopic evaluation of urine, kit immunoassay tests, canine heartworm assays, Mycoplasma hemofelis, and clinical pathology case studies.

PREREQUISITES: VTEC 0113

FORMATS: Lecture | Lab

VTEC 0124 Fundamentals in Veterinary Technology II

CREDIT HOURS: 2

This is the second in a stream of courses designed to address discrete topics in veterinary technology that do not warrant full-course status or that require attention during the semester to support other courses. Topics included in this course are: communications in the veterinary practice, veterinary medical records, credentialing and legislation in the veterinary professions, veterinary medical terminology, pharmacology, parasitology, computer applications in veterinary practice, and the economics of veterinary practice.

PREREQUISITES: VTEC 0114

FORMATS: Lecture

VTEC 0125 Anatomy–Physiology–Pathophysiology II

CREDIT HOURS: 2

This is the second of two courses designed to enable the student to apply the principles of anatomy, physiology, and pathophysiology to animal nursing and medicine. Clinical applications are stressed, and progress through this course is co-ordinated with other courses in the semester. This course addresses the anatomy, physiology, and typical disease processes in the remainder of the major body systems. Systems and topics in this course include: digestive, reproductive, nervous, and endocrine systems; organs of special sense; and skin. The principles of inheritance and genetics and embryology are dealt with using examples of common congenital diseases.

PREREQUISITES: VTEC 0115

FORMATS: Lecture | Lab

VTEC 0131 Internship in Veterinary Technology

CREDIT HOURS: 2

This is a capstone course. In this course the learning objectives of all courses in the first two semesters are consolidated and re-tested. Students rotate through clinical, laboratory, and off-campus cooperating hospital experiences, with daily classroom sessions for discussion and testing. In clinical and diagnostic laboratory sessions, students hone skills learned in the first two semesters and acquire some new ones. Completion of this course is a prerequisite for

registration in VTEC 0133 and for registration in all second-year courses (Semesters 4 and 5). The approximate division of elements of this course is: Clinical 64 hours (2 x 8 hr per week); Clinical Pathology 36 hours (3 x 3 hr per week); Cooperating Hospital 16 hours (1 x 4 hr per week); and Cognitive Classroom Sessions 16 hours (4 x 1 hr per week). Animal care and maintenance duties are in addition to scheduled hours in this course. Task areas included in this course are animal and facilities maintenance, drug administration, anaesthesiology, surgical preparation and assisting, radiography, clinical calculations, fluid therapy, blood sampling, feeding, and introduction to dental disease and treatment.

VTEC 0132 Externship at the Atlantic Veterinary College

CREDIT HOURS: 2

This course is an off-campus externship delivered by the Atlantic Veterinary College (AVC). During these 3 weeks (or minimum 100 clinical hours) students are on duty with technical staff for approximately one-half of their time at the Veterinary Teaching Hospital (VTH). Evening and night shifts are a large part of the AVC Externship. Day shifts allow some opportunity for the student to choose specific areas of interest. In addition, there are structured learning exercises. There is a significant livestock and equine component to the AVC Externship. Students attend this externship in two or more sections. Attendance is required at all scheduled duty shifts and exercises.

CALENDAR NOTES: Winter semester, 2nd Year. Note: Cost of transportation to AVC and room and board in Charlottetown are the responsibility of the student. Staff of the Veterinary Technology Program will assist the student where possible, but the responsibility for living arrangements is the student's.

FORMATS: Other (explain in comments)

VTEC 0133 Externship in General Veterinary Practice

CREDIT HOURS: 2

This course is an off-campus learning experience in a general veterinary practice. Students locate these externship practices from a list provided by the VT Program staff, but an unlisted practice contacted by a student may be approved. To be approved the practice must have a significant companion-animal (small-animal) clientele and employ at least one graduate AHT/VT. Students may apply to complete this externship in practices outside of the Atlantic Region. A contract between the student, the practice, and the University must be completed before this externship can begin. Weekly report forms and a final report are completed by practice personnel. Student assignments must be completed before a credit can be entered for this course.

CALENDAR NOTES: Spring semester

PREREQUISITES: VTEC 0131

VTEC 0134 Fundamentals in Veterinary Technology IV

CREDIT HOURS: 2

This is the third in a stream of courses designed to address discrete topics in veterinary technology that do not warrant full course status. This course includes a continuation of clinical calculations from previous courses in the stream. There is section on veterinary communications which prepares graduates to communicate effectively with both clients and coworkers in the veterinary industry. Acknowledging the special risk factors in the veterinary industry, students will be equipped with skills to promote positive mental health and prevent compassion fatigue and burn out. The final topic is small animal nutrition, which focuses on tailored nutrition for various life stages and disease processes.

PREREQUISITES: VTEC 0124 Fundamentals in Veterinary Technology II

RESTRICTIONS: Only Veterinary Technology students can take this course.

FORMATS: Lecture | Tutorial

VTEC 0211 Animal Medicine and Nursing III

CREDIT HOURS: 2

This is the third in a stream of medicine and nursing courses designed to enable the student to grasp cognitively the principles and practices of veterinary medical, surgical, and related topics. In conjunction with other courses in the Veterinary Technology Program and the related internship and externships, these courses equip the graduate to perform entry-level clinical tasks in the veterinary practice workplace. Topics included in this course are anaesthesiology, pain management, surgical preparation and assisting, radiography, clinical calculations, fluid therapy, emergency procedures, blood sampling, non-infectious diseases of companion animals, feeding in disease states, and dental disease and treatment.

PREREQUISITES: VTEC 0131

FORMATS: Lecture

VTEC 0212 Clinical Exercises III

CREDIT HOURS: 2

This is the third in a stream of clinical exercises courses designed to enable the student to perform medical, surgical, and related clinical skills. In conjunction with other courses in the Veterinary Technology program and the related internship and externships, these courses equip the graduate to perform entry-level clinical tasks in the veterinary practice workplace. Animal care and maintenance duties are in addition to the scheduled hours in this course. Task areas included in this course are animal and facilities maintenance, drug administration, general nursing, anaesthesiology, surgical preparation and assistance, radiography, fluid therapy, sampling for the laboratory, and dental procedures.

PREREQUISITES: VTEC 0131

FORMATS: Lecture | Lab

VTEC 0213 Veterinary Clinical Pathology III

CREDIT HOURS: 2

This is the third in a stream of theory and practical clinical pathology courses designed to enable the student to perform, and cognitively grasp the principles of, essential tasks in the in-house veterinary practice laboratory. In conjunction with other courses in the clinical pathology stream and the related internship and externships, these courses equip the graduate to perform entry-level laboratory diagnostic tasks in the veterinary practice workplace. Task areas and topics included in this course are all prior topics, plus theory of blood chemical tests, serum chemistry, large-animal parasites, haematology of alternate species, microbiology and antibiotic susceptibility testing, yeast and other fungi, advanced parasitology techniques, quality control in the laboratory, submissions to external laboratories, and clinical pathology case studies.

PREREQUISITES: VTEC 0131

FORMATS: Lecture | Lab

VTEC 0214 Fundamentals in Veterinary Technology III

CREDIT HOURS: 2

This is the third in a stream of courses designed to address discrete topics in veterinary technology that do not warrant full-course status or that require attention during the semester to support other courses. Case reports from externships are delivered and discussed. Topics included in this course are veterinary medical terminology, pharmacology and dispensing, parasitology, clinical calculations, computer applications in veterinary practice, bookkeeping in the veterinary practice, and presentations to small groups.

PREREQUISITES: VTEC 0131

FORMATS: Lecture

VTEC 0215 Livestock and Equine Principles

CREDIT HOURS: 2

Through a mixture of classroom and field trip exercises, this course enables the Veterinary Technology student to recognize common equine and livestock breeds; describe livestock production cycles and methods; and use appropriate terminology. Common diseases of large animals as they relate to the veterinary technician are dealt with. Urgent and emergency clinical signs in large-animal species are stressed. Common clinical procedures in large-animal practice are outlined.

PREREQUISITES: VTEC 0131

FORMATS: Lecture | Lab

VTEC 0221 Animal Medicine and Nursing IV

CREDIT HOURS: 2

This is the last and capstone course in a stream of medicine and nursing courses designed to enable the student to grasp cognitively the principles and practices of veterinary medical, surgical, and related topics. Upon completion of this course and the related course VTEC 0222, the graduate is able to perform entry-level clinical tasks in the veterinary practice workplace. Problem-oriented case studies are used as models. All task areas included in prior Animal Medicine and Nursing courses are revisited, and some are elaborated. Students are re-evaluated comprehensively.

PREREQUISITES: VTEC 0211, VTEC 0212

FORMATS: Lecture

VTEC 0222 Clinical Exercises IV

CREDIT HOURS: 2

This is the last and capstone course in a stream of clinical exercises courses designed to enable the student to perform medical, surgical, and related clinical skills. Upon completion of this course and the related VTEC0221, the graduate is able to perform entry-level clinical tasks in the veterinary practice workplace. All task areas included in prior Clinical Exercises courses are reviewed, some are elaborated, and students are re-evaluated.

PREREQUISITES: VTEC 0211, VTEC 0212

FORMATS: Lecture | Lab

VTEC 0223 Veterinary Clinical Pathology IV

CREDIT HOURS: 2

This is the last and capstone course in a stream of theory and practical clinical pathology courses designed to enable the student to perform, and cognitively grasp the principles of, essential tasks in the in-house veterinary practice laboratory. Upon completion of this course the graduate is able to perform entry-level laboratory diagnostic tasks in the veterinary practice workplace. Students are re-evaluated comprehensively. Task areas and topics included in this course are all prior topics, plus cytology of the reproductive tracts, soft tissues, and body fluids; transfusion medicine; bone marrow evaluation; semen evaluation; cerebrospinal fluid; blood dyscrasias; coagulation factor evaluations; quality control programs; trouble shooting problems in the laboratory; and clinical pathology case studies.

PREREQUISITES: VTEC 0213

FORMATS: Lecture | Lab

VTEC 0225 Laboratory Animal and Alternative Pet Medicine

CREDIT HOURS: 2

This course enables the student to apply the principles of clinical nursing to alternate and exotic pets as well as to common laboratory animal species. It also enables the graduate to enter the research facility and, with supplemental training and experience, prepares the graduate for certification with the Canadian Association for Laboratory Animal Sciences. Topics include specialized animal sources, barriers and containment, bio-hazards, special requirements of various species, handling of and common techniques used on alternate and laboratory animal species, and the ethics of animal research and of wild animal species as pets.

PREREQUISITES: VTEC 0211, VTEC 0212, VTEC 0213, VTEC 0214

FORMATS: Lecture | Lab

Faculty of Architecture and Planning

Location:

Sexton House
5263 DaCosta Row

Introduction

The Faculty of Architecture and Planning includes the School of Architecture and the School of Planning. The Faculty's degree programs are primarily for individuals who intend to become a professional architect or planner. The Faculty also offers several courses that are open to all students in the university, as well as undergraduate and graduate courses that may be taken with permission from the instructor. The professional Architecture program (BEDS/MArch) is described in the Architecture section of this calendar. The Bachelor of Community Design program is described in the Planning section of this calendar. Please see the [Graduate Studies](#) calendar for a description of all graduate Architecture and Planning programs.

Introduction

The School of Architecture, which is part of the Faculty of Architecture and Planning at Dalhousie University, was established in 1961 to serve the Atlantic region. While it continues to fulfill its original mandate, the School also contributes nationally and internationally to architecture through its dynamic faculty and committed student body. Its primary aim is to educate individuals who intend to become a professional architect. The School's professional degree program includes the two-year Bachelor of Environmental Design Studies degree and the two-year Master of Architecture degree. Most of the program is conducted within the School of Architecture by full-time faculty members. It also includes two co-op work terms in which students gain practical experience in an architectural office. The curriculum enables architectural education and practice to develop in parallel.

Design

The central activity of the professional degree program is architectural design: the creative study of buildings and cities. In the School's design studios, students examine historical and contemporary buildings in Canada and abroad, and respond through the design of new architectural projects. From the core studies of the undergraduate program to the elective studies and design thesis of the graduate program, students learn to rely on their artistic skill, their knowledge of history and technology, their social and cultural awareness, and their critical imagination. Architecture is a multi-disciplinary profession, with alliances to the fine arts, the humanities and technologies. Many undergraduate disciplines provide an effective entry into architecture. Conversely, architectural studies provide an excellent foundation for careers in a variety of design-related fields.

Facilities

The School is located in the original home of the Nova Scotia Technical College, built in 1908 and renamed the Ralph M. Medjuck Building in 2005. Corresponding to the School's emphasis on architectural design, one-third of the building is devoted to studio spaces that are open to students 24 hours a day. The Faculty's facilities include computer labs, a wood shop, photo studio, digital lab, and a large exhibition hall. The University Library's architecture collection is located nearby.

Co-op Work Terms

The School's professional degree program includes two work terms that provide students with practical experience in building design and responsible professional practice. The School's Co-op Program has been operating since 1970, and the university's SITE Co-op Office assists students in finding suitable work terms. In recent years, Architecture students have been employed in every province and territory in Canada, and approximately one-third have chosen to work abroad - most recently, in Australia, China, Germany, Japan, Mexico, Netherlands, South Africa, Sweden, United Kingdom, United States, and Zambia.

Accreditation

The School's Master of Architecture program is fully accredited by the Canadian Architectural Certification Board (CACB). The entire six-year program consists of two years of general studies at a recognized university, followed by two years of undergraduate study at the School of Architecture (BEDS) and two years of graduate study at the School of Architecture (MArch).

In Canada, the Canadian Architectural Certification Board (CACB) is the sole agency authorized by the Canadian Architectural Licensing Authorities (CALA) to accredit Canadian professional degree programs in architecture for the purposes of architectural licensure.

Professional Registration

After receiving the professional degree, a graduate may fulfill additional requirements for professional registration, including a period of post-graduate practical experience and the completion of registration examinations. In Canada, these additional requirements are determined by provincial organizations that are empowered to register an individual for professional practice. A United States citizen who graduates from the School's MArch program is qualified to become an architectural intern and complete the examination for professional registration there. Applicants from other countries are advised to contact their national architectural organization about requirements for professional registration.

Regulations

For academic regulations that apply to undergraduate students in the School of Architecture (including workload, course changes, withdrawal, transfer credits, part-time studies, duration of undergraduate studies, minimum degree requirements, assessment, incomplete course work, reassessment of a grade, and academic standing), please refer to the [Academic Regulations](#) section and the Current Students section of the School of Architecture Website.

Please note that some undergraduate regulations differ from their graduate counterparts.

Bachelor of Environmental Design Studies

BEDS is a two-year, full-time, pre-professional program for a student who has already completed at least two years of general studies in subjects other than architecture. It consists of four academic terms in residence and a four-month work term. The BEDS degree recognizes a student's successful completion of a minimum of four years of university study, including two at the School of Architecture.

The BEDS program consists primarily of required courses in Design, Humanities, Technology, Representation, and Professional Practice. These courses provide a base of academic knowledge and design skill from which a student may proceed to a graduate program. The BEDS program leads to the MArch program, as well as to the Faculty's other graduate programs in Environmental Design Studies and Planning. A BEDS graduate may also choose to continue into another related field in design, environmental studies, management, etc., at Dalhousie or elsewhere.

Graduate Degree Program

The entire professional degree program includes both the BEDS and MArch degrees. The Master of Architecture program information can be found using the link shown below.

Courses Open to Non-Majors

The School of Architecture offers courses that are open to other students in the university:

- ARCH 1001.03: Introduction to Architecture 1
- ARCH 1002.03: Introduction to Architecture 2
- ARCH 1201.03: Science of the Built Environment 1
- ARCH 1202.03: Science of the Built Environment 2
- ARCH 2501.03: Design Communication 1
- ARCH 2502.03: Design Communication 2
- ARCH 3106.03: Ancient Settlements, Buildings, and Landscapes
- ARCH 3107.03: Modern Settlements, Buildings, and Landscapes

Please consult the university's academic timetable for available courses. Individuals who are not currently registered at Dalhousie University should refer to the university's regulations in this calendar for details on Special Student status.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

School of Architecture Courses

The first digit of an ARCH course number indicates its level: introductory courses open to all university students (1 and 2); Year 3 - BEDS (3); Year 4 - BEDS (4); or Undergraduate Co-op Work Term (8). The second digit indicates the area of study: Design (0), Humanities (1), Technology (2), Professional Practice (3), or Representation (5). Courses in the BEDS program have various credit-hour extensions (01-06) that indicate the approximate course hours each week and the appropriate balance of subjects for professional accreditation. Courses may be interchanged between academic terms, depending on the availability of instructors.

Professional Degree Program

The following chart illustrates the distribution of terms throughout the four years of the professional degree program in the School of Architecture. Following the two-year general studies prerequisite, the next two years are Bachelor of Environmental Design Studies and the final two years are Master of Architecture.

Fall	Winter	Summer
Year 3 - BEDS B1 (academic term)	B2 (academic term)	Year 4 - BEDS B3 (academic term)
B4 (work term)	B5 (academic term)	Year 5 - MArch M1 (academic term)
M2 (academic term)	M3 (work term)	M4 (work term)
Year 6 - MArch M5 (academic term)	M6 (academic term)	

Bachelor of Environmental Design Studies

Year 3 - Term B1 (Fall)

- ARCH 3001.06: Design
- ARCH 3106.03: Ancient Settlements, Buildings, and Landscapes
- ARCH 3207.03: Building Technology
- ARCH 3301.01: Professional Practice
- ARCH 3501.03: Representation

Year 3 - Term B2 (Winter)

- ARCH 3002.06: Design
- ARCH 3107.03: Modern Settlements, Buildings, and Landscapes
- ARCH 3208.03: Building Technology
- ARCH 3302.01: Professional Practice
- ARCH 3502.03: Representation
- ARCH 8890.00: Co-op Orientation

Year 4 - Term B3 (Summer)

- ARCH 4003.03: Design
- ARCH 4004.03: Free Lab
- ARCH 4112.03: Architectural History and Theory - 20th Century to the Present
- ARCH 4211.03: Building Systems Integration
- ARCH 4303.01: Professional Practice
- ARCH 4501.03: Representation

Year 4 - Term B4 (Fall)

- ARCH 8892.03: Professional Practice (Co-op Work Term)

Year 4 - Term B5 (Winter)

- ARCH 4005.06: Design
- ARCH 4113.03: Architectural Theory and Interpretation
- ARCH 4212.03: Building Systems Integration
- ARCH 4304.01: Professional Practice
- ARCH 4502.03: Representation

Course Descriptions

ARCH 1001 Introduction to Architecture 1

CREDIT HOURS: 3

This course introduces recurring themes in architecture: site, function, history, materiality, and expression/social commentary. Lectures are complemented by design exercises that apply conventions of architectural drawing. The course is for students with an interest in architecture as part of a well-rounded education, and for those who are considering an architectural career.

EXCLUSIONS: ARCH 1000.06

FORMATS: Lecture

ARCH 1002 Introduction to Architecture 2

CREDIT HOURS: 3

This course introduces diverse practices in architecture and the broad range of work in which architects may be involved. It describes different scales of design, from furniture to buildings and cities. It shows how architects collaborate with other professions such as planning and landscape architecture. The course includes lectures and drawing/design exercises.

EXCLUSIONS: ARCH 1000.06

FORMATS: Lecture

ARCH 1201 Science of the Built Environment 1

CREDIT HOURS: 3

This course introduces a broad range of scientific principles to understand the interior environment in modern buildings. Topics include light, heat, sound, electricity, and fire. It uses a "common-sense" approach involving graphic images, practical understanding, and problem-solving. A background in mathematics or science is not required.

EXCLUSIONS: ARCH 1200.06

FORMATS: Lecture

ARCH 1202 Science of the Built Environment 2

CREDIT HOURS: 3

This course introduces a broad range of scientific principles that influence the relation between modern buildings and their exterior environment. Topics include heating, cooling, storms, water, and foundations. It uses a "common-sense" approach involving graphic images, practical understanding, and problem-solving. A background in mathematics or science is not required.

EXCLUSIONS: ARCH 1200.06

FORMATS: Lecture

ARCH 2501 Design Communication 1

CREDIT HOURS: 3

This course studies principles and techniques for documenting, analyzing, and presenting characteristics of the built and natural environments. Using manual and digital media, students learn freehand drawing, mapping, and photographic narrative.

RESTRICTIONS: Completion of one year of university; or permission of instructor

EXCLUSIONS: ARCH 2000, ARCH 2025, PLAN 2025

FORMATS: Lecture | Tutorial

ARCH 2502 Design Communication 2

CREDIT HOURS: 3

This course studies principles and techniques for documenting, analyzing, and presenting characteristics of the built and natural environments. Using manual and digital media, students learn technical drawing, modeling, and composition of word and image.

RESTRICTIONS: Completion of one year of university; or permission of instructor

EXCLUSIONS: ARCH 2001

FORMATS: Lecture | Tutorial

ARCH 3001 Design

CREDIT HOURS: 6

This studio course introduces principles of architectural design, focusing on elementary building types of room and pavilion. Through case studies and original design work, students develop skills in problem definition, building organization and geometry, structural and material development and visualization. Additional topics include the social and symbolic functions of architecture and design as a response to site.

RESTRICTIONS: Year 3 BEDS students

FORMATS: Lecture | Studio

ARCH 3002 Design

CREDIT HOURS: 6

This course studies principles of architecture by focusing on the design of the house. Building on topics from ARCH 3001, it considers issues of composition (structural, volumetric, and spatial), building program, interior environment, and relations to community context and ecological surroundings. The course includes historical design studies to understand how other architects have responded to these issues.

RESTRICTIONS: Year 3 BEDS students

FORMATS: Lecture | Studio

ARCH 3106 Ancient Settlements, Buildings, and Landscapes

CREDIT HOURS: 3

This course explores the origin and evolution of human settlement patterns from prehistory to the early modern era. With a comparative analysis of global cultures, it considers geographic, ecological, social, and economic factors that are common or unique. Topics include land use, habitation, defensive structures, monumental complexes, commercial districts, infrastructure, and communication networks.

RESTRICTIONS: Restricted to BEDS students; BCD students in third or fourth year; students in third year or above from other faculties; or permission of instructor

FORMATS: Lecture | Tutorial

ARCH 3107 Modern Settlements, Buildings, and Landscapes

CREDIT HOURS: 3

This course explores the development of human settlement patterns from the early modern era to the present day. With a comparative analysis of global cultures, it considers geographic, ecological, social, and economic factors that are common or unique. Topics include land use, habitation, defensive structures, monumental complexes, commercial districts, infrastructure, and communication networks.

RESTRICTIONS: Restricted to BEDS students, BCD students in third or fourth year, students in third or fourth year from other faculties, or permission of instructor

FORMATS: Lecture | Tutorial

ARCH 3207 Building Technology

CREDIT HOURS: 3

Through hands-on and observational exercises, this course develops tacit understanding of materials, their properties, and applications. Readings introduce terminology, theory, and sizing. Primary topics are: the exclusion and inclusion of water; structural behaviours providing bracing, bearing, and span; and the rudiments of natural light and heat.

RESTRICTIONS: Year 3 BEDS Students

FORMATS: Lecture | Studio

ARCH 3208 Building Technology

CREDIT HOURS: 3

This course emphasizes building envelope. It studies the design, construction, and performance of control layers in light wood frame and other forms of construction, including engineered wood. Assemblies and details are investigated through technical drawings and models, applying knowledge of topics and vocabularies.

RESTRICTIONS: Year 3 BEDS students

FORMATS: Lecture | Studio

ARCH 3301 Professional Practice

CREDIT HOURS: 1

This course introduces the role and place of the architect in society, with an emphasis on the development of the profession through history. It also studies representation methods employed by architects and their implications for design.

RESTRICTIONS: Year 3 BEDS students

FORMATS: Lecture | Seminar

ARCH 3302 Professional Practice

CREDIT HOURS: 1

In this week-long module students learn about the architect in society; the political, social, economic and ethical environments in which architects practice; and an introduction to office organization and project management.

RESTRICTIONS: Year 3 BEDS students

FORMATS: Lecture | Seminar

ARCH 3501 Representation

CREDIT HOURS: 3

This course studies fundamental concepts, techniques, and applications of architectural representation. Class work involves freehand drawing, orthographic drawing, model making, and photography. Drafting and modeling equipment are required.

RESTRICTIONS: Year 3 BEDS students

FORMATS: Lecture | Studio

ARCH 3502 Representation

CREDIT HOURS: 3

This course builds on the principles of drawing, modeling, imaging, and composition studied in ARCH 3501. Topics include axonometric, perspective, tone, colour, and composition.

RESTRICTIONS: Year 3 BEDS students

FORMATS: Lecture | Studio

ARCH 4003 Design

CREDIT HOURS: 3

This course studies principles of architecture through the design of a public building. Building on previous courses, it includes the organization of a public program and issues of context and interpretation. As an intensive studio it encourages students to focus on design intentions and to develop an awareness of design process.

RESTRICTIONS: Year 4 BEDS students

FORMATS: Lecture | Studio

ARCH 4004 Free Lab

CREDIT HOURS: 3

To complement studio-based learning, this course is an experimental hands-on workshop in design led by an instructor. Investigations of a particular architectural topic may include design-and-build, documentary work, landscape installations, community design projects and interdisciplinary work. Projects may be done locally or involve travel to a distant site.

RESTRICTIONS: Year 4 BEDS students

FORMATS: Lecture | Studio

ARCH 4005 Design

CREDIT HOURS: 6

This course studies advanced principles of architectural design through the design of a medium-sized institutional building. Elaborating on topics from the previous design courses, students organize a complex program on an urban site and develop a project that uses building technology strategically and engages relevant issues in architectural history and theory. Emphasis is also placed on fluency in architectural representation.

RESTRICTIONS: Year 4 BEDS students

FORMATS: Lecture | Studio

ARCH 4112 Architectural History and Theory: 20th Century to the Present

CREDIT HOURS: 3

This course investigates the history and theory of architecture as cultural expression from the 20th century to the present. It explores design practices, theories, and paradigm shifts in recent decades and diverse global contexts, including questions of class, gender, race, and ecology.

RESTRICTIONS: BEDS; completion of ARCH 3106 and ARCH 3107; or students in third or fourth year who have completed 6 credit-hours of a history subject

FORMATS: Lecture | Seminar

ARCH 4113 Architectural Theory and Interpretation

CREDIT HOURS: 3

This course studies primary sources in architectural theory, situated in their cultural context and compared to our local situation. It examines modern architectural terms, concepts, and roles, along with their historical equivalents. It also provides a basic theoretical framework and references for considering humanities-related topics in architectural design projects.

RESTRICTIONS: BEDS, Year 4

FORMATS: Lecture | Seminar

ARCH 4211 Building Systems Integration

CREDIT HOURS: 3

This course investigates structural design in heavy construction, long spans, and specialized forms such as shells and tents. It addresses related envelope performance issues and construction methods. It also explores how structure can organize a plan, characterize a section, and accommodate building services.

RESTRICTIONS: Year 4 BEDS students

FORMATS: Lecture | Studio

ARCH 4212 Building Systems Integration

CREDIT HOURS: 3

This course emphasizes environmental controls in buildings with a complex program. It examines how passive and active control systems can achieve climatic comfort with low lifetime environmental impacts. It also studies guides for environmental performance, including configurational approaches, quantitative assessments, and associated standards and regulations.

RESTRICTIONS: Year 4 BEDS students

FORMATS: Lecture | Studio

ARCH 4303 Professional Practice

CREDIT HOURS: 1

This course introduces contemporary office practices and project delivery including marketing, contracts, project phases and contract administration. The course also introduces issues related to the co-op work term, including job placement and the role of the student in a professional office.

RESTRICTIONS: Year 4 BEDS students

FORMATS: Lecture | Seminar

ARCH 4304 Professional Practice

CREDIT HOURS: 1

In this week-long module students learn about the architect in society; professional ethics; models of practice; legal aspects of practice; authorities having jurisdiction over building; the National Building Code; and internship.

RESTRICTIONS: Year 4 BEDS students

FORMATS: Lecture | Seminar

ARCH 4501 Representation

CREDIT HOURS: 3

This course studies the expressive use of manual and digital media to present design work to various audiences, including the architectural community and the public. Topics include mapping, diagrams, image editing, rendering, and the integration of text, image, and model in the development of design ideas.

RESTRICTIONS: Year 4 BEDS students

FORMATS: Lecture | Studio

ARCH 4502 Representation

CREDIT HOURS: 3

This course studies advanced strategies of representation. It promotes the fluent use of manual and digital media in design development, guided by architectural intentions and an understanding of architectural history, theory, and technology.

RESTRICTIONS: Year 4 BEDS students

FORMATS: Lecture | Studio

ARCH 8890 Co-op Orientation

CREDIT HOURS: 0

This course introduces aspects of career development, including self-assessment, resumé and cover letter writing, portfolio development, interviewing skills, and job search techniques. It provides an overview of the co-op program policies and procedures. This course is a prerequisite for all Architecture co-op courses and must be completed prior to a student's first work term at Dalhousie.

RESTRICTIONS: degree: BEDS

FORMATS: Online Delivery

ARCH 8892 Professional Practice (Co-op Work Term)

CREDIT HOURS: 3

A student works in the architectural profession for a total of 500 hours in no less than 12 weeks and completes an academic report on the work experience. The work term is coordinated by the SITE Co-op Office and must be approved by the School of Architecture.

RESTRICTIONS: Year 4 BEDS students

School of Planning

Location:
O'Brien Hall
5217 Morris Street

Community Design (Planning)

The Bachelor of Community Design (Honours) program provides experiential learning opportunities to become professional planners accredited by the Professional Standards Board (PSB) and recognized by the Canadian Institute of Planners. Planning is a dynamic profession, which involves activities that shape the form and structure of communities, the quality of the environment and the character of daily life. The School of Planning is the hub of planning education in Atlantic Canada.

The School offers two four-year Honours programs:

1. BCD Honours (Urban Design and Planning); and
2. BCD Honours (Environmental Planning).

Students with a strong commitment to sustainability may pursue a Double Major in Community Design and Sustainability (Honours).

The Community Design programs will generally interest students who care about the character and the future of our communities, who are committed to sustainable approaches to the environment, and who want to learn design and communication skills that will allow them to make a difference in how we build cities and communities.

The study of community design at Dalhousie is distinguished by:

- **an emphasis on physical planning.**
The School recognizes the importance of visual and spatial information and understanding, and introduces design as a method of learning, analyzing, and resolving problems. Design is comprehensive, integrative, context-sensitive, and synthetic. It seeks to enhance community and environmental resilience.
- **a focus on planning practice that is collaborative, creative, and responsive.**
Courses will attract students eager to help communities make changes in the world they inhabit. They will develop knowledge and skills to allow them to analyze community issues, test policy proposals, and propose and implement appropriate courses of action to achieve desired outcomes.
- **interdisciplinary studies.**
The planning programs are interdisciplinary. They involve the application of scientific, humanistic, and creative approaches to plan for resilient, equitable and smart communities.

Students may also pursue a three-year general undergraduate program, Bachelor of Community Design. Alternatively, they may pursue a four-year Double Major in Community Design and Sustainability.

In addition to their regular program, BCD students are eligible to take certificates; for example, the Certificate in Geographic Information Science is offered by the Faculty of Science. Furthermore, students in any four-year BCD program have the option of taking approved minors within Dalhousie's College of Arts and Science.

Students wishing to enter the program must have completed grade 12 with a 70% or greater average in five grade 12 subjects including English, Math, and one Science (Biology or Geology are recommended). Grade 12 Geography is recommended, and a background in art or design is an asset. Students who have successfully completed a full year of university or college level studies may apply to transfer to the Bachelor of Community Design and may be considered for advanced standing. (Those admitted as transfer students should consult the Undergraduate Advisor in Planning for advice on course selection.)

All students admitted to the BCD must meet the Dalhousie requirement for a full course or equivalent in courses with a significant writing requirement, usually completed in the first year of university study. Students must complete at least six credit hours in a science subject, and six credit hours in an arts, humanities, or social sciences subject to graduate.

Students must complete at least 42 credit hours (seven full course equivalents) at the 2000 level or higher for the three year (90 credit hour) degree, or at least 72 credit hours (12 full course equivalents) at the 2000 level or above for a four year degree (120 credit hours).

Bachelor of Community Design (Honours) (four year program)

The Bachelor of Community Design (Honours) normally takes four years of full-time study. The program requires 120 credit hours of course work.

The Honours programs provide opportunities for students to engage in an internship work placement, and supervised thesis projects. Students participate in studios where learning involves hands-on training and working on community-centred projects. The BCD Honours is a professional degree in planning recognized by the Canadian Institute of Planners.

Program requirements are as follows:

Year 1 (30 Credit Hours)

Planning required courses

- PLAN 1001.03: Introduction to Planning
- PLAN 1002.03: Introduction to Community Design
- PLAN 1101.03: Dynamics of Human Settlements

Other required courses

- EARTH/GEOG 1030.03: Physical Geography
- Select six credit hours from among: ARCH 1001.03, ARCH 1002.03, ENVS 1100.03, ENVS 1200.03, SUST 1000.06, PLAN 1201.03, and SUST 1400.03
- Plus 12 credit hours, normally including the six credit hours BCD English writing requirement (e.g., SUST 1000.06)

Year 2 (30 Credit Hours)

Planning required courses

- PLAN 2006.03: Space, Place and Geographic Information Systems
- PLAN 2101.03: Data, Probability and Planning
- PLAN 2201.03: Introduction to Environmental Planning
- PLAN 2009.03: Introduction to Policy Making
- Plus core elective/ free electives

Recommended core electives or free electives for second year:

- PLAN 2002.03: Community Planning Methods
- PLAN 2007.03: Population Data Analysis for Planning
- PLAN 2010.03: Sustainable Community Design
- PLAN 2102.03: Housing Policy
- ARCH 2501.03: Design Communication 1 OR ARCH 2502.03: Design Communication 2

Year 3 (30 Credit Hours)

Planning required courses

- PLAN 3030.03: Site Planning
- PLAN 3100.03: Transportation and Land Use Planning
- PLAN 4101.03: History and Theory of Urban Design

Plus choose at least 1 of the following:

- ARCH 3106.03: Ancient Settlements, Building & Landscapes
- ARCH 3107.03: Modern Settlements, Building & Landscapes

Plus choose 2 courses from among the following:

- PLAN 3110.03: Planning for Healthy Communities
- PLAN 3115.03: Social Justice
- PLAN 3045.03: Community Design Practice

Students may declare their intention to pursue a BCD Honours Degree once they have completed all first year requirements, including the writing requirement. They will submit a full application once the mandatory second year (2000-level) planning courses are completed. Admission to the Honours degree requires the following:

1. 3.0 or higher cumulative GPA; and
2. 3.0 or higher GPA calculated for mandatory planning and core elective courses completed at the time of application to the Honours program. (Where students have completed more than nine credit hours of core electives, the highest grades for the nine credit hours will be used in the calculation.); and
3. A portfolio submitted to the School of Planning by a date in the Winter semester each year, announced in the immediately preceding Fall semester of each academic year in the School of Planning. Requirements of the portfolio are available from the School of Planning.

Admission to the Honours program is competitive. Up to 20 applicants will normally be admitted to the Honours degree based on admission review.

Once in the Honours program, students must maintain both a cumulative GPA of 3.0 or higher and a GPA of 3.0 or higher for mandatory Planning courses and core electives. If a student falls below either of these minimum standards, the student cannot continue in the Honours program. A student may apply for re-entry to the Honours program once the minimum standard is restored. Students have a choice of major within the Honours program. During the Honours year, students require 30 credit hours, as follows.

Year 4 of Honours Major in Urban Design and Planning (30 Credit Hours)

- PLAN 4002.06: Urban Design Studio
- PLAN 4050.03: Thesis Proposal
- PLAN 4035.03: Application of Planning Law
- PLAN 4100.03: Community Design Internship
- PLAN 4500.06: Thesis Project
- Fourth year planning required courses - choose two from among:

PLAN 4106.03: Transportation Planning

PLAN 4105.03: Land Development Economics

PLAN 3015.03: Site Infrastructure

- Plus three credit hours from core elective list B (Urban Design and Planning) or list C (electives for either major) at 2000 level or above

Year 4 of Honours Major in Environmental Planning (30 Credit Hours)

- PLAN 4001.06: Environmental Planning Studio
- PLAN 4050.03: Thesis Proposal
- PLAN 4035.03: Application of Planning Law
- PLAN 4100.03: Community Design Internship
- PLAN 4500.06: Thesis Project
- Choose two courses from among the following:

PLAN 4106.03: Transportation Planning

PLAN 4105.03: Land Development Economics

- Plus three credit hours from core electives list A (Environmental Planning) or list C (electives for either major) at 2000 level or above

Requirements for Graduation with Honours

In order to graduate with the Honours (Major) distinction in the BCD the student will have completed the course requirements identified above and will have a cumulative GPA of 3.0 or higher and a calculated GPA of 3.0 or higher for required Community Design courses and core electives.

Other Requirements

In addition to the core program courses listed above, students must complete:

- in the first three years, six credit hours of science courses, and six credit hours of courses from the arts, humanities or social science disciplines; and
- in the first year, six credit hours from the following courses approved for the Bachelor Community Design English writing requirement. Other writing requirement courses may be considered by the School of Planning on an individual basis:

CLAS 1010X/Y.06, CLAS 1100.03, CLAS 1103.03, CLAS 1104.03, ENGL 1000X/Y.06, ENGL 1005.03, ENGL 1010.03, ENGL 1015.03, ENGL 1020.03, ENGL 1025.03, ENGL 1040.03, ENGL 1060.03, ENGL 1100.03, ENGL 2100.03, ENGL 2110.03, HIST 1005.06, HIST 1867.03, HSTC 1800.03, HSTC 1801.03, JOUR 1001X/Y.06, JOUR 1002.03, JOUR 1003.03, POLI 1001.03, POLI 1002.03, POLI 1103X/Y.06, PHIL 1010X/Y.06, PHIL 1810.03, PHIL 1820.03, SOSA 1050.06, SUST 1000.06, THEA 1000X/Y.06, THEA 1300X/Y.06.

Note: Students who complete the requirements for Years 1, 2, and 3, above (including the requirements for English writing courses; science courses; and arts, humanities and social science courses), may choose to apply to graduate with the 90 credit hour Bachelor of Community Design general degree. Please note that the Bachelor of Community Design 90 credit hour degree is not accredited by the Professional Standards Board as a professional planning degree.

Program core electives for the Bachelor of Community Design

Each program in Community Design requires that the student select a specified number of credit hours of core electives from the approved lists (contact the Undergraduate Advisor for a more current list). Where students exceed the requirements for the number of core electives for their program, the excess core elective courses will be counted as free electives.

Students earning the three-year Bachelor of Community Design must select three courses from any of the three categories (environmental planning, urban design and planning, or open to both) for their “core electives”. In year three, students are recommended to select courses at the 2000 level or above for their core electives.

Students earning the four-year Bachelor of Community Design Double Major in Community Design and Sustainability must select four courses from any of the three categories (environmental planning, urban design studies, or open to both) for their BCD “core electives”. In year three and four, students are recommended to select courses at the 2000 level or above for their core electives.

In their Honours year, students earning the Bachelor of Community Design Honours, Major in Environmental Planning, must select one additional “core elective” from among courses at the 2000 level or above in the categories “Environmental planning” (A) or “Electives for either option” (C).

In their Honours year, students earning the Bachelor of Community Design Honours, Major in Urban Design and Planning, must select one additional “core elective” from among courses at the 2000 level or above in the categories “Urban design studies” (B) or “Electives for either option” (C).

In their Honours year, students earning the Bachelor of Community Design Honours, Double Major in Environmental Planning and Sustainability, must select one additional “core elective” from among courses at the 2000 level or above in the categories “Environmental planning” (A) or “Electives for either option” (C).

In their Honours year, students earning the Bachelor of Community Design Honours, Double Major in Community Design (Urban Design and Planning) and Sustainability, must select one additional “core elective” from among courses at the 2000 level or above in the categories “Urban design studies” (B) or “Electives for either option” (C).

Note: Students must check to ensure they meet the prerequisites for any courses they select. In some cases, courses may be full or unavailable. Some courses may require the instructor’s or department’s consent. Not all courses are offered every year.

Core electives that may count for either Major (List C)

Any PLAN and ARCH course for which the School and the course instructor has given permission for the BCD student to enroll

- PLAN 1101.03: Dynamics of Human Settlement
- PLAN 1201.03: Environmental Systems in Planning
- PLAN 2002.03: Community Planning Methods
- PLAN 2010.03: Sustainable Community Design
- PLAN 2102.03: Housing Policy
- PLAN 3015.03: Site Infrastructure
- PLAN 3045.03: Community Design Practice
- PLAN 3050.03: Topics in Community Design (Other topics included under PLAN 3051, PLAN 3052, PLAN 3053)
- PLAN 3110.03: Planning for Healthy Communities
- PLAN 4105.03: Land Development Economics
- PLAN 4106.03: Transportation Planning
- PLAN 4120.03: Citizen Engagement and Consultation
- PLAN 4125.03: Negotiation & Conflict Management
- PLAN 4150.03: Topics in Planning
- PLAN 4200.03: Independent Study

- AGRI 4001.03: Agriculture, Food and Well-being (A&H) (Truro Campus)
- ARCH 1001.03 Introduction to Architecture 1
- ARCH 1002.03 Introduction to Architecture 2
- ARCH 1201.03: Science of the Built Environment 1
- ARCH 1202.03: Science of the Built Environment 2
- ARCH 2501.03: Design Communication 1
- ARCH 2502.03: Design Communication 2
- CANA 2050.03/HIST 2205.03: Historical Issues in Indigenous Studies
- CANA 3185.03 Issues in the Study of Indigenous Peoples of North America
- CTMP 3220.03: The Aesthetics of Environments
- CTMP 3340.03: Home and Homelessness
- ECON 1101.03: Principles Micro Economics
- ECON 1102.03: Principles Macro Economics
- ECON 2334.03: Globalization and Economic Development
- ECON 2336.03: Regional Development

- ENV 3502.03: Environmental Problem Solving 2
- ENV 3601.03: Global Biogeochemical Cycles
- ENV 3701.03: Fundamentals of Hydrology
- ENV 4001.03: Environmental Impact Assessment
- ERT 1080.03: Geology I
- ERT 1091.03: Geology II
- ERT 3440.03/GEOG 3440.03: Geomorphology
- HPRO 4422.03: Environmental Health
- INTD 3021.03: Communicating Development and Environment
- OCEA 2800.03/GEOG 2800.03/PHYC 2800.03: Climate Change
- OCEA 2001/2: The Blue Planet
- OCEA 3004.03: The Last Billion Years
- PHIL 2480.03: Environmental Ethics
- POLI 3385.03: Politics of the Environment
- SUST 3000.03: Environmental Decision Making

Urban Design and Planning core electives (List B)

- ECON 2200.03/ECON 2201.03: Intermediate Micro/Macro Economics
- ECON 2218.03: The Canadian Economy: Policy Issues
- HIST 1020.03/ HIST 1021.03 Introduction to European History
- HIST 1501.03: Comparative Global History
- HIST 1510.03: History of the Future
- HIST 2007.03: The Atlantic World 1650-1800: European Empires in the Americas
- HIST 2210.03: Many Canadas: 1930-Present
- HIST 2950.03: Heritage Studies Introduction
- INTD 1102.03 Halifax and the World: Part 1
- INTD 1103.03 Halifax and the World: Part 11

Bachelor of Community Design Honours, Double Major in Community Design and Sustainability

Students also have the option to earn a double major in Sustainability within the Honours program. Year 4 of the BCD Honours Double Major in Sustainability is the same as year 4 of the BCD Honours.

Program requirements are as follows:

Year 1

- PLAN 1001.03: Introduction to Planning
- PLAN 1002.03: Introduction to Community Design
- PLAN 1101.03: Dynamics of Human Settlements
- ERT 1030.03/GEOG 1030.03: Physical Geography
- SUST 1000.06: What is Sustainability or SUST 1400.03 Exploring Sustainability (online)*
- SUST 1001.06: A Sustainable Future
- Plus six credit hours of electives

Note: SUST 1000.06 and SUST 1001.06 satisfy the science requirement, and the social science requirement for BCD students. SUST 1000.06 satisfies the BCD English writing requirement.

* If SUST 1400.03 is chosen, the student is also required to take one course from among: PLAN 1201.03, ARCH 1001.03, ARCH 1002.03, ENV 1001.03, or ENV 1200.03. Note: SUST 1400.03 does not fulfil the BCD English writing requirement.

Year 2

- PLAN 2006.03: Space, Place and Geographic Information Systems

- PLAN 2009.03: Introduction to Policy Making
- PLAN 2101.03: Data, Probability and Planning
- PLAN 2201.03: Introduction to Environmental Planning
- SUST 2000.06: Local Governance, Citizen Engagement and Sustainability
- SUST 2001.06: Global Environmental Governance
- Plus six credit hours of core electives/ free electives

Recommended core electives (or free electives) for second year:

- PLAN 2002.03: Community Planning Methods
- PLAN 2007.03: Population Data Analysis for Planning
- PLAN 2010.03: Sustainable Community Design
- PLAN 2102.03: Housing Policy
- ARCH 2501.03: Design Communication 1 OR ARCH 2502.03: Design Communication 2

Year 3

- PLAN 3030.03: Site Planning
- PLAN 3100.03: Transportation and Land Use Planning
- PLAN 4101.03: History & Theory of Urban Design
- SUST 3000.03: Environmental Decision Making
- Three credit hours SUST at 3000-level or above

Plus choose 1 of the following:

- ARCH 3106.03: Ancient Settlements, Building & Landscapes
- ARCH 3107.03: Modern Settlements, Building & Landscapes

Choose 2 courses from among the following:

- PLAN 3110.03: Planning for Healthy Communities
- PLAN 3115.03: Social Justice
- PLAN 3045.03: Community Design Practice

Plus six more credit hours core electives/ electives

Year 4 of Honours Major in Urban Design and Planning (30 Credit Hours)

- PLAN 4002.06: Urban Design Studio
- PLAN 4050.03: Thesis Proposal
- PLAN 4035.03: Application of Planning Law
- PLAN 4100.03: Community Design Internship
- PLAN 4500.06: Thesis Project
- Fourth year planning required courses - choose two from among:

PLAN 4106.03: Transportation Planning

PLAN 4105.03: Land Development Economics

PLAN 3015.03: Site Infrastructure

- Plus three credit hours from core electives list B (Urban Design and Planning) or list C (electives for either major) at 2000 level or above

Year 4 of Honours Major in Environmental Planning (30 Credit Hours)

- PLAN 4001.06: Environmental Planning Studio
- PLAN 4050.03: Thesis Proposal
- PLAN 4035.03: Application of Planning Law
- PLAN 4100.03: Community Design Internship

- PLAN 4500.06: Thesis Project
- Choose two courses from among the following:

PLAN 4106.03: Transportation Planning

PLAN 4105.03: Land Development Economics

PLAN 3015.03: Site Infrastructure

- Plus three credit hours from core electives list A (Environmental Planning) or list C (electives for either major) at 2000 level or above

Bachelor of Community Design, Double Major in Community Design and Sustainability (four year program)

The Double Major in Community Design and Sustainability normally requires four years of full time study. It includes 120 credit hours of course work. For complete details about the College of Sustainability see the [College of Sustainability section](#).

Please note that the Bachelor of Community Design, Double Major in Community Design and Sustainability (non-honours) is not accredited by the Professional Standards Board (PSB) as a professional planning degree.

Program requirements are as follows:

Year 1

- PLAN 1001.03: Introduction to Planning
- PLAN 1002.03: Introduction to Community Design
- PLAN 1101.03: Dynamics of Human Settlements
- EARTH 1030.03/GEOG 1030.03: Physical Geography
- SUST 1000.06: What is Sustainability or SUST 1400.03 Exploring Sustainability (online)*
- SUST 1001.06: A Sustainable Future
- Plus six credit hours of electives

Note: SUST 1000.06 and SUST 1001.06 satisfy the science requirement, and the social science requirement for BCD students. SUST 1000.06 satisfies the BCD English writing requirement.

* If SUST 1400.03 is chosen, the student is also required to take one course from among: PLAN 1201.03, ARCH 1001.03, ARCH 1002.03, ENVS 1001.03, or ENVS 1200.03. Note: SUST 1400 does not fulfil the BCD English writing requirement.

Year 2

- PLAN 2006.03: Space, Place and Geographic Information Systems
- PLAN 2009.03: Introduction to Policy Making
- PLAN 2101.03: Data, Probability and Planning
- PLAN 2201.03: Introduction to Environmental Planning
- SUST 2000.06: Local Governance, Citizen Engagement and Sustainability
- SUST 2001.06: Global Environmental Governance
- Plus three credit hours of BCD core electives and three credit hours of free electives

Recommended BCD core electives (or free electives) for second year:

- PLAN 2002.03: Community Planning Methods
- PLAN 2007.03: Population Data Analysis for Planning
- PLAN 2010.03: Sustainable Community Design
- PLAN 2102.03: Housing Policy
- ARCH 2501.03: Design Communication 1 OR ARCH 2502.03: Design Communication 2

Year 3

- PLAN 3030.03: Site Planning

- PLAN 3100.03: Transportation and Land Use Planning
- PLAN 4101.03: History & Theory of Urban Design
- SUST 3000.03: Environmental Decision Making
- Three credit hours SUST at 3000-level or above

Plus choose 1 course from among the following:

- ARCH 3106.03: Ancient Settlements, Building & Landscapes
- ARCH 3107.03: Modern Settlements, Building & Landscapes

Plus choose 2 courses from among the following:

- PLAN 3110.03: Planning for Healthy Communities
- PLAN 3115.03: Social Justice
- PLAN 3045.03: Community Design Practice

Plus choose 3 credit hours core electives and 3 credit hours free electives

Year 4

- SUST 4001.03: Environment, Sustainability and Society Capstone Part 1
- SUST 4002.03: Environment, Sustainability and Society Capstone Part 2 *
- Six credit hours SUST/ESS electives
- Select six credit hours from BCD core electives list (at or above the 2000 level). Recommended BCD core electives:

PLAN 4105.03: Land Development Economics

PLAN 4106.03: Transportation Planning

PLAN 3015.03: Site Infrastructure

- Plus 12 credit hours in electives of student's choice

* SUST 4001.03 and SUST 4002.03 must be completed in consecutive Fall and Winter terms. Credit will not be granted for SUST 4001.03 without completion of SUST 4002.03.

Bachelor of Community Design (Honours) with a Minor in Environmental Studies

See [Minors](#) section of this calendar.

Bachelor of Community Design (Honours, Major) with a Minor in Geography

The Minor in Geography is available to students registered in the BCD Honours Major 120 credit hours degree programs. Requirements are the completion of six credit hours at the 1000 level, a compulsory three credit hours at the 2000 level or higher. Students in community design cannot assign required, geography cross-listed planning courses to the minor degree, nor can they assign geography cross-listed planning courses used to meet BCD program elective requirements to the geography minor. EARTH 1030/GEOG 1030 is required for both the BCD degree and the Minor in Geography. See [Minors](#) and [Geography](#) for details on the Minor in Geography requirements and course offerings.

BCD Honours Conversion

Students who complete the three-year BCD program and graduated with the degree may apply to convert their degree to Honours with an additional year of study to complete the requirements for the Honours degree. Please refer to the Academic Regulations section of this calendar for regulations regarding transfer credit eligibility.

Eligible students need to meet the following conditions:

- They completed the three-year BCD with a cumulative GPA of 3.0 or greater and a calculated GPA of 3.0 or higher for mandatory Community Design courses and core electives;
- A portfolio submitted to the School of Planning by a date in the Winter semester of each year, announced in the immediately preceding Fall semester of each academic year in the School of Planning. Requirements of the portfolio are available from the School of Planning.

Students who may have completed any required courses from the honours year as part of the 90 credit hours of the general BCD program will select alternative core elective credits from the lists to make up the credit hours to a total of 30.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

Courses Offered

Not all courses are offered every term. Please consult the university timetable for current listings.

- PLAN 1001.03: Introduction to Planning
- PLAN 1002.03: Introduction to Community Design
- PLAN 1101.03: Dynamics of Human Settlements
- PLAN 1201.03: Environmental Systems in Planning
- PLAN 2001.03: Landscape Analysis
- PLAN 2002.03: Community Planning Methods
- PLAN 2005.03: Community Design Context
- PLAN 2006.03: Space, Place and GIS
- PLAN 2009.03: Introduction to Policy Making
- PLAN 2010.03: Sustainable Community Design
- PLAN 2101.03: Data, Probability and Planning
- PLAN 2102.03: Housing Policy
- PLAN 2201.03: Introduction to Environmental Planning

- PLAN 4101.03: History and Theory of Urban Design
- PLAN 4102.03: Urban Economics
- PLAN 4105.03: Land Development Economics
- PLAN 4106.03: Transportation Planning
- PLAN 4107.03: Regional Planning
- PLAN 4108.03: History and Theory of Landscape Architecture
- PLAN 4111.03: Housing Theory
- PLAN 4120.03: Citizen Engagement and Consultation
- PLAN 4125.03: Negotiation and Conflict Management
- PLAN 4131.03: Planning of Coastal Communities and Regions
- PLAN 4150.03: Topics in planning
- This course provides opportunities to examine selected topical issues in planning in a seminar discussion. (Other topics included under PLAN 4151, PLAN 4152, PLAN 4153)
- PLAN 4200.03: Independent Study
- PLAN 4201.03: Waste Management Planning
- PLAN 4500.03: Thesis Project

Course Descriptions

PLAN 1001 Introduction to Planning

CREDIT HOURS: 3

This course introduces community design by exploring the characteristics of human and natural communities, the connections between them, and the types of interventions planners can make to help people create good living environments. Community design involves applying scientific and creative approaches to helping communities accommodate human needs while respecting the environment.

FORMATS: Lecture | Tutorial | Seminar

PLAN 1002 Introduction to Community Design

CREDIT HOURS: 3

This course explores how designers affect the form, structure, and character of human settlements. It examines principles of design, and helps students understand strategies and develop techniques for documenting, testing, and communicating ideas. Students will work on a community design project.

FORMATS: Lecture | Lab | Tutorial

PLAN 1101 Dynamics of Human Settlements

CREDIT HOURS: 3

The contemporary landscape reflects a long history of design interventions and human activities on the land. Civilisations rise and fall, often because they damage the ecosystems that support them. This course examines the relationship of cities and towns with the natural environment within which they exist. Learning from the past provides contemporary societies with important lessons for finding long-term strategies for sustainable development.

FORMATS: Lecture | Tutorial

PLAN 1201 Environmental Systems in Planning

CREDIT HOURS: 3

Planners require a fundamental understanding of bio-physical structures and processes in diverse landscapes, and how they interact with human uses. This course introduces students to human-environment systems, and how they inform the environmental principles applied in planning. The course will place understanding of these concepts within the multiple ethical, legal, political, and social contexts of planning. Students will learn the fundamentals of field observation, documentation, and report writing.

FORMATS: Lecture | Tutorial

PLAN 2001 Landscape Analysis

CREDIT HOURS: 3

Designers and planners need to understand the influence of physical, biological, and cultural systems in landscape evolution, and the relevance of that

information in analyzing land capability. Students develop inventory and analysis tools for understanding environmental processes and their implications for design and planning. There will be field trips and a lab component.

PREREQUISITES: or Concurrent: GEOG/ERTH 1030.03

CROSSLISTED: GEOG 2001.03

RESTRICTIONS: Restricted to students in: Bachelor of Community Design

FORMATS: Lecture | Lab

PLAN 2002 Community Design Methods

CREDIT HOURS: 3

This course explores the design theory, processes, principles, and methods that inform community design. Students will develop design literacy and skills, and engage in problem-solving exercises and projects.

PREREQUISITES: PLAN 1002.03 or concurrent

RESTRICTIONS: Restricted to students in: Bachelor of Community Design

FORMATS: Lecture | Lab

PLAN 2002 Community Planning Methods

CREDIT HOURS: 3

This course explores the design theory, processes, principles, and methods that inform community design. Students will develop design literacy and skills, and engage in problem-solving exercises and projects.

PREREQUISITES: PLAN 1002.03 or concurrent

RESTRICTIONS: Restricted to students in: Bachelor of Community Design

FORMATS: Lecture | Lab

PLAN 2005 Community Design Context

CREDIT HOURS: 3

Our communities are shaped by a wide range of factors as varied as the way we organize power within our government system, the significance of the profit motive in our economy, and our cultural desire to separate work and home. This course considers various governance, economic, social, demographic, and service issues that influence the shape and regulation of communities and landscapes in the contemporary context. It examines a range of scales, from international through national, provincial and local.

PREREQUISITES: PLAN 1001.03 or concurrent

RESTRICTIONS: Restricted to students in: Bachelor of Community Design

FORMATS: Lecture | Seminar

PLAN 2006 Space, Place and Geographic Information Systems

CREDIT HOURS: 3

Planners use Geographical Information Systems (GIS) for data collection, coordination, and analysis. Properly interpreted, GIS data contribute to informed decision-making. This course explores the application of GIS in planning within a project-centred setting. Students learn to use GIS to address land use and site planning issues. The course also considers mapping standards used within the field of planning, and examines legal, privacy, and ethical implications of using GIS data in the public realm.

CROSSLISTED: GEOG 2006.03

RESTRICTIONS: Restricted to students who have completed at least 30 credit hours

EXCLUSIONS: PLAN 3055.03, BIOL 3633.03

FORMATS: Lecture | Lab

PLAN 2007 Population Data Analysis for Planning

CREDIT HOURS: 3

This course provides opportunities to learn how population data analysis can be applied to better understand the needs of communities in the context of planning. The course aims to develop students' skills in identifying, processing, and analyzing population data such as Canadian Population Census, using Halifax and Nova Scotia as case studies. Through various assignments, students will learn to work and draw conclusions about distributions of key population characteristics—such as population and dwelling densities, age group distribution, and socioeconomic conditions—in and across communities. Weekly laboratory exercises introduce how some of the key geographic and demographic concepts and methods can be applied in planning research, using actual data, and exploring how planners use this data in decision-making. The analysis will pay attention to differences across rural, suburban and urban neighbourhoods and communities, allowing the students to critically think about the implications in planning decision making.?

PREREQUISITES: 30 credits of undergraduate level courses

RESTRICTIONS: Restricted to students who have completed at least 30 credit hours

FORMATS: Lecture | Lab | Online Delivery

PLAN 2009 Introduction to Policy Making

CREDIT HOURS: 3

This course introduces students to policy making within the Canadian context. The importance of policies, actors, institutions, and the policy making process are explored. The constraints to policy making are examined, and the relationship between policy making and planning considered. The course emphasizes provincial and local government contexts and uses a range of case studies centered on land-use planning, transportation planning, and the natural and built environments.

PREREQUISITES: 3 credit hours of a Bachelor of Community Design English writing requirement course

RESTRICTIONS: Restricted to students who have completed at least 30 credit hours

PLAN 2010 Sustainable Community Design

CREDIT HOURS: 3

Through case studies and collaborative design projects, this course explores how the form of communities can change in response to new environmental awareness, shifting economic conditions, emerging technologies, and a focus on sustainable local action.

RESTRICTIONS: Restricted to students who have completed at least 30 credit hours

FORMATS: Lecture | Tutorial

PLAN 2101 Data, Probability and Planning

CREDIT HOURS: 3

This course explores the strategic value of using data and analytics to inform planning decisions. It introduces basic elements of survey design, sampling strategy and survey tools. The course familiarizes students with database structure, data analytics, interpretation and predictions utilizing a variety of sources including census tabulations. It also introduces basic statistical methods, descriptive and inferential, used in urban and regional planning. The course trains students on several tools, including MS Excel, MS Access and Mintab for data analysis, mining and visualization.

RESTRICTIONS: Restricted to students who have completed at least 30 credit hours

PLAN 2102 Housing Policy

CREDIT HOURS: 3

The objective of this course is to introduce students to housing policy issues in Canada through a comparative approach. The course will cover the relationship between housing policy and strategic planning, municipal/regional tools used in planning for a variety of housing types and tenures, and theoretical models that influence the development of housing plans. Key paradigms to be explored in this course include: the role of housing in the development and growth of households, housing as a system contributing to the spatial, social, and resilient networks of cities/region, and the contribution of housing to the economy.

RESTRICTIONS: Restricted to students who have completed at least 30 credit hours

FORMATS: Lecture

PLAN 2201 Introduction to Environmental Planning

CREDIT HOURS: 3

This course examines the historical and theoretical integration of environmental considerations into contemporary planning theory and practice. It introduces environmental planning regulations, decision-making processes and techniques of environmental analysis, including Environmental Impact Assessment (EIA). Other analytical frameworks such as Ecological Footprint Analysis and Life Cycle Assessment are reviewed. The course will discuss environmental planning (EP) as it relates to water, wastewater, solid waste, air quality and climate change. It also examines the integration of ecology and land use planning. Public consultation in environmental planning is covered including how to design effective programs that integrate local values and environmental ethics into the planning process. First Nations and the marginalization of Traditional Ecological Knowledge in EP is reviewed with a view to consensus building and reconciliation.

RESTRICTIONS: Restricted to students who have completed at least 30 credit hours

FORMATS: Lecture

PLAN 3001 Landscape Ecology

CREDIT HOURS: 3

Landscapes reflect the interaction of natural and cultural processes. This course introduces the principles of ecology to landscape analysis. It explores relationships between environmental components in the landscape to inform community design and land use planning applications.

PREREQUISITES: PLAN 2001.03/GEOG 2001.03, and PLAN 2006.03/GEOG 2006.03

CROSSLISTED: GEOG 3001.03

RESTRICTIONS: Restricted to students in the following Majors: Community Design, Environmental Planning, Urban Design and Planning. Restricted from students in class : Earned Hours (0-29), Earned Hours (30-59)

FORMATS: Lecture | Lab

PLAN 3006 Reading the Landscape

CREDIT HOURS: 3

Any landscape reflects its natural and cultural history. This course explores principles, theories, and methods of landscape interpretation. These approaches will be applied to community design problems in local landscapes.

PREREQUISITES: PLAN 2001.03/GEOG 2001.03 and PLAN 2005.03

CROSSLISTED: GEOG 3006.03

RESTRICTIONS: Restricted to students in Degree: Bachelor of Community Design

FORMATS: Lecture | Lab

PLAN 3010 Urban Ecology

CREDIT HOURS: 3

More than three-quarters of Canadians, and more than half the world's population, live in urban settings. This course treats the urban system as habitat made by and for people, and takes an ecological approach to the flows of energy and materials which make urban life possible. Students study their own behaviour and surroundings, comparing their observations with data from Canada, North America, and the rest of the world. This leads to discussions about the health and sustainability of urban communities.

CROSSLISTED: PLAN 6103.03

FORMATS: Lecture | Seminar

PLAN 3015 Site Infrastructure

CREDIT HOURS: 3

The course examines the role of infrastructure in community design and site planning. Students are introduced to principles of grading, access, service provision, and cost estimating. Key exercises allow students to apply theory to practical projects.

PREREQUISITES: PLAN 2006.03/GEOG 2006.03 OR Permission of the Instructor.

CROSSLISTED: PLAN 5015.03

RESTRICTIONS: Restricted to students who have completed at least 60 credit hours Restricted to students in Bachelor of Community Design

FORMATS: Lecture | Lab

PLAN 3020 Landscape Design

CREDIT HOURS: 3

The course introduces principles and methods of site design. It pays special attention to social, natural, and technical components as factors in adapting sites for human use. Practical projects allow students to develop deeper insight into the challenges and opportunities of landscape design.

PREREQUISITES: At least one of PLAN 2002.03, PLAN 2025.03, or PLAN 3025.03

CROSSLISTED: PLAN 5020.03

FORMATS: Lecture | Lab

PLAN 3025 Representation in Design

CREDIT HOURS: 3

The course explores techniques of representation in community design work. It examines design drawing conventions such as orthography, paraline, and perspective projections. It helps students develop their awareness of design approaches and their skills in design presentation.

PREREQUISITES: PLAN 2002.03 or PLAN 2025.03/ARCH 2025.03

CROSSLISTED: PLAN 5025.03

RESTRICTIONS: Restricted from students in Class: Earned Hours (0-29), Earned Hours (30-59)

FORMATS: Lecture | Lab

PLAN 3030 Site Planning

CREDIT HOURS: 3

This course examines a range of practical approaches in evaluating and planning sites within the contexts of natural, economic, and cultural systems. Students are introduced to the principles of site inventory, analysis, and planning, including site grading. Exercises allow students to apply theory to applied projects.

RESTRICTIONS: Restricted to students who have completed at least 60 credit hours Restricted to students in Bachelor of Community Design

PLAN 3031 Geology and Land use Planning - Exploring the Connections

CREDIT HOURS: 3

This lecture and seminar course explores the influence of geology in the evolution of human settlements; geological opportunities and constraints to land and community development; the sources and formats of geophysical information available and useful to planners and community designers and how to access and use the information.

PREREQUISITES: PLAN/GEOG 2001.03 or EARTH 1080.03 and EARTH 1090.03 or 10 credits

RESTRICTIONS: Restricted from students in: Class: Earned Hours (0 – 29), Earned Hours (30-59)

FORMATS: Lecture | Seminar

PLAN 3040 Reading the Suburbs

CREDIT HOURS: 3

An increasing proportion of Canadians live in the suburbs. This course explores issues related to planning and designing the suburbs, and develops techniques for analyzing and developing community form in the suburban environment.

PREREQUISITES: PLAN 2005.03

CROSSLISTED: PLAN 5040.03

RESTRICTIONS: Restricted from students in: Class: Earned Hours (0-29), Earned Hours (30-59)

FORMATS: Lecture | Lab

PLAN 3045 Community Design Practice

CREDIT HOURS: 3

Community-building constitutes an important component of the Canadian economy. This course explores the financial, regulatory, social, and ethical issues of development practice. Using a case study approach, it examines examples of community design projects and initiatives in Canadian communities. Students gain insight into the financing, planning, and building of projects from the perspective of the development industry.

PREREQUISITES: PLAN 1001.03, PLAN 1002.03, PLAN 2101.03, PLAN 2009.03, PLAN 2006.03 AND PLAN 2201.03

RESTRICTIONS: Restricted to students in Bachelor of Community Design

FORMATS: Lecture

PLAN 3050 Topics in Community Design

CREDIT HOURS: 3

This course provides opportunities to examine selected topical issues in community design.

PREREQUISITES: (to be announced for each topic)

CROSSLISTED: PLAN 5050.03

RESTRICTIONS: Restricted from students in: Class: Earned Hours (0-29), Earned Hours (30-59)

FORMATS: Lecture | Seminar

PLAN 3051 Topics in Community Design 2

CREDIT HOURS: 3

This course provides opportunities to examine selected topical issues in community design.

RESTRICTIONS: Restricted from students in: Class: Earned Hours (0-29), Earned Hours (30-59)

EXCLUSIONS: PLAN 5051.03

FORMATS: Lecture | Seminar

PLAN 3052 Topics in Community Design 3

CREDIT HOURS: 3

This course provides opportunities to examine selected topical issues in community design.

CROSSLISTED: PLAN 5052.03

RESTRICTIONS: Restricted from students in: Class: Earned Hours (0-29), Earned Hours (30-59)

FORMATS: Lecture | Seminar

PLAN 3100 Transportation and Land Use Planning

CREDIT HOURS: 3

This course explores the interactions between transportation and land use systems. The main aim of the course is to introduce the fundamental concepts of transportation and land use linkages, planning cities for people and places, case studies of urban and suburban transformations, transit-oriented developments, micro-design of road contractions, complete Street, corridor planning, and land use consideration for future mobility needs. It will also discuss tools, methods and approaches of accessibility measurements and integrated land use and transportation modelling. By the end of the course, the students should have a basic understanding of the transportation-land use interactions, and integrated transportation and land use planning processes, methods and applications.

RESTRICTIONS: Restricted to students who have completed at least 60 credit hours Restricted to students in Bachelor of Community Design

FORMATS: Lecture

PLAN 3110 Planning for Healthy Communities

CREDIT HOURS: 3

Planning plays a crucial role in creating the built and social environments in our communities that facilitate healthy lifestyles while minimizing health risks. Drawing broadly from planning and health fields, this course will explore principles, theories and planning tools that guide creation of healthy communities.

CALENDAR NOTES: Must have completed 60 credit hours
RESTRICTIONS: Restricted to students who have completed at least 60 credit hours
FORMATS: Lecture | Seminar | Discussion

PLAN 3115 Social Justice

CREDIT HOURS: 3

This is a seminar exploring principles and theories of social justice as they apply to planning practice and research. The course is designed to develop an understanding of how theoretical understandings of equity, diversity, inclusiveness, affordability and social justice influence planning processes, plans, and policies. Students will study specific tools and strategies that municipalities, non-profit and community-based organizations and other actors use to address complex and long-standing issues of social justice. Students will engage with and respond to a variety of guest lecturers, videos, films and other resources.

CROSSLISTED: PLAN 5115

RESTRICTIONS: Restricted to students who have completed at least 60 credit hours

FORMATS: Seminar

PLAN 4001 Environmental Planning Studio

CREDIT HOURS: 6

This course provides an applied context for analyzing landscape issues and exploring environmental planning options. Students provide a service to the community by working through projects where local community groups or agencies have identified real needs for information and advice.

PREREQUISITES: Admission to Honours program

RESTRICTIONS: Restricted to year 4 BCD (Hons.) Students

FORMATS: Studio

PLAN 4002 Urban Design Studio

CREDIT HOURS: 6

This studio provides an applied project context for looking at issues related to the design of cities, especially their core areas. Students explore various urban design and planning options. Students provide a service to the local community by working through projects where local community groups or agencies have identified real needs for information and advice.

PREREQUISITES: Admission to Honours program

RESTRICTIONS: Restricted to year 4 BCD (Hons.) Students

FORMATS: Studio

PLAN 4035 Application of Planning Law

CREDIT HOURS: 3

This course explores the application of planning law in the field of community design. The course introduces students to the legal processes and statutory requirements for land use planning in Canada, with particular reference to Nova Scotia.

PREREQUISITES: Admission to Honours program; OR admission to graduate program.

RESTRICTIONS: Restricted to students in: Program BCD Honours in Environmental Planning, BCD Honours in Environmental Planning & Sustainability, BCD Honours in Urban Design & Planning, BCD Honours Urban Design & Planning & Sustainability

EXCLUSIONS: Plan 3035.03

FORMATS: Lecture | Seminar

PLAN 4050 Thesis Proposal

CREDIT HOURS: 3

Students in the honours programs in Community Design develop a thesis proposal for their honours thesis. The course will review appropriate research methods and guide the students through background research, literature synthesis, methods development and proposal writing.

CALENDAR NOTES: Students must achieve a B or higher for admission from this course into PLAN 4500.06 Restricted to year 4 BCD (Hons.) Students

PREREQUISITES: Admission to Honours program

RESTRICTIONS: Restricted to students in Bachelor of Community Design Honours Programs

FORMATS: Lecture | Seminar

PLAN 4100 Community Design Internship

CREDIT HOURS: 3

Students locate a company or organization involved in some element of community design or planning and volunteer for eight hours a week in the office. An internship in a relevant workplace allows students to reflect on the knowledge they can bring to practice. Students will keep a work journal, prepare an internship report, and make a brief presentation on the placement at the end of term. Students will meet with the course coordinator for occasional seminars.

CALENDAR NOTES: Restricted to year 4 BCD (Hons.) Students

PREREQUISITES: PLAN 4001.06 or PLAN 4002.06 (limited to Honours BCD students)

RESTRICTIONS: Restricted to students in Bachelor of Community Design Honours Programs
FORMATS: Seminar

PLAN 4101 History and Theory of Urban Design

CREDIT HOURS: 3

The course introduces the history and theory of urban design as a distinct area of professional knowledge and skill within the spectrum of planning and design concerns and specialities.

CALENDAR NOTES: Restricted to students with at least 60 credit hours

RESTRICTIONS: Restricted to students who have completed at least 60 credit hours Restricted to students in Bachelor of Community Design

EXCLUSIONS: PLAN 6101.03

FORMATS: Lecture | Seminar

PLAN 4106 Transportation Planning

CREDIT HOURS: 3

The main aim of the course is to introduce fundamental concepts of transportation planning, travel behaviour, multi-modal transportation, public transit, the four-stage model, and intelligent transportation systems. By the end of the course, students should have a basic understanding of the transportation systems, and planning processes, methods and applications..

CALENDAR NOTES: Restricted to year 4 BCD (Hons.) Students or permission of instructor

PREREQUISITES: PLAN 2006.03 or permission of the instructor.

CROSSLISTED: PLAN 6106.03

RESTRICTIONS: Restricted to students in: Program BCD Honours in Environmental Planning, BCD Honours in Environmental Planning & Sustainability, BCD Honours in Urban Design & Planning, BCD Honours Urban Design & Planning & Sustainability

FORMATS: Lecture | Seminar

PLAN 4108 History and Theory of Landscape Architecture

CREDIT HOURS: 3

This lecture and seminar course deals with changing landscapes and perceptions of the natural world during the past 250 years. It discusses the effects of technology and resource use on the design of landscapes as small as a private garden and as large as a bio-region, and examines the changing role of landscape architects, their writings and their collaboration with architects.

CROSSLISTED: PLAN 6108.03

RESTRICTIONS: Restricted to students in: Class: Earned Hours (0 – 29), Earned Hours (30-59)

FORMATS: Lecture | Seminar

PLAN 4111 Housing Theory

CREDIT HOURS: 3

An introduction to the history and theory of contemporary practice in housing design and production. The focus is on the quality of housing and the residential environment. A comparative analysis of significant past and current examples is used to provide insight into the way houses and neighborhoods are designed. This understanding is placed in the context of differing economic, political and housing market situations.

