This course is the second course in a series that focus on the social, behavioural, and administrative responsibilities of a pharmacist. Each course will include learning about the principles of professionalism, ethics, and leadership. During this course, students will cover topics including cultural competency and diversity, approaches to modern medicine and pharmacotherapy, pharmacy law, and regulation of the profession.

FORMATS: Lecture | Lab

PHAR 1073 Skills Lab 1

CREDIT HOURS: 3

Introduction to Pharmacy Practice is the first of 8 skills lab courses in the curriculum. Students will explore the legal, ethical and practical aspects of pharmacy practice and learn to manage a safe and effective medication distribution system. Students will learn fundamental structures and skills necessary for effective communication in pharmacy practice, including best possible medication histories and over-the-counter medication consultations. Students will learn and demonstrate proficiency in Medical Terminology.

PHAR 1074 Skills Lab 2

CREDIT HOURS: 3

Students will learn the fundamentals of the Pharmacist's Patient Care Process and further develop communication strategies and structures to effectively assess and communicate with patients. Students will have the opportunity to apply therapeutic content learning in PBL to various consultations including new prescription consultations. Students will be introduced to basic concepts of patient assessment, physical assessment and clinical documentation. Students will assess, identify and manage common drug-related problems in patient encounters related to OTC consultations, prescription therapy and drug interactions.

FORMATS: Lecture | Lab

PHAR 1075 Skills Lab 3

CREDIT HOURS: 3

Foundations of Calculations and Compounding, students will learn the fundamentals of pharmacy calculations and fundamental methods of compounding for day-to-day pharmacy practice. Students will explore compounding literature in order to gain skills in researching formulas and ingredient information. At the end of this course, students will be competent in processing prescriptions for and compounding selected dosage forms for pharmacy practice.

FORMATS: Lecture | Lab

PHAR 1083 Introduction to Pharmacy Practice Experience: Community

CREDIT HOURS: 4

This four-week (40 hours per week) introductory rotation provides pharmacy students with an opportunity to contribute to patient care in a community pharmacy setting. Pharmacy students will build upon the knowledge, skills and abilities they have developed during the first year of the Doctor of Pharmacy program. Opportunity will be provided to help pharmacy students cultivate their patient care skills and begin to gain personal clinical experiences working with a variety of patients and other members of the healthcare team encountered in a community pharmacy. Students will begin to make health care decisions with the help and guidance of a pharmacist preceptor. The Pharmacist's Patient Care Process, pharmacy law and ethics, medication coverage in Canada, the operation of a community pharmacy, case presentations, drug information, quality assurance and interprofessional practice are key areas of this rotation. Students are required to travel to sites outside the Halifax area and are responsible for all associated costs.

PREREQUISITES: Successful completion of first year classes (See College of Pharmacy Regulations)
FORMATS: Experiential Learning

PHAR 1183 Orientation to Practice Experience

CREDIT HOURS: 0

FORMATS: Lecture

PHAR 1283 Orientation to Practice Experience Course 2

CREDIT HOURS: 0

FORMATS: Lecture

PHAR 2013 Critical Appraisal Series 2A

CREDIT HOURS: 2

Students are introduced to clinical research methods with emphasis on understanding various study designs and related principles of biostatistics and their applications to research studies. There will be a focus on the critical appraisal of research using different study designs, including but not limited to randomized controlled trials.

PREREQUISITES: Successful completion of all first-year Pharmacy classes.

FORMATS: Lecture | Tutorial

PHAR 2014 Critical Appraisal Series 2B

CREDIT HOURS: 2

This course advances and reinforces the topics learned in previous courses in the Critical Appraisal Series. The course focuses on research methods and biostatistics seen in various trial designs. Students learn to critically evaluate various research designs and their findings commonly used in pharmaceutical and pharmacy research. Built-in are more opportunities to apply knowledge and abilities through assignments and group work.

PREREQUISITES: Successful completion of all first-year Pharmacy classes

FORMATS: Lecture | Tutorial

PHAR 2041 Special Considerations in Pharmacotherapeutics: Pregnancy, Lactation and Pediatrics

CREDIT HOURS: 1

PHAR 2041 is a focused pharmacotherapeutics course module that focuses on physiological changes and drug use principles and management during pregnancy, lactation and growth and development in children. Students will be introduced to common conditions and complications in pregnancy. Special nutritional needs and use of vitamins and supplements for these special populations will be addressed. Assessment and management of common symptoms, conditions and infections in pediatric patients will be discussed. Current childhood immunization schedules and vaccine administration issues in children will be reviewed.

PREREQUISITES: Successful completion of all first-year Pharmacy classes

FORMATS: Lecture

PHAR 2042 Special Considerations in Pharmacotherapeutics – Substance Use Disorders

CREDIT HOURS: 1

PHAR 2042 is a focused pharmacotherapeutics course module relating to the background and management of substance use disorders. Students will be introduced to the basic concepts of substance use disorders including the scope of the problem, the pharmacists' role in management and education, as well as legal and ethical considerations. Assessment and management of commonly used substances including alcohol, benzodiazepines, opioids, stimulants, hallucinogens, volatile solvents, performance enhancing drugs, and cannabinoids will be addressed. Skills related to patient assessment and motivational interviewing will be introduced and applied. Relevant scope of practice activities such as minor ailments assessment, prescribing, and smoking cessation counselling will be discussed. Students will gain a deeper understanding of the stigma people who use substances face, and the potentially challenging scenarios clinicians may face. Resources and programs available for the management of substance use disorders will be reviewed, and the voices and perspectives of people with lived experience of substance use and marginalization will be included.

PREREQUISITES: Successful completion of all first-year Pharmacy classes.

FORMATS: Lecture

PHAR 2051 Integrated PBL-3: Cardiovascular Diseases, Endocrine Disorders, Integration

CREDIT HOURS: 9

PHAR 2051 Integrated PBL-3. This course addresses cardiovascular diseases, diabetes, thyroid conditions, and their management. Students learn the medicinal chemistry, pharmaceuticals, biopharmaceuticals and pharmacokinetics, and pharmacology, as well as the pathophysiology and pharmacotherapeutic principles pertaining to the problems and products discussed. Students will apply cumulative knowledge to a complex patient case.

PREREQUISITES: Successful completion of all first-year Pharmacy classes

FORMATS: Lecture | Tutorial

PHAR 2052 Integrated PBL-4: Contraception, Osteoporosis, Menopause, Infectious Disease 1, Pain, Integration

CREDIT HOURS: 9

This course encompasses issues such as contraception, osteoporosis and menopause; common infectious disease states including colds/influenza, otitis media and pneumonia; acute and chronic pain of various origins and the management of these conditions. Students learn the medicinal chemistry, pharmaceuticals, biopharmaceuticals and pharmacokinetics, and pharmacology, as well as the pathophysiology and pharmacotherapeutic principles pertaining to the problems and products discussed. Students will apply cumulative knowledge to a complex patient case.

PREREQUISITES: Successful completion of all first-year Pharmacy classes

FORMATS: Lecture | Tutorial

PHAR 2063 Social, Behavioural, and Administrative Pharmacy 3

CREDIT HOURS: 3

This course will build on topics covered in PHAR1061 and PHAR1062 such as professionalism, ethics, and leadership. Students will analyze various aspects related to health care economics and pharmacoeconomics including supply and demand factors, third party prescription insurance plans and payment policies, drug use management strategies, and pharmacoeconomic analyses and concepts.

PREREQUISITES: Successful completion of all first-year Pharmacy classes

FORMATS: Lecture | Tutorial

PHAR 2064 Social, Behavioural, and Administrative Pharmacy 4

CREDIT HOURS: 3

This course will build on concepts taught in other Social, Behavioural, and Administrative Pharmacy courses, but will have a focus on various aspects of pharmacy management. Topics covered include basic responsibility of management; marketing, financial, and human resource management in pharmacy; and a pharmacist's role as manager.

PREREQUISITES: Successful completion of all first-year Pharmacy classes

FORMATS: Lecture | Tutorial

PHAR 2073 Skills Lab 4

CREDIT HOURS: 3

In Skills Lab 4, students will build on the fundamental skills introduced in previous skills lab courses. Students will have the opportunity to apply therapeutic content learning in PBL to various consultations including over the counter and new prescription consultations at a more challenging level and will be introduced to the monitoring consultation. Students will apply basic concepts of patient assessment, physical assessment and laboratory data interpretation related to therapeutic areas taught in PBL. Students will be introduced to Medication Reconciliation, Pharmacist Prescribing and answering drug information questions. Students will revisit prescription processing using pharmacy software in relation to clinical assessment and documentation.

PREREQUISITES: Successful completion of all first-year Pharmacy classes

FORMATS: Lecture | Lab | Tutorial

PHAR 2074 Skills Lab 5

CREDIT HOURS: 3

In Skills Lab 5, students will build on the skills introduced in Skills Lab 4. Students will have the opportunity to apply therapeutic knowledge learned in PBL to various clinical scenarios including over the counter and new prescription consultations at a more challenging level and will be introduced to the monitoring consultation. Students will apply basic concepts of patient assessment, physical assessment and laboratory data interpretation related to therapeutic areas taught in PBL. Students will be introduced to the Focused Medication History and online Adverse Reaction Reporting. Students will revisit prescription processing using pharmacy software in relation to clinical assessment and documentation.

PREREQUISITES: Successful completion of all first-year Pharmacy classes

FORMATS: Lecture | Lab | Tutorial

PHAR 2083 Introductory Pharmacy Practice Experience: Hospital

CREDIT HOURS: 4

This four-week introductory rotation provides students with an opportunity to actively participate in pharmacy patient care within a hospital pharmacy practice setting. Pharmacy students will build upon the knowledge, skills, and abilities they have developed during the first two years of the Doctor of Pharmacy program. Opportunity will be provided to allow pharmacy students to continue to cultivate their patient care skills and gain personal clinical

experiences working with a variety of patients and other members of the healthcare team within a hospital setting. Students will begin to make healthcare decisions with the help and guidance of a pharmacist preceptor. Specific units will focus on: the role of the hospital pharmacist as part of the healthcare team; understanding the patient chart; documentation of patient care; applying the Pharmacist's Patient Care Process; ordering and interpreting lab values as required for the management of drug therapy; case presentations; drug information; medication safety; and interprofessional practice. Students are required to travel to sites outside the Halifax area and are responsible for all associated costs.

PREREQUISITES: Successful completion of all second year Doctor of Pharmacy courses.

FORMATS: Experiential Learning

PHAR 2183 Orientation to Practice Experience Course 3

CREDIT HOURS: 0

FORMATS: Lecture

PHAR 2283 Orientation to Practice Experience Course 4

CREDIT HOURS: 0

FORMATS: Lecture

PHAR 3001 Research and Scholarly Studies Elective

CREDIT HOURS: 3

This course introduces the undergraduate pharmacy student to research skills through participation in a research or scholarly project in an area of pharmacy or health-related research that is of interest to the student. The student will work with a faculty supervisor on a project in areas such as pharmaceutical sciences, social, behavioural and administrative pharmacy, pharmacy practice, pharmacy educational research or program evaluation. Given the time allotted, it is reasonable that the student may participate in a specific part of the research process, for example, any one or more of the following: a review of the background literature, preparing a research ethics submission, identifying appropriate research methods, helping with data collection and/or data analysis, developing a decision aid for pharmacy practice etc. The expectation is, however, that the student will understand how their specific project fits within the supervisor's larger research or scholarly project.

PREREQUISITES: Successful completion of all second-year Pharmacy Classes

FORMATS: Lecture

PHAR 3002 Introduction to Pharmacy Home Health Care Elective

CREDIT HOURS: 3

This course introduces the undergraduate pharmacy student to the home healthcare aspect of community pharmacy. They will learn about common services and products available to patients that these specialty pharmacy teams provide including, but not limited to, ostomy, catheters & incontinence aids, as well as mobility aids. Students will learn the pharmacist's role in the provision of these services including when to refer patients to another health care professional.

PREREQUISITES: Successful completion of all second-year Pharmacy Classes

FORMATS: Lecture

PHAR 3003 Antimicrobial Resistance, Antimicrobial Stewardship, and Advanced Infectious Diseases

CREDIT HOURS: 3

PHAR 3003.03 is an elective course that builds on core competencies for pharmacists in the areas of antimicrobial resistance, antimicrobial stewardship, and infectious diseases. This elective course aims to prepare students to engage in antimicrobial stewardship initiatives and promote appropriate antimicrobial use in hospital and community settings. In addition, students will also apply principals of antimicrobial stewardship and gain advanced knowledge of pharmacotherapy for management of select infectious diseases through discussion of patient cases. This course was developed using the World Health Organization's "Health Workers' Education and Training on Antimicrobial Resistance" curricula guide.

PREREQUISITES: Successful completion of all second-year Pharmacy Classes

FORMATS: Lecture

PHAR 3004 Pharmacy Elective 4

CREDIT HOURS: 3

Consult Department

PREREQUISITES: Successful completion of all second-year Pharmacy Classes

FORMATS: Lecture

PHAR 3005 Pharmacy Elective 5

CREDIT HOURS: 3

Consult Department

PREREQUISITES: Successful completion of all second-year Pharmacy Classes

FORMATS: Lecture

PHAR 3013 Critical Appraisal Series 3A

CREDIT HOURS: 2

This course advances and reinforces the topics learned in previous courses in the Critical Appraisal Series. The course will focus on applying the tenets of evidence-based clinical practice. Through a journal club setting, students will evaluate the strengths and weaknesses seen in the literature as they relate to a clinical situation.

PREREQUISITES: Successful completion of all second-year Pharmacy classes

FORMATS: Lecture | Tutorial

PHAR 3014 Critical Appraisal Series 3B

CREDIT HOURS: 3

This is a final installment of the Critical Appraisal Series. Students will combine their skills from the previous courses in this series, as well as knowledge and skills derived from their problem-based learning curriculum and skills lab courses in a variety of tasks over the term. The ability to follow an evidence-based approach for supporting clinical decisions will be emphasized.

PREREQUISITES: Successful completion of all second-year Pharmacy classes

FORMATS: Lecture | Tutorial

PHAR 3041 Special Considerations in Pharmacotherapeutics: Geriatrics

CREDIT HOURS: 1

PHAR 3041 is a focused pharmacotherapeutics course module relating to the management of common issues and conditions in elderly patients. Students will be introduced to concepts related to physiological changes in aging and how drug response may be affected. Key concepts relevant to the care of elderly patients including fitness, frailty, functional ability, social vulnerability, elder abuse and therapeutic decision making will be addressed as it applies to pharmacy practice. Students will be exposed to the concept of polypharmacy and the basis for medication review as part of the comprehensive geriatric assessment. The assessment and management of common conditions such as cognition, continence and falls will be reviewed and will complement topics covered in PBL cases in PHAR3052. Special nutritional challenges in elderly patients will also be examined. This course will further compliment general knowledge in PBL.

PREREQUISITES: Successful completion of all second-year Pharmacy classes

FORMATS: Lecture

PHAR 3051 Integrated PBL 5: Infectious Disease 2, Autoimmune, Genitourinary/Renal/Liver, Integration

CREDIT HOURS: 9

In this course student learning of infectious diseases and their management continues. Autoimmune diseases, men's health issues related to the genitourinary tract, liver and kidney disease and their respective managements are other foci of learning. Students learn the medicinal chemistry, pharmaceuticals, biopharmaceuticals and pharmacokinetics, and pharmacology, as well as the pathophysiology and pharmacotherapeutic principles pertaining to the problems and products discussed. Students will apply cumulative knowledge to a complex patient case.

PREREQUISITES: Successful completion of all second-year Pharmacy classes

FORMATS: Lecture | Tutorial

PHAR 3052 Integrated PBL 6: CNS, Oncology, Integration

CREDIT HOURS: 9

This course focusses on central neurologic and behavioural disorders and pathocytologic disorders and their respective managements. Students learn the medicinal chemistry, pharmaceuticals, biopharmaceuticals and pharmacokinetics, and pharmacology, as well as the pathophysiology and pharmacotherapeutic principles pertaining to the problems and products discussed. Students will apply cumulative knowledge to a complex patient case.

PREREQUISITES: Successful completion of all second-year Pharmacy classes

FORMATS: Lecture | Tutorial

PHAR 3061 Social, Behavioural, and Administrative Pharmacy 5

CREDIT HOURS: 3

This course will build on topics covered in previous Social, Behavioural, and Administrative Pharmacy courses focusing on the issues surrounding the development of community and hospital pharmacy practices as well as how to develop, plan, implement, and evaluate patient care services.

PREREQUISITES: Successful completion of all second-year Pharmacy classes

FORMATS: Lecture | Tutorial

PHAR 3062 Social, Behavioural, and Administrative Pharmacy 6

CREDIT HOURS: 3

The final course in the Social, Behavioural, and Administrative Pharmacy series will build on concepts taught in previous courses but will have a focus on various aspects of pharmacy management. Topics covered include bioethics and the similarities and differences between the management of hospital and community pharmacies.

PREREQUISITES: Successful completion of all second-year Pharmacy classes

FORMATS: Lecture | Tutorial

PHAR 3073 Skills Lab 6

CREDIT HOURS: 3

In Skills Lab 6, students will build on the fundamental skills introduced in Skills Lab 5 and previous Skills Lab courses. Students will have the opportunity to apply therapeutic content learning in PBL to various consultations including over the counter and new prescription consultations, monitoring consultations and answering drug information questions at a more challenging level. Students will apply basic concepts of patient assessment, physical assessment and laboratory data interpretation related to therapeutic areas taught in PBL. Students will be introduced to how to conduct a Comprehensive Medication Review and how to effectively communicate with other health care providers in the provision of patient care. Students will revisit prescription processing using pharmacy software in relation to clinical assessment and documentation.

PREREQUISITES: Successful completion of all second-year Pharmacy classes

FORMATS: Lecture | Lab

PHAR 3074 Skills Lab 7

CREDIT HOURS: 2

In Skills Lab 7- Immunization and Injection Administration Training for Pharmacy Students, students will build on the fundamental communication skills introduced in Skills Lab 6 and previous Skills Lab courses. This course will provide the knowledge and skills needed to administer vaccines and medications by injection safely and effectively in selected populations. NOTE: Prior to administering injections in a practice setting students must fulfill regulatory requirements as outlined by the pharmacy regulatory body of the jurisdiction in which they wish to practice.

PREREQUISITES: Successful completion of all second-year Pharmacy Classes

FORMATS: Lecture | Lab

PHAR 3075 Skills Lab 8

CREDIT HOURS: 3

In Skills Lab 8, students will build on the skills introduced in the previous Skills Lab courses. Students will have the opportunity to apply therapeutic content learning in PBL to various consultations including over the counter and new prescription consultations, monitoring consultations and answering drug information questions at a more challenging level. Students will apply patient assessment, physical assessment and laboratory data interpretation related to therapeutic areas taught in PBL. Students will have the opportunity to demonstrate effective communication, both oral and written, with other health care providers in the provision of patient care. Students will also have the opportunity to demonstrate evidence-based communication to patients and their caregivers regarding risks and benefits of medication. Students will encounter more complex patient cases and have the opportunity to apply the principles of deprescribing and perform medication reviews.

PREREQUISITES: Successful completion of all second-year Pharmacy classes

FORMATS: Lecture | Lab

PHAR 4080 Practice Experience Program (PEP) IV

CREDIT HOURS: 4.5

This clinical rotation focuses primarily on the provision of patient focused pharmacy care in hospital or long-term care practice. The student will apply the knowledge, skills and values that have been learned in their academic study and previous PEP rotations, using a patient-centered approach. Students will serve as a member of the healthcare team incorporating professionalism, ethical principles, drug information, patient education and health promotion in the application of patient focused pharmacy care. Students will be required to complete a full patient care work-up on several patients and present the cases to a health professional audience. Students will expand their educational role by preparing and presenting an in-service on a relevant topic to a health professional audience. Students are required to travel to sites outside the Halifax area and are responsible for all associated costs.

PREREQUISITES: successful completion of fourth year classes (see College of Pharmacy Regulation F2)

PHAR 4081 Advanced Pharmacy Practice Experience: Collaborative Health Care Setting

CREDIT HOURS: 12

This twelve-week clinical rotation focuses on the provision of patient focused pharmacy care in a collaborative healthcare practice setting e.g. hospital, long-term care, ambulatory or primary care sites. Pharmacy students will apply the knowledge, skills and abilities they have developed during the past three years of the Doctor of Pharmacy program to further refine their clinical skills in preparation to enter independent practice. Students will serve as an active member

of the healthcare team incorporating professional, legal and ethical principles; identifying and resolving drug related problems; providing drug information and patient education. Using the Pharmacist's Patient Care Process learned at the College of Pharmacy students will gain clinical experience providing safe and effective, patient focused and evidence-informed care to a variety of patients with acute and chronic conditions; across the lifespan; and across all levels of care offered within the institution as well as for patients in the transitions between levels of care. Students are required to travel to sites outside the Halifax area and are responsible for all associated costs.

PREREQUISITES: Successful completion of all third-year Pharmacy classes and any prior scheduled fourth year rotations.

FORMATS: Experiential Learning

PHAR 4082 Advanced Pharmacy Practice Experience: Community Setting

CREDIT HOURS: 11

This twelve-week clinical rotation focuses on the provision of patient focused pharmacy care in a community pharmacy practice setting. Pharmacy students will complete rotations at community pharmacy practice sites offering an expanded scope of pharmacy services. Pharmacy students will build upon the knowledge, skills and abilities they have developed during the first three years of the Doctor of Pharmacy curriculum to further refine their clinical skills in preparation to enter independent practice. Students will serve as an active member of the healthcare team and provide safe and effective care under the supervision of a pharmacist preceptor to a variety of patients presenting with chronic and acute conditions across the lifespan. Students are required to travel to sites outside the Halifax area and are responsible for all associated costs.

PREREQUISITES: Successful completion of all third-year Pharmacy classes and any prior scheduled fourth year rotations.

FORMATS: Experiential Learning

PHAR 4083 Advanced Pharmacy Practice Experience Elective

CREDIT HOURS: 9

This eight-week advanced pharmacy practice rotation will focus on an area of pharmacy practice or research that is of personal interest to the pharmacy student. Rotations may be completed in a direct or non-direct patient care setting. Preceptors may be pharmacists, other health professionals or suitable supervisors who are committed to learning and teaching with a fourth year pharmacy student. Students will explore and/or develop both traditional and non-traditional roles of pharmacists within either a Canadian or global health care context. Pharmacy students will contribute meaningfully and productively to the patient care and/or professional activities of the rotation site. Students will be required to design, develop and complete a project for the rotation site. Students are required to travel to sites outside the Halifax area and are responsible for all associated costs.

PREREQUISITES: Successful completion of all third-year Pharmacy classes and any prior scheduled fourth year rotations.

FORMATS: Experiential Learning

PHAR 4085 Practice Experience Program (PEP) V

CREDIT HOURS: 4.5

This clinical rotation focuses primarily on the practical provision of patient centered pharmacy care in community practice. As with the hospital rotation, students will apply the knowledge, skills and values that have been acquired throughout academic study and previous PEP rotations using a patient-centered approach. Interaction with family physicians and other healthcare professionals in the community is a key component of this rotation. Students should have the opportunity to interact with patients in the physician's office, pharmacy and/or home environment. Students will serve as a member of the healthcare team and incorporate professionalism, ethical principles, drug information, patient education and health promotion in the application of patient focused pharmacy care. Students will be required to complete full patient care work-ups on several patients and present the cases to a health professional audience. Students will expand their educational role by preparing and presenting a relevant health promotion/disease prevention topic to a community audience. Students are required to travel to sites outside the Halifax area and are responsible for all associated costs.

PREREQUISITES: Successful completion of fourth year classes (see College of Pharmacy Regulation F2)

PHAR 4181 Orientation to Practice Experience

CREDIT HOURS: 0

FORMATS: Lecture

PHAR 4281 Orientation to Practice Experience

CREDIT HOURS: 0

School of Social Work

Location:
Mona Campbell Building
1459 LeMarchant Street
Suite 3201
PO BOX 15000
Halifax NS
B3H 4R2

Phone Number: (902) 494-3760
Fax Number: (902) 494-6709
Email Address: social.work@dal.ca
Website: www.socialwork.dal.ca

Introduction

The School of Social Work's vision is a commitment to building a socially just society, defined as one that upholds and validates the values of equality, diversity, inclusiveness, democracy and concern for human welfare. We manifest and advance curricula, scholarship and school culture that are congruent with those values.

The BSW degree program is accredited by the Canadian Association for Social Work Education. It embraces a critical and anti-oppressive approach to social work practice that includes an emphasis on social policy, research skills and critical analysis, professional values, theoretical perspectives and practice methods. While the program has evolved within the context of the people, communities and service network of the Maritime Provinces, graduates are qualified to practice social work throughout Canada and beyond.

BSW Delivery Options

The BSW is a 120 credit hour degree program and is offered on campus and by distance delivery online. Both delivery methods include a 700 hour community based field placement experience. The application deadline is February 15th of each year.

Continuing Education

The School offers a Continuing Education Program (non-credit) of thematic workshops.

Nova Scotia College of Social Workers

Provincial legislation requires that only persons who are licensed with the Nova Scotia College of Social Workers (NSCSW) can practice as social workers within Nova Scotia. To become fully licensed and use the title of Social Worker after award of the BSW degree, at least 3,858 hours of paid supervised social work experience is necessary. For more information please contact NSCSW at <http://nscsw.org/>

Agency Field Instructors

Many individuals throughout the municipality, province, and country contribute to the education of Social Work students through offering and supervising student placements. They represent a wide range of agencies and organizations including: community based, non-profit, government, physical/mental health and addiction prevention and treatment services. Their invaluable assistance is gratefully acknowledged and appreciated.

Admissions

Information on academic preparation, admission and application procedures is contained in the Admission Requirements section of the calendar. Enrolment is limited to a specified number of places that are offered once a year to the best qualified candidates, selected by the School's Admissions Committee. Equal consideration is given to part-time and full-time applications.

Prior Criminal Conviction

BSW applicants should be aware that a prior criminal conviction may render them unable to obtain a license in their field of study upon graduation, or unable to participate in some clinical field work experiences throughout their course of study.

Affirmative Action

The School of Social Work has an affirmative action policy for applicants who are Acadian, Aboriginal, African Canadian, members of other racially visible groups, and persons with (dis)Abilities and for Lesbian, Gay, Bisexual, Transgender, Two-Spirit, Queer and Intersex (LGBTQQI) people. The school is committed to admitting and graduating the highest possible number of students who qualify under this policy. Members of these groups who have five (30 credit hours) general (non social work) university credits that average B- are encouraged to apply under this policy. Applicants make their request in a place provided on the Social Work Statement cover sheet, which is part of the BSW application package. Each candidate is considered individually on the basis of her/his qualifications, rather than in relation to other applicants. The admissions prerequisites and selection criteria are otherwise the same for all candidates.

Regulations

All Bachelor of Social Work students are required to observe the [University Regulations](#) and [Academic Regulations](#) of Dalhousie University and the Faculty of Health set forth in the annual Undergraduate Calendar.

Grade Point Average Requirements

Faculty of Health's academic regulations applies to the BSW degree requirements. Students require a cumulative GPA of 2.0 to graduate. In addition, the School's grade requirements specified in Items 2 and 3 below apply to components of the Social Work curriculum.

Grade Requirements for Social Work Courses

The minimum requirements for satisfactory completion of a Social Work course is C-. In the case of a core course, a student who earns a grade of less than C-, but is otherwise still eligible to continue in the program, must repeat the course until a grade of C- is attained. In the case of an elective, a student who earns a grade of less than a C-, but is otherwise still eligible to continue in the program, must repeat the same elective or if not offered during the student's course of study, a different elective until a grade of at least C- is attained. Social Work courses are all courses taken under BSW study other than those designated as general admission credits.

Required Withdrawal: Academic Dismissal

A student who fails to meet sessional GPA standards as defined in the Academic Regulations - Faculty of Health must withdraw from the School for at least 12 months. (Please refer to Academic Regulations - Good Standing, Probation and Academic Dismissal, Dalhousie Undergraduate Calendar).

- A student who fails a repeated academic course must normally withdraw from the BSW Program.

Required Withdrawal on Grounds of Unsuitability

See University Regulations: Suspension or Dismissal from a Program on the Grounds of Professional Unsuitability - Faculty of Health.

Consideration of Readmission

Students are normally required to complete their undergraduate studies within ten years of their first registration and comply with the program requirements at the time of first registration. If a student is readmitted and cannot complete the program within 10 years they may be required to comply with the new program requirements.

A. Request for Readmission After Dismissal

Students who have been required to withdraw from the School of Social Work on the basis of academic dismissal may apply for readmission by the annual February 15 admissions deadline date that follows a minimum of 12 month's absence from the School. Due to the competitive nature of the enrolment process, readmission of students is not guaranteed.

B. Request for Readmission After Voluntary Withdrawal

Students in good standing who have not registered in the program for 36 months or less and who wish to be reinstated are required to submit a new application form to be returned with a letter to the Undergraduate Program Coordinator requesting re-admission to resume their BSW degree studies.

Students in good standing who have not registered in the program for 37 months or more and who wish to be reinstated are required to reapply by the February 15 admission deadline date. The application and all supporting documentation must be accompanied by a letter explaining the reasons for the interruption in the student's studies and the decision to request readmission to the BSW degree program.

Appeals

A student wishing to appeal a decision based on School regulations, should consult with the Undergraduate Program Coordinator for advice on appeal procedures.

Duration of Undergraduate Study

Students are normally required to complete the BSW degree within 10 years of their first registration (see Academic Regulation—[Duration of Undergraduate Studies](#)).

Workload Regular Academic Year

30 credit hours per academic year shall be regarded as constituting a normal workload for a full-time student. Permission of the Undergraduate Program Coordinator is required if this workload is to be exceeded, or if the planned workload in any one term (Fall or Winter) would amount to more than 15 credit hours per term.

On-campus, part-time students may register for a minimum of one .03 credit (three credit hours) per term. Part-time status applies to students registered for no more than a total of 2.5 credits in the Fall and/or Winter terms. All new students are required to register in the first Fall term following their acceptance in order to maintain their place in the program.

Workload Summer Session (includes May-June and July-August)

Dalhousie regulations permit students to take two .03 credit (six credit hours) in each of the May-June and July-August parts of Summer term. Social Work students may, following consultation with the Field Coordinator, register for the Field Practicum and Seminar course during this session.

The School usually offers one .03 credit (three credit hours) Social Work elective in the May/June period for BSW campus students, provided that minimum enrollment requirements are met. Students in distance delivery take elective and core courses in the summer sessions. Consult the timetable for current course offerings.

Permission of the Undergraduate Program coordinator is required to exceed the two .03 credit limit for the two summer terms.

Students in Other Degree Programs (applicable for on-campus students only)

Students enrolled in degree programs at Dalhousie may, in conformance with their program regulations, choose their degree electives from Social Work Field of Practice electives. Permission from the instructor is required; course prerequisites and class size limitations apply. Students are able to enroll in Social Work electives only to the maximum credit value allowable for open electives by their degree requirements. Any additional Social Work courses would be considered on the same basis as “No Degree.”

Special Students “Non-Degree” (applicable for on-campus students only)

Social Work courses are not available to persons on a “no degree” basis, with the exception of agency field instructors and other qualified Social Work professionals who are able to satisfy normal admission requirements. Permission of the Undergraduate Coordinator is also required.

Students enrolled in other Social Work degree programs may be permitted to enroll in specific elective courses, by application for admission as a visiting student with letter(s) of permission from the home university. Course prerequisites and size limitations apply. Permission of the Undergraduate Coordinator and the course instructor is required. Further information may be obtained from the Student Services Coordinator.

Deferral Policy

Newly accepted applicants who, for reasons beyond their control, are unable to take up their position on the date from which they were accepted, may request a deferral of one year. No student may receive more than one deferral. Foundational courses begin in September, therefore the deferral would be from September to the following September.

Requests for a deferral of admission should be sent in writing to the Undergraduate Coordinator of the School of Social Work by August 15th for the year in which they were offered admission. When submitting a request for deferral, please clearly state the reason for the deferral and, where relevant or appropriate, provide additional documentation to support the request (for example, medical certificates). All deferrals are subject to the approval of the Undergraduate Program Coordinator.

Audit by Agency Field Instructors

The School of Social Work permits Agency Field Instructors to audit Social Work courses. Prior permission of the instructor is required. In order for the audit to show on a University transcript, the agency field instructor must abide by the audit and fee regulations as outlined in Academic Regulation—[Audit of Courses](#).

Tuition Fees

Detailed information concerning tuition and fees is available in Money Matters at https://www.dal.ca/admissions/money_matters/tuition_payments.html

BSW Degree Program

Program Objectives

Upon successful completion of the BSW program, students will:

1. Have an understanding of equity and justice through critical analysis.
2. Develop intellectual skills, scholarly attributes, and professional characteristics and values, including but not limited to, curiosity, open-mindedness, effective communications, judgment, rigor, respect, humility, embracing of difference, acceptance, integrity, compassion, self-care and ethical action.

3. Develop insight into the complex, contextual, and sometimes contradictory nature of social work theory, practice, policy, ethics and research.
4. Develop practice theory and skills “required to analyze situations, establish accountable relationships, intervene appropriately with clients and related systems and evaluate one’s social work interventions” (CASWE, 2007) This includes an understanding of a range of life events and processes that may impact peoples’ development, personalities and potentials.
5. Develop a critical understanding of the personal and professional “use of self.”

Program Requirements

Program Requirements

The BSW degree is comprised of 120 credit hours

30 credit hours:

These are the basic academic pre-requisite for all applicants to the program.
These are called **Admission Credits**.

60 credit hours:

These are the credits that all students are required to complete within the Dalhousie University BSW Program.
These are called **Social Work Credits**.

30 credit hours:

These are **General Social Sciences Credits** taken outside the BSW program:

1. Some students have more than the 30 Admission Credits at a B- minimum average *before* beginning the BSW program. These General Social Sciences Credits are assessed for eligibility at the time of acceptance to the program from the last 60 credit hours completed. These are called *Admission Transfer Credits*. They may have been completed at Dalhousie or another university. Please see the Admission Transfer Credit Policy below for requirements.
2. Some students undertake the additional 30 General Social Sciences Credits *during* the BSW degree. These are not admission transfer credits. These may be taken at Dalhousie or another university and must be assessed as at or above the 2000 level by Dalhousie University. Please review the academic regulations regarding Letter of Permission in the Academic Calendar.

* Electives external to the School of Social Work or the Faculty of Health taken during the SW program must be assessed at the Dalhousie equivalency of 2000 level or above.

* For electives external to Dalhousie University taken during the SW program please review the academic regulations regarding Letter of Permission in the Academic Calendar.

* For electives external to Dalhousie University taken before admission to the Dalhousie SW program please see the Admission Transfer Credit Policy below.

Admission Transfer Credit Policy

Suitable university credits that have been completed with a minimum grade of 2.7 (or B-) are eligible for admission transfer credit consideration. Community College credits, diploma and certificate work are not eligible for consideration. The following guides the assignment of transfer credit:

1. Applicants who are admitted with the minimum academic requirement of 30 credit hours are not eligible to receive Admission Transfer Credits.
2. For those who have more than the minimum noted in #1, a maximum of 30 General Social Sciences credit hours that are complete at the time of application may be eligible for Admission Transfer Credit consideration.
3. Potential Admission Transfer Credits are assessed for accepted students and only on the last 60 credit hours completed.
4. Those 60 credit hours must have been completed within 15 years of the BSW program start date.
5. Regardless of transfer credit eligibility, all students must complete at least 60 credit hours offered by the Dalhousie SSW to complete the BSW degree.
6. The only exception to the above is students transferring from other BSW university programs. These students will be governed under the Faculty of Health Policy regarding transfer students. To obtain a BSW degree from Dalhousie, at least half the credits must be taken at Dalhousie University. Transfer credit is assigned as fairly and appropriately as possible, although some loss of credit usually occurs

Admission Transfer Credit assessment is completed after the admission process, and only for successful applicants. Admission Transfer Credit is assessed on an individual basis at the School of Social Work.

Required Courses

- SLWK 2010.03: Introduction to Community Social Work
- SLWK 2112.03/2113.03: Development of Canadian Social Work and Social Welfare
- SLWK 2222.03: Advancing Social Justice
- SLWK 2334.03/2335.03: Beginning Social Work Practice or SLWK 2334.03/SLWK 2335.03
- SLWK 2550.03: Indigenizing and Decolonizing Social Work Practice
- SLWK 3032.03/3033.03: Theoretical Foundations of Social Work Practice
- SLWK 3012.03: Perspectives on Social Welfare Policy
- SLWK 3086.03/3087.03: Social Work Research
- SLWK 3220.03: Cross-Cultural Issues in Social Work Practice
- SLWK 4008.03/4009.03: Advanced Social Work Practice
- SLWK 4034.045/4035.045: Field Practicum and Seminar
- Social Work Elective
- Social Work Elective

For distance students the Beginning Social Work Practice course has two course numbers and students must register for both SLWK 2334 and SLWK 2335. The course is a combination of online study in the winter term and a two week on-campus (Dalhousie, Halifax, NS) residency component in the spring session, normally in May.

Interprofessional Health Education

Students are required to maintain enrolment in IPHE 4900 (see calendar section on Health Professions, Interprofessional Health Education) for the duration of their studies. **Please register in IPHE 4900.00 (section 6)** which is a shell course comprised of four interprofessional learning experiences across the BSW degree. Successful completion of this course is a requirement for graduation with a BSW degree.

Course Load and Sequencing

Length of Program

Course load varies from student to student depending on the number of Admission Transfer Credits and full or part-time status. Each student receives a personalized curricular advising form which details course load and sequencing. The minimum length of program is two years taken fulltime.

On-Campus Delivery

- For full-time students the usual load is 15 credit hours (e.g. five .03 credit courses) in the Fall and Winter terms.
- For part-time study the course load may be as minimal as one .03 credit course per term.
- The only Social Work courses offered in the Spring semester consist of one Social Work elective and Field Practicum and Seminar.
- It is important to pay close attention to the pre or co-requisites for each course. These are indicated in the course descriptions.

Distance Delivery

Distance Students are strongly encouraged to maintain their course sequencing schedule. Any changes must be in accordance with pre- and co-requisites as outlined in the calendar and are dependent upon availability of course offerings, especially electives. Students studying by distance are assessed distance delivery fees in addition to tuition.

Registration

Registration is completed online for all students regardless of delivery method. For more information, go to <http://www.dal.ca/registration> and <http://www.dal.ca/online>.

The academic timetable is available online each year. On-campus Social Work courses have section numbers of 01 or 02. Online Distance Social Work courses have section numbers of 07 or 08.

IMPORTANT: Please note that it is not possible to transfer between onsite and the online delivery or to register for courses other than those which apply to the delivery method for which the student has been accepted.

Field Education

The Field Practicum and Seminar course consists of a 700 hour placement at a community agency **plus** participation in a concurrent integrated seminar. For a full explanation of the placement process, roles and responsibilities please download the Field Manual at <https://www.dal.ca/faculty/health/socialwork/programs/field-education/manual.html>

Field Placements are organized by the Field Education Coordinator at the School of Social Work.

Advising Sessions for New Students

New on campus students are expected to attend Orientation which is scheduled prior to the commencement of courses. Students can meet individually with the Student Services Coordinator to review the curriculum advising forms and ask questions pertaining to the BSW program. Distance students are provided with an online orientation and information site and should contact the Distance Education Assistant or the Manager, e-Learning regarding their program schedule and questions.

A comprehensive Field Orientation is also offered later in the 1st year for all campus BSW students and during residency for distance BSW students.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

Course Notes

The following courses are restricted to Social Work students.

SLWK 2010.03: Introduction to Community Social Work.
SLWK 2112.03/2113.03: Development of Canadian Social Work and Social Welfare.
SLWK 2222.03: Advancing Social Justice.
SLWK 2334.03/2335.03: Beginning Social Work Practice.
SLWK 2550.03: Indigenizing and Decolonizing Social Work Practice
SLWK 3012.03: Perspectives on Social Welfare Policy.
SLWK 3032.03/3033.03: Theoretical Foundations of Social Work Practice.
SLWK 3086.03/3087.03: Social Work Research
SLWK 3220.03: Cross-Cultural Issues and Social Work Practice.
SLWK 4008.03/4009.03: Advanced Social Work Practice.
SLWK 4034.045/4035.045: Field Practicum and Seminar.

Electives

In keeping with the overall program goals of the BSW program of SSW, all elective courses are designed to help students develop a critical analysis of the major themes and current issues related to the course topic. In addition, all electives explore the differential impact of social constructs such as race, gender, class, age, sexual orientation, and ability on the particular issue or practice field.

There are no pre or co-requisites for Social Work Field of Practice Electives. The format is generally a combination of lecture, discussions and small group activities. Participation of non-social work students is dependent upon approval of their home School/Department, course enrollment and the permission of the instructor. Not all electives are offered every year; check the timetable for each year's offerings.

Possible Elective Offerings

- SLWK 3110.03: Africentric Perspectives in Social Work
- SLWK 3120.03: International Social Work
- SLWK 3130.03: Gender Based Violence
- SLWK 3135.03: Social Work and Mental Health
- SLWK 3140.03: Crisis Counseling
- SLWK 3145.03: Trauma Informed Practice in Social Work
- SLWK 3150.03: Poverty and Inequality
- SLWK 3200.03: Law and Social Work
- SLWK 3245.03: Queer-Centred Social Work Practice
- SLWK 3250.03: Social Work in Corrections
- SLWK 3270.03: Social Work in Addictions
- SLWK 3290.03: Advanced Counseling in Social Work Practice
- SLWK 3320.03: Social Work and Aging
- SLWK 3330.03: Independent Study
- SLWK 3350.03: Social Work with Groups
- SLWK 3360.03: Social Work and Adolescents
- SLWK 3370.03: Child Welfare
- SLWK 4380.03: Disability Policy and Service

Course Descriptions

SLWK 2010 Introduction to Community Social Work

CREDIT HOURS: 3

Community Development within social work is the facilitation of meaningful change within communities to improve the quality of life for members of those communities. This course considers various conceptions of community, elements of change processes, and specific change strategies.

SLWK 2112 Development of Canadian Social Work & Social Welfare

CREDIT HOURS: 3

This introductory survey course offers a critical examination of the early development of Canadian social work from 1800s-2000s. Secularization and professionalization provide a focus with which to examine early welfare principles, policies, and practices spanning early Indigenous-European relations in the North American colonies through to the emergence of capitalism and industrialization, immigration and urbanization.

CALENDAR NOTES: Students taking this course must register in SLWK 2113 (the second half of the course) in the winter term. Credit will not be granted if courses are not completed consecutively.

COREQUISITES: IPHE 4900

FORMATS: Lecture

SLWK 2113 Development of Canadian Social Work & Social Welfare

CREDIT HOURS: 3

This introductory course reviews contemporary social work politics and discourses from the early 2000s onward through an examination of welfare issues, policies, and specific populations. Topics are explored relative to the histories of professional ethics and regulation in social work. Evolving trends in social work from social media to evidence based practice are also explored.

CALENDAR NOTES: This course is continued from SLWK 2112.03. Credit will not be granted if courses are not completed consecutively.

COREQUISITES: IPHE 4900.00

FORMATS: Lecture

SLWK 2222 Advancing Social Justice

CREDIT HOURS: 3

This course introduces students to the central concepts of a social justice perspective through a deconstruction and reconstruction of various assumptions, practices, and positionalities that advance and/or impede social justice. Rooted in processes of critically reflective analysis this course attends to cognitive, affective, and spiritual learning processes.

SLWK 2333 Beginning Social Work Practice

CREDIT HOURS: 6

NOTE: Course Details listed here also apply to SLWK 2334/SLWK 2335.

CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

PREREQUISITES: /Co-requisite: SLWK 2111, SLWK 2222

SLWK 2334 Beginning Social Work Practice

CREDIT HOURS: 3

This course introduces students to the processes and practices of the social work profession including a range of beginning practice skills, social work values and ethics, the varied contexts of social work practice, and the roles and responsibilities of professional social workers. This multi-faceted course may include course room instruction, simulations, seminars, workshops, contact with practicing social workers, visits to various social service agencies, and exposure to "first voice" experiences. This course requires 40 hours of self-directed learning activity time to be completed outside regularly scheduled class time.

COREQUISITES: SLWK 2112, SLWK 2113, SLWK 2222

PREREQUISITES: SLWK 2112, SLWK 2113, SLWK 2222

FORMATS: Lecture

SLWK 2335 Beginning Social Work Practice

CREDIT HOURS: 3

This course introduces students to the processes and practices of the social work profession including a range of beginning practice skills, social work values and ethics, the varied contexts of social work practice, and the roles and responsibilities of professional social workers. This multi-faceted course may include course room instruction, simulations, seminars, workshops, contact with practicing social workers, visits to various social service agencies, and exposure to "first voice" experiences. This course requires 40 hours of self-directed learning activity time to be completed outside regularly scheduled class time.

COREQUISITES: SLWK 2112, SLWK 2113, SLWK 2222

PREREQUISITES: SLWK 2112, SLWK 2113, SLWK 2222

SLWK 2444 Life Processes: Conceptualizations and practices for Critical Social Work

CREDIT HOURS: 3

This course critically explores a range of life events and processes that may impact peoples' development, personalities and potentials. Attention is given to how ethnicity, race, social class, ability, gender, sexual orientation, age, religion, and other social variables intersect with the individual development. The need for differential reactions from workers in response to clients varied life experiences will also be considered.

PREREQUISITES: /Co-requisite: SLWK 2111, SLWK 2222

SLWK 2550 Indigenizing and Decolonizing Social Work Practice

CREDIT HOURS: 3

Indigenous perspectives and practices for social work are introduced. Using an Indigenizing approach, students will analyze the historical and contemporary experiences of Canada's Indigenous peoples and the implications for social work practice. Students will examine their positionality and the need to critically reflect on and decolonize their practice. Indigenous peoples refers to First Nations, Inuit and Metis peoples throughout Canada as well as the First peoples in other colonized nations.

COREQUISITES: SLWK 2112, SLWK 2113, SLWK 2222

PREREQUISITES: SLWK 2112, SLWK 2113, SLWK 2222

FORMATS: Lecture

SLWK 3012 Perspectives on Social Welfare Policy

CREDIT HOURS: 3

As an introduction to social policy analysis, this course surveys a variety of perspectives on social problems and social policy issues, with a focus on contemporary debates. The impact of policy on service users is a central theme of the course.

PREREQUISITES: /Co-requisite: SLWK 2112, SLWK 2113, SLWK 2222

SLWK 3032 Theoretical Perspectives and Practice in Social Work - Part 1

CREDIT HOURS: 3

This is the first of two consecutive core courses on theoretical concepts, perspectives, and practice. This course introduces the conceptual building blocks of theory, exploring purpose and application in social work. Using ideological and political lenses to understand theory making and implementation, the aim is to demystify the theory/practice relationship.

CALENDAR NOTES: Students taking this course must register in SLWK 3033.03 (the second half of the course) in the winter term. Credit will not be granted if courses are not completed consecutively.

PREREQUISITES: /Co-requisite: SLWK 2112.03/SLWK 2113.06, SLWK 2222.03

FORMATS: Lecture

SLWK 3033 Theoretical Perspectives and Practice in Social Work - Part 2

CREDIT HOURS: 3

This is the second of two consecutive core courses on theoretical concepts, perspectives, and practice. Building on SLWK 3031.03, the focus here is on the analysis of dominant and pathologizing theoretical discourses and their impacts on disadvantaged and marginalized groups. The course includes a number of practice theories using case applications.

CALENDAR NOTES: This course is continued from SLWK 3032.03. Credit will not be granted if courses are not completed consecutively.

PREREQUISITES: /Co-requisite: SLWK 2112.03, SLWK 2113.03, SLWK 2222.03

FORMATS: Lecture

SLWK 3085 Social Work Research

CREDIT HOURS: 6

This is a survey course that presents the core foundations and processes of social work research from a critical perspective. The course will critically explore a diversity of research paradigms, methodologies, methods and designs in order to demystify 'doing research' and contextualize research within the social work world. NOTE: Course Details listed here also apply to SLWK 3086/SLWK3087.

EXCLUSIONS: SLWK 3083 and SLWK 3084

FORMATS: Lecture

SLWK 3120 International Social Work

CREDIT HOURS: 3

FORMATS: Lecture

SLWK 3130 Gender Based Violence

CREDIT HOURS: 3

FORMATS: Lecture

SLWK 3135 SLWK and Mental Health

CREDIT HOURS: 3

FORMATS: Lecture

SLWK 3145 Trauma Informed Practice in Social Work

CREDIT HOURS: 3

This is an introductory course on trauma informed practice in social work which focuses on understanding trauma, coping with trauma, trauma informed care and practice in generalist and community based social work settings. The course will explore how trauma impacts people and communities on personal, interpersonal and societal levels across generations with an emphasis on children/youth, Indigenous peoples, women and other marginalized populations. It will examine the interconnections of social work values with trauma informed practice and explore ways for social work to avoid retraumatizing and revictimizing those we work with. This course will also explore the knowledge and skills needed to help mitigate the impact of working in trauma exposed social work environments. The first class will discuss how course material can be difficult and the importance of addressing trauma as a central aspect of social work practice.

SLWK 3220 Cross-Cultural Issues and Social Work Practice

CREDIT HOURS: 3

This course provides an opportunity to critically examine theoretical frameworks for viewing marginalized racial, ethnic and cultural groups in society, to examine personal values as they relate to the above groups, to develop skills in working effectively with these groups, and to understand related social policies.

PREREQUISITES: SLWK 2222.03, SLWK 2112.03, SLWK 2113.03, SLWK 2334.03, SLWK 2335.03, SLWK 3012.03

SLWK 3270 Social Work in Addiction

CREDIT HOURS: 3

FORMATS: Lecture

SLWK 3300 Independent Study

CREDIT HOURS: 3

FORMATS: Lecture

SLWK 4008 Advanced Social Work Practice

CREDIT HOURS: 3

Building on a number of preceding courses this course considers numerous advanced practice theories and skills including a critical analysis of ethics. Student will become proficient in applying a critical social work practice framework at the beginning practitioners' level.

COREQUISITES: SLWK 3032.03, SLWK 3033.03, IPHE 4900

PREREQUISITES: SLWK 2112, SLWK 2113, SLWK 2222, SLWK 2334, 2335, SLWK 2550

FORMATS: Lecture

SLWK 4009 Advanced Social Work Practice

CREDIT HOURS: 3

Building on a number of preceding courses this course considers numerous advanced practice theories and skills including a critical analysis of ethics. Student will become proficient in applying a critical social work practice framework at the beginning practitioners' level.

CALENDAR NOTES: Part of a multi-term course. Students must also register in SLWK 4008 in the fall term to receive credit for this course.

COREQUISITES: SLWK 3032.03, SLWK 3033.03, IPHE 4900.00

PREREQUISITES: SLWK 2112.03, SLWK 2113.03, SLWK 2222.03, SLWK 2334.03, SLWK 2335.03, SLWK 2550.03

FORMATS: Lecture

SLWK 4010 Advanced Social Work Practice

CREDIT HOURS: 6

Building on a number of preceding courses this course considers numerous advanced practice theories and skills including a critical analysis of ethics. Student will become proficient in applying a critical social work practice framework at the beginning practitioners' level.

COREQUISITES: SLWK 3030, IPHE 4900

PREREQUISITES: SLWK 2111, SLWK 2222, SLWK 2333, SLWK 2444,

SLWK 4033 Field Practicum and Seminar

CREDIT HOURS: 9

NOTE: Course Details listed here also apply to SLWK 4034/SLWK 4035.

COREQUISITES: SLWK 3032.03, SLWK 3033.03, SLWK 3012.03, SLWK 3086.03, SLWK 3087.03, SLWK 3220.03, SLWK 4008.03, SLWK 4009.03

PREREQUISITES: SLWK 2010.03, SLWK 2112.03, SLWK 2113.03, SLWK 2222.03, SLWK 2334.03, SLWK 2335.03, SLWK 2550.03

SLWK 4034 Field Practicum & Seminar

CREDIT HOURS: 4.5

This course includes a 700 hour agency based practice placement, integrated seminars and the opportunity to develop a broad range of practice knowledge and skills sufficient to meet the requirements of an entry level professional position. The field practicum is done at the end of a student's program. Students are responsible to stay in touch with the Field Coordinator during the coordination process and comply with various requirements of placement sites (for example: immunizations, CRC, Child Abuse Registry). Some sites may require separate disability insurance in lieu of eligibility for Worker Compensation Coverage. Such costs are the responsibility of the student. NOTE: Course Details listed here also apply to SLWK 4034/SLWK 4035.

COREQUISITES: SLWK 3032, SLWK 3033, SLWK 4008, SLWK 4009

PREREQUISITES: SLWK 2112, SLWK 2113, SLWK 2222, SLWK 2334, SLWK 2335, SLWK 2550

FORMATS: Lecture

SLWK 4035 Field Practicum & Seminar

CREDIT HOURS: 4.5

Introduction

The Faculty of Management is a community for individuals and organizations who have a sense of purpose and want to make a positive contribution to the world around them. For more than a century, this is where students, faculty, staff, alumni, and the public have come together to conduct research, share knowledge, and build relationships. These activities are the foundation on which we've built a global reputation that puts us among the most desirable places to pursue an education and launch a career.

Our programs cover subject matter that is essential to leaders, managers and professionals working in public, private, and not-for-profit sectors. We develop competency in financial, technological, organizational, ethical, cultural, and administrative topics. No matter the discipline, our faculty cultivates the skills necessary to thrive in any workplace or community such as resilience, adaptability, critical thinking, and collaboration.

We understand that private, public, and not-for-profit sectors need to work together to generate new possibilities. We are an inclusive community driven by curiosity, integrity, and discovery. We welcome and celebrate diverse perspectives.

Students come here knowing that we are a place that inspires social and economic action and innovation. We foster talent in people who want to focus on activities that matter, are useful, and make a positive difference in the world.

The Faculty of Management offers two undergraduate programs, the Bachelor of Commerce Cooperative and the Bachelor of Management. Students outside these programs are welcome to take many of our courses and certificates and can complete a Minor in Innovation and Entrepreneurship. Our degree programs are all [externally accredited](#).

Our graduate programs include direct-entry and mid-career versions of the Master of Information, Master of Business Administration, and Master of Public Administration, as well as the Master of Science in Business. We actively participate in the Interdisciplinary PhD program and the multi-Faculty Master of Digital Innovation.

Undergraduate students wishing to enrol in programs or seek further information should contact the Undergraduate Advising Office by calling +1 (902) 494-3710, or by emailing uao@dal.ca.

Bachelor of Commerce (Co-op) Program

Introduction

As one of three universities in Canada who have integrated mandatory work terms into the student experience, we are a proud leader in embedding experiential learning into our Bachelor of Commerce Co-op Program. We continue this path with a robust team of professionals who support students in their pursuit of meaningful work. Our students are encouraged to broaden their experiential opportunities by engaging with our many student societies, participating in case competitions and pursuing international study and/or work terms which are supported by our Global Experience Hub.

With faculty who offer relevant and challenging material in the classroom and advisors who understand the needs of employers, locally, nationally, and globally, our students begin their careers with confidence and skill. Accredited by the Association to Advance Collegiate Schools of Business (AACSB) and Co-operative Education and Work Integrated Learning Canada (CEWIL Canada) our students are also prepared with the necessary scholarship should they wish to continue their education.

The objectives of the BComm Co-op are to:

- Develop knowledge of key concepts and issues relevant to organizations and their communities, as well as in-depth knowledge within specialized business disciplines.
- Enhance communication skills which are needed to excel in business and management careers.
- Develop analytical and decision-making skills, through a mix of theoretical and applied approaches which include lectures, discussion groups, research projects (individual and team), casework, and field work.
- Develop an understanding of the needs of public, private and not-for-profit sectors and the significance of socially responsible management practices to ensure we understand the impact of decisions on future generations.

Questions about the Bachelor of Commerce Co-op program can be directed to the Undergraduate Advising Office by sending an email to uao@dal.ca or calling 1 (902) 494-3710.

Bachelor of Commerce (Co-op) Program

The schedule for the Bachelor of Commerce (Co-op) Program includes seven academic terms (AT) and three mandatory work terms (WT), as follows:

	Fall	Winter	Summer
Year 1	AT1	AT2	
Year 2	AT3	WT1	AT4
Year 3	WT2	AT5	WT3
Year 4	AT6	AT7	

The co-op program in Commerce offers students the opportunity to participate in an international learning experience (academic or work), choose a major in a variety of special areas, a minor in an area outside of the Faculty of Management, and/or a certificate(s) should they wish to do so. The Commerce (Co-op) program does not currently offer double majors.

The three work-terms each receive academic credit, and constitute a full work load (see the Regulations section of this calendar for workload limits and conditions).

Degree Requirements

- Four-year program - seven academic terms and three work-terms
- Total credit hours required - 120
- Required GPA for graduation 2.00

- Work-terms - 9 credit hours (3.0 credit hours each)
- COMM 1711.015: Prersonal and Professional Development I
- COMM 1712.015: Personal and Professional Development I
- COMM 1010.03: Business in a Global Context
- COMM 1101.03: Introduction to Accounting I (Financial)
- COMM 1102.03: Introduction to Accounting II (Managerial)
- COMM 1503.03: Introduction to Quantitative Decision Making
- COMM 1715.03: Business Communication
- COMM 2202.03: Finance I
- COMM 2203.03: Finance II
- COMM 2303.03: Introduction to Organizational Behaviour
- COMM 2310.03: Business Ethics and Corporate Social Responsibility (CSR)
- COMM 2401.03: Introduction to Marketing
- COMM 2504.03: Intermediate Quantitative Decision Making
- COMM 2603.03: Legal Aspects of Business
- COMM 3500.03: Advanced Quantitative Decision Making
- COMM 3501.03: Production/Operations Management
- COMM 3511.03: Management Information Systems
- COMM 4353.03: Strategic Management
- ECON 1101.03: Principles of Microeconomics
- ECON 1102.03: Principles of Macroeconomics
- Six Electives (18 credit hours) can be at or above the 1000 level in any discipline
- Two Electives (6 credit hours) **MUST** be at or above the 2000 level in any discipline
- Ten Electives (30 credit hours) can be either Commerce or Management at or above the 2000 level

NOTE: Students readmitted to the Commerce Co-op program will be subject to the Academic Regulations as stated in the Calendar for the year of readmission. For further information, contact the Faculty of Management's Undergraduate Advising Office, 6100 University Avenue, Suite 2086. Phone +1 (902) 494-3710 or Email: uao@dal.ca

Program Guide

Students normally follow a fixed program of study, as outlined below:

Academic Term One

- COMM 1010.03: Business in a Global Context
- COMM 1101.03: Introduction to Accounting I (Financial)
- COMM 1503.03: Introduction to Quantitative Decision Making
- COMM 1711.015: Personal and Professional Development I
- ECON 1101.03: Principles of Microeconomics
- One elective

Academic Term Two

- COMM 1102.03: Introduction to Accounting II (Managerial)
- COMM 1712.015: Personal and Professional Development II
- COMM 1715.03: Business Communication (**or** one elective from term three)
- ECON 1102.03: Principles of Macroeconomics
- Two electives

**** One elective** - to be completed during any work term (financial implications) or academic term after winter term of 1st year (email uao@dal.ca for details)

Academic Term Three

- One elective (**or** COMM 1715.03: Business Communication from term two)
- COMM 2202.03: Finance I
- COMM 2401.03: Introduction to Marketing
- COMM 2504.03: Intermediate Quantitative Decision Making
- COMM 2603.03: Legal Aspects of Business

Work Term One

- COMM 2801.03

Academic Term Four

- COMM 2203.03: Finance II
- COMM 2303.03: Introduction to Organizational Behaviour
- COMM 2310.03: Business Ethics and Corporate Social Responsibility (CSR)
- COMM 3501.03: Productions/Operations Management
- COMM 3511.03: Management Information Systems

Work Term Two

- COMM 3801.03

Academic Term Five

- COMM 3500.03: Advanced Quantitative Decision Making
- Four electives

Work Term Three

- COMM 3802.03

Academic Terms Six and Seven

- COMM 4353.03: Strategic Management

- Nine electives

Students can either pursue a customized program of study by choosing electives from a wide range of the functional areas of business, humanities, or social sciences, or they can follow a more specialized program taking their elective courses towards a major, a minor, and/or a certificate(s). Students interested in majoring should consult the [School's website](#) and their [Academic Advisor](#) for further details before registering for their fifth academic term.

Major in Accounting

Note: An average grade of B- must be obtained between COMM 1101.03 and COMM 1102.03 to major in Accounting.

Students **must** complete the following eight courses:

- COMM 3105.03: Intermediate Financial Accounting I
- COMM 3111.03: Intermediate Financial Accounting II
- COMM 3114.03: External Auditing
- COMM 3116.03: Cost Management
- COMM 4101.03: Advanced Topics in Accounting I
- COMM 4102.03: Advanced Topics in Accounting II
- COMM 4125.03: Taxation
- COMM 4126.03: Taxation II

Chartered Professional Accountants (CPA) Canada requires certain academic prerequisites for admission to the CPA certification program. That is, CPA candidates must complete an undergraduate degree and cover specific prerequisite subject areas. Appropriate courses can be taken in the Bachelor of Commerce (Co-op) program, as part of the Accounting Major structure, to meet these requirements. Particulars can be obtained from the Chartered Professional Accountants Canada website <https://cpacanada.ca>

Major in Entrepreneurship

Students **must** complete the following four courses:

- MGMT 2902.03: Innovation
- COMM 3907.03: New Venture Creation
- COMM 4901.03: Applied Entrepreneurship and Innovation
- COMM 4523.03: Project Management

Plus four of:

- COMM 3309.03: Management Skills Development
- COMM 3401.03: Consumer Behaviour
- COMM 3402.03: Marketing Communications
- COMM 3404.03: Marketing Research
- COMM 3405.03: Global Marketing
- COMM 3409.03: Personal Selling and Sales Management
- COMM 3410.03: Services Marketing
- COMM 3508.03: Transportation Modes and Policy
- COMM 3908.03: Managing the Family Enterprise
- COMM 4701.03: International Business Strategy
- MGMT 3902.03: Starting Lean

Major in Finance

Note: An average grade of B- must be obtained between COMM 2202 and COMM 2203 to major in Finance

Students **must** complete the following three courses:

- COMM 3203.03: Financial Institutions
- COMM 3206.03: Investment and Money Management
- COMM 4240.03: Advanced Corporate Finance

Plus five of:

- COMM 2220.03: Introduction to FinTech
- COMM 4201.03: International Financial Management
- COMM 4202.03: Derivatives
- COMM 4250.03: Theory of Finance
- COMM 3102.03: Financial Statement Analysis*
- COMM 3105.03: Intermediate Financial Accounting I*
- COMM 4340.03: Corporate Governance*
- ECON 2200.03: Intermediate Microeconomics*
- ECON 2201.03: Intermediate Macroeconomics*
- MGMT 3204.03: Risk Management*

* Maximum two electives from NON-Finance courses

Note: ECON satisfies “electives” (not COMM/MGMT electives)

Major in International Business

Students **must** complete:

- Language Requirement; six credit hours from the same subject at a level appropriate to knowledge, as determined by department concerned (i.e. FREN 1007.03 and FREN 1008.03)
- One academic term, or one work term, in a country other than their primary residence.

Plus four of:

- COMM 3405.03: Global Marketing
- COMM 4201.03: International Financial Management
- COMM 4315.03: International and Intercultural Management
- COMM 4701.03: International Business Strategy
- COMM 4705.03: Contemporary Issues in Global Business

Plus two of:

- ECON 2213.03: Emerging Giants: The Economic Rise of China and India
- ECON 2219.03: Euros and Cents: From Common Market to European Union
- ECON 2334.03: Globalization and Economic Development: Current Debates
- POLI 1065.03: Political Worlds: The Global Domain
- POLI 1500.06: Globalization
- POLI 3233.03: Canada in the Global Economy
- POLI 3390.03: Politics of Consumption
- POLI 3569.03: Canadian Foreign Policy

Major in Managing People and Organizations

Students **must** complete the following four courses:

- COMM 3303.03: Introduction to Human Resource Management
- COMM 3309.03: Management Skills Development
- COMM 3310.03: Reflections on Leadership
- COMM 3320.03: Organizational Theory

Plus four of:

- COMM 3405.03: Global Marketing
- COMM 3507.03: Logistics Management
- COMM 4201.03: International Financial Management
- COMM 4315.03: International and Intercultural Management
- COMM 4501.03: Business Analytics for Decision Making
- COMM 4510.03: Corporate Communication
- COMM 4523.03: Project Management

- COMM 4701.03: International Business Strategy
- MGMT 3802.03: Public Policy
- MGMT 3810.03: Government Policy Towards Business

Major in Marketing

Students **must** complete the following four courses:

- COMM 3401.03: Consumer Behaviour
- COMM 3402.03: Marketing Communications
- COMM 3404.03: Marketing Research
- COMM 4401.03: Marketing Strategy

Plus four of:

- COMM 3405.03: Global Marketing
- COMM 3409.03: Personal Selling and Sales Management
- COMM 3410.03: Services Marketing
- COMM 3413.03: Brand Management
- COMM 3414.03: Digital Marketing
- MGMT 2402.03: Marketing Applications in the Not-For-Profit Sectors

Major in Supply Chain & Logistics Management

Students **must** complete the following four courses:

- COMM 3507.03: Logistics & Supply Chain Management
- COMM 4501.03: Business Analytics for Decision Making
- COMM 4511.03: Business Process Integration using ERP Systems
- COMM 4520.03: Supply Chain Planning & Execution

Plus four of:

- COMM 3405.03: Global Marketing
- COMM 3409.03: Personal Selling and Sales Management
- COMM 3410.03: Services Marketing
- COMM 3508.03: Transportation Modes and Policy
- COMM 4512.03: Business Intelligence and Data Visualization
- ECON 2850.03: Science and Economics of Climate Change
- ECON 3330.03: International Trade
- ECON 3335.03: Environmental Economics

Minors

Bachelor of Commerce (Co-op) students can choose to complement their degree by declaring a minor in another subject area outside of the Faculty of Management. Students should consult with their program Academic Advisor concerning their degree requirements, and an Advisor from within their desired subject area for the minor requirements. For a current list of available minors please see [Minors](#).

Co-op Work Terms

(For more information visit: www.dal.ca/mcs)

A work term is a period of time when a student gains practical experience in a business-related work environment. Each passed work term is an academic half credit and must meet the requirements listed below. Three passed work terms are required to graduate.

During a work term a student is considered an employee of their work term employer with reference to the conditions of their employment, and is a student with respect to academic evaluation and conduct only. The university does not accept liability for the student's work environment.

Students are remunerated according to employer policy and the labour laws of the jurisdiction in which they work.

Members of the Management Career Services team conduct mid-term reviews with both the employers and students to ensure the work term objectives are being met.

Work Term Requirements

Students receive academic credit upon completion of the following for each work term:

1. Students must register for each work term (COMM 2801, COMM 3801 and COMM 3802) via Dal Online.
2. Students must complete all mandatory requirements for co-op orientation, as outlined in the relevant components of COMM 1711 and COMM 1712, the Personal and Professional Development courses.
3. Each work term must be completed within the designated semester with one employer. A work term must total no less than 12 weeks and must be a minimum of 35 hours per week.
4. All jobs, including self-developed jobs, must be approved by Management Career Services (MCS) prior to the work term start date.
5. Students are responsible for finding suitable employment. Students complete a Co-op Education Program Agreement prior to the first work term accepting this and all other responsibilities associated with the co-op portion of their program. Support for the job search is provided by MCS, and job opportunities are posted on the *myCareer* job posting system.
6. Employers commit to completing and submitting an evaluation detailing the student's performance level which must be assessed as satisfactory or above to receive academic credit.
7. For each work term, students must submit a satisfactory work term report to the assigned faculty member in the Faculty of Management.

Academic Eligibility for Work Terms

Only students who meet the prerequisites (see **Section II: Courses Offered** of this calendar) are eligible to participate in a work term. Students who fail a required core course or a work term twice, and/or whose grades drop below a 1.70 GPA overall will be **dismissed** from the University. Refer to the university regulations regarding academic [probation](#) and [dismissal](#) for more information.

Co-op/Career Services Fee

Students are charged a Co-operative Education/Career Services Fee (pro-rated for part-time studies). In an effort to balance the cost, the fees are charged on each academic term until completion of the degree, which includes academic semesters outside of the regular program structure after all work terms have been successfully completed. While no fee is charged for the actual work term, any student taking an academic course during the work term will be charged an additional pro-rated fee.

These fees are non-refundable after the deadline dates listed in the University Calendar.

Students completing an academic term (three or more half credit courses) outside of Dalhousie on a Letter of Permission are also responsible for the payment of co-op fees. Before the Letter of Permission can be granted, students must sign a co-op fee agreement, available from the Undergraduate Advising Office.

Payment of all fees is required to obtain a Bachelor of Commerce (Co-op) Degree. Consult the Fees section of the Dalhousie University Calendar for details.

The fee supports the administration of work terms as well as career services provided for the post-graduation job search. It covers, but is not limited to;

- Administration of the work terms,
- Job search assistance (cover letters and resume building, interview preparation and debrief, coaching for self-developed job search strategies),
- Variety of workshops and other training,
- Networking opportunities with employers (including special events, competitions, information sessions, corporate tours, mentoring, etc.),
- Online e-learning webinars,
- Work term monitoring and mediation,
- Work term report instruction and grading by the assigned Instructor for COMM 2801, COMM 3801, and COMM 3802,
- Marketing and communications tools and activities to promote the Commerce Co-op program to employers,
- Development and administration of work term and grad job opportunities,
- Access to an on-line job posting site (*myCareer*) and job posting administration,
- Interview space and co-ordination,
- Facilitation of job offers,
- Tracking of eligibility and job search activity.

Exchange Programs

Dalhousie offers Bachelor of Commerce (Co-op) students the opportunity to study abroad in a variety of countries all over the world, including Denmark, France, Sweden, Norway, South Korea and China (a complete list of partnerships can be found [here](#)). While participating in this program, students create international contacts, immerse themselves in a different culture, and gain valuable experiences. For more information, please contact our Global Experience Manager by emailing management.global@dal.ca

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions

COMM 1010 Business in a Global Context

CREDIT HOURS: 3

This course provides an introduction to the national and international context of Canadian political, economic and business activity. It presents a sampling of the most relevant issues facing managers in business, labour and public sector organizations. Emphasis is placed on developing an understanding of Canada's competitive position today, and of the historical background and current influences on this position. The focus of the course will be on lectures, the text, guest speakers, and more specifically what is said in class by your instructor as well as in tutorials by your tutorial leader and your colleagues. Leading edge ideas and concepts - many of which are not confined exclusively to any one particular text or article - will be introduced by your instructor during the lectures, and may be reinforced through hand-outs from time to time.

CALENDAR NOTES: Students in BComm Program can not receive credit for Mgmt 1000.03 or Mgmt 1001.03

FORMATS: Lecture

COMM 1101 Introductory Accounting I (Financial)

CREDIT HOURS: 3

An introduction to the principles and practices used by accountants in processing and communicating data, both within and outside the organization. Emphasis is on financial accounting and reporting used in the measurement and reporting of an organization's operating, financing and investing activities to external users. Students will develop an understanding of basic financial accounting methodologies, and develop the analytical and procedural skills related thereto; as well as understand the information content of conventional financial statements, and the inherent limitations of accounting data. The organizational context includes business and not-for-profit settings. The coverage includes an examination of the accounting process, basic issues in financial reporting, and the financial statement disclosure requirements.

CALENDAR NOTES: Students who have completed COMM 2101.03 or MGMT 1101.03 (MGMT 2101.03) cannot also receive credit for COMM 1101.03.

CROSSLISTED: MGMT 1101.03

FORMATS: Lecture | Tutorial

COMM 1102 Introductory Accounting II (Managerial)

CREDIT HOURS: 3

An introduction to the use of accounting information by managers, within the organization. This course examines how accounting can provide information to assist management in their planning, decision-making and performance evaluation activities. Both qualitative and quantitative information supports this decision-making. Emphasis is on management accounting and analysis, with the following objectives: To develop an understanding of the kinds of accounting information managers need; To examine managerial accounting methodologies and develop the analytical and procedural skills related thereto; To prepare accounting reports which are useful for management planning, control and decision making; To develop an awareness of the limitations of managerial accounting information.

CALENDAR NOTES: Students who have completed COMM 2102.03, or MGMT 1102.03 (MGMT 2102.03) cannot also receive credit for COMM 1102.03.

PREREQUISITES: COMM 1101.03 OR MGMT 1101.03

CROSSLISTED: MGMT 1102.03

EXCLUSIONS: COMM 2102.03

FORMATS: Lecture | Tutorial

COMM 1503 Introduction to Quantitative Decision Making

CREDIT HOURS: 3

This is an introductory course on quantitative decision making with emphasis on applications in business, economics and management. Lecture topics include: time series, trendlines and forecasting; descriptive statistics, data visualization and regression; spreadsheet modelling, optimization and simulation; and an overview of decision analysis. Tutorial labs are held for students to practice related tools and techniques on cases and computers using Excel.

CALENDAR NOTES: COMM 1502.03, MGMT 1601.03, ASSC 1000.03, CSCI 1200.03, MATH 1060.03, STAT 1060.03, or MATH 1115.03 will NOT be counted in the Commerce program.

COMM 1700 Preparing for Study and Work in Canada

CREDIT HOURS: 3

This course is a mix of online lectures and in-class seminars, presentations, and workshops. Activities in this course will help students meet the demands of the Canadian workplace and academic environments. These activities will involve practical applications of business communication strategies and language skills. The course will address writing resumes and professional emails, participating in job interviews and business meetings, delivering presentations, and giving constructive feedback.

CALENDAR NOTES: Entrance into this course is by special permission. Please contact the Undergraduate Advising Office (uao@dal.ca) for more information

FORMATS: Lecture

COMM 1711 Personal and Professional Development (PPD) I

CREDIT HOURS: 1.5

To meet the demands of the modern workplace, Personal and Professional Development I offers an introduction to the academic and professional challenges of the Bachelor of Commerce Co-op program. To succeed in the classroom and the workplace, students must be proficient in Canadian Business English. Students will demonstrate the foundational skills in grammar and usage necessary to write clearly and confidently in the workplace (emails, text messages and reports). This course provides students strategies for career exploration and techniques for exploring their targeted industry. Students will become integrated into the academic and professional community at the Faculty of Management by being introduced to various societies, programs, and resources available. They will also have opportunities to explore time management skills, goal setting, and guidelines for academic integrity.

RESTRICTIONS: restricted to first year Commerce students (0-29 hours)

EXCLUSIONS: COMM 1710.03

FORMATS: Lecture

COMM 1712 Personal and Professional Development (PPD) II

CREDIT HOURS: 1.5

Personal and Professional Development II focuses on the skills necessary to secure work terms, as well as concepts to assist with completing effective academic reports a required part of each of the three mandatory work term components of the Program. As emerging professionals, students will identify techniques used when searching for work term opportunities, creating job application documents, and achieving workplace success. Students will discover effective methods of developing business relationships, critical self-reflection, goal setting, and obtain an understanding of the co-op course requirements.

PREREQUISITES: COMM 1711.015

RESTRICTIONS: restricted to first year Commerce students (0-29 hours)

EXCLUSIONS: COMM 1710.03

FORMATS: Lecture

COMM 1715 Business Communication

CREDIT HOURS: 3

This course teaches students professionalism in written and oral business correspondence. Students learn how to assess the business context and how to make strategic choices of medium, channel, and form. The course develops students' ability to work through the writing process, tailor business messages to specific purposes and audiences, and utilize techniques of persuasion in business memos, e-mail messages, letters, and informational and analytical reports. Students will also learn how to be effective speakers and presenters. The course introduces students to storytelling, structure, body language, and vocal techniques to enhance content in presentations.

PREREQUISITES: COMM 1711

EXCLUSIONS: COMM 1710.03, COMM 1720.03, COMM 1702.03, MGMT 3602.03, ENGL 2100.03, ENGL 2110.03, CSCI 2100.03

FORMATS: Lecture | Experiential Learning | Online Delivery | Other (explain in comments)

COMM 2202 Finance I

CREDIT HOURS: 3

An introduction to the problems faced by business managers in the acquisition and effective use of the firm's resources, and analytical concepts for evaluating financial decisions. Topics covered are: financial planning, time value of money, working capital management, risk and return, and valuation of debt and equity instruments.

PREREQUISITES: COMM 1101.03, COMM 1503.03 (or MATH 1115 or MATH 1000), ECON 1101.03, and ECON 1102.03.

EXCLUSIONS: MGMT 3201.03

FORMATS: Lecture | Tutorial

COMM 2203 Finance II

CREDIT HOURS: 3

This course provides students with an overview of the theory of corporate finance and its application to the problems faced by financial managers. This course covers an in-depth study of capital budgeting and long term investment decisions in national and international contexts, capital structure, dividend policy, and the fundamentals of options and futures.

PREREQUISITES: COMM 2202.03

EXCLUSIONS: MGMT 3201.03

FORMATS: Lecture

COMM 2220 Introduction to FinTech

CREDIT HOURS: 3

This course exposes students to the rapidly evolving FinTech landscape. After a high-level overview of the traditional financial system to ensure the class is familiar with the basic financial industry structure, we will proceed into looking at how this industry is disrupted by new technologies. We examine the main changes happening in the financial industry and the factors driving the unprecedented growth in the use of technology, what FinTech is, the main trends related to FinTech, the components of the FinTech ecosystem, and the emerging FinTech innovations. The first wave of FinTech led to the unbundling of banking, i.e., FinTech startups have challenged banks vertically on one of their core functions by providing better and cheaper options. This part will focus on FinTech companies competing with incumbents in the personal finance, payments, lending, capital markets, wealth management, insurance, and money transfer sectors. The next generation of FinTechs that are moving beyond their initial mono-product and into rebundling will also be examined. We will also discuss the threat to the sector posed by the Big Tech companies that are moving into financial services.

PREREQUISITES: At least second year standing

FORMATS: Lecture

COMM 2303 Introduction to Organizational Behaviour

CREDIT HOURS: 3

This course will provide an overview of organizational behaviour theory, as well as an introduction to the practical application of that theory, within the context of the external and organizational forces that impact management. Through lectures, assignments, and discussion, students will be introduced to the theoretical basis of managing people in organizations. Key topics will include individual factors, such as personality and perception; group processes, such as team development and influence; and contextual issues, such as organizational culture. Experiential exercises will be incorporated to link theory with practice.

PREREQUISITES: COMM 1010.03, and at least second-year standing.

EXCLUSIONS: MGMT 2303.03 and MGMT 2304.03

FORMATS: Lecture | Discussion

COMM 2310 Business Ethics and Corporate Social Responsibility (CSR)

CREDIT HOURS: 3

Business is a collection of private, commercially oriented organizations, whereas society is a broad group of people with varying traditions, values, institutions, and collective activities and interests. Hence, businesses operate in free markets but are subject to obligations to protect (or do no harm to) the common good. Their challenge is to marry 'the freedom to be' with responsibility for others, particularly the vulnerable. Business ethics provides moral systems for aligning priorities amid what are regularly contradictory or inconsistent sets of goals. This course examines the nature of these challenges from the basis of business ethics, their effects on companies and managers, and the corporate social responsibility tools managers can use to better understand and address complex issues involving numerous stakeholders. The students will explore current challenges, such as corporate social responsibility, sustainability and environmental ethics, ethics in a global world, corporate-stakeholder relations, and social, civic, and political action.

PREREQUISITES: At least second-year standing

EXCLUSIONS: PHIL 2081.03

FORMATS: Lecture | Tutorial

COMM 2401 Introduction to Marketing

CREDIT HOURS: 3

The objective of this course is to familiarize you with marketing's mode of inquiry-the way marketers look at the world. As a marketer you should be able to: 1) ask the right questions about markets; 2) organize data into relevant information; 3) discover market opportunities; 4) set goals; 5) create a marketing plan that includes clear target markets, as well as product, price, distribution and communication strategies; and 6) implement and control a marketing program. A mixture of instructional methods will be used, including lectures, video cases, assignments, and current topics discussions. You are expected to prepare for class each week by prior reading of the assigned materials. Active participation is expected throughout the course.

PREREQUISITES: COMM 1010.03 and at least second-year standing.
CROSSLISTED: MGMT 2401.03
FORMATS: Lecture

COMM 2504 Intermediate Quantitative Decision Making

CREDIT HOURS: 3

This is a second course on quantitative decision making with emphasis on applications in business, economics and management. It introduces students to statistical thinking and the application of analytical techniques to analyze data from real business cases both with in-class demonstrations and hands-on lab sessions using Excel or another analysis software. The aim is to be able to solve problems and make decisions in a variety of situations related to accounting, finance, marketing, operations and supply chain management.

PREREQUISITES: COMM 1503.03

EXCLUSIONS: COMM 2501.03, MGMT 1501.03, STAT 1060.03, MATH 1060.03, ECON 2260.03, ENGM 2032.03

FORMATS: Lecture | Lab

COMM 2603 Legal Aspects of Business

CREDIT HOURS: 3

This course provides a general understanding of how the Canadian legal system works, and the business-related aspects of the major areas of law, such as contracts, torts, property and business associations. There is special emphasis on legal risk management and dispute resolution. By the end of the course, the student will be able to analyze a business-related fact situation and apply correct legal principles to achieve sound business decision-making.

PREREQUISITES: at least second-year standing.

EXCLUSIONS: MGMT 2200.03, MGTA 2001.03

FORMATS: Lecture

COMM 2801 Work-Term One, Bachelor of Commerce (Co-op)

CREDIT HOURS: 3

The Bachelor of Commerce Co-op Program has three mandatory work terms for which students receive academic credit. COMM 2801 is the first of these three work terms, and along with the work component, requires both a satisfactory assessment of the student's work completed by their supervisor (coordinated by Management Career Services) and successful completion of an academic report (assessed by a faculty member). Work term I is completed in the Winter term of the second year.

PREREQUISITES: At least 13 half credits earned (must include COMM 1711.015, COMM 1712.015, COMM 1715.03 plus at least 7 half credits of required core courses from the first three academic terms)

FORMATS: Experiential Learning

COMM 3102 Financial Statement Analysis

CREDIT HOURS: 3

This course involves analyzing financial statements and entire annual reports for a variety of different entities. Topics include analysis of financial statements, MD&A and notes to the financial statements. Accounting topics include but are not limited to: asset recognition and impairment, pensions, deferred taxes, inter-corporate investments, leases, earnings per share, and cash flow. The approach to the course is analytical rather than procedural, with an emphasis on a user perspective. There is a HEAVY qualitative component of testing in this course.

PREREQUISITES: COMM 1101.03 or MGMT 1101.03, and at least a second year standing

EXCLUSIONS: COMM 3100.03

FORMATS: Lecture

COMM 3105 Intermediate Financial Accounting I

CREDIT HOURS: 3

This course, and its follow-up Commerce 3111.03, are meant to provide a solid understanding of the corporate financial reporting model and related conceptual issues. The course develops expertise in financial reporting issues related to revenue and expense recognition and a wide range of asset accounting issues, including receivables, inventories, and capital assets.

PREREQUISITES: COMM 1101.03 and COMM 1102.03 with a combined average of at least B-

EXCLUSIONS: COMM 3100.03

FORMATS: Lecture

COMM 3111 Intermediate Financial Accounting II

CREDIT HOURS: 3

In conjunction with its prerequisite, COMM 3105.03, this course is intended to provide an understanding of the corporate financial reporting model and related conceptual issues. The course will develop expertise in accounting and reporting issues related to liabilities and shareholders' equity, including complex debt and equity instruments, corporate income taxes, leases, pensions and other post-retirement obligations, earnings per share, accounting changes

and restatements.

PREREQUISITES: COMM 3105.03 with a minimum grade of C

EXCLUSIONS: COMM 3100.03 BUSI 6108.03

FORMATS: Lecture

COMM 3114 External Auditing

CREDIT HOURS: 3

This course covers the theory and practice of public auditing according to generally accepted auditing standards (GAAS). The course emphasizes Canadian Auditing Standards (CAS) and considers the forces impacting the setting of standards and the current level of standards. This includes pronouncements of the accounting profession, understanding the operations of auditing teams in a professional setting, as well as understanding the stakeholders and pressures and incentives that impact those stakeholders. The course also provides an understanding of reporting standards, professional ethics, audit planning, risk assessment, standards for examination, as well as internal control in both manual and computerized environments. Standards for the quality of evidence, statistical sampling and the sufficiency of evidence, documentation and working papers are addressed. The course considers typical audit programs for examination of financial statement elements and fraud awareness. The course also introduces the use of data analytics and data visualization as part of the external financial statement audit and reporting to stakeholders.