RESTRICTIONS: Restricted from students in: Class: Earned Hours (0 – 29), Earned Hours (30-59)

EXCLUSIONS: PLAN 6111.03, ARCH 5102.03

FORMATS: Lecture | Seminar

PLAN 4120 Citizen Engagement and Consultation

CREDIT HOURS: 3

This course examines the conceptual foundations and practice of citizen participation, especially in the context of planning and development decisions by municipal and provincial governments, and the techniques or methods that can be used to more effectively involve individual citizens and stakeholder groups in community decisions.

PREREQUISITES: Honours students in the Faculty of Architecture and Planning, or permission of instructor.

CROSSLISTED: PLAN 6120.03

RESTRICTIONS: Restricted from students in: Class: Earned Hours (0 – 29), Earned Hours (30-59)

FORMATS: Lecture | Seminar

PLAN 4125 Negotiation and Conflict Management

CREDIT HOURS: 3

This course explores the world of interpersonal communication, conflict and negotiation and the variety of approaches and range of skills needed to solve problems, reach agreements and maintain relationships. It will enable participants to understand the positive and negative dimensions of conflict, analyze the dynamics of formal and informal negotiations, and interact with others with greater awareness, intention and skill.

CROSSLISTED: SUST 4125, MGMT 4125

RESTRICTIONS: Restricted from students in: Class: Earned Hours (0 – 29), Earned Hours (30-59)

EXCLUSIONS: PLAN 6125.03

FORMATS: Lecture

PLAN 4150 Topics in Planning

CREDIT HOURS: 3

This course provides opportunities to examine selected topical issues in planning in a seminar discussion.

PREREQUISITES: PLAN 2006.03/GEOG 2006.03, or permission of instructor.

CROSSLISTED: PLAN 6150.03

RESTRICTIONS: Restricted from students in: Class: Earned Hours (0 – 29), Earned Hours (30-59)

FORMATS: Seminar

PLAN 4151 Topics in Planning II

CREDIT HOURS: 3

This course provides opportunities to examine selected topical issues in planning in a seminar discussion.

PREREQUISITES: Restricted to honours or graduate students in the Faculty of Architecture and Planning, or permission of instructor

CROSSLISTED: PLAN 6151.03

FORMATS: Seminar

PLAN 4152 Topics in Planning III

CREDIT HOURS: 3

This course provides opportunities to examine selected topical issues in planning in a seminar discussion.

PREREQUISITES: Restricted to honours or graduate students in the Faculty of Architecture and Planning, or permission of instructor

CROSSLISTED: PLAN 6152.03

FORMATS: Seminar

PLAN 4153 Topics in Planning IV

CREDIT HOURS: 3

This course provides opportunities to examine selected topical issues in planning in a seminar discussion.

PREREQUISITES: Restricted to honours or graduate students in the Faculty of Architecture and Planning, or permission of instructor

CROSSLISTED: PLAN 6153.03

FORMATS: Seminar

PLAN 4200 Independent Study

CREDIT HOURS: 3

A student in the honours major may undertake an independent reading or research project under faculty supervision. The student will prepare a proposal that must be signed by the project supervisor and the Director of the School. The proposal will set out a work plan and projected outcomes.

CALENDAR NOTES: Restricted to year 4 BCD (Hons.) Students

PREREQUISITES: permission of instructor and School

RESTRICTIONS: Restricted to students in: Program BCD Honours in Environmental Planning, BCD Honours in Environmental Planning & Sustainability, BCD Honours in Urban Design & Planning, BCD Honours Urban Design & Planning & Sustainability

PLAN 4201 Waste Management Planning

CREDIT HOURS: 3

This course explores the complex socio-political dynamics of waste management issues and identifies possible strategies at the local and global levels. The course covers waste auditing techniques, waste reduction programs, landfills, environmental assessments, and public engagement. Using Canadian and international cases, the class critically examines the 'life-course' of waste management in different contexts to advance future solutions. The course also highlights environmental racism and social equity issues in waste management practices.

RESTRICTIONS: Restricted to students who have completed at least 60 credit hours Restricted to students in Bachelor of Community Design

PLAN 4500 Thesis Project

CREDIT HOURS: 6

Honours students in their final semester work on advanced research projects related to their Major concentration. Students will work relatively independently on coordinated topics. The course uses a project management model which emulates professional practice. Each student prepares an individual thesis project

report and presents it orally.

CALENDAR NOTES: Restricted to year 4 BCD (Hons.) Students

PREREQUISITES: PLAN 4001.06 or PLAN 4002.06 and PLAN 4050.03 (with a minimum grade of B)

RESTRICTIONS: Restricted to students in Bachelor of Community Design Honours Programs

Introduction

The Faculty of Arts and Social Sciences includes humanities, social sciences, languages, and performing arts. Within the Faculty's departments and interdisciplinary programs, you can get involved in music and theatre at a professional level. Or you can find out how to do social surveys or archival research. Try out your language-learning abilities in French, German, Spanish, Italian, Russian, Arabic, Mandarin, or maybe Hebrew, Latin, or Greek. Study abroad for a term or a year, and you will develop your skills in cross-cultural interaction. Sharpen your reasoning powers and writing skills by taking literature and philosophy courses that teach advanced levels of reading and analysis.

By exploring various academic disciplines, you'll find that your curiosity about the world and your hopes of a career can be fulfilled in many different ways. You may find that a particular discipline exactly suits your needs. Or you may want to design a course of studies that engages you in a wider variety of departments and programs. You may find everything you need within the disciplines grouped in this Faculty. Or perhaps you will seek out the programs that combine this Faculty's offerings with ones from other Faculties. Professors and administrators, advisors and instructors, will all help to guide you as you choose courses and programs. Our goal is to help you to see differently, and to see your way to a bright future!

Certificates in Arts

Certificates are a way of recognizing students who have achieved a level of proficiency or specialization in a particular area or subject. Certificates are normally awarded upon graduation from the BA program and are recorded on the student's academic transcript. The certificates listed at the right are offered by the Faculty of Arts and Social Sciences.

Certificate in Art History and Visual Culture

This certificate is open to currently registered Dalhousie and King's students in all Faculties.

Contact/Coordinator: Dr. Lisa Binkley, History Department (lbinkley@dal.ca)

The Certificate in Art History and Visual Culture is designed for students in the arts, social sciences, and sciences who are interested in advancing their visual literacy. The ability to interpret meaning from images and objects is critical in our increasingly image-saturated culture. This certificate program will provide students with solid training in visual analysis, art history methodologies, research, and communication.

A Certificate in Art History and Visual Culture would be most obviously beneficial to students considering graduate studies or careers in Art History, Museum Studies, Museum Education, Arts Administration, Conservation, Cultural Studies, etc. However, the importance of developing visual literacy is being recognized much more broadly in today's digital, image-based world (for example, courses in art history are now required at several top medical schools). Indeed, in many fields visual thinking is considered as crucial as verbal thinking. A Certificate in Art History and Visual Culture would therefore provide a sound complement to any area of studies in the humanities, sciences, or social sciences.

Learning Outcomes:

- Students will cultivate visual literacy - the ability to interpret works of arts & visual culture both as formal structures and in relation to social, political, and cultural contexts - and develop a working knowledge of the vocabulary of art history and criticism.
- Students will learn to effectively use objects as primary sources and to articulate the relevance of art as both evidence of, and stimulus for, historical, social, political, and intellectual movements.
- Students will develop the ability to communicate their knowledge of visual culture both orally and in writing by learning how to synthesize a wide range of primary and secondary sources.

Students will be able to count credit earned in these courses toward their undergraduate major, minor, or distribution requirements, unless otherwise specified in their program's regulations.

Requirements:

This certificate is a **12 credit hour certificate** with one required 3 credit hour course (HIST 2900.03/GWST 2900.03). The remainder of the courses will be selected from a list of 3 credit hour electives. Students have the option to take one of their 3 credit hour electives at NSCAD University.

- HIST 2900.03: Ways of Seeing: An Introduction to Art History and Visual Culture (Cross-listed GWST 2900.03)

And nine additional credit hours drawn from the following list of electives:

Department of Classics:

- CLAS 2214.03: The Roots of Greek Civilization (held every two years)
- CLAS 3021.03: Ancient Art and Architecture from the Pyramids to the Agora

Contemporary Studies Programme:

- CTMP 2316.03: The "Pictorial Turn" in Recent Thought, Art and Theory

- CTMP 2340.03: Theories of the Avant-Garde
- CTMP 3305.03: Modern Film and Theory of the Gaze
- CTMP 3330.03: Art and Atrocity: Contemporary Contexts, Gendered Perspectives

Early Modern Studies Programme:

- EMSP 2215.03: Violence and Wonder: Baroque Art
- EMSP 2230.03: Picture and Poetry in Early Modern Culture
- EMSP 2415.03: The Art of Global Encounters in the Early Modern Period
- EMSP 2510.06: Early Modern Art, Literature, and Politics in Florence, Italy (Summer Study Abroad)
- EMSP 3280.03: Love, lust, and desire in Italian Renaissance Art (Cross-listed GWST 3280.03)
- EMSP 3270.03: Leonardo da Vinci: Between Art and Science (cross-listed HSTC 3270.03)
- EMSP 3290.03: The Renaissance Print and Cross-Cultural Exchange
- EMSP 3350.03: Art, Optics, and Technologies of Illusion (cross-listed HSTC 3350.03)
- EMSP 3640.03: Studies in Early Modern Aesthetics
- EMSP 4501.03: Honours Seminar in Early Modern Studies: The Development of Aesthetic Theory in the Early Modern Period I
- EMSP 4502.03: Honours Seminar in Early Modern Studies: The Development of Aesthetic Theory in the Early Modern Period II
- EMSP 4640.03: Special Topics in Early Modern Aesthetics

Department of English:

- ENGL 2080.03: Cartoons and Comics
- ENGL 2088.03: Images and Texts
- ENGL 3301.03: Graphic Novels
- ENGL 4890.03: Indigenous Graphic Novels

Fountain School of Performing Arts:

- THEA 2401.03: Caves to Castles: Costume and Identity from Antiquity to the High Middle Ages
- THEA 2402.03: Castle to Café: Costume and Identity from 1450 to 1700
- THEA 2412.03: Language of Design
- THEA 3402.03: Baroque to Bustles: Costume from 1700 to 1900
- THEA 3403.03: Bustles to Boardrooms: Costume and Identity from 1900- Present Day

Film

- FILM 2301.03: Film History I
- FILM 2311.03: Film Analysis
- FILM 3301.03: Film History 2
- FILM 3370.03: Animated Film: Technologies, Characters and Society

Department of History:

- HIST 2042.03: Capital of Europe: Paris in the Nineteenth Century
- HIST 2900.03: Introduction to Art History and Visual Culture
- HIST 3212.03: A History of Indigenous Visual and Material Culture
- HIST 3215.03: Indigenous Textiles: Tourism, Industry, Globalization
- HIST 3303.03: De-Colonizing Modernism: Critiquing the Legacy of Modern Art (Cross-listed GWST 3303.03)
- HIST 4162xy.06: Advanced Seminar in Baroque Culture (taught in the Czech Republic)
- HIST 4175.03: Bella Figura: Display Behaviours in Baroque Europe
- HIST 4210.03: Museums, Archives, and Material Culture (cross-listed INDG 4210)
- HIST 4303.03: The Birth of Pop: How Victorian Visual Culture Makes Meaning (Cross-listed GWST 4303.03)

History of Science and Technology Programme:

- HSTC 4120.03: Artefacts: The Material Culture of Science and Technology

Indigenous Studies:

- INDG 3400.03: Contemporary Indigenous Art (Cross-listed CANA 3400.03)

Department of Philosophy:

- PHIL 2260.03: Philosophy of Art

Certificate in Computing in Arts & Social Sciences

This certificate is open to currently registered Dalhousie undergraduate students in the Faculty of Arts and Social Sciences; it will not be open for direct application.

Designed for students in the arts, social sciences, and humanities, this certificate program is intended to develop participants' digital literacy. Students will develop and apply technical computing skills and also explore key social and intellectual issues in an increasing digital world. This program will give students important skills for future employment and will impart the tools they will need to understand and navigate a rapidly changing society.

This certificate can be completed by students in any BA program, in addition to the students' regular program requirements, and will appear on the students' transcripts. Note, too, that courses completed for this certificate can also count toward regular degree requirements for a student's major or minor, depending on the subject.

Students can enrol in the certificate by logging in to [Dal Online](#); under "Web for Students", click on 'Admissions' then 'Declare a Major or Minor', and at the bottom of that screen, click on the appropriate link in the drop-down list of certificate options.

Requirements:

12 credit hours:

- Students will complete the following 9 credit hours:
 - CSCI 1105: Introduction to programming
 - CSCI 1170: Introduction to Website development
 - CSCI 2203: Data Science for Everyone
- plus 3 credit hours from the following list of applied skills courses:
 - CSCI 1107.03: Social Computing
 - CSCI 1109.03: Practical Data Science
 - PHIL 2490: Social, Ethical and Professional Issues in Computer Science
 - CSCI 2201.03: Introduction to Information Security
 - CSCI 2670.03: Introduction to Server-Scripting
 - ENGL 3310.03: Writing in a Digital Age
 - MGMT 2601.03: Knowledge Management
 - MGMT 3601.03: Information in a Networked World
 - MGMT 3603.03: Beyond Google
 - MGMT 4540.03: Data Management
 - MGMT 4620.03: Web Design and Architecture

Learning Outcomes:

- Students will become familiar with simple programming concepts and apply them.
- Students will become familiar with and use typical software applications such as word processors, spreadsheets, and database applications.
- Students will become familiar with and practice web page creation.
- Students will critically appraise scholarly literature on ethical and intellectual issues with computing as it exists today.

Questions? Contact the Associate Dean Academic of the Faculty of Arts and Social Sciences at fassadac@dal.ca or at 902.494.1254.

Certificate in Dance and Movement

Certificate in Dance and Movement

This Certificate is open to currently registered Dalhousie and King's students in all Faculties.

Contact / Coordinator: Associate Director, Theatre (fspa.theatre@dal.ca)

The Certificate in Dance and Movement introduces students to the broad context of dance as a performance art and to the various skills that encompass movement and dance techniques. Through both practical and theoretical studies, students will develop an understanding of dance composition and movement for the stage, and will develop the vocabularies necessary to communicate in the field of dance and movement. This Certificate will be of interest to any Dalhousie or King's student who wishes to expand their knowledge of Dance and Movement, gain foundational performance skills, and improve physical wellness.

Learning Outcomes:

Upon completion of the Certificate, students will:

- Achieve proficiency in the basic skills of the performing artist: interaction with the performing space, creation of character through movement and gesture, collaboration, and ensemble-building.
- Understand the broad vocabularies of dance and movement techniques.
- Learn a variety of dance and movement techniques through practical application.
- Gain a foundation in dance composition and be able to create choreographic sequences.
- Develop confidence as performers by participating in a range of in-class and public performance opportunities.
- Improve physical skills and wellness through exploration of alignment, healthy movement, and mind-body connection.
- Gain an appreciation for, and be able effectively to explain both orally and in writing, the historical development of various dance styles and their importance to the cultures in which they developed.

Students can count credit earned in these courses toward their undergraduate major, minor, or distribution requirements, unless otherwise specified in their program's regulations.

Requirements:

This Certificate is a 15-credit-hour certificate. All students must complete:

- THEA 1801.03 and THEA 1802.03
- EITHER:
 - THEA 2821.03 and 2822.03 **OR**
 - THEA 2020.06 **OR**
 - THEA 2021.03 and THEA 2022.03
- PERF 3830.03

NOTE: Students who wish to do so may also apply to take THEA 4201.03 (Short Apprenticeship); THEA 4202.06 (Long Apprenticeship, one term); or THEA 4903.03 (Long Apprenticeship a) and THEA 4904.03 (Long Apprenticeship b) as higher-level electives to add a further component of Experiential Learning to their Certificate in Dance and Movement. Students who wish to add one of these classes to their Certificate must apply to the Fountain School of Performing Arts (FSPA) via an application form available from the FSPA Main Office, the Associate Director for Theatre, or the Certificate Coordinator. Entrance into these classes is by application only, and approval is given on a case-to-case basis. These electives are optional and are **not** required for completion of the Certificate.

Certificate in Heritage Studies

The Certificate in Heritage Studies (CHS) affords students an added dimension to their undergraduate degree, exposing them to professional settings and ways of applying historical knowledge through experiential, community-engaged and work-integrated learning. The purpose of the certificate is to provide students with theoretical knowledge and practical experience in the heritage sector. Upon completion, students will benefit from a certificate that will accompany their degree and illustrate their added knowledge, skills, and experience to potential employers and institutions.

The Certificate in Heritage Studies is a 12- credit hour certificate, comprised of course work and an institution-focused project. Students must have completed their first year of university (or 30 credit hours) and be in good academic standing, with an average of B or better, to enroll in the certificate program.

Requirements:

1. HIST 2950.03, Introduction to Heritage Studies and Public Humanities
2. Six credit hours from a list of approved electives to provide additional historical context and/or theoretical engagement with public uses of history and heritage, to prepare them to make best use of the capstone experience.
3. HIST 4710.03, Heritage Studies: Capstone. This will be a final, three credit hour seminar requiring students to apply the skills and knowledge gathered from the program to an institution-focused project. Each student will develop a project that will necessitate them drawing on the resources of a particular local institution (e.g., Pier 21, Nova Scotia Museum sites, Dalhousie Archives, etc.) without having to be hired or formally placed. The certificate coordinator will guide students through this capstone project seminar, usually in the fall semester of their final year of study.

Electives (Note that not all courses on this list are offered each year):

Department of Sociology and Social Anthropology:

- SOSA 2052.03 Contemporary Issues in Indigenous Studies
- SOSA 2111.03 Is there an Atlantic Canada?
- SOSA 2115.03 African Canadian Society, Culture, and Resistance
- SOSA 2191.03 Gender Across Cultures
- SOSA 3015.03 Popular Memory
- SOSA 3185.03 Issues in the Study of Indigenous Peoples of North America
- SOSA 3284.03 Living in Cities

Department of History:

- HIST 2205.03 Historical Issues in Indigenous Studies
- HIST 2210.03 Many Canadas: Canada, 1930 to the present
- HIST 2235.03 History of Canadian Culture
- HIST 2272.03 Atlantic Canada since Confederation: Regionalism, Identity, and Development
- HIST 2280.03 African Nova Scotian History
- HIST 2900.03 Ways of Seeing: An Introduction to Art History & Visual Culture
- HIST 3210.03 Canadian Cultural Landscapes
- HIST 3215.03 Indigenous Textiles in Canada: Tourism, Industry, Identity
- HIST 3274.03 Nova Scotia: Post-Confederation
- HIST 3282.03 Public History
- HIST 3302.03 Technology and History in North America
- HIST 4250.03 Popular Culture in the Atlantic World, 1650-1850
- HIST 4210.03 Museums, Archives, and Material Culture
- HIST 4162.03/THEA 4360.03/MUSC 4360.03, Advanced Seminar in Baroque Culture [taught at the UNESCO World Heritage Site, the State Castle in Cesky Krumlov]

Indigenous Studies:

INDG 3050.03 Indigenous Research Methodologies and Knowledge Practices

INDG 3401.03 Indigenous Representation in Film

Department of Political Science:

POLI 2215.03 Canadian Aboriginal Politics: An Institutional Perspective

Department of English:

ENGL 2006.03 Cultural Studies

Contemporary Studies Programme:

CTMP 2316.03 The “Pictorial Turn” in Recent Thought, Art and Theory

CTMP 3322.03 Representations of the Holocaust: Remembrance

Canadian Studies Program:

CANA 2002.03 The Idea of Canada: Cultural and Literary Perspectives

Certificate in Indigenous Studies

This certificate is open to currently registered Dalhousie students in all Faculties; it is not yet open for direct application.

The Certificate in Indigenous Studies is a 9 credit hour certificate with two core 3 credit hour courses and a choice of one of three 3 credit hour courses.

Requirements:

- HIST 2205.05/INDG 2050.03/CANA 2050.03: Historical Issues in Indigenous Studies
- INDG 2052.03/CANA 2052.03/SOSA 2052.03: Contemporary Issues in Indigenous Studies
- Plus one of the following three courses:
 - INDG 3050.03/CANA 3050.03: Indigenous Research Methodology & Knowledge Practices
 - INDG 3052.03/CANA 3052.03/SOSA 3052.03: Indigenous Social, Health, and Environmental Issues
 - IPHE 2201: Introduction to Aboriginal Peoples’ Health and Healing

Students will be able to count credit earned in these courses toward their undergraduate major, minor, or distribution requirements, unless otherwise specified in their program’s regulations.

Learning Outcomes:

- Students will become familiar with Indigenous perspectives on historical and contemporary political, social, and economic issues.
- Students will learn about the Indian Residential School system and the implications of the Truth and Reconciliation Commission of Canada’s Calls to Action.
- Students will become familiar with Indigenous models of research.
- Students will attain basic competencies in protocols of working with Indigenous groups or in Indigenous communities.

Contact [Indigenous Studies](#) for more information.

Certificate in Intercultural Communication

The Certificate in Intercultural Communication is open to students from any Faculty at Dalhousie, and welcomes both Canadian and International students. It offers the globally-minded student an opportunity to combine academic and experiential learning in order to understand and communicate more effectively with people from cultures different from their own.

Contact Person: Dr. Rebecca Babcock

Location: McCain 3030

Contact information: (902) 494-1440 CIC@dal.ca

Website: dal.ca/cic

Academic Components

(graduate students may receive advance standing for these components)

1. One full academic credit focusing on the understanding of culture, chosen from the list below.
2. Foreign/second language at or beyond the 2000 level or equivalent N.B. This requirement is satisfied:
 1. by taking foreign/second language courses at Dalhousie at the second-year level
 2. if the student is a native speaker of a language other than English and studying at Dal
 3. by non-credit community-based learning of such languages as Mi'kmaq or American Sign Language

N.B. Approval of the advisor is required for those students wishing to satisfy this requirement by options (II) or (III) above.

Extended Experiential Component

1. Minimum one semester work or study abroad (or at Dalhousie for international students)
OR
2. Minimum (75 hours) volunteering or working in an intercultural context within Canada

N.B. Students may satisfy this requirement by a blending of work/study abroad for less than one full semester and a local volunteer or work placement. Students wishing to satisfy this requirement by a volunteer or work placement, or a blend of study abroad and work/volunteer placement, need the approval of the advisor.

Theoretical and practical understanding of issues in intercultural communication (three credit hours required: ASSC 3150.03).

Courses satisfying the Academic credit (six credit hours required):

- ARBC 2100.03/RELS 2052.03: A Cultural Intro to Arab World
- CANA 1102.03/INTD 1102.03: Halifax and the World I
- CANA 1103.03/INTD 1103.03: Halifax and the World II
- CANA 2050.03/HIST 2205.03: Historical Issues in Indigenous Studies
- CANA 2052.03/SOSA 2052.03 Contemporary Issues in Indigenous Studies
- CANA 3001.03/INDG 3400.03: Contemporary Indigenous Art
- CANA 3401.03/INTD 3401.03: Indigenous Representation in Film

Certificate in Theatre Creation

This certificate is open to currently registered Dalhousie and King's students in all Faculties.

Contact/Coordinator: Associate Director, Theatre (fspace.theatre@dal.ca)

The Certificate in Theatre Creation offers students opportunities to study playwriting, theatre directing, dramaturgy, and other skills associated with the creation of theatrical works. Through both practical and theoretical studies, students will develop an understanding of the basics of play analysis and dramaturgy before continuing to advanced electives enabling them to specialize by developing practical skills important to the work of playwrights and/or theatre directors. All courses offer experiential learning through practical creative exercises. This Certificate will be of interest to any Dalhousie or King's student who wishes to acquire foundational skills in creating theatrical works.

Learning Outcomes:

Upon completion of the certificate, students will:

- Understand the key methodologies for conducting preparatory analytical work on a playtext before rehearsals begin
- Understand the principles underlying the structuring of dramatic texts
- Understand the typical rehearsal process, including how to interact with actors, designers, and stage technicians
- Understand the theory and terminology of playwriting
- Understand the theory and terminology of theatre directing
- Understand audience-building activities, such as outreach and promotion
- Have applied theoretical discoveries to practical and creative dramaturgical and playwriting exercises
- Have applied theoretical exercises to practical exercises in theatre directing

Students will be able to count credit earned in these courses toward their undergraduate major, minor, or distribution requirements, unless otherwise specified in their program's regulations.

Requirements:

This certificate is a **12 credithour certificate**.

All students must complete the following two required courses:

- THEA 2901.03 (Dramaturgy: The Art of Developing Plays)

- THEA 2902.03 (Play Analysis for Directors)

Students must also choose TWO of the following electives:

- THEA 3201.03 (Directing for the Stage)
- THEA 3601.03 (The Playwright in the Theatre A)
- THEA 3602.03 (The Playwright in the Theatre B)
- THEA/PERF/MUSC 4250.03 (Artists as Entrepreneurs: From Concept to Creation)
- THEA 4925.03 (Puppets: Bringing Objects to Life)

Note: THEA 3201.03, THEA 3601.03 and THEA 3602.03 all require completion of the two required courses as prerequisites; the other two electives do not.

Courses in Arabic

Courses in Arabic are administered by the [Classics Department](#).

For general information on Bachelor of Arts program requirements, visit the [College of Arts and Science](#) section of the Academic Calendar.

Minor in Arabic Studies

Minor in Arabic Studies

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Students must take 18 credit hours at the 2000 level or above to a maximum of 27 credit hours from the following list:

Required:

- ARBC 2021.03: Intermediate Arabic I
- ARBC 2022.03: Intermediate Arabic II

And 12 credit hours selected from the following:

- ARBC 2030.03: Conversational Arabic: Introduction to Levantine Dialects
- ARBC 2100.03: Cultural Introduction to the Arab World
- ARBC 3030.03: Advanced Arabic I
- ARBC 3031.03: Advanced Arabic II
- ARBC 3040.03: Arabic Philosophical Texts: al-Ghazali or RELS 4010.03 Islamic Philosophy: al-Ghazali

- ARBC 3050.03: Arabic Philosophical Texts: Maimonides or RELS 4011.03 Jewish Philosophy: Maimonides
- ARBC 3100.03: Arabic Pre-Islamic Poetry
- CLAS 2281.03: Christian Beginnings: The Orthodox and Oriental Churches
- CLAS 3017.03: Meetings between Hellenism, Judaism, Christianity, and Islam until the Renaissance
- CLAS 3382.03: Medieval Philosophy from Arabic and Jewish Thinkers to Aquinas
- RELS 2003.03: Islam
- RELS 3003.03: Islam and the Others
- RELS 3009.03: Christianity in the Lands of Islam
- RELS 3012.03: Mystics of the Middle East
- RELS 4018.03: Christian Theology in Islamic Lands: John of Damascus

Note: Not all courses are offered each year. Please consult with the timetable for courses offered.

Contact [Arabic Studies](#) for more information.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions

ARBC 1021 Introduction to Arabic I

CREDIT HOURS: 3

Introduction to Arabic I focuses on the acquisition of the elementary foundation in Arabic language. It also offers basic information regarding the Arab world: ancient and modern culture and civilization, daily life, religions, literature, etc. The variety of Arabic offered by this course is *Modern Standard Arabic*, which represents the Arabic language nowadays used in all Arab countries in formal communication. *Modern Standard Arabic* is used in *writing*, but it is also a *spoken* language used in many formal situations. This course aims to cover: writing with Arabic characters, reading simple original texts in Arabic, the basic components of Arabic grammar and basic daily vocabulary. Some elements of spoken Arabic varieties (dialects) may be offered as well in the second term. CALENDAR NOTES: This course is the first part of the former full-year course ARBC 1020X/Y.06. This course description reflects the entirety of the pair (ARBC 1021.03 and ARBC 1022.03). This course along with ARBC 1022.03 fulfills the BA language requirement.

PREREQUISITES: Student wishing to take ARBC 1021.03: Introduction to Arabic I must take the Arabic Placement Test (APT). This test is administered by the instructor at the beginning of the regular academic session.

EXCLUSIONS: ASSC 1020X/Y.06, ARBC 1020X/Y.06

FORMATS: Lecture

ARBC 1022 Introduction to Arabic II

CREDIT HOURS: 3

Introduction to Arabic II is the continuation of ARBC 1021 that completes the elementary foundation in Arabic language. It also offers basic information regarding the Arab world: ancient and modern culture and civilization, daily life, religions, literature, etc. The variety of Arabic offered by this course is *Modern Standard Arabic*, which represents the Arabic language nowadays used in all Arab countries in formal communication. *Modern Standard Arabic* is used in *writing*, but it is also a *spoken* language used in many formal situations. This course aims to cover: reading simple original texts in Arabic, the basic components of Arabic grammar, and basic daily vocabulary and conversation. Some elements of spoken Arabic varieties (dialects) may be offered as well. CALENDAR NOTES: This course is the second part of the former full-year course ARBC 1020X/Y.06. This course description reflects the entirety of the pair (ARBC 1021.03 and ARBC 1022.03). This course along with ARBC 1021.03 fulfills the BA language requirement.

PREREQUISITES: ARBC 1021.03

EXCLUSIONS: ASSC 1020X/Y.06 ARBC 1020X/Y.06

FORMATS: Lecture

ARBC 2021 Intermediate Arabic I

CREDIT HOURS: 3

This course aims at consolidating the grammar and vocabulary acquired at the first level (Introduction to Arabic), and to improve reading and correct use of the syntactical structures in both oral and written communication. The course will also provide the student with the foundation necessary for reading standard forms of Arabic prose (especially newspapers). Written and oral translations from Arabic into English and vice-versa will be frequently proposed to the students in order to attain this purpose.

CALENDAR NOTES: This course is the first part of the former full-year course ARBC 2020X/Y.06. This course description reflects the entirety of the pair (ARBC 2021.03 and ARBC 2022.03).

PREREQUISITES: ARBC 1020.06 or ARBC 1021.03 and ARBC 1022.03, or permission of the instructor

EXCLUSIONS: ASSC 2020.06, ARBC 2020.06

FORMATS: Lecture

ARBC 2022 Intermediate Arabic II

CREDIT HOURS: 3

This course aims at continuing to consolidate the grammar and vocabulary acquired at the first level (Introduction to Arabic) and in ARBC 2021, and to improve reading and correct use of the syntactical structures in both oral and written communication. The course will also provide the student with the foundation necessary for reading standard forms of Arabic prose (especially newspapers) and for using Modern Standard Arabic in conversation. Written and oral translations from Arabic into English and vice-versa will be frequently proposed to the students in order to attain this purpose.

CALENDAR NOTES: This course is the second part of the former full-year course ARBC 2020X/Y.06. This course description reflects the entirety of the pair (ARBC 2021.03 and ARBC 2022.03).

PREREQUISITES: ARBC 2021.03, or permission of the instructor

EXCLUSIONS: ASSC 2020.06, ARBC 2020.06

FORMATS: Lecture

ARBC 2030 Conversational Arabic: Introduction to Levantine Dialects

CREDIT HOURS: 3

This class aims to complement students' knowledge of the formal language (Modern Standard Arabic) with an understanding of Levantine dialects (spoken in Jordan, Lebanon, Palestine/Israel, and Syria) and the ability to converse, informally, on daily life and activities. It is designed for students in their early stage of Arabic language acquisition. Students who have taken Standard Arabic at the introductory level at Dalhousie (ARBC 1020 or ARBC 1022) or elsewhere may take this class in parallel with ARBC 2020 or ARBC 2021, Intermediate Arabic (which focuses on Standard Arabic). Cultural aspects related to life, society and mentalities in the Levantine area of the Arabic speaking world will be introduced along with linguistic notions.

PREREQUISITES: ARBC 1020, ARBC 1022 or the instructor's permission.

EXCLUSIONS: Native speakers of any Arabic dialect (Levantine or other).

FORMATS: Lecture

ARBC 2100 A Cultural Introduction to the Arab World

CREDIT HOURS: 3

This course, offered in English, aims at providing students with the basic tools for approaching the Arab world from a cultural perspective. It offers an overview of the Arabic Islamic and Christian cultural heritage from the Classical ages through the modern and contemporary periods, with accent on literature, myths, mentalities, arts, youth and popular culture, etc.

CROSSLISTED: RELS 2052.03

FORMATS: Lecture | Discussion

ARBC 3030 Advanced Arabic I

CREDIT HOURS: 3

This course is a continuation of Intermediate Arabic II (ARBC 2022). The course is designed to: (1) consolidate the knowledge acquired in Modern Standard Arabic at the previous level(s); cursorily reading texts without vocalization, acquiring more complex notions of grammar and vocabulary, translating from Arabic into English; and (2) add new morphological forms (especially verbal and nominal derived forms, passive of verbs, irregular forms, etc.) and more complex syntactical structures, extended vocabulary, developed conversation abilities, translation from English into Arabic and composition skills.

PREREQUISITES: ARBC 2020.06 or ARBC 2022.03 or permission of the instructor

FORMATS: Lecture

ARBC 3031 Advanced Arabic II: Literary Readings

CREDIT HOURS: 3

This course is given mainly in Arabic for native speakers of Arabic and non-native students with a high command of Modern Standard Arabic. It is primarily designed to develop, at a high level, the students' command of Modern Standard Arabic through the reading and discussion of selected texts of Classical and modern Arabic literature (poetry and prose). The texts offer access to the highest linguistic level in Arabic, to elaborated syntactic structures and semantic issues, as well as to a rich and nuanced vocabulary.

PREREQUISITES: ARBC 3030.03 or permission of the instructor.

FORMATS: Lecture

ARBC 3040 Arabic Philosophical Texts: al-Ghazali

CREDIT HOURS: 3

Abu Hamid al-Ghazali (1058-1111) is one of the greatest Muslim thinkers of all time. This course is an introduction to his thought, based on a selection of passages in the original Arabic for advanced students of Arabic.

PREREQUISITES: ARBC 3030.03, and an introductory level course in Classics or Religious Studies, or permission of the instructor

FORMATS: Lecture | Seminar

ARBC 3050 Arabic Philosophical Texts: Maimonides

CREDIT HOURS: 3

Moses Maimonides (1135-1204) is one of the greatest Jewish thinkers of all time. Though he wrote some of his legal works in Hebrew, his major philosophical works were written in Arabic. This course is an introduction to his thought, based on a selection of passages from his *The Guide of the Perplexed* and other works in the original Arabic for advanced students of Arabic.

PREREQUISITES: ARBC 3030, and introductory level course in Classics or Religious Studies, or permission of the instructor

EXCLUSIONS: RELS 4011.03; CLAS 4011.03

FORMATS: Lecture | Seminar

ARBC 3100 Arabic Pre-Islamic Poetry

CREDIT HOURS: 3

This course offers an overview of the best pieces of the earliest poetry composed in Arabic language, in the Arabian Peninsula, within a period which preceded Islam. It focuses on the so-called "Suspended Poems" (Al-Mu'allaqat), considered as the master-pieces of seven (or ten, according to different sources) Arabian poets such as Imru'al-Qays, Tarafa, Antara, Zuhayr, etc.

CALENDAR NOTES: This course will be offered in English and is based on English translations of the poems. The course does not require previous notions or knowledge of the Arabic language. The required bibliography will be in English as well.

CROSSLISTED: CLAS 3100

RESTRICTIONS: Students must be beyond the first year of study.

FORMATS: Lecture | Seminar

Course Descriptions

ASSC 1000 Introduction to Computing for Non-Majors

CREDIT HOURS: 3

This is a course of technical computer literacy. Students can expect to learn about computers in a general way and how computers affect the way we live and work. Students will be given an opportunity to become familiar with typical applications of software such as word processors, spreadsheets and database applications. Other topics will include the use of the internet, creation of web pages, and simple programming concepts. No previous computer experience is required. This course is open to Arts and Social Sciences and Health Education students only.

CALENDAR NOTES: This course cannot be taken by BMgmt and BScRBM students. This course cannot be counted towards the Bachelor of Commerce or a Minor in Business

CROSSLISTED: CSCI 1200.03

EXCLUSIONS: COMP 1000.03, MGMT 1601.03, LIBS 1601.03, COMM 1501.03

FORMATS: Lecture | Lab

ASSC 1040 Culture, Society & International Students

CREDIT HOURS: 3

This course is designed for international students. It aims to discuss the basic elements of culture and society relative to the challenges of academic integration in a Canadian university. Students will reflect on various cultural contexts through a series of learning activities organized around two salient issues confronting international students: a.) the internationalization of Canadian education; and b.) the problems and prospects of immigrating to Canada. It will highlight cultural forms such as art, music & dance, literature, sports & film; and succinct discussions of major social institutions like the family, education, religion and state. This aims to enable students to examine critically the similarities and differences across societies and cultures where they face the challenges of social and academic adjustment to a successful learning experience.

FORMATS: Lecture | Tutorial | Discussion

ASSC 1050 Foundations for Learning

CREDIT HOURS: 3

This course introduces participants to university culture and helps them to enhance academic performance. Course experiences build a practical understanding of the learning process at the university level, enabling students to develop strategies to be more effective learners. Topics include performance expectations, conventions of academic critical reading and writing, research methods, discipline-specific learning strategies, knowledge management, learning communities, self-evaluation methods, and effective use of university resources.

PREREQUISITES: Faculty of Arts and Social Sciences students with 30 credit hours or less; and permission of Assistant Dean (Student Matters).

FORMATS: Lecture | Seminar

ASSC 1200 First-Year Seminar: Arts & Social Sciences

CREDIT HOURS: 3

The First-Year Seminar is a three-credit Humanities elective for first-year students, entering from high school. Topics vary; the seminar offers students a chance to explore a particular theme in a small-group format. The small class size provides students with opportunities to develop study, research and information literacy skills under a faculty mentor, and to develop project-based peer and group relationships. Registration is on a first-come, first-served basis and space is limited.

CALENDAR NOTES: Students may only receive credit for one First-Year Seminar course.

FORMATS: Seminar

ASSC 1201 First Year Seminar: Arts and Social Sciences

CREDIT HOURS: 3

The First-Year Seminar is a three-credit Humanities elective for first-year students, entering from high school. Topics vary; the seminar offers students a chance to explore a particular theme in a small-group format. The small class size provides students with opportunities to develop study, research and information literacy skills under a faculty mentor, and to develop project-based peer and group relationships.

FORMATS: Seminar

ASSC 1300 Introduction to the Humanities

CREDIT HOURS: 3

What does the term “Humanities” mean? What do the various subjects and disciplines we include under the name ‘Humanities’ share in common that distinguish them from natural sciences or social sciences? What distinguishes these Humanities disciplines from one another? How do they relate to the Arts? What are different arguments for the continued value of studying Humanities, and how might these arguments affect the choices of a Humanities student today? This course aims to orient students to the various possible paths within the Humanities at Dalhousie so they can discover which paths seem most exciting and best suited to their own passions and interests, while also showcasing the interrelations between Humanities subjects and the ways in which they can work together, as well as separately, to offer insights into past, present, and future societies and cultures.

EXCLUSIONS: ASSC 1400, OLCD 1000

FORMATS: Lecture

ASSC 1400 Introduction to the Social Sciences

CREDIT HOURS: 3

Although we are living in an era when the world enjoys the greatest average levels of wealth and health in history, never before have political, social, environmental, and cultural conflicts been so pressing. The world is warming, populism is rising, inequity is growing, and some have argued that the era of liberalism, and with it the social sciences and liberal arts, is all but finished. But is it? There is no textbook with solutions to these challenges, and no “one way” of approaching the future. By bringing together a team of outstanding educators from across FASS, this course aims to inspire an incoming cohort of 1st year students to approach these big issues. In the process, it will illuminate the common goals and unique traits of Social Scientists in FASS, showing the expertise they can bring to the crucial social challenges of our time.

EXCLUSIONS: ASSC 1300, OLCD 1000

FORMATS: Lecture

ASSC 1800 Computing and Society in History

CREDIT HOURS: 3

This course introduces students to the history of computing from early mechanical devices to the internet. Students will learn to read, write, and discuss scholarly arguments about how computing has shaped society, and how society has shaped computing, over time.

CROSSLISTED: CSCI 1800

EXCLUSIONS: HSTC 1800.03, HSTC 1200.06, HIST 2074.06, HSTC 2200.06, and SCIE 2000.06

FORMATS: Lecture

ASSC 1801 Case Studies in Computing and Society

CREDIT HOURS: 3

This course introduces students to specific topics in the history of computing. Topics may include algorithms, automation, or information. Students will learn to read, write, and discuss scholarly arguments about how computing has shaped society, and how society has shaped computing, over time.

CROSSLISTED: CSCI 1801

EXCLUSIONS: HSTC 1801.03, HSTC 1200.06, HIST 2074.06, HSTC 2200.06, SCIE 2000.06

FORMATS: Lecture

ASSC 1971 Engineering and Society: Historical and Philosophical Perspectives

CREDIT HOURS: 3

This course uses historical case studies to examine the connections between engineers, technology, and society. Topics will include the emergence of engineering as a profession; the societal impact of the Industrial Revolution; the rise of environmentalism and green technology; the relation of engineers to governments and militaries; and ethical responsibility for engineering disasters. In addition to developing written and oral communication skills, students will learn various ethical theories and apply them to key cases in engineering history.

CROSSLISTED: HIST 1971

EXCLUSIONS: HSTC 1801.03

FORMATS: Lecture | Tutorial

ASSC 3112 Writing Theory

CREDIT HOURS: 3

This course considers a range of approaches to writing. Students read widely in rhetoric and composition theory, participate in the ongoing conversation about writing, and heighten their understanding of the composition process. Writing intensive and writing centred, the course is ideal for anyone interested in writing and critical thinking.

PREREQUISITES: Instructor's permission required

CROSSLISTED: ENGL 3112.03

EXCLUSIONS: ASSC 3110.06XY/ENGL 3111.06XY

FORMATS: Lecture | Discussion

ASSC 3113 Writing Practice

CREDIT HOURS: 3

This course puts writing theory into practice. As part of their course work, students gain valuable experience working as writing tutors and/or assistant editors for an academic journal. The course is ideal preparation for careers in teaching or publishing, as well as for students going on to do graduate work.

PREREQUISITES: ASSC 3112.03 / ENGL 3112.03 or ENGL 2202.03 or EGLA 1000.03 AND EGLA 1001.03 or instructor's permission

CROSSLISTED: ENGL 3113.03

EXCLUSIONS: ASSC 3110.06X/Y / ENGL 3111.06X/Y

ASSC 3150 Intercultural Communication

CREDIT HOURS: 3

In this highly interactive course, students will study and apply key concepts of intercultural communication with the goal of developing an empathic understanding of other cultures and an ability to communicate effectively across cultures. Topics include: Awareness of one's own culture (values, norms) and of variations within it; verbal and nonverbal elements of communication, hierarchy ("power distance"), collectivism vs individualism, direct/indirect communication styles, conflict management styles. This course is required for students completing the Certificate in Intercultural Communication.

PREREQUISITES: Open to undergraduate students with at least 45 credit hours, or to any graduate student

FORMATS: Lecture | Discussion

ASSC 3311 Interdisciplinary Special Topics I

CREDIT HOURS: 3

This is an interdisciplinary course that investigates a subject in the arts or social science which does not emerge from a particular discipline. The topic will be announced in the year prior to the course being offered.

PREREQUISITES: At least two courses at the 2000 level in an arts or social science subject

FORMATS: Lecture | Seminar

ASSC 3312 Interdisciplinary Special Topics II

CREDIT HOURS: 3

This is an interdisciplinary course that investigates a subject in the arts or social science which does not emerge from a particular discipline. The topic will be announced in the year prior to the course being offered.

PREREQUISITES: At least two Classes at the 2000 level in an arts or social sciences subject

FORMATS: Lecture | Seminar

ASSC 4020 Editing and Publishing

CREDIT HOURS: 6

This seminar will introduce students to theories and practices of editing and publishing in both print and digital media. As participants in this experiential-learning seminar, students will accumulate specific skills and develop a portfolio relevant to working in the field of academic publishing. By providing practical experience with print and web-based publishing projects, the seminar will allow students to work in collaboration with the professor on the production of edited texts.

CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

PREREQUISITES: Seminar participants must have already completed 60 university credits or the equivalent of 10 full courses.

ASSC 4311 Interdisciplinary Special Topics III

CREDIT HOURS: 3

This is an interdisciplinary course that investigates a subject in the arts or social science which does not emerge from a particular discipline. The topic will be announced in the year prior to the course being offered.

PREREQUISITES: At least two courses at the 2000 level in an arts or social sciences subject

FORMATS: Lecture | Seminar

Introduction

Why Canadian Studies at Dalhousie? In this era of globalized exchange, and growing international citizenship and responsibilities, Canadian Studies programs are enjoying a renaissance. Knowing ourselves and understanding our place in the world as Canadians remains an urgent task for students and scholars alike.

Canadian Studies at Dalhousie University has always been based upon a very strong tradition of research and teaching in a wide range of Faculty of Arts and Social Science and Faculty of Science departments and in other associated faculties and professional schools, such as Health Professions, Law, and the King's School of Journalism. The Dalhousie Canadian Studies Program, with its various options, allows students to deepen their understanding of Canada in an exciting and coherent interdisciplinary context. As a second field of study leading to a Minor, a Double Major or a Combined Honours BA or BSc, it provides the opportunity to enrich and enhance a student's work on Canadian topics beyond his or her primary departmental home. To this end, Canadian Studies provides both a group of core courses that study Canada from an interdisciplinary perspective, and a long list of electives cross-listed in other departments throughout the University.

Former students of Canadian Studies have found that this interdisciplinary study has been of benefit to them in a wide range of activities and careers including journalism, public service, teaching at all levels, and graduate and professional studies.

Requirements

In addition to the departmental requirements listed below, students must satisfy the requirements outlined in the Degree Requirements section of this calendar.

For general information on Bachelor of Arts program requirements, visit the [College of Arts and Science](#) section of the Academic Calendar.

BA or BSc (120 credit hour) Double Major in Canadian Studies

1000 level

Six credit hours in French (a course in an Indigenous language may be substituted. Must be approved by the Coordinator).

2000 - 4000 level

A minimum of 30 and a maximum of 48 credit hours of Canadian Studies courses, 18 of which must be at the 3000-4000 level, for a combined minimum of 60 and a maximum of 84 credit hours in the two major subjects.

Required:

- CANA 2001.03: The Idea of Canada: Social and Political Perspectives
- CANA 2002.03: The Idea of Canada: Cultural and Literary Perspectives
- CANA 3000.03: Interdisciplinary Approaches to Canadian Themes
- CANA 4000.03: Canadian Studies Senior Seminar
- Further [Canadian Studies electives](#) as required. CANA 4001.03: Research Topics in Canadian Studies may count toward this requirement.

BA or BSc (120 credit hour) Combined Honours in Canadian Studies

1000 level

Six credit hours in French (a course in an Indigenous language may be substituted. Must be approved by the Coordinator).

2000 - 4000 level

A minimum of 30 and a maximum of 48 credit hours of Canadian Studies courses, 18 of which must be at the 3000-4000 level, for a combined minimum of 66 and a maximum of 84 credit hours in the two honours subjects.

Required:

- CANA 2001.03: The Idea of Canada: Social and Political Perspectives
- CANA 2002.03: The Idea of Canada: Cultural and Literary Perspectives
- CANA 3000.03: Interdisciplinary Approaches to Canadian Themes
- CANA 4000.03: Canadian Studies Senior Seminar
- CANA 4001.03: Research Topics in Canadian Studies
- Further [Canadian Studies electives](#) as required.

Note: Canadian Studies must be the second subject in a combined honours program. Canadian Studies is not available as a concentrated honours program.

BA (90 credit hour) Minor in Canadian Studies

See the [Minors](#) section of this calendar.

Minor in Canadian Studies

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A BA (90 credit hour) degree program with a minor in Canadian Studies is also available.

Required:

1000 level

- Six credit hours in French (a course in an Indigenous language may be substituted. Must be approved by the Coordinator.)

2000-4000 level

A minimum of 18 and a maximum of 27 credit hours from the list of Canadian Studies electives including:

- CANA 2001.03: The Idea of Canada: Social and Political Perspectives
- CANA 2002.03: The Idea of Canada: Cultural and Literary Perspectives

Note: CANA 3000.03: Interdisciplinary Approaches to Canadian Themes, and CANA 4000.03: Seminar in Canadian Studies, may count towards this requirement.

In addition to the courses listed below, appropriate courses in other departments may be taken as Canadian Studies credits, with the permission of the instructor concerned and the coordinator.

- CANA 1102.03: Halifax and the World: Part One
- CANA 1103.03: Halifax in the World: Part Two
- CANA 2004.03: Canadian Literature
- CANA 2005.03: Introduction to African Canadian Studies: Society, History and Culture
- CANA 2021.03/CANA 2022.03: Language and Culture
- CANA 2050.03: Historical Issues in Indigenous Studies
- CANA 2052.03: Contemporary Issues in Indigenous Studies
- CANA 2111.03: Is there an Atlantic Canada?

- CANA 2207.03: Indigenous Peoples and Empires: Canada's Origins to 1763
- CANA 2208.03: Patriots, Rebels, Refugees: Canada's roots in the Age of Revolution, 1763 to 1860
- CANA 2209.03: Making a Nation: Canada, 1860-1929
- CANA 2211.03: Social History of Canada before 1870
- CANA 2212.03: Social History of Canada since 1870

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions

CANA 1102 Halifax and the World: Part I

CREDIT HOURS: 3

This course offers an introduction to both International Development Studies and Canadian Studies by exploring the connections between important global issues and your daily life as a student in Halifax. As you walk across the Dalhousie campus and go about daily life in Halifax, your actions connect you to people around the globe and to the history of the city and world as well as to the many works of literature, art and music that depict these connections. Here are just a few examples of connections that we will explore in Halifax and the World: Part I (INTD / CANA 1102.03): • Walking across the Dalhousie campus you are traversing what remains unceded Mi'kmaq territory raising hard questions about relations between Settler and First Nations Peoples. • While walking downtown on a Friday night you might tread in the footsteps of the central characters in Hugh MacLennan's novel *Barometer Rising* and other major works of Canadian fiction. • As you walk through the city you'll see monuments and statues that commemorate the city's early colonial leaders – which raise questions

about how we chose to remember history of the city and its connections to the world. The course will critically examine the connections between daily life in Halifax and broader issues of colonialism, race and class relations, historical memory, ethics and justice through a combination of lectures, guest speakers, discussion groups, field trips, experiential learning in the city of Halifax. Assignments include written reflections on specific sites in Halifax which students are expected to visit and explore, a public engagement project, and a series of quizzes (there is no final exam).

CROSSLISTED: INTD 1102.03

EXCLUSIONS: INTD 1100, INTD 1101

CANA 1103 Halifax and the World: Part II

CREDIT HOURS: 3

This course builds on INTD/CANA 1102.03 (Halifax and the World: Part I) with a continued focus on the connections between important global issues and your daily life as a student in Halifax. In the winter semester, the course will focus on connections between life in Halifax and global development issues in other parts of the world. In particular, the course will highlight the 'commodity chains' that connect our daily consumption decisions to other people around the world who are involved in the life cycle of those commodities – from their production through to their disposal. The course will also specifically address the ethical questions and challenges that emerge from these connections and the practical ways in which we might respond to those questions. As in the first semester, the course will involve a combination of lectures, guest speakers, discussion groups, field trips, and experiential learning in the city of Halifax. The assignments will include written reflections on specific sites in Halifax which students are expected to visit and explore, a public engagement project, and a series of quizzes (there is no final exam).

CROSSLISTED: INTD 1103.03

EXCLUSIONS: INTD 1100, INTD 1101

CANA 2001 The Idea of Canada: Social and Political Perspectives

CREDIT HOURS: 3

This course employs an interdisciplinary approach to focus on selected themes in Canadian history and society. It explores developments before and after the arrival of European peoples, and focuses on the rise and the impact of settler colonialism. It examines major events in the formation of Canada, and gives students the opportunity to work directly with primary sources. Themes may include, but are not restricted to: Indigenous history and culture; imperial influences and colonialism; political and constitutional reform; bilingualism and multiculturalism; nationalism and ethnic conflict; globalization and protest movements.

CALENDAR NOTES: Course is open to first-year students.

EXCLUSIONS: CANA 2000X

FORMATS: Lecture | Discussion

CANA 2002 The Idea of Canada: Cultural and Literary Perspectives

CREDIT HOURS: 3

This course employs an interdisciplinary approach to focus on selected themes in Canadian history and society. Beginning with the premise that a nation is fundamentally a "narration," it asks: What sorts of stories do Canadians tell about themselves? Thus the course is centered on important texts - novels, poems, films, songs, and political documents - that relate formative events in Canadian history and that point to new, sometimes contested, directions for the future. Themes may include, but are not restricted to: First Nation's history and culture; multiculturalism; wilderness; the north; regional identity; and foreign policy.

CALENDAR NOTES: Course is open to first-year students

EXCLUSIONS: CANA 2000Y

FORMATS: Lecture | Discussion

CANA 2004 Canadian Literature

CREDIT HOURS: 3

From early exploration narratives to contemporary fiction, this course will survey a wide range of key texts in the development of Canadian literature in English. It will consider the literary and historical contexts that inform our readings, and identify and interrogate the various myths, images, icons and institutions that structure our ideas of what it means to be Canadian.

PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF

CROSSLISTED: ENGL 2004.03

EXCLUSIONS: ENGL 2207.03

CANA 2005 Introduction to African Canadian Studies: Society, History and Culture

CREDIT HOURS: 3

There has been a presence of African peoples in Canada for over 400 years; however, the rich histories of African-Canadian people have been often ignored. This course examines African Canadian society and culture from the historical to contemporary period. Topics will include patterns of immigration and settlement, slavery, family, continental African and diasporic connections, identity, arts and culture, education, religion, employment, justice and the law, the media, diasporic debates, Black struggles and resistance, and African Canadian achievements. The course will be taught from a critical race and gender perspective, and will include readings about the diverse Black communities across Canada.

CROSSLISTED: SOSA 2005.03, BAFD 2005.03

EXCLUSIONS: CANA 2115.03; SOSA 2115.03

FORMATS: Lecture

CANA 2021 Language and Culture

CREDIT HOURS: 3

Normally follows FREN 1045X/Y.06 or 1050X/Y.06, and is taken in the second year of study. This course provides the opportunity to practice and improve language skills (vocabulary and grammar) already acquired. Each year sections offer topics from the options listed below. Each section focuses upon a broad cultural topic via which language skills are developed. No prior knowledge of the topic is supposed. Various readings lead to discussions and oral presentations. Descriptions for sections offered in a specific year may be obtained in April from the Department. All courses and assignments are entirely in French. A maximum of two sections may be taken under the course designation of FREN 2021.03 and 2022.03. Approved in part with Canadian Studies. Contact French Department for details.

PREREQUISITES: FREN 1045X/Y.06 or 1050X/Y.06, or 2000-level Placement Test result, or instructor's permission

CROSSLISTED: FREN 2021.03

CANA 2022 Language and Culture

CREDIT HOURS: 3

Normally follows FREN 1045X/Y.06 or FREN 1050X/Y.06. This course provides the opportunity to practise and improve language skills (vocabulary and grammar) already acquired. Each year sections offer topics from the options listed under FREN 2021.03. Each section focuses upon a broad cultural topic via which language skills are developed. No prior knowledge of the topic is supposed. Various readings lead to discussions and oral presentations. Descriptions for sections offered in a specific year may be obtained in April from the Department. All courses and assignments are entirely in French. A maximum of two sections may be taken under the course designation of FREN 2021.03 and FREN 2022.03. Approved in part with Canadian Studies. Contact French Department for details.

PREREQUISITES: FREN 1045X/Y.06 or 1050X/Y.06, or 2000-level Placement Test result, or instructor's permission

CROSSLISTED: FREN 2022.03

CANA 2050 Historical Issues in Indigenous Studies

CREDIT HOURS: 3

This course is an interdisciplinary introduction to the history of encounters and relationships between indigenous peoples and European settlers in Canada. Topics may include treatise, colonial policy, residential schools, child welfare, resettlement, and the Indian Act. This course provides the necessary background to understand contemporary Indigenous issues.

CROSSLISTED: INDG 2050.03, HIST 2205.03

EXCLUSIONS: TYPR 1750 and TYPR 1751

CANA 2052 Contemporary Issues in Indigenous Studies

CREDIT HOURS: 3

This course offers an interdisciplinary introduction to contemporary challenges faced by Indigenous peoples in Canada. Topics may include language and culture, land rights, economics, governance and treaty relationships, child welfare and education, health, social services, environmental issues, violence, criminal justice and self-determination, political mobilization and resistance, and decolonization.

PREREQUISITES: Recommended: CANA 2050.03 or HIST 2205.03

CROSSLISTED: INDG 2052.03, SOSA 2052.03

FORMATS: Lecture | Discussion

CANA 2111 Is there an Atlantic Canada?

CREDIT HOURS: 3

This course will examine the historical and contemporary social issues related to the Maritimes and Atlantic Provinces. The course will critically question what is meant by "Atlantic Canada" and look at its social, demographic, economic, and cultural trends in relation to the rest of the country. Attention will be given to the role of Acadiens, Mi'kmaq, and African Nova Scotians as well as dominant powerholders in the construction of Atlantic Canada.

PREREQUISITES: One SOSA course at the 1000 level or FYP

CROSSLISTED: SOSA 2111.03

CANA 2207 Indigenous Peoples and Empires: Canada's Origins to 1763

CREDIT HOURS: 3

This course explores Canada's origins to 1763. It covers the history of Indigenous peoples before and after the arrival of Europeans. It addresses themes such as the role of the physical environment; the fur, fish, and timber trades; and the imperial struggle for dominance in North America. While the lectures will narrate the major developments in the seventeenth and eighteenth centuries, the tutorials will focus on specific issues, such as the role of treaties in Canadian history. The course climaxes with the Conquest of Quebec and the end of the Seven Years War.

CROSSLISTED: HIST 2207.03

CANA 2208 Patriots, Rebels, Refugees: Canada's roots in the Age of Revolution, 1763 to 1860

CREDIT HOURS: 3

As empires continued their international contest and Britain fought to maintain colonies within North America, old and new inhabitants of what would become Canada also wrestled with questions concerning who would exercise power within their communities and governing bodies. In the process they gave new and, at times, conflicting answers to old questions: what did it mean to be a patriot? who and what were they willing to defend? who and what were they prepared to resist? Immigrants, exiles and the refugees of European and North American wars shaped new homelands, even as the First Nations peoples became refugees within their own lands. In this course we explore the related questions of loyalty and conscience through the diaries and letters of men and women defining their place in a new order.

CROSSLISTED: HIST 2208.03

CANA 2209 Making a Nation: Canada, 1860-1929

CREDIT HOURS: 3

This is the story of how British North America was transformed into a distinct nation-state for the twentieth century. We'll see how a young Canada grappled with geographical, political, and social challenges: acquiring enormous territories amid growing provincial differences; maintaining loyalties to Empire while developing a New World identity; reconciling new and diverse cultural communities; and mobilizing for war.

CROSSLISTED: HIST 2209.03

CANA 2210 Many Canadas: Canada, 1930 to the present

CREDIT HOURS: 3

This course explores the remaking of Canada, including the shift from imperial to continental and nationalist politics, the rise and transformation of third-party political movements, and the emergence of new ideas about the rights and responsibilities of the liberal individual subject.

CROSSLISTED: HIST 2210.03

FORMATS: Lecture

CANA 2211 Social History of Canada before 1870

CREDIT HOURS: 3

This class examines the social history of pre-Confederation Canada through such topics as social control, violence and protest, women and domestic life, regionalism and marginal peoples, and the transformation of the economy.

CROSSLISTED: HIST 2211.03

EXCLUSIONS: HIST 2210X/Y.06

CANA 2212 Social History of Canada since 1870

CREDIT HOURS: 3

This class examines the social history of Canada since Confederation through such topics as the impact of industrialization, social classes, conflict, the role of women, the state and social development, and relationships among the wide variety of social groups in Canada.

CROSSLISTED: HIST 2212.03

EXCLUSIONS: HIST 2210X/Y.06

CANA 2218 Canadian Economy: Policy Issues

CREDIT HOURS: 3

Canada's economy today faces many problems: unemployment, productivity, income distribution, environmental protection, trade relations, federal-provincial fiscal relations, maintenance of social programs, etc. What are the most important economic policy issues that Canada now faces? What is the appropriate policy role for government?

PREREQUISITES: ECON 1101.03, 1102.03

CROSSLISTED: ECON 2218.03

CANA 2231 The Making of Modern Canada: Canadian Political History, 1896 to the Present

CREDIT HOURS: 3

This class surveys the major political developments in Canadian history since 1896. Topics to be examined include: regionalism and the emergence of third-party movements; French-English relations; federal-provincial relations; and the transformation of the liberal state in the post-1945 era.

CROSSLISTED: HIST 2231.03

EXCLUSIONS: HIST 2230

FORMATS: Discussion

CANA 2233 Canadian Economic History

CREDIT HOURS: 3

An examination of the economic history of Canada from the time of Confederation to WWI. Major topics explored include: the economic reasons for Confederation, the building of the CPR, the Wheat Boom, foreign trade and investment and the roots of regional disparities.

CROSSLISTED: ECON 2233.03

CANA 2235 History of Canadian Culture

CREDIT HOURS: 3

This course explores the history of Canadian culture since the mid-nineteenth century, including art, architecture, music, literature, sport, and mass media. Themes include creating a "national" culture amid regional differences, and the relationship between popular culture (heavily influenced by the United States) and "high" culture cultivated by the state.

CROSSLISTED: HIST 2235.03

CANA 2271 Atlantic Canada to Confederation

CREDIT HOURS: 3

A survey of the history of Atlantic Canada (the Maritimes and Newfoundland) from the origins of human habitation to the early 1860s. Emphasis is placed on the pattern of change and conflict which, over time, forged a series of "limited identities" that gradually became elements of an emerging regional personality.

CROSSLISTED: HIST 2271.03

CANA 2272 Atlantic Canada since Confederation: Regionalism, Identity, and Development, 1867-2000

CREDIT HOURS: 3

A survey of the history of Atlantic Canada (the Maritimes and Newfoundland) from the 1860s to the present. Emphasis is placed on how episodes such as the "age of sail", industrialization, class and gender conflict, war, the struggle for human rights and a chronic effort to play "catch-up" with the rest of the nation have defined this region's identity.

CROSSLISTED: HIST 2272.03

EXCLUSIONS: HIST 2270X/Y.06

FORMATS: Discussion

CANA 2280 African Nova Scotian History

CREDIT HOURS: 3

Do African Nova Scotians constitute a distinct people? This course provides an historical survey of the Black population in Nova Scotia, from its origins through to the present. Treating the people of African descent in Nova Scotia as a particular aspect of the broader African diaspora, we will examine the African Nova Scotian experience in both local and global contexts. The central tenet of the course is that the history of the Black population is an integral component of the region's history: neither can be understood in isolation from the other. A recurring theme is the active and conscious historical agency of African Nova Scotians in the struggle to assert their democratic rights and achieve self-determination.

CROSSLISTED: HIST 2280.03

EXCLUSIONS: TYPR 1650.03 and TYPR 1651.03

FORMATS: Lecture | Discussion

CANA 3000 Interdisciplinary Approaches to Canadian Themes

CREDIT HOURS: 3

This multidisciplinary seminar provides students with the opportunity to consider the structure and content of Canadian society from a variety of academic viewpoints, including the philosophical, historical, political, sociological, geographical, legal and literary. Professors discuss the study of Canada as seen from their different disciplinary perspectives, while the course co-ordinator leads a weekly tutorial.

CANA 3001 Topics in Canadian Studies

CREDIT HOURS: 3

CANA 3002 Topics in Indigenous Studies

CREDIT HOURS: 3

This course will explore significant themes in Indigenous Studies in Canada. As the particular topics to be discussed will vary from year to year, students are advised to consult with the home department for information.

PREREQUISITES: CANA 2050.03 or CANA 2052.03

CROSSLISTED: INDG 3002.03

EXCLUSIONS: INDG 3401.03

CANA 3008 Canadian Society and Politics

CREDIT HOURS: 3

This course about the nature of Canadian society has as its focus the study of structures and events which shape social and political organization in Canada. There is not only one way to understand Canadian society: generations of historians, political scientists and economists have provided valuable insights as to why Canadians have believed or acted or voted in one way or another. Sociology and Social Anthropology have helped to understand Canada in terms of contexts and conditions of life which have shaped the evolution of society as we know it. The course explores issues, events, discontents and groups which have produced the recurrent themes that underlie social life in Canada.

PREREQUISITES: One 1000 level SOSA course or FYP. RECOMMENDED: SOSA 2110 or another course on Canadian society and/or politics.

CROSSLISTED: SOSA 3008.03

CANA 3020 Canadian Cultural Landscapes

CREDIT HOURS: 3

This course explores the origins of one "signature" landscape in each province. Contact with different geographies shaped distinctive regional histories; but at the same time, the story of each place is tied to the national narrative. These landscapes also illuminate how nature has been understood, used, and transformed since the fifteenth century.

CROSSLISTED: GEOG 3210.03, HIST 3210.03

FORMATS: Discussion

CANA 3026 Le français québécois/ Quebec French

CREDIT HOURS: 3

Definition, origin and evolution of the French of Quebec. Study of its phonetic, lexical, morphosyntactic and semantic characteristics. Comparison with Canadian French outside of Quebec and with international French. Analysis of written and oral documents for the purpose of illustration. Approved with Linguistics.

PREREQUISITES: FREN 2045X/Y.06 or instructor's permission

CROSSLISTED: FREN 3026.03

CANA 3050 Indigenous Research Methodology & Knowledge Practices

CREDIT HOURS: 3

This course examines the methods and practices used for research with Indigenous groups or communities, and explores their ethical and political aspects. Topics will cover the history of research relationships with Indigenous groups or communities, community-based research approaches, research ethics, the political, cultural, and practical aspects of conducting research with groups or communities, research protocols, research agreements, data collection and analysis, and the OCAP (ownership, control, access, and possession) principle.

PREREQUISITES: CANA 2050/HIST 2205 or CANA 2052/SOSA 2052 or permission of instructor

CROSSLISTED: INDG 3050.03

FORMATS: Lecture | Discussion

CANA 3050 Indigenous Research Methods

CREDIT HOURS: 3

This course examines the methods and practices used for research with Indigenous groups or communities, and explores their ethical and political aspects. Topics will cover the history of research relationships with Indigenous groups or communities, community-based research approaches, research ethics, the political, cultural, and practical aspects of conducting research with groups or communities, research protocols, research agreements, data collection and analysis, and the OCAP® (ownership, control, access, and possession) principle.

PREREQUISITES: INDG 2050.03/CANA 2050.03/HIST 2205.03, or INDG 2052.03/CANA 2052.03/SOSA 2052.03, or permission of instructor

CROSSLISTED: INDG 3050.03

FORMATS: Lecture | Discussion

CANA 3052 Indigenous Social Health and Environmental Issues

CREDIT HOURS: 3

This course offers an interdisciplinary overview of contemporary social, health, and environmental issues impacting Indigenous peoples in Canada. Topics will include an exploration of the human rights of Indigenous peoples, social statistics, food sovereignty, health and well-being in Indigenous communities, connection to place, impact of environmental degradation and land dispossession, Indigenous knowledge and the environment, politics and political activism.

PREREQUISITES: A previous course in Indigenous Studies is recommended, eg. INDG 2050.03/CANA 2050.03/HIST 2205.03 or INDG 2052.03/CANA 2052.03/SOSA 2052.03

CROSSLISTED: INDG 3052.03, SOSA 3052.03

FORMATS: Lecture | Discussion

CANA 3185 Issues in the Study of Indigenous Peoples of North America

CREDIT HOURS: 3

This seminar is concerned with the historical background of the Native-European situation in North America and with issues arising from this background. Students will research issues which are significant to themselves and important to Native groups. Topics covered may vary from year to year, but will normally include a combination of historical issues such as culture change and contemporary issues such as land claims, self-determination and government policy, and social conditions of Natives. Approved with International Development Studies and Law and Society minor.

PREREQUISITES: One SOSA 1000 level course or FYP or CANA 2052.03 or SOSA 2052.03 1200X/Y.06

CROSSLISTED: SOSA 3185.03

CANA 3231 Modern Canadian Literature

CREDIT HOURS: 3

The historical period covered in this course extends from the end of World War I through the decade following World War II, a period during which Canada witnessed the formation of a modern literature in English. Varied aesthetic responses to ideas of the modern, the processes and technologies of modernization, and the conditions of social, cultural, economic, and political modernity will be addressed.

PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF or FYP

CROSSLISTED: ENGL 3231.03

CANA 3270 Contemporary Canadian Literature

CREDIT HOURS: 3

In this course, a variety of late twentieth-century and recent Canadian fiction and poetry texts will be studied from such perspectives as the following: postcolonial, postmodern, multicultural. The politics of cultural expression will be emphasized, as well as the relationship between ethics and aesthetic approaches to literature.

PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF.

CROSSLISTED: ENGL 3270.03

EXCLUSIONS: ENGL 3233.03

CANA 3400 Contemporary Indigenous Art

CREDIT HOURS: 3

This course examines a range of contemporary artistic expression by Indigenous people from nations across North America. Works examined may include painting, sculpture, hip hop, textile, and video. Focus will be on how Indigenous artists respond to contemporary issues of identity, politics, and culture.

CROSSLISTED: INDG 3400.03

EXCLUSIONS: CANA 3001.03

FORMATS: Lecture | Discussion

CANA 3401 Indigenous Representation in Film

CREDIT HOURS: 3

This course offers an overview of issues shaping the portrayal of Indigenous peoples in film. Focus will be on developing a critical understanding of Indigenous representation in political and cultural context. Films examined will span the silent to contemporary film era, and will include Indigenous cinema. Some of the videos included in this syllabus will contain sexual, violent, racist, sexist, and otherwise disturbing content.

CROSSLISTED: INDG 3401.03; FILM 3401.03

EXCLUSIONS: CANA 3002.03

FORMATS: Lecture | Discussion

CANA 3568 Canada and the World

CREDIT HOURS: 3

This course examines post-World War II Canadian Foreign Policy in two parts: (1) an analysis of 'landmark' policy issues; and (2) an investigation of the general factors that help to "explain" the form and content of Canadian foreign policy, with particular reference to the institutions and processes through which policy decisions are made. Issues discussed are likely to include: the "invention" of peacekeeping; the Mulroney government's involvement in the campaign to end apartheid in South Africa; the negotiation of the North American free trade; the politics of immigration and diasporas; and the place of the Arctic in Canada and international relations.

PREREQUISITES: POLI 2210 or POLI 2220 or POLI 2520 or POLI 2530 or HIST 2212 or HIST 2235 or HIST 2661 recommended

CROSSLISTED: POLI 3568.03

FORMATS: Seminar

CANA 3900 /CANA 3901: La littérature canadienne française/French-Canadian Literature

CREDIT HOURS: 3

In-depth study of a few major works of French-Canadian literature with emphasis on the period from 1945 to the present day.

PREREQUISITES: FREN 2201.03/2202.03

CROSSLISTED: FREN 3901.03

FORMATS: Discussion

CANA 4000 Seminar in Canadian Studies

CREDIT HOURS: 3

The course will explore in depth a single Canadian issue, topic or theme that crosses disciplinary borders. Along with the instructor, cross-appointed faculty from different departments will share their views on the subject. Topics might include aboriginal issues, Canada as a maritime nation, or Canadian film.

CALENDAR NOTES: CANA 4000.03 is also open, as an elective course, to Faculty of Arts and Social Sciences students with an interest in Canadian Studies who may not complete the Canadian-content requirements for the Concentration, minor or joint degrees.

CANA 4001 Research Topics in Canadian Studies

CREDIT HOURS: 3

This course will provide students with an opportunity to develop, in close consultation with a faculty member, a topic in Canadian Studies usually growing out of the work done in the seminar CANA 4000.03. Research will culminate in the writing of a major research paper. There will be regular one-to-one meetings with the chosen faculty member and progress meetings of the whole group. It is mandatory for those completing a Combined Honours in Canadian Studies and is highly recommended for those seeking the Emphasis or Double Major in Canadian Studies.

PREREQUISITES: CANA 4000.03 or permission of the instructor

FORMATS: Tutorial | Seminar

CANA 4300 Canadian Healthcare Delivery System

CREDIT HOURS: 3

The course is designed to provide an overview of healthcare in Canada, and more specifically in Nova Scotia, where the health reform process will be addressed. Aimed specifically at supervisors, middle management, and administrators the existing trends in healthcare from a national and provincial perspective will be reviewed. The goal of this course is to provide the student with a snapshot view of the existing healthcare system, its past development, and future direction.

CROSSLISTED: HESA 4000.03

CANA 4362 Topics in Canadian Music

CREDIT HOURS: 3

This course focuses on one or more of the following topics: Canadian composers, performers and musical institutions. The perspective may be analytical, aesthetic and/or historical.

CROSSLISTED: MUSC 4362.03

EXCLUSIONS: MUSC 3362.03

CANA 4500 Canadian Theatre to 1968: Performing the Nation

CREDIT HOURS: 3

Early Canadian theatre offers a fascinating example of a colonized nation's struggle to find its own dramatic voice in the face of powerful outside influences. This seminar course will explore the development of theatre in Canada from its roots in First Nations ritual and performance, to its encounters with British and European models and its eventual search for an independent identity via the Little Theatre movement, the Workers' Theatre movement and the Dominion Drama Festival. The course will close with a consideration of the influential Massey Commission and the birth of the Stratford Festival, Canada's first 'world class' theatre. Over the course of the term, special attention will be paid to the development of diverse dramatic traditions in French and English Canada.

Drama by representative playwrights will be studied alongside primary sources in Canadian theatre history to give students an integrated perspective on the complex artistic and political debates that helped to determine the character of performance in Canada.

PREREQUISITES: Permission of the instructor

CROSSLISTED: THEA 4500.03, ENGL 4500.03

CANA 4501 Canadian Theatre Since 1968: Interrogating Identities

CREDIT HOURS: 3

This seminar course will examine the ongoing emergence of uniquely Canadian forms of theatre in the years since the Massey Commission asserted the need to foster Canada's native talent. Topics to be considered will include: the controversial role of government subsidy and policy-making in Canadian culture; the differing models offered by the Stratford and Shaw Festivals, by the major regional theatres, and by 'alternate' and independent companies; the contrast between First Nations, English- and French-Canadian traditions; and the rise of the current 'Fringe' phenomenon. Drama by representative playwrights will be considered alongside post-colonial theory and primary sources in Canadian theatre history to help students consider what a genuinely 'Canadian' theatre

might look like. Above all, the course offers an opportunity to consider the complex relationship between theatre and national identity: who are 'we,' and how might our theatre express or even shape 'us'?

Introduction

A minor in Chinese Studies is an excellent interdisciplinary complement to a course of studies at Dalhousie or University of King's College in any area of arts, social sciences, sciences, or other programs. Students will attain a solid foundation for further academic, professional, and/or personal explorations of this fascinating culture, its history, and its complex relationship to other parts of Asia as well as to the West.

For general information on Bachelor of Arts program requirements, visit the [College of Arts and Science](#) section of the Academic Calendar.

Minor in Chinese Studies

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A minimum of 18 credit hours in Chinese Studies above the 1000 level. Within those 18 credit hours, students must include CHIN 2030.06: Intermediate Chinese (Mandarin), or CHIN 2031.03/CHIN 2032.03: Intermediate Chinese (Mandarin) and at least six credit hours above the 2000 level.

Contact [Russian Studies](#) for more information.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions

CHIN 1030 Introduction to Chinese (Mandarin)

CREDIT HOURS: 6

This course aims to provide basic competence in understanding and speaking Mandarin and reading Chinese characters. It is for students who have had no exposure to Mandarin or Cantonese. This course fulfills the BA language requirement.

CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

EXCLUSIONS: ASSC 2035.06X/Y; native speakers of Chinese (any dialect)

FORMATS: Lecture | Lab

CHIN 1031 Introduction to Chinese (Mandarin), Pt. 1

CREDIT HOURS: 3

This course aims to provide basic competence in understanding and speaking Mandarin and reading Chinese characters. It is for students who have had no exposure to Mandarin or Cantonese.

RESTRICTIONS: Students wishing to continue to Intermediate or Advanced Chinese language courses, or to use this course toward satisfying the BA language requirement, must complete both CHIN 1031 and CHIN 1032.

EXCLUSIONS: CHIN 1030X/Y.06, ASSC 2035X/Y.06; native speakers of Chinese (any dialect).

FORMATS: Lecture | Lab

CHIN 1032 Introduction to Chinese (Mandarin), Pt 2

CREDIT HOURS: 3

This course is a continuation of CHIN 1031 and aims to provide basic competence in understanding and speaking Mandarin and reading Chinese characters.

PREREQUISITES: CHIN 1031.03

RESTRICTIONS: Students wishing to continue to Intermediate or Advanced Chinese language courses, or to use this course toward satisfying the BA language requirement, must complete both CHIN 1031 and CHIN 1032.

EXCLUSIONS: CHIN 1030X/Y.06, ASSC 2035X/Y.06; native speakers of Chinese (any dialect).

FORMATS: Lecture | Lab

CHIN 2020 History of East Asia

CREDIT HOURS: 3

This introductory course explores historical change and social transformation in China, Japan, Korea, and Vietnam from antiquity to the present. It is an East Asian counterpoint to the historical narrative of Western civilization. Emphasizing the Chinese and Japanese experiences, the class will examine some of the more salient social, intellectual, political, economic, and environmental features apparent in the heritage of these societies, as well as some of the ways each society has influenced the others. No previous study of East Asia is expected or required.

CROSSLISTED: HIST 2820.03

FORMATS: Lecture | Discussion

CHIN 2030 Intermediate Chinese (Mandarin)

CREDIT HOURS: 6

For students with some background in Mandarin Chinese, this course is a continuation of CHIN 1030.06 Introduction to Mandarin. All four language skills—listening and speaking, reading and writing—will be further developed; as well, a broader range of Chinese cultural elements will be introduced.

CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

EXCLUSIONS: Native speakers of Chinese (any dialect)

FORMATS: Lecture | Lab

CHIN 2031 Intermediate Chinese (Mandarin), Pt. 1

CREDIT HOURS: 3

For students with some background in Mandarin Chinese, this class is a continuation of CHIN 1031 and CHIN 1032, Introduction to Chinese (Mandarin), pts. 1 and 2. All four language skills – listening and speaking, reading and writing – will be further developed. As well, a broader range of Chinese cultural elements will be introduced.

PREREQUISITES: CHIN 1031.03 and CHIN 1032.03 or equivalent

EXCLUSIONS: CHIN 2030X/Y.06; native speakers of Chinese (any dialect).
FORMATS: Lecture | Lab

CHIN 2032 Intermediate Chinese (Mandarin), Pt. 2

CREDIT HOURS: 3

For students with some background in Mandarin Chinese, this class is a continuation of CHIN 2031. All four language skills – listening and speaking, reading and writing – will be further developed. As well, a broader range of Chinese cultural elements will be introduced.

PREREQUISITES: CHIN 2031.03, or equivalent

EXCLUSIONS: CHIN 2030X/Y.06; native speakers of Chinese (any dialect).

FORMATS: Lecture | Lab

CHIN 2040 History of Chinese Science and Technology

CREDIT HOURS: 3

This course examines the history of Chinese science and technology in an intellectual, social, and cultural context. Students will read and learn about both Chinese and East Asian history generally and the long-term global trajectories of environmental and technological change that transformed the production of goods, the conduct of governance, and the relationship between humans and their environment long before the “rise of the West” with which so much of the history of science and technology is concerned.

CROSSLISTED: HSTC 2810.03

CHIN 2050 Chinese Culture

CREDIT HOURS: 3

This course introduces students to the Chinese cultural heritage. It offers an overview of traditional and modern Chinese culture through the lenses of history, sociology, religion, philosophy, literature, art, and film. The class offers students an opportunity not only to familiarize themselves with the historical legacies of China, but also to examine modern issues facing Chinese society in the contexts of international relations, society, economics, gender, ethnicity, and politics. No previous knowledge of Chinese culture or the Chinese language is required.

PREREQUISITES: None

CROSSLISTED: SOSA 2051.03

FORMATS: Lecture | Discussion

CHIN 2052 East Meets West in Popular Culture

CREDIT HOURS: 3

This course is devoted to examining intersections between “West” and “East” through the study of cross-cultural influences in popular literature, cinema, music, and comics in Europe, North America, and East Asia.

CROSSLISTED: CTMP 2336.03

RESTRICTIONS: Restricted to students in their 2nd year and above.

FORMATS: Lecture | Seminar

CHIN 2060 Chinese and Japanese Religions

CREDIT HOURS: 3

An introduction to the cultural, religious, and philosophical traditions of China and Japan. Topics to be covered include: Classical Confucianism, Neo-Confucianism, Philosophical and Religious Taoism, Shinto, Chinese and Japanese Buddhism. The course will also examine the interaction, competition, and overlap between these traditions.

CROSSLISTED: RELS 2012.03

FORMATS: Lecture | Seminar

CHIN 2070 Buddhism

CREDIT HOURS: 3

This course introduces the student to the Buddhist religious tradition, beginning with its origins and early developments in India and followed by a treatment of key themes of later world Buddhism such as meditation, devotion, monasticism, and ritual. The course thus exposes students to both Buddhism's early Indian doctrinal and institutional dimensions, and to aspects of Buddhism as practiced subsequently in China, Japan, and Tibet.

CROSSLISTED: RELS 2013.03

FORMATS: Lecture | Seminar

CHIN 2080 The East is Read: Early Modern Conceptions of Asian Thought

CREDIT HOURS: 3

This class considers early modern European interpretations of key Asian texts. It assesses both the merits of early modern interpretations of Asian thought and what these interpretations reveal about the self-consciousness of European thinkers in the early modern period.

CROSSLISTED: EMSP 2450.03

EXCLUSIONS: EMSP 2390.03, CHIN 2082.03, CTMP 2120.03, HSTC 2811.03

FORMATS: Seminar

CHIN 2082 Asia and the West: Centuries of Dialogue

CREDIT HOURS: 3

This course will explore some of the most important engagements of modern Western thinkers with various texts and traditions of East and/or South Asian thought, examine the very aspects of Asian thought that intrigued modern Western thinkers, and assess Western values and projects in their lights.

CROSSLISTED: EMSP 2390.03, HSTC 2811.03, CTMP 2102.03

EXCLUSIONS: EMSP 2450.03, CHIN 2080.03

FORMATS: Lecture | Seminar

CHIN 2290 Emerging Giants: The Economic Rise of China and India

CREDIT HOURS: 3

This course examines the economic history, current issues, and future trends of China and India, answering such questions as: What explains China's and India's growth? How is climate change affected by this growth? How are global labour markets affected? Must growth lead to rising inequality? Is democracy required for development?

PREREQUISITES: A grade of C or better in ECON 1101.03 and ECON 1102.03

CROSSLISTED: ECON 2213.03

FORMATS: Lecture

CHIN 3030 Advanced Chinese (Mandarin)

CREDIT HOURS: 6

For students with intermediate-level background in Mandarin Chinese, this course is a continuation of CHIN 2030.06 Intermediate Chinese (Mandarin). The course aims to develop further the four language skills: listening, speaking, reading, and writing. It seeks to enlarge the students' vocabulary in commonly used characters and phrases and provide students with further understanding of Chinese grammar, abilities to read expository and narrative writings, speaking skills to cope with real life situations, writing skills of short essays, as well as further understanding of Chinese culture and society.

CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

EXCLUSIONS: Native speakers of Chinese (any dialect)

FORMATS: Lecture | Lab

CHIN 3031 Advanced Chinese (Mandarin), Pt 1

CREDIT HOURS: 3

For students with intermediate background in Mandarin Chinese, this class is a continuation of CHIN 2031 and 2032, Intermediate Chinese (Mandarin), pts. 1 and 2. The class aims to develop further the four language skills: listening, speaking, reading and writing. It seeks to enlarge the students' vocabulary in commonly used characters and phrases and provide students with further understanding of Chinese grammar, abilities to read expository and narrative writings, speaking skills to cope with real life situations, writing skills suitable for short essays, as well as further understanding of Chinese culture and society.

PREREQUISITES: CHIN 2031 and CHIN 2032, or equivalent

EXCLUSIONS: CHIN 3030X/Y.06; native speakers of Chinese (any dialect).

FORMATS: Lecture | Lab

CHIN 3032 Advanced Chinese (Mandarin), Pt. 2

CREDIT HOURS: 3

For students with an intermediate background in Mandarin Chinese, this class is a continuation of CHIN 3031. The class aims to develop further the four language skills: listening, speaking, reading and writing. It seeks to enlarge the students' vocabulary in commonly used characters and phrases and provide students with further understanding of Chinese grammar, abilities to read expository and narrative writings, speaking skills to cope with real-life situations, writing skills suitable for short essays, as well as further understanding of Chinese culture and society.

PREREQUISITES: CHIN 3031 or equivalent

EXCLUSIONS: CHIN 3030X/Y.06; Native speakers of Chinese (any dialect).

FORMATS: Lecture | Lab

CHIN 3050 Topics in Asian Cinema

CREDIT HOURS: 3

Each year will focus on specific topics as explored in the cinema of various Asian countries. Particular attention will be paid to how Asian filmmakers employ different cinematic genres in their treatments of diverse aspects of Asian societies and cultures.

PREREQUISITES: Successful completion of the university writing requirement. See list of classes under College of Arts and Science, Degree Requirements, Writing Course Requirements

CROSSLISTED: THEA/FILM 3350.03

FORMATS: Lecture | Discussion

CHIN 3062 Modern Chinese Literature

CREDIT HOURS: 3

A survey of representative works in modern Chinese literature, this course is designed to enhance students' understanding of modern Chinese society and culture through reading works by major Chinese authors from the Republican period, over three decades—1919 to 1949. It was a period of cultural clashes between traditional Chinese culture and Western influences, a time of wars, political and ideological struggles and changes. All readings are in English, as is the language of instruction. A background in Chinese language, culture, and/or literature is encouraged but not required.

FORMATS: Lecture | Discussion

CHIN 3080 Literature of the Asian Diaspora

CREDIT HOURS: 3

Literature of the Asian Diaspora encompasses literature written in English by writers of Asian descent and heritage. Each year may have a specific focus, such as Asian Canadian and Asian American, Anglo-Asian, or Asian Australian literature. The course will concern itself with what constitutes Asian diasporic literature, its various historical and social contexts, as well as its narrative traditions and innovations.

CROSSLISTED: ENGL 3087.03

FORMATS: Lecture | Discussion

CHIN 4001 Independent Study

CREDIT HOURS: 3

PREREQUISITES: CHIN 3032 or equivalent

CHIN 4010 Special Topics

CREDIT HOURS: 3

This course explores a special topic that is not a regular offering of the department. It is taught as a lecture or seminar course. Since the topics covered in this course will vary from year to year, students are advised to consult the department prior to registration.

PREREQUISITES: CHIN 2050.03, SOSA 2051.03 or permission of the instructor

Cinema and Media Studies - Fountain School of Performing Arts

Location:

Dalhousie Arts Centre, Room 514
6101 University Avenue

PO BOX 15000
Halifax NS
B3H 4R2

Phone Number: (902) 494-3772

Fax Number: (902) 494-2801

Email Address: fspa@dal.ca

Website: www.dal.ca/performingarts

Introduction

Dalhousie provides ways to study many aspects of Cinema and Media Studies, within the vibrant context of our multi-disciplinary Fountain School of Performing Arts. We offer core courses in film history and audiovisual analysis as well as electives in national

cinemas, individual directors, film genres, television, video games, and various kinds of film and media theory. The Cinema and Media Studies program teaches students to think critically about the moving image in its historical, theoretical, and cultural contexts and to appreciate and view audiovisual storytelling media with eyes wide open.

The Bachelor of Arts in Cinema and Media Studies offers focused studies to prepare graduates for careers or further study in many areas, including film, television, digital media, curating, and reviewing, as well as professional programs such as Law and Education. Training in Cinema and Media Studies teaches transferrable analytical, problem-solving, and communications skills that are excellent preparation for many career paths in and beyond the world of moving images.

You can pursue a BA Major, Double Major, or Combined Honours degree in Cinema and Media Studies. Alternatively, you can pursue a BSc if you combine CMS with a Science subject for a Double Major or Combined Honours. Finally, you can complete a Minor in Film Studies, which includes a smaller range of electives than the Cinema and Media Studies program but shares many of the same courses, including the core courses.

The degree programs involve a curriculum of Cinema and Media Studies courses and a selection of other courses in different disciplines. The University has Academic Regulations which specify how these programs must be arranged. These regulations are all listed earlier in this Calendar, and prospective students should refer to them to become aware of the opportunities offered. There are a surprising number of different ways to arrange one's studies; recommended here are the paths you can follow if Cinema and Media Studies is your primary interest.

Degree Programs

In addition to the Fountain School requirements listed below, students must satisfy the requirements outlined in the [Degree Requirements](#) section of this calendar.

BA with Combined Honours in Cinema and Media Studies

BA (120 credit hour) Major in Cinema and Media Studies

BA (120 credit hour) Double Major in Cinema and Media Studies

Minor in Film Studies

BA (120 credit hour) Major in Cinema and Media Studies

The Major in Cinema and Media Studies requires a minimum of 30 and a maximum of 54 credit hours in Cinema and Media Studies beyond the 1000-level. This must include at least 18 credit hours beyond the 2000-level, and within them must be the following required courses:

- FILM 2311.03: Film Analysis or SMU ENGL 2511.03: Reading Film
- FILM 2301.03: Film History 1 or NSCAD AHIS 2800.03: Film History and Criticism 1890-1945
- FILM 3301.03: Film History 2 or NSCAD AHIS 2810.03: Film History and Criticism 1945-Present

In addition to all this, students must follow the general requirements for a BA Major degree.

In principle, no more than 6 credit hours of a student's degree in Cinema & Media Studies may be in film production as opposed to the academic study of cinema, although permission may be granted for a student to include more production courses in their degree if they also complete more than the minimum number of electives. Film production may include Fountain School apprenticeships (depending on the host organization), PERF 3721.03, PERF 3722.03, and includes NSCAD film production courses. If there is a course not currently on the list of pre-approved electives that students would like to take, and/or for permission to include more than 6 credit hours of production courses, contact the Associate Director of Cinema and Media Studies.

Students may not take both the Minor in Film Studies and the BA Major in Cinema and Media Studies.

The following elective courses can count toward degrees in Cinema and Media Studies:

- CANA 3401.03/INDG 3401.03/FILM 3401.03: Indigenous Representations in Film
- CHIN 3050.03/FILM 3350.03: Topics in Asian Cinema
- CTMP 2201.03 Mass and Digital Media Culture
- CTMP 3302.03: Film Theory
- CTMP 3304.03 / GWST 3304.03 / JOUR 3304.03: Through Her Eyes: Women and the Documentary Tradition
- CTMP 3305.03: Modern Film and the Theory of the Gaze
- ENGL 2085.03: Videogames: Story, World and Play

- ENGL 2095.03: Narrative in the Cinema
- ENGL 3300.03: TV: Theory and Criticism
- ENGL 3305.03: Fan Culture
- FILM 2350.03: Studies in Film Directors
- FILM 2360.03: Popular Cinema
- FILM 3314.03/THEA 3314.03/ENGL 3314.03: Shakespeare and his Contemporaries on Film
- FILM 3330.03: Film Theory I
- FILM 3331.03/GWST 3331.03: Film Theory II: Desire in Cinema
- FILM 3351.03: The Cinema of David Lynch
- FILM 3370.03: Animated Film
- FILM 3915.03/THEA 3915.03: Stars and Stardom on Stage and Screen
- FILM 4101.03: Short Apprenticeship (counts as a production credit)
- FILM 4103.03: Long Apprenticeship a and FILM 4104.03: Long Apprenticeship b (counts as a production credit)
- FILM 4390.03: Special Topics in Film Studies
- FILM 4391.03: Special Topics in Popular Cinema
- FILM 4392.03: Point of View in the Cinema
- FILM 4393.03/THEA 4924.03: Special Topics in Theatre and Cinema
- FILM 4926.03/PERF 4926.03/THEA 4926.03: Creative Responses to A Midsummer Night's Dream
- FREN 2800.03: Cinema: The French Phenomenon I
- FREN 2801.03: Cinema: The French Phenomenon II
- GERM 2040.03/FILM 2340.03: Monsters and Madness: 20th Century German Film
- HSTC 2500.03: Science Fiction in Film
- ITAL 2600.03/FILM 2314: Survey of Italian Cinema
- ITAL 3600.03/FILM 3320.03: Italian National Cinema
- JOUR 3662.03: The Journalist as Documentarian
- JOUR 3663.03: Documentary Journalism
- MUSC 2010.03/FILM 2010.03: Topics in Music and Cinema
- MUSC 2016.03/FILM 2016.03: Topics in Music and Cinema
- PERF 3721.03: Digital Design for Performance 1 (counts as production credit)
- PERF 3722.03: Digital Design for Performance 2 (counts as production credit)
- PERF 4250.03: Artists as Entrepreneurs
- RUSN 2036.03/FILM 2336.03: Russian Film I
- RUSN 2037.03/FILM 2337.03: Russian Film II
- RUSN 2046.03/FILM 2346.03: East European Cinema: War, Love, and Revolutions
- SOSA 3105.03: Media and Society
- SPAN 2150.03: Identidades Hispanas a través del cine (taught in Spanish)

The following 1000-level courses do not count toward degrees in Cinema and Media Studies, but are recommended for students looking for a relevant Writing Requirement credit:

- PERF 1000.03: Writing About Performance
- PERF 1002.03: Writing About Stage and Screen

The following courses at NSCAD University can count toward degrees in Cinema and Media Studies. Students will need to obtain Letters of Permission in order to take these classes for credit:

- NSCAD AHIS 2800.03: Film History and Criticism 1890-1945 (equivalent to FILM 2301)
- NSCAD AHIS 2810.03: Film History and Criticism 1945-Present (equivalent to FILM 3301)
- NSCAD AHIS 2820: History of Animation
- NSCAD AHIS 3190: Canadian Cinema: Art and Industry
- NSCAD AHIS 3822: Topics in Film History: Hitchcock's Films (3 credit hours)
- NSCAD AHIS 3826: Topics in Film History: Film Noir and Neo-Noir (3 credit hours)
- NSCAD AHIS 3832: Topics in Film History: Canadian Cinema (3 credit hours)
- NSCAD AHIS 3835: Topics in Film History: Contemporary Cinemas of Globalization (3 credit hours)
- NSCAD AHIS 3836: Topics in Film History: Subjectivities in Moving Pictures (3 credit hours)
- NSCAD AHIS 3837: Topics in Film History: Out on Screen (3 credit hours)
- NSCAD AHIS 3839: The Director's Cinema (3 credit hours)
- NSCAD AHIS 3850: History and Criticism of Documentary Film (3 credit hours)

- NSCAD AHIS 3840.03: Art Cinema Histories
- NSCAD AHIS 3841.03: Cinema and Postcolonialism
- NSCAD FHIS 3852: Cinemas of Globalization (3 credit hours)
- NSCAD FILM 2500.06: Introduction to Film Production (3 credit hours)
- NSCAD FILM 3305: Approaches in Non-Fiction

The following courses at St Mary's University can count toward degrees in Cinema and Media Studies. Students will need to obtain Letters of Permission in order to take these classes for credit:

- SMU ACST 3305: Moving Images of Atlantic Canada (3 credit hours)
- SMU ACST 3876.1: Atlantic Canadian Film and Television
- SMU ENGL 2325: The Media in Everyday Life (3 credit hours)
- SMU ENGL 2511.03: Reading Film (equivalent to FILM 2311)
- SMU ENGL 3313: Narrative in Fiction and Film (6 credit hours)
- SMU ENGL 3511.03: Film and the City
- SMU ENGL 3826: Contemporary Canadian Film and Television
- SMU FREN 2260: Francophone Cultures through Film
- SMU FREN 2300: French Film Comedy
- SMU HIST 3450: Film and History (3 credit hours)
- SMU RELS 3356.2: Religions in Film
- SMU SOSI 3346/CRIM 3303: Crime and the Media (3 credit hours)
- SMU SOSI 4452: Atlantic Canadian Film and Television (3 credit hours)

BA (120 credit hour) Double Major in Cinema and Media Studies

The Double Major in Cinema and Media Studies requires a minimum of 30 and a maximum of 48 credit hours in Cinema and Media Studies beyond the 1000-level. These must include at least 18 credit hours beyond the 2000-level, and within them must be the following required courses:

- FILM 2311.03: Film Analysis or SMU ENGL 2511.03: Reading Film
- FILM 2301.03: Film History 1 or NSCAD AHIS 2800.03: Film History and Criticism 1890-1945
- FILM 3301.03: Film History 2 or NSCAD AHIS 2810.03: Film History and Criticism 1945-Present

In addition to all this, students must follow the general requirements for a BA Double Major degree.

In principle, no more than 6 credit hours of a student's degree in Cinema & Media Studies may be in film production as opposed to the academic study of cinema, although permission may be granted for a student to include more production courses in their degree if they also complete more than the minimum number of electives. Film production may include Fountain School apprenticeships (depending on the host organization), PERF 3721.03, PERF 3722.03, and includes NSCAD film production courses. If there is a course not currently on the list of pre-approved electives that students would like to take, and/or for permission to include more than 6 credit hours of production courses, contact the Associate Director of Cinema and Media Studies.

Students may not take both the Minor in Film Studies and Double Major in Cinema and Media Studies.

The following elective courses can count toward degrees in Cinema and Media Studies:

- CANA 3401.03/INDG 3401.03/FILM 3401.03: Indigenous Representations in Film
- CHIN 3050.03/FILM 3350.03: Topics in Asian Cinema
- CTMP 2201.03: Mass and Digital Media Culture
- CTMP 3302.03: Film Theory
- CTMP 3304.03 / GWST 3304.03 / JOUR 3304.03: Through Her Eyes: Women and the Documentary Tradition
- CTMP 3305.03: Modern Film and the Theory of the Gaze
- ENGL 2085.03: Videogames: Story, World and Play
- ENGL 2095.03: Narrative in the Cinema
- ENGL 3300.03: TV: Theory and Criticism
- ENGL 3305.03: Fan Culture
- FILM 2350.03: Studies in Film Directors

- FILM 2360.03: Popular Cinema
- FILM 3314.03/THEA 3314.03/ENGL 3314.03: Shakespeare and his Contemporaries on Film
- FILM 3330.03: Film Theory I
- FILM 3331.03/GWST 3331.03: Film Theory II: Desire in Cinema

- SPAN 2150.03: Identidades Hispanas a través del cine (taught in Spanish)

The following 1000-level courses do not count toward degrees in Cinema and Media Studies, but are recommended for students looking for a relevant Writing Requirement credit:

- PERF 1000.03: Writing About Performance
- PERF 1002.03: Writing About Stage and Screen

The following courses at NSCAD University can count toward degrees in Cinema and Media Studies. Students will need to obtain Letters of Permission in order to take these classes for credit:

- NSCAD AHIS 2800.03: Film History and Criticism 1890-1945 (equivalent to FILM 2301)
- NSCAD AHIS 2810.03: Film History and Criticism 1945-Present (equivalent to FILM 3301)
- NSCAD AHIS 2820: History of Animation
- NSCAD AHIS 3190: Canadian Cinema: Art and Industry
- NSCAD AHIS 3822: Topics in Film History: Hitchcock's Films (3 credit hours)
- NSCAD AHIS 3826: Topics in Film History: Film Noir and Neo-Noir (3 credit hours)
- NSCAD AHIS 3832: Topics in Film History: Canadian Cinema (3 credit hours)
- NSCAD AHIS 3835: Topics in Film History: Contemporary Cinemas of Globalization (3 credit hours)
- NSCAD AHIS 3836: Topics in Film History: Subjectivities in Moving Pictures (3 credit hours)
- NSCAD AHIS 3837: Topics in Film History: Out on Screen (3 credit hours)
- NSCAD AHIS 3839: The Director's Cinema (3 credit hours)
- NSCAD AHIS 3850: History and Criticism of Documentary Film (3 credit hours)
- NSCAD AHIS 3840.03: Art Cinema Histories
- NSCAD AHIS 3841.03: Cinema and Postcolonialism

- NSCAD FHS 3852: Cinemas of Globalization (3 credit hours)
- NSCAD FILM 2500.06: Introduction to Film Production (3 credit hours)
- NSCAD FILM 3305: Approaches in Non-Fiction

The following courses at St Mary's University can count toward degrees in Cinema and Media Studies. Students will need to obtain Letters of Permission in order to take these classes for credit:

- SMU ACST 3305: Moving Images of Atlantic Canada (3 credit hours)
- SMU ACST 3876.1: Atlantic Canadian Film and Television
- SMU ENGL 2325: The Media in Everyday Life (3 credit hours)
- SMU ENGL 2511.03: Reading Film (equivalent to FILM 2311)
- SMU ENGL 3313: Narrative in Fiction and Film (6 credit hours)
- SMU ENGL 3511.03: Film and the City
- SMU ENGL 3826: Contemporary Canadian Film and Television
- SMU FREN 2260: Francophone Cultures through Film
- SMU FREN 2300: French Film Comedy
- SMU HIST 3450: Film and History (3 credit hours)
- SMU RELS 3356.2: Religions in Film
- SMU SOSI 3346/CRIM 3303: Crime and the Media (3 credit hours)
- SMU SOSI 4452: Atlantic Canadian Film and Television (3 credit hours)

BA (120 credit hour) Combined Honours in Cinema and Media Studies

The degree will consist of a minimum of 30 and a maximum of 48 credit hours in Cinema and Media Studies beyond the 1000-level. As per Dalhousie's regulations for Combined Honours degrees, grades in these courses must be 'C' or better, otherwise the course will not count toward the degree. They must include at least 18 credit hours beyond the 2000-level, and within them must be the following required courses:

- FILM 2311.03: Film Analysis or SMU ENGL 2511.03: Reading Film
- FILM 2301.03: Film History 1 or NSCAD AHIS 2800.03: Film History and Criticism 1890-1945
- FILM 3301.03: Film History 2 or NSCAD AHIS 2810.03: Film History and Criticism 1945-Present
- FILM 3330.03: Film Theory I or FILM 3331.03: Film Theory II: Desire in Cinema or FILM 4392.03: Point of View in the Cinema or CTMP 3305.03: Theory of the Gaze or CTMP 3302.03: Film Theory or ENGL 3300.03: TV Theory & Criticism

A student in this program may elect to complete the Honours Qualifying Credit in either Cinema and Media Studies or the Combined field. In CMS, the credit is a zero-credit, letter-graded paper with a professionalization component (participation at a colloquium) designed to act as a capstone to the degree by providing an opportunity to plan, conduct, and present independent research.

In addition to all this, students must follow the general requirements for a BA Combined Honours degree, including a 2.0 overall GPA for graduation and minimum GPA of 2.7 in Cinema and Media Studies courses.

In principle, no more than 6 credit hours of a student's degree in Cinema & Media Studies may be in film production as opposed to the academic study of cinema, although permission may be granted for a student to include more production courses in their degree if they also complete more than the minimum number of electives. Film production may include Fountain School apprenticeships (depending on the host organization), PERF 3721.03, PERF 3722.03, and includes NSCAD film production courses. If there is a course not currently on the list of pre-approved electives that students would like to take, and/or for permission to include more than 6 credit hours of production courses, contact the Associate Director of Cinema and Media Studies.

Students may not take both the Minor in Film Studies and the Combined Honours in Cinema and Media Studies.

The following elective courses can count toward degrees in Cinema and Media Studies:

- CANA 3401.03/INDG 3401.03/FILM 3401.03: Indigenous Representations in Film
- CHIN 3050.03/FILM 3350.03: Topics in Asian Cinema

Minor in Film Studies

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program. It is an inter-University program that allows students to obtain credit hours from any of the participating institutions in addition to Dalhousie: Nova Scotia College of Art and Design University, Saint Mary's University, and the University of King's College.

A minimum of 24 credit hours in Film Studies above the 1000 level are required. Within those 24 credit hours, students must include:

- FILM 2311.03: Film Analysis or SMU ENGL 2511.03: Reading Film
- FILM 2301.03: Film History 1 or NSCAD AHIS 2800.03: Film History and Criticism 1890-1945
- FILM 3301.03: Film History 2 or NSCAD AHIS 2810.03: Film History and Criticism 1945-Present
- 9 credits of electives above the 2000 level

* Students are strongly advised to take the core courses as soon as they declare their film minor.

Course Descriptions

FILM 2010 Topics in Music and Cinema

CREDIT HOURS: 3

This course investigates various engagements of music and cinema. Topics vary from year to year and may include: diegetic/non-diegetic music, musical narrativity in film, representation, manipulation, cinema and opera, music or sound as special effect, film-scoring and the use of notable songs/tunes.

CROSSLISTED: MUSC 2010.03

EXCLUSIONS: MUSC 2015.06XY

FORMATS: Lecture | Lab

FILM 2016 Topics in Music and Cinema

CREDIT HOURS: 3

This course investigates various engagements of music and cinema. Topics vary from year to year and may include: diegetic/non-diegetic music, musical narrativity in film, representation, manipulation, cinema and opera, music or sound as special effect, film-scoring and the use of notable songs/tunes.

CROSSLISTED: MUSC 2016

EXCLUSIONS: MUSC 2015.06

FORMATS: Lecture | Lab

FILM 2043 How iRead the Eye-Books: Film and Multimedia Adaptations of World Literature

CREDIT HOURS: 3

In this course, we will be reading and watching the world adaptations of international literary classics and popular contemporary works. From analyzing the art of comic strips and Supermen sagas to e-books designed for iPads and Android mobile devices, during the semester students will learn to appreciate both the text and its visual renderings using theoretical frameworks of adaptation and textual fidelity, as well as will have an opportunity to practice their skills in the art of film-making and constructing an iBook.

CROSSLISTED: RUSN 2043.03, THEA 2043.03, ENGL 2043.03

EXCLUSIONS: RUSN 2045.06, ENGL 2045.06, THEA 2347.06

FORMATS: Lecture

FILM 2044 How iRead the Eye-Books: Film Adaptations of World Literature II

CREDIT HOURS: 3

In this course, we will be reading and watching the world adaptations of international literary classics and popular contemporary works. From analyzing the art of comic strips and Supermen sagas to e-books designed for iPads and Android mobile devices, during the semester students will learn to appreciate both the text and its visual renderings using theoretical frameworks of adaptation and textual fidelity, as well as will have an opportunity to practice their skills in the art of film-making and constructing an iBook.

CROSSLISTED: RUSN 2044.03, ENGL 2044.03

EXCLUSIONS: RUSN 2045, THEA 2347, ENGL 2045, FILM 2347

FORMATS: Lecture

FILM 2301 Film History 1

CREDIT HOURS: 3

This course surveys the history of film from its invention in the 1890s to the 1950s. Students will learn about the aesthetic, social, and technological changes that affected the development of cinema. The course addresses films from both the silent and sound eras, and from film industries around the world. Artistic movements that may be studied include Soviet Montage, German Expressionism, Classical Hollywood, Neorealism, and the African-American 'race films'.

PREREQUISITES: Any course that qualifies as a writing credit.

EXCLUSIONS: THEA 2300X/Y.06, THEA 2301.03, NSCAD AHIS 2800.03

FORMATS: Lecture | Discussion

FILM 2311 Film Analysis

CREDIT HOURS: 3

This course introduces students to the close textual analysis of narrative films. To this end, a few films will be studied in depth. Their formal properties, such as mise-en-scène, sound, cinematography, and editing, will be analyzed and situated in social and historical contexts, including issues of race, class, and gender. Through screenings, readings, lectures, discussions and exercises, students will develop their technical vocabulary and skills in film interpretation.

EXCLUSIONS: SMU ENGL 2511.03

FORMATS: Lecture | Discussion

FILM 2314 Survey of Italian Cinema

CREDIT HOURS: 3

Course to be held in English; with part of the course work in Italian for Italian majors. Survey of the Italian Cinema from the origins onwards. Focus: the 'golden age' of Italian silent movies; visual culture under fascism; Italian neo-realism; the impact of television.

CROSSLISTED: ITAL 2600.03

FORMATS: Lecture

FILM 2336 Russian Film I

CREDIT HOURS: 3

This course surveys Russian film from the Silent Era to "Thaw" (1900-1960s). Its goal is to develop students' knowledge of cinema in its historical and cultural context through critical watching, reading, thinking, and writing. The course will concentrate on the development of main genres and styles in Russian and official Soviet Cinema, major directors and styles. Full versions of films will be screened each Monday night. Later in the week they will be followed by a lecture, discussion, and viewing additional short clips.

CROSSLISTED: RUSN 2036

FORMATS: Lecture | Discussion

FILM 2337 Russian Film II

CREDIT HOURS: 3

This course will provide an overview of the most significant trends and periods in the development of Russian cinema since the 1960s until the latest blockbusters. The course will concentrate on the development of main genres and styles, major directors and productions, issues of race, gender, war and violence in Soviet, post-Soviet and new Russian cinema.

CROSSLISTED: RUSN 2037.03

FORMATS: Lecture | Discussion

FILM 2340 Monsters and Madness: 20th Century German Film

CREDIT HOURS: 3

This course provides an introduction to German film of the early 20th century. We will focus on one of the most influential period of cinema history, German Expressionism, and continue to early sound film, Nazi-Propaganda and Postwar film. No knowledge of the German language is necessary. All films are subtitled.

CROSSLISTED: GERM 2040.03

FILM 2346 East European Cinema: War, Love, and Revolutions

CREDIT HOURS: 3

This course brings post-Berlin Wall European film into the fray of current debates on cultural identity, transnational cinema, and postcolonialism. Despite the state control, the filmmakers of communist Europe were often more bold, honest and provocative than their profit-driven Hollywood counterparts. By drawing on political, cultural, and philosophical discourses, the course will offer pointed analyses of most significant East European films that touch upon issues of ethnicity, gender, and overcoming censorship.

CROSSLISTED: RUSN 2046.03

FORMATS: Lecture | Discussion

FILM 2350 Studies in Film Directors

CREDIT HOURS: 3

This course offers students the opportunity to study in detail the work of an individual film director. Aesthetic, political, philosophical and/or ethical issues related to the director's work will be studied via close analysis of his/her most significant films. The identity of the director to be studied will be posted on the Academic timetable.

CROSSLISTED: THEA 2350.03

FORMATS: Lecture | Discussion

FILM 2360 Popular Cinema

CREDIT HOURS: 3

This course helps students develop their critical understanding of popular cinema. It introduces different approaches to the analysis of popular film, and considers principles of production, distribution, exhibition and reception in major industries such as Hollywood and popular Hindi and Hong Kong cinemas. Throughout, it addresses the implications of the concept of "popular cinema."

CROSSLISTED: THEA 2360.03

EXCLUSIONS: THEA 2320.06

FORMATS: Lecture | Discussion

FILM 2911 Stars and Stardom on Stage and Screen

CREDIT HOURS: 3

What makes a 'star' actor? How do stars' gifts and idiosyncrasies interact with the possibilities of their media and with market forces to create celebrity? This

course explores stage and screen stardom as historical, aesthetic, and economic phenomena that illuminate shifting constructions of beauty, class, gender, sexuality, race, and ethnicity.

CROSSLISTED: THEA 2911.03

FORMATS: Lecture | Discussion

FILM 3301 Film History 2

CREDIT HOURS: 3

This course surveys global cinema and new media from the 1950s until the present day. Students will learn about the aesthetic, social, and technological changes that have affected the development of cinema and new media, as well as the political contexts of these changes. The course looks at how capitalism, different forms of imperialism, feminism, queer activism, and decolonization have shaped and responded to the texts and institutions of cinema and new media.

PREREQUISITES: Any course that qualifies as a Writing credit. Recommended PERF 1002.03

EXCLUSIONS: THEA 2300X/Y.06 and NSCAD AHIS 2810.03

FORMATS: Lecture | Discussion

FILM 3313 Documentary, Experimental and Animated Film

CREDIT HOURS: 3

This course introduces students to the historical, social, ethical and aesthetic dimensions of documentary, experimental and animated cinema. The course is taught through lectures, discussions, film screenings and readings.

PREREQUISITES: THEA 2311.03 or permission of the instructor

CROSSLISTED: THEA 3313.03

EXCLUSIONS: THEA 2312.03 and NSCAD AHIS 3850.03

FORMATS: Lecture | Discussion

FILM 3314 Shakespeare and his Contemporaries on Film

CREDIT HOURS: 3

This course will study the adaptation of Shakespeare and his contemporaries to the medium of cinema, focusing on the differences between theatre and cinema, the process of textual adaptation, the updating of classic stories to modern settings, and the close analysis of the performer's choices.

PREREQUISITES: Experience in Shakespeare at any level OR experience in Cinema and Media Studies at any level.

CROSSLISTED: ENGL 3314.03, THEA 3314.03

EXCLUSIONS: THEA 2313.03, ENGL 2313.03

FORMATS: Lecture | Seminar

FILM 3320 Italian National Cinema

CREDIT HOURS: 3

The focus of the course: : the Italian cineastes, who received international recognition since the 1960s. It aims to investigate Italian film production within the social and cultural climate of contemporary Italy.

CROSSLISTED: ITAL 3600.03, THEA 3320.03

FORMATS: Lecture | Seminar

FILM 3330 Film Theory I

CREDIT HOURS: 3

This course will survey and discuss the major cinematic theories of the twentieth century: these may include formalism, realism, semiotics, psychoanalytic film theory, and/or post-structuralism. It addresses debates and approaches which have sought to define new terminology and new methodologies for the study of the moving images.

PREREQUISITES: Previous Cinema and Media Studies course or permission of the instructor

CROSSLISTED: THEA 3330.03

EXCLUSIONS: CTMP 3302.03

FORMATS: Lecture | Discussion

FILM 3331 Film Theory 2: Desire in Cinema

CREDIT HOURS: 3

This course focuses on theories of gender, sexuality and desire in the cinema. It addresses debates around the representation of gender, sexuality and desire on screen, as well as theories of spectatorial desire.

PREREQUISITES: Previous Cinema and Media Studies course or Gender and Women's Studies course or permission of the instructor

CROSSLISTED: GWST 3331.03

FORMATS: Lecture | Discussion

FILM 3350 Topics in Asian Cinema

CREDIT HOURS: 3

Each year will focus on specific topics as explored in the cinema of various Asian countries. Particular attention will be paid to how Asian filmmakers employ different cinematic genres in their treatments of diverse aspects of Asian societies and cultures. The identity of the topic to be studied will be assigned at the end of the preceding academic year and then posted in the University's timetable.

PREREQUISITES: Any course that qualifies as a Writing credit.

CROSSLISTED: CHIN 3050.03

FORMATS: Lecture | Discussion

FILM 3351 The Cinema of David Lynch

CREDIT HOURS: 3

David Lynch is one of the most fascinating filmmakers alive today. His work includes relatively mainstream and popular successes, such as *The Elephant Man* and the TV series *Twin Peaks*, along with more difficult cult films such as *Eraserhead*, *Lost Highway* and *Mulholland Drive*. In this course, students will engage in close analysis of Lynch's works, his source material, and his inspirations.

PREREQUISITES: FILM 2301.03, FILM 2311.03 OR FILM 3301.03

FORMATS: Lecture | Discussion

FILM 3353 Topics in Black and African Diaspora Cinemas

CREDIT HOURS: 3

Calendar: This course examines moving images produced by Black filmmakers from Africa and/or the African Diaspora. It will analyze artistic forms and address how these moving images speak to and about cultures and societies. The specific topic to be studied will be assigned at the end of the preceding academic year and then posted in the University's timetable. Description for Sample Syllabus: This course focuses on three important sites of African film production: the post-independence cinema of Senegal, the popular cinema of Nigeria (a.k.a. Nollywood), and the thriving documentary industry across sub-Saharan Africa. It examines such topics as colonialism and postcolonialism; the significance of languages (French, English, Igbo, etc.) in filmmaking; modes of production, distribution, and exhibition; economic issues and class; and representations of gender and sexuality.

CALENDAR NOTES: Calendar Description: This course examines moving images produced by Black filmmakers from Africa and/or the African Diaspora. It will analyze artistic forms and address how these moving images speak to and about cultures and societies. The specific topic to be studied will be assigned at the end of the preceding academic year and then posted in the University's timetable.

COREQUISITES: None

PREREQUISITES: None. One previous course in Black and African Diaspora Studies or Film/Cinema and Media Studies recommended but not required.

CROSSLISTED: None

RESTRICTIONS: None

EXCLUSIONS: None

FORMATS: Lecture | Discussion | Online Delivery

FILM 3370 Animated Film: Technologies, Characters, and Societies

CREDIT HOURS: 3

This class is an historical survey and theoretical investigation of animation techniques and aesthetics. Three interwoven themes of this course will be addressed throughout: the techniques of animation, the construction of characters, and the role of animation in society.

EXCLUSIONS: FILM 2370.03, THEA 2370.03

FORMATS: Lecture | Seminar

FILM 3401 Indigenous Representation on Film

CREDIT HOURS: 3

This course offers an overview of issues shaping the portrayal of Indigenous peoples in film. Focus will be on developing a critical understanding of Indigenous representation in political and cultural context. Films examined will span the silent to contemporary film era, and will include Indigenous cinema. Some of the videos included in this syllabus will contain sexual, violent, racist, sexist, and otherwise disturbing content.

CROSSLISTED: CANA 3401.03, INDG 3401.03

EXCLUSIONS: CANA 3002.03

FORMATS: Lecture

FILM 3915 Stars and Stardom on Stage and Screen

CREDIT HOURS: 3

What makes a 'star' actor? How do stars' gifts and idiosyncrasies interact with the possibilities of their media and with market forces to create celebrity? This course explores stage and screen stardom as historical, aesthetic, and economic phenomena that illuminate shifting constructions of beauty, class, gender, sexuality, race, and ethnicity.

CROSSLISTED: THEA 3915.03
EXCLUSIONS: FILM 2911.03; THEA 2911.03
FORMATS: Lecture | Discussion

FILM 4101 Short Apprenticeship

CREDIT HOURS: 3

Students gain practical, workplace experience with an organization appropriate to their course of study. The Short Apprenticeship will represent approximately 50 – 60 hours of work on an approved project with a sponsoring organization. Positions may be paid when appropriate, but this is not guaranteed. PREREQUISITES: Permission of the Fountain School RESTRICTIONS: Students must have completed two years of study in a Minor/Major/Double Major/Honours/Combined Honours Bachelor of Arts program in Cinema and Media Studies or in Theatre. Applications for apprenticeships will be evaluated by the Associate Director (Cinema and Media Studies) in consultation with FSPA faculty members, who will have final decision about which apprenticeships can be sponsored by the School.

PREREQUISITES: Permission of the Fountain School

EXCLUSIONS: There are no exclusions, but students who have completed FILM 4102.06 will not be prioritized if they apply for FILM 4101.03 and vice versa. Approval will not be granted for two apprenticeship credits with the same or similar course content.

FORMATS: Experiential Learning

FILM 4102 Long Apprenticeship

CREDIT HOURS: 6

Students gain practical, workplace experience with an organization appropriate to their course of study. The Long Apprenticeship will represent approximately 100 – 120 hours of work on an approved project with a sponsoring organization. Positions may be paid when appropriate, but this is not guaranteed.

PREREQUISITES: Permission of the Fountain School.

EXCLUSIONS: There are no exclusions, but students who have completed a Long Apprenticeship will not be prioritized if they apply for a Short Apprenticeship and vice versa. Approval will not be granted for two apprenticeship credits with the same or similar course content.

FORMATS: Experiential Learning

FILM 4103 Long Apprenticeship a

CREDIT HOURS: 3

Students gain practical, workplace experience with an organization appropriate to their course of study. The Long Apprenticeship will represent approximately 100 – 120 hours of work on an approved project with a sponsoring organization, completed over two consecutive academic terms in FILM 4103.03 and FILM 4104.03. Positions may be paid when appropriate, but this is not guaranteed.

COREQUISITES: FILM 4104.03 Long Apprenticeship b must be completed in a consecutive academic term

PREREQUISITES: Permission of the Fountain School

RESTRICTIONS: Students must have completed two years of study in a Minor/Major/Double Major/Honours/Combined Honours Bachelor of Arts program in Theatre or Cinema and Media Studies. Applications for apprenticeships will be evaluated by the Associate Director (Cinema and Media Studies) in consultation with FSPA faculty members, who will have final decision about which apprenticeships can be sponsored by the School.

EXCLUSIONS: There are no exclusions, but students who have completed FILM 4102.06 will not be prioritized if they apply for FILM 4103.03/4104.03 and vice versa. Approval will not be granted for two apprenticeship credits with the same or similar course content.

FORMATS: Experiential Learning

FILM 4104 Long Apprenticeship b

CREDIT HOURS: 3

Students gain practical, workplace experience with an organization appropriate to their course of study. The Long Apprenticeship will represent approximately 100 – 120 hours of work on an approved project with a sponsoring organization, completed over two consecutive academic terms in FILM 4103.03 and FILM 4104.03. Positions may be paid when appropriate, but this is not guaranteed.

PREREQUISITES: FILM 4103 Long Apprenticeship Part 1

RESTRICTIONS: Students must have completed two years of study in a Minor/Major/Double Major/Honours/Combined Honours Bachelor of Arts program in Theatre or in Cinema and Media Studies. Applications for apprenticeships will be evaluated by the Associate Director (Cinema and Media Studies) in consultation with FSPA faculty members, who will have final decision about which apprenticeships can be sponsored by the School.

EXCLUSIONS: There are no exclusions, but students who have completed FILM 4102.06 will not be prioritized if they apply for FILM 4103.03/4104.03 and vice versa. Approval will not be granted for two apprenticeship credits with the same or similar course content.

FORMATS: Experiential Learning

FILM 4300 Cinema and Media Studies Honours Credit

CREDIT HOURS: 0

Cinema and Media Studies Combined Honours students for whom CMS is their principal subject will write a 5000-7000 word research essay and a conference-length version of the same paper which they will present orally. The paper may be an expansion of work started for a class, but students are welcome to start a new project of interest to them. Students will work with a faculty mentor to complete the essay and present the work.

COREQUISITES: NA

PREREQUISITES: Admission to Combined Honours in Cinema and Media Studies

CROSSLISTED: NA

RESTRICTIONS: Restricted to Combined Honours students in Cinema and Media Studies with a minimum B+ average in CMS classes

EXCLUSIONS: NA

FORMATS: Other (explain in comments)

FILM 4390 Special Topics in Cinema and Media Studies

CREDIT HOURS: 3

This advanced course examines one topic in depth from formal, political, and/or historical perspectives. Topics may include but are not limited to: montage; screen acting; film adaptation; the work of a particular director; a platform such as YouTube or online streaming services; Virtual or Augmented Reality; or a film movement. The topic to be studied will be determined by the Fountain School of Performing Arts.

PREREQUISITES: FILM 2311.03

FORMATS: Other (explain in comments)

FILM 4391 Special Topics in Popular Cinema

CREDIT HOURS: 3

This advanced seminar addresses an issue in popular cinema. Topics may include but are not limited to: critical perspectives on a particular set of films; the relation between “independent” cinema and “mainstream” cinema; or the social and aesthetic impact of new technologies in popular cinema. The identity of the topic to be studied will be assigned by the Fountain School of Performing Arts at the end of the preceding academic year and then posted at the School and in the University's timetable.

PREREQUISITES: FILM 2311.03 (and FILM 2360.03 is recommended)

FORMATS: Seminar

FILM 4392 Point of View in the Cinema

CREDIT HOURS: 3

In this course, students engage in rigorous close analysis to understand better the ways in which filmmakers make us experience a narrative from the perspective of an individual character. The course explores the methods and purposes that underlie the manipulation of point of view in mainstream movies, art films and political cinema.

PREREQUISITES: FILM 2311.03

FORMATS: Lecture | Seminar

FILM 4393 Special Topics in Theatre and Cinema

CREDIT HOURS: 3

In this seminar class, students focus on a particular topic relevant to the fields of both theatre and cinema and investigate it in great detail. The topic is assigned by the School of Performing Arts at the end of the preceding academic year and it is then posted at the School and in the Academic Timetable.

PREREQUISITES: Permission of the instructor

CROSSLISTED: THEA 4924.03

FORMATS: Lecture | Seminar

FILM 4502 East Asian Animation and its Roots in Performance and Visual Culture

CREDIT HOURS: 3

This course asks how Chinese-language and Japanese performance and visual arts feed into animated film, and how animation today is shaped by but also extends these traditions. With a focus on aesthetics, it is centred around the theoretical question of when/how we can define “animation” in opposition to other arts and technologies, and when/how these overlap. Secondary questions include the concept of “nation” in relation to animation and the extent to which causality can be attributed to connections between aesthetic forms; no doubt additional questions and themes will arise as we discuss. The aim of the course is not to answer these definitively, but to use these as starting points for conversation and analysis. This course does not go deep into any one form or style but rather gives an overview of many in order to enable students to look more closely, in their own research, into those that interest them most.

CROSSLISTED: THEA 4502, CHIN 4502

FORMATS: Lecture

FILM 4926 Creative Responses to A Midsummer Night's Dream

CREDIT HOURS: 3

Shakespeare's *A Midsummer Night's Dream* is an ideal play for exploring how one creative work can inspire others. Its tale of lovers and actors lost in a fairy-filled forest still speaks to us about imagination, beauty, transformation, sexuality, gender, dreams, love, rebellion, laughter, art, the environment, and performance. Not only are productions of it still commonplace, but it has also inspired numerous adaptations in theatre, cinema, poetry, music, dance, novels, animations, and songs. In this course, you will read the play closely and examine the creative dreams that it has inspired in other artists over the centuries.

You may also engage in creative projects of your own for credit.

Introduction

Classics is the study of the ancient Greeks and Romans: their myths, mysteries, and games, their epics, comedies, and tragedies, their languages, arts, and architectures, their religions, philosophies, and sciences. We examine how they constructed their relations to nature, literally created "history", and discovered how terrible the human is. We learn their magic, blessings, and curses, their politics and laws, their social structures, and ways of making war. We look at their sex lives, how they died, and what they used for money. Classics tells the story of the rise and fall of their empires, and of what has indelibly lasted after imperial military and political forces collapsed. We investigate how what the Greeks and Romans became depended on encounters with the peoples, cultures, philosophies, technologies of war and peace, politics and religions of Egypt and North Africa, of Judea, Lebanon, and Syria, of Arabia and Persia, and of Tuscany and the Eurasian North. And Classics looks at how, out of those same meetings, new religions and philosophies evolved, giving us the literatures, arts, and politics of Greek, Latin, and Arabic Christianities, of Hebrew, Greek, and Arabic Judaisms, and of Islam. We start from the remotest origins of human history, make a long stop at the "Classical" period, become what some regard as decadent, and go up to the end of the Middle Ages. We are at home in Athens and Rome, in Constantinople and Istanbul, in Carthage, Alexandria and Jerusalem, in Antioch, Damascus, and Baghdad, in Cordoba and Palermo, in Paris, Oxford, Fribourg, and Cologne, and we encamp at Hadrian's Wall, once the boundary of "civilization". Languages, chiefly Greek and Latin, are both our pleasure and our necessity, but Classics is much more than the study of languages, its study lays the foundation of self-knowledge.

Classics at Dalhousie offers the full range of electives and degree programs: minors, majors, and honours for Bachelor degrees, the Master of Arts, and the PhD. It has specialists in philosophy and religion, in languages and literature, and in history. Students of Classics must learn Greek and Latin, if they wish to take an honours degree or go on to graduate studies in the field. While we recommend that students begin Latin or Greek in their first year, it is quite feasible to start language studies subsequently.

Degree Programs

In addition to the departmental requirements listed below, students must satisfy the requirements outlined in the [Degree Requirements](#) section.

Staff

Dean

Andrews, J. Hons BA (McGill), MA, PhD (University of Toronto)

Chair

Diamond, E. BA (Vind), MA (Dalhousie), PhD (Northwestern)

Undergraduate Advisor

Mitchell, J., BA (McGill), PhD (Stanford)

Professor Emeritus

Friedrich, R., Dr. Phil. (Göttingen)

Associate Professors

Diamond, E., BA (Vind), MA (Dalhousie), PhD (Northwestern)
Firanesco, D. R., PhD (Bucharest)
Fournier, M., BA, MA (Dalhousie), PhD (BC)
Mitchell, J., BA (McGill), PhD (Stanford)
Varto, E., BA (Queen's), MA (Dalhousie), PhD (UBC)

Assistant Professors

MacLeod, L. M., BA (Brock) MA, PhD (Dalhousie)
O'Brien, P. H., BA (Vind), MA (Dalhousie), MA, PhD (BU)

BA (120 credit hour) Honours in Classics

For purposes of meeting grouping requirements, some Ancient and Medieval Philosophy courses may be counted either as Classics credits, or Philosophy credits.

Students must complete between 54 - 66 credit hours in Classics at the 2000 level or above. Among these credit hours, students must take the following:

- 30 credit hours in Greek and Latin (12 in one; 18 in the other). Students may choose from: Greek: CLAS 2505; CLAS 2506; CLAS 3701; CLAS 3702; and any upper level courses offered in Greek. Latin: CLAS 2401; CLAS 2402; CLAS 3803; CLAS 3804; and any upper level courses offered in Latin.
- 18 credit hours at the 3000 level or higher
- completion of the Honours Examination (CLAS 0401 and CLAS 0402)

Candidates for Honours and Combined Honours degrees who anticipate continuing their studies at the Graduate level in Classics should consult the calendars of the Graduate Schools of their choice concerning requirements for entry into Graduate programs. It may be the case that additional preparation in the classical languages or in other aspects of ancient civilizations is required for entry into certain programs.

NOTE: Students are urged to apply for Honours as early as possible in their program (applications may be submitted after completion of one year of university). Please consult undergraduate advisor.

BA (120 credit hour) Combined Honours in Classics

Classics may be taken as part of a combined honours program with other disciplines. Students interested in such programs should consult with the undergraduate advisors of the respective departments.

Students must complete 30 - 48 credit hours in Classics at the 2000 level or higher. Among these credit hours, students must take the following:

- 18 credit hours in Greek and/or Latin. Students may choose from:
- Greek: CLAS 2505; CLAS 2506; CLAS 3701; CLAS 3702; and any upper level courses offered in Greek. Latin: CLAS 2401; CLAS 2402; CLAS 3803; CLAS 3804; and any upper level courses offered in Latin.
- 18 credit hours at the 3000 level or higher
- completion of the Honours Examination (CLAS 0401 and CLAS 0402) if the major work is done in Classics

Candidates for Honours and Combined Honours degrees who anticipate continuing their studies at the Graduate level in Classics should consult the calendars of the Graduate Schools of their choice concerning requirements for entry into Graduate programs. It may be the case that additional preparation in the classical languages or in other aspects of ancient civilizations is required for entry into certain programs.

NOTE: Students are urged to apply for Honours as early as possible in their program (applications may be submitted after completion of one year of university). Please consult undergraduate advisor.

BA (120 credit hour) Major in Classics

Students must complete the faculty requirements for a major. These requirements include 36 to 54 credit hours in Classics at or above the 2000 level; including 18 credit hours at the 3000 level or higher. Students are encouraged to take two language courses in Greek and/or Latin.

BA (120 credit hour) Double Major in Classics

Students must complete the faculty requirements for a double major. These include 60 to 84 credit hours in the Major subjects at the 2000 level or higher with no more than 48 and no fewer than 30 in either. Students must include at least 18 credit hours at the 3000 level or higher in each subject.

BA (90 credit hour) Minor in Classics

See the [Minors](#) section of this Calendar.

Minor in Ancient History

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Students must take 18 credit hours from the following list at the 2000 level or above to a maximum of 27 credit hours.

- CLAS 2209.03: The Roman World from Constantine to Theodosius
- CLAS 2214.03: The Roots of Greek Civilization
- CLAS 2215.03: The Classical Greek World
- CLAS 2216.03: Alexander the Great and the Hellenistic Kings
- CLAS 2220.03: Ancient Israel
- CLAS 2231.03: The Rise of Rome
- CLAS 2232.03: The Fall of Rome
- CLAS 2233.03: Roman Legions and the Barbarians
- CLAS 2234.03: Death, Sex, and Gold in the Ancient World
- CLAS 2281.03: Christian Beginnings: The Orthodox and Oriental Churches
- CLAS 3016.03: Meetings between Hellenism and the East to Philo the Jew
- CLAS 3017.03: Meetings between Hellenism, Judaism, Christianity, and Islam until the Renaissance
- CLAS 3021.03: Ancient Art and Architecture from the Pyramids to the Forum
- CLAS 3205.03: Fall of the Roman Republic
- CLAS 3501.03: Herodotus: Father of History, Father of Lies
- CLAS 3502.03: Thucydides and the Greek World at War
- CLAS 4100.03: Reading and Research in Latin Texts (when appropriate)
- CLAS 4540.03: Ammianus Marcellinus and his World

Language Courses

Not more than six credit hours in ancient language may be counted towards the Minor:

- CLAS 2401.03: Introductory Latin I
- CLAS 2402.03: Introductory Latin II
- CLAS 2505.03: Introductory Ancient Greek I
- CLAS 2506.03: Introductory Ancient Greek II
- CLAS 3701.03: Intermediate Greek I
- CLAS 3702.03: Intermediate Greek II
- CLAS 3803.03: Intermediate Latin I
- CLAS 3804.03: Intermediate Latin II

Note: Not all courses are offered each year. Please consult with the timetable for courses offered.

Contact [Classics](#) for more information.

Minor in Classical Literature

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Students must take 18 credit hours to a maximum of 27 credit hours from the following list:

- CLAS 2103.03: Gods, Heroes, and Monsters: Ancient Mythology I
- CLAS 2104.03: Gods, Heroes, and Monsters: Ancient Mythology II
- CLAS 2401.03: Introductory Latin I
- CLAS 2402.03: Introductory Latin II
- CLAS 2505.03: Introductory Ancient Greek I
- CLAS 2506.03: Introductory Ancient Greek II
- CLAS 2515.03: Myth into Film I: the Greek World
- CLAS 3701.03: Intermediate Greek I
- CLAS 3702.03: Intermediate Greek II
- CLAS 3803.03: Intermediate Latin I
- CLAS 3804.03: Intermediate Latin II
- CLAS 3515.03: Greek Tragedy
- CLAS 3516.03: Ancient Comedy
- CLAS 3525.03: Ancient Greek Epic
- CLAS 4060.03: Boethius and Prosimetrum: Poetry and Prose in the Consolation of Philosophy
- CLAS 4070.03: The Study of the Latin Text of Augustine's Confessions
- CLAS 4100.03: Reading and Research in Latin Texts
- CLAS 4540.03: Ammianus Marcellinus and his World
- CLAS 4711.03: Greek Texts: Epic I
- CLAS 4712.03: Greek Texts: Epic II
- CLAS 4721.03: Greek Texts: Poetry I
- CLAS 4722.03: Greek Texts: Poetry II
- CLAS 4741.03: Greek Texts: Tragedy I
- CLAS 4742.03: Greek Texts: Tragedy II
- CLAS 4802.03: Latin Texts: Roman Poetry II
- CLAS 4811.03: Latin Texts: Love and Violence
- CLAS 4812.03: Latin Texts: War and Peace
- CLAS 4820.03: Special Topics - Homer
- CLAS 4821.03: Latin Texts: Human and Divine
- CLAS 4822.03: Latin Texts: Myth and History
- CLAS 4851.03: Latin Texts: Friends and Enemies

Note: Not all courses are offered each year. Please consult with the timetable for courses offered.

Minor in Classics: Ancient Philosophy

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Students must take 18 credit hours at the 2000 level or above to a maximum of 27 credit hours from the following list, including a minimum of 9 credit hours chosen from the following:

- CLAS 2365.03: Plato and the Case of Socrates: Philosophy on Trial
- CLAS 2366.03: Gods, Beasts and the Political Animal: Plato, Aristotle, and their Legacy
- CLAS 3403.03: The Dialogues of Plato I
- CLAS 3404.03: The Dialogues of Plato II
- CLAS 3503.03: Aristotle

Philosophy courses

- CLAS 2024.03: Philosophy and God
- CLAS 2025.03: Conceptions of Nature in the Pre-Modern World
- CLAS 2026.03: Paganism
- CLAS 2027.03: Magic, Religion and Philosophy
- CLAS 2320.03: Panpsychism

- CLAS 2361.03: Ancient Philosophy: From Thales to Plato
- CLAS 2362.03: Ancient Philosophy: From Aristotle to Plotinus
- CLAS 2365.03: Plato and the Case of Socrates: Philosophy on Trial
- CLAS 2366.03: Gods, Beasts and the Political Animal: Plato, Aristotle, and their Legacy
- CLAS 3016.03: Meetings between Hellenism and the East to Philo the Jew
- CLAS 3017.03: Meetings between Hellenism, Judaism, Christianity, and Islam until the Renaissance
- CLAS 3404.03: Dialogues of Plato II
- CLAS 3411.03: St. Augustine's Confessions I
- CLAS 3412.03: St. Augustine's Confessions II
- CLAS 3431.03: St. Augustine's On the Trinity Part I
- CLAS 3432.03: St. Augustine's On the Trinity Part II
- CLAS 3503.03: Aristotle
- CLAS 3901.03: Philosophy of Aristotle I
- CLAS 3902.03: Philosophy of Aristotle II
- CLAS 3911.03: Neoplatonism: Plato and Neoplatonism I
- CLAS 3912.03: Neoplatonism: Plato and Neoplatonism II
- CLAS 4060.03: Boethius and Prosimetrum: Poetry and Prose in the Consolation of Philosophy
- CLAS 4019.03: Philo Judaeus
- CLAS 4601.03: Hellenistic Philosophy - Stoics and Epicureans
- CLAS 4602.03: Hellenistic Philosophy - From Scepticism to Neoplatonism

Language Courses

Not more than six credit hours of a language course may be counted towards the Minor:

- CLAS 2401.03: Introductory Latin I
- CLAS 2402.03: Introductory Latin II
- CLAS 2505.03: Introductory Ancient Greek I
- CLAS 2506.03: Introductory Ancient Greek II
- CLAS 3701.03: Intermediate Greek I
- CLAS 3702.03: Intermediate Greek II
- CLAS 3803.03: Intermediate Latin I
- CLAS 3804.03: Intermediate Latin II

Note: Not all courses are offered each year. Please consult with the timetable for courses offered.

Minor in Classics: Medieval Philosophy

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Students must take between 18 and 27 credit hours from the following list, including the listed language courses. Must include 9 credit hours from:

- CLAS 3381.03: Medieval Philosophy from Anselm to Augustine
- CLAS 3382.03: Medieval Philosophy from Arabic and Jewish Thinkers to Aquinas
- ARBC 3040.03: Arabic Philosophical Texts: al-Ghazali (or CLAS 4010.03: Islamic Philosophy: al-Ghazali)
- ARBC 3050.03: Arabic Philosophical Texts: Maimonides (or CLAS 4011.03: Jewish Philosophy: Maimonides)
- CLAS 4018.03: Christian Theology in Islamic Lands: John of Damascus
- CLAS 4451.03: Medieval Interpreters of Aristotle
- CLAS 4452.03: Medieval Interpreters of Aristotle

Philosophy courses

- CLAS 2024.03: Philosophy and God
- CLAS 2027.03: Magic, Religion and Philosophy
- CLAS 3016.03: Meetings between Hellenism and the East to Philo the Jew

- CLAS 3017.03: Meetings between Hellenism, Judaism, Christianity, and Islam until the Renaissance
- CLAS 3381.03: Medieval Philosophy from Anselm to Augustine
- CLAS 3382.03: Medieval Philosophy from Arabic and Jewish Thinkers to Aquinas
- CLAS 3411.03: St. Augustine's Confessions I
- CLAS 3412.03: St. Augustine's Confessions II
- CLAS 3431.03: St. Augustine's On the Trinity Part I
- CLAS 3432.03: St. Augustine's On the Trinity Part II
- CLAS 3841.03: Latin Philosophical Texts: Aquinas Texts
- CLAS 3842.03: Latin Philosophical Texts: Anselm and Bonaventure Texts
- CLAS 3911.03: Neoplatonism: Plato and Neoplatonism I
- CLAS 3912.03: Neoplatonism: Plato and Neoplatonism II
- CLAS 4060.03: Boethius and Prosimetrum: Poetry and Prose in the Consolation of Philosophy
- CLAS 4070.03: The Study of the Latin Text of Augustine's Confessions
- CLAS 4401.03: Philosophy of Greek Church Fathers
- CLAS 4402.03: Philosophy of Latin Church Fathers
- CLAS 4451.03: Medieval Interpreters of Aristotle
- CLAS 4452.03: Medieval Interpreters of Aristotle
- CLAS 4501.03: Seminar on Neoplatonism I
- CLAS 4502.03: Seminar on Neoplatonism II
- CLAS 4602.03: Hellenistic Philosophy - From Scepticism to Neoplatonism

Language Courses

Not more than six credit hours in a language course may be counted towards the Minor:

- ARBC 2021.03: Intermediate Arabic I
- ARBC 2022.03: Intermediate Arabic II
- ARBC 3030.03: Advanced Arabic I
- ARBC 3031.03: Advanced Arabic II
- CLAS 2401.03: Introductory Latin I
- CLAS 2402.03: Introductory Latin II
- CLAS 2505.03: Introductory Ancient Greek I
- CLAS 2506.03: Introductory Ancient Greek II
- CLAS 3701.03: Intermediate Greek I
- CLAS 3702.03: Intermediate Greek II
- CLAS 3803.03: Intermediate Latin I
- CLAS 3804.03: Intermediate Latin II
- CLAS 2901.03: Intermediate Hebrew I
- CLAS 2902.03: Intermediate Hebrew II

Note: Not all courses are offered each year. Please consult with the timetable for courses offered.

Contact [Classics](#) for more information.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions

NOTES:

1. Not all courses are offered every year. Please consult the current timetable or the Classics Department (494-3468) to determine this year's offerings.
2. The Introductory courses, and the more elementary courses in Ancient History and Religions, and Classical Philosophy listed below do not require knowledge of the ancient languages. However, students who plan to do advanced work in any of these areas are advised to begin study of the appropriate languages as early as possible.
3. The Department of Classics offers courses at three levels in Arabic. Descriptions for these courses can be found in the [Arabic](#) section of this calendar.

Course Descriptions

CLAS 0401 Honours Examination I

CREDIT HOURS: 0

Details available from the department.

CALENDAR NOTES: This course is the first part of the former full-year course CLAS 0400X/Y.06. This course description reflects the entirety of the pair (CLAS 0401.03 and CLAS 0402.03).

PREREQUISITES: CLAS 3702.03 or CLAS 3804.03

EXCLUSIONS: CLAS 0400X/Y.06

CLAS 0402 Honours Examination II

CREDIT HOURS: 0

Details available from the department.

CALENDAR NOTES: This course is the second part of the former full-year course CLAS 0400X/Y.06. This course description reflects the entirety of the pair (CLAS 0401.03 and CLAS 0402.03).

PREREQUISITES: CLAS 0401.03

EXCLUSIONS: CLAS0400X/Y.06

CLAS 1011 Ancient Greece and Rome

CREDIT HOURS: 3

A survey of the ancient civilisations of Greece and Rome, with a focus on their politics, social and cultural institutions, and military history. We chart the rise of the Greek city-state, the glory of Athens, and the transformation of the Greek world by Alexander the Great before turning to the expansion of Rome from humble beginnings to its central place in the history of Europe, the fall of the Republic and the ups and downs of Empire. This is an introductory course and no special preparation is required; there is no foreign language requirement. "Please note that this class does not fulfill the Writing Course Requirement."

EXCLUSIONS: CLAS 1010X/Y

FORMATS: Lecture

CLAS 1012 Ancient History

CREDIT HOURS: 3

Consideration of the pre-classical Near Eastern civilisations (Mesopotamian, Egyptian, Hebrew, etc.) is followed by treatment of the civilisations of Greece and Rome. The course concludes with a consideration of the dissolution of Roman Imperial power and the development of Christian and Islamic cultures.

Particular attention will be paid to political, cultural and social history. As the course is intended as an introductory one, no special preparation is expected.

There is no foreign language requirement.

RESTRICTIONS: CLAS 1010X/Y.06

FORMATS: Lecture

CLAS 1101 Classical Mythology

CREDIT HOURS: 3

This class will study various mythic texts from ancient Greece and Rome, with occasional attention to other nearby ancient cultures. Students will demonstrate competence in describing the content of specific myths as found in various primary sources, understanding the function of myth in expressing and shaping ancient cultural values, assessing the relationships between specific myths or versions of the same myth, and the reception of myths in later societies. All primary texts will be read in English translation.

EXCLUSIONS: CLAS 1103.03; CLAS 2103.03; RELS 1201.03

FORMATS: Lecture

CLAS 1103 Gods, Heroes, and Monsters: Ancient Mythology I

CREDIT HOURS: 3

An introductory survey of the traditional religious narratives of ancient civilizations including Mesopotamia, Egypt, Israel, Greece, and Rome. Of special interest: the function of myth in shaping and expressing a culture's understanding of the divine, the institutions of human community (religion, the family, government), and the natural world; the interrelationships of the myths of those civilizations; the reception of those traditions in the origins of Christian and Islamic culture. The traditional narratives and their broader cultural contexts will be approached through study of primary sources including epic, tragic, and didactic poetry, hymnography, historiography, philosophy, the visual arts, and architecture.

CALENDAR NOTES: This course is the first part of the former full-year course CLAS 1100X/Y.06. This course description reflects the entirety of the pair (CLAS 1103.03 and CLAS 1104.03). Together CLAS 1103.03 and CLAS 1104.03 fulfill the BA writing requirement. CLAS 1103.03 must be successfully completed before taking CLAS 1104.03.

EXCLUSIONS: CLAS 2100X/Y.06, CLAS 2103.03, CLAS 2104.03, CLAS 1100X/Y.06, RELS 1200X/Y.06

FORMATS: Lecture | Tutorial

CLAS 1104 Gods, Heroes, and Monsters: Ancient Mythology II

CREDIT HOURS: 3

An introductory survey of the traditional religious narratives of ancient civilizations including Mesopotamia, Egypt, Israel, Greece, and Rome. Of special interest: the function of myth in shaping and expressing a culture's understanding of the divine, the institutions of human community (religion, the family, government), and the natural world; the interrelationships of the myths of those civilizations; the reception of those traditions in the origins of Christian and Islamic culture. The traditional narratives and their broader cultural contexts will be approached through study of primary sources including epic, tragic, and didactic poetry, hymnography, historiography, philosophy, the visual arts, and architecture.