PREREQUISITES: COMM 3105.03 with a minimum grade of C

EXCLUSIONS: BUSI 6101.03

FORMATS: Lecture

COMM 3116 Cost Management

CREDIT HOURS: 3

The major objective of this course is to develop a deeper understanding of the key topics in cost/managerial accounting and their management control implications. The selected topics to be covered include costing systems, cost-volume-profit analysis, variance analysis, control and performance evaluation in decentralized organizations. This course is intended for students who wish to deepen their understanding of cost management concepts and their impact to an organization's decision making.

PREREQUISITES: COMM 1101.03 and COMM 1102.03, with a combined average of B-

FORMATS: Lecture | Discussion

COMM 3203 Financial Institutions

CREDIT HOURS: 3

This course is designed to introduce students to the structure and operations of financial institutions in Canada, and the role they play in the growth and operation of capital markets. The class content includes reviewing the operation and functioning of various types of financial institutions and their roles in the economy. An emphasis will be put on measuring different types of risks and methods for managing these risks for financial institutions, particularly the banks. The topics include (but are not limited to) interest rate risk management, credit risk management, market risk management, regulation, and so forth. The role of derivative securities in various hedging strategies will also be reviewed.

PREREQUISITES: average grade of B - between COMM 2202.03 and COMM 2203.03; or MGMT 3201.03 minimum grade of B-

FORMATS: Lecture | Tutorial

COMM 3206 Investment and Money Management

CREDIT HOURS: 3

This course is designed to provide the students with an overview of current investment theories and their application to the real world. In particular, a considerable effort will be made to compare and contrast the activities of money managers with the ones that are suggested in various theoretical models. The intention is to provide our students with the needed skills to successfully face the challenging world of portfolio and money management.

PREREQUISITES: average grade of B- between COMM 2202.03 and COMM 2203.03

FORMATS: Lecture | Seminar

COMM 3207 Canadian Securities

CREDIT HOURS: 3

The topics covered in this course include an overview of capital markets and the financial services industry; financial statement analysis; an overview of the Canadian economy; fixed income securities; equity securities; investment funds; derivatives; security analysis; financing, listing and regulation; financial planning and taxation issues; and, portfolio management. Upon meeting the CSI's requirements, the student will earn the Canadian Securities Course designation.

CALENDAR NOTES: This course is offered via Distance Education. Students will have to register with the Canadian Securities Institute and will incur an additional fee.

PREREQUISITES: COMM 2202.03 OR MGMT 3201.03

FORMATS: Online Delivery

COMM 3303 Introduction to Human Resource Management

CREDIT HOURS: 3

The role of human resource management (HRM) and administration are analyzed, along with these major aspects: job analysis, human resource planning, recruitment and selection, training, performance appraisal, compensation, labour relations, and safety and health. Knowledge of HRM processes is supplemented by applying analytical skill to human resource problems and understanding HRM's strategic role and how HRM integrates with many other functions required in the organization. This course builds upon the skill and knowledge acquired in COMM 2303.03. Class discussions and assignments focus on applying HRM skills to various work environments. The course will be structured around a combination of lectures, student presentations, group work, in-class discussions, and experiential exercises.

PREREQUISITES: COMM 2303.03 or MGMT 2304.03

FORMATS: Lecture | Discussion | Experiential Learning

COMM 3309 Management Skills Development

CREDIT HOURS: 3

This course will expose students to key knowledge, behaviors, skills, competencies, and attitudes considered critical to leadership and managerial success. This course is designed with an emphasis skill development and the application of effective management practices. Key topic areas include: understanding personal self-awareness/self-management, communications, interpersonal negotiations, team skills, managing innovation and change, conflict management, coaching, and leadership skills, behaviors, and attitudes needed for success. Significant amounts of classroom time will be devoted to putting theory into practice by developing students' leadership skills. In class, students will experience a combination lectures, student presentations, group work, individual work, skill development practice session, in-class discussions, and experiential exercises.

PREREQUISITES: COMM 2303.03 OR MGMT 2304.03; and at least third-year standing.

CROSSLISTED: MGMT 3309.03

FORMATS: Lecture | Seminar | Discussion | Experiential Learning

COMM 3310 Reflections on Leadership

CREDIT HOURS: 3

Reflections on Leadership explores the meaning of leadership in today's changing world, enabling students' capacity and capability to influence change and position themselves as a positive force within organizations and society. Students will explore how to engage and navigate an organization as a complex adaptive system and to envision the fundamental competencies required to engage in complexity through use of dialogue, adaptation and resilience. Students learn reflexive strategies to enable self-awareness and effective leadership practices. The course will consider ways to approach leadership through lenses of, for instance, Indigenous knowledge co-operation and sustainability. By the end of the course the student should be able to answer the question of who am I as a leader?, be more intentional in how they lead through change in organizations and society, and build a foundation for future leadership practice.

PREREQUISITES: At least third-year standing

FORMATS: Lecture

COMM 3320 Organizational Theory

CREDIT HOURS: 3

If you want to know how to assess and create organizations that are adaptable, effective, and flexible in today's complex environments then this is the course for you. The goal of this course is to prepare students to assess, design and structure organizations to be more effective. The interrelationships between strategy, technology, culture, and the organization's internal and external environments will be explored. An emphasis will be placed on change management practices and other frameworks that are useful for assessing and increasing organizational effectiveness. In class, students will experience a combination of lectures, student presentations, group work, individual work, in-class discussions, and experiential exercises.

PREREQUISITES: COMM 2303.03

CROSSLISTED: MGMT 3320.03

EXCLUSIONS: COMM 4306.03

FORMATS: Lecture | Seminar | Discussion | Experiential Learning

COMM 3401 Consumer Behaviour

CREDIT HOURS: 3

In view of the very competitive situation in modern business, the firm that is successful designs and sells products that meet the desires of specific consumer segments. Thus, analysis and prediction of consumer behaviour are increasing in importance and sophistication. An extensive body of research evidence from marketing and the behavioral sciences is explored and evaluated to assess the marketing implications of elements of consumer behaviour. Emphasis in course will be focused on how to incorporate an understanding of consumer behaviour into strategic marketing plans.

PREREQUISITES: COMM 2401.03 or MGMT 2401.03

FORMATS: Lecture | Discussion

COMM 3402 Marketing Communications

CREDIT HOURS: 3

This course is designed to provide students with an understanding of how the major types of marketing communication messages are created and delivered. This means students should come away knowing the strengths and weakness of the major marketing communication functions (e.g. advertising, public relations, direct response, sales promotion, social media marketing, web marketing, packaging, etc.) and the major media used by them. By the end of the

course, the student will have the ability to: (1) establish a knowledge base of researching and evaluating a company's marketing and promotional situations; (2) gain hands-on experiences in the creation of an integrated marketing communication campaign that impact customer relationships and brands; and (3) develop effective communication strategies and programs for real company situations. For those students who are not marketing majors, this course will also provide a basic understanding of persuasive skills which can be used no matter what vocation they choose in the future.

PREREQUISITES: COMM 2401.03 or MGMT 2401.03

FORMATS: Lecture

COMM 3404 Marketing Research

CREDIT HOURS: 3

Students learn the scientific method in solving marketing problems and creating marketing intelligence from data. Emphasis is on planning and formulating research problems, research design, application of sampling methods, and analysis of data collected. The course uses cases and a real world project to hone skills needed for a wide range of marketing positions in industry.

PREREQUISITES: COMM 2401.03, and COMM 2504.03 (or COMM 2502.03)

FORMATS: Lecture | Tutorial | Discussion

COMM 3405 Global Marketing

CREDIT HOURS: 3

This course will examine similarities and differences in international marketing structures, functions and processes as related to the socio-economic and cultural environment and the opportunities and problems associated with international marketing for Canadian firms wanting to export to overseas markets. It is designed to be a comprehensive course embodying lectures, class discussion, assignments, and case studies. Students will also complete an export marketing plan for a Canadian company wishing to explore marketing opportunities in a foreign country.

PREREQUISITES: COMM 2401.03

FORMATS: Lecture | Discussion

COMM 3409 Personal Selling and Sales Management

CREDIT HOURS: 3

This course is designed to provide an understanding of the tasks and problems facing today's sales professionals and sales managers and to familiarize one with current personal selling and sales force management practices. Specifically, this course provides an exposure to personal selling concepts, techniques and procedures used in buyer-seller relations such as prospecting, sales call planning, negotiation skills, overcoming obstacles, persuasion and closing skills. It also covers sales management topics including the organization of the sales force, personnel management, selection, sales training, motivation, compensation, evaluation and supervision, budgets, quotas, territories and sales control. Sales role-plays, mock sales presentations, case studies and classroom discussion are used to extend the basic text material and examine other points of view.

PREREQUISITES: COMM 2401.03

FORMATS: Lecture

COMM 3410 Services Marketing

CREDIT HOURS: 3

Intangible services play an increasingly important role in the global economy, and most especially in the economies of developed countries. Yet, business school curriculae have customarily emphasized the marketing of tangible products in consumer and industrial markets. A basic premise of the elective course is that services (versus tangible goods) share a number of attributes that present unique challenges for marketing. The course seeks to prepare students to face those challenges. It is ideal for students who wish to work in a service industry (e.g., banking, insurance, travel, hospitality, consulting) or in a service capacity in the manufacturing sector (e.g., sales, customer relations). Emphasis will be placed on understanding the distinctive characteristics of services, the implications of these distinctions for marketing, the role of service quality as a determinant of customer satisfaction, and the measurement of these phenomena. Examples will be drawn from North American and European service industries.

PREREQUISITES: COMM 2401.03

COMM 3413 Brand Management

CREDIT HOURS: 3

This course is designed to provide students with an in-depth understanding of branding. Students will explore how social and psychological factors contribute to creating brand meaning. Students will learn how to design a creative brand identity. Students will further understand brand equity and how successful brands are managed. By the end of this course, students will be able to create an effective and creative branding strategy.

PREREQUISITES: COMM 2401.03

FORMATS: Lecture

COMM 3414 Digital Marketing

CREDIT HOURS: 3

This course is designed to provide students with an in-depth understanding and practice of digital marketing. This course allows students to learn about the

principles that govern digital marketing and to put these principles into practice. Students should expect a hands-on experience as they get to build a website, social media content, and execute real advertising campaigns. By the end of the course, students will have the ability to: 1) Formulate a digital marketing strategy; 2) Build website content that takes the user experience into consideration; 3) Design a search engine optimization strategy; 4) Execute digital advertising campaigns; 5) Understand the principles of content creation and build effective content; 6) Understand the different social media platforms and build an effective social media plan ; 7) Measure the success of digital marketing strategies.

PREREQUISITES: COMM 2401.03

FORMATS: Lecture

COMM 3500 Advanced Quantitative Decision Making

CREDIT HOURS: 3

This is a third course on quantitative decision making with emphasis on applications in business, economics and management. Advanced topics will be covered for students to be able to solve problems and make decisions in a variety of situations related to accounting, finance, marketing, operations and supply chain management.

PREREQUISITES: COMM 2504.03

EXCLUSIONS: COMM 2502.03; ECON 2260.03; ECON 2280.03; ENGM 2032.03; MATH 2080.03; MGMT 2502.03; STAT 2080.03

FORMATS: Lecture | Lab

COMM 3501 Production/Operations Management

CREDIT HOURS: 3

Production is one of the fundamental functions of any organization, regardless of whether it provides goods or services. Consequently, all managers should have an understanding of the key concepts of production and operations. The purpose of this course is to provide such an understanding and to introduce some of the standard techniques to manage operations particularly in manufacturing and services. Topics include: forecasting, inventory, supply chains, production planning, project management, quality assurance and queuing. Cases and class examples are used to build general skills and illustrate concepts and techniques to solve real-world problems in practice.

PREREQUISITES: COMM 1101.03, COMM 2401.03, and COMM 2504.03

EXCLUSIONS: MGMT 3501.03

FORMATS: Lecture | Lab

COMM 3507 Logistics and Supply Chain Management

CREDIT HOURS: 3

this course examines the decisions faced by managers within the supply chain. This includes: the channels of distribution; the transportation and storage of products/services; and the communications and data processing systems used to minimize the total cost of these activities and satisfy the marketing requirements of the firm and its customers. Additional topics in this course include the integrated logistics and supply chain management concept, customer service, transportation, distribution centers, inventory management, materials management, packaging, purchasing, order processing and information systems, financial control, logistics organization, international logistics, reverse distribution and recycling, and the strategic logistics supply chain plan.

PREREQUISITES: COMM 3501.03

FORMATS: Lecture

COMM 3508 Transport Modes & Policy

CREDIT HOURS: 3

This course introduces the business of managing a transport enterprise. It focuses on understanding the regulatory policy environment and customer requirements prior to exploring operational considerations across a number of transport modes. The intent is to explore the impacts of policy and modal structure on marketing the transportation company and structuring it for growth. The course is suitable for students wishing to work in the transport industry, in the supply chain activities of a transport customer, or tangentially, in the strategic management of any service business.

PREREQUISITES: at least third-year standing

CROSSLISTED: BUSI 6408.03

FORMATS: Lecture

COMM 3511 Management Information Systems

CREDIT HOURS: 3

Information is a key resource for organizations, and professionals. Innovative uses of information are often keys to survival in an increasingly competitive and digital economy. Information systems enable these uses and account for an increasing larger share of assets in most organizations. This course is designed to help students understand how organizations leverage their information systems - that include digital technologies, business process, data, and people - in ways that deliver business value. In addition to conceptual frameworks, business cases and simulations, students will develop hands-on skills in information systems such as SAP Enterprise Resource Planning (ERP) systems and Business Intelligence digital technologies.

PREREQUISITES: COMM 1010.03 and at least a second-year standing

CROSSLISTED: MGMT 3511.03

FORMATS: Lecture | Lab | Discussion | Experiential Learning

COMM 3710 Doing Business in Emerging Markets

CREDIT HOURS: 3

This course is designed to give students an understanding of the traditional challenges and opportunities Canadian businesses face when expanding their business to emerging markets, including those in Africa, Asia, Latin America, and Eastern and Central Europe. Through this course, students will be expected to acquire a holistic understanding of the political, cultural, social, and economic challenges companies face when considering the benefits of expanding and conducting business in emerging markets.

PREREQUISITES: COMM 2303.03 and COMM 2401.03

CROSSLISTED: MGMT 3710.03

FORMATS: Lecture

COMM 3801 Work-Term Two, Bachelor of Commerce (Co-op)

CREDIT HOURS: 3

The Bachelor of Commerce Co-op Program has three mandatory work terms for which students receive academic credit. COMM 3801 is the second of these three work terms, and along with the work component, requires both a satisfactory assessment of the student's work completed by their supervisor (coordinated by Management Career Services) and successful completion of an academic report (assessed by a faculty member). Work term two is completed in the Fall term of the third year.

PREREQUISITES: At least 18 half credits earned. Must include COMM 2801.03 (and its prerequisites) plus at least 12 half credits of required core courses from the first four academic terms.

FORMATS: Experiential Learning

COMM 3802 Work-Term Three, Bachelor of Commerce (Co-op)

CREDIT HOURS: 3

The Bachelor of Commerce Co-op Program has three mandatory work terms for which students receive academic credit. COMM 3802 is the third of these three work terms, and along with the work component, requires both a satisfactory assessment of the student's work completed by their supervisor (coordinated by Management Career Services) and successful completion of an academic report (assessed by a faculty member). Work term three is completed in the Summer term of the Third year.

PREREQUISITES: At least 23 half credits earned. Must include COMM 3801.03 plus at least 14 half credits of required core courses from the first five academic terms.

FORMATS: Experiential Learning

COMM 3905 Indigenous Business Studies

CREDIT HOURS: 3

Over 370 million Indigenous people are living in over 70 countries (United Nations, 2019), and the Indigenous populations in Canada are growing. An understanding of Indigenous business has become essential to the business professions. Highly relevant to all Canadians, including the First Nations, Métis, and Inuit of present-day Canada and Mi'kma'ki and beyond, this course addresses the impacts that history and policy have had on Indigenous business relations. Through an exploration of Indigenous ways of knowing and the practice of two-eyed seeing, students will move toward reconciliation through an appreciation of the challenges and successes of Indigenous businesses. The course is open to both Indigenous and non-Indigenous students.

PREREQUISITES: Comm 1010.03 and at least third year standing

CROSSLISTED: MGMT 3905.03

COMM 3907 New Venture Creation

CREDIT HOURS: 3

This course prepares students to act on entrepreneurial ideas. By linking theory and practice, the course will expose students to the issues, problems and challenges of developing new ventures and provide students with the opportunity, within the framework of a formal class, to explore and develop venture ideas, testing their ideas assumptions, and most importantly how to act on ideas with the resources you have on hand. Experiential exercises enable the students to build their personal entrepreneurial strategy, identify an innovative idea, build their business model, gather resources, and present their business idea. The purpose of the course is to provide students a foundation from which they can act entrepreneurially for themselves or for the organization they work for.

PREREQUISITES: MGMT 2902.03

CROSSLISTED: MGMT 3907.03

FORMATS: Lecture | Discussion | Experiential Learning

COMM 3908 Managing the Family Enterprise

CREDIT HOURS: 3

Managing the Family Enterprise is for students who are part of, or are considering joining, a family business. Students who want to explore this segment of Canadian businesses are also welcome. The course provides an organized framework for students to understand the dynamics and special challenges family

businesses may encounter. We explore the family system, the business system, the ownership system and their interactions - functional and dysfunctional. Specific topics include: the decision to join a family firm, management succession, ownership succession, the role of key non-family employees, strategic planning and other issues especially relevant for family firms. The course also addresses conflict and communication in the family and the business. The course relies on field projects, guest speakers, case studies, videos, research papers and extensive class discussion to explore the territory of managing family businesses.

PREREQUISITES: At least third-year standing, and COMM 1010.03 OR (COMM3907 OR COMM 3307)

EXCLUSIONS: COMM 3308.03, MGMT 3308.03, BUSI 6006.03

FORMATS: Lecture | Discussion | Experiential Learning

COMM 4000 Directed Reading and Research

CREDIT HOURS: 3

This course offers the student the opportunity to explore in greater detail a particular area of interest. The content of the course is negotiated with the individual instructor involved. The student and instructor must develop a proposal, and submit it to the Curriculum Committee for approval. Guidelines are available from the Undergraduate Advising Office, Suite 2086, Rowe Building.

COMM 4101 Advanced Topics in Accounting I

CREDIT HOURS: 3

This course provides a theoretical framework for the study of accounting policy. Case analysis is an integral part of the course, with the bulk of the course focusing on analysis of simulated cases. Topics covered include accounting policy choice in a dynamic framework, an introduction to the impact of accounting policy choice and normalized income on business valuation, and the role of the professional accountant as part of these engagements. As well, the course may consider various practical and theoretical topics, including the role of the professional accountant working within an organization, as well as current topics as appropriate. There is a HEAVY qualitative component of testing in this course.

PREREQUISITES: COMM 3105.03, COMM 3111.03, and COMM 3114.03

EXCLUSIONS: BUSI 6110.03

FORMATS: Lecture

COMM 4102 Advanced Topics in Accounting II

CREDIT HOURS: 3

This course provides an in-depth study of the interrelated topics of intercorporate investments, business combinations, consolidated financial statements, foreign currency transactions and foreign operations. The course also covers segmented reporting, and not-for-profit accounting and fund accounting.

PREREQUISITES: COMM 3105.03 and COMM 3111.03

CROSSLISTED: BUSI 6109.03

FORMATS: Lecture

COMM 4125 Taxation

CREDIT HOURS: 3

This course is an introduction to the taxation system in Canada, with a focus on the calculation of net income for tax purposes and concluding with personal tax payable calculations. By the end of the course students should be able to calculate taxes payable for individuals, and identify and analyze tax issues related to these calculations.

PREREQUISITES: COMM 3105.03 with a minimum grade of C.

EXCLUSIONS: COMM 4120.03 BUSI 6102.03

FORMATS: Lecture

COMM 4126 Taxation II

CREDIT HOURS: 3

This course is a follow up to COMM 4125. It covers areas of personal tax not covered in COMM 4125 and then focuses on corporate income tax. By the end of the course students should be able to calculate taxes payable for corporations, and identify and analyze tax issues for both individuals and corporations.

PREREQUISITES: COMM 4125.03

EXCLUSIONS: COMM 4121.03

FORMATS: Lecture

COMM 4201 International Financial Management

CREDIT HOURS: 3

This course aims at acquainting students with international aspects of corporate finance. The ultimate objective of the course is to develop your ability to understand and analyze major problems of financial management in an international context. Specifically, we will see throughout this course, how the business of the multinational corporation (MNC) - compared to that of a purely domestic firm - is affected by the changes in the international financial environment and by the presence of new variables, in particular the exchange rate risk and the political risk. Therefore, the first part of the course will provide

an overview of the MNC and the international environment in which it operates and describe the functioning of the international financial markets with emphasis on the Foreign Exchange Market. We will also thoroughly examine the theories underlying exchange rate determination, as well as exchange rate risk measurement and management. Finally, we will analyze how exchange rate risk affects the pricing of capital assets.

PREREQUISITES: COMM 2203.03

FORMATS: Lecture

COMM 4202 Derivatives

CREDIT HOURS: 3

This course is an introduction to derivatives and the main applications of derivatives for both investment purposes and corporate finance use. As an introductory or first course in derivatives, the goal is to cover the central concepts and issues that will permit the student to start using the products and understanding the main advantages, as well as the issues with derivative transactions. The course covers both quantitative pricing issues, as well as the many practical qualitative issues involved with the use of derivatives. Students should be comfortable with basic statistics and algebra. Knowledge of calculus is not required for this course. Students should also be comfortable with Excel spreadsheets and basic Excel mathematical functions.

PREREQUISITES: COMM 2203.03

FORMATS: Lecture

COMM 4240 Advanced Corporate Finance

CREDIT HOURS: 3

This course will help students learn to apply fundamental ideas of corporate finance to real-life problems of business valuation and financial decision. Topics that will be discussed include valuation, mergers and acquisitions, financial distress, capital structure, payout policy, securities issuance, and corporate governance. The course builds on concepts and techniques that students have learned in finance, accounting, statistics, and economics. Case studies will be used to bridge the gap between finance theory and its applications to practical problems in corporate finance.

PREREQUISITES: average grade of B- between COMM 2202.03 and COMM 2203.03; and COMM 3206.03

FORMATS: Lecture

COMM 4250 Theory of Finance

CREDIT HOURS: 3

With a focus on portfolio analysis and investment decisions, this course is designed to complement other finance courses. Topics include time value of money and capital budgeting, valuation and equilibrium pricing of risky securities (stocks, bonds, and derivative securities, including structured products), portfolio investment and performance analysis, real options. All theoretical models will be implemented using Excel.

PREREQUISITES: COMM 2203.03

FORMATS: Seminar

COMM 4315 International and Intercultural Management

CREDIT HOURS: 3

The growing importance of international business and involvement in global competitiveness requires the manager of the 21st century to acquire additional skills and abilities for effective international and intercultural interactions at home and abroad. This senior-level course is designed to provide students with the knowledge and skills necessary for effective management in global and culturally diverse domestic workplaces. The course content includes such topics as introduction to international human resource management, cultural orientations and values, cross-cultural communications, employee attitude, motivational issues in cross-cultural settings, differences in management and leadership styles, staffing and training for international assignments, expatriation and repatriation management, ethics and social responsibility across cultures, and intercultural negotiations. RECOMMENDED prior learning: COMM 3303.03 and COMM 3309.03

PREREQUISITES: COMM 2303.03 and COMM 4353.03; or MGMT 2304.03 and MGMT 4003.03

FORMATS: Lecture

COMM 4340 Corporate Governance

CREDIT HOURS: 3

The central focus of corporate governance is the relationship between the top management team (TMT), the board of directors (BoD), and other stakeholders, especially stockholders. The collapse of once successful, large corporations across the globe illustrates the prankishness of their board members and the degree of their lack of concern for stockholders' interests. The reputation of audit and consulting companies associated with these ill-fated corporations suffered a great setback, leaving stakeholders wondering whom to trust to safeguard their interests. Students will take an in-depth look at the corporate governance triad, as indicated above, that controls the modern corporation. Accordingly, this course will deal with the control, composition, functions, roles, and structure of boards; board responsibility and accountability, CEO tenure and compensation, shareholder and other stakeholder representation; corporate board's vis-à-vis social responsibility and ethics; and comparative corporate governance across North America, Europe, and selected Asian countries.

PREREQUISITES: COMM 4353.03 or COMM 4351.03

CROSSLISTED: BUSI 6315.03, MGMT 4340.03

FORMATS: Lecture

COMM 4351 Competitive Strategy

CREDIT HOURS: 3

Competitive Strategy focuses on how a firm competes at various levels; that is, functional, business and corporate. The course is designed to analyze the sources of competitive advantage among firms and to develop knowledge and skills necessary for effectively analyzing and formulating strategy. Accordingly, the course examines the role of the general manager in the organization; environmental and industry factors; organizational resource and capability constraints; the creation of value through functional-, business-, and corporate-level strategies, and, finally, how an organization leverages its resources and capabilities to extend its product and geographic scope internationally. Building upon this foundation, students will practice formulating well thought-out strategy recommendations that are specific and actionable. Throughout the term, students will be exposed to a wide variety of organizations through readings, case studies, and experiential exercises.

PREREQUISITES: All required first, second, and third year core courses, including the three work-terms, for the Bachelor of Commerce (Co-op) program.
EXCLUSIONS: MGMT 4001.03, MGMT 4003.03

COMM 4352 Strategic Management

CREDIT HOURS: 3

Strategic Management builds on COMM 4351.03: Competitive Strategy. Following a brief review of firm strategy as it relates to the external environment and core competencies, the focus of this capstone course turns to the examination of the firm's organizational design. More specifically, the course is about strategic change and implementation. It enables the student to develop an appreciation for the influence of uncertainty and complexity on managerial action. The course integrates functional- and business-level strategies to understand the alignment of the firm's competitive strategy with its organizational design. Various pedagogical methods are used to enhance the student's analytical, writing, and presentation skills. It emphasizes a number of conceptual frameworks that aid in strategic decision-making while drawing upon specific concepts, tools, and techniques from other core courses in the Bachelor of Commerce (Co-op) program

PREREQUISITES: COMM 4351.03

EXCLUSIONS: MGMT 4002.03, MGMT 4003.03

FORMATS: Lecture

COMM 4353 Strategic Management

CREDIT HOURS: 3

Strategic Management focuses on how a firm competes at various levels (functional, business, corporate, and international). The course is designed to analyze the sources of competitive advantage among firms and to develop knowledge and skills necessary for effectively analyzing, formulating, and implementing strategy. By the end of the course, the student should: 1. Understand the key concepts, tools and techniques in competitive strategy, strategy formulation, and strategy implementation; 2. Understand relevant methods and decision criteria in making strategic decisions; 3. Have an ability to use the appropriate concepts, tools, and techniques when discerning key issues, analyzing situations, and making sound decisions in a variety of strategic situations; and 4. Have oral and written communication skills that enable the effective presentation of strategic management and implementation concepts within the case-study format.

PREREQUISITES: All required CORE first, second, and third year courses, including the three work-terms, for the Bachelor of Commerce (Co-op) program.

EXCLUSIONS: COMM 4351.03, COMM 4352.03, MGMT 4001.02 and MGMT 4002.03

FORMATS: Lecture

COMM 4401 Marketing Strategy

CREDIT HOURS: 3

Marketing Strategy is the capstone course for marketing majors designed to integrate learning from other marketing courses as well as to introduce marketing strategy concepts. For both B2C and B2B firms, the aim of marketing strategy is to create superior value for customers and build long-term relationships with them. The course focuses strategies that help firms grow and expand their markets. Marketing strategy is underpinned by insightful customer, competitive and market analysis so that firms can achieve competitive advantage in the markets where they operate. Marketing plans designed to implement a firm's marketing strategy are also critical tools in determining a firm's success. Discussion of cases are the main learning tools. Simulations, report writing, and group presentations will also be used to enhance the acquisition of essential marketing skills.

PREREQUISITES: COMM 3401.03 OR COMM 3402.03 OR COMM 3404.03; plus one additional marketing elective course (choose from COMM 3405.03, COMM 3409.03, COMM 3410.03, COMM 3413.03, COMM 3414.03, or COMM 3710.03)

FORMATS: Lecture | Discussion

COMM 4501 Business Analytics for Decision Making

CREDIT HOURS: 3

Decision-making is a critical management function; it can be very difficult for an enterprise to recover from bad decisions. This course provides students an opportunity to learn how decision situations can be approached scientifically, and how managerial experiences and judgement can be used to make a sound decision. The course uses a combination of data and models and includes topics such as spreadsheet modelling using Excel, optimization (linear programming) and simulations with a focus on business applications in finance, marketing, operations and general management. Cases are used to illustrate the main topics.

PREREQUISITES: COMM 3500.03; or COMM 2502.03 and COMM 3501.03

FORMATS: Lecture

COMM 4510 Corporate Communication

CREDIT HOURS: 3

By the end of this course, students will learn about various communication strategies adopted and deployed by corporations. Students will learn about key concepts from the field including the study of public relations, integrated marketing, and internal corporate communications. Through the course, students will assemble a corporation communication portfolio that includes press releases, internal memos, an investigative communication audit, integrated marketing campaign, media kit, press conference, crisis communication strategy, and strategic communication plan

PREREQUISITES: COMM 1715.03 and COMM 2303.03

FORMATS: Lecture

COMM 4511 Business Process Integration using ERP Systems

CREDIT HOURS: 3

An experiential learning approach is adopted in this class that includes hands-on learning using SAP ERP, analytics tools, and a game-based SAP ERP simulation. Here you will learn to manage a company end-to-end from vendors to buyers using the actual SAP ERP in a real-time simulated competitive environment. You will grasp the concept of processes, gain technical skills with SAP, and playfully learn how Enterprise Systems facilitate Business Intelligence which can be used to lead a company in a competitive environment. Since the emphasis of this class is on experiential learning, the class time is focused on hands-on cases and simulations instead of lectures. There is an expectation that you are prepared and complete the readings before each class. In this course, there will be a balanced focus on learning both business processes integrating different functional areas and the technology that facilitates this. The class will be taught in the lab activities through a combination of individual and group tasks interspersed with short lectures.

PREREQUISITES: COMM 3511.03 or MGMT 3511.03

FORMATS: Lecture | Lab | Experiential Learning

COMM 4512 Business Analytics and Data Visualization

CREDIT HOURS: 3

This course provides an introduction to business analytics and data visualization using state-of-the-art technologies. It covers the processes, methodologies and practices used to transform data into useful information to support business decision-making. Students will learn how to extract and manipulate data from various sources and acquire basic knowledge of data mining and data analysis, with a focus on data visualization. Students will also learn to build dashboards using a variety of data design and visualization tools. The course will be comprised of both conceptual and applied topics, with classes being held in an interactive computer lab (or virtually via asynchronous lectures and synchronous office hours). Technologies to be used will be focused on end-user analytics and data visualization and will include state-of-the-art tools for self-serve business analytics, such as MS Excel, SAP Lumira Discovery, SAP Cloud Analytics, SAP Business Objects Analysis, SAP Predictive Analytics, and Tableau.

PREREQUISITES: COMM 3511.03 or MGMT 3511.03

FORMATS: Lecture | Lab | Experiential Learning

COMM 4520 Supply Chain Planning & Execution

CREDIT HOURS: 3

A Supply Chain (SC) consists of all parties involved in fulfilling a customer request. Efficient integration of suppliers, manufacturers, distribution/logistics companies, and retailers/customers is vital in managing SCs so that the right products are delivered to the right place at the right price, quantity, and time. Good management of a SC creates a competitive advantage. Focusing on the planning and execution of SC decisions, this course will help students have a deep understanding of modern SCs, utilize the analytical tools necessary to solve complex SC problems via a capstone course project, and apply managerial levers to pull in order to sustainably improve SC performance.

PREREQUISITES: COMM 3507.03 (or COMM 3407.03), and COMM 3501.03

FORMATS: Lecture

COMM 4523 Project Management

CREDIT HOURS: 3

Many organizations in the private sector and the public sector are now using projects as tools to implement and achieve strategic goals, to innovate and to respond to customers changing needs. This course will introduce students to the management of project portfolio, the project management methodology, the cross-cultural leadership skills, the concepts, the tools and techniques required to successfully manage a project. In this course, a practical and hands-on approach is used and involves several experiential exercises enabling the students to build an expertise in the process of managing projects.

PREREQUISITES: COMM 3501.03 OR MGMT 3501.03

CROSSLISTED: MGMT 4333.03

COMM 4701 International Business Strategy

CREDIT HOURS: 3

The objective of this course is to help the students understand why firms expand overseas and how foreign operations differ from domestic ones. It provides the students with the necessary knowledge for a career or further study in international business. The course introduces the basic concepts of international business from a manager's perspective. It examines the issues and problems that arise when business operations extend across national boundaries and become international in scope or character. The emphasis is two-fold. First, consideration is given to the characteristics and contemporary dynamics of the world economy. Second, analysis is made of the development of the multinational firm and of the adaptation of the basic managerial functions due to internationalization. The course orientation is pragmatic and managerial. Through case studies, class discussions, assigned readings, and lectures, the students

are expected to develop the skills for analyzing situations and formulating solutions in an international business context.

PREREQUISITES: COMM 4353.03 (or COMM 4351.03 or MGMT 4001.03 or MGMT 4003.03)

FORMATS: Lecture

COMM 4705 Contemporary Issues in Global Business

CREDIT HOURS: 3

Large cross-border movements of goods, services, capital and technology increasingly demand a transnational view of firm strategy and operations. Some global corporations seek competitive advantage through the close coordination of geographically dispersed units while others choose to tailor their multinational operations to the legitimate economics, political and social aspirations of diverse national governments. Yet others seek to balance conflicting demands through intensive organization wide coordination and shared decision making. This course examines critically the generic and functional strategies open to multinational enterprises and through numerous industry and business case studies. Classes comprise of case analyses, lectures, as well as independent research, class presentations and guest speakers. As the success depends in large measure on the preparedness and effective participation of course members, attendance is crucial and particular attention is paid to the quality of individual contributions to case discussion.

COREQUISITES: COMM 4353.03

PREREQUISITES: At least 4th year standing

FORMATS: Lecture

COMM 4901 Applied Entrepreneurship and Innovation

CREDIT HOURS: 3

COMM 4901 is the capstone undergraduate course in Entrepreneurship and Innovation. Linking theory and practice, students will practice learning's from prerequisite courses, while enhancing their understanding through an instructor led project. Working in groups, students will progress through an innovation management process consisting of secondary research, primary research, design thinking, refinement and implementation. As concepts are refined, students will work to establish the feasibility of their business model. This course will challenge students to identify opportunities; develop innovative concepts and manage the process for successful entrepreneurial outcomes. Students will learn how to manage innovation projects for both individual and corporate entrepreneurship. This course is a demanding, yet rewarding experience.

PREREQUISITES: COMM 3307.03 or COMM 3907.03 or MGMT 3907.03

Bachelor of Management

The Bachelor of Management (BMgmt) program is designed to be flexible and open to your creative and varied interests. It's built on a foundation of key management concepts like leadership, marketing, organizational behaviour and innovation. We want you to have the freedom to find careers in business environments, government, social enterprises or non-profit sectors. We want you to work on the things that excite you. This is a program for students who're interested in a business background to be able to run an art gallery, write environmental policy, streamline a family business, or manage an achieve; the possibilities are endless.

The objectives of the the BMgmt are:

- Enhance and lead organizations in diverse industries and sectors.
- Analyze and assess information in context to make appropriate decisions.
- Synthesize and evaluate information and ideas to make informed, creative decisions in complex, data rich, global environments.
- Manage multicultural and diverse workplaces by applying theories related to diversity and inclusion.
- Apply multidisciplinary management theories and tools to solve complex business problems in a dynamic environment.
- Apply leadership theories in ethical, socially responsible, and innovate ways.

Degree Requirements

- Four year program
- Total credit hours required - 120
- Required GPA for graduation - 2.00
- Required core area courses - 60 credit hours:
 - ECON 1101.03: Principles of Microeconomics
 - ECON 1102.03: Principles of Macroeconomics
 - MGMT 1301.03: Interdisciplinary Management I
 - MGMT 1302.03: Interdisciplinary Management II
 - MGMT 1501.03: Statistics for Managers I
 - MGMT 1601.03: Management Software and Technology
 - MGMT 1101.03: Accounting I (Financial)
 - MGMT 2303.03: People, Work and Organizations: Micro Organizational Behaviour
 - MGMT 2304.03: People, Work and Organizations: Macro Aspects of Organizational Behaviour
 - MGMT 2305.03: Ethics and Social Responsibility
 - MGMT 2401.03: Introduction to Marketing
 - MGMT 2402.03: Marketing Applications in the Not-for-Profit Sectors
 - MGMT 2605.03: Working with Data
 - MGMT 2801.03: Government Structure

- MGMT 3001.03: Data Analytics and Applied Research
- MGMT 3201.03: Financial Management
- MGMT 3501.03: Operations Management
- MGMT 3602.03: Professional Communications Skills
- MGMT 4003.03: Strategic Management
- MGMT 4004.03: Interdisciplinary Capstone
- Required Management electives
 - nine credit hours in management electives are required
 - six credit hours Writing Course (see Section C.)
- Open Electives
 - 45 credit hours, chosen from all courses offered in the University
 - A maximum of 18 credit hours at the 1000 level is permitted (Open and MGMT inclusive).
 - A maximum of 18 credit hours in Commerce is permitted.

Program Guide

Students will normally follow the courses as listed in the table below:

Year	Fall Sept - Dec (A)	Winter Jan - Apr (B)
Year One	Writing Requirement	Writing Requirement

Writing Course

One of the first five credits chosen should be selected from a list of courses in which written work is considered frequently and in detail. These writing courses are approved by the Writing Across the Curriculum committee and are listed under [Writing Courses](#) of the academic calendar.

Courses which satisfy the Writing Requirement are identified by the following text in their formal description (under FORMAT): Meets Writing Requirement

Combined Degree

The School of Health and Human Performance and the Faculty of Management offer a five-year program in which a student graduates with both degrees, Bachelor of Science (Recreation)/Bachelor of Management. Please consult the School of [Health and Human Performance](#) section in the calendar for more information.

Majors

During their second and third year, students can continue to pursue a general program of study with electives that they can choose, or they can focus on one of the five majors.

Entrepreneurship and Innovation Major

Students must complete the following courses:

- MGMT 2902.03: Innovation: Introduction to Design Thinking
- MGMT 3511.03: Management Information Systems
- MGMT 3907.03: New Venture Creation
- MGMT 4901.03: Applied Entrepreneurship and Innovation

Students must choose four of the following:

- COMM 3310.03: Reflections on Leadership
- COMM 3401.03: Consumer Behaviour
- COMM 3402.03: Marketing Communications
- COMM 3405.03: Global Marketing
- COMM 3409.03: Sales Management
- COMM 3410.03: Service Marketing
- LEIS 4362.03: Recreational Entrepreneurship and Special Events
- MGMT 2200.03: Fundamentals of the Legal Environment of Management
- MGMT 3308.03: Managing the Family Enterprise
- MGMT 3309.03: Management Skills Development
- MGMT 3902.03: Starting Lean
- MGMT 4333.03: Project Management

Leadership and Organizations Major

Students must complete the following courses:

- COMM 3303.03 Human Resource Management
- COMM 3310.03: Reflections on Leadership
- MGMT 3309.03: Management Skills Development
- MGMT 3320.03: Organizational Theory

Students must choose four of the following:

- COMM 4315.03: International/Cultural Management
- COMM 4510.03: Corporate Communications
- COMM 4701.03: International Business Strategy

- ECON 2217.03: Women and the Economy
- ECON 3319.03: Industrial Organization
- LEIS 2296.03: Leadership and Group Dynamic
- MGMT 2200.03: Fundamentals in the Legal Environment of Management
- MGMT 2805.03: Introduction to Indigenous Governance
- MGMT 3802.03: Public Policy
- MGMT 3810.03: Government Policy Towards Business
- MGMT 4333.03: Project Management
- MGMT 4340.03: Corporate Governance

Managing Data and Information

Students must complete the following courses:

- MGMT 3511.03: Management Information Systems
- MGMT 3601.03: Information in a Networked World
- MGMT 3603.03: Beyond Google
- MGMT 4620.03/INFO 6620.03: Web Design & Architecture

Students must choose four of the following:

- CSCI 1107.03: Social Computing
- CSCI 2141.03: Introduction to Database Systems
- CSCI 2201.03: Introduction to Information Security
- CSCI 2203.03: Data Science for Everyone
- MGMT 3605.03: Management of Knowledge and Innovation
- MGMT 4300.03/INFO 6300.03: Government Information Resources
- MGMT 4310.03/INFO 6310.03: Resource for Business Intelligence
- MGMT 4370.03/INFO 6370.03: Records Management
- MGMT 4611.03/INFO 6610.03: Information Policy
- MGMT 4681.03/INFO 6681.03: Geospatial Information Management

Public Sector Management Major

Students must complete the following courses:

- MGMT 2200.03: Fundamentals of the Legal Environment of Management
- MGMT 2805.03: Introduction to Indigenous Governance
- MGMT 3802.03: Public Policy
- MGMT 3810.03: Government Policy Towards Business

Students must choose four of the following:

- CANA 2001.03: The Idea of Canada: Social and Political Perspectives
- CANA 2218.03/ECON 2218.03: Canadian Economy: Policy Issues
- CANA 3333.03: New Media and the Courts in Canada
- ECON 2212.03: Law and Economics
- ECON 2216.03: Economics of Global Warming
- ECON 2217.03: Women and the Economy
- ECON 2231.03: Perspective Health Economics
- ECON 2233.03: Canadian Economic History
- ECON 2334.03: Perspectives on Economic Development
- ECON 2336.03: Regional Development
- MGMT 4300.03/INFO 6300.03: Information Resources in Government
- POLI 2210.03: Unity and Diversity
- POLI 2215.03: Canadian Aboriginal Politics
- POLI 2220.03: Structures of Canadian Parliamentary Government
- POLI 2301.03: Comparative Politics I: Development Democracies Under Pressure

- POLI 2302.03: Comparative Politics II: The Developing World
- POLI 3208.03: Canadian Provincial Politics
- POLI 3220.03: Intergovernmental Relations
- POLI 3224.03: Canadian Political Parties

Environment, Sustainability and Society Major

Students must complete the following courses:

- SUST 1000.06: What is Sustainability? **OR** SUST 1001.06: A Sustainable Future*
- SUST 2000.06: Local Governance **OR** SUST 2001.06: Global Environmental Governance
- SUST 3000.03: Environmental Decision Making **OR** MGMT/SUST 3702.03: Sustainable Industries
- SUST 4001.03: Environment, Sustainability and Society Capstone Part 1
- SUST 4002.03: Environment, Sustainability and Society Capstone Part 2**

* SUST 1000 or SUST 1001 satisfy the first year ESS Major requirement, however; SUST 1000 also satisfies the BMgmt writing requirement and can be more easily accommodated in the first year BMgmt schedule. SUST 1001 does not satisfy the BMgmt writing requirement.

**SUST 4001 and SUST 4002 must be completed in consecutive fall and winter terms. Credit will not be granted for SUST 4001 without successful completion of SUST 4002.

Students must choose two from the following:

- Six credit hours SUST at 3000 level or above
- Three credit hours SUST/ESS electives at the 3000 level or above

Minors

For Bachelor of Management students

Bachelor of Management students can undertake a minor from various departments within the Faculty of Arts and Social Science, the Faculty of Science or the Faculty of Computer Science. They should consult advisors in those faculties for the most current information on the requirements for particular minors.

For a current list of minors please see “[Minor Programs](#)” of the Undergraduate Calendar

For students registered in the Bachelor of Arts (BA), Bachelor of Science (BSc), Bachelor of Computer Science (BCSc) and Bachelor of Applied Computer Science (BACS) programs

The minor in management is available to students registered in the BA, BSc, BCSc and BACS programs. The requirements are as for the appropriate degree program with completion of the following courses:

Required courses:

- MGMT 1301.03: Interdisciplinary Management I
- MGMT 1302.03: Interdisciplinary Management II

Any 18 credit hours chosen from the below list, three credit hours of which must be at the 3000 level. Please note that some MGMT courses have additional prerequisite requirements:

- MGMT 2200.03: Fundamentals of the Legal Environment
- MGMT 2303.03: People, work and organizations: Micro Organizational Behaviour (**Not an option for BACS students**)
- MGMT 2304.03: People, work and organizations: Macro Organizational Behaviour
- MGMT 2401.03: Introduction to Marketing
- MGMT 2801.03: Government Structure
- MGMT 2805.03: Introduction to Indigenous Governance
- MGMT 3308.03: Managing the Family Enterprise
- MGMT 3309.03: Management Skills Development
- MGMT 3320.03: Organizational Theory

- MGMT 3601.03: Information in a Networked World (**Not an option for BACS students**)
- MGMT 3603.03: Beyond Google (**Not an option for BACS students**)
- MGMT 3701.03: The Community as a Living Laboratory
- MGMT 3702.03: Sustainable Industries
- MGMT 3802.03: Public Policy
- MGMT 3810.03: Government Policy Towards Business to the list below

Optional Internship

The Bachelor of Management (BMgmt) internship is a minimum of 32 weeks (approximately eight months) of consecutive, full time work experience related to your studies. Internships can be with large multi-national corporations or small businesses, at a not-for-profit organization or a government department. Management Career Services will support you in your internship job search.

Bachelor of Management students currently in the second year of their program are eligible to apply for the Internship Program. Please meet with your Academic Advisor to discuss your course plan. Full details on the program can be found at www.dal.ca/mcs/internship. With proper academic planning, students participating in the Internship Program are able to complete an eight month internship and still graduate from the BMgmt Program in four years. In addition, participants in the Internship Program receive 1 full credit towards their program.

acceptance to participate in the Internship Program will be assessed on the following:

1. A completed application form
2. a written statement of intent
3. a resume
4. reference letters
5. an interview with Management Career Services (to be arranged once complete application is reviewed), and
6. full participation in the Internship Prep Seminar, MGMT 4895 held each fall

Students must have a CGPA of 2.70 or a GPA of 2.70 or higher for the two terms prior to the applicaiton.

Internship Fee

Students accepted into the Internship Program are charged an Internship Fee. This fee is non-refundable after the last day to drop a course without a "W".

The Internship Fee covers administration of the internship including, but not limited to:

- MGMT 4895, the Internship Prep Seminar
- Job search assistance (cover letters and resume building, interview preparation and debrief, coaching for self-developed job search strategies)
- Networking opportunities with employers
- Development of job opportunities
- Access to on-line job posting site and job posting administration
- Interview space and co-ordination
- Facilitation of job offers
- Tracking of eligibility and job search activity
- Internship monitoring and mediation of unsatisfactory situations
- Marketing and communications tools and activities to promote the internship program to employers

Career Development Fee

Bachelor of Management students have access to specialized career development services through the Management Career Services unit. This service is covered through the payment of a mandatory Management Career Services Fee. This fee is prorated for part-time students. The Management Career Services team provides the following services:

- Career Related Workshops including: Resumes, Interviewing, Job Search Strategies, Networking and more
- Individual coaching appointments (See below)
- Employer Information Sessions
- myCareer job postings
- On-campus grad recruitment

- Special Events (e.g. Sector specific Recruiting Events and Corporate Tours, both locally and in other cities)

Career & Recruitment Specialists

There are six Career & Recruitment Specialists (CRS), each responsible for specific employment sectors, and a Student Development Manager who oversees the team. Two of the six CRS staff members are dedicated to working with Bachelor of Management students across all majors (or undeclared). Bachelor of Management students may also meet with another CRS if they require specific information on career interest areas of marketing, finance, accounting, supply chain & logistics, or international business. Career & Recruitment Specialists work with students to guide them through a process that provides the student with the ability and knowledge needed to develop their careers. This set of skills will serve students well now, and in the future.

Career & Recruitment Specialists work with students individually or in group sessions to help with the following:

- Identifying student strengths, interests and priorities
- helping students establish which career path and work environment is right for them
- planning a job search strategy
- writing effective resumes and cover letters
- building and interacting with a network of contacts
- preparing for interviews
- providing job search assistance for graduating students

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions

MGMT 1000 Managing Organizational Issues I

CREDIT HOURS: 3

This course is specially designed for Bachelor of Applied Computer Science students in the Dalhousie - Universal College Lanka (Dal-UCL) pathway program to introduce them to the complex social, economic, ecological, political and technological forces shaping 21st century leadership in the public, private and non-profit sectors.

MGMT 1001 Managing Organizational Issues II

CREDIT HOURS: 3

This course is specially designed for Bachelor of Applied Computer Science students in the Dalhousie - Universal College Lanka (Dal-UCL) pathway program to introduce them to the complex social, economic, ecological, political and technological forces shaping 21st century leadership in the public, private and non-profit sectors.

EXCLUSIONS: ASSC 1100.03, SCIE 1100.03

MGMT 1101 Introductory Accounting I (Financial)

CREDIT HOURS: 3

An introduction to the principles and practices used by accountants in processing and communicating data, both within and outside the organization. Emphasis is on financial accounting and reporting used in the measurement and reporting of an organization's operating, financing and investing activities to external users. Students will develop an understanding of basic financial accounting methodologies, and develop the analytical and procedural skills related thereto; as well as understand the information content of conventional financial statements, and the inherent limitations of accounting data. The organizational context

includes business and not-for-profit settings. The coverage included an examination of the accounting process, basic issues in financial reporting, and the financial statement disclosure requirements.

CALENDAR NOTES: Students who have completed MGMT 2101.03 or COMM 1101.03 (COMM 2101.03) cannot also receive credit for MGMT 1101.03

CROSSLISTED: COMM 1101.03

FORMATS: Lecture | Tutorial

MGMT 1102 Introductory Accounting II

CREDIT HOURS: 3

An introduction to the use of accounting information by managers, within the organization. This course examines how accounting can provide information to assist management in their planning, decision-making and performance evaluation. Both qualitative and quantitative information supports this decision-making. Emphasis is on management accounting and analysis, with the following objectives: To develop an understanding of the kinds of accounting information managers need; To examine managerial accounting methodologies and develop the analytical and procedural skills related thereto; To prepare accounting reports which are useful for management planning, control and decision making; To develop an awareness of the limitations of managerial accounting information.

CALENDAR NOTES: Students who have completed MGMT 2102.03 or COMM 1102.03 (COMM 2102.03) cannot also receive credit for MGMT 1102.03.

PREREQUISITES: MGMT 1101.03

CROSSLISTED: COMM 1102.03

EXCLUSIONS: MGMT 2102.03

MGMT 1301 Interdisciplinary Management I

CREDIT HOURS: 3

Management skills are essential, regardless of field or discipline. This course introduces foundational management concepts, exploring how people and processes are similar but vary across government, social enterprises, non-profits and business environments. Students will explore basic management issues of planning, organizing, leading and controlling to respond to internal and external pressures. Students will examine the interactions among the environment, technology, society, organizations and people, in a world with limited resources. The course introduces students to management issues with an emphasis on creativity, leadership and innovation, and is the starting point for the Management degree and minor, which are flexible programs that allow you to blend management skills with other fields and subjects you care about.

FORMATS: Lecture

MGMT 1302 Interdisciplinary Management II

CREDIT HOURS: 3

Management skills are essential, regardless of field or discipline. This course introduces foundational management concepts, exploring how people and processes are similar but vary across government, social enterprises, non-profits and business environments. Students will explore basic management issues of planning, organizing, leading and controlling to respond to internal and external pressures. Students will examine the interactions among the environment, technology, society, organizations and people, in a world with limited resources. The course introduces students to management issues with an emphasis on creativity, leadership and innovation, and is the starting point for the Management degree and minor, which are flexible programs that allow you to blend management skills with other fields and subjects you care about.

PREREQUISITES: MGMT 1301.03

FORMATS: Lecture

MGMT 1501 Statistics for Managers

CREDIT HOURS: 3

An introduction to the principles and applications of statistics relevant to managers, with an emphasis on making inferences based on observed data. Topics include descriptive statistics, probability, random variables, estimation, hypothesis testing and regression. Tutorial labs are held for students to practice related tools and techniques on cases and computers using Excel or another statistical software.

CALENDAR NOTES: Students enrolled in the Bachelor of Management must register for this course.

EXCLUSIONS: COMM 2504.03, MATH 1060.03, STAT 1060.03, ECON 2260.03, ENGM 2032.03 NOTE: Students cannot receive credit for MGMT

1501.03 after already receiving credit for STAT 2060.03

FORMATS: Lecture | Tutorial

MGMT 1601 Management Software and Technology

CREDIT HOURS: 3

This course will teach students how to use computer applications and systems that are essential to virtually all management professions. Students will master the word processing, spreadsheet, and presentation software in an integrated office suite. They will also learn to manage web communications, enterprise cloud software, and social media. It is strongly recommended that students complete this course in their first year of study.

CALENDAR NOTES: ASSC 1000 or CSCI 1200 will not be counted in the Bachelor of Management program.

EXCLUSIONS: ASSC 1000.03, CSCI 1200.03

MGMT 2105 Introductory Conflict Management for Sustainability

CREDIT HOURS: 3

Working towards sustainability requires collaboration between multiple stakeholders, disciplines, and fields, which can lead us to disagreement and conflict. This course explores tools and models for developing interpersonal conflict management and communication skills so that we might transform our conflicts to opportunities for transformation and greater understanding.

CROSSLISTED: SUST 2101.03

RESTRICTIONS: Second year status or above

EXCLUSIONS: SUST 3952 (taken in Winter 2022)

FORMATS: Lecture

MGMT 2106 Climate Change and Sustainability

CREDIT HOURS: 3

This course introduces quantitative methods for understanding our environment and calculating change. Our natural environment is influenced by multiple natural and anthropogenic factors that can influence the trajectory of our ecosystems through time. Fundamentally, we must understand the past such that we can compare and understand the current context of global warming into perspective. This course focuses on the quantitative science behind understanding the Quaternary period, which represents the last 2.6 million years of the earth's history. Topics will include the physical basis of climate change as well as the human activities that have influenced this change. A focus on research methods, including quantitative analysis of data, will enable students to understand how we know what we do about our past, and what it means for our future.

CROSSLISTED: SUST 2106

RESTRICTIONS: Second year status or above

FORMATS: Lecture | Tutorial

MGMT 2200 Fundamentals of the Legal Environment of Management

CREDIT HOURS: 3

This course provides an introduction to the legal setting of management in Canada. It examines the structure of the legal system and the machinery of justice. It considers the nature and application of various areas of law that are particularly relevant to management in the early 21st century, including administrative law, the law of torts, the law of contracts, principles from equity, organizational structures, employment and labour relations, insurance, the various areas of property law, privacy and freedom of information, and environmental protection.

PREREQUISITES: At least second year standing

EXCLUSIONS: COMM 2603.03, MGTA 2001.03

FORMATS: Online Delivery

MGMT 2303 People, Work, and Organizations: Micro Organizational Behaviour

CREDIT HOURS: 3

Organizational behavior and the study of work organizations and management draw on a number of disciplines within social sciences to help us to understand and make sense of individual behavior and human action in groups and organizations. Through a combination of individual assessments, reflections, and assignments related to real-world application, this course will explore concepts and theories relating to micro aspects of organizational behavior. Topics include: individual motivation, personality, perception, attitudes, cultural values, and ethics in organizations. Links will also be made to practice and processes in organizations (for example: rewards, stress appraisal, trust and organizational commitment).

PREREQUISITES: MGMT 1302.03

EXCLUSIONS: COMM 2303.03*Students who have taken COMM 2303.03 Introduction to Managing People are currently required to take MGMT 3309.03 (Management Skills Development) for full exclusion to MGMT 2303.03 and MGMT 2304.03.

FORMATS: Online Delivery

MGMT 2304 People, Work and Organizations: Macro Aspects of Organizational Behaviour

CREDIT HOURS: 3

This course takes a macro perspective of organizational behavior (micro perspectives are covered in MGMT 2303) that considers the relationships between ethical, cultural, social, economic and political factors and the managing and organizing of work. Topics include: communication, team performance and leadership, and how they interact with organizational structures, power and politics, organizational cultures, the process of change, and ultimately, levels of employee commitment and performance. To achieve a balance between theoretical and practical learning, the teaching methods will combine mini-lectures with in-class/on-line exercises, cases, and discussions.

PREREQUISITES: MGMT 2303.03

EXCLUSIONS: COMM 2303.03 Please note: where a student is transferring from Commerce to Management and has taken COMM 2303.03, they will need to take the complementary course MGMT 3309.03 (Management Skills Development) to receive full credit for MGMT 2303.03 and MGMT 2304.03

FORMATS: Lecture

MGMT 2305 Ethics and Social Responsibility

CREDIT HOURS: 3

What is a good thing to do? What is the right thing to do? What ethical obligations do managers and decision-makers have to others, whether those be the user of their products and services, their community, their workplace, the environment, or humanity more broadly? In this course, students will explore the basics

of ethical reasoning and learn how to apply it to the workplace. After establishing a framework with which to undertake ethical analysis, this course presents students with a series of controversial case studies that they will learn to evaluate critically. Students will learn how to compose the central format with which information is transmitted in a wide range of corporate and governmental environments, the brief. A secondary, but no less important, outcome of this course is that students will have a better understanding of their own ethical commitments in the workplace and in their personal lives. Through the tutorials, students will build skills in writing, facilitation, conflict resolution, and moral reasoning. Ultimately, this course aims for students to be equipped with a 'textbook' to navigate ethical conundrums and commitments in their own professional and personal lives.

PREREQUISITES: MGMT 1302.03

EXCLUSIONS: PHIL 2081.03

FORMATS: Lecture | Lab

MGMT 2401 Introduction to Marketing

CREDIT HOURS: 3

The objective of this course is to familiarize you with marketing's mode of inquiry—the way marketers look at the world. As a marketer you should be able to: 1) ask the right questions about markets; 2) organize data into relevant information; 3) discover market opportunities; 4) set goals; 5) create a marketing plan that includes clear target markets, as well as product, price, distribution and communication strategies; and 6) implement and control a marketing program. A mixture of instructional methods will be used, including lectures, video cases, assignments, and current topics discussions. You are expected to prepare for class each week by prior reading of the assigned materials. Active participation is expected throughout the course. Students will work in teams and will be preparing a marketing plan to introduce a new product to the Canadian market.

PREREQUISITES: MGMT 1302.03

EXCLUSIONS: COMM 2401.03

MGMT 2402 Marketing Applications in the Not-for-Profit Sectors

CREDIT HOURS: 3

This course is intended to further the student's understanding of the ways in which the discipline of marketing can be applied to a number of public policy, environmental, professional and non-profit management areas. It will integrate the basic theory and concepts covered in the introductory marketing course with advanced theory and concepts in consumer psychology. Overall, the course will maintain a consumer behaviour perspective in examining the ways in which various constituencies fulfill their strategic organizational objectives through the application of marketing practices. Topic areas examined will be: micro-marketing (firm perspective) vs. macro-marketing (societal perspective); non-profit, cause-related, "green" and social marketing; de-marketing (e.g. anti-smoking, etc.); the use of marketing communications in the electoral and public policy-making process; ethics in marketing; marketing and development. The course may also examine the application of the discipline of marketing to a number of professional fields, such as sports/recreation and health sciences. Learning activities might include: lectures, videos, seminars, internet exercises, examinations and field assignments.

PREREQUISITES: MGMT 2401.03

MGMT 2502 Predictive Analytics

CREDIT HOURS: 3

This course is a continuation of MGMT 1501. It concerns mostly the relationship of two or more measurements, with an eye to making quantitative predictions in the context of a business or other organization. Topics covered in detail are analysis of variance, simple and multiple regression, logistic regression and time series.

PREREQUISITES: MGMT 1501.03

CROSSLISTED: COMM 2502.03

EXCLUSIONS: MATH 2080.03, STAT 2080.03, ECON 2280.03

MGMT 2601 Knowledge Management

CREDIT HOURS: 3

In today's economy cutting-edge organizations in every industry are harnessing the power of knowledge as a core asset of the organization and the key to a sustainable competitive advantage. The aim of this Knowledge Management (KM) course is to provide an introductory and integrated approach to the various topics, emerging issues and perspectives in KM and organizational learning. We will explore how all types of organizations can effectively understand, analyze, measure, and manage, knowledge as an asset, i.e., manage the organization's intellectual assets and turn organizational wisdom into market value. Emphasis is placed on the development and application of both technical and people management skills within Knowledge Management environments.

PREREQUISITES: At least second-year standing

FORMATS: Lecture

MGMT 2605 Working with Data

CREDIT HOURS: 3

People and organizations are grappling with increasing amounts of data. Modern employees and citizens are expected to collect, manage, evaluate, visualize, analyze, and apply data in a range of domains and challenges: in short, to be data literate. This course introduces this knowledge and skillset through online lectures and hands-on labs. Students will learn to use a variety of tools to find, manage, assess, extract value from, and visualize raw data.

PREREQUISITES: MGMT 1302.03

FORMATS: Lecture | Lab | Online Delivery

MGMT 2801 Government Structure

CREDIT HOURS: 3

This course introduces students to the organizing principles and structures of governments in Canada, including federal, provincial, municipal and territorial governments. The course explores the role of the permanent public service and seeks to examine the relationship between the various public institutions in Canada, including the public service, political parties, advocacy groups, and the courts. For those interested in business this is an important course as it provides an understanding of the core structures business must understand when dealing with government. As citizens this course provides a framework for understanding your rights and responsibilities.

PREREQUISITES: MGMT 1302.03

FORMATS: Lecture

MGMT 2803 Management in the Public Sector

CREDIT HOURS: 3

This course provides an introduction to the principles and methods used in the management of financial, human, and information resources in public sector organizations, with an emphasis on leadership in the Canadian context. It is designed to meet the educational needs of undergraduate students who are interested in a career in public service, the arts, or non-profit organizations, and who wish an exposure to modern management practices in the public sector.

PREREQUISITES: MGMT 2801.03

MGMT 2805 Introduction to Indigenous Governance

CREDIT HOURS: 3

This course focuses on the traditional political cultures of Indigenous peoples within Canada as well as the fundamental issues facing Indigenous communities. This introductory course will provide students with the necessary background and conceptual framework that will equip them with a better understanding of Indigenous governance.

PREREQUISITES: At least second-year standing

FORMATS: Online Delivery

MGMT 2902 Innovation: An Introduction to Design Thinking

CREDIT HOURS: 3

Ever wonder how great ideas turn into innovative solutions people, organizations or communities want to adopt? In today's highly dynamic workplaces, innovation has become not only a priority, but a driving force in the pursuit of financial returns, competitive edge and social impact / social good. Moreover, employers such as Pixar, AirBnb, the Government of Canada and the United Nations, to name a few, have identified the ability to promote innovation and engage in creative practices as essential competencies for their employees and future leaders. Many of these organizations adopt an approach to innovative problem solving called Design Thinking. Design Thinking's mindset, process and rich collection of methods emphasize the importance of keeping an understanding of people and communities at the core of problem-solving efforts. A design thinking exercise offers the promise of producing ideas and solutions that are desirable for the user (of a product or service), customer or community. This course will explore what we mean when we use the word innovation and its relevance to today's organizations and workforce. We will devote some time to understanding barriers to creativity, the impact of these barriers to innovative pursuits and how they might be overcome. Finally, we will take an in-depth look at Design Thinking – its foundations, methods, and challenges with execution. This course combines theory and application. It provides students with a hands-on practical learning experience in which they will experiment with how design thinking can be used to develop solutions to real-world problems.

PREREQUISITES: At least second-year standing

FORMATS: Lecture

MGMT 3001 Research Methods and Applied Data Analytics

CREDIT HOURS: 3

Informed management decisions rely on high-quality knowledge, information, and data. This course will provide the knowledge and skills required to define a problem, identify a method to inform that problem, collect quantitative and qualitative data, and analyze collected data in concert with existing data sets to reach a resolution. This course emphasizes critical thinking, applied skills, and the use of advanced data analytic tools to derive value from raw data.

PREREQUISITES: MGMT 2605.03 or HAHP 3100.03 or HLTH 3010

FORMATS: Lecture

MGMT 3003 Tourism Management

CREDIT HOURS: 3

A multidisciplinary introduction to the concepts, methods, and practices of tourism management. Tourism is introduced within the context of leisure and recreation. It is described as a phenomenon that has social, economic, and environmental implications. Students are encouraged to think about the development of tourism in terms of the value of the experience created for the tourist. Emphasis is placed on a wholistic and sustainable perspective whereby the socioeconomic wellbeing of local people is paramount.

PREREQUISITES: At least third year standing

FORMATS: Lecture

MGMT 3104 Sustainability and the Non-Profit Sector

CREDIT HOURS: 3

This course introduces the Canadian non-profit sector and its role in driving social change towards sustainability, equity and social justice at local, regional, national and international levels. It examines the particular role and contributions of NGOs in relation to state and private sector, in achieving social, economic and ecological sustainability.

PREREQUISITES: SUST 2000.06 or MGMT 2304.03 or INTD 2002.03 or permission of instructor

CROSSLISTED: SUST 3104.03

FORMATS: Lecture | Experiential Learning

MGMT 3108 Green Finance & Environment, Social, and Governance Investing

CREDIT HOURS: 3

This course explores rapidly growing markets Green Finance and Environmental, Social and Governance investing. The class begins with an overview of general approaches to financial investing, combined with an examination of how ESG investing fits into these markets. The course also explores project evaluation, allowing students to better understand which offer the best opportunities for investment while creating the greatest ESG impact. Students will then practically apply these skills in two semester long projects. The first is to design, implement and trade their own ESG investment portfolios. The second is to design, scope, outline, and budget an ESG project.

CROSSLISTED: SUST 3108.03

RESTRICTIONS: Third year status or above

EXCLUSIONS: SUST 3954.03 (taken in Winter 2022)

MGMT 3201 Financial Management

CREDIT HOURS: 3

This course is an introduction to the techniques and core principles for making optimal financial decisions for profit, not for profit and public sector organizations. The emphasis is on understanding the role of finance in an integrated management framework. Concepts covered include stakeholder analysis, financial planning, valuation and triple bottom line analysis.

PREREQUISITES: At least second-year standing

EXCLUSIONS: COMM 2202.03 and COMM 2203.03

FORMATS: Lecture

MGMT 3204 Risk Management

CREDIT HOURS: 3

This course is designed to be a holistic class on risk management. Risk is defined as "the possibility that bad or good things may happen". While centered on risk and uncertainty management in the context of business, it will cover a range of risk management ideas, tactics and strategies that are relevant to policy, environmental management, health care, media and communications management, development and other areas in which risk management plays a role.

PREREQUISITES: 2nd year standing

FORMATS: Online Delivery

MGMT 3308 Managing the Family Enterprise

CREDIT HOURS: 3

Managing the Family Enterprise is about the special problems and issues that confront family businesses. It explores the family system, the business system, the ownership system and their interactions - functional and dysfunctional. Specific topics, examined from the family business perspective, include: the decision to join a family firm, management succession, ownership succession, the role of key non-family employees, strategic planning and other issues especially relevant for family firms. The course also addresses conflict and communication in the family and business. The course has two purposes. First it provides an organized framework for students to understand the dynamics and special issues of family firms. Second it is designed to allow students to explore their interest in joining a family firm. Therefore, it is especially intended for students who come from families which are in business or for students considering joining a family business. Others who wish to explore a key segment of Canadian business are also welcome. The course relies on field projects, guest speakers, case studies, videos, research papers and extensive class discussion to explore the territory of managing family businesses.

PREREQUISITES: At least third-year standing, and MGMT 1302.03 or MGMT 3907.03

CROSSLISTED: COMM 3908.03

EXCLUSIONS: BUSI 6006.03

FORMATS: Lecture | Discussion | Experiential Learning

MGMT 3309 Management Skills Development

CREDIT HOURS: 3

This course will expose students to key knowledge, behaviors, skills, competencies and attitudes considered critical to leadership and managerial success.

This course is designed with an emphasis on skill development and the application of effective management practices. Key topic areas include: understanding personal self-awareness/self-management, communications, interpersonal negotiations, team skills, managing innovation and change, conflict management, coaching and leadership skills, behaviors, and attitudes needed for success. Significant amounts of classroom time will be devoted to putting theory into practice by developing students' leadership skills. In class, students will experience a combination of lectures, student presentations, group work, individual work, skill development practice session, in-class discussion, and experiential exercises.

PREREQUISITES: MGMT 2304.03 or COMM 2303.03 and at least third-year standing

CROSSLISTED: COMM 3309.03

FORMATS: Lecture | Seminar | Discussion | Experiential Learning

MGMT 3320 Organizational Theory

CREDIT HOURS: 3

If you want to know how to assess and create organizations that are adaptable, effective, and flexible in today's complex environments then this is the course for you. The goal of this course is to prepare students to assess, design and structure organizations to be more effective. The interrelationships between strategy, technology, culture, and the organization's internal and external environments will be explored. An emphasis will be placed on change management practices and other frameworks that are useful for assessing and increasing organizational effectiveness. In class, students will experience a combination of lectures, student presentations, group work, individual work, in-class discussions, and the experiential exercises.

PREREQUISITES: MGMT 2304.03

CROSSLISTED: COMM 3320.03

EXCLUSIONS: COMM 4306.03

FORMATS: Lecture | Seminar | Discussion | Experiential Learning

MGMT 3400 Introduction to Real Estate Management

CREDIT HOURS: 3

The purpose of this course is to provide students with an overview of the varied aspects of property management in the Canadian environment. Topics include: Residential Management, Building Operations, Environmental Programs and Initiatives, Facility Management, Law and the Lease, and Site Development.

PREREQUISITES: MGMT 1101.03 and MGMT 3201.03 or COMM 1101.03, COMM 2202.03 and COMM 2203.03

FORMATS: Lecture

MGMT 3501 Operations Management

CREDIT HOURS: 3

This course introduces some of the standard techniques to manage operations in manufacturing and services. Topics include forecasting, inventory, supply chains, production planning, project management, quality assurance and queueing. Cases and class examples are used to build general skills and illustrate concepts and techniques to solve real-world problems in practice.

PREREQUISITES: MGMT 1101.03, MGMT 1501.03, MGMT 2401.03

EXCLUSIONS: COMM 3501.03

FORMATS: Lecture

MGMT 3511 Management Information Systems

CREDIT HOURS: 3

Information is a key resource for organizations and professionals. Innovative uses of information are often keys to survival in an increasingly competitive and digital economy. Information systems enable these users and account for an increasing larger share of assets in most organizations. The ability to harness and manage these systems demands a sound understanding of a broad range of concepts, terms, and challenging issues dealing with technologies and strategies.

This course is designed to help students acquire these essential skills and become an effective client, user, and manager of these systems. Specifically, the course will help students understand the fundamentals of what, how and why information systems are used in organizations and the technologies that enables them. In addition to lecture materials and theoretical frameworks, students will be exposed to real information systems such as SAP and Enterprise Resource Planning (ERP) systems and Business Analytics tools via hands-on lab work and exercises.

PREREQUISITES: MGMT 1302.03 and at least second-year standing

CROSSLISTED: COMM 3511.03

FORMATS: Lecture | Lab | Discussion | Experiential Learning

MGMT 3601 Information in a Networked World

CREDIT HOURS: 3

This course provides an introduction to the economic, political, and social dimensions of today's networked information economy. It considers the historical development of information and knowledge production, issues related to control versus the free flow of information, the ethical and legal aspects of information management, and organizational use of information management for storing and processing information, managing knowledge, and making decisions.

PREREQUISITES: At least third year standing

FORMATS: Lecture

MGMT 3602 Professional Communication Skills

CREDIT HOURS: 3

This course will introduce students to the broad range of written and oral communication skills needed by managers, including how to adapt a document or presentation for a particular audience and purpose, how to select a suitable method of organization, how to make good use of graphics, how to work effectively as part of a collaborative project team. Students will have the opportunity to practice their communication skills and techniques in small groups, and in formal presentations before the whole class.

CALENDAR NOTES: CSCI 2100 Workplace Communications for Computer Science - will not be counted towards the Bachelor of Management Program

PREREQUISITES: Writing Requirement

EXCLUSIONS: COMM 1702.03, ENGL 2100.03, ENGL 2110.03, EGLA 1003.03, (COMM 1710.03 and COMM 1720.03), (COMM 1711.03 and COMM 1712.03 and COMM 1715.03)

FORMATS: Lecture

MGMT 3603 Beyond Google

CREDIT HOURS: 3

The ability to find contextually relevant information is essential to support decision making and strategic planning by individuals, groups and organizations.

This course discusses the theory and practice of information seeking while developing key skills for systematically accessing, gathering and evaluating resources efficiently, effectively and ethically. In addition, this course explores contemporary information-seeking behavior issues including fake news and the Internet of Things. The use of technologies to streamline search processes will be emphasized, as well as the behavioral, affective and cognitive aspects of human information behavior that influences how we find and consume digital content.

PREREQUISITES: At least third year standing

FORMATS: Online Delivery

MGMT 3605 Management of Knowledge & Innovation

CREDIT HOURS: 3

This course focuses on the management of knowledge and innovation in organizations. In this course, we will explain the role that knowledge plays in the economy today and why it is essential to view knowledge as part of an “organization’s stock of capital assets”. We will survey theory and research on knowledge and innovation as an outcome (product, service, technology, practice), as well as examine and discuss the process of development and implementation of knowledge assets and innovation in organizations. We will also discuss the basic structures and designs that underlie an effective information or knowledge management system. Emphasis will be on the engagement of management and leadership in knowledge and innovation processes, particularly at the macro (strategy) level.

FORMATS: Lecture

MGMT 3701 The Community as a Living Laboratory

CREDIT HOURS: 3

This course introduces students to research, concepts and methods for understanding community sustainability across a spectrum of perspectives. In this course, the Halifax community serves as a living laboratory for exploring environmental, social and economic challenges and solutions for community sustainability. Working in groups, students apply evidence-based approaches to case-based projects using mixed (qualitative and quantitative) research methods to help community organizations (governmental and non-governmental) grapple with real world problems. A variety of tools may be used including systems analysis, environmental audits, field surveys, questionnaires, interviews, and statistical analysis. Students then draw conclusions and make recommendations for improvements on the basis of their analysis, and present them in a final report and powerpoint presentation.

PREREQUISITES: ENVS 1100.03 and ENVS 1200.03 or SUST 2000.06 or SUST 2001.06 or MGMT 1702.03 and MGMT 2702.03 or MGMT 1301.03 and MGMT 1302.03

CROSSLISTED: SUST 3701.03

EXCLUSIONS: ENVS 3502.03, SUST 3502.03

MGMT 3702 Sustainable Industries

CREDIT HOURS: 3

The course introduces students to concepts and methods for analyzing industrial sustainability through an interdisciplinary lens that highlights the necessity of including economic, social and environmental considerations. It also intends to deepen their understanding of: a) the business case (short term and long term) for industrial/corporate sustainability; b) the tools, techniques and strategies necessary to decouple economic growth of our business sectors from resource use and environmental degradation; and c) the key role that business and industry play in the sustainable development agenda. Using examples from various industrial settings, a range of management and policy mechanisms for ensuring resource sustainability are explored.

PREREQUISITES: MGMT 1702.03 and MGMT 2702.03 or MGMT 1301.03 and MGMT 1302.03 or SUST 2000.06 or SUST 2001.06 or ENVS 1100.03 and ENVS 1200.03 or ENVS 1000.06

CROSSLISTED: ENVS 3702, SUST 3702

MGMT 3710 Doing Business in Emerging Markets

CREDIT HOURS: 3

This course is designed to give students an understanding of the traditional challenges and opportunities Canadian businesses face when expanding their business to emerging markets, including those in Africa, Asia, Latin America, and Eastern and Central Europe. Through this course, students will be expected to acquire a holistic understanding of the political, cultural, social, and economic challenges companies face when considering the benefits of expanding and conducting business in emerging markets.

PREREQUISITES: MGMT 2304 and MGMT 2401

CROSSLISTED: COMM 3710

FORMATS: Lecture

MGMT 3802 Public Policy

CREDIT HOURS: 3

This course serves as an introduction to the public policy process with an emphasis on the interplay between policy and the four thematic areas of study and professional practice upon which the Faculty of Management has been formed – the private sector, the environment, the public sector and information technology. Students assume the role of a policy analyst during the course and pursue a policy problem of their choosing through the policy process that culminates in a policy project briefing and paper.

PREREQUISITES: At least third year standing

FORMATS: Lecture

MGMT 3810 Government Policy Toward Business

CREDIT HOURS: 3

The focus of this course is twofold: first, how governments shape business behaviour through policy, regulation, state ownership, and other forms of intervention; and secondly, why collaboration is a growing reality enjoining public sector and private sector organizations and the implications for each sector and society as a whole. The course aims to understand the fundamental difference between the public interest and the private interest and how such differences are sorted out through contemporary governance systems involving public, private and civic actors. While the emphasis will be on the Canadian environment, a comparative perspective will also be used in light of many issues that are increasingly transnational in scope. Students will be able to develop a critical view of government intervention and grow a sense of when and where government action is warranted and when and where it is not.

PREREQUISITES: At least third year standing

FORMATS: Lecture

MGMT 3902 Starting Lean

CREDIT HOURS: 3

This course provides real-world, hands-on learning about what it is like to actually build a scalable startup. This is a lab providing experiential learning -- not a theory course. You will work in teams learning how to turn a great idea into a great enterprise. You will learn how to talk to customers, partners, and competitors, as you encounter the chaos and uncertainty of how a startup actually works. You will learn the importance of customer development and customer discovery to determine whether anyone other than you would want/use your product. Each day will be a new adventure outside the classroom as you test each part of your business model, then share your hard earned knowledge with the rest of the class.

PREREQUISITES: At least third year standing

EXCLUSIONS: BUSI 5902.03

MGMT 3905 Indigenous Business Studies

CREDIT HOURS: 3

Over 370 million Indigenous people are living in over 70 countries (United Nations, 2019), and the Indigenous populations in Canada are growing. An understanding of Indigenous business has become essential to the business professions. Highly relevant to all Canadians, including the First Nations, Métis, and Inuit of Mi'kma'ki and beyond, this course addresses the impacts that history and policy have had on Indigenous business relations. Through an exploration of Indigenous ways of knowing and the practice of two-eyed seeing, students will move toward reconciliation through an appreciation of the challenges and successes of Indigenous businesses. The course is open to both Indigenous and non-Indigenous students.

PREREQUISITES: MGMT 1302.03 and 3rd year standing

CROSSLISTED: COMM 3905.03

MGMT 3907 New Venture Creation Entrepreneurship

CREDIT HOURS: 3

This course is about entrepreneurial thinking and acting on it. By linking theory and practice, the course will expose students to the issues, problems and challenges of developing new ventures and provide students with the opportunity, within the framework of a formal class, to explore and develop venture ideas, testing their ideas assumptions, and most importantly how to act on ideas with the resources you have on hand. Experiential exercises enable the students to build their personal entrepreneurial strategy. identify an innovative idea, build their business model, gather resources, and present their business idea. The purpose of the course is to provide students a foundation from which they can act entrepreneurially for themselves or for the organization they work for.

PREREQUISITES: MGMT 2902.03

CROSSLISTED: COMM 3907.03

MGMT 4001 Strategy Formulation

CREDIT HOURS: 3

This is a capstone course which draws upon all previous courses in the Bachelor of Management Program. The course introduces students to different theoretical frameworks for the analysis and development of strategy. Moving through an analysis of the external and competitive environment of the organization and its resources and capabilities, students' progress to the formulation phase of strategy-making through lectures, case studies, and experiential exercises. Strategy is examined in the context of the four thematic areas of study and professional practice upon which the Faculty of Management has been formed. In addition to other requirements, student knowledge is consolidated through the preparation of a major individual project on a real organization.

PREREQUISITES: All required first, second, and third year core courses for the Bachelor of Management program.

EXCLUSIONS: COMM 4351.03

FORMATS: Lecture

MGMT 4002 Strategy Implementation

CREDIT HOURS: 3

This course is the second capstone course in the Bachelor of Management Program and is a continuation of MGMT 4001.03. The course is about strategy implementation. Through the course, students learn to discern and manage four important variables on the way to effectively implementing a chosen strategy: organizational structure, control systems, people management systems, and organizational culture. In addition, students learn about leadership and management in the context of creating organizational change. The course entails lecture case discussions, individual assignments, and a major team project on strategy implementation within an existing organization. Finally, the course draws on, and applies to, the four thematic areas of study and professional practice upon which the Faculty of Management was formed: the private sector, the environment, the public sector and information technology.

PREREQUISITES: MGMT 4001.03

EXCLUSIONS: COMM 4352.03

FORMATS: Lecture

MGMT 4003 Strategic Management

CREDIT HOURS: 3

This is a "capstone" style course that attempts to utilize all business disciplines (management, marketing, finance, accounting, etc.) to identify, diagnose, and recommend appropriate action for real managerial problems. It is hoped that through this course, students will gain a better understanding of the complexity and interrelationship of modern managerial decision-making. It is also hoped that this exposure will facilitate the students' ability to analyze complex problem situations.

PREREQUISITES: All required first, second and third year core classes for the Bachelor of Management

EXCLUSIONS: MGMT 4001 and MGMT 4002; COMM 4351 and COMM 4352

MGMT 4004 Interdisciplinary Management Capstone

CREDIT HOURS: 3

This capstone course will integrate management theory and learning across various sectors of government, social enterprises, non-profits and business environments. Students will examine different means by which growth and the status of economic and social well-being are measured; market approaches to engage scarce resources; the interactions between market organizations where existing practices have been ineffective. The course examines innovation approaches and strategies in private and public sector organizations. Students will draw on their broadened awareness of interdisciplinary management to solve complex organizational problems.

PREREQUISITES: MGMT 4003

MGMT 4031 Ecological Economics

CREDIT HOURS: 3

Ecological economics is an emergent, transdisciplinary field of inquiry whose primary concern is to advance the body of theory and tools to understand and manage the environmental dimensions of economic activity. It is an explicitly normative field oriented towards environmental sustainability in economic organization. Ecological economics recognizes three conditions necessary to environmental sustainability: appropriate scale (relative to biocapacity), efficient allocation, and just distribution. Given the breadth of material encompassed within the scope of ecological economics, this class will explore a subset of possible topics including the basic principles and theory of scale, efficiency, and distributive justice. In addition, the class will look at how these apply to managing real world issues in environmental management and explore the tools used by ecological economists to quantify and interpret scale, efficiency, and distributive justice. This course is designed as a one-term introduction to ecological economics for graduate students in environmental studies and related programs with little or no prior exposure to economics.

CALENDAR NOTES: MGMT classes cross-listed with ENVI graduate classes require approval from the School for Resource and Environmental Studies

EXCLUSIONS: ENVI 5031.03

MGMT 4041 Environmental Education

CREDIT HOURS: 3

Environmental education for all ages is a critical step in fostering sustainable behaviours and achieving higher level environmental goals. This course takes an interdisciplinary approach to studying environmental education, examining the cognitive and social science underpinnings of behaviour change. Through course readings and experiential "hands-on" learning opportunities, students are invited to critically evaluate how environmental educators create effective and authentically engaging programs. This course provides an overview of program evaluation techniques as well as environmental education in formal school settings, wilderness education, urban environmental education, how policy and mass media influence environmental behaviour.

CALENDAR NOTES: MGMT classes cross-listed with ENVI graduate classes require approval from the School for Resource and Environmental Studies

PREREQUISITES: Permission of instructor

CROSSLISTED: ENVI 5041

MGMT 4047 Biodiversity Conservation System Design

CREDIT HOURS: 3

Biodiversity conservation systems are increasingly necessary as human activities dominate the landscape, seascape and freshwater ecosystems. Precise prescriptions for conservation design are evolving. The theory and practice of conservation system design are explored through lectures, student presentations, discussions and exercises, as an active learning module involving the students, the instructor and the broader community. Topics include representation of ecological systems, focal species, population viability, habitat suitability, landscape ecology, connectivity, road ecology and planning for species shifts in response to climate change.