CALENDAR NOTES: This course is the second part of the former full-year course CLAS 1100X/Y.06. This course description reflects the entirety of the pair (CLAS 1103.03 and CLAS 1104.03). Together CLAS 1103.03 and CLAS 1104.03 fulfill the BA writing requirement. CLAS 1103.03 must be successfully completed before taking CLAS 1104.03.

PREREQUISITES: CLAS 1103.03

EXCLUSIONS: CLAS 2100X/Y.06, CLAS 2103.03, CLAS 2104, CLAS 1100X/Y.06, RELS 1200X/Y.06

FORMATS: Lecture | Tutorial

CLAS 1600 Sanskrit I

CREDIT HOURS: 3

This course provides students with all the basic tools required for the study of Sanskrit, with a particular emphasis on basic Sanskrit grammar. Students will learn the Devanagari script, several common nominal forms and the basics of the verbal system, as well as develop a competency in basic reading and recitation.

CROSSLISTED: RELS 1600.03

CLAS 1802 Intro Latin Part II

CREDIT HOURS: 3

This is an introduction to Latin grammar and syntax designed to bring students with no previous knowledge of Latin to the point where they are able to read Latin prose authors with the help of only a dictionary.

PREREQUISITES: CLAS 1801.03

EXCLUSIONS: CLAS 1800X/Y.06, CLAS 2810X/Y.06

CLAS 1901 Intro Hebrew Part I

CREDIT HOURS: 3

Students will study the vocabulary, grammar, and syntax of classical Hebrew, sufficient for reading and translating prose and simple poetry from the Hebrew Bible or other ancient texts and inscriptions. Please note that this class covers ancient Hebrew with purposes of reading in mind, not modern Israeli Hebrew for conversational purposes.

CLAS 2001 Beginnings of Wisdom: Science in the Pre-modern World

CREDIT HOURS: 3

This course introduces key developments in pre-modern science. Fundamental concepts in the physical sciences, astronomy and cosmology are treated through the study of primary sources from antiquity (Near Eastern and Greco-Roman) and the medieval Islamic, Jewish and Christian cultures. We will be attentive to the wider cultural contexts in which science was pursued and to intersections between science and other ways of knowing (e.g., myth, magic, religion).

CROSSLISTED: HSTC 2001

FORMATS: Lecture

CLAS 2002 Medieval Natural Philosophy: From the Roman Empire to the Age of Dante

CREDIT HOURS: 3

This course introduces key developments in medieval understandings of nature (better called "natural philosophy" than "science") through a direct engagement with primary sources. We consider how the texts and authorities of antiquity (Plato and Aristotle, most notably) were assimilated, adapted and transformed during the Roman Empire, in Islam, and in later medieval Christian Europe. Questions such as the role of 'nature' in defining human happiness, the good life, and the character of political power will figure prominently. We will attend to the limits of 'natural' reason in relation to established disciplines like theology, as well as more contested areas of knowledge such as magic, astrology and alchemy. The approach taken will be that of intellectual history, in the sense that we will focus on fundamental concepts articulated by the authors and on careful textual exegesis, while always attentive to the wider historical and cultural contexts. Especially given that this course's authors, texts and contexts are quite distant in time from our contemporary world, there will also be occasions for us to reflect on the challenges facing the modern inquirer into pre-modern conceptions of nature and scientific knowledge.

PREREQUISITES: CLAS 2001.03 or HSTC 2001.03 are recommended, but not required.

CROSSLISTED: HSTC 2002.03

EXCLUSIONS: HSTC 2000X/Y.06

FORMATS: Lecture | Seminar

CLAS 2010 Greek Literature in Translation

CREDIT HOURS: 3

Beginning with the two great epic poems of Homer, this course will consider the poetic legacy of ancient Greece, by considering the evolution of many of the literary genres which remain the basis for poetry and prose today. Moving through the archaic, classical and Hellenistic periods of ancient Greek literary history, students will encounter epic and lyric poetry, tragic and comic drama, historical, medical, and philosophical prose, the Platonic dialogue, and the soaring oratory of the courtroom and assembly. In this course we examine twelve of ancient Greece's greatest authors, choosing a key text each week for discussion and close reading while also considering the social and political context for each.

EXCLUSIONS: CLAS 2000X/Y

FORMATS: Seminar

CLAS 2011 Latin Literature in Translation

CREDIT HOURS: 3

The civilisation that built the Roman Empire left another, even more enduring legacy: Latin literature. From the grand epic of Virgil to the crystal lyrics of Horace, from the savage satire of Juvenal to the passionate patriotism of Cicero, the Romans established forms and genres that are still the basis of poetry and prose today. In this course we examine twelve of Rome's greatest authors, choosing a key text each week for discussion and close reading while also considering the social and political context for each.

COREQUISITES: none

PREREQUISITES: none

CROSSLISTED: none

EXCLUSIONS: CLAS 2000X/Y

FORMATS: Seminar

CLAS 2024 Philosophy and God

CREDIT HOURS: 3

Does god exist? Can God be known? Have a nature? Do evil? Beginning by occupying the same ground as religion, philosophy has asked these questions. Starting with Pythagoras, Empedocles, Plato, Aristotle, Epicurus, and continuing with their pagan Jewish, Christian, and Islamic followers, we shall learn to state the answers of sages and mystics with historical accuracy and to judge their persuasive power.

CROSSLISTED: RELS 2203

FORMATS: Lecture | Discussion

CLAS 2025 Conceptions of Nature in the Pre-Modern World.

CREDIT HOURS: 3

What is nature? What is the proper relationship between nature and the human being, political community, and divinity? This course will investigate ancient Greek, Roman, Jewish, Christian and Islamic answers to these questions through the study of literature, philosophy, art and architecture of the Pre-Modern West.

FORMATS: Lecture

CLAS 2026 Paganism

CREDIT HOURS: 3

In this class we examine the development of ancient religious systems in Greece, Rome, and neighbouring peoples from the dawn of recorded history to the triumph of Christianity. From hero cult and civic ritual to the coalescence of myth and pantheon, from superstition and secret initiation to divine kingship, we will range across the full breadth of "pagan" (pre-monotheist) religious experience, including the thousand-year dialogue of religious practice and poetic or philosophic discussion of the gods.

CROSSLISTED: RELS 2026.03

FORMATS: Lecture | Discussion

CLAS 2027 Magic, Religion, and Philosophy

CREDIT HOURS: 3

Reading the Greek Magical Papyri, as well as curse tablets and binding spells from ancient sources, we will explore the intersections of, and relations between, magic, religion, and philosophy in antiquity. The focus will be on both the practical and theoretical aspects of magic in the Greek and Roman worlds.

CROSSLISTED: RELS 2027.03

FORMATS: Lecture

CLAS 2103 Gods, Heroes, and Monsters: Ancient Mythology I

CREDIT HOURS: 3

An introductory survey of the traditional religious narratives of ancient civilizations including Mesopotamia, Egypt, Israel, Greece, and Rome. Of special interest: the function of myth in shaping and expressing a culture's understanding of the divine, the institutions of human community (religion, the family, government), and the natural world; the interrelationships of the myths of those civilizations; the reception of those traditions in the origins of Christian and Islamic culture. The traditional narratives and their broader cultural contexts will be approached through study of primary sources including epic, tragic, and didactic poetry, hymnography, historiography, philosophy, the visual arts, and architecture.

CALENDAR NOTES: This course is the first part of the former full-year course CLAS 2100X/Y.06. This course description reflects the entirety of the pair (CLAS 2103.03 and CLAS 2104.03).

PREREQUISITES: Students must be beyond the first year and have completed the writing requirement.

EXCLUSIONS: CLAS 1100X/Y.06, RELS 1200X/Y.06, CLAS 1103.03, CLAS 1104.03, RELS 1201.03, RELS 1202.03, CLAS 2100X/Y.06

FORMATS: Lecture

CLAS 2104 Gods, Heroes, and Monsters: Ancient Mythology II

CREDIT HOURS: 3

An introductory survey of the traditional religious narratives of ancient civilizations including Mesopotamia, Egypt, Israel, Greece, and Rome. Of special interest: the function of myth in shaping and expressing a culture's understanding of the divine, the institutions of human community (religion, the family, government), and the natural world; the interrelationships of the myths of those civilizations; the reception of those traditions in the origins of Christian and Islamic culture. The traditional narratives and their broader cultural contexts will be approached through study of primary sources including epic, tragic, and didactic poetry, hymnography, historiography, philosophy, the visual arts, and architecture.

CALENDAR NOTES: This course is the second part of the former full-year course CLAS 2100X/Y.06. This course description reflects the entirety of the pair (CLAS 2103.03 and CLAS 2104.03).

PREREQUISITES: Students must be beyond the first year and have completed the writing requirement, and CLAS 2103.03

EXCLUSIONS: CLAS 1100X/Y.06, RELS 1200X/Y.06, CLAS 1103.03, CLAS 1104.03, RELS 1201.03, RELS 1202.03, CLAS 2100X/Y.06

FORMATS: Lecture

CLAS 2202 The Beginnings of Western Medicine: the Birth of the Body

CREDIT HOURS: 3

This course will look at how the body was viewed in ancient scientific theory and practice. Western medicine as a rationalized scientific practice finds its origins in the ancient Greek philosophical and medical texts attributed to "Hippocrates". Through a close reading of selected ancient medical texts, this course will explore ideas of how the human body is constituted, how it relates to the Cosmos as a whole, what the role of the physician was seen to be, and how illness and healing were seen as changes in the balance of the components of the body.

CROSSLISTED: HSTC 2202.03

FORMATS: Lecture | Seminar

CLAS 2209 The Roman World from Constantine to Theodosius (312-395)

CREDIT HOURS: 3

This course covers one of the most important periods of Roman history in which Christianity became the dominant religion in the empire and foreign peoples threatened the existence of the empire itself. The course is open to first-year students. There is no foreign language requirement.

CROSSLISTED: HIST 2017.03

EXCLUSIONS: CLAS 2210X/Y.06, HIST 2004X/Y.06

FORMATS: Seminar

CLAS 2214 The Roots of Greek Civilization: From Crete and Troy to the Rise of Athens

CREDIT HOURS: 3

A history of Archaic Greek culture from the Bronze Age palaces of Crete and Mycenae through the development of the Greek city-states. Topics to be discussed include prehistory, palaces and shipwrecks, art and archaeology, the world of Homeric poetry, archaic poetry and thought, colonization, and cultural interaction between the Greek world, the Near East, and Egypt. No knowledge of Greek is expected.

CROSSLISTED: HIST 2088.03
FORMATS: Lecture | Discussion

CLAS 2215 The Classical Greek World: Athens, Sparta, and a Century of Conflict

CREDIT HOURS: 3

A history of Classical Greek culture from the rise of Athens and Sparta as the dominant Greek city-states to the fall of Athens in the Peloponnesian Wars and the death of Socrates. Topics to be discussed include the rise of democracy, the culture and society of the Athenian 'Golden Ages', drama, art and architecture, empire building, and the Greeks at war, first with the Persian Empire and then with each other. No knowledge of Greek is expected.

CROSSLISTED: HIST 2016.03
FORMATS: Lecture | Discussion

CLAS 2216 Alexander the Great and the Hellenistic Kings: Transforming Ancient East and West

CREDIT HOURS: 3

A history of Late Classical and Hellenistic Greek culture from the end of the Peloponnesian Wars through the empire of Alexander the Great to the Hellenistic World. Topics to be discussed include relations between and among the Greek city-states and the Persian Empire, developments in art, religion, literature, and philosophy, the career and legacy of Alexander, and the new world order of kings and kingdoms he ushered in. No knowledge of Greek is expected.

CROSSLISTED: HIST 2089.03
FORMATS: Lecture | Discussion

CLAS 2220 Ancient Israel

CREDIT HOURS: 3

Students will become familiar with the broad outlines of ancient Israelite history with specific attention to Israel's relationship to her immediate neighbours and the major imperial powers from the 2nd millennium BCE to first century CE. This will entail an initial survey of biblical texts in order to lay an adequate understanding of ancient Israel's self-conception, followed by a detailed survey of Israel's interaction with other nations, including early Mesopotamia, Egypt, Assyria, Babylon, Persia, the Seleucid empire, and Rome.

CROSSLISTED: HIST 2520.03/RELS 2220.03
FORMATS: Lecture | Seminar

CLAS 2231 The Rise of Rome: Consuls, Classes, and World Conquest

CREDIT HOURS: 3

How did a little village conquer the world? This course follows Rome's gradual expansion across Latium, Italy, and finally the whole Mediterranean. Questionable myths, aggressive literature, fiery rhetoric, and political propaganda complement the archaeological record as we trace the development and decadence of Republican institutions and the Republic's descent into shattering civil war. Class tensions, continuous foreign conflict, and still famous figures like Brutus, Cato, Cicero, and Caesar feature prominently in this vigorous study of a paradigmatic political and social problem: the destiny of Republican Rome. Students will be expected to familiarise themselves with both primary and secondary materials, but no knowledge of Latin is required. The material covered in this course is continued in CLAS 2232 / HIST 2091.

CROSSLISTED: HIST 2090.03
FORMATS: Lecture | Discussion

CLAS 2232 The Fall of Rome: Caesars, Saints, and Warlords

CREDIT HOURS: 3

Rome did not fall in a day, or even a century. If the period of Imperial power includes Rome's decadence, it also includes its greatest power and glory. In this chronological survey of the Roman Empire, we will trace the rise of autocracy, the causes of rare but ferocious civil wars, and the transformation of Roman political institutions from Augustus to Diocletian. A lively look at the growth of urban life in the West, at the limits of Roman identity throughout the empire, at the fearful economic and military crisis of the 3rd century, at the adoption of official Christianity, and at the challenges of foreign invasion will lead us to ponder whether the "Decline and Fall" model of Roman imperial history is still valid. Students will be expected to familiarise themselves with both primary and secondary materials, but no knowledge of Latin is required. This course is a continuation of the material covered in CLAS 2231 / HIST 2090 but that is not a prerequisite.

CROSSLISTED: HIST 2091.03

CLAS 2233 Roman Legions and the Barbarians

CREDIT HOURS: 3

This course examines the origins, refinement, and eventual collapse of the Roman military machine. Grand strategy, field tactics, and the analysis of specific battles complement our study of the changing relationship between the army and Roman society and the former's role in building and breaking the political order from 500 BC to 500 AD.

CROSSLISTED: HIST 2023.03
FORMATS: Lecture

CLAS 2234 Death, Sex, and Gold in the Ancient Roman World

CREDIT HOURS: 3

We will explore ancient Roman beliefs and practices concerning the afterlife, sexuality, the social duties of men and women, marriage, family life, and slavery. Gladiatorial games, funerals, brothels, temples, and markets are just some of the places at which Romans defined, defended, and denounced each others' identities as mortal, sexual, and economic players. A journey into often alien, always elusive, sometimes alluring aspects of the pre-Christian Mediterranean.

CROSSLISTED: HIST 2092.03

FORMATS: Lecture | Tutorial

CLAS 2281 Christian Beginnings: The Orthodox and Oriental Churches

CREDIT HOURS: 3

This course traces the development of Christianity from its origin as a Jewish sect to its status as the dominant religion within the Byzantine Empire. The Christian religion as patronized by the Eastern Roman Emperors identified itself with the persecuted Christian sect of the first three centuries through the cult of the martyrs, articulated in the increasing importance of relic, icon, and pilgrimage to holy place. The seven ecumenical councils (325-787) progressively defined the Orthodox faith and resulted in the rise of Oriental churches, rejecting aspects of the definitions. Through to our end-date of 843 (when the icon was finally accepted) themes will be treated by attention to historical events (including the rise of Islam), art, architecture, liturgy, and various genres of literature (including hagiography).

CROSSLISTED: RELS 2281.03

EXCLUSIONS: CLAS 3280X/Y.06

FORMATS: Lecture

CLAS 2320 Panpsychism

CREDIT HOURS: 3

One of the most controversial new theories in consciousness studies is actually one of the oldest and most common ideas in the history of philosophy. Panpsychism, the view that mind is a fundamental feature of the physical world, goes back to Thales among the Greeks, and has numerous defenders in Hellenic, Hellenistic, late Ancient, Medieval, Renaissance, and Modern philosophy. This class will begin from a consideration of contemporary arguments for panpsychism in Nagel, Chalmers, and Strawson before turning to explore panpsychist views from Thales to Leibniz.

FORMATS: Lecture

CLAS 2361 Ancient Philosophy: From Thales to Plato

CREDIT HOURS: 3

This course covers the period in Ancient Philosophy from Thales to Plato: Pre-Socratics, Sophists, Minor Socratics, and selected Platonic dialogues. The period from Aristotle to Plotinus is covered in CLAS 2362.03.

CROSSLISTED: PHIL 2361.03

FORMATS: Lecture

CLAS 2362 Ancient Philosophy: From Aristotle to Plotinus

CREDIT HOURS: 3

This course covers the period in Ancient Philosophy from Aristotle to Plotinus: selected texts of Aristotle, Stoicism, Epicureanism, Pyrrhonian and Academic Scepticism, Middle Platonism, Neoplatonism.

CROSSLISTED: PHIL 2362.03

FORMATS: Lecture

CLAS 2365 Plato and the Case of Socrates: Philosophy on Trial

CREDIT HOURS: 3

Socrates (469-399 BCE) never wrote a single word, but posed such threat to Athens that a jury put him to death for the alleged ethical corruption and impiety of his thought. This course will explore the revolutionary life and thought of Socrates, and consider whether the jury's decision against him was justified.

CROSSLISTED: PHIL 2365

FORMATS: Lecture

CLAS 2366 Gods, Beasts and The Political Animal: Plato, Aristotle, and their Legacy

CREDIT HOURS: 3

We will study some of the most important Platonic dialogues and Aristotelian treatises, to understand the supremely influential views of Plato and Aristotle on divinity, nature, the human, and political community. We will examine the rejection of Platonic-Aristotelian idealism by Stoic, Epicurean and Skeptical

schools. Subjects treated include ethics, politics, metaphysics, logic, aesthetics, and psychology.

CROSSLISTED: RELS 2366, PHIL 2366

FORMATS: Lecture

CLAS 2401 Introductory Latin Part I

CREDIT HOURS: 3

This is an introduction to Latin grammar and syntax designed to bring students with no previous knowledge of Latin to the point where they are able to read Latin prose authors with the help of only a dictionary.

CALENDAR NOTES: Completion of CLAS 2401.03 and CLAS 2402.03 satisfies the BA language requirement.

EXCLUSIONS: CLAS 1800.06; CLAS 1801.03

FORMATS: Lecture

CLAS 2402 Introductory Latin Part II

CREDIT HOURS: 3

This class is a continuation of CLAS 2401.03: Introductory Latin I. This course will undertake the exploration of one of history's most satisfying linguistic challenges, the iron language of Emperors.

CALENDAR NOTES: Completion of CLAS 2401.03 and CLAS 2402.03 satisfies the BA language requirement.

PREREQUISITES: CLAS 2401.03

EXCLUSIONS: CLAS 1800.06, CLAS 1802.03

FORMATS: Lecture

CLAS 2505 Introductory Ancient Greek I

CREDIT HOURS: 3

The course is an introduction to ancient Greek language through the study of its basic grammar. No previous study or experience of Greek is required or expected. The aim of this course is to give students sufficient preparation to read basic passages of ancient Greek texts and to pursue further intermediate studies in ancient Greek. There are no prerequisites for this course; this is an introductory course.

CALENDAR NOTES: This course is the first part of the former full-year course CLAS 2500X/Y.06. This course description reflects the entirety of the pair (CLAS 2505.03 and CLAS 2506.03). CLAS 2505.03 and 2506.03 together fulfill the BA language requirement.

EXCLUSIONS: CLAS 1700; CLAS 2710, CLAS 2500X/Y.06

CLAS 2506 Introductory Ancient Greek II

CREDIT HOURS: 3

The aim of this course is to give students sufficient preparation to read basic passages of ancient Greek texts and to pursue further intermediate studies in ancient Greek.

CALENDAR NOTES: This course is the second part of the former full-year course CLAS 2500X/Y.06. This course description reflects the entirety of the pair (CLAS 2505.03 and CLAS 2506.03). CLAS 2505.03 and 2506.03 together fulfill the BA language requirement.

PREREQUISITES: CLAS 2505.03

EXCLUSIONS: CLAS 1700; CLAS 2710, CLAS 2500X/Y.06

FORMATS: Lecture

CLAS 2515 Myth into Film I: The Greek World

CREDIT HOURS: 3

An introduction to classical myth and culture through the medium of film. Cinema has always drawn on different historical periods, yet its connection with the ancient world remains one of the most significant. This course explores cinema's reconstruction and interpretation of the ancient world, using both ancient and modern sources.

FORMATS: Lecture | Discussion

CLAS 2600 Sanskrit II

CREDIT HOURS: 3

This course develops further the basic grammar and vocabulary of Introductory Sanskrit I, emphasizing the basic past tense verbal systems, participial formations, and translation of simple Sanskrit texts.

PREREQUISITES: RELS 1600.03 or CLAS 1600.03

CROSSLISTED: RELS 2600.03

CLAS 2901 Intermediate Hebrew I

CREDIT HOURS: 3

A continuation of grammar study and translation of selected texts from the Hebrew scriptures.

PREREQUISITES: CLAS 1901.03 & CLAS 1902.03

EXCLUSIONS: CLAS 2900.06

FORMATS: Seminar

CLAS 2902 Intermediate Hebrew II

CREDIT HOURS: 3

A continuation of grammar study and translation of selected texts from the Hebrew scriptures.

PREREQUISITES: CLAS 2901.03

EXCLUSIONS: CLAS 2900.06

FORMATS: Seminar

CLAS 3016 Meetings Between Hellenism and the East to Philo the Jew

CREDIT HOURS: 3

We consider the constitution of Hellenism in relation to Eastern cultures as this emerges in Homer and Herodotus, the emergence of philosophy and the polis. With Alexander and the Hellenistic empires we look at the results and limits of military conquest especially in what is now Afghanistan. The course concludes with the constitution of Jewish religion and culture and its meeting with Hellenism with Philo Judaeus in Alexandria. In order to integrate the presentation of text and art the lectures are all in PowerPoint.

CROSSLISTED: HIST 3016, RELS 3018

FORMATS: Lecture | Discussion

CLAS 3017 Meetings Between Hellenism, Judaism, Christianity and Islam until the Renaissance

CREDIT HOURS: 3

We consider the constitution of Christianity in relation to Hellenism and Judaism during the first six centuries of the Christian era. After treating the constitution of Islam, we consider its meetings with Christianity and Judaism especially in Spain and Norman Sicily. We conclude with medieval Jewish, Christian and Islamic philosophical theologians. Integrating the presentation of text and art the lectures are all in PowerPoint.

CROSSLISTED: HIST 3017, RELS 3019

EXCLUSIONS: CLAS 2300, CLAS 3015, HIST 3015, RELS 2004

FORMATS: Lecture | Discussion

CLAS 3021 Ancient Art and Architecture from the Pyramids to the Agora

CREDIT HOURS: 3

This advanced course explores the art and architecture of the ancient Near Eastern and Greek Worlds, with an emphasis on understanding cultures through their artistic and material remains. Various types and forms of artistic expression will be considered thematically as they develop and change over time and space in their social, political, intellectual, and religious contexts.

PREREQUISITES: At least 6 credit hours in Classics at the second year or above, or permission of the instructor.

EXCLUSIONS: CLAS 2021.03

FORMATS: Lecture

CLAS 3120 Distilling Nature's Secrets: The Ancient Alchemists

CREDIT HOURS: 3

This course explores the scientific and esoteric currents which contributed to the rise of alchemy in the late Ancient World. This 'sacred science' of transmutation was a cultural synthesis of Greek natural philosophy, late pagan mysticism, and Near Eastern metallurgic technologies. The physical processes enacted in the alchemical laboratory - where metals were decomposed, purified and transformed - were experienced inwardly by the alchemist himself as a spiritual drama of death and resurrection, analogous to the rites of initiation in the mystery cults. Alchemy was thus a form of ritual technology, aimed simultaneously at the purification of self and cosmos. The texts studied in the course range from technical manuals preserved on papyrus, to the highly esoteric and visionary works of the Hermetic philosopher Zosimos (circa 300CE). The relation between these technical and occult dimensions will be of central concern.

CROSSLISTED: HSTC 3120

CLAS 3205 Fall of the Roman Republic

CREDIT HOURS: 3

This course covers the end of republican Rome and its metamorphosis into the Augustan Principate. Literary texts, read in English translation, as well as art and architecture, are considered as elements of a study of Roman political, cultural, and religious history. There is no foreign language requirement.

PREREQUISITES: CLAS 1010.03, CLAS 2231.03/HIST 2090.03, CLAS 2232.03/HIST 2091.03 or permission of Instructor.

CROSSLISTED: HIST 3020.03
FORMATS: Lecture | Discussion

CLAS 3282 Christian Beginnings: Catholicism

CREDIT HOURS: 3

This course will consider the formation of Catholicism (Latin Christianity) up to the 12th century in relation to the Greco-Roman context and the barbarian invasions. Moving from North Africa to Western Europe, and using a combination of text, music and artistic, architectural, and archaeological evidence, it will examine the formation of doctrine and discipline in relation to schisms, heresies and Hellenic philosophy, the origin and developments of western monasticism, the papacy, church and state relations, and the construction of liturgy. A theme will be the interplay between the centrifugal and centripetal.

CREDIT HOURS: 3

This seminar involves the detailed study of a group of dialogues. The choice of dialogues varies from year to year.

CALENDAR NOTES: This course is the second part of the former full-year course CLAS 3400X/Y.06. This course description reflects the entirety of the pair (CLAS 3403.03 and CLAS 3404.03).

EXCLUSIONS: CLAS 3400X/Y.06

FORMATS: Seminar

CLAS 3411 Augustine's *Confessions* I: Books 1-9

CREDIT HOURS: 3

This course will examine the first nine books of Augustine's *Confessions*. These 'autobiographical' books contain Augustine's account of his intellectual progress, culminating in his encounter with Platonism in book 7, followed by an account of his conversion to Christianity and his life as a Christian in books 8 and 9.

CROSSLISTED: RELS 3411.03

EXCLUSIONS: CLAS/RELS 3410.06

FORMATS: Seminar

CLAS 3412 Augustine's *Confessions* II: Books 10-13

CREDIT HOURS: 3

This course will examine the last four books of *Confessions*. Book 10 marks the transition from autobiography to Augustine's account of his present psychological life, undertaken in order to know himself as he is known by God. Books 11-13 are an exegesis of the beginning of the book of Genesis.

CROSSLISTED: RELS 3412.03

EXCLUSIONS: CLAS/RELS 3410.06

FORMATS: Seminar

CLAS 3413 Augustine's *Confessions*

CREDIT HOURS: 3

A study of the 13 books of Augustine's *Confessions*.

CROSSLISTED: RELS 3413.03

FORMATS: Seminar

CLAS 3431 St. Augustine's *On the Trinity*

CREDIT HOURS: 3

In his *De Trinitate* Augustine establishes the orthodox teaching about God through an examination of scripture and a consideration of the categories of substance, relation and act, and attempts to understand what has been shown through the distinction of scientia and sapientia.

CROSSLISTED: RELS 3431.03

FORMATS: Seminar

CLAS 3434 The Ancient Origins of Political Thought: From Homer to Aristotle

CREDIT HOURS: 3

This course will study the very beginnings of political thought with Greek poets, historians and educators, culminating in a careful investigation of the political writings of Plato and Aristotle. We will investigate philosophical questions about the origin of the state, the purpose of political community, the different kinds of regimes or constitutions, the common good, individual freedoms, revolution, war, wealth, poverty, and slavery.

CROSSLISTED: POLI 3434.03, PHIL 3434.03

FORMATS: Lecture | Tutorial

CLAS 3501 Herodotus: Father of History, Father of Lies

CREDIT HOURS: 3

This course explores the conflict between Persia and the Greeks as narrated by the 'father of history/father of lies' as a story of exotic cultures, dramatic and bizarre events, and the actions of kings, despots, demagogues, warriors (with texts in English translation).

FORMATS: Seminar

CLAS 3502 Thucydides and the Greek World at War

CREDIT HOURS: 3

This course explores the world of warring Greek city-states, alliances and empire-building, meddling superpowers, and rival politics and politicians in the Mediterranean in the 5th Century BC as recounted by Thucydides (in English translation)

CROSSLISTED: HIST 3502.03

FORMATS: Seminar

CLAS 3503 Aristotle

CREDIT HOURS: 3

A careful reading of an Aristotelian treatise, or selections from several treatises. The treatise studied will vary from year to year.

PREREQUISITES: CLAS/PHIL/RELS 2365 or CLAS/PHIL/RELS 2366 or CLAS/PHIL 2361 or CLAS/PHIL 2362, or permission from instructor

FORMATS: Seminar

CLAS 3515 Greek Tragedy

CREDIT HOURS: 3

Greek tragedy was a product of the democratic society of fifth century Athens and played a vital role in the life of the community. This course explores the nature and development of the tragic genre through a study of the plays of Aeschylus, Sophocles, and Euripides in translation. The tragedies are examined as literary texts and in terms of their mythical background and cultural context. Topics to be studied include the conventions of the genre; the nature of tragic heroism; aspects of staging and performance; ancient & modern theories of tragedy.

PREREQUISITES: Students must be beyond first year.

EXCLUSIONS: CLAS 3510X/Y.06

FORMATS: Lecture | Discussion

CLAS 3516 Ancient Comedy

CREDIT HOURS: 3

Ancient Comedy ranges from the boisterous and bawdy plays of Old Comedy through the domestic and romantic 'tragicomedies' of Euripides to the boy-meets-girl stories of Greek and Roman New Comedy. This course examines the origins and development of the comic genre in the Greek and Roman world through a study of the plays of Aristophanes, Euripides, Menander, Plautus, and Terence in translation. It considers the nature of comedy and its function within society as well as the basic techniques and conventions of the genre itself. Topics to be studied include the 'comic hero'; comic stereotypes; types of humor; the relationship between actor & spectator.

PREREQUISITES: Students must be beyond first year.

CROSSLISTED: THEA 3516

EXCLUSIONS: CLAS 3510X/Y.06

FORMATS: Lecture | Discussion

CLAS 3525 Ancient Greek Epic

CREDIT HOURS: 3

This course is designed to introduce students to the heroic epics of the Ancient Greek world. Texts are read in translation and will be selected from the works of Hesiod, Homer, and Apollonius of Rhodes. Topics to be discussed will include the cultural background of the Homeric world; the nature of oral poetry; oral vs. literate culture; conventions of the epic genre; the heroic code; the relationship between the human and divine world.

PREREQUISITES: Students must be beyond first year.

FORMATS: Lecture | Seminar

CLAS 3600 Sanskrit Texts I: Narrative and Epic Selections

CREDIT HOURS: 3

This course provides a transition from first-year Sanskrit grammar to the reading of simple Sanskrit texts in their original form. In the first weeks, the materials selected for reading will be examined slowly and thoroughly as a means of introducing key aspects of grammar not covered in the first year (notably the infinitive, simple future, additional forms of compounds, present participial adjective, optative, gerundive, absolute constructions, causative and reduplicating perfect). Students thus will be equipped with the tools for independent reading of simple narrative and epic sources such as the Pancatantra, Hitopadesa, Kathasaritsagara, Mahabharata, Harivaṃśa, and Rāmāyaṇa.

PREREQUISITES: Both CLAS/RELS 1600.03 and CLAS/RELS 2600.03

CROSSLISTED: RELS 3600.03

FORMATS: Other (explain in comments)

CLAS 3601 Arab Caliphs, Turkish Commanders, and Persian Viziers: Islamic History, 750-1200

CREDIT HOURS: 3

Please see description for HIST 3509.03 in the History section of this calendar.

PREREQUISITES: HIST 2502.03 or 2503.03 or permission of instructor

CROSSLISTED: HIST 3509.03
FORMATS: Lecture | Discussion

CLAS 3602 Ancient and Medieval History of the Persianate World

CREDIT HOURS: 3

Please see description for HIST 3511.03 in the History section of this calendar.

PREREQUISITES: HIST 2502.03 or 2503.03 or CLAS 1010X/Y.06 or permission of instructor

CROSSLISTED: HIST 3511.03

FORMATS: Lecture | Discussion

CLAS 3611 Oratory and Power: Jedi of the Greco-Roman World

CREDIT HOURS: 3

The ancient art of oratory was an art of mind-control. In politics, in law, in love, success depended on the skillful use of rhetoric to persuade neutrals, rally friends, and demolish enemies. In this class, we will explore the historical development of Greek and Roman oratory, study the actual techniques ancient speakers employed both in phrasing and in argument, consider the causes of the decline of oratory in antiquity itself, and compare ancient oratory to oratory in our modern world. (No knowledge of ancient Greek or Latin is required.)

FORMATS: Lecture | Tutorial | Discussion

CLAS 3661 Hellenistic Philosophy: The Epicureans

CREDIT HOURS: 3

A study of philosophy in the Hellenistic Age. We will investigate the development of Greek and Roman philosophy after Aristotle, focusing on Epicureanism. The course covers the logic, physics, and ethics of Epicurus' school, as well as its religious dimension.

PREREQUISITES: CLAS 2361.03 and 2362.03 or permission of instructor

FORMATS: Seminar

CLAS 3662 Hellenistic Philosophy - The Sceptics

CREDIT HOURS: 3

A study of philosophy in the Hellenistic Age focusing on Pyrrhonian and Academic Scepticism, as well as various responses to sceptical arguments.

PREREQUISITES: CLAS 2361.03 and 2362.03 or permission from instructor

EXCLUSIONS: CLAS 4602.03, RELS 4602.03

CLAS 3701 Intermediate Greek I

CREDIT HOURS: 3

This course is a continuation of the study of ancient Greek language at the intermediate level. It continues the study of the language begun in introductory ancient Greek. In the course, students review and complete their study of Greek grammar before reading ancient Greek texts in their original language.

PREREQUISITES: 2505.03 & 2506.03

EXCLUSIONS: CLAS 2700X/Y.06 CLAS 2701.03

FORMATS: Seminar

CLAS 3702 Intermediate Greek II

CREDIT HOURS: 3

This course is a continuation of the study of ancient Greek language at the intermediate level. It continues the study of the language begun in introductory ancient Greek. In the course, students review and complete their study of Greek grammar before reading ancient Greek texts in their original language.

PREREQUISITES: CLAS 3701.03

EXCLUSIONS: CLAS 2702.03

FORMATS: Seminar

CLAS 3712 Greek Texts: Epic II

CREDIT HOURS: 3

A Greek reading course on epic, exploring the works of Homer and/or Hesiod. Texts will be read in ancient Greek.

PREREQUISITES: minimum grade of C in CLAS 2700 or permission of the instructor

EXCLUSIONS: CLAS 3710X/Y

FORMATS: Seminar

CLAS 3779 Fate, the Hero, and Eternal Empire: Roman Epic in English Translation

CREDIT HOURS: 3

This class investigates the epic genre in Rome primarily through its three most prominent works: Virgil's Aeneid, Ovid's Metamorphoses, and Lucan's Civil War. We'll pay attention to the debt these authors owe to their Greek predecessors (above all Homer) and also survey some fragments of pre-Virgilian Roman. In addition to exploring such topics as changing standards of heroic characterization, the poetic treatment of history and myth, religion, philosophy, politics, violence, gender and sexuality, and art and propaganda, we'll try to understand how, for the Romans, writing and reading epic was so important for working out the proper relationship between individual and state, and for justifying the idea that Rome's empire over other nations and peoples was a destiny guaranteed by the gods. In addition to reading these works (or selections from them) in English translation, students will read some secondary works at the instructor's discretion.

PREREQUISITES: Any first year writing class

FORMATS: Lecture

CLAS 3794 Read & Research Seminars: Greeks and Others

CREDIT HOURS: 3

Advanced history seminar course on the theme of "Greeks and Others". Class is offered in translation.,

CLAS 3803 Intermediate Latin I

CREDIT HOURS: 3

This course is a continuation of Introductory Latin at the intermediate level. It is a study of the poetry and prose literature of Rome through a selection of texts. Particular attention is paid to improving the students' command of the grammar and syntax of the Latin language.

PREREQUISITES: CLAS 2402.03

EXCLUSIONS: CLAS 2801.03

FORMATS: Seminar

CLAS 3804 Intermediate Latin II

CREDIT HOURS: 3

This course is a continuation of Introductory Latin at the intermediate level. It is a study of the poetry and prose literature of Rome through a selection of texts. Particular attention is paid to improving the students' command of the grammar and syntax of the Latin language.

PREREQUISITES: CLAS 2402.03

EXCLUSIONS: CLAS 2802.03

FORMATS: Seminar

CLAS 3842 Latin Philosophical Texts: Anselm and Bonaventure

CREDIT HOURS: 3

The purpose of this course is to give students experience in reading philosophical Latin. The texts will be chosen from the works of Anselm and Bonaventure.

PREREQUISITES: First year Latin or its equivalent.

EXCLUSIONS: CLAS 3840X\Y.06

FORMATS: Seminar

CLAS 3901 Philosophy of Aristotle I

CREDIT HOURS: 3

The general scope of the Aristotelian Philosophy - the understanding of nature, the City, the aesthetic experience of humanity - is considered in relation to the argument of the Metaphysics or 'First Philosophy'.

PREREQUISITES: One of the following: CLAS 2361.03, CLAS 2362.03, CLAS 2365.03, CLAS 2366.03 or permission of the instructor

EXCLUSIONS: CLAS 3900.06

FORMATS: Seminar

CLAS 3902 Philosophy of Aristotle II

CREDIT HOURS: 3

The general scope of the Aristotelian Philosophy - the understanding of nature, the City, the aesthetic experience of humanity - is considered in relation to the argument of the Metaphysics or 'First Philosophy'.

CREDIT HOURS: 3

The philosophy of Plotinus and later thinkers is considered as the resume of Greek Philosophy; in particular, the role of Plato and other older philosophers in the formation of Neoplatonism is a principal interest.

PREREQUISITES: One of the following: CLAS 2361.03, CLAS 2362.03, CLAS 2365.03, CLAS 2366.03 or permission of the instructor.

EXCLUSIONS: CLAS 3910.06

FORMATS: Seminar

CLAS 4010 Islamic Philosophy: al-Ghazali

CREDIT HOURS: 3

Abu Hamid al-Ghazali (1058-1111) is one of the greatest Muslim thinkers of all time. This course is an introduction to his thought, focusing on al-Ghazali's "two-tier" approach to theology – exoteric theology for the masses and esoteric theology for the select few – and on his attitude to Islamic philosophy and Islamic mysticism (Sufism).

PREREQUISITES: At least one of RELS 1002.03 RELS 2003.03 or KING 1000X/Y.06 or KING 1100X/Y.06 or permission of instructor

CROSSLISTED: RELS 4010.03, CLAS 5817.03

FORMATS: Seminar

CLAS 4011 Jewish Philosophy: Maimonides

CREDIT HOURS: 3

Moses Maimonides (1135-1204) is one of the greatest Jewish thinkers of all time. This course is an introduction to his philosophical and legal writings, with special emphasis on his famous treatise *The Guide of the Perplexed*. Maimonides' stance on such issues as God's incorporeality, creation, and prophecy will be compared to that of other varieties of Judaism.

PREREQUISITES: Students must have completed 5 full credits of university study and RELS 2001.03 or RELS 3382.03/CLAS 3382.03/PHIL 2382.03, or permission of the instructor

CROSSLISTED: RELS 4011.03

FORMATS: Lecture | Seminar

CLAS 4018 Christian Theology in the Lands of Islam: John of Damascus

CREDIT HOURS: 3

John of Damascus (d. 749) is one of the greatest Christian theologians of the Patristic age. Though he wrote in Greek, he was a Christian Arab (his Arabic name is Mansur ibn Sarjun), who lived under Muslim rule and was employed as a public official in the Umayyad administration in Damascus. The course will focus on his theological works (especially his *Summa of Christian Theology*, entitled *On the Orthodox Faith*, and his three treatises in defence of the icons), their Christian sources, and their Islamic context.

PREREQUISITES: At least one of RELS 1002.03, RELS 2003.03, RELS 2281.03, RELS 3283.03 RELS 3009.03 Foundation Year Program or permission of instructor

CROSSLISTED: RELS 4018.03

CLAS 4019 Philo Judaeus

CREDIT HOURS: 3

Reconciling Jewish Scripture and Plato, Philo culminates Second Temple Jewish thought and founds the Christian treatment of Scripture. He is the most influential Jewish theologian and presents the High Priest as priest of the cosmos so he is crucial both to understand our past the to carry us into the future.

PREREQUISITES: At least one course at the second year or above in CLAS or RELS

CROSSLISTED: RELS 4019.03

FORMATS: Seminar

CLAS 4050 Sappho

CREDIT HOURS: 3

Sappho is simultaneously one of the most famous ancient authors and one of the most problematic. Once acclaimed as the most sublime lyric poet of antiquity, even as the "tenth Muse," she reaches us in only a handful of intact poems (together with numerous fragments); therefore, in this class we will

employ the full range of scholarly tools (aesthetic interpretation, historical-literary context, theories of performance, analysis of metre and dialect, papyrology) in attempting to assess both Sappho's mostly lost corpus and her legacy in the modern world.

PREREQUISITES: CLAS 3702.03

FORMATS: Seminar

CLAS 4060 The Consolation of Philosophy

CREDIT HOURS: 3

Boethius's Consolation is a strange example of Menippean satire, which is itself a strange genre. This class will consider the poetry, the prose and, most significantly, how these elements are combined in order to achieve the goal of the work, which is to offer consolation to the reader.

FORMATS: Seminar

CLAS 4100 Reading and Research in Latin Texts

CREDIT HOURS: 3

Advanced reading of a Latin author or genre with attention to secondary literature and the critical reception of the works in question.

PREREQUISITES: CLAS 4801.03, CLAS 4802.03, CLAS 4811.03, CLAS 4812.03, CLAS 4822.03, CLAS 4851.03, or CLAS 4852.03 or permission of the instructor.

FORMATS: Seminar

CLAS 4117 Beginning with Being: Reading Parmenides from Plato Heidegger

CREDIT HOURS: 3

In this course, we shall stage an encounter between the two great thinkers - Plato and Heidegger - whose thought has often been thought to mark the 'beginning' and the 'end' of the Western philosophical tradition. Taking Parmenides' pregnant insight ("Being and Thinking are the same") as the poetic site of this encounter, we will ask what it still means to engage in philosophy today.

CROSSLISTED: CTMP 4117.03

FORMATS: Lecture

CLAS 4321 Ancient Modern Dialect I

CREDIT HOURS: 3

By reading a selection of important ancient texts alongside modern criticisms and appropriations of ancient dialectic, this class will compare and evaluate how the power, the limits, and the purpose of philosophical reason are understood in both ancient and modern thought.

CLAS 4322 Ancient Modern Dialect II

CREDIT HOURS: 3

By reading a selection of important ancient texts alongside modern criticisms and appropriations of ancient dialectic, this class will compare and evaluate how the power, the limits, and the purpose of philosophical reason are understood in both ancient and modern thought.

CLAS 4352 Ancient Religion II

CREDIT HOURS: 3

This advanced seminar focuses on the intersection of religious belief, practice and material culture in Ancient Greek and Roman religion. Specific topics vary from year to year.

CLAS 4401 Philosophy of the Greek Church Fathers

CREDIT HOURS: 3

This seminar involves the detailed study of a text, or group of texts, from one or more of the Greek Church Fathers. The choice of text varies from year to year, in relation to the needs and interests of students.

PREREQUISITES: At least one of RELS 1002.03, RELS 2281.03, RELS 3283.03, RELS 3309.03, Foundation Year Program, or permission of instructor

CROSSLISTED: RELS 4401.03

CLAS 4501 Seminar on Neoplatonism I

CREDIT HOURS: 3

This course considers major texts in the history of Neoplatonism. Normally a single text is chosen from the works of authors from Plotinus to Cusa.

EXCLUSIONS: CLAS 4500.03, RELS 4500.03

CLAS 4502 Seminar on Neoplatonism II

CREDIT HOURS: 3

This course considers major texts in the history of Neoplatonism. Normally a single text is chosen from the works of authors from Plotinus to Cusa.

EXCLUSIONS: CLAS 4500.03; RELS 4500.03

FORMATS: Lecture

CLAS 4540 Ammianus Marcellinus and his World

CREDIT HOURS: 3

This course approaches the history and culture of the fourth century AD through its most important historian, Ammianus Marcellinus. The course will focus on (but not be limited to) a careful study of Books 14-25 of the *Res Gestae*, which span the reign of Ammianus' hero, Julian the Apostate.

PREREQUISITES: CLAS 4801.03, CLAS 4802.03, CLAS 4811.03, CLAS 4812.03, CLAS 4822.03, CLAS 4851.03, or CLAS 4852.03 or permission of the instructor.

FORMATS: Seminar

CLAS 4545 Roman Culture and Roman Politics in the Transition to Autocracy

CREDIT HOURS: 3

A study of the cultural and political history of Rome during the Principate of Augustus; we will focus on the reformation of Roman elite culture during this period in light of the intellectual traditions of the Late Republic and the cultural politics of the age of Principate.

PREREQUISITES: CLAS 1011.03 or CLAS 2209.03 or CLAS 2231.03 or CLAS 2232.03 or CLAS 2233.03 or CLASS 2234.03.

FORMATS: Seminar

CLAS 4600 Sanskrit Texts II: Myth, Poetry and Drama

CREDIT HOURS: 3

This course continues from CLAS/RELS 3600 the reading of Sanskrit texts in their original form, training students in the styles and conventions of Puranic literature (e.g. Vishnu Purana, Bhagavata Purana, etc.) as well as of kavya or courtly poetry and drama (e.g. excerpts from the Gita Govinda of Jayadeva, poems and plays of Kalidasa, plays of Bhasa, Kiratarjuniya of Bharavi, etc.). Students will work through short selections, emphasizing thorough mastery of smaller and representative samples over quantity or exhaustive coverage of entire works.

PREREQUISITES: CLAS/RELS 3600.03

CROSSLISTED: RELS 4600.03

CLAS 4680 Reading and Research

CREDIT HOURS: 3

NOTE: Course Details listed here also apply to CLAS 4690.

CLAS 4690 Reading & Research

CREDIT HOURS: 3

See CLAS 4680

CLAS 4711 Greek Texts: Epic I

CREDIT HOURS: 3

A Greek reading course on epic, exploring the works of Homer and/or Hesiod. Texts will be read in Greek.

EXCLUSIONS: 3711

FORMATS: Lecture | Seminar

CLAS 4712 Greek Texts: Epic II

CREDIT HOURS: 3

A Greek reading course on epic, exploring the works of Homer and/or Hesiod. Texts will be read in Greek.

PREREQUISITES: CLAS 3702.03

EXCLUSIONS: CLAS 3712.03

CLAS 4721 Greek Texts: Poetry I

CREDIT HOURS: 3

A Greek reading course on poetry, including archaic, classical, and Hellenistic poetry and drama. Texts will be read in ancient Greek

PREREQUISITES: CLAS 2702.03

EXCLUSIONS: CLAS 3720.03 and CLAS 3721.03

FORMATS: Seminar

CLAS 4722 Greek Texts: Greek Poetry II

CREDIT HOURS: 3

A Greek reading course on poetry, including archaic, classical, and Hellenistic poetry and drama. Texts will be read in ancient Greek

PREREQUISITES: CLAS 3702.03

EXCLUSIONS: CLAS 3720.03 and CLAS 3722.03

FORMATS: Seminar

CLAS 4741 Greek Texts: Tragedy I

CREDIT HOURS: 3

A Greek reading course on tragedy, exploring the works of Aeschylus, Sophocles, and/or Euripides. Texts will be read in ancient Greek.

PREREQUISITES: CLAS 2702.03

EXCLUSIONS: CLAS 3730.03 and CLAS 3741.03

FORMATS: Seminar

CLAS 4742 Greek Texts: Tragedy II

CREDIT HOURS: 3

A Greek reading course on tragedy, exploring the works of Aeschylus, Sophocles, and/or Euripides. Texts will be read in ancient Greek.

PREREQUISITES: CLAS 2702.03

EXCLUSIONS: CLAS 3730.03 and CLAS 3742.03

FORMATS: Seminar

CLAS 4751 Greek Texts: Greek Authors I

CREDIT HOURS: 3

A Greek reading course on authors from the ancient canon who wrote history, biography, philosophy, and oratory. Texts will be read in ancient Greek.

PREREQUISITES: CLAS 2702.03

EXCLUSIONS: CLAS 3751.03 and CLAS 3750.03

FORMATS: Seminar

CLAS 4752 Greek Texts: Greek Authors II

CREDIT HOURS: 3

A Greek reading course on authors from the ancient canon, who wrote history, biography, philosophy, and oratory. Texts will be read in ancient Greek.

PREREQUISITES: CLAS 3702.03

EXCLUSIONS: CLAS 3752.03 and CLAS 3750X/Y.06

FORMATS: Seminar

CLAS 4761 Greek Texts: Philosophy I

CREDIT HOURS: 3

A Greek reading course on philosophical texts, exploring the works of authors such as Plato and Aristotle. Texts will be read in ancient Greek.

PREREQUISITES: CLAS 3702.03

EXCLUSIONS: CLAS 3761.03

FORMATS: Seminar

CLAS 4762 Greek Texts: Philosophy II

CREDIT HOURS: 3

A Greek reading course on philosophical texts, exploring the works of authors such as Plato and Aristotle. Texts will be read in ancient Greek.

PREREQUISITES: CLAS 3702.03

EXCLUSIONS: CLAS 3762.03

FORMATS: Seminar

CLAS 4781 Greek Texts: History I

CREDIT HOURS: 3

A Greek reading course on historical texts, exploring the works of authors such as Herodotus, Thucydides, Lysias, and Plutarch. Texts will be read in ancient Greek.

PREREQUISITES: CLAS 2702.03 or CLAS 3702

EXCLUSIONS: CLAS 3781.03 and CLAS 3780X/Y.06

FORMATS: Seminar

CLAS 4782 Greek Texts: History II

CREDIT HOURS: 3

A Greek reading course on historical texts, exploring the works of authors such as Herodotus, Thucydides, Lysias, and Plutarch. Texts will be read in ancient Greek.

PREREQUISITES: CLAS 3702.03

EXCLUSIONS: CLAS 3782.03 CLAS 3780X/Y.06

FORMATS: Seminar

CLAS 4801 Latin Text: Roman Poetry I

CREDIT HOURS: 3

A reading course that solidifies the student's command of grammar and syntax while reading Roman poetry, including epics, elegies, odes, and satires. Texts will be read in Latin.

PREREQUISITES: CLAS 2802.03

EXCLUSIONS: CLAS 3801.03

FORMATS: Seminar

CLAS 4802 Latin Texts: Roman Poetry II

CREDIT HOURS: 3

A reading course that solidifies the student's command of grammar and syntax while reading Roman poetry, including epics, elegies, odes, and satires. Texts will be read in Latin.

PREREQUISITES: CLAS 3804.03
EXCLUSIONS: CLAS 3802.03
FORMATS: Seminar

CLAS 4811 Latin Texts: Love and Violence

CREDIT HOURS: 3

A reading course that solidifies the student's command of grammar and syntax while exploring the themes of love and violence in the works of authors such as Cicero, Virgil, Catullus, and Horace. Texts will be read in Latin.

PREREQUISITES: CLAS 3804.03

EXCLUSIONS: CLAS 3810X/Y.06 and CLAS 3811.03

FORMATS: Seminar

CLAS 4812 Latin Texts: War and Peace

CREDIT HOURS: 3

A reading course that solidifies the student's command of grammar and syntax while exploring the themes of war and peace in the works of authors such as Cicero, Virgil, Catullus, and Horace. Texts will be read in Latin.

PREREQUISITES: CLAS 3804.03

EXCLUSIONS: CLAS 3812.03 CLAS 3810X/Y.06

FORMATS: Seminar

CLAS 4821 Latin Texts: Human and Divine

CREDIT HOURS: 3

A reading course that solidifies the student's command of grammar and syntax while exploring the themes of the human and the divine in the works of authors such as Apuleius, Virgil, Ovid, and Horace. Texts will be read in Latin.

PREREQUISITES: CLAS 2802.03

EXCLUSIONS: CLAS 3821.03, CLAS 3820X/Y.06

CLAS 4822 Latin Texts: Myth and History

CREDIT HOURS: 3

A reading course that solidifies the student's command of grammar and syntax while exploring the themes of myth and history in the works of authors such as Apuleius, Livy, Virgil, and Horace. Texts will be read in Latin.

PREREQUISITES: CLAS 3804.03

EXCLUSIONS: CLAS 3822.03, CLAS 3820X/Y.06

FORMATS: Seminar

CLAS 4851 Latin Texts: Fate and Empire

CREDIT HOURS: 3

A reading course that solidifies the student's command of grammar and syntax while exploring the theme of fate and empire in the works of authors such as Sallust, Ovid, Virgil, Livy, and Horace. Texts will be read in Latin.

PREREQUISITES: CLAS 3804.03

EXCLUSIONS: 3850 3851

FORMATS: Seminar

CLAS 4852 Latin Texts: Friends and Enemies

CREDIT HOURS: 3

A reading course that solidifies the student's command of grammar and syntax while exploring the theme of friends and enemies in the works of authors such as Sallust, Cicero, Catullus, Horace, Ovid, and Virgil. Texts will be read in Latin

Introduction

The “contemporary period” might be described as one of constant transformation, with new challenges and opportunities emerging all the time. The Contemporary Studies Program engages with the ideas, thinkers, and movements of the 19th, 20th, and 21st centuries that have contributed to new understandings of the world, community, self and other.

The annual ‘core’ courses give students a framework for understanding political, scientific, and aesthetic phenomena in the contemporary period. The elective courses explore ideas about ethics, aesthetics, and politics; contemporary art, modern film, and digital media; new biotechnologies, nature, environment and the body, and many others.

Degree Options

Students registered in the BA degree can pursue a degree in the Contemporary Studies Program: (a) as a Combined Honours degree; or (b) as a Minor. Students registered in the BSc degree can pursue a degree in the Contemporary Studies Program: (a) as a Combined Honours degree with the Science subject as the primary subject and Contemporary Studies as the secondary subject; or (b) as a Minor. Students may also take Contemporary Studies courses as electives towards any BA or BSc degree program.

Combined Honours

The Contemporary Studies Program (CSP) offers a Combined Honours BA or BSc program offered jointly by Dalhousie University and the University of King's College. The other honours subject must be selected from the following list of Dalhousie departments and programs:

In Arts: Canadian Studies; Cinema and Media Studies; Classics; Creative Writing; English; French; Gender and Women's Studies; German; History; International Development Studies; Italian; Law, Justice, and Society; Music; Philosophy; Political Science; Religious Studies; Russian; Sociology and Social Anthropology; Spanish; and Theatre.

In Science: Atmospheric Science, Biochemistry, Biology, Chemistry, Computer Science, Earth Science, Economics, Environmental Science, Mathematics, Microbiology and Immunology, Neuroscience, Physics, Psychology, and Statistics.

Contemporary Studies can also be taken in combination with Environment, Sustainability and Society.

Electives may be taken in any of the above-mentioned departments and programs, as well as in the following programs: Early Modern Studies, and History of Science and Technology.

All students must meet the general requirements for their degree type as detailed in the Degree Requirements section of this calendar. Students who are eligible to take an honours degree are urged to apply to the Contemporary Studies Program. Because it is an honours program, the quality of work required is higher than that required in a 90 credit hour minor or 120 credit hour major program.

Applications for admission must be made to the Dalhousie department concerned and to the Contemporary Studies Office at King's on forms available from the Registrar at either Dalhousie or King's. Students normally enroll in CTMP 2001.03 & CTMP 2002.03 (the first "core" course) in their second year, and apply for the Combined Honours program in either second or third year. For each individual student the entire degree program, including elective courses, is subject to supervision and approval by the Dalhousie department concerned and by the Director of Contemporary Studies.

All Contemporary Studies Program students are encouraged to acquire competence in languages through appropriate courses which are relevant to their degree, interests, and future plans.

The joint Dalhousie/King's Contemporary Studies combined honours program is based on the general requirement that the 120 credit hours required to graduate include:

1. Completion of either the King's Foundation Year Program or at least 12 credit hours of first year courses at Dalhousie;
2. A minimum of 66 and a maximum of 84 credit hours beyond the 1000-level in the two honours subjects, but not more than 48 nor fewer than 30 credit hours being in either of them.
3. The three "core" course doublets in Contemporary Studies: CTMP 2001.03 & CTMP 2002.03 (or CTMP 2000.06), CTMP 3001.03 & CTMP 3002.03 (or CTMP 3000.06), CTMP 4001.03 & CTMP 4002.03 (or CTMP 4000.06).
4. At the conclusion of an honours program a student's record must show a grade which is additional to the grades taken to complete the required 120 credit hours. In a combined honours program, students usually obtain this grade in their primary subject (in which they have completed more credits); permission may be required from the primary subject advisor if a student wishes to obtain the grade in the secondary subject. Students fulfilling this requirement in Contemporary Studies submit a research paper and defend it at an oral examination. They must enrol in both parts of the honours thesis seminar and choose one of the following options: Non-credit CTMP 0456.00 & non-credit CTMP 0457.00 Honours Thesis Seminar or non-credit CTMP 0456.00 and 3 credit hours CTMP 4456.03 Honours Thesis Seminar.

Please Note:

Students may take an Independent Readings course only when they reach their third or fourth year. The permission of a member of the teaching staff and the Director is necessary in order to take these courses, and their availability is strictly limited.

Minor in Contemporary Studies

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Requirements

Students seeking a minor in Contemporary Studies must complete between 18 and 27 credit hours at the 2000 level or above. This must include:

1. One of the core course doublets:
CTMP 2001.03 & CTMP 2002.03 (or CTMP 2000.06)

**Both CTMP 2001.03 & CTMP 2002.03 should be taken in the same academic year.*

CTMP 3001.03 & CTMP 3002.03 (or CTMP 3000.06)

**Both CTMP 3001.03 & CTMP 3002.03 should be taken in the same academic year.*

CTMP 4001.03 & CTMP 4002.03 (or CTMP 4000.06)

**Both CTMP 4001.03 & CTMP 4002.03 should be taken in the same academic year.*

2. 6 Credit hours at the 3000 or 4000 level. *CTMP 3001.03 & CTMP 3002.03 (or CTMP 3000.06) **OR** CTMP 4001.03 & CTMP 4002.03 (or CTMP 4000.06) will also fulfil this requirement.

3. 6 Credit hours at any level.

Contact [Contemporary Studies](#) for more information.

Dalhousie Selectives

CTMP Selectives

Students enrolled in the Combined Honours or Minor program in CSP can opt to take a maximum of one 3-credit hour “selective” course at Dalhousie University to count towards the CSP part of their degree. The Registrar’s Office at King’s should be notified if students wish to pursue this option.

Approved selectives (for 2022-23 only) are:

- [CHIN 3050/FILM 3350 Topics in Asian Cinema](#)
- [CHIN 3062 Modern Chinese Literature in Revolutionary Times](#)
- [ENGL 3086 Post-Colonial Literatures](#)
- [INDG 3401 Indigenous Representation in Film](#)
- [POLI 2520 World Politics](#)
- [POLI 3385 Politics of the Environment](#)
- [SOSA 3215 Migration and Identity](#)
- [SOSA 3225 Culture, Rights and Power](#)

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year’s offering. For further information please contact the department, or visit the department's website.

Course Descriptions

CTMP 0456 Honours Thesis Seminar in Contemporary Studies Part 1

CREDIT HOURS: 0

Students intending to complete an honours thesis in CSP are required to register in the Honours Thesis Seminar Part 1. Seminars will be held four times during the semester. In addition, students will work individually with thesis supervisors to formulate the topic, write the thesis proposal, and begin writing the first draft. Students are required to submit the thesis proposal by the deadline specified in the “Honours Thesis Memo.”

PREREQUISITES: Approval of Director required. CTMP 0456 & CTMP 0457 or CTMP 0456 & CTMP 4456 must be taken in the same academic year to fulfill the requirements of the CTMP Combined Honours degree.

EXCLUSIONS: CTMP 0455X/Y

FORMATS: Seminar

CTMP 0457 Honours Thesis Seminar in Contemporary Studies Part 2

CREDIT HOURS: 0

Students intending to complete an honours thesis are required to register in the Honours Thesis Seminar. Seminars will be held four times during the year. Students will meet with the Director to discuss the expectations and requirements of the honours thesis in preparation for a thesis defence that takes place in March.

PREREQUISITES: Approval of Director required. CTMP 0456 & CTMP 0457 must be taken in the same academic year to fulfill the requirements of the CTMP Combined Honours degree.

EXCLUSIONS: CTMP 0455X/Y

FORMATS: Seminar

CTMP 2001 Modern Social and Political Thought: Politics of Recognition

CREDIT HOURS: 3

This course focuses on recognition as a guiding theme in nineteenth-century social and political thought. By foregrounding related issues such as social and political visibility, material inequality, and self-consciousness, students will be introduced to the tradition of modern political theory and will also canvas some important early responses to Hegelian, liberal, and Marxist visions of individuals and society. Alongside these theoretical resources, the course also includes literary meditations on religious, colonial, and feminist themes, and the way these anticipated the transformative and turbulent century to follow.

CALENDAR NOTES: CTMP 2001.03 & CTMP 2002.03 must normally be taken in the same academic year to fulfill the requirements of the CTMP Combined Honours degree.

PREREQUISITES: Completion of 24 credit hours of 1st year classes

EXCLUSIONS: CTMP 2000.06

FORMATS: Lecture | Tutorial

CTMP 2002 Modern Social and Political Thought: Challenging Recognition

CREDIT HOURS: 3

The emergence of the 'modern world', in the late nineteenth and early twentieth centuries, greatly expanded the possibility of a viable large-scale politics of recognition; however, these advances also produced antagonisms of their own. Drawing on diverse theoretical and literary resources, this course will explore the unfolding of often devastating consequences resulting from these blind spots, especially regarding state power and individual agency, the problem of freedom, and notions of community. Particular areas of focus will include colonization and post-colonialism, revolution and war, mid-century and later feminism, gender studies, and alienation in post-modernity. The syllabus includes contributions by Simone de Beauvoir, Frantz Fanon, Chinua Achebe, Maria Campbell, bell hooks and Arthur Koestler.

CALENDAR NOTES: CTMP 2001.03 & CTMP 2002.03 must normally be taken in the same academic year to fulfill the requirements of the CTMP Combined Honours degree.

PREREQUISITES: CTMP 2001.03 or permission of the instructor

EXCLUSIONS: CTMP 2000.06

FORMATS: Lecture | Tutorial

CTMP 2011 The Lecture Series

CREDIT HOURS: 3

In some years a lecture series course is offered. Students are allowed to take up to three such courses, one for each year of upper-level study. Each course will consist of several evening lectures given by specialists from Canada and beyond, and a weekly two-hour seminar. The lecturers will offer students reflections on a number of contemporary issues and themes. Each series explores a different theme. NOTE: Course Details listed here also apply to CTMP 3011/CTMP 4011..

CROSSLISTED: CTMP 3011.03, CTMP 4011.03

EXCLUSIONS: CTMP 2010.06, CTMP 3010.06, CTMP 4010.06

FORMATS: Lecture | Seminar

CTMP 2100 The Politics of Hope: From Romanticism to Anarchism and Beyond

CREDIT HOURS: 3

A look at the connection between revolutionary political thought and nihilism: the course focuses on the history of Romanticism and anarchism, from Fichte and some colourful literary characters (German and English) to the deadly serious Russian nihilists. Our central concern is the notion of an infinite, all-powerful human freedom.

FORMATS: Lecture | Tutorial

CTMP 2101 Apocalypse: The Revolutionary Transformation of Politics and Culture

CREDIT HOURS: 3

This course highlights the movement from revolutionary nihilism to various forms of post-revolutionary unity and integration. Beginning with Nietzsche and

Dostoyevsky, the course discusses how some of the greatest contemporary thinkers (German, French, British, American) have struggled to put modern evil in the context of a larger good.

FORMATS: Lecture | Tutorial

CTMP 2102 Asia and the West: Centuries of Dialogue

CREDIT HOURS: 3

This course will explore some of the most important engagements of modern Western thinkers with various texts and traditions of East and/or South Asian thought, examine the very aspects of Asian thought that intrigued modern Western thinkers, and assess Western values and projects in their lights.

CROSSLISTED: EMSP 2390, HSTC 2811, CHIN 2082

EXCLUSIONS: EMSP 2460, CHIN 2080

FORMATS: Lecture | Seminar

CTMP 2115 The Idea of Race in Philosophy, Literature, and Art

CREDIT HOURS: 3

What is race? How does racism impact our sense of self and the communities in which we live? The first part of this class examines the emergence of the modern idea of race, in relation to European expansionism, philosophical ideas of the time, and the development of science. Next, we focus on contemporary conceptions of race and their relations to culture, history, ideology, science, and everyday lived experience. We consider contemporary debates on race and racism in the works of thinkers, writers, artists, and social activists, reflecting on the intersections of race, class, and gender.

FORMATS: Seminar

CTMP 2121 Humanism and Anti-humanism: The Dramatic Story of What Makes Us Modern

CREDIT HOURS: 3

We will begin by exploring the work of structuralist thinkers such as Ferdinand de Saussure, Claude Levi-Strauss, Louis Althusser, and Jacques Lacan. Their work addresses the deep structures of signs, language, political economy, cultural production, and the psyche. We will consider the way poststructuralist thinkers, such as Barthes, Foucault, Deleuze, and Derrida criticize and transform structuralist interpretations of subjectivity, language and the political.

FORMATS: Seminar

CTMP 2150 Society, Politics, and Literature

CREDIT HOURS: 3

During the nineteenth and twentieth centuries, the possibility of individual autonomy and freedom in the face of unprecedented social upheaval has been brought into question through the novel, a literary form which came to maturity in this time. The novels read in this course have been selected for their insights into the dilemmas of an age formed by political and economic revolutions where new collective forces have been brought into play. This class will consider the politics of race, class, colonialism, gender and nationhood in literature.

FORMATS: Lecture | Tutorial

CTMP 2201 Mass and Digital Media Culture

CREDIT HOURS: 3

This course will examine the development of mass and digital media in the 20th and 21st centuries. We will consider philosophical, journalistic, and literary responses to the radical changes in our communications technologies, and the way those mediums shape our understanding of the world, ourselves, and our relationships to others.

EXCLUSIONS: CTMP3411.03 for the 2015/16 academic year and CTMP3415.03 for the 2013/14 academic year

FORMATS: Lecture | Discussion

CTMP 2203 Bio-Politics: Human Nature in Contemporary Thought

CREDIT HOURS: 3

To what extent do biology and culture determine what it is to be human? Drawing on theorists ranging from Foucault to Steven Pinker, this course will examine the recent political, moral and existential issues raised by attempts to answer that question. Topics will include: evolutionary psychology, genetic screening, race, bio-engineering, and the spectre of determinism.

CROSSLISTED: HSTC 2206.03

FORMATS: Lecture

CTMP 2205 Totalitarianism and Science

CREDIT HOURS: 3

The question of who has authority over funding, direction and priorities of modern science is a central political concern. This course considers the case of totalitarian states (USSR and Nazi Germany) and consists of two parts. Part I analyses the essential features of totalitarian regimes. Part II concentrates on the

fortune of particular sciences (medicine, biology, physics) under them.
CROSSLISTED: HSTC 2205.03
FORMATS: Lecture | Tutorial

CTMP 2206 Environmentalism: origins, ideals, and critique

CREDIT HOURS: 3

In this course, we examine the ideals of environmentalism from its origins in the late 18th century to the present. Topics include the romantic critique of industrialization, forest management and sustainability, wilderness preservation, animal rights, radical environmentalism, and environmental justice.

CROSSLISTED: HSTC 2209.03

FORMATS: Lecture | Seminar

CTMP 2207 IDEAS OF THE SEA AND SEAFARING: INTERCULTURAL PERSPECTIVES

CREDIT HOURS: 3

A survey of intercultural ideas of the sea and seafaring from ancient to modern times. Topics include oceanic myths and origin stories, the myth of Atlantis, marine natural history, sea monsters, mermaids, the law and freedom of the sea, Black Atlantic identity, scientific sea voyages, oceanic science fiction, modern sea power, and marine conservation.

CROSSLISTED: EMSP 2490.03, HSTC 2220.03

FORMATS: Lecture | Discussion

CTMP 2301 Pain

CREDIT HOURS: 3

What does pain mean? This course will investigate the question of suffering in the contemporary world, and in doing so, it will approach various sites where pain matters, examining different discursive practices which attempt to speak of pain - or alternatively, claim that pain is what cannot be spoken. We will discuss the experience of the body in pain and the relation of pain to knowledge. Topics to be addressed will include pain in a medical context; torture and the political uses of pain; sexuality and pain; the expressibility of pain. We will examine two archetypes of “the tortured artist”, Frida Kahlo and Jackson Pollock, and will inquire whether pain can be made meaningful.

FORMATS: Seminar

CTMP 2303 Narrative and Meta-narrative

CREDIT HOURS: 3

This course will explore twentieth-century theories of the narrative and the increasingly broad claims made for the role of narrativity in politics, psychology and literature. Starting from Lyotard's characterization of the post-modern as an incredulity towards meta-narratives, the course will look at literary narratives (for example, Balzac, Borges, Thomas Pynchon and Alice Munroe) as well as theories of the narrative (Levi-Strauss, Freud, Lacan, Lyotard, and Roland Barthes). Topics to be considered include the constitution of social narratives, possible grounds for the interpretation of narrative, the relation of narrative to ideology and the explanatory power of meta-narratives

FORMATS: Seminar

CTMP 2313 The Vampire: Modernity and the Undead

CREDIT HOURS: 3

Since the emergence of vampire stories in the late sixteenth century, the vampire has served as a complex symbol for forces that defy or challenge modernity. This course will examine the figure of the vampire as it appear in folklore, philosophy, fiction, poetry, film, and television. Throughout the course we will consider the works in their historical and cultural context, considering what changing ideas of the vampire can tell us about early modern and contemporary views of death, morality, national identity, sexuality, and gender.

CROSSLISTED: EMSP 2313.03

FORMATS: Lecture | Seminar

CTMP 2316 The “Pictorial Turn” in Recent Thought, Art and Theory

CREDIT HOURS: 3

The world is increasingly saturated with visual representations. This class considers the proliferation of the image in contemporary culture, and will reflect on vision and visuality, particularly in the fine arts. This class will introduce students to the work of artists and the writing of several key theorists and debates in visual culture studies.

CTMP 2322 The Experience of Others in Philosophy, History and Literature

CREDIT HOURS: 3

This class examines modern theories and narratives regarding the issue of alterity, the condition of being different or ‘other’. We will focus on the many

political, social and ontological mechanisms (often integral to the structure of contemporary societies) which marginalize or erase the 'other'. Equally, we will consider the perspectives of many of these 'others' and their overcoming of these antagonisms in pursuit of agency and dignity. The course readings include contributions from Albert Camus, Kamel Daoud, Simone de Beauvoir, Emmanuel Levinas, G.W.F. Hegel, bell hooks, J.M. Coetzee, Chinua Achebe and Mohsin Hamid.

FORMATS: Seminar

CTMP 2330 Reflections on Death

CREDIT HOURS: 3

The texts in this course consist of literary and philosophical reflections on death, the "permanent and irreversible cessation of life" (J.M. Fischer). With references to Plato and Hegel, we will consider the ways in which death has been understood as giving meaning and structure to life. The focus will be on contemporary confrontations with "pure negativity" and on different thinkers' attempts to articulate death as an ontological condition. We will also look at representations of death in contemporary art, literature, and film.

FORMATS: Lecture | Seminar

CTMP 2335 The Artist and Society

CREDIT HOURS: 3

A preoccupation of 20th century cultural life has been the relation between the creative artist and society. To what extent should the artist engage in the social and political currents of her/his time, or retreat into solitude? What responsibility does the artist have to society, or society to the artist? This course often concentrates on a particular artist or group of artists. In 2017-18, the artist will be David Bowie.

FORMATS: Seminar

CTMP 2336 East Meets West in Popular Culture

CREDIT HOURS: 3

This course is devoted to examining intersections between "West" and "East" through the study of cross-cultural influences in popular literature, cinema, music, and comics in Europe, North America, China, and Japan.

CROSSLISTED: CHIN 2052.03

RESTRICTIONS: Restricted to students in their 2nd year and above.

CTMP 2340 Art, philosophy and politics

CREDIT HOURS: 3

This course attempts to make sense of the philosophical, political and artistic aims, accomplishments and influences of futurism, expressionism and surrealism. Students will read primary texts, including prose, poetry, literature and manifestos as well as examine selected works from the visual arts and film. Topics for discussion include the death of art, the reintegration of art and life, modernism, art and the unconscious, anti-aesthetics, art and kitsch, the autonomy of art, and art and politics. Writings about art will include works by Burger, Lukacs, Benjamin, Kracauer, Adorno, Lyotard, Greenberg, Agamben, and Foster.

FORMATS: Lecture | Seminar

CTMP 2350 Feminisms: The First Three Waves

CREDIT HOURS: 3

In this course we will consider major developments in feminist theory from the 19th century to the present, concentrating on primary philosophical and literary texts. We will read representative works from all three waves, and consider black, lesbian, and postcolonial feminisms, as well as writing by trans* authors.