CALENDAR NOTES: MGMT classes cross-listed with ENVI graduate classes require approval from the School for Resource and Environmental Studies

CROSSLISTED: SUST 4047.03

RESTRICTIONS: Restricted from 0-59 credit hours

EXCLUSIONS: ENVI 5047.03

MGMT 4050 Directed Reading and Research

CREDIT HOURS: 3

This course offers the student the opportunity to explore in greater detail a particular area of interest. The content of the course is negotiated with the individual instructor involved. The student and instructor must develop a proposal, and submit it to the Program Committee for approval. Guidelines are available from the Bachelor of Management Program Administrator.

MGMT 4125 Conflict Negotiation & Sustainability

CREDIT HOURS: 3

This course looks at local and global conflicts driven by: climate, politics, resource extraction, land use, and development. The class offers preparatory lectures followed by team-based simulated negotiations. Students learn techniques related to de-escalation, negotiation and debate tactics, through assuming and advocating various stakeholders' perspectives.

CROSSLISTED: PLAN 6125.03, SUST 4125.03, PLAN 4125.03

RESTRICTIONS: Must be third year status or above

FORMATS: Lecture | Discussion

MGMT 4270 Introduction to Data Science

CREDIT HOURS: 3

This course aims to provide students of all backgrounds with a set of fundamental skills and techniques for converting data into knowledge to support research, business processes, and policy. Students will learn to use R to collect, manipulate, analyze, visualize data, and publish high-quality reports in various formats, including interactive web sites and applications.

PREREQUISITES: At least third-year standing

CROSSLISTED: INFO 6270

FORMATS: Lecture | Lab

MGMT 4300 Government Info Resources

CREDIT HOURS: 3

This course will examine the ways in which various levels of government structure organize, produce, and disseminate information for a range of internal & external purposes. The emphasis will be on growing digital resources and approaches for accessing these types of material. There will be a focus on Canadian content with additional consideration of American, British, foreign and international resources, including specialized agencies such as the United Nations. The course will include a practical perspective for those seeking employment working with government information resources at provincial and/or federal levels.

CALENDAR NOTES: NOTE: MGMT classes cross listed with INFO graduate classes are restricted and require approval from the School of Information Management.

PREREQUISITES: INFO 5530.03 (recommended)

CROSSLISTED: INFO 6300.03

RESTRICTIONS: MI, MI/JD, MI/MPA, MI/MREM

MGMT 4333 Project Management

CREDIT HOURS: 3

Many organizations in the private sector and the public sector are now using projects as tools to implement and achieve strategic goals, to innovate and to respond to customers changing needs. This course will introduce students to the management of project portfolio, the project management methodology, the cross-cultural leadership skills, the concepts, the tools and techniques required to successfully manage a project. In this course, a practical and hands-on approach is used and involves several experiential exercises enabling the students to build an expertise in the process of managing projects.

PREREQUISITES: MGMT 3501.03 or COMM 3501.03

CROSSLISTED: COMM 4523.03

MGMT 4340 Corporate Governance

CREDIT HOURS: 3

The central focus of corporate governance is the relationship between the top management team (TMT), the board of directors (BoD), and other stakeholders, especially stockholders. The collapse of once successful, large corporations across the globe illustrates the prankishness of their board members and the degree of their lack of concern for stockholders' interests. The reputation of audit and consulting companies associated with these ill-fated corporations suffered a great setback, leaving stakeholders wondering whom to trust to safeguard their interests. Students will take an in-depth look at the corporate governance triad, as indicated above, that controls the modern corporation. Accordingly, this course will deal with the control, composition, functions, roles, and structure of boards; board responsibility and accountability, CEO tenure and compensation, shareholder and other stakeholder representation; corporate board's vis-à-vis social responsibility and ethics; and comparative corporate governance across North America, Europe, and selected Asian countries.

PREREQUISITES: MGMT 4001.03 or MGMT 4003.03

CROSSLISTED: COMM 4340.03

EXCLUSIONS: BUSI 6315.03

FORMATS: Lecture

MGMT 4370 Records Management

CREDIT HOURS: 3

This course provides a comprehensive introduction to the management of current records in contemporary environments in analog and digital form. Topics covered include: records creation, evaluation, maintenance and control; issues related to the maintenance, storage and disposition of records; electronic records management; legal and ethical compliance; recordkeeping and decolonization; and social justice issues in Archives & Records Management (ARM).

CALENDAR NOTES: MGMT classes cross-listed with INFO graduate classes require approval from the School of Information Management

PREREQUISITES: INFO 5515.03 (MI) or MGMT 5502.03 (MIM)

CROSSLISTED: MGMT 5012.03, INFO 6370.03

MGMT 4507 Environmental Informatics

CREDIT HOURS: 3

This course introduces students to geospatial information management, including the nature of geospatial data; access, representation, and communication of data and information; and relevant tools and materials such as census data, spreadsheets, and geographic information systems. Special topics may include privacy, health, citizen science, or the humanities.

CALENDAR NOTES: MGMT classes cross-listed with ENVI graduate classes require approval from Environmental Studies.

EXCLUSIONS: ENVI 5507.03, INFO 6681.03

FORMATS: Lecture | Lab | Discussion

MGMT 4540 Data Management

CREDIT HOURS: 3

Introduces the theory and practice of managing data, covering technology-driven solutions to the challenges of storing, curating, and retrieving unstructured, semi-structured, and structured data. Topics include: tabular data, assessing data management requirements, data models and schemas, relational database management systems, SQL, post-relational DBMSs, Big Data, and visualization.

CALENDAR NOTES: MGMT classes cross-listed with INFO graduate classes require approval from the School of Information Management

PREREQUISITES: IT Competencies listed in Admission Requirements

CROSSLISTED: INFO 6540.03, BUSI 6516.03

MGMT 4611 Information Policy

CREDIT HOURS: 3

Explores, in a graduate seminar setting, a range of issues currently facing information professionals and the effect of these issues on policy development. Discusses the roles of all levels of government, the private and not-for-profit sectors, and key individuals in developing policies which affect information creation, control, access, and use. Focuses on Canadian issues, and includes international affairs as appropriate to the information society.

EXCLUSIONS: INFO 6610.03

MGMT 4620 Web Design and Architecture

CREDIT HOURS: 3

Examines the theories, techniques and processes used to create, structure, and deliver electronic text. Topics include: writing and design for the web, information architecture, and document analysis for digitization. Focuses on practical experience with HTML and CSS, TEI standards, XML, and XSLT.

CALENDAR NOTES: MGMT classes cross-listed with INFO graduate classes require approval from the School of Information Management

CROSSLISTED: INFO 6620

MGMT 4681 Geospatial Info Management

CREDIT HOURS: 3

Spatial information is the air and water that makes mapping and spatial analysis possible. Mobile applications using maps are some of the most popular and often used web-based applications; they are also cloud based which added another layer of management issues. Maps, GIS and the use of spatial information have never been more popular or public. This course addresses the effective management of spatial information. The course covers principles and practices associated with metadata, GIS, licensing, spatial information databases, map libraries and archives, spatial data infrastructures and web-based delivery of products and services, as well as distributed systems such as geolibraries, "digital earth" and the development of the "spatial cloud". This course is geared towards the manager who seeks to deploy services associated with spatial information and effectively develop an enterprise approach to managing spatial information. The course will also provide hands-on experience in using GIS and related technologies so as to be able to better understand how to deploy services, especially over the web.

CALENDAR NOTES: NOTE: MGMT classes cross listed with INFO graduate classes are restricted and require approval from the School of Information Management.

CROSSLISTED: INFO 6681.03

MGMT 4705 Environmental Assessment

CREDIT HOURS: 3

Students explore all aspects of environmental assessment (EA, also known as Environmental Impact Assessment or Impact Assessment) with a focus on EA processes in Canada. The course examines professional practice in scientific, procedural, and political dimensions. Students will have the opportunity to participate in a technical report on an ongoing major natural resource extraction project as well as meet and work with external professionals in EA. Upon completion of this course, students will be equipped with the skills to participate in EA processes from all sectors (government regulation, technical consulting, public intervention, representing Indigenous communities, and/or academic research). Learning is done through case studies, seminar discussions, and research papers. Course is offered in alternating years, and will next be offered in the 2024/2025 academic calendar.

EXCLUSIONS: ENVI 5001.03

MGMT 4895 Internship Prep Seminar

CREDIT HOURS: 0

Upon acceptance into the Bachelor of Management Optional Internship Program (Winter Term), students must register for MGMT 4895 for the Fall Term. This course is designed to introduce internship students to aspects of career development and preparation for their internship experience. Students apply to the Internship Program through Management Career Services in their second year.

CALENDAR NOTES: This course is a Pass/Fail course and carries zero credit hours. Details on the Bachelor of Management Internship Program are available at www.dal.ca/mcs/internship

FORMATS: Seminar

MGMT 4896 Management Internship

CREDIT HOURS: 3

The optional internship will take place between academic year 3 and the final academic year. It is designed to offer the opportunity to combine relevant job experience with classroom studies. Students can work with professionals in their chosen field which will increase employability after graduation.

CALENDAR NOTES: This is a Pass/Fail course with only a maximum of six credit hours to be applied to the Bachelor of Management degree. Achieving the six credit hours for the internship, along with the work component, requires both a satisfactory assessment of the student's work completed by their supervisor (coordinated by Management Career Services) and successful completion of an academic report (assessed by a faculty member).

PREREQUISITES: Successful completion of 12 Core MGMT courses in addition to MGMT 3602 (Professional Communication Skills) and MGMT 4895 (Internship Prep Seminar)

MGMT 4897 Management Internship

CREDIT HOURS: 3

The optional internship will take place between academic year 3 and the final academic year. It is designed to offer the opportunity to combine relevant job experience with classroom studies. Students can work with professionals in their chosen field which will increase employability after graduation.

CALENDAR NOTES: This is a Pass/Fail course with only a maximum of six credit hours to be applied to the Bachelor of Management degree. MGMT 4901 Applied Entrepreneurship and Innovation

CREDIT HOURS: 3

MGMT 4901 is the capstone undergraduate course in Entrepreneurship and Innovation. Linking theory and practice, students will practice learnings from prerequisite courses, while enhancing their understanding through an instructor led project. Working in groups, students will progress through an innovation management process consisting of secondary research, primary research, design thinking, refinement and implementation. As concepts are refined, students will work to establish the feasibility of their business model. This course will challenge students to identify opportunities; develop innovative concepts and manage the process for successful entrepreneurial outcomes. Students will learn how to manage innovation projects for both individual and corporate entrepreneurship. This course is a demanding, yet rewarding experience.

About Us

For more than 35 years, the Faculty of Open Learning & Career Development has been providing top-quality solutions for the educational and training needs of our learners. We offer more than 500 courses that can be taken individually or as part of a certificate. We are focused on offering courses that support you in that next step in your career or academic journey. If you're preparing for entry into a degree program or applying for a new job, we have courses to get you ready.

Our Guiding Light

At the Faculty of Open Learning & Career Development, every day is guided by our commitment to empower our customers to seize opportunity through learning solutions.

Our Values

Woven throughout our work across the Faculty are our four key values:

- Pursuing being better through constant learning
- Working collaboratively to anticipate and respond to community needs
- We engage in an internal culture of respect, support and accountability
- We evaluate our activities through an accessibility and inclusion lens

Our Areas of Focus

Supported by our values and our guiding light, the Faculty will be sharply focused on three main areas of growth and refinement:

- Providing a superior learning experience
- Thriving financially
- Continuously improving our internal and external user experiences

Staff

Staff

Dean

Tyers, D., MA (Queensland), MBA (Western), PhD (Toronto)

Adult Learning & Teaching

Meet the challenges of today's learning environment with our adult learning and teaching program. Whether you're currently working as an educator or are looking to expand your knowledge of the field, our courses will help expand and strengthen your skills.

Certificates

Adult Learning Fundamentals

This five-course certificate enables learners to confidently and competently design and facilitate learning experiences in various contexts. Learners will explore foundational theories and principles of adult learning, reflect on questions of diversity and inclusion, examine the stages of program design, identify appropriate instructional methods for a given context, and practice their facilitation skills.

Courses

- Theories of Adult Learning
- Understanding Diversity and Inclusion
- Program Design
- Instructional Methods
- Effective Facilitation

Advanced Certificate in Adult Learning and Teaching

To enrol in this certificate, you must first complete the *Certificate in Adult Learning Fundamentals*. Three additional electives are required in order to achieve the Advanced Certificate in Adult Learning and Teaching.

You may choose three of the following courses:

- Evaluating Learning
- Designing and Teaching Online
- Indigenous Teaching and Learning Perspectives
- Understanding EDI: An Organization Imperative
- Inclusive Communications in the Workplace

- Optimizing Diverse Team Performance
- Strategies for Implementing EDI Initiatives

Standalone Courses & Workshops

- Train the Trainer (Two Options Available: Online Workshop or Self-Paced)

In this course, you will build skills and confidence in designing and delivering dynamic, interactive, and effective training sessions.

- Online Design and Delivery (Self-paced)

In this self-paced, 8-hour course, you will learn how to move teaching content online or develop new online courses.

- Interrupting Unconscious Bias (Self-paced)

In this self-paced, 12-hour course, you will look inwards and dig deep into your beliefs. By bringing them to the forefront, you can explore the ways in which your biases impact your interactions with others.

- Workplace Diversity and Inclusion

In this 36-hour course, you will explore the concepts of diversity and inclusion, reflect on your own lived experience, and draw connections between diversity and inclusion and the success of businesses and their employees. Content is self-paced with weekly live sessions.

Business Operations & Management

Effective operations and process management can dramatically increase productivity within a business. Learn how to improve your planning, strategy, and day-to-day production.

Certificates

Business Analysis

The demand for experienced business analysts increases as the profession becomes more globally recognized and standardized, and employers acknowledge the value business analysts bring to their organizations. Whether you are new to the profession or a seasoned business analyst, you will benefit from the knowledge and practical application of standard tools and techniques used in many industries today.

Required Courses:

- Business Analysis Essentials
- Business Analysis in Practice
- Enterprise and Strategic Analysis
- Introduction to Business Data Analytics
- The Agile Business Analyst

Leadership Excellence

This certificate is offered fully online and is issued in partnership with the *Business Excellence Institute*, an international organization specializing in leadership and strategy. It provides a robust foundation for current and aspiring leaders to develop an authentic, flexible and adaptable leadership style for today's complex, dynamic organizations and landscapes. Take one course or more to upskill your leadership competencies and build confidence in your leadership capabilities.

Required Courses:

- Leadership Dynamics
- Ethics in Action
- Mastering Strategy

Business Management

This certificate is offered fully online. The practical focus of the courses help you develop a knowledge base and a range of strategies and skills to manage effectively and successfully in complex, dynamic organizational contexts.

Required Courses:

- Finance Essentials for Business
- Law Essentials for Business

- Marketing Essentials for Business **OR** Microeconomics for Business

Human Resource Leadership

Offered fully online, this certificate provides an additional set of skills for HR employees who want to focus on coaching their employees to get the best possible results, employee and media communications to maintain meaningful relationships, and effectively resolving conflict in the workplace.

Required Courses:

- Coaching Skills for Leaders
- Strategic Public Communications: Building Impact and Influence
- Negotiation and Conflict Resolution

Human Resource Management

This certificate is offered fully online. The practical focus of the courses in this certificate equips you with a knowledge base and a range of strategies and skills to manage your organization's greatest asset -- its people -- responsively, fairly and consistently.

Required Courses:

- Human Resources Management
- Interpersonal & Intercultural Communication
- Organizational Behavior

Project Management

In consultation with the PMBOK 7, this certificate is ideal for those who are relatively new to the world of project management as well as for those with project management experience who wish to consolidate and advance their skills and knowledge.

Required Courses:

- Project Management Essentials
- Engaging Stakeholders: Communication Strategies for Managing Expectations
- Tracking and Forecasting Progress: Budgets, Baselines and Timelines
- Strategies for Effectively Leading Through Change
- Managing Uncertainty & Opportunities: Project Risk Management
- Project Management Principles
- Agile Bootcamp

Customized Lean Six Sigma Offerings

Our three-course Certificate in Lean Six Sigma is now offered as a training option for your organization. It consists of three courses:

- Lean Six Sigma: DMAIC, Deployment, Define, and Metrics
- Lean Six Sigma: Measure Phase and Value Stream Analysis
- Lean Six Sigma: Analyze (Part II), Improve and Control

This certificate will provide you with an advanced set of quality tools to be applied in a structured way to improve your organization's processes and the services or products produced by those processes.

The Certificate in Lean Six Sigma can be delivered as is or customized for your organization – it's up to you. The training also includes an optional coaching package. If you're interested in offering this training to a group of 12 or more, please contact us at openlearning@dal.ca to get started.

Courses & Certification

We offer a range of courses you can take individually without enrolling in a certificate.

- Strategic Public Communications: Building Impact & Influence

Study the foundational elements of public communications and its many facets. You'll cover everything from employee communication to media relations, to the changing nature of public communications in a digital landscape.

- Change Management Foundation Plus Practitioner (CMP) Certification

This Change Management course will prepare you to challenge two certification programs available through APMG International. It will provide practical knowledge on change management techniques, as well as the Foundation™ and Practitioner™ certifications (two exams and two certifications both included in the cost). In order to obtain your Change Management Professional (CMP) designation, you must successfully pass both exams.

- Corporate Social Responsibility

Learn about the exciting world of Corporate Social Responsibility (CSR) and the sustainable frameworks used by the world's largest tech, telecommunications, manufacturing, retail and mining companies.

- Law Essentials for Business

This 12-week course will give you practical knowledge that can be used in the business world. The course covers topics such as: contract law, negligence, legislation applicable to the workplace, employment law, setting up a business, intellectual property and electronic commerce.

- Microeconomics for Business

This course is designed for non-Econ majors to learn about fundamental economic principles through thoughtful and engaging scenarios that we encounter every day, such as Taylor Swift's decision to forgo school and Uber's surge pricing to better understand how limited resources drive the decision-making process.

- Marketing Essentials for Business

This 12-week course will teach you how to write a marketing plan from start to finish. Learn what makes marketing a critical activity in business growth by exploring the broad principles and practices of marketing from a practical perspective.

- PMP® Exam Preparation

This 4-week course is specifically designed to provide participants with a proven, practical approach to preparing for the Project Management Professional (PMP)® Certification Exam from the Project Management Institute (PMI). The course is delivered by trainers who have had extensive experience in professional project management and a long history of successfully preparing people for the PMP® exam.

- Project Management Essentials

This 4-week, online course provides new project managers and project team members the essential tools they need to deliver successful projects. It consists of four weeks of self-directed, online learning, including four online live sessions.

- Technical Writing Essentials

This four-week, online course provides you with the tools to communicate complex and technical projects in clearer and simpler ways. You will discover communication strengths and learn how to build on them to become a more capable, confident writer.

Career Essentials

Don't miss out on our hottest courses in leadership, organizational behaviour, and other essential skills.

Courses Not To Miss

- Strategic Public Communications: Building Impact & Influence

This course examines the foundational elements of communication and its many facets. You'll cover everything from employee communication to media relations, to the changing nature of communication in a digital landscape.

- Law Essentials for Business

This course is designed to provide participants with practical knowledge that can be used in the business world. The course covers topics such as: contract law, negligence, legislation applicable to the workplace, employment law, setting up a business, intellectual property and electronic commerce.

- Coaching Skills for Leaders

Throughout your learning journey in this course, you will gain knowledge of theory, you will be asked to apply that knowledge in a specific leadership context, and you will be offered the opportunity to practice.

- Critical Thinking, Decision-Making and Problem-Solving for Leaders

The course is a practical introduction to critical thinking, decision-making and problem-solving as needed for leaders in today's complex and rapidly changing contexts.

- Ethics in Action

This highly interactive course includes journaling, teamwork, and online discussions to enable active learning. It requires deep thinking in order to help you become consciously aware of and articulate clearly about ethics.

- Finance Essentials for Business

This course is designed for non-finance or accounting executives involved in a small/medium-sized enterprise that is subject to ASPE Standards (Accounting for Private Enterprises).

- Finance Essentials for Public Sector Leaders

The course will teach you to interpret and apply financial information for short, medium and long-term decisions. The course is practical, using case studies to explore the financial information of different types of real organizations.

- Human Resources Management

This course will introduce contemporary human resources (HR) practices. Human resources have become critical to organizational, team and individual successes.

- Interpersonal and Intercultural Communication

This 12-week course brings together the best theories and practices of communication between people in society.

- Leadership Dynamics

This course will challenge you to question your fundamental assumptions, beliefs, and values regarding leading people. You will be asked to look closely at who you are as a leader today, and who you would like to become in the future.

- Mastering Strategy

This course has been designed to have you learn both *about strategy* and *how to be strategic*, providing learners with the knowledge needed to understand strategy as well as the opportunity to build the skills and competencies required to leverage this understanding.

- Microeconomics for Business

This course is designed for non-economics majors to learn about fundamental economic principles through thoughtful and engaging scenarios that we encounter every day.

- Organizational Behaviour

In this course, students explore frameworks used to study and predict what people think, feel and do in and around organizations.

Customized Training

Do you have a team in need of custom training?

Consider a solution from Dalhousie carefully crafted around your organization's needs. We will actively listen, consult with industry professionals, and pull in the most current market research to make sure you and your team get the training you're looking for.

Why Choose Us?

- We offer world-renowned expertise in a wide range of areas.
- We provide customized training solutions to meet your unique needs.
- We ensure flexible program delivery that can be online or in-person.

DalOpen

A new way to learn at Dalhousie University

Earn a university credit by taking a course that lets you study on a schedule that fits your life and lets you save on the time and cost it takes to apply to a degree program.

Accessible, flexible and convenient

- Take a course for fun, for professional development, or just to try out university education.
- Save on the **time** and **cost** of applying to a degree program.
- Receive an academic record and academic credit that may apply towards the requirements of a degree program.
- Learn at your convenience with our 100% online courses.

- Enjoy the same learning experience as Dalhousie students.

For more information, please contact us at openlearning@dal.ca.

Data, Risk & Emerging Technologies

The development of new technologies is expected to change the world as we know it. Learn how to adopt emerging technologies and navigate new risks around data privacy.

Certificates

Blockchain, Bitcoin and Cryptocurrency

This technology spans many industries from banking to healthcare, entertainment, supply chain management and more. Get trained in blockchain and cryptocurrency with our certificate program that includes three 6-week courses that can be taken individually.

Courses:

- Introduction to Blockchain and Blockchain Networks
- Introduction to Blockchain Platforms, Cryptocurrencies and the Digital Economy
- The Future of Blockchain: Challenges, Opportunities and Introduction to Blockchain Use Cases

Data Management for Professionals

Gain a broad perspective of data management issues occurring in enterprise organizations in this three-course certificate. It connects business practices with technology to increase participants' data literacy.

Courses:

- Introduction to Enterprise Data Management
- Data Governance
- Data Storage Technologies

JavaScript Coding Fundamentals: Preparing for Professional Engagements

Develop JavaScript coding skills and cultivate good programming practices that are transferable to other software development languages and environments. Connecting real-world examples to coding theory, this certificate will provide a solid skills foundation for participants interested in developing JavaScript programs in professional environments.

Courses:

- JavaScript Coding 1: Building Foundational Skills
- JavaScript Coding 2: Developing Software of Medium Complexity

Sustainable Energy Technologies

As the world fights the effects of the climate crisis, let's embrace renewable energy, smart cities and the clean technologies that are shaping our future. Taking three 6-week courses, you'll learn how energy systems work, where they can be successfully deployed, the economic implications, policy directions, and how they will integrate with the Internet of Things (IoT).

Courses:

- Energy Fundamentals
- Wind Energy Developers
- Solar Energy Developers

Standalone Course

- Corporate Social Responsibility

A fully self-paced, 42-hour course that will teach you what Corporate Social Responsibility (CSR) is and the growing importance and expectations of corporate citizenship. You will learn about responsible investing, sustainability reporting, benchmarking performance and what factors to consider when creating a CSR that will work for your organization.

English Language Studies

We offer a range of English language programs accredited by *Languages Canada* and designed for students and professionals at all levels of proficiency.

We also offer professional development for teachers and faculty in English-medium instruction, language education, and internationalization.

Explore our programs and courses designed for *Students* and for *Professionals and Educators*.

For Students

We offer a wide range of English Language Studies programs, online and face-to-face, accredited by *Languages Canada* and designed for students at all levels of their English language learning.

Our programs focus on developing the English skills needed for success in university. Improve academic reading, writing, speaking and listening skills while also learning how to do research and gaining an introduction to Canadian academic culture.

English for Academic Purposes

EAP could be right for you if you're planning to take a bachelor's, master's or doctorate, if you've been conditionally accepted to an academic program, but do not meet English language requirements, or if you want to improve your English language skills.

Online and face-to-face delivery options are available.

English in Canada

This four-week program is available in February, June, July and August, and uniquely combines English language study with university courses in different subject areas.

Applied Language Courses

English for Academic Credit

This selection of courses will help you improve your English communication and academic skills, and your writing and research skills. Choose from English Communication and Academic Skills, Academic Writing and Research Skills, and Academic Foundations for Computer Science Students.

For Professionals and Educators

Gain an international perspective, build intercultural competence, and boost your employability by studying online with us.

This is your opportunity to invest in your future, gain competitive advantages by improving English proficiency, learn about Canadian academic culture and receive an official certificate and transcript from the Faculty of Open Learning & Career Development.

Certificate in English-Medium Instruction

This four-course certificate will help you improve teaching and learning in an English-Medium Instruction (EMI) context by developing knowledge of Content and Language Integrated Learning (CLIL) theory and strategies.

Online delivery is available.

Professional Development Courses

The Department of English Language Studies will be introducing courses for people who are involved in internationalization of the curriculum initiatives. The courses are all offered in English and one is offered in both English and Spanish.

All courses are 20 hours each and are fully online. All of these courses can be customized for cohorts or groups.

- Leadership of Internationalization of the Curriculum Initiatives

You will focus on practical leadership and implementation of the theoretical and pedagogical principles driving such aspects of internationalization of the curriculum as English-medium instruction, internationalization at home, and teaching and learning in diverse classrooms.

- Innovación pedagógica en contextos de internacionalización

Este curso tiene como objetivo apoyar a los docentes universitarios a capitalizar las diversas formas de diversidad —cultural, lingüística, de género, regional, entre otras— para incrementar el aprendizaje de los estudiantes.

- Pedagogical Innovation in Context of Internationalization

In this course, you will learn about supporting university academic staff to capitalize on the various forms of diversity—cultural, linguistic, gender, regional, amongst others—to increase student learning.

- Leading Professional Learning in International Higher Education

In this train the trainer course, you will develop your capacity to design and lead effective, dynamic peer training programs to support internationalization of the curriculum or EMI at their institution.

Equity, Diversity and Inclusion

There are many faces, perspectives and histories reflected in our workplaces and in our communities. Explore our courses to uncover new ways to see and understand the world, your peers, your community, and yourself.

Certificate

Equity, Diversity and Inclusion

This explores the struggles organizations face in achieving equity, inclusion, and harmonious environments. Through participation in the certificate, learners will explore ways to create safe spaces to engage in real dialogue, policies around fairness, respect and civility, and strategies for navigating sensitive issues related to diversity and inclusion.

Required courses:

- Understanding EDI: An Organization Imperative
- Inclusive Communications in the Workplace
- Optimizing Diverse Team Performance
- Strategies for Implementing EDI Initiatives

Standalone Courses

- Foundations of Diversity, Equity and Inclusion in the Workplace

This eight-hour course will help you build knowledge on the topics of equity, diversity and inclusion. You will develop skills, confidence and the capacity to make intentional changes in your workplace communication. Learners will earn a microcredential in Inclusive Communication Strategies.

- Workplace Diversity & Inclusion

Explore the concepts of diversity and inclusion, reflect on your own lived experience, and draw connections between diversity and inclusion and the success of businesses and their employees.

- Interrupting Unconscious Bias

This 12-hour course can be taken at your own pace. It will have you looking inwards and digging deep into your beliefs, bringing them to the forefront so you can explore the ways in which your biases impact how you interact with others.

- Understanding Diversity and Inclusion

Participants in this course will spend time discovering insights into their own values, beliefs, and behaviours with respect to diversity. The intention is that participants will examine diversity in adult education and develop competencies to integrate diversity into their practice.

Health & Wellness

A healthy organization is made up of healthy individuals. Positive mental health and well-being can help everyone cope with challenges and improve focus and productivity at work. Learning strategies to sustain and improve your own mental health, in addition to those that you interact with on a regular basis, will create a healthier environment for all to flourish. Through our certificates and courses, you will learn new skills and perspectives to guide you and your organization through everyday challenges, as well as those that go beyond the ordinary.

Certificates

Building Positive Workplace Cultures

Do you want to influence how your workplace looks and feels by developing a more positive culture? This certificate will empower participants to uncover ways to enhance their workplace relationships using the principles of *Positive Psychology*. Learn how to become a “positive” leader through the implementation of positively strategic approaches. A positive lens has been demonstrated to foster confidence, promote enthusiasm and broaden resilience.

Using a scaffolding approach to the required courses, learners will explore how *Positive Psychology* can help optimize self, others, and entire organizations. When we want to influence change in any setting, we must first start with a clear awareness of our own contributions and presence. The certificate has been designed to foster the exploration of these principles as they relate to ourselves, our relationships with others, and finally with our workplaces.

Upon completion of this certificate, you will have a “positive plan” to use in your professional, as well as your personal life. Each of the four required courses requires approximately 15 learner hours. An elective course must also be taken.

Required courses:

- Foundations of Positive Psychology
- Application of Positive Psychology Principles for Self-Care
- Application of Positive Psychology Principles to Influence Others
- Adaptation of Positive Psychology Principles in Organizations and Teams

Choose one of the following electives:

- Leadership Dynamics
- Coaching Skills for Leaders
- Understanding EDI: An Organization Imperative
- Inclusive Communications in the Workplace
- Optimizing Diverse Team Performance
- Organizational Behaviour

Ergonomic Program Management

If you are responsible for an occupational health and safety program or the creation and management of an ergonomics program for your company or organization, this certificate is for you. You will learn how to develop an ergonomic program appropriate for your workplace, identify risk factors, and assess its effectiveness at your place of work.

Required Courses:

- Ergonomics in the Workplace
- Office Ergonomics and Workplace Design
- Industrial Ergonomics and Workplace Design
- Ergonomic Program Design and Integration

Professional Designations & Accreditations

We offer a range of credentials and certifications that can help you move up in your career.

Career Practitioners

Certificate of Professional and Leadership Studies in Career Development

This certificate has been designed in partnership with the *Nova Scotia Career Development Association (NSCDA)*. It provides an

opportunity for both new and experienced practitioners to deepen and refresh their knowledge, in line with the Career Development Professional (CDP) Canadian Competency Framework (2021) from the Canadian Career Development Foundation (CCDF). Participants emerge with the knowledge, skills, and confidence to manage effective employment services for a wide range of clients and employers.

Required courses:

- Career Transition Management
- Theories, Models & Strategies for Career Development
- Career Decision-Making
- Supporting Career Searches
- Workplace Diversity and Inclusion

And the following advanced skill course:

- Supporting Military Members in Career Transition

Certified Employee Benefit Specialist

The CEBS program offers three highly renowned designations in Canada covering all aspects of benefits and pensions:

- CEBS (Certified Employee Benefit Specialist) - The premier designation in benefits and pensions, considered the standard of excellence in the industry
- GBA (Group Benefits Associate) - a specialty designation focusing on life and health care and other group benefits
- RPA (Retirement Plans Associate) - a specialty designation focusing on all aspects of retirement plans

CEBS features a unique partnership with leading academic institutions. In Canada, the International Foundation shares the honour with Dalhousie University in Halifax, Nova Scotia. In the U.S., CEBS is cosponsored by the *International Foundation* and the *Wharton School of the University of Pennsylvania*.

Each course requires successful completion of an exam. All courses can be self-studied. Optional online classes are also available. Contact our Student Services team for more information at openlearning@dal.ca.

Credit Union Institute of Canada Program

The success of credit unions has been due largely to the dedication and commitment to service excellence of credit union management and staff. In a rapidly changing financial services environment, providing service excellence to members rests increasingly on the ability of employees to learn new skills and keep pace with changes in the financial services industry.

Many credit unions are finding that the best way to keep pace with change is to encourage their staff to broaden their knowledge and skills through continuing education programs offered by the Credit Union Institute of Canada (CUIC). The CUIC provides credit union employees with a challenging curriculum of study aimed at enhancing their job skills. These programs provide greater job satisfaction, and open doors to new career opportunities within the credit union system.

What is the Credit Union Institute of Canada?

The CUIC is an independent, national, educational association which is part of CUSOURCE, a provider of development and learning systems to Canada's credit unions. CUSOURCE is owned by the Canadian Credit Union Association. Established in 1972 and re-organized in 1990, the CCUA provides Canadian credit unions with professional development programs for their elected officials, management and staff.

Programs

The CUIC currently offers two professional studies programs that are co-sponsored by Dalhousie University's Faculty of Open Learning & Career Development. Each program comprises a series of courses leading to a professional designation recognized throughout the credit union system. Some courses may be taken at approved colleges, universities, professional associations or other institutions. Others are offered directly through CCUA.

The Faculty of Open Learning & Career Development and CUIC jointly determine the academic content and standards of the programs. The CUIC oversees all administration. Professional designations for each program are awarded jointly by CUIC and the Faculty of Open Learning & Career Development.

General Studies Program (GSP)

The GSP is a nine-course program that provides a general overview of credit union administration and management. This program is suitable for entry-level, supervisory and middle-management employees. GSP graduates are awarded the professional designation, "Fellow of the Credit Union Institute of Canada" (FCUIC). Introduced in July 1992, this program replaced the Canadian Credit Union Institute's longstanding Fellows' Program.

Management Studies Program (MSP)

The MSP is a twelve-course program that offers a mix of general and credit union-specific courses on credit union business management. This program is suitable for credit union employees in, or preparing for, middle-and upper-level management positions. MSP graduates are awarded the professional designation, "Associate of the Credit Union Institute of Canada" (ACUIC).

For more information, please contact our Student Services team at openlearning@dal.ca.

Fire Service Leadership

Today's fire service needs leaders—professionals equipped to meet challenges and inspire change. Get what you need to step into a more advanced role through Dalhousie's internationally recognized Fire Service Leadership Program

Our courses build on your technical knowledge. You'll develop administrative, leadership and critical thinking skills that will make an immediate difference to your job and career. You'll be ready to navigate obstacles and create strategic plans to bring your organization into the future.

Dalhousie University has been a leader in fire service leadership and management development for more than 25 years. Offered 100% online, you'll have access to leading experts and resources when and where it works best for you. Our program offers:

- access to experienced fire officials and experts
- actionable learning for immediate impact on your job
- the knowledge you need to take on more senior roles
- the courses required to gain professional certification

Certificates

Built for members of modern fire services, our certificates give you the knowledge and skills to get ahead in your profession.

Fire Service Leadership (Prerequisite to the Certificate in Fire Service Administration)

The Certificate in Fire Service Leadership (CFSL) provides fire service officers with opportunities to expand their knowledge of the fire service and add management education to their technical training. The CFSL has been offered across Canada since 1996. It is a prerequisite for the Certificate in Fire Service Administration (CFSA) and includes three required courses:

- Station Officer: Dealing with People
- Station Officer: Dealing with New Operations
- The Environment of the Fire Station

Incident Command

The first course in this two-course certificate introduces research theory that attempts to explain how the size up is conducted through recognition-primed decision making. The second course introduces the more social and political aspects of incident command research and builds on the psychological aspects developed in the first course.

- Theoretical Foundations of Incident Command: Thinking
- Theoretical Foundations of Incident Command: Acting

Fire Service Administration

To obtain the Certificate in Fire Service Administration, students must complete nine courses (six required courses and three electives). Students are required to obtain some breadth of understanding in fire service administration.

Required Courses:

- Fire Department Human Resource Management I
- Municipal Finance
- Municipal Law I (formerly Fire Service Law)
- Program Evaluation and Statistics

- Fire Service Strategic Planning I
- Fire Suppression Management OR Fire Prevention Management

Electives:

- Disaster Management and the Fire Department
- Emergency Medical Service Management and the Fire Department
- Fire Department Human Resource Management II
- Fire Service Strategic Planning II
- Municipal Government and Service Delivery
- Theoretical Foundations of Incident Command: Acting
- Theoretical Foundations of Incident Command: Thinking
- Coaching Skills for Leaders
- Leadership Dynamics
- Organizational Behaviour
- Negotiation and Conflict Resolution

Concentrations for Fire Service Administration

You can concentrate on five different areas as part of your Certificate in Fire Service Administration. The three electives you choose will determine your concentration.

The **Certificate in Fire Service Administration: Emergency Management** is an advanced Certificate that will focus on emergency and disaster management systems. Content includes building professional competency, a look at delivery models, and working in a Canadian context. One must complete three of the following electives in order to receive this concentration:

- Emergency Medical Service Management and the Fire Department
- Disaster Management and the Fire Department
- Theoretical Foundations of Incident Command: Acting
- Theoretical Foundations of Incident Command: Thinking

The **Certificate in Fire Service Administration: Human Resource Management** is an advanced Certificate that will identify human resource challenges faced by public organizations, discuss the importance of evaluating recruitment and other HR processes, and explain key features and benefits of mentoring and succession planning. One must complete these three electives in order to receive this concentration:

- Fire Department Human Resource Management II
- Negotiation and Conflict Resolution
- Coaching Skills for Leaders

The **Certificate in Fire Service Administration: Operational Planning** is an advanced Certificate that will focus on resources required for the effective management of a fire department, community engagement, and structured decision making. Content includes technical fire prevention planning, working with political leadership in a municipal context, and public relations in emergencies. One must complete three of the following electives in order to receive this concentration:

- Fire Suppression Management
- Fire Prevention Management
- Disaster Management and the Fire Department
- Emergency Medical Service Management and the Fire Department
- Negotiation and Conflict Resolution

The **Certificate in Fire Service Administration: Strategic Planning** is an advanced Certificate that will focus on big picture planning and issues management in a fire department context. Content includes a review of strategic planning models, identifying strengths and weakness of the internal environment, and creating applicable strategies for organizational success.

Required Course:

- Fire Service Strategic Planning II

Electives:

- Municipal Government and Service Delivery
- Disaster Management and the Fire Department
- Negotiation and Conflict Resolution

The **Certificate in Fire Service Administration: Advanced Leadership** will focus on identifying the characteristics of effective and ineffective leaders, applying leadership theory and strategy to a professional context and understanding cultural approaches to conflict in diverse settings. One must complete three of the following electives in order to receive this concentration:

- Leadership Dynamics
- Coaching Skills for Leaders
- Negotiation and Conflict Resolution
- Interpersonal & Intercultural Communication

After completing the Certificate in Fire Administration in one area of concentration, you can apply to the **Advanced Certificate in Fire Service Administration** by completing three additional courses from the options in this certificate. Email openlearning@dal.ca to request enrolment in this certificate.

Advanced Certificate in Fire Service Administration

Choose three courses from the following list:

- Fire Prevention Management
- Emergency Medical Service Management and the Fire Department
- Theoretical Foundations of Incident Command: Thinking
- Fire Department Human Resource Management II
- Fire Suppression Management
- Municipal Government and Service Delivery
- Disaster Management and the Fire Department
- Negotiation and Conflict Resolution
- Interpersonal and Intercultural Communication

Certification

Fire Officer III Accreditation Track

If you have obtained your Fire Officer II accreditation, you may apply for Fire Officer III Certification upon successful completion of 10 courses and by submitting the application. In order to qualify for Fire Officer III certification, students must receive at least 70% on each of the 10 courses taken for the certification. The program staff will then check your application for completeness. If gaps are found, you will be notified by Dalhousie University staff. Once your application has been approved, your request will be submitted to the Nova Scotia Fire Marshall's office. After all requirements have been verified you will receive Fire Officer III Certification.

Required Courses:

- Station Officer: Dealing with People
- Station Officer: Dealing with New Operations
- The Environment of the Fire Station
- Fire Prevention Management
- Fire Department Human Resource Management I
- Municipal Finance
- Fire Service Strategic Planning I
- Organizational Behavior
- Fire Suppression Management

Electives (choose 1 course):

- Disaster Management and Fire Management
- Theoretical Foundations of Incident Command: Thinking

Fire Officer IV Accreditation Track

This four-course certificate will track completion of the following Dalhousie University Faculty of Open Learning & Career Development courses (or their equivalent), at least one of which must have been taken in the fall 2013 term or later. All must have received a grade of 70% or higher.

Required Courses:

- Municipal Government and Service Delivery
- Fire Department Human Resource Management II
- Emergency Medical Service Management and the Fire Department
- Program Evaluation and Statistics

Local Government

Master the fundamentals of how local governments work and propel your community and career forward, whether you're new to the municipal landscape or seeking to advance your current position.

Certificate

Associate Certificate in Local Government

This associate certificate will be a prerequisite for all concentrations and is the entry-level certificate for the Local Government Program. On its own, it would be beneficial for those who work in the technical fields of local government to gain a working knowledge of the history, organization, challenges, and opportunities for local government.

Police Leadership

The demanding schedule of police work can make professional development difficult. But to stay on top of your fast-moving profession—and ready yourself for the next step in your career—you need to build your skillset and strategic perspectives.

Certificates

Police Leadership

This six-course certificate is offered fully online. It will help you develop a range of current, theory-based strategies and skills to lead effectively and successfully in high-pressure, high-stakes, publicly visible and rapidly evolving situations while holding true to your organization's foundational principles. The certificate can be completed over several years, depending upon how many courses you take each term and year. The cost of the certificate varies according to the degree of interactivity and corresponding course hours.

Required courses:

- Leadership Dynamics
- Ethics in Action
- Mastering Strategy
- Evidence-Based Policing
- Policing the Modern Community

Electives (choose one):

- Global and Domestic Terrorism
- Strategic Public Communications: Building Impact & Influence
- Finance Essentials for Public Sector Leaders
- Children Recruited and Used in Violence

Police Supervisory Skills

The certificate is offered fully online, with four required courses and a range of electives. The certificate offers a wide range of courses to help you develop strategies and skills for managing people in the unpredictability of a high-pressure, high-stakes police work context. The Certificate can be completed over several years, depending upon how many courses you take each term and year.

Required courses:

- Human Resources Management

- Interpersonal & Intercultural Communication
- Negotiation and Conflict Resolution
- Coaching Skills for Leaders

Electives (to total at least 72 hours):

- Train the Trainer (24 hours)
- Workplace Diversity and Inclusion (36 hours)
- Foundations of Positive Psychology (15 hours)
- Critical Thinking, Decision-Making and Problem-Solving for Leaders (36 hours)

Courses

We offer a broad range of courses in specific aspects of police leadership. You can register for them individually or as part of a certificate.

- Evidence-Based Policing

Learn to use research evidence strategically to inform management and decision-making. This is a 12-week course.

- Leadership Dynamics (Replaces Police Leadership and Management Development)

Develop your leadership skills by examining the five practices of 'exemplary leadership' and explore the concept of credibility and its role in leadership and development of relationships. This is a 12-week course.

Ethics in Action (Replaces Ethics for Police Leaders)

Examine how professional ethics apply to individuals and organizations and its role in leadership. This is a 12-week course.

Global & Domestic Terrorism

Draw on the latest terrorism thinking and research from a variety of academic and other sources to develop a broad understanding of terrorism as a complex social phenomenon and a challenging domestic and global security problem. This is a 12-week course.

Interpersonal & Intercultural Communication (Replaces Communication Skills for Police Personnel)

This 12-week course brings together the best theories and practices of communication between people in society.

Coaching Skills for Leaders (Replaces Managing Police Performance)

Coaching is comprised of a set of skills and a series of steps that help others become better at their jobs. There are many leadership styles that experts cite and describe; this course specifically examines the coaching leadership style. This is a 12-week course.

Public Safety Communicator Leadership

Public safety communicators occupy a crucial position between emergency responders and the people they serve. You make decisions that save lives—ones that require up-to-date expertise in leadership, communication, negotiation and conflict resolution.

Certificate

Public Safety Communicator Leadership

This certificate is designed for individuals in a leadership role or aspiring to a leadership role in a high-pressure public safety communicator context. As public safety communicators, you occupy a crucial position between emergency responders and the people you serve. You make fast-paced decisions that save lives. Leading in this crucial, dynamic environment requires up-to-date expertise in communication, critical thinking, problem-solving, negotiation and conflict resolution, skills that are acquired through this certificate.

Required Courses:

- Interpersonal & Intercultural Communication
- Negotiation and Conflict Resolution
- Critical Thinking and Problem-Solving for Leaders

You may be required to take up to five of the following electives, depending on the course length and the Continuing Education Units (CEUs) required to complete the certificate:

- Train the Trainer
- Workplace Diversity and Inclusion
- Coaching Skills for Leaders

- Leadership Dynamics
- Ethics in Action
- Mastering Strategy
- Strategic Public Communications: Building Impact & Influence
- Organizational Behaviour
- Human Resources Management
- Foundations of Positive Psychology
- Project Management Essentials

Other Certifying Programs

Medical Certificate of Death

A Medical Certificate of Death is the permanent legal record of death and its cause and manner. In Nova Scotia, only a physician or nurse practitioner who is responsible for the treatment and care of a patient may legally complete and submit a Medical Certificate of Death to the funeral director.

Completion of this module will prepare nurse practitioners to complete a Medical Certificate of Death. It will assist the nurse practitioner to identify instances when completion of the certificate falls under the jurisdiction of the Medical Examiners Office. Upon completion of the module, our online learning platform (Brightspace) will forward a notice of completion to you by email for your records.

Standalone Course

- Strategic Public Communications: Building Impact & Influence

Study the foundational elements of public communications and its many facets. You'll cover everything from employee communication to media relations, to the changing nature of public communications in a digital landscape.

Technical & Engineering Training

Set yourself apart from your peers and advance in your career with our certificates and courses designed for today's technical professionals.

Certificates

AutoCAD

Master the basics of producing professional engineering drawings with AutoCAD. For professionals wanting to enter the drafting world.

Required Courses:

- Getting Started with AutoCAD
- Orthogonal Views, Sections, Dimensions, and Notes
- Blocks, Attributes, Xrefs, Plotting, and Architectural Drawings

Construction Management

Acquire valuable skills in project planning, quality control, risk management, procurement, contracts, labour relations and more.

Required Courses:

- Construction Industry and Practice
- Methods in Project Management
- Business Methods in Managing Construction

Heating Ventilation and Air Conditioning (HVAC)

With this three-course certificate, you can develop a solid understanding of HVAC systems and requirements, including installation, balancing, maintenance and troubleshooting.

Required Courses:

- HVAC Basics
- Understanding HVAC
- Implementing HVAC

Home Inspection

Gain the technical skills and communication savvy to inspect all the key components of a home with confidence. To earn the full certificate, you must complete ten required courses.

Required Courses:

- Electrical Inspection
- Plumbing Inspection
- Communication and Professional Practice
- Heating I Inspection
- Heating II Inspection
- Insulation and Interior Inspection
- Air Conditioning and Heat Pump Inspection
- Roofing Inspection
- Exterior Inspection
- Structure Inspection

Maintenance Management

Learn the elements of proper predictive and preventative maintenance. A powerful and specialized program for maintenance management professionals.

Required Courses:

- Introduction to Maintenance Management
- Maintenance Planning and Scheduling
- Preventive and Predictive Maintenance

Technical Writing

Develop a versatile set of writing skills by mastering best practices for writing clear, compelling reports and other technical documents.

Required Course:

- Technical Writing Essentials

Choose three of the following electives:

- Grammar Tune-up
- Persuasive Writing
- Project Management Documents
- Writing Clear Technical Reports
- Writing Emails that Get Results

Individual Courses

- Accident Investigation

You will gain the necessary background, understanding, and innovative methods required to conduct a thorough and effective accident investigation.

- Wood Dust Explosion Prevention

This is a training course for the identification of explosion risk and the necessary prevention in the wood processing and wood manufacturing sectors. The principals covered can be applied to any combustible dust including coal, sulfur or process chemicals.

University Access Programs

Not every journey to a university degree is linear. Our programs offer solutions to help you prepare for beginning your chosen undergraduate or graduate degree.

University Preparation

Our University Preparation courses have been designed to give you a solid foundation in a subject area before going to university or, if you are currently in university, to help you get the prerequisite you need for the program you want.

We offer courses in:

- Biology
- Canadian Studies
- Chemistry
- Academic Math
- Physics
- Pre-Calculus Plus
- Writing Skills for Academic Study

Transition Year Program

Do you dream of earning a university degree, but worry you might not have what it takes? Dalhousie's Transition Year Program (TYP) might be exactly what you're looking for. This eight-month program is designed to prepare you for all aspects of academic life. Students receive university credit for the TYP courses.

You will develop essay writing and research skills, gain (or re-gain) foundational math and English skills, learn to study effectively and manage your workload, and earn the confidence to succeed in an academic environment. Please contact us for an application form.

The TYP launched in 1970 with the goal of increasing the successful participation of Black and Indigenous students at Dalhousie University. The program has been helping students successfully prepare for university ever since.

The Transition Year Program is welcoming and accessible to students who are ready to make a commitment to learning. Financial support, including living allowance, is available to qualified applicants. When you successfully complete the eight-month program, you receive a tuition fee waiver for your undergraduate degree.

Our Courses

We offer courses that are designed to give you the academic and life skills foundation you need for a successful transition to the academic university environment.

Required courses include:

- **Academic Writing and Strategies for University Learning 1 and 2**
The first course will help you develop university-level communication and composition skills, along with study skills to facilitate the transition to university. The second course will help you further develop university-level communication and composition skills, along with study skills to aid in the transition to university. These courses may not be used to satisfy the degree writing requirements.
- **English 1 and 2**
The first course covers grammar, basic essay writing, research, documentation, argumentative writing and a wide variety of writing skills. It includes literary material from current and historical essayists. The second course takes English 1 skills to an advanced level. It includes the study and analysis of literary material from current and historical essayists as well as contemporary Mi'kmaq and Black Nova Scotia authors. These courses may not be used to satisfy the degree writing requirements.
- **Black Studies 1 and 2**
The first course focuses on the history of Africa and the emergence of the African Diaspora, interweaving aspects of the African Nova Scotia experience. It provides an overview of African history and the African Diaspora: the integral contribution of African peoples to world history. The second course provides an historical survey of the Black Nova Scotian experience, covering its origins, socio-economic conditions, politics and evolution to the present. The people of

African descent in Nova Scotia represent a particular aspect of the African Diaspora.

- **Indigenous Studies 1 and 2**

In the first course, we will learn about the history of Indigenous Peoples in what is now known as Canada. We'll move through the pre-contact era to the historical relationship between the British Crown and First Nations Peoples with an emphasis on Indigenous perspectives on history, land, treaties, self-government and oral traditions. The second course will have you delving into colonialism, imperialism and other key issues facing Aboriginal peoples, both historically and in present day.

- **TYP Math 0034 and 0035**

The first course covers signed numbers, order of operations, fractions, decimals, exponents, polynomials, equations, algebraic fractions, and graphing. Homework is checked regularly. Several tests and two major exams are given. The second course covers a diverse array of topics that include: fractions, decimals, exponents, polynomials, algebra, graphing, probability, and statistics. Homework is regularly assigned and marked, and several major exams are given during the year, including a three-hour final in April.

International Pathway Year (IPY) Program

The International Pathway Year (IPY) Program is designed to allow you to complete a qualifying year and improve your English language skills to meet admission requirements for undergraduate studies at Dalhousie University. This unique 8-month program combines five non-credit University preparation courses with intensive English language training and support, preparing you to progress into your degree program. After successful completion of the IPY Program, you will directly enter your chosen undergraduate program at Dalhousie. For more information, please contact us at openlearning@dal.ca.

Foundations for Academic Success

This course is designed to help students understand the nature of university learning and academic expectations. Students will learn how to build a solid foundation for academic success. This course is recommended for anyone seeking to develop a strategic approach to learning. Students will also increase self-awareness by exploring their learning styles, motivation and study habits. Topics will include time management, reading, note-taking, critical thinking, academic writing and preparing for exams. For more details, please contact us at openlearning@dal.ca.

Writing & Communications

Effective communication is key to a successful business. Develop the skills you need to communicate with style and confidence in the workplace.

Certificates

Customer Service Specialization

With robotics in artificial intelligence, customer service is a fast-changing industry and it is vital to stay on top of the most current market trends. Looking at real-world examples and case studies, this certificate program covers the different phases of implementing a customer service plan. We will also examine operations, management techniques, and data reporting methods that all support customer success management (CSM) program implementation.

Required Courses:

- Understanding the Value of Customer Success
- Implementing Customer Success Strategies
- Refining, Measuring, and Improving Customer Success Strategies

Professional Communications

This certificate is designed to help you communicate with clarity and confidence in today's work settings - in-person, virtual or hybrid. You will learn to better communicate across cultures and generations. You will also learn how to write and verbalize more effectively to your audience.

Required Courses:

- Interpersonal and Intercultural Communication
- Fresh and Engaging Virtual Presentations
- Communication in a Hybrid World

Electives (Two Required):

- Grammar Tune-up
- Persuasive Writing
- Writing Emails that Get Results

Technical Writing

You're interested in this certificate because you're looking for a grammar refresh or strategies to write concise and informative technical reports and proposals. This certificate is intended for professionals working in a technical field such as engineering, technology, or science. To earn the certificate, you need to take four courses. These courses can also be taken individually.

Required Course:

- Technical Writing Essentials

Electives (Three Required):

- Grammar Tune-up
- Persuasive Writing
- Project Management Documents
- Writing Clear Technical Reports
- Writing Emails that Get Results

Standalone Courses

- Accident Investigation

In this nine-week course, you will gain the necessary background, understanding, and innovative methods required to conduct a thorough and effective accident investigation.

- Strategic Public Communications: Building Impact & Influence

This course examines the foundational elements of communication and its many facets. You'll cover everything from employee communication to media relations, to the changing nature of communication in a digital landscape.

Introduction

Epidemiology is the core science that underpins both public health and evidence-based clinical practice and health policy. Epidemiologic research targets factors that influence the development, mechanism, and outcomes of health conditions. Included among these factors are biological and social determinants of health as well as health services and systems.

Our faculty members are responsible for an undergraduate course, CH&E 4010.03 Principles of Epidemiology and Research Methods. This course is offered in the Faculties of Science/Medicine, as part of the BSc Medical Sciences Program. Our faculty members are also engaged in tutoring, teaching, research mentorship, and leadership within the medical school (please see the [Faculty of Medicine](#) calendar for more information).

Degree Programs

The Department of Community Health & Epidemiology offers MSc and PhD programs in Epidemiology and Applied Health Research. Please see the [Faculty of Graduate Studies](#) calendar for more information.

Introduction

The Department of Medical Neuroscience fosters research and training in neuroscience that advances the understanding and treatment of diseases of the nervous system. Our faculty members contribute to undergraduate neuroscience courses in the Faculty of Science including NESC 3440: Human Neuroanatomy and NESC 4070: Chemical Neurobiology.

The Department of Medical Neuroscience is also the home for Anatomy at Dalhousie University, at the undergraduate level offering courses in human gross anatomy and histology.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions

ANAT 1010 Basic Human Anatomy

CREDIT HOURS: 3

This course is offered by the Department of Medical Neuroscience primarily to students in the Schools of Nursing (Section 01). A limited number of seats are available for Special Health Professions, Arts and Science, or Non-Degree students. Note that this course is also offered by DISTANCE EDUCATION (ANAT 1010.03, Section 02) during the Regular Term (Fall or Winter). Upon successful completion of the course, the student will be able to explain and describe, at a basic level, the gross anatomy and histology of the human body. This course uses an online Virtual Anatomy Laboratory.

CALENDAR NOTES: Please note that the Distance Anat 1010 section 02 course is unrestricted and open to all students.

RESTRICTIONS: Section 01 is restricted to Nursing students and a limited number of seats are available for Special Health Professions, Arts & Science, or Non-Degree students.

FORMATS: Lecture

ANAT 1020 Basic Human Anatomy

CREDIT HOURS: 3

This course is offered by the Department Medical Neuroscience primarily to student in Recreation, Physical and Health Education and Kinesiology. A limited number of seats are available for Special Health Professions, Arts & Science, or Non-Degree students. Note that this course is also offered by DISTANCE EDUCATION (ANAT 1010.03, Section 02) during the Regular Term (Fall or Winter). Upon successful completion of this course, the student will be able to explain and describe, at a basic level, the gross anatomy and histology of the human body. This course uses an online Virtual Anatomy Laboratory.

CALENDAR NOTES: This course is NOT offered during the summer term.

RESTRICTIONS: Restricted to student in Recreation, Physical and Health Education and Kinesiology. A limited number of seats are available for Special Health Professions, Arts & Science, or Non-Degree students.

FORMATS: Lecture

ANAT 2160 Introduction to Human Histology

CREDIT HOURS: 3

Histology is the study of the structure of cells, tissue and organ systems, and it utilizes information derived from both light and electron microscopy. This course complements studies in anatomy, cell biology, physiology, and biochemistry, broadening the understanding of how organisms function.

PREREQUISITES: BIOL 2020.03 or permission of instructor

CROSSLISTED: BIOL 3430.03

FORMATS: Lecture | Lab

ANAT 3010 Introductory Human Anatomy

CREDIT HOURS: 3

This is a lecture-based course in human anatomy that provides an intermediate-level understanding of the human musculoskeletal, cardiovascular, respiratory, digestive, urinary, reproductive and nervous systems, and introduces key features associated with the formation of the human body. Restricted to students in the Bachelor of Science in Medical Science Program.

PREREQUISITES: BIOL 2020.03 or equivalent

RESTRICTIONS: Restricted to student in Bachelor of Science in Medical Sciences

FORMATS: Lecture

ANAT 4010 Advanced Human Anatomy

CREDIT HOURS: 3

This laboratory-centered course provides students with a high level of understanding of three-dimensional human anatomy. The course consists of hands-on study of functional anatomy through cadaver dissections and supplementary lectures and discussions. Restricted to fourth year students in the BSc in Medical Science program.

PREREQUISITES: ANAT 3010.03; Instructor permission required.

FORMATS: Lecture | Lab

Pathology

Location:

Sir Charles Tupper Medical Building

5850 College Street

11th Floor

PO BOX 15000

Halifax NS

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department, or visit the Psychology and Neuroscience website.

Course Descriptions

PATH 3000 Introduction to Pathology

CREDIT HOURS: 3

This course provides a general introduction into the science concerned with the basis of disease. The primary focus of the course is to highlight the basic concepts that underlie disease processes. These concepts are illustrated through a range of topics including: immunopathology, neoplasia, genetic disorder, neuropathology, hematopathology and cardiovascular pathologies.

CALENDAR NOTES:

PREREQUISITES: BIOL 1011.03 or equivalent, BIOL 2020.03 or equivalent

RESTRICTIONS: Restricted to students in the Bachelor of Science in Medical Sciences Program

FORMATS: Lecture

PATH 4100 Critical Thinking in Neuropathology

CREDIT HOURS: 3

This course focuses on breakthroughs in understanding human brain function. You will learn about the inspirations and accidents that lead to seminal discoveries. You will be able to understand the context of these breakthroughs. You will learn to ask better questions about the process of basic and applied research.

PREREQUISITES: NESC 2470 or PHYL 2041

FORMATS: Seminar

Pharmacology

Location:

Sir Charles Tupper Medical Building
5850 College Street
6B3, 6th Floor
PO BOX 15000
Halifax NS
B3H 4R2

Phone Number: (902) 494-3435

Fax Number: (902) 494-1388

Email Address: pharmacology@dal.ca

Website: pharmacology.medicine.dal.ca/

Introduction

Pharmacology is the study of the actions and fates of drugs in biological systems. Studies of the interaction of drugs with their receptors and the elucidation of the cellular mechanisms underlying the resulting responses are central to Pharmacology. It is also important to understand how drugs are handled in the body, why they produce adverse effects, and how they interact with each other. In addition, scientists often use drugs as tools to determine the basic mechanisms that underlie both normal and pathological conditions in biology. A solid understanding of the principles of Pharmacology is essential for any scientist who wishes to use drugs as tools properly. The experimental approaches used in Pharmacology are varied, ranging from bioassay, electrophysiology, chemical and biochemical analyses to molecular biology.

Degree Programs

Students intending to pursue graduate training in Pharmacology are encouraged to study pharmacology at the undergraduate level. In addition, a solid background in pharmacology can open the door to employment in numerous sectors, most notably the pharmaceutical industry. The Department of Pharmacology does not offer an honours pharmacology degree program as such. However, it does provide courses that may be taken for credit within various other honours degree programs, including Biology, Biochemistry, Psychology (Neurosciences) and Microbiology and Immunology. In addition, students can conduct honours thesis research projects in the laboratories of Pharmacology faculty. Finally, undergraduate students may, with permission of their home department and the course instructor, take certain graduate specialty courses which are offered in the Department of Pharmacology.

Staff

Dean

Anderson, D., MD

Professors Emeriti

Gray, J. D., BSc, MD (Alta), FRCP(c)

Renton, K. W., BSc (Sir Geo Wms), PhD (McGill)

Robertson, H. A., BA, MSc (Western), PhD (Cantab)

Ruedy, J., MDCM (Queen's), FRCP(c), FACP

White, T. D., BSc, MSc (UWO), PhD (Bristol)

Professor and Head of Department

Sinal, C.J., BSc, (McMaster), PhD (Western)

Professors

Denovan-Wright, E. M., BSc, PhD (Dalhousie)

Dupré, D. J., BSc, PhD (Sherbrooke)

Fawcett, J., BSc, MSc, MSc (T) (McMaster), PhD (McGill)

Howlett, S. E., BSc (Concordia), MSc, PhD (Memorial)
Kelly, M. E. M., BSc, PhD (Southampton)
McDougall, J. J., BSc (Hons), PhD (Glasgow Univ Scotland)
McMaster, C.R., BSc (Hons), PhD (Manitoba)
Pasumarthi, K. B. S., DVM (India), PhD (Manitoba)
Robertson, G. S., BSc, PhD (Dalhousie)
Sinal, C.J., BSc, (McMaster), PhD (Western)

Associate Professors

Brunt, K. R., BSc (Hons) (Saskatchewan), PhD (Queen's)
Herder, M., BSc (Hons) (Memorial), LLB, LLM (Dalhousie), JSM (Stanford)
Langille, M. G., BSc (New Brunswick), PhD (Simon Fraser Univ)

Assistant Professors

Karakach, T., MSc, PhD, (Dalhousie)

Cross Appointments/Adjunct

Delbridge, L., PhD (Melbourne), major appointment in Physiology, Univ of Melbourne
Ellis, L., BSc (Hons), MSc (Guelph), PhD (McGill), major appointment in NRC
Goralski, K., BSc (Hons), PhD (Manitoba), major appointment in College of Pharmacy
Grandy, S. A., BScK, MSc, PhD (Dalhousie), major appointment in School of Health and Human Performance
Hoffman, E., major appointment at Center for Genetic Medicine Research, Children's National Medical Center in Washington, DC
Hung, O. R., BSc Pharm, MD (Dalhousie) FRCP (C), major appointment in Department of Anesthesia
Laprairie, R. B., BSc (Hons) (Saskatchewan), MSc, PhD (Dalhousie), major appointment in Pharmacy and Nutrition, Univ of Saskatchewan
Lehmann, C., MD (Humboldt U Berlin), major appointment in Anesthesia
Lynch, M., BSc, MD (Dalhousie), major appointment in Anesthesia
Manchia, M., MD, PhD (Cagliari, Italy), major appointment in Psychiatry
Pollak, P. T., MD, PhD (Western Ontario), major appointment in Pharmacology and Cardiac Services, Univ of Calgary
Top, D., BSc (Hons) (Toronto), PhD (Dalhousie), major appointment in Pediatrics

Instructor

Farrell, S. R., BSc (Hons), PhD (Dalhousie)

Course Descriptions

PHAC 1471 Pharmacology for Pharmacy

CREDIT HOURS: 3

Part one of a two semester course providing an introduction to Pharmacology, emphasizing basic mechanisms of drug action and principals of drug-receptor interactions, pharmacokinetics, and drug metabolism.

CALENDAR NOTES: This course is restricted to students enrolled in the PharmD program at Dalhousie University.

RESTRICTIONS: This course is restricted to students enrolled in the PharmD program at Dalhousie University.

FORMATS: Lecture

PHAC 1472 Pharmacology for Pharmacy

CREDIT HOURS: 3

Part two of a two semester course providing an introduction to Pharmacology, emphasizing basic mechanisms of drug action and principals of drug-receptor interactions, pharmacokinetics, and drug metabolism.

CALENDAR NOTES: This course is restricted to students enrolled in the PharmD program at Dalhousie University.

RESTRICTIONS: This course is restricted to students enrolled in the PharmD program at Dalhousie University.

FORMATS: Lecture

PHAC 3000 Experiential Learning in Pharmacology

CREDIT HOURS: 3

This one semester course is intended to introduce students to outside-the-classroom learning experiences. Students will work closely with a supervisor to learn laboratory skills and expand their knowledge in Pharmacology. Course structure will vary, depending on the nature of the experience.

CALENDAR NOTES: To register for this class, students must find a supervisor in the Department of Pharmacology and complete a project description, including expectations/role of the student learning objectives and assessment components. The project outline, objectives and assessment must be approved by the course coordinator prior to registration

COREQUISITES: Phac 3001 or Phac 3030 or Phac 4403 or Phac 4409

RESTRICTIONS: Requires permission of coordinator and supervisor

EXCLUSIONS: Lab work that is part of another course or paid employment is not eligible. Cannot be taken concurrently with another Directed Research or Honours course. Only one experiential learning course per degree is permitted.

FORMATS: Experiential Learning

PHAC 3030 Pharmacology - The Drugs Around Us

CREDIT HOURS: 3

Using examples of drugs found in our environment and daily lives, this course will discuss subjects including drug regulations, how drugs affect us and modify our body, foods that are addictive; drugs in products you wouldn't suspect as well as the treacherous effects of common medications and environmental toxins.

RESTRICTIONS: 3rd year and above

FORMATS: Lecture | Discussion

PHAC 3333 Pharmacology of Medicinal Herbs and Fungi

CREDIT HOURS: 3

Natural products remain an important source for the development of new therapeutics. The course explores the uses of plants, herbs and fungi as medicine, ranging from traditional approaches for treating ailments to modern pharmaceuticals.

COREQUISITES: none

PREREQUISITES: PHAC 3030 or instructor's approval

CROSSLISTED: n/a

RESTRICTIONS: third year or above, E1 and E2 registration exclusion

FORMATS: Lecture

PHAC 4000 Directed Research Project in Pharmacology

CREDIT HOURS: 3

This course is intended to introduce students to academic research in a laboratory environment. Students will work closely with a supervisor to develop a research question and project proposal to address this question. Students will learn laboratory skills and expand their knowledge in Pharmacology. It is expected that students will take 4000 & 4100 consecutively in Fall & Winter terms of the same academic year, unless otherwise agreed upon with the student, coordinator and supervisor.

CALENDAR NOTES: To register for this class, students must find a supervisor in the Department of Pharmacology and complete a project description, including expectations/role of the student learning objectives and assessment components. The project outline, objectives and assessment must be approved by the course coordinator prior to registration.

COREQUISITES: PHAC 3001 or PHAC 3030 or PHAC 4403 or PHAC 4409

RESTRICTIONS: Requires permission of coordinator and supervisor

EXCLUSIONS: Lab work that is part of another course or paid employment is not eligible. Cannot be taken concurrently with an Experiential Learning or Honours course.

FORMATS: Other (explain in comments)

PHAC 4100 Directed Research Project in Pharmacology

CREDIT HOURS: 3

This course is intended to introduce students to academic research in a laboratory environment. Students will work closely with a supervisor to develop a research question and project proposal to address this question. Students will learn laboratory skills and expand their knowledge in Pharmacology. It is expected that students will take 4000 & 4100 consecutively in Fall & Winter terms of the same academic year, unless otherwise agreed upon with the student, coordinator and supervisor.

CALENDAR NOTES: To register for this class, students must find a supervisor in the Department of Pharmacology and complete a project description, including expectations/role of the student learning objectives and assessment components. The project outline, objectives and assessment must be approved by the course coordinator prior to registration.

COREQUISITES: PHAC 3001 or PHAC 3030 or PHAC 4403 or PHAC 4409

RESTRICTIONS: Requires permission of coordinator and supervisor

EXCLUSIONS: Lab work that is part of another course or paid employment is not eligible. Cannot be taken concurrently with an Experiential Learning or Honours course.

FORMATS: Other (explain in comments)

PHAC 4403 Systems Pharmacology I

CREDIT HOURS: 3

This course introduces pharmacology, the study of the interactions of drugs with the human body. Topics include drug receptors, drug metabolism, and drug distribution. Drugs acting on the autonomic nervous system, skeletal muscle, cardiovascular system, antimicrobial medications, plus anti-cancer drugs will be discussed. Content experts in pharmacology present different topics.

COREQUISITES: None

PREREQUISITES: BIOC 2300 or PHYL 2041 or NESC 2570 or Instructor's Permission

CROSSLISTED: None

RESTRICTIONS: Restricted to third year and above.

EXCLUSIONS: PHAC 3001

FORMATS: Lecture

PHAC 4409 Systems Pharmacology II

CREDIT HOURS: 3

This course is designed to complement Pharmacology I. It covers drug classes acting on various human body systems with emphasis on basic principles, mechanism of the drug action, therapeutic indications and adverse drug reactions. Topics include drugs acting on the central nervous system, drugs of abuse, local and general anesthetics, drugs acting on various endocrine glands, reproductive, immune, gastrointestinal and respiratory systems, anticancer drugs and drugs used in selected populations.

PREREQUISITES: BIOC 2300 or PHYL 2041 or NESC 2570 or Instructor's Permission

CROSSLISTED:

RESTRICTIONS: Restricted to third year and above.

EXCLUSIONS: PHAC 4001

FORMATS: Lecture

Introduction

The Department of Physiology and Biophysics offers a wide range of undergraduate courses in addition to those restricted to students in the faculties of Medicine, Dentistry and Health Professions. Students who have previously taken biology, chemistry, physics will be best equipped to study physiology.

The courses listed below are aimed at providing the student with an understanding of the functioning of the human body. The Distance Education course PHYL 1001.03/1002.03 is open to all students. PHYL 2041.03 and/or PHYL 2044.03 is/are the recommended

prerequisite for science students interested in taking higher level physiology courses. Students wishing to enrol in other specialized courses require permission from the Course Director.

Staff

Dean

Anderson, D. R., MD, FRCPC, FACP

Head of Department

Cowley, E.A., PhD

Undergraduate Student Advisor

Krueger, S., PhD (Zurich)

Professors

Chappe, V., BSc (Univ Aix-Marseille), MSc, PhD (Université de Provence-Marseille, France). Structure, function, recycling and regulation of the CFTR chloride channels; Cystic Fibrosis causing mutations; second messengers; protein kinases; protein interactions; receptors and signalling pathways.

Chauhan, B., PhD (Wales), major appointment Department of Ophthalmology and Visual Sciences. Experimental models of optic nerve and retinal damage, visual function in health and disease, structural and functional assessment of glaucoma, risk factors for the progression of glaucoma

Cowley, E. A., BSc (London), PhD (Leicester). Oxidative stress in lung disease. Role of K⁺ channels in transepithelial secretion

Croll, R. P., BSc (Tufts), PhD (McGill). Physiology and functional anatomy of invertebrate nervous systems; analyses of motor program generation; regeneration, development, and evolution of identified neurons

Fine, A., AB (Harvard), VMD, PhD (Penn). Neural plasticity; learning and memory, development and regeneration; optical monitoring of neural activity and plasticity; neural transplantation

French, A. S., MSc, PhD (Essex). Sensory transduction and adaptation; epithelial ion transport; ion channel biophysics

Lehmann, C., MD, PhD (Humboldt-Univ, Germany), FRCDC (Dalhousie), major appointment with Department of Anesthesia, Pain Management and Perioperative Medicine

Linsdell, P., BSc (London), PhD (Leicester). Ion channel biophysics; chloride channel structure and function; epithelial transport; cystic fibrosis

Sapp, J.L., BSc (Toronto), BSc Med, MD (Dalhousie), FRCP(C), major appointment with Department of Medicine. Ventricular tachycardia investigation and management. Intramyocardial needle ablation for treatment-refractory ventricular tachycardia; the role of catheter ablation for ischemic ventricular tachycardia; body surface mapping to derive an inverse solution and quantify its accuracy and the improvement of rapid mapping of ventricular tachycardia

Torkkeli, P. H., BSc, MSc, LcSc (Oulu), PhD (Alta). Mechanosensitive, voltage- and ligand-gated ion channels in mechanosensory neurons, central control of mechanosensation

Associate Professors

Anini, Y., PhD (Paris, France), Prohormones processing. Role of new enteric peptides and adipokines in the regulation of pancreatic secretions and adipogenesis. Hormonal regulation of energy homeostasis. Type 2 diabetes. Obesity

Dong, X., PhD (Univ Sci Tech, China). Lysosome physiology and lysosome-related diseases; lysosomal ion channels and transporters in calcium signaling, membrane trafficking, autophagy, lysosomal storage diseases, neurodegenerative diseases, and cancers

El Hiani, Y., BSc (Ibn Zohr, Morocco), MSc, PhD (UPJV, Amiens-France). Oxidative stress in breast cancer and opportunities for pharmacological intervention. Membrane electrophysiology, ion channel biophysics and structure function; transient receptor potential channels, calcium channels; calcium influx; calcium signaling)

Krueger, S., PhD (Zurich). Synaptic physiology; development and plasticity of synapses in the central nervous system; regulation of neurotransmitter release

Quinn, T. A., PhD (Columbia University, NY). Cardiovascular disease, with an emphasis on changes in cardiac mechanics, electrophysiology, and mechano-electric interactions leading to cardiac arrhythmias and heart failure; Cardiac regulation, with an emphasis on intrinsic autoregulatory mechanisms, including stretch and the intracardiac nervous system; Fluorescence-, optogenetic-, and computational modelling-based structure-function studies using whole animals to isolated cells. Primary appointment in the Department of Physiology and Biophysics

Siddiq, F., BSc (Dalhousie), MD (University of Toronto, TO, Canada), major appointment with Division of Endocrinology and Metabolism. Prevention of Diabetes complications; quality improvement initiatives in diabetes care.

Wells, S., PhD (Toronto), major appointment in the School of Biomedical Engineering. Structural-mechanical relations in biopolymers such as elastin and collagen in order to determine the underlying mechanism(s) of elasticity of these materials-and thereby to understand the functioning of the arteries, ligaments, skin etc. which they make up. Structural remodeling of these structures during development and maturation from fetal to adult life

Assistant Professor

Chaudhary, K.R., BPharm (HNGU, Gujarat, India), PhD (University of Alberta, Edmonton, AB, Canada). Study of sex differences in right ventricular angiogenesis, right ventricular function, and pathophysiology of right (-sided) heart failure. Identification and characterization of cardiac vascular stem cells and their role in right ventricular adaptation to physiological and pathological stress.

Agosto, M. A., BS (M.I.T.), PhD (Harvard). Neurobiology of the retina; synaptic trafficking; synaptic protein interactions

Adjunct Professors

Höger, Ulli., MSc, PhD (Johann Wolfgang Goethe Univ, Germany)

Luhovyy, B., MS, BSc, PhD (Lviv Ivan Franko National Univ, Ukraine)

Senior Instructor

Beaudoin, M.-S., BSc (McGill), MSc, PhD (Guelph)

Instructor

Slysz, J., BSc and MSc (University of PEI), PhD (University of Guelph)

Certificate in Human Physiology

Offered by: Physiology & Biophysics, Psychology & Neuroscience, Biology, Kinesiology

Coordinators: Dr. Derek Kimmerly (Kinesiology students) dskimmerly@dal.ca

Dr. Nathan Crowder (Neuroscience & Psychology) Nathan.Crowder@dal.ca

Dr. Stefan Krueger (Medical Sciences & other programs) stefan.krueger@dal.ca

Eligibility: This certificate is open to currently registered Dalhousie students.

Overview: The Certificate in Human Physiology provides students with an opportunity to specialize in physiological studies through courses offered in the Medical Sciences, Biology, Neuroscience, and Kinesiology undergraduate programs, as well as experiential learning opportunities. The learning outcomes will vary between students and depend on their main area of undergraduate studies, as well as on individual interests. Concentrating on one or more cross-cutting themes, students enrolled in the certificate program may choose to:

- Examine the function and role of particular organ systems in human performance and disease.
- Analyze the function of the nervous and endocrine systems to appreciate how they regulate bodily functions and behaviour.
- Explore physiological mechanisms at molecular and cellular levels to develop a more thorough understanding of physiological and pathophysiological processes at a higher organizational level.

Admission to Certificate: Students should enrol in the Certificate Program in Human Physiology in their third year of studies. To enrol, students must declare the certificate through Dal Online (<https://dalonline.ca> >Web for Students>Admissions>Declare Major/Minor/Certificate) and notify the Certificate Coordinator by e-mail.

To graduate with the Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate Requirements:

1. A minimum grade of at least B- is required in 6 credit hours of the following core courses:

- PHYL 2041 Human Neurophysiology and PHYL 2044 Systems Physiology or
- BIOL 3078/MARI 3078 Animal Physiology I and BIOL 3079/MARI 3079 Animal Physiology II or
- NESL 2470 Systems Neuroscience and PHYL 2044 Systems Physiology or
- KINE 2310 Physiology of Exercise and KINE 2430 Motor Control & Learning

2. A grade of at least B- required in 15 elective credit hours chosen from the list of courses below. Courses can only be counted towards elective credits if they have not been used to fulfill core course requirements. No more than one 2000-level course can be used towards elective credits. A maximum of 9 credit hours from any one stream (PHYL, NESC, BIOL, KINE) can be used.

- PHYL 3120 Exercise Physiology
- PHYL 3320 Human Cell Physiology
- PHYL 3520 Core Concepts in Medical Physi
- PHYL 3620 Human Physiology Lab
- PHYL 4000 Synaptic Function
- PHYL 4324 Endocrine Function
- PHYL 4504 Respiratory Physiology
- PHYL 4680 Cardiovascular Physiology

- NESC 2150 Perceptual Processes
- NESC 2570 Cellular Neuroscience
- NESC 3051 Methods in Sensation and Perception
- NESC 3170 Hormones & Behaviour
- NESC 3670 Genes, Brain & Behaviour
- NESC 3970 Molecular Neuroscience
- NESC 4070 Chemical Neurobiology

- BIOL 3430 Intro Human Histology
- BIOL 4020 Advanced Cell Biology

- KINE 3419 Appl Physiology Principles Human Performance
- KINE 3250 Human Nutrition
- KINE 3440 Sensory and Motor Function
- KINE 4704 Cardiorespiratory Dynamics in Exercise

3. At least 6 credit hours of experiential learning or independent research. Research projects have to be conceptually or methodologically related to Physiology and be approved by the certificate program committee. Suitable courses for this requirement include **PHYL 3600, NESC 3001, NESC 3100, NESC 3101, NESC 4501, NESC 4502, SCIE 3100, SCIE 4101, SCIE 4102, SCIE 4901, SCIE 4902, BIOL 3800, BIOL 4806, BIOL 4807, BIOL 4901, BIOL 4902, KINE 4801, KINE 4802, and KINE 4900X/Y.**

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above

are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions

PHYL 1001 Human Physiology 1

CREDIT HOURS: 3

This online distance course is the first of two that explore the organization and function of the human body from the level of molecules to organ systems and the integration of systems within the whole organism. Specific topics in this course include Cellular Physiology with an emphasis on Transport, Metabolism and Communication, the Immune System, Neural, Muscle and Sensory Physiology and Control of Body Movement. DIRECTORS: M.-S. Beaudoin and J. Slys

CALENDAR NOTES: This course is normally given during the Fall Semester and meets the prerequisite requirement for PHYL 1002.03 (Human Physiology 2) and PHYL 1012.03. This course can not be used as a prerequisite course for 3rd and 4th year physiology courses, nor as a co-requisite for PHYL 2570.03 (Cellular Neurophysiology).

EXCLUSIONS: PHYL 1011.03

FORMATS: Online Delivery

PHYL 1002 Human Physiology 2

CREDIT HOURS: 3

This course is a continuation of PHYL 1001.03 and explores the organization and function of the human body from the level of molecules to organ systems and the integration of systems within the whole organism. Specific topics in this course include Endocrine, Cardiovascular, Respiratory, Renal, Acid-Base, Whole Body Metabolism and Reproductive Physiology. DIRECTORS: M.-S. Beaudoin and J. Slys

CALENDAR NOTES: This course is normally given during the Winter Semester. This course can not be used as a prerequisite course for 3rd and 4th year physiology courses, nor as a co-requisite for PHYL 2570.03 (Cellular Neurophysiology).

PREREQUISITES: PHYL 1001.03 or PHYL 1011.03 or permission of course director

EXCLUSIONS: PHYL 1012.03

FORMATS: Online Delivery

PHYL 1011 Human Physiology 1

CREDIT HOURS: 3

This course is the first of two that explore the organization and function of the human body from the level of molecules to organ systems and the integration of systems within the whole organism. Specific topics in this course include Cellular Physiology with an emphasis on Transport, Metabolism and Communication, the Immune System, Neural, Muscle and Sensory Physiology and Control of Body Movement. DIRECTOR: M.-S. Beaudoin and J. Slys

CALENDAR NOTES: This course is given in the Fall semester and meets the prerequisite requirement for PHYL 1012.03 (Human Physiology 2) and the online distance course PHYL 1002.03. This course cannot be used as a prerequisite course for 3rd and 4th year physiology courses, nor as a co-requisite for PHYL 2570.03 (Cellular Neurophysiology).

EXCLUSIONS: PHYL 1001.03

FORMATS: Other (explain in comments)

PHYL 1012 Human Physiology 2

CREDIT HOURS: 3

This course is a continuation of PHYL 1011.03 and explores the organization and function of the human body from the level of molecules to organ systems and the integration of systems within the whole organism. Specific topics in this course include Endocrine, Cardiovascular, Respiratory, Renal, Acid-Base, Whole Body Metabolism and Reproductive Physiology. DIRECTOR: M.-S. Beaudoin and J. Slys

CALENDAR NOTES: This course is given in the Winter Semester. This course can not be used as a prerequisite course for 3rd and 4th year physiology courses, nor as a co-requisite for PHYL 2570.03 (Cellular Neurophysiology).

PREREQUISITES: PHYL 1001.03 or PHYL 1011.03 or permission of course director

EXCLUSIONS: PHYL 1002.03

FORMATS: Other (explain in comments)

PHYL 2041 Human Neurophysiology

CREDIT HOURS: 3

The aim of this class is to understand the functional mechanisms of the human nervous system and its clinical significance. The course covers the electrical and chemical properties of neurons and glia, and how neurons communicate with one another and with muscle cells. It reviews the motor, sensory and higher integrative functions of the central nervous system, and the closely related autonomic nervous system. It also surveys the physiology and functional anatomy

of the somatosensory, visual, auditory, vestibular and chemical senses. Both normal functions and selected pathologies of these systems will be discussed. The class also covers important investigative techniques in neuroscience. The overall objective is to provide a solid, factual foundation of knowledge in neurophysiology as well as its underlying principles.

CALENDAR NOTES: PHYL 2041, a core neurophysiology class for students in the Medical Sciences program, serves as equivalent to NESC 2470.03 as prerequisite for upper level NESC courses. Medical Sciences students intending to take NESC 2470.03 in place of PHYL 2041 are advised to also enroll in NESC 2570 as a Selective. Director: S. Krueger, M. Agosto, X. Dong

PREREQUISITES: (BIOL 1010.03 or BIOL 1020.03) and (BIOL 1011.03 or 1021.03) and (CHEM 1012.03 or CHEM 1022.03), or equivalent

EXCLUSIONS: NESC 2470.03

FORMATS: Lecture

PHYL 2044 Human Systems Physiology

CREDIT HOURS: 3

The human body consists of cells organized into a number of organ systems. The aim of this class is to explain how six organ systems (respiratory, cardiovascular, renal, gastrointestinal, endocrine, and reproductive) function to allow us to live and carry out our daily activities. Director: T. A. Quinn

PREREQUISITES: BIOL 1010.03 (or BIOL 1020.03) and BIOL 1011.03 (or BIOL 1021.03) and CHEM 1012.03 OR CHEM 1022.03 or equivalent

FORMATS: Lecture

PHYL 2570 Cellular Neurophysiology

CREDIT HOURS: 3

This course provides an introduction to the function of the nerve cells of the brain, which forms the basis for explaining features of brain function in terms of activity of individual cells and their membrane properties, as well as small networks of neurons. The course is designed for all students wishing to take more advanced courses in, or to major in, Neuroscience. Although the course covers topics of neuroscience at all levels, the content is directed towards cellular neuroscience; detailed coverage of the strictly developmental systems or molecular levels of neuroscience is provided in other courses. DIRECTOR(S): N. Crowder, P. Cote, S. Krueger

PREREQUISITES: PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03 and PSYO 1012.03 or PSYO 1022.03 or SCIE 1505.18 or SCIE 1515.36, SCIE 1520.30, 1540.27 or (BIOL 1010.03 or BIOL 1020.03 AND BIOL 1011.03 or BIOL 1021.03 with a grade of B- or better)

CROSSLISTED: NESC 2570.03, PSYO 2570.03

FORMATS: Lecture

PHYL 3120 Exercise Physiology in Health and Disease

CREDIT HOURS: 3

The function and dysfunction of body organ systems are reviewed, and the short- and long-term responses of these systems to physical exercise are analyzed. Factors affecting physical performance are considered, and the preventive and therapeutic use of exercise for a wide range of clinical conditions is examined.

DIRECTOR: M.-S. Beaudoin, J. Slysz

PREREQUISITES: PHYL 2041.03 or PHYL 2044.03 or permission of the class director

FORMATS: Lecture | Tutorial

PHYL 3320 Human Cell Physiology

CREDIT HOURS: 3

Events at the cellular and molecular level underlie the functions of tissues, organs and systems. This course examines key physiological principles at the molecular level, and uses the understanding developed to describe important cell and tissue functions, as well as dysfunctions in human disease states.

Lectures focus on membrane transport, electrical excitability and electrical signaling, epithelial transport, signaling within individual cells, intracellular organelle function, and ion channels. DIRECTOR: Y. El Hiani

PREREQUISITES: PHYL 2041.03 or permission of the course director

FORMATS: Lecture

PHYL 3520 Core Concepts in Medical Physiology

CREDIT HOURS: 3

Through didactic (lectures) and problem-solving (tutorial) sessions, students will gain a deeper understanding of the functions of various organ system physiologies. In addition, the integration of a number of organ system functions will also be discussed. Where appropriate, the physiology of disease processes will underscore the consequences of a malfunction of a physiological process. Organ systems covered include cardiovascular, renal, respiratory and gastrointestinal. A firm understanding of physiological principles is essential for any student contemplating a career in the health professions. DIRECTOR: Y. Anini

PREREQUISITES: PHYL 2044.03 or permission of course director

EXCLUSIONS: PHYL 4504.03

FORMATS: Lecture | Tutorial

PHYL 3600 Directed Project in Physiology

CREDIT HOURS: 3

The goal of this course is to provide advanced undergraduate students with the opportunity to conduct a research project under the supervision of a faculty member in the department of Physiology & Biophysics. Projects may cover a variety of experimental approaches and topics including, but not limited to, cardiovascular physiology, neurophysiology, respiratory physiology, endocrinology and neuroendocrinology, and molecular physiology. DIRECTOR: S. Krueger

PREREQUISITES: PHYL 2041.03 and PHYL 2044.03 or permission of the course director

FORMATS: Lab

PHYL 3620 Human Physiology Lab

CREDIT HOURS: 3

This course offers fundamental concepts of human physiology including neural, muscular, cardiovascular, respiratory, renal, gastrointestinal, endocrine and sensory systems. Students will learn to carry out experimental procedures such as measurement and analysis of ECG, EEG, blood pressure, pulmonary function, senses and reflexes, integrating practical knowledge with theoretical background and clinical significance. DIRECTOR: M.-S. Beaudoin, J. Slys

PREREQUISITES: PHYL 2044.03 or permission of course director

EXCLUSIONS: PHYL 2031.03, PHYL2032.03, PHYL 2030.06 X/Y

FORMATS: Lab

PHYL 4000 Current Advances in Synaptic Function and Plasticity

CREDIT HOURS: 3

Key recent research studies in cellular and systems neurophysiology are presented and discussed. Emphasis is placed on synaptic function and plasticity, excitability, dendritic integration, neural networks and relevant advances in experimental methods. Newly published papers within these areas are reviewed weekly, followed by a more extensive critique of two publications. DIRECTOR: S. Krueger, A. Fine

PREREQUISITES: NESC 2570.03/PHYL 2570.03 or PHYL 2041.03 or permission of course directors

CROSSLISTED: NESC 4185.03

FORMATS: Seminar

PHYL 4324 Endocrine Physiology

CREDIT HOURS: 3

This course is designed to provide intermediate and advanced undergraduates with a basic understanding of the function of the endocrine system. The course will progress from a consideration of basic concepts and mechanisms to the physiological function of specific endocrine systems. Interactions between organ systems will be emphasized. DIRECTOR: Y. Anini

PREREQUISITES: PHYL 2044.03 or permission of the class director

EXCLUSIONS: PHYL 5513

FORMATS: Lecture

PHYL 4504 Respiratory Physiology

CREDIT HOURS: 3

This class will provide a detailed overview of key concepts in respiratory physiology. Attention will be given to aspects of integrated physiology, as well as cellular and molecular concepts. Particular reference will be given to pulmonary diseases. Students will be expected to make presentations based on appropriate literature. Specific topics to be covered include: mechanics of breathing; gas exchange; gas transport; ventilation-perfusion ratios; pulmonary function testing; blood flow and metabolism; airway epithelial cells and transepithelial transport; mechanisms of airways host defence; control of ventilation; respiratory system under stress; cardiopulmonary response to aerobic exercise. Director: E.A. Cowley

PREREQUISITES: PHYL 2044.03 or permission of the course director

EXCLUSIONS: PHYL 5504.03

FORMATS: Lecture | Discussion

PHYL 4680 Cardiovascular Physiology

CREDIT HOURS: 3

This course provides a detailed overview of key concepts of cardiovascular physiology and disease, including discussion of current research in the field.

Topics include: cardiac anatomy/structure; electrophysiology; excitation-contraction coupling; mechanics; metabolism; nervous system control; and vasculature function. Director: T. A. Quinn

PREREQUISITES: PHYL 2044.03 or permission of the course director

CROSSLISTED: PHYL 5568.03 Advanced Cardiovascular Physiology, BMNG 5270.03 Advanced Cardiovascular Physiology

FORMATS: Lecture | Discussion | Other (explain in comments)

Introduction

Dalhousie's Faculty of Science is the primary centre in the region for science education and research. The principal mission of the Faculty is the discovery, organization, dissemination and preservation of knowledge and understanding of the natural world. The Faculty is dedicated to excellence in the pursuit of this mission. Students in the Faculty of Science develop a capacity for inquiry, logical thinking and analysis; cultivate an ability to communicate with precision and style; and acquire skills and attitudes for lifelong learning.

We offer students the opportunity to pursue undergraduate degrees in 16 different Science programs, including disciplines in the life sciences, physical sciences, and mathematical or economic sciences. In addition, students may combine studies across science disciplines, or with subject areas from other faculties, including the Faculty of Arts & Social Sciences, the Faculty of Computer Science or the College of Sustainability. Other opportunities include the Co-op Education in Science option, where paid work terms are integrated into academic programs, opportunities to participate in research projects led by internationally renowned scientists, and the chance to work toward Certificates that recognize particular skill sets or training obtained as part of a science undergraduate education.

Details concerning particular programs of study are found in the departmental and program entries.

Departments and Programs of the Faculty of Science

The Faculty of Science offers 16 undergraduate programs:

- [Actuarial Science](#)
- [Biochemistry and Molecular Biology](#) *^c
- [Biology](#) ^c
- [Chemistry](#) ^c
- [Earth Sciences](#) ^c
- [Economics](#) ^c
- [Environmental Science](#) ^c
- [Marine Biology](#) ^c
- [Mathematics](#) ^c
- [Medical Sciences](#) **
- [Microbiology and Immunology](#) *^c
- [Neuroscience](#)
- [Ocean Sciences](#)
- [Physics](#) ^c
- [Psychology](#)
- [Statistics](#) ^c

* Departments belong to the Faculty of Medicine

** Offered in cooperation with the Faculty of Medicine

^c Co-operative Education option available

Staff

Dean

Macdonald, C.L.B., BSc (Hons), PhD (Dalhousie), Professor (Chemistry)

Associate Dean (Academic)

Walde, S., PhD (Calgary), Professor (Biology)

Associate Dean (Research)

Kreplak, L., MSc (Supelec, France), PhD (Universite Paris-sud), Professor (Physics & Atmospheric Science)

Assistant Dean (Student Affairs)

Laws, P., BSc (Acadia), MSc (Dalhousie), BEd (MSVU), Senior Instructor (Chemistry)

Assistant Dean (Finance and Administration)

Certificates in Science

Certificates are one way that the Faculty of Science recognizes graduating students who have achieved a level of proficiency or specialization in a particular area or subject. Certificates are awarded upon graduation from a degree program and will be recorded on the student's academic transcript.

Certificates vary in their goals and requirements. Many have a research or practicum component. Some are interdisciplinary, requiring work in more than one department, while others focus on a specialization within a single program. Some Certificates are designed for students enrolled in particular programs, while others are broadly applicable to students in any science program.

In Certificate programs, students enrol by applying to the Certificate Coordinator. Interested students are advised to enrol early in their programs of study, but enrolment is usually also permitted in the final year of study, provided requirements have been met. To be awarded a Certificate, students must notify the Coordinator of their intention to graduate, and provide evidence of completion of all Certificate requirements, prior to the end of the examination period of their final year. Some Certificate programs may require earlier notification; please check with your Coordinator.

Faculty of Science students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section of the calendar.

The following Certificates are offered by the Faculty of Science. Students enrolled in one of the programs listed beside the Certificate are most likely to be able to meet the Certificate requirements within their programs. Specific Certificate requirements are described below.

- [Certificate in Actuarial and Financial Mathematics](#) (Mathematics, Statistics)
- [Certificate in Animal Behaviour](#) (Biology, Psychology and Neuroscience)
- [Certificate in Applied and Computational Mathematics](#) (Mathematics, Statistics)
- [Certificate in Aquaculture and the Environment \(Biology, Marine Biology\)](#)
- [Certificate in Environmental Impact Assessment](#) (Biology, Environmental Science)
- [Certificate in Genetics](#) (Biochemistry & Molecular Biology, Biology, Microbiology & Immunology)
- [Certificate in Geographic Information Science](#) (Biology, Earth Sciences, Environmental Science)
- [Certificate in Information Technology](#) (Earth Sciences, Physics)

- [Certificate in Materials Science](#) (Chemistry, Physics, Earth Sciences)
- [Certificate in Medicinal Chemistry](#) (Chemistry)
- [Certificate in Neurotechnology Innovation \(Psychology, Neuroscience\)](#)
- [Certificate in Science Leadership and Communication](#)(any 4-year Faculty of Science program)

Certificate in Actuarial and Financial Mathematics

Offered by: Mathematics & Statistics

Coordinator: Dr. Toby Kenney (tkenney@mathstat.dal.ca) Mathematics and Statistics

This program provides many of the learning objectives and fundamental mathematical and statistical skills required to complete the classes (and examinations) of the Society of Actuaries accreditation program. Students who are interested in a career in actuarial science should consult the Basic Education Catalogue on the Society of Actuaries web page (www.soa.org) or the Syllabus of Basic Education on the Casualty Actuaries website (www.casact.org). This program also prepares students for employment in general financial institutions where modelling, quantitative risk analysis, management of investment instruments, asset and liability management, life contingencies and insurance assessment, and other complex financial calculations are required.

Admission to Certificate

To enrol in the *Certificate in Actuarial and Financial Mathematics*, students must declare the certificate through Dal Online (<https://dalonline.dal.ca>>Web for Students > Admissions > Declare Major/Minor/Certificate).

To graduate with the Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate Requirements:

1. Completion of a 120 credit hour Major or Honours program in Mathematics and/or Statistics
2. Completion of the following mathematics courses: MATH 1000, MATH 1010, MATH 1030 or 2030, MATH 2001, MATH 2002, MATH 2600
3. Completion of the following statistics courses: STAT 2060, STAT 2080, STAT 2450, STAT 3340 and STAT 3360
4. Completion of either:

Financial Option: MATH 2120, MATH 3300, and MATH 3900

OR

Actuarial Option: STAT 3703, STAT 3720, and STAT 4390

Certificate in Animal Behaviour

Offered by: Biology, Psychology and Neuroscience

Coordinator: Dr. Simon Gadbois (Psychology and Neuroscience) simon.gadbois@dal.ca

The Certificate in Animal Behaviour provides students with an opportunity to specialize in Animal Behaviour through a set of courses and a research project.

Admission to Certificate

Students should enrol in the Certificate in Animal Behaviour in their third year of studies, when they are seeking approval from the Certificate Coordinator for the independent research component. To enrol, students must declare the certificate through Dal Online (<https://dalonline.dal.ca> >Web for Students>Admissions>Declare Major/Minor/Certificate), and notify the Certificate Coordinator by e-mail. To qualify for this certificate, students must complete all course requirements, and must receive approval for the research component of the certificate prior to the start of the research course.

To graduate with the certificate, students must apply to Graduate with a Certificate at the time they apply to graduate from their degree program

Certificate requirements:

1. A minimum grade of B- is required in each of four mandatory courses:

- PSYO 2160.03/NESC 2160.03: Animal Behaviour
- PSYO 2501.03: Statistical Methods or STAT 2080.03: Statistical Methods for Data Analysis Inference
- BIOL 3062.03: Behavioural Ecology or PSYO 3162.03/NESC 3162.03: Advanced Animal Behaviour
- BIOL 3630.03: Field Methods in Animal Behaviour or NESC 3161.03/PSYO 3161.03: Measuring Behaviour or NESC 3165.03/PSYO 3165.03: Neuroethology

2. A grade of at least B- in all of 12 additional credit hours of courses chosen from the following list. Courses taken as one of the four mandatory classes cannot also be used to fulfill this requirement. Six credit hours must be at the 3000/4000 level.

2000 level

- ANSC 2003.03: Companion Animal Behaviour
- PSYO 2140.03/NESC 2140.03: Learning
- PSYO 2470.03/NESC 2470.03: Systems Neuroscience

3000 level

- ANSC 3002.03: Domestic Animal Behaviour
- BIOL 3062.03: Behavioural Ecology (if not used to fulfill Requirement 1 above)
- BIOL 3080.03/MARI 3080.03: Ecology and Evolution of Fishes
- BIOL 3327.03: Entomology
- BIOL 3622.03: Ornithology
- BIOL 3626.03: Field Studies of Marine Mammals
- BIOL 3628.03/MARI 3628.03: Marine Ornithology
- BIOL 3630.03: Field Methods in Animal Behaviour (if not used to fulfill Requirement 1 above)
- BIOL 3640.06: Tropical Ecology and Biodiversity (with Animal Behaviour project: counts for three credit hours only)
- BIOL 3632.03: Applied Field Methods in Fish Ecology
- BIOL 3639.03: Herpetology
- MARI 3090.03: Marine Mammalogy
- PSYO 3000.06/NESC 3000.06: Independent Research in Modern Psychology (Animal Behaviour topic)
- PSYO 3001.03/NESC 3001.03: Directed Research Project in Psychology or Neuroscience (Animal Behaviour topic)
- PSYO 3043.03/NESC 3043.03: Neurobiology of Learning
- PSYO 3044.03/NESC 3044.03: Laboratory Methods of Learning and Conditioning
- PSYO 3161.03/NESC 3161.03: Measuring Behaviour
- PSYO 3162.03/NESC 3162.03: Advanced Animal Behaviour (if not used to fulfill Requirement 1 above)
- PSYO 3165.03/NESC 3165.03: Neuroethology (if not used to fulfill Requirement 1 above)
- PSYO 3170.03/NESC 3170.03: Hormones and Behaviour
- PSYO 3180.03/NESC 3180.03: Psychoneuroimmunology/Ecological Immunology
- PSYO 3670.03/NESC 3670.03: Genes, Brain and Behaviour

4000 level

- BIOL 4323.03/MARI 4323.03: Biologging in Ecology
- BIOL 4800.06: Special Topics (Animal Behaviour topic)
- BIOL 4806.03/MARI 4806.03, BIOL 4807.03/MARI 4807.03, BIOL 4808.03/MARI 4808.03, BIOL 4810.03: Special Topics (Animal Behaviour topic)
- BIOL 4510.03 Cultural Evolution
- BIOL/MARI 4900.06: Honours Research and Thesis or BIOL 4901.03/MARI 4901.03 BIOL 4902.03/MARI 4902.03: Honours Research and Thesis I and II (with approved Animal Behaviour topic)
- MARI 4090.03: Evolutionary Ecology of Marine Mammals
- PSYO 4140.03 or NESC 4140.03: Animal Learning Topics
- PSYO 4160.03/NESC 4160.03: Topics in Behavioural Biology
- PSYO 4500.06/NESC 4500.06: Honours Research (with approved Animal Behaviour topic)

3. A grade of B- in 3 credit hours or more of independent research in Animal Behaviour.

The course used to fulfil this requirement can also be counted toward the courses that fulfil Requirement 2 above.

Students must obtain approval of their research topic from a Certificate Coordinator prior to the start of the research course. Animal behaviour research projects may be completed through one or more of PSYO 3100.03/NESC 3100.03 or PSYO 3101.03/NESC 3101.03, PSYO 3001.03/NESC 3001.03, PSYO 4500.06/NESC 4500.06, BIOL 4800.06, BIOL 4806.03/MARI 4806.03, BIOL 4807.03/MARI 4807.03, BIOL 4808.03/MARI 4808.03 or BIOL 4900.06.

Honours students may fulfill this requirement by conducting their honours thesis research on a topic in Animal Behaviour. Students are encouraged to further develop their study design and analysis skills by taking additional courses such as BIOL 4061.03 (Design of Biological Experiments) or BIOL 4062.03 (Analysis of Biological Data).

Certificate in Applied and Computational Mathematics

Offered by: Mathematics & Statistics

Coordinator: Dr. P. Selinger mathdirector@mathstat.dal.ca

This program is concerned with the development of the core mathematical and computational skills required in science, government and industry. Areas of application include everything from mathematical modeling to operations research to cryptography to software development.

Admission to Certificate

To enrol in the *Certificate in Applied and Computational Mathematics*, students must declare the certificate through Dal Online (<https://dalonline.dal.ca> >Web for Students>Admissions>Declare Major/Minor/Certificate), and notify the Certificate Coordinator by e-mail.

To graduate with the Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate Requirements:

1. Completion of the 120 credit hour Major or Honours program in Mathematics or an equivalent program
2. Completion of the following mathematics courses: MATH 1000, MATH 1010, MATH 1030 (or MATH 2030), MATH 2001, MATH 2002, MATH 2040, MATH 2110 (or MATH/CSCI 2112), MATH 2120
3. Completion of at least four of: MATH 3120, MATH 3210, MATH 3260, MATH 3300, MATH 3330, MATH 3400
4. Completion of at least two of: MATH 4116, MATH 4220, MATH 4230, MATH 4250, MATH 4320

Additional recommended courses: MATH 2300, STAT 2060, STAT 2080

Certificate in Aquaculture and the Environment

Offered by: Faculty of Science

Coordinator: Dr. Diego Ibarra Diego.ibarra@dal.ca (Biology)

Eligibility: The certificate is open to any Dalhousie undergraduate student. Non-degree Dalhousie students may qualify for the certificate if they fulfill all course requirements at Dalhousie.

Overview: The *Certificate in Aquaculture and the Environment* consists of courses that include lectures, laboratories, and visits to coastal and land-based aquaculture sites. It is designed to provide students with knowledge of, and experience with general aspects of the cultivation of aquatic species. The emphasis is on understanding aquaculture - environment interactions, and acquiring the knowledge, skills and quantitative tools needed to assess and reduce the environmental footprint of aquaculture operations.

Admission to Certificate

To enrol in the *Certificate in Aquaculture and the Environment*, students must declare the certificate through Dal Online (<https://dalonline.dal.ca> >Web for Students>Admissions>Declare Major/Minor/Certificate), and notify the Certificate Coordinator by e-mail. To qualify for the certificate, students must complete the course requirements, and have received approval from the Certificate Coordinator if a course other than MARI 3604 is used to fulfil subject area F.

To graduate with the Certificate, students must Apply to Graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate Requirements

To obtain the *Certificate in Aquaculture and the Environment*, students must take one course from each of six subject areas (A to F), with a minimum of B- in each course. Note that most of these courses may also count toward a Major, Minor or Honours program in Biology or Marine Biology.

A. Introduction to aquaculture

- MARI 3602.03: Introduction to Aquaculture

B. Practical skills in aquaculture

- MARI 3603.03: Practical Aquaculture

C. Biology of aquatic organisms

One of

- MARI 3074.03 (or BIOL 3078.03): Physiology of Marine Animals Part I
- MARI 3076.03 (or BIOL 3079.03): Physiology of Marine Animals Part II
- MARI 3221.03 (or BIOL 3221.03): Diversity of Algae
- MARI 3301.03 (or BIOL 3301.03): Invertebrate Biology
- MARI 4080.03 (or BIOL 4080): Laboratory Studies of Fishes
- BIOL 4662.03/MARI 4662.03/OCEA 4230.03: Biology of Phytoplankton

D. Aquaculture and the environment

- MARI 4600.03: Ecosystem modelling for Aquaculture

E. Aquaculture management

One of

- OCEA 4401.03: Marine Management I
- OCEA 4402.03: Marine Management II
- BIOL 4001.03: Environmental Impact Assessment
- ENVS 3200.03: Introduction to Environmental Law
- ECON 3335.03: Environmental Economics
- SUST 3101.03: Food Systems and Sustainability: Feeding the 10 billion

F. Industry-relevant knowledge and experience

** One of

- MARI 3604.03: Field Aquaculture
- * MARI 3800.03 (or BIOL 3800.03): Experiential Learning
- * MARI 4806.03: Special Topics Independent Research
- * MARI 4901.03 and MARI 4902.03 (or MARI 4900.06): Honours Thesis
- * BIOL 4901.03 and BIOL 4902.03 (or BIOL 4900.06): Honours Thesis
- * MARI 8891.00 (or MARI 8892.00 or MARI 8893.00) Co-op work term
- * ENVS 3000.03: Environmental Science Internship
- * ENVS 8891.00 (or ENVS 8892.00 or ENVS 8893.00) Co-op work term
- * SUST 3002.03: ESS Engagement Project
- * SCIE 4701.03 and SCIE 4702.03 Science and Technology Innovation, Commercialization and Entrepreneurship I and II

* These courses must be pre-approved (prior to start of the course) by the certificate coordinator as having a focus on aquaculture

** Some alternatives used to fulfil **Requirement F** are not available to students in all programs. For example, MARI 4900 is open only to students in the Marine Biology Honours program, MARI 8891 and ENVS 8891 are open only to students in Marine Biology or Environmental Science Co-op programs.

Certificate in Data Analytics

Offered by: Faculty of Science

Coordinator: Dr. Theodore Kolokolnikov, Mathematics and Statistics (tkolokol@mathstat.dal.ca)

Eligibility: Open to Dalhousie undergraduate students

Overview: Data Analytics is an interdisciplinary field aimed at extracting knowledge from data of various forms. The techniques of data analytics draw heavily from the fields of statistics, computer science, and mathematics. Students completing the certificate will understand distinctions among data, information and knowledge, will be able to use the Structured Query Language (SQL) to manipulate relational databases, the R programming language to model data using a variety of machine learning and statistical models, and will be able to assess the performance of predictive models.

Admission to Certificate

To enrol in the *Certificate in Data Analytics*, students must declare the certificate through Dal Online (<https://dalonline.dal.ca>>Web for Students > Admissions > Declare Major/Minor/Certificate), and notify the Certificate Coordinator by email.

To graduate with the Certificate, students must apply to Graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate requirements:

- MATH 1000: Differential and Integral Calculus I (or MATH 1215 or MATH 1280)
- MATH 1030: Matrix Theory and Linear Algebra I
- MATH 2040: Matrix Theory and Linear Algebra II (or MATH 2135)
- STAT 1060: Introduction to Statistics (or STAT 2060)
- STAT 2450: Introduction to Data Mining with R
- CSCI 2202: Computer Modeling for Scientists (or CSCI 1105 or CSCI 1110)
- CSCI 2141: Introduction to Database Systems
- One of
 - BIOC 4010: Bioinformatics
 - BIOL 4062: Analysis of biological data
 - CHEM 4205: Chemometrics
 - CSCI 4146: The process of data science
 - ECON 4440: Time series analysis in economics
 - ENVS 3100: Environmental analytics
 - EARTH 4520: GIS applications
 - MARI 4600: Ecosystem modelling for aquaculture
 - OCEA 4210/STAT 4390: Time series analysis in oceanography and meteorology
 - PHYC 3250: Computational methods in physics
 - PHYC 4250: Topics in numerical computing
 - STAT 4130: Bayesian data analysis
 - STAT 4350: Applied multivariate analysis
 - STAT 4550: Longitudinal data analysis
 - STAT 4620: Data analysis
 - STAT 4100: Survival analysis

Certificate in Data Science

Certificate in Data Science

This certificate is intended for students completing a Bachelor of Computer Science, Bachelor of Science in Computer Science, or a Bachelor of Science in Statistics, but is open to currently registered Dalhousie students in all Faculties; it will not be open for direct application.

This certificate requires a student to take two required courses and four electives from a list of elective courses with at least a C in each of them. Required courses are:

- CSCI 3151: Foundations of Machine Learning or STAT 3450: Statistical learning with R
- CSCI 4146: The Process of Data Science

Elective courses are:

- CSCI 4125: High Performance Computing
- CSCI 4141: Information Retrieval
- CSCI 4144: Introduction to Data Mining and Data Warehousing
- CSCI 4152: Natural Language Processing
- CSCI 4155: Machine Learning
- CSCI 4156: Reinforcement Learning with Gaming Applications
- CSCI 4166: Visualization
- STAT 2080: Statistical methods for Data Analysis and Inference
- STAT 2430: Data Visualization
- STAT 2450: Introduction to Data Mining with R
- STAT 3340: Regression and Analysis of Variance
- STAT 3360: Probability
- STAT 3740: Predictive Analysis
- STAT 4066: Advanced Statistical Theory
- STAT 4130: Bayesian Analysis
- STAT 4350: Multivariate Analysis
- STAT 4370: Stochastic Processes
- STAT 4390: Time Series Analysis
- STAT 4620: Data Analysis
- STAT 4690: Computational Statistics

Requirements

Note that to obtain a certificate, the degree requirements must be satisfied. To be awarded a Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate in Environmental Impact Assessment

Offered by: Faculty of Science

EIA Certificate Coordinator: Patricia Lane (Biology), patricia.lane@dal.ca

The **Certificate in Environmental Impact Assessment** is for students who are interested in, or majoring in environmental areas, and who wish to pursue additional training in EIA. This certificate is available to students in the Faculty of Science, Faculty of Agriculture, Faculty of Architecture and Planning, Faculty of Arts and Social Sciences, Faculty of Management, and the College of Sustainability.

Students will learn to:

1. Apply a Project EIA Framework in the preparation of a Nova Scotia - based EIA.
2. Demonstrate an understanding of relevant federal and provincial (Nova Scotia) legislation.
3. Design a meaningful stakeholder participation program.
4. Use environmental impact and risk methodologies to accurately predict project impacts.
5. Design an Environmental Management Plan that includes: mitigation, enhancement, compensation, monitoring, residual impacts and project accountability.
6. Prepare a comprehensive project EIA for a physical project
7. Prepare a Strategic Environmental Assessment (SEA) for a federal policy.

Disclaimer: This EIA Certificate was developed within Dalhousie University and it is not designed to fulfill any governmental and/or professional requirements outside of the university, in Canada or abroad.

The Certificate requires a total of 24 credit hours as follows:

1. Required EIA course: BIOL 4001.03/ENVS 4001.03 (3 credit hours) to be taken in fourth year. Note: transfer or online courses are not acceptable substitutes for this requirement.
2. Introductory Science, SUST, Agriculture, or FASS course (minimum 3 credit hours) from Table 1.
3. Environmental courses with theoretical content from Table 2 (minimum 9 credit hours).
4. Methods courses with field, laboratory, statistical, or modelling experience from Table 3 (minimum 3 credit hours).
5. Supplementary courses in Major or Related Disciplines from Table 4 (minimum 6 credit hours).

Students must obtain a minimum grade of B for all courses counted toward the certificate.

Classes cannot be substituted from one table to another. Please note that many classes are cross-listed, but only listed once for the department offering the class below. Students can use any one of the cross-listings.

Certificate in Genetics

Offered by: Biochemistry & Molecular Biology, Biology, Microbiology & Immunology

Coordinators:

Dr. Claudio Slamovits claudio.slamovits@dal.ca (Biochemistry & Molecular Biology)

Debra Grantham grantham@dal.ca (Biology)

Dr. Ian Weaver ian.weaver@dal.ca (Medical Sciences, Psychology, Neuroscience)

Dr. Zhenyu Cheng zhenyu.cheng@dal.ca (Microbiology & Immunology - Until December 2020)

Dr. Lois Murray lois.murray@dal.ca (Microbiology & Immunology - As of January 2021)

The Certificate in Genetics provides students with an opportunity to complete a set of courses and research that will accord them recognition of specialization in genetics.

Admission to Certificate

Students should enrol in the Certificate in Genetics in their third year of studies, when they are seeking approval of the independent research component from the Certificate Coordinator for their degree program. To enrol in the *Certificate in Genetics*, students must declare the certificate through Dal Online (<https://dalonline.dal.ca> >Web for Students>Admissions>Declare Major/Minor/Certificate), and notify the Certificate Coordinator. To qualify for the certificate students must complete all course requirements, *and* have received approval for the research component prior to the start of the research course.

To graduate with the Certificate, students must apply to graduate with a certificate at the time they apply to graduate from their degree program.

Certificate requirements:

1. A minimum grade of a B- in four mandatory courses:

- BIOL 2020.03: Cell Biology
- BIOL 2030.03: Genetics and Molecular Biology
- BIOC 2300.03: Introduction to Biochemistry
- BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology

2. A minimum grade of B- in 12 credit hours chosen from the following list. At least 6 credit hours must be at the 4000 level.

2000 level

- BIOL 2040.03: Evolution

3000 level

- BIOL 3036.03: Transgenic Organisms
- BIOL 3037.03: Life Rewritten: Applications and Implications of Gene Editing and Synthetic Biology

- BIOL 3042.03/MARI 3042.03: Molecular Ecology
- BIOL 3044.03: Ecological Genetics
- BIOL 3046.03: Molecular Evolution
- BIOL 3102.03: Microbial Eukaryotes: Biodiversity and Evolution
- MICI 3114.03: Virology
- MICI 3119.03: Physiology of the Prokaryotic Cell
- NESC 3670.03/PSYO 3670.03: Genes, Brain and Behaviour

4000 level

- BIOC 4010.03: Bioinformatics
- BIOC 4027.03/MICI 4027.03: Molecular Mechanisms of Cancer
- MICI 4033.03: Advanced Microbial Genetics
- MICI 4114.03: Advanced Topics in Molecular and Medical Virology
- BIOC 4403.03: Genes and Genomes
- BIOC 4404.03: Gene Expression
- BIOC 4501.03: Medical Biotechnology
- BIOC 4835.03/BIOL 4035.03: Human Genetics
- NESC 4670.03: Behavioral Neuro(epi)genetics and Genomics

3. Other required courses (prerequisites for BIOC 3400.03)

- CHEM 2441.03, or CHEM 2401.03 and CHEM 2402.03

4. A minimum grade of B- in three credit hours or more of independent research on a topic involving microbial genetics, molecular genetics, transmission genetics or population genetics. Co-op Work Terms are not applicable. The research topic must be pre-approved by the Department's Certificate Coordinator prior to the start of the research course.

- BIOC 4001.03
- BIOC 4604.03
- BIOC 4605.03
- BIOL 4806.03/MARI 4806.03
- BIOL 4807.03/MARI 4807.03
- BIOL 4900.06/MARI 4900.06
- BIOL 4901.03/MARI 4901.03
- BIOL 4902.03/MARI 4902.03
- MICI 4703.03 and MICI 4704.03 (or MICI 4700X/Y.06)
- MICI 4701.03
- MICI 4702.03
- MICI 4901.03 and MICI 4902.03 (or MICI 4900X/Y.06)
- MICI 4901.03
- MICI 4902.03
- NESC 4501.03 and NESC 4502.03 OR PSYO 4501.03 and PSYO 4502.03 (or NESC 4500X/Y.06/PSYO 4500X/Y.06)
- SCIE 4101.03 and SCIE 4102.03 (or SCIE 4100X/Y.06)
- SCIE 4901.03 and SCIE 4902.03 (or SCIE 4900X/Y.06)

Certificate in Geographic Information Science (GIS)

Offered by: Earth Sciences, Environmental Sciences, Biology

Coordinators:

Dr. C.S Greene csgreene@dal.ca (Earth and Environmental Sciences)

Dr. D. Tittensor Derek.Tittensor@dal.ca (Biology)

Dr. E. Rapaport eric.rapaport@dal.ca (School of Planning)

The GIS Certificate program provides training and experience in geographic information science as part of an undergraduate degree program, usually in Earth Sciences, Environmental Science or Biology, and prepares students for further study or employment in the

area. The Certificate requires the completion of GIS-related courses and completion of a major project that involves work with geographic information systems and geomatics.

Admission to Certificate

It is recommended that students enrol in the GIS Certificate in their second or third year of studies, and that they contact the Certificate Coordinator at that time. To enrol, students must declare the Certificate through Dal Online (<https://dalonline.dal.ca> >Web for Students>Admissions>Declare Major/Minor/Certificate). To qualify for the Certificate, students must complete all course requirements, *and* have received approval for the research component (project) from the Certificate Coordinator if intending to use an alternative to the Geographic Information Science Research course to satisfy the research component of the certificate.

To graduate with the Certificate, students must apply to graduate with a certificate at the time they apply to graduate from their degree program.

Certificate Requirements:

1. A minimum grade of B- in each of the following courses:

- ENVS 3500.03/ERTH 3500.03/GEOG 3500.03: Geoscience Information Management
- ERTH 4520.03/GEOG 4520.03: GIS Applications to Environmental and Geological Science

2. A minimum grade of B- in a minimum of two of the following courses:

- GEOG 2000.03: Cartography
- GEOG 2006.03: Space, Place and GIS
- BIOL 3633.03/ENVS 3633.03/GEOG 3633.03: Spatial Information and GIS in Ecology
- ERTH 4530.03/GEOG 4530.03: Environmental Remote Sensing
- ENVS 2100.03: Environmental Informatics
- ENVS 3100.03: Environmental Analytics
- ENVS 3400.03/GEOG 3400.03: Environment and Human Health

3. Completion of a research project with an emphasis in geographic information science via one of the following sets of courses (minimum grade of B-). Research topics must be pre-approved by the Certificate Coordinator

Set 1

- SCIE 4850.03/BIOL 4850.03/ENVS 4850.03/GEOG 4850.03: Geographic Information Science Research Project

Set 2

- BIOL 4901.03 and BIOL 4902.03 or MARI 4901.03 and MARI 4902.03: Honours Thesis (or the former BIOL 4900.06/MARI 4900.06)
- ENVS 4901.03/ENVS 4902.03: Honours Thesis ERTH 4101.03 and ERTH 4102.03: Research Project (or ERTH 4100.06)
- ERTH 4201.03 and ERTH 4202.03: Honours Thesis (or ERTH 4200.06)
- SUST 4800.03: Independent Study
- SUST 4901.03 and SUST 4902.03: Honours Thesis (or SUST 4900.06)

Research Project Guidelines for the Certificate in Geographic Information Science

Students should learn how to design, manage and complete a research project that emphasizes the use of a geographic information system (GIS). Students will identify a suitable research problem and work to solve it through acquiring, organizing, analyzing and presenting data using GIS. A substantive analytical component involving GIS must be included. Projects should be undertaken after all or most of the coursework is completed, e.g. students should already be familiar with GIS concepts and functions, and be proficient in the use of at least one GIS package. Supervision and evaluation of research projects must include input from a professor or GIS technician competent in geographic information science, methods and technologies.

Students enrolled in an undergraduate program other than Biology, Environmental Science, Earth Sciences or the College of Sustainability, may be able to complete the project through a directed readings or honours thesis course listed within their home department. The project must be pre-approved by a Certificate Coordinator. Non-thesis students, or honours students who wish to complete the certificate through a project that is not part of their thesis, who are in Biology, Earth Sciences or Environmental Science should complete the project through SCIE 4850: Geographic Information Science Research Project.

Certificate in Human Physiology

Offered by: Physiology & Biophysics, Psychology & Neuroscience, Biology, Kinesiology

Coordinators: Dr. Derek Kimmerly (Kinesiology students) dskimmerly@dal.ca
Dr. Nathan Crowder (Neuroscience & Psychology) Nathan.Crowder@dal.ca
Dr. Stefan Krueger (Medical Sciences & other programs) stefan.krueger@dal.ca

Eligibility: This certificate is open to currently registered Dalhousie students.

Overview: The Certificate in Human Physiology provides students with an opportunity to specialize in physiological studies through courses offered in the Medical Sciences, Biology, Neuroscience, and Kinesiology undergraduate programs, as well as experiential learning opportunities. The learning outcomes will vary between students and depend on their main area of undergraduate studies, as well as on individual interests. Concentrating on one or more cross-cutting themes, students enrolled in the certificate program may choose to:

- Examine the function and role of particular organ systems in human performance and disease.
- Analyze the function of the nervous and endocrine systems to appreciate how they regulate bodily functions and behaviour.
- Explore physiological mechanisms at molecular and cellular levels to develop a more thorough understanding of physiological and pathophysiological processes at a higher organizational level.

Admission to Certificate: Students should enrol in the Certificate Program in Human Physiology in their third year of studies. To enrol, students must declare the certificate through Dal Online (<https://dalonline.ca> >Web for Students>Admissions>Declare Major/Minor/Certificate) and notify the Certificate Coordinator by e-mail.

To graduate with the Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate Requirements:

1. A minimum grade of at least B- is required in 6 credit hours of the following core courses:

- PHYL 2041 Human Neurophysiology and PHYL 2044 Systems Physiology or
- BIOL 3078/MARI 3078 Animal Physiology I and BIOL 3079/MARI 3079 Animal Physiology II or
- NESC 2470 Systems Neuroscience and PHYL 2044 Systems Physiology or
- KINE 2310 Physiology of Exercise and KINE 2430 Motor Control & Learning

2. A grade of at least B- required in 15 elective credit hours chosen from the list of courses below. Courses can only be counted towards elective credits if they have not been used to fulfill core course requirements. No more than one 2000-level course can be used towards elective credits. A maximum of 9 credit hours from any one stream (PHYL, NESC, BIOL, KINE) can be used.

- PHYL 3120 Exercise Physiology
- PHYL 3320 Human Cell Physiology
- PHYL 3520 Core Concepts in Medical Physiol
- PHYL 3620 Human Physiology Lab
- PHYL 4000 Synaptic Function
- PHYL 4324 Endocrine Function
- PHYL 4504 Respiratory Physiology
- PHYL 4680 Cardiovascular Physiology

- NESC 2150 Perceptual Processes
- NESC 2570 Cellular Neuroscience
- NESC 3051 Methods in Sensation and Perception
- NESC 3170 Hormones & Behaviour
- NESC 3670 Genes, Brain & Behaviour
- NESC 3970 Molecular Neuroscience
- NESC 4070 Chemical Neurobiology

- BIOL 3430 Intro Human Histology
- BIOL 4020 Advanced Cell Biology
- KINE 3419 Appl Physiology Principles Human Performance
- KINE 3250 Human Nutrition
- KINE 3440 Sensory and Motor Function
- KINE 4704 Cardiorespiratory Dynamics in Exercise

3. At least 6 credit hours of experiential learning or independent research. Research projects have to be conceptually or methodologically related to Physiology and be approved by the certificate program committee. Suitable courses for this requirement include **PHYL 3600, NESC 3001, NESC 3100, NESC 3101, NESC 4501, NESC 4502, SCIE 3100, SCIE 4101, SCIE 4102, SCIE 4901, SCIE 4902, BIOL 3800, BIOL 4806, BIOL 4807, BIOL 4901, BIOL 4902, KINE 4801, KINE 4802, and KINE 4900X/Y.**

Certificate in Information Technology

Offered by: Physics

Coordinator: Dr. Philip Bennett philip.bennett@dal.ca

The goal of this certificate is to recognize students who have completed courses with a substantial Information Technology (IT) component, and to provide these students with a document to present to potential employers who seek graduates with IT skills. Depending on the program of study, students may work with symbolic calculation packages such as MATLAB or MAPLE, statistical packages such as R or S-Plus, numerical computation or programming languages. Others develop proficiency in web design, or use of database, drawing (e.g. CAD) or GIS software. Experience with a variety of hardware and operating systems experience may further round out the set of skills.

The Certificate in IT is a discipline-based program available to students majoring in Physics.

Admission to Certificate

To enrol in the *Certificate in Information Technology*, students must declare the certificate through Dal Online (<https://dalonline.dal.ca> > Web for Students > Admissions > Declare Major/Minor/Certificate), and notify the Certificate Coordinator by e-mail.

To graduate with the Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate Requirements (Physics):

- Completion of a 120 credit hour Major or Honours degree program in Physics
- Two of PHYC 2050.03, PHYC 3250.03, PHYC 4250.03
- One additional course which may be a CSCI or INFX course, ENGM 1081.03 or MATH 2300.03

Certificate in Materials Science

Offered by: Faculty of Science

Coordinator: Dr. Mita Dasog (Chemistry) mita.dasog@dal.ca

The Certificate in Materials Science provides recognition for students who have had significant training in the breadth and depth of materials science within their 120 credit hour Honours or Major program. It is particularly suited for students in Chemistry, Earth Sciences and Physics programs.

Admission to Certificate

To enrol in the Certificate in Materials Science, students must declare the certificate through Dal Online (<https://dalonline.dal.ca> > Web for Students > Admissions > Declare Major/Minor/Certificate), and notify the Certificate Coordinator by e-mail. Students may enrol in the second, third or fourth year of their programs, but early enrolment is advised.

To graduate with the Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate Requirements

1. At least four of the following courses, with a minimum grade of B- in each:

CHEM 3305.03/PHYC 3303 (or CHEM 3303.03): Materials Science

CHEM 4302.03: Intro to Surface Science

CHEM 4502.03: Polymer Science

CHEM 4311.03: Fundamental and Applied Electrochemistry

CHEM 4105.03: Inorganic Materials Synthesis

ERTH 2001.03: Earth Materials Science I

ERTH 2002.03: Earth Materials Science II

PHYC 3900.03: Introduction to Soft Condensed Matter Physics

PHYC 4230.03: Introduction to Condensed Matter

BIOE 4391.03: Polymeric Biomaterials

BMNG 5110.03: Biocompatibility and Biomaterials Design

2. Students must complete a research project with a materials emphasis (pre-approved by the Certificate Coordinator) via one of the following sets of courses, with a minimum grade of B-:

- CHEM 4801.03 and CHEM 4802.03
- CHEM 4902.03 and CHEM 4903.03 (or CHEM 4901.06)
- EARTH 4201.03 and EARTH 4202.03 (or EARTH 4200.06)
- EARTH 4101.03 and EARTH 4102.03 (or EARTH 4100.06)
- PHYC 4800.03 and PHYC 4850.03

Certificate in Medicinal Chemistry

Offered by: Faculty of Science

Coordinator: Dr. Alison Thompson alison.thompson@dal.ca (Chemistry)

The Department of Chemistry offers a Certificate in Medicinal Chemistry in conjunction with its Major and Honours programs. This certificate is intended to reflect that the student has completed a course of study in chemistry that is appropriate for employment or further study related to pharmaceutical development and production.

Admission to Certificate

To enrol in the *Certificate in Medicinal Chemistry*, students must declare the certificate through Dal Online (<https://dalonline.dal.ca> > Web for Students > Admissions > Declare Major/Minor/Certificate), and notify the Certificate Coordinator by e-mail.

To graduate with the Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate Requirements:

- Completion of a 120 credit hour program in Chemistry (Honours, Combined Honours, Major, Double Major)
- CHEM 2101.03, CHEM 2201.03, CHEM 2301.03, CHEM 2304.03, CHEM 2401.03, CHEM 2402.03
- CHEM 3203.03, CHEM 3401.03, CHEM 3404.03, CHEM 3601.03
- CHEM 4401.03, CHEM 4601.03
- Any two of: CHEM 3301.03, CHEM 4205.03, CHEM 4206.03, CHEM 4301.03, CHEM 4402.03

Certificate in Neurotechnology Innovation

Offered by: Faculty of Science

Coordinator: Dr. Aaron Newman, Department of Psychology and Neuroscience (aaron.newman@dal.ca)

Overview Neurotechnology is an area of research and application involving technologies that measure and/or modulate brain function. Technologies include hardware, software, and drugs, and have applications in several areas including clinical diagnosis and treatment, health promotion and maintenance (including cognitive health), entertainment, and forensics. The undergraduate certificate in Neurotechnology Innovation is designed to provide foundational knowledge in this multi-disciplinary area. The certificate will also provide an understanding of how neurotechnologies can be translated into applications that are available to patients and consumers - through training in innovation, design, and commercialization. The Neurotechnology Innovation certificate provides students with knowledge in:

- Basic neuroscience
- Neurotechnology
- Clinical and cognitive neuroscience
- Computer science
- Entrepreneurship
- Innovation and product design
- Intellectual property

Eligibility The Certificate is oriented toward undergraduate students majoring in Neuroscience, but is open to students in other programs. Students from outside the Faculty of Science (Arts & Social Sciences, Computer Science, Engineering, Management) are welcome, but should consult with an advisor from their home program prior to enrolling.

Admission To enrol in the *Certificate in Neurotechnology Innovation*, students must declare the certificate through Dal Online (<https://dalonline.dal.ca> > Web for Students > Admissions > Declare Major/Minor/Certificate).

To graduate with the Certificate, students must apply to Graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate Requirements

The certificate requires completion of 18 credit hours of coursework, in addition to the prerequisites that any of the required courses have. The certificate will be awarded based on successful completion of all of the student's degree requirements, as well as the following courses required for the certificate. Students should consult the University Calendar and departmental requirements for their major regarding the limitations that may be imposed upon the number of credit hours taken outside of the Faculty in which they are majoring, as well as prerequisites for the courses required for the certificate

1. Successful completion of courses from each of the three following sections, as detailed below (or courses deemed equivalent by the Certificate Coordinator):

(a) NESC 2470 Systems Neuroscience or

PSYO 2770 Brain and Behaviour

(b) At least one of

NESC/PSYO 3505 Neural Data Science

CSCI 1105 Introduction to Programming

CSCI 1110 Introduction to Computer Science

CSCI 2202 Introduction to Programming with Applications for Scientists

CSCI 2203 Data Science for Everyone

PHYC 2050 Computer Simulation in Science

(c) SCIE 4701 and SCIE 4702 Science and Technology Innovation, Commercialization and Entrepreneurship

2. Completion of at least three credit hours (one course) from each of the two topic areas listed below. Courses used to satisfy the requirements below cannot also be used to satisfy Requirement 1 above. Note that many of these courses have additional prerequisites; students are responsible for identifying and fulfilling any such prerequisites and/or obtaining special permission from the instructor.

(a) Neuroscience/Neurotechnology

PHYC 2250 Physics of Biological and Medical Technology

NESC/PSYO 3137 Research Methods in Cognitive Neuroscience

NESC/PSYO 3227 Principles of Human Neuropsychology

NESC/PSYO 3237 Drugs and Behaviour

NESC 4070 Chemical Neurobiology

NESC 4177 Theoretical Neuroscience

NESC 4185 Synaptic Function and Plasticity

PHAC 3001 Pharmacology I

PHAC 4403 Systems Pharmacology I

(b) Computer and Data Science

Note that not all courses are available to non-Computer Science majors every year. Please consult with the Faculty of Computer Science regarding enrolment in these courses

NESC/PSYO 3505 Neural Data Science

CSCI 1107 Social Computing

CSCI 1108 Experimental Robotics

CSCI 1110 Introduction to Computer Science

CSCI 1120 Introduction to Computer Systems

CSCI 2110 Data Structures and Algorithms

CSCI 2134 Software Development

CSCI 2141 Intro to Database Systems

CSCI 2202 Introduction to Programming with Applications for Scientists

CSCI 2203 Data Science for Everyone

CSCI 3141 Foundations of Data Science Using R

PHYC 2050 Computer Simulation in Science

STAT 2450 Introduction to Data Mining Using R

Notes on the Computer Science course options:

- CSCI 1105 and 1110 are mutually-exclusive options for an introductory computer science course. You should take CSCI 1105 if you have no prior computer programming/coding experience, or CSCI 1110 if you have previous programming experience (e.g., a past high school or university class in programming, or independent programming experience). Students with some programming experience who are unsure which course to register for, should consult with an advisor in the Computer Science program.

- CSCI 2202 *Computer Modelling for Scientists* and CSCI 2203 *Data Science for Everyone* have no prerequisites, and do not assume prior programming experience. If you choose to take CSCI 2202 first, you should not take CSCI 1105 after, as the content will be redundant. However, taking both CSCI 2202 and CSCI 1110 in either order is acceptable.
- Likewise, if you take NESC/PSYO 3505 first, you should not take CSCI 1105 after, as the content will be redundant.

Certificate in Science Communication

Offered by: Faculty of Science

Coordinator: Dr. Leanne Stevens, Leanne.stevens@dal.ca

Description: The focus of the Certificate in Science Communication is to develop the communication skills of science students, through courses focused on understanding the history of science in the media, ethics in science, and communicating science to non-scientists. This certificate is open to any student pursuing a Bachelor of Science degree (BSc or BSc(MedSci)) in the Faculty of Science.

Eligibility: Students currently registered in a Bachelor of Science degree offered by the Faculty of Science (BSc, BSc(Medical Sciences)).

Admission to Certificate: To enrol in the *Certificate in Science Communication*, students must declare the certificate through Dal Online (<https://dalonline.dal.ca> > Web for Students > Admissions > Declare Major/Minor/Certificate) and notify the Certificate Coordinator.

To qualify for the Certificate, students must complete all course requirements, and the Portfolio of Science Communication.

To graduate with the Certificate, students must apply to Graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate Requirements

The certificate requires completion of 15 credit hours of coursework, in addition to the prerequisites that any of the required courses have. The certificate will be awarded based on successful completion of all the student's degree requirements, as well as the following courses (and portfolio) required for the certificate (all with minimum grades of B).

1) **Core requirements:** Students must complete all three core requirements (9 credit hours total), with a grade of B or better in each.

- HSTC 2400.03 /JOUR 2400.03 Science and the Media
- PHIL 2680.03/PHIL 1050.03 Ethics in Science (*preferred*) *Accepted alternates:* PHIL 2480.03 Environmental Ethics, PHIL 2810.03 Ethics in Health Care: Social Policy
- SCIE 3211.03 Communicating Science to Non-Scientists

2) **Topics in Communication:** Students must complete at least **6-credit hours** of communications-focused courses, with a grade of B or better in each, from the list below:

- ASSC 3150.03 Intercultural Communication I
- BIOL 4880.03 / MARI 4880.03 Communicating Science for Societal Impact
- CMMT 3000.03 Human Communication
- HSTC 2500.03 Science Fiction in Film
- INTD 3021.03 Communicating Development and Environment
- JOUR 1002.03 Foundations in Journalism I
- MGMT 3602.03 Professional Communication Skills
- MGMT 4041.03 Environmental Education
- NESC 3011.03/NESC 3012.03 / PSYO 3011.03/PSYO 3012.03 Experiential Learning in Science Communication
- SCIE 3333.03 Science Education

3) **Portfolio in Science Communication** (SCIE 4211.03): Students are required to register for this zero-credit hour course in the semester that they are submitting their completed portfolio for evaluation (typically, the final semester of their degree).

The portfolio is a record that can be shared with future employers and built upon into the future. It will include and document, at a minimum:

i) Two exemplary pieces of science communication. These pieces can be in any format and from courses or extracurricular activities, but *cannot* be from any of the three required courses (HSTC 2400, PHIL 2680, or SCIE 3211): written, blog post, infographic, podcast, video, etc. Students must provide a reflection/explanation of the pieces and describe how they effectively communicate science.

ii) Evidence of at least one public engagement in science communication, paired with a short essay outlining skills used in the engagement, challenges faced, and solutions achieved, and constructive self-criticism of the student's performance. Examples include Soapbox Science, Let's Talk Science, Science Slam Canada, etc.

iii) Reflection and critique of the courses completed as part of the certificate – outlining how each course contributed to their learning, skills learned, and areas for further growth and development related to science communication.

OPTIONAL: Students who have completed the coursework for the Certificate in Science Communication (items 1 & 2 in Certificate Requirements), have the option to convert to the *Certificate in Science Communication & Leadership*. Students wishing to switch to the Science Communication & Leadership certificate must consult with the coordinators for BOTH certificates. At least six additional credit hours must be completed, including the SCIE 4444.03 Science Leadership capstone course. Consult the Academic Calendar for more information and full details on the Science Communication & Leadership certificate.

NOTE: Students can only receive ONE of the Science Communication or Science Communication & Leadership certificates. The two certificates are considered exclusionary.

Certificate in Science Communication and Leadership

Offered by: Faculty of Science

Coordinator: asscdean.science@dal.ca

The focus of the Certificate in Science Communication and Leadership is to develop basic leadership and communication skills specifically in and through the sciences, to enable Dalhousie Science graduates to better understand the nature and context of science, to consider the process of change, and to have the skills to communicate and lead effectively. The Certificate is available to any undergraduate student in the Faculty of Science. **The Certificate in Science Communication and Leadership builds on the content of the Science Communication Certificate:** students can only receive credit for either the Science Communication Certificate or the Science Communication and Leadership Certificate, but not both.

The Certificate in Science Communication and Leadership replaces the Science Leadership and Communication Certificate. Students who enrolled in the Science Leadership and Communication Certificate prior to Fall 2022 should consult the Calendar for 2021-22 for details on completion of this Certificate.

Admission to the Certificate

Students may enroll in the Certificate in Science Communication and Leadership at any point during their undergraduate program. Students must contact the Certificate Coordinator when seeking permission to enroll in the Portfolio of Learning non-credit course required for completion of this Certificate (SCIE 4445). To enroll in the Certificate, students must declare the Certificate through Dal Online and notify the Certificate Coordinator by email that they have done so.

To graduate with the Certificate, students must apply to graduate with the Certificate at the time they apply to graduate from their degree program.

Certificate Requirements:

1. Leadership: Core required course

SCIE 4444.03: Leadership in Science

2. Communicating Science: Core required course

SCIE 3211.03: Communicating Science

3. Science communication elective: One and no more than 2 of the following Topics in Communication: with a grade of B or better

- ASSC 3150.03 Intercultural Communication I
- BIOL 4880.03/MARI 4880.03 Communicating Science for Societal Impact
- CMMT 3000.03 Human Communication

- HSTC 2500.03 Science Fiction in Film
- INTD 3021.03 Communicating Development and Environment
- JOUR 1002.03 Foundations in Journalism I
- MGMT 3602.03 Professional Communication Skills
- MGMT 4041.03 Environmental Education
- NESC 3011.03/NESC 3012.03 / PSYO 3011.03/PSYO 3012.03 Experiential Learning in Science Communication
- SCIE 3333.03 Science Education

4. Understanding the nature and context of science

HSTC 2400.03: Science and the Media

5. Ethics in Science: One of the following required courses

- PHIL 2680.03: Ethics in Science
- PHIL 1050.03: Ethics in Science
- (NOTE: CREDIT WILL NOT BE GIVEN FOR BOTH PHIL 2680 and PHIL 1050)
- PHIL 2480.03: Environmental Ethics
- PHIL 2810.03: Ethics in Health Care: Social Policy

6. Discipline-specific course: Note that one of these courses may replace the second Topics in Science Communication requirement (#3 above)

- BIOL 2040.03: Evolution
- ECON 2850.03/PHYC 2850.03: Science and Economics of Climate Change
- ENVS 3501.03: Environmental Problem-solving I
- EARTH 3001.03: Field school
- BIOL 4664.03/MARI 4664.03: History of Marine Science*
- NESC 2007.03: Neuroscience Principles and Methods
- PSYO 2000.03: Methods in Experimental Psychology
- PSYO 3581.03: History of Psychology I
- PSYO 3582.03: History of Psychology II
- BIOC 4501.03: Medical Biotechnology I
- MICI 2400.03: Laboratory Methods in Microbiology and Immunology
- OCEA 2020.03: Tools and Concepts in Ocean Sciences I

Other courses may be considered. Please consult a coordinator.

* Cross-listed as OCEA 4331.03, HIST 3073.03, HSTC 3331.03, SCIE 4000.03

7. Portfolio of leadership development (SCIE 4445.00). Only register for this zero-credit hour course in the semester that you are submitting your completed portfolio for evaluation, once all other components are completed (or in the final stages of completion).

The portfolio is a record that can be shared with future employers, and built upon in the future. It will document, at a minimum:

- The activities undertaken in each of the above 6 components of the Certificate
- Evidence of your development as a leader and communicator in science throughout the Certificate
- Reflections on how each component fits into leadership and communication development in your discipline / science more broadly

Co-operative Education in Science

The Co-op Program allows students to alternate three, career-focused work terms with study terms and receive a co-op degree designation upon graduation. Co-op enables students to apply what they learn in class to real-world work situations and then apply what they learn at work to their classroom studies, thereby enriching their learning. It also helps students to learn more about their career options by test-driving different work environments before they graduate.

Co-op is available to students in many of our BSc (120 credit hour) Honours or Major programs. Interested students normally apply to join Co-op at the end of their first year of study.

Further details are available from departmental Co-op Academic Advisors and from [S.I.T.E.](#).

Actuarial Science

Location:
Chase Building
6316 Coburg Road

PO BOX 15000
Halifax NS

Fax Number: (902) 494-5130
Email Address: info@mathstat.dal.ca
Website: www.dal.ca/mathstat

Introduction

Actuarial Science is the quantitative study of risk, particularly financial risk, and the methods for managing it. It is traditionally associated with insurance and pension plans, but can be applied to a wide range of other areas where there is need for assessment of risk. An Actuarial Science degree provides students with the background for a career in Actuarial Science. Course offerings provide the knowledge and techniques needed by students to prepare to write most of the Society of Actuaries preliminary examinations. Students will learn the relevant mathematical and statistical techniques, with specific applications to Actuarial Science, and acquire a basic understanding of Economics and Business.

The Dalhousie Actuarial Science program is offered through the Department of Mathematics and Statistics.

Degree Programs

The Department of *Mathematics and Statistics* offers the following degree programs in *Actuarial Science*

- BSc (120 credit hour) Honours (Concentrated)*
- BSc or BA (120 credit hour) Combined Honours*
- BSc (120 credit hour) Major*
- BSc or BA (120 credit hour) Double Major*
- Minor in *Actuarial Science*
- A post-baccalaureate diploma

* May be combined with Minor programs from other disciplines

Departmental Requirements for these programs are described below. In addition to departmental requirements, students must satisfy the requirements outlined in the [Academic Regulations](#) and the [College of Arts and Science Degree Requirements](#) sections of this calendar.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Students applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with the Actuarial Science undergraduate academic advisor.

BSc (120 credit hour) Concentrated Honours in Actuarial Science

Students who obtain an Honours degree will have covered the subject material required for sitting most of the Society of Actuaries examinations. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours. Honours students complete a minimum of 54 credit hours above the 1000 level in Actuarial Science with a grade of C or better and a minimum

GPA of 3.0. Honours students are required to write a research-based Honours thesis. The research thesis and the Honours Qualifying Examination requirement are satisfied through completion of *STAT 4950.03/ACSC 4950.03*.

Admission to Honours

Students must apply for admission to Honours programs. Students considering Honours in Actuarial science should consult with the Actuarial Science Honours Advisor early in their studies.

Departmental requirements

In addition to fulfilling the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections of this calendar, students in a BSc **Concentrated Honours program in Actuarial science** must complete the following courses:

1000 level

- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II or MATH 1215.03: Life Sciences Calculus/MATH 1010.03: Differential and Integral Calculus II or MATH 1500X/Y: Calculus
- MATH 1030.03 : Matrix Theory and Linear Algebra I
- ECON 1101.03: Principles of Microeconomics/ECON 1102.03: Principles of Macroeconomics

2000 level

- CSCI 2202.03: Computer modelling for scientists
- MATH 2001.03: Intermediate Calculus I
- MATH 2040.03: Matrix Theory and Linear Algebra II or MATH 2135.03: Linear Algebra
- STAT 2060.03: Introduction to Probability and Statistics
- STAT 2080.03: Statistical Methods for Data Analysis and Inference
- STAT 2450.03: Introduction to Data Mining with R
- STAT 2600.03: Theory of Interest/MATH 2600.03: Theory of Interest

3000 level

- STAT 3340.03: Regression and Analysis of Variance
- STAT 3360.03: Probability
- STAT 3460.03: Intermediate Statistical Theory
- ACSC 3703.03/STAT 3703.03: Actuarial Models I
- ACSC 3720.03/STAT 3720.03: Life Contingencies I

4000 level

- ACSC 4950.03/STAT 4950.03: Honours Research Project

Choices

- Two of the following courses:

- ACSC 3740.03: Predictive Analytics
- ACSC 4703.03/STAT 4703.03: Actuarial Models II
- ACSC 4720.03/STAT 4720.03: Life Contingencies II

- One of the following courses:

- STAT 3450.03: Statistical learning with R
- STAT 4350.03: Applied Multivariate Analysis
- STAT 4390.03: Time Series Analysis
- STAT 4620.03: Data Analysis

Electives

- In addition to the above courses, you must take at least 2 additional elective courses. The elective courses can be chosen from any of the courses listed above, or from the following courses, or any courses that are specified as Actuarial Science electives in any future version of the University Calendar prior to the time of your graduation.

2000 level

MATH 2052.03: Introduction to Numerical Programming
MATH 2120.03: Methods of Ordinary Differential Equations
MATH 2300.03: Mathematical Modelling
MATH 2505.03: Introductory Analysis
STAT 2430.03: Data Visualization

3000 Level

MATH 3120.03: Differential Equations
MATH 3210.03: Introduction to Numerical Analysis
MATH 3260.03: Applied Differential Equations
MATH 3300.03: Optimization
MATH 3400.03: Classical Game Theory
MATH 3501.03: Intermediate Analysis I
MATH 3502.03: Intermediate Analysis II
MATH 3900.03: Financial Mathematics

4000 Level

MATH 4010.03: Introduction to Measure Theory and Integration
MATH 4140.03: Introduction to Functional Analysis
MATH 4540.03: Applied Analysis
STAT 4100.03: Survival Analysis
STAT 4130.03: Bayesian Data Analysis
STAT 4370.03: Stochastic Processes
STAT 4390.03: Time Series Analysis
STAT 4620.03: Data Analysis
STAT 4690.03: Computational Statistics

BSc or BA (120 credit hour) Combined Honours in Actuarial Science and another subject

Students who wish to study *Actuarial Science* in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. *Actuarial Science* may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject.

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. Students must have their program of study approved by Academic Advisors in both subject areas. Students must complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For *Actuarial Science*, this requirement is satisfied through ACSC 4950.03/STAT 4950.03.

Departmental requirements

Students in a BSc **Combined Honours program in Actuarial Science** and another subject must fulfill the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections of this calendar.

The required actuarial science and statistics courses at or above the 2000 level with a grade of C or better in each are the following:

2000 Level

- CSCI 2202.03: Computer modelling for scientists
- MATH 2001.03: Intermediate Calculus
- MATH 2040.03: Matrix Theory and Linear Algebra II or MATH 2135.03: Linear Algebra
- STAT 2060.03: Introduction to Probability and Statistics
- STAT 2080.03: Statistical Methods for Data Analysis and Inference
- STAT 2450.03: Introduction to Data Mining with R
- STAT 2600/MATH 2600.03: Theory of Interest

3000 Level

- STAT 3340.03: Regression and Analysis of Variance
- STAT 3360.03: Probability
- STAT 3460.03: Intermediate Statistical Theory
- ACSC 3703.03/STAT 3703.03: Actuarial Models I
- ACSC 3720.03/STAT 3720.03: Life Contingencies I

Choices

You must also complete two of the following courses:

- ACSC 3740.03: Predictive Analytics
- ACSC 4703.03/STAT 4703.03: Actuarial Models II
- ACSC 4720.03/STAT 4720.03: Life Contingencies II

Electives

The requirements for combined honours degrees include:

Minimum of 66, maximum of 84 credit hours beyond the 1000 level in two subjects, not more than 54 credit hours nor fewer than 30 credit hours being in either, including at least 18 credit hours above the 2000 level in each subject. Grades in honours subject courses must be C or better.

If there is no overlap in required courses between Actuarial Science and your other honours subject, then the above requirements will satisfy this condition. If the other honours subject has some overlap in required courses, you may need to take some additional elective courses. For this purpose, the following courses can count as Actuarial Science Electives.

2000 Level

- MATH 2052.03: Introduction to Numerical Programming
- MATH 2120.03: Methods for Ordinary Differential Equations
- MATH 2300.03: Mathematical Modelling
- MATH 2505.03: Introductory Analysis
- STAT 2430.03: Data Visualization

3000 Level

- MATH 3120.03: Differential Equations
- MATH 3210.03: Introduction to Numerical Analysis
- MATH 3260.03: Applied Differential Equations
- MATH 3300.03: Optimization
- MATH 3400.03: Classical Game Theory
- MATH 3501.03: Intermediate Analysis I
- MATH 3502.03: Intermediate Analysis II

- MATH 3900.03: Financial Mathematics
- STAT 3450.03: Statistical learning with R

4000 Level

- MATH 4010.03: Introduction to Measure Theory and Integration
- MATH 4140.03: Introduction to Functional Analysis
- MATH 4540.03: Applied Analysis
- STAT 4100.03: Survival Analysis
- STAT 4130.03: Bayesian Data Analysis
- STAT 4350.03: Applied Multivariate Analysis
- STAT 4370.03: Stochastic Processes
- STAT 4390.03: Time Series Analysis
- STAT 4620.03: Data Analysis
- STAT 4690.03: Computational Statistics

BSc (120 credit hour) Major in Actuarial Science

The 120 credit hour major is suited to students who want to focus on *Actuarial Science* and prepare for sitting the Society of Actuaries examinations, but wish to have a program that is somewhat less constrained than the Honours program.

Departmental requirements

In addition to fulfilling the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections of the calendar, students in a BSc **Major program in Actuarial science** must complete the following courses:

1000 level

- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II or MATH 1215.03: Life Sciences Calculus/MATH 1010.03: Differential and Integral Calculus II or MATH 1500X/Y: Calculus
- MATH 1030.03: Matrix Theory and Linear Algebra
- ECON 1101.03: Principles of Microeconomics/ECON 1102.03: Principles of Macroeconomics

2000 level

- CSCI 2202.03: Computer modelling for scientists
- MATH 2001.03: Intermediate Calculus I
- MATH 2040.03: Matrix Theory and Linear Algebra II or MATH 2135.03: Linear Algebra
- STAT 2060.03: Introduction to Probability and Statistics
- STAT 2080.03: Statistical Methods for Data Analysis and Inference
- STAT 2450.03: Introduction to Data Mining with R
- STAT 2600.03 Theory of Interest/MATH 2600.03: Theory of Interest

3000 level

- STAT 3340.03: Regression Analysis
- STAT 3360.03: Probability
- STAT 3460.03: Intermediate Statistical Theory
- ACSC 3703.03/STAT 3703.03: Actuarial Models I
- ACSC 3720.03/STAT 3720.03: Life Contingencies I

Choices

Two of the following courses:

- ACSC 3740.03: Predictive Analysis
- ACSC 4703.03/STAT 4703.03: Actuarial Models II

- ACSC 4720.03/STAT 4720.03: Life Contingencies II

One of the following course:

- STAT 3450.03: Statistical learning with R
- STAT 4350.03: Applied Multivariate Analysis
- STAT 4390.03: Time Series Analysis
- STAT 4620.03: Date Analysis

BSc or BA (120 credit hour) Double Major in Actuarial Science and another subject

The Double Major degree program allows students to combine a study of *Actuarial Science* with another subject. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. *Actuarial Science* may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

Students enrolled in a Double Major program must have their program of study approved by advisors in both subject areas.

Departmental requirements

Students in a BSc or BA **Double Major in Actuarial Science** and another subject must fulfill the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections of this calendar.

The required actuarial science and statistics courses at or above the 2000 level are the following:

2000 Level

- CSCI 2202.03: Computer modelling for scientists
- MATH 2001.03: Intermediate Calculus I
- MATH 2040.03: Matrix Theory and Linear Algebra II or MATH 2135.03: Linear Algebra
- STAT 2060.03: Introduction to Probability and Statistics
- STAT 2080.03: Statistical Methods for Data Analysis and Inference
- STAT 2450.03: Introduction to Data Mining with R
- STAT 2600.03: Theory of Interest/MATH 2600.03: Theory of Interest

3000 Level

- STAT 3340.03: Regression and Analysis of Variance
- STAT 3360.03: Probability
- STAT 3460.03: Intermediate Statistical Theory
- ACSC 3703.03/STAT 3703.03: Actuarial Models I
- ACSC 3720.03/STAT 3720.03: Life Contingencies I

Choices

Two of the following courses:

- ACSC 3740.03: Predictive Analytics
- ACSC 4703.03/STAT 4703.03: Actuarial Models II
- ACSC 4720.03/STAT 4720.03: Life Contingencies II

One of the following courses:

- STAT 3450.03: Statistical learning with R
- STAT 4350.03: Applied Multivariate Analysis
- STAT 4390.03: Time Series Analysis
- STAT 4620.03: Data Analysis

Electives

In addition to the above courses, you must take ACSC courses satisfying the following requirements:

- 60-84 credit hours at or above the 2000 level between the two majors subjects, with 30-48 in each subject.

If there is overlap between your other subject, you may need to take additional elective courses in Actuarial Science. The elective courses can be chosen from any of the courses listed above, or from the following courses, or any courses that are specified as Actuarial Science electives in any future version of the University Calendar prior to the time of your graduation.

2000 Level

- MATH 2052.03: Introduction to Numerical Programming
- MATH 2120.03: Methods for Ordinary Differential Equations
- MATH 2300.03: Mathematical Modelling
- MATH 2505.03: Introductory Analysis
- STAT 2430.03: Data Visualization

3000 Level

- MATH 3120.03: Differential Equations
- MATH 3210.03: Introduction to Numerical Analysis
- MATH 3260.03: Applied Differential Equations
- MATH 3300.03: Optimization
- MATH 3400.03: Classical Game Theory
- MATH 3501.03: Intermediate Analysis I
- MATH 3502.03: Intermediate Analysis II
- MATH 3900.03: Financial Mathematics

4000 Level

- MATH 4010.03: Introduction to Measure Theory and Integration
- MATH 4140.03: Introduction to Functional Analysis
- MATH 4540.03: Applied Analysis
- STAT 4100.03: Survival Analysis
- STAT 4130.03: Bayesian Data Analysis
- STAT 4370.03: Stochastic Processes
- STAT 4390.03: Time Series Analysis
- STAT 4620.03: Data Analysis
- STAT 4690.03: Computational Statistics

Minor in Actuarial Science

(for students in 120 credit hour programs other than Actuarial science)

Students in other 120 credit hour degree programs may choose to include a Minor in *Actuarial science* in their program. Students taking a Minor in *Actuarial science* may also consider to take the Certificate in Actuarial and Financial Mathematics.

Departmental Requirements

A minimum of 18 credit hours in *Actuarial Science* courses at the 2000 level or higher. It is possible to count Mathematics or Statistics courses towards these requirements, so long as they are not counted towards a candidate's Major or Honours subject.

A minor degree in Actuarial Science must include the following courses:

- STAT 2600.03/MATH 2600.03: Theory of Interest
- STAT 3360.03/MATH 3360.03: Probability

Plus at least two of

- ACSC 3703.03/STAT 3703.03: Actuarial Models I
- ACSC 3720.03/STAT 3720.03: Life Contingencies I
- ACSC 4703.03/STAT 4703.03: Actuarial Models II
- ACSC 4720.03/STAT 4720.03: Life Contingencies II

The remaining credit hours can be chosen from any ACSC, STAT or MATH courses at or above the 2000 level.

Diploma in Actuarial Science

(30 credit hours)

Students with a general 90 credit hour BSc degree in Mathematics, Statistics, Economics, or another quantitative discipline, may apply for admission into a Diploma in Actuarial Science program, provided they have completed the appropriate Mathematics and Statistics courses. A strong background in Mathematics and Statistics is necessary, and courses taken should cover multidimensional calculus (equivalent to MATH 2001: Intermediate Calculus I), matrix theory (equivalent to MATH 2030: Matrix Theory and Linear Algebra I), basic probability theory (equivalent to STAT 2060: Introduction to Probability and Statistics) and introductory R programming (equivalent to STAT 2450: Introduction to Data mining with R).

Departmental requirements

- STAT 2080.03: Statistical Methods for Data Analysis and Inference
- STAT 2600.03/MATH 2600.03: Theory of Interest
- STAT 3340.03: Regression and Analysis of Variance
- STAT 3360.03: Probability
- STAT 3460.03: Intermediate Statistical Theory
- ACSC 3703.03/STAT 3703.03: Actuarial Models I
- ACSC 3720.03/STAT 3720.03: Life Contingencies I
- Two of the following courses:
 - ACSC 3740.03/STAT 3740.03: Predictive Analytics
 - ACSC 4703.03/STAT 4703.03: Actuarial Models II
 - ACSC 4720.03/STAT 4720.03: Life Contingencies II
- One of the following courses:
 - STAT 3450.03: Statistical learning with R
 - STAT 4350.03: Applied Multivariate Analysis
 - STAT 4390.03: Times Series Analysis
 - STAT 4620.03: Date Analysis

In cases that students have already taken some of the above courses prior to entering the program, in consultation with the Actuarial Science undergraduate academic advisor, students can choose other same level ACSC, STAT or MATH courses as substitute courses to fulfil the total credit hour requirement.

After completion of the diploma program, students will be prepared to write most of the Society of Actuarial examinations.

Minors and Certificates for Actuarial Science Students

Minors available to students in Actuarial Science

Minor programs allow students to develop subject specialities in addition to their Major or Honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs. Students in a BSc or BA (120 credit hour) program in *Actuarial Science* may choose to include a Minor selected from the list of approved [Minors](#) in this Calendar. Courses counted toward a Major or

Honours subject cannot be used to fulfill the requirements of a Minor program. Minor subjects in Economics or Commerce are highly recommended subjects for Actuarial Science major students.

Certificates

In combination with a BSc or BA in Actuarial Science, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the **Certificate Coordinator** to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of [Faculty of Science Certificates](#) and requirements can be found in *the Faculty of Science* section of this calendar. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the [College of Arts and Science Degree Requirements](#) section of the calendar.

Certificates of particular interest to student enrolled in a BSc or BA in Actuarial science include:

- Certificate in Applied and Computational Mathematics
- Certificate in Data Science

Course Descriptions

ACSC 3703 Actuarial Models I

CREDIT HOURS: 3

This class builds on the material in STAT 3360 to develop the theoretical basis for construction and evaluation of actuarial models. Topics covered include survival models, probability distributions, deductibles and limits, and aggregate loss models, with application to insurance.

PREREQUISITES: STAT 3360.03 OR MATH 3360.03 or permission of instructor

CROSSLISTED: STAT 3703.03

EXCLUSIONS: STAT 4701.03

ACSC 3720 Life Contingencies I

CREDIT HOURS: 3

This course introduces the student to the mathematical models for valuation of life contingencies (e.g. life insurance policies). The course covers both the statistical aspects of modelling survival data, and the financial aspects of valuing uncertain future cash-flows.

PREREQUISITES: STAT 3360.03/MATH 3360.03 and STAT 2600.03/MATH 2600.03

CROSSLISTED: STAT 3720.03

ACSC 3740 Predictive Analytics

CREDIT HOURS: 3

This course teaches students to analyze data in a real-world context, going through all stages of the data analysis: problem formulation; initial data exploration; model selection and validation; and communication of results. It is intended that this course should prepare students for the Society of Actuaries Predictive Analytics examination.

COREQUISITES: Stat/Math 3340

PREREQUISITES: STAT 2450

CROSSLISTED: STAT 3740

FORMATS: Lecture

ACSC 3750 Credibility Theory

CREDIT HOURS: 3

Credibility theory deals with the difficulty in combining information from two samples, one of which is small ver relevant, the other is large but less relevant. In this course, we will study different approaches to dealing with this problem.

COREQUISITES: STAT 3703.03/ACSC 3703.03

PREREQUISITES: STAT 3360.03 or MATH 3360.03

CROSSLISTED: STAT 3750.03

ACSC 4703 Actuarial Models II

CREDIT HOURS: 3

This course focuses on the development of statistical methods for the estimation and validation of actuarial models. Topics to be discussed include: methods of estimation, properties of estimators, goodness of fit, credibility theory, survival estimators, measures of risk, estimation of severity.

PREREQUISITES: STAT 3703.03 or ACSC 3703.03

ACSC 4720 Life Contingencies II

CREDIT HOURS: 3

STAT 3720.03 covers the basics of life contingencies in a simple standard situation. In this course we extend this to deal with a number of common additional features that affect life insurance policies. We introduce multiple-state models, pensions, and profit testing.

PREREQUISITES: STAT 3720.03 or ACSC 3720.03

CROSSLISTED: STAT 4720.03

FORMATS: Lecture

ACSC 4950 Honours Research Project

CREDIT HOURS: 3

A requirement for the actuarial science honours degree, this course consists of a research project under the supervision of a faculty member in the department. The project will be submitted as a written report. Students wishing to enroll in this class must obtain permission from the Actuarial Science honours advisor.

Biochemistry and Molecular Biology

Location:

Sir Charles Tupper Medical Building

5850 College Street

9th Floor

PO BOX 15000

Halifax NS

B3H 4R2

Phone Number: (902) 494-6436

Fax Number: (902) 494-1355

Email Address: bioc@dal.ca

Website: biochem.dal.ca

Introduction

Biochemistry is the study of biological function at the molecular level. Although biochemical processes follow the basic laws of physics and chemistry, living organisms, because of their complexity, operate on a set of distinct principles that are not found in simple isolated chemical systems. The goal of biochemistry is to elucidate these principles. The department offers an integrated series of courses that will provide students with an up-to-date view of modern biochemistry and molecular biology ranging from evolution of genomes to structure-function relationships in macromolecules to the dynamic aspects of metabolism. The core programs can be adapted to emphasize different biochemical specialties such as structural biology, metabolism, molecular biology and cell signaling. Students wishing to pursue advanced studies in related sciences can include courses in Physiology, Pharmacology and/or Pathology in their programs. Greater flexibility is available in combined degree programs of Biochemistry and Molecular Biology with another subject; most often with Chemistry, Microbiology, Biology, Neuroscience, Psychology or Environment, Sustainability and Society. Specific programs developed with the Department of Microbiology and Immunology provide coordinated studies of metabolism, enzymology and molecular biology with bacteriology, virology and immunology. These programs provide the foundation for molecular genetics, genetic engineering, biotechnology, biomedical research and medicine.

Laboratory Exercises: Some of the courses offered by the Department of Biochemistry and Molecular Biology include a laboratory component. The laboratory exercises provide an opportunity to develop laboratory skills, as well as to illustrate the theoretical principles taught in course. This process culminates in fourth year, with a supervised research project required for Honours Biochemistry and Molecular Biology students. Although no exercise involves live animals, experiments may use materials derived from animal sources, as well as from plants and micro-organisms. Laboratory experiments will often be performed in groups, but writing of reports is expected to be an individual effort, meeting the guidelines on plagiarism set out in the [University Regulations](#) in the Calendar and the Department Policy on Plagiarism.

Degree Programs

The Department offers the following degree programs in Biochemistry and Molecular Biology

- BSc (120 credit hour) Honours (Concentrated)*
- BSc (120 credit hour) Combined Honours*
- BSc (120 credit hour) Major*

- BSc (120 credit hour) Double Major*
- BSc (90 credit hour) Minor in Biochemistry and Molecular Biology
- Minor in Biochemistry and Molecular Biology

* BSc Co-op option available (see below)

* May be combined with Minors from other disciplines

Departmental Requirements for each degree program can be seen by following the links in the menu to the right and in the Undergraduate Handbook, available on the departmental website <https://medicine.dal.ca/departments/department-sites/biochemistry-molecular-biology/programs/undergraduate.html>. In addition to departmental requirements, students must satisfy the requirements outlined in the [Academic Regulations](#) and the [College of Arts and Science Degree Requirements](#) sections.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Students applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully. It is recommended that students considering an Honours or Major program consult with a Biochemistry and Molecular Biology Academic Advisor prior to registering for second year classes.

Students who participated in the Integrated Science Program in their first year should consult the Undergraduate Calendar for first year course equivalencies. The following options fulfill the first year requirements for any Biochemistry and Molecular Biology program:

- SCIE 1515.36
- SCIE 1520.30
- SCIE 1540.27
- SCIE 1505.18

Instructor

Xiong, S., BSc (Manitoba), PhD (Toronto)

BSc (120 credit hour) Concentrated Honours in Biochemistry and Molecular Biology

Students who want a challenging program that results in a broad and in-depth background in Biochemistry and Molecular Biology, and includes an independent research experience, may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours. Honours students complete a minimum of 54 credit hours above the 1000 level in Biochemistry and Molecular Biology subject courses, with a minimum GPA of 3.0, and write a research-based Honours thesis. The Honours thesis and Qualifying Examination requirements are satisfied through completion of BIOC 4604.03/BIOC 4605.03. Because Biochemistry and Chemistry are closely interwoven both conceptually and experimentally, the list of required courses includes both subjects. Additional chemistry courses beyond those required for the honours degree may be taken as electives.

A Co-op option is available for students enrolled in a BSc Concentrated Honours in Biochemistry and Molecular Biology. See [Co-operative Education Program](#).

Admission to Honours

Students who wish to enrol in a Biochemistry and Molecular Biology Honours program should apply for admission after their second year Fall term grades are in. To be admitted, students must have

- Consulted with a Departmental Academic advisor
- Minimum grades of B- in BIOL 1010, BIOL 1011, CHEM 1011 and CHEM 1012 (or equivalents)

Departmental Requirements

In addition to fulfilling the requirements outlined in [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#), students in a BSc Concentrated Honours program in Biochemistry and Molecular Biology must complete the following courses:

1000 level

- BIOL 1010.03: Principles of Biology Part I/BIOL 1011.03: Principles of Biology Part II or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution/BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology (minimum grade of "B-")
- CHEM 1011.03 Concepts in Chemistry/CHEM 1012.03: Concepts in Chemistry: Structure and Reactivity (minimum grade of "B-")
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus
- MATH 1010.03: Differential and Integral Calculus II or MATH 1030: Matrix Theory/Linear Algebra I or STAT 1060.03: Introductory Statistics for Science and Health Sciences

Or Integrated Science Program

2000 level

- BIOC 2300.03: Introduction to Biochemistry and BIOC 2610.03: Introductory Biochemistry Lab
- BIOL 2020.03: Cell Biology and BIOL 2030.03: Genetics and Molecular Biology
- CHEM 2401.03: Introductory Organic Chemistry: Structure, Concepts of Mechanisms and Spectroscopy and CHEM 2402.03: Introductory Organic Chemistry: Reactivity of Functional Groups
- CHEM 2201.03: Introductory Analytical Chemistry

3000 level

- BIOC 3300.03: Intermediary Metabolism
- BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology
- CHEM 3601.03: Chemistry of Living Systems or one course in Biochemistry at or above the 3000 level
- BIOC 3700.03: Biomolecular Chemistry

4000 level

- BIOC 4604.03: Research Project I and BIOC 4605.03: Research Project II (Honours Thesis)
- Nine credit hours from BIOC 40XX, 43XX, 44XX, 45XX, 47XX
- Six additional credit hours of BIOC at the 4000 level

Other requirements:

A pass is required in the Honours Qualifying examination. Students should ensure that they enrol in any 2000 or 3000 level courses that are prerequisites for advanced courses they intend to take (see calendar entries).