CROSSLISTED: GWST 2350.03

FORMATS: Seminar

CTMP 3001 Science and Culture I: The Discourses of Modernity

CREDIT HOURS: 3

This class engages one of the main questions of our modern world: what is science and how does it relate to the rest of modernity? It explores the rise of a "scientific" world view, the clashes over methodologies, the disputed meanings of technology and the oppositions between the social/cultural and the natural, introducing recent crises of rationality and its defence.

CALENDAR NOTES: CTMP 3001.03 & CTMP 3002.03 must normally be taken in the same academic year to fulfill the requirements of the CTMP Combined Honours degree.

FORMATS: Other (explain in comments)

CTMP 3101 Crisis of Critique of Reason

CREDIT HOURS: 3

There is a tendency, widespread in our day, to deny that we can know with certainty the conditions of any claim to knowledge, and as a result to doubt that we can say anything true about the world and ourselves. This class reconstructs the history of this critique of reason with a view to understanding the profound changes that have overtaken the social disciplines in the course of the past few decades. The class spans a couple of centuries. We discuss amongst other things the relationship between scepticism and truth, the practical character of human rationality, and the role of the language in the formation of our scientific theories, our ethical and political thinking, and our aesthetic sensibilities.

FORMATS: Seminar

CTMP 3102 Tradition & Critique

CREDIT HOURS: 3

Nothing generates more controversy in our intellectual world than questions concerning the interpretation of history and culture. To what extent should interpretation be negative or critical? How are critical ideas contained in traditional practices and beliefs? In this class we explore the antagonism between tradition and critique. Starting from two opposed theories of interpretation - "deconstruction" (Derrida) and the "historicity of understanding" (Gadamer) - the class proceeds in a historically-oriented way to study, on the one hand, the philosophical traditions of idealism, Marxism, and hermeneutics and, on the other hand, psychoanalysis and literary criticism. We discuss amongst other things the distinction between myth and science, the notion of "progress" in history, and the sources of understanding.

FORMATS: Seminar

CTMP 3103 Critiques of Modernity

CREDIT HOURS: 3

What is the status of the modern world? It is a source of freedom and truth or rather of the deconstruction of religion, humanity and nature. The contemporary period has defined itself in many ways through the critique of modernity. These critiques have come from an array of perspectives: philosophic, aesthetic, religious, moral, political. This course will provide a survey of a number of such critiques seeking to grasp both points of commonality, disagreement and development.

CROSSLISTED: EMSP 3203.03

FORMATS: Seminar

CTMP 3104 The Rise of Nietzscheanism

CREDIT HOURS: 3

This course will show the origins and growth of Nietzsche's fame and influence from the late nineteenth century to around the middle of the twentieth, and consider his impact on many different and conflicting trends of thought, including Nazism and avant-garde art, depth psychology, existentialist philosophy and anarchistic social theory.

RESTRICTIONS: Restricted to students in their 2nd year and above.

FORMATS: Seminar

CTMP 3105 The Nietzschean Legacy

CREDIT HOURS: 3

This course surveys the influence of Friedrich Nietzsche on Western thought and culture, from the middle of the twentieth century to the present day. We will see Nietzscheanism at work in many different schools of thought, from French existentialism and American liberalism to various forms of contemporary anti-

humanism and post-humanism.

RESTRICTIONS: Restricted to students in their 2nd year and above.

FORMATS: Seminar

CTMP 3110 The Ideal World of Enlightenment: Desire and Freedom

CREDIT HOURS: 3

In the course of criticizing tradition and integrating the experience of the Renaissance and the Reformation, in responding to the beginnings of modern natural science and modern political institutions, early modern Europeans sought in diverse - and often conflicting - ways to express the self-understanding of Enlightenment. By the end of the eighteenth century, science, morality and art were seen as different realms of activity in which questions of truth, justice and taste could be separately determined, that is, evaluated according to their own specific criteria of validity. This course will consider how these differences compelled European philosophers and theologians, artists and social theorists, to develop and expand their self-understanding to the point where enlightened reason could properly reflect the formal divisions of culture and make critical judgements in relation to them. Special attention will be paid to the relationship between faith and knowledge and the growing sense of conflict between religion and secular freedom.

CROSSLISTED: EMSP 3210.03

FORMATS: Seminar

CTMP 3113 Kant and Radical Evil

CREDIT HOURS: 3

This course will examine the roots of the modern conception of radical evil in the late work of Immanuel Kant. Beginning with the traditional, pre-Kantian conception of evil as merely a negative phenomenon - as a lack or privation of being - we will trace the emergence of Kant's radical innovation, his positive conception of evil as the ineradicable "knot" at the very heart of human freedom. We will also consider at some length the subsequent career of Kant's doctrine in 19th and 20th Century thought.

CROSSLISTED: EMSP 3213.03

EXCLUSIONS: EMSP 3630.03

FORMATS: Seminar

CTMP 3115 The Real World of Enlightenment: Time and History

CREDIT HOURS: 3

In enlightened European culture, religion, state and society as well as science, morality and art were gradually separated from one another under exclusively formal points of view, and subordinated to a critical reason that took on the role of a supreme judge. By the beginning of the nineteenth century, many Europeans began to question the self-understanding evoked by the principle of critical reason. This course will consider how enlightened freedom and reason moved European philosophers and theologians, artists and social theorists, to conceive of themselves historically, that is, to become conscious of the dissolution of tradition, and of the need to ground the divisions of culture in ideal forms of unity derived from the tradition. The course will pay particular attention to the relationship between religion and the demand that the unifying force in culture come from a dialectic residing in the principle of enlightened reason itself.

CROSSLISTED: EMSP 3220.03

FORMATS: Seminar

CTMP 3116 Heidegger: Science, Poetry, Thought

CREDIT HOURS: 3

In this course, we shall examine the complex relations that obtain in Heidegger's early and later work between science, poetry and thought. From his early identification of phenomenology as "philosophical science" to his mature insistence on the irreducibility of philosophy to science (and his new emphasis on the essential kinship of philosophy and poetry), we shall trace the contours of this powerful and inescapable path of thinking.

RESTRICTIONS: Restricted to students in their second year and above.

FORMATS: Seminar

CTMP 3121 Genocide: Comparative Perspectives

CREDIT HOURS: 3

This course inquires into the concept of genocide, taking into account its cultural, socio-political and historical contexts. Which atrocities are included in that concept and why? Does the fact that the term was coined in a specific context (after WWII) limit its applicability. We will consider several documented instances of genocidal violence and reflect on the relations between genocide and the politics of memory, including museum displays, public commemorations, and popular culture. We will look at competing claims from victim groups and ask questions about the impact of racism in targeting specific populations; and the role of world powers in deciding about intervention or non-intervention.

FORMATS: Lecture

CTMP 3125 The Concept of Memory in Late-Modernity: Commemoration, Representation, Trauma

CREDIT HOURS: 3

This course will involve an examination of the relations between memory, theory, and representation in the context of proliferating 'cultures of memory'. Differing theoretical approaches to memory from the philosophy and psychoanalysis of the 19th and 20 centuries will be explored, alongside various genres & practices of memory (political, memorial, artistic, and critical).

RESTRICTIONS: Restricted to students in their second year and above

EXCLUSIONS: CTMP3410.03 for the 2008/09, 2009/10, 2010/11 academic years only and CTMP3415.03 for the 2011/12 academic year only

FORMATS: Seminar

CTMP 3130 The Thought of Michel Foucault

CREDIT HOURS: 3

The thought of Michel Foucault (1926-1984) resists categorization. This is in large part due to its interdisciplinary nature, which crosses the boundaries of history, sociology, psychology and philosophy. This class will introduce students to some of the topics in Foucault's major works on the history of madness, the birth of the penitentiary, the history of the human sciences, bio-power, the history of sexuality, and ethics. Readings will include selections from Foucault's major published works as well as interviews, lectures, and shorter essays. We will pay particular attention to the evolution of Foucault's methodology from archaeology to genealogy and Foucault's later claim that the goal of his work from the 1960s to 1980s has been the creation of a history of the different ways in which human beings are made subjects.

FORMATS: Seminar

CTMP 3135 Reconstructing Political Modernity

CREDIT HOURS: 3

This course will examine several interpretations of early modern philosophers by 20th century authors who are original political thinkers in their own right. These interpretations have involved as much reconstruction of early modern thought as faithful scholarly commentary. Indeed, they sometimes shed more light on the interpreter than the thinkers being interpreted. Thus, we shall critically analyze the radical transformations of early modern texts that were undertaken in order to make these works relevant to social and political questions centuries later.

CROSSLISTED: EMSP 3440.03

FORMATS: Seminar

CTMP 3145 Leo Strauss and his Intellectual Context

CREDIT HOURS: 3

Leo Strauss was during his own lifetime a figure of controversy and has grown more so in the thirty years since his death. In recent newspaper and academic articles, Strauss has been seen through the influence of his students ("Straussians") to be the secret intellectual source of much of the Neo-Conservative movement and in particular the policies and doctrines of the Bush White House. This course will endeavour to understand Strauss's thought in terms of his own intellectual development and in the context of the issues that were particularly formative for his thinking. The course will include the influence of Husserl upon his thought, his reflections on Zionism and the Jewish intellectual tradition during the 1920s and 30s when he was still living in Germany, his critique of Carl Schmitt, his response to the thought of Martin Heidegger, his debate with Alexandre Kojève. In short, the purpose of this course is to locate Strauss's thought in its intellectual context and thereby gain distance on the demonizing and sanctifying rhetoric that characterizes the contemporary debate about "Straussianism".

FORMATS: Seminar

CTMP 3155 The Question of the Animal

CREDIT HOURS: 3

In this course, we will explore animality and the relationship between human and nonhuman animals. Topics include animals and cognitive awareness, the ethical status of animals, cultural representations of animals, pets and domesticity, animals and science and posthumanist concepts of animality. Readings will include selections from a number of disciplines, including philosophy, literature, art, anthropology, and ethology.

EXCLUSIONS: CTMP 2011.03/3011.03/4011.03 and HSTC 2011.03/3011.03/4011.03 for 2013/14 academic year only.

FORMATS: Seminar

CTMP 3170 Theories of Punishment

CREDIT HOURS: 3

In this course we will examine the development and application of a number of theories of punishment, especially liberal and utilitarian theories developed in the 18th century. Our theoretical examination will lead us to consider the social, economic, and ethical implications of different attitudes toward and understandings of punishment. We will also investigate the concrete expression of these theories of punishment in the form of large-scale institutions. These institutions include (among others) the transatlantic slave trade, penal colonies, prisons, penology, residential schools, asylums, and the police. The course will be guided by a few broad, but fundamental questions including: who (or what) should be punished, how should they be punished, and (most fundamentally) why?

CROSSLISTED: EMSP 3430.03

EXCLUSIONS: CTMP 3410 for the 2020/21 academic year only.

FORMATS: Seminar

CTMP 3192 The Thought of Ludwig Wittgenstein

CREDIT HOURS: 3

Ludwig Wittgenstein (1889-1951) is one of the most renowned philosophers of the twentieth century. His extraordinary influence is the result of his teaching small groups of dedicated students. Published for the most part posthumously, his writings, too, have made him a philosopher's philosopher. Nevertheless, his influence has extended well beyond the questions about the foundations of logic and language which preoccupied him. This course will explore some of the broader implications of his work, touching on music, art and architecture, on anthropology and psychology, and on ethics and religion, as well as on his central contributions to the philosophy of language and mind.

EXCLUSIONS: CTMP 2190.03

FORMATS: Tutorial | Seminar

CTMP 3201 Science and Religion: Contemporary Perspectives

CREDIT HOURS: 3

This course tells the story of interactions between religious belief and the study of nature from 1800 to today. Beginning with an overview of the history and methodology of the study of science and religion, encounters between science and religion are traced from the rise of Darwinism in the early nineteenth century to the contemporary postmodern age. From an examination of nineteenth-century natural theology and the religious impact of Darwin's *Origin of Species* (1859), this course moves on to such contemporary topics as the religious interpretations of quantum mechanics, the Big Bang, the anthropic principle, medical science, bioethics, evolutionary psychology, chaos theory, aesthetics in nature, science fiction, extra-terrestrial life (including the SETI Project) and the quest for techno-immortality. Case studies of "conflict" emanating from Darwinism, the Scopes Trial, the on-going Creation-Evolution debates and the New Atheism are contrasted with examples of harmony and interdependence between science and religion in the careers of modern scientists, along with phenomena like neurotheology and the Intelligent Design (ID) movement. The religious scope of the course is intentionally wide-ranging, and examinations of science-religion interaction within indigenous spirituality are added to treatments of traditional eastern and western religion.

CROSSLISTED: HIST 3076.03, HSTC 3201.03, RELS 3201.03

FORMATS: Seminar

CTMP 3204 Human Experiments

CREDIT HOURS: 3

This course explores the history, method, and meaning of experimenting on humans through a series of case studies that question how these experiments mediate between experimenters, their subjects, and the state and how these relationships have influenced our ideas of scientific objectivity, autonomy and consent, race, gender, and class divides.

CROSSLISTED: HSTC 3101.03

EXCLUSIONS: HSTC 3615.03 and CTMP 3411.03 for the 2017/18 academic year only.

FORMATS: Lecture | Seminar | Discussion

CTMP 3210 Intersecting Bodies, Selves and Environments

CREDIT HOURS: 3

The traditional view of the relation between humans and nonhuman nature is regarded by many as dualistic insofar as it posits not only a distinction and separation between humans and nonhuman nature but regards humans as superior to nonhuman nature, on either religious, metaphysical, moral, or even evolutionary, grounds. In this course, we examine three different strategies for overcoming this view. We begin by examining phenomenological attempts to overcome dualistic accounts of the relations between perceiver and perceived, mind and body, and mind and world. In the next section, we discuss attempts by radical ecologists to establish a nondualist view of the relation between humans and nature. In the concluding section of the course, we examine some postmodern strategies for overcoming dualistic thinking about culture and nature.

FORMATS: Seminar

CTMP 3215 Feminism and Science

CREDIT HOURS: 3

Science has been the subject of intense scrutiny by contemporary feminist theorists. The course will examine the various feminist critiques of natural science, as well as the positive proposals that feminism has brought to science and scientific culture. Questions that will be addressed include: Is the style of science gendered? Has feminism influenced the content of various sciences? How has science contributed to gendered constructions of nature? Is there such a thing as value-free scientific research? How do feminist theories of knowledge differ from traditional understandings of scientific knowledge and scientific objectivity? The readings for this course will include work by Donna Haraway, Sandra Harding, Evelyn Fox Keller, Helen Longino, and Hilary Rose.

CROSSLISTED: HSTC 3411.03, GWST 3215.03

FORMATS: Seminar

CTMP 3220 Environmental Aesthetics

CREDIT HOURS: 3

In this course, we consider differing approaches to the aesthetics of both natural and human environments. In the first part of the course, we will examine the

role of science, art, perception, imagination, emotion, and ethics in the aesthetic appreciation of nature. In the second part, we will discuss contemporary approaches to the aesthetics of the city, the theme park, the garden, the shopping center, the home, and the countryside. In the concluding part, we will think about environmental art and aesthetics in the Anthropocene.

FORMATS: Lecture | Seminar

CTMP 3250 Nature and History

CREDIT HOURS: 3

In the nineteenth and twentieth centuries, the study of the natural world and historical thought have been closely linked. Participants in the seminar will read texts which helped to define ideas of history in the era after the Enlightenment and consider how these ideas influenced, and were influenced by, developments in scientific thought. The seminar will consider how nature and history are related in idealism, historical materialism and the thinking of the evolutionists, and how this connection is rejected by Nietzsche, Freud and Foucault.

CROSSLISTED: HSTC 3150.03

EXCLUSIONS: CTMP 3150.03

FORMATS: Seminar

CTMP 3302 Film Theory

CREDIT HOURS: 3

This course will provide an introduction to the field of film theory and criticism. Students will be provided with the tools to interpret films using the following critical and theoretical methodologies: Classical Film Theory, Auteur Theory, Genre Theory, Semiotics, Psychoanalysis, Feminist Theory, Reception Theory, Star Studies, Critical Race Theory and Queer Theory.

EXCLUSIONS: FILM 3330.03/THEA 3330.03

FORMATS: Seminar

CTMP 3305 Modern Film and the Theory of the Gaze

CREDIT HOURS: 3

This course will develop certain aspects of the theory of the gaze in relation to a selection of films which themselves embody or express a thinking about looking. We all like to look; and we are all given over to being seen, and both these modalities have received historically unprecedented elaboration in the moving pictures. The films and theories will raise issues about visual desire, horror, paranoia, surveillance and fascination.

FORMATS: Lecture | Discussion

CTMP 3311 Culture, Politics and the Post Colonial Condition

CREDIT HOURS: 3

The term 'postcolonial' marks the historical passage of European colonial domination and national independence movements, and describes the contemporary condition of domination and struggle both in the new nations that emerged in the second half of the twentieth century and in Western metropolitan centres with their new populations. This course will examine recent configurations of postcolonialism as political and cultural practice, focusing on debates over globalization and cosmopolitanism, the status of refugees and migrants, and the role of the intellectual in bringing about social change.

FORMATS: Seminar

CTMP 3316 Spinozisms: From Early Modernity to the Contemporary World

CREDIT HOURS: 3

This course will focus on Spinoza's thought, and the ways thinkers have adopted and transformed his ideas from the Early Modern period to the present day. We will consider Spinoza's contributions to ethics, political thought, optics, theology, and affect theory, as well as art and literature.

CROSSLISTED: EMSP 3216.03

FORMATS: Lecture | Discussion

CTMP 3321 Representations of the Holocaust: Bearing Witness

CREDIT HOURS: 3

At the time when the Holocaust recedes into history, the imperative to "never forget" acquires new urgency. In this course, we focus on various modes of representing this traumatic historical period. Why did the Holocaust happen "in the middle of civilized Europe"? Who were the perpetrators? Does the word "Holocaust" refer only to the Nazi attempt to exterminate the Jewish people or should we also consider the experiences of different victim groups? Did men and women experience extreme events differently? Can horror be accommodated in language or represented by any other means? Is the Holocaust unique or should it be considered in comparison with other genocides? These and other questions will arise in this class based on the examination of eye-witness accounts from the killing fields in the East, Holocaust diaries written in the ghettos, memoirs written by survivors of the Nazi camps, and perpetrators' diaries, as well as works by historians and literary works written by the participants of the events.

FORMATS: Seminar

CTMP 3322 Representations of the Holocaust: Remembrance

CREDIT HOURS: 3

Representations of the Holocaust: Bearing Witness is not required. Basic knowledge of Holocaust facts and some familiarity with Holocaust literature is recommended. This course focuses on memoirs and literary accounts of the Holocaust written several decades after the war, as well as on contemporary debates about the nature of Holocaust memory and commemoration. Of special interest is the struggle of both children of survivors and children of perpetrators to reckon with their parents' past. We will evaluate the burden of responsibility for the past postulated by these texts and consider how the Holocaust has been represented in literature, film, and museum exhibits. We will look at Holocaust denial, with emphasis on anti-Semitism and white supremacy movements in Canada. Finally, we will consider the politics of Holocaust memory in comparative perspectives. The course includes excerpts from films, documentaries, and other video-taped material, and illustrated lectures on Holocaust art.

FORMATS: Seminar

CTMP 3330 Art and Atrocity: Contemporary Contexts, Gendered Perspectives

CREDIT HOURS: 3

The course focuses on representations of mass atrocities in visual art. Starting from debates about the "limits of representation" and the tensions between historical documents and creative representations of traumatic events, it asks questions about art's ability to convey the experiences of suffering, to bear witness to traumatic events, and to engage in practices of commemoration, healing, and repair.

FORMATS: Lecture

CTMP 3340 Home and Homelessness

CREDIT HOURS: 3

This course takes the current social problem of homelessness as a starting place for an inquiry into the significance of figurations of home and homelessness in the contemporary world. Home is a place of comfort and belonging; it is a domestic setting, a language, a nationality and a series of identifications that 'place' and maintain individuals. The notion of home is opposed to key diagnoses of the modern condition--as alienated, displaced, estranged and uncanny, for example. These diagnoses have been applied both to psychological conditions and to actual social phenomena of mass displacements, refugees, immigration and exile. The social imaginary of many historically displaced groups centres around the return to or establishment of a homeland. This course will consider literary and artistic representations of 'home', the phenomenology of 'homeliness' and of its strange double, the uncanny, and the stakes that post-war philosophy has in the notions of rootedness, place and dwelling.

FORMATS: Seminar

CTMP 3345 The Theory of the Gift

CREDIT HOURS: 3

Is it possible to give, freely, without expectation of return? That is, can generosity ever really exist? Or are we trapped in restricted economies of exchange which find us always calculating some profit to ourselves, whether in this world or the next? The problem of the possibility of generosity and altruism is of central importance to current deliberations about ethics and economics. This seminar will read its way through the modern genealogy of the thinking of the gift, beginning with its foundation in anthropological studies of so-called 'primitive' economies. It is of some interest that the modern concern with the gift appears in the guise of anthropology rather than from its well-established place in the Christian theological tradition. This course will consider the debate over the gift among anthropologists such as Mary Douglas and Marshall Sahlins, in the extraordinary theses of Georges Bataille, and will place special emphasis on the importance of the gift in the work of Jacques Derrida.

FORMATS: Seminar

CTMP 3350 Rewriting Gender

CREDIT HOURS: 3

This class dissects the dominant, binary (male/female) notion of gender, as it has been constructed in relation to heteropatriarchal norms and systems of signification. We look at the dissolution of these rigid concepts and consider alternative (and multiple) sites of gender-identification through the lens of gender theory, fictional works (novels and poetry), and visual material (art, film, and music). We ask in what way these gendered subversions of traditional discourses engage (or fail to engage) with race, sexuality, class, ability and other identity categories.

FORMATS: Other (explain in comments)

CTMP 4105 European Nihilism

CREDIT HOURS: 3

In the latter half of the nineteenth-century a number of European thinkers and writers came to sense a profound loss of meaning and significance at work in their culture. The term that was coined to describe this experience was "nihilism." The purpose of this course is to explore the thought of those who gave expression to this new phenomenon. We will begin with the literary explorations of Dostoyevsky and Baudelaire, and then turn to the thought of Nietzsche as

the most complete explication of European nihilism. The course will conclude by considering the twentieth-century's most important commentator on nihilism, Martin Heidegger. In particular, the course will consider Martin Heidegger's set of lectures from the late 1930s that were published as Nietzsche. This set of lectures as reflections on Nietzsche's account of European nihilism formed, according to Heidegger's own recounting, a crucial transition in his own thought, the famous "turn" from the "early" to the "late" Heidegger. This course will examine the lecture series in the context of Heidegger's other writings at this time and his much-debated involvement with Nazism to try to understand the exact nature and import of his "turn." In all of this the course will be exploring the connections between a deep cultural experience - that of European nihilism and its social and political implications.

FORMATS: Seminar

CTMP 4110 Modernity in Ruins

CREDIT HOURS: 3

This course explores the current preoccupation with ruins in two ways: first, we shall establish lines of continuity between older forms of the pleasure of ruins (Ruinenlust) from the Renaissance to Romanticism. Second, we shall consider what characterizes the contemporary admiration for decrepitude and decay: We will consider modern and contemporary examples of ruins, wreckage, and decay to highlight a critical blurring of boundaries, in the ruin, between the present, past, and future; between presence and absence; between nature and history; between destruction and disclosure.

FORMATS: Lecture | Seminar

CTMP 4117 Beginning with Being: Reading Parmenides from Plato to Heidegger

CREDIT HOURS: 3

In this course, we shall stage an encounter between the two great thinkers - Plato and Heidegger - whose thought has often been thought to mark the 'beginning' and the 'end' of the Western philosophical tradition. Taking Parmenides' pregnant insight ("Being and Thinking are the same") as the poetic site of this encounter, we will ask what it still means to engage in philosophy today.

FORMATS: Lecture

CTMP 4124 Walter Benjamin's Materials

CREDIT HOURS: 3

Following the diversity of Benjamin's own interests: "literature, philosophy, architecture, journalism, photography, the city, film, children's toys, fashion, rubbish," we will read his essays on culture and the media alongside writings by Baudelaire, some artworks, and selections from The Arcades Project, Benjamin's collection of quotations and observations about mall life and modernity in Paris.

RESTRICTIONS: Restricted to students in their 2nd year and above.

FORMATS: Seminar

CTMP 4125 Hannah Arendt: Terror, Politics, Thought

CREDIT HOURS: 3

In this course we examine the trajectory of Hannah Arendt's long path of thinking: from her early political writings (on the state of Israel, on totalitarianism), to the more theoretically ambitious writings of the 1950's and 1960's (on action, power, and the creation of political spaces), to the late work on the life of the mind (on thinking, willing, and judging). We will attempt to understand how Arendt's overarching 'love of the world' informed her thought at every stage of its development, giving rise to a powerful critique of liberal democracy and preparing the groundwork for a new 'post-totalitarian' thinking of the political.

FORMATS: Lecture | Seminar

CTMP 4126 Kafka, Scholem, Benjamin: On Law and Crisis in 20th Century Jewish Thought

CREDIT HOURS: 3

In this course, we will examine the illuminating disagreement between Gershom Scholem and Walter Benjamin - two of the giants of 20th Century Jewish thought - on the meaning of the Law in Franz Kafka's stories. We will see how their respective interpretive strategies have dramatically informed the theoretical landscape of contemporary Jewish and non-Jewish thought.

FORMATS: Lecture | Seminar

CTMP 4130 Marxism, Critical Theory and Society

CREDIT HOURS: 3

This class examines writings by members and associates of Critical theory from the 1920s to the present. Topics include freedom and individuality, monopoly capitalism, the psychology of fascism, the culture industry and art, Marxism and psychoanalysis, antisemitism, technology and liberation, the revolutionary subject, and culture and nature. The course will pay close attention to first generation Critical theorists, including Horkheimer, Adorno, Fromm, Marcuse, Benjamin, and Fromm but will also consider representatives of the so-called second and third generations of Critical theory, which include Habermas and Honneth.

FORMATS: Seminar

CTMP 4140 Phenomenology and its Legacy: Back to the 'Things Themselves'

CREDIT HOURS: 3

This course examines some of the major figures in the phenomenological movement. We begin with an examination of Edmund Husserl's attempt to establish a "radical" science of phenomenology. The method of phenomenology, the intentionality of consciousness, perception, and the Lebenswelt are among the topics we will consider. We then turn to various reformulations and critiques of Husserl's conception of Phenomenology in selected works from Heidegger to Derrida. Topics and concepts for discussion will include Being-in-the-world, the nature of consciousness, the lived body, temporality, the priority of otherness and hermeneutics.

FORMATS: Seminar

CTMP 4150 Derrida and Deconstruction

CREDIT HOURS: 3

This class is an in-depth examination of one of the most challenging and provocative thinkers of the last century. We will examine Derrida's thought - from the development of deconstruction, through his innovative exploration of works of art and literature, to his politically inflected late writings on the gift, forgiveness, and hospitality. We will look at deconstruction as a "method" and at its relation to the "tradition."

FORMATS: Seminar

CTMP 4200 Philosophies of Technology: From Techne to Technology

CREDIT HOURS: 3

What does it mean to live in a "technological society"? In a certain sense, technology forms the very ground of what it means to be "modern". We moderns are technological beings. This course will explore the history, structure and associated problems of our coming to be technological, beginning with technical arts and instrumental reasoning of Enlightenment and industrial ideology. Post-Enlightenment critiques polarizing around the place of "machine" and alienation in Karl Marx, and in the "question concerning technology" in Martin Heidegger will then be examined, leading up to the present state of technological discourse. In each case, we shall mark the importance of contextualising the debate by examining the actual historical evolution of technology. Weekly lectures will be devoted to presenting a social and historical background to the development of modern technologies. Student-led seminars will focus on the reading of primary texts in the field.

CROSSLISTED: HSTC 4200.03

FORMATS: Lecture | Seminar

CTMP 4201 Contemporary Technologies: Living with Machines

CREDIT HOURS: 3

This topical seminar course will explore in detail the implications of powerful contemporary debates concerning the meaning and place of technology. What do we mean by technology? Can there be a philosophy of technology? What are the political and cultural ramifications of going technological? Topics will include: technological determinism in history, feminist critiques, technology and development, the meaning of expertise, technology, art and the "lifeworld", social-construction vs. actor-network theory, Donna Haraway's concept of cyborg culture and the "modern technological sublime". The course will be conducted in seminar format with particular emphasis placed on the elucidation of historical and contemporary case-studies. Whenever possible, guest lecturers from the "real world" of technology will be invited to participate in class.

CROSSLISTED: HSTC 4201.03

FORMATS: Lecture | Seminar

CTMP 4301 Freud, Lacan and the Critique of Psychoanalysis

CREDIT HOURS: 3

Is psychoanalysis a medical practice, a method of interpretation, or an account of the social symbolic? The modern skepticism about consciousness and conscious life is most thoroughly voiced in psychoanalytic thought as first developed by Freud and pursued in the work of Jacques Lacan. This course will consider the question of the modern psyche, the nature of symbolic practices in art and literature, and the construction of libidinal economies in society. The central question of the course will concern the way in which the individual subject is incorporated in symbolic practices. The recent attacks on Freud and Freudian methodologies will also be considered.

FORMATS: Seminar

CTMP 4302 French Feminist Theory

CREDIT HOURS: 3

This course will concentrate on some of feminism's most challenging voices, those that emerged from France at the end of the last century Kristeva, Cixous and Irigaray. The course will attempt to illuminate the intellectual background against which these women write, particularly in the areas of linguistic and anthropological structuralism, and in psychoanalytic theory. The course will be organized in part by the historical evolution of feminist thought, in part by the consideration of central feminist concerns.

CROSSLISTED: GWST 4402.03

EXCLUSIONS: Former CTMP 2030.06 and 4300.06

FORMATS: Lecture | Tutorial

CTMP 4315 Psychoanalysis and Politics

CREDIT HOURS: 3

Freudian psychoanalysis and its Lacanian successor have added new dimensions to the analysis of contemporary political issues. In the mid-twentieth century Sigmund Freud's theory of the unconscious was drawn upon to supplement liberal and Marxist analyses of fascism. Lacanian psychoanalysis has recently been employed in the understanding of nationalism, ethnic conflict and religious fundamentalism through such categories as identification, recognition and trauma. The course will begin with some key texts by Freud and Lacan, and then move to a consideration of recent examples of the conjunction of psychoanalytic and political theory.

FORMATS: Seminar

CTMP 4330 Ethics after the Holocaust

CREDIT HOURS: 3

Shortly after World War II ended, thinkers such as Arendt, Adorno, and Buber reflected on the causes of the genocide and its impact on humanity. It has taken decades, however, for others (such as Fackenheim, Habermas or Derrida) to confront "Auschwitz." In this course, we will inquire into the challenges the Holocaust poses to philosophy, and to ethics in particular. The thinkers discussed reflect on the collapse of traditional ethical systems in the wake of National Socialism. In various ways and in different religious and cultural contexts, they try to find an alternative moral foundation "after Auschwitz".

FORMATS: Seminar

CTMP 4340 Giants of 20th Century Jewish Thought

CREDIT HOURS: 3

This course introduces students to a constellation of seminal 20th Century Jewish thinkers and writers – Franz Kafka, Gershom Scholem, Franz Rosenzweig, Walter Benjamin, Hannah Arendt, and Abraham Heschel – and examines their enduring significance, not only for Jewish thought but for contemporary developments in literature, theology, and political theory.

EXCLUSIONS: CTMP 4415.03 for the 2018/19 academic year only and CTMP 4410.03 for the 2020/21 academic year only

FORMATS: Lecture | Seminar

CTMP 4410 Special Topics in Contemporary Social and Political Thought in the 20th Century

CREDIT HOURS: 3

The Special Topics courses focus on one author or one particular school of thought in an interdisciplinary context.

CALENDAR NOTES: No more than two special topics courses (one full credit) can be taken for credit towards the Contemporary Studies Program. Students can enrol only once in CTMP 4410.03.

PREREQUISITES: Students must complete at least 2 years of university study (minimum 10 full credits) prior to enrollment.

FORMATS: Seminar

CTMP 4411 Special Topics in Contemporary Science and Technology

CREDIT HOURS: 3

The Special Topics courses focus on one author or one particular school of thought in an interdisciplinary context. Topics vary each year.

CALENDAR NOTES: No more than two special topics courses (one full credit) can be taken for credit towards the Contemporary Studies Program. Students can enrol only once in CTMP 4411.03.

PREREQUISITES: Students must complete at least 2 years of university study (minimum 10 full credits) prior to enrollment.

FORMATS: Seminar

CTMP 4415 Special Topics in Contemporary Aesthetic and Critical Theories

CREDIT HOURS: 3

The Special Topics courses focus on one author or one particular school of thought in an interdisciplinary context. Topics vary each year.

CALENDAR NOTES: No more than two special topics courses (one full credit) can be taken for credit towards the Contemporary Studies Program. Students can enrol only once in CTMP 4415.03.

PREREQUISITES: Students must complete at least 2 years of university study (minimum 6 full credits) prior to enrollment.

FORMATS: Seminar

CTMP 4456 Honours Thesis Seminar in Contemporary Studies Part 2

CREDIT HOURS: 3

Students intending to complete an honours thesis in CSP are required to register in the Honours Thesis Seminar Part 2. One seminar will be held during the winter term in preparation for a thesis defence that takes place in March. Students will work individually with thesis supervisors on completing their theses. Students are required to submit drafts and final copies of the theses by the deadlines specified in the "Honours Thesis Memo."

PREREQUISITES: Approval of Director required. CTMP 0456 & CTMP 4456 must be taken in the same academic year to fulfill the requirements of the CTMP Combined Honours degree.

EXCLUSIONS: CTMP 0455X/Y, CTMP 0457

CTMP 4510 Independent Readings in Contemporary Studies

CREDIT HOURS: 3

NOTE: Course Details listed here also apply to CTMP 4511/CTMP 4515.

PREREQUISITES: Honours registration in Contemporary Studies and permission of the instructor and director.

CTMP 4511 Independent Readings

CREDIT HOURS: 3

See CTMP 4510.

PREREQUISITES: Honours registration in Contemporary Studies and permission of the instructor and director.

Coordinated Arts Program (DalCAP)

Please note that this program is being temporarily suspended for 2022-2023.

Dalhousie offers the widest range of courses and programs in the arts, humanities, and social sciences of any university in the Maritimes. We have dozens of first year courses to let you tailor your studies specifically to your interests. BA students can also choose courses from Science, Management, Computer Science, and from the neighbouring University of King's College to further diversify their studies. Or, instead of picking your own set of courses, starting in the 2017/18 academic year, you might wish to start your time at Dal with our new **intensive, interdisciplinary, coordinated year one program**: the DalCAP.

This coordinated, structured set of courses will give you the **foundation** for engaging with the challenges facing our world, even as it provides an excellent entry point for most Majors in the Arts and Social Sciences*. Still a full courseload, 30 credit hours program but with only three courses per term instead of the usual five, DalCAP lets you **focus** your attention – and will have coordinated assignment deadlines, too. You'll work throughout the year with a group of students in the same program, benefiting from a community of people with similar interests in a mix of lectures and small discussion groups. The DalCAP is intended to ease first year students' transitions to university by helping to create learning communities and simplifying course selection, even as it challenges participants to learn new skills and knowledge that will help them excel in a wide range of fields thereafter.

As a DalCAP student you'll take:

Fall term:

- SUST 1000.06: Introduction to Environment, Sustainability and Society 1
- CRWR 1030/ENGL 1030.06: Reading and Writing Stories
- *plus one course of your choice (3 credit hours)*

Winter term:

- POLI 1500.06: Globalizations (Political Science, Sociology, and Social Anthropology)
- HIST 1510.06: The History of the Future
- *plus one course of your choice (3 credit hours)*

* Note: For language majors (i.e., French, German, Spanish, and Russian), add the relevant intro course as your optional course. Students intending to major in Philosophy are encouraged (but not required) to add an intro Philosophy course. The DalCAP program isn't suitable as a first year for Music or Theatre students. Note that the DalCAP program satisfies four of the five distribution requirements for BA students: it covers the Science, Humanities, Social Sciences, and Writing requirements, leaving only the language requirement to be fulfilled with either the optional course or in a later year.

Costume Studies

Location:

Creative Writing Program

Creative Writing courses are open to Dalhousie and King's students in any program. Students in the BA or BSc program who take 30 credit hours in Creative Writing above the first-year level may combine Creative Writing with another subject to earn a Double Major or Combined Honours with Creative Writing as the secondary subject. Students in the BA or BSc program who take 18 credit hours in Creative Writing above the first-year level may combine Creative Writing with another subject to earn a minor in Creative Writing.

Requirements for Double Major or Combined Honours:

- At least 6 credit hours from among:
 - CRWR 2001.03: The Creative Process
 - CRWR 2002.03: Introduction to Creative Writing
 - CRWR 2010.03/ENGL2010.03 The Personal Essay
 - 3 credit hours of English at the 2000-level
- At least 12 credit hours from among:
 - CRWR 3010.03/ENGL 3098.03: Creative Writing Poetry I
 - CRWR 3020.03/ENGL 3099.03: Creative Writing Fiction I
 - CRWR 3011.03: Poetry II
 - CRWR 3021.03: Fiction II
 - CRWR 3100.03: Songwriting: Creative Writing for Lyric Forms
 - CRWR 3200.03: Spoken Word, Storytelling, and Literary Performance
 - CRWR 3311.03/ENGL 3311.03: Editing and Publishing Literature
 - CRWR 3410.03: Writing for Children: Picture Books
 - THEA 3601.03: The Playwright in the Theatre a
 - THEA 3602.03: The Playwright in the Theatre b
 - JOUR 3440.03: Narrative Non-Fiction
 - JOUR 3441.03: Advanced Narrative Non-Fiction
- At least 6 credit hours from among:
 - CRWR 4010.03/4011.03: Advanced Poetry I and II (must be taken together in the same academic year)
 - CRWR 4020.03/4021.03: Advanced Fiction I and II (must be taken together in the same academic year)

Additional credit hours from the courses listed above, or other Creative Writing courses beyond the 1000 level, to make up a total of 30 credits. Students may choose to have 3 credit hours of English at the 2000 level count towards their Creative Writing credit hours.

Students interested in Creative Writing but not completing the program may enter individual third year CRWR seminars with the instructor's permission.

Requirements for Minor:

- At least 6 credit hours from among:
 - CRWR 2001.03: The Creative Process
 - CRWR 2002.03: Introduction to Creative Writing
 - CRWR 2010.03/ ENGL2010.03 The Personal Essay

- At least 12 credit hours from among:
 - CRWR 3010.03/ENGL 3098.03: Creative Writing Poetry I
 - CRWR 3020.03/ENGL 3099.03: Creative Writing Fiction I
 - CRWR 3011.03: Poetry II
 - CRWR 3021.03: Fiction II
 - CRWR 3100.03: Songwriting: Creative Writing for Lyric Forms
 - CRWR 3200.03: Spoken Word, Storytelling, and Literary Performance
 - CRWR 3311.03/ENGL 3311.03: Editing and Publishing Literature
 - CRWR 3410.03: Writing for Children: Picture Books
 - THEA 3601.03: The Playwright in the Theatre a
 - THEA 3602.03: The Playwright in the Theatre b
 - JOUR 3440.03: Narrative Non-Fiction
 - JOUR 3441.03: Advanced Narrative Non-Fiction
 - CRWR 4010.03/4011.03: Advanced Poetry I and II (must be taken together in the same academic year)
 - CRWR 4020.03/4021.03: Advanced Fiction I and II (must be taken together in the same academic year)

Course Descriptions -- Creative Writing

For general information on Bachelor of Arts program requirements, visit the [College of Arts and Science](#) section of the Academic Calendar.

Minor in Creative Writing

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

To complete a minor in Creative Writing, students must take:

At least 6 credit hours from:

- CRWR 2001.03 The Creative Process
- CRWR 2002.03 Introduction to Creative Writing
- CRWR 2010.03 The Personal Essay

At least 12 credit hours from:

- CRWR 3010.03/ENGL 3098.03 Creative Writing: Poetry I
- CRWR 3020.03/ENGL 3099.03: Creative Writing: Fiction 1
- CRWR 3011.03 (formerly 3000.03): Creative Writing: Poetry II
- CRWR 3021.03 (formerly 3001.03): Creative Writing: Fiction II
- CRWR 3100.03 Songwriting
- CRWR 3200.03 Spoken Word
- CRWR 3311.03: Editing and Publishing Literature
- CRWR 3410.03: Writing for Children: Picture Books
- THEA 3601.03: The Playwright in the Theatre a
- THEA 3602.03: The Playwright in the Theatre b
- JOUR 3440.03 Creative Non-fiction
- JOUR 3441.03 Advanced Creative Non-fiction
- CRWR 4010.03/4011.03 Advanced Poetry (both courses must be completed)
- CRWR 4020.03/4021.03 Advanced Fiction (both courses must be completed)

Early Modern Studies Program

Location:

University of King's College
 6350 Coburg Road
 Arts and Administration Building
 PO BOX
 Halifax NS
 B3H 2A1

Phone Number: (902) 422-1271

Fax Number: (902) 423-3357

Introduction

What are the bases of our modern conceptions of the self, nature, society, freedom, and art? What ideas provoked historical turning-points such as the Renaissance, the Scientific Revolution, the Enlightenment, and the French Revolution? These questions, as well as those surrounding atheism, witchcraft, maritime piracy, cross-cultural encounters, the fine arts, vampirism, and more were set in motion in the early modern period. Thinkers and artists like Leonardo da Vinci, Machiavelli, Shakespeare, Descartes, Hobbes, Rousseau, Goethe, and Wollstonecraft sparked the conversations we are still having centuries later.

The Early Modern Studies Program (EMSP) explores the origins of modernity through a study of its development in European culture from the 16th to early 19th centuries. We take an interdisciplinary look at an era that begins with the colonization of “new worlds”, and ends with revolutions which ushered in the modern world. By examining philosophical, scientific, moral, social, political, and aesthetic points of view, we gain insight into a time of spectacular upheaval, and understand the revolutionary basis for aspects of society that seem fundamental to contemporary life.

EMSP courses are designed so that important figures and developments may be considered on their own terms and in relation to other important aspects of the period. This will often involve consideration of the differences between the early modern and other historical periods of the west. Emphasis will be placed upon encounters between European and non-European peoples and cultures in the early modern period. Our three “core” courses (mandatory for the Combined Honours degree) cover the key ideas, figures, and developments in early modern culture. Our electives branch out to explore a wide range of topics and questions. Many of these courses pursue in greater depth questions introduced in the core courses.

Aside from preparing undergraduates for more specialized training at the graduate or professional level, the EMSP is intended to provide them with a broad overview of the early modern period. Students are encouraged to relate the various aspects of early modern thought and culture to one another and to develop independent insights into the nature of this historical period. It is also hoped that EMSP students will take an active role in organizing events each year, including lectures, debates, and exhibitions.

Degree Options

Students registered in the BA degree can pursue a degree in the Early Modern Studies Program: (a) as a Combined Honours degree; or (b) as a Minor. Students registered in the BSc degree can pursue a degree in the Early Modern Studies Program: (a) as a Combined Honours degree with the Science subject as the primary subject and Early Modern Studies as the secondary subject; or (b) as a Minor. Students may also take Early Modern Studies courses as electives towards any BA or BSc degree program.

For general information on Bachelor of Arts program requirements, visit the [College of Arts and Science](#) section of the Academic Calendar.

Zahiremami, P., BA (Shiraz), MA, PhD (Toronto)

Combined Honours

The Combined Honours BA/BSc programs in Early Modern Studies are offered jointly by Dalhousie University and the University of King's College.

The departmental offerings within the EMSP at Dalhousie may include the other honours subject and a number of possible electives. The other honours subject must be selected from the following list of Dalhousie departments and programs: Canadian Studies, Cinema and Media Studies, Classics, Creative Writing, English, French, Gender and Women's Studies, German, History, International Development Studies, Italian Studies, Law, Justice and Society, Music, Philosophy, Political Science, Religious Studies, Russian Studies, Sociology and Social Anthropology, Spanish, Theatre or any of the BSc Honours subjects. Early Modern Studies can also be taken in combination with Environment, Sustainability and Society. Electives may be taken in any of the above-mentioned departments and programs as well as in the following subjects: Contemporary Studies and History of Science and Technology. In addition, some professors in the Dalhousie Faculty of Arts and Social Sciences are members of the Early Modern Studies teaching staff and offer courses at King's.

Students who are eligible to take an honours degree should apply to the EMSP and the other department or program concerned as early as possible. All students must meet the requirements of the Faculty of Arts and Social Sciences or the Faculty of Science as detailed in the [Degree Requirements](#) section. Because it is an honours program, the quality of work required in it is higher than that required in a 90 credit hour minor or 120 credit hour major program.

Applications for admission must be made to the Dalhousie department concerned and to the Early Modern Studies office at King's on forms available from the Registrar at either Dalhousie or King's. Students normally enroll in EMSP 2001.03 & EMSP 2002.03 (or EMSP 2000.06) (the first "core" course) in their second year, and register for the Combined Honours program in either their second or third year. For each individual student, the entire degree program, including elective courses, is subject to supervision and approval by the Dalhousie department concerned and by the Director of Early Modern Studies.

All EMSP students are encouraged to acquire competence in languages through appropriate courses which are relevant to their degree, interests, and future plans.

The joint Dalhousie/King's Early Modern Studies Program is based on the general requirement that the 120 credit hours needed to graduate include:

1. Completion of **either** the King's Foundation Year Program (either the 18 credit hour or the 24 credit hour version) **or** at least 12 credit hours of first year courses.
2. A minimum of 66, maximum of 84 credit hours beyond the 1000 level in the two honours subjects, not more than 48 credit hours being in either of them. Typically, no fewer than 30 credit hours can be completed in either of the honours subjects, but if Early Modern Studies is the secondary subject in a Combined Honours Bachelor of Arts Degree, students may elect to complete a minimum of 24 credit hours in Early Modern Studies courses.
3. The three 'core' course doublets in Early Modern Studies:
 - EMSP 2001.03 & EMSP 2002.03 (or EMSP 2000.06)
 - EMSP 3001.03 & EMSP 3002.03 (or EMSP 3000.06)
 - EMSP 4001.03 & EMSP 4002.03 (or EMSP 4000.06)
4. An honours qualifying examination (see Degree Requirement: BA, BSc Combined Honours (4 year)). Early Modern Studies students may choose to acquire this additional grade in either honours subject. In the Early Modern Studies Program, completion of the Honours Seminar (EMSP 4501.03 & EMSP 4502.03) fulfills the requirement of the honours qualifying examination; or, with the approval of the director, an honours thesis (in conjunction with EMSP 4551.03 & EMSP 4552.03) may also serve to fulfill the requirement of the honours qualifying examination.

Students will be eligible to take an 'Independent Reading' course only after they reach their third year. There will be six options for this course, but only six credit hours or the equivalent may be taken in a year. No more than 12 credit hours of this type may be taken during an EMSP degree. The permission of a member of the teaching staff and the Director of the program is necessary in order to take one of these courses, and their availability is strictly limited.

Minor in Early Modern Studies

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Requirements

Students seeking a minor in Early Modern Studies must complete between 18 and 27 credit hours at the 2000 level or above. This must include:

1. Any one of the three core course doublets:

- EMSP 2001.03 & EMSP 2002.03 (OR EMSP 2000.06)

Both EMSP 2001.03 & EMSP 2002.03 must normally be taken in the same academic year to meet this requirement.

- EMSP 3001.03 & EMSP 3002.03 (OR EMSP 3000.06)

Both EMSP 3001.03 & EMSP 3002.03 must normally be taken in the same academic year to meet this requirement.

- EMSP 4001.03 & EMSP 4002.03 (OR EMSP 4000.06)

Both EMSP 4001.03 & EMSP 4002.03 must normally be taken in the same academic year to meet this requirement.

2. 6 credit hours at the 3000 or 4000 level. *EMSP 3001.03 & EMSP 3002.03 (or EMSP 3000.06) or EMSP 4001.03 & EMSP 4002.03 (or EMSP 4000.06) will also fulfil this requirement.

3. 6 credit hours at any level.

Contact [Early Modern Studies](#) for more information.

Dalhousie Selectives

EMSP Selectives

Students enrolled in the Combined Honours or Minor program in EMSP can opt to have a maximum of one 3-credit hour “selective” course at Dalhousie University to count toward the EMSP part of their degree. The [Registrar’s Office](#) at King’s should be notified if students wish to pursue this option.

Eligible selectives in 2022-23 only

- [ENGL/THEA 2215 Young Shakespeare](#)
- [ENGL 3011 Renaissance Poetry and Culture II](#)

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year’s offering. For further information please contact the department, or visit the department's website.

Courses offered at the University of King's College

Please note that for **Early Modern Studies, courses at the 2000 level are open to all students, even first-year students, unless otherwise noted. Courses at the 3000 and 4000 level are open to students in their second year or above.

Course Descriptions

EMSP 2001 Structures of the Modern Self I

CREDIT HOURS: 3

Central to what distinguishes modernity from the ages preceding it was the development of a new conception of the self. This course traces the history of the modern self in its European cultural expressions. We will begin in the Renaissance, considering genres such as the novel and essay, and how these express new conceptions of the self. We will also examine crucial early modern developments such as the colonization of the New World, the rise of Protestantism, and the Counter-Reformation, through the lenses of philosophy, literature, and other aesthetic expressions.

CALENDAR NOTES: EMSP 2001.03 & EMSP 2002.03 must normally be taken in the same academic year to fulfill the requirements of the EMSP

Combined Honours degree.

EXCLUSIONS: EMSP 2000.06

FORMATS: Lecture | Seminar

EMSP 2002 Structures of the Modern Self II

CREDIT HOURS: 3

This course continues exploring the development of the modern self in its European cultural expressions, primarily focusing on philosophical and literary texts from the Enlightenment to early developments in Romanticism. We will grapple with early modern ethical theories and the problem of evil. We will also examine the Romantic reaction to the Enlightenment's emphasis on reason, and the championing of emotion as a more authentic expression of the self. We will continue to examine the novel as a genre and consider portraiture as an expression of the modern self.

CALENDAR NOTES: EMSP 2001.03 & EMSP 2002.03 must normally be taken in the same academic year to fulfill the requirements of the EMSP

Combined Honours degree.

PREREQUISITES: EMSP 2001.03 or permission of the instructor

EXCLUSIONS: EMSP 2000.06

FORMATS: Lecture | Tutorial

EMSP 2011 The Lecture Series

CREDIT HOURS: 3

NOTE: Course Details listed here also apply to EMSP 3011/EMSP 4011.

CROSSLISTED: EMSP 3011.03, EMSP 4011.03

EXCLUSIONS: CTMP 2010.06, CTMP 3010.06, CTMP 4010.06

FORMATS: Lecture | Seminar

EMSP 2215 Violence and Wonder: Baroque Art

CREDIT HOURS: 3

This course examines the key monuments of Baroque art and architecture and the social and political context in which they were produced. The course begins in the 1560s, a decade that saw the death of Michelangelo, the end of the Council of Trent, and the publication of the second edition of Giorgio Vasari's *Lives of the Artists*. Examining Mannerism and its critics in the Catholic Reformation sets the ground for the 17th century reform of art spurred on by Caravaggio and the Carracci. Their legacy—and the themes of violence and wonder—will be traced through the work of the Caravaggisti and the illusionistic Baroque ceiling painters. The importance of Rome as a locus of Baroque art will be a central focus, but the course also considers the distinctive political, religious, and cultural life of Flanders, the Dutch Republic, Spain, and France.

FORMATS: Lecture

EMSP 2220 The Voice of Satire: Rabelais, Cervantes, Voltaire

CREDIT HOURS: 3

This course will cover several examples of early modern satire, ranging from Cervantes' *Don Quixote*, to Rabelais' *Gargantua and Pantagruel*, to scathing works of 18th century British satire, as exemplified by Pope and Swift. We will consider novels, poems, theatre, journalism, and visual media such as caricatures.

FORMATS: Seminar

EMSP 2230 Picture and Poetry in Early Modern Culture

CREDIT HOURS: 3

Early modern artists and thinkers were fond of the Latin phrase, *ut pictura poesis*, which means, “as in painting, so in poetry.” Ben Jonson, for example, argued that “poetry and picture are arts of a like nature, and both are busy about imitation.” The objective here will be to test the validity of such claims with reference to early modern visual art and literature. Are poets and painters engaged in the same field of representation? Do they adopt parallel strategies of representation? Do they interpret and organize social energies in similar ways?

FORMATS: Seminar

EMSP 2240 Themes in Early Modern Science, Metaphysics, and Epistemology

CREDIT HOURS: 3

This course covers the period from Descartes through Kant and is structured around a study of themes in science, epistemology, and metaphysics as they evolved in this period. Although the themes to be covered may vary somewhat, on the philosophical side the main ones will be a selection from the following: theories of representation, theories of perception, theories of concepts and abstract ideas, theories of knowledge and the issue of skepticism (proofs of God and of the external world), metaphysics and ontology, causality, and doctrines of logic and method. What makes the early modern period so intellectually fascinating is that philosophy and science, empirical studies and a priori studies, are interwoven. We shall look at some parts of the tapestries that resulted, especially in the area of cognitive science, especially in Descartes, but also including physics and mathematics, and the contributions of other philosophers of the period.

FORMATS: Seminar

EMSP 2250 The Myth of Modernity in Goethe's *Faust*

CREDIT HOURS: 3

The Faust myth can be described as the myth of modernity itself: the ideas of human self-realization and progress are under debate in the story of the German scholar Dr. Faustus, who in his pact with the devil transgresses the boundaries that nature, religion, and society imposed on mankind. Unquestionably, the most famous representation of this modern myth is Goethe's *Faust*. Written over a period of sixty years (1772–1832), Goethe's *opus magnum* broadens the focus of the original myth to portray the central ambiguities and controversies presented by the modern age. His Faust is the story of modern man at large, successful, egotistical, torn, alienated, driven, in search of truth and totality, a man who in the course of his life becomes spectacularly guilty, and in the end is spectacularly (and controversially) redeemed. Faust's journey through the world traces major developments of the western world from the sixteenth to the early nineteenth century, developments that still shape today's world.

FORMATS: Seminar

EMSP 2260 The Philosophes, the *Encyclopédie*, and Enlightenment Movement

CREDIT HOURS: 3

This course explores the range, depth and commitment of the work of several leading figures of the eighteenth-century intellectual movement that came to be known as *Les Lumières* in France, the *Enlightenment* in Scotland, *Aufklärung* in Germany, and *Illuminismo* in Italy. The course takes a primary interest in the French *philosophes*, writers, and thinkers who contributed directly to the *Encyclopédie*, but some consideration will also be given to the movement in these other European countries. Course readings will include a nucleus of articles from the *Encyclopédie, ou Dictionnaire Raisonné des Sciences, des Arts et des Métiers*, whose publication was overseen by Denis Diderot and Jean le Rond d'Alembert from 1751-1772, augmented by a host of other works of major philosophical, scientific, aesthetic, cultural, and historical importance.

FORMATS: Seminar

EMSP 2270 Endless Romance

CREDIT HOURS: 3

The great medieval genre of romance both endured and metamorphosed in the early modern period. This course will consider the important transformation of romance in the period by concentrating on two main texts, Spenser's *The Faerie Queene*, and Cervantes' *Don Quixote*. The course will begin by looking at a few paradigmatic late medieval romances of the fifteenth century, including portions of Sir Thomas Malory's *Le Morte D'Arthur*, and the Spanish romance by Martorel, *Tirant lo blanc*. The main texts will then be considered as examples of the extraordinary reception of the genre, as continuation, elaboration and allegorization in the case of Spenser, and as the foundation of the novel in the case of Cervantes. Central themes such as quest, errancy, and desire will be considered; there will be a limited number of readings on the theory of romance (Frye, Bakhtin, Parker). In conclusion, we will briefly consider much later manifestations of romance, in the work of the Romantic poets.

FORMATS: Seminar

EMSP 2280 Friedrich Schiller's Historical Dramas

CREDIT HOURS: 3

Friedrich Schiller's five historical dramas range over early modern Europe from the Hundred Years War to the Thirty Years War, and find settings in medieval Switzerland and France, as well as Counter-Reformation Spain and Elizabethan England. These five plays will be analyzed according to lyrical, theatrical, historical, and aesthetic criteria.

CROSSLISTED: GERM 2280.03

FORMATS: Seminar

EMSP 2290 German Romanticism: From Goethe to Hegel

CREDIT HOURS: 3

Romanticism begins by overthrowing conventional literary rules and attitudes. It demands scepticism towards received religious doctrine and practice. Genuine feeling and political liberation are enhanced by attention to classical antiquity and modern folktale. Apparently a reaction against the modern, from Goethe to Hegel, Romanticism manages to eclipse almost everything else.

CROSSLISTED: GERM 2290.03

FORMATS: Seminar

EMSP 2310 Women and Gender in Early Modern Science

CREDIT HOURS: 3

This course will explore the roles of women, and questions about women's nature, in the development of early modern science. The course will consider several interrelated aspects of scientific culture in the sixteenth, seventeenth, and eighteenth centuries: first, we will look at the place of women in the scientific institutions of the time. The second part of the course will look at the contributions of some particular women to the fields of physics, astronomy, botany, and medicine. We will then examine how science interpreted sex and gender. Finally, the course will explore the ways in which gender and nature were portrayed in the broader cultural context. We will, for example, discuss the ways in which women were depicted as scientists and as symbols of science in art and literature.

CROSSLISTED: GWST 2310.03, HSTC 2310.03

FORMATS: Lecture | Seminar

EMSP 2313 The Vampire: Modernity and the Undead

CREDIT HOURS: 3

Since the emergence of vampire stories in the late sixteenth century, the vampire has served as a complex symbol for forces that defy or challenge modernity. This course will examine the figure of the vampire as it appears in folklore, philosophy, fiction, poetry, film, and television. Throughout the course we will consider the works in their historical and cultural contexts, considering what changing ideas of the vampire can tell us about early modern and contemporary views of death, morality, national identity, sexuality, and gender.

CROSSLISTED: CTMP 2313.03

FORMATS: Lecture | Discussion

EMSP 2320 Witchcraft in Early Modern Europe

CREDIT HOURS: 3

The period of European history from 1500 to 1800 saw the rise of modern science and philosophy. It was also a period in which thousands of witch trials and executions were carried out. This course will seek to understand how these seemingly contradictory developments could have occurred simultaneously. The course will examine changing conceptions of the witch and witchcraft in their historical, intellectual, cultural, religious, and political contexts. We will pay special attention to early modern notions of gender and sexuality and their influence on the witch hunts and witch trials.

CROSSLISTED: GWST 2320.03, RELS 2420.03

FORMATS: Lecture | Discussion

EMSP 2330 Nature Imagined: Literature and Science in Early Modern Europe

CREDIT HOURS: 3

The Scientific Revolution of the sixteenth, seventeenth, and eighteenth centuries brought about massive changes in the scientific world view. These changes also had a great influence on the literature of the period. Some writers were entranced by the new natural science, and sought to disseminate its principles and lionize its most significant figures. Other writers were harshly critical of the emerging notions of scientific progress and domination of nature. This course will examine the ways in which science was portrayed in early modern poetry, prose, and drama, in an attempt to understand how the new science, and new conceptions of nature, were understood and received in the broader philosophical and cultural context.

EXCLUSIONS: EMSP 2340.03 and HSTC 2340.03

FORMATS: Lecture | Seminar

EMSP 2340 The Origins of Science Fiction in Early Modern Europe

CREDIT HOURS: 3

In 1500, literate Europeans lived in a bounded, geocentric universe. By 1800, the sun had replaced the earth at the centre of a limited planetary system situated in infinite space. These changes prompted early modern philosophers, scientists, and writers to consider the possibility that the universe might contain a plurality of worlds. This course will explore the ways in which the "plurality" theme was developed in some of the earliest works of science fiction. We will consider this theme as it appears in stories of intergalactic voyages, utopian societies, and encounters with extraterrestrial beings, paying special attention to the ways in which early modern writers used these tales to speculate on philosophical, political, and scientific issues.

CROSSLISTED: HSTC 2340.03

EXCLUSIONS: EMSP 2330.03

FORMATS: Lecture | Seminar

EMSP 2350 The Body in Early Modern Europe

CREDIT HOURS: 3

This course will explore how the emergence of the modern self intersected with changing conceptions of the body. We will explore such topics as the rise of Renaissance anatomy; early modern perceptions of gender, race, and sexual difference; new explanations of madness and melancholy; monstrous and demonic bodies; representations of the diseased body; and the emergence of the modern ideal of the disciplined body.

CROSSLISTED: HSTC 2350.03

FORMATS: Lecture | Seminar

EMSP 2360 Magic, Science and the Occult: from Antiquity to Postmodernity

CREDIT HOURS: 3

A perennial source of fear and fascination, magic and related forms of 'occultism' (e.g. alchemy and astrology) have been dismissed as pseudo-science and even stigmatized as 'Satanism'. This course aims to recover the original meaning of occultism from the perspective of the practitioners of magic. It explores the origins and development of the 'occult sciences', highlighting their often-overlooked contributions to the history of science, and their continuing evolution in the modern world.

CROSSLISTED: HSTC 2120.03, HIST 2990.03, RELS 2120.03

FORMATS: Lecture | Seminar

EMSP 2390 Asia and the West: Centuries of Dialogue

CREDIT HOURS: 3

This course will explore some of the most important engagements of modern western thinkers with various texts and traditions of East and/or South Asian thought, examine the very aspects of Asian thought that intrigued modern western thinkers, and assess western values and projects in their lights.

CROSSLISTED: CTMP 2102, HSTC 2811, CHIN 2082

EXCLUSIONS: CHIN 2080, EMSP 2450

FORMATS: Lecture | Seminar

EMSP 2410 Imagining the Other: The Portrayal of the Non-European World in Early Modern Culture

CREDIT HOURS: 3

European encounters with non-European cultures in the early modern period shaped national economies, political power, and European self-understanding. Confrontation with non-European societies reinforced hegemonic, reflective, and self-critical aspects of European culture. The course analyzes how writers and artists implicitly engaged in clarifying and criticizing European identity as they came to terms with non-Europeans. The texts and images derive from Portuguese, Italian, Spanish, English, French, and Dutch sources from the late Middle Ages to the end of the eighteenth century. The contexts include Southeast Asia, India, Africa, North and South America, Polynesia, and purely imaginary settings.

FORMATS: Seminar

EMSP 2415 The Art of Global Encounters in the Early Modern Period

CREDIT HOURS: 3

An introduction to global art history of the early modern period, with a particular focus on how cross-cultural encounters instigated the development of new and hybrid art forms. Topics include, among others: Indigenous art practices in the Americas; artistic exchange between Italy and the Ottoman Empire; the Atlantic slave trade; and the museum's role in reconciliation and restitution.

FORMATS: Lecture

EMSP 2420 Virtue, Vice, and the Commercial Society in Early Modern Literature

CREDIT HOURS: 3

An important development in early modern Europe is the emergence of the commercial society in the seventeenth and eighteenth centuries. The course will consider literary works by authors who grappled with the moral implications of the growth of commercial society in Europe, particularly in England at the beginning of the eighteenth century. These authors sought to understand and to some extent criticize the notion of a society chiefly devoted to the acquisition of economic wealth. Furthermore, they employed literary genres such as travel literature and satire to explore the changing conceptions of virtue and vice in Europe, thus presenting often ambiguous treatments of commercial society. As well, reference will be made throughout to other philosophical and artistic works of the period.

FORMATS: Lecture | Seminar

EMSP 2430 The Pursuit of Happiness in Early Modern Culture

CREDIT HOURS: 3

A central preoccupation in early modern European culture, particularly in the eighteenth century, was that of the attainment of happiness in one's private life and in society in general. Happiness was seen as the highest good by some thinkers - as arguably reflected, on a political level, in the American constitution - while others argued against the identification of happiness with goodness. This course will examine various literary and philosophical texts in which the pursuit of happiness in its diverse senses is an important theme. Depictions of the happy life as well as philosophical and literary critiques of the primacy

given to happiness will be discussed.
FORMATS: Lecture | Seminar

EMSP 2440 Providence, Progress, Degeneration: Early Modern Ideas of Historical Transformation

CREDIT HOURS: 3

Against the background of works of both Renaissance historians and seventeenth-century state-of-nature theorists, eighteenth-century authors developed new theories of multi-staged historical existence. Readings may include selections from authors such as Vico, Rousseau, Voltaire, Smith, Gibbon, Lessing, Kant, and Herder.

FORMATS: Lecture | Seminar

EMSP 2450 The East is Read: Early Modern Conceptions of Asian Thought

CREDIT HOURS: 3

This class considers early modern European interpretations of key Asian texts. It assesses both the merits of early modern interpretations of Asian thought and what these interpretations reveal about the self-consciousness of European thinkers in the early modern period.

CROSSLISTED: CHIN 2080.03

EXCLUSIONS: EMSP 2390.03, CHIN 2082.03, CTMP 2120.03, HSTC 2811.03

FORMATS: Seminar

EMSP 2460 Images of Modernity in Cinema: Early Modern Stories on Film

CREDIT HOURS: 3

This course is intended to introduce students to the history and culture of European and Asian societies from the sixteenth to early nineteenth centuries through the study of film. The motion pictures to be screened dramatize such events, themes, and/or stories as the Protestant Reformation, Shakespearean drama, the decline of chivalry in France and Japan, French Absolutism, the wild child phenomenon, and cross-cultural encounters in the Americas and South Pacific. Each week will include both a film screening and relevant lecture and discussion. The films may include such titles as *A Man for All Seasons*, *Henry V*, *Amadeus*, *The New World*, *Seven Samurai*, *Cyrano de Bergerac*, *Aguirre: The Wrath of God*, *Black Robe*, *The Wild Child*, *The Bounty*, and *Ridicule*. Selected primary and secondary documents will be assigned to supplement the films. No prior knowledge of early modern history and culture is assumed.

FORMATS: Lecture | Discussion

EMSP 2470 Visions of Renaissance Political Thought in Film

CREDIT HOURS: 3

Renaissance political thought has been successfully adapted to films set in various imagined contexts. This course will examine the creative intersections between the political ideas in Renaissance texts and film adaptations in such settings as Renaissance England, feudal Japan, and modern-day Britain and the United States. The films may include such titles as *The Godfather I and II*, *Edward II*, *Richard III*, *Ran*, *Throne of Blood*, and *Revenagers Tragedy*.

FORMATS: Lecture | Discussion

EMSP 2480 The Pirate and Piracy

CREDIT HOURS: 3

This course will examine early modern historical, philosophical, and literary accounts of pirates and piracy. It will also trace ancient and medieval precursors to these early modern treatments as well as consider later representations—literary and cinematic—of early modern piracy and implications for contemporary piracy.

CROSSLISTED: HIST 2750.03

FORMATS: Lecture | Discussion

EMSP 2490 Ideas Of The Sea And Seafaring: Intercultural Perspectives

CREDIT HOURS: 3

A survey of intercultural ideas of the sea and seafaring from ancient to modern times. Topics include oceanic myths and origin stories, the myth of Atlantis, marine natural history, sea monsters, mermaids, the law and freedom of the sea, Black Atlantic identity, scientific sea voyages, oceanic science fiction, modern sea power, and marine conservation.

CROSSLISTED: CTMP 2207.03, HSTC 2220.03

FORMATS: Lecture | Discussion

EMSP 2510 Early Modern Art, Literature, and Politics in Florence, Italy

CREDIT HOURS: 6

This course provides an intensive introduction to the art, literature, philosophy, and politics of Renaissance and early modern Italy (1280-1580), with a special focus on Florence. Taught entirely on-site, this course offers students the unique opportunity to consider the civic, ecclesiastical, and domestic spheres of

Renaissance Florentine life through daily visits to the city's town halls, churches, palaces, and museums.
FORMATS: Seminar

EMSP 3001 Humanity, Nature, and Environment in the Early Modern Period I: Renaissance to the Age of Reason

CREDIT HOURS: 3

This interdisciplinary class provides an overview of major changes and continuities in the representation of the natural world, and the relationship between human beings and the natural environment, in the early modern period. The first part of the class focuses on the period that begins in the Renaissance and ends in the late 17th century.

CALENDAR NOTES: EMSP 3001.03 & EMSP 3002.03 must normally be taken in the same academic year to fulfill the requirements of the EMSP Combined Honours degree.

EXCLUSIONS: EMSP 3000.06

FORMATS: Lecture | Seminar

EMSP 3002 Humanity, Nature, and Environment in the Early Modern Period II: Enlightenment to Romanticism

CREDIT HOURS: 3

This interdisciplinary class provides an overview of major changes and continuities in the representation of the natural world, and the relationship between human beings and the natural environment, in the early modern period. The second part of the class begins with the 18th century Enlightenment and ends with the rise of Romantic views of nature in the early 19th century.

CALENDAR NOTES: EMSP 3001.03 & EMSP 3002.03 must normally be taken in the same academic year to fulfill the requirements of the EMSP Combined Honours degree.

PREREQUISITES: EMSP 3001.03 or permission of the instructor.

EXCLUSIONS: EMSP 3000.06

FORMATS: Lecture | Seminar

EMSP 3011 The Lecture Series

CREDIT HOURS: 3

See EMSP 2011.

CROSSLISTED: EMSP 2011.03, EMSP 4011.03

EMSP 3203 Critiques of Modernity

CREDIT HOURS: 3

What is the status of the modern world? Is it a source of freedom and truth or rather the deconstruction of religion, humanity and nature? The contemporary period has defined itself in many ways through the critique of modernity. These critiques have come from an array of perspectives: philosophic, aesthetic, religious, moral, political. This course will provide a survey of a number of such critiques seeking to grasp both points of commonality, disagreement, and development.

CROSSLISTED: CTMP 3103.03

FORMATS: Seminar

EMSP 3210 The Ideal World of Enlightenment: Desire and Freedom

CREDIT HOURS: 3

In the course of criticizing tradition and integrating the experience of Renaissance and the Reformation, in responding to the beginnings of modern natural science and modern political institutions, early modern Europeans sought in diverse – and often conflicting – ways to express the self-understanding of Enlightenment. By the end of the eighteenth century, science, morality, and art were seen as different realms of activity in which questions of truth, justice, and taste could be separately determined, that is, evaluated according to their specific criteria of validity. This course will consider how these differences compelled European philosophers and theologians, artists and social theorists, to develop and expand their self-understanding to the point where enlightened reason could properly reflect the formal divisions of culture and make critical judgements in relation to them. Special attention will be paid to the relationship between faith and knowledge and the growing sense of conflict between religion and secular freedom.

CROSSLISTED: CTMP 3110.03

FORMATS: Seminar

EMSP 3213 Kant and Radical Evil

CREDIT HOURS: 3

This course will examine the roots of the modern conception of radical evil in the late work of Immanuel Kant. Beginning with the traditional, pre-Kantian conception of evil as a merely negative phenomenon - as a lack or privation of being - we will trace the emergence of Kant's radical innovation, his positive conception of evil as the ineradicable "knot" at the very heart of human freedom. We will also consider at some length the subsequent career of Kant's doctrine in 19th- and 20th-Century thought.

CROSSLISTED: CTMP 3113.03

EXCLUSIONS: EMSP 3630.03
FORMATS: Seminar

EMSP 3216 Spinozisms: From Early Modernity to the Contemporary World

CREDIT HOURS: 3

This course will focus on Spinoza's thought, and the ways thinkers have adopted and transformed his ideas from the early modern period to the present day. We will consider Spinoza's contributions to ethics, political thought, optics, theology, and affect theory, as well as art and literature.

CROSSLISTED: CTMP 3316.03

FORMATS: Lecture | Discussion

EMSP 3220 The Real World of Enlightenment: Time and History

CREDIT HOURS: 3

In enlightened European culture, religion, state, and society as well as science, morality, and art were gradually separated from one another under exclusively formal points of view, and subordinated to a critical reason that took on the role of a supreme judge. By the beginning of the nineteenth century, many Europeans began to question the self-understanding evoked by the principle of critical reason. This course will consider how enlightened freedom and reason moved European philosophers and theologians, artists, and social theorists, to conceive of themselves historically, that is, to become conscious of the dissolution of tradition, and of the need to ground the divisions of culture in ideal forms of unity derived from the tradition. The course will pay particular attention to the relationship between religion and the demand that the unifying force in culture come from a dialectic residing in the principle of enlightened reason itself.

CROSSLISTED: CTMP 3115.03

FORMATS: Seminar

EMSP 3230 Impersonations: Theatre, Performance, and Identity in Early Modern England

CREDIT HOURS: 3

In his celebrated "Oration on the Dignity of Man," Pico della Mirandola glorified man's ability to "transform himself into what he most wills, taking like a chameleon the colour of all those things to which he is most nigh." For Pico as for many early modern thinkers, human subjects were distinguished less by preordained identities than by an actor-like ability to fashion and perform new selves. In early modern England, the burgeoning commercial theatre became a focal point for cultural debates about the social and ethical ramifications of this performative construction of the self. This course will explore these debates both as they relate to the growth of the professional theatre and in terms of their wider implications for early modern English society. We will begin by looking at the roles traditionally played by performance in the affirmation of identities both aristocratic and plebian. We will then go on to examine a number of plays from the main genres performed in English public theatres between 1590 and 1640. By reading these plays alongside primary sources from conduct manuals to statutes for theatre governance, and from playwrights' celebrations of their art to Puritans' attacks on the theatre's degeneracy, we will consider the huge range of cultural responses to the relationship between performance and identity in a rapidly shifting social order. Special attention will be paid to the interrogations of class, gender, sexuality, and morality implied in these works, and to their far-reaching effect on English society before and after the closure of the public theatres in 1642.