BSc (120 credit hour) Combined Honours in Biochemistry and Molecular Biology and another subject

Students who wish to study Biochemistry and Molecular Biology in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Biochemistry and Molecular Biology may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject.

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. The same standards and conditions for admission apply as for entry into a Concentrated Honours program (see above). In addition, students must have their program of study approved by Academic Advisors in both subject areas. Students must complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Biochemistry and Molecular Biology, this requirement is satisfied through BIOC 4604.03/BIOC 4605.03: Research Project.

A Co-op option is available for students enrolled in BSc Combined Honours with Biochemistry and Molecular Biology as the primary subject. See Co-operative Education Program below.

Departmental Requirements

In addition to fulfilling the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#), students in a Combined Honours program in Biochemistry and Molecular Biology and another subject must complete the following:

Biochemistry and Molecular Biology as the primary or secondary subject

1000 level

- 1000 level as for [Concentrated Honours](#), except MATH 1000: Differential and Integral Calculus I and MATH 1010: Differential and Integral Calculus II required if Chemistry is the other subject

2000 level

- BIOC 2300.03: Introduction to Biochemistry and BIOC 2610.03: Introductory Biochemistry Lab
- BIOL 2020.03: Cell Biology and BIOL 2030.03: Genetics and Molecular Biology
- CHEM 2401.03: Introductory Organic Chemistry: Structure, Concepts of Mechanisms and Spectroscopy and CHEM 2402.03: Introductory Organic Chemistry: Reactivity of Functional Groups

3000 level

- BIOC 3300.03: Intermediary Metabolism
- BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology
- BIOC 3700.03: Biomolecular Chemistry
- Three additional credit hours of BIOC at or above the 3000 level if Biochemistry & Molecular Biology is the second subject

4000 level

- Six credit hours from BIOC 40XX, 43XX, 44XX, 45XX, 47XX
- BIOC 4604.03: Research Project I and BIOC 4605.03: Research Project II (if Honours thesis and qualifying exam are in Biochemistry)

Consult an Undergraduate advisor for recommended courses of study.

BSc (120 credit hour) Major in Biochemistry and Molecular Biology

The 120 credit hour Major is suited to students who want to focus on Biochemistry and Molecular Biology, but wish to have a program that is somewhat less constrained than the Honours program. Biochemistry and Molecular Biology Majors complete a minimum of 45 credit hours in program courses above the 1000 level. Research and other experiential learning opportunities are available through laboratories, and through direct research and experiential classes. Although Dalhousie University does not require formal application for its 120 credit hour Major programs, this Department requires that all those registering with a view to completing such a degree must first consult with an undergraduate advisor from the Department of Biochemistry and Molecular Biology.

A Co-op option is available for students enrolled in a 120 credit hour BSc Major program in Biochemistry and Molecular Biology. See [Co-operative Education Program](#).

Departmental Requirements

In addition to fulfilling the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#), students in a Major program in Biochemistry and Molecular Biology must complete the following:

1000 level

- BIOL 1010.03: Principles of Biology Part I/BIOL 1011.03: Principles of Biology Part II or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution/BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology (minimum grade of "B-")
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium (minimum grade "B-")
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus
- MATH 1010.03: Differential and Integral Calculus II or MATH 1030: Matrix Theory/Linear Algebra I or STAT 1060.03: Introductory Statistics for Science and Health Sciences

Or Integrated Science Program

2000 level

- BIOC 2300.03: Introduction to Biochemistry and BIOC 2610.03: Introductory Biochemistry Lab
- BIOL 2020.03: Cell Biology and BIOL 2030.03: Genetics and Molecular Biology
- CHEM 2401.03: Introductory Organic Chemistry: Structure, Concepts of Mechanisms and Spectroscopy and CHEM 2402.03: Introductory Organic Chemistry: Reactivity of Functional Groups
- CHEM 2201.03: Introductory Analytical Chemistry

3000 level

- BIOC 3300.03: Intermediary Metabolism
- BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology
- BIOC 3700.03: Biomolecular Chemistry
- Nine additional credit hours in BIOC at or above the 3000 level

4000 level

- Six credit hours in BIOC at the 4000 level

BSc (120 credit hour) Double Major in Biochemistry and Molecular Biology and another subject

The Double Major degree program allows students to combine a study of Biochemistry and Molecular Biology with another subject. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Biochemistry and Molecular Biology may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

It is recommended that students enrolled in a Double Major program seek advice from advisors in both subject areas.

A Co-op option is available for students enrolled in BSc Double Major with Biochemistry and Molecular Biology as the primary subject. See [Co-operative Education Program](#).

Departmental Requirements

In addition to fulfilling the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#), students in a Double Major program in Biochemistry and Molecular Biology and another subject must complete the following set of core courses:

1000 level

- BIOL 1010.03: Principles of Biology Part I/BIOL 1011.03: Principles of Biology Part II or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution/BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology (minimum grade of "B-")
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium (minimum grade of "B-")
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus
- MATH 1010.03: Differential and Integral Calculus II or MATH 1030: Matrix Theory/Linear Algebra I or STAT 1060.03: Introductory Statistics for Science and Health Sciences

Or Integrated Science Program

2000 level

- BIOC 2300.03: Introduction to Biochemistry and BIOC 2610.03: Introductory Biochemistry Lab
- BIOL 2020.03: Cell Biology and BIOL 2030.03: Genetics and Molecular Biology
- CHEM 2401.03: Introductory Organic Chemistry: Structure, Concepts of Mechanisms and Spectroscopy and CHEM 2402.03: Introductory Organic Chemistry: Reactivity of Functional Groups

3000 level

- BIOC 3300.03: Intermediary Metabolism

- BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology
- BIOC 3700.03: Biomolecular Chemistry
- Three additional credit hours of BIOC at or above the 3000 level

4000 level

- Six credit hours of BIOC at the 4000 level

The same set of core courses is required in a Double Major with Biochemistry and Molecular Biology as the primary or secondary subject.

BSc (90 credit hour) Minor in Biochemistry and Molecular Biology

The 90 credit hour degree with Minor in Biochemistry and Molecular Biology is appropriate for students who want to study some Biochemistry and Molecular Biology but do not wish to complete the conventional four-year program. The degree is best suited for students who want a general science degree with some specialization in Biochemistry and Molecular Biology. A 90 credit hour degree program is not suitable for students who wish to pursue graduate studies. With additional study, the degree may be upgraded to a 120 credit hour Major or Honours degree at a later date.

See the [Minor in Biochemistry and Molecular Biology](#) section of this Calendar.

Minor in Biochemistry and Molecular Biology

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Requirements

- A minimum of 18 credit hours in Biochemistry (BIOC) courses at the 2000 level or higher to a maximum of 36 credit hours.

Please note that there are prerequisite requirements for entry into upper level Biochemistry (BIOC) courses. Some non-BIOC courses such as BIOL 2020.03: Cell Biology, BIOL 2030.03: Genetics and Molecular Biology, CHEM 2401.03: Introductory Organic Chemistry: Structure, Concepts of Mechanisms and Spectroscopy and CHEM 2402.03: Introductory Organic Chemistry: Reactivity of Functional Groups are required for the Biochemistry and Molecular Biology degree programs. These non-BIOC courses cannot be counted as part of the 18 credits hours in BIOC required for a minor.

Contact [Biochemistry and Molecular Biology](#) for more information.

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Co-operative Education Program in Biochemistry and Molecular Biology

Co-op Academic Advisor: Dr. H-S. Ro, Email: Hyo-Sung.Ro@dal.ca

Cooperative Education (Co-op) is a program where academic study in a science subject is combined with paid career-related work experience. Students undertake three work-terms interspersed with their academic study terms. Co-op degree programs enable students to apply their knowledge directly while providing them with work experience that assists in making educated career choices.

Co-op is available to students in BSc (120 credit hour) Honours or Major programs in Biochemistry and Molecular Biology, or in Combined Honours or Double Major programs with Biochemistry and Molecular Biology as the primary subject. The number of students admitted into Co-op each year is limited. A minimum GPA of 3.00 is required for admission and for continuation in the Co-op program. Students must be eligible to work in Canada.

Students normally apply to join Co-op during their first year of study. Students must apply before April 15, and it is strongly recommended that interested students meet with their Departmental Co-op advisor early in the Winter term of their first year. If

accepted into Co-op, students must register for, and attend the Science Co-op Seminar Series (SCIE 2800.00) in the Fall term of the year they join.

Details are available from the Biochemistry and Molecular Biology Co-op Academic Advisor and from the Co-operative Education office www.dal.ca/academics/cooperative_education.html. For more information on Co-op Education in Biochemistry and Molecular Biology, please see the Departmental webpage https://www.dal.ca/faculty/site/disciplines/science/biochemistry_molecular_biology.html.

Minors available to students in Biochemistry and Molecular Biology

Minor programs allow students to develop subject specialties in addition to their major or honours subjects. Minors in other subjects are normally added to 120 credit hour programs (including Co-op).

Students in a BSc (120 credit hour) program in Biochemistry and Molecular Biology may choose to include a Minor selected from the [list of approved Minors](#). Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc in Biochemistry and Molecular Biology, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of Faculty of Science Certificates and requirements can be found at [Faculty of Science - Certificates](#). Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the [College of Arts and Science Degree Requirements](#) section.

Certificates of particular interest to students enrolled in a Major or Honours program in Biochemistry and Molecular Biology include:

- Certificate in Data Analytics
- [Certificate in Genetics](#)
- [Certificate in Medicinal Chemistry](#)

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

Course Notes

The Department also teaches students in Dentistry, Medicine and Nursing; these courses are described in the appropriate sections of the Calendar.

Other Courses

The following courses given by other departments may be taken as a Biochemistry and Molecular Biology course toward BSc Biochemistry and Molecular Biology degrees. See course descriptions in relevant section of this calendar.

Chemistry - CHEM 3601.03, CHEM 4601.03

Microbiology - MICI 4033.03

Pharmacology - PHAC 4403.03 as BIOC 4XXX, PHAC 4409.03 as an elective only.

Note: CHEM 3601.03 is considered to be BIOC 3000-level courses, and CHEM 4601.03, MICI 4033.03 and PHAC 4403.03 to be BIOC 4000-level courses when taken as part of Biochemistry and Molecular Biology Major and Honours degree programs. These courses, in addition to required non-BIOC 2000-level courses (BIOL 2020, BIOL 2030, CHEM 2401, CHEM 2402), cannot be counted towards the 18 credit hours in BIOC required for a Minor in Biochemistry and Molecular Biology.

Course Descriptions

BIOC 1420 Introductory Biochemistry for Nursing Students

CREDIT HOURS: 3

Topics discussed include the structure, biosynthesis and functions of biologically important compounds, enzymes, control of metabolism, genetic engineering and nutrition. Medical aspects are stressed.

CALENDAR NOTES: This course cannot be used as a prerequisite for any other biochemistry course and is not normally accepted by Faculties of Dentistry or Medicine in fulfilment of the requirement of a biochemistry course for admission.

RESTRICTIONS: This class is restricted to students in the BScN and BHSc programs.

FORMATS: Lecture

BIOC 2300 Introduction to Biochemistry

CREDIT HOURS: 3

This course surveys basic topics and concepts of Biochemistry. The structures, properties and metabolic inter-relations of proteins, carbohydrates and lipids are considered together with an introduction to nutrition and metabolic control. Although mammalian examples predominate some consideration of special aspects of biochemistry of microbes and plants is included.

CALENDAR NOTES: Students are advised to also take CHEM 2401.03 and CHEM 2402.03

PREREQUISITES: BIOL 1010.03 (or equivalent), CHEM 1011.03 (or equivalent) and CHEM 1012.03 (or equivalent); all with grades of C or higher, or instructor's consent.

EXCLUSIONS: BIOC 2200.03

FORMATS: Lecture

BIOC 2610 Biochemistry Laboratory Methods & Techniques

CREDIT HOURS: 3

An introduction to fundamental techniques in Biochemistry through the exploration of the properties of essential biomolecules. This course is intended for students in Biochemistry & Molecular Biology and Microbiology & Immunology Programs.

COREQUISITES: BIOC 2300.03 and CHEM 2401.03 and CHEM 2402.03 or instructor's consent

PREREQUISITES: BIOL 1010.03 and 1011.03 (or equivalent), CHEM 1011.03 and 1012.03 (or equivalent), all with grades of B- or higher; or instructor's consent. CHEM 2201.03 is recommended but not required.

EXCLUSIONS: BIOC 2200.03

FORMATS: Lab

BIOC 3300 Intermediary Metabolism

CREDIT HOURS: 3

This course covers synthesis and catabolism of carbohydrates, lipids and some nitrogen compounds. Metabolic regulation is emphasized, including factors influencing the rate at which compounds flow through selected pathways. Compartmentalization of, inter-relationships between and environmental impact on metabolic pathways are considered. Laboratory exercises examine the techniques used to study metabolic pathways. COORDINATOR: B. Karten

PREREQUISITES: BIOC 2300.03 and BIOC 2610.03 (both with grades of B- or higher) and BIOL 2020.03 and BIOL 2030.03 and CHEM 2401.03 and CHEM 2402.03, or instructor's consent

FORMATS: Lecture | Lab

BIOC 3400 Nucleic Acid Biochemistry and Molecular Biology

CREDIT HOURS: 3

This course focuses on the relationship of structure to function in RNA and DNA. Methods for studying the primary, secondary, and tertiary structures of nucleic acids are explored in lectures and in the laboratory. Topics covered include enzymic mechanisms for biosynthesis, rearrangement, degradation, and repair of nucleic acid molecules, and processes of replication, transcription, and translation. Nucleic acid biochemistry is emphasized as a basis for understanding storage and transfer of biological information. COORDINATOR: P. Liu

PREREQUISITES: BIOL 2020.03 and BIOL 2030.03 (both with grades of B- or higher); CHEM 2401.03 and CHEM 2402.03; BIOC 2300.03 and BIOC 2610.03; or instructor's consent

FORMATS: Lecture | Lab

BIOC 3501 Introduction to Biotechnology

CREDIT HOURS: 3

Topics covered include (1) the history and scope of biotechnology, (2) genetic, molecular and analytical approaches central to biotechnology, (3) production of macromolecules and small molecules using cells of biological materials, (4) detection of molecules using cells or biological materials, (5) biotechnology in Atlantic Canada, and (6) responsibilities in biotechnology.

CALENDAR NOTES: 1. Does not count as a Biochemistry & Molecular Biology credit towards a Major or Honours in Biochemistry & Molecular Biology, but can be taken as a general elective. 2. Can be counted towards a Minor in Biochemistry & Molecular Biology

COREQUISITES: N/A

PREREQUISITES: BIOC 2300 AND BIOL 2020 AND BIOL 2030; or Instructor's permission

CROSSLISTED: N/A

RESTRICTIONS: None, although this BIOC course will not count as a BIOC credit toward a Major or Honours in Biochemistry & Molecular Biology

EXCLUSIONS: None

FORMATS: Lecture

BIOC 3610 Research Methods in Biomedical Sciences

CREDIT HOURS: 3

An introduction to key laboratory methods in biochemistry is presented, along with relevant theory and applications. Topics include liquid handling, protein chemistry, small molecule assays, data analysis and data management. Current context and emerging methodologies are introduced by guest speakers.

CALENDAR NOTES: This course does not count as a Biochemistry & Molecular Biology credit towards any degree with a Major or Honours in Biochemistry & Molecular Biology, but it can be counted towards a Minor In Biochemistry & Molecular Biology. Priority for enrollment will be given to students registered in the B.Sc. (Medical Sciences) program

PREREQUISITES: CHEM 2401.03, CHEM 2402.03, BIOC 2300.03, BIOL 2020.03 and BIOL 2030.03, all with grades of B- or higher; or instructor's permission.

FORMATS: Lecture | Lab

BIOC 3620 Experiential Learning in Biochemistry and Molecular Biology

CREDIT HOURS: 3

This course is an outside the classroom learning experience in which the student works in a research laboratory an average of one day per week acquiring biochemistry or molecular biology knowledge and skills. COORDINATOR: H-S. Ro

CALENDAR NOTES: To register in this course, students must first find a faculty member from the Department of Biochemistry & Molecular Biology willing to supervise the work experience and sign a learning agreement with the supervisor.

PREREQUISITES: BIOC 2300.03, BIOC 2610.03, BIOL 2020.03, BIOL 2030.03 (all with a grade of B- or higher), CHEM 2401.03 and CHEM 2402.03.

EXCLUSIONS: The following may not be used towards BIOC 3620: lab work that is part of another scheduled course at a learning institution, study that would qualify for Special Topics courses, co-op work terms, and paid work. The class is only open to students registered in Biochemistry & Molecular Biology Degree programs, either Major or Honours, combined or concentrated. Students may not take BIOC 3620 concurrently with BIOC 4604 or BIOC 4605.

FORMATS: Lab

BIOC 3700 Biomolecular Chemistry

CREDIT HOURS: 3

This course covers structural and functional properties of biomolecules, including the physical bases for their characterization, thermodynamic principles of protein folding and biomolecular interactions, and the kinetics and mechanisms of enzyme catalysis.

PREREQUISITES: BIOC 2300.03, BIOC 2610.03, CHEM 2401.03 and CHEM 2402.03 (all with a grade of B- or higher), AND MATH 1000.03 or MATH 1215.03; or, instructor's consent. CHEM 2201.03 is highly recommended but not required.

EXCLUSIONS: BIOC 3200.03

FORMATS: Lecture | Lab

BIOC 4001 Special Topics in Biochemistry

CREDIT HOURS: 3

Students interested in topics not covered in formal courses may ask the department for special courses to meet their needs. An Undergraduate Advisor will assist students to ascertain if faculty expertise is available to direct reading and the preparation of papers and seminars in a particular subject area.

COORDINATOR: J. Rainey

PREREQUISITES: BIOC 3300.03, BIOC 3400.03, and BIOC 3700.03 (average of B or higher and consent of coordinator)

BIOC 4010 Bioinformatics

CREDIT HOURS: 3

This course presents the theory and practice of bioinformatics. Topics include: rate of mutation, sequence alignment, database searching, phylogenetic analysis, bioinformatic tools for analyzing genes, genomes and proteins.

PREREQUISITES: BIOC 3400.03 or instructor's consent

CROSSLISTED: BIOC 5010.03

BIOC 4027 Molecular Mechanisms of Cancer

CREDIT HOURS: 3

The multi-step nature of 'carcinogenesis' is the focus of this course. This course dissects the role of oncogenes, tumor suppressors, cell death and survival, differentiation, angiogenesis, metastasis, inflammation, and anticancer immunity in cancers. Major research techniques routinely used in cancer research are discussed to fully understand the process of cancer development, progression and persistence.

PREREQUISITES: Minimum grades of B+ in a 3000 level Biochemistry class and another 3000 level Biochemistry, Microbiology or Pathology class.

Permission of instructor required

CROSSLISTED: PATH 5027.03 and MICI 5027.03/4027.03

FORMATS: Lecture | Discussion

BIOC 4302 Biochemistry and Cell Biology of Lipids and Membranes

CREDIT HOURS: 3

This course discusses (1) the influence of lipids on membrane structure and function, (2) lipid metabolism and inborn errors that cause human disease, (3) the intra- and extra-cellular transport of lipids and contribution to cell physiology and (4) the role of lipids in specialized physiological and cell signaling pathways.

PREREQUISITES: BIOC 3300.03

FORMATS: Lecture

BIOC 4305 Mechanisms of Signal Transduction

CREDIT HOURS: 3

The emphasis of this course is to introduce concepts and key mediators of signal transduction. Topics include protein kinases, tumour suppressors, oncogenes, G-protein coupled receptors, calcium signalling, lipids in signalling, integration of signalling cascades, cytoskeletal reorganization, cellular metastasis, apoptosis, anoikis, genomic stability, and stem cell biology.

PREREQUISITES: BIOC 3300.03 or instructor's consent

EXCLUSIONS: BIOC 4301.03

FORMATS: Lecture

BIOC 4306 Nutritional Biochemistry

CREDIT HOURS: 3

Appropriate nutrition is essential for health and reflects the basic biochemistry of the organism. Changes in the human diet can impact health and disease. This course considers the principles of optimal nutrition in a biochemical context and the role of nutrition in disease etiology and treatment.

PREREQUISITES: BIOC 3300.03, BIOC 3400.03, BIOC 3700.03 or instructor's permission

FORMATS: Lecture | Other (explain in comments)

BIOC 4403 Genes and Genomes

CREDIT HOURS: 3

This course discusses the organization of genes into genomes. It deals with (i) compartmentalization of genetic material in nuclear and organellar genomes, (ii) the structure, behaviour and origins of components of both nuclear and organellar genomes which are not genes (transposable and other repetitive elements, introns), (iii) genetic and physical methods for mapping genomes, and (iv) the significance of genetic organization and higher order chromosomal structure and function. The methodology and prospects of genomics are discussed at some length.

PREREQUISITES: BIOC 3400.03 or BIOL 3046.03 or instructor's consent

CROSSLISTED: BIOC 5403.03

FORMATS: Lecture

BIOC 4404 Gene Expression

CREDIT HOURS: 3

This course is centered around the central dogma that genetic information is passed from DNA to RNA to protein. We focus on the different mechanisms that regulate this flow of information in prokaryotic and eukaryotic cells. Specific topics include transcription, translation, chromatin, epigenetics, and non-coding RNA.

PREREQUISITES: BIOC 3400.03 or instructor's consent

EXCLUSIONS: BIOC 5404.03

FORMATS: Lecture

BIOC 4501 Medical Biotechnology

CREDIT HOURS: 3

This course covers fundamental principles of biotechnology from a medical perspective. Topics discussed include: recombinant DNA technology, polymerase-chain reaction-based applications, DNA microarrays, DNA sequencing, immunochemical techniques and applications, production of transgenic organisms, potential applications for embryonic stem cell and nuclear transfer cloning, business and legal aspects of biotechnology.

PREREQUISITES: BIOC 3400.03 or instructor's consent

EXCLUSIONS: BIOC 5501.03

FORMATS: Lecture | Discussion

BIOC 4604 Research Project I

CREDIT HOURS: 3

This course requires original biochemical research in the laboratory of a faculty member, and requires the equivalent of at least one day per week to be spent in the laboratory. A report is submitted at the end of the term. COORDINATOR: Stephen Bearne

CALENDAR NOTES: This course is intended to be taken in conjunction with BIOC 4605.03 and no credit can be given for one course without the other. The work undertaken in BIOC 4605.03 should be a continuation of that initiated in BIOC 4604.03 and hence the report submitted for BIOC 4605.03 may include data and analysis incorporated in the BIOC 4604.03 report. In exceptional cases, the research project can be done outside the Department of Biochemistry and Molecular Biology. Prior approval must be obtained from the course coordinator.

PREREQUISITES: Permission of coordinator and a member of the Department who will serve as supervisor. At least a B average for BIOC 3300.03, BIOC 3400.03 and BIOC 3700.03.

FORMATS: Lab

BIOC 4605 Research Project II

CREDIT HOURS: 3

This course requires original biochemical research in the laboratory of a faculty member, and requires the equivalent of at least one day per week to be spent in the laboratory. A report is submitted at the end of the term. COORDINATOR: Stephen Bearne

CALENDAR NOTES: This course is intended to be taken in conjunction with BIOC 4604.03 and no credit can be given for one class without the other. The work undertaken in BIOC 4605.03 should be a continuation of that initiated in BIOC 4604.03 and hence the report submitted hence the report submitted for BIOC 4605.03 may include data and analysis incorporated in the BIOC 4604.03 report. In exceptional cases the research project can be done outside the Department of Biochemistry & Molecular Biology. Prior approval must be obtained from the course coordinator.

PREREQUISITES: BIOC 4604.03

FORMATS: Lab

BIOC 4700 Proteins

CREDIT HOURS: 3

Our theme is the relationship between structure and function. The kinetic and thermodynamic determination of the protein fold is explored. Specific details of how form determines function in binding other molecules both small and large in membranes, and in energy transduction are provided. Protein evolution and turnover are examined.

PREREQUISITES: BIOC 3700.03; or (CHEM 3601.03 AND CHEM 2301.03 AND CHEM 2304.03), or instructor's consent.

CROSSLISTED: BIOC 5700.03

FORMATS: Lecture

BIOC 4701 Enzymes

CREDIT HOURS: 3

Fundamental principles of enzyme catalysis and its regulation are examined. Topics include enzyme kinetics, enzyme inhibition and inactivation, isotope effect measurements, site-directed mutagenesis, and the active site architecture and transition state stabilization of selected enzymes. Classic and current papers in the literature are reviewed and the experimental and conceptual approaches are critically appraised.

PREREQUISITES: BIOC 3700.03; or (CHEM 3601 AND CHEM 2301 AND CHEM 2304), or instructor's consent.

CROSSLISTED: BIOC 5701.03

FORMATS: Lecture

BIOC 4702 Biophysical Characterization of Macromolecules

CREDIT HOURS: 3

This course covers methods allowing determination of sub-molecular and atomic-level structure and dynamics of biomacromolecules in physiological settings (e.g. solution-state or lipid bilayers) including: fluorescence, electronic and vibrational circular dichroism and NMR spectroscopy; light vs. X-ray vs. neutron scattering; and, single molecule methods.

PREREQUISITES: BIOC 3700.03; or (CHEM 3601 AND CHEM 2301 AND CHEM 2304), or instructor's consent. Recommended: PHYC 1190.03 and 1290.03, or 1310.03 and 1320.03

CROSSLISTED: CHEM 4602.03

EXCLUSIONS: BIOC 5702.03, CHEM 5602.03

FORMATS: Lecture

BIOC 4703 Structural Biology

CREDIT HOURS: 3

This course covers theoretical and practical aspects of determining and assessing the quality of atomic resolution biomolecular structures. The underlying theory and applications of X-ray diffraction, NMR spectroscopy, and cryo-electron microscopy are discussed in detail.

PREREQUISITES: BIOC 3700 or CHEM 3601 or instructor's consent.

CROSSLISTED: CHEM 4603.03

EXCLUSIONS: BIOC 5703.03, CHEM 5603.03

FORMATS: Lecture

BIOC 4813 Biochemistry of Clinical Disorders

CREDIT HOURS: 3

This course is an introduction to the pathophysiology of disease. It provides the clinical and biochemical background to disease groups and system disorders and the laboratory approach to their diagnosis. Topics include cardiovascular, renal, gastrointestinal and hepatobiliary disorders, addiction, and acid-base, carbohydrate, lipid and amino acid disorders; endocrine and rheumatological diseases, as well as tumor markers and toxicology, blood and immune abnormalities.

PREREQUISITES: BIOC 3300.03 and BIOC 3400.03 and BIOC 3700.03 or consent of instructor

EXCLUSIONS: BIOC 4811.03 and BIOC 4812.03 PATH 5013.03, BIOC 5813.03

FORMATS: Lecture | Discussion

BIOC 4835 Human Genetics

CREDIT HOURS: 3

For science students with special interest in human genetics. Topics include errors of metabolism, human development, transmission genetics, DNA structure, gene function, mutation and chromosomal alterations, population genetics, genetics of immunity and cancer, genetic technology in medicine, and ethical and social issues related to medical genetics.

PREREQUISITES: BIOC 3400.03 or permission from instructor

CROSSLISTED: BIOL 4035.03, 5035.03, PATH 5035.03

FORMATS: Lecture | Tutorial

BIOC 8891 Co-op work term 1

CREDIT HOURS: 0

BIOC 8892 Co-op work term 2

CREDIT HOURS: 0

BIOC 8893 Co-op work term 3

CREDIT HOURS: 0

BIOC 8894 Co-op work term 4

CREDIT HOURS: 0

Bioinformatics

Much of the current research in the biological sciences today requires the handling of “Big Data”. Nowhere is this need more apparent than in the area of genomics, where next generation sequencing techniques are capable of producing, at a relatively low cost, hundreds of gigabytes and even terabytes of DNA sequence data. There is a need for people who have an understanding of molecular and evolutionary genomics (the structure and function of genes and genomes) and the skill set needed to analyze the data. A [Minor in Bioinformatics](#) provides students with an introduction to molecular genomics and to some of the informatics tools currently available.

Coordinator: Dr. Daniel Ruzzante (daniel.ruzzante@dal.ca)

Minor in Bioinformatics

This minor is available to students registered in a 120 credit hour Bachelor of Science or Bachelor of Science (Computer Science) program.

Much of the current research in the biological sciences today requires the handling of “Big Data”. Nowhere is this need more apparent than in the area of genomics, where next generation sequencing techniques are capable of producing, at a relatively low cost, hundreds of gigabytes and even terabytes of DNA sequence data. There is a need for people who have an understanding of molecular and evolutionary genomics (the structure and function of genes and genomes) and the skill set needed to analyze the data. A **Minor in Bioinformatics** provides students with an introduction to molecular genomics and to some of the informatics tools currently available.

To qualify for a Minor in Bioinformatics, students must take **all Required Courses** and enough courses from the **Selectives** list to total 18 credit hours above the 2000 level that count uniquely toward the Minor (e.g. do not also count toward a Major or Honours degree). In addition all students must complete the prerequisite 1000-level courses.

Pathways to obtaining the Minor in Bioinformatics have been designed for students majoring in Computer Science, Biochemistry & Molecular Biology, Biology, Marine Biology, Statistics and Neuroscience. Students in other programs may obtain the Minor by fulfilling the general requirements below, but should be aware that most of the courses listed have prerequisites, and that they may need to complete a number of courses in addition to the required and selective courses.

Irrespective of path, students with a Bioinformatics Minor will end up having taken a common set of courses in Computer Science, Calculus, Statistics, Genetics, and Molecular Biology or Biochemistry. All students will also receive training in use of ACENET.

Minor in Bioinformatics – General requirements

Coordinator: Dr. Daniel Ruzzante (daniel.ruzzante@dal.ca)

Students must take all required courses and enough selective courses to total 18 credit hours. Courses (required or selective) cannot be used toward the Minor if the course is being counted toward a Major or Honours degree.

Required prerequisite courses (don't count toward minor)

- CSCI 1105.03: Introduction to Computer Programming (or CSCI 1100.03)
- CSCI 1110.03: Introduction to Computer Science (or CSCI 1101.03)
- BIOL 1010.03: Principles of Biology Part I or BIOL 1020.03: Introductory Biology I
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus

Required courses

- STAT 2060.03/MATH 2060.03: Introduction to Probability and Statistics
- BIOL 2030.03: Genetics and Molecular Biology
- BIOL 3046.03: Molecular Evolution or BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology

Selectives

- CSCI 2134.03: Software Development (Highly recommended)
- STAT 2080.03/MATH 2080.03: Statistical Methods for Data Analysis and Inference
- BIOL 2040.03: Evolution
- BIOL 3101.03/MARI 3101.03: Microbial Ecology
- BIOL 3042.03/MARI 3042.03: Molecular Ecology
- CSCI 3110.03: Design and Analysis of Algorithms I
- CSCI 4180.03: Intro to Computational Biology and Bioinformatics
- CSCI 4181.03: Bioinformatics Algorithms
- BIOC 4010.03: Bioinformatics

- BIOC 4403.03: Genes and Genomes (Highly recommended)

PATHWAY for Biochemistry & Molecular Biology students

Coordinator: Dr. Claudio Slamovits (claudio.slamovits@dal.ca)

Students must take all required courses and enough selective courses to total 18 credit hours. Courses (required or selective) cannot be used toward the Minor if the course is being counted toward a Major or Honours degree.

Required prerequisite courses (don't count toward minor):

- CSCI 1105.03: Introduction to Computer Programming (or CSCI 1100.03)
- CSCI 1110.03: Introduction to Computer Science (or CSCI 1101.03)
- BIOL 1010.03: Principles of Biology Part I or BIOL 1020.03: Introductory Biology I
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus

Required course:

- STAT 2060/MATH 2060.03: Introduction to Probability and Statistics

Selectives:

- STAT 2080/MATH 2080.03: Statistical Methods for Data Analysis and Inference
- CSCI 2134.03: Software Development (Highly recommended)
- CSCI 4180.03: Intro to Computational Biology and Bioinformatics
- CSCI 4181.03: Bioinformatics Algorithms
- BIOL 3046.03: Molecular Evolution
- BIOC 4010.03: Bioinformatics *
- BIOC 4403.03: Genes and Genomes (Highly recommended) *

* Cannot be used toward the Minor if the course is being counted toward a Major or Honours degree

PATHWAY for Biology or Marine Biology students

Coordinator: Dr. Daniel Ruzzante (daniel.ruzzante@dal.ca)

Students must take all required courses and enough selective courses to total 18 credit hours. Courses (required or selective) cannot be used toward the Minor if the course is being counted toward a Major or Honours degree.

Required prerequisite courses (don't count toward minor):

- CSCI 1105.03: Introduction to Computer Programming (or CSCI 1100.03)
- CSCI 1110.03: Introduction to Computer Science (or CSCI 1101.03)
- BIOL 1010.03: Principles of Biology Part I or BIOL 1020.03: Introductory Biology I
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus

Required courses:

- STAT 2060/MATH 2060.03: Introduction to Probability and Statistics
- BIOL 3046.03: Molecular Evolution * or BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology *

Selectives:

- CSCI 2134.03: Software Development (Highly recommended)
- STAT 2080/MATH 2080.03: Statistical Methods for Data Analysis and Inference
 - BIOL 3101/MARI 3101.03: Microbial Ecology *
 - BIOL 3042/MARI 3042.03: Molecular Ecology *
 - BIOL 3046.03: Molecular Evolution *
 - BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology *
 - CSCI 4180.03: Intro to Computational Biology and Bioinformatics
 - CSCI 4181.03: Bioinformatics Algorithms
 - BIOC 4010.03: Bioinformatics *

- BIOC 4403.03: Genes and Genomes (Highly recommended) *

* Cannot be used toward the Minor if the course is being counted toward a Major or Honours degree

PATHWAY for Computer Science students

Coordinator: Dr. Robert Beiko (beiko@cs.dal.ca)

Students must take all required courses and enough selective courses to total 18 credit hours. Courses (required or selective) cannot be used toward the Minor if the course is being counted toward a Major or Honours degree.

Required prerequisite courses (don't count toward minor):

- CSCI 1105.03: Introduction to Computer Programming (or CSCI 1100.03)
- CSCI 1110.03: Introduction to Computer Science (or CSCI 1101.03)
- BIOL 1010.03: Principles of Biology Part I or BIOL 1020.03: Introductory Biology
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus

Required courses:

- STAT 2060/MATH 2060.03: Introduction to Probability and Statistics *
 - BIOL 2030.03: Genetics and Molecular Biology
 - BIOL 2040.03: Evolution
 - BIOL 3046.03: Molecular Evolution

Selectives:

- STAT 2080/MATH 2080.03: Statistical Methods for Data Analysis and Inference
- CSCI 2134.03: Software Development *
- CSCI 3110.03: Design and Analysis of Algorithms I *
- CSCI 4180.03: Intro to Computational Biology and Bioinformatics *
 - CSCI 4181.03: Bioinformatics Algorithms *
 - BIOC 4403.03: Genes and Genomes (Highly recommended)

* Cannot be used toward the Minor if the course is being counted toward a Major or Honours degree

PATHWAY for Statistics or Mathematics students

Coordinator: Dr. Hong Gu (hgu@mathstat.dal.ca)

Students must take all required courses and enough selective courses to total 18 credit hours. Courses (required or selective) cannot be used toward the Minor if the course is being counted toward a Major or Honours degree.

Required prerequisite courses (don't count toward minor):

- CSCI 1105.03: Introduction to Computer Programming (or CSCI 1100.03)
- CSCI 1110.03: Introduction to Computer Science (or CSCI 1101.03)
- BIOL 1010.03: Principles of Biology Part I or BIOL 1020.03: Introductory Biology
- MATH 1000.03: Differential and Integral Calculus I or MATH 1500.06 X/Y: Calculus)

Required courses

- BIOL 2030.03: Genetics and Molecular Biology
- BIOL 2040.03: Evolution
- BIOL 3046.03: Molecular Evolution

Selectives

- CSCI 2134.03: Software Development (Highly recommended)
- CSCI 4180.03 :Intro to Computational Biology and Bioinformatics
- CSCI 4181.03 :Bioinformatics Algorithms
- BIOC 4403.03: Genes and Genomes (Highly recommended)

PATHWAY for Neuroscience students

Coordinator: Dr. Tamara Franklin (tamara.franklin@dal.ca)

Students must take all required courses and enough selective courses to total 18 credit hours. Courses (required or selective) cannot be used toward the Minor if the course is being counted toward a Major or Honours degree.

Required prerequisite courses (don't count toward minor):

- CSCI 1105.03: Introduction to Computer Programming (or CSCI 1100.03)
- CSCI 1110.03: Introduction to Computer Science (or CSCI 1101.03)
- BIOL 1010.03: Principles of Biology Part I or BIOL 1020.03: Introductory Biology I
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus

Required courses:

- STAT 2060/MATH 2060.03: Introduction to Probability and Statistics
- BIOL 2030.03: Genetics and Molecular Biology
- BIOL 3046.03: Molecular Evolution or BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology

Selectives:

- CSCI 2134.03: Software Development (Highly recommended)
- STAT 2080/MATH 2080.03: Statistical Methods for Data Analysis and Inference
- BIOL 2040.03: Evolution
- BIOL 3101/MARI 3101.03: Microbial Ecology
 - BIOL 3042/MARI 3042.03: Molecular Ecology
 - CSCI 3110.03: Design and Analysis of Algorithms I
 - CSCI 4180.03: Intro to Computational Biology and Bioinformatics
 - CSCI 4181.03: Bioinformatics Algorithms
 - BIOC 4010.03: Bioinformatics
 - BIOC 4403.03: Genes and Genomes (Highly recommended)

Introduction

Welcome to the Department of Biology. It has been said that the 21st century will be the century of Biology. We are inclined to agree. Biologists study the entire hierarchy of living systems from molecules, cells, organelles and organs to individuals, populations, and ecosystems. Increasingly, the focus of biological inquiry has shifted from reducing living systems into their parts to investigating how these parts interact in complex systems from which novel and unique properties emerge.

The Department of Biology offers both undergraduate and graduate students a wide range of learning experiences and training in the biological sciences. The undergraduate core introduces the student to the whole biological hierarchy and provides an excellent introduction to the biodiversity of species and their habitats. There are multiple avenues for more tailored learning as well, including independent research opportunities, special topics courses, experiential learning, specialty certificates, and honours research. State of the art laboratories provide experience in current technology and experimental design. Our Seaside Program includes a large number of summer field courses covering freshwater, marine, and terrestrial ecosystems. We excel in Marine Biology as proximity to the

Atlantic Ocean gives us the capacity to provide hands-on marine training. In 2014, the Department of Biology began participating in a unique Medical Sciences program that was developed collaboratively by the Faculty of Science and the Faculty of Medicine.

There has never been a more exciting time to be a Biologist, nor has the need to understand the intricacies of nature been more urgent. Our comprehensive programs prepare students for a wide range of career options, including research and education, field and laboratory positions, environmental management and conservation, medical sciences and biotechnology, bioengineering, industry, and business. Not every student will use this degree to be a biologist but each one will have the opportunity to participate in and contribute to one of the most worthwhile endeavors in humanity's near future: understanding nature and how humanity can live better without endangering the multitude of living systems around us, and in turn, ourselves.

Degree Programs

The Department of Biology offers the following degree programs in Biology

- BSc or BA (120 credit hour) Honours (Concentrated)*
- BSc or BA (120 credit hour) Combined Honours*
- BSc or BA (120 credit hour) Major*
- BSc or BA (120 credit hour) Double Major*
- BSc or BA (90 credit hour) Minor in Biology
- Minor in Biology

* [BSc Co-op option available](#)

* May be combined with Minor programs from other disciplines

In addition to departmental requirements, students must satisfy the requirements outlined in the [Academic Regulations](#) and the [College of Arts and Science Degree Requirements](#) sections. Students are advised that a number of requirements differ for the BA and BSc degrees.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Student applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with a Biology undergraduate academic advisor.

Prospective Biology students should be aware that to advance to second year Biology courses, they must achieve at least a C grade in the prerequisite first year Biology courses. Students with exceptional extenuating circumstances may appeal this requirement to the Biology Undergraduate Curriculum Committee. Students should go to the Biology Main Office for further details.

Staff

Dean

Macdonald, C.L.B., BSc (Hons), PhD (Dalhousie), Professor (Chemistry)

Chair

Stone, S. L., PhD (York)

Biology Program Advisors

For Biology program advising, please email biology.advising@dal.ca for an auto-reply with advisors' office hours.

Professors Emeriti

Hall, B. K., DSc (UNE), LL.D (Calgary), PhD (UNE), FRSC, University Research Professor Emeritus

Meinertzhagen, I. A., PhD, DSc (St. Andrews), FRSC, Professor Emeritus

Professors

Adamo, S., BSc (Toronto), PhD (McGill), major appointment in Psychology

Bentzen, P., MSc (UBC), PhD (McGill), Killam Professor

Bielawski, J. P., PhD (Texas A & M Univ)

Budge, S., PhD (Memorial), major appointment in Process Engineering

Burton, D. L., BSc (Dalhousie), MSc (Guelph), PhD (Alberta), major appointment in Plant, Food, and Environmental Sciences (Agr)

Croll, R., PhD (McGill), major appointment in Physiology/Biophysics (Medicine)

Crossin, G. T., BA (Maine), BSc (New Hampshire), MSc, PhD (UBC)
Cutler, C., BSc Hons (Memorial), MPM (SFU), PhD (Guelph), major appointment in Plant, Food and Environmental Sciences (Agr)
Dustin, J., major appointment in Faculty of Agriculture
Fredeeen, A., BSA (Saskatoon), MSc (Guelph), PhD (California), major appointment in Animal Science and Aquaculture (Agr)
Gunawardena, A., BSc (Hons) (Peradeniya), PhD (Oxford Brookes)
Hutchings, J. A., MSc, PhD (Memorial)
Iverson, S. J., PhD (Maryland)
Johnston, M. O., PhD (Chicago), Campbell Chair
Lada, R., BSc, MSc (Hort) (TNAU), PhD (Adelaide), major appointment in Plant, Food, and Environmental Sciences (Agr)
Lane, P. A., MSc (SUNY Binghamton), PhD (SUNY Albany)
La Roche, J., BSc (McGill), PhD (Dalhousie)
Leonard, M. L., PhD (Ottawa)
Lotze, H. K., BSc (Göttingen), MSc, PhD (Kiel)
Lynch, D. H., BSc, MSc (Agr) (McGill), PhD (Guelph), major appointment in Plant, Food and Environmental Sciences (Agr)
MacLaren, L., major appointment in Faculty of Agriculture
MacNeil, M. A., BSc (Hons) (Dalhousie) MSc (Georgia), PhD (Newcastle)
Metaxas, A., BSc (McGill), MSc (UBC), PhD (Dalhousie), major appointment in Oceanography
Miar, Y., major appointment in Faculty of Agriculture
Nams, V. O., BSc (Toronto), MSc (Alberta), PhD (Victoria), major appointment in Environmental Sciences (Agr)
Percival, D. C., BSc (Agr), MSc, PhD (Guelph), major appointment in Environmental Sciences (Agr)
Prithviraj, B., BSc (Agr) (Annamalai), MSc, PhD (BHU)
Rathgeber, B., major appointment in Faculty of Agriculture
Rupasinghe, H. P. V., BSc (Peredeniya), MSc (Iowa), PhD (Guelph), major appointment in Plant, Food and Environmental Sciences (Agr)
Ruzzante, D. E., PhD (Dalhousie), Killam Professor
Simpson, A. G. B., BSc, PhD (Sydney Australia)
Stewart-Clark, S., major appointment in Faculty of Agriculture
Stone, S. L., PhD (York)
Walde, S. J., PhD (Calgary)
Wang-Pruski, G., BSc (China), PhD (Alberta), major appointment in Plant and Animal Science (Agr)
Whitehead, H., MA, PhD (Cambridge)
Worm, B., PhD (Kiel)

Associate Professors

Bertrand, E., BSc (Bates College), PhD (MIT/WHOI)
Filgueira, R., major appointment in Marine Affairs
Gujar, S., DVM (Marathwada), PhD (Memorial), MHA (Dalhousie), major appointment in Pathology and Microbiology & Immunology (Medicine)
Latta, R., MSc (Toronto), PhD (Colorado)
Lennox, R., PhD (Carleton)
Myles, S. A., BA (St. Thomas), MSc (Oxford), PhD (Max Planck), major appointment in Plant, Food and Environmental Sciences (Agr)
Tittensor, D. P., BSc (Aberdeen), MSc (Memorial), PhD (Dalhousie)

Assistant Professors

Côté, P. D., BSc (Ottawa), PhD (McGill)
El Hiani, Y., PhD (Université de Picardie Jules Verne), major appointment in Physiology and Biophysics (Medicine)
Ferrier, J., PhD (Ottawa)
Gonzales-Morales, N., BSc (Universidad Autónoma de Querétaro) PhD (Université de Nice Sophia-Anpolis)
McLean, N. L., BSc (Agri), MSc (McGill), PhD (Dalhousie), major appointment in Plant, Food and Environmental Sciences (Agr)

Summer Education and Applied Science Institute at Dalhousie in Ecology (S.E.A.S.I.D.E.)

Frail-Gauthier, J., BSc, PhD (Dalhousie)

Adjunct

Baillie, S., BSc (Acadia), MSc (Memorial), PhD (New Zealand)

Gass, G., PhD (Toronto)
Gibson, L., BSc (Victoria), MSc (Dalhousie)
McCarville, M., BSc, MSc (Dalhousie)
Rajaselvam, R. J., BSc (Hons), MPhil (Peradeniya), MSc (Oxford), MScF (Toronto)
Schmidt, A., MSc, PhD (Dalhousie)

Senior Instructors

Ewart, K. V., PhD (Memorial), major appointment in Biochemistry & Molecular Biology
Grantham, D., BSc (Hons), MSc (Dalhousie)
Van Dommelen, J., MSc (Dalhousie)

Instructors

Frail-Gauthier, J., BSc, PhD (Dalhousie)
Ibarra, D., BEng (ITESM), MSc (Dalhousie), PhD (Dalhousie)

Post Doctoral Fellows

Arif, S., PhD (Dalhousie)
Beck, S.
Boerder, K., BSc (Germany), MSc (Germany), PhD (Dalhousie)
Delgado, L., BSc (Peru), MSc (Michigan), PhD (Dalhousie)
Dimarchopoulou, D.
Martins, A., PhD (JCU)
Mull, C., PhD (SFU)

Sorais, M.
Zivkovic, T., PhD (McGill)

BSc or BA (120 credit hour) Concentrated Honours in Biology

Students who want a challenging program resulting in a broad background in Biology, including an independent research experience may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours.

To graduate with Honours, students must complete a minimum of 54 credit hours above the 1000 level in Biology. A minimum B+ average (GPA of 3.3), with no grade less than C, is required in the core Biology courses. Students must also have a cumulative B average (GPA of 3.0) in courses in the honours subject at the time of graduation. Students write a research-based Honours thesis. The Honours Qualifying Examination requirement is satisfied through completion of BIOL 4901.03 AND BIOL 4902.03.

A Co-op option is available for students enrolled in a BSc Concentrated Honours in Biology. See [Co-operative Education Program](#).

Admission to Honours

Students must apply for admission to Honours programs. Students considering Honours should consult with a Biology Honours Advisor early in their studies. To be admitted, students must:

- Have a minimum B+ average (GPA of 3.3) in the core Biology courses with no grade less than C. A maximum of two of these core courses may be repeated once to achieve this requirement.
- Have a minimum B average (GPA of 3.0) across all courses in the honours subject.
- Identify and gain the support of a thesis supervisor during their third year of studies (see Honours webpage for supervisor eligibility).
- With the supervisor's input, draft and submit a thesis proposal to the Honours Committee no later than May 15th of their third year of studies. See Honours webpage for thesis proposal guidelines, and admission procedures for Honours Co-op students.

Biology Honours webpage <https://www.dal.ca/faculty/science/biology/honours.html>

Course Requirements

In addition to fulfilling the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections, students in a Concentrated Honours program in Biology must complete the following courses:

1000 level

- BIOL 1010.03: Principles of Biology Part I (or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- BIOL 1011.03: Principles of Biology Part II (or BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology or SCIE 1505X/Y.18: Integrated Science or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences (or SCIE 1505X/Y.18: Integrated Science or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- An additional 3 credit hours in MATH or STAT (BSc)
- CHEM 1011.03: Concepts of Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium

Recommended:

- PHYC 1310.03/PHYC 1320.03 (or PHYC 1300X/Y.06): Physics In and Around You
- MATH 1215.03: Life Sciences Calculus or MATH 1000.03: Differential and Integral Calculus I or MATH 1030.03: Matrix Theory and Linear Algebra I

2000 level

Core Biology courses

- BIOL 2003.03: Animal Diversity
- BIOL 2004.03: Diversity of Plant and Microorganisms
- BIOL 2020.03: Cell Biology
- BIOL 2030.03: Genetics and Molecular Biology

- BIOL 2040.03: Evolution
- BIOL 2060.03: Introductory Ecology

3000/4000 level

A minimum of 30 additional credit hours in BIOL or BIOL-equivalent courses at or above the 2000 level, of which at least 18 credit hours must be at or above the 3000 level. One of the following course options must be included:

Core Biology Courses

- BIOL 3050.03: Developmental Biology
OR
- BIOL 3371.03/MARI 3371.03: Laboratory in Comparative Animal Physiology
OR
- BIOL 3078.03: Principles of Animal Physiology Part I AND BIOL 3079.03: Principles of Animal Physiology Part II

In addition, students must complete an Honours Thesis:

- BIOL 4901.03: Honours Research and Thesis I and BIOL 4902.03: Honours Research and Thesis II

Students are encouraged to consult the sections on Course Selection Guidelines and BIOL-Equivalent Courses when selecting their 3000 and 4000 level courses.

BSc or BA (120 credit hour) Combined Honours in Biology and another subject

Students who wish to study Biology in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science (other than Marine Biology), the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Biology may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject. Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. Students must have their program of study approved by Academic Advisors in both subject areas.

To graduate with Honours, students must complete a minimum of 36 credit hours above the 1000 level in BIOL or BIOL-equivalent courses, whether Biology is the primary or the secondary subject. A minimum B+ average (GPA of 3.3), with no grade less than C, is required in the core Biology courses. Students must also have a cumulative B average (GPA of 3.0) at the time of graduation. Students write a research-based Honours thesis and complete an Honours Qualifying Examination in their primary subject area. For Biology, this requirement is satisfied through BIOL 4901.03 AND BIOL 4902.03.

A Co-op option is available for students enrolled in a BSc Combined Honours in Biology. See [Co-operative Education Program](#).

Admission to Honours

Students must apply for admission to Honours programs. To be admitted to the Biology Honours program, students must:

- Have a minimum B+ average (GPA of 3.3) in core 2nd year Biology courses with no grade less than C. A maximum of two of these core courses may be repeated once to achieve this requirement.
- Have a minimum B average (GPA of 3.0) across all courses in the Honours subject.
 - If Biology is to be the primary subject area, students must
 - Identify and gain the support of a thesis supervisor during their third year of studies (see Biology Honours webpage for supervisor eligibility).
 - With the supervisor's input, draft and submit a thesis proposal to the Biology Honours Committee no later than May 15th of their third year of studies. See Honours webpage for thesis proposal guidelines, and admission procedures for Honours Co-op students.

Biology Honours webpage <https://www.dal.ca/faculty/science/biology/honours.html>

Course Requirements

In addition to fulfilling the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections, students in a BSc or BA Combined Honours program in Biology and another subject must complete the following:

1000 level

- BIOL 1010.03: Principles of Biology Part I (or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution or SCIE 1505X/Y.18: Integrated Science or SCIE 1506.09 Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- BIOL 1011.03: Principles of Biology Part II (or BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology or SCIE 1505X/Y.18: Integrated Science or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences (or SCIE 1505X/Y.18: Integrated Science or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium

Recommended:

- PHYC 1310.03/PHYC 1320.03 (or PHYC 1300X/Y.06): Physics In and Around You or equivalent
- MATH 1215.03: Life Sciences Calculus or MATH 1000.03: Differential and Integral Calculus I or MATH 1030.03: Matrix Theory and Linear Algebra I

2000 level

Core Biology Courses

- BIOL 2003.03: Animal Diversity
- BIOL 2004.03: Diversity of Plants and Microorganisms
- BIOL 2020.03: Cell Biology
- BIOL 2030.03: Genetics and Molecular Biology
- BIOL 2040.03: Evolution
- BIOL 2060.03: Introductory Ecology

3000/4000 level

If Biology is the primary subject, students must complete 12 additional credit hours in BIOL or BIOL-equivalent courses at the 3000/4000 level. If Biology is the secondary subject, you must complete 18 additional credit hours in BIOL or BIOL-equivalent courses at the 3000/4000 level. In either case, one of the following course options must be included:

Core Biology Courses

- BIOL 3050.03: Developmental Biology
OR
- BIOL 3371.03/MARI 3371.03: Laboratory in Comparative Animal Physiology
OR
- BIOL 3078.03: Principles of Animal Physiology Part I AND BIOL 3079.03: Principles of Animal Physiology Part II

In addition, if Biology is the primary subject, students will also complete:

- BIOL 4901.03: Honours Research and Thesis I and BIOL 4902.03: Honours Research and Thesis II

Students are encouraged to consult the sections on Course Selection Guidelines, and BIOL-Equivalent Courses when selecting their 3000 and 4000 level courses.

BSc or BA (120 credit hour) Major in Biology

The Major degree program is suited to students who want to focus on Biology but wish to have a program that is somewhat less constrained than the Honours program. It provides a four-year survey of Biology and is designed for students not anticipating subsequent experimental graduate-level training in Biology or related disciplines. Biology Majors complete a minimum of 42 credit hours in BIOL or BIOL-equivalent courses above the 1000 level. Biology Majors do not have thesis (or related) requirements. Research and other experiential learning opportunities are available through laboratories, independent research courses, special

topics courses and experiential learning courses. Students should plan their programs carefully and obtain advice from an academic advisor in the Biology Department.

A Science Co-op option is available for students enrolled in a Major program in Biology. See [Co-operative Education Program](#).

Course Requirements

In addition to fulfilling the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections, students in a Major program in Biology must complete the following courses:

1000 level

- BIOL 1010.03: Principles of Biology Part I (or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution or SCIE 1505X/Y.18: Integrated Science or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- BIOL 1011.03: Principles of Biology Part II (or BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology or SCIE 1505X/Y.18: Integrated Science or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences (or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- An additional three credit hours in MATH or STAT (BSc)
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium

2000 level

- BIOL 2003.03: Animal Diversity
- BIOL 2004.03: Diversity of Plants and Microorganisms
- BIOL 2020.03: Cell Biology
- BIOL 2030.03: Genetics and Molecular Biology
- BIOL 2040.03: Evolution
- BIOL 2060.03: Introductory Ecology

3000/4000 level

- A minimum of 24 credit hours, of which at least 3 credit hours must be at the 4000 level, of BIOL or BIOL-equivalent courses.

Students are encouraged to consult Course Selection Guidelines and BIOL-Equivalent Courses when selecting their 3000 and 4000 level courses.

BSc or BA (120 credit hour) Double Major in Biology and another subject

The Double Major degree program allows students to combine a study of Biology with another subject. The other subject may be any discipline from the Faculty of Science (other than Marine Biology), the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Biology may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

Regardless of whether Biology is the primary or secondary subject, the Biology departmental requirements are the same (see below). Students must complete a minimum of 33 credit hours in BIOL or BIOL-equivalent courses above the 1000 level. It is recommended that students enrolled in a Double Major program consult with advisors in both subject areas.

A Science Co-op option is available for students enrolled in BSc Double Major with Biology as the primary subject. See [Co-operative Education Program](#).

Course Requirements

In addition to fulfilling the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections, students in a BSc or BA Double Major program in Biology and another subject must complete the following:

1000 level

- BIOL 1010.03: Principles of Biology Part I (or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution or SCIE 1505X/Y.18: or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- BIOL 1011.03: Principles of Biology Part II (or BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology or SCIE 1505X/Y.18: or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences (or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent) (if planning to take BIOL 2060.03: Introductory Ecology)
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
- An additional three credit hours of MATH or STAT (BSc)

2000 level

- BIOL 2020.03: Cell Biology
- BIOL 2030.03: Genetics and Molecular Biology
- BIOL 2040.03: Evolution
- Any TWO of
 - BIOL 2003.03: Animal Diversity
 - BIOL 2004.03: Diversity of Plants and Microorganisms
 - BIOL 2060.03: Introductory Ecology
- Three additional credit hours in BIOL or BIOL-equivalent courses at or above the 2000 level

3000/4000 level

- A minimum of 18 credit hours of BIOL or BIOL-equivalent courses at or above the 3000 level whether Biology is the primary or the secondary subject

Please note that a double major in Biology and Marine Biology is not offered.

Students are encouraged to consult the sections on Course Selection Guidelines and BIOL-Equivalent Courses when selecting their 3000 and 4000 level courses.

BSc or BA (90 credit hour) Minor in Biology

The 90 credit hour degree with Minor in Biology is appropriate for students who want to study some Biology but do not wish to complete the conventional four-year program. The degree is best suited for students who want a general science degree with some specialization in Biology. A 90 credit hour degree program is not suitable for students who wish to pursue graduate studies. With additional study, the degree may be upgraded to a 120 credit hour Major or Honours degree at a later date.

A 90 credit hour BSc or BA in Biology is usually the preferred option for students who wish to combine studies in Biology with a degree in Engineering (see BSc/BEng or BA/BEng Concurrent Program).

Requirements

- A minimum of 18 credit hours in Biology (BIOL) and/or Marine Biology (MARI) courses at the 2000 level or higher to a maximum of 36 credit hours. A maximum of 6 credit hours may be **BIOL-equivalent**.

Please note that upper level Biology (BIOL) and Marine Biology (MARI) courses have prerequisite requirements.

A BSc or BA (120 credit hour) degree program with a [Minor in Biology](#) is also available to students in the Faculty of Science.

Minor in Biology

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

This minor is not available to students majoring in Marine Biology.

Requirements

- A minimum of 18 credit hours in Biology (BIOL) and/or Marine Biology (MARI) courses at the 2000 level or higher to a maximum of 36 credit hours. A maximum of 6 credit hours may be [BIOL-equivalent](#).

Please note that upper level Biology (BIOL) and Marine Biology (MARI) courses have prerequisite requirements.

A [BSc or BA \(90 credit hour\) degree program with a Minor in Biology](#) is also available to students in the Faculty of Science.

Contact [Biology](#) for more information.

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Co-operative Education Program (Science Co-op) in Biology

Co-op Academic Advisor: Mindy McCarville mindy.mccarville@dal.ca

Science Co-op is a program where academic study in a science subject is combined with paid career-related work experience. Students undertake three work-terms interspersed with their academic study terms. Science Co-op degree programs enable students to apply their knowledge directly while providing them with work experience that assists in making educated career choices.

Science Co-op is available to students in BSc (120 credit hour) Honours or Major programs in Biology, or in Combined Honours or Double Major programs with Biology as the primary subject. The number of students admitted into Science Co-op each year is limited. A minimum GPA of 3.00 is required for admission and for continuation in the Co-op program. Students must be eligible to work in Canada.

Students normally apply to join Science Co-op during their first year of study, but application during the second year of study is possible. Students must apply before April 15, and it is recommended that interested students contact their Departmental Co-op advisor early in the Winter term of their first year. If accepted into Science Co-op, students must register for, and attend the Science Co-op Seminar Series (SCIE 2800.00) at least four months prior to the first work term.

Details are available from the Biology Co-op Academic Advisor and from the Co-operative Education office http://www.dal.ca/academics/cooperative_education.html. For more information on Co-op Education in Biology, please see the Biology department webpage.

Minors available to students in Biology

Minor programs allow students to develop subject specialties in addition to their major or honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs (including Science Co-op).

Students in a BSc or BA (120 credit hour) program in Biology may choose to include a Minor selected from the [list of approved Minors](#). Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc or BA in Biology, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of [Faculty of Science Certificates](#) and requirements. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the [College of Arts and Science Degree Requirements](#) section of the calendar.

Certificates of particular interest to student enrolled in a BSc or BA in Biology include:

- [Certificate in Animal Behaviour](#)
- [Certificate in Aquaculture and the Environment](#)
- [Certificate in Environmental Impact Assessment](#)
- [Certificate in Genetics](#)
- [Certificate in Geographic Information Science](#)
- [Certificate in Science Leadership and Communication](#)

BSc/BEng or BA/BEng Concurrent Program

Students interested in combining their interest in Biology with a degree in Engineering may choose a BSc/BEng or BA/BEng Concurrent Program, normally completed in a 5 year period. Over the first three years, students complete the requirements for a 90 credit hour BSc or BA degree in Biology and a Diploma of Engineering (the first two years of engineering studies). Two more years of engineering studies are then required to obtain a BEng. Interested students should see an undergraduate advisor from Biology and from the Faculty of Engineering in their first year of study.

Required Biology courses for a BSc/BEng or BA/BEng program in Biology

- A minimum of 18 credit hours in BIOL above the 1000 level

Note that there are prerequisite requirements for entry into upper level Biology courses.

Course Selection Guidelines

Biology is a large and diverse field, and students enroll in Biology programs with a corresponding diversity of interests and goals. While we encourage students to sample broadly across the various biological disciplines during their undergraduate years, we recognize that many students wish to emphasize one or more general areas within Biology. To help students select courses that fit their interests and goals, we have identified three general areas in Biology:

- A. Ecology and Evolution,
- B. Organismal Biology,
- C. Cell/Molecular Biology.

Below, we list courses associated with each area, and provide recommendations for designing individual programs at the third and fourth year levels.

IMPORTANT: Students should choose 2000 level courses in their second year with care, so that they will have the necessary pre-requisites to enroll in third and fourth year courses in their interest areas.

NOTE: These are not requirements. Students may select courses from any or all areas, provided they meet requirements for their degree program.

Ecology and Evolution

Ecology and Evolution (E&E) spans a broad range of concepts and applications from ecosystem ecology through population ecology to molecular evolution. A well-rounded course of study in Ecology or Evolution or both will include some courses in basic principles applicable to all organisms and habitats/ecosystems, as well as more specific courses on the details of how these principles play out in particular situations (e.g. taxa, habitats), and how these principles are applied to real world problems. In addition, a well-trained student in E&E should have both well-developed numerical skills as well as exposure to the application of E&E in broader society. Students wishing to emphasize E&E in their degree program should select courses from the following:

Principles: BIOL 3042, BIOL 3044, BIOL 3046, BIOL 3061, BIOL 3062, BIOL 3065, BIOL 3101, BIOL 4500

Biodiversity: BIOL 3080, BIOL 3221, BIOL 3301, BIOL 3322, BIOL 3327, BIOL 3620, BIOL 3622, BIOL 3626, MARI 3090

Ecosystems: BIOL 3101, BIOL 3623, BIOL 3624, BIOL 3664, BIOL 3761, BIOL 4002, BIOL 4323, BIOL 4370, BIOL 4661, BIOL 4666, OCEA 3001, OCEA 3002, OCEA 3003, OCEA 3004

Evolution: BIOL 3102, BIOL 3326, BIOL 4500, EARTH 2205, EARTH 2420, MARI 4090

Applications: BIOL 3060, BIOL 3063, BIOL 3225, BIOL 3226, BIOL 3328, BIOL 3329, BIOL 3580, BIOL 3601, BIOL 3623, BIOL 3624, BIOL 3634, BIOL 4001, BIOL 4065, BIOL 4160, BIOL 4335, BIOL 4369, BIOL 4500, HSTC 2204, MARI 3602, MARI 3603, MARI 3604

Methods and Data Skills: BIOL 3633, BIOL 3664, BIOL 3680, BIOL 4061, BIOL 4062, BIOL 4323, MARI 4600

Organismal Biology

Organismal biology includes areas such as development, physiology and anatomy, as well the study of particular taxonomic groups. Students interested in organismal biology are encouraged to select courses from the following:

Developmental Biology: BIOL 3050

Physiology/Anatomy: BIOL 3078, BIOL 3079, BIOL 3326, BIOL 3336, BIOL 3421, BIOL 3430, PHYL 3120

Microbes: BIOL 2004, BIOL 3101, BIOL 3102

Algae/plants: BIOL 3221, BIOL 3225, BIOL 3226

Animals: BIOL 3080, BIOL 3301, BIOL 3322, BIOL 3326, BIOL 3327, BIOL 3336, BIOL 3622, BIOL 3626, BIOL 4080, EARTH 2420, MARI 3090, MARI 3627, MARI 4090

Organisms in the environment: BIOL 3062, BIOL 3101, BIOL 3620, BIOL 3623, BIOL 3630, BIOL 3664, BIOL 4323, BIOL 4369, BIOL 4370

General: BIOL 3024, BIOL 3503, BIOL 3580, BIOL 4061, BIOL 4062, BIOL 4664

Cell/Molecular Biology

Cell/molecular biology includes areas such as cell biology, molecular biology, genetics, biochemistry, microbiology, development, evolution and biotechnology. Students interested in cell/molecular biology are encouraged to consider the courses listed below. Note that Biology credit can be obtained for Microbiology, Biochemistry and Physiology courses above the 2000 level.

Biology: BIOL 3037, BIOL 3046, BIOL 3102, BIOL 4020, BIOL 4035

Microbiology: all MICI courses 2000 level or higher

Biochemistry: all BIOC courses 2000 level or higher

Neuroscience: NESC 2570, NESC 3970

Physiology: all PHYL courses 2000 level or higher

BIOL-Equivalent Courses

Several other Dalhousie departments offer courses in one or more areas of Biology. Students enrolled in a 120 credit hour BSc or BA program in Biology may count any of the following courses toward their Biology program course requirements:

Please note that **two(2)** BIOL-equivalent courses can count towards a minor program in Biology.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

Course Notes

The normal entry requirement for admission to upper level courses in Biology is a grade of C or better in each of BIOL 1010.03 or BIOL 1020.03 and BIOL 1011.03 or BIOL 1021.03 or in SCIE 1505.18. Students with a lower grade and extenuating circumstances may appeal to the department Undergraduate Curriculum committee. Students should go to the Biology Main Office for further details.

Consult the Biology Department's website for updates on new courses and suggested course combinations.

Course Descriptions

BIOL 1010 Principles of Biology Part I

CREDIT HOURS: 3

This course, which prepares students for more advanced courses in biology and allied subjects, surveys the fundamental principles of biology with an emphasis on those features common to all organisms. Topics covered include cell and molecular biology, genetics, and evolution. Knowledge of high school mathematics, chemistry and biology is recommended.

CALENDAR NOTES: Students wishing to continue as biology or marine biology majors should complete BIOL 1010 (or BIOL 1020) and BIOL 1011 (or BIOL 1021) in the first year of study. Students planning to take further courses in Biology or Marine Biology should read the Program Requirements for these degrees.

EXCLUSIONS: BIOL 1020.03, SCIE (15XX), BIOA 1002.03

FORMATS: Lecture | Lab

BIOL 1011 Principles of Biology Part II

CREDIT HOURS: 3

Biology 1011 broadens the background laid down in BIOL 1010 to include plant and fungi form and function, animal form and function, and ecology.

Knowledge of high school mathematics, chemistry and biology is recommended

CALENDAR NOTES: Students wishing to continue as biology or marine biology majors should complete BIOL 1010 (BIOL 1020) and BIOL 1011 (BIOL 1021) in the first year of study. Students planning to take further courses in Biology or Marine Biology should read the Program Requirements

EXCLUSIONS: BIOL 1021.03, SCIE 15XX, BIOA 1003.03

FORMATS: Lecture | Lab

BIOL 1020 Introductory Biology I: Cells, Genetics & Evolution

CREDIT HOURS: 3

Biology 1020.03 is the equivalent of BIOL 1010.03, and is offered primarily online. Topics include cell and molecular biology, genetics, and evolution. High school mathematics, chemistry, and biology is recommended. Learning activities include readings, quizzes, interactive multimedia, online labs, home labs, recorded lectures, and synchronous help sessions.

CALENDAR NOTES: Students planning to take further courses in Biology or Marine Biology should read the Program Requirements for these degrees.

Exams must be written on a Dalhousie campus.

EXCLUSIONS: BIOL 1010.03, SCIE 15XX, BIOA 1002.03

FORMATS: Online Delivery

BIOL 1021 Introductory Biology II: Organismal Biology & Ecology

CREDIT HOURS: 3

Biology 1021.03 is the equivalent of BIOL 1011.03, and is offered primarily online. Topics include diversity of eukaryotic life, ecology, and plant and animal biology. High school mathematics, chemistry, and biology are recommended. Learning activities include readings, quizzes, interactive multimedia, online labs, home labs, recorded lectures, and synchronous help sessions.

CALENDAR NOTES: Students planning to take further courses in Biology or Marine Biology should read the Program Requirements for these degrees.

Exams must be written on a Dalhousie campus.

EXCLUSIONS: BIOL 1011.03, SCIE 15XX, BIOA 1003.03

FORMATS: Online Delivery

BIOL 1050 Biology and Society

CREDIT HOURS: 3

Health, climate change, genetically modified organisms, species and the evolution of disease. Designed for non-majors this course introduces the basics of cell biology, genetics and evolution and how they affect our society. Students acquire a foundation for life-long learning and critical thinking in biology through lectures, independent study and lab activities. NOTE: This course is for students in an Arts program or program other than Biology.

PREREQUISITES: None

EXCLUSIONS: BIOL 1010.03, BIOL 1020.03, SCIE 15XX

FORMATS: Lecture | Lab

BIOL 2003 Animal Diversity

CREDIT HOURS: 3

Surveys the diversity of forms and functions of invertebrate and vertebrate animals. The course takes a phylogenetic approach, exploring the evolutionary relationships and key transitions between metazoan taxa. Examples of the different life forms are introduced.

PREREQUISITES: A grade of C or higher in BIOL 1011.03 or (BIOL 1021.03, BIOL 1031.03, BIOA 1003.03, SCIE 1506.09).

FORMATS: Lecture | Lab

BIOL 2004 Diversity of Plants and Microorganisms

CREDIT HOURS: 3

Introduces the main domains of plant, fungal and microbial life, based on modern phylogenetic taxonomy. Examines the diversity, structure, physiology and ecology of non – animal life forms. Reviews the origins of the main lineages of living things - Archaea, Eubacteria and Eukaryota, as well as the main groups of eukaryotes.

PREREQUISITES: A grade of C or higher in BIOL 1010.03 or (BIOL 1020.03, BIOL 1030.03, BIOA 1002.03, SCIE 1507.09) and BIOL 1011.03 or (BIOL 1021.03, BIOL 1031.03, BIOA 1003.03, SCIE 1506.09).

FORMATS: Lecture | Lab

BIOL 2020 Cell Biology

CREDIT HOURS: 3

An introduction to the eukaryotic cell. Major cell components and activities are described at ultrastructural and molecular levels with emphasis on mammalian systems. The concept of the cell as an integrated structural, functional unit is developed.

PREREQUISITES: A grade of C or higher in BIOL 1010.03 or (BIOL 1020.03, BIOL 1030.03, BIOA 1002.03, SCIE 1507.09). RECOMMENDED: CHEM 1011.03 and CHEM 1012.03

EXCLUSIONS: BIOA 2001.03

FORMATS: Lecture | Lab

BIOL 2030 Genetics and Molecular Biology

CREDIT HOURS: 3

The power and prominence of modern genetics are emphasized through a blend of classical and molecular approaches. Topics: Mendelian, population and quantitative genetics; chromosome structure and variation; structure and function of nucleic acids; DNA replication, transcription and translation; gene expression; gene mutations; and genetic engineering. Course-based authentic research in lab.

PREREQUISITES: A grade of C or higher in BIOL 1010.03 or (BIOL 1020.03, BIOL 1030.03, BIOA 1002.03, SCIE 1507.09). RECOMMENDED: CHEM 1011.03 and CHEM 1012.03

EXCLUSIONS: GENE 2000.03

FORMATS: Lecture | Lab | Tutorial

BIOL 2040 Evolution

CREDIT HOURS: 3

A thorough overview of the process of evolution. Genetic variation and changes in genetic composition of populations, the relationship between genetic and phenotypic change. Adaptation at various levels of organization (DNA to species), speciation, phylogeny, and macroevolutionary patterns. Introduces the full breadth of evolutionary concepts, preparatory to more advanced courses.

CALENDAR NOTES: Recommended: SCIE 1111.03 Writing for the Sciences.

PREREQUISITES: A grade of C or higher in BIOL 1010.03 or BIOL 1020.03 or BIOL 1031.03 or BIOA 1002.03 and BIOA 1003.03, or SCIE 1506.09 and SCIE 1507.09 or equivalent.

EXCLUSIONS: none

FORMATS: Lecture | Lab

BIOL 2060 Introductory Ecology

CREDIT HOURS: 3

Ecology examines interactions of plants and animals, including humans, with each other and with their non-living world. Topics include population growth, competition, predation, food webs, metapopulation dynamics, biodiversity and ecosystem function. The course has a quantitative approach providing a foundation for further work in ecology, marine biology and environmental science.

PREREQUISITES: A grade of C or higher in BIOL 1011.03 or (BIOL 1021.03, BIOL 1031.03, BIOA 1003.03, ENVS 1100.03, ENVS 1000.06, SCIE 1506.09); and a grade of D or higher in MATH 1060.03 or (STAT 1060.03, MATH 2080.03, STAT 2080.03).

EXCLUSIONS: BIOA 3001.03

FORMATS: Lecture | Lab | Tutorial

BIOL 2111 Dalhousie Science Scholars and Leaders: Becoming a Scientist I

CREDIT HOURS: 0

This course examines the structure of science and situates science majors in the context of the scientific process. The course de-mystifies the language and culture of science. Students will develop skills to help them progress towards a science career. The course also explores the translation of science to society.

CALENDAR NOTES: BIOL 2111.00 and BIOL 2112.03 must be taken in consecutive fall/winter terms.

CROSSLISTED: SCIE 2111

RESTRICTIONS: E1. The course requires permission of instructor. Preference will be given to students in the Dalhousie Science Scholars & Leaders Program. BIOL 2111 will be open to Biology majors. SCIE 2111 will be open to students from other units within the Faculty of Science.

FORMATS: Lecture | Experiential Learning | Other (explain in comments)

BIOL 2112 Dalhousie Science Scholars and Leaders: Becoming a Scientist II

CREDIT HOURS: 3

This course examines the structure of science and situates science majors in the context of the scientific process. The course de-mystifies the language and culture of science. Students will develop skills to help them progress towards a science career. The course also explores the translation of science to society.

CALENDAR NOTES: BIOL 2111.00 and BIOL 2112.03 must be taken in consecutive fall/winter terms.

PREREQUISITES: Pass grade in BIOL 2111 (or SCIE 2111)

CROSSLISTED: SCIE 2112

RESTRICTIONS: E1. The course requires permission of instructor. Students must have been enrolled in BIOL/SCIE2111 in the Fall term. BIOL 2112.03 will be open to Biology majors. SCIE 2112.03 will be open to students from other units within the Faculty of Science.

FORMATS: Lecture | Experiential Learning | Other (explain in comments)

BIOL 2601 The Flora of Nova Scotia

CREDIT HOURS: 3

Introduction to the biodiversity of flowering plants (Angiosperms) found in Nova Scotia. A wide range of plant communities are visited on several day-long field trips. A focus on plant identification is supplemented with lessons in plant ecology, floral biology, pollination mechanisms, natural history, and human uses (e.g., edible, poisonous, medicinal).

CALENDAR NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.

PREREQUISITES: One year of university courses

EXCLUSIONS: BIOL 3219.03

FORMATS: Lecture | Lab

BIOL 2605 Introduction to Marine Life of Nova Scotia

CREDIT HOURS: 3

Introduction to the variety of marine life found in Nova Scotia. The diversity and zonation of invertebrates and macroalgae is explored on field trips to different shore environments, including a salt marsh, rocky shore and sandy beach. Lectures and laboratory-based investigations on live marine organisms complement the field trips.

CALENDAR NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca. Marine Biology students may NOT use this course as part of their major degree requirements. This course is aimed at non-majors who have completed at least one year of university.

PREREQUISITES: One year of university courses

FORMATS: Lecture | Lab

BIOL 3003 Introduction to Field Oceanography

CREDIT HOURS: 3

See course description for OCEA 3003.03 in the Oceanography section of the calendar.

BIOL 3024 Microscopy

CREDIT HOURS: 3

See course description for MICI 3024.03 in the Microbiology and Immunology section of the calendar.

BIOL 3037 Life Rewritten: Applications and Implications of Gene Editing and Synthetic Biology

CREDIT HOURS: 3

This course introduces students to gene editing and synthetic biology tools (eg.CRISPR) as well as both current and future applications of those tools for

conservation, medicine, and food production. This course empowers students to develop informed opinions about the ethics of using such tools in science and society.

PREREQUISITES: A mark of B- or better in both BIOL 2020 (Cell Biology) and BIOL 2030 (Genetics and Molecular Biology) or instructor's consent.

RESTRICTIONS: E1 and E2. Reservation for Biology majors to register first.

FORMATS: Lecture | Discussion | Other (explain in comments)

BIOL 3042 Molecular Ecology

CREDIT HOURS: 3

We survey techniques of molecular genetic analysis and consider how they can be used to identify species, populations, sexes, individuals and family relationships, and study population attributes such as historical dispersal, contemporary connectivity, mating behaviour and effective population size.

Evaluation is based on assignments, a test and a final exam.

PREREQUISITES: A grade of B- or better in each of BIOL 2030.03 (or GENE 2000.03), BIOL 2040.03, and BIOL 2060.03.

CROSSLISTED: MARI 3042.03

EXCLUSIONS: BIOL 4042.03

FORMATS: Lecture

BIOL 3044 Ecological Genetics

CREDIT HOURS: 3

An advanced examination of genetic variation in ecologically important (especially quantitative) traits. Topics will include determining whether a trait is inherited; natural selection in the wild; specialist vs. generalist strategies; how variation is maintained in the face of selection; trade-offs between competing selective pressures and selection for diversification.

PREREQUISITES: BIOL 2040.03 or BIOL 3041.03

EXCLUSIONS: BIOL 4044.03

FORMATS: Lecture

BIOL 3046 Molecular Evolution

CREDIT HOURS: 3

This course examines the process of evolutionary change at the molecular level. It begins with the sources of mutation, and moves on to dynamics of population variation. The course culminates with a macro-evolutionary perspective on topics such as adaptive evolution and genetic co-option. This course is complementary to BIOC 4010.03 (Bioinformatics).

PREREQUISITES: BIOL 2030.03 (or GENE 2000.03) and BIOL 2040.03

FORMATS: Lecture

BIOL 3050 Developmental Biology

CREDIT HOURS: 3

Lectures describe development as a sequence of processes and events, in which 'simple' structures such as fertilized eggs are progressively transformed into complex organisms. These events are governed by developmental 'rules' which have been determined through experimental study of animal and plant model organisms. Laboratories use live material whenever possible.

PREREQUISITES: BIOL 2020.03 (or BIOA 2001.03) and BIOL 2030.03 (or GENE 2000.03)

FORMATS: Lecture | Lab | Discussion

BIOL 3060 Environmental Ecology

CREDIT HOURS: 3

The ecological effects of pollution, disturbance, and other stressors, both anthropogenic and natural. Major subject areas are air pollutants, toxic metals, acidification, eutrophication, oil spills, pesticides, forestry, warfare, urban ecology, risks to biodiversity, and resource degradation. The overarching context of the course is ecological sustainability of the human economy.

PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03) (or see instructor)

FORMATS: Lecture | Tutorial

BIOL 3061 Communities and Ecosystems

CREDIT HOURS: 3

Life exists and evolves in ecosystems which are complex systems. This class studies ecosystems and their food webs from a systems theory approach with an emphasis on network theory and qualitative analysis. Life itself is a networked process. Ecosystems are approached holistically to discover a new set of system properties.

PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03) or INTD 2001.03 or INTD 2002.03

RESTRICTIONS: E1, E2

FORMATS: Lecture

BIOL 3062 Behavioral Ecology

CREDIT HOURS: 3

This course examines animal behaviour from an evolutionary perspective. Using the theory of natural selection as a basis, we will examine foraging, grouping patterns, territorial behaviour, parenting, mating behaviour, social organization, aggression and cooperation. There will be tutorials and essay assignments.

PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03)

FORMATS: Lecture

BIOL 3063 Resource Ecology

CREDIT HOURS: 3

This course considers the ecology, utilization, and management of natural resources in fisheries, wildlife and forest management, agriculture and aquaculture. Topics include population dynamics, community interactions, and ecosystem support of resources as well as the history of resource utilization, practices of controlling production, pests, and predators, and sustainable management strategies.

PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03) and MATH 1000.03 (or MATH 1215.03 or SCIE 1505.18) and STAT 1060.03 (or SCIE 1505.18)

CROSSLISTED: MARI 3063.03

FORMATS: Lecture | Tutorial

BIOL 3065 Conservation Biology

CREDIT HOURS: 3

This course offers an introduction to conservation biology: the science of understanding and conserving biodiversity on Earth. Students learn how biodiversity change is assessed and what tools are used to prevent the extinction of species and the disruption of ecosystems. Tutorials involve oral presentations as well as a written essay, and an in-depth discussion of controversial topics.

PREREQUISITES: BIOL 2060.03 or BIOA 3001.03

FORMATS: Lecture | Tutorial

BIOL 3078 Principles of Animal Physiology Part I

CREDIT HOURS: 3

Lectures on the mechanisms which coordinate the activities of cells within multicellular organisms and permit such organisms to remain in homeostatic balance. The emphasis is on the mechanisms most widely distributed throughout the animal kingdom. The laboratories are designed to illustrate these principles in a variety of organisms.

CALENDAR NOTES: Students must complete 3078.03 before 3079.03

PREREQUISITES: BIOL 2003.03, and BIOL 2020.03 (or BIOA 2001.03)

CROSSLISTED: MARI 3074.03

FORMATS: Lecture | Lab

BIOL 3079 Principles of Animal Physiology Part II

CREDIT HOURS: 3

This course is a continuation of a discussion of the mechanisms which coordinate the activities of cells within multicellular organisms which began in BIOL 3078.03. This term emphasizes the urinary, cardiovascular and respiratory systems. The laboratories reflect the approaches taken to study these systems in a variety of organisms.

PREREQUISITES: BIOL 3078.03 or MARI 3074.03

CROSSLISTED: MARI 3076.03

EXCLUSIONS: BIOA 3005.03

FORMATS: Lecture | Lab

BIOL 3080 The Ecology and Evolution of Fishes

CREDIT HOURS: 3

The class examines selected topics on the ecology and evolution of marine and freshwater fishes. Topics include: phylogeny and systematics; functional morphology and physiology; population biology; life-history evolution; behavior; fisheries science; and conservation biology.

PREREQUISITES: A cumulative GPA of 2.7 (B-) or better in BIOL 2003.03, BIOL 2040.03, BIOL 2060.02 (or BIOA 3001.03)

CROSSLISTED: MARI 3080.03

EXCLUSIONS: BIOL 3067.03, MARI 3067.03, BIOL 5067.03

FORMATS: Lecture

BIOL 3101 Microbial Ecology

CREDIT HOURS: 3

Lectures on the ecology of bacteria, viruses and protists. Community structure, food web nutrient cycling, biogeochemical cycles, competition, succession and symbiosis are discussed with examples from marine, fresh-water and soil habitats. There is an emphasis on marine organisms.

PREREQUISITES: BIOL 2004.03 (or MICI 2100.03), and BIOL 2060.03 (or BIOA 3001.03)

CROSSLISTED: MARI 3101.03

FORMATS: Lecture

BIOL 3102 Microbial Eukaryotes: Biodiversity and Evolution

CREDIT HOURS: 3

Microbial eukaryotes are of tremendous ecological, evolutionary and medical/veterinary importance. This course provides a comprehensive understanding of the biodiversity and evolution of both algal and protozoan eukaryotes, and examines important aspects of their organismal biology, including cell and genome organization, life histories, trophic strategies, locomotion and symbiosis.

PREREQUISITES: BIOL 2020.03 (or BIOA 2001.03) and BIOL 2004.03 (or MICI 2100.03)

FORMATS: Lecture | Lab

BIOL 3219 Flora of Nova Scotia

CREDIT HOURS: 3

Hands-on introduction to the plants of Nova Scotia, with an emphasis on taxonomy and a focus on the flowering plants. Includes identification, morphology, distribution, habitat, and ecology. Takes several day-long and half-day field trips. Evaluation includes a plant collection, field notebook, field report, presentation, and lecture and lab exams.