FORMATS: Seminar

EMSP 3240 Opera and the Idea of Enlightenment

CREDIT HOURS: 3

This course explores opera's emergence and development as a dominant western art form during and after the early modern period. Through close analysis of key works, we will strive to understand how opera's fusion of music, drama, poetry, and visual spectacle reflected--and helped to shape--changing ideals of enlightenment.

FORMATS: Lecture | Discussion

EMSP 3250 Atheism in Early Modern Europe

CREDIT HOURS: 3

Although atheism continues to be a source of controversy and debate, one of the most significant features of the modern world is the extent to which religious unbelief has become accepted as a morally and intellectually defensible position. This course will seek to understand the rise of modern atheism by examining its origins in the early modern world.

CROSSLISTED: RELS 3250.03

FORMATS: Seminar

EMSP 3260 Montaigne's Essays and the Modern Self

CREDIT HOURS: 3

In this course, we will read selections from Montaigne's Essays at length. We will consider his relationship to the Ancients, Renaissance humanism, skepticism, and how his thinking evolves throughout the Essays. We will also look at some of the history of Montaigne's reception by readers ranging from Shakespeare, to Rousseau, to contemporary scholars.

EXCLUSIONS: EMSP 2210.03
FORMATS: Lecture | Discussion

EMSP 3270 Leonardo da Vinci: Between Art and Science

CREDIT HOURS: 3

Leonardo da Vinci (1452-1519) moved easily between the artistic, literary, and scientific circles of Renaissance Italy. Scholars, however, often treat his art and science as competing interests. In this course, students consider the relationship between art and science, imagination and knowledge, by exploring all aspects of Leonardo's career.

CROSSLISTED: HSTC 3270.03

EXCLUSIONS: EMSP3620.03 and HSTC3611.03 for the 2017/18 academic year only.

FORMATS: Lecture | Discussion

EMSP 3280 Love, Lust, and Desire in Italian Renaissance Art

CREDIT HOURS: 3

Some of the most refined works of Italian Renaissance art portray the desires of the flesh. From erotic mythological paintings, to titillating private portraits, illicit subject matter provided an endless font of inspiration for painters, sculptors, and craftsmen alike. Through an intersectional approach, this course examines how gender, race, and class shaped the visual imaginary of desire in Renaissance Italy (1300-1650). Weekly topics will include: the visual culture of courtly love, marriage and virginity, ideals of beauty and the male gaze, sexual violence, women artists and self-representation, and the fetishization of foreign bodies.

CROSSLISTED: GWST 3280.03

EXCLUSIONS: EMSP 3640.03 for the 2010/11, 2011/12, 2012/13, 2013/14, 2014/15 academic years.

FORMATS: Seminar

EMSP 3290 The Renaissance Print and Cross-Cultural Exchange

CREDIT HOURS: 3

Printmaking transformed how early modern artists put ideas to paper, told archetypal stories, and documented the natural world and contemporary events. It also altered how art was received and collected. Examining the material culture of prints thus engages a range of questions: from aesthetics to economics to cross-cultural knowledge transmission.

FORMATS: Lecture

EMSP 3310 Hidden Worlds: Microscopy in Early Modern Europe

CREDIT HOURS: 3

Microscopes were introduced into Europe at the beginning of the seventeenth century. In the words of Robert Hooke, the microscope opened up a "new visible World" to the understanding -- a strange new landscape populated by vast numbers of new creatures. This course will explore the influence of the microscope, and the micro - world that it opened up, in the development of early modern science.

FORMATS: Seminar

EMSP 3321 In Search of the Philosopher's Stone: The History of European Alchemy

CREDIT HOURS: 3

This course traces the development of alchemical theories and practices in the medieval Latin west up to the emergence of early modern chemistry. It employs a multi-disciplinary approach which treats the scientific, technological, esoteric, and iconographic dimensions of alchemy as interdependent. The entire development of European alchemy is covered from the transmission of the Greek and Islamic alchemical traditions in the 12th century up to Newton, whose alchemical theories represent a point of transition to early modern chemistry in one direction, and to a more spiritualised occult philosophy in the other. This course is independent of HSTC 3120.03. All students interested in the intersections of science, magic, and mysticism are welcome.

FORMATS: Lecture | Seminar

EMSP 3330 Science and Religion: Historical Perspectives

CREDIT HOURS: 3

This course tells the story of interactions between religious belief and the study of nature from deepest Antiquity to 1800. Beginning with an overview of the history and methodology of the study of science and religion, encounters between science and religion are traced from the dawn of civilization to the end of the eighteenth century, with a special focus on the early modern period. From an examination of the biblical view of nature and Creation, ancient Babylonian astrology and divination and Plato's Timaeus, this course moves through a treatment of the centrality of theology to Medieval science on to natural theology and the "Watchmaker" Design Argument of the seventeenth and eighteenth centuries. Models of conflict, harmony and complementarity offered to characterize relations between science and religion are explored through case studies such as the understanding of the soul, Galileo's controversy with the Church and instances where religious belief inspired natural philosophers like Boyle and Newton. Claims that certain confessional traditions (notably

Protestantism and its dissenting offshoots) facilitated the rise of modern science are also appraised. Science-religion relations are examined both from the standpoint of mainstream religion and with respect to religious heterodoxy, prophecy, alchemy, magic and witchcraft. This course employs examples from Judaism, Christianity and Islam and involves the reading and discussion of primary texts.

FORMATS: Seminar

EMSP 3340 Knowledge is Power: Francis Bacon and the Birth of Modernity

CREDIT HOURS: 3

Modern western culture draws close connections between three facets of human experience: a) our knowledge of nature; b) our visions of what it is to be human; and c) power, or the political, social, and technological means by which we relate the first two: nature and human nature. The Renaissance period (roughly 1400-1630) was highly influential in laying the foundations for such modern connections, even as it seems to us to be a period rather different from our own. We will examine those connections in an exploration primarily of the work of Francis Bacon (1561 - 1626).

CROSSLISTED: HSTC 3205.03

FORMATS: Lecture | Seminar

EMSP 3350 Art, Optics, and Technologies of Illusion

CREDIT HOURS: 3

On the basis of a wide range of technologies of vision such as camera obscura, stereoscopes, and virtual reality, this course focuses on the ways in which artistic methods and applied science have contributed to our changing understanding of perception. Ultimately, this course asks: what does it mean to "fool the eye"?

EMSP 3420 Religious Warfare and Political Theology in the Early Modern Period

CREDIT HOURS: 3

The early modern period witnessed tremendous upheavals in different regimes, in part caused by religiously based strife within and without their borders. Many thinkers responded to these events by formulating 'political theologies', i.e., interpretations of religious teachings with a view to assessing the political consequences of religion and to harmonising religious interpretations with particular conceptions of political life. We shall examine various philosophical and literary European and non-European texts of the early modern period which are both timely and thoughtful reflections on religious teachings as they relate to--and sometimes contrast with--the underpinnings of the modern state and religious freedom.

CROSSLISTED: RELS 3010.03

FORMATS: Seminar

EMSP 3430 Theories of Punishment

CREDIT HOURS: 3

In this course we will examine the development and application of a number of theories of punishment, especially liberal and utilitarian theories developed in the 18th century. Our theoretical examination will lead us to consider the social, economic, and ethical implications of different attitudes toward and understandings of punishment. We will also investigate the concrete expression of these theories of punishment in the form of large-scale institutions. These institutions include (among others) the transatlantic slave trade, penal colonies, prisons, penology, residential schools, asylums, and the police. The course will be guided by a few broad, but fundamental questions including: who (or what) should be punished, how should they be punished, and (most fundamentally) why?

CROSSLISTED: CTMP 3170.03

FORMATS: Seminar

EMSP 3440 Reconstructing Political Modernity

CREDIT HOURS: 3

This course will examine several interpretations of early modern philosophers by twentieth-century authors who are original political thinkers in their own right. These interpretations have involved as much reconstruction of early modern thought as faithful scholarly commentary. Indeed, they sometimes shed more light on the interpreter than the thinkers being interpreted. Thus, we shall critically analyze the radical transformations of early modern texts that were undertaken in order to make these works relevant to social and political questions centuries later.

CROSSLISTED: CTMP 3135.03

FORMATS: Seminar

EMSP 3450 Common Tragedy: Catastrophe, Loss, and Ambition in Early Modern Europe

CREDIT HOURS: 3

Modern consciousness can be defined by new visions of death, loss, and ambition. As modernity emerges and "matures", so do writings on catastrophe. Writings from the catastrophic fourteenth-century, the seventeenth-century plague, and the 1755 Lisbon earthquake provide insight into shifts and continuities

between late medieval and modern senses of the self.
EXCLUSIONS: EMSP 3630.03 for the 2006/07 academic year only
FORMATS: Lecture

EMSP 3510 Independent Readings in Early Modern Studies

CREDIT HOURS: 3

NOTE: Course Details listed here also apply to EMSP 3511.03, EMSP 3515X/Y.06, EMSP 4510.03, EMSP 4511.03, EMSP 4515X/Y.06.

CALENDAR NOTES: Credit can only be given for EMSP 3515.06 and EMSP 4515.06 if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

PREREQUISITES: Honours registration in Early Modern Studies, permission of the instructor and the Director of the Program. Restricted to students in 3rd year and above.

EMSP 3511 Independent Readings

CREDIT HOURS: 3

See EMSP 3510.

PREREQUISITES: Honours registration in Early Modern Studies, permission of the instructor and the Director of the Program. Restricted to students in 3rd year and above.

EMSP 3515 Independent Readings in Early Modern Studies

CREDIT HOURS: 6

See EMSP 3510.

PREREQUISITES: Honours registration in Early Modern Studies, permission of the instructor and the Director of the Program. Restricted to students in 3rd year and above.

EMSP 3610 Studies in Early Modern Subjectivities

CREDIT HOURS: 3

In this course, students will explore a focused topic in an interdisciplinary context. Topics vary each year. Some of the topics are "Empirical Selves and Transcendental Selves in German Idealism", "Freedom and Necessity in Enlightenment Debates about the Self", "Self-Portrait in Literature and the Visual Arts", and "Reformation and Subjectivity in Early Modern Thought".

CALENDAR NOTES: Not more than one of each course number can be taken for credit towards the Early Modern Studies Program.

FORMATS: Lecture | Discussion

EMSP 3620 Studies in Early Modern Natural Philosophy

CREDIT HOURS: 3

In this course, students will explore a focused topic in an interdisciplinary context. Topics vary each year. Some of the topics are "Teleology", "Exploration and Early Modern Natural Philosophy", and "Mathematics and Metaphysics in the Seventeenth Century".

CALENDAR NOTES: Not more than one of each course number can be taken for credit towards the Early Modern Studies Program.

FORMATS: Lecture | Discussion

EMSP 3630 Studies in Early Modern Social and Political Thought

CREDIT HOURS: 3

In this course, students will explore a focused topic in an interdisciplinary context. Topics vary each year. Some of the topics are "States of Nature in Early Modern Political Thought", "The Seventeenth-Century Discovery of Sovereignty", "The Concept of the State", and "Apocalyptic Thought in the Early Modern Period".

CALENDAR NOTES: Not more than one of each course number can be taken for credit towards the Early Modern Studies Program.

FORMATS: Lecture | Discussion

EMSP 3640 Studies in Early Modern Aesthetics

CREDIT HOURS: 3

In this course, students will explore a focused topic in an interdisciplinary context. Topics vary each year. Some of the topics are "The Quarrel of the Ancients and Moderns", "The Status of the Artist in Society", and "Storm and Stress".

CALENDAR NOTES: Not more than one of each course number can be taken for credit towards the Early Modern Studies Program.

FORMATS: Lecture | Discussion

EMSP 4001 Conceptions of State, Society and Revolution in the Early Modern Period I

CREDIT HOURS: 3

This course examines political works, both philosophical and literary, by important and/or influential writers from the sixteenth to seventeenth centuries, in the context of the decline of Renaissance Italy, the querelle des femmes, the Protestant Reformation, the English civil war, the rise of absolutist monarchies, the Glorious Revolution, and early overseas European colonialism.

CALENDAR NOTES: EMSP 4001.03 & EMSP 4002.03 must normally be taken in the same academic year to fulfill the requirements of the EMSP Combined Honours degree.

EXCLUSIONS: EMSP 4000.06

FORMATS: Seminar

EMSP 4002 Conceptions of State, Society and Revolution in the Early Modern Period II

CREDIT HOURS: 3

This course examines political works, both philosophical and literary, by important and/or influential writers from the eighteenth to early nineteenth centuries, in the context of the rise of modern civil society, the expansion of European colonialism, changing gender norms, the trans-Atlantic slave trade, the French Revolution, and the Napoleonic wars.

CALENDAR NOTES: EMSP 4001.03 & EMSP 4002.03 must normally be taken in the same academic year to fulfill the requirements of the EMSP Combined Honours degree.

PREREQUISITES: EMSP 4001.03 or permission of the instructor.

CROSSLISTED: EMSP 2011.03, EMSP 3011.03

EMSP 4300 Nature and Romanticism

CREDIT HOURS: 3

Kant's "Copernican Revolution" in philosophy, ironically, marked a resurrection of a full-blown "idealist" philosophy of nature. This course will investigate the attempts of Kant's followers to construct a natural philosophy and its engagement with the rival mechanical world picture. It explores the implications of this endeavour for the growth of romanticism, vitalism, and our modern picture of "nature". It begins with an examination of the ambiguous heritage presented by Kant's writings on nature and proceeds through the attempts to develop a complete program of idealist *Naturphilosophie* and its spread throughout European thought by the medium of romanticist art and natural philosophy.

CROSSLISTED: HSTC 4300.03

EXCLUSIONS: HIST 5004.03

FORMATS: Lecture | Tutorial

EMSP 4310 Newton and Newtonianism

CREDIT HOURS: 3

This seminar involves a close study of the work of Isaac Newton, along with that of his supporters and detractors. Beginning with an overview of pre-Newtonian science, topics range from Newton's rejection of Cartesianism through his contributions to mathematics, physics, astronomy and optics, along with his inductive scientific method, laws of motion, and calculus priority dispute with Leibniz. Also considered are lesser-known aspects of his career, such as his secretive pursuit of alchemy, his heretical theology, his attempts to unravel the apocalypse, his role in British statecraft, and his autocratic rule of the Royal Society. A taxonomy of the forms of Newtonianism that emerged after Newton's death also allows an exploration of iconographical and apologetic uses of Newton, and his differing legacies in the Britain and France. This seminar concentrates on primary readings, including Newton's *Principia* (1687), *Opticks* (1740), alchemical treatises and unpublished theological papers, as well as the Leibniz-Clarke correspondence (1717), anti-Newtoniana, and eighteenth-century popularizations of Newtonianism such as Voltaire's *Philosophical Letters* (1733) and Maclaurin's *Account of Newton's Discoveries* (1748). Attention is paid to the social, cultural, and political aspects of Newtonianism and no prior knowledge of science is required.

CROSSLISTED: HSTC 4400.03

FORMATS: Seminar

EMSP 4501 Honours Seminar in Early Modern Studies: The Development of Aesthetic Theory in the Early Modern Period I

CREDIT HOURS: 3

While the arts have been a topic of theoretical concern since antiquity, it is only in the early modern period that aesthetics emerged as an independent field of inquiry. This seminar will consider how the various understandings of the arts with which the early modern period began developed into the independent field of aesthetics. Throughout the course, art and literature of the period will be studied in conjunction with theoretical texts. This course may be designated as fulfilling the honours qualifying examination requirements for an EMSP Combined Honours BA (see section 6 of Degree Program above). Students are also welcome to take this course as an elective with the permission of the instructor.

CALENDAR NOTES: EMSP 4501.03 & 4502.03 must be taken in the same academic year to fulfill the requirements of the EMSP Combined Honours degree.

PREREQUISITES: Honours registration in Early Modern Studies or permission of the instructor. Restricted to students in 3rd year and above.

Introduction

The study of English includes both analysis of texts and awareness of contexts. The texts proposed for analysis in various English courses will range from the long-established to the contemporary; English is a discipline which includes writings by such authors as Chinua Achebe, Jane Austen, Geoffrey Chaucer, Olaudah Equiano, Tomson Highway, Alice Munro, John Milton, and Toni Morrison, among others from past and present. The wide range of human experience represented in these texts can provide the student with what Kenneth Burke has called "equipment for living" and Audre Lorde has called "the foundations for a future of change." In more practical terms, the discipline of English fosters the development of various human skills: it requires the student to think, and to use language with clarity, judgment, and imagination.

But individual works of literature are also related in various ways to their social, cultural, and political contexts. For this reason, curiosity about a particular text often leads to enquiries that touch upon history, philosophy, politics, religion, biography, and the fine arts as well. The written text turns out to be a bridge between an individual sensibility and the rest of the world. The value of English studies, therefore, though difficult to measure, can be discovered both in the large semiologies of the cultures to which we belong, and in the smallest nuances of the language we use.

The calendar descriptions describe all English courses. Not all are offered in any given year. **Students should consult the English Department website for updated information about which courses are offered this year, and to get detailed descriptions of courses (with booklists).** There is a variety of first-year (1000-level) English courses to suit all inclinations and needs, and all sections with a number ending in -0 or -5 can be used to fulfill the University Writing Requirement. Once the first year is complete, students may register in any course at the 2000 or 3000 level. Many of the 2000-level courses are open to anyone with a Writing Requirement course in any discipline, while the smaller and more historically-focused 3000-level courses are open to both majors and non-majors. More intensive seminars at the 4000 level are mainly intended for students in their third and fourth years of an English Major or Honours program.

Degree Programs

In addition to the departmental requirements listed below, students must satisfy the requirements outlined in the [Degree Requirements](#) section.

Staff

Dean

Andrews, J. BA (McGill), MA, PhD (Toronto)

Chair

Bennett, L., BA, MA (Dalhousie), MA (Carleton), PhD (Dalhousie)

BA with Honours in English

Students must meet the faculty requirements for honours, which include 54 to 66 credit hours in English above the 1000 level and at least 18 credit hours above the 2000 level. Within these courses, students must:

1. Complete one or more courses in each of at least **seven** of the following areas, with **four** of the areas chosen from among areas 1-6;

- 1) Literary Theory and Criticism (recommended)
- 2) Medieval
- 3) Renaissance/Early Modern
- 4) Restoration and Eighteenth Century
- 5) Romantics
- 6) Victorian
- 7) Modern British
- 8) American
- 9) Canadian
- 10) Postcolonial/World Literature
- 11) Cultural Studies/Popular Culture
- 12) Writing/Creative Writing/Language

See [English Area Groupings](#) for details on which courses fall under each area.

2. ENGL 4900.03 Honours Capstone

3. ENGL 4901.00: Honours Essay in English (non-credit class)

4. an additional twelve credit hours at the 4000 level

To be considered for the Honours program, students must attain a 3.3 avg. GPA in upper-level English courses, and apply to the Undergraduate Coordinator in English.

BA with Combined Honours

Students must meet the faculty requirements for combined honours degrees, which include at least 30 and no more than 48 credit hours in English above the 1000 level (at least 66 to a maximum of 84 credit hours in both subjects). Students must take at least 18 credit hours above the 2000 level in each subject. Among the English courses, students must take:

Complete one or more courses in each of at least **four** of the following areas, with **two** of the areas chosen from among areas 1-6;

- 1) Literary Theory and Criticism (recommended)
- 2) Medieval
- 3) Renaissance/Early Modern
- 4) Restoration and Eighteenth Century
- 5) Romantics
- 6) Victorian
- 7) Modern British
- 8) American
- 9) Canadian
- 10) Postcolonial/World Literature
- 11) Cultural Studies/Popular Culture
- 12) Writing/Creative Writing/Language

See [English Area Groupings](#) for details on which courses fall under each area.

ENGL 4900.03: Honours Capstone (for students weighting their programs towards English)

ENGL 4901.00: Honours Essay in English (non-credit class for students weighting their programs towards English)

nine credit hours at the 4000 level (ENGL 4900.03 must be counted in these nine credit hours for students weighting their programs towards English)

To be considered for the Honours program, students must attain a 3.3 average GPA in upper-level English courses, and apply to the Undergraduate Coordinator in English.

BA (120 credit hour) Major in English

Students must meet the faculty requirements, which include 36 to 54 credit hours in English above the 1000 level, including 18 credit hours above the 2000 level; within these 36 to 54 credit hours, they must take the following:

Complete one or more courses in each of at least **seven** of the following areas, with **four** of the areas chosen from among areas 1-6;

- 1) Literary Theory and Criticism (recommended)
- 2) Medieval
- 3) Renaissance/Early Modern
- 4) Restoration and Eighteenth Century
- 5) Romantics
- 6) Victorian
- 7) Modern British
- 8) American
- 9) Canadian
- 10) Postcolonial/World Literature
- 11) Cultural Studies/Popular Culture
- 12) Writing/Creative Writing/Language

See [English Area Groupings](#) for details on which courses fall under each area.

Double Major

Students must meet the requirements for the double major, which include 60 to 84 credit hours in the Major subjects above the 1000 level (no more than 48 and no fewer than 30 credit hours in either). Students must take at least 18 credit hours above the 2000 level in each subject. Among their English courses, students must take:

Complete one or more courses in each of at least **four** of the following areas, with **two** of the areas chosen from among areas 1-6;

- 1) Literary Theory and Criticism (recommended)
- 2) Medieval
- 3) Renaissance/Early Modern
- 4) Restoration and Eighteenth Century
- 5) Romantics
- 6) Victorian
- 7) Modern British
- 8) American
- 9) Canadian
- 10) Postcolonial/World Literature
- 11) Cultural Studies/Popular Culture
- 12) Writing/Creative Writing/Language

See [English Area Groupings](#) for details on which courses fall under each area.

BA (90 credit hour) Minor in English

See the [Minor in English](#) section of this Calendar

English Area Groupings

NOTE: Some courses are not offered every year so please consult the current timetable, in addition to the calendar, when registering.

Courses which cover more than one area (e.g., ENGL 2001.03: British Literature to 1800) may be counted only toward one.

- 1) Literary Theory and Criticism (*recommended*):** ENGL 3000.03: Close Reading, ENGL 3001.03: History of Literary Criticism, ENGL 3002.03: Contemporary Critical Theory
- 2) Medieval:** ENGL 2001.03: British Literature to 1800.03, ENGL 2018.03: Arthur, ENGL 2020.03: Sampling Medieval Literature, ENGL 2237.03: Outlaw Tales, ENGL 3005.03: The Canterbury Tales, ENGL 3006.03: Old English; ENGL 3009.03 Medieval English Drama
- 3) Renaissance/Early Modern:** ENGL 2001.03: British Literature to 1800, ENGL 2215.03: Young Shakespeare, ENGL 2217.03: Shakespeare at the Globe, ENGL 3010.03: Renaissance Poetry and Culture I: More to Jonson, ENGL 3011.03: Renaissance Poetry and Culture II: Donne to Milton, ENGL 3015.03: Renaissance Drama, ENGL 3314.03: Shakespeare and His Contemporaries on Film
- 4) Restoration and Eighteenth-Century:** ENGL 2001.03: British Literature to 1800, ENGL 2218.03: Gothic Fiction, ENGL 3017.03: English Poetry and Prose 1660-1740, ENGL 3019.03: Poetry and Prose 1740-1789, ENGL 3020.03: English Drama 1660-1800, ENGL 3022.03: English Fiction to 1820, ENGL 3040.03: Irish Literature, 1700-1900
- 5) Romantics:** ENGL 2002.03: British Literature after 1800, ENGL 2218.03: Gothic Fiction, ENGL 3022.03: English Fiction to 1820, ENGL 3026.03: Romantic Era I: Radicals and Visionaries, ENGL 3027.03: Romantic Era II: The Satanic and the Sublime, ENGL 3040.03: Irish Literature, 1700-1900
- 6) Victorian:** ENGL 2002.03: British Literature after 1800, ENGL 2218.03: Gothic Fiction, ENGL 2231.03: Foundations of Science Fiction, ENGL 2238.03: Children's Literature, ENGL 3029.03: Victorian Poetry, ENGL 3031.03: The Nineteenth-Century British Novel from Austen to Dickens, ENGL 3032.03: The Nineteenth-Century British Novel from Dickens to Hardy, ENGL 3040.03: Irish Literature, 1700-1900
- 7) Modern British:** ENGL 2002.03: British Literature after 1800, ENGL 2231.03: Foundations of Science Fiction, ENGL 2232.03: Contemporary Science Fiction, ENGL 2235.03: Tolkien: Fantasy and Medievalism, ENGL 3234.03: British Literature of the Earlier Twentieth Century, ENGL 3235.03: British Literature of the Later Twentieth Century, ENGL 3238.03: Fiction of the Earlier Twentieth Century, ENGL 3239.03: Fiction of the Later Twentieth Century, ENGL 3240.03: Drama of the Earlier Twentieth Century, ENGL 3241.03: Drama of the Later Twentieth Century, ENGL 3242.03: Poetry of the Earlier Twentieth Century, ENGL 3243.03: Poetry of the Later Twentieth Century, ENGL 3501.03: The Modern Theatre 1: Realism and Responses, ENGL 3502.03: The Modern Theatre 2: High Modernism

- 10) Postcolonial/World Literature:** ENGL 2005.03: World Literature, ENGL 2090.03: Literature, Multiculturalism, and Identity, ENGL 2210.03: Introduction to the African Diaspora, ENGL 3086.03: Post-Colonial Literatures, ENGL 3087.03: Literature of the Asian Diaspora, ENGL 3088: African Caribbean Women Writers, ENGL 3089.03 Gender and Sexuality in Asian North American Writing, ENGL 3239.03: Fiction of the Later Twentieth Century, ENGL 3241.03: Drama of the Later Twentieth Century, ENGL 3243.03: Poetry of the Later Twentieth Century; ENGL 3260.03: Contemporary Fiction
- 11) Cultural Studies/Popular Culture:** ENGL 2006.03: Cultural Studies, ENGL 2030.03: Literature, Health and Healing, ENGL 2040.03: Mystery and Detective Fiction, ENGL 2050.03: Literature and Propaganda, ENGL 2060.03: Sports Literature, ENGL 2080.03: Cartoons and Comics, ENGL 2085.03: Video Games: Story, World and Play, ENGL 2088.03: Images and Texts, ENGL 2095.03: Narrative in the Cinema, ENGL 2231.03 Foundations of Science Fiction; ENGL 2232.03: Contemporary Science Fiction, ENGL 2235.03 Tolkien; ENGL 2236.03: Fantasy after Tolkien, ENGL 3300.03: TV: Theory and Criticism, ENGL 3301.03: Graphic Novels, ENGL 3305: Fan Culture, ENGL 3320.03: Literature and the History of Medicine
- 12) Writing/Creative Writing/Language:** ENGL 2010.03: The Personal Essay, ENGL 2110.03: Introduction to Professional Writing, ENGL 2202.03: Academic Writing, ENGL 3098.03: Creative Writing: Poetry 1, ENGL 3099.03: Creative Writing: Fiction 1, ENGL 3110.03: Writing in a Digital Age, ENGL 3112.03: Writing Theory, ENGL 3113.03: Writing Practice, ENGL 3203.03: History

Creative Writing Program

Creative Writing courses are open to Dalhousie and King's students in any program. Students in the BA or BSc program who take 30 credit hours in Creative Writing above the first-year level may combine Creative Writing with another subject to earn a Double Major or Combined Honours with Creative Writing as the secondary subject. Students in the BA or BSc program who take 18 credit hours in Creative Writing above the first-year level may combine Creative Writing with another subject to earn a minor in Creative Writing.

Requirements for Double Major or Combined Honours:

- At least 6 credit hours from among:
 - CRWR 2001.03: The Creative Process
 - CRWR 2002.03: Introduction to Creative Writing
 - CRWR 2010.03/ENGL2010.03 The Personal Essay
 - 3 credit hours of English at the 2000-level
- At least 12 credit hours from among:
 - CRWR 3010.03/ENGL 3098.03: Creative Writing Poetry I
 - CRWR 3020.03/ENGL 3099.03: Creative Writing Fiction I
 - CRWR 3011.03: Poetry II
 - CRWR 3021.03: Fiction II
 - CRWR 3100.03: Songwriting: Creative Writing for Lyric Forms
 - CRWR 3200.03: Spoken Word, Storytelling, and Literary Performance
 - CRWR 3311.03/ENGL 3311.03: Editing and Publishing Literature
 - CRWR 3410.03: Writing for Children: Picture Books
 - THEA 3601.03: The Playwright in the Theatre a
 - THEA 3602.03: The Playwright in the Theatre b
 - JOUR 3440.03: Narrative Non-Fiction
 - JOUR 3441.03: Advanced Narrative Non-Fiction
- At least 6 credit hours from among:
 - CRWR 4010.03/4011.03: Advanced Poetry I and II (must be taken together in the same academic year)
 - CRWR 4020.03/4021.03: Advanced Fiction I and II (must be taken together in the same academic year)

Additional credit hours from the courses listed above, or other Creative Writing courses beyond the 1000 level, to make up a total of 30 credits. Students may choose to have 3 credit hours of English at the 2000 level count towards their Creative Writing credit hours.

Students interested in Creative Writing but not completing the program may enter individual third year CRWR seminars with the instructor's permission.

Requirements for Minor:

- At least 6 credit hours from among:
 - CRWR 2001.03: The Creative Process
 - CRWR 2002.03: Introduction to Creative Writing
 - CRWR 2010.03/ ENGL2010.03 The Personal Essay
- At least 12 credit hours from among:
 - CRWR 3010.03/ENGL 3098.03: Creative Writing Poetry I
 - CRWR 3020.03/ENGL 3099.03: Creative Writing Fiction I
 - CRWR 3011.03: Poetry II
 - CRWR 3021.03: Fiction II
 - CRWR 3100.03: Songwriting: Creative Writing for Lyric Forms
 - CRWR 3200.03: Spoken Word, Storytelling, and Literary Performance
 - CRWR 3311.03/ENGL 3311.03: Editing and Publishing Literature
 - CRWR 3410.03: Writing for Children: Picture Books
 - THEA 3601.03: The Playwright in the Theatre a
 - THEA 3602.03: The Playwright in the Theatre b
 - JOUR 3440.03: Narrative Non-Fiction
 - JOUR 3441.03: Advanced Narrative Non-Fiction

- CRWR 4010.03/4011.03: Advanced Poetry I and II (must be taken together in the same academic year)
- CRWR 4020.03/4021.03: Advanced Fiction I and II (must be taken together in the same academic year)

Course Descriptions -- Creative Writing

For general information on Bachelor of Arts program requirements, visit the [College of Arts and Science](#) section of the Academic Calendar.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

English Courses at the 1000 level

The study of English at the 1000 level allows students to experience the variety and excitement of thinking in the verbal arts, and to develop techniques for analyzing, creating and writing about texts.

Any 6 credit hour course, or any two 3 credit hour courses in English at the 1000 level with numbers ending in -0 or -5, will fulfill the College of Arts and Sciences Writing Requirement. The same course or courses will fulfill the College of Arts and Sciences Languages and Humanities requirement, and may serve as the prerequisite for English courses at the 2000 and 3000 levels. Students may take more than six credit hours in English at the 1000 level but must pay particular attention to exclusions.

Courses at the 1000 level with numbers ending in 1 (e.g., ENGL 1041 or ENGL 1051) are similar to the corresponding courses with numbers ending in 0 (e.g., ENGL 1040 or ENGL 1050), but they do not fulfill the Writing Requirement. They are offered for students who are interested in the subject, or are seeking to fulfill the Languages and Humanities requirement. They are typically taught as subsections of the corresponding Writing Requirement course; they are taught by the same instructor, usually in the same room at the same time (for example ENGL 1041 is taught with ENGL 1040), but with less emphasis on writing instruction.

English Courses at the 2000 level

Courses at the 2000 level are open to **any** student above the first year, with the necessary prerequisites. They include surveys of historical periods, national literatures, and major fields intended as an entrance into the discipline of literary studies, as well as a colorful selection of genre-, author- and topic-oriented courses.

English Courses at the 3000 Level

Courses at the 3000 level include three overviews of critical methods (ENGL 3000.03, ENGL 3001.03, ENGL 3002.03), as well as a sequence of courses that together span the historical and cultural breadth of literary writing in English. All of these courses are open to students beyond their first year who have completed the necessary prerequisites.

English Courses at the 4000 Level

Courses at the 4000 level are small seminars intended for third and fourth-year English majors or honours students, offering intensive, research-oriented study of special topics, particular authors or periods, national traditions, literary or cultural forms and theories. Reflecting the specialties of their instructors, their subjects change every year. **Students must request permission to register in any 4000 level English course.** Students who have declared English as part of their program will be contacted prior to the beginning of the

registration period and asked to submit their seminar preferences. Priority for available seats will be given to students entering their final year of study. Detailed descriptions of this year's seminars will be available on the English department website.

Studies in Major Authors - 4011-4099

Studies in Genre - 4200-4299

Studies in National Literatures - 4400-4499

Studies in Literature History - 4600-4699

Studies in Culture and Theory - 4800-4899

Course Descriptions - English

ENGL 1005 Literature: A Global Perspective

CREDIT HOURS: 3

This course offers an introduction to global literature. With the help of influential writers from around the world, we will explore some of the pressing social, political and cultural questions of the present day. In addition to strengthening your skills as a reader, this class offers you the opportunity to become a better writer.

CALENDAR NOTES: Meets Writing Requirement when taken with any one of ENGL 1015.03, ENGL 1025.03, ENGL 1040.03, ENGL 1050.03, ENGL 1060.03 or ENGL 1100.03.

EXCLUSIONS: ENGL1000X/Y.06, ENGL1010.03, ENGL1011.03, ENGL1020.03, ENGL1021.03

FORMATS: Lecture

ENGL 1015 Literature: How it Works

CREDIT HOURS: 3

This course provides an overview of literary genres and techniques, and an introduction to the analysis of literary forms and language. Readings will be drawn from the principal literary genres: prose fiction, poetry, drama, and non-fictional prose. Readings will represent a variety of authors, genres, national literatures, and time periods, but the principal emphasis is on the relation of literary form to content and on training students in the close analysis and interpretation of literary meaning.

CALENDAR NOTES: Meets Writing Requirement when taken with any one of ENGL 1005.03, ENGL 1025.03, ENGL 1040.03, ENGL 1050.03, ENGL 1060.03, or ENGL 1100.03.

EXCLUSIONS: ENGL1000X/Y.06, ENGL1010.03, ENGL1011.03, ENGL1020.03, ENGL1021.03

FORMATS: Lecture

ENGL 1025 Literature: Why it Matters

CREDIT HOURS: 3

This course considers the value and evaluation of literary works. It addresses such topics as the pleasures of literary reading, the concept of literature, and the criteria used in judging literature. The material includes a selection of literary works, both popular and classic, drawn from early and recent periods, and in different genres. Though students will be expected to analyze these works for their styles and meanings, the approach taken will be aesthetic and sociological.

CALENDAR NOTES: Meets Writing Requirement when taken with any one of ENGL 1005.03, ENGL 1015.03, ENGL 1040.03, ENGL 1050.03 ENGL 1060.03 or ENGL 1100.03.

EXCLUSIONS: ENGL1000X/Y.06, ENGL1010.03, ENGL 1011.03, ENGL1020.03, ENGL1021.03

FORMATS: Lecture

ENGL 1030 Reading and Writing Stories

CREDIT HOURS: 6

This class introduces students to the key facets of a writer's craft, including its methods and its practices, its genres and their masters. Students will study the techniques of a range of literary works in order to become familiar with the terminology and concepts central to literary studies. They will also hone their skills as creative writers through individual and collaborative expression, and will follow a number of original creative works from first draft to finished version. These skills and activities will be supported by tutorials, writing workshops, and lectures.

CROSSLISTED: CRWR 1030.06

EXCLUSIONS: ENGL 1000.06, ENGL 1010.03, ENGL 1011.03, ENGL 1020.03, ENGL 1021.03

FORMATS: Lecture | Tutorial

ENGL 1040 Reading Popular Culture: Writing Requirement

CREDIT HOURS: 3

This course introduces students to methods of analyzing forms of cultural expression. It engages students in the serious study of diverse creative media

including film, television, literature, video games, electronic texts, jokes, advertising, graffiti, cartoons, song lyrics and consumer goods. Explicit instruction in clear and forceful writing is an important component of this course. For the non-WR version, see ENGL 1041.

CALENDAR NOTES: Meets Writing Requirement when taken with any one of ENGL 1005.03, ENGL 1015.03, ENGL 1025.03, ENGL 1050.03, ENGL 1060.03 or ENGL 1100.03.

EXCLUSIONS: ENGL 1041.03

FORMATS: Lecture | Discussion

ENGL 1041 Reading Popular Culture: non-Writing Requirement

CREDIT HOURS: 3

This course introduces students to methods of analyzing forms of cultural expression. It engages students in the serious study of diverse creative media including film, television, literature, video games, electronic, texts, jokes, advertising, graffiti, cartoons, song lyrics and consumer goods. This is the non-Writing Requirement version of the course: For the WR version, see ENGL 1040.

EXCLUSIONS: ENGL 1040.03, ENGL 1042.03

FORMATS: Lecture | Discussion

ENGL 1050 Pulp Fiction: Writing Requirement

CREDIT HOURS: 3

This course provides an entry point to the discussion of literature through 'pulp' genres such as romance, mystery/crime, the Western, sci-fi/fantasy, horror, sports literature, and comic books. It is available in Writing-Requirement and non-Writing Requirement versions. Explicit instruction in clear and forceful writing is an important component of this course. For the non-Writing Requirement version, see ENGL 1051.

EXCLUSIONS: ENGL 1051.03

FORMATS: Lecture | Discussion

ENGL 1051 Pulp Fiction: non-Writing Requirement

CREDIT HOURS: 3

This course provides an entry point to the discussion of literature through 'pulp' genres such as romance, mystery/crime, the Western, sci-fi/fantasy, horror, sports literature, and comic books. This is the non-Writing requirement version of the course. For the WR version see ENGL 1050.

EXCLUSIONS: ENGL 1050.03

FORMATS: Lecture | Discussion

ENGL 1060 Reading Literature and Science

CREDIT HOURS: 3

While literature and science are often seen as opposed ways of discussing and analyzing the world, their history has always been intertwined. Literature has often pondered the ethical questions of scientific experiment, as in Mary Shelley's *Frankenstein*, or contemplated the social and cultural transformations wrought by scientific development, as in Henry Adams' meditation on electricity and religion. Likewise, language, literature, and culture have informed how science has been understood, and even which questions science has asked. In this course, we will read novels, plays, and poems that relate to a range of scientific disciplines. We will discuss how scientific discourses across a range of disciplines function, and how literature addresses and transforms those discourses.

CALENDAR NOTES: Meets Writing Requirement when taken with any one of ENGL 1005.03, ENGL 1015.03, ENGL 1025.03, ENGL 1040.03, ENGL 1050.03 or ENGL 1100.03.

EXCLUSIONS: ENGL1000X/Y.06, ENGL1010.03, ENGL1011.03, ENGL1020.03, ENGL1021.03

FORMATS: Lecture | Tutorial

ENGL 1100 Writing for University

CREDIT HOURS: 3

An introduction to rhetoric and composition, this course is designed to prepare students to write analytic and research papers. Grammatical and rhetorical terms are addressed, and the course includes a number of assignments to hone writing skills from outline to revision.

FORMATS: Lecture | Discussion

ENGL 2001 British Literature to 1800

CREDIT HOURS: 3

This course traces the course of British Literature from its beginnings to the year 1800. Starting with Old English works such as *Beowulf* in their historical contexts, we will move on to Middle English, Renaissance, Restoration, and eighteenth-century literature, looking at writers such as Chaucer, Shakespeare, Donne, Milton, Behn, Swift, and Pope. This course puts special emphasis on developing skills in critical thinking, literary historical research, and scholarly argumentation.

PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF

EXCLUSIONS: ENGL 2205.06

FORMATS: Lecture | Tutorial | Discussion

ENGL 2002 British Literature after 1800

CREDIT HOURS: 3

This course studies many of the traditions and influential writers in British Literature from 1800 to the present. Studying these writers will orient students to British literary history and introduce them to key issues and concepts. This course will also emphasize developing skills in critical thinking, scholarly argumentation, and documentation.

PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF

EXCLUSIONS: ENGL 2205.06

FORMATS: Lecture | Tutorial | Discussion

ENGL 2003 American Literature

CREDIT HOURS: 3

This course is an introduction to some of the traditions and influential texts of American literature, from its colonial beginnings to the present, providing historical orientation and demonstrating the diversity of American literature. The course will also emphasize developing skills in critical thinking, scholarly argumentation, and documentation.

PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF

FORMATS: Lecture | Tutorial | Discussion

ENGL 2004 Canadian Literature

CREDIT HOURS: 3

From early exploration narratives to contemporary fiction, this course will survey a wide range of key texts in the development of Canadian literature in English. It will consider the literary and historical contexts that inform our readings, and identify and interrogate the various myths, images, icons and institutions that structure our ideas of what it means to be Canadian. This course will also emphasize developing skills in critical thinking, scholarly argumentation, and documentation.

PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF

CROSSLISTED: CANA 2004.03

EXCLUSIONS: ENGL 2207.06

FORMATS: Lecture | Tutorial | Discussion

ENGL 2005 World Literature

CREDIT HOURS: 3

This course will introduce students to some of the most influential writers from around the globe, with a focus on contemporary literature written in English or studied in translation. These writers raise pressing questions about the meaning of justice, the power of nations, and the value of human imagination in our global world. This course will also emphasize developing skills in critical thinking, scholarly argumentation, and documentation.

PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF

EXCLUSIONS: ENGL 2212.03, ENGL 2213.03

FORMATS: Lecture | Tutorial | Discussion

ENGL 2006 Cultural Studies

CREDIT HOURS: 3

This course surveys notions of “culture” from both historical and theoretical perspectives and introduces students to the critical study of the multiple forms and uses of popular culture. This course will also emphasize developing skills in critical thinking, scholarly argumentation, and documentation.

PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF

EXCLUSIONS: ENGL 2240.06

FORMATS: Lecture | Tutorial | Discussion

ENGL 2010 The Personal Essay

CREDIT HOURS: 3

In the personal essay we use moments and material from our lives to communicate meaning to a reader. The trick of it, suggests Philip Lopate, is to “make the small loom large” by using the humble details of daily life to address some aspect of the human condition. With this challenge in mind, this course considers a wide range of personal essays and allows students to try their hands at writing in this form. Class time will be divided between the analysis of published essays and the development of original work.

PREREQUISITES: Any class or combination of classes that satisfies the College of Arts and Social Sciences Writing Requirement.

CROSSLISTED: CRWR 2010

FORMATS: Lecture

ENGL 2018 Arthur

CREDIT HOURS: 3

This course will explore the many stories of King Arthur and his Round Table including some of Sir Thomas Malory's *Morte D'arthur*; earlier texts will be read in translation.

PREREQUISITES: Any course or combination of courses that satisfies the College of Arts and Science Writing Requirement.

EXCLUSIONS: ENGL 3018.03

FORMATS: Lecture | Discussion

ENGL 2020 Sampling Medieval Literature

CREDIT HOURS: 3

A properly medieval title for this course would be "Florilegium." It considers works important to the medieval literary scene in England, whether written initially in Old English, Middle English, Anglo-Norman French, Welsh, Norse, or Latin; almost all will be read in translation. The works read may include sagas, riddles, lyrics, the Breton lais of Marie de France, romances, chronicles, plays, saints' lives, comic tales, beast fables.

PREREQUISITES: Any English course or combination of English courses that satisfies the College of Arts and Science Writing Requirement; or THEA 1000.06; or the King's FYP

EXCLUSIONS: ENGL 3218.06

FORMATS: Lecture | Discussion

ENGL 2028 Short Poems in English

CREDIT HOURS: 3

Forms and themes in the short poem are studied by means of critical reading of poems written in English. Topics may include the following: the self in the short poem, other persons, public events, love, nature, the city, the machine, wit, myth, traditional forms, free verse, the hokku, lyric as song, spoken poetry, poetry in print, concrete poetry, and possibly other topics to suit the course.

PREREQUISITES: Any course or combination of courses that satisfies the College of Arts and Sciences Writing Requirement.

FORMATS: Lecture | Discussion

ENGL 2029 Framed Narratives

CREDIT HOURS: 3

This course studies framed narratives - stories within stories - focusing on the dramatic relationship between the frame and the stories within it, and what this form tells us about the nature of storytelling itself.

PREREQUISITES: Any course or combination of courses that satisfies the College of Arts and Sciences Writing Requirement.

FORMATS: Lecture | Discussion

ENGL 2030 Literature, Health and Healing

CREDIT HOURS: 3

This class explores selected literary texts (chiefly contemporary) dealing with health and healing and introduces students to key concepts and issues in the interdisciplinary field of medical humanities. Topics vary depending upon the instructor, but might include the role of narrative or story-telling in medicine and the health professions; illness memoirs (for example, cancer narratives or memoirs about mental illness); ethics and communications in health care; literary representations of health professionals; therapeutic uses of literature; indigenous healing practices; social and cultural determinants of health; and literary representations of topics such as anorexia, autism, disabilities, aging, trauma and recovery, chronic pain, communicable diseases, neurological disorders, and issues in sexual and reproductive health.

PREREQUISITES: Any course or combination of courses that satisfies the College of Arts and Sciences Writing Requirement

FORMATS: Lecture | Discussion

ENGL 2034 The Short Story

CREDIT HOURS: 3

This course will examine the form and evolution of the short story.

PREREQUISITES: Any course or combination of courses that satisfies the College of Arts and Sciences Writing Requirement.

FORMATS: Lecture | Discussion

ENGL 2040 Mystery and Detective Fiction

CREDIT HOURS: 3

In this course, we will study the development of mystery and detective fiction, from Victorian classics by Charles Dickens, Wilkie Collins, and Arthur Conan Doyle to contemporary classics by Agatha Christie and Raymond Chandler and recent works by authors such as Sue Grafton, Sara Paretsky, and Ian Rankin.

PREREQUISITES: Any course or combination of courses that satisfies the College of Arts and Sciences Writing Requirement
FORMATS: Lecture | Discussion

ENGL 2043 How iRead the Eye-Books: Film Adaptations of World Literature I

CREDIT HOURS: 3

In this course, we will be reading and watching the world adaptations of international literary classics and popular contemporary works. From analyzing the art of comic strips and Supermen sagas to e-books designed for iPads and Android mobile devices, during the semester students will learn to appreciate both the text and its visual renderings using theoretical frameworks of adaptation and textual fidelity, as well as will have an opportunity to practice their skills in the art of film-making and constructing an iBook.

CROSSLISTED: THEA 2043.03, RUSN 2043.03

EXCLUSIONS: RUSN 2045.06, ENGL 2045.06, THEA 2347.06

FORMATS: Lecture

ENGL 2044 How iRead the Eye-Books: Film Adaptations of World Literature II

CREDIT HOURS: 3

In this course, we will be reading and watching the world adaptations of international literary classics and popular contemporary works. From analyzing the art of comic strips and Supermen sagas to e-books designed for iPads and Android mobile devices, during the semester students will learn to appreciate both the text and its visual renderings using theoretical frameworks of adaptation and textual fidelity, as well as will have an opportunity to practice their skills in the art of film-making and constructing an iBook.

CROSSLISTED: THEA 2044.03, RUSN 2044.03

EXCLUSIONS: RUSN 2045X, THEA 2347X, ENGL 2045X

FORMATS: Lecture | Discussion

ENGL 2050 Literature and Propaganda

CREDIT HOURS: 3

This course explores the relation of literary art to propaganda through the study of selected writings in different genres. Among the terms and concepts that may be considered are didacticism, rhetoric, ideology, pornography, and censorship.

PREREQUISITES: Any course or combination of courses that satisfies the College of Arts and Science Writing Requirement.

FORMATS: Lecture | Discussion

ENGL 2060 Sports Literature

CREDIT HOURS: 3

While material may range from Homer and Pindar to contemporary works, this course will typically focus on a specific sport, period, or subject (e.g., race, the lesbian/gay athlete) or genre. Students will explore the unique features of writing that deals with athletic or sporting activities and recognize how the literature of sport is connected to the broader literary canon. Commercialism, nationalism, authenticity, and aesthetics are possible topics. Consult the current course description.

PREREQUISITES: Any course or combination of courses that satisfies the College of Arts and Sciences Writing Requirement

FORMATS: Lecture | Discussion

ENGL 2070 African American Literature

CREDIT HOURS: 3

An introduction to some major modes of writing in the African American community. Subjects of enquiry may include the “escaped-slave” narratives of the nineteenth century, or works produced by members of the Harlem Renaissance, or poetry and fiction by contemporary African American women writers.

PREREQUISITES: Any English course or combination of English courses that satisfies the College of Arts and Science Writing Requirement; or PERF 1001.03 and PERF 1002.03; or the King's FYP

FORMATS: Lecture | Discussion

ENGL 2080 Cartoons and Comics

CREDIT HOURS: 3

A study of cartoons and comics from the eighteenth century to the present, addressing such issues as the history and formal conventions of the genre as well as its various cultural roles, from the political to the popular and from consumer culture to cultural capital.

PREREQUISITES: Any course or combination of courses that satisfies the College of Arts and Sciences Writing Requirement

FORMATS: Lecture

ENGL 2085 Video Games: Story, World and Play

CREDIT HOURS: 3

This course introduces students to the critical study of video games and gaming culture, with a particular emphasis on how video games combine interactive gameplay, worldmaking, and storytelling.

PREREQUISITES: Any course or combination of courses that satisfies the College of Arts and Sciences Writing Requirement or INFX 1615.03 and INFX 1616.03 or CSCI 2100.03

FORMATS: Lecture | Discussion

ENGL 2088 Images and Texts

CREDIT HOURS: 3

This course will examine the rich interrelations of art and literature, from visual and verbal treatments of the same theme (jealousy, for example), to similarities in style (such as impressionism or Dadaism), to specific topics such as humour or scandal.

PREREQUISITES: Any course or combination of courses that satisfies the college of Arts and Sciences Writing Requirement

FORMATS: Lecture

ENGL 2090 Literature, Multiculturalism, and Identity

CREDIT HOURS: 3

Literature provides a powerful means of developing the cross-cultural understanding essential for living and working in increasingly multicultural societies and differing global contexts. This course examines literature (chiefly novels) that explore the complexities of identities shaped by globalization and multicultural contexts. Topics might include the shifting boundaries of “home”; generational conflicts and connections; cross-cultural romantic relationships; challenges in adapting to a foreign language and/or customs; global cultural networks; and emerging forms of cosmopolitan identity or “fusion” cultures.

PREREQUISITES: Any course or combination of courses that satisfies the College of Arts and Sciences Writing Requirement.

FORMATS: Lecture

ENGL 2095 Narrative in the Cinema

CREDIT HOURS: 3

Examining select films from throughout the history of cinema, this course examines various forms and conventions of story-telling and fiction-making in film. Although social, political, psychological, and other non-formal aspects of film will be discussed, the course is principally concerned with the aesthetics and visual styles at work in the films under consideration.

PREREQUISITES: Any course or combination of courses that satisfies the College of Arts and Sciences Writing Requirement

FORMATS: Lecture | Discussion

ENGL 2209 Literature of the Asian Diaspora

CREDIT HOURS: 3

Literature of the Asian Diaspora encompasses literature written in English by writers of Asian descent and heritage. Each year may have a specific focus, such as Asian Canadian and Asian American, Anglo-Asian, or Asian Australian literature. The course will concern itself with what constitutes Asian diasporic literature, its various historical and social contexts, as well as its narrative traditions and innovations.

CROSSLISTED: CHIN 3080.03

EXCLUSIONS: ENGL 3087.03

ENGL 2210 Introduction to the African Diaspora

CREDIT HOURS: 3

In this course, we study literary texts and other cultural production of the African diaspora. Through reading a variety of African diasporic texts, we explore the ways that the African diaspora has responded creatively to slavery, colonialism, migration, and travel, producing legacies and languages of resilience, resistance, and rupture. We will consider: different streams of the African diaspora, including continental Africa, the Caribbean, Britain, and North America; various genres, including prose fiction, creative non-fiction, poetry, drama, music, and film; and the ways that African diasporic identity intersects with other modes of identification, such as nationality, gender, sexuality, class, age, and religion. This course will introduce you to some of the key theoretical and thematic concerns of African diasporic literature. The majority of the texts will have been written in English originally, although there will be some texts read in translation.

PREREQUISITES: Any class or combination of courses that satisfies the College of Arts and Sciences Writing Requirement.

FORMATS: Lecture

ENGL 2215 Young Shakespeare

CREDIT HOURS: 3

This course explores some of the works of William Shakespeare written or performed before 1600. Plays to be studied may include Richard III, Henry IV Parts I and II, Henry V, Titus Andronicus, The Taming of the Shrew, A Midsummer Night's Dream, Love's Labour's Lost, The Merchant of Venice, Romeo and Juliet, Much Ado about Nothing and Hamlet; poetry may include Venus and Adonis, The Rape of Lucrece and some of the sonnets. We will attend to how Shakespeare learned his craft through experimentation and cross-fertilization in the larger context of the rhetorical and theatrical culture of sixteenth-

century London.

PREREQUISITES: Any English course or combination of English courses that satisfies the College of Arts and Science Writing Requirement; or THEA 1000.06, or PERF 1000.03 and PERF 1002.03; or the King's FYP

CROSSLISTED: THEA 2215.03

EXCLUSIONS: ENGL 2214.06/ THEA 2214.06

FORMATS: Lecture

ENGL 2217 Shakespeare at the Globe

CREDIT HOURS: 3

During the years after the Globe Theatre was built on the banks of the Thames, Shakespeare's company performed some of his best-known theatrical works. Plays to be studied may include Twelfth Night, As You Like It, Troilus and Cressida, Measure for Measure, Othello, King Lear, Antony and Cleopatra, Macbeth, Coriolanus, The Winter's Tale, Cymbeline, and The Tempest. Focusing on Shakespeare's career after 1600, this course explores Shakespeare's mature works in their historical and cultural contexts.

PREREQUISITES: Any English course or combination of English courses that satisfies the College of Arts and Science Writing Requirement; or THEA 1000.06, or PERF 1000.03 and PERF 1002.03; or the King's FYP

CROSSLISTED: THEA 2216.03

EXCLUSIONS: ENGL 2214.06/THEA 2214.06

FORMATS: Lecture

ENGL 2218 Gothic Fiction

CREDIT HOURS: 3

This course examines a selection of gothic fiction from Horace Walpole onwards, and across national divisions, and may include such authors as Matthew Lewis, Mary Shelley, Edgar Allan Poe, Bram Stoker, Shirley Jackson, and Richard Matheson. Topics to be considered may include the significance of supernatural figures (ghosts, fetches, vampires, and so on), narrative forms, the representation of terror, and the gothic as a vehicle of social critique.

PREREQUISITES: Any course or combination of courses that satisfies the College of Arts and Sciences Writing Requirement

EXCLUSIONS: ENGL 2216.06, ENGL 3216.06

FORMATS: Lecture | Discussion

ENGL 2222 Fictions of Self Discovery

CREDIT HOURS: 3

A study of literary works (chiefly novels, but also possibly including short stories or short story collections) that portray the crises and conflicts involved in coming of age, finding a vocation, and the search for identity. Works from the nineteenth century to the present may be included, by authors writing in English in a variety of national traditions and global contexts. Typical themes include childhood experience and education, familial and romantic relationships, identity formation (cultural, gender, sexual), occupational issues and challenges.

PREREQUISITES: Any class or combination of courses that satisfies the College of Arts and Sciences Writing Requirement.

EXCLUSIONS: ENGL 2221X/Y.06

ENGL 2229 Tragedy

CREDIT HOURS: 3

This course studies a representative selection of texts from various historical periods in order to arrive at an understanding of the meaning of tragedy. Various definitions of tragedy will be examined along with such possible questions as how has tragedy changed over time, and what is tragicomedy.

PREREQUISITES: Any course or combination of courses that satisfies the College of Arts and Sciences Writing Requirement.

CROSSLISTED: THEA 2229.03

EXCLUSIONS: ENGL 2226.06

FORMATS: Lecture | Discussion

ENGL 2230 Satire

CREDIT HOURS: 3

A survey of traditional satire from early invective to contemporary caricature. This course chiefly examines conventional forms of verse and prose satires but attention is also paid to the visual and dramatic. Students are introduced to a wide range of specific modes (e.g., the character sketch, mock encomium, travesty, parody, lampoon) and satire's many uses within various national contexts (e.g., Roman, English, American, Canadian).

PREREQUISITES: Any course or combination of courses that satisfies the College of Arts and Sciences Writing Requirement.

EXCLUSIONS: ENGL 2227.06

FORMATS: Lecture | Discussion

ENGL 2231 Foundations of Science Fiction

CREDIT HOURS: 3

Various origins have been offered for science fiction: from classical Greek texts, to *Gulliver's Travels*, to *Frankenstein*, to twentieth-century pulp publications. This course will read science fiction from these various origins through to the so-called Golden Age of Science Fiction in the 1950s. Authors could include Mary Shelley, H.G. Wells, and Hugo Gernsback.

PREREQUISITES: Any course or combination of courses that satisfies the College of Arts and Sciences Writing Requirement

EXCLUSIONS: ENGL 2233.06

FORMATS: Lecture

ENGL 2232 Contemporary Science Fiction

CREDIT HOURS: 3

This course will study science fiction from the Golden Age of the 1940s and 50s to the most recent developments. Such schools and areas as the New Wave, cyberpunk, and postcolonial SF are among the topics that could be explored, as are developments in film, television, and new media.

PREREQUISITES: Any course or combination of courses that satisfies the College of Arts and Sciences Writing Requirement

EXCLUSIONS: ENGL 2233.06

FORMATS: Lecture

ENGL 2235 Tolkien: Fantasy and Medievalism

CREDIT HOURS: 3

This course will examine the fantasy writings of J. R. R. Tolkien. Topics could include the development of high fantasy, the question of escapism, alternate worlds, heroes and anti-heroes, Norse and medieval mythology, language-creation, Tolkien's medieval scholarship, the Inklings, Tolkien and Christianity, and Tolkien's work in the context of twentieth-century wars and politics.

PREREQUISITES: Any course or combination of courses that satisfies the College of Arts and Sciences Writing Requirement

FORMATS: Lecture

ENGL 2236 Fantasy after Tolkien

CREDIT HOURS: 3

This course will examine writings in the fantasy genre of the later twentieth century. Authors could include Ursula LeGuin, Guy Gavriel Kay, Charles de Lint, Susan Cooper, R. Scott Bakker, J. K. Rowling, and Philip Pullman.

PREREQUISITES: Any course or combination of courses that satisfies the College of Arts and Sciences Writing Requirement

FORMATS: Lecture

ENGL 2237 Outlaw Tales

CREDIT HOURS: 3

This course will study the romantic outlaw of fiction, poetry and film. Texts may range from sagas to Robin Hood ballads to highwayman tales to modern Westerns. Topics include images and tropes for the outlaw; the question of why the figure of the outlaw is appealing to law-abiding readers; the way the literary and romantic outlaw compares with the real-life outlaws of the time; or the role of the exile as a commentator on 'legal' society.

PREREQUISITES: Any course or combination of courses that satisfies the College of Arts and Science Writing Requirement

ENGL 2238 Children's Literature

CREDIT HOURS: 3

This course will focus on literature written for children, from short stories to novels and poetry. The course will consider the origins of the genre, examine major works from the 1850-1900 period (called the Golden Age of children's literature for a group of texts still widely republished and adapted in film), and then survey a range of twentieth-century examples, including the rise of the multi-volume series for children and young adults.

PREREQUISITES: Any course or combination of courses that satisfies the College of Arts and Sciences Writing Requirement.

FORMATS: Lecture

ENGL 3000 Close Reading

CREDIT HOURS: 3

Focusing on the close reading of literary and other texts, this course aims to equip students with the tools and vocabulary necessary to understanding how contexts, epistemologies, and ideologies permeate language in its most local and broadest uses.

PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF.

FORMATS: Lecture | Discussion

ENGL 3001 History of Literary Criticism

CREDIT HOURS: 3

This course provides a survey of major statements in literary theory from antiquity to the mid-20th century. Topics considered in the course include the value of literature, the relation of fiction to reality, the nature of creativity, the function of genres and conventions, and the role of the critic.

PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF.

EXCLUSIONS: ENGL 3244.06

FORMATS: Lecture | Discussion

ENGL 3002 Contemporary Critical Theory

CREDIT HOURS: 3

This course provides a survey of major issues and schools in literary theory since 1960. Among the approaches considered are formalism, Marxism, feminism, reader-response criticism, psychoanalysis, structuralism, deconstruction, new historicism, queer studies, post-colonialism, and cultural studies.

PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF.

EXCLUSIONS: ENGL 3244.06

FORMATS: Lecture | Discussion

ENGL 3005 Canterbury Tales

CREDIT HOURS: 3

An introduction to the study of Middle English literature in Middle English by way of Geoffrey Chaucer's collection of tales told by a mixed crowd of people on pilgrimage, from idealistic knight and pious nun to bawdy wife and drunken cook.

PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF.

EXCLUSIONS: ENGL 3219.06

FORMATS: Lecture | Discussion

ENGL 3006 Old English

CREDIT HOURS: 3

An introduction to the Old English language and literature in Old English from the seventh to the eleventh centuries. Literary works will include the heroic, the sacred, the bawdy, and the historical; the question of who got to enjoy this literature will lead to such topics as orality and literacy, manuscript production and circulation, palaeography, and multilingual culture.

PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF.

EXCLUSIONS: ENGL 4253.06

FORMATS: Lecture

ENGL 3009 Middle English Drama

CREDIT HOURS: 3

This course will study Middle English Drama from its origins through to ca. 1500.

PREREQUISITES: Any course or combination of courses that satisfies the College of Arts and Sciences Writing Requirement.

CROSSLISTED: THEA 3009

FORMATS: Lecture

ENGL 3010 Renaissance Poetry and Culture I: More to Jonson

CREDIT HOURS: 3

This course explores the flourishing of English literary culture from the Tudor humanists (such as Sir Thomas More) and courtly makers (Sir Thomas Wyatt) to the Elizabethan sonnet writers (Sir Philip Sidney) and plain style poets (Ben Jonson). Shakespeare's poetry, Spenser's *Faerie Queene*, and selected works by women authors (including Queen Elizabeth herself) will be represented in the syllabus.

PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF.

EXCLUSIONS: ENGL 3224.06

FORMATS: Lecture | Discussion

ENGL 3011 Renaissance Poetry and Culture II: Donne to Milton

CREDIT HOURS: 3

This course offers students the chance to interpret poems by one of the most enigmatic English writers (John Donne) and to argue about the view of human nature encoded in one of the most contested English texts (*Paradise Lost*). In addition, there will be opportunities to study devotional poetry (George Herbert), life-writing (Sir Thomas Browne), women's writing (Lady Mary Wroth), political writing (Andrew Marvell), or even prison writing (by Suckling or Bunyan, for example).

PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF.

EXCLUSIONS: ENGL 3224.06

FORMATS: Lecture | Discussion

ENGL 3015 Renaissance Drama

CREDIT HOURS: 3

This course will explore the richness and strangeness of some of the playwrights too often obscured by Shakespeare's shadow. Between the opening of the first professional playhouse in London (1576) and the closing of the theatres by Parliament (1641), the Globe was only one of many venues catering to an avid theatre-going public, and the first English play by a woman was circulated in manuscript. Playwrights to be studied include Christopher Marlowe, Ben Jonson, Thomas Middleton, John Webster, Elizabeth Cary, and John Ford.

PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF.

CROSSLISTED: THEA 3015.03

FORMATS: Lecture | Discussion

ENGL 3017 English Poetry and Prose, 1660-1740

CREDIT HOURS: 3

The poetry and prose from the Restoration and early eighteenth-century contain much in the way of sex and jokes. The course studies works by authors such as Dryden, Rochester, Behn, Finch, Swift, and Pope. Students are introduced to popular forms (heroic couplet, satire, conversational poems, essay, epistle, political allegory) and to the many changes that shaped the literature of the period, notably the decline of the court, the emergence of modern capitalism, and the rise of professional authorship.

PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF.

EXCLUSIONS: ENGL 3225.06

FORMATS: Lecture | Discussion

ENGL 3019 Poetry and Prose, 1740-1789

CREDIT HOURS: 3

A survey of poetry and prose from the mid- to late-eighteenth century. This course studies the works of Samuel Johnson and his circle, the poets of sensibility, the Bluestockings, and sundry other authors. It covers a wide range of genres and movements (odes, imitation, poems, aesthetic treatises, fables) in light of contemporary social and political events, from the growth of democracy at home to historic revolutions abroad.

PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF.

EXCLUSIONS: ENGL 3225.06

FORMATS: Lecture | Discussion

ENGL 3020 English Drama, 1660-1800

CREDIT HOURS: 3

A survey of plays produced during the Restoration and eighteenth century. Concentrating on the London scene from the first appearance of actresses on the stage to the burning of the Haymarket theatre in 1789, this course introduces students to the period's various dramatic forms, the literary influences and controversies, and the many women and men who penned for the stage.

PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF.

CROSSLISTED: THEA 3913.03

EXCLUSIONS: ENGL 3225.06

FORMATS: Lecture | Discussion

ENGL 3022 English Fiction to 1820

CREDIT HOURS: 3

This course surveys the rise of the English novel from Behn to Austen. Examining works by several early novelists, some well-known and some not so well-known, the course introduces students to a wide range of early prose narratives, such as amatory fiction, the fictional memoir, the *roman à clef*, the epistolary novel, and various comic and sentimental works.

PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF.

EXCLUSIONS: ENGL 2208.06

FORMATS: Lecture | Discussion

ENGL 3026 Romantic Era I: Radicals and Visionaries

CREDIT HOURS: 3

Focusing primarily on the late 18th century, this class will explore the interaction between imaginative writing and pressing political debates over rights—for men, for women, and for the enslaved. Authors may include William Blake, Anna Letitia Barbauld, Samuel Taylor Coleridge, Olaudah Equiano, Keats, Mary Robinson, and the Shelleys.

PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF.

EXCLUSIONS: ENGL 2205.06, ENGL 3025.06

FORMATS: Lecture | Discussion

ENGL 3027 Romantic Era II: The Satanic and the Sublime

CREDIT HOURS: 3

Focusing primarily on the early 19th century, this class will explore the interactions and reactions of reform and conservatism, evil and the sublime, tradition and modernity, across genres. Authors may include Jane Austen, William Blake, Byron, Samuel Taylor Coleridge, Felicia Hemans, John Keats, Letitia Landon, the Shelleys, and the Wordsworths.

PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF.

EXCLUSIONS: ENGL 3025.06

FORMATS: Lecture | Discussion

ENGL 3029 Victorian Poetry

CREDIT HOURS: 3

This course explores Victorian poetry in the context of the cultural, social, political, artistic and religious transformations that occurred between the 1830s and 1900. Authors studied will include Tennyson, Robert and Elizabeth Barrett Browning, Matthew Arnold, and the Pre-Raphaelite poets. Specific emphases will vary, but recurrent themes will include the poet's role in an increasingly technological and scientific culture, the challenges faced by women poets, experimentation with new poetic forms like the dramatic monologue, and the crisis of faith caused by new modes of intellectual inquiry.

PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF

FORMATS: Lecture | Discussion

ENGL 3031 The Nineteenth-Century British Novel from Austen to Dickens

CREDIT HOURS: 3

In this course we will study British novels from the first half of the nineteenth century. Specific reading will vary from year to year but will usually include works by Jane Austen, Walter Scott, Charles Dickens, W. M. Thackeray, and the Brontës. We will examine these authors' experimentation and innovation with both the form and the subject matter of fiction as they transformed the novel from a generic upstart into the century's dominant literary form.

PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF.

EXCLUSIONS: ENGL 2208.06

FORMATS: Lecture | Discussion

ENGL 3032 The Nineteenth-Century British Novel from Dickens to Hardy

CREDIT HOURS: 3

In this course we will study British novels of the second half of the nineteenth century. Specific reading will vary from year to year but will usually include works by Charles Dickens, George Eliot, Anthony Trollope, Wilkie Collins, and Thomas Hardy, all writers who drew on the now-established tradition and prominence of the British novel and found their own ways to extend and challenge its conventions.

PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF.

EXCLUSIONS: ENGL 2208.06

FORMATS: Lecture | Discussion

ENGL 3040 Irish Literature. 1700-1900: Satire, Sentiment, and the Gothic

CREDIT HOURS: 3

This course will survey Irish writing in English from 1700 to 1900 and emphasize three literary modes significant to this body of work—satire, sentiment, and the gothic—across the genres of poetry, drama, and prose fiction. Possible authors include Swift, the Sheridans, Moore, Mangan, LeFanu, the Wildes, and Stoker.

PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF.

FORMATS: Lecture | Discussion

ENGL 3061 American Literature to 1865

CREDIT HOURS: 3

A survey of the major writers of the United States up to the end of the Civil War. This period includes the earliest practitioners of the modern short story, radically inventive poets, early "nature writers," experimental novelists, and various forms of autobiography.

PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF.

FORMATS: Lecture | Discussion

ENGL 3062 American Literature, 1865-1914

CREDIT HOURS: 3

A survey of the major writers of the United States from the Civil War to the beginning of the First World War, with an emphasis on the realist novel. Major

figures include Mark Twain, Henry James, Edith Warton, Stephen Crane.

PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF.

FORMATS: Lecture | Discussion

ENGL 3070 Twentieth-Century African American Novel

CREDIT HOURS: 3

While it is obvious that several of the novelists on this reading list might well appear in other courses, it is a worthwhile exercise for students to engage in a conversation about these and other texts by African American novelists in the context of African American novelists. That context will be the focus of this course. Such a comparatively restricted focus brings with it such questions as does it matter that these novels were written by African Americans? What do we gain/lose by considering these texts in this specific national and ethno-cultural context? Are the texts representative, and if so, of what and in what ways? Do these texts reinforce or complicate (or both) notions such as the African American experience?

PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF

FORMATS: Lecture | Discussion

ENGL 3086 Post-Colonial Literatures

CREDIT HOURS: 3

This course will allow you to read literature from the former British colonies, as well as some of the influential theorists who are helping to shape the evolving field of postcolonial studies. Our purpose will be to gain familiarity with a selection of the seminal texts, arguments, and debates that characterize this diverse and vibrant area of research and study.

PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF.

EXCLUSIONS: ENGL 3085.06

FORMATS: Lecture

ENGL 3088 African Caribbean Women Writers

CREDIT HOURS: 3

This course will consider African Caribbean women writers from through the twentieth and twenty-first centuries. By exploring prose, poetry, drama, and music, we will consider how these women writers address diverse topics such as the experience of coming of age, the intersections between race and gender, familial relations, and sexuality. This course will introduce you to some of the most common thematic concerns of African diasporic women's writing as well as introduce you to the multiplicity of approaches different writers take to these themes.

PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF.

CROSSLISTED: GWST 3088.03

FORMATS: Lecture

ENGL 3089 Gender and Sexuality in Asian North American Writing

CREDIT HOURS: 3

This course introduces students to the multiplicity of approaches that Asian diasporic literature takes to the themes of gender and sexuality. Focusing primarily on texts by writers situated in Canada and the US, all of the course readings are written in English.

PREREQUISITES: Any course or combination of courses that satisfies the College of Arts and Sciences Writing Requirement.

CROSSLISTED: GWST 3089

FORMATS: Lecture

ENGL 3098 Creative Writing: Poetry I

CREDIT HOURS: 3

This course provides students with an opportunity to write and workshop poems and to develop skills as poets. Students receive peer feedback on their original poems in a workshop environment and explore poetic technique and tools such as metaphor, simile, enjambment, assonance, alliteration, and rhyme. Various skills are developed through the sharing of individual and collaborative expression, and the understanding of the movement from first draft to a poem that one feels ready to share toward publication. Students learn from instructors who have both current knowledge of creative writing theory and current, practical publication experience.

PREREQUISITES: Completion of CRWR 2000.06 or CRWR 2002.03; or 60.0 credit hours, including 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF.

CROSSLISTED: CRWR 3010 Creative Writing Poetry I

ENGL 3099 Creative Writing: Fiction I

CREDIT HOURS: 3

This course provides students with an opportunity to write and workshop fiction and to develop skills as fiction writers. Students receive peer feedback on their original works of fiction in a workshop environment and explore narrative techniques required of fiction writing such as setting, character development, point of view, theme, tone, mood, dialogue, scene, exposition, and figurative language. Various skills are developed through the sharing of individual and

collaborative expression, and the understanding of the movement from a first draft to a work of fiction that one feels ready to share toward publication. Students learn from instructors who have both current knowledge of creative writing theory and current, practical publication experience.
PREREQUISITES: Completion of CRWR 2000.06 or CRWR 2002.03; or 60.0 credit hours, including 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF.
CROSSLISTED: CRWR 3020

ENGL 3112 Writing Theory

CREDIT HOURS: 3

This course considers a range of approaches to writing. Students read widely in rhetoric and composition theory, participate in the ongoing conversation about writing, and heighten their understanding of the composition process. Writing intensive and writing centered, the course is ideal for anyone interested in writing and critical thinking.

PREREQUISITES: Any course or combination of courses that satisfies the College of Arts and Sciences Writing Requirement

EXCLUSIONS: ASSC 3110.06X/Y / ENGL 3111.06X/Y

FORMATS: Lecture | Discussion

ENGL 3113 Writing Practice

CREDIT HOURS: 3

This course puts writing theory into practice. As part of their course work, students gain valuable experience working as writing tutors and/or assistant editors for an academic journal. The course is ideal preparation for careers in teaching or publishing, as well as for students going on to do graduate work.