CALENDAR NOTES: Instructor approval required. Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses.

PREREQUISITES: BIOL 2004.03, and 2060.03, or equivalents

EXCLUSIONS: BIOL 2601.03

FORMATS: Lecture | Lab | Other (explain in comments)

BIOL 3221 Diversity of Algae

CREDIT HOURS: 3

This is a taxonomic introduction to the major algal groups (macrophytic and microscopic) with an emphasis on the marine seaweeds. Basic taxonomic differences are covered, along with an introduction to macrophyte ecology, human uses and symbioses. Laboratory sessions focus on morphology and reproduction.

CALENDAR NOTES: Also offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see <http://www.seaside.science.dal.ca>

PREREQUISITES: BIOL 2004.03 or equivalent

CROSSLISTED: MARI 3221.03

EXCLUSIONS: BIOL 3212.03, MARI 3212.03

FORMATS: Lecture | Lab

BIOL 3225 Plants in the Human Landscape

CREDIT HOURS: 3

The use of plants for human recreation and aesthetic purposes in gardens, public parks, suburban and urban landscapes. Topics include: history of gardens, garden design, plant materials, edible landscaping, plants and human health. The course includes field trips and group work and students complete a design project.

PREREQUISITES: BIOL 1010.03 or BIOL 1020.03 (C+ or better) and BIOL 1011.03 or BIOL 1021.03 (C+ or better); or SCIE 1505.18 (C+ or better) or PLAN 2001.03 (C+ or better) or instructor permission

CROSSLISTED: ENVS 3225, PLAN 3225

FORMATS: Lecture | Tutorial

BIOL 3226 Economic Botany: Plants & Civilization

CREDIT HOURS: 3

The story of the human use of plants for food, fibre and fuel including the botany, domestication, development, distribution, production, processing, history, economic and social impacts of the major world crops (cereals, fruits, vegetables, flowers and industrial crops) and the importance of plants in medicine and conservation.

PREREQUISITES: A grade of B- or higher in BIOL 1010.03 or (BIOL 1020.03 or BIOA 1002.03 or BIOL 1030.03) and BIOL 1011.03 or (BIOL 1021.03, BIOA 1003.03, or BIOL 1031.03); or SCIE 1505.18

CROSSLISTED: ENVS 3226.03

FORMATS: Lecture | Tutorial

BIOL 3301 Invertebrate Biology

CREDIT HOURS: 3

A survey of the diversity, ecology and evolutionary history of the major invertebrate groups. Lectures will emphasize phylogenetics and diversity of body plans. Labs will emphasize identification and anatomy through dissections and observations.

PREREQUISITES: BIOL 2003.03

CROSSLISTED: MARI 3301.03

EXCLUSIONS: BIOL 3321X/Y.06

FORMATS: Lecture | Lab

BIOL 3322 Parasitology

CREDIT HOURS: 3

The course emphasizes the parasite-host relationships, evolution of the parasites and adaptations to the host, modifications of physiology, structure and life cycle for a parasitic existence. Since the most extensive research pertains to parasites of man, the emphasis is on human parasites.

CALENDAR NOTES: Students who took a Biology 1000 level prerequisite prior to September 2013 and did not get a grade of C+ or higher should contact an advisor in the Biology Department preferably before registration begins.

PREREQUISITES: A grade of C+ or higher in BIOL 1010 (or BIOL 1020.03 or BIOA 1002.03) and BIOL 1011.03 (or BIOL 1021.03 or BIOA 1003.03) or SCIE 1505.18

FORMATS: Lecture | Lab

BIOL 3326 Vertebrate Design: Evolution and Function

CREDIT HOURS: 3

Vertebrate Design explores 600 million years of vertebrate evolution and phylogenetic relationships, with particular attention to origins of major groups and the anatomical and functional innovations associated with their rise and diversification. Functional morphology and physiology of swimming, flying and terrestrial locomotion is also covered.

PREREQUISITES: BIOL 2003.03 and BIOL 2040.03

FORMATS: Lecture

BIOL 3327 Entomology

CREDIT HOURS: 3

The course is an introduction to the study of insects. Topics include insect classification, evolutionary diversity, biology, ecology, behaviour, and various applied aspects. Through this survey of the insects, students will gain an appreciation of insect biodiversity as well as their economic and ecological importance.

CALENDAR NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.

PREREQUISITES: BIOL 2003.03

EXCLUSIONS: BIOA 3000.03

FORMATS: Lecture | Lab

BIOL 3328 Medical Entomology

CREDIT HOURS: 3

Medical Entomology covers direct injuries caused by arthropods such as phobias, annoyance, allergies, toxins, venoms and myiasis, arthropod transmission of vertebrate parasites, epidemiology of arthropod-borne diseases. Students study transmission of diseases, methods of surveillance of diseases, management by vector control and other methods of arthropod-borne diseases.

CALENDAR NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For date, times and special registration procedures, see seaside.science.dal.ca.

PREREQUISITES: BIOL 2003.03 or permission of instructor

FORMATS: Lecture | Lab

BIOL 3329 Applied Entomology

CREDIT HOURS: 3

Insects not only comprise more than half of the world's biodiversity, but influence human health and economic well-being in many ways. In this course students are introduced to insect pest management, agricultural, forest and medical entomology, forensic entomology, and insects in food science, beneficial and harmful insects.

CALENDAR NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.

PREREQUISITES: A grade of C+ or higher in BIOL 1010 (or BIOL 1020.03 or BIOA 1002.03) and BIOL 1011.03 (or BIOL 1021.03 or BIOA 1003.03) or SCIE 1505.18

FORMATS: Lecture | Lab

BIOL 3336 Vertebrate Functional Morphology

CREDIT HOURS: 3

Vertebrates are mechanical machines that move through the environment in a wide variety of ways. We use simple physics and mathematics to explore the mechanics and energetics of various modes of terrestrial locomotion, swimming, and flying, and the materials from which vertebrates are built.

PREREQUISITES: BIOL 2003.03 AND MATH 1000.03 or MATH 1215.03

RESTRICTIONS: E1

FORMATS: Lecture

BIOL 3370 Comparative Animal Physiology

CREDIT HOURS: 3

Lecture course examining principles of animal physiology, with emphasis on the coordination of metabolism, neural and sensory function, muscular function, stress, and reproduction, all within the context of ecology and evolution.

PREREQUISITES: BIOL 2003.03, BIOL 2020.03 (or BIOA 2001.03)

CROSSLISTED: MARI 3370

EXCLUSIONS: BIOL 3078, BIOL 3079, MARI 3074, MARI 3076

FORMATS: Lecture

BIOL 3371 Laboratory in Comparative Animal Physiology

CREDIT HOURS: 3

This laboratory intensive course will provide opportunities for students to experience firsthand the role that experimentation, and data collection, interpretation, and communication plays in our understanding of how animals function. Vertebrate and invertebrate examples are used, in a comparative approach, to study a variety of physiological processes.

CALENDAR NOTES: Laboratory experiments involve live invertebrates and/or vertebrate tissues. Students are required to handle live invertebrates during the lab.

PREREQUISITES: Grade of B- or higher in BIOL 3078 or MARI 3074 or BIOL 3370 or MARI 3370; CHEM 1011 and CHEM 1012; STAT 1060 or STAT 2060

CROSSLISTED: MARI 3371

EXCLUSIONS: BIOL 3079, MARI 3076

FORMATS: Lecture | Lab | Tutorial

BIOL 3430 Introduction to Human Histology

CREDIT HOURS: 3

See course description for ANAT 2160.03 in the Anatomy and Neurobiology section of the calendar.

BIOL 3580 Philosophy of Biology

CREDIT HOURS: 3

See course description for PHIL 3420.03 in the Philosophy section of this calendar.

BIOL 3601 Nature Conservation

CREDIT HOURS: 3

This interdisciplinary course explores relationships between humans and the natural world, including damage caused to species and ecosystems. The course looks at environmental ethics and world views, environmental philosophy, sustainability, the cultural expression of natural values (literature, music, art) and conservation science and actions, including the establishment of protected areas.

PREREQUISITES: BIOL 1010.03 (or BIOL 1020.03 or BIOA 1002.03) and BIOL 1011.03 (or BIOL 1021.03 or BIOA 1003.05); or SCIE 15XX, or permission of instructor

FORMATS: Lecture | Tutorial

BIOL 3602 History of Biology

CREDIT HOURS: 3

What was life? This course explores a wide range of human attempts to understand the living world, from ancient accounts of spontaneous generation to atomic-age genetics and ecology.

CROSSLISTED: HSTC 3302

RESTRICTIONS: E1

FORMATS: Lecture | Seminar

BIOL 3614 Field Ecology

CREDIT HOURS: 3

This course provides practical experience in field ecology by collecting, analysing, and interpreting field data and preparing formal reports. Class research projects address questions in animal or plant ecology within intertidal, freshwater or forest ecosystems. Instruction includes data analysis and scientific writing skills. Evaluation is based on individual written papers.

CALENDAR NOTES: Includes several weekend field trips, some overnight camping; contact instructor for details and application; auxiliary fee charged to cover costs of field expenses; course aimed at 4th year majors and 3rd year honours students. Signature required.

PREREQUISITES: BIOL 2060.03 and STAT 1060.03; STAT 2080.03 recommended

RESTRICTIONS: E1, E2

EXCLUSIONS: BIOL 3615.03

FORMATS: Lecture | Lab | Other (explain in comments)

BIOL 3620 Field Survey of Terrestrial Biodiversity

CREDIT HOURS: 3

Measuring and interpreting trends in the biodiversity of organisms in terrestrial environments. Field-intensive, with one week spent camping at a field station. Techniques for identification of major groups (lichens, mosses, higher plants, insects, amphibians, birds, mammals), sampling presence and abundance of species, and relating trends to natural and anthropogenic variation.

CALENDAR NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.

PREREQUISITES: BIOL 2003.03 and BIOL 2060.03 (or BIOA 3001.03) or permission of instructor

FORMATS: Lecture | Lab

BIOL 3622 Ornithology

CREDIT HOURS: 3

Overview of avian biology and techniques for the scientific study of bird populations, including identification by sight and sound. Field-intensive, with 8 days in the field, including one week camping at a field station in southwestern Nova Scotia to conduct research on birds in their natural habitats.

CALENDAR NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.

PREREQUISITES: BIOL 2003.03 or BIOL 2060.03 or BIOA 3001.03, or permission of instructor

FORMATS: Lecture | Lab

BIOL 3623 Applied Coastal Ecology

CREDIT HOURS: 3

Applied Coastal Ecology explores impacts of anthropogenic inputs on structure and function of coastal ecosystems. Through field trips, laboratories and guest demonstrations, students examine ecosystem health, e.g. communities on rocky shores, salt marshes and sandy shores and learn experimental design, principles of environmental assessment and monitoring, and coastal habitat remediation.

CALENDAR NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca. Not offered every year.

PREREQUISITES: BIOL 2003.03 and BIOL 2060.03 (or BIOA 3001.03)

CROSSLISTED: ENVS 3623.03, MARI 3623.03

FORMATS: Lecture | Lab

BIOL 3624 Urban Freshwater Systems

CREDIT HOURS: 3

Ecology of urban freshwater systems with a focus on understanding how they respond to human-caused stresses within their watersheds. Students conduct case studies at nearby lakes and/or streams to monitor water quality and characterize resident communities of plants and animals. Evaluation is based on individual and group research reports.

CALENDAR NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.

PREREQUISITES: BIOL 2060.03 or BIOA 3001.03 and MATH 1060.03 (or STAT 1060.03 or DISP) or permission of instructor

CROSSLISTED: ENVS 3624.03

FORMATS: Lecture | Lab

BIOL 3626 Field Studies of Marine Mammals

CREDIT HOURS: 3

Hands-on introduction to research on marine mammals. Lectures provide an overview of marine mammal adaptations, evolution, population biology, social

organization, conservation, and management. Labs include a necropsy and techniques of photographic identification of individuals. On a several-day camping trip, students observe marine mammals from whale-watch boats and conduct research projects.

CALENDAR NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.

PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03) and BIOL 3062.03 (or BIOL 3630.03 or PSYO 2160.03), and MATH 1060.03/STAT 1060.03

CROSSLISTED: MARI 3626.03

FORMATS: Lecture | Lab

BIOL 3628 Marine Ornithology

CREDIT HOURS: 3

Overview of the biology of birds in marine environments. Seabird ecology, evolution, adaptations, identification, and natural history. Tools and techniques for studying their behaviour, diet, and populations in the field. Lectures, exercises, and a week-long field trip to Maritime seabird breeding colonies. Student team and independent research projects and presentations.

CALENDAR NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.

PREREQUISITES: BIOL 1010 or BIOL 1020 or equivalent, and BIOL 1011 or BIOL 1021 or equivalent, or SCIE 15XX, one of BIOL 2003 or BIOL 2004, and BIOL 2060, or instructor's permission. Knowledge of statistics, Geographic Information Systems (GIS), and familiarity with Excel spreadsheets are helpful, but not required, for research projects.

CROSSLISTED: MARI 3628.03

BIOL 3630 Field Methods in Animal Behaviour

CREDIT HOURS: 3

First-hand experience in studying animal behaviour in the field. Day-long field exercises teach basic methods, then students plan, conduct, write up, and orally present a 5-day project of their own.

CALENDAR NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.

PREREQUISITES: BIOL 3062.03 or PSYO 2160.03 or PSYO 3160X/Y.06 or permission of instructor

FORMATS: Lecture | Lab

BIOL 3632 Applied Field Methods in Fish Ecology

CREDIT HOURS: 3

Practical experience conducting field research on fishes with field trips to streams and shallow water marine/freshwater habitats. Techniques include collecting fish, designing and conducting surveys, studying behaviour, measuring phenotypic variability, quantifying temporal and spatial variation, planning for statistical analysis, and weighing tradeoffs between data quality, quantity, costs and ethical/environmental considerations.

CALENDAR NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.

PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03) and STAT 1060.03 (or MATH 1060.03 or SCIE 1505), or their equivalents, or permission of instructor. STAT 2080 is recommended.

CROSSLISTED: MARI 3632.03, ENVS 3632.03

FORMATS: Lecture | Lab

BIOL 3633 Spatial Information and GIS in Ecology

CREDIT HOURS: 3

A hands-on approach to understanding and using spatial information, this course introduces students to Geographic Information Systems (GIS) as a tool to answer ecological questions. Together, students conduct a major field project, collecting data, creating maps using GIS, and interpreting spatial patterns, to address an applied problem in ecology.

CALENDAR NOTES: Offered in the summer through **SEASIDE**. an auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.

PREREQUISITES: BIOL 2060.03 or BIOA 3001.03

CROSSLISTED: ENVS 3633.03, GEOG 3633.03, MARI 3633.03

EXCLUSIONS: PLAN 2006.03, GEOG 2006.03

FORMATS: Lecture | Lab

BIOL 3634 Agroforestry

CREDIT HOURS: 3

Agroforestry is a land-use system in which trees or shrubs are grown in association with agricultural crops or livestock. As practiced in the tropics, agroforestry generates numerous ecological, environmental and economic benefits. This hands-on, field-intensive course provides a foundation for understanding this traditional practice and its applications in North America.

CALENDAR NOTES: Offered in summer through **SEASIDE**. an auxiliary fee is charged to cover field expenses. For dates, times, and special registration procedures, see seaside.science.dal.ca

PREREQUISITES: BIOL 2060.03 or AGRI 1000.03 or BIOA 3001.03 or permission of the Instructor. An additional class on the biology, ecology, diversity or physiology of plants is recommended.

BIOL 3635 Species at Risk Field Course

CREDIT HOURS: 3

This course provides practical field experience in the biology of Species at Risk (SAR). Students learn through lectures, presentations, field work, and writing a formal report. On a week-long field trip to Southwestern Nova Scotia, students learn from SAR biologists how to conduct field surveys, document data, and recover SAR.

CALENDAR NOTES: Intensive summer field course. Field trip to Southwestern NS for 7-9 days. Auxiliary fee charged to cover field expenses. Application and deposit required for permission to register. See www.seaside.science.dal.ca for details.

PREREQUISITES: BIOL 2003.03 or BIOL 2004.03; and BIOL 2060.03. BIOL 3065.03 is recommended.

CROSSLISTED: MARI 3635.03

RESTRICTIONS: Requires permission of instructor

FORMATS: Lecture | Lab | Other (explain in comments)

BIOL 3639 Herpetology

CREDIT HOURS: 3

Through a combination of lectures, labs and field activities, this course provides an overview of the global diversity, evolution, ecology and conservation of herpetofauna (amphibians and reptiles), and the natural history and identification of Nova Scotian herpetofauna. Students gain experience with common field research and monitoring techniques for herpetofauna.

CALENDAR NOTES: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca

PREREQUISITES: BIOL 2060.03, BIOL 2003.03

FORMATS: Lecture | Lab | Other (explain in comments)

BIOL 3640 Tropical Ecology and Biodiversity Field Class

CREDIT HOURS: 6

Hands-on introduction to tropical ecology, biodiversity, and conservation. Includes an 18-day field trip to Sri Lanka to visit a variety of tropical terrestrial and aquatic ecosystems, quantify habitats, identify species, and study agroforestry, ecological interactions and animal behavior. Evaluation includes lecture tests, field notebooks, class research projects, presentations and reports.

CALENDAR NOTES: Offered in summer through SEASIDE. Special application procedure. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see: seaside.science.dal.ca.

PREREQUISITES: BIOL 2003.03 and BIOL 2004.03 or equivalent and BIOL 2060 or equivalent or instructor's permission. An introductory course in statistics (STAT 1060.03 or similar) is recommended.

BIOL 3664 Intertidal Ecology and Diversity

CREDIT HOURS: 3

Hands-on, intensive introduction to ecological research on rocky shores, tidal flats, and sandy beaches. Relevant ecological concepts, sampling techniques for flora and fauna, and statistical skills are learned. Field sampling on day and camping trips is followed by lab work (e.g., identification of seaweeds, invertebrates), statistical analysis, and report preparation.

CALENDAR NOTES: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.

PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03), and STAT 1060.03 (or MATH 1060.03 or SCIE 15xx), and BIOL 2003.03

CROSSLISTED: ENVS 3664.03, MARI 3664.03

EXCLUSIONS: BIOL 3662.03, BIOL 3663.03

FORMATS: Lecture | Lab

BIOL 3680 Scientific Diving Methods for Marine Ecology

CREDIT HOURS: 3

This course introduces students that are certified divers to the practice of underwater research using SCUBA. It combines lectures with supervised dives in various marine habitats to demonstrate the application of standard sampling and experimental procedures in marine ecology, with an emphasis on logistical considerations and diving safety.

CALENDAR NOTES: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.

PREREQUISITES: BIOL 2003.03, BIOL 2060.03 or BIOA 3001.03, STAT 1060.03 or DISP, internationally recognized diving certification, diving physical; recommended: BIOL 3321.03, BIOL 3301.03

CROSSLISTED: MARI 3680.03

FORMATS: Lecture | Lab

BIOL 3761 Marine Ecology

CREDIT HOURS: 3

Building upon an understanding of basic ecological and evolutionary principles, and a familiarity with the major marine invertebrate and algal taxa, this course examines patterns and processes at the organismal, population and community levels that determine the diversity and distribution of life in the sea.

PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03) and (BIOL 2003.03 or BIOL 2004.03), and OCEA 2000X/Y.06 or (OCEA 2001.03 and OCEA 2002.03)

CROSSLISTED: MARI 3761.03

RESTRICTIONS: This course is restricted to 3rd and 4th year students.

FORMATS: Lecture

BIOL 3762 Terrestrial Ecology

CREDIT HOURS: 3

This course provides a conceptual framework for understanding the function of terrestrial ecosystems. One week at a field station in Nova Scotia provides practical experience with forest, bog and agroecosystems. Topics include soil profiles and nutrients; plant productivity and interactions; and ecological roles of microorganisms, lichens, fungi, insects, and vertebrates.

CALENDAR NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times, and special registration procedures see seaside.science.dal.ca

PREREQUISITES: BIOL 2003.03 or BIOL 2004.03 , and BIOL 2060.03 (or BIOA 3001.03), or instructor's permission.

FORMATS: Lecture | Lab

BIOL 3800 Experiential Learning

CREDIT HOURS: 3

Experiential Learning recognizes the learning experience relevant to the program outside the scheduled curriculum. Students are responsible for drafting a learning agreement with the course coordinator and supervisor to specify learning outcomes, activities designed to accomplish these outcomes, a quantifiable assessment strategy and a timetable.

CALENDAR NOTES: To register in this course, a student must first find a suitable supervisor and sign a learning agreement between the course coordinator, the student and the supervisor.

PREREQUISITES: Students must be registered in a Biology or Marine Biology program, have completed a minimum of 18 credit hours in Biology above the 1000 level and have a minimum cumulative GPA of 2.4 or permission of course coordinator.

CROSSLISTED: MARI 3800.03

EXCLUSIONS: Scheduled courses at a learning institution, study that would qualify for a Special Topics course, an Honours project, co-op work terms and paid work. Only one experiential learning course per degree is permitted.

BIOL 3872 The Biologist's Toolkit

CREDIT HOURS: 3

Best practices for scientific computing and data handling, theory of visualisation, and scripting, teaching students how to create, store, and manipulate data using the object-oriented programming language R. Examples and projects will be drawn from a wide variety of biological areas, covering typical problems encountered with computer use.

CALENDAR NOTES: This course is aimed at biology and marine biology majors who are looking to pursue future research in any discipline.

PREREQUISITES: BIOL 2030.03 or BIOL 2040.03 or BIOL 2060.03 or permission of Instructor

FORMATS: Lecture | Lab

BIOL 4001 Environmental Impact Assessment

CREDIT HOURS: 3

This course serves as the capstone to the EIA certificate. It is a hands-on training course that guides students through a nine-step framework for preparing individual EIAs on a physical project as well as a Strategic Environmental Assessment on a policy. International, national, provincial examples illustrate the framework.

CALENDAR NOTES: All students taking BIOL 4001.03 or ENVS 4001.03 must have completed 90 credit hours and be in their fourth year of study, or have permission of instructor.

PREREQUISITES: ENVS 1100.03 and 1200.03 (or ENVS 1000X/Y.06) or BIOL 2060.03 (or BIOA 3001.03) or EARTH 2410.03 or GEOG 2100X/Y.06 or GEOG 2201.03 or GEOG 2202.03 or INTD 2001.03 or INTD 2002.03 or OCEA 2000X/Y.06 (or OCEA 2001.03 and OCEA 2002.03) or SUST 2000.06 or SUST 2001.06

CROSSLISTED: ENVS 4001.03

RESTRICTIONS: E1, E2, and E3 This course is open to all students with the necessary prerequisites regardless of whether they are applying for the EIA certificate or not.

FORMATS: Lecture | Tutorial

BIOL 4002 The Science of Wetland Ecosystems

CREDIT HOURS: 3

See ENVS 4002.03 in the Environmental Science section of the calendar.

BIOL 4003 Indigenous perspectives in conservation biology

CREDIT HOURS: 3

This two week field course takes a holistic approach to conservation biology. Paradigms and frameworks in native science are discussed in conservation study hotspots, in outdoor and indoor classrooms, and laboratories in First Nations' territories. Native knowledge systems from Turtle Island are explored to highlight the roles and duties indigenous peoples have with attention to Canada's colonial framework and the treaties.

CALENDAR NOTES: Intensive summer field course. Multiple overnight trips. Auxiliary fee charged to cover field expenses. Application and deposit required for permission to register. See www.seaside.science.dal.ca for details.

RESTRICTIONS: Requires permission of instructor

EXCLUSIONS: E1, E2

FORMATS: Lecture | Lab | Experiential Learning | Other (explain in comments)

BIOL 4004 Principles of Indigenous Medicine

CREDIT HOURS: 3

A holistic, two-eyed seeing course highlighting indigenous medicine's principles in ceremony, concepts of health and wellness, biochemistry, ethnopharmacology, practice and discovery. This course introduces indigenous ways of knowing medicine, important natural products, their biosynthesis, the drug discovery process, synthetic biology and indigenous style formulations and medicine practices.

PREREQUISITES: Recommend that students have completed the second year requirements of a degree program. Override permitted with instructor permission.

CROSSLISTED: Grad

EXCLUSIONS: E1: 30 Credit hours

FORMATS: Lecture | Discussion | Experiential Learning

BIOL 4020 Advanced Cell Biology

CREDIT HOURS: 3

This advanced class focuses on how the animal cell interacts with its environment and integrates information to proceed with an appropriate course of action. Consequences of disrupting signaling pathways are also examined. Lectures are supplemented with assigned readings of original research articles for discussion in class.

PREREQUISITES: BIOL 2020.03 or BIOA 2001.03 with a minimum grade of B- or instructor's consent.

EXCLUSIONS: BIOL 3020.03

FORMATS: Lecture | Discussion

BIOL 4035 Human Genetics

CREDIT HOURS: 3

See BIOC 4835 in the Biochemistry section of the calendar.

BIOL 4039 Special Topics

CREDIT HOURS: 3

Enables students to study an area of Biology or Marine Biology not covered in other courses. Students should consult with the faculty member to arrange the topic of study and develop an outline of course content, which must be approved by the Chair of the Biology Undergraduate Curriculum Committee.

CALENDAR NOTES: Registration in Special Topics can only be approved by the Chair of the Biology Undergraduate Curriculum Committee or their designate. The course outline must be submitted for approval no later than one week after the start of the term in which the student wishes to register. For forms and more information see <https://www.dal.ca/faculty/science/biology/programs/undergraduate.html>

BIOL 4061 Design of Biological Experiments

CREDIT HOURS: 3

This course introduces students with previous training in univariate statistics to the practice and pitfalls of experimental design and data analysis in biology. Lectures and take-home exams are used to demonstrate the fundamentals of design and analysis, with emphasis on potential problems and how they are overcome.

PREREQUISITES: MATH 2080.03 or STAT 2080.03 or ECON 2280.03 (Grade of B+ or higher); offered to well prepared honours students as well as graduate students

FORMATS: Lecture

BIOL 4062 Analysis of Biological Data

CREDIT HOURS: 3

The course introduces students to techniques available for the analysis of biological data, including regression, general linear models and multivariate methods. Emphasis is on the practical use of these techniques rather than derivations. Students analyze real and realistic data sets, and are assessed on write-ups of these analyses.

PREREQUISITES: (STAT 2080.03 or MATH 2080.03) and BIOL 3872.03

BIOL 4065 Sustainability and Complexity

CREDIT HOURS: 3

Sustainability is a transdisciplinary area integrating equitable societies, protected environments, and robust economies. Achieving sustainability is a challenge that has only had limited success in our complex world. Complexity studies offer new approaches for achieving sustainability beyond the traditional ones mostly focused upon reducing unsustainability.

CALENDAR NOTES: Course open to students in: Faculty of Science, College of Sustainability, and International Development students in FASS

PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03) or EARTH 2410.03 or GEOG 2100X/Y.06 or GEOG 2201.03 or GEOG 2202.03 or INTD 2001.03 or INTD 2002.03 or OCEA 2001.03/2002.03 (or OCEA 2000X/Y.06) or SUST 2000.06 or SUST 2001.06

RESTRICTIONS: E1, E2, E3 Restricted to students in: Faculty of Science, College of Sustainability and International Development students in FASS

FORMATS: Lecture | Tutorial | Discussion

BIOL 4069 Statistical Rethinking: Applied Bayesian Statistics

CREDIT HOURS: 3

This course, which uses Richard McElreath's popular 'Statistical Rethinking' book as a foundation, provides a broad introduction to applied Bayesian models using R or Python. Examples are drawn from Biology and Social Science, in contexts designed to be widely applicable to analysis of observational data across disciplines.

CALENDAR NOTES: Course is aimed at non-stats majors seeking to do applied statistical work, primarily in Biology but including other disciplines;

Students majoring in statistics (including Honours, Majors, Combined Honours and Double Majors programs) cannot receive STAT course credit for this course. Students Minorng in Statistics can count this as a 3000 level STAT course credit.

PREREQUISITES: STAT 2060.03 OR STAT 2080.03 AND One of: STAT 2450.03, CSCI 2202.03, BIOL 3872.03, MARI 4600.03

CROSSLISTED: STAT 3069.03

FORMATS: Lecture

BIOL 4071 Physiological adaptations for breeding in birds

CREDIT HOURS: 3

This course provides an overview of female avian reproductive physiology and ecology, with an emphasis on individual variation in life-history traits. It will describe the physiological, metabolic, energetic, and hormonal mechanisms that underpin individual variation in the key female-specific reproductive traits, and the trade-offs amongst these traits that determine variation in fitness.

PREREQUISITES: BIOL 3062.03 and BIOL 3078.03

FORMATS: Lecture | Other (explain in comments)

BIOL 4080 Laboratory Studies of Fishes

CREDIT HOURS: 3

Through a series of laboratory exercises, the course provides students with practical experience on various topics related to the study of ichthyology. Topics shall include the following: species identification; meristics and morphometrics; use of dichotomous keys; internal and external morphology; ageing and growth determination; ecomorphological attributes; data collection and analysis.

PREREQUISITES: BIOL 3080.03 or MARI 3080.03

CROSSLISTED: MARI 4080.03

EXCLUSIONS: BIOL 3067.03, MARI 3067.03, BIOL 5067.03

FORMATS: Lab

BIOL 4141 Advances in Biological Oceanography

CREDIT HOURS: 3

This course explores major advances in biological oceanography through analysis and discussion of influential historical and recent cutting-edge papers from the scientific literature. The course will be delivered through a combination of student presentations, class discussions, and invited speakers.

CALENDAR NOTES: BIOL 4141 can be taken after or concurrently with OCEA 4140.03 or (OCEA 5140.03 or BIOL 4661.03 or MARI 4661.03)

COREQUISITES: OCEA 4140.03 or permission of instructor.

CROSSLISTED: OCEA 4141.03

RESTRICTIONS: E3

EXCLUSIONS: MARI 4141.03, BIOL 5141.03

FORMATS: Seminar

BIOL 4160 Political Ecology

CREDIT HOURS: 3

Political ecology (PE) examines the politics of the environment but not on specific policies, political theories, or ideologies. PE considers an interacting array of political and socio-economic forces that shape human-environmental relationships. International case studies will be evaluated using several PE tools. Discussion format with Blackboard Learning/Internet assignments.

PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03), and one of BIOL 3003.03, BIOL 3060.03, BIOL 3061.03, BIOL 3062.03, BIOL 3063.03, BIOL 3065.03, BIOL 3067.03, BIOL 3069.03, BIOL 3101.03, BIOL 3601.03, BIOL 3623.03, BIOL 3624.03, BIOL 3761.03, BIOL 3762.03, or INTD 2001 or INTD 2002 or permission of instructor

FORMATS: Discussion

BIOL 4220 Plant Cell Biology

CREDIT HOURS: 3

This course covers the structure, function, and dynamic properties of plant cellular components including constituent organelles, cytoskeleton, and the cell wall. Current areas of research such as programmed cell death, cell signalling and cellular trafficking are discussed in depth. The course consists of lectures, student seminars, and report writing.

PREREQUISITES: BIOL 2020.03 (or BIOA 2001.03) and BIOL 2004.03 or permission of the instructor

FORMATS: Lecture

BIOL 4302 Clinical and Molecular Immunology

CREDIT HOURS: 3

See course description for MICI 4302.03 in the Microbiology and Immunology section of this calendar.

BIOL 4323 Biologging & Biotelemetry in Ecology

CREDIT HOURS: 3

This course explores the fundamentals and applications of biologging and biotelemetry: the use of electronic tags to study free-ranging animals and their environment. Students are introduced to the wide range of tags and their diverse applications in biology.

PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03), or PSYO/NESC 2160.03 or permission of the instructor.

CROSSLISTED: MARI 4323.03

FORMATS: Lecture | Lab

BIOL 4335 Environmental Impacts in Marine Ecosystems

CREDIT HOURS: 3

See course description for OCEA 4335.03, in the Oceanography section of this calendar.

BIOL 4369 Fisheries Oceanography

CREDIT HOURS: 3

See course description for OCEA 4160.03 in the Oceanography section of this calendar.

BIOL 4370 Deep Sea Biology

CREDIT HOURS: 3

See course description for MARI 4370.03 in the Marine Biology section or OCEA 4370.03 in the Oceanography section of this calendar.

PREREQUISITES: (BIOL 2060 or BIOA 3001) and OCEA 2000 or (OCEA 2001 and OCEA 2002)

BIOL 4500 The Evolution of Life Histories

CREDIT HOURS: 3

Life history describes how reproductive effort changes with age to create strategies that influence survival and reproduction. Life-history research is fundamental to population ecology, evolutionary biology, sustainable harvesting, and conservation biology. Life-history theory provides an explanatory/predictive framework for understanding why organisms differ in how they propagate genes to future generations.

CALENDAR NOTES: This course is restricted to 4th year students

PREREQUISITES: Minimum of B- in each of BIOL 2003.03, BIOL 2040.03, and BIOL 2060.03 or Instructor's approval. One of BIOL 3044.03, BIOL 3060.03, or BIOL 3080.03 is strongly recommended.

RESTRICTIONS: E1, E2, E3
FORMATS: Lecture

BIOL 4510 Cultural Evolution

CREDIT HOURS: 3

Culture is socially learned and group-specific information or behaviour. This course explores the nature of culture across the animal kingdom, how it evolves, and its relationship to ecology, genetic evolution and conservation. Students consider and discuss the controversies and uncertainties as to the role of culture in biology.

PREREQUISITES: BIOL 2040.03, and BIOL 3062.03 or PSYO 3162.03

FORMATS: Lecture | Discussion | Other (explain in comments)

BIOL 4661 Biological Oceanography

CREDIT HOURS: 3

See course description for OCEA 4140.03, in the Oceanography section of this calendar.

PREREQUISITES: OCEA 2000 or (OCEA 2001 and OCEA 2002) and OCEA 2020 and OCEA 2021

BIOL 4662 Biology of Phytoplankton

CREDIT HOURS: 3

This is an upper-division course on the phytoplankton in the context of their evolutionary history and ecological diversity, with an emphasis on their adaptations and acclimation to different environments and their role in food webs and in biogeochemical cycling.

PREREQUISITES: MATH 1000.03 (or MATH 1215.03) and MATH 1010.03 or equivalent, and OCEA 2001.03 and OCEA 2002.03; or permission of Instructor

CROSSLISTED: OCEA 4230, OCEA 5230, MARI 4662

EXCLUSIONS: E1, E2

FORMATS: Lecture | Discussion

BIOL 4664 History of Marine Sciences

CREDIT HOURS: 3

See course description for MARI 4664.03 in the Marine Biology section, or SCIE 4001.03 in the Science, Interdisciplinary section of this calendar.

BIOL 4666 Benthic Ecology

CREDIT HOURS: 3

See course description for OCEA 4330.03 in the Oceanography section of the calendar.

BIOL 4806 Independent Research I

CREDIT HOURS: 3

Students conduct supervised, independent research in Biology. The student and faculty supervisor together develop a course outline, with a proposal for original research and the method of evaluation, including a formal research paper. Outline must be approved by the course coordinator before the student is permitted to register.

CALENDAR NOTES: This course is intended for Biology or Marine Biology majors in their fourth year of study. The signature required to register can only be given by the Chair of the Biology Undergraduate Curriculum Committee or their designate. The course outline must be submitted for approval no later than one week after the start of the term in which the student wishes to register. For forms and more information see

<https://www.dal.ca/faculty/science/biology/programs/undergraduate.html>

PREREQUISITES: Signature required

FORMATS: Other (explain in comments)

BIOL 4807 Independent Research II

CREDIT HOURS: 3

Students conduct supervised, independent research in Biology. The student and faculty supervisor together develop a course outline, with a proposal for original research and the method of evaluation, including a formal research paper. Outline must be approved by the course coordinator before the student is permitted to register.

CALENDAR NOTES: This course is intended for Biology or Marine Biology majors in their fourth year of study. The signature required to register can only be given by the Chair of the Biology Undergraduate Curriculum Committee or their designate. The course outline must be submitted for approval no later than one week after the start of the term in which the student wishes to register. For forms and more information see

<https://www.dal.ca/faculty/science/biology/programs/undergraduate.html>

PREREQUISITES: Signature required
FORMATS: Other (explain in comments)

BIOL 4809 Independent Research III

CREDIT HOURS: 3

Students conduct supervised, independent research in Biology. The student and faculty supervisor together develop a course outline, with a proposal for original research and the method of evaluation, including a formal research paper. Outline must be approved by the course coordinator before the student is permitted to register.

CALENDAR NOTES: This course is intended for Biology or Marine Biology majors in their fourth year of study. The signature required to register can only be given by the Chair of the Biology Undergraduate Curriculum Committee or their designate. The course outline must be submitted for approval no later than one week after the start of the term in which the student wishes to register. For more information see

<https://www.dal.ca/faculty/science/biology/programs/undergraduate.html>

PREREQUISITES: Signature required

FORMATS: Other (explain in comments)

BIOL 4811 Special Topics

CREDIT HOURS: 3

Enables students to study an area of Biology or Marine Biology not covered in other courses. Students should consult with the faculty member to arrange the topic of study and develop an outline of course content, which must be approved by the Chair of the Biology Undergraduate Curriculum Committee.

CALENDAR NOTES: Registration in Special Topics can only be approved by the Chair of the Biology Undergraduate Curriculum Committee or their designate. The course outline must be submitted for approval no later than one week after the start of the term in which the student wishes to register. For forms and more information see <https://www.dal.ca/faculty/science/biology/programs/undergraduate.html>

PREREQUISITES: Signature required

BIOL 4850 Geographic Information Science Research Project

CREDIT HOURS: 3

Students learn how to design, manage and complete a research project in Geographic Information Science (GIS). Projects must include a substantive analytical component where GIS is central to methods employed. Evaluation includes a written report, oral presentation and digital data. Required for completion of the Certificate in GIS.

COREQUISITES: EARTH 4520.03/GEOG 4520.03

PREREQUISITES: ENVS 3500 or EARTH3500 or GEOG 3500

CROSSLISTED: ENVS 4850/ERTH 4850/GEOG 4850/SCIE 4850

RESTRICTIONS: This course is restricted to 3rd and 4th year students.

BIOL 4880 Communicating science for societal impact

CREDIT HOURS: 3

This class is for students interested in communicating scientific content with relevance to society, contributing to positive change. We aim to build skills to reach media, decision makers, regulators, and the public. The emphasis will be on communicating findings effectively and developing critical skills in science communication and scientific leadership.

CROSSLISTED: MARI 4880

RESTRICTIONS: E3

FORMATS: Lecture | Tutorial | Experiential Learning

BIOL 4901 Honours Research and Thesis I

CREDIT HOURS: 3

This course is required of, and restricted to, all Biology Honours programs in which Biology is the major area of study. Students conduct a research project supervised by a research scientist and attend weekly meetings of the class. The classes (BIOL 4901.03 and BIOL 4902.03) are taken in the students' final year.

CALENDAR NOTES: BIOL 4901.03 and BIOL 4902.03 must be taken in consecutive fall/winter terms, or winter/fall terms (co-op only). Grades will not be recorded for either course until both have been completed, and the final Honours Thesis has been evaluated.

RESTRICTIONS: Students in the Biology Honours Programme, normally in their final year of study.

EXCLUSIONS: BIOL 4900.06, MARI 4900.06

FORMATS: Other (explain in comments)

BIOL 4902 Honours Research Thesis II

CREDIT HOURS: 3

This course is required of, and restricted to, all Biology Honours programs in which Biology is the major area of study. Students conduct a research project supervised by a research scientist and attend weekly meetings of the class. The classes (BIOL 4901.03 and BIOL 4902.03) are taken in the students' final year.

CALENDAR NOTES: BIOL 4901.03 and BIOL 4902.03 must be taken in consecutive fall/winter terms, or winter/fall terms (co-op only). Grades will not be recorded for either course until both have been completed, and the final Honours Thesis has been evaluated.

RESTRICTIONS: Students in the Biology Honours Programme, normally in their final year of study.

EXCLUSIONS: BIOL 4900.06, MARI 4900.06

FORMATS: Other (explain in comments)

BIOL 8891 Co-op Work Term I

CREDIT HOURS: 0

PREREQUISITES: SCIE 2800.03

BIOL 8892 Co-op Work Term II

CREDIT HOURS: 0

PREREQUISITES: SCIE 2800.03, BIOL 8891.00

BIOL 8893 Co-op Work Term III

CREDIT HOURS: 0

PREREQUISITES: SCIE 2800.03, BIOL 8892.00

BIOL 8894 Co-op Work Term IV

CREDIT HOURS: 0

PREREQUISITES: SCIE 2800.03, BIOL 8893.00

Introduction

Chemistry is often called the central science because of its relevance to so many other disciplines. Understanding the composition and properties of matter, as well as the manner in which one substance is transformed into another, is essential to the study of our physical and natural worlds. As such, chemistry is often a starting point for many different careers in science. A variety of programs are available, ranging from focused studies to interdisciplinary options to suit the interests of the student.

A chemistry degree involves considerable breadth of training in the major branches of chemistry. These include organic, inorganic, physical, analytical and biological chemistry. In addition to establishing a solid foundation in the fundamental principles of chemistry, students who undertake a chemistry degree develop essential skills that include problem solving, critical thinking, organization, data analysis, and written and oral communication. The laboratories associated with courses develop the necessary experience with laboratory procedures, equipment and safety, and serve to reinforce the concepts learned in lecture.

Degree Programs

The Department of Chemistry offers the following degree programs in Chemistry

- BSc or BA (120 credit hour) Honours (Concentrated)*
- BSc or BA (120 credit hour) Combined Honours*
- BSc or BA (120 credit hour) Major*
- BSc or BA (120 credit hour) Double Major*
- BSc or BA (90 credit hour) Minor in Chemistry
- Minor in Chemistry

* BSc [Co-op option available](#)

* May be combined with Minor programs from other disciplines

Departmental requirements for each degree program can be seen by following the links in the menu to the right.

In addition to departmental requirements, students must satisfy the requirements outlined in the [Academic Regulations](#) and the [College of Arts and Science Degree Requirements](#) sections. Students are advised that a number of requirements differ for the BA and BSc degrees.

A student is governed by the academic regulations in place at the time of initial enrolment in the Faculty of Science, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects; otherwise the student should consult the calendar of the appropriate year.

The 120 credit hour Concentrated Honours and Major degrees, as well as corresponding Co-op programs, are accredited by the Canadian Society for Chemistry (CSC). CSC accreditation ensures that graduates of these programs have met certain criteria concerning the quantity and quality of their instruction. It qualifies such graduates for membership in the CSC and to practice chemistry as professionals.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with a Chemistry undergraduate academic advisor.

Students who participated in the Integrated Science Program in their first year should consult the Undergraduate Calendar for first year course equivalencies.

Staff

Dean

Macdonald, C.L.B., BSc (Hons), PhD (Dalhousie), Professor (Chemistry)

Chairperson of Department

Schepp, N. P., BSc, PhD (Toronto).

Undergraduate Advising

To contact a Chemistry academic advisor, please go to the Chemistry Main Office (Chemistry Room 212), phone 902-494-3305 or visit the Chemistry Website (www.dal.ca/faculty/science/chemistry.html)

Professors Emeriti

Aue, W. A., PhD (Vienna). FCIC

Becke, A. D., BSc (Queen's), MSc, PhD (McMaster). FRSC, FRS, FCIC, Harry Shirreff Professor of Chemical Research (Emeritus)

Boyd, R. J., BSc (UBC), PhD (McGill). FCIC

Burnell, D. J., BSc, MSc (Carleton), PhD (UNB).

Kwak, J. C. T., BSc, MSc, PhD (Amsterdam). FCIC

White, M. A., BSc (Western), PhD (McMaster). OC, FRSC, Harry Shirreff Professor of Chemical Research (Emerita) and cross-appointment with Physics and Atmospheric Science

Professors

Andreas, H. A., BSc, PhD (Calgary).

Bearne, S. L., BSc (Acadia), PhD (Toronto), MDCM (McGill). Cross-appointment from Biochemistry and Molecular Biology

Doucette, A. A., BSc (Dalhousie), PhD (Alberta).

Freund, M., BSc, PhD (Florida). Cross-appointments with Physics and Atmospheric Science, Electrical & Computer Engineering, and Process Engineering. Harry Shirreff Chair of Chemical Research & Director of the Clean Technologies Research Institute

Jakeman, D. L., BSc, PhD (Sheffield). Cross-appointment from College of Pharmacy

Johnson, E. R., BSc (Carleton), PhD (Queen's). Cross-appointment with Physics and Atmospheric Science. Herzberg-Becke Chair in Theoretical Chemistry
Macdonald, C. L. B., BSc, PhD (Dalhousie). Dean, Faculty of Science
Obrovac, M. N., BSc (Simon Fraser), MSc, PhD (Dalhousie). Cross-appointment with Physics and Atmospheric Science. NSERC/Novonix Industrial Research Chair in Metal Ion Batteries
Rainey, J. K., BSc (Guelph), MSc, PhD (Toronto). Cross-appointment from Biochemistry and Molecular Biology.
Stradiotto, M., BSc, PhD (McMaster). FRSC, Alexander McLeod Professor of Chemistry & Arthur B. MacDonald Research Chair (CRC Tier-I Equivalent)
Thompson, A., BSc (Leicester), PhD (Sheffield). Cross-appointment with Faculty of Engineering General. Tier 1 Canada Research Chair in Pyrrole Chemistry for Chemical Biology and Energy
Turculet, L., BSc (MIT), PhD (Berkeley).
Zhang, P., BSc, MSc (Jilin Univ, China), PhD (Western). Cross-appointment with School of Biomedical Engineering
Zwanziger, J. W., BA (Chicago), PhD (Cornell). Cross-appointment with Physics and Atmospheric Science. Canada Research Chair in NMR Studies of Materials

Associate Professors

Chitnis, S. S., BAsC (McMaster), PhD (Victoria).
Cozens, F. L., BSc (York), PhD (Toronto).
Dasog, M., BSc (Saskatchewan), PhD (Alberta). Izaak Walton Killam Memorial Research Chair
Schepp, N. P., BSc, PhD (Toronto).
Speed, A. W., BSc (Dalhousie), PhD (Harvard).

Assistant Professors

Charron, C.L., BSc (Dalhousie), PhD (Western).
MacDonell, R.J., BSc (Carleton), PhD (Ottawa).
Metzger, M., BSc, PhD (Technical Univ of Munich, Germany). Cross-appointment from Physics and Atmospheric Science
Yang, C., BSc (Nanjing Univ, China), MSc, PhD (Chinese Academy of Science). Cross-appointment from Physics and Atmospheric Science

Senior Instructors

Alemán Milán, G., BEng (Superior Polytechnic Institute of Havana, Cuba), MSc, PhD (Dalhousie). University Teaching Fellow
Aish, G. A., ACBT dip. (Camosun College), BSc, MSc (Dalhousie).
Chisholm, R.A., BSc (St. Mary's), PhD (Alberta).
Crane, A. K., BSc (Memorial), PhD (UBC). University Teaching Fellow
MacDonald, J. L., BSc, BTech (Cape Breton Univ), PhD (Dalhousie). University Teaching Fellow
Moya Barrios, R., BSc (Univ of Havana, Cuba), MSc, PhD (Dalhousie).
Whalen, J. M., BSc (Dalhousie), PhD (McMaster).

Instructors

Bates, J. I., BSc (Queen's), PhD (UBC).
Snitynsky, R., BSc, BEd (Saskatchewan), MSc (Alberta).

Adjunct (FGS)

Boyd, R. J., BSc (UBC), PhD (McGill). FCIC
Burnell, D. J., BSc, MSc (Carleton), PhD (UNB).
Chatt, A., BSc (Univ of Calcutta, India), MSc (Roorkee, India), MSc (Waterloo), PhD (Toronto). FCIC
Grindley, T. B., BSc, MSc, PhD (Queen's). FCIC
Grossert, J. S., BSc, MSc, PhD (Univ of Natal, South Africa). FCIC
Kelly, A. T., BSc (Memorial), PhD (Toronto).
Matta, C., BPharm Sci (Alexandria Univ, Egypt), Graduate Diploma in Health and Hospital Administration (National Institute of Management, Egypt), PhD (McMaster). Mount Saint Vincent University
Pinto, D. M., BSc (McGill), PhD (Alberta). Institute for Marine Biosciences
Ramaley, L., BA (Colorado), MA, PhD (Princeton). FCIC
Werner-Zwanziger, U., Vordiplom, Diploma, PhD (Westfälische Wilhelms-Universität Münster, Germany).
White, R. L., BSc (Dalhousie), PhD (McMaster). FCIC

Adjunct (Retired)

Becke, A. D., BSc (Queen's), MSc, PhD (McMaster). FRSC, FRS, FCIC, Harry Shirreff Professor of Chemical Research (Emeritus)
Dahn, J. R., BSc (Dalhousie), MSc, PhD (UBC). Cross-appointment from Physics and Atmospheric Science. NSERC/Tesla Canada Industrial Research Chair
Wentzell, P. D., BSc (Dalhousie), PhD (Michigan State).
White, M. A., BSc (Western), PhD (McMaster). OC, FRSC, Harry Shirreff Professor of Chemical Research (Emerita) and cross-appointment with Physics and Atmospheric Science

Part-time Academics

Allison, A., BSc (Dalhousie).
Steeves-Vigneault, K.A., BSc (Acadia).
Wall, M.J., BTech (Cape Breton Univ), PhD (Dalhousie).
Weatherby, J.A.R., BSc (UPEI), MSc (Dalhousie).
Zsoldos, E., BAsC (Waterloo).

Postdoctoral Fellows, Research Associates/Assistants

Adeleke, A., BTech (Federal Univ of Tech, Nigeria), MSc (Saskatchewan).
Alkas, A., BSc (Marmara Univ, Turkey), MSc (Istanbul Tech Univ, Turkey), PhD (Massey Univ, New Zealand).
Anderson, T., BSc (Mount Allison), PhD (Memorial).
Ben-Barak, I., BSc, MS (Technion Israel Institute of Tech, Israel).
Fathy Hassan, M., BSc, MSc (Cairo Univ, Egypt), PhD (Florida Institute of Tech).
Ghosh, S., BSc (Burdwan Univ, India), MSc, PhD (Indian Institute of Tech, India).
Greening, S., BS (Univ of Central Florida), PhD (Dalhousie).
Hatchard, T., BSc, BComm (St. Mary's), MSc, PhD (Dalhousie).
Hilborn, J., BSc (Guelph), PhD (Dalhousie).
King, H., BEng, MAsC (Dalhousie), PhD (Tech Univ of Braunschweig, Germany).
Kompany-Zareh, M., MSc (Shiraz, Iran), PhD (Shahid B., Iran).
Ogawa, T., BEng, MEng, PhD (Nagoya Institute of Tech, Japan).
Omidvar, N., BSc (Andishmand Univ., Iran), MSc (Payame Noor Univ., Iran), MSc (Dalhousie).
Puthanveetil, T., BPharm (Univ of Calicut, Kerala, India), MSc (Acadia), Diploma Biotech (Centennial College, Toronto).
Scholzen, P., BSc, MSc (Univ of Liege, Belgium), PhD (ESPCI, France).
Tahmasebi Sefid Dashti, M. H., BSc, MSc, PhD (Isfahad Univ of Tech, Iran).
Wang, J., BSc, MSc (Dalhousie).
Werner-Zwanziger, U., Vordiplom, Diploma, PhD (Westfälische Wilhelms-Universität Münster, Germany).
Yan, M., MEng, PhD (Univ of Sheffield, UK).

BSc or BA (120 credit hour) Concentrated Honours in Chemistry

Students who want a challenging program resulting in a broad and in-depth background in Chemistry that includes an independent research experience may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider the Honours program. Honours students complete a minimum of 54 credit hours above the 1000 level in Chemistry with a minimum GPA of 3.0 and write a research-based Honours thesis. The Honours thesis and Qualifying Examination requirements are satisfied through completion of CHEM 4902.03 and CHEM 4903.03. The Honours program is accredited by the Canadian Society for Chemistry.

A Co-op option is available for students enrolled in a BSc Concentrated Honours in Chemistry. See [Co-operative Education Program](#).

Admission to Honours

Students must apply for admission to Honours programs. Students considering Honours in Chemistry should consult with a Chemistry Academic Advisor early in their studies.

Departmental requirements

In addition to fulfilling the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections, students in a BSc or BA Concentrated Honours program in Chemistry must complete the following courses:

1000 level

- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium, or CHEM 1021.03: Engineering Chemistry I/CHEM 1022.03: Engineering Chemistry II, or equivalent
- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II, or equivalent
- PHYC 1190.03/PHYC 1290.03: Introduction to Physics or PHYC 1310.03/PHYC 1320.03: Physics In and Around You, or equivalent

2000 level

- CHEM 2101.03: Introductory Inorganic Chemistry
- CHEM 2201.03: Introductory Analytical Chemistry
- CHEM 2301.03: Introduction to Physical Chemistry I and CHEM 2304.03: Introductory Physical Chemistry II
- CHEM 2401.03: Introductory Organic Chemistry: Structure, Concepts of Mechanisms and Spectroscopy and CHEM 2402.03: Introductory Organic Chemistry: Reactivity of Functional Groups

3000 level

- CHEM 3103.03: Intermediate Inorganic Chemistry
- CHEM 3203.03: Advanced Analytical Laboratory
- CHEM 3301.03: Quantum Mechanics and Chemical Bonding
- CHEM 3401.03: Intermediate Organic Chemistry or CHEM 3404.03: Intermediate Organic Chemistry - Physical Organic and Spectroscopy
- CHEM 3601.03: Chemistry of Living Systems

4000 level

- CHEM 4902.03: Honours and Major Research Project I and CHEM 4903.03: Honours and Major Research Project II (minimum grade of B-)

Additional Requirements

- MATH 1030.03 (or MATH 2030.03): Matrix Theory and Linear Algebra I and MATH 2001.03: Intermediate Calculus
- A minimum of 15 additional credit hours in CHEM courses at or above the 2000 level
- Combined lab hours across CHEM 3XXX and 4XXX must be >190.
- Minimum grade of C in all Honours subject courses (except CHEM 4902.03 and CHEM 4903.03, which require a minimum grade of B-)

BSc or BA (120 credit hour) Combined Honours in Chemistry and another subject

Students who wish to study Chemistry in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Chemistry may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject. The Combined Honours program is not accredited by the Canadian Society for Chemistry.

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. Students must have their program of study approved by Academic Advisors in both subject areas. Students complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Chemistry, this requirement is satisfied through CHEM 4902.03 and CHEM 4903.03.

A Co-op option is available for students enrolled in BSc Combined Honours with Chemistry as the primary subject. See [Co-operative Education Program](#).

Departmental requirements

In addition to fulfilling the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections, students in a BSc or BA Combined Honours program in Chemistry and another subject must complete the following:

Chemistry as the primary subject

- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium, or CHEM 1021.03: Engineering Chemistry I/CHEM 1022.03: Engineering Chemistry II, or equivalent
- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II, or equivalent
- CHEM 2101.03: Introductory Inorganic Chemistry
- CHEM 2201.03: Introductory Analytical Chemistry
- CHEM 2301.03: Introduction to Physical Chemistry I and CHEM 2304.03: Introductory Physical Chemistry II
- CHEM 2401.03: Introductory Organic Chemistry: Structure, Concepts of Mechanisms and Spectroscopy and CHEM 2402.03: Introductory Organic Chemistry: Reactivity of Functional Groups
- A minimum of 18 additional CHEM credit hours above the 2000 level (including CHEM 4902.03 and CHEM 4903.03 if applicable).

Chemistry as the secondary subject

- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium, or CHEM 1021.03: Engineering Chemistry I/CHEM 1022.03: Engineering Chemistry II, or equivalent
- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II, or equivalent
- A minimum of 30 CHEM credit hours above the 1000 level, including at least 18 CHEM credit hours above the 2000 level.

BSc or BA (120 credit hour) Major in Chemistry

The 120 credit hour Major is suited to students who want to focus on Chemistry, but wish to have a program that is somewhat less constrained than the Honours program. Chemistry Majors complete a minimum of 45 credit hours in Chemistry courses above the 1000 level. Research and other experiential learning opportunities are available through laboratories and research project classes. Like the Honours degree, the 120 credit hour Major program is accredited by the Canadian Society for Chemistry.

A Co-op option is available for students enrolled in a 120 credit hour BSc Major program in Chemistry. See [Co-operative Education Program](#).

Departmental requirements

In addition to fulfilling the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections, students in a BSc or BA Major program in Chemistry must complete the following courses:

1000 level

- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium, or CHEM 1021.03: Engineering Chemistry I/CHEM 1022.03: Engineering Chemistry II, or equivalent
- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II, or equivalent
- PHYC 1190.03/PHYC 1290.03: Introduction to Physics, or PHYC 1310.03/PHYC 1320.03: Physics In and Around You, or equivalent

2000 level

- CHEM 2101.03: Introductory Inorganic Chemistry
- CHEM 2201.03: Introductory Analytical Chemistry
- CHEM 2301.03: Introduction to Physical Chemistry I and CHEM 2304.03: Introductory Physical Chemistry II
- CHEM 2401.03: Introductory Organic Chemistry: Structure, Concepts of Mechanisms and Spectroscopy and CHEM 2402.03: Introductory Organic Chemistry: Reactivity of Functional Groups

3000 level

- CHEM 3103.03: Intermediate Inorganic Chemistry
- CHEM 3203.03: Advanced Analytical Laboratory
- CHEM 3305.03: Materials Science
- CHEM 3401.03: Intermediate Organic Chemistry or CHEM 3404.03: Intermediate Organic Chemistry - Physical Organic and Spectroscopy
- CHEM 3601.03: Chemistry of Living Systems

Additional Requirements

- Six additional hours from a combination of MATH 1030.03, MATH 2XXX, any STAT course, CSCI 1100.03, CSCI 1101.01, CSCI 1105.03, CSCI 1110.03
- A minimum of 12 additional CHEM credit hours at or above the 2000 level, including at least 3 credit hours at or above the 3000 level
- Combined lab hours across CHEM 3XXX and 4XXX must be >190.

BSc or BA (120 credit hour) Double Major in Chemistry and another subject

The Double Major degree program allows students to combine a study of Chemistry with another subject. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Chemistry may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA. The Double Major program is not accredited by the Canadian Society for Chemistry.

A Co-op option is available for students enrolled in BSc Double Major with Chemistry as the primary subject. See [Co-operative Education Program](#).

Departmental requirements

In addition to fulfilling the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections, students in a Double Major program in Chemistry and another subject must complete the following:

Chemistry as the primary subject

- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium, or CHEM 1021.03: Engineering Chemistry I/CHEM 1022.03: Engineering Chemistry II, or equivalent
- MATH 1000.03: Differential and Integral Calculus I
- MATH 1010.03: Differential and Integral Calculus I or MATH 1030.03: Matrix Theory and Linear Algebra I or MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences
- CHEM 2101.03: Introductory Inorganic Chemistry and CHEM 2201.03: Introductory Analytical Chemistry
- CHEM 2301.03: Introduction to Physical Chemistry I or CHEM 2304.03: Introductory Physical Chemistry II
- CHEM 2401.03: Introductory Organic Chemistry: Structure, Concepts of Mechanisms and Spectroscopy
- A minimum of 18 additional CHEM credit hours above the 2000 level.

Chemistry as the secondary subject

- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium, or CHEM 1021.03: Engineering Chemistry I/CHEM 1022.03: Engineering Chemistry II, or equivalent
- MATH 1000.03: Differential and Integral Calculus I
- MATH 1010.03: Differential and Integral Calculus I or MATH 1030.03: Matrix Theory and Linear Algebra I or MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences
- A minimum of 30 CHEM credit hours above the 1000 level, including at least 18 CHEM credit hours above the 2000 level.

BSc or BA (90 credit hour) Minor in Chemistry

The 90 credit hour degree with Minor in Chemistry is appropriate for students who want to study some Chemistry but do not wish to complete the conventional four-year program. The degree is best suited for students who want a general science degree with some specialization in Chemistry. A 90 credit hour degree program is not suitable for students who wish to pursue graduate studies and is not accredited by the Canadian Society for Chemistry. With additional study, the degree may be upgraded to a 120 credit hour Major or Honours degree at a later date.

A 90 credit hour BSc or BA in Chemistry is usually the preferred option for students who wish to combine studies in Chemistry with a degree in Engineering (see [BSc/BEng or BA/BEng Concurrent Program](#)).

See [Minor in Chemistry](#) section.

Minor in Chemistry

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A BSc or BA (90 credit hour) degree program with a Minor in Chemistry is available to students in the Faculty of Science.

Requirements

- A minimum of 18 credit hours in Chemistry (CHEM) courses at the 2000 level or higher to a maximum of 36 credit hours, not including any course that cannot be used toward a Chemistry degree

Please note that entry into upper level Chemistry (CHEM) courses requires completion of six credit hours at the first year level (CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium)

Contact [Chemistry](#) for more information.

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Co-operative Education Program (Science Co-op) in Chemistry

Co-op Academic Advisor: Dr. Alan Doucette alan.doucette@dal.ca

Science Co-op is a program where academic study in a science subject is combined with paid career-related work experience. Students undertake three work-terms interspersed with their academic study terms. Science Co-op degree programs enable students to apply their knowledge directly while providing them with work experience that assists in making educated career choices.

Science Co-op is available to students in BSc (120 credit hour) Honours or Major programs, or in Combined Honours or Double Major programs. The number of students admitted into Science Co-op each year is limited. A minimum GPA of 3.00 is required for admission and for continuation in the Co-op program. Students must be eligible to work in Canada.

Students normally apply to join Science Co-op during their first year of study. Students must apply before April 15, and it is strongly recommended that interested students meet with their Departmental Co-op advisor early in the Winter term of their first year. If accepted into Science Co-op, students must register for, and attend the Science Co-op Seminar Series (SCIE 2800.00) at least four months prior to the first work term.

Details are available from the Chemistry Co-op Academic Advisor and from the Co-operative Education office www.dal.ca/academics/cooperative_education.html. For more information on Co-op Education in Chemistry please see the departmental page www.dal.ca/faculty/science/chemistry/programs/undergraduate-studies/degree-programs/co-operative-education.html

Minors available to students in Chemistry

Minor programs allow students to develop subject specialties in addition to their major or honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs (including Science Co-op).

Students in a BSc or BA (120 credit hour) program in Chemistry may choose to include a Minor selected from the [list of approved Minors](#). Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc or BA in Chemistry, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of [Faculty of Science Certificates](#) and requirements is available. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the [College of Arts and Science Degree Requirements](#) section of the calendar.

Certificates of particular interest to student enrolled in a BSc or BA in Chemistry include:

- [Certificate in Materials Science](#)
- [Certificate in Medicinal Chemistry](#)

- [Certificate in Science Leadership and Communication](#)

BSc/BEng Concurrent Program (Chemistry)

Chemistry is known as the central science because its main theme is transformations of matter and energy that are at the core of many fields of science and engineering. A strong background in Chemistry has direct relevance to fields such as biological/biomedical engineering, chemical engineering, environmental and resource engineering, food science technology, materials engineering, mining/petroleum engineering and process engineering. Following is the recommended sequence of courses for students wishing to obtain a concurrent BEng and BSc (90 credit hour) degree with Minor in Chemistry. Interested students must consult with the Assistant Dean, Faculty of Science, and the Associate Dean, Faculty of Engineering prior to enrolling in a concurrent BEng/BSc degree.

It is recommended that students also discuss their selection of courses with an undergraduate advisor in the Department of Chemistry. A concurrent BEng/BSc Major or Honours in Chemistry (120 credit hours) can be designed for interested candidates.

Fall

Winter

Registered in BEng

Year 1 CHEM 1021 *Engineering Chemistry I*

CHEM 1022 *Engineering Chemistry II*

MATH 1280 *Engineering Math I*

MATH 1290 *Engineering Math II*

ENGI 1103 *Engineering Design I*

ENGI 1203 *Engineering Mechanics I: Statics*

PHYC 1190 *Physics I*

PHYC 1290 *Physics II*

ENGM 1081 *Computer Programming*

ENGM 1041 *Applied Linear Algebra*

CPST 1103 *Technical Communications I*

CPST 1203 *Technical Communications II*

Apply for admission into concurrent BEng/BSc ^a

Year 2 ENGM 2101 *Applied Vector Calculus*

ENGM 2022 *Applied Differential Equations*

ENGM 2032 *Applied Probability & Statistics*

HSTC 1801 *History of Engineering II*

^b Writing course (Humanities)

^d One Engineering elective

Two of CHEM 2201, CHEM 2301, CHEM 2401

Two of CHEM 2101, CHEM 2304, CHEM 2402

One social science course^c

One social science or humanities course^e

Year 3 IENG 2005 *Engineering economics*

ENGI 2203 *Engineering design II*

ECED 2000 *Electric circuits*

^d Two Engineering electives

ENGI 2102 *Thermo-Fluid Engineering I*

One 2000 level (or higher) CHEM course

One 2000 level (or higher) CHEM course

One Science/FASS course (may be CHEM)

One Science/FASS course (may be CHEM)

Graduate with Diploma in Engineering and BSc 90 credit degree

Year 4 Continue in BEng program

Year 5 Complete BEng program

^aTo meet the BSc 90 credit hour Minor in Chemistry requirements, students complete 30 credit hours in addition to their Engineering requirements: a minimum of 18 credit hours of CHEM courses at or above the 2000 level, 6 credit hours of social science/humanities

courses, and 6 additional credit hours in Science/FASS courses (which may be CHEM). Students may not select CHEM courses that cannot be counted toward a Chemistry Major degree.

^b Writing requirement: choose from eligible writing courses in CLAS, ENGL, GERM, HIST, PERF, PHIL, RELS, or RUSN to fulfill writing and humanities requirements [College of Arts and Science]

^c Choose from CANA, CTMP, ECON, EMSP, EURO, GWST, HIST, HSTC, INTD, POLI, PSYO, SOSA, SUST for social science courses. Choose from ARBC, CANA, CHIN, CLAS, CTMP, CRWR, EMSP, EURO, SWST, GERM, HIST, HTSC, ITAL, PERF, PHIL, RELS, RUSN, SPAN and THEA for humanities courses

^d See Engineering section of the calendar for details

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

Course Notes

Undergraduate courses that are regularly offered by the Chemistry Department are briefly described in this section. More detailed information can be found on the departmental web site at <http://chemistry.dal.ca>. Students should note the following.

- Not all courses are offered every year. Please consult the Academic Timetable for the details of courses offered in a particular academic year.
- The first digit of the course number is the year of a student's program that a course would typically be taken, but this is not meant to be restrictive if a student has the necessary prerequisites or permission of the instructor. For example, a 3000 level course can be taken in the fourth year and 4000 level course can be taken in the third year.
- The second digit of the course number defines the general sub-discipline:

0 = General Chemistry

1 = Inorganic Chemistry

5 = Interdisciplinary

2 = Analytical Chemistry

6 = Biological Chemistry

3 = Physical Chemistry

8,9 = Research Classes

4 = Organic Chemistry

- The extension following the course number (e.g. XXXX.03) indicates the number of credit hours assigned to the course (e.g. three credit hours). Note that six credit hours are equivalent to one credit.
- All chemistry courses, unless stated otherwise, have a minimum grade requirement of C- for their prerequisite chemistry courses. Students with grades below C- in the prerequisite chemistry courses can only register with the permission of the instructor for the course.
- Unless stated otherwise, the minimum grade requirement for credit in a chemistry course is a D, except for Honours programs, where the minimum grade requirement for chemistry credit is a C (B- for Honours Qualifying Examination).

Chemistry Resource Centres

First-Year and Advanced Chemistry Resource Centres are located in Rooms 122 and 115, respectively. The former is staffed with advanced undergraduate and graduate students to help with both lab and course material. First-year students are encouraged to make

use of the Concept Room, which is located in the First-Year Resource Centre. Here, first-year Instructors will be available at regularly scheduled times to provide aid with course material in a small group or one-on-one atmosphere.

The First-Year Chemistry Resource Centre also houses a number of computers with chemistry-specific programs for students to use. Additionally, there is a selection of resource materials such as molecular model kits and reference texts available to students.

Course Descriptions

CHEM 1011 Concepts in Chemistry: Structure and Reactivity

CREDIT HOURS: 3

The electronic structures of atoms and molecules are used to explain the reactivity and properties of chemicals. Topics include atomic structure, bonding models, structure and shape of molecules and ions, and acid/base chemistry. It is recommended that students have Nova Scotia grade 12 chemistry or equivalent before taking this course.

COORDINATOR: A. Crane

EXCLUSIONS: CHEM 1021.03

FORMATS: Lecture | Lab

CHEM 1012 Concepts in Chemistry: Energy and Equilibrium

CREDIT HOURS: 3

The principles of thermodynamics and kinetics are used to explain chemical reactivity and the principles of organic chemistry are used to develop an understanding of organic synthesis. Special topics include electrochemistry, spectroscopy, chirality, polymers, and the chemistry of living systems to illustrate the relevance of chemistry in everyday life.

PREREQUISITES: CHEM 1011.03 or equivalent

EXCLUSIONS: CHEM 1022.03

FORMATS: Lecture | Lab

CHEM 1021 Engineering Chemistry I

CREDIT HOURS: 3

The electronic structures of atoms and molecules are used to explain the reactivity and properties of chemicals. Topics include atomic structure, bonding models, structure and shape of molecules and ions, and acid/base chemistry. It is recommended that students have Nova Scotia grade 12 chemistry or equivalent before taking this course.

COORDINATOR: A. Crane

EXCLUSIONS: CHEM 1011.03

FORMATS: Lecture | Lab

CHEM 1022 Engineering Chemistry II

CREDIT HOURS: 3

The principles of thermodynamics and kinetics are used to explain chemical reactivity and the principles of organic chemistry are used to develop an understanding of organic synthesis. Special topics include electrochemistry, spectroscopy, chirality, polymers, and the chemistry of living systems to illustrate the relevance of chemistry in everyday life.

COORDINATOR: A. Crane

PREREQUISITES: CHEM 1021.03 or equivalent

EXCLUSIONS: CHEM 1012.03

FORMATS: Lecture | Lab

CHEM 2101 Introductory Inorganic Chemistry

CREDIT HOURS: 3

The fundamentals of inorganic chemistry are covered. Specific topics include ionic bonding and the nature of solids, the structure of atoms and simple bonding theory, coordination chemistry of the transition metals, and selected topics in main group chemistry. The preparation, analysis and observation of inorganic compounds are the laboratory assignments.

PREREQUISITES: CHEM 2401.03 or equivalent (grade of C+ or better); or permission of the instructor.

FORMATS: Lecture | Lab

CHEM 2201 Introductory Analytical Chemistry

CREDIT HOURS: 3

The basic principles of analytical chemistry are presented, including chemical and instrumental methods of analysis. Topics include chemical equilibria,

spectroscopy, electrochemistry and chromatography. Laboratory experiments explore all of these topics, and illustrate the techniques with practical examples.
PREREQUISITES: CHEM 1011.03 and CHEM 1012.03 or equivalent (grade of C- or better)
FORMATS: Lecture | Lab

CHEM 2301 Introduction to Physical Chemistry I

CREDIT HOURS: 3

The physical principles underlying chemical systems and reactivity are explored, with an emphasis on the forces between molecules and the properties of matter. Principles of thermodynamics are presented, including thermochemistry, entropy and free-energy relationships. Applications include phase equilibria, chemical equilibria, solutions, colligative properties and electrochemistry.

PREREQUISITES: CHEM 1011.03/CHEM 1012.03 or equivalent; MATH 1000.03 or equivalent (grade of C- or better). PHYC 1190.03/PHYC 1290.03 or PHYC 1310.03/PHYC 1320.03 is strongly recommended.

FORMATS: Lecture | Lab

CHEM 2304 Introductory Physical Chemistry II

CREDIT HOURS: 3

The physical properties of chemical systems at the level of atoms and molecules are examined. Topics include the quantum mechanical description of atoms and molecules, chemical bonding, experimental and computational methods for studying molecular systems, and the kinetics of chemical processes.

PREREQUISITES: CHEM 1011.03/CHEM 1012.03 or equivalent; MATH 1000.03 and MATH 1010.03 or equivalent (grade of C- or better). PHYC 1190.03/PHYC 1290.03 or PHYC 1310.03/PHYC 1320.03 is strongly recommended.

FORMATS: Lecture | Lab

CHEM 2401 Introductory Organic Chemistry: Structure, Concepts of Mechanisms and Spectroscopy

CREDIT HOURS: 3

Organic chemistry is introduced through an examination of bonding, conformation and stereochemistry. Spectroscopic methods (MS, IR, ¹H and ¹³C NMR) are used to determine the structures of compounds. Alkanes, alkenes, alkynes and alkyl halides are presented with an emphasis on the mechanisms of their reactions.

PREREQUISITES: CHEM 1011.03/CHEM 1012.03 or equivalent (grade of C- or better)

FORMATS: Lecture | Lab

CHEM 2402 Introductory Organic Chemistry: Reactivity of Functional Groups

CREDIT HOURS: 3

Building on CHEM 2401, the properties and reactions of alcohols, ethers, amines, nitriles, the carbonyl-containing functional groups and aromatic compounds are examined. The reactions are used in synthetic sequences, and reaction mechanisms are stressed. The concepts of resonance and aromaticity become familiar. The use of spectroscopic methods is reinforced.

PREREQUISITES: CHEM 2401.03 (grade of C+ or better)

FORMATS: Lecture | Lab

CHEM 2488 Our Organic World

CREDIT HOURS: 3

Pharmaceuticals, plastics, and some fuels are organic compounds with dramatic roles in our health and economy. Drugs or poisons? Caraway or spearmint? Bendable or stiff? Aspects of organic chemistry are surveyed so that issues such as these can be debated and the chemical facts applied to the world around us.

PREREQUISITES: CHEM 1011.03 or equivalent

EXCLUSIONS: CHEM 2488.03 does not serve as a prerequisite for any other chemistry class nor does it count as a chemistry credit towards any degree with a major in chemistry.

FORMATS: Lecture

CHEM 3103 Intermediate Inorganic Chemistry

CREDIT HOURS: 3

Modern bonding theories are developed using symmetry concepts. These are applied to understanding the molecular structure, reactivity and spectroscopic properties of inorganic compounds, including coordination compounds and organometallic complexes. The compounds prepared in the laboratory introduce more advanced synthetic procedures for the preparation of inorganic compounds.

PREREQUISITES: CHEM 2101.03 (grade of C- or better). Recommended: CHEM 2402.03.

EXCLUSIONS: CHEM 3101.03, CHEM 3102.03

FORMATS: Lecture | Lab

CHEM 3201 Analytical Mass Spectrometry and Separations

CREDIT HOURS: 3

The most commonly employed instrumental techniques in chemical analysis use spectroscopy in some form or involve separations. Qualitative and quantitative analysis and the instrumentation involved are discussed in some detail for mass spectrometry. Methods of separation including solvent extraction and the various types of chromatography are presented. Laboratory experiments illustrate the above techniques with practical examples.

PREREQUISITES: CHEM 2201.03 (grade of C- or better)

EXCLUSIONS: CHEM 3203

FORMATS: Lecture | Lab

CHEM 3203 Advanced Analytical Laboratory

CREDIT HOURS: 3

An introduction to the fundamentals of instrumental chemical analysis is presented in a laboratory environment, with emphasis on selection of appropriate analytical techniques, sample treatment, data handling, and communication of experimental results. Instrumental techniques include chromatography, spectrophotometry, mass spectrometry, and electrochemistry, with applications in biological, environmental, forensic and health-related areas.

PREREQUISITES: CHEM 2201.03 (grade of C- or better)

EXCLUSIONS: CHEM 3201

FORMATS: Lecture | Lab | Tutorial

CHEM 3301 Quantum Mechanics and Chemical Bonding

CREDIT HOURS: 3

The fundamentals and postulates of quantum mechanics are developed from first principles, with applications to illustrative model systems, vibrations, rotations, atoms, and molecules.

PREREQUISITES: MATH 2001.03 and MATH 1030.03, and CHEM 2304.03, (grade of C-or better), and PHYC 1190.03/PHYC 1290.03 or PHYC 1310.03/PHYC 1320.03

FORMATS: Lecture

CHEM 3305 Materials Science

CREDIT HOURS: 3

This course emphasizes understanding the principles behind materials' physical properties, such as thermal and mechanical stability, and electrical and optical properties. Materials discussed include liquid crystals, perfect crystals, defective solids, polymers and glasses. Applications, such as the use of materials in displays, gas sensors, and lasers, are discussed.

CALENDAR NOTES: This course is the same as PHYC 3303, except CHEM 3305 has a lab and PHYC 3303 has a major term paper.

PREREQUISITES: CHEM 1012.03, and (CHEM 2301.03 and CHEM 2304.03) or PHYC 3200.03 (can be a corequisite) or (ERTH 2001.03 and EARTH 2002.03)

EXCLUSIONS: PHYC 3303.03, CHEM 3303.03

FORMATS: Lecture | Lab

CHEM 3401 Intermediate Organic Chemistry

CREDIT HOURS: 3

Topics presented include aromatics, heterocycles, amines, enolate anions and other methods for forming C-C bonds, concerted reactions, carbohydrates and some heteroatom chemistry. There is a continuing emphasis on the principles of mechanistic organic chemistry. Students work independently in the laboratory on the preparation of organic compounds.

PREREQUISITES: CHEM 2402.03 (grade of C+ or better)

FORMATS: Lecture | Lab

CHEM 3404 Intermediate Organic Chemistry - Physical Organic and Spectroscopy

CREDIT HOURS: 3

This course provides an introduction to concepts in physical organic chemistry that are used to explain structure reactivity relationships. Spectroscopic techniques are also described with an emphasis on NMR spectroscopy. The organic laboratory will focus on organic compound separation and identification.

PREREQUISITES: CHEM 2402.03 (grade of C+ or better)

EXCLUSIONS: CHEM 3402.03

FORMATS: Lecture | Lab

CHEM 3601 Chemistry of Living Systems

CREDIT HOURS: 3

The chemical principles governing a wide variety of biological processes are discussed. Structure and mechanism are emphasized in explanations and predictions of the behavior of organic compounds in nature. Specific topics include proteins, activation of carboxyl groups, peptide synthesis and

biosynthesis, enzyme catalysis, coenzymes and prochirality.
PREREQUISITES: CHEM 2402.03 (grade of C+ or better)
FORMATS: Lecture | Lab

CHEM 3801 Experiential Learning in Chemistry

CREDIT HOURS: 3

This is an outside-the classroom learning experience in which students work to acquire knowledge and skills relevant to chemistry under the direction of a supervisor. Suitable work environments can be located at Dalhousie or in a commercial/industrial setting.

CALENDAR NOTES: To register for this course, each student must first find a supervisor willing to supervise the chemistry work experience. The student and supervisor must sign a learning agreement that has been approved by the course coordinator.

PREREQUISITES: At least four of the following courses: CHEM 2101.03, CHEM 2201.03, CHEM 2301.03, CHEM 2304.03, CHEM 2401.03 and CHEM 2402.03.

RESTRICTIONS: Restricted to students in third year and above.

EXCLUSIONS: The following may not be used towards CHEM 3801: work that is part of another scheduled course at a learning institution; study that would qualify for Special Topics course; co-op work terms; and paid work.

CHEM 4101 Advanced Main Group Chemistry

CREDIT HOURS: 3

Following a brief overview of the fundamental aspects of preparation, structure and bonding for familiar systems, selected topics are examined in some detail. An emphasis is placed on novel structure and bonding arrangements in comparison with carbon chemistry.

PREREQUISITES: CHEM 3103.03 (grade of C- or better)

CROSSLISTED: CHEM 5101.03

FORMATS: Lecture

CHEM 4102 Advanced Transition Metal Chemistry

CREDIT HOURS: 3

Various themes of modern transition metal chemistry are examined, including but not restricted to: fundamental structure and bonding; spectroscopic characterization methods; as well as reactivity and reaction mechanisms.

PREREQUISITES: CHEM 3103.03 (grade of C- or better)

EXCLUSIONS: CHEM 5102.03

FORMATS: Lecture

CHEM 4120 Advanced Organometallic Chemistry

CREDIT HOURS: 3

Catalytic and stoichiometric transition metal mediated reactions of fundamental significance in synthetic chemistry are surveyed. Molecular orbital theory is used to understand structure and bonding in metal complexes and the reactivity properties of these species. Relevant examples from the current chemical literature are introduced.

PREREQUISITES: CHEM 3103.03 (grade of C- or better)

FORMATS: Lecture

CHEM 4201 Advanced Topics in Separations

CREDIT HOURS: 3

Classical methods (solvent extraction and ion exchange) are reviewed for pre-concentration of metal ions prior to their determination by spectroscopic methods. Chromatographic topics include gas, liquid, and supercritical chromatography with emphasis on multidimensional techniques. Examples in environmental and biological analysis are drawn from the current literature.

PREREQUISITES: CHEM 2201.03

CROSSLISTED: CHEM 5201.03

FORMATS: Lecture

CHEM 4205 Chemometrics

CREDIT HOURS: 3

The application of statistical tools to univariate and multivariate chemical measurements is explored. Topics include descriptive statistics, probability and probability distributions, propagation of errors, hypothesis testing, analysis of variance, experimental design, univariate and multivariate calibration, pattern recognition, exploratory data analysis and mixture analysis. Students are introduced to programming in MatLab.

PREREQUISITES: CHEM 2201.03 (grade of C- or better)

CROSSLISTED: CHEM 5205.03

FORMATS: Lecture

CHEM 4206 Analytical Mass Spectrometry

CREDIT HOURS: 3

This course offers a thorough treatment of modern analytical mass spectrometry instrumentation, with applications towards chemical and biochemical analysis. Specific examples include characterization of pharmaceuticals and biomolecules (proteins, carbohydrates), and discussion of field portable instruments. Reaction mechanisms and spectral interpretation are discussed, but are not emphasized in this applied course.

PREREQUISITES: CHEM 2201.03 (grade of C- or better)

EXCLUSIONS: CHEM 5206.03

FORMATS: Lecture

CHEM 4301 Theory of Chemical Bonding

CREDIT HOURS: 3

This course develops molecular orbital theory from both qualitative and quantitative perspectives. Topics include the basic principles of the LCAO (Linear Combination of Atomic Orbitals) MO method, qualitative understanding of MOs in simple molecules, orbital symmetries, through to state-of-the-art techniques for computer computations of molecular properties.

PREREQUISITES: CHEM 3301.03 (grade of C- or better)

CROSSLISTED: CHEM 5301.03

FORMATS: Lecture

CHEM 4302 Introduction to Surface Science

CREDIT HOURS: 3

The fundamental theory and principles of surface science are introduced. Topics include the atomic structure of solid surfaces, thermodynamic and kinetic properties of surfaces, electronic and bonding behavior of surfaces, catalytic processes by surfaces, and typical surface analysis techniques.

PREREQUISITES: CHEM 2301.03 and CHEM 2304 or PHYC 3200.03 and PHYC 3640.03

CROSSLISTED: CHEM 5302.03

FORMATS: Lecture

CHEM 4311 Fundamental and Applied Electrochemistry

CREDIT HOURS: 3

This course provides a broad introduction to the fundamentals of electrochemistry, including electrochemical theory, double layer modelling and electrochemical methods. Additionally, important electrochemical applications are discussed, including corrosion, energy production and energy storage (fuel cells, batteries and supercapacitors).

PREREQUISITES: CHEM 2301.03 and CHEM 2304.03 (grade of C- or better)

EXCLUSIONS: CHEM 5311.03

FORMATS: Lecture

CHEM 4401 Synthesis in Organic Chemistry

CREDIT HOURS: 3

A number of important organic reactions are examined in depth with particular attention to regioselectivity and the development of relative or absolute stereochemistry. Applications of these reactions in the synthesis of complex molecules are illustrated with recent examples from the literature.

PREREQUISITES: CHEM 3401.03 (grade of C- or better)

CROSSLISTED: CHEM 5401.03

FORMATS: Lecture

CHEM 4402 Organic Structure Determination

CREDIT HOURS: 3

Nuclear magnetic resonance spectroscopy and mass spectrometry are emphasized in solving structural problems. Topics include 2D NMR, correlation of structure with chemical shifts and coupling constants, operation of NMR spectrometers, NMR relaxation, analysis of spectral patterns, the vector model of 1D and 2D experiments and ionization methods in mass spectrometry.

PREREQUISITES: CHEM 3404.03 (grade of C- or better)

CROSSLISTED: CHEM 5402.03

FORMATS: Lecture

CHEM 4502 Polymer Science

CREDIT HOURS: 3

Aspects of synthesis, analysis, characterization, structure and uses of synthetic and naturally occurring macromolecules are explored. Emphasis is on the application of standard methods of organic synthesis, analytical separations, and physico-chemical characterization. There is no laboratory, but students will do an independent literature project.

PREREQUISITES: CHEM 2201.03 and CHEM 2301.03 and CHEM 2304.03 and CHEM 2402.03 (grade of C- or better)

FORMATS: Lecture

CHEM 4504 Diffraction Techniques in Solid State Chemistry

CREDIT HOURS: 3

All chemical elements and compounds can exist as crystalline solids. This course studies the arrangements of atoms and molecules in such solids and examines the methods used to determine these structures. Particular emphasis is placed on the techniques of X-ray crystallography.

PREREQUISITES: CHEM 2101.03 (grade of C- or better) and MATH 2001.03 and MATH 1030.03

FORMATS: Lecture | Lab

CHEM 4595 Atmospheric Chemistry

CREDIT HOURS: 3

Fundamental introduction to the physical and chemical processes determining the composition of the atmosphere and its implications for climate, ecosystems, and human welfare. Origin of the atmosphere. Nitrogen, oxygen, carbon, sulfur cycles. Atmospheric transport and turbulence. Stratospheric ozone. Oxidizing power of the atmosphere. Regional air pollution: aerosols, smog, acid rain.

PREREQUISITES: MATH 1000.03, PHYC 1190.03/PHYC 1290.03 or PHYC 1310.03/PHYC 1320.03, and CHEM 1012.03 (grade of C- or better)

CROSSLISTED: PHYC 4595.03, OCEA 4595.03,

EXCLUSIONS: OCEA 5595.03

FORMATS: Lecture

CHEM 4601 Principles of Biomolecular and Drug Molecule Design

CREDIT HOURS: 3

The course covers both general principles and biochemical considerations in drug design. The fundamental goal is to give students the necessary tools to design new chemical structures as putative therapeutics for a human or veterinarian pathological problem. Students in chemistry are strongly recommended to take CHEM 3601.03 prior to registering in this course.

PREREQUISITES: CHEM 2402.03 (grade of C- or better)

CROSSLISTED: CHEM 5601

FORMATS: Lecture

CHEM 4602 Biophysical Characterization of Macromolecules

CREDIT HOURS: 3

Covers methods allowing determination of sub-molecular and atomic-level structure and dynamics of biomacromolecules in physiological settings (e.g. solution-state or lipid bilayers) including: fluorescence, electronic and vibrational circular dichroism and NMR spectroscopy; light vs. X-ray vs. neutron scattering; and, single molecule methods.

PREREQUISITES: BIOC 3700.03 or (CHEM 3601.03 and CHEM 2301.03 and CHEM 2304.03), all with grades of B or higher, or permission of instructor.

Recommended: PHYC 1190.03/PHYC 1290.03 or PHYC 1310.03/PHYC 1320.03.

CROSSLISTED: BIOC 4702.03, CHEM 5602.03, BIOC 5702.03

FORMATS: Lecture

CHEM 4603 Structural Biology

CREDIT HOURS: 3

This course covers theoretical and practical aspects of determining and assessing the quality of atomic-resolution biomolecular structures. The underlying theory and applications of X-ray diffraction, NMR spectroscopy, and cryo-electron microscopy are discussed in detail.

PREREQUISITES: BIOC 3700.03 or CHEM 3601.03

CROSSLISTED: BIOC 4703.03

FORMATS: Lecture

CHEM 4801 Research Project in Chemistry I

CREDIT HOURS: 3

Students carry out research projects under the supervision of a faculty member, and submit a report and make an oral presentation.

PREREQUISITES: CHEM 2101.03, 2201.03, 2301.03, 2304.03, 2401.03 and 2402.03 plus at least one full credit at the 3000 or 4000 level in the area of interest with an average grade of at least B-, or permission of instructor; GPA 3.0

CHEM 4802 Research Project in Chemistry II

CREDIT HOURS: 3

Students carry out research projects under the supervision of a faculty member and submit a report and make an oral presentation. This course is intended for those students in the Major program who wish greater exposure to independent scientific research.

PREREQUISITES: CHEM 4801.03

CHEM 4902 Honours and Major Research Project I

CREDIT HOURS: 3

Together with CHEM 4903.03, this is an honours program requirement to develop research skills. Research is carried out under the direction of a faculty member and evaluated through supervisor assessment, a written report and oral presentation.

CALENDAR NOTES: Students should apply for this course in the winter term prior to their final year by contacting the Honours Coordinator. A grade will not be assigned for CHEM 4902.03 until both CHEM 4902.03 and CHEM 4903.03 have been completed. To receive credit, CHEM 4902.03 and 4903.03 must be completed in the same academic year.

PREREQUISITES: Minimum GPA of 3.0 and permission of Honours Coordinator.

EXCLUSIONS: CHEM 4901.06

FORMATS: Experiential Learning

CHEM 4903 Honours and Major Research Project II

CREDIT HOURS: 3

Together with CHEM 4902.03, this is an honours program requirement to develop research skills. Research is carried out under the direction of a faculty member and evaluated through supervisor assessment, an honours thesis and oral presentation.

CALENDAR NOTES: To receive credit, CHEM 4902.03 and 4903.03 must be completed in the same academic year.

PREREQUISITES: Completion of CHEM 4902.03 and permission of Honours Coordinator.

EXCLUSIONS: CHEM 4901.06

FORMATS: Experiential Learning

Introduction

Earth Science is a holistic discipline whose focus of study is the Earth System. It includes the geosciences which address the solid earth, but necessarily also extends to study of the atmosphere, hydrosphere, oceans and biosphere. Broadly, Earth scientists work to understand

1. how the Earth System works;
2. how it evolved to its current state;
3. the processes for and distribution of Earth's physical resources such as fossil fuels, minerals, and water; and
4. limits to and consequences of the use of physical resources by humans.

Examples of specific questions within Earth Sciences include: How was the Earth formed? What is its composition? Where do we look for oil? Where do we look for reliable water supplies? What are the relationships between glaciers, rivers, and climate, both now and in the deep past? To answer questions such as these, Earth scientists typically use methods from the foundation sciences -- physics, chemistry, biology, mathematics - along with discipline-specific methods and modern tools including computing and satellite mapping. Some Earth scientists also consider or draw expertise from the social sciences, particularly as humans collectively become a significant agent in modifying components of the Earth System.

Career paths

Earth Science is of tremendous importance to Canadians and can be an immensely satisfying profession. Earth scientists are employed in universities, government agencies, the oil, gas and mineral industries, environmental consulting, and beyond. The Earth Sciences department offers programs and courses designed to meet the needs of students with varying goals for her/his undergraduate education. In general, the following summary recommendations can be made:

- To prepare to become a professional geoscientist, students should enroll in a 120 credit hour BSc or BA degree (Major, Honours or Combined) and meet the knowledge requirements for professional registration by following the Geoscience Knowledge and Experience handbook available at <https://geoscientistscanada.ca>.
- To prepare for postgraduate study (MSc or PhD) in Earth Sciences or a related field, students should pursue a BSc Concentrated Honours in Earth Sciences or Combined Honours with a related subject, and consider meeting requirements of professional registration (above).
- Students seeking an undergraduate preparation for Law, Education, or another professional program outside of Earth Sciences, or to complement another subject, should consider a BSc or BA Major or Double Major.
- Electives courses and Minors: Earth Sciences is about understanding how the Earth 'works'. As such it makes an excellent general education subject. Several EARTH courses that may be suitable electives are listed below.

General interest courses

These courses are designed to be accessible to students who want to know something about the Earth, but whose major field of study is not Earth Sciences. For example, the course may be of interest to an economics student concerned with resources, a history student interested in the role played by Canada's geological framework in the development of transportation, a biology student interested in faunal environments on the seafloor.

Courses without prerequisites

- EARTH 1030.03: Introduction to Physical Geography
- EARTH 1060.03: Earthquakes, Volcanoes and Natural Disasters
- EARTH 1080.03: Geology I (lab course)

Courses with prerequisites

- EARTH 1090.03: Geology II (with lab)
- EARTH 1091.03: Geology II (non-lab course)
- EARTH 2020.03: Journey Through the Solar System
- EARTH 2410.03: Environmental Issues in Earth Sciences
- EARTH 2420.03: Dinosaurs
- EARTH 3440.03: Geomorphology

High School Preparation

Students in high school who plan a career in Earth Sciences, should have Advanced Math or Pre-calculus Math, plus Chemistry and Physics. Note that only Mathematics is required as a prerequisite, but the others are strongly recommended. A student should ideally aim to make up deficiencies in high school preparation in the first year at Dalhousie.

Degree Programs

The Department of Earth Sciences offers the following degree programs in Earth Sciences

- BSc or BA (120 credit hour) Honours (Concentrated)*
- BSc or BA (120 credit hour) Combined Honours*
- BSc or BA (120 credit hour) Major*
- BSc or BA (120 credit hour) Double Major*
- BSc or BA (90 credit hour) Minor in Earth Sciences
- Minor in Earth Sciences

* BSc [Co-op option available](#)

* May be combined with Minor programs from other disciplines

Departmental Requirements for these programs are described below. In addition to departmental requirements, students must satisfy the requirements outlined in the [Academic Regulations](#) and the [College of Arts and Science Degree Requirements](#) sections. Students are advised that a number of requirements differ for the BA and BSc degrees.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Student applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with an Earth Sciences undergraduate academic advisor.

Staff

Dean

Macdonald, C.L.B., BSc (Hons), PhD (Dalhousie), Professor (Chemistry)

Chair of Earth and Environmental Sciences

Brenan, J. M., BSc Honours (McGill), PhD (Rensselaer)

Undergraduate Program Coordinator

Coutand, L., BSc, PhD, (Univ of Rennes, France)

Undergraduate Advisor

Arnott, A., BSc (Acadia), PhD (Dalhousie)

Co-op Academic Advisor

Wright, T., PhD (Alberta)

Faculty

Arnott, A., BSc (Acadia), PhD (Dalhousie)

Brenan, J. M., BSc Honours (McGill), PhD (Rensselaer)

Coutand, L., BSc, PhD, (Univ of Rennes, France)

Cox, R., BSc Hons, MSc (Glasgow Univ), PhD (Memorial)

Fedortchouk, Y., MSc (Mosow State Univ), PhD (Victoria)

Gosse, J. C., BSc Honours (Memorial), PhD (Lehigh)

Green, C., BSc Honours (Acadia), MES (York), MSA, PhD (Ryerson)

Grujic, D., BSc (Belgrade), PhD (ETH Zurich)

Maselli, V., BSc (Bologna), MSc (Trieste), PhD (Bologna)

Nedimovic, M., BSc (Belgrade), MSc, PhD (Toronto)

Plug, L., BA (McGill), PhD (Univ of Alaska - Fairbanks)

Sherwood, O., BSc, MSc (McMaster), PhD (Dalhousie)

Sterling, S., PhD (Duke Univ)

Wach, G. D., BA (Hons) (Western Ontario), MSc (South Carolina), DPhil (Oxford)

Wright, T., PhD (Alberta)

Young, M., BSc (Dalhousie), MSc (Queen's)

Zhang, M., BSc (Henan Normal University), PhD (University of Science and Technology of China)

Core Requirements for all BSc and BA (120 credit hour) Degrees

All 120 credit hour degrees in Earth Sciences (Concentrated Honours, Combined Honours, Major, Double Major) share the following required courses:

1000 level

- EARTH 1080.03: Geology I and EARTH 1090.03 (recommended) or EARTH 1091.03: Geology II
- MATH 1000.03: Differential and Integral Calculus I (recommended) or MATH 1215.03: Life Sciences Calculus or equivalent
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity AND CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium

Students in the Integrated Science Program should contact the department regarding first year equivalencies.

2000 level

- EARTH 2001.03: Mineralogy
- EARTH 2002.03: Introduction to Petrology
- EARTH 2110.03: Field Methods
- EARTH 2203.03: Sediments and Sedimentary Rocks
- EARTH 2380.03: Geochemistry

3000 level

- EARTH 3001.03: Field School
- EARTH 3140.03: Structural Geology
- EARTH 3303.03: Stratigraphy

Field Work

Many Earth Sciences courses have a regular field excursion component that are typically conducted when classes are in regular session, although some excursions may occur on weekends or following exams. Course syllabi will provide specific for each course's field excursions each term, and whether trips are mandatory for the course.

Note that EARTH 3001.03 : Field School is required for all 120 credit hour degree programs in Earth Sciences and is typically held over 15 days in late August, just before the start of the University fall term.

BSc or BA (120 credit hour) Concentrated Honours in Earth Sciences

Students who want a challenging program that includes an in-depth background in Earth Sciences and an independent research experience may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours. Honours students complete a minimum of 54 credit hours above the 1000 level in Earth Sciences with a minimum GPA of 3.5 and write a research-based Honours thesis. The Honours thesis and Qualifying Examination requirements are satisfied through completion of EARTH 4201.03/ EARTH 4202.03.

A [Co-op option](#) is available for students enrolled in a BSc Concentrated Honours in Earth Sciences.

Admission to Honours

Students must apply for admission to Honours programs, usually by the end of their third year. Students considering Honours in Earth Sciences should consult with an Earth Sciences Academic Advisor early in their studies.

Departmental Requirements

In addition to fulfilling the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#), students in the Concentrated Honours program in Earth Sciences must complete the following:

Core Requirements (Section A)

1000 level

- MATH 1010.03: Differential and Integral Calculus II, or MATH 1030.03: Matrix Theory and Linear Algebra I, or MATH 2300.03: Mathematical Modelling, or STAT 1060.03: Introductory Statistics for Science and Health Sciences or STAT 2060.03: Introduction to Probability and Statistics
- PHYC 1190.03: Introduction to Physics and PHYC 1290.03: Introduction to Physics (recommended), or PHYC 1310.03: Physics In and Around You I and PHYC 1320.03: Physics In and Around You II

2000 level and higher

- EARTH 2270.03: Introduction to Applied Geophysics
- EARTH 4201.03 and EARTH 4202.03: Honours Thesis
- Minimum of 21 additional credit hours of EARTH courses at or above the 2000 level, of which at least 15 credit hours must be at or above the 3000 level

Additional Requirements

- Minimum GPA of 3.5 in Honours subject courses, with no grade less than a C

- First-class Honours; Minimum GPA of 3.7 in Honours subject courses, with at least an A- in EARTH 4200.06

BSc or BA (120 credit hour) Combined Honours in Earth Sciences and another subject

Students who wish to study Earth Sciences in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Earth Sciences may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject.

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. Students must have their program of study approved by Academic Advisors in both subject areas. Students complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Earth Sciences, this requirement is satisfied through EARTH 4201.03/ERTH 4202.03.

A [Co-op option](#) is available for students enrolled in BSc Combined Honours with Earth Sciences as the primary subject.

Departmental requirements

In addition to fulfilling the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections, students in a Combined Honours program in Earth Sciences and another subject must complete the following:

Earth Sciences as primary subject

- [Core requirements](#) (Section A)

1000 level

- One of MATH 1010.03, MATH 1030.03, MATH 2040.03, MATH 2300.03, STAT 1060.03, or STAT 2060.03
- PHYC 1190.03 and PHYC 1290.03 or PHYC 1310.03 and PHYC 1320.03

2000 level and higher

- EARTH 2270.03: Introduction to Applied Geophysics
- EARTH 4201.03 and EARTH 4202.03: (Honours Thesis)
- A minimum of three additional EARTH credit hours at 3000 level or above

Students in Combined Honours should consult the department when choosing courses. Exceptions to requirements may be made where justified by a student's particular subject combination.

Earth Sciences as secondary subject

- [Core requirements](#) (Section A)

1000 level

- One of MATH 1010.03, MATH 1030.03, MATH 2040.03, MATH 2300.03, STAT 1060.03, or STAT 2060.03
- PHYC 1190.03 and PHYC 1290.03 or PHYC 1310.03 and PHYC 1320.03

2000 level and higher

- EARTH 2270.03: Introduction to Applied Geophysics
- A minimum of nine additional credit hours in EARTH at or above the 3000 level

Students in Combined Honours should consult the department when choosing courses. Exceptions to requirements may be made where justified by a student's particular subject combination.

BSc or BA (120 credit hour) Major in Earth Sciences

The 120 credit hour Major is suited to students who want to focus on Earth Sciences, but wish to have a program that is somewhat less constrained than the Honours program.

Earth Sciences Majors complete a minimum of 42 credit hours in Earth Sciences courses above the 1000 level.

Research and other experiential learning opportunities are available through laboratories and research project classes.

A [Co-op option](#) is available for students enrolled in a 120 credit hour BSc Major program in Earth Sciences.

Departmental requirements

In addition to fulfilling the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections, students in a Major program in Earth Sciences must complete the following courses:

- [Core requirements](#) (Section A)

1000 level

- One of MATH 1010.03, MATH 1030.03, MATH 2040.03, MATH 2300.03, STAT 1060.03, or STAT 2060.03 (BSc only)

2000 level and higher

- An additional 18-credit hours of Earth Sciences courses, of which a minimum of 15-credit hours must be at the 3000- or 4000-level

BSc or BA (120 credit hour) Double Major in Earth Sciences and another subject

The Double Major degree program allows students to combine a study of Earth Sciences with another subject. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Earth Sciences may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

It is recommended that students enrolled in a Double Major program consult with advisors in both subject areas.

A [Co-op option](#) is available for students enrolled in BSc Double Major with Earth Sciences as the primary subject.

Departmental requirements

In addition to fulfilling the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections, students in a Double Major program in Earth Sciences and another subject must complete the following:

Earth Sciences as the primary or secondary subject

- [Core requirements](#) (Section A)

1000 level

- One of MATH 1010.03, MATH 1030.03, MATH 2040.03, MATH 2300.03, STAT 1060.03, or STAT 2060.03

2000 level and higher

- A minimum of nine additional credit hours in EARTH at or above the 3000 level

Students in Double Major programs should consult the department when choosing courses. Exceptions to requirements may be made where justified by a student's particular subject combination.

BSc or BA (90 credit hour) Minor in Earth Sciences

The 90 credit hour degree with Minor in Earth Sciences is appropriate for students who want to study some Earth Sciences but do not wish to complete the conventional four-year program. The degree is best suited for students who want a general science degree with

some specialization in Earth Sciences. A 90 credit hour degree program is not suitable for students who wish to pursue graduate studies. With additional study, the degree may be upgraded to a 120 credit hour Major or Honours degree at a later date.

A 90 credit hour BSc or BA in Earth Sciences is usually the preferred option for students who wish to combine studies in Earth Sciences with a degree in Engineering (see [BSc/BEng or BA/BEng Concurrent Program](#)).

See [Minor in Earth Sciences](#) section.

Minor in Earth Science

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A BSc or BA (90 credit hour) degree program with a Minor in Earth Sciences is available to students in the Faculty of Science.

Requirements

- EARTH 1080.03: Geology I and EARTH 1090.03 or EARTH 1091.03: Geology II
- A minimum of 18 credit hours in Earth Sciences courses at the 2000 level or higher, must include at least six credit hours at the 3000 level or higher

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Co-operative Education Program (Science Co-op) in Earth Sciences

Co-op Academic Advisor: Dr. Tarah Wright

Science Co-op is a program of academic study in a science subject, combined with paid career-related work experience. Students undertake three work-terms interspersed with their academic study terms. Science Co-op degree programs enable students to apply their knowledge directly while providing them with work experience that assists in making educated career choices.

Science Co-op is available to students in BSc (120 credit hour) Honours or Major programs in Earth Sciences, or in Combined Honours or Double Major programs with Earth Sciences as the primary subject. The number of students admitted into Science Co-op each year is limited. A minimum GPA of 3.00 is required for admission and for continuation in the Co-op program. Students must be eligible to work in Canada.

Students normally apply to join Science Co-op during their first year of study. Students must apply before April 15, and it is strongly recommended that interested students meet with their Departmental Co-op advisor early in the Winter term of their first year. If accepted into Science Co-op, students must register for, and attend the Science Co-op Seminar Series (SCIE 2800.00) at least four months prior to the first work term.

Details are available from the Earth Sciences Co-op Academic Advisor and from the Co-operative Education office

www.dal.ca/academics/cooperative_education.html

Minors available to students in Earth Sciences

Minor programs allow students to develop subject specialties in addition to their major or honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs (including Science Co-op).

Students in a BSc or BA (120 credit hour) program in Earth Sciences may choose to include a Minor selected from the [list of approved Minors](#). Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc or BA in Earth Sciences, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of [Faculty of Science Certificates](#) and requirements can be found at the beginning of the [Faculty of Science](#) section. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the [College of Arts and Science Degree Requirements](#) section.

Certificates of particular interest to students enrolled in a BSc or BA program in Earth Sciences include:

- [Certificate in Environmental Impact Assessment](#) (EIA) (contact: Dr. Patricia Lane, Biology, patricia.lane@dal.ca)
- [Certificate in Geographic Information Science](#) (GIS) (contact: Dr. Chris Greene, Earth Sciences, csgreene@dal.ca)
- [Certificate in Materials Science](#) (contact: Dr. Mita Dasog, Chemistry, mita.dasog@dal.ca)
- [Certificate in Science Leadership and Communication](#) (contact: Dr. Anne-Marie Ryan, Earth Sciences, AMRyan@dal.ca)

Knowledge Requirements for Professional Practice as a Geoscientist

Geoscience is a regulated profession in most of Canada. Individual provinces and territories have acts that restrict the practice of geoscience to individuals who are registered members of professional associations. In Nova Scotia, the Association of Professional Geoscientists of Nova Scotia (APGNS) is the licensing body which fulfils this mandate. APGNS and other provincial geoscience associations, under the guidance of Geoscientists Canada, ensure high standards of geoscience practice and education.

Students who intend to pursue geoscience as a profession, or simply want the most in-depth education in geoscience, should follow the guidelines laid out in the Geoscience Knowledge and Experience handbook provided by Geoscientists Canada. The Geoscience Knowledge and Experience handbook outlines comprehensive sequences of courses intended to prepare a student for professional practice in modern geoscience, and to meet formal requirements for registration in the Geology and Environmental Geoscience streams.

Professional geoscience knowledge requirements are more specific and stringent than degree requirements in terms of the courses required in Earth Sciences and in the Foundation Sciences (mathematics and physics in particular). Earth Science students can meet the knowledge requirements within a 120 credit hour degree by careful selection of EARTH courses and Foundation Science courses, and this should begin in the first year. Less than judicious course selection, and/or combining Earth Science with another subject which also has numerous specific course requirements, may result in a student needing extra courses (beyond the 120 credit hours) in order to meet knowledge requirements for registration. Consult the professional associations -- Geoscientists Canada and APGNS - for additional information on registration.

BSc/BEng or BA/BEng Concurrent Program

Students interested in combining their interest in Program with a degree in Engineering may choose a BSc/BEng or BA/BEng Concurrent Program, normally completed in a 5 year period. Over the first three years, students complete the requirements for a 90 credit hour BSc or BA degree in Earth Sciences and a Diploma of Engineering (the first two years of engineering studies). Two more years of engineering studies are then required to obtain a BEng. Interested students should see undergraduate advisors from Earth Sciences and from the Faculty of Engineering in their first year of study.

Field Work

Field excursions are part of many courses and are conducted at appropriate times during the session. In addition, some optional field excursions may be held each year. Note that some mandatory field trips may be held on Saturdays or Sundays. Field School, EARTH 3001, which is required for most degree programs, is offered for about 15 days in late August, just before the start of the University fall term.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

Course Notes

NOTE: Some mandatory field trips may be held on Saturdays or Sundays. Check with Instructor.

Course Descriptions

ERTH 1030 Introduction to Physical Geography

CREDIT HOURS: 3

This science course examines the nature of weather and climate, Earth's surface features and processes, and internal processes that contribute to landform development. An integral component of the course is an exploration of the representation and interpretation of physical geographic data through the examination of a variety of maps.

CALENDAR NOTES: There are no pre-requisites for this course, and students may take this course in addition to any other first year Earth Science course.

CROSSLISTED: GEOG 1030.03

FORMATS: Lecture | Tutorial

ERTH 1060 Earthquakes, Volcanoes and Natural Disasters

CREDIT HOURS: 3

Earthquakes, meteorite impacts, rapid climate change, volcanic eruptions, hurricanes, landslides, solar flares, and floods are natural disasters that affect our economy, public policy, and safety. Where, why and how frequently do natural disasters occur? Are predictions possible? Are media portrayals of risk and damage realistic? This course, aimed at the nonspecialist, investigates these intriguing questions. Excerpts of "disaster films", in conjunction with lectures and discussions are used to identify the causes, consequences and sometimes erroneous perceptions of natural hazards. Examples from Atlantic Canada and contemporary disasters are used to assess local risk and real-time events worldwide.

CROSSLISTED: GEOG 1060.03

FORMATS: Lecture

ERTH 1080 Geology I

CREDIT HOURS: 3

This course focuses on the solid earth (geosphere) and how it evolved throughout earth's vast history, and continues to evolve today. The processes involved are recorded in the rocks and minerals of our earth, and we explore these natural processes and materials as a way to understanding our earth. The course meets the needs of students who require a science course with a lab component, is a required prerequisite course for all Earth Science majors, and serves as an introduction for all those interested in Earth Science. No previous knowledge of geology is required.

FORMATS: Lecture | Lab

ERTH 1090 Geology II

CREDIT HOURS: 3

Earth systems introduced in Geology I are explored in greater detail, with an emphasis on change through time, earth resources, and on geologic systems that are connected to human actions. This course provides a strong background to pursue further work in the environmental sciences and is the required course for Earth Sciences majors.

PREREQUISITES: EARTH 1080.03. Concurrent enrolment in EARTH 1080.03 and EARTH 1090.03 is by permission of instructor.

EXCLUSIONS: Credit will only be given for one of EARTH 1091.03 or EARTH 1090.03

FORMATS: Lecture | Lab

ERTH 1091 Geology II

CREDIT HOURS: 3

ERTH 1091 builds on the earth systems introduced in Geology I and explores them in greater detail. The emphasis is on change through time, earth resources, and on geologic systems that are connected to human actions. This non-lab course provides a strong background to pursue further work in the environmental sciences and is the required course for earth sciences majors.

PREREQUISITES: EARTH 1080.03. Concurrent enrolment with 1080.03 is by permission of instructor.

EXCLUSIONS: Credit will be given for only one of EARTH 1091.03 or EARTH 1090.03.

FORMATS: Lecture

ERTH 2002 Introduction to Petrology

CREDIT HOURS: 3

Through a thorough and systematic examination of hand specimens and thin sections, and the detailed description of mineral assemblages and textures, students will be able to formally classify a wide range of igneous, metamorphic and sedimentary rock types. Case studies representing the geology of Nova Scotia will also be presented.

PREREQUISITES: EARTH 2001.03 and CHEM 1011.03/CHEM 1012.03 or CHEM 1021.03/CHEM 1022.03

FORMATS: Lecture | Lab

ERTH 2020 Journey Through The Solar System

CREDIT HOURS: 3

An introduction to the geological features of the planets, asteroid belt, and major satellites of our solar system, and the current understanding as to their formation. The course uses the earth as an analog to compare the landforms, and both the measured and inferred geology of the solar system.

PREREQUISITES: There are no prerequisites, however a basic understanding of mathematics and the physical sciences is required.

RESTRICTIONS: Restricted from students in first year.

FORMATS: Lecture | Online Delivery

ERTH 2110 Field Methods

CREDIT HOURS: 3

This is intended as an introduction to field techniques useful to the practicing geologist, particularly those concepts essential for the accurate field description and identification of rocks and the use and construction of geological maps. Computer techniques and elementary structural geology are also considered.

PREREQUISITES: EARTH 1080.03 (or SCIE 1506.09 and SCIE 1507.09) and (permission of instructor or EARTH 1090.03 or EARTH 1091.03)

FORMATS: Lecture | Lab

ERTH 2203 Sediments and Sedimentary Rocks

CREDIT HOURS: 3

The course deals with physical, chemical and biological processes that generate modern sediments, and their conversion to sedimentary rocks through time. Labs provide a practical introduction to sediment analysis and to a range of sedimentary structures and rock types. Fieldwork may include description of beaches and bedrock in Nova Scotia.

PREREQUISITES: EARTH 1080.03 (or SCIE 1506.09/ SCIE 1507.09) and (ERTH 1090.03 or EARTH 1091.03 or permission of instructor)

FORMATS: Lecture | Lab

ERTH 2270 Introduction to Applied Geophysics

CREDIT HOURS: 3

An Introduction to using physical principles to explore the Earth's subsurface, with an emphasis on near-surface applications. Topics include seismic, gravity, magnetic, electrical, and electromagnetic surveying techniques, and their application in prospecting, hydrogeology, environmental assessments, and well-logging. The geophysics field school, normally conducted during the last week of April, is an integral part of this course.

PREREQUISITES: EARTH 1080.03 or (SCIE 1506.03/SCIE 1507.03) and MATH 1000.03 and (PHYC 1190.03/ PHYC 1290.03 or PHYC 1310.03/PHYC 1320.03 X/Y)

CROSSLISTED: PHYC 2270.03

FORMATS: Lecture | Lab | Experiential Learning

ERTH 2380 Geochemistry

CREDIT HOURS: 3

An introduction to the principles of chemistry applied to geologic systems, including an overview of the chemistry of rocks and minerals, isotopes in the geologic environment, processes that control the mobility of elements in geologic environments, and the use of geochemical data in solving geological and paleo- environmental problems.

PREREQUISITES: EARTH 2001.03 or permission of the instructor

FORMATS: Lecture | Tutorial

ERTH 2410 Environmental Issues in Earth Sciences

CREDIT HOURS: 3

Geology underlies many of the environmental problems facing humans today. Topics include environmental aspects of energy and mineral resource, geologic hazards, geologic connections to pollution and waste disposal, and the role that water plays in its various guises. Canadian examples are incorporated where appropriate. Approved with Canadian Studies.

CALENDAR NOTES: This course is not offered every year. Please consult department in the spring for further information.

PREREQUISITES: One of: EARTH 1080, EARTH/GEOG 1030, EARTH/GEOG 1060, ENVS 1000 or ENVS 1100 or ENVS 1200, SUST 1001 with a grade of B or above, or DISP with Earth Sciences

CROSSLISTED: ENVS 2410

EXCLUSIONS: This class does not count toward a Major or Honours in Earth Sciences

FORMATS: Lecture

ERTH 2420 Dinosaurs

CREDIT HOURS: 3

Students will consider the origin, evolution and extinction of non-avian dinosaurs. What are dinosaurs? Why were some dinosaurs so big? What did dinosaurs eat? How fast could dinosaurs run? Were dinosaurs good parents? To answer these questions, we will examine the nature of evidence gathered from dinosaur fossils and their surrounding rocks.

CALENDAR NOTES: This course may not be offered every year. Please consult spring timetable or Department on whether course will be offered.

PREREQUISITES: EARTH 1080.03 or any two of EARTH 1060.03, EARTH 1090.03, EARTH 1091.03, or permission of instructor

FORMATS: Lecture

ERTH 2430 Forensic and Medical Geology

CREDIT HOURS: 3

Designed for non-earth sciences majors, this course explores the evolving fields within the realm of geosciences. Forensic and medical geology share a common thread in that both depend upon identifying potential geologic and geoenvironmental sources of evidence, and applying this information to solve a larger problem, either legal or health-related.

CALENDAR NOTES: This course is not offered every year. Please consult department in the spring for further information.

PREREQUISITES: EARTH 1080 and one other Earth Sciences course or instructor's permission.

FORMATS: Lecture | Tutorial

ERTH 3001 Field School

CREDIT HOURS: 3

This field-intensive course provides two weeks of geological mapping in northern Nova Scotia and entails: (1) identifying, measuring and localizing rocks and geological structures; (2) drawing geological maps from field observations and (3) writing a report describing and interpreting the data.

CALENDAR NOTES: The class is held for two weeks at the end of summer just prior to the start of the fall term and is required for the Major and Honours programs. It can be a physically demanding course involving day-long traverses - prior consultation with instructors is required

PREREQUISITES: EARTH 2002.03, EARTH 2110.03, EARTH 2203.03 and permission of the instructor.

FORMATS: Experiential Learning

ERTH 3010 Igneous Petrology

CREDIT HOURS: 3

Igneous petrology is the study of the field relations, mineralogy, texture, and geochemistry of volcanic and plutonic rocks. Lectures discuss the classification and graphical representation of igneous rocks; the production, differentiation, and emplacement of magma in different tectonic environments. Practical work consists of laboratory petrographic examination and weekend field trips.

PREREQUISITES: EARTH 2002.03 and EARTH 2380.03

FORMATS: Lecture | Lab

ERTH 3011 Theoretical Foundations of Igneous Petrology

CREDIT HOURS: 3

Igneous petrology is an online class that introduces students to the variety of volcanic and plutonic rocks, their field relations, textures, mineralogical and geochemical features. The class examines the production, differentiation, and emplacement of magma in different tectonic environments using thermodynamics, geochemical methods, virtual field trips, and projects-based studies

CALENDAR NOTES: Cannot receive credit for EARTH 3011 after receiving credit for EARTH 3010

PREREQUISITES: EARTH 2002.03 and EARTH 2380.03

EXCLUSIONS: EARTH 3010

FORMATS: Online Delivery

ERTH 3012 Practicum on petrography of igneous rocks

CREDIT HOURS: 1

This course complements the "Theoretical Foundations of Igneous Petrology" course by providing students with in-depth training using petrographic microscope for studies of plutonic and volcanic rocks. The course consists of eight lab sessions followed by an exam completed over one week (5 days).

CALENDAR NOTES: Cannot receive credit for EARTH 3012 after receiving credit for EARTH 3010

PREREQUISITES: EARTH 2002, EARTH 3011

EXCLUSIONS: EARTH 3010

ERTH 3020 Metamorphic Petrology

CREDIT HOURS: 3

Metamorphic petrology is the study of the way in which pre-existing igneous, sedimentary, and metamorphic rocks respond to changes in pressure, temperature, and geochemical environment. Metamorphic reactions, deformation and recrystallization, the stability relations of minerals and mineral assemblages under various physical and chemical conditions, and the concept of metamorphic facies are discussed. The relationship of metamorphism to other

geological processes is considered. In the labs, microscopic mineralogy and texture are used to decipher the metamorphic history of rocks.

PREREQUISITES: EARTH 3010.03

FORMATS: Lecture | Lab

ERTH 3140 Structural Geology

CREDIT HOURS: 3

Introduction to the behaviour of rocks during deformation, stressing the geometrical aspects of rock structures. Students learn: (a) geometrical principles to identify, describe, and interpret common types of structures in outcrop and hand sample; (b) to interpret the mechanical properties of rocks based on their microstructure; (c) construction techniques to calculate and interpret stress and strain in deformed rocks.

PREREQUISITES: EARTH 2002.03, EARTH 2110.03, EARTH 2203.03

FORMATS: Lecture | Lab

ERTH 3205 Paleobiology

CREDIT HOURS: 3

This course examines fossil plants and animals and their interactions with the physical world throughout Earth's history. Lectures and lab encompass the concepts of fossil preservation, fossil morphology, fossil identification, systematics, evolution, extinction, paleoecology and biostratigraphy.

PREREQUISITES: EARTH 2203.03 or permission of the instructor.

EXCLUSIONS: EARTH 2205.03

FORMATS: Lecture | Lab

ERTH 3302 Quaternary Sedimentary Environments

CREDIT HOURS: 3

The student is exposed to fluvial, alluvial, subglacial, glaciolacustrine, hillslope, eolian, coastal, shallow marine, rift, wedge top, retroarc, and foreland basin environments. Field trips and labs provide experience in methods used to distinguish the environments, including sedimentology, geomorphology, geochronology and thermochronology, and analysis of soils, cores, pebble fabrics, and section-scale non-petroleum sedimentary facies. Quaternary paleoclimatology and tectonic controls on weathering and deposition are discussed and debated.

PREREQUISITES: EARTH 2203.03

CROSSLISTED: GEOG 3302

FORMATS: Lecture | Lab

ERTH 3303 Stratigraphy

CREDIT HOURS: 3

Stratigraphy is the backbone of the geological sciences; it brings together sedimentology, paleontology, petrology and structural geology to reconstruct Earth history. We survey the impact of sea-level change, tectonics and climate on sediment accumulation, with emphasis on seismic and sequence stratigraphy. Case studies focus on sedimentary basins across Canada, and practical work includes laboratory and class exercises, as well as field excursions.

PREREQUISITES: EARTH 2203.03

FORMATS: Lecture | Lab

ERTH 3401 Hydrogeology

CREDIT HOURS: 3

Hydrogeology examines the space-time characteristics of groundwater quantity and quality. It includes physical processes occurring in natural groundwater systems and the governing relations for flow and transport; emphasizing Darcy's Law, steady state and transient flow. It provides an overview of groundwater resource development, evaluation, contamination, and remediation.

PREREQUISITES: EARTH 3701 or permission of instructor

FORMATS: Lecture | Lab

ERTH 3420 Geochemistry of Aquatic Environments

CREDIT HOURS: 3

Given the abundance of water at the earth's surface and the wide use both humans and other organisms make of aqueous environments, it becomes imperative for environmentally-oriented scientists to understand the chemistry of natural bodies of water. In particular, we need to comprehend the processes that lead to the observed composition of groundwaters, lakes, rivers and oceans. We also need to be aware of how man's activities can alter these natural systems. Water is also an agent for geologic and environmental change, both on short and long time-scales. Earth and environmental scientists should have an appreciation of these processes (sources, sinks and transport mechanisms) and the resulting geological cycles. This course is an introduction to the governing principles and processes of aquatic geochemistry. Specific topics will include physical chemistry of natural waters, kinetics (mechanisms & rates) of geochemical reactions, the hydrologic cycle, the dissolved carbonate system and pH controls, redox reactions and the influence of life, rainwater and acid rain, weathering and the formation of soils, mineral-solution equilibria, controls on the composition of rivers, lakes and oceans, sediments and their after-burial changes, and the global cycles of carbon, nitrogen, and sulfur. Students will be taught to approach problems quantitatively through the principles of mass action (Eh-pH and activity-

diagrams) and of mass balance (box models and conservation equations).

CALENDAR NOTES: This course is not offered every year. Please consult department in the spring for further information.

PREREQUISITES: CHEM 1011.03/CHEM 1012.03 or equivalent and EARTH 1080/(ERTH 1090 or EARTH 1091) or EARTH 1010/ERTH 1020

CROSSLISTED: OCEA 3420.03

FORMATS: Lecture

ERTH 3440 Geomorphology

CREDIT HOURS: 3

Geomorphology is the quantitative study of Earth's surface processes and landforms with applications in geology, civil engineering, hydrogeology, and environmental management. We investigate slope stability, weathering and soils, sediment production, wind-driven and coastal environments, tectonic landforms, and river, glacial and permafrost processes.

PREREQUISITES: EARTH 1080 (or SCIE 1506.09/SCIE 1507.09) and (ERTH 1090.03 or EARTH 1091.03); OR completion of (or concurrent enrolment in) a 1000-level mathematics class, a 1000-level physics class, a 1000-level chemistry class AND permission of instructor

CROSSLISTED: GEOG 3440.03

FORMATS: Lecture

ERTH 3500 Geoscience Information Management

CREDIT HOURS: 3

Geographic Information Systems (GIS), as a tool for the management of georeferenced data, have become indispensable for disciplines where location of objects and pattern of processes is important. GIS plays a fundamental role for a wide range of applications, from modeling, to analysis and predictions, to decision making. The course is designed for a broad base of potential users and draws on examples of the role of GIS in global climate change, mineral exploration, preservation of biodiversity, coastal zone management, resource depletion, and many other present and future environmental issues. The course material will be of interest to those studying geoscience, environmental science, ecology, marine biology, oceanography, epidemiology, urban and rural planning, civil engineering, and any other field involving spatial data. Laboratory exercises emphasize the principles of raster and vector GIS, and the integration of databases and GPS (global positioning systems) data into GIS. Exercises draw on the diversity of GIS applications in a number of topical areas.

PREREQUISITES: Two years of university study or equivalent or instructor's permission

CROSSLISTED: EARTH 5600, GEOG 3500, ENVS 3500

EXCLUSIONS: Credit will only be given for one of EARTH 3500.03, EARTH 5600.03, GEOG 3500.03, SCIE 3600.03 or ENVS 3500

FORMATS: Lecture | Lab

ERTH 3601 Global Biogeochemical Cycles

CREDIT HOURS: 3

We currently face daunting environmental challenges at the global scale that are expected to worsen in the 21st century, including a global water crisis, climate change and pollution of our waters and atmosphere; this course examines the science behind these environmental issues from the multidisciplinary framework of global biogeochemical cycling. With the global scale as the focus, this course pulls together the many disparate fields that are encompassed by the broad reach of biogeochemistry. You will learn about the processes that drive the movement of carbon, water, nitrogen, phosphorus, and sulphur, through the earth system, and the residency of these elements in the atmosphere, soils, lithosphere, oceans and freshwaters. In the quantitative and analytical exercises you calculate and compare the effects of industrial emissions, land clearing, agriculture, and rising population on the processes driving the Earth's chemical cycles. Weekly journal readings for discussion in laboratory group cover the latest developments in this exciting and rapidly changing field. This course provides an excellent framework for those interested in the science of global change.

PREREQUISITES: CHEM 1011.03/ CHEM 1012.03 or equivalent, and one of ENVS 1100.03, SUST 1001.03, EARTH 1080.03, or (SCIE 1506.09 or SCIE 1507.09) and completion of 2 years of an undergraduate degree.

CROSSLISTED: ENVS 3601.03

ERTH 3700 Earth Resources, Sustainability, and Society

CREDIT HOURS: 3

This course addresses the question: What do we need to know and understand about the nature and distribution of geologic resources to optimally reconcile mineral extraction with society's needs, considerations of the environment, and the sustainable development goals in a more sustainable, geoethical, and balanced approach, through the 21st century.

CALENDAR NOTES: Aimed as an elective course for majors in Earth Sciences and in Environmental Sciences. Must be third year students.

PREREQUISITES: EARTH 1080

CROSSLISTED: GEOG 3700 ENVS 3700

RESTRICTIONS: E1 and E2

FORMATS: Lecture | Seminar | Discussion | Other (explain in comments)

ERTH 3701 Fundamentals of Hydrology

CREDIT HOURS: 3

This course is an introduction to hydrology, emphasizing surface processes and watershed responses. In this course we learn about both the pure and applied uses of hydrology. The course is quantitative and introduces hydrologic processes in the atmosphere, on the land surface, in groundwater and in stream channels.

PREREQUISITES: MATH 1000.03 or MATH 1215.03, AND one of ENVS 1100.03/ENVS 1200.03 , SUST 1001.06, EARTH 1080.03, SCIE 1506.09/SCIE 1507.09, AND completion of 2 years of an undergraduate degree. PHYC 1190.03 and PHYC 1290.03 (or PHYC 1310.03/PHYC 1320.03) are recommended.
CROSSLISTED: ENVS 3701.03
RESTRICTIONS: E1 and E2
FORMATS: Lecture | Lab

ERTH 4001 Sponsored Geologic Experience

CREDIT HOURS: 1.5

These Field Trips &/or Laboratory Sessions Introduce students to some of the following: Practical exploration techniques, field and laboratory skills, familiarization with deposit models, related economic and environmental geology, and the business side of Earth-science industries.

FORMATS: Lab

ERTH 4002 Advanced Field School

CREDIT HOURS: 3

This application of the principles of field geology is a comprehensive and intellectually challenging program designed to provide pre-professional field training for senior BSc geoscience students. Multiple field-based projects challenge students to synthesize field observations and solve geological and environmental geoscience problems to gain training that is otherwise difficult to obtain in the classroom or laboratory.

CALENDAR NOTES: The field camp is usually offered in May at selected international settings, and involves mapping exercises and camping over a wide range of climate and topography.

PREREQUISITES: EARTH 3001.03, EARTH 3140.03 and permission from instructor

ERTH 4003 Advanced Field Geology Orientation

CREDIT HOURS: 1.5

This course covers geological and logistical preparation for the month-long Advanced Field Geology course. The course will examine the geology of southwestern North America, as well as geological processes and field techniques relevant to the Field School projects. Discussion topics will also include field safety, group dynamics, travel logistics, and travel grant proposals and fundraising.

CALENDAR NOTES: This is a compulsory course for students taking EARTH 4004: Advanced Field Geology. Credit can only be given for this course if EARTH 4003.015 and 4004.045 are completed in consecutive terms. No grade is assigned for EARTH 4003 until EARTH 4004 has also been completed.

COREQUISITES: EARTH 3140.03

PREREQUISITES: EARTH 3001.03 and permission from instructor

EXCLUSIONS: EARTH 4002

FORMATS: Seminar

ERTH 4004 Advanced Field Geology

CREDIT HOURS: 4.5

This application of the principles of field geology is a comprehensive and intellectually challenging program designed to provide pre-professional field training for senior BSc geoscience students. Multiple field-based projects challenge students to synthesize field observations and solve geological and environmental geoscience problems to gain training that is otherwise difficult to obtain in the classroom or laboratory

CALENDAR NOTES: The field camp is usually offered in May at selected international settings and involves mapping exercises and camping over a wide range of climate and topography. Credit can only be given for this course if EARTH 4003.015 and 4004.045 are completed in consecutive terms.

PREREQUISITES: EARTH 4003.015 and permission of instructor

RESTRICTIONS: Requires an application and permission of instructor

EXCLUSIONS: EARTH 4002

FORMATS: Experiential Learning

ERTH 4010 Advanced Topics in Petrology and Geochemistry

CREDIT HOURS: 3

This course advances students' knowledge of modern aspects of petrology, volcanology, and geochemistry, chosen to reflect instructor and students interests. The focus is on learning thermodynamic and computational methods as well as advanced petrographic work and field mapping for interpretation of igneous and metamorphic rocks.

CALENDAR NOTES: This course is not offered every year. Please consult department in the spring for further information.

PREREQUISITES: EARTH 3010, EARTH 3020, EARTH 3001

CROSSLISTED: EARTH 5010

ERTH 4040 Integrated Field Studies

CREDIT HOURS: 3

A field-based course, of up to 2 weeks, which includes detailed exercises in geological mapping integrated with advanced concepts in mineralogy, petrology,

economic geology, structural geology and tectonics. Students are based for the entire duration of the course off-campus, at an international location, or within Canada.

CALENDAR NOTES: This course will not be offered every year (please consult timetable and/or Department) and will run only if there is a minimum number of 8 students registered. There is a cap of 12 students and priority will be given to students in their final year of study.

PREREQUISITES: EARTH 3001.03, EARTH 3140.03, EARTH 3303.03 and one of EARTH 3010.03 or EARTH 3020.03, as well as permission of the instructor.

FORMATS:

ERTH 4101 Research Project

CREDIT HOURS: 3

This course allows students who are not in an Honours program to do a research project. See course description for EARTH 4201.03/ERTH 4202.03.

CALENDAR NOTES: Credit can only be given for this course if EARTH 4101.03 and 4102.03 are completed in consecutive terms. No grade is assigned for EARTH 4101.03 until both EARTH 4101.03 and 4102.03 have been completed.

EXCLUSIONS: EARTH 4100.06

FORMATS: Lecture

ERTH 4102 Research Project

CREDIT HOURS: 3

This course allows students who are not in an Honours program to do a research project. See course description for EARTH 4201.03/ERTH 4202.03.

CALENDAR NOTES: Credit can only be given for this course if EARTH 4101.03 and 4102.03 are completed in consecutive terms. Credit cannot be given for a single term.

PREREQUISITES: EARTH 4101.03

EXCLUSIONS: EARTH 4100.06

FORMATS: Lecture

ERTH 4110 Geological Oceanography

CREDIT HOURS: 3

This course provides a broad survey of geology and geophysics as they apply to the oceans. The course content covers methods and observations with quantitative applications to an understanding of marine geophysical and geological processes. The topics covered include the origin of ocean basins, plate tectonics, heat flow, gravity, and magnetism (1/3 of the course); patterns and processes of sediment transport and deposition, and the paleoceanographic reconstruction of and past climates (2/3 of the course).

CALENDAR NOTES: Some training in calculus and statistics will prove to be advantageous to the student's outcome.

PREREQUISITES: OCEA 2001.03/OCEA 2002.03 (or OCEA 2000.06); OCEA 2020.03; OCEA 2021.03; EARTH 1080.03 or equivalent; or permission of instructor.

CROSSLISTED: OCEA 5110.03; OCEA 4110.03

EXCLUSIONS: Students in third year and above.

FORMATS: Lecture

ERTH 4131 Advanced Petroleum Geoscience

CREDIT HOURS: 3

This is an advanced course in petroleum geoscience applications and interpretations for basin/prospect evaluation. Students work in a team interpreting industry data, including well logs and reflection seismic, in a competitive environment. The team submits its findings and recommendations in written and oral presentations.

PREREQUISITES: EARTH 3303.03, EARTH 4153.03, or permission of the instructor

CROSSLISTED: EARTH 5131.03

FORMATS: Lecture

ERTH 4151 Mineral Deposits

CREDIT HOURS: 3

This course is an introduction to the geology of metallic ore and some industrial mineral deposits. Emphasis is given to the ore formation processes that lead to the economic concentrations of commodities. The course integrates many Earth Science disciplines. Laboratory work introduces ore study in reflected light microscopy.

CALENDAR NOTES: This course is not offered every year. Please consult department in the spring for further information.

PREREQUISITES: EARTH 3010.03, 3140.03

CROSSLISTED: EARTH 5151.03

FORMATS: Lecture | Lab

ERTH 4153 Petroleum Geology and Energy Systems

CREDIT HOURS: 3

The course provides an introduction to petroleum geology (gas and oil) with some discussion of alternative energy sources. The course provides an introduction to petroleum geology and petroleum systems with discussion of basin analysis, source rock evaluation, seismic and well log sequence stratigraphy, core and outcrop description, depositional facies analysis, oil sands geology, biostratigraphy, drilling and completions, petrophysics and well log analysis in addition to other topics.

PREREQUISITES: EARTH 2270.03, EARTH 3140.03, EARTH 3303.03

FORMATS: Lecture | Lab

ERTH 4157 Petroleum Geoscience Field Methods

CREDIT HOURS: 3

This course provides an advanced-level overview of petroleum systems and petroleum geology field methods including basin analysis, source rock evaluation, seismic and well log sequence stratigraphy and depositional facies analysis, biostratigraphy, drilling and completions, petrophysics and well log analysis in addition to other topics.

PREREQUISITES: EARTH 3303.03 and EARTH 4153.03 and permission of instructor

CROSSLISTED: EARTH 5157.03

ERTH 4201 Honours Thesis

CREDIT HOURS: 3

This course covers many aspects of written and oral communication of scientific material. In particular, it covers the scientific method, the elements of scientific style, the logical organization and development of ideas and scientific writing. Individual research presentations form a key component.

CALENDAR NOTES: This is a compulsory course for students writing an Honours thesis in Earth Sciences, but is open to students from other disciplines. Field work may be part of thesis research. Credit can only be given for this course if EARTH 4201.03 and EARTH 4202.03 are completed in consecutive terms.

No grade is assigned for EARTH 4201.03 until EARTH 4202.03 has also been completed.

EXCLUSIONS: EARTH 4200.06

FORMATS: Lecture

ERTH 4202 Honours Thesis

CREDIT HOURS: 3

This course covers many aspects of written and oral communication of scientific material. In particular, it covers the scientific method, the elements of scientific style, the logical organization and development of ideas and scientific writing. Individual research presentations form a key component.

CALENDAR NOTES: This is a compulsory course for students writing an Honours thesis in Earth Sciences, but is open to students from other disciplines.

Field work may be part of thesis research. Credit can only be given for this course if EARTH 4201.03 and EARTH 4202.03 are completed in consecutive terms.

EXCLUSIONS: EARTH 4200.06

FORMATS: Lecture

ERTH 4320 Seafloor Mapping

CREDIT HOURS: 3

A fourth-year undergraduate course on ocean mapping technologies and techniques for study of the seabed environment. Acoustic remote sensing technologies, ground-validation techniques, and data processing and integration methods using geospatial software are covered. The focus of the course is on how these approaches are used to study and map the geology and biology of the ocean floor.

PREREQUISITES: EARTH 3500.03

CROSSLISTED: OCEA 4320.03

EXCLUSIONS: OCEA 5320.03

FORMATS: Lecture | Lab

ERTH 4350 Tectonics

CREDIT HOURS: 3

This course is intended to synthesize the various aspects of geology covered in the third year core program. The focus of the course is on tectonic processes and the ways in which these processes create and modify the Earth's crust. We cover the fundamental geological, geophysical, and geochemical controls that operate today, including plate tectonics, and the ways in which these might have differed in the geological past. The tectonic evolution of specific orogenic belts is discussed, including both modern and ancient examples in Canada and other parts of the world.

PREREQUISITES: EARTH 2270.03, 3140.03

CROSSLISTED: EARTH 5350.03

FORMATS: Lecture

ERTH 4410 Environmental Geoscience

CREDIT HOURS: 3

Environmental geoscience integrates various aspects of earth sciences to critically examine the interaction between humans and the geologic environment. Topics include: environmentally sensitive elements and minerals, geologic hazards, water, soil, mineral and energy issues, use of isotopes as tracers, as well as waste management, radioactivity, and the urban environment.

CALENDAR NOTES: This course is not offered every year. Please consult department in the spring for further information.

COREQUISITES: EARTH 2380.03

PREREQUISITES: EARTH 2380.03, EARTH 3303.03 and two additional EARTH courses at the 3000 level or above, or permission of instructor

RESTRICTIONS: Restricted to students in third year or above.

FORMATS: Lecture | Tutorial

ERTH 4460 Geochronology and Thermochronology

CREDIT HOURS: 3

Earth and Planetary Sciences extensively use the radioactive decay and growth of naturally occurring nuclides to quantify the timing and rates of geological processes. This course introduces the fundamentals of Geochronology and Thermochronology including the principles, analytical methods and application of several of the most widely applied geo- and thermochronometers.

PREREQUISITES: EARTH 2380.03, EARTH 2002.03 and one course out of MATH 1000.03, PHYC 1190.03 or PHYC 1290.03.

CROSSLISTED: EARTH 6400.03

FORMATS: Online Delivery

ERTH 4470 Introduction to Seismic Imaging

CREDIT HOURS: 3

This course teaches the basic techniques of the reflection seismic method for imaging of earth structures such as those used in hydrocarbon exploration. Lectures introduce concepts and techniques that are applied in computer lab to the processing of a multi-channel seismic dataset. Concepts covered include: source and receiver geometry, digital filtering, deconvolution, velocity analysis, stacking, and migration.

PREREQUISITES: EARTH 2270.03 or permission of instructor

CROSSLISTED: EARTH 5470.03, OCEA 4470.03, PHYC 4470.03, PHYC 5470.03

FORMATS: Lecture | Lab

ERTH 4510 Directed Reading

CREDIT HOURS: 3

NOTE: Course Details listed here also apply to EARTH 4511.

PREREQUISITES: Permission of Department

ERTH 4511 Directed Readings

CREDIT HOURS: 3

See EARTH 4510.

PREREQUISITES: Permission of Department

ERTH 4520 GIS Applications to Environmental and Geological Sciences

CREDIT HOURS: 3

Geographic information systems (GIS) provide a rich set of new tools to the geologist and environmental scientist, not only to solve conventional problems, but also to explore transdisciplinary questions not readily answered by other means. This course builds on the fundamentals of GIS taught in EARTH 3500.03 to explore analytical tools that aid in decision-making processes encountered in mineral exploration, hydrogeology, site selection, environmental assessment, and global change analysis. The course concentrates on case studies and problem solving, including those requiring multi-criteria and multi-objective decision making processes.

PREREQUISITES: GEOG 3500.03, ENV 3500, EARTH 3500.03; EARTH 5600, or SCIE 3600.03; STAT 1060.03

CROSSLISTED: GEOG 4520.03, EARTH 5520.03

FORMATS: Lab

ERTH 4530 Environmental Remote Sensing

CREDIT HOURS: 3

The goal of this course is to introduce students to the role of remote sensing as a technique provide environmental and geologic information. Particular emphasis will be placed on examining the potential and limitations of remote sensing methods and data in this context. The lectures discuss the fundamentals of remote sensing with an emphasis on optical multispectral satellite systems. In the lab, students use computerized techniques of digital image enhancement and thematic information extraction to process images derived from a range of remote-sensing systems. The integration of remote-sensing information with GIS (Geographic Information Systems) is stressed in both the labs and lectures.

CALENDAR NOTES: This course is not offered every year. Please consult department in the spring for further information.

PREREQUISITES: EARTH 3500.03, GEOG 3500.03, ENVS 3500.03 or EARTH 5600.03 or SCIE 3600.03
CROSSLISTED: GEOG 4530.03, EARTH 5530.03
FORMATS: Lecture | Lab

ERTH 4850 Geographic Information Science Research Project

CREDIT HOURS: 3

Students learn how to design, manage and complete a research project in Geographic Information Science (GIS). Projects must include a substantive analytical component where GIS is central to methods employed. Evaluation includes a written report, oral presentation and digital data. Required for completion of the Certificate in GIS.

COREQUISITES: EARTH 5420.03/GEOG 4520.03/ERTH4520.03

PREREQUISITES: ENVS 3500.03/ERTH 3500.03/GEOG 3500.03

CROSSLISTED: SCIE 4850.03, ENVS 4850.03, EARTH 4850.03, GEOG 4850.03

EXCLUSIONS: Restricted to 3rd and 4th year students

FORMATS: Lecture

Introduction

Economics is a social science - a science because it involves a rigorous intellectual effort to derive logical conclusions from basic facts and propositions; a social science because it has human beings and their welfare as its ultimate concern. The basic facts of Economics cannot be knowable and measurable with the same precision as those of the physical sciences - human society and its motivations are far too complex to permit this - but none of the sciences surpasses economics in its relevance to our needs, problems and goals.

Economics analyzes the equity, efficiency, and sustainability of human behavior in the production, distribution, and consumption of commodities. Economics is not an easy science; indeed, it is one of the most complex, difficult (and fascinating) areas of study when you pursue it beyond its elementary levels, but some basic knowledge of economics is essential for any educated person. A more extensive knowledge of the subject is an invaluable complement to other fields of specialization such as law, commerce, politics and other studies in social sciences or humanities, and a specialization in the field can lead to a variety of interesting career opportunities.

Degree Programs

The Department of Economics offers the following degree programs in Economics

- BSc or BA (120 credit hour) Honours (Concentrated)*
- BSc or BA (120 credit hour) Combined Honours*
- BSc or BA (120 credit hour) Major*
- BSc or BA (120 credit hour) Double Major*
- BSc or BA (90 credit hour) Minor in Economics
- Minor in Economics

* May be combined with Minor programs from other disciplines

Departmental Requirements for each degree program can be seen by following the links in the menu to the right.

In addition to departmental requirements, students must satisfy the requirements outlined in the [Academic Regulations](#) and the [College of Arts and Science Degree Requirements](#) sections. Students are advised that a number of requirements differ for the BA and BSc degrees.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Student applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with an Economics undergraduate academic advisor.

Staff

Dean

Macdonald, C., BA (Hons), PhD (Dalhousie), Professor (Chemistry)

Chairperson of Department

Iscan, T., BA (Middle East Tech), MA, PhD (Cornell)

Faculty Advisors

Ntantamis, C., Co-op Academic Advisor and Undergraduate Advisor, econadvisor@dal.ca

Okoye, D., Graduate Coordinator (MDE/PhD), econgrad@dal.ca

Warman, C., Graduate Coordinator (MA/PhD), econgrad@dal.ca

Professors Emeritus

Lesser, B. BComm (Dalhousie), MA, PhD (Cornell)

Professors

Akbulut-Yuksel, M., BS (Middle East Tech), MA, PhD (Houston)

Burton, P., BSc (Saskatchewan), MA, PhD (UBC)

Iscan, T., BA (Middle East Tech), MA, PhD (Cornell)

Osberg, L., BA (Hons) (Queen's), MPhil, PhD (Yale), McCulloch Professor of Economics

Phipps, S. A., BA (Hons) (Victoria), MA, PhD (UBC), Maxwell Chair of Economics

Rosenblum, D., BA (Williams College), MA, MPhil, PhD (Yale)

Tumennasan, N., BA (Univ of Mongolia), MA (Colorado-Denver), AM, PhD (Brown)

Warman, C., BA (Combined Hons), MA, PhD (Carleton)

Xu, K., Dip. (Beijing Teachers' Univ), MBA, PhD (Concordia)

Yuksel, M., BSc (METU), MA, PhD (Houston)

Associate Professors

Cyrus, T., BA (UCLA), PhD (Berkeley)

Giusto, A., Laurea in Economics (Bologna), PhD (Oregon)

Kotlyarova, Y., Dip. Software Eng (Lviv Poly Inst), MSc (Univ of Illinois - Urbana), PhD (McGill)

Okoye, D., BA Hons, PhD (UWO)

Zhou, W., BE, MA (Tokyo Inst of Technology), PhD (UBC)

Assistant Professor

McNeil, J., BA Hons (Carleton), MA, PhD (Queens)

University Teaching Fellow

Boulatoff, C., MS (Universite Catholique de l'Ouest), PhD (Utah State)

Senior Instructor

Forsdyke, R., BSc (Hons) Biochemistry, BEd, MA (Queen's), PhD (Simon Fraser)

Instructors

Ntantamis, C., Dip. Naval Architecture & Marine Eng. (Athens), MSc (Piraeus), PhD (McGill)

Shamsuddin, M., BA (Lafayette), PhD (Georgetown)

Adjunct Professors

Cross, M.L., AA (Dawson College), BA (Montana), MA (SFU), PhD (Texas A&M)

Dasgupta, S., BA (Calcutta), MA (Delhi), MA, PhD (Rochester)

McAllister, R.I., MA (Oxon), MA (Cantab), LLD (Dalhousie)

Rankaduwa, W., BA, MSc (Sri Lanka), MA, PhD (Dalhousie), UPEI

BSc or BA (120 credit hour) Concentrated Honours in Economics

Students who want a challenging program that results in a broad background in Economics and includes an independent research experience, may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours. Honours students complete a minimum of 54 credit hours above the 1000 level in Economics with a minimum GPA of 3.3 and write a research-based Honours thesis. The Honours Qualifying Examination requirement is satisfied through completion of ECON 4201.03 / ECON 4202 : Honours Thesis I and II.

Students interested in eventually pursuing a Masters in Economics are advised to choose the BSc Honours option in order to acquire the needed analytical skills. In contrast, the the BA Honours program provides a broad background in Economics which is excellent preparation for a wide variety of other post-graduate programs.

Admission to Concentrated Honours

Students must apply for admission to Honours programs. Students considering Honours in Economics should consult with an Economics Undergraduate Advisor early in their studies.

To be admitted to the **BSc Concentrated Honours program**, students must

- Have at least a B+ average (GPA of 3.3 or above) in Economics courses at the 2000 level and above, with no grade lower than a C
- Have completed ECON 2200.03: Intermediate Microeconomics, ECON 2201.03: Intermediate Macroeconomics, ECON 3338.03: Econometrics I, and ECON 3700.03: Mathematics for Economists
- It is highly recommended that BSc students complete ECON3339.03: Econometrics II prior to applying to Honours
- Have completed the Dalhousie writing requirement with a grade of B or higher
- Submit the Economics Department honours application by the end of their third year of studies

To be admitted to the **BA Concentrated Honours program**, students must

- Have at least a B+ average (GPA of 3.3 or above) in Economics courses at the 2000 level and above, with no grade lower than a C
- Have completed ECON 2200.03: Intermediate Microeconomics, ECON 2201.03: Intermediate Macroeconomics, ECON 3338.03: Econometrics I
- Have completed at least 12 credit hours of additional advanced Economics courses including 3000-level courses.
- Have completed the Dalhousie writing requirement with a grade of B or higher
- Submit the Economics Department honours application by the end of their third year of studies

Departmental requirements

All students must fulfill the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections. Students are advised that a number of requirements differ for the BA and BSc degrees. In addition, students in a Concentrated Honours program in Economics must complete the following courses:

BSc Concentrated Honours Requirements:

1000 level

- ECON 1101.03: Principles of Microeconomics/ECON 1102.03: Principles of Macroeconomics
- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II
- MATH 1030.03: Matrix Theory and Linear Algebra I
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences or STAT 2060.03/MATH 2060.03: Introduction to Probability and Statistics

2000 level and higher

- ECON 2200.03: Intermediate Microeconomics/ECON 2201.03: Intermediate Macroeconomics
- ECON 3338.03: Econometrics I/ECON 3339.03: Econometrics II
- ECON 3700.03: Mathematics for Economists
- One of ECON 2233.03: Canadian Economic History, ECON 2239.03: The European Economy Since 1900, ECON 3310.03: Economic Growth in Historical Perspective, or ECON 3349.03: History of Economic Thought

- ECON 4420.03: Microeconomic Theory/ECON 4421.03: Macroeconomic Theory
- ECON 4201.03: Honours Thesis I/ ECON 4202.03: Honours Thesis II
- An additional 24 credit hours in Economics at or above the 2000 level

Additional Requirements

- STAT 2060.03/MATH 2060.03: Introduction to Probability and Statistics

BA Concentrated Honours Requirements:

1000 level

- ECON 1101.03: Principles of Microeconomics/ECON 1102.03: Principles of Macroeconomics
- MATH 1000.03: Differential and Integral Calculus I
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences or STAT 2060.03/MATH 2060.03: Introduction to Probability and Statistics

2000 level and higher

- ECON 2200.03: Intermediate Microeconomics/ECON 2201.03: Intermediate Macroeconomics
- ECON 3338.03: Econometrics I
- One of ECON 2233.03: Canadian Economic History, ECON 2239.03: The European Economy Since 1900, ECON 3310.03: Economic Growth in Historical Perspective, or ECON 3349.03: History of Economic Thought
- ECON 4201.03: Honours Thesis I/ ECON 4202.03: Honours Thesis II
- An additional 36 advanced credit hours in Economics of which 12 credit hours must be at the 3000-level or higher

Additional Requirements

- STAT 2060.03/MATH 2060.03: Introduction to Probability and Statistics

BSc or BA (120 credit hour) Combined Honours in Economics and another subject

Students who wish to study Economics in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Economics may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject.

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. In addition, students must have their program of study approved by Academic Advisors in both subject areas. Students must complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Economics, this requirement is satisfied through ECON 4201.03/ECON 4202.03: Honours Thesis.

Students are required to complete a minimum of 33 credit hours in Economics courses above the 1000 level if Economics is their primary subject, and a minimum of 30 credit hours in Economics courses above the 1000 level if Economics is their secondary subject.

Combined Honours students interested in eventually pursuing a Masters in Economics, are advised to choose the BSc option (with Economics as the primary subject) in order to acquire the needed analytical skills. To contrast, the BA Combined Honours program or BSc or BA (with Economics as a secondary subject) provides a broad background in Economics and another subject which is excellent preparation for a wide variety of other post-graduate programs.

Admission to Combined Honours

Students must apply for admission to Combined Honours programs. Students considering Combined Honours in Economics should consult with an Economics Undergraduate Advisor early in their studies.

To be admitted to the **BSc Combined Honours program (Economics as primary subject)**, students must

- Have at least a B+ average (GPA of 3.3 or above) in Economics courses at the 2000 level and above, with no grade lower than a C
- Have completed ECON 2200.03: Intermediate Microeconomics, ECON 2201.03: Intermediate Macroeconomics, ECON 3338.03: Econometrics I, and ECON 3700.03: Mathematics for Economists
- It is highly recommended that BSc students complete ECON 3339.03: Econometrics II prior to applying to Combined Honours
- Have completed the Dalhousie writing requirement with a grade of B or higher
- Submit the Economics Department honours application by the end of their third year of studies

To be admitted to the **BA Combined Honours program (Economics as primary subject) or BA/BSc Combined Honours program (Economics as secondary subject)** students must

- Have at least a B+ average (GPA of 3.3 or above) in Economics courses at the 2000 level and above, with no grade lower than a C
- Have completed ECON 2200.03: Intermediate Microeconomics, ECON 2201.03: Intermediate Macroeconomics, ECON 3338.03: Econometrics I
- Have completed the Dalhousie writing requirement with a grade of B or higher
- Submit the Economics Department honours application by the end of their third year of studies

Departmental requirements

All students must fulfill the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections. Students are advised that a number of requirements differ for the BA and BSc degrees. In addition, students in a Combined Honours program in Economics and another subject must complete the following:

BSc Combined Honours Requirements:

Economics as primary subject

1000 level

- ECON 1101.03: Principles of Microeconomics/ECON 1102.03: Principles of Macroeconomics
- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II
- MATH 1030.03: Matrix Theory and Linear Algebra I
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences or STAT 2060.03/MATH 2060.03: Introduction to Probability and Statistics

2000 level and higher

- ECON 2200.03: Intermediate Microeconomics/ECON 2201.03: Intermediate Macroeconomics
- ECON 3338.03: Econometrics I/ECON 3339.03: Econometrics II
- ECON 3700.03: Mathematics for Economists
- One of ECON 2233.03: Canadian Economic History, ECON 2239.03: The European Economy Since 1900, ECON 3310.03: Economic Growth in Historical Perspective, or ECON 3349.03: History of Economic Thought
- ECON 4420.03: Microeconomic Theory/ECON 4421.03: Macroeconomic Theory
- ECON 4201.03: Honours Thesis I/ ECON 4202.03: Honours Thesis II
- An additional 3 credit hours in Economics at or above the 2000 level

Additional Requirement

- STAT 2060.03/MATH 2060.03: Introduction to Probability and Statistics

Economics as secondary subject

1000 level

- ECON 1101.03: Principles of Microeconomics/ECON 1102.03: Principles of Macroeconomics
- MATH 1000.03: Differential and Integral Calculus I
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences or STAT 2060.03/ MATH 2060.03: Introduction to Probability and Statistics

2000 level and higher

- ECON 2200.03: Intermediate Microeconomics/ECON 2201.03: Intermediate Macroeconomics
- ECON 3338.03: Econometrics I
- One of ECON 2233.03: Canadian Economic History, ECON 2239.03: The European Economy Since 1900, ECON 3310.03: Economic Growth in Historical Perspective, or ECON 3349.03: History of Economic Thought
- An additional 18 credit hours in Economics at or above the 2000-level, 12 of which must be at or above the 3000-level if (ECON 3310.03 or ECON 3349.03) is chosen or 15 of which must be at or above the 3000-level if (ECON 2233.03 or ECON 2239.03) is chosen.

Additional Requirement

- STAT 2060.03/MATH 2060.03: Introduction to Probability and Statistics

BA Combined Honours Requirements:

Economics as primary subject

1000 level

- ECON 1101.03: Principles of Microeconomics/ECON 1102.03: Principles of Macroeconomics
- MATH 1000.03: Differential and Integral Calculus I
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences or STAT 2060.03/MATH 2060.03: Introduction to Probability and Statistics

2000 level and higher

- ECON 2200.03: Intermediate Microeconomics/ECON 2201.03: Intermediate Macroeconomics
- ECON 3338.03: Econometrics I
- One of ECON 2233.03: Canadian Economic History, ECON 2239.03: The European Economy Since 1900, ECON 3310.03: Economic Growth in Historical Perspective, or ECON 3349.03: History of Economic Thought
- ECON 4201.03: Honours Thesis I/ ECON 4202.03: Honours Thesis II
- An additional 15 advanced credit hours in Economics of which 12 credit hours must be at the 3000-level or higher

Additional Requirement

- STAT 2060.03/MATH 2060.03: Introduction to Probability and Statistics

Economics as secondary subject

- Same requirements as for BSc. Combined Honours with Economics as a secondary subject

BSc or BA (120 credit hour) Major in Economics

The 120 credit hour Major is suited to students who want to focus on Economics, but wish to have a program that is somewhat less constrained than the Honours program. BSc Economics Majors complete a minimum of 42 credit hours in Economics courses above the 1000 level; BA Economics majors complete a minimum of 36 credit hours in Economics courses above the 1000 level. Research and other experiential learning opportunities are available through special topics and experiential classes.

Departmental requirements

All students must fulfill the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections. Students are advised that a number of requirements differ for the BA and BSc degrees.

BSc Major requirements:

1000 level

- ECON 1101.03: Principles of Microeconomics/ECON 1102.03: Principles of Macroeconomics
- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II

- MATH 1030.03: Matrix Theory and Linear Algebra I
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences or STAT 2060.03/MATH 2060.03: Introduction to Probability and Statistics

2000 level

- ECON 2200.03: Intermediate Microeconomics/ECON 2201.03: Intermediate Macroeconomics
- An additional 12 credit hours in Economics at or above the 2000 level

3000 level and higher

- ECON 3338.03: Econometrics I
- An additional 21 credit hours in Economics at or above the 3000 level

Additional Requirements

- STAT 2060.03/MATH 2060.03: Introduction to Probability and Statistics

BA Major requirements:

1000 level

- ECON 1101.03: Principles of Microeconomics/ECON 1102.03: Principles of Macroeconomics
- MATH 1000.03: Differential and Integral Calculus I
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences

2000 level

- ECON 2200.03: Intermediate Microeconomics/ECON 2201.03: Intermediate Macroeconomics
- An additional 12 credit hours in Economics at or above the 2000 level

3000 level and higher

- An additional 18 credit hours in Economics at or above the 3000 level

BSc or BA (120 credit hour) Double Major in Economics and another subject

The Double Major degree program allows students to combine a study of Economics with another subject. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Economics may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA. Students are required to complete a minimum of 30 credit hours in Economics courses above the 1000 level.

It is recommended that students enrolled in a Double Major program consult with advisors in both subject areas.

Departmental requirements

All students must fulfill the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections. Students are advised that a number of requirements differ for the BA and BSc degrees.

BSc requirements (Economics as primary or secondary subject)

1000 level

- ECON 1101.03: Principles of Microeconomics/ECON 1102.03: Principles of Macroeconomics
- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II
- MATH 1030.03: Matrix Theory and Linear Algebra I

- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences or STAT 2060.03/MATH 2060.03: Introduction to Probability and Statistics

2000 level

- ECON 2200.03: Intermediate Microeconomics/ECON 2201.03: Intermediate Macroeconomics
- An additional 6 credit hours in Economics at or above the 2000 level

3000 level and higher

- ECON 3338.03:Econometrics I
- An additional 15 credit hours in Economics at or above the 3000 level

Additional Requirements

- STAT 2060.03/MATH 2060.03: Introduction to Probability and Statistics

BA requirements (Economics as primary or secondary subject)

1000 level

- ECON 1101.03: Principles of Microeconomics/ECON 1102.03: Principles of Macroeconomics
- MATH 1000.03: Differential and Integral Calculus I
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences

2000 level

- ECON 2200.03: Intermediate Microeconomics/ECON 2201.03: Intermediate Macroeconomics
- An additional 6 credit hours in Economics at or above the 2000 level

3000 level and higher

- An additional 18 additional credit hours in Economics at or above the 3000 level

BSc or BA (90 credit hour) Minor in Economics

The 90 credit hour degree with Minor in Economics is appropriate for students who want to study some Economics but do not wish to complete the conventional four-year program. The degree is best suited for students who want a general arts or science degree with some specialization in Economics. A 90 credit hour degree program is not suitable for students who wish to pursue graduate studies. With additional study, the degree may be upgraded to a 120 credit hour Major or Honours degree at a later date.

A 90 credit hour BSc or BA in Economics is usually the preferred option for students who wish to combine studies in Economics with a degree in Engineering (see [BSc/BEng or BA/BEng Concurrent Program](#)).

See the [Minor in Economics](#) section of this Calendar.

Minor in Economics

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A BSc or BA (90 credit hour) degree program with a Minor in Economics is available to students in the Faculty of Science and in the Faculty of Arts and Social Sciences.

Requirements

- ECON 1101.03: Principles of Microeconomics/ECON 1102.03: Principles of Macroeconomics

- Must complete between 18 and 36 credit hours in Economics courses at the 2000 level or higher

Contact [Economics](#) for more information.

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Co-operative Education Program in Economics

Co-op Academic Advisor: Dr. Christos Ntantamis (econadvisor@dal.ca)

Co-operative Education in Science is a program where academic study in a science subject is combined with paid career-related work experience. Students undertake three work-terms interspersed with their academic study terms. Science Co-op degree programs enable students to apply their knowledge directly while providing them with work experience that assists in making educated career choices.

Science Co-op is available to students in **BSc (120 credit hour) Honours or Major programs** in Economics, or in Combined Honours (with Economics as the primary subject) or Double Major programs. A minimum GPA of 3.00 is required for admission and for continuation in the Co-op program. Students must be eligible to work in Canada.

Students normally apply to join Co-op during their first year of study, but application during the second year of study is possible. Students must apply before April 15, and it is strongly recommended that interested students meet with their Department Co-op advisor early in the Winter term of their first year. If accepted into Science Co-op, students must register for, and attend the Science Co-op Seminar Series (SCIE 2800.00) at least four months prior to the first work term.

Details are available from the Co-operative Education office dal.ca/academics/cooperative_education.html. For more information on Co-op Education in Economics, please see the Department webpage dal.ca/faculty/science/economics/programs/undergraduate-programs/Co-operative-education.html

Minors available to students in Economics

Minor programs allow students to develop subject specialties in addition to their major or honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs (including Science Co-op).

Students in a BSc or BA (120 credit hour) program in Economics may choose to include a Minor selected from the [list of approved Minors](#). Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc or BA in Economics, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of [Faculty of Science Certificates](#) and requirements can be found at the beginning of the [Faculty of Science](#) section of this calendar. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the [College of Arts and Science Degree Requirements](#) section of the calendar.

Certificates of particular interest to students enrolled in a BSc or BA in Economics include:

Certificate in Data Analytics

Certificate in Environmental Impact Assessment

Certificate in Science Leadership and Communication

BEng/BSc (90 credit hour) concurrent degree (Economics)

This degree prepares students for careers in engineering by providing students with a better understanding of: the costs and benefits of projects (including externalities and opportunity costs), the business side of projects and financing, and economic policy frameworks. Following is a recommended sequence of courses for students wishing to obtain a concurrent BEng and BSc (90 credit hour) degree with Minor in Economics. Interested students must consult with the Assistant Dean, Faculty of Science, and the Associate Dean, Faculty of Engineering prior to enrolling in a concurrent BEng/BSc degree.

It is recommended that students also discuss their selection of courses with an undergraduate advisor in the Department of Economics. A concurrent BEng/BSc Major in Economics (120 credit hours) can be designed for interested candidates.

	Fall	Winter
Registered in BEng		
Year 1	CHEM 1021 <i>Chemistry I</i>	CHEM 1022 <i>Chemistry II</i>

Graduate with Diploma in Engineering and BSc 90 credit degree

Year 4 Continue in BEng program

Year 5 Complete BEng program

*Under either Option (1 or 2) students must complete ECON 1101/ECON 1102, and a minimum of 18 credit hours of ECON courses at or above the 2000 level, and an additional 6 credit hours of Science/FASS courses (which may also be ECON courses)

* Writing requirement: choose from eligible writing courses in CLAS, ENGL, GERM, HIST, PERF, PHIL, RELS, or RUSN to fulfill writing and humanities requirements [College of Arts and Science]

* See Engineering section of the calendar for details

Co-operative Education Program in Economics

Co-op Academic Advisor: Dr. C. Ntantamis (econadvisor@dal.ca)

Co-operative Education in Science is a program where academic study in a science subject is combined with paid career-related work experience. Students undertake three work-terms interspersed with their academic study terms. Science Co-op degree programs enable students to apply their knowledge directly while providing them with work experience that assists in making educated career choices.

Science Co-op is available to students in **BSc (120 credit hour) Honours or Major programs** in Economics, or in Combined Honours (with Economics as the primary subject) or Double Major programs. A minimum GPA of 3.00 is required for admission and for continuation in the Co-op program. Students must be eligible to work in Canada.

Students normally apply to join Co-op during their first year of study, but application during the second year of study is possible. Students must apply before April 15, and it is strongly recommended that interested students meet with their Department Co-op advisor early in the Winter term of their first year. If accepted into Science Co-op, students must register for, and attend the Science Co-op Seminar Series (SCIE 2800.00) at least four months prior to the first work term.

Details are available from the Co-operative Education office dal.ca/academics/cooperative_education.html. For more information on Co-op Education in Economics, please see the Department webpage dal.ca/faculty/science/economics/programs/undergraduate-programs/Co-operative-education.html.

Minors available to students in Economics

Minor programs allow students to develop subject specialties in addition to their major or honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs (including Science Co-op).

Students in a BSc or BA (120 credit hour) program in Economics may choose to include a Minor selected from the [list of approved Minors](#). Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc or BA in Economics, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of [Faculty of Science Certificates](#) and requirements can be found at the beginning of the [Faculty of Science](#) section of this calendar. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the [College of Arts and Science Degree Requirements](#) section of the calendar.

Certificates of particular interest to students enrolled in a BSc or BA in Economics include:

[Certificate in Data Analytics](#)

[Certificate in Science Leadership and Communication](#)

BEng/BSc (90 credit hour) concurrent degree (Economics)

This degree prepares students for careers in engineering by providing students with a better understanding of: the costs and benefits of projects (including externalities and opportunity costs), the business side of projects and financing, and economic policy frameworks. Following is a recommended sequence of courses for students wishing to obtain a concurrent BEng and BSc (90 credit hour) degree with Minor in Economics. Interested students must consult with the Assistant Dean, Faculty of Science, and the Associate Dean, Faculty of Engineering prior to enrolling in a concurrent BEng/BSc degree.

It is recommended that students also discuss their selection of courses with an undergraduate advisor in the Department of Economics. A concurrent BEng/BSc Major in Economics (120 credit hours) can be designed for interested candidates.

	Fall	Winter
Registered in BEng		
Year 1	CHEM 1021 <i>Chemistry I</i>	CHEM 1022 <i>Chemistry II</i>
	MATH 1280 <i>Engineering Math I</i>	MATH 1290 <i>Engineering Math II</i>

	Option 1 ^a	Option 1
	Two 2000 level (or higher) ECON courses	Two 2000 level (or higher) ECON courses
	Option 2 ^a	

ECON 1101 and ECON 1102

Option 2

Two 2000 level or higher ECON courses

Year 3 IENG 2005 *Engineering economics*

ENGI 2203 *Engineering design II*

ECED 2000 *Electric circuits*

^c Two Engineering electives

ENGI 2102 *Thermo-Fluid Engineering I*

Option 1

Option 1

One 2000 level (or higher) ECON course

One 2000 level (or higher) ECON course

One Science/FASS course (may be ECON)

One Science/FASS course (may be ECON)

Option 2

Option 2

Two 2000 level (or higher) ECON courses

Two 2000 level (or higher) ECON courses

One Science/FASS course (may be ECON)

One Science/FASS course (may be ECON)

Graduate with Diploma in Engineering and BSc 90 credit degree

Year 4 Continue in BEng program

Year 5 Complete BEng program

^a Under either Option (1 or 2) students must complete ECON 1101/ECON 1102, and a minimum of 18 credit hours of ECON courses at or above the 2000 level, and an additional 6 credit hours of Science/FASS courses (which may also be ECON courses)

^b Writing requirement: choose from eligible writing courses in CLAS, ENGL, GERM, HIST, PERF, PHIL, RELS, or RUSN to fulfill writing and humanities requirements [College of Arts and Science]

^c See Engineering section of the calendar for details

Graduate Studies

The Department offers a graduate program leading to the MA, MDE and PhD degrees. Details of these programs, including a list of graduate courses, are given in the Calendar of the Faculty of Graduate Studies. Senior undergraduates may be admitted to some graduate courses at the discretion of the instructors concerned.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

Course Notes

Recent course outlines are available on the department's website (<http://economics.dal.ca>)

All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.

Course Descriptions

ECON 1101 Principles of Microeconomics

CREDIT HOURS: 3

How do you decide whether or not to go to university? Why does the price of pizza change so much less than the price of oil? What will better help prevent climate change: a carbon tax, or a cap-and-trade system? Microeconomic analysis, which considers the behaviour of individuals and businesses, can answer questions like these.