PREREQUISITES: ENGL 3112.03 / ASSC 3112.03 or ENGL 2202.03 or instructor's permission

EXCLUSIONS: ASSC 3110.06X/Y / ENGL 3111.06X/Y

ENGL 3203 History of the English Language

CREDIT HOURS: 3

This course introduces students to the study of the history of English, tracing the story from the origins of the language in proto-Germanic to its current abundance of varieties around the globe. Most emphasis will be placed on the development of English in our earlier literature from OldEnglish to Early Modern English, and then its current manifestations in Canada.

PREREQUISITES: Any course or combination of courses that satisfies the College of Arts and Sciences Writing Requirement

EXCLUSIONS: ENGL 3202.03

FORMATS: Lecture | Discussion

ENGL 3220 American Literature of the Earlier Twentieth Century

CREDIT HOURS: 3

An introduction to American literature from the beginning of the twentieth century until the end of the second world war.

PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF.

EXCLUSIONS: ENGL 3213.06

FORMATS: Lecture | Discussion

ENGL 3221 American Literature of the Later Twentieth Century

CREDIT HOURS: 3

An introduction to American literature from the middle of the twentieth century until the end.

PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF.

EXCLUSIONS: ENGL 3213.06

FORMATS: Lecture | Discussion

ENGL 3231 Modern Canadian Literature

CREDIT HOURS: 3

The historical period covered in this course extends from the end of World War I through the decade following World War II, a period during which Canada witnessed the formation of a modern literature in English. Varied aesthetic responses to ideas of the modern, the processes and technologies of modernization, and the conditions of social, cultural, economic, and political modernity will be addressed.

PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF.

CROSSLISTED: CANA 3231.03

FORMATS: Lecture | Discussion

ENGL 3234 British Literature of the Earlier Twentieth Century

CREDIT HOURS: 3

An introduction to British literature from the beginning of the twentieth century roughly to the end of the second world war.

PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF.

EXCLUSIONS: ENGL 3212.06

FORMATS: Lecture | Discussion

ENGL 3235 British Literature of the Later Twentieth Century

CREDIT HOURS: 3

An introduction to British literature from the middle of the twentieth century until the end.

PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF.

EXCLUSIONS: ENGL 3212.06

FORMATS: Lecture | Discussion

ENGL 3238 Fiction of the Earlier Twentieth Century

CREDIT HOURS: 3

A selection of fiction from the beginning of the twentieth century to approximately the end of the second world war. Texts will be subject to the instructor's preferences.

PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF.

EXCLUSIONS: ENGL 3209.06

FORMATS: Lecture | Discussion

ENGL 3239 Fiction of the Later Twentieth Century

CREDIT HOURS: 3

An introduction to fiction in English from the middle of the twentieth century to the end. Texts will be subject to the instructor's preferences.

PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF.

EXCLUSIONS: ENGL 3209.06

FORMATS: Lecture | Discussion

ENGL 3240 Drama of the Earlier Twentieth Century

CREDIT HOURS: 3

An introduction to major developments in drama from Ibsen to Brecht. The course will explore the diversity of dramatic styles and theatrical movements, as playwrights respond to and react against the nineteenth century's traditions and their own changing times. In addition to Ibsen and Brecht, authors may include Strindberg, Chekhov, Shaw, Synge, Pirandello, and O'Neill.

PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF.

FORMATS: Lecture | Discussion

ENGL 3241 Drama of the Later Twentieth Century

CREDIT HOURS: 3

This course focuses on a selection of plays ranging from Absurdist works to present-day texts, including scripts by Canadian dramatists. The focus will be the growth of contemporary theatrical movements, such as the kitchen-sink drama of the 1950s and the "In-Yer-Face" theatre of the 1990s. Playwrights may include Beckett, Ionesco, Osborne, Albee, Stoppard, Churchill, Kane, and Tremblay.

PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF.

FORMATS: Lecture | Discussion

ENGL 3242 Poetry of the Earlier Twentieth Century

CREDIT HOURS: 3

An introduction to poetry in English from the beginning to the middle of the twentieth century.

PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF.

FORMATS: Lecture | Discussion

ENGL 3243 Poetry of the Later Twentieth Century

CREDIT HOURS: 3

An introduction to poetry in English from the middle of the twentieth century to the end.

PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF.

FORMATS: Lecture | Discussion

ENGL 3245 The Beat Generation

CREDIT HOURS: 3

This course will examine the writing of the Beat Generation. Authors to be considered could include Jack Kerouac, Allen Ginsberg, William S. Burroughs, and Denise Levertov, among others.

PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF.

FORMATS: Lecture | Discussion

ENGL 3250 Contemporary Women Poets

CREDIT HOURS: 3

During the last few decades, an extraordinary number of powerful new women poets have appeared on the literary scene. This course focuses on selected works written by these poets, and explores the ways in which monolithic ideas of "woman" have been challenged by individual poets who are positioned differently by race, sexual orientation, and national identity.

PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF.

CROSSLISTED: GWST 3050.03

EXCLUSIONS: ENGL 3050.06

FORMATS: Lecture | Discussion

ENGL 3255 Experimental Subjects: Women, Writing, Life

CREDIT HOURS: 3

This course examines contemporary writing by women and women-identifying writers. Texts may include personal essays, novels, short stories, life writing, scholarship, and creative non-fiction, as well as works that borrow from all of these categories but fit neatly into none of them.

PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF.

CROSSLISTED: GWST 3255

FORMATS: Lecture

ENGL 3260 Contemporary Fiction

CREDIT HOURS: 3

An introduction to contemporary fiction in English. Texts will be subject to the instructor's preferences.

PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF

FORMATS: Lecture

ENGL 3270 Contemporary Canadian Literature

CREDIT HOURS: 3

In this course, a variety of late twentieth-century and recent Canadian fiction and poetry texts will be studied from such perspectives as the following: postcolonial, postmodern, multicultural. The politics of cultural expression will be emphasized, as well as the relationship between ethics and aesthetic approaches to literature.

PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF.

CROSSLISTED: CANA 3270.03

EXCLUSIONS: ENGL 3233.03

ENGL 3300 TV: Theory and Criticism

CREDIT HOURS: 3

This course considers television as a uniquely powerful source of cultural production, presenting students with some of the theoretical questions it raises and some of the critical methods that have been developed for engaging it. The course will explore the way TV mediates cultural attempts to understand the contemporary world.

PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF.

FORMATS: Lecture

ENGL 3301 Graphic Novels

CREDIT HOURS: 3

This course explores the history and development of graphic novels from the early twentieth century to the present. It examines the history and formal conventions of various genres, and it is particularly concerned with the cultural status of graphic novels and the relationship between verbal and visual forms.

PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF.

FORMATS: Lecture

ENGL 3305 Fan Culture

CREDIT HOURS: 3

This course will provide an introduction to the field of fan culture studies by examining how critics have analyzed and interpreted a wide range of fan practices and products, including fanzines, fan fiction, fan artwork, fan music, fan videos and fan costumes. Individual case studies may cover a wide range of historical periods and cultural traditions.

FORMATS: Lecture

ENGL 3310 Writing in a Digital Age

CREDIT HOURS: 3

ENGL 3310 focuses on the analysis and production of electronic texts. Students publish their work electronically and explore emerging theories about hypertext writing and the role of visual rhetoric. Objects of study will encompass a variety of electronic genres, but will focus mainly on sites on the World Wide Web.

PREREQUISITES: Any course or combination of courses that satisfies the College of Arts and Sciences Writing Requirement

FORMATS: Lecture | Discussion

ENGL 3311 Editing and Publishing Literature

CREDIT HOURS: 3

Along with teaching technical skills in editing and publishing, this course will investigate the cultural and social implications of editing and publishing in Canada. We will cover key concepts surrounding the material production of literature, arts administration, book and print cultures, and publishing standards such as developmental editing, structural editing, stylistic editing, copy editing, proofreading, project management, timeline development, layout and design, printing and binding, etc.

PREREQUISITES: Completion of CRWR 2000.06 or CRWR 2002.03; or 60.0 credit hours, including 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF.

CROSSLISTED: CRWR 3311.03

FORMATS: Lecture

ENGL 3314 Shakespeare and his Contemporaries on Film

CREDIT HOURS: 3

This course will study the adaptation of Shakespeare and his contemporaries to the medium of cinema, focusing on the differences between theatre and cinema, the process of textual adaptation, the updating of classic stories to modern settings, and the close analysis of the performer's choices.

PREREQUISITES: Experience in Shakespeare at any level OR experience in Film Studies at any level.

CROSSLISTED: THEA 3314.03, FILM 3314.03

EXCLUSIONS: THEA 2313.03, ENGL 2313.03

FORMATS: Lecture | Seminar

ENGL 3320 Literature and Medicine

CREDIT HOURS: 3

Focusing on texts and contexts from the medieval to the postmodern, this course considers literature within the history of medicine. Topics may include but are not limited to the rise of the physician, the history of midwifery and obstetrics, the ethics of medical research, and the epidemic in literature. The course is designed to appeal to both English Majors and to students in other programs.

PREREQUISITES: Any course or combination of courses that satisfies the College of Arts and Sciences Writing Requirement.

ENGL 3503 Modern Theatre

CREDIT HOURS: 3

From the 1870s until the 1960s, the theatre underwent a series of radical transformations as artists sought new forms for a rapidly changing world. This course explores the key theatrical movements of this period, including Realism, Naturalism, Symbolism, Epic Theatre, Theatre of Cruelty, and Absurdism. It compares the theories behind them to the plays, stagecraft, and performance techniques they produced, and considers their legacy for the contemporary stage.

PREREQUISITES: THEA 2011.03 and THEA 2012.03 or permission of the instructor

CROSSLISTED: THEA 3503

EXCLUSIONS: ENGL 3501.03, ENGL 3502.03, THEA 3500.03, THEA 3501.03, THEA 3502.03

FORMATS: Seminar

ENGL 3820 Nabokov

CREDIT HOURS: 3

A close study of selected works by consummate twentieth century prose stylist Vladimir Nabokov - novelist, poet, critic and translator, author of notorious *Lolita*.

CROSSLISTED: RUSN 3820.03

FORMATS: Lecture | Discussion

ENGL 4900 Honours Capstone

CREDIT HOURS: 3

This course is intended to prepare students to complete the Honours essay. Students will also learn practices and hone skills they can carry forward into academic and non-academic professional realms.

CALENDAR NOTES: A grade will not be assigned for ENGL 4900 until both ENGL 4900 and ENGL 4901 have been completed. To receive credit, ENGL 4900 and 4901 must be completed in the same academic year.

PREREQUISITES: Admission to Honours or Combined Honours in English.

EXCLUSIONS: ENGL 4990.00

ENGL 4901 Honours Essay in English

CREDIT HOURS: 0

All English Honours students and those in combined Honours programs in which English is their principal subject must write a substantial essay on a topic chosen and refined in ENGL 4900.03. Students will work with a faculty mentor to complete the essay and the mentor will assign a final grade.

PREREQUISITES: ENGL 4900.03 Honours Capstone

FORMATS: Tutorial

Course Descriptions - Creative Writing

CRWR 1030 Reading and Writing Stories

CREDIT HOURS: 6

This class introduces students to the key facets of a writer's craft, including its methods and its practices, its genres and their masters. Students will study the techniques of a range of literary works in order to become familiar with the terminology and concepts central to literary studies. They will also hone their skills as creative writers through individual and collaborative expression, and will follow a number of original creative works from first draft to finished version. These skills and activities will be supported by tutorials, writing workshops, and lectures.

CALENDAR NOTES: This class will fulfill the Writing Requirement

CROSSLISTED: ENGL 1030.06

EXCLUSIONS: ENGL 1000.06, ENGL 1010.03, ENGL 1011.03, ENGL 1020.03, ENGL 1021.03

FORMATS: Lecture | Tutorial

CRWR 2001 The Creative Process

CREDIT HOURS: 3

The Creative Process focuses on creativity in a wide variety of artistic and other areas of thought and expression. You will have opportunity to: Explore aspects and issues of the creative process; Consider steps in the creative process and creative process tools; Develop your own practice and creative projects; Generate ideas that could be used for future projects. The course will consist of lectures, exercises, guest presentations, personal reflection, group discussion, and creative assignments. Although this course is filed under "creative writing," you will be exposed to the practices of creative thinkers in various fields, including guest speakers from the local community.

PREREQUISITES: Any class or combination of classes that satisfies the College of Arts and Sciences Writing Requirement

EXCLUSIONS: CRWR 2000.06

FORMATS: Lecture

CRWR 2002 Introduction to Creative Writing

CREDIT HOURS: 3

Introduction to Creative Writing explores the techniques and practices of various literary genres including poetry, fiction, narrative non-fiction, playwriting, and writing for children. Students will develop their skills through writing exercises and assignments, and examine a broad range of styles and approaches through lectures, group discussion, and presentations by professional writers and editors.

PREREQUISITES: Completion of any course or combination of courses that satisfies the College of Arts and Sciences Writing Requirement.

FORMATS: Lecture

CRWR 2010 The Personal Essay

CREDIT HOURS: 3

In the personal essay we use moments and material from our lives to communicate meaning to a reader. The trick of it, suggests Philip Lopate, is to “make the small loom large” by using the humble details of daily life to address some aspect of the human condition. With this challenge in mind, this course considers a wide range of personal essays and allows students to try their hands at writing in this form. Class time will be divided between the analysis of published essays and the development of original work.

PREREQUISITES: Any class or combination of classes that satisfies the College of Arts and Social Sciences Writing Requirement.

CROSSLISTED: ENGL 2010.03

FORMATS: Lecture

CRWR 3010 Creative Writing: Poetry I

CREDIT HOURS: 3

This course provides students with an opportunity to write and workshop poems and to develop skills as poets. Students receive peer feedback on their original poems in a workshop environment and explore poetic technique and tools such as metaphor, simile, enjambment, assonance, alliteration, and rhyme. Various skills are developed through the sharing of individual and collaborative expression, and the understanding of the movement from first draft to a poem that one feels ready to share toward publication. Students learn from instructors who have both current knowledge of creative writing theory and current, practical publication experience.

PREREQUISITES: Completion of CRWR 2000.06 or CRWR 2002.03; or 60.0 credit hours, including 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF.

CROSSLISTED: ENGL 3098

FORMATS: Lecture

CRWR 3011 Creative Writing: Poetry II

CREDIT HOURS: 3

This course is a continuation of CRWR 3010.03/ENGL 3098.03 Poetry I. Students receive peer feedback on their original poems in a workshop environment and continue to develop a deeper understanding of diverse approaches to craft and technique. The course engages in further discussion and practice of different poetic forms and techniques. Students continue to learn from instructors who have both current knowledge of creative writing theory and current, practical publication experience.

PREREQUISITES: ENGL 3098.03 or CRWR 3010.03 with a grade of B or better, or by permission of the instructor

EXCLUSIONS: CRWR 3000.03

CRWR 3020 Creative Writing: Fiction I

CREDIT HOURS: 3

This course provides students with an opportunity to write and workshop fiction and to develop skills as fiction writers. Students receive peer feedback on their original works of fiction in a workshop environment and explore narrative techniques required of fiction writing such as setting, character development, point of view, theme, tone, mood, dialogue, scene, exposition, and figurative language. Various skills are developed through the sharing of individual and collaborative expression, and the understanding of the movement from a first draft to a work of fiction that one feels ready to share toward publication. Students learn from instructors who have both current knowledge of creative writing theory and current, practical publication experience.

PREREQUISITES: Completion of CRWR 2000.06 or CRWR 2002.03; or 60.0 credit hours, including 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF.

CROSSLISTED: ENGL 3099

CRWR 3021 Creative Writing: Fiction II

CREDIT HOURS: 3

This course is a continuation of English 3099/CRWR3020. Students receive peer feedback on their original fiction in a workshop environment and continue to develop a deeper understanding of diverse approaches to craft and technique. The course engages in further discussion and practice of different fictive forms, including postcard fiction and novels. Students continue to learn from instructors who have both current knowledge of creative writing theory and current, practical publication experience.

PREREQUISITES: ENGL 3099 or CRWR 3020 with a grade of B or better, or by permission of the instructor.

EXCLUSIONS: CRWR 3001

CRWR 3100 Songwriting: Creative Writing for Lyric Forms

CREDIT HOURS: 3

This course will explore songwriting as a literary genre, with emphasis on the writing of lyrics and the interplay between words and music. Students will receive peer feedback on their original song compositions in a workshop environment. Basic knowledge of and access to a recording device or audio recording software (e.g. GarageBand, Audacity, FL Studio) is essential. No experience playing a musical instrument is required, however musical exploration is emphatically encouraged.

PREREQUISITES: Completion of CRWR 2000.06 or 2002.03; or 60.0 credit hours, including 6.0 credit hours at the 1000-level in CRWR, ENGL, PERF, or KING.

FORMATS: Seminar

CRWR 3200 Spoken Word, Storytelling, and Literary Performance

CREDIT HOURS: 3

This course will explore spoken word, storytelling, and literary performance, with emphasis on the writing of performative genres and the relationship between text and performance. Classes and discussions will examine various approaches to these genres, and the use of theatrical tools and techniques. A range of forms and styles will be analyzed to consider topics like writing for the stage, poetic metre and cadence, voice production, staging/blocking, and the transference of oral art forms to the printed page. Students will receive peer feedback on their original compositions in a workshop environment.

CALENDAR NOTES:

PREREQUISITES: Completion of CRWR 2000.06 or 2002.03; or 60.0 credit hours, including 6.0 credit hours at the 1000-level in CRWR, ENGL, PERF, or KING.

FORMATS: Lecture

CRWR 3311 Editing and Publishing Literature

CREDIT HOURS: 3

Along with teaching technical skills in editing and publishing, this course will investigate the cultural and social implications of editing and publishing in Canada. We will cover key concepts surrounding the material production of literature, arts administration, book and print cultures, and publishing standards such as developmental editing, structural editing, stylistic editing, copy editing, proofreading, project management, timeline development, layout and design, printing and binding, etc.

PREREQUISITES: Completion of CRWR 2000.06 or CRWR 2002.03; or 60.0 credit hours, including 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF.

CROSSLISTED: ENGL 3311.03

FORMATS: Lecture

CRWR 3410 Writing for Children: Picture Books

CREDIT HOURS: 3

This is a hands-on writing workshop for beginning writers of children's picture books. We will generate ideas for stories through writing activities, explore picture book writing tools and technique, consider contemporary and classic texts, and develop our works-in-progress by giving and receiving constructive feedback. While the focus of this course is on writing and peer critique, you will also learn something of the children's book market and the business of publishing picture books.

PREREQUISITES: Completion of CRWR 2000.06 or CRWR 2002.03; or 60.0 credit hours, including 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF.

CRWR 4000 Creative Writing Poetry

CREDIT HOURS: 6

Students will meet in group session during the fall term to workshop their material that will lead to the production of a full manuscript of poetry. In the winter term students will meet on an individual basis with the professor to discuss and facilitate the completion of this project.

CALENDAR NOTES: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

PREREQUISITES: ENGL 3098.03, CRWR 3000.03

CRWR 4001 Creative Writing Fiction

CREDIT HOURS: 6

Students will meet in group session to workshop their material that will lead to the production of a full manuscript of fiction (short stories or novel).

CALENDAR NOTES: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

PREREQUISITES: ENGL 3099.03, CRWR 3001.03

CRWR 4010 Advanced Creative Writing: Poetry I

CREDIT HOURS: 3

Advanced Poetry will give students the opportunity to establish a disciplined poetic practice with attention to craft, vitality and surprise. Students will hone their ability to attend to the dynamic interaction and fluency of words and syntax as well as engage in the pursuit of imaginative and evocative creative thinking. You will be expected to critically engage with your classmates' poems and to learn to approach your own work with an editorial acuity that allows for progress, which will be more deeply explored in the second term. This advanced workshop builds on the technique and craft learned in earlier classes to deepen and broaden your practice of writing poetry.

PREREQUISITES: CRWR 3011.03

EXCLUSIONS: CRWR 4000.06

FORMATS: Other (explain in comments)

CRWR 4011 Advanced Creative Writing: Poetry II

CREDIT HOURS: 3

This course is a continuation of CRWR 4010.03. Advanced Poetry will give students the opportunity to establish a disciplined poetic practice with attention to craft, vitality and surprise. Students will hone their ability to attend to the dynamic interaction and fluency of words and syntax as well as engage in the pursuit of imaginative and evocative creative thinking. You will be expected to critically engage with your classmates' poems and to learn to approach your own work with an editorial acuity that allows for progress, which will be more deeply explored in the second term. This advanced workshop builds on the technique and craft learned in earlier classes to deepen and broaden your practice of writing poetry.

PREREQUISITES: CRWR 4010.03

EXCLUSIONS: CRWR 4000.06

CRWR 4020 Advanced Creative Writing: Fiction I

CREDIT HOURS: 3

This advanced fiction workshop is for dedicated writers who are ready to share finished, polished work with an audience of peers. Through reading and reacting to the work of published writers as well as the work of their peers, students will develop the skills required to assess others' writing as well as revising and editing their own work.

PREREQUISITES: CRWR 3021.03

EXCLUSIONS: CRWR 4001.06

CRWR 4021 Advanced Creative Writing: Fiction II

CREDIT HOURS: 3

This advanced fiction workshop is for dedicated writers who are ready to share finished, polished work with an audience of peers. Through reading and reacting to the work of published writers as well as the work of their peers, students will develop the skills required to assess others' writing as well as revising and editing their own work.

Degree Programs

The College of Sustainability offers a 120 credit-hour BA Double Major, Combined Honours degree in Environment, Sustainability and Society (ESS) with any major/honours subject in the Faculty of Arts and Social Sciences or the Faculty of Science. ESS can also be added as a Minor to any 120 credit hour BA degree, or can be taken as a Minor in a 90 credit hour BA degree. For complete details about the College, its programs and courses please see the [College of Sustainability](#) section.

BA Double Major, Environment, Sustainability and Society

The BA Double Major degree program allows students to combine a study of Environment, Sustainability and Society (ESS) with another subject (Allied Subject). The Allied Subject may be any Major subject from the Faculty of Arts and Social Sciences or the Faculty of Science. It is recommended that students enrolled in a Double Major program consult with academic advisors in both subject areas. This degree may also be combined with Minor(s) and Certificate(s).

In addition to fulfilling the 120 credit hour degree requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections, students in a BA Double Major program in ESS and another subject must complete the following:

ESS Requirements

1000-level requirements

- SUST 1000.06: *What is Sustainability?* or SUST 1400.03 *Exploring Sustainability* (online)
- SUST 1001.06: *A Sustainable Future*
- With **Foundation Year Program (FYP)** or **Dalhousie Integrated Science Program (DISP)**: Any 1000-level SUST course (minimum 3 credit hours)

Upper-level requirements

- SUST 2000.06: *Local Governance, Citizen Engagement and Sustainability*
- SUST 2001.06: *Global Environmental Governance*
- SUST 3000.03: *Environmental Decision Making*
- SUST 4001.03: *Environment, Sustainability and Society Capstone Part 1*
- SUST 4002.03: *Environment, Sustainability and Society Capstone Part 2**
- 3 more credit hours SUST at 3000 level or above
- 6 more credit hours SUST or ESS Electives at 3000 level or above
- The courses listed above fulfill the minimum requirements of 30 credit hours at 2000-level or above and 18 credit hours at 3000-level or above
- Students may take up to 18 more credit hours in SUST/ESS Electives at 2000-level or above, to a maximum of 48 credit hours

* SUST 4001 and SUST 4002 must be taken in consecutive Fall and Winter terms. Credit will not be granted for SUST 4001 until completion of SUST 4002.

Allied Subject Requirements

Please consult the Calendar and Academic Advisor for your Allied Subject.

General Degree Requirements satisfied by SUST courses

- SUST 1000.06 satisfies the 6 credit hours Writing Requirement (SUST 1400.03 and SUST 1001.06 do not satisfy the Writing Requirement).
- For BA students either SUST 1000.06 or SUST 1001.06 satisfy the Life and Physical Sciences requirement.
- For BSc students either SUST 1000.06 or SUST 1001.06 satisfies the Social Science requirement.
- For all General Degree Requirements please see [College of Arts and Science Degree Requirements](#).

BA Combined Honours, Environment, Sustainability and Society

The BA Combined Honours degree program allows students to combine a study of Environment, Sustainability and Society (ESS) with another subject (Allied Subject). The Allied Subject may be any Honours subject from the Faculty of Arts and Social Sciences or the Faculty of Science. An Honours Thesis is completed in either ESS or in the Allied Subject. Students intending to complete a Combined Honours program must consult with academic advisors in both subject areas. This degree may also be combined with Minor(s) and Certificates(s).

In addition to fulfilling the 120 credit hour degree requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections, students in a BA Combined Honours program in ESS and another subject must complete the following:

ESS Requirements

1000-level requirements

- SUST 1000.06: *What is Sustainability?* or SUST 1400.03 *Exploring Sustainability* (online)
- SUST 1001.06: *A Sustainable Future*
- With **Foundation Year Program (FYP)** or the **Dalhousie Integrated Science Program (DISP)**: Any 1000-level SUST course (minimum 3 credit hours)

Upper-level requirements

- SUST 2000.06: *Local Governance, Citizen Engagement and Sustainability*
- SUST 2001.06: *Global Environmental Governance*
- SUST 3000.03: *Environmental Decision Making*
- 9 more credit hours SUST at 3000 level or above (SUST 4001.03 and SUST 4002.03 *ESS Capstone* recommended)

ESS as primary subject in BA Combined Honours:

- 6 more credit hours SUST or ESS Electives at **2000 level or above**
- SUST 4901.03 and SUST 4902.03: *ESS Honours Thesis* (see below for admission requirements)

ESS as secondary subject in BA Combined Honours:

- 6 more credit hours SUST or ESS Electives at **3000 level or above**
- The courses listed above fulfill the minimum requirements of 30 credit hours at 2000-level or above and 18 credit hours at 3000-level or above
- Students may take no more than 48 credit hours in SUST/ESS Electives at 2000-level or above

Allied Subject Requirements

Please consult the Academic Calendar and Academic Advisor for your Allied Subject. If ESS is the secondary subject, the Honours Thesis is typically completed in the Allied (primary) Subject. Even if ESS is the primary subject, there may be additional course requirements for the Allied Subject to satisfy their Combined Honours degree requirements.

Admission to ESS Honours

Students wishing to complete the Honours Thesis in ESS must apply for admission to the ESS Honours Program by completing the “Intent to Register for ESS Honours Thesis” form before the end of the winter term prior to starting the Honours Thesis course. A cumulative GPA of 3.3 is required in all SUST and ESS Elective courses at 2000 level or above, with no individual grade less than C. Students must also complete the Dalhousie Honours Application Form before the deadline in September of their Honours year.

BA Combined Honours Graduation Requirements

Students must fulfill the requirements for the 120 credit hour BA Combined Honours degree outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections. Arts and Social Science subjects require a GPA of 2.7 on courses in the Honours subjects at 2000 level or above, with no individual grade less than C. Science subjects require a GPA of 3.0 on courses in the Honours subjects at 2000 level or above, with no individual grade less than C.

General Degree Requirements satisfied by SUST courses

SUST 1000.06 satisfies the 6 credit hours Writing Requirement (SUST 1400.03 and SUST 1001.06 do not satisfy the Writing Requirement). For BA students either SUST 1000.06 or SUST 1001.06 satisfy the Life and Physical Sciences requirement. For BSc students either SUST 1000.06 or SUST 1001.06 satisfy the Social Science requirement. For all General Degree Requirements please see [College of Arts and Science Degree Requirements](#).

Minor in Environment, Sustainability and Society

The Environment, Sustainability and Society (ESS) Minor is available to students registered in a 120 credit hour Bachelor of Arts, Bachelor of Science, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Applied

Computer Science, Bachelor of Management, Bachelor of Music, Bachelor of Journalism, or Bachelor of Science (Medical Sciences) program.

A BA (90 credit hour) degree program with a Minor in Environment, Sustainability and Society (ESS) is also available.

Requirements for Minor in ESS:

- any 1000-level SUST course
- a minimum of 18 credit hours and a maximum of 27 credit hours at the 2000 level or above in SUST courses.

Contact [College of Sustainability](#) for more information.

See [Minor in Environmental Studies](#) section in this Calendar.

BA Approved Electives in Environmental Studies:

Additions to the following lists will be made, as relevant courses become available.

Faculty of Science:

- BIOL 2060.03: Introductory Ecology
- BIOL 2601.03: The Flora of Nova Scotia
- BIOL 2605.03: Introduction to Marine Life in Nova Scotia
- BIOL 3060.03: Environmental Ecology
- BIOL 3061.03: Communities and Ecosystems
- BIOL 3225.03: Plants in the human landscape
- BIOL 3226.03: Economic Botany, Plants and Civilization
- BIOL 3601.03: Nature Conservation
- BIOL 3615.03: Methods in Ecology
- BIOL 4065.03: Sustainability and Global Change
- CHEM 2505.03: Environmental Chemistry
- ECON 2336.03: Regional Development
- ECON 3332.03: Resource Economics
- ECON 3335.03: Environmental Economics
- EARTH 2410.03: Environmental and Resource Geology I
- EARTH 3500.03: Geoscience Information Management
- GEOG 2800.03: Climate Change
- OCEA 2000.06: The Blue Planet
- OCEA 2800.03: Climate Change
- PHYC 2451.03: Astronomy I: The Sky and Planets
- PHYC 2800.03: Climate Change
- ENVS 2001.03: Analytical Environmental Science and Social Responsibility
- ENVS 3000.03: Environmental Science Internship
- ENVS 3210.03: Environmental Law II: Natural Justice and Unnatural Acts
- ENVS 3220.03: International Environmental Law for Scientists

- ENV5 3226.03: Economic Botany, Plants and Civilization
- ENV5 3300.03: Contaminated Site Management
- ENV5 3400.03: Human Health and Sustainability
- ENV5 3501.03: Environmental Problem Solving I
- ENV5 3502.03: Environmental Problem Solving II: The Campus as a Living Laboratory

Faculty of Arts and Social Sciences (FASS):

- CTMP 3000.06: Science and Culture
- CTMP 3150.03: Nature and History
- CTMP 3210.03: Intersecting Bodies, Selves and Environments
- CTMP 3411.03: Studies in Contemporary Science and Technology
- EMSP 2310.03: Women and Gender in Early Modern Science
- EMSP 2330.03: Nature Imagined
- EMSP 3000.06: The Study of Nature in Early Modern Europe
- ENGL 4005.03: Green Reading: Nature, Culture, Canada
- ENGL 4400.03: Nature of America
- HSTC 3000.03: The Scientific Revolution
- HSTC 4000.06: Science and Nature in the Modern Period
- HSTC 4300.03: Nature and Romanticism
- HIST 3073.03: History of Marine Sciences
- HIST 3210/CANA 3020/GEOG 3210.03: Canadian Cultural Landscapes
- HIST 3302.03: Technology and History in North America
- HIST 3370.03: North American Landscapes
- HIST 3750.03: History of Seafaring
- HIST 4271.03: The Fisheries of Atlantic Canada - Society and Ecology in Historical Perspective
- HIST 4350.03: People and Things - Material Culture
- INTD 2001.03: Introduction to Development I
- INTD 2002.03: Introduction to Development II
- INTD 3002.03: Seminar in Development: Development Practice
- INTD 3114.03: Environment and Development
- INTD 3304.03: Sustainable Development in Cuba
- INTD 4013.03: Environmental Conflict & Security
- PHIL 2475.03: Justice in Global Perspective

Introduction

The European Studies program at Dalhousie is designed to guide students to a multidisciplinary understanding of contemporary Europe. It is not housed in any one department but is a combined effort of most departments in the Faculty of Arts and Social Sciences and the University of King's College. It encourages students to develop a broad perspective on Europe as seen through history and politics, literature and ideas, and the fine arts, with special emphasis placed on acquisition of language skills. There is an Honours program and a 120 credit hour Major. Because it is already a multidisciplinary program, European Studies cannot be combined with other subjects to form a combined honours degree.

For general information on Bachelor of Arts program requirements, visit the [College of Arts and Science](#) section of the Academic Calendar.

BA Honours in European Studies

Students must meet the faculty requirements for honours.

Year I

A full-time student takes 30 credit hours in the first year, meeting the distribution requirements of the BA. These courses include:

- 6 credit hours of writing requirement courses
- both HIST 1020.03: Europe:Before the French Revolution, and HIST 1021.03: Europe:French Revolution to the Present; or equivalent course(s) totaling 6 credit hours in a later year
- 6 credit hours of a language other than English
- 6 credit hours of social sciences courses
- 6 credit hours of natural science courses

Notes: Completion of the King's College Foundation Year Program satisfies the first-year requirements for European Studies, with the exception of the language course and the natural sciences course.

Some students may wish to take another "second language" course in the first year, and postpone one of the other courses until a later year.

Years II to IV

The program consists of a further 90 credit hours including the second year core course and an Honours project. The general requirements for the program are:

- Courses in two contemporary European languages other than English. One of these languages is studied up to 3000/4000 level (six credit hours each year). The minimum requirement for the other language is six credit hours at the first year level, though students are strongly encouraged to take advanced courses in both languages.
- 66-78 credit hours with significant European content. As this is a multidisciplinary program, no more than 30 credit hours above the 1000 level may be taken from one department. No fewer than 36 credit hours must be taken from two other departments. These may include courses from a language department to fulfill the language requirement, or one of the King's Honours programs. At least 18 credit hours must be at the 3000 level or above, taken in at least two different departments. Courses taken during a study abroad year will need to be counted in the above mix.
- EURO 2101.03, EURO 2102.03
- Students should seek advice from the European Studies Coordinator, who will strive to ensure that courses are included from each of the following areas:
 - History and Politics:
Approved ES courses in the departments of History, Political Science, Sociology and Social Anthropology, Economics, Commerce
 - Literature and Ideas:
Approved ES courses in the departments of Classics, English, French, German, Italian, Philosophy, Religious Studies, Russian Studies, Spanish
 - Fine Arts:
Approved ES courses in the Fountain School of Performing Arts (Cinema and Media Studies, Music, or Theatre)

Approved ES courses in Contemporary Studies, Early Modern History, and Gender and Women's Studies may fit one or more of these groupings. Please consult a European Studies advisor.

In conjunction with the Honours project a fourth year multidisciplinary seminar is required; EURO 4512.03 or an approved equivalent.

- A term of study in the honours program at a European university in a second-language environment. A summer work term in Europe is encouraged.

BA (120 credit hour) Major

Year I

A full-time student takes 30 credit hours in the first year, meeting the distribution requirements of the BA. These courses include:

1. 6 credit hours of writing requirement courses
2. both HIST 1020.03: Europe:Before the French Revolution, and HIST 1021.03: Europe:French Revolution to the Present; or equivalent course(s) totaling 6 credit hours in a later year
3. 6 credit hours of a language other than English
4. 6 credit hours of social sciences courses
5. 6 credit hours of natural science courses

Note: Completion of the King's College Foundation Year Program satisfies the first-year requirements for the European Studies 120 credit hour Major, with the exception of the language course and the natural science course.

Year II to IV

- After the first year, students take a minimum of 54 credit hours from the approved list of courses with significant European content.
- No more than 24 of these may be taken in any one department, and at least 30 must be taken in two other departments.
- At least 18 credit hours should be at the 3000 level or above, taken from at least two different departments.
- The 4000-level multidisciplinary seminar (EURO 4512.03) and the two second year core courses (EURO 2101.03 and EURO 2102.03) are also required.

Students should seek advice from the European Studies Coordinator, who will strive to ensure that courses are included from each of the following areas:

1. History and Politics:
Approved ES courses in the departments of History, Political Science, Sociology and Social Anthropology, Economics, Commerce
2. Literature and Ideas:
Approved ES courses in the departments of Classics, English, French, German, Italian, Philosophy, Religious Studies, Russian Studies, Spanish
3. Fine Arts:
Approved ES courses in Fountain School of Performing Arts (including Cinema and Media Studies, Music, and Theatre)

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

European Studies Approved Courses

Note: Students should note that some courses may have prerequisites or other departmental restrictions, and some courses may not be offered in every year.

Other courses, not on this list, may be appropriate. Please consult an ES Advisor.

Approved Courses

Classics

All courses

Religious Studies

- RELS 1002.03: Introduction to Western Religions
- RELS 1201.03: Gods, Heroes and Monsters: Ancient Mythology I

Course Descriptions

EURO 2101 Europe: Ideas, Culture and Society to 1900

CREDIT HOURS: 3

A multidisciplinary introduction to European Studies emphasizing the period to 1900. Classes look at the interconnecting themes among literature, the arts, philosophy and society in Europe.

PREREQUISITES: Completion of at least two first-year courses from FASS departments, or the King's Foundation Year Program.

FORMATS: Lecture | Discussion

EURO 2102 Europe: Ideas, Culture and Society from 1900 to the Present

CREDIT HOURS: 3

A multidisciplinary introduction to European Studies beginning in the 20th century. Classes look at the interconnecting themes among literature, the arts, philosophy and society in contemporary Europe.

PREREQUISITES: Completion of at least two first-year courses from FASS departments, or the King's Foundation Year Program. Completion of EURO 2101.03 will ideally precede registration for this course.

FORMATS: Lecture | Discussion

EURO 3999 Independent Study

CREDIT HOURS: 3

Individually directed research and writing, supervised by a faculty member. This course is taught only by special arrangement between individual students and individual instructors. Signature required.

PREREQUISITES: Restricted to 3rd year European Studies Advanced Majors and Honours students

EURO 4510 European Studies Seminar

CREDIT HOURS: 6

Discussion of readings and presentations on European Studies topics. The topics for the seminar vary each year. The course emphasizes a broad multidisciplinary perspective on European Studies.

EURO 4512 European Studies Seminar

CREDIT HOURS: 3

Discussion of readings and presentations on European Studies topics. The topics for the seminar vary each year. The course emphasizes a broad multidisciplinary perspective on European studies.

PREREQUISITES: Restricted to 4th year European Studies Honours and Advanced Major students

EXCLUSIONS: EURO 4510.06X/Y

FORMATS: Seminar

EURO 4801 Honours Essay in European Studies Pt. 1

CREDIT HOURS: 3

CALENDAR NOTES: Students taking this course must register in and complete EURO 4801.03 and EURO 4802.03 in consecutive terms; credit will not be granted if courses are not completed consecutively.

PREREQUISITES: Admission to the honours program

RESTRICTIONS: Honours Student in their final year of study

EXCLUSIONS: EURO 4800XY.06

EURO 4802 Honours Essay in European Studies Pt. 2

CREDIT HOURS: 3

CALENDAR NOTES: Students taking this course must register in and complete EURO 4801.03 and EURO 4802.03 in consecutive terms; credit will not be granted if courses are not completed consecutively.

PREREQUISITES: Admission to the honours program

RESTRICTIONS: Honours Student in final year of study

EXCLUSIONS: EURO 4800XY.06

Introduction

The Fountain School of Performing Arts brings together the former departments of Music and Theatre as a single academic unit.

Areas of study include Acting, Cinema and Media Studies, Composition, Costume Studies, Music Performance, Musicology, Popular Musics, Stage Design and Technical Theatre, and Theatre Studies. The Fountain School of Performing Arts supports a wide variety of cross-disciplinary initiatives including a high-profile visiting arts program and active outreach and mentoring programming.

For more information on academic programs, see the following Calendar sections:

Introduction

The Department of French offers students the possibility of studying the literature and culture of France, French Canada and the other countries and regions of the French-speaking world, as well as the linguistic structure and development of French.

Courses are available for beginners and for those with a background in the language who wish to improve and maintain any or all of the following skills: speaking, listening, reading, and writing. Other courses are specially designed for students who are interested in translation, or other areas of language study. The role of French in Canada and in the Maritimes is stressed in courses in Acadian and Québec literature and civilization. The literature of France and French-speaking nations is brought to life in courses organized around a theme, a genre, or an historical period.

The Department of French urges students to practise the language as much as possible. The French Club organizes activities including films, French meals, parties and plays in which all students may participate. Participation in immersion programs and individual student travel and study are encouraged. Please consult the Department for information and see below: [Studies in a Francophone Environment](#).

A BA degree in French with Honours, or with Honours in French and another allied subject, may lead the student to a career in education, translation or interpreting, or may provide the background for careers in many fields, including radio, television, new media, public service, tourism, law, social work, public relations, business, politics, diplomacy, journalism, and library and information science. Students considering French as a Minor in a BA, BSc or other degree program are invited to discuss the matter at any time (the earlier the better) with a departmental advisor. The focus is on the particular needs and aspirations of the individual. An Honours degree is normally required for access to graduate studies: MA and PhD degrees may be pursued in the Department (see the Calendar for [Faculty of Graduate Studies](#)).

The French Department offers a number of academic awards to students, including the Ruth Murray Scholarship, the French Department Scholarship, the Marcelle Cendres Sandhu Memorial Prize, the Sabah Metlej French Scholarship, the Prof. and Mrs. Robert Lloyd McIntosh Prize, the Prix de l'Alliance française, and Embassy and Consular book prizes. The Department encourages graduating students to apply for an eight month teaching assistantship in France, offered by the French Embassy.

Students may, with the approval of the Department of French, take up to one year of study at a University in a francophone environment and receive credit at Dalhousie. In particular, students may spend a semester or year of study abroad through our [Dijon](#)

[Study Abroad Program](#). Bursaries may be available for students selected to participate in a Dalhousie "Studies in a Francophone Environment" program.

The BA language requirement exemption test in French is given in the April examination period. Students should register at the Registrar's Office before mid January by completing an *Application for Exemption from the BA Language Requirement*. A copy of the form must be provided to the French Department. Please note that passing the BA language requirement exemption test does not give a course credit.

Degree Programs

In addition to the departmental requirements listed below, students must satisfy the requirements outlined in the [Degree Requirements](#) section.

Requirements for the four degree programs are set out in the following sections. Electives from other departments, when chosen with care, can enrich and enhance the major courses. Departmental Advisors can provide information on recommended electives. All Majors and Honours Students must consult with the Undergraduate Advisor.

Students interested in a degree in European Studies should consult the [European Studies](#) section.

Students interested in an emphasis or a combined degree in Canadian Studies should consult the [Canadian Studies](#) section.

Students interested in the Certificate of Intercultural Communication should consult the [Calendar entry](#).

Lee Men Chin, P., BA (Concordia), MA (Carleton), PhD (Dalhousie)

BA with Honours in French

This program offers systematic, comprehensive and individualized study of French language, literature, linguistics and other program elements both inside and outside the classroom. It is, therefore, an option which should be considered seriously by any student who,

with career or personal objectives in mind, wishes to obtain a strong background in French and by those who plan to teach or earn a graduate degree in French.

Honours students are strongly encouraged to enrich their learning experience by spending at least one term in a French-speaking area. Please consult the department for information on our Dijon study abroad program and exchange opportunities in Morocco.

Potential Honours applicants should consult the Department's Undergraduate Advisor, preferably during their second year of study, regarding the application procedure and relevant deadlines.

BA Concentrated Honours in French (120 credit hours)

54 to 66 credit hours in French*

(9-11 full credits)

2000 level French: 2047 & 2048.(06)

2201.03

2202.03

2020.03

3000 level French: 3021.03 *or* 3022.03

3047 & 3048.(06)

and six additional credit hours at the 3000 level

4000 level French: 4046.03

4017.03

and twelve additional credit hours at the 4000 level

Fall term Honours Seminar (French 4933)

Honours Essay

Honours Conversion

The Honours Conversion is an option for continued study open to anyone who has previously completed a BA (90 credit hours) program at Dalhousie. Normally, it consists of 30 credit hours of course work plus six additional credit hours: either an honours essay or an oral interview based on course work and /or a specific topic. Requirements for the Honours Conversion are similar to those for the concentrated Honours Program, but will vary according to individual circumstances.

120 credit hour degrees may also be converted to Honours degrees; please consult the departmental Undergraduate Advisor.

BA or BSc Combined Honours

Students must meet the [Faculty degree requirements](#) which include 30 to 48 credit hours in French for a total of 66 to 84 credit hours in French and another subject. Minimum requirements for the Combined Honours program are as follows:

- FREN 2045.06: Intensive Grammar or FREN 2047.03 and FREN 2048.03
- FREN 2201.03 and FREN 2202.03: Introduction to French Literature
- FREN 3045.06: Written Expression or FREN 3047.03 and FREN 3048.03
- FREN 4017.03: General Translation and FREN 4046.03: Advanced Composition
- plus a minimum of six credit hours in language, literature, culture or linguistics at the 3000 or 4000 level.

Also, when French is the primary subject:

- FREN 4933.00: Honours Seminar and an additional credit; either an Honours Essay or an Oral Presentation (see document entitled "French Honours Qualifying Examination" available from the Undergraduate Advisor or the departmental secretary).

BA (120 credit hour) Major in French

Students must meet the [Faculty degree requirements](#) which include 36 to 54 credit hours in French above the 1000 level, including 18 credit hours above the 2000 level; within these 36 to 54 credit hours, they must take the following:

Departmental requirements

2000 level (12 credits)

- FREN 2045.06: Intensive Grammar or FREN 2047.03 and FREN 2048.03

At least six additional 2000 level credit hours from:

- FREN 2201.03: and FREN 2202.03: Introduction to French Literature (prerequisites for 3000-level literature courses)
- FREN 2020.03: Introduction to Linguistics (prerequisite for 3000-level linguistics courses)

Please note: Both 2201.03 and 2202.03, or permission of the instructor, are required to register in any 3000-level literature course.

3000 level (12 credits)

- FREN 3045.06: Written Expression or FREN 3047.03 and FREN 3048.03
- Six credit hours at the 3000 level in French

4000 level (12 credits)

- FREN 4017.03: General Translation and FREN 4046.03: Advanced Composition
- Six credit hours at the 4000 level in French

PLEASE NOTE: Students with proper standing wishing to change to an Honours Program may do so, in which case they must take FREN 2020.03 and FREN 3021.03 or FREN 3022.03 (required for Honours), and consult the Chair or the Undergraduate Advisor.

BA or BSc (120 credit hour) Double Major in French

Students must meet the Faculty degree requirements which include 30 to 48 credit hours in French.

Departmental requirements include:

2000 level (12 credits)

- FREN 2045.06: Intensive Grammar or FREN 2047.03 and FREN 2048.03

At least six additional credits from:

- FREN 2201.03: Introduction to French Literature I and FREN 2202.03: Introduction to French Literature (prerequisite for 3000-level literature courses)
- FREN 2020.03: Introduction to Linguistics (prerequisite for 3000-level linguistics courses)

Please note: Both 2201.03 and 2202.03, or permission of the instructor, are required to register in any 3000-level literature course.

3000/4000 level (18 credits)

- FREN 3045.06: Written Expression or FREN 3047.03 and FREN 3048.03
- Nine additional credit hours at the 3000-4000 level, including at least three credit hours at the 4000 level

Students must have a combined total of 60 - 84 credit hours in two allied subjects.

BA (90 credit hour) Minors in French [Minor in French](#)

1. [Minor in French Literature and Culture](#)
2. [Minor in French: Linguistics and Translation](#)

Minor in French

Minor in French: Linguistics and Translation

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A minimum of 18 to a maximum of 27 credit hours beyond the 1000-level, including:

- FREN 2020.03: Introduction à la linguistique/Introduction to Linguistics OR FREN 2075.03: Introduction to Linguistics
- and any 15 credit hours from the following:
 - FREN 3017.03: Linguistique différentielle/Differential Linguistics
 - FREN 3021.03: Syntaxe/Syntax
 - FREN 3022.03: Sémantique/Semantics
 - FREN 3026.03: Le français québécois/Québec French
 - FREN 4011.03: Lexicologie/Lexicology
 - FREN 4013.03: Pragmatique/Pragmatics
 - FREN 4014.03: Langue et société/ Language and Society
 - FREN 4017.03: Traduction générale/General Translation

Contact [French](#) for more information.

Studies in a Francophone Environment

Study Abroad Program in Dijon, France

Students at all levels of proficiency in French have the opportunity of spending a winter term (or full year) at the CIEF (Centre International d'Études Françaises) on the Université de Bourgogne campus in Dijon, which is located about 300 km southeast of Paris.

Students will register for courses via letter of permission and will receive grades on a Pass/Fail basis. The courses will be noted on the student's academic record as transfer credits.

Upon arrival at the CIEF, students are placed in the appropriate proficiency level, which corresponds to first, second or third year transfer credits at Dalhousie. Students will receive 15 credit hours per term.

In addition to compulsory language courses, the CIEF offers courses in French literature, civilization, history, art history, music, economics, political science, philosophy, and more.

Study Work International Fund (SWIF) funding up to \$2,000 may be available through the International Centre.

An information session is held in November of each year, with applications due early in the new year. For information, consult the website at dal.ca/dijon or contact french@dal.ca or 902 494-2430.

Study Abroad Program in Agadir, Morocco

Students with intermediate or higher-level French skills have the opportunity of spending up to one full academic year at Ibn Zohr University in Agadir, Morocco.

Students will register for courses via letter of permission and will receive grades on a Pass/Fail basis. The courses will be noted on the student's academic record as transfer credits.

In addition to French language and grammar courses, participating students will be able to enrol in classes in a wide range of disciplines (Finance, Management, Humanities, etc.).

Study Work International Fund (SWIF) funding up to \$2,000 may be available through the International Centre.

An information session is held in the fall term of each year, with applications due early in the new year. For information, consult the website at dal.ca/french or contact french@dal.ca or 902 494-2430.

Language and Culture in the Francophone World - Field Course in Saint-Pierre and Miquelon

Students with intermediate or higher-level French skills may participate in an intensive three-week program in the French Territorial Collectivity of Saint-Pierre and Miquelon, located just off the coast of Newfoundland. This field course is normally offered in April/May. Students will stay with host families and attend daily classes, as well as participate in sociocultural activities and excursions organized in collaboration with the Francoforum, a French language and culture institute on the island of Saint-Pierre. Emphasis will be on development of intermediate and advanced oral and aural skills. As well as studying the language, culture and history of Saint-Pierre and Miquelon, students will complete an extended experiential learning project involving close working contact with elements of the local community.

Students will receive 6 Dalhousie credits for successful completion of the course.

Go Beyond Borders bursaries of up to \$1500, along with other funding opportunities, may be available through the International Centre.

Applications are due at the end of January for departure in April of the same year. For information, consult the website at dal.ca/french or contact french@dal.ca or 902 494-2430.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

Notes

PLACEMENT TEST: All students taking their first French course at Dalhousie are required to take the French Placement Test prior to selecting their first French course. The test is available online at <http://www.dal.ca/frenchtest>.

Some courses are offered in English, including FREN 1004X/Y.06 which satisfies the Bachelor of Arts Language requirement. Other courses taught in English, that do not satisfy this degree requirement, are FREN 1100.03, FREN 1200.03, FREN 2060.03, FREN 2075.03, FREN 2275.03, FREN 2666.03, FREN 2800.03, FREN 2801.03, FREN 3125.03, FREN 3175.03, FREN 4016.06. Not all courses are given every year.

Most courses above the 1000 level are given entirely in French. Exceptions: FREN 2060.03, FREN 2075.03, FREN 2666.03, FREN 2800.03, FREN 2801.03, FREN 3125.03, FREN 3175.03, FREN 4016.06 (These courses do not satisfy the French degree program requirements or the Faculty of Arts Language requirement.)

Course Descriptions

FREN 1004 Pratique de la lecture/French for Reading

CREDIT HOURS: 6

This course develops the ability to read contemporary French prose with ease and accuracy. Emphasis is on the acquisition of skills that facilitate reading. Classroom work involves a grammar review, study and discussion of a wide variety of readings, reading comprehension, as well as correction of prepared translations and sight translations (from French to English only). FREN 1004.06 is given in English and is not, by itself, suitable for students who plan to major in French. It may, however, be taken by those with no prior training in French or as an additional first-year option for those taking FREN 1007.03/FREN 1008.03 or FREN 1045X/Y.06. This course also satisfies the Bachelor of Arts Language Requirement.

CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

PREREQUISITES: Online French Placement Test (dal.ca/frenchtest)

EXCLUSIONS: FREN 1060.06

FREN 1005 Français fondamental/Basic French

CREDIT HOURS: 6

For students with little or no previous background in French, for example students with grade 8-11 core French (online Placement Test required: www.dal.ca/frenchtest). This course presents the basic components of French grammar with an emphasis on simple sentence types, and develops all four language skills: speaking & writing, and listening & reading comprehension. It also provides an introduction to Francophone culture worldwide. This course is normally followed by FREN 1045.06 or 1047.03 (for students who have achieved a final grade of B+ or above), or FREN 2005.06 for students who do not wish to major in French. This course satisfies the Bachelor of Arts Language Requirement.

PREREQUISITES: Online Placement Test required: dal.ca/frenchtest

EXCLUSIONS: FREN 1000.06, 1006.06, 1050.06, 1007.03, 1008.03

FORMATS: Lecture

FREN 1007 Français fondamental/Basic French, Part 1

CREDIT HOURS: 3

For students with little or no previous background in French, for example students with grade 8-11 core French (online Placement Test required: www.dal.ca/frenchtest). This course presents the basic components of French grammar with an emphasis on simple sentence types, and develops all four language skills: speaking & writing, and listening & reading comprehension. It also provides an introduction to Francophone culture worldwide. This course is followed by FREN 1008 and satisfies the Bachelor of Arts Language Requirement.

CALENDAR NOTES: Students wishing to continue to Intermediate French (FREN 1045), or to use this course toward satisfying the BA language requirement, must complete both FREN 1007 and FREN 1008.

PREREQUISITES: Online Placement Test required (dal.ca/frenchtest)

EXCLUSIONS: FREN 1000X/Y.06, FREN 1005 X/Y.06, FREN1006X/Y.06

FORMATS: Lecture

FREN 1008 Français fondamental II/Basic French II

CREDIT HOURS: 3

For students with little or no previous background in French, for example students with grade 8-11 core French (online Placement Test required: www.dal.ca/frenchtest). This course presents the basic components of French grammar with an emphasis on simple sentence types, and develops all four language skills: speaking & writing, and listening & reading comprehension. It also provides an introduction to Francophone culture worldwide. This course is normally followed by FREN 1045.06 (for students who have achieved a final grade of B+ or above), or FREN 2005 for students who do not wish to major in French. This course satisfies the Bachelor of Arts Language Requirement.

CALENDAR NOTES: Students wishing to continue to Intermediate French (FREN 1045), or to use this course toward satisfying the BA language requirement, must complete both FREN 1007 and FREN 1008.

PREREQUISITES: FREN 1007.03

EXCLUSIONS: FREN 1000X/Y.06, FREN 1005 X/Y.06, FREN1006X/Y.06

FORMATS: Lecture

FREN 1031 Pratique de la lecture I/French for Reading I

CREDIT HOURS: 3

This course develops the ability to read contemporary French prose with ease and accuracy. Emphasis is on the acquisition of skills that facilitate reading. Classroom work involves a grammar review, study and discussion of a wide variety of readings, reading comprehension, as well as correction of prepared translations and sight translations (from French to English only). FREN 1031.03 is given in English and is not, by itself, suitable for students who plan to major in French. It may, however, be taken by those with no prior training in French or as an additional first-year option for those taking FREN1005.06 OR FREN 1007.03/FREN 1008.03. This course also satisfies the Bachelor of Arts Language Requirement when taken together with FREN 1032.03.

PREREQUISITES: Online French Placement Test (dal.ca/frenchtest)

EXCLUSIONS: FREN 1060.06, FREN 1004.06

FORMATS: Lecture

FREN 1032 Pratique de la lecture II/French for Reading II

CREDIT HOURS: 3

This course is the continuation of FREN 1031.03 and further develops the ability to read contemporary French prose with ease and accuracy. It also satisfies the Bachelor of Arts Language Requirement when taken together with FREN 1031.03.

PREREQUISITES: FREN 1031.03

EXCLUSIONS: FREN 1060.06, FREN 1004.06

FORMATS: Lecture

FREN 1045 Français intermédiaire/Intermediate French

CREDIT HOURS: 6

For students with some background in French, for example grade 11-12 core French (online Placement Test required: www.dal.ca/frenchtest), or follows FREN 1005 (for students who have achieved a final grade of B+ or above) or FREN 1007.03/FREN 1008.03 (final grade of B+ or above in FREN 1008). Focusing on the study of more advanced grammatical structures with an introduction to grammatical analysis, this course also aims to further develop the four language skills: listening, reading, writing and speaking. Selected readings will lead to the application of structures being studied and to vocabulary enrichment. A final grade of B or above in this course leads to all second-year French courses. This course satisfies the Bachelor of Arts Language Requirement and is normally followed by FREN 2045.03 (or FREN 2047.03 and FREN 2048.03) or FREN 2021.03 and FREN 2022.03.

CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

PREREQUISITES: Online Placement Test qualifying result (www.dal.ca/frenchtest). Students who have taken FREN 1007/FREN 1008 (final grade B+ or above in FREN 1008), or FREN 2005, may also take this course.

EXCLUSIONS: FREN 1050X/Y.06

FORMATS: Lecture

FREN 1047 Français intermédiaire I/Intermediate French I

CREDIT HOURS: 3

For students with some background in French, for example grade 11-12 core French (online Placement Test required: www.dal.ca/frenchtest), or to be taken following FREN 1007.03/FREN 1008.03 (final grade of B+ or above in FREN 1008). Focusing on grammatical structures, this course also aims to further develop the four language skills: listening, reading, writing, and speaking. Selected readings will lead to the application of structures being studied and to vocabulary enrichment. This course is followed by FREN 1048.03.

CALENDAR NOTES: Students must complete both FREN 1047 and FREN 1048 to satisfy the BA Language requirement, and/or continue to Advanced French (FREN 2047.03/2048.03).

PREREQUISITES: Online Placement Test qualifying result (www.dal.ca/frenchtest). Students who have taken FREN 1007/1008 (final grade B+ or above) may also take this course.

EXCLUSIONS: FREN 1050X/Y.06; FREN 1057.03; FREN 1058.03; 1045X/Y.06; FREN 1057.03; FREN 1058.03

FORMATS: Lecture

FREN 1048 Français intermédiaire II/Intermediate French II

CREDIT HOURS: 3

This course follows FREN 1047 and continues the study of grammatical structures, while also aiming to further develop the four language skills: listening, reading, writing, and speaking. Selected readings will lead to the application of structures being studied and to vocabulary enrichment.

CALENDAR NOTES: Students must complete both FREN 1047 and FREN 1048 to satisfy the BA Language requirement, and/or continue to Advanced French (FREN 2047/2048). A final grade of B or above leads to all second-year French courses.

PREREQUISITES: FREN 1047.03 or instructor's permission.

EXCLUSIONS: FREN 1050X/Y.06; FREN 1057.03; FREN 1058.03; 1045X/Y.06; FREN 1057.03; FREN 1058.03

FORMATS: Lecture

FREN 1057 Français pour anciens étudiants des programmes d'immersion I/French for Former Immersion Students I

CREDIT HOURS: 3

For students who have completed French Immersion to Grade 12 (online Placement Test required: www.dal.ca/frenchtest). Focusing on the study of grammatical structures, this course also aims to further develop the four language skills: listening, reading, writing, and speaking. Selected readings will lead to the application of the structures being studied and to vocabulary enrichment. This course will enable immersion graduates to build on their strengths while working to eliminate ingrained errors. This course is followed by FREN 1058.03.

CALENDAR NOTES: Students must complete both FREN 1057 and FREN 1058 to satisfy the BA Language requirement, and/or continue to Advanced French (FREN 2047.03/FREN 2048.03).

PREREQUISITES: Online Placement Test required: dal.ca/frenchtest

EXCLUSIONS: FREN 1005X/Y.06, FREN 1007.03/FREN 1008.03, FREN 1045X/Y.06, FREN 1047.03; FREN 1048.03; FREN 1050XY.06

FORMATS: Lecture

FREN 1058 Français pour anciens étudiants des programmes d'immersion II/French for Former Immersion Students II

CREDIT HOURS: 3

This course follows FREN 1057.03 and continues the study of advanced grammatical structures. It also aims to further develop the four language skills: listening, reading, writing, and speaking. Selected readings will lead to the application of the structures being studied and to vocabulary enrichment. This course will enable immersion graduates to build on their strengths while working to eliminate ingrained errors. A final grade of B or above leads to all second-year French courses.

CALENDAR NOTES: Students must complete both FREN 1057 and FREN 1058 to satisfy the BA Language requirement, and/or continue to Advanced French (FREN 2047.03/FREN 2048.03).

PREREQUISITES: FREN 1057.03 or instructor's permission

EXCLUSIONS: FREN 1005X/Y.06, FREN 1007.03/FREN 1008.03, FREN 1045X/Y.06, FREN 1047.03; FREN 1048.03; FREN 1050X/Y.06

FORMATS: Lecture

FREN 1100 France, Canada and the Francophone World: Perspectives on Culture and Identity I.

CREDIT HOURS: 3

This class, taught in English, is writing-intensive and may be combined with FR 1200 to fulfill the university's Writing Requirement. While its focus and balance may vary from year to year, it aims to treat a range of themes of common interest between France, Canada and the French-speaking world. Using a variety of resources that may include films, literary texts, the graphic novel (bande dessinée), journalistic and scholarly articles, essays, and theoretical texts of various kinds, we will explore a variety of perspectives from a range of historical periods and geographical-cultural locations. The focus will be on contemporary relevance and the comparative perspective will always be a critical one aimed at finding points of useful comparison with respect to the most urgent contemporary debates, many of which have as their focus culture and identity. Some likely themes include: representations of immigration and refugees in current cinema; models of social and cultural diversity- Canadian multiculturalism, Québec interculturalism and French laïcité; the role of France and/or Canada in the world as seen in recent literary, paraliterary and cinematic works; etc.

CALENDAR NOTES: This course does not satisfy the French degree program requirements. French Majors and Honours students may take this course as an elective.

FORMATS: Lecture

FREN 1200 France, Canada and the Francophone World: Perspectives of Culture and Identity II.

CREDIT HOURS: 3

This class, taught in English, is writing-intensive and may be combined with FR 1100 to fulfill the university's Writing Requirement. While its focus and balance may vary from year to year, it builds on the work of FR 1100 and aims to treat a range of themes of common interest between France, Canada and the French-speaking world. Using a variety of resources that may include films, literary texts, the graphic novel (bande dessinée), journalistic and scholarly articles, essays, and theoretical texts of various kinds, we will explore a variety of perspectives from a range of historical periods and geographical-cultural locations. The focus will be on contemporary relevance and the comparative perspective will always be a critical one aimed at finding points of useful comparison with respect to the most urgent contemporary debates, many of which have as their focus culture and identity. Some likely themes include: representations of immigration and refugees in current cinema; models of social and cultural diversity--Canadian multiculturalism, Québec interculturalism and French laïcité; the role of France and/or Canada in the world as seen in recent literary, paraliterary and cinematic works; etc.

FORMATS: Lecture | Tutorial

FREN 1994 Independent Study

CREDIT HOURS: 3

This course is normally restricted to students preparing to study abroad in the winter term.

FREN 1995 Independent Study

CREDIT HOURS: 3

CALENDAR NOTES: This course requires departmental approval.

RESTRICTIONS: Signature required.

FORMATS: Lecture

FREN 2002 Le français oral/Spoken French

CREDIT HOURS: 3

In this course, students will develop their ability to express themselves orally in French. The course will emphasize the use of idiomatic and socio-culturally appropriate vocabulary and structures for a variety of communication purposes. Audio-visual and electronic resources, as well as interactive technology, may be integrated into course material.

PREREQUISITES: FREN 1045X/Y.06, or 1050X/Y.06, or FREN 1047.03 and FREN 1048.03, or FREN 1057.03 and FREN 1058.03, or FREN 2005X/Y.06 or 2000-level Placement Test result, or instructor's permission

FORMATS: Lecture | Discussion

FREN 2005 Français pratique pour non-spécialistes/Practical French for Non-Majors

CREDIT HOURS: 6

This course follows French 1005 and is designed for students who do not wish to major in French but who would like to maintain and improve their general knowledge of French language and Francophone culture. Along with further training in basic grammatical structures, the course focuses on the practical and accurate use of French to further develop communication skills. Based on authentic audiovisual and multimedia material (films, commercials, documentaries, etc.), activities will aim at vocabulary enrichment, oral comprehension and expression development and will focus mainly on contemporary and daily life topics in a Canadian context. Successful completion of this course (final grade of B or above) leads to second year courses such as FREN 2002.03 or FREN 2021.03/2022.03 for Non-Majors, or to FREN 1045.06 for students who subsequently decide to major in French. This course does not count towards a Major or Minor in French.

PREREQUISITES: FREN 1007.03 and FREN 1008.03 (final grade of B or above) or instructor's permission

FORMATS: Lecture | Discussion

FREN 2020 Introduction à la linguistique/Introduction to Linguistics

CREDIT HOURS: 3

Linguistics is the science of language. This course is designed to serve as an introduction to basic concepts in linguistics. The various subfields of linguistics will be introduced with a focus on the core areas of linguistics: phonetics, phonology, morphology, syntax, and semantics. Students will learn about the structure of language at different levels of organization: phonemes, syllables, words, phrases, and sentences.

PREREQUISITES: FREN 1045X/Y.06 or 1050X/Y.06, or FREN 1047.03 and FREN 1048.03, or FREN 1057.03 and FREN 1058.03, or 2000-level Placement Test result or instructor's permission

EXCLUSIONS: FREN 3020.06

FORMATS: Lecture

FREN 2021 Langue et culture/Language and Culture

CREDIT HOURS: 3

Normally follows FREN 1045X/Y.06 or 1050X/Y.06, and is taken in the second year of study. This course provides the opportunity to practise and improve language skills (vocabulary and grammar) already acquired. Each year sections offer topics from the options listed below. Each section focuses upon a broad cultural topic via which language skills are developed. No prior knowledge of the topic is supposed. Various readings lead to discussions and oral presentations. Descriptions for sections offered in a specific year may be obtained in April from the Department. All classes and assignments are entirely in French. A maximum of two sections may be taken under the class designation of FREN 2021.03 and 2022.02. Approved in part with Canadian Studies (topic 7 and 15), IDS (topic 3), and Film Studies (topic 13). Topic 01: Le journalisme: I. Oore; Topic 02: La société française à travers la littérature; Topic 03: La civilisation francophone de l'Afrique occidentale et des Antilles; Topic 04: Etudes acadiennes; Topic 05: Monuments culturels de Paris; Topic 06: La France et ses photographes; Topic 07: Québécois et Québécoises célèbres; Topic 08: Contes et légendes; Topic 09: Nature et culture: C. Elson; Topic 10: L'Art en France depuis la Révolution; Topic 11: Voyages culturels à travers la France; Topic 12: Le roman policier: V. Frigerio; Topic 13: Aspects du cinéma français et francophone: C. Elson; Topic 14: Faim et festin: I. BlackTopic; Topic 15: Communication et compétence interculturelle; Topic 16 Francophonie et civilisation marocaine: D. Aissaoui

PREREQUISITES: FREN 1045X/Y.06 or FREN 1050X/Y.06, or FREN 1047.03 and FREN 1048.03, or FREN 1057.03 and FREN 1058.03, or 2000-level Placement Test result, or instructor's permission

CROSSLISTED: CANA 2021.03. Please note that the cross-listing with Canadian Studies depends on the topic of the course. Please check with instructor.

FORMATS: Lecture

FREN 2022 Langue et culture/Language and Culture

CREDIT HOURS: 3

Normally follows FREN 1045X/Y.06 or FREN 1050X/Y.06. This course provides the opportunity to practise and improve language skills (vocabulary and grammar) already acquired. Each year sections offer topics from the options listed under FREN 2021.03. Each section focuses upon a broad cultural topic via which language skills are developed. No prior knowledge of the topic is supposed. Various readings lead to discussions and oral presentations. Descriptions for sections offered in a specific year may be obtained in April from the Department. All courses and assignments are entirely in French. A maximum of two sections may be taken under the course designation of FREN 2021.03 and FREN 2022.03. For possible topics, see FREN 2021.03. Approved in part with Canadian Studies (topic 7), Film Studies (topic 13) and IDS (topic 3).

PREREQUISITES: FREN 1045X/Y.06 or FREN 1050X/Y.06 or FREN 1047.03 and FREN 1048.03, or FREN 1057.03 and FREN 1058.03 or FREN 2005X/Y.06 or 2000-level Placement Test result, or instructor's permission

CROSSLISTED: CANA 2022.03 NOTE: The cross-listing with Canadian Studies depends on the topic of the course. Please check with your instructor to see if course is cross-listed for the current year.

FORMATS: Lecture

FREN 2025 Morphologie/Morphology

CREDIT HOURS: 3

The course builds upon elements of morphology introduced in FREN 2020 (Introduction to Linguistics). It focuses on the place of morphology in the general linguistic theory and on formal modeling of morphological phenomena in several languages, in particular French.

PREREQUISITES: FREN 2020.03 or FREN 3020.03 or equivalent

FORMATS: Lecture

FREN 2032 Phonologie/Phonology

CREDIT HOURS: 3

Using varied texts and recordings, this course studies the basic sounds (phonemes) of French, and the essential non-phonemic features of the language (rhythm, stress, intonation, etc.). It helps students master French phonemes, understand the role of non-phonemic features in oral communication and use the latter to develop self-expression and audio comprehension.

PREREQUISITES: FREN 1045X/Y.06 or FREN 1050X/Y.06, or FREN 1047.03 and FREN 1048.03, or FREN 1057.03 and FREN 1058.03, or 2000-level Placement Test result, or instructor's permission

FORMATS: Lecture | Lab

FREN 2045 Advanced French/Français niveau avancé

CREDIT HOURS: 6

This course develops a more advanced knowledge of French. A detailed study of grammar through an in-depth analysis of all components of simple, complex and marked sentences leading to paragraph and text analysis. Emphasis is placed on the correspondence between grammatical content and meaning. Various grammar, writing and translation exercises will aim at developing the ability to communicate in clear, accurate written French. This class normally follows FREN 1045/FREN 1050, and is normally followed by FREN 3045 or FREN 3047.03 and FREN 3048.03.

CALENDAR NOTES: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

PREREQUISITES: FREN 1045X/Y.06 (final grade of B or above), FREN 1050X/Y.06 (final grade of B or above), or FREN 1047.03 and FREN 1048.03, or FREN 1057.03 and FREN 1058.03, or 2000-level Placement Test result

EXCLUSIONS: FREN 2047.03 and FREN 2048.03

FORMATS: Lecture

FREN 2047 Français niveau avancé I/Advanced French I

CREDIT HOURS: 0.03

This course develops a more advanced knowledge of French. It offers a detailed study of grammar through an in-depth analysis of all components of simple, complex, and marked sentences leading to paragraph and text analysis. Various grammar, writing, and translation exercises will aim at developing the ability to communicate in clear, accurate written French. This course is followed by FREN 2048.03.

CALENDAR NOTES: Students must complete both FREN 2047 and FREN 2048 to satisfy the degree requirements for a Major or Minor in French.

PREREQUISITES: FREN 1045X/Y.06 or FREN 1048.03 (final grade of B or above), FREN 1050X/Y.06 or FREN 1058.03 (final grade of B or above), or 2000-level Placement Test result

EXCLUSIONS: FREN 2045X/Y.06

FORMATS: Lecture

FREN 2048 Français niveau avancé II/Advanced French II

CREDIT HOURS: 0.03

This course follows FREN 2047.03 and continues the detailed study of grammar through an in-depth analysis of all components of simple, complex and marked sentences leading to paragraph and text analysis. Various grammar, writing and translation exercises will aim at developing the ability to communicate in clear, accurate written French. This course is normally followed by FREN 3047.03/FREN 3048.03.

CALENDAR NOTES: Students must complete both FREN 2047 and FREN 2048 to satisfy the degree requirements for a Major or Minor in French.

PREREQUISITES: FREN 1045X/Y.06 or FREN 1047.03 and 1048.03 (final grade of B or above), FREN 1050X/Y.06 or FREN 1057.03 and 1058.03 (final grade of B or above), or 2000-level Placement Test result

EXCLUSIONS: FREN 2045X/Y.06

FORMATS: Lecture

FREN 2070 Le français des affaires I/French for Business I

CREDIT HOURS: 3

This course aims to introduce the basic elements of business and administrative French. While developing oral, reading and writing skills through the use of authentic economic and business documents, students will master vocabulary specific to the workplace. This course is normally followed by FREN 3070 (French for Business II)

PREREQUISITES: FREN 1045.03 or FREN 1050.03 or FREN 1047.03 and FREN 1048.03, or FREN 1057.03 and FREN 1058.03 or 2000-level placement test or instructor's permission

RESTRICTIONS: Must be taken before FREN 3070

EXCLUSIONS: FREN 3030X/Y

FORMATS: Lecture | Discussion

FREN 2075 Introduction to Linguistics

CREDIT HOURS: 3

Taught in English, the course focuses on core theories and methods of linguistics and its principal subfields: phonology, morphology, syntax, semantics, pragmatics and sociolinguistics. Open to first year students.

CALENDAR NOTES: This course does not satisfy the French degree program requirements. French Majors and Honours students may take this course as an elective.

PREREQUISITES: None

FORMATS: Lecture

FREN 2201 Introduction à la littérature, du Moyen Âge au XVIIIe siècle /Introduction to French Literature, Middle Ages to 18th Century

CREDIT HOURS: 3

A survey of literature in French from the Middle Ages to the 18th Century, presenting selected works of prose, poetry and theatre from France. Introduction to general notions of literary history and to the basic techniques involved in reading literary texts. Attention is paid to the development of both oral and written expression of ideas. FREN 2201.03 and FREN 2202.03 may be taken in either order. Classes involve group discussions and lectures.

PREREQUISITES: FREN 1045X/Y.06 or FREN 1050X/Y.06, or FREN 1047.03 and FREN 1048.03, or FREN 1057.03 and FREN 1058.03, or 2000-level Placement Test result.

FORMATS: Lecture

FREN 2202 Introduction à la littérature, du XIXe au XXIe siècle/Introduction to French Literature, 19th to 21st Century

CREDIT HOURS: 3

A survey of literature in French from the 19th to the 21st Century, presenting selected works of prose, poetry and theatre from France, and possibly also from Québec, Acadia and other francophone areas. Introduction to general notions of literary history and to the basic techniques involved in reading literary texts. Attention is paid to the development of both oral and written expression of ideas. FREN 2201.03 and FREN 2202.03 may be taken consecutively but this is not obligatory. Classes involve group discussions and lectures

PREREQUISITES: FREN 1045X/Y.06 or FREN 1050X/Y.06, or FREN 1047.03 and FREN 1048.03, or FREN 1057.03 and 1058.03, or 2000-level Placement Test result.

FREN 2275 French Literature in Translation: The Novel/Littérature française: le cas du roman en traduction anglaise

CREDIT HOURS: 3

Given in English, with no prior knowledge of French required, this course will study key fictional works representative of different historical periods and the changing form of the novel. Approximately seven to eight works from a selection of the following authors will be studied: Chretien de Troyes, Marguerite de Navarre, Madame de Lafayette, Rousseau, Laclos, Balzac, Flaubert, Stendhal, Proust, Colette, De Beauvoir, Duras. The selection of authors and works may vary from year to year, but the “survey” nature of the course will be maintained.

CALENDAR NOTES: This course does not satisfy the French degree program requirements. French Majors and Honours students may take this course as an elective.

FORMATS: Lecture | Seminar

FREN 2666 The End of the World, from 'Apocalypse' to 'Zombies'

CREDIT HOURS: 3

Given in English, with no prior knowledge of French required, this course is an introduction to the 'End of the World' (the end of Mankind / of the Earth / of the whole Universe) as a topic or as an archetype in a selection of narratives ranging from religious and prophetic writings to modern 'apocalyptic and post-apocalyptic fiction'. The survey will be both chronological (from pre-biblical writings to 21st c. cinema) and thematic (destruction and renewals, chronologies and predictions, war and famine, death and the undead).

CALENDAR NOTES: This course does not satisfy the French degree program requirements. French Majors and Honours students may take this course as an elective.

FORMATS: Lecture

FREN 2800 Cinema: The French Phenomenon I From the Lumière Brothers to the New Wave

CREDIT HOURS: 3

Given in **English**, with no knowledge of French required, this course traces the history of French film from its beginnings, through its “classic” period, to the movements and authors of the 1950’s and 60’s New Wave in French cinema. The social and broad cultural dimensions of the French and Francophone film world will be explored, as will its rich and changing aesthetic and theoretical implications. Lectures will blend with open discussion periods based on selected readings and viewings. Directors and scriptwriters whose work will be discussed include Renoir, Prévert, Bresson, Resnais, Duras, Godard, Robbe-Grillet, Varda, Bunuel, Truffaut, Malle, Rohmer, Chabrol. Actors as varied in technique as Arletty, Gabin, Belmondo, etc. will draw attention.

CALENDAR NOTES: Film Studies minor specialists should consult program requirements. This course *does not* satisfy the French degree program requirements. French Majors and Honours students may take this course as an elective.

FORMATS: Lecture | Discussion

FREN 2801 Cinema: The French Phenomenon II From the New Wave to the New Millennium

CREDIT HOURS: 3

Given in **English**, with no knowledge of French required, this course traces the history of French film from the author-based cinema of the New Wave period (1950’s and 60’s France) right up to contemporary developments in France and the contemporary Francophone world at large: Québec, the Maghreb, West Africa, Acadia, Belgium, the Antilles, etc. As with FREN 2800.03, this course will consider the social and broad cultural dimensions of the French and Francophone film world and its rich and changing aesthetic and theoretical implications. Lectures will blend with open discussion periods based on selected readings and viewings. Directors and scriptwriters whose work will be discussed include Godard, Robbe-Grillet, Varda, Truffaut, Malle, Rohmer, Chabrol, Besson, Tavernier, Jutra, Chiasson, Perreault, Arcand, etc. Actors as varied in technique as Deneuve, Depardieu, Dauteuil, etc. will draw attention.

Consideration will be given to the documentary tradition, particularly its manifestations in French Canada.

CALENDAR NOTES: Film Studies minor specialists should consult program requirements. This course *does not* satisfy the French degree program requirements. French Majors and Honours students may take this course as an elective.
FORMATS: Lecture | Discussion

FREN 2994 Independent Study

CREDIT HOURS: 3

This course is normally restricted to students preparing to study abroad in the winter term.

FREN 3000 Cours supérieur de français oral/ Advanced Oral French Workshop

CREDIT HOURS: 3

Class discussions and oral presentations based on themes of contemporary concern. This course is intended to build vocabulary, perfect facility of expression (fluency) and style. Reading and research are necessary for the oral presentations.

PREREQUISITES: FREN 2002.03 or instructor's permission

FORMATS: Lecture | Discussion

FREN 3017 Linguistique différentielle/Differential Linguistics

CREDIT HOURS: 3

A contrastive comparison of English and French from a syntactic, lexical, semantic and stylistic point of view, intended to help students acquire the skills necessary to identify and correct acquisition errors stemming from the influence of one language on the other. The course will raise students' awareness of the specificity of each language, and deepen their understanding of the practical functioning of both English and French.

PREREQUISITES: FREN 2020.03, or FREN 2075.03, or FREN 2045.06, or FREN 2047.03 and FREN 2048.03

FORMATS: Lecture

FREN 3021 Syntaxe/Syntax

CREDIT HOURS: 3

Syntax is a linguistic discipline focusing on sentence structures i.e., on how words are organized linearly and hierarchically together in order to form larger units: phrases, sentences. Some theoretical frameworks have been defined which propose sets of principles/(meta) rules aiming at describing syntactic features that are both common to all languages and specific to individual ones. This course will concentrate on the description of French syntax (general/specific features) through one (or more) of these frameworks.

PREREQUISITES: FREN 2020.03

EXCLUSIONS: FREN 3020.06

FORMATS: Lecture

FREN 3022 Sémantique/Semantics

CREDIT HOURS: 3

This course builds upon the elements of semantics introduced in FREN 2020.02. It focuses on the acquisition of fundamental semantic concepts (semanteme, semantic predicate/object, semantic decomposition, semantic & lexical relations) and their application to semantic descriptions of fragments of particular languages, in our case of French.

PREREQUISITES: FREN 2020.03

EXCLUSIONS: FREN 3020.06

FORMATS: Lecture

FREN 3026 Le français québécois/Québec French

CREDIT HOURS: 3

Definition, origin and evolution of the French of Québec. Study of its phonetic, lexical, morphosyntactic and semantic characteristics. Comparison with Canadian French outside of Québec and with international French. Analysis of written and oral documents for the purpose of illustration.

PREREQUISITES: FREN 2045X/Y.06, or FREN 2047.03 and FREN 2048.03, or instructor's permission

CROSSLISTED: CANA 3026.03

FORMATS: Lecture

FREN 3033 Language and Culture in the Francophone World

CREDIT HOURS: 6

This course is an intensive three-week programme in the French Territorial Collectivity of Saint-Pierre and Miquelon. Students will stay with host families and attend daily classes, as well as participate in sociocultural activities and excursions organized in collaboration with the Francoforum, a French language and culture institute on the island of Saint-Pierre. Emphasis will be on development of intermediate and advanced oral and aural skills. As well as studying the

language, culture and history of Saint-Pierre and Miquelon, students will complete an extended experiential learning project involving close working contact with elements of the local community.

CALENDAR NOTES: Students doing the Major, Double Major, Honours, Combined Honours in French, may take this course as an elective, but it does not count toward the minimal amount of 3000 level credits.

PREREQUISITES: At least five full credits at the university level. Students must also demonstrate intermediate-level French language skills (FREN 1045 or FREN 1050 or equivalent, with permission of instructor)

RESTRICTIONS: Instructor approval must be given to register for this course.

EXCLUSIONS: FREN 3000

FORMATS: Experiential Learning

FREN 3045 Expression écrite/Written Expression

CREDIT HOURS: 6

This course normally follows FREN 2045 or FREN 2047.03 and FREN 2048.03. It introduces the students to different types of texts and their communicative functions. Students learn how to analyze texts and how to produce them in similar written communicative situations. Grammar is hence taught in the natural context provided by the texts. Students work with a corpus of authentic documents and with electronic tools. While students' common grammar and stylistic weaknesses are addressed, attention is also given to students' individual writing problems. Self-correction strategies are put in place to help them overcome these. This course is normally followed by FREN 4017 and FREN 4046.

CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

PREREQUISITES: FREN 2045X/Y.06, or FREN 2047.03 and FREN 2048.03, or equivalent or instructor's permission

EXCLUSIONS: FREN 3047.03 and FREN 3048.03

FORMATS: Lecture

FREN 3047 Expression écrite I/Written Expression I

CREDIT HOURS: 0.03

This course normally follows FREN 2045 or FREN 2047/2048. It introduces the students to different types of texts and their communicative functions. Students learn how to analyze texts and how to produce them in similar written communicative situations. Grammar is hence taught in the natural context provided by the texts. Students work with a corpus of authentic documents and with electronic tools. While students' common grammar and stylistic weaknesses are addressed, attention is also given to students' individual writing problems. Self-correction strategies are put in place to help them overcome these. This course is followed by FREN 3048.03.

PREREQUISITES: FREN 2045X/Y.06, or FREN 2047.03 and 2048.03, or instructor's permission

EXCLUSIONS: FREN 3045X/Y.06 or FREN 3047.03 and FREN 3048.03

FORMATS: Lecture

FREN 3048 Expression écrite II/Written Expression II

CREDIT HOURS: 0.03

This course follows FREN 3047.03 and continues work on different types of texts and their communicative functions. Students learn how to analyze texts and how to produce them in similar written communicative situations. Grammar is hence taught in the natural context provided by the texts. Students work with a corpus of authentic documents and with electronic tools. While students' common grammar and stylistic weaknesses are addressed, attention is also given to students' individual writing problems. Self-correction strategies are put in place to help them overcome these. This course is normally followed by FREN 4017.03 and FREN 4046.03.

PREREQUISITES: FREN 3047.03 or instructor's permission

EXCLUSIONS: FREN 3045X/Y.06 or FREN 3047.03 and FREN 3048.03

FORMATS: Lecture

FREN 3070 Le français des affaires II/French for Business II

CREDIT HOURS: 3

This course is a continuation of FREN 2070 and will focus on the development of reading, writing and oral skills in the following areas: commercial correspondence and writing; management, banking, financial and economic terminologies; specificities of business word processing in French.

PREREQUISITES: FREN 2070 or instructor's permission

RESTRICTIONS: May not be taken before FREN 2070

EXCLUSIONS: FREN 3030X/Y

FORMATS: Lecture | Discussion

FREN 3101 Culture et civilisation françaises/French culture and civilization

CREDIT HOURS: 3

This course aims to provide, through lectures, readings, discussions and presentations, an overview of French culture and civilization, which will focus on contemporary France while taking a historical perspective.

PREREQUISITES: 2000-level French course

EXCLUSIONS: FREN 3100X/Y.06

FREN 3125 The French-Speaking World/Le monde francophone

CREDIT HOURS: 3

Given in English, with no prior knowledge of French required, this course provides an introduction to the French-speaking world from a political, cultural, social and economic perspective. Study of the organization known as la Francophonie, with an emphasis on its evolution and mandate, as well as on the bilateral and multilateral cooperation between its member countries. The course is designed for students who are not specializing in French. The course format will consist of lectures and in-class discussion of print and audio-visual materials. Student assessment will be based on oral presentations, assignments, exams and written papers.

CALENDAR NOTES: This course does not satisfy the French degree program requirements. French Majors and Honours students may take this course as an elective.

CROSSLISTED: INTD 3125.03

FORMATS: Lecture

FREN 3150 Aspects de la francophonie/Aspects of the Francophone World

CREDIT HOURS: 3

Taught in French, this course provides an introduction to the study of the francophone world: political, economic, linguistic, literary and cultural aspects. From year to year the course may emphasize different regions: Western Countries, Sub-Saharan Africa, Pacific Islands, West Indies, Northern Africa.

PREREQUISITES: 2000-level French course or instructor's permission

CROSSLISTED: INTD 3150.03

FORMATS: Lecture

FREN 3175 Topical Issues in Francophonie/Thèmes de la francophonie

CREDIT HOURS: 3

Given in English, with no prior knowledge of French required, this course builds on the overview provided by FREN 3125, and involves an in-depth study of a selection of topics that are of relevance to the francophone world, including: the relationship between French and native languages; linguistic and cultural policies; languages in the educational system; economic development issues; North-South relations, etc. Approved with IDS.

CALENDAR NOTES: This course does not satisfy the French degree program requirements. French Majors and Honours students may take this course as an elective.

PREREQUISITES: FREN 3125.03/INTD 3125.03 or FREN 3150.03/INTD 3150.03, or instructor's permission

FORMATS: Lecture

FREN 3203 Approches du texte littéraire/Approaches to Literary Texts

CREDIT HOURS: 3

An introduction to the critical reading of a selection of literary texts (various genres and periods) with an emphasis on Québec literature. The close analysis of short texts will lead to discussions of the broader nature of recurring images and myths as well as central themes. Strongly recommended for French majors and Honours students. Approved with Canadian Studies. Without French 2201 and 2202, this class is not a sufficient prerequisite for 4000-level literature classes.

PREREQUISITES: FREN 2045X/Y.06 or FREN 2047.03 and FREN 2048.03

CROSSLISTED: CANA 3203.03

EXCLUSIONS: FREN 2203.03 CANA 2203.03

FORMATS: Lecture | Discussion

FREN 3300 Parallel Universes (Medieval Literature)

CREDIT HOURS: 3

Introduction to Medieval French narrative literature (12th – 15th centuries) through the motif of the “other world”, whereby the protagonists gain access to a hidden, parallel world. Various examples and literary genres will be considered: lays (Faerie, the land of Coccagne, etc.), Arthurian romance (the forest of Brocéliande, the island of Avalon, etc.), Alexandrian romance (the terrestrial Paradise, the enclosed land of Gog and Magog, “India” and “Ethiopia”, etc.), real and imaginary travel narratives (Saint Brendan’s Island, Cipangu [Japan], etc.), visions of the afterlife (Heaven, Hell, Purgatoire de Saint Patrice, etc.) or the Apocalypse. Texts will be studied in bilingual editions (Old or Middle French / Modern French).

PREREQUISITES: FREN 2201.03 and FREN 2202.03

EXCLUSIONS: FREN 4300.03

FORMATS: Lecture | Discussion

FREN 3400 Love and Death (French Prose & Poetry)

CREDIT HOURS: 3

Introduction to 16th century French thought and literature through the study of two topics, often intertwined: “l’amour” (love) and “la mort” (death).

Comparisons to earlier and later occurrences of the same “themes” in French literature will be involved, from courtly love and late medieval “macabre” to

17th c. baroque literature. Various genres will be considered: poetry, narrative prose, commentaries, philosophical essays, etc.

PREREQUISITES: FREN 2201.03 and FREN 2202.03

EXCLUSIONS: FREN 4401.03

FORMATS: Lecture | Discussion

FREN 3500 La littérature du dix-septième siècle/17th Century French Literature

CREDIT HOURS: 3

This course offers an introduction to seventeenth century French literature with a primary focus on representative works by three major dramatists: Corneille, Molière and Racine. It explores their vision of humanity and the world and assesses their contribution to French literature and the history of ideas.

PREREQUISITES: FREN 2201.03 and FREN 2202.03

FORMATS: Lecture | Discussion

FREN 3600 La littérature du dix-huitième siècle/18th Century French Literature

CREDIT HOURS: 3

An introduction to the literature of the 18th century which includes works by such authors as Voltaire, Rousseau, Diderot and Marivaux. Each year the readings and class discussions will be centred on a different theme (for example: the hero, women, love, wealth and power).

PREREQUISITES: FREN 2201.03 and 2202.03

FORMATS: Lecture | Discussion

FREN 3700 La littérature du dix-neuvième siècle/19th Century French Literature

CREDIT HOURS: 3

An introduction to the main literary movements of the 19th Century: Romanticism, Realism, Symbolism. Focus is on representative authors and/or texts belonging to one or more of these trends.

PREREQUISITES: FREN 2201.03 and FREN 2202.03

FORMATS: Lecture | Discussion

FREN 3730 La bande dessinée franco-belge/The Franco-Belgian Comic Strip

CREDIT HOURS: 3

This course offers an analysis of the development of Franco-Belgian comics (bandes dessinées) from the post-war period to the present time, focusing on a number of major authors, magazines and publishers. Several theoretical approaches will be used including semiotics, sociocriticism and cultural studies.

PREREQUISITES: FREN 2201.03 and FREN 2202.03

FORMATS: Lecture | Seminar

FREN 3750 Littérature industrielle, roman populaire et roman de consommation/Popular Literature and the Rise of Mass Culture

CREDIT HOURS: 3

The second half of the XIXth century witnesses the development and increasing popularization of the novel as the pre-eminent form of literary expression, concurrently with a dramatic increase and diversification of the reading public. This course will explore the evolution of the novel during this period, with a particular emphasis on the appearance of serialized novels in magazines and newspapers (le feuilleton) and on the development of “genre” fiction and the concept of “popular” literature. Books or excerpts from several representative writers of the time (Alexandre Dumas père, Eugène Sue, Balzac, Frédéric Soulié, Paul Féval, Jules Verne) will be analysed and discussed, in the light of theoretical works on the development of modern mass culture (Umberto Eco, René Guise, Daniel Couégnas, Lise Queffélec).

PREREQUISITES: FREN 2201.03 and FREN 2202.03

FORMATS: Lecture | Seminar

FREN 3800 Théâtre et poésie du vingtième siècle/French Theatre and Poetry of the 20th Century

CREDIT HOURS: 3

This course offers study of modern poetry from Dada and Surrealism to the work of contemporary poets such as Yves Bonnefoy, Jacques Dupin and Michel Deguy; and of modern theatre from Jarry to Beckett, Ionesco and beyond.

PREREQUISITES: FREN 2201.03 and FREN 2202.03

FORMATS: Lecture | Discussion

FREN 3810 Prose et théorie littéraire du 20e siècle/20th Century Prose and Literary Theory

CREDIT HOURS: 3

Analysis of a broad selection of short prose by major novelists of the 20th century from Gide, Proust and Aragon, but with emphasis upon the more recent

work of Beckett, Sarraute, Simon, Duras, Le Clézio and Cixous. Parallel discussion will be centred upon the literary theory of critics such as Bachelard, Poulet, Starobinski, Barthes and Derrida.

PREREQUISITES: FREN 2201.03 and FREN 2202.03

FORMATS: Lecture | Discussion

FREN 3811 Introduction à la littérature francophone de l'Afrique subsaharienne et des Caraïbes/Introduction to African and Caribbean Francophone Literature

CREDIT HOURS: 3

This course focuses on the evolution of African and Caribbean literature from its origins to the present day. It prepares students for upper level courses in African and Caribbean literature, for example FREN 4811.03 (Francophone Poetry).

PREREQUISITES: FREN 2201.03 and FREN 2202.03 or permission of instructor

FORMATS: Lecture | Discussion

FREN 3900 /FREN 3901: La littérature canadienne-française/French-Canadian Literature

CREDIT HOURS: 3

In-depth study of a few major works of French-Canadian literature with emphasis on the period from 1945 to the present day. Approved with Canadian Studies.

PREREQUISITES: FREN 2201.03 and FREN 2202.03

CROSSLISTED: CANA 3900.03/CANA 3901.03

FORMATS: Lecture | Discussion

FREN 3994 Independent Study

CREDIT HOURS: 3

This course is normally given in preparation for students studying abroad in the Winter term.

FREN 4001 Histoire du français - Moyen Âge/History of French - The Middle Ages

CREDIT HOURS: 3

Advanced research into selected topics in Old and Middle French - manuscript studies such as paleography, historical phonetics, morphology and syntax, and the cultural-literary context of linguistic development.

PREREQUISITES: 3000-level French course

FORMATS: Seminar

FREN 4002 Histoire du français - époque moderne/History of French - The Modern Period

CREDIT HOURS: 3

Advanced research into selected topics - the emergence of a national language, the problem of orthography, usage and the development of normative grammars, the evolution of vocabulary, epochal phenomena (Rhétoriciens, the Baroque, Préciosité, the Revolution, scientific French, argot), etc.

PREREQUISITES: 3000-level French course

FORMATS: Seminar

FREN 4011 Lexicologie/Lexicology

CREDIT HOURS: 3

How can French vocabulary be studied and structured? What is its formation (derivation, composition, metaphor, borrowing, abbreviation, etc.), its meaning, its development? Class reports, discussions and lexical assignments are important components of this course.

PREREQUISITES: FREN 3020.06 or FREN 2020.03 and FREN 3021.03 or FREN 3022.03, or instructor's permission

FORMATS: Seminar

FREN 4013 Pragmatique/Pragmatics

CREDIT HOURS: 3

Introduction to the study of linguistic pragmatics: definitions, principles and methods. Analysis of the conditions of language use, with particular emphasis on the description of speech acts. Elements of literary pragmatics. Application exercises.

PREREQUISITES: FREN 3020.06 or FREN 2020.03 and FREN 3021.03 or FREN 3022.03, or instructor's permission

FORMATS: Lecture

FREN 4014 Langue et société/ Language and Society

CREDIT HOURS: 3

A linguistic introduction to the analysis of the relationship between language and society. Typology of sociolinguistic situations. The phenomena of language contact, linguistic variation, norms. The relationship between groups in multi-lingual situations. Principal theoretical tendencies. Practical applications.

PREREQUISITES: FREN 2020.03 or instructor's permission

FORMATS: Lecture

FREN 4017 Traduction générale/General Translation

CREDIT HOURS: 3

This course normally follows FREN 3045 or FREN 3047.03 and FREN 3048.03. Students taking this course will be familiarized with essential notions of translation theory, and will be introduced to professional translation practice. Emphasis will be placed on the translation of relatively short texts in a wide variety of subjects and fields, from English into French and from French into English. Assessment will be carried out through weekly assignments, as well as in-class exams.

PREREQUISITES: FREN 3045.06, or FREN 3047.03/FREN 3048.03, or instructor's permission

EXCLUSIONS: FREN 4015.06

FORMATS: Lecture

FREN 4018 Outils et ressources électroniques d'aide à la rédaction, la traduction et la révision en français/Electronic tools and resources for French

CREDIT HOURS: 3

The aim of this course is to provide the student with a wide range of electronic tools and resources useful to text writing, translation and editing activities in French. The student will learn how to use these electronic tools and resources, and in particular, some of the techniques associated with them. Tools demonstrated will include grammar checkers, machine (aided) translators, concordancers and speech synthesizers/recognizers. Resources presented will consist of on-line terminology banks, dictionaries, thesauri and grammars, etc.

PREREQUISITES: FREN 3045X/Y.06 or FREN 3047.03 and FREN 3048.03 or instructor's permission

FORMATS: Lecture | Lab

FREN 4046 Composition avancée/Advanced Composition

CREDIT HOURS: 3

This course normally follows FREN 3045 or FREN 3047.03/FREN 3048.03. Students in this course will hone their writing skills by learning principles of good writing and putting them into practice via writing, editing and revising texts of various kinds. They will learn the conventions that characterize good academic writing in French. They will also create some professional documents, including a French curriculum vitae and job application letter. Students may also do some less formal writing, including descriptions or narratives.

PREREQUISITES: FREN 3045.06 or FREN 3047.03/FREN 3048.03 or instructor's permission

EXCLUSIONS: FREN 4045.06

FORMATS: Lecture

FREN 4300 Parallel Universes (Medieval Literature -- Advanced)

CREDIT HOURS: 3

In-depth study of Medieval French narrative literature (12th – 15th centuries) through the motif of the “other world”, whereby the protagonists gain access to a hidden, parallel world. Various examples and literary genres will be considered: lays (Faerie, the land of Coçaigne, etc.), Arthurian romance (the forest of Brocéliande, the island of Avalon, etc.), Alexandrian romance (the terrestrial Paradise, the enclosed land of Gog and Magog, “India” and “Ethiopia”, etc.), real and imaginary travel narratives (Saint Brendan’s Island, Cipangu [Japan], etc.), visions of the afterlife (Heaven, Hell, Purgatoire de Saint Patrice, etc.) or the Apocalypse. Texts will be studied in bilingual editions (Old or Middle French / Modern French), with occasional unilingual excerpts.

PREREQUISITES: 3000-level French literature course

EXCLUSIONS: FREN 3300.03

FORMATS: Seminar

FREN 4401 Love and Death (French Prose & Poetry - Advanced)

CREDIT HOURS: 3

In-depth study of two recurring topics in 16th century French thought and literature, often intertwined: “l’amour” (love) and “la mort” (death). Comparisons to earlier and later occurrences of the same “themes” in French literature will be involved, from courtly love and late medieval “macabre” to 17th c. baroque literature. Various genres will be considered: poetry, narrative prose, commentaries, philosophical essays, etc.

PREREQUISITES: 3000-level French literature course or instructor's permission.

EXCLUSIONS: FREN 3400.03

FORMATS: Seminar

FREN 4500 L'aventure intellectuelle du Grand Siècle/The Intellectual Adventure of 17th-Century France

CREDIT HOURS: 3

This course examines, at an advanced level, a major writer, movement, genre or theme in 17th-century French literature. As the focus of the course may vary frequently, please consult the professor for detailed information on the topic and format.

PREREQUISITES: 3000-level French literature course or instructor's permission.

FORMATS: Seminar

FREN 4600 Le siècle des lumières: forme et philosophie/The Enlightenment: Form and Philosophy

CREDIT HOURS: 3

An in-depth study of the French Enlightenment which treats some of the longer works by major authors and introduces the student to secondary authors whose works are also of significant literary, philosophical or historical value. The study is unified by an examination of recurring philosophical ideas and literary themes important to understanding the development of new genres and styles. Please consult the professor for information on the theme treated and the works to be studied in any given semester.

PREREQUISITES: 3000-level French literature course or instructor's permission.

FORMATS: Seminar

FREN 4700 La révolution romantique/The Romantic Revolution

CREDIT HOURS: 3

Romanticism is viewed primarily as a rebellious and creative force which greatly contributed to the reshaping of traditional society. The origins, main themes and trends of the movement are studied with an attempt to show Romanticism as a European movement, the impact of which was felt in fields beyond the boundaries of literature. Classes are conducted as seminars. The choice of texts depends largely on the students' previous experience: they include works by Mme de Staël, Chateaubriand, Lamartine, Hugo, Vigny, G. Sand and others.

PREREQUISITES: 3000-level French literature course or instructor's permission.

FORMATS: Seminar

FREN 4701 Le roman du dix-neuvième siècle/ The Nineteenth-Century Novel

CREDIT HOURS: 3

Intensive study of the work of a major novelist of the 19th century: e.g. Stendhal, Flaubert, Balzac, Zola, Sand; a study of his/her place in the development of the novel and of his/her contribution to the genre.

PREREQUISITES: 3000-level French literature course or instructor's permission.

FORMATS: Seminar

FREN 4710 Du symbolisme au surréalisme/ From Symbolism to Surrealism

CREDIT HOURS: 3

Analysis of the evolution of French literature from the various symbolist manners of Verlaine, Rimbaud, Mallarmé, Lautréamont and Laforgue, through the period of Jarry and Dada, to the aspirations and paradoxes of Surrealism viewed, principally, through the work of Breton, Eluard, Aragon and Desnos.

PREREQUISITES: 3000-level French literature course or instructor's permission.

FORMATS: Seminar

FREN 4801 Le Nouveau Roman/Anti-novels of the 20th Century

CREDIT HOURS: 3

In this course we are mainly interested in fictional techniques: how the author creates his illusion. Each of the works selected for detailed study is important due to the author's rejection of conventional ideas regarding the form of the novel.

PREREQUISITES: 3000-level French literature course or instructor's permission.

FORMATS: Seminar

FREN 4811 La poésie francophone de Perse et Char à Senghor et Césaire/Francophone Poetry from Perse and Char to Senghor and Césaire

CREDIT HOURS: 3

Discussion of the works of five or six major francophone poets of the modern period, chosen from: Perse, Reverdy, Claudel, Char, Frénaud, Senghor, Tchicaya, Césaire, Glissant, Miron and others.

PREREQUISITES: 3000-level French literature course or instructor's permission.

FORMATS: Seminar

FREN 4902 Écrivains québécois contemporains/Contemporary Québec Writers

CREDIT HOURS: 3

In depth study of one or more contemporary Québec writers. Approved with Canadian Studies.

PREREQUISITES: 3000-level French literature course or instructor's permission.

FORMATS: Seminar

FREN 4903 Contemporary Quebec Writers

CREDIT HOURS: 3

In depth study of one or more contemporary Québec writers. Approved with Canadian Studies.

PREREQUISITES: 3000-level French literature course or instructor's permission.

FORMATS: Seminar

FREN 4904 Écrivaines québécoises/ Québec Women Writers

CREDIT HOURS: 3

This course will explore the condition of women as revealed in texts by Québec women writers. In any given year different writers and time periods will be covered, and a variety of genres may be included. Approved with Canadian Studies.

PREREQUISITES: 3000-level French literature course, preferably French Canadian, or instructor's permission.

CROSSLISTED: GWST 4250.03

FORMATS: Lecture | Discussion

FREN 4933 Séminaire “de spécialisation”/Honours Seminar, Honours Essay

CREDIT HOURS: 0

The honours seminar is a compulsory preliminary to the honours essay or oral presentation and is given as a fall term course for honours students in their graduating year writing their Honours Essay in French. The seminar prepares students to write the honours essay, beginning with a detailed outline of the work. It provides instruction, advice, and guidance on all the essential steps for producing the honours essay, from selecting and researching a topic, through planning and drafting the text, to matters of form and style. Students continue the work begun in the seminar by working individually with a supervisor during the winter term.

PREREQUISITES: Only open to students in graduating year of French Honours program.

FORMATS: Seminar

FREN 4994 FREN 4995, FREN 4996, FREN 4997, FREN 4998, FREN 4999: Recherches indépendantes/Independent Research

CREDIT HOURS: 3

May only be taken with the approval of the Chair or the Undergraduate Advisor.

PREREQUISITES: 3000-level French literature or linguistics course

FORMATS: Seminar

Introduction

Gender and Women’s Studies is a dynamic and rapidly expanding interdisciplinary area of study. An alternative to the traditional curriculum, Gender and Women’s Studies provides students with the opportunity to examine history, social structures, the sciences, language, literature, and culture from critical and illuminating perspectives.

At Dalhousie, students can currently enter the following programs in Gender and Women's Studies: a Minor, a Major, a Double Major, or a Combined Honours program. These programs include courses in the disciplines of Economics, English, History, Music, Philosophy, Political Science, Sociology and Social Anthropology, and Theatre, and in interdisciplinary and professional fields, including Contemporary Studies, Early Modern Studies, Health Promotion, International Development, Law, and Nursing.

Students in the Dalhousie Gender and Women's Studies program develop a critical understanding of gender as a category of analysis in scholarly enquiry, social dynamics, cultural expression, and belief systems. They also investigate the ways in which gender intersects with other variables such as race, class, and cultural difference. They study women's contributions to civilization in many fields of knowledge, and examine the social and ideological forces that have made these contributions "invisible" in the past. Through exposure to a large and growing body of research in a number of disciplines and fields, Gender and Women's Studies Majors gain a grounding in the methodologies and concepts shaping the organization and dissemination of knowledge.

Our courses also provide students with opportunities of uniting theory with social and cultural practice, addressing contemporary issues that individuals and institutions are grappling within today's changing world order. They provide a context in which women can find strength and insight through exchanging experiences and ideas with other women, and a context in which women, men, and non-binary individuals together can further human understanding and equality through exploring and respecting differences.

Do students other than women take Gender and Women's Studies courses? Yes. Gender has operated as a fundamental category in the organization of knowledge, social systems, forms of representation and modes of production and consumption. The critical examination of gender is relevant to all.

Degree Programs

Gender and Women's Studies programs provide preparation for careers in a variety of fields, as well as for professional schools or graduate programs. For example, graduates can work as consultants, policy analysts, and officers in government and para-governmental organizations, in business and industry, and in educational institutions. The fields they enter include employment equity, public administration, international development, health care, workplace conditions, personnel relations, publishing and editorial work, and public relations.

For students interested in a preparatory degree, Gender and Women's Studies programs provide appropriate preparation for professional schools and programs in the fields of education, social work, counselling, journalism, the health professions, and certain areas of law. They also provide suitable preparation for graduate programs in Women's Studies, Gender Studies, Interdisciplinary Studies, Cultural Studies, and studies in Social Justice. Students interested in proceeding to graduate work should enter a four-year degree program.

Students may enter Gender and Women's Studies programs in the first, second, or third year of study. In many cases, students in second or third years may already have acquired some Gender and Women's Studies credits through taking courses in the traditional disciplines or in other interdisciplinary programs that are cross-listed with Gender and Women's Studies core courses.

NOTE: In addition to the departmental requirements listed below, students must satisfy the requirements outlined in the [Degree Requirements](#) section.

BA (120 credit hour) Major in Gender and Women's Studies

Four year, 120 credit hour program

This program provides a more comprehensive grounding in Gender and Women's Studies than the BA (90 credit hours) minor in Gender and Women's Studies. Students interested in applying to graduate programs should enter a four-year degree program.

Departmental Requirements

- At least 36 and no more than 54 credit hours beyond the 1000 level in Gender and Women's Studies of which at least 18 must be beyond the 2000 level
- At least three different disciplines shall be represented in a student's selection of cross-listed Gender and Women's Studies courses

BA (120 credit hour) Double Major

Four year, 120 credit hour program

Students can combine Gender and Women's Studies courses with courses either in a traditional discipline or with another interdisciplinary program such as International Development Studies, Canadian Studies, or Contemporary Studies.

Departmental Requirements

- At least 60 and no more than 84 credit hours beyond the 1000 level in two allied subjects, one of which is Gender and Women's Studies, with no more than 48 and no fewer than 30 credit hours in either
- At least 18 credit hours in each of the two subjects (GWST and the other chosen subject) beyond the 2000-level.
- At least three different disciplines shall be represented in a student's selection of cross-listed Gender and Women's Studies courses.

BA with Combined Honours

Four year, 120 credit hours program

Students can enter a BA with Combined Honours program in Gender and Women's Studies and a range of other subjects including Biology, Classics, Contemporary Studies, English, Environment, French, History, International Development Studies, Philosophy, Political Science, Psychology, Sociology, Social Anthropology, Sustainability, and Theatre. Students interested in any of these combinations or any other that involves Gender and Women's Studies and another subject should consult with the Departments concerned.

General Degree Requirements

Please read the detailed description of the BA with Combined Honours program in the Degree Requirements section of the Dalhousie Academic Calendar. After meeting the first-year requirements, students must complete:

- Minimum of 66, maximum of 84 credit hours beyond the 1000 level in the two allied subjects combined, not more than 48 credit hours nor fewer than 30 credit hours being in either of them, and a minimum of 18 credit hours beyond the 2000 level in each of the two subjects. Grade must be "C" or better; otherwise, course will not count toward degree.
- Within the last 90 credit hours, 6 to 24 - depending on the number selected in the honours subjects - elective credit hours.
- PLEASE NOTE: Where a class selected from the Gender and Women's Studies "list" is cross-listed with a class in the allied subject, the class may not be double counted (i.e. it may be counted toward one subject or the other, but not both).
- Total credit hours required above 1000 level - 72
- Total credit hours required for degree - 120
- Required GPA for graduation - 2.00
- Honours Qualifying Examination: see concentrated honours program above for details.
- Required standing for graduation:
 - Arts and Social Sciences subjects require a GPA of 2.70 (3.70 for first class) on courses in the honours subjects.
 - Science subjects (see below) require a GPA of 3.00 (3.70 for first class) in courses in the honours subjects.
- May be combined with minor(s)

Note: If the student has a minor, courses in the honours subjects and the minor are included in the honours GPA

Departmental Requirements

In addition to meeting the Degree Requirements set out by the Faculty of Arts and Social Sciences, Gender and Women's Studies students must meet the following requirements:

1. At least **two** of the following classes must be taken: GWST 2066.03, 2301.03, 2500.03, 2191.03, 2192.03, 2170.03 (Normally this requirement should be met in the second year of the program).
2. At least **three** Gender and Women's Studies classes (9 credit hours) must be taken beyond the 2000 level.
3. At least **two** classes at the 4000 level (6 credit hours) in Gender and Women's Studies, Directed Readings (with approval), Special Topics, or cross-listed classes (Normally this requirement should be met in the fourth year of the program).
4. To meet the Honours Examination requirement when Gender and Women's Studies is the major subject, students will prepare a research paper under the supervision of a Gender and Women's Studies faculty member.
5. At least **three different disciplines** must be represented in a student's selection of Gender and Women's Studies classes (in disciplines other than the allied subject).

Minor in Gender and Women's Studies

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A BA (90 credit hour) degree program with a minor in Gender and Women's Studies is also available.

Requirements

- 18 credit hours to a maximum of 27 credit hours beyond the 1000 level in Gender and Women's Studies
- At least three different disciplines shall be represented in a student's selection of cross-listed Gender and Women's Studies courses

Contact [Gender and Women's Studies](#) for more information.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

Related Courses

These courses are subject to change; consult the program office for offerings.

In addition to the courses listed, appropriate courses in other departments (for example, Special Topics courses on women and/or gender issues) may be taken as Gender and Women Studies credits, with the permission of the Instructor concerned and the Coordinator. Students may also select Gender and Women's Studies courses at Saint Mary's or Mount Saint Vincent Universities, subject to the rules and regulations of the College of Arts and Science at Dalhousie regarding transfer credits and in consultation with the Gender and Women's Studies Coordinator.

Courses Offered at Mount Saint Vincent University and Saint Mary's University

Courses offered within the Women's Studies programs at these universities are available to Gender and Women's Studies majors at Dalhousie. Courses offered are subject to change.

Please consult:

1. Women's Studies, Mount Saint Vincent (902) 457-6547; or
2. Women's Studies, Saint Mary's University (902) 420-5842.

These courses must be taken on a letter of permission (see the Dalhousie Gender and Women's Studies Program Coordinator).

Course Descriptions

GWST 1010 Introduction to Gender and Women's Studies

CREDIT HOURS: 3

Gender and Women's Studies is an interdisciplinary field aimed at developing a critical understanding of gender as a category of analysis in scholarly enquiry and social dynamics. Paying close attention to the experiences and perspectives of women, students have the opportunity to examine history, social structures, the sciences, language, literature, culture from the illuminating perspective of gender. In all these areas, Gender and Women's Studies investigates how gender intersects with other variables such as race, class, and cultural difference. This introductory course provides an overview of some of the central topics of Gender and Women's Studies, such as the sex/gender distinction, understanding sexualities, the social construction of motherhood, changing definitions of masculinity and femininity, and the place of sex and gender cross-culturally.

FORMATS: Lecture | Discussion

GWST 1015 Gender and Diversity

CREDIT HOURS: 3

This course continues from "Introduction to Gender and Women's Studies" to focus particularly on the many ways that gender as a social system interacts with other systems of power and inequality. We all make sense of our lives through multiple identities that combine in shifting ways to define our

opportunities for action and the limits we face. Identities based on gender, race, ethnicity, age, class, sexuality, disability, nation, or religion are blended in varied ways for individuals, but they are not just individual self-perceptions. They are also elements of larger social systems. Topics may include the multiple identities of the body; race, gender, and violence; diversity and work; contemporary transformations of the family; and gender and globalization.

FORMATS: Lecture | Discussion

GWST 1070 Modern Russian Culture and Civilization

CREDIT HOURS: 3

Conducted in English. The cultural history of 20th century Russia.

CALENDAR NOTES: Meets Writing Requirement (when taken in combination with RUSN 1020.03), 3 hours

GWST 2000 Directed Readings in Gender and Women's Studies

CREDIT HOURS: 3

Readings and research in Gender and Women's Studies on selected topics. In exceptional circumstances, and with the permission of both the Gender and Women's Studies Coordinator and the Instructor concerned, students may arrange to take appropriate courses for credit in Gender and Women's Studies that are not otherwise available as one term courses in Gender and Women's Studies. To find out how to register in one of these courses, please see <http://www.dal.ca/gwst>.

PREREQUISITES: Permission of the GWST Coordinator and instructor

GWST 2011 Queering Foundations

CREDIT HOURS: 3

This class will introduce you to concepts in queer theory, which are analyses that challenge identity categories by examining how those identities are constructed socially. Weekly lectures will bring a critical lens to how gender and sexuality are constructed historically and contemporarily, and in relation to other markers, such as race, ethnicity, or socio-economic class. Readings will introduce queer theory terms and demonstrate how to analyze language in relation to power. You will discuss the theory we read, reflect on its connection to your own experience, and apply the theories to contemporary representations of gender and sexuality.

FORMATS: Lecture | Tutorial

GWST 2066 Women, Gender and Music

CREDIT HOURS: 3

This course explores the variety of ways in which gender shapes musical discourse. The role of gender in music will be examined through three broad topics: the history of female contributions to music as musicians, composers, patrons and listeners; musical constructions of gender, race, class and sexuality; and feminist criticism in recent musical discourse. No formal training in music is required.

CROSSLISTED: MUSC 3066.03

FORMATS: Lecture | Discussion

GWST 2170 Philosophy of Sex and Love

CREDIT HOURS: 3

This course offers an examination of key concepts and questions related to love and sexual desire. Topics will include the nature of desire, of romantic love, and of sexual orientation. We will take up questions in sexual ethics and politics, and look at selected concepts such as trust and betrayal, sexual objectification, and perversion.

CROSSLISTED: PHIL 2170.03

FORMATS: Lecture

GWST 2191 Gender Across Cultures

CREDIT HOURS: 3

Applying theoretical perspectives drawn primarily from anthropology, this course considers the social and historical constructions of gender and sexuality in different cultural contexts. The course provides an overview of the anthropological study of gender as a universal yet culturally specific identity and set of relations and expectations. Themes around which the course will be organized will likely include the relationship between gender and the following: identities and markers of social difference, notably sexuality; kinship, reproduction, and the family as cultural institutions; labour, class and the global political economy; and gender politics and power relations. Students taking this course will consider the importance of looking beyond the western experience for understanding questions of gender, sexuality, and power. Approved with International Development Studies.

PREREQUISITES: One of SOSA 1002.03, SOSA 1003.03, FYP, or 3 credits of GWST at any level

CROSSLISTED: SOSA 2191.03

FORMATS: Lecture

GWST 2192 Gender, Sexuality and Society

CREDIT HOURS: 3

This course introduces students to the sociological study of gender and sexuality. It explores how socio-economic and cultural conditions— particularly in contemporary Canada— shape our understandings and experiences of gender and sexuality and how both intersect with age, ethnicity, class and other markers of identity. Specific topics to be examined may include the interconnected histories of sexuality and gender expectations in western societies, representations of gender and sexuality in the contemporary media, the family as a changing social institution and/or the social organization of intimate relationships, and different forms of gender and sexual activism and the notions of justice that they represent. Students taking this course will gain an in-depth understanding of gender and sexuality as evolving socially constructed concepts that have real and multiple effects.

CALENDAR NOTES: Note: Given its focus on contemporary Canadian society, this course may not be approved as an IDS class.

PREREQUISITES: One of SOSA 1002.03, SOSA 1003.03, FYP, or 3 credits of GWST at any level

CROSSLISTED: SOSA 2192.03

FORMATS: Lecture

GWST 2217 Women and the Economy

CREDIT HOURS: 3

This course studies questions such as: Have economic conditions improved for women in Canada over the past 30 years? Is there gender discrimination in the Canadian labour market? What are the economic consequences of divorce? Are women more likely than men to be poor? Are there inequalities within families?

PREREQUISITES: ECON 1101.03, ECON 1102.03 with minimum grades of C

CROSSLISTED: ECON 2217.03

FORMATS: Lecture

GWST 2222 Fictions of Self Discovery

CREDIT HOURS: 3

A study of literary works (chiefly novels, but also possibly including short stories or short story collections) that portray the crises and conflicts involved in coming of age, finding a vocation, and the search for identity. Works from the nineteenth century to the present may be included, by authors writing in English in a variety of national traditions and global contexts. Typical themes include childhood experience and education, familial and romantic relationships, identity formation (cultural, gender, sexual), occupational issues and challenges.

PREREQUISITES: Any class or combination of classes that satisfies the College of Arts and Sciences Writing Requirement.

CROSSLISTED: ENGL 2222.03

EXCLUSIONS: ENGL 2221X/Y.06

GWST 2300 Making Gender: Sex and Gender in Pre-Modern Europe

CREDIT HOURS: 3

This course examines the diverse and fascinating ways western cultures have shaped what it meant to be a woman or a man. Beginning in the time of the Roman Empire and continuing to the age of the French Revolution, the course examines such topics as eunuchs, fasting saints, female ‘popes’, changing notions of the physical differences between the sexes, and early struggles for women’s rights.

CROSSLISTED: HIST 2614.03

FORMATS: Lecture | Tutorial

GWST 2301 Making Gender: Male and Female from the American Revolution to the Present

CREDIT HOURS: 3

This course examines the diverse and fascinating ways western cultures have shaped the meanings of gender. The history of women informs us about the once little-known history of femininity. And, as a result, historical changes in definitions of masculinity become visible. The meanings of gender are explored in this course through topics such as: the doctrine of separate spheres, respectability, the family wage, the homosexual, imperialism, citizenship, welfare dependency, and infertility.

CROSSLISTED: HIST 2615.03

FORMATS: Lecture | Tutorial

GWST 2310 Women and Gender in Early Modern Science

CREDIT HOURS: 3

This course will explore the roles of women, and questions about women’s nature, in the development of early modern science. The course will consider several interrelated aspects of scientific culture in the sixteenth, seventeenth, and eighteenth centuries: first, we will look at the place of women in the scientific institutions of the time. Although women were, for the most part, excluded from universities and scientific academies, some women were able to do scientific work through their participation in salons and craft guilds. The second part of the course will look at the contributions of some particular women to the fields of physics, astronomy, botany, and medicine. We will then examine how science interpreted sex and gender. We will pay special attention to the biological sciences and their treatments of sex differences, conception, and generation. We will consider how these biological theories were influenced by, and at the same time used to uphold, various political and social structures. Finally, the course will explore the ways in which gender and nature were portrayed in the broader cultural context. We will, for example, discuss the ways in which women were depicted as scientists and as symbols of science in art and literature.

GWST 2320 Witchcraft in Early Modern Europe

CREDIT HOURS: 3

The period of European history from 1500 to 1800 saw the rise of modern science and philosophy. It was also a period in which thousands of witch trials and executions were carried out. This course will seek to understand how these seemingly contradictory developments could have occurred simultaneously. The course will examine changing conceptions of the witch and witchcraft in their historical, intellectual, cultural, religious and political contexts. The course will pay special attention to early modern notions of gender and sexuality and their influence on the witch hunts and witch trials.

CROSSLISTED: EMSP 2320.03, RELS 2420.03

FORMATS: Lecture | Seminar

GWST 2350 Feminisms: The First Three Waves

CREDIT HOURS: 3

In this course we will consider major developments in feminist theory from the 19th century to the present, concentrating on primary philosophical and literary texts. We will read representative works from all three waves, and consider black, lesbian, and postcolonial feminisms, as well as writing by trans* authors.

CROSSLISTED: CTMP 2350

FORMATS: Seminar

GWST 2412 Human Sexuality

CREDIT HOURS: 3

This course is concerned with biological, cultural, ethical, historical, psychological, religious and semantic aspects of human sexuality. Four themes are threaded throughout the course - diversity in gender roles and in sexual attitudes, behaviours and customs; critical thinking; making responsible decisions; sexual health. The course is designed to support positive integration of sexuality into the lives of individuals and to foster the prevention of sexuality-related problems, at all stages of life.

CROSSLISTED: HPRO 4412.03

FORMATS: Lecture | Discussion

GWST 2500 Philosophical Issues of Feminism

CREDIT HOURS: 3

An exploration and examination of some of the concepts, issues, and arguments underlying feminist claims and perspectives. Such topics as pornography, rape, mothering, the nature of gender, and feminism's responses to racism will be considered.

CROSSLISTED: PHIL 2160.03

FORMATS: Lecture | Discussion

GWST 2900 Ways of Seeing: An Introduction to Art History and Visual Culture

CREDIT HOURS: 3

Why have all human beings, at all times and in all places, made art? In order to understand the role of visual culture, this course will explore broad themes in global art production, such as sex, death, religion, race, knowledge, power and entertainment. Students will be encouraged to consider cross-cultural perspectives and trans-historical connections in their study of visual culture. They will be introduced to different 'ways of seeing' including an introduction to Indigenous visual culture through a regional study of North America and the fundamentals of traditional art history with a chronology of western stylistic movements. Students will develop the skills to describe, analyze and think critically about the visually saturated world in which they live.

CROSSLISTED: HIST 2900.03

GWST 3000 Directed Readings in Gender and Women's Studies

CREDIT HOURS: 3

Readings and research in Gender and Women's Studies on selected topics. In exceptional circumstances, and with the permission of both the Gender and Women's Studies Coordinator and the Instructor concerned, students may arrange to take appropriate courses for credit in Gender and Women's Studies that are not otherwise available as one term courses in Gender and Women's Studies. To find out how to register in one of these courses, please see <http://www.dal.ca/gwst>.

PREREQUISITES: Permission of the GWST Coordinator and Instructor

GWST 3001 Directed Readings in Gender and Women's Studies

CREDIT HOURS: 3

Readings and research in Gender and Women's Studies on selected topics. In exceptional circumstances, and with the permission of both the Gender and

Women's Studies Coordinator and the Instructor concerned, students may arrange to take appropriate courses for credit in Gender and Women's Studies that are not otherwise available as one term courses in Gender and Women's Studies. To find out how to register in one of these courses, please see <http://www.dal.ca/gwst>.

PREREQUISITES: Permission of the GWST Coordinator and instructor.

GWST 3006 Comparative Perspectives on Gender and Work

CREDIT HOURS: 3

This course will use comparative perspectives to explore a range of topics relating to the gendering of work: wage-work, household-based labour, the informal sector, masculinity and femininity in the work place, occupational segregation, employment policies directed at changing the status quo (such as affirmative action, pay equity), and unionization. The context will be the changing global political economy and its consequences for the strategies of different groups (such as nation states, but also trade unions, feminist groups and employer groups).

PREREQUISITES: One 1000 level SOSA course or FYP

CROSSLISTED: SOSA 3006.03

FORMATS: Lecture

GWST 3017 Colonialism and the Body: Sex and the Practice of Power

CREDIT HOURS: 3

Theorists such as Frantz Fanon and Anne McClintock have argued that the colonial encounter has been a sexual and sexualized undertaking, undergirded by regimes of power. This course Colonialism and the Body uses sex, sexuality, and gender as the starting point from which to interrogate and examine the meanings attached to the bodies of the colonized and colonizer, and the social, spatial, political locations of these bodies during the heyday of European colonization, and further, in this supposedly postcolonial moment. We will examine diverse forms of colonialism (internal, direct, and indirect) in specific locations around the globe, including Canada, the United States, the Caribbean, and in parts of Africa and Asia. Topics include slavery and the slave trade, European contact with indigenous societies, Africville, Oka, sports, racial science, racialization of the African body, and colonial crime and punishment.

PREREQUISITES: One SOSA 1000 level course or FYP

CROSSLISTED: SOSA 3016

EXCLUSIONS: SOSA 3186.03

FORMATS: Lecture

GWST 3050 Contemporary Women Poets

CREDIT HOURS: 3

Reading women's poetry in local and global contexts, this course will address the emergent practices of contemporary poetics in Canada and the United States. The majority of our readings will consist of book-length works of poetry—that is, longer texts that transgress the limits of the lyric and collections of shorter poems linked by various formal, narrative, and thematic continuities. These texts represent some of the key innovations and formations of women's poetics and poetics from the end of the twentieth to the beginning of the twenty-first centuries.

PREREQUISITES: ENGL 1000.06

CROSSLISTED: ENGL 3250.03

FORMATS: Lecture | Discussion

GWST 3088 African Caribbean Women Writers

CREDIT HOURS: 3

This course will consider African Caribbean women writers from through the twentieth and twenty-first centuries. By exploring prose, poetry, drama, and music, we will consider how these women writers address diverse topics such as the experience of coming of age, the intersections between race and gender, familial relations, and sexuality. This course will introduce you to some of the most common thematic concerns of African diasporic women's writing as well as introduce you to the multiplicity of approaches different writers take to these themes.

CROSSLISTED: ENGL 3088

FORMATS: Lecture

GWST 3089 Gender and Sexuality in Asian North American Writing

CREDIT HOURS: 3

This course introduces students to the multiplicity of approaches that Asian diasporic literature takes to the themes of gender and sexuality. Focusing primarily on texts by writers situated in Canada and the US, all of the course readings are written in English.

PREREQUISITES: Any course or combination of courses that satisfies the College of Arts and Sciences Writing Requirement.

CROSSLISTED: ENGL 3089

FORMATS: Lecture

GWST 3100 Feminist Perspectives in Sociology and Anthropology

CREDIT HOURS: 3

This course will begin with an overview discussing what is feminism? There is no way to come to a definitive answer to this question; therefore, the first month of classes will focus on readings and discussion of feminism from an historical perspective. We will investigate the three historical waves of feminism and the diversity of feminism found in the social sciences. After this brief introduction, we will concentrate on gender and sex, clearly dominant themes found in feminist works. We will approach this by critically exploring socio cultural constructions of sex and gender, which in turn will shed critical light on feminist perspectives about the relationship between these two concepts.

PREREQUISITES: One SOSA 1000 level course or FYP

CROSSLISTED: SOSA 3100.03

FORMATS: Lecture

GWST 3110 Special Topics in Gender and Women's Studies

CREDIT HOURS: 3

This is a Special Topics course which will explore various areas of current research on a broad topic in Gender and Women's Studies or gender theory. Topics will vary by year. The course will be directed to majors and honours students in Gender and Women's Studies, but will be open to qualified students from other disciplines.

PREREQUISITES: One full credit in Gender and Women's Studies or permission of instructor

FORMATS: Lecture

GWST 3150 Sociology and Anthropology of the Body

CREDIT HOURS: 3

This course will consist of a micro-sociological examination of the human body as a socio-cultural construction. Topics include: bodily self image, cultural definitions of physical attractiveness, stigmatization, proxemic behaviour, non-verbal communications, body hygiene and pollution taboos, and cultural aspects of human reproduction and sexuality. Special attention will be paid to class, gender and ethnicity and their relationship to body politics.

PREREQUISITES: One SOSA 1000 level course or FYP

CROSSLISTED: SOSA 3150

FORMATS: Lecture

GWST 3168 Issues in Latin American Society

CREDIT HOURS: 3

This course introduces students to case studies on contemporary Latin America. The goal of the course is to familiarize students with key social and cultural issues in the region. The focus of the course will change from year to year, and may include a particular country or region, or a theme or topic. Students should contact the Gender and Women's Studies department/co-ordinator for details on the specific theme of the course in a given year. This course will only be offered as a Gender and Women's Studies course in years when the topic is gender-related.

CROSSLISTED: SOSA 3168.03

FORMATS: Lecture

GWST 3186 Special Topics in Gender and Women's Studies

CREDIT HOURS: 3

CALENDAR NOTES: This course is held in conjunction with SOSA 3186.

CROSSLISTED: SOSA 3186.03

FORMATS: Lecture

GWST 3215 Feminism and Science

CREDIT HOURS: 3

Science has been the subject of intense scrutiny by contemporary feminist theorists. The course will examine the various feminist critiques of natural science, as well as the positive proposals that feminism has brought to science and scientific culture. Questions that will be addressed include: Is the style of science gendered? Has feminism influenced the content of various sciences? How has science contributed to gendered constructions of nature? Is there such a thing as value-free scientific research? How do feminist theories of knowledge differ from traditional understandings of scientific knowledge and scientific objectivity? The readings for this course will include work by Donna Haraway, Sandra Harding, Evelyn Fox Keller, Helen Longino, and Hilary Rose.

PREREQUISITES: Second year and above.

CROSSLISTED: CTMP 3215.03, HSTC 3411.03

FORMATS: Seminar

GWST 3250 Écrivaines françaises/French Women writers

CREDIT HOURS: 3

This course will explore the condition of women as expressed in a selection of texts by French women writers. The choice of writers may vary from year to

year, and the course may be organized around a theme or a particular time period. Students taking this course as a Gender and Women's Studies course may write their essays and exams in English.

PREREQUISITES: Recommended: FREN 2201.03/FREN 2202.03

CROSSLISTED: FREN 3250.03

FORMATS: Lecture | Discussion

GWST 3255 Experimental Subjects: Women, Writing, Life

CREDIT HOURS: 3

This course examines contemporary writing by women and women-identifying writers. Texts may include personal essays, novels, short stories, life writing, scholarship, and creative non-fiction, as well as works that borrow from all of these categories but fit neatly into none of them.

PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF.

CROSSLISTED: ENGL 3255

FORMATS: Lecture

GWST 3280 Love, lust, and desire in Italian Renaissance Art

CREDIT HOURS: 3

Some of the most refined works of Italian Renaissance art portray the desires of the flesh. From erotic mythological paintings, to titillating private portraits, illicit subject matter provided an endless font of inspiration for painters, sculptors, and craftsmen alike. Through an intersectional approach, this course examines how gender, race, and class shaped the visual imaginary of desire in Renaissance Italy (1300-1650). Weekly topics will include: the visual culture of courtly love, marriage and virginity, ideals of beauty and the male gaze, sexual violence, women artists and self-representation, and the fetishization of foreign bodies.

CROSSLISTED: EMSP 3280.03

EXCLUSIONS: EMSP 3640.03 for the 2010/11, 2011/12, 2012/13, 2013/14, 2014/15 academic years.

FORMATS: Seminar

GWST 3300 Family and Community in North America 1600-1900

CREDIT HOURS: 3

The family in North American society from, when the family was a model for social relations to the time when it was idealized as a private refuge. Among the topics considered are the role of the family in rural and urban communities; the demographic transition from high fertility and mortality; the reduction of the family's economic and educational autonomy; the role of ideology in shaping sex roles and child rearing; and the relations of family and community according to ethnic group, class and economic setting. RECOMMENDED: A course in the Sociology or Social Anthropology of the family.

CROSSLISTED: HIST 3350.03

FORMATS: Lecture | Discussion

GWST 3303 De-Colonizing Modernism: Critiquing the Legacy of Modern Art

CREDIT HOURS: 3

What is Modernism? Modern Art? Our answers to these questions reflect our attitudes towards art and the role of the artist in society. This course gives students a foundation in the western visual culture of the 20th century. It will equip them to research and write about art and critique the omissions and biases of art history. Through this process they will better understand how the Western art production of the past 150 years affects the visual culture they experience daily.

CROSSLISTED: HIST 3303.03

FORMATS: Lecture

GWST 3304 Through her Eyes: Women and the Documentary Tradition

CREDIT HOURS: 3

This course will explore the rarely examined historical and contemporary involvement of women in the field of documentary filmmaking. Women documentary makers have produced extensive bodies of engaging work that challenge many societal assumptions about gender, class, race, the function of political power, sexuality and peace-war. They have worked at every level within the process: as directors, cinematographers, editors, sound recordists, producers, writers and fund-raisers. A variety of documentaries made by women from diverse backgrounds will be screened and analyzed along with a close reading of selected critical texts. Students will identify the similarities and differences in subjects, themes, styles, aesthetics, and approaches to creation, production and distribution.

CROSSLISTED: CTMP 3304.03

FORMATS: Seminar

GWST 3331 Film Theory II: Desire in Cinema

CREDIT HOURS: 3

This course focuses on theories of gender, sexuality and desire in the cinema. It addresses debates around the representation of gender, sexuality and desire on screen, as well as theorizations of spectatorial desire.

PREREQUISITES: One of the Film Studies courses (or other exposure to the discipline)

CROSSLISTED: THEA 3331.03

FORMATS: Lecture | Discussion

GWST 3350 Rewriting Gender

CREDIT HOURS: 3

This class dissects the dominant, binary (male/female) notion of gender, as it has been constructed in relation to heteropatriarchal norms and systems of signification. We look at the dissolution of these rigid concepts and consider alternative (and multiple) sites of gender-identification through the lens of gender theory, fictional works (novels and poetry), and visual material (art, film, and music). We ask in what way these gendered subversions of traditional discourses engage (or fail to engage) with race, sexuality, class, ability and other identity categories.

CROSSLISTED: CTMP 3350.03

FORMATS: Seminar

GWST 3358 Slavery, Gender, and Power: Women in Nineteenth Century America

CREDIT HOURS: 3

This course studies the tangled histories of slavery and gender in nineteenth century America. Principal topics include the lives of female slaves, the cult of domesticity, the rise of early feminism, the role of women in the destruction of slavery, and the tension between gender and race.

CROSSLISTED: HIST 3358.03

FORMATS: Seminar

GWST 3412 Hypatia's Daughters: Women In Science

CREDIT HOURS: 3

From Hypatia to Hildegard von Bingen, from Mary Somerville to Marie Curie, this course surveys the scientific contributions made throughout history by some of the most important women scientists and natural philosophers while examining how their respective social contexts shaped their philosophical and scientific practices.

CROSSLISTED: HSTC 3412

FORMATS: Lecture | Tutorial

GWST 3426 Sex, Race, and the State

CREDIT HOURS: 3

This course will consider the role of the state and other institutions in the social, moral and legal production and regulation of sex and gender, particularly in Western countries. It will begin with a brief historical overview of the role of religious prescriptions in the social and legal regulation of sex, and in the refinement of laws and policies that have been implicated in sex-and gender-based discrimination. We will also address a range of contemporary topics such as the decriminalization of homosexuality; hate crimes against sexual minorities; the politics of relationship recognition; state response to HIV/AIDS; gender-related refugee claims; and developments in the regulation of reproductive technologies.

PREREQUISITES: Previous coursework in Political Science recommended

CROSSLISTED: POLI 3426.03

FORMATS: Seminar

GWST 3500 Contemporary Feminist Theories

CREDIT HOURS: 3

Contemporary feminism is not a single theory but comprises multiple theoretical perspectives, reflecting both a diversity in women's experience of subordination and a diversity of interests and approaches. This course aims to present some of the richness and variety in feminist theory while offering students the opportunity for sustained critical engagement with influential feminist thinkers.

PREREQUISITES: At least two previous classes in Gender and Women's Studies, or at least two previous classes in Philosophy, or permission of the instructor.

EXCLUSIONS: PHIL 3170.03, PHIL 5170.03, GWST 5170.03

FORMATS: Seminar

GWST 3600 Sexuality, Racism, and Western Political Thought

CREDIT HOURS: 3

Representations of women and constructs of femininity are a significant part of mainstream western political thought. This course explores these topics in the work of leading western philosophers, such as Aristotle, Aquinas, Hobbes, Locke and Rousseau, with attention to understanding the relation of ideas of sexual

difference to general systems of thought. The course also considers how conceptions of gender difference and equality shape contemporary political, legal and philosophical discourses and practices, including in feminist critical theory and international human rights scholarship and activism. We will consider the arguments and strategies used by men and women in the past century to address systemic discrimination and advance gender equality.

PREREQUISITES: Any one of the following classes: POLI 1010, POLI 1015, POLI 1030, POLI 1035, POLI 1050, POLI 1055, POLI 1100, POLI 1103, GWST 1010.03, GWST 1015.03, GWST 2000, GWST 2053, GWST 2066, GWST 2200, GWST 2217, GWST 2300, GWST 2301, GWST 2310, GWST 2320, GWST 2500, GWST 2800, or permission from the instructor.

CROSSLISTED: POLI 3427.03

FORMATS: Seminar

GWST 3800 Gender and Health

CREDIT HOURS: 3

This course aims to reflect upon and challenge our taken-for-granted assumptions about the gendered dimensions of health and healthcare. Rather than take the categories of 'women's health' and 'men's health' as its foundation, the course revolves around two main questions: (1) how does the field of health and healthcare define and enforce the very categories of 'women' and 'men'?; (2) how does gender, thus defined and enforced, affect the health, healthcare, and health work of those defined as men, women, or other? We will consider these questions by examining particular health topics that have a strongly gendered component, such as sexual health, reproductive health, and disability. Throughout the course, we will explore the theoretical perspectives used in the field; the two-sex model and challenges to it; the gendering of particular health problems and health professions; the medicalization of womanhood and, more recently, manhood; and the relationships between gender and other forms of social classification (e.g. race, class, sexual orientation).

PREREQUISITES: One of SOSA 1002.03 or SOSA 1003.03

CROSSLISTED: SOSA 3145.03

FORMATS: Lecture

GWST 3810 Women and Aging

CREDIT HOURS: 3

As women grow older the experience of aging is generally more difficult for them than for men. Somewhere in the forties, anxieties about the aging process exacerbate the difficulties facing women in modern society. Disempowering older women is usually accomplished in small increments. "Old woman" is a pejorative label; the older a woman becomes, the less credibility she generally has; this is especially true for women of color, poor women, lesbians, and women who are physically challenged. While aging is a biological phenomenon, ageism is socially constructed. Specifically, under patriarchy, older women are seen as a burden, desexualized and segregated by both men and younger women. They are usually not taken very seriously, nor seen as a threat. This course will explore the issues related to social, psychological, political and economic factors that are major determinants to the well-being of aging women based upon race, gender, sexual orientation, disabilities and class inequities.

PREREQUISITES: SOSA 1002.03 and SOSA 1003.03, or 2 credits in Women's Studies

EXCLUSIONS: SOSA 3245.03, NURS 4370/5850.03

FORMATS: Lecture | Seminar | Discussion

GWST 3911 Gender in Theatre: A Cross-Cultural Survey

CREDIT HOURS: 3

This seminar course examines the roles gender has played in the shaping of world theatre alongside the roles the theatre has played in the shaping of various cultural conceptions of gender. By exploring plays and performances from Europe, North America, China, Japan, India, Iran and/or other traditions, we will strive to understand the ways in which various forms of representation reflect their cultures' governing images of masculinity and femininity. In the process, we will interrogate the historical and cultural variability of the notion of 'gender' itself. The main objective of the seminar will be to ask how gender determines performers' choices in various cultures, and to see how gender itself can actually be shaped by performance.

PREREQUISITES: None, although a background in Gender and Women's Studies, Theatre or Dramatic Literature will be an asset.

CROSSLISTED: THEA 3911.03

FORMATS: Lecture | Seminar

GWST 3912 Gender Theory and Contemporary Performance

CREDIT HOURS: 3

This seminar course offers students an opportunity to encounter some of the most provocative and challenging gender theory of recent years in relation to contemporary theatre, film and performance art. Students will read considerations of the relationship between gender, performance and identity by such authors as Jacques Lacan, Michel Foucault, Hélène Cixous, Luce Irigaray, Julia Kristeva, Judith Butler, Peggy Phelan and Camille Paglia, among others. Alongside these works, we will examine contemporary performances, from the popular to the oppositional. Through this intertextual exploration of theory and performance, we will aim to expand our understanding of the ways in which gender roles are created, maintained, questioned and changed in contemporary culture(s).

GWST 4000 Directed Readings in Gender and Women's Studies

CREDIT HOURS: 3

Advanced readings and research in Gender and Women's Studies on selected topics. Students may take appropriate courses in other Departments under these

numbers, with the permission of the Instructor and the Gender and Women's Studies Coordinator, or they may construct their own reading list and research project in consultation with an appropriate faculty member, and the Coordinator. To find out how to register in one of these courses, please consult department. NOTE: Course Details listed here also apply to GWST 4100.
PREREQUISITES: Permission of the GWST Coordinator and instructor
RESTRICTIONS: Restricted to senior students. Signature Required.

GWST 4100 Directed Readings

CREDIT HOURS: 3

See GWST 4000.

PREREQUISITES: Permission of the GWST Coordinator and instructor

GWST 4116 Contemporary Issues in Gender and Development

CREDIT HOURS: 3

The course critically examines how development processes affect women and men and gender relations. Many development projects and policies have had a negative impact on women. The course provides a theoretical and conceptual grounding in gender/women and/in development, explores the gendered impact of policies and processes and examines issues such as governance, HIV/AIDS, and conflict.

PREREQUISITES: INTD 2001.03

CROSSLISTED: INTD 3116.03

FORMATS: Seminar

GWST 4150 Special Topics in Gender and Women's Studies I

CREDIT HOURS: 3

In this seminar course, students will explore some of the current research on a focused topic in Gender and Women's Studies or gender theory. Topics may be drawn from such areas as queer theory, gender and embodiment, contemporary theory of sexuality, representations of gender, women and eating disorders, postcolonial feminist theory, and so on. The course will be directed to majors and honours students in Gender and Women's Studies, but will be open to qualified students from other disciplines.

PREREQUISITES: One full credit in Gender and Women's Studies or permission of instructor

FORMATS: Seminar

GWST 4151 Special Topics in Gender and Women's Studies 2

CREDIT HOURS: 3

In this seminar course, students will explore some of the current research on a focused topic in women's studies or gender theory. Topics may be drawing from such areas as queer theory, gender and embodiment, contemporary theory of sexuality, representations of gender, women and eating disorders, postcolonial feminist theory, and so on. FORMATS: Seminar

GWST 4250 Québec women Writers

CREDIT HOURS: 3

This course will explore the condition of women as revealed in texts by Québec women writers. In any given year different writers and time periods will be covered, and a variety of genres may be included. Approved with Canadian Studies.

PREREQUISITES: 3000-level French literature course, preferably French Canadian, or instructor's permission.

CROSSLISTED: FREN 4904

FORMATS: Lecture | Discussion

GWST 4300 Introduction to Women and the Law

CREDIT HOURS: 3

The course begins with a focus on feminist legal theory, and the integration of feminism with issues of race, class, sexual orientation, and disability. The second major focus is on equality rights in Canada, from the early cases to current concepts of equality under the Charter. The course then considers the impact of feminist legal theories on particular areas of the law. This is followed by student class presentations on major paper topics.

PREREQUISITES: This class is open to all 2nd and 3rd year Law students and all students eligible to take classes from the classes listed as Gender and Women's Studies core classes. However, this is a seminar class and is limited to a total of 18 students from Law and Gender and Women's Studies combined. Therefore, available spaces may be limited.

GWST 4303 The Birth of Pop: How visual Culture Makes Meaning

CREDIT HOURS: 3

Contemporary western society is saturated with visual images of all kinds: from oil painting to pornography. Visual culture is not only becoming more diverse but also increasingly globalized. For these reasons alone, the study of popular visual culture is an important pursuit. But popular images, like all visual images, also carry meaning and generate effects. The first part of this course explores the origins of mass popular culture in 19th Century Britain. Through case studies, suggesting that Western ideas about mental health, gender, romance, weddings and marriage emerged and were transmitted through Victorian visual culture, students learn to see connections between the popular culture of the past and contemporary visuality. Students will also critique the development of cultural studies as a discipline and form their own theoretical positions. In the second part, students will conduct their own self-directed primary research into a visual popular culture topic of their choosing. In the final weeks of the course, students will be asked to reflect on the course as a whole, consolidate what they have learned, and articulate the connections (or disruptions) they see between historical and contemporary theory and practice. This course is ideally suited to students who want to incorporate visual or popular culture sources in their Honours or MA thesis.

PREREQUISITES: HIST 2900.03 or GWST 2900.03 or HIJST 3303.03 or GWST 3303.03

CROSSLISTED: HIST 4303.03

FORMATS: Seminar

GWST 4315 Women's Suffrage From The French Revolution To World War I

CREDIT HOURS: 3

The question of women's participation in representative government first emerged during the French Revolution but by 1914, only two European countries had granted women the right to vote. This seminar explores the suffrage movement in the nineteenth century and the obstacles in the process of women's enfranchisement.

PREREQUISITES: A modern European history course above the introductory level

CROSSLISTED: HIST 4613.03

FORMATS: Seminar

GWST 4330 Topics in the History of Sexuality

CREDIT HOURS: 3

This seminar is intended for senior undergraduates. The specific content of the course varies from year to year, with a general focus on comparative, historiographic and theoretical issues relating to the history of sexuality. Topics may include: the rise and fall of schools of sexology as embodied by Ellis, Freud and Kinsey; sexual violence and harassment; the commodification of sexuality; the history of the body; sexuality and colonialism; gay and lesbian subcultures; and the intersection of class, race and gender in sexual experiences, discourses and communities.

PREREQUISITES: HIST 2614, GWST 2300, HIST 2615, GWST 2301, HIST 3350, GWST 3300, HIST 3013 or GWST 3013

CROSSLISTED: HIST 4614.03

FORMATS: Seminar

GWST 4355 Narrative Strategies in Nineteenth-Century Music: Gender, Identity, and Social Politics

CREDIT HOURS: 3

An interdisciplinary survey of nineteenth-century instrumental music, focusing on the narrative potential of nineteenth-century musical conventions and their relationship to other aspects of nineteenth-century Western culture. Representative musical works will be studied within the context of broader social and cultural issues, including gender, race, class, sexuality, nationality, ethnicity, and identity.