FORMATS: Lecture

ECON 1102 Principles of Macroeconomics

CREDIT HOURS: 3

Why are some countries rich and others poor? If high oil prices cause the loonie to rise, how are Ontario manufacturers affected? Why were mortgage interest rates above 20% in 1981 but below 5% in 2013? Macroeconomic analysis, which considers the behaviour of the entire economy, can answer questions like these.

CALENDAR NOTES: ECON 1101.03 is not required before taking ECON 1102.03. ECON 1101.03 and ECON 1102.03 (together) satisfy the Principles of Economics requirement for Economics majors and for Bachelor of Commerce and Bachelor of Management students.

FORMATS: Lecture

ECON 1214 Economics of Food and Food Systems

CREDIT HOURS: 3

This course uses food and food systems to introduce, explore, and understand a range of economic themes and concepts using both historical and contemporary contexts. The economic themes include the demand for food, the supply of food, economic policies that affect both the demand for and supply of food, and climate change and biodiversity loss.

FORMATS: Lecture

ECON 2064 Economic History of the Early Modern West 1500 - 1800

CREDIT HOURS: 3

The course provides an overview of Europe's growing economic power - agriculture, manufacturing, commerce, consumption and fiscality - in the centuries between the first overseas exploration and the onset of the Industrial Revolution. Along with the lectures, students are introduced to a variety of period sources, transcribed and translated.

CALENDAR NOTES: This class cannot be used to meet the life or physical science subject requirement for the BA degree.

CROSSLISTED: HIST2064.03

FORMATS: Lecture | Seminar

ECON 2200 Intermediate Microeconomics

CREDIT HOURS: 3

This course covers consumer behaviour, the theory of the firm, factor markets, and general equilibrium welfare analysis. The course serves as the microeconomic prerequisite for higher-level courses in economics.

CALENDAR NOTES: All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.

PREREQUISITES: ECON 1101.03 with a minimum grade of C.

EXCLUSIONS: ECON 2220.03, ECON 2210.03

FORMATS: Lecture

ECON 2201 Intermediate Macroeconomics

CREDIT HOURS: 3

An extension of macroeconomic theory of income, unemployment, the exchange rate, inflation and financial markets that satisfies the minimum macroeconomic theory requirement for majors in economics. Serves as the macroeconomic prerequisite for higher-level courses in economics.

CALENDAR NOTES: All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.

PREREQUISITES: ECON 1102.03 with a minimum grade of C.

FORMATS: Lecture

ECON 2210 Managerial Microeconomics

CREDIT HOURS: 3

An extension of microeconomic theory and its applications that satisfies the minimum microeconomic theory requirements for Majors in economics. Especially of interest to Commerce students or others not majoring in economics, it pays particular attention to applications of theory in a practical context. Serves as the microeconomic prerequisite for higher-level classes in economics.

CALENDAR NOTES: Credit cannot be received for BOTH ECON 2200.03 and ECON 2210.03.

PREREQUISITES: ECON 1101.03 or ECOA 1000.03 with minimum grade of C

EXCLUSIONS: ECON 2200.03, ECON 2220.03

FORMATS: Lecture

ECON 2211 Economics of Innovation

CREDIT HOURS: 3

Innovation involves the creation and diffusion of new products, processes and methods that drive productivity increases and sustainable growth. This course uses microeconomics to examine the public sector's role in promoting innovation and firms' receptor capacity to recognize and address productivity gaps with investments in innovative products, processes and methods.

PREREQUISITES: ECON 1101 or ECON 1102 with minimum grade of C

FORMATS: Lecture

ECON 2212 Law and Economics

CREDIT HOURS: 3

Law and Economics is the study of optimal legal frameworks. This course uses microeconomic theory to study the efficiencies of property, contract, tort, criminal, and antitrust law. A critical analysis of the role of the Competition Bureau in Canadian markets is presented, along with the tools used to evaluate transactions.

PREREQUISITES: ECON 1101 with minimum grade of C

FORMATS: Lecture

ECON 2213 Emerging Giants: The Economic Rise of China and India

CREDIT HOURS: 3

This course examines the economic history, current issues, and future trends of China and India, answering such questions as: What explains China's and India's growth? How is climate change affected by this growth? How are global labour markets affected? Must growth lead to rising inequality? Is democracy required for development?

CALENDAR NOTES: The student is recommended to have some knowledge of Statistics prior to taking this course.

PREREQUISITES: ECON 1101.03, ECON 1102.03 with minimum grades of C

CROSSLISTED: CHIN 2290.03

FORMATS: Lecture

ECON 2216 Economics of Global Warming

CREDIT HOURS: 3

This course uses economic principles to investigate such questions as: What are the benefits and costs of various time paths for abating emissions? How do we value the well-being of future generations? How do we balance helping the poor with environmental sustainability? What policies can align incentives with environmental sustainability?

PREREQUISITES: ECON 1101.03 with minimum grade of C

EXCLUSIONS: ECON2850.06, PHYC2850.06

FORMATS: Lecture

ECON 2217 Women and the Economy

CREDIT HOURS: 3

This course studies questions such as: Have economic conditions improved for women in Canada over the past 30 years? Is there gender discrimination in the Canadian labour market? What are the economic consequences of divorce? Are women more likely than men to be poor? Are there inequalities within families?

CALENDAR NOTES: Approved with Canadian Studies.

PREREQUISITES: ECON 1101.03, ECON 1102.03 with minimum grades of C

CROSSLISTED: GWST 2217.03

FORMATS: Lecture

ECON 2218 Canadian Economy: Policy Issues

CREDIT HOURS: 3

Canada's economy today faces many problems: unemployment, productivity, income distribution, environmental protection, trade relations, federal-provincial fiscal relations, maintenance of social programs, etc. What are the most important economic policy issues that Canada now faces? What is the appropriate policy role for government?

CALENDAR NOTES: Approved with Canadian Studies.

PREREQUISITES: ECON 1101.03, ECON 1102.03, with minimum grades of C

CROSSLISTED: CANA 2218.03

FORMATS: Lecture

ECON 2219 Euros and Cents: From Common Market to European Union

CREDIT HOURS: 3

The European Union is a grand experiment to unite countries in a single market. The stepwise evolution from customs union to common market to economic and monetary union with a single currency, the Euro, is reviewed and analyzed. Learn more about an economic integration that is unparalleled in history.

CALENDAR NOTES: All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.

PREREQUISITES: ECON 1101.03, ECON 1102.03 with minimum grades of C

FORMATS: Lecture

ECON 2220 Microeconomic Theory

CREDIT HOURS: 3

This course covers the economic behaviour of individual decision makers, such as a consumer, a worker or a firm. Emphasis is on theoretical ideas, while applications of these ideas are also considered. Of particular interest to those planning to major or to do honours in economics.

CALENDAR NOTES: Students may not receive credit for both 2200.03 and 2220.03. All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.

PREREQUISITES: Econ 1101.03, MATH 1000.03 (or equivalent) with minimum grades of C

EXCLUSIONS: Credit cannot be received for BOTH ECON 2200.03 and ECON 2210.03.

FORMATS: Lecture

ECON 2231 Perspectives in Health Economics

CREDIT HOURS: 3

This course introduces students to the economics of health, health care, and health policy. It surveys major topics in health economics and the ongoing debate over health care policy. Topics include the economic determinants of health, markets for medical care and health insurance and the government's role in health care.

PREREQUISITES: ECON 1101.03 and any MATH or STAT course with minimum grades of C

FORMATS: Lecture

ECON 2233 Canadian Economic History

CREDIT HOURS: 3

An examination of the economic history of Canada from the time of Confederation to WWI. Major topics explored include: the economic reasons for Confederation, the building of the CPR, the Wheat Boom, foreign trade and investment and the roots of regional disparities.

CALENDAR NOTES: Approved with Canadian Studies. The student is recommended to have some knowledge of history prior to taking this course.

PREREQUISITES: ECON 1101.03, ECON 1102.03 with minimum grades of C

CROSSLISTED: CANA 2233.03

FORMATS: Lecture

ECON 2239 European Economic History

CREDIT HOURS: 3

This course examines the contrasting development patterns of various industrialized European countries during and after their respective industrial revolutions, their association to the European colonial expansion taking place at the same time, and the economic impact on the rest of the world with reference to the turbulent 20th century.

CALENDAR NOTES: Approved with Canadian Studies.

PREREQUISITES: ECON 1101.03, ECON 1102.03 with minimum grades of C

FORMATS: Lecture

ECON 2326 Money and Banking

CREDIT HOURS: 3

The course concerns the nature and operation of the financial system with particular reference to the Canadian experience. It investigates financial instruments (including money) and institutions and the social control of the supply of money and credit.

CALENDAR NOTES: Approved with Canadian Studies

PREREQUISITES: ECON1101.03, ECON1102.03 with minimum grades of C

EXCLUSIONS: ECON3326.03

FORMATS: Lecture

ECON 2334 Perspectives on Economic Development

CREDIT HOURS: 3

Economists have long debated whether the task of development should be entrusted largely to market forces, or whether there is a role for the state in directing a nation's economic affairs. These debates continue. We assess critiques of economic analysis of development and students are encouraged to debate these issues.

PREREQUISITES: ECON 1101.03, ECON 1102.03 with minimum grades of C

FORMATS: Lecture

ECON 2336 Regional Development

CREDIT HOURS: 3

Why are some countries or regions poor? Why have the relative positions of different countries and regions shifted over the last several decades? Economic development issues, policies, and theories are analyzed to answer these questions.

PREREQUISITES: ECON 1101.03, 1102.03 with minimum grades of C

CROSSLISTED: GEOG 2336.03

FORMATS: Lecture

ECON 2400 Economic Demography

CREDIT HOURS: 3

This course investigates the economic determinants and consequences of the size, growth, and age structure of human populations. Topics include: why and how households save for retirement and related policy; how age structure affects the employment and well-being of particular generations; and how demographic change and economic growth interact.

PREREQUISITES: ECON 1101.03, ECON 1102.03 with minimum grades of C

FORMATS: Lecture

ECON 2850 The Science and Economics of Climate Change

CREDIT HOURS: 6

This course examines how climate change will impact the environment and human activities, and how to formulate and implement economically realistic solutions. It integrates the physical and biological science with economics in order to analyze the response options as we move towards a carbon-neutral society.

PREREQUISITES: ECON 1101.03 or ECON 1102.03 or any First year MATH or STAT course

CROSSLISTED: PHYC 2850.06

EXCLUSIONS: PHYC 2800.03, ECON 2216.03

FORMATS: Lecture

ECON 3111 Writing in Economics

CREDIT HOURS: 3

This course provides instruction in principles and practice of good writing about economics. Students read and examine writing samples and practice writing for various venues (such as government, firms, and news media) in various formats (such as opinion editorials, government policy papers, proposal writing and journal articles).

PREREQUISITES: ECON 2200.03 or (ECON 2210.03 or ECON 2220.03) with a minimum grade of C

ECON 3231 Topics in Health Economics

CREDIT HOURS: 3

This course comprises a survey of major topics in health economics and introduces the issues, theory and practice of health economics. The course frames health care as an input into the production of health. It thus differentiates the concepts of healthcare and health addressing both throughout the term.

CALENDAR NOTES: ECON 2231.03 is a recommended prerequisite

PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03), and ECON 2280.03/STAT 2080.03/MATH 2080.03, with minimum grades of C

FORMATS: Lecture

ECON 3310 Economic Growth in Historical Perspective

CREDIT HOURS: 3

This course examines the sources of long-run economic growth and development in a historical perspective. Topics covered include invention, innovation, culture, legal institutions governing access to resources, demography, fertility, mortality, and alternative modes of production.

PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03) and ECON 2201.03 with minimum grades of C

FORMATS: Lecture

ECON 3315 Labour Economics

CREDIT HOURS: 3

This course considers the theory, evidence and policy of labour economics from a Canadian perspective. Topics include: How does EI affect the Canadian labour market? Do minimum wages reduce employment? What is economic discrimination and does it exist in Canada? How well do immigrants fare in the Canadian labour market?

PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03), and ECON 2201.03 with minimum grades of C

FORMATS: Lecture

ECON 3319 Industrial Organization

CREDIT HOURS: 3

The course provides an overview of the organization of production. Market structure, firm conduct, and performance affect each other in complex ways; the degree of horizontal and vertical integration affects the ability to set prices, for example. Governments regulate firms in order to reduce socially harmful anticompetitive behaviour.

CALENDAR NOTES: Approved with Canadian Studies.

PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03) with minimum grade of C

FORMATS: Lecture

ECON 3320 The Economics of Professional Sports

CREDIT HOURS: 3

This course applies microeconomic theory to explain the peculiar nature of professional sports. Topics may include the organization of leagues, ticket pricing, advertising, competitive balance, franchise valuation, stadium financing, broadcasting and sports labour markets. "Controversial" topics, such as gambling, cheating, performance enhancing drugs (PEDs) and discrimination may also be covered.

PREREQUISITES: ECON1102.03, ECON 2200.03 (or ECON2210.03 or ECON2220.03) and (STAT1060.03/MATH1060.03 or

STAT2060.03/MATH2060.03) each with minimum grades of C.

FORMATS: Lecture

ECON 3325 The Economics of Racism

CREDIT HOURS: 3

This course examines race and discrimination through the lens of economics. We cover economic theories of discrimination, empirical evidence of discrimination based on race, and government policies meant to reduce discrimination as well as the many policies that exacerbate it, e.g., slavery, red-lining, and segregation.

PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03) with minimum grade of C

FORMATS: Lecture

ECON 3330 International Trade

CREDIT HOURS: 3

This course examines the theory and empirics of international trade, including standard historical trade theories, more recent theories, and evidence regarding these theories. The course investigate factor movements, the welfare effects of trade policies in both industrial and developing countries, and the institutions that have developed to regulate those policies.

PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03) with minimum grade of C

FORMATS: Lecture

ECON 3331 International Finance

CREDIT HOURS: 3

This course covers the theory and empirics of international macroeconomics. It examines the determination of exchange rates, international capital flows, and risk; the effectiveness of fiscal and monetary policy in an open economy; modern international policy coordination; and the determination of the current account and net foreign assets.

PREREQUISITES: ECON 2201.03 with minimum of grade C
FORMATS: Lecture

ECON 3332 Resource Economics

CREDIT HOURS: 3

This course focuses on intertemporal economics and the economics of market failure as they pertain to the use of natural resources. A selection of resource sectors will also be discussed. Fisheries, agriculture, forestry, and energy represent possibilities, but this will vary from year to year.

CALENDAR NOTES: Approved with Canadian Studies. All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.

PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03), MATH 1000.03 or equivalent with minimum grades of C

FORMATS: Lecture

ECON 3333 Economic Development

CREDIT HOURS: 3

This course surveys current applications of economic theory to the problem of economic development. Topics covered include recent advances in theory of economic growth, theories of poverty and inequality and their relation to economic performance, theories of fertility and population growth, and the microeconomics of peasant agriculture.

PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03), ECON 2201.03, with minimum grades of C

FORMATS: Lecture

ECON 3335 Environmental Economics

CREDIT HOURS: 3

This course serves as an introduction to environmental economics. Topics include social decision making, externalities and public goods, regulatory approaches (standards, charges, tradable permits), forms of value derived from the environment and measurement techniques.

PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03) with minimum grade of C

FORMATS: Lecture

ECON 3338 Econometrics I

CREDIT HOURS: 3

The theory of some quantitative methods commonly used by economists is discussed in the context of the classical linear model. Estimation problems caused by violations of the assumptions of the classical model are studied including heteroscedasticity and autocorrelation.

PREREQUISITES: MATH 1000.03 (or equivalent) and STAT 2060.03/MATH 2060.03 with minimum grades of C

FORMATS: Lecture

ECON 3339 Econometrics II

CREDIT HOURS: 3

This course is an extension of ECON 3338.03 and covers a range of econometric methods that are used in economic research. The topics for this course include: panel data, binary-choice models, instrumental variables, time series and forecasting.

PREREQUISITES: ECON 3338.03 with minimum grade of C

FORMATS: Lecture

ECON 3345 Public Finance

CREDIT HOURS: 3

This class studies the economics of taxes and transfers. Equity and efficiency effects of both are considered. Approved with Canadian Studies.

CALENDAR NOTES: All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.

PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03) and ECON 2201.03 with minimum grades of C

ECON 3349 History of Economic Thought

CREDIT HOURS: 3

This course will examine theories of value, production, distribution, and growth as developed in classical political economy and neoclassical economics. Theories of equilibrium and stability, the links between classical political economy and macroeconomic theory, and reactions to classical and neoclassical economics will be considered as time permits.

PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03) and ECON 2201.03 with minimum grades of C

FORMATS: Lecture

ECON 3350 Social Cost Benefit Analysis

CREDIT HOURS: 3

Social cost benefit analysis is used to evaluate public projects and private sector regulations. It is similar to the revenue cost accounting used by firms but takes into account external costs and benefits such as environmental damages. This course explains the methodology in the context of case studies after which students apply the method to evaluate a public policy problem.

CALENDAR NOTES: It is strongly recommended for students to have taken one welfare analysis course such as ECON2216.03, ECON3335.03, ECON3345.03, ECON3330.03 or ECON3319.03 prior to registering for the course.

PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03) with a minimum grade of C

RESTRICTIONS: Registration exclusion = E2

EXCLUSIONS: ECON 4350

FORMATS: Lecture

ECON 3426 Monetary Policy

CREDIT HOURS: 3

Assuming a basic knowledge of monetary institutions and macroeconomics, a critical analysis of the objectives and effectiveness of monetary policy is developed. Particular attention is given to the Canadian experience and the effectiveness of Canadian policy.

CALENDAR NOTES: Approved with Canadian Studies.

PREREQUISITES: ECON 2201.03 and ECON 2326.03 with minimum grades of C

EXCLUSIONS: ECON4426

FORMATS: Lecture

ECON 3500 Public Economics

CREDIT HOURS: 3

Analyzes the role of government in problems of resource allocation due to market failure. Concentrates on theories of public goods, collective choice, potential of conflict and cooperation in individually-motivated actions, incentive structures capable of realizing rational, cooperative, group outcomes. Provides theoretical underpinnings of many applied fields. Involves mathematical methods.

CALENDAR NOTES: While a background of ECON 3700 is helpful, it is not a prerequisite.

PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03), and MATH 1000.03 or equivalent with minimum grades of C or instructor permission

FORMATS: Lecture

ECON 3600 Strategic Behaviour in Economics

CREDIT HOURS: 3

Many economic questions (such as price competition, tax policy, research and development decision, bargaining) can be interpreted as games, in which each player's action affects payoffs of other players. The students learn how to recognize various strategic interactions in economics, and how to evaluate the outcomes of such interactions.

PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03), MATH 1000.03 or equivalent with minimum grades of C

FORMATS: Lecture

ECON 3700 Mathematics for Economists

CREDIT HOURS: 3

This course presents mathematical methods used in modern economics. The lectures concentrate on the basic concepts of analysis, comparative statics and optimization theory. Topics include an introduction to set theory and matrix algebra, the implicit function theorem, unconstrained optimization, constrained optimization with equality and inequality constraints, and intertemporal choice.

PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03), ECON 2201.03, and MATH 1000.03 or equivalent with minimum grades of C or permission of the instructor

CROSSLISTED: MATH 3700.03

FORMATS: Lecture

ECON 3800 Financial Economics

CREDIT HOURS: 3

This course is an introduction to decision making by investors under uncertainty, portfolio theory, asset pricing, financial markets, and instruments. The course covers both the theoretical and practical aspects of investment, surveys the techniques available for economists, and emphasizes "hands-on" learning using Canadian and international case studies.

PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03), ECON 2201.03 with minimum grades of C

CROSSLISTED: MATH 3800.03

FORMATS: Lecture

ECON 3900 Financial Mathematics

CREDIT HOURS: 3

See course description for MATH 3900.03 in the Mathematics section of this calendar.

PREREQUISITES: MATH 2060.03 and (MATH 2120.03 or MATH 3110.03 or MATH 2135.03) with minimum grades of C or instructor's permission

CROSSLISTED: MATH 3900.03

FORMATS: Lecture

ECON 4002 Experiential Learning (in Economics)

CREDIT HOURS: 3

Experiential learning recognized the learning experience relevant to the program outside the scheduled curriculum. Students are responsible for drafting a learning agreement with the course coordinator and supervisor to specify learning outcomes, activities designed to accomplish these outcomes, a quantifiable assessment strategy and timetable.

PREREQUISITES: ECON 1101.03, ECON 1102.03, ECON 2200.03 (or ECON 2210.03 or ECON 2220.03), ECON 2201.03, ECON 3338.03, ECON 3339.03 with minimum grades of C. To be eligible, students should have a minimum average GPA of 3.0 in Economics.

EXCLUSIONS: Scheduled classes at a learning institution, study that would qualify for co-op work terms and paid work. Only one experiential learning class per degree is permitted.

ECON 4201 Honours Thesis I

CREDIT HOURS: 3

This course is required for honours students, and helps students define, research, and write an original research project under the supervision of an economics faculty member. Students develop a topic, critique current literature, run statistical tests, or research and write a policy paper, and present results in a public conference.

CALENDAR NOTES: Students must complete both ECON4201.03 and 4202.03 in the same academic year, and are assigned a common grade for both courses after both have been completed. To be given permission to take the Honours Thesis courses, students should have completed the Dalhousie writing requirement, with a grade of B or higher in at least one Dalhousie writing course. ECON3339.03 is a recommended prerequisite for B.Sc. students.

PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03), ECON 2201.03, ECON 3338.03, with minimum grades of C and permission of instructor

EXCLUSIONS: ECON4200.06

FORMATS: Seminar

ECON 4202 Honours Thesis II

CREDIT HOURS: 3

This course is required for honours students, and helps students define, research, and write an original research project under the supervision of an economics faculty member. Students develop a topic, critique current literature, run statistical tests, or research and write a policy paper, and present results in a public conference.

CALENDAR NOTES: Students must complete both ECON4201.03 and ECON4202.03 in the same academic year, and are assigned a common grade for both courses after both have been completed. To be given permission to take the Honours Thesis course, students should have completed the Dalhousie writing requirement, with a grade of B or higher in at least one Dalhousie writing course. ECON3339.03 is a recommended prerequisite for B.Sc. students.

PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03), ECON 2201.03, ECON 3338.03, ECON4201.03, all with minimum grades of C, and permission of instructor

EXCLUSIONS: ECON4200.06

FORMATS: Seminar

ECON 4317 Poverty and Inequality

CREDIT HOURS: 3

Why are some people poor, while others are rich? Why do some nations have more poverty or inequality than others? What can or should be done? This course examines the extent of poverty and inequality in contemporary societies, and the theories underlying alternative measures and explanations.

CALENDAR NOTES: Approved with Canadian Studies. The student is advised to take ECON 3315 before taking ECON 4317.

PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03), and ECON2201.03, with minimum grades of C.

EXCLUSIONS: ECON 3317.03; ECON 5317.03

FORMATS: Lecture

ECON 4360 Ethics, Justice, and Economics

CREDIT HOURS: 3

Assumptions of Neoclassical economic theory are critically examined with a focus on the ethical and distributional consequences of using markets as an

allocation mechanism. We discuss the major conceptions of economic justice, including utilitarianism and social choice theory, Rawlsian egalitarianism, Nozickian libertarianism, Sen's capabilities approach and equality of opportunity.

PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03), and ECON 2201.03, with minimum grades of C

CROSSLISTED: PHIL 4360.03

EXCLUSIONS: ECON 3360.03, ECON 5360.03, PHIL 3361.03

FORMATS: Lecture

ECON 4420 Microeconomic Theory

CREDIT HOURS: 3

In-depth study of outcomes of decision-making by agents, individually, collectively or as an interdependent system. Selects topics from: linear and non-linear optimization and applications to theory of consumers and firms, general equilibrium, game theory, alternative solution concepts, comparative statics, stability, welfare, market failures, collective choice, intertemporal economics, uncertainty.

PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03), ECON 3700.03, MATH 1000.03 or equivalent, MATH 1010.03 with minimum grades of C

FORMATS: Lecture

ECON 4421 Macroeconomic Theory

CREDIT HOURS: 3

Students are introduced to contemporary issues in macroeconomics including aggregate growth accounting; neoclassical growth models; monetary policy, inflation and unemployment; theories of consumption and investment; and trade and exchange rates. Mathematical methods are applied extensively and their application to economic problems will be stressed at both the theoretical and intuitive levels.

PREREQUISITES: ECON 2201.03, ECON 3700.03, MATH 1000.03 (or equivalent), MATH 1010.03 with minimum grades of C

FORMATS: Lecture

ECON 4427 Market Design

CREDIT HOURS: 3

The course studies how the organization of centrally administered markets affects their performance. Students learn several mechanisms that are currently used, and evaluate their properties. The course has a strong emphasis on applications, e.g., the allocation of students to public schools, interns to hospitals or organ donors to recipients.

PREREQUISITES: ECON3700 or MATH 2001 with a minimum grade of C

EXCLUSIONS: Econ 5427.03

FORMATS: Lecture

ECON 4440 Time Series in Economics

CREDIT HOURS: 3

This is a course in econometrics that focuses on time series models. The topics cover estimation and inference procedures for univariate and multivariate time series models with stationary and nonstationary data, including vector autoregressive models and Markov switching models.

PREREQUISITES: ECON 3338.03 (grade of C or higher), ECON 3339.03 (grade of B or higher)

EXCLUSIONS: ECON 5440.03

FORMATS: Lecture

ECON 4700 Advanced Mathematics for Economists

CREDIT HOURS: 3

The course emphasizes abstract analytical methods via a selection of topics in mathematics which prepares the advanced undergraduate student for pursuing graduate studies in economics. Topics include elements of mathematical logic, sets and correspondence, vector spaces, metric spaces, topological concepts, fundamentals of analysis, multivariate calculus, fixed point theorems, dynamic optimization.

PREREQUISITES: ECON 3700.03 with minimum grade of C

FORMATS: Lecture

ECON 8891 Co-op Work-Term I

CREDIT HOURS: 0

ECON 8892 Co-op Work-Term II

CREDIT HOURS: 0

ECON 8893 Co-op Work-Term III

CREDIT HOURS: 0

Environment, Sustainability and Society

Location:

College of Sustainability
1459 LeMarchant Street
Suite 1401
PO BOX 15000
Halifax NS
B3H 4R2

Phone Number: (902) 494-4581

Fax Number: (902) 494-8923

Email Address: sustainability@dal.ca

Website: www.ess.dal.ca

Degree Programs

The College of Sustainability offers a BSc Double Major, Combined Honours and Minor in Environment, Sustainability and Society with any major/honours subject in the Faculty of Science and the Faculty of Computer Science. For complete details about the College, its programs and courses please see the [College of Sustainability](#).

Students in the ESS Program are eligible to pursue the following Certificates offered by the Faculty of Science:

- [Certificate in Environmental Impact Assessment](#)
- [Certificate in Geographical Information Systems](#)

BSc Combined Honours, Environment, Sustainability and Society

The BSc Combined Honours degree program allows students to combine a study of Environment, Sustainability and Society (ESS) with another subject (Allied Subject). The Allied Subject may be any Honours subject from the Faculty of Science or the Faculty of Computer Science. An Honours Thesis is completed in either ESS or in the Allied Subject. Students intending to complete a Combined Honours program must consult with academic advisors in both subject areas. This degree may also be combined with Minor(s) and Certificate(s).

In addition to fulfilling the 120 credit hour degree requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections, students in a BSc Combined Honours program in ESS and another subject must complete the following:

ESS Course Requirements

1000-level Requirements

- SUST 1000.06: *What is Sustainability?* or SUST 1400.03 *Exploring Sustainability* (online)
- SUST 1001.06: *A Sustainable Future*
- With **Foundation Year Program (FYP)** or **Dalhousie Integrated Science Program (DISP)**: Any 1000-level SUST course (minimum 3 credit hours)

Upper-level requirements:

- SUST 2000.06: *Local Governance, Citizen Engagement and Sustainability*
- SUST 2001.06: *Global Environmental Governance*
- SUST 3000.03: *Environmental Decision Making*
- 9 more credit hours SUST at 3000 level or above (SUST 4001.03 and SUST 4002.03 *ESS Capstone* recommended)

ESS as primary subject in BSc Combined Honours:

- 6 more credit hours SUST or ESS Electives at **2000 level or above**
- SUST 4901.03 and SUST 4902.03: *ESS Honours Thesis* (see below for admission requirements)

ESS as secondary subject in BSc Combined Honours:

- 6 more credit hours SUST or ESS Electives at **3000 level or above**
- The courses listed above fulfill the minimum requirements of 30 credit hours at 2000-level or above and 18 credit hours at 3000-level or above
- Students may take no more than 54 credit hours in SUST/ESS Electives at 2000-level or above

Allied Subject Requirements

Please consult the Academic Calendar and Academic Advisor for your Allied Subject. If ESS is the secondary subject, the Honours Thesis is typically completed in the Allied (primary) Subject. Even if ESS is the primary subject, there may be additional course requirements for the Allied Subject to satisfy their Combined Honours degree requirements.

Admission to ESS Honours Thesis

Students wishing to complete the Honours Thesis in ESS must apply for admission to the ESS Honours Thesis by completing the “Intent to Register for ESS Honours Thesis” form before the end of the winter term prior to starting the ESS Honours Thesis course. A cumulative GPA of 3.3 is required in all SUST and ESS Elective courses at 2000 level or above, with no individual grade less than C. Students must also complete the Dalhousie Honours Application Form before the deadline in September of their Honours year.

BSc Combined Honours Graduation Requirements

Students must fulfill the requirements for the 120 credit hour degree requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections. A cumulative GPA of 3.0 is required in all Honours Subject courses at 2000 level or above, with no individual grade less than C.

General Degree Requirements satisfied by SUST courses

- SUST 1000.06 satisfies the 6 credit hours writing requirement (SUST 1400.03 and SUST 1001.06 do not satisfy the Writing Requirement).
- For BSc students either SUST 1000.06 or SUST 1001.06 satisfy the Social Science requirement.
- For BA students either SUST 1000.06 or SUST 1001.06 satisfy the Life and Physical Sciences requirement.
- For all General Degree Requirements please see [College of Arts and Science Degree Requirements](#).

BSc Double Major, Environment, Sustainability and Society

The BSc Double Major degree program allows students to combine a study of Environment, Sustainability and Society (ESS) with another subject (Allied Subject). The Allied Subject may be any Major subject from the Faculty of Science or the Faculty of Computer Science. It is recommended that students enrolled in a Double Major program consult with academic advisors in both subject areas. This degree may also be combined with Minor(s) and Certificate(s).

In addition to fulfilling the 120 credit hour degree requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections, students in a BSc Double Major program in ESS and another subject must complete the following:

ESS Requirements

1000-level requirements

- SUST 1000.06: *What is Sustainability?* or SUST 1400.03 *Exploring Sustainability* (online)
- SUST 1001.06: *A Sustainable Future*
- With **Foundation Year Program (FYP)** or **Dalhousie Integrated Science Program (DISP)**: Any 1000-level SUST course (minimum 3 credit hours)

Upper-level requirements

- SUST 2000.06: *Local Governance, Citizen Engagement and Sustainability*
- SUST 2001.06: *Global Environmental Governance*
- SUST 3000.03: *Environmental Decision-Making*
- SUST 4001.03: *Environment, Sustainability and Society Capstone Part 1*
- SUST 4002.03: *Environment, Sustainability and Society Capstone Part 2*
- 3 more credit hours SUST at 3000 level or above
- 6 more credit hours SUST or ESS Electives at 3000 level or above
- The courses listed above fulfill the minimum requirements of 30 credit hours at 2000-level or above and 18 credit hours at 3000-level or above
- Students may take up to 18 more credit hours in SUST/ESS Electives at 2000-level or above, to a maximum of 48 credit hours

* SUST 4001 and SUST 4002 must be taken in consecutive Fall and Winter terms. Credit will not be granted for SUST 4001 until completion of SUST 4002.

Allied Subject Requirements

Please consult the Calendar and Academic Advisor for your Allied Subject.

General Degree Requirements satisfied by SUST courses

- SUST 1000.06 satisfies the 6 credit hours Writing Requirement (SUST 1400.03 and SUST 1001.06 do not satisfy the Writing Requirement).
- For BA students either SUST 1000.06 or SUST 1001.06 satisfy the Life and Physical Sciences requirement.
- For BSc students either SUST 1000.06 or SUST 1001.06 satisfy the Social Science requirement.
- For all General Degree Requirements please see [College of Arts and Science Degree Requirements](#).

Minor in Environment, Sustainability and Society

The Environment, Sustainability and Society (ESS) Minor is available to students registered in a 120 credit hour Bachelor of Arts, Bachelor of Science, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Applied Computer Science, Bachelor of Management, Bachelor of Music, Bachelor of Journalism, or Bachelor of Science (Medical Sciences) program.

A BA (90 credit hour) degree program with a Minor in Environment, Sustainability and Society (ESS) is also available.

Requirements for Minor in ESS:

- any 1000-level SUST course
- a minimum of 18 credit hours and a maximum of 27 credit hours at the 2000 level or above in SUST courses.

Contact [College of Sustainability](#) for more information.

Introduction

Environmental Science in the Department of Earth and Environmental Sciences offers several programs. These include a BSc Honours/Major in Environmental Science, a Minor in Environmental Science, a Double Major in Environmental Science and Community Design, and a BSc or BA Double Major or Combined Honours in Environmental Science and any Major/Honours subject in the Faculty of Science, Faculty of Arts and Social Sciences (FASS) or with the College of Sustainability. The Faculty of Arts and Social Sciences (FASS), the Faculty of Science, the Faculty of Computer Science and the Faculty of Architecture and Planning also offer a Minor in Environmental Studies which is administered through Environmental Science.

Environmental Science applies the findings and principles from multiple disciplines to environmental questions and problems. Environmental Science, by nature, is multidisciplinary and interdisciplinary. Most environmental scientists develop expertise in a particular discipline, and work co-operatively with specialists in other disciplines to solve environmental problems. They work in a variety of institutions in both the public and private sectors: municipal, provincial and federal government departments, consulting and engineering companies, development aid organizations in the non-governmental sector and activist community organizations. In all of these institutions they must integrate their scientific knowledge into the prevailing political, economic and legal systems.

The courses required for the BSc Environmental Science stress the links among the fields of study that the students acquire. Thus, students graduate with a combination of depth and breadth of knowledge and the ability to solve problems in the real world.

Degree Programs

The Faculty of Science offers the following degree programs in Environmental Science

- BSc (120 credit hour) Honours (Concentrated)*
- BSc or BA (120 credit hour) Combined Honours*
- BSc (120 credit hour) Major*
- BSc or BA (120 credit hour) Double Major*
- Minor in Environmental Science (120 hour and 90 hour)
- Minor in Environmental Studies

* BSc [Co-op option](#) available

* May be combined with Minor programs from other disciplines

Program Requirements can be seen by following the links to the right. In addition to the program requirements, students must satisfy the requirements outlined in the [Academic Regulations](#) and the [College of Arts and Science Degree Requirements](#) sections. Students are advised that a number of requirements differ for the BA and BSc degrees.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Student applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with the Environmental Science undergraduate academic advisor.

Staff

Dean

Macdonald, C.L.B., BSc (Hons), PhD (Dalhousie), Professor (Chemistry)

Chair of Earth and Environmental Sciences

Brenan, J. M., BSc Honours (McGill), PhD (Rensselaer)

Undergraduate Program Coordinator

Wright, T., PhD (Alberta)

Undergraduate Advisors

Gass, S., PhD (Open Univ, UK)

Co-op Academic Advisor

Wright, T., PhD (Alberta)

Faculty

Cray, H., MSc (McGill), PhD (Waterloo)

Fong, K., HBSc (Toronto), MSc (ETH Zurich), ScD (Harvard)

Gass, S., PhD (Open Univ, UK)

Mui, A., BSc (Guelph), MSc (Sydney), PhD (Toronto)

Sterling, S., PhD (Duke Univ)

Wright, T., PhD (Alberta)

Supporting Faculty

Environmental Science draws on faculty from the departments below:

Biology

Chemical Engineering

Chemistry

Earth Sciences

Economics

Environmental Engineering

International Development Studies

Mathematics

Oceanography

Philosophy

Physics and Atmospheric Science

Political Science

School for Resource and Environmental Studies

School of Planning

Sociology and Social Anthropology

Statistics

Note: This field is rapidly expanding. Students interested in these types of programs should ask about courses related to the environment, other than those listed on the following pages, through the departmental contacts noted above.

BSc (120 credit hour) Major in Environmental Science

The 120 credit hour Major is suited to students who want to focus on Environmental Science, but wish to have a program that is somewhat less constrained than the Honours program. Environmental Science Majors complete 36 credit hours in Environmental Science courses. Research and other experiential learning opportunities are available through laboratories, field, special topics and internship courses.

A Co-op option is available for students enrolled in a 120 credit hour BSc Major program in Environmental Science. See [Co-operative Education Program](#).

Program requirements

In addition to fulfilling the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#), students in a BSc Major program in Environmental Science must complete the 1000 level courses (listed below) and the Common Core courses - Majors (also listed below).

1000 Level Courses (to be taken in first year, if possible)

- SCIE 1505.18: Integrated Science or (1506.09 and 1507.09) and (CHEM 1011.03 and CHEM 1012.03) and (MATH 1000.03 or MATH 1215.03)

Or

- BIOL 1010.03: Principles of Biology Part I or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus
- STAT 1060.03: Introductory Statistics for Science and Health Sciences
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
- EARTH 1080.03: Geology I
- ENVS 1100.03: Foundations of Environmental Science: Ecosphere, Resources and Sustainability (grade of B- or higher)
- ENVS 1200.03: Current Environmental Challenges: Analysis and Solutions (grade of B- or higher)

Students are encouraged to take three credit hours of their Language and Humanities requirement in their first year.

Also required but usually taken in the second year:

- ECON 1101.03: Principles of Microeconomics or ECON 1102.03: Principles of Macroeconomics*

Common Core Courses - Majors

To be completed over the course of a four year degree program: Common Core Courses introduce students to the scope and magnitude of Environmental Science and are designed to provide students with an appreciation of the scientific, historic, legal and social aspects of environmental issues.

- STAT 2080.03: Statistical Methods of Data Analysis and Inference*
- BIOL 2060.03: Introductory Ecology
- PHIL 2480.03: Environmental Ethics**
- ENVS 2310.03: Energy and the Environment
- ENVS 2000.03: Urban Field School or ENVS 2500.03 Field Methods in Environmental Science
- ENVS 2100.03: Environmental Informatics
- ENVS 3001.03: Environmental Science Field School
- ENVS 3100.03: Environmental Analytics
- ENVS 3200.03: Introduction to Environmental Law
- ENVS 3500.03: Geoscience Information Management
- ENVS 3501.03: Environmental Problem Solving I
- ENVS 3502.03: Environmental Problem Solving II
- ENVS 3601.03: Global Biogeochemical Cycles
- ENVS 4001.03: Environmental Impact Assessment
- ENVS 4100.03: Environmental Science Capstone

*STAT 2080.03: Statistical Methods of Data Analysis and Inference and ECON 1101.03: Principles of Microeconomics or ECON 1102.03: Principles of Macroeconomics together satisfy the College of Arts and Science requirement for six credit hours in Social Science.

**PHIL 2480.03: Environmental Ethics satisfies half of the College of Arts and Science requirement for six credit hours in Languages and Humanities.

BA (120 credit hour) Major in Environmental Science

BA Major in Environmental Science

1000 Level

- ENVS 1100.03: Foundations of Environmental Science: Ecosphere, Resources and Sustainability (grade of B- or higher)
- ENVS 1200.03: Current Environmental Challenges: Analysis and Solutions (grade of B- or higher)
- Six credit hours in a single first year science subject chosen from BIOL, CHEM, PHYC, EARTH, ECON

- STAT 1060.03: Introductory Statistics for Science and Health Sciences

2000 Level

- ENVS 2000.03: Urban Field School or ENVS 2500.03 Field Methods in Environmental Science
- ENVS 2100.03: Environmental Informatics
- Six credit hours chosen from:
 - BIOL 2003.03: Diversity of Life I
 - BIOL 2004.03: Diversity of Life II
 - BIOL 2060.03: Introductory Ecology
 - GEOG 2800.03: Climate Change
 - CHEM 2505.03
 - OCEA 2001.03: The Blue Planet 1
 - OCEA 2002.03: The Blue Planet 2
 - ECON 2216.03: Economics of Global Warming
 - EARTH 2410.03: Environmental Issues in Earth Sciences
 - ENVS 2310.03: Energy and the Environment
 - PHIL 2480.03: Environmental Ethics
 - Any additional ENVS 2000- level course. Please note this may include ENVS 2000 or ENVS 2500.

3000 and 4000 Level

- ENVS 3200.03: Introduction to Environmental Law
- ENVS 3501.03: Environmental Problem Solving I
- ENVS 3502.03: Environmental Problem Solving II*
- ENVS 4001.03: Environmental Impact Assessment
- At least six additional credit hours from:
 - Any additional 3000 or 4000 level ENVS courses
 - BIOL 3060.03: Environmental Ecology
 - BIOL 3061.03: Communities and Ecosystems
 - BIOL 4160.03: Political Ecology

BSc Double Major in Environmental Science and Community Design

In addition to fulfilling the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#), students in a BSc Double Major program in Environmental Science and Community Design must complete the following:

1000 Level

- SCIE 1505.18: Integrated Science or (1506.09 and 1507.09) and (CHEM 1011.03 and CHEM 1012.03) and (MATH 1000.03 or MATH 1215.03)
- ECON 1101.03: Principles of Microeconomics or ECON 1102.03: Principles of Macroeconomics
- PLAN 1001.03: Introduction to Community Design I and PLAN 1002.03: Introduction to Community Design II

OR

- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity and CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus
- STAT 1060.03: Introductory Statistics for Science and Health Sciences
- EARTH 1030.03: Introduction to Physical Geography
- ECON 1101.03: Principles of Microeconomics or ECON 1102.03: Principles of Macroeconomics
- PLAN 1001.03 and PLAN 1002.03
- ENVS 1100.03: Foundations of Environmental Science: Ecosphere, Resources and Sustainability and ENVS 1200.03: Current Environmental Challenges: Analysis and Solutions

Common Core Courses - as listed for BSc Major, except:

- ENVS 2310.03: Energy and the Environment not required
- Choice of ENVS 2000.03: Urban Field School or ENVS 2500.03 Field Methods in Environmental Science or ENVS 3001.03: Environmental Science Field School

Community Design Courses

- PLAN 2001.03: Landscape Analysis
- PLAN 2002.03: Community Design Methods
- PLAN 2005.03: Community Design Context
- PLAN 3001.03: Landscape Ecology
- PLAN 3002.03: Reading the City
- PLAN 3005.03: Cities and the Environment in History
- PLAN 3006.03: Reading the Landscape
- An additional three credit hours in PLAN

BSc or BA (120 credit hour) Double Major in Environmental Science and another subject

The Double Major degree program allows students to combine a study of Environmental Science with another subject. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, the College of Sustainability or Community Design in the Faculty of Architecture and Planning. Environmental Science may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

Students enrolled in a Double Major program must have their program of study approved by advisors in both subject areas.

A Co-op option is available for students enrolled in BSc Double Major with Environmental Science as the primary subject. See [Co-operative Education Program](#).

Program Requirements

In addition to fulfilling the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#), students in a BSc or BA Double Major program in Environmental Science and another subject must complete the following (BSc requirements are listed first followed by those for a BA):

BSc Double Major, ENVS as primary or secondary subject

Students must complete the following:

1000 Level (to be taken the first year, if possible)

- SCIE 1505.18: Integrated Science or (1506.09 and 1507.09) and (CHEM 1011.03 and CHEM 1012.03) and (MATH 1000.03 or MATH 1215.03)

OR

- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus
- STAT 1060.03: Introductory Statistics for Science and Health Sciences
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
- ENVS 1100.03: Foundations of Environmental Science: Ecosphere, Resources and Sustainability (grade of B- or higher)
- ENVS 1200.03: Current Environmental Challenges: Analysis and Solutions (grade of B- or higher)

Students are encouraged to take three credit hours of their Language and Humanities requirement in their first year.

Also required but usually taken in the second year:

- ECON 1101.03: Principles of Microeconomics or ECON 1102.03: Principles of Macroeconomics*

Common Core Courses as listed for BSc Major except:

- ENVS 2310.03: Energy and the Environment is not required
- Choice of ENVS 2000.03: Urban Field School or ENVS 2500.03 Field Methods in Environmental Science or ENVS 3001.03: Environmental Science Field School

BA Double Major, ENVS as primary or secondary subject

1000 Level

- ENVS 1100.03: Foundations of Environmental Science: Ecosphere, Resources and Sustainability (grade of B- or higher)
- ENVS 1200.03: Current Environmental Challenges: Analysis and Solutions (grade of B- or higher)
- Six credit hours in a first year science subject chosen from BIOL, CHEM, PHYC, EARTH, ECON
- STAT 1060.03: Introductory Statistics for Science and Health Sciences

2000 Level

- ENVS 2000.03: Urban Field School or ENVS 2500.03 Field Methods in Environmental Science
- ENVS 2100.03: Environmental Informatics
- Six credit hours chosen from:
 - BIOL 2003.03: Diversity of Life I
 - BIOL 2004.03: Diversity of Life II
 - BIOL 2060.03: Introductory Ecology
 - GEOG 2800.03: Climate Change
 - CHEM 2505.03
 - OCEA 2001.03: The Blue Planet I
 - OCEA 2002.03: The Blue Planet II
 - ECON 2216.03: Economics of Global Warming
 - EARTH 2410.03: Environmental Issues in Earth Sciences
 - ENVS 2310.03: Energy and the Environment
 - PHIL 2480.03: Environmental Ethics

3000 and 4000 Level

- ENVS 3200.03: Introduction to Environmental Law
- ENVS 3501.03: Environmental Problem Solving I
- ENVS 3502.03: Environmental Problem Solving II*
- ENVS 4001.03: Environmental Impact Assessment
- At least six additional credit hours from:
 - Any additional 3000 or 4000 level ENVS courses
 - BIOL 3060.03: Environmental Ecology
 - BIOL 3061.03: Communities and Ecosystems
 - BIOL 4160.03: Political Ecology

*If ESS is the A subject ENVS 3502.03: Environmental Problem Solving II: The Campus as a Living Laboratory is waived, and should be replaced with another ENVS course at or above the 3000 level.

BSc or BA (120 credit hour) Combined Honours in Environmental Science and another subject

Students who wish to study Environmental Science in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Environmental Science may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject.

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. The same standards and conditions for admission apply as for entry into a Concentrated Honours program (see above). In addition, students must have their program of study approved by Academic Advisors in both subject areas. Students must complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Environmental Science, this requirement is satisfied through ENVS 4901.03 and ENVS 4902.03.

A Co-op option is available for students enrolled in BSc Combined Honours with Environmental Science as the primary subject. See [Co-operative Education Program](#).

Program Requirements

In addition to fulfilling the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#), students in a BSc or BA Combined Honours program in Environmental Science and another subject must complete the following (BSc requirements are listed first followed by those for a BA):

BSc Combined Honours in Environmental Science and another subject

ENVS as primary or secondary subject

1000 Level (to be taken in first year, if possible)

- SCIE 1505.18: Integrated Science or (1506.09 and 1507.09) and (CHEM 1011.03 and CHEM 1012.03) and (MATH 1000.03 or MATH 1215.03)

OR

- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus
- STAT 1060.03: Introductory Statistics for Science and Health Sciences
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
- ENVS 1100.03: Foundations of Environmental Science: Ecosphere, Resources and Sustainability (grade of B- or higher)
- ENVS 1200.03: Current Environmental Challenges: Analysis and Solutions (grade of B- or higher)

Students are encouraged to take three credit hours of their Language and Humanities requirement and/or their writing requirement in their first year.

Also required but normally taken in the second year:

- ECON 1101.03: Principles of Microeconomics or ECON 1102.03: Principles of Macroeconomics

Common Core Courses as listed for BSc Concentrated Honours except:

- ENVS 2310.03: Energy and the Environment not required
- Choice of ENVS 2000.03: Urban Field School or or ENVS 2500.03 Field Methods in Environmental Science or ENVS 3001.03: Environmental Science Field School

If ENVS is the primary subject: a minimum of six additional credit hours of ENVS or ENVS-equivalent courses, which may be ENVS 4901.03/ENVS 4902.03 (Honours Thesis and Qualifying Exam).

If ESS (Environment, Sustainability and Society) is the primary subject, ENVS 3502.03: Environmental Problem Solving II is waived and should be replaced with another ENVS course at or above the 3000 level.

BA Combined Honours in Environmental Science and another subject

Requirements are the same for ENVS as primary or secondary subject. Students must complete the following:

1000 Level

- ENVS 1100.03: Foundations of Environmental Science: Ecosphere, Resources and Sustainability (grade of B- or higher)
- ENVS 1200.03: Current Environmental Challenges: Analysis and Solutions (grade of B- or higher)
- Six credit hours in a single first-year science subject chosen from BIOL, CHEM, PHYC, EARTH, ECON
- STAT 1060.03: Introductory Statistics for Science and Health Sciences

2000 Level

- ENVS 2000.03: Urban Field School or ENVS 2500.03: Field Methods in Environmental Science
- ENVS 2100.03: Environmental Informatics

- Six credit hours chosen from:
 - BIOL 2003.03: Diversity of Life
 - BIOL 2004.03: Diversity of Life II
 - BIOL 2060.03: Introductory Ecology
 - GEOG 2800.03: Climate Change
 - CHEM 2505.03
 - OCEA 2000.06: The Blue Planet
 - ECON 2216.03: Economics of Global Warming
 - EARTH 2410.03: Environmental Issues in Earth Sciences
 - ENVS 2310.03: Energy and the Environment
 - PHIL 2480.03: Environmental Ethics

3000 and 4000 Level

- ENVS 3200.03: Introduction to Environmental Law
- ENVS 3501.03: Environmental Problem Solving I
- ENVS 3502.03: Environmental Problem Solving II*
- ENVS 4001.03: Environmental Impact Assessment
- At least six additional credit hours from:
 - Any ENVS course
 - BIOL 3060.03: Environmental Ecology
 - BIOL 3061.03: Communities and Ecosystems
 - BIOL 4160.03: Political Ecology

If ENVS is the primary subject, a minimum of six additional credit hours of ENVS or ENVS equivalent courses, which may be ENVS 4901.03, ENVS 4902.03 (Honours Thesis and Qualifying Exam).

*If ESS is the primary subject, ENVS 3502.03: Environmental Problem Solving II is waived and should be replaced with another ENVS course at or above the 3000 level.

BSc (120 credit hour) Concentrated Honours in Environmental Science

Students who want a challenging program resulting in a broad background in Environmental Science, including an independent research experience may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours. Honours students complete a minimum of 54 credit hours above the 1000 level in Environmental Science or Environmental Science Equivalent Courses with a minimum GPA of 3.0, and each ENVS and ENVS Equivalent Course above the 1000-level must be passed with a grade of "C" or better. Honours students write a research-based Honours thesis and the Honours Qualifying Examination requirement is satisfied through completion of ENVS 4901.03 and ENVS 4902.03.

A Co-op option is available for students enrolled in a BSc Concentrated Honours in Environmental Science. See [Co-operative Education Program](#).

Admission to Honours

Students must apply for admission to Honours programs. Students considering Honours in Environmental Science should consult with an Environmental Science Advisor early in their studies. To be admitted, students must have a minimum GPA of 3.5 in all ENVS courses. More information on applying to the Environmental Science Honours program can be found at www.dal.ca/environmentalscience.

Program Requirements

In addition to fulfilling the requirements outline in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#), students in a BSc Concentrated Honours program in Environmental Science must complete the following:

1. 1000 level courses (below)
2. Common Core courses (Honours) (below)
3. ENVS 4901.03 and ENVS 4902.03 (Honours thesis and Qualifying Exam)
4. An additional 12 credit hours of ENVS or ENVS-equivalent courses at or above the 2000 level

1000 Level

- SCIE 1505.18: Integrated Science or Integrated Science I and II (SCIE 1506.09 and 1507.09) and (CHEM 1011.03 and CHEM 1012.03) and (MATH 1000.03 or MATH 1215.03)

OR

- BIOL 1010.03: Principles of Biology Part I or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus
- STAT 1060.03: Introductory Statistics for Science and Health Sciences
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
- EARTH 1080.03: Geology I
- ENVS 1100.03: Foundations of Environmental Science: Ecosphere, Resources and Sustainability (grade of B- or higher)
- ENVS 1200.03: Current Environmental Challenges: Analysis and Solutions (grade of B- or higher)

Students are encouraged to take three credit hours of their Language and Humanities requirement and/or their writing requirement in their first year.

The courses listed above should be taken in the first year, if possible, if ENVS 1100.03: Foundations of Environmental Science: Ecosphere, Resources and Sustainability and ENVS 1200.03: Current Environmental Challenges: Analysis and Solutions are not taken in the first year, it should be taken in the second year.

Also required but usually taken in the second year.

- ECON 1101.03: Principles of Microeconomics* or ECON 1102.03: Principles of Macroeconomics*

Common Core Courses

Completed at various times over a four year degree program, the Common Core Courses introduce students to the scope and magnitude of Environmental Science and are designed to provide students with an appreciation of the scientific, historic, legal and social aspects of environmental issues.

- STAT 2080.03: Statistical Methods for Data Analysis and Inference*
- BIOL 2060.03: Introductory Ecology
- PHIL 2480.03: Environmental Ethics**
- ENVS 2000.03: Urban Field School or ENVS 2500.03 Field Methods in Environmental Science
- ENVS 2100.03: Environmental Informatics
- ENVS 2310.03: Energy and the Environment
- ENVS 3001.03: Environmental Science Field School
- ENVS 3100.03: Environmental Analytics
- ENVS 3200.03: Introduction to Environmental Law
- ENVS 3500.03: Geoscience Information Management
- ENVS 3501.03: Environmental Problem Solving I
- ENVS 3502.03: Environmental Problem Solving II
- ENVS 3601.03: Global Biogeochemical Cycles
- ENVS 4001.03: Environmental Impact Assessment
- ENVS 4100.03: Environmental Science Capstone

*STAT 2080.03: Statistical Methods for Data Analysis and Inference and ECON 1101.03: Principles of Microeconomics or ECON 1102.03: Principles of Macroeconomics together satisfy the College of Arts and Science requirement for six credit hours in social science.

**PHIL 2480.03: Environmental Ethics satisfies half of the College of Arts and Science requirement for six credit hours in Language and Humanities.

BA (120 credit hour) Concentrated Honours in Environmental Science

BA Concentrated Honours in Environmental Science

Students who want a challenging program resulting in a broad background in Environmental Science, including an independent research experience may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours. Honours students complete a minimum of 54 credit hours above the 1000 level in Environmental Science or Environmental Science Equivalent Courses with a minimum GPA of 3.0, and each ENVS and ENVS Equivalent Course above the 1000-level must be passed with a grade of "C" or better. Honours students write a research-based Honours thesis and the Honours Qualifying Examination requirement is satisfied through completion of ENVS 4901.03 and ENVS 4902.03.

Admission to Honours

Students must apply for admission to Honours programs. Students considering Honours in Environmental Science should consult with an Environmental Science Advisor early in their studies. To be admitted, students must have a cumulative GPA of 3.5 in the first two years of study. More information on applying to the Environmental Science Honours program can be found at www.dal.ca/environmentalscience.

1000 Level

- ENVS 1100.03: Foundations of Environmental Science: Ecosphere, Resources and Sustainability (grade of B- or higher)
- ENVS 1200.03: Current Environmental Challenges: Analysis and Solutions (grade of B- or higher)
- Six credit hours in a single first year science subject chosen from BIOL, CHEM, PHYC, EARTH, ECON
- STAT 1060.03: Introductory Statistics for Science and Health Sciences

2000 Level

- ENVS 2000.03: Urban Field School or ENVS 2500.03 Field Methods in Environmental Science
- ENVS 2100.03: Environmental Informatics
- Six credit hours chosen from:
 - BIOL 2003.03: Diversity of Life I
 - BIOL 2004.03: Diversity of Life II
 - BIOL 2060.03: Introductory Ecology
 - GEOG 2800.03: Climate Change
 - CHEM 2505.03
 - OCEA 2001.03: The Blue Planet 1
 - OCEA 2002.03: The Blue Planet 2
 - ECON 2216.03: Economics of Global Warming
 - EARTH 2410.03: Environmental Issues in Earth Sciences
 - ENVS 2310.03: Energy and the Environment
 - PHIL 2480.03: Environmental Ethics

3000 and 4000 Level

- ENVS 3200.03: Introduction to Environmental Law
- ENVS 3501.03: Environmental Problem Solving I
- ENVS 3502.03: Environmental Problem Solving II*
- ENVS 4001.03: Environmental Impact Assessment
- At least six additional credit hours from:
 - Any additional 3000 or 4000 level ENVS courses
 - BIOL 3060.03: Environmental Ecology
 - BIOL 3061.03: Communities and Ecosystems
 - BIOL 4160.03: Political Ecology

*If ESS is the A subject ENVS 3502.03: Environmental Problem Solving II: The Campus as a Living Laboratory is waived, and should be replaced with another ENVS course at or above the 3000 level.

Minor in Environmental Science

This Minor is available to students registered in a 120-credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A BSc or BA 90-credit hour degree with Minor in Environmental Science is appropriate for students who want to study some Environmental Science but do not wish to complete the conventional four-year program. The degree is best suited for students who want a general science degree with some specialization in Environmental Science. A 90-credit hour degree program is not suitable for students who wish to pursue graduate studies. With additional study, the degree may be upgraded to a 120-credit hour Major or Honours degree at a later date.

The 90-credit hour BSc or BA in Environmental Science is usually the preferred option for students who wish to combine studies in Environmental Science with a degree in Engineering (see BSc/BEng or BA/BEng Concurrent Program).

Minor requirements:

- ENVS 1100.03: Foundations of Environmental Science and ENVS 1200.03: Current Environmental Challenges
- A minimum of 18 credit hours in Environmental Science (ENVS) courses at the 2000 level or higher to a maximum of 36 credit hours. A maximum of 6 credit hours may be ENVS-equivalent.

*Please note that upper level Environmental Science (ENVS) courses have prerequisite requirements.

Minor in Environmental Studies

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

BA Minor

BA students must take 12 credit hours of required courses and 18 elective credit hours from the list of approved courses below. The following rules apply to the selection of courses for the Minor:

- A maximum of three credit hours in the Major subject (e.g. a course beyond those required for the Major) can count instead toward the Minor.
- At least six credit hours from the Approved Electives list must be in FASS courses and at least six credit hours must be from Science Approved Electives courses.
- In addition to ENVS 3200.03: Introduction to Environmental Law, at least nine credit hours must be at the 3000 level or above.

Required Courses:

- ENVS 1000X/Y.06: Introduction to Environmental Science or ENVS 1100.03: Foundations of Environmental Science and ENVS 1200.03: Current Environmental Challenges
- PHIL 2480.03: Environmental Ethics
- ENVS 3200.03: Introduction to Environmental Law

BA Approved Electives in Environmental Studies:

Additions to the following lists will be made, as relevant courses become available.

Faculty of Science:

- BIOL 2060.03: Introductory Ecology
- BIOL 2601.03: The Flora of Nova Scotia
- BIOL 2605.03: Introduction to Marine Life in Nova Scotia
- BIOL 3060.03: Environmental Ecology
- BIOL 3061.03: Communities and Ecosystems
- BIOL 3225.03: Plants in the human landscape
- BIOL 3226.03: Economic Botany, Plants and Civilization
- BIOL 3601.03: Nature Conservation
- BIOL 3615.03: Methods in Ecology
- BIOL 4065.03: Sustainability and Global Change
- ECON 2336.03: Regional Development
- ECON 3332.03: Resource Economics
- ECON 3335.03: Environmental Economics
- EARTH 2410.03: Environmental and Resource Geology I

- EARTH 3500.03: Geoscience Information Management
- GEOG 2800.03: Climate Change
- MARI 4665.03: Hacking the Blue Planet
- OCEA 2001.03: The Blue Planet I
- OCEA 2002.03: The Blue Planet II
- OCEA 2800.03: Climate Change
- PHYC 2451.03: Astronomy I: The Sky and Planets
- PHYC 2800.03: Climate Change
- ENVS 2100.03: Environmental Informatics
- ENVS 2310.03: Energy and the Environment
- ENVS 3000.03: Environmental Science Internship
- ENVS 3100.03: Environmental Analytics
- ENVS 3210.03: Environmental Law II: Natural Justice and Unnatural Acts
- ENVS 3220.03: International Environmental Law for Scientists
- ENVS 3226.03: Economic Botany, Plants and Civilization
- ENVS 3300.03: Contaminated Site Management
- ENVS 3400.03: Human Health and Sustainability
- ENVS 3501.03: Environmental Problem Solving I
- ENVS 3502.03: Environmental Problem Solving II: The Campus as a Living Laboratory
- ENVS 3702.03: Sustainable Industries
- ENVS 4001.03: Environmental Impact Assessment
- ENVS 4004.03: Pathways to Sustainable Energy
- ENVS 4100.03: Environmental Science Capstone

Faculty of Arts and Social Sciences (FASS):

- CTMP 3000.06: Science and Culture
- CTMP 3150.03: Nature and History
- CTMP 3210.03: Intersecting Bodies, Selves and Environments
- CTMP 3411.03: Studies in Contemporary Science and Technology
- EMSP 2310.03: Women and Gender in Early Modern Science
- EMSP 2330.03: Nature Imagined
- EMSP 3000.06: The Study of Nature in Early Modern Europe
- ENGL 4005.03: Green Reading: Nature, Culture, Canada
- ENGL 4400.03: Nature of America
- HSTC 3000.03: The Scientific Revolution
- HSTC 3202.03: Ecology and Religion
- HSTC 4000.06: Science and Nature in the Modern Period
- HSTC 4300.03: Nature and Romanticism
- HIST 3073.03: History of Marine Sciences
- HIST 3210/CANA 3020/GEOG 3020.03: Canadian Cultural Landscapes
- HIST 3302.03: Technology and History in North America
- HIST 3370.03: North American Landscapes
- HIST 3750.03: History of Seafaring
- HIST 4271.03: The Fisheries of Atlantic Canada - Society and Ecology in Historical Perspective
- HIST 4350.03: People and Things - Material Culture
- INTD 2001.03: Introduction to Development I
- INTD 2002.03: Introduction to Development II
- INTD 3002.03: Seminar in Development: Development Practice
- INTD 3114.03: Environment and Development
- INTD 3304.03: Sustainable Development in Cuba
- INTD 4013.03: Environmental Conflict & Security
- PHIL 2475.03: Justice in Global Perspective
- PHIL 2485.03: Technology and the Environment
- PHIL 3670.03: Philosophy of Science
- PHIL 4120.03: Theory of Rational Decision-Making
- POLI 3585.03: Politics of the Environment

- POLI 4228.03: Interest Groups
- POLI 4380.03: Politics of Climate Change
- RELS 3211.03, Ecology and Religion
- SOSA 2100.06: Environment and Culture
- SOSA 3185.03: Issues in the Study of Indigenous Peoples of North America
- SOSA 3190.03: Social Movements
- SOSA 3200.03: Environment and Society
- SOSA 3220.03: Coastal Communities
- SOSA 4210.03: Tourism and Development
- SPAN 2070.03: Area Studies on Mexico and Central America
- GWST 3310.03: Gender and Development in Africa

Other Electives

- PLAN 2001.03: Landscape Analysis
- PLAN 3001.03: Landscape Ecology
- PLAN 3002.03: Reading the City
- PLAN 3005.03: Cities and the Environment in History
- PLAN 3010.03: Urban Ecology
- PLAN 3020.03: Landscape Design
- PLAN 4106.03: Transportation Planning

BACSc, BSc, BCSc, BInf, BComm, BMgmt Minor

Students in these programs must take 18 credit hours of required courses, plus 12 credit hours from the approved list of elective courses below. Note: In planning their programs students must take into account the prerequisites which apply to many of the elective courses listed below. The following rules apply to the selection of courses for the Minor:

- No course can fulfill a requirement of both the Major or Honours subject and the Minor.
- A maximum of three credit hours in the Major/Honours subject (e.g. a course beyond those required for the Major/Honours) can count toward the Minor.
- At least three credit hours beyond the required courses must be at the 3000 level or above.

Additions to the Electives list will be made as relevant courses become available.

Required Courses:

- ENVS 1000X/Y.06: Introduction to Environmental Science or ENVS 1100.03: Foundations of Environmental Science and ENVS 1200.03: Current Environmental Challenges
- PHIL 2480.03: Environmental Ethics
- ENVS 3501.03: Environmental Problem Solving I
- ENVS 3502.03: Environmental Problem Solving II
- ENVS 3200.03: Introduction to Environmental Law

Electives (12 credit hours from the list):

- BIOL 2601.03: The Flora of Nova Scotia
- BIOL 2605.03: Introduction the Marine Life of Nova Scotia
- BIOL 3063.03 Resource Ecology
- BIOL 3225.03: Plants in the Human Landscape
- BIOL 3226.03: Economic Botany, Plants and Civilization
- BIOL 3601.03: Nature Conservation
- BIOL 3xxx.03: Any ecology-related course at 3000-level or above
- BIOL 4065.03: Sustainability and Global Change
- BIOL 4104.03: Environmental Microbiology
- BIOL 4160.03: Political Ecology
- CHEM 2505.03: Environmental Chemistry I
- CHEM 4203.03: Environmental Chemistry II
- CHEM 4595.03: Atmospheric Chemistry

BCD Minor

The Minor in Environmental Studies is a 30 credit hour Minor taken in conjunction with the Bachelor of Community Design Honours (It is not available within the three year BCD program). The Minor in Environmental Studies provides a student with an appreciation of the scientific, cultural, economic, historic, legal and social aspects of environmental issues. The student will have the opportunity to earn an additional credential on the degree to recognize the special concentration of courses in environmental studies. Approval for the program is required from the School of Planning and from the Coordinator of Environmental Programs. Students complete all requirements for their Honours Major in addition to these required courses for the minor. Students may count the course ENVS 1000 towards both the BCD requirements and towards the requirement for the Minor. Other courses cannot be counted towards both sets of requirements.

Required Courses:

- ENVS 1000.06: Introduction to Environmental Studies (or DISP) or ENVS 1100.03: Foundations of Environmental Science and ENVS 1200.03: Current Environmental Challenges
- PHIL 2480.03: Environmental Ethics
- ENVS 3200.03: Environmental Law
- ENVS 3501.03: Environmental Problem Solving I
- ENVS 3502.03: Environmental Problem Solving II

Elective requirements:

12 credit hours of courses from the following list:

- BIOL 2605.03: Introduction to Marine Life of Nova Scotia
- BIOL 3601.03: Nature Conservation
- CHEM 2505.03: Environmental Chemistry I
- CHEM 4203.03: Environmental Chemistry II
- ECON 2216.03: Economics of Global Warming
- ECON 2336.03: Regional Development
- ECON 3332.03: Resource Economics
- ECON 3335.03: Environmental Economics
- ENVS 3000.03: Environmental Science Internship
- ENVS 3200.03: Introduction to Environmental Law
- ENVS 3226.03: Economic Botany, Plants and Civilization
- ENVS 3300.03: Contaminated Site Management
- ENVS 3301.03: Enterprise Sustainability
- ENVS 3220.03: International Environmental Law for Scientists
- ENVS 3400.03: Environment and Human Health
- ENVS 3500.03: Exploring Geographic Information Systems
- ENVS 4001.03: Environmental Impact Assessment
- ESMP 2330.03: Nature Imagined

- ESMP 3000.06: The Study of Nature in Early Modern Europe
- EARTH 3302.03: Quaternary Sedimentary Deposits
- EARTH 3440/GEOG 3440: Geomorphology
- HIST 3370.03: North American Landscapes
- HSTC 3202.03: Ecology and Religion
- INTD 2001.03: Introduction to Development I
- INTD 2002.03: Introduction to Development II
- MARI 4665.03: Hacking the Blue Planet
- OCEA 2001.03: The Blue Planet I
- OCEA 2002.03: The Blue Planet II
- OCEA 2800.03: Climate Change
- OCEA 3001.03: Introduction to Physical Oceanography
- OCEA 3002.03: Introduction to Chemical Oceanography
- PHIL 2485.03: Technology and the Environment
- POLI 3385.03: Politics of the Environment
- POLI 3589.03: Politics of the Sea I
- RELS 3211.03: Ecology and Religion

- SOSA 4072.03: Naturalistic Approaches to the Social Sciences
- STAT 3345.03: Environmental Risk Assessment

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Co-operative Education Program (Science Co-op) in Environmental Science

Co-op Academic Advisor: Dr. Tarah Wright tarah.wright@dal.ca

Science Co-op is a program where academic study in a science subject is combined with paid career-related work experience. Students undertake three work-terms interspersed with their academic study terms. Science Co-op degree programs enable students to apply their knowledge directly while providing them with work experience that assists in making educated career choices.

Science Co-op is available to students in BSc (120 credit hour) Honours or Major programs in Environmental Science, or in Combined Honours or Double Major programs with Environmental Science as the primary subject. The number of students admitted into Science Co-op each year is limited. A minimum GPA of 3.00 is required for admission and for continuation in the Co-op program. Students must be eligible to work in Canada.

Students normally apply to join Science Co-op during their first year of study. Students must apply before April 15, and it is strongly recommended that interested students meet with their Departmental Co-op advisor early in the Winter term of their first year. If accepted into Science Co-op, students must register for, and attend the Science Co-op Seminar Series (SCIE 2800.00) at least four months prior to the first work term.

Details are available from the Environmental Science Co-op Academic Advisor and from the Co-operative Education office http://www.dal.ca/academics/cooperative_education.html. For more information on Co-op Education in Environmental Science, please see www.dal.ca/environment.

Minors available to students in Environmental Science

Minor programs allow students to develop subject specialties in addition to their major or honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs (including Science Co-op).

Students in a BSc or BA (120 credit hour) program in Environmental Science may choose to include a Minor selected from the [list of approved Minors](#). Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc or BA in Environmental Science, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or

Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of [Faculty of Science Certificates](#) and requirements can be found at the beginning of the [Faculty of Science](#) section. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the [College of Arts and Science Degree Requirements](#).

Certificates of particular interest to student enrolled in a BSc or BA in Environmental Science include:

- [Certificate in Animal Behaviour](#)
- [Certificate in Environmental Impact Assessment](#)
- [Certificate in Geographic Information Science](#)
- [Certificate in Science Leadership and Communication](#)

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions

ENVS 1100 Foundations of Environmental Science: Ecosphere, Resources & Sustainability

CREDIT HOURS: 3

This course introduces students to key topics in Environmental Science including science literacy, environmental ethics, principles of ecology, evolution, biodiversity, human population growth, soil, agriculture, forestry, and oceans and freshwater systems. Tutorials reinforce and supplement lectures and allow for small group discussion and debate.

EXCLUSIONS: ENVI 1100.06, ENVS 1000.06, MGMT 1702.03

FORMATS: Lecture | Tutorial

ENVS 1200 Current Environmental Challenges: Analysis and Solutions

CREDIT HOURS: 3

This course introduces current issues and challenges in Environmental Science including air pollution and climate change, non-renewable and renewable energy, waste, urbanization, environmental law, and sustainability and education. Tutorials reinforce and supplement lectures and allow for small group discussion and debate.

EXCLUSIONS: ENVI 1100.06, ENVS 1000.06, MGMT 1702.03

FORMATS: Lecture | Tutorial

ENVS 2000 Urban Field School

CREDIT HOURS: 3

This field course offers an introduction to urban environmental science by examining the role of humans in ecosystems and how humans change ecosystem processes and functions within urban areas. Students gain hands-on experience in environmental science techniques during excursions in different urban settings within the Halifax Regional Municipality.

CALENDAR NOTES: Offered in early May. Daily field trips and/or labs. An auxiliary fee is charged to cover field expenses.

PREREQUISITES: ENVS 1000.06 or SCIE 1505.18 or ENVS 1100.03 and ENVS 1200.03, or equivalent and open only to students in the BSc or BA Environmental Science Programs

FORMATS: Lecture | Lab

ENVS 2100 Environmental Informatics

CREDIT HOURS: 3

Environmental Informatics is the knowledge, skills and tools which enable information to be collected, managed and disseminated to support research in environmental science. Students develop analytical skills using a variety of software including spatial querying in GIS. Identification of fallacies in the media and effective science communication are introduced and applied to current environmental issues.

PREREQUISITES: ENVS 1100.03 and ENVS 1200.03, and STAT 1060.03

FORMATS: Lecture | Lab

ENVS 2310 Energy and the Environment

CREDIT HOURS: 3

The physical principles and limitations of renewable energy source utilization and energy conversion. A quantitative introduction to energy conversion and storage systems, including solar power and heating, wind, tidal, geothermal, hydroelectric, nuclear power, hydrogen technology, electrical and mechanical energy storage. The input of these energy options on the global climate and environment will be discussed.

PREREQUISITES: PHYC 1190.03/1290.03 or PHYC 1300X/Y.06 or CHEM 1011.03/1012 and MATH 1000.03 or MATH 1215.03 or permission of the instructor.

CROSSLISTED: PHYC 2310.03

EXCLUSIONS: Students who have previously taken PHYC 3330 can not take PHYC 2310.

FORMATS: Lecture

ENVS 2410 Environmental Issues in Earth Sciences

CREDIT HOURS: 3

Geology underlies many of the environmental problems facing humanity today. Topics include environmental aspects of energy and mineral resource, geologic hazards, geologic connections to pollution and waste disposal, and the role that water plays in its various guises. Canadian examples are incorporated where appropriate. Approved with Canadian Studies.

CALENDAR NOTES: This course is not offered every year. Please consult department in the spring for further information.

PREREQUISITES: One of: EARTH 1080, EARTH/GEOG 1030, EARTH/GEOG 1060, ENVS 1100.03 and ENVS 1200.03, or ENVS 1000.06, SUST 1001 with a grade of B or above, or DISP with Earth Sciences

CROSSLISTED: CANA 2410.03, EARTH 2410.03

EXCLUSIONS: This class does not count toward a Major or Honours in Earth Sciences

FORMATS: Lecture

ENVS 2500 Field Methods in Environmental Science

CREDIT HOURS: 3

A field-based immersion into environmental field sampling methods. Students gain skills in flora and fauna identification and inventory, assessment of ecosystem health, and sampling methods for air and soil. GPS, GIS, and basic remote sensing skills are utilized in sampling design, collection and visualization of results.

CALENDAR NOTES: Includes a number of field trips. An auxiliary fee is charged to cover field expenses.

PREREQUISITES: ENVS 1100.03 and ENVS 1200.03, (or ENVS 1000.06)

RESTRICTIONS: Restricted to students in BSc and BA Environmental Science programs

FORMATS: Lab

ENVS 3000 Environmental Science Internship

CREDIT HOURS: 3

This course allows students to gain hands-on experience while addressing a question of personal and academic interest relevant to the field of environmental science by working as interns for 8 hours a week over a twelve-week period on a specific project at a sponsoring agency.

CALENDAR NOTES: It is the student's responsibility to consult with Environmental Program at least 3 weeks prior to the term in which the internship will take place to arrange for a placement and to make sure that the details of the internship are in accordance with university standards.

PREREQUISITES: Open ONLY to students in Minor in Environmental Studies, Honours/Major/Double Major/Combined Honours in Environmental Science. Minimum GPA of 3.0 or permission of instructor required to register.

ENVS 3001 Environmental Science Field School

CREDIT HOURS: 3

Daily field trips introduce methods used in environmental science and environmental processes at diverse sites within Nova Scotia. Involves full-day trips from Halifax and a multi-day camping trip away from Halifax. Offered during the last 2 weeks before Labour Day.

PREREQUISITES: ENVS 2100 and must be an ENVS student

ENVS 3073 Ecology and Environmental Issues in the Bahamas

CREDIT HOURS: 3

This applied field course includes introductory lectures in Canada followed by a place-based field trip to the Cape Eleuthera Institute, Bahamas. Students will collect and analyze a wide spectrum of data related to environmental problems on the island and will consider and problematize various environmental solutions.

PREREQUISITES: ENVS 1100.03 and ENVS 1200.03 (with a grade of B- or higher in each) or SUST 1000.06 or SUST1001.06 (with a grade of B- or higher), An introductory course in statistics (STAT 1060.03 or similar) is recommended. Must be at least a 2nd year student OR have permission of the instructor.

RESTRICTIONS: E1 and E2

FORMATS: Lecture | Experiential Learning | Other (explain in comments)

ENVS 3100 Environmental Analytics

CREDIT HOURS: 3

This course takes a hands-on approach to data analysis to support environmental conservation. Topics include experimental design, spatial pattern analysis, visualization of 3D data, ecological modelling, and animated mapping of time series data. Emphasis is placed on learning skills directly applicable to conducting environmental research in a variety of settings.

PREREQUISITES: ENVS 2100.03 and STAT 2080.03

FORMATS: Lecture | Tutorial

ENVS 3200 Introduction to Environmental Law

CREDIT HOURS: 3

This course will take a look at how environmental law operates in Nova Scotia within the Federal framework and it will illustrate some of the multi-disciplinary aspects which make this area of law part science, part art and part soothsaying.

PREREQUISITES: Must be a third year student

FORMATS: Lecture

ENVS 3225 Plants in the Human Landscape

CREDIT HOURS: 3

The use of plants for human recreation and aesthetic purposes in gardens, public parks, suburban and urban landscapes. Topics include: history of gardens,

garden design, plant materials, edible landscaping, plants and human health. The course includes field trips and group work and students complete a design project.

PREREQUISITES: BIOL 1010.03 or BIOL 1020.03 (C+ or better) and BIOL 1011.03 or BIOL 1021.03 (C+ or better) or DISP or PLAN 2001.03

CROSSLISTED: PLAN 3225, BIOL 3225

FORMATS: Lecture | Tutorial

ENVS 3226 Economic Botany, Plants and Civilization

CREDIT HOURS: 3

The story of the human use of plants for food, fibre and fuel including the botany, domestication, development, distribution, production, processing, history, economic and social impacts of the major world crops (cereals, fruits, vegetables, flowers and industrial crops) and the importance of plants in medicine and conservation.

PREREQUISITES: A grade of C+ or higher in BIOL 1010.03 or (BIOL 1020.03 or BIOA 1002.03 or BIOL 1030.03) and BIOL 1011.03 or (BIOL 1021.03, BIOA 1003.03, or BIOL 1031.03); or SCIE 1505.18

CROSSLISTED: BIOL 3226.03

FORMATS: Lecture | Lab

ENVS 3300 Contaminated Site Management

CREDIT HOURS: 3

Scientists, engineers and planners should have a basic understanding of the issues surrounding environmental site assessment given the potential environmental and socio-economic impacts. Topics include phased assessments, risk assessment, remediation and monitoring. Case studies, projects, guest speakers and field trips augment the class.

PREREQUISITES: CHEM 1011.03 and 1012.03 (or equivalent) AND EARTH 1080.03; OR permission of the instructor

RESTRICTIONS: Restricted to 3rd year students and above or permission of instructor.

FORMATS: Lecture

ENVS 3400 Environment and Human Health

CREDIT HOURS: 3

This course examines the relationships between the health of populations and health determinants in the context of environmental sustainability. Weekly laboratory exercises will teach students how geomatics (GIS, GPS, and remote sensing technologies) and epidemiological tools can be used to assess the links between the health of human populations and the health of the environment, and how to use these tools for environmental health research.

PREREQUISITES: Must be a third year student or have permission of instructor

CROSSLISTED: GEOG 3400.03

FORMATS: Lecture | Lab

ENVS 3500 Geoscience Information Management

CREDIT HOURS: 3

See course description for EARTH 3500 in the Earth Sciences section of the calendar.

ENVS 3501 Environmental Problem Solving I

CREDIT HOURS: 3

This course introduces students to concepts and methods for analyzing environmental problems. Students will learn analytical approaches for problem solving that are appropriate for a wide range of environmental issues and apply these to the analysis of case studies.

PREREQUISITES: ENVS 1100.03 and ENVS 1200.03 (with a grade of B- or higher in each) or SUST 1000.06 or SUST 1001.06 (with a grade of B- or higher). Must be a 3rd year student OR have permission of instructor.

ENVS 3502 Environmental Problem Solving II: The Campus as a Living Laboratory

CREDIT HOURS: 3

In this course the campus serves as a living laboratory for identifying, evaluating and assessing indicators of progress toward greater campus sustainability. Working in groups, students apply problem solving models to case studies using qualitative and quantitative research methods and make recommendations for improvements on campus based on their analyses.

PREREQUISITES: ENVS 1100.03 and ENVS 1200.03 (with a grade of B- or higher in each) or SUST 2000.06 or SUST 2001.06. Must be a 3rd year student OR have permission of instructor.

CROSSLISTED: SUST 3502.03

EXCLUSIONS: MGMT 3701.03 SUST 3701.03

ENVS 3601 Global Biogeochemical Cycles

CREDIT HOURS: 3

An interdisciplinary course that examines example global cycles of water, carbon, nitrogen, phosphorus, and sulphur, and human impacts on these cycles, as manifested in our atmospheric, soil, ocean and freshwater environments. This course involves discussion of the latest developments in this rapidly changing field and will provide a framework for those interested in global change.

PREREQUISITES: CHEM 1011.03/ CHEM 1012.03 or equivalent, and one of ENVS 1100.03, SUST 1001.03, EARTH 1080.03, or (SCIE 1506.09 or SCIE 1507.09) and completion of 2 years of an undergraduate degree.

CROSSLISTED: EARTH 3601.03

ENVS 3615 Methods in Ecology

CREDIT HOURS: 3

See course description for BIOL 3615 in the Biology section of the calendar.

ENVS 3623 Applied Coastal Ecology

CREDIT HOURS: 3

See course description for BIOL 3623 in the Biology section of the calendar.

ENVS 3624 Urban Freshwater Systems

CREDIT HOURS: 3

See course description for BIOL 3624 in the Biology section of the calendar.

ENVS 3632 Applied Field Methods in Fish Ecology

CREDIT HOURS: 3

See course description for BIOL 3632 in the Biology section of the calendar.

FORMATS: Lecture | Lab

ENVS 3633 Spatial Information and GIS in Ecology

CREDIT HOURS: 3

A hands-on approach to understanding and using spatial information, this course introduces students to Geographic Information Systems (GIS) as a tool to answer ecological questions. Together, students conduct a major field project, collecting data, creating maps using GIS, and interpreting spatial patterns, to address an applied problem in ecology.

CALENDAR NOTES: Offered in the summer through SEASIDE. an auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.

PREREQUISITES: BIOL 2060.03

CROSSLISTED: BIOL 3633.03, GEOG 3633.03, MARI 3633.03

ENVS 3664 Intertidal Ecology and Diversity

CREDIT HOURS: 3

See course description for BIOL 3664 in the Biology section of the calendar.

ENVS 3700 Earth Resources, Sustainability, and Society

CREDIT HOURS: 3

This course addresses the question: What do we need to know and understand about the nature and distribution of geologic resources to optimally reconcile mineral extraction with society's needs, considerations of the environment, and the sustainable development goals in a more sustainable, geoethical, and balanced approach, through the 21st century.

CALENDAR NOTES: Aimed as an elective course for majors in Earth Sciences and in Environmental Sciences. Must be third year students.

PREREQUISITES: EARTH 1080

CROSSLISTED: GEOG 3700 EARTH 3700

RESTRICTIONS: E1 and E2

FORMATS: Lecture | Seminar | Discussion | Other (explain in comments)

ENVS 3701 Fundamentals of Hydrology

CREDIT HOURS: 3

This course is an introduction to hydrology, emphasizing surface processes and watershed responses. In this course we learn about both the pure and applied uses of hydrology. The course is quantitative and introduces hydrologic processes in the atmosphere, on the land surface, in groundwater and in stream channels.

PREREQUISITES: MATH 1000.03 or MATH 1215.03 and one of ENVS 1000.06 or ENVS 1100.03 and ENVS 1200.03, SUST 1001.06, EARTH 1080.03, or EARTH 1090.03 or one of SCIE 1515X/Y.21, SCIE 1530.27, SCIE 1540X/Y.33 and completion of 2 years of an undergraduate degree. PHYC 1280 and PHYC 1290.03 (or PHYC 1300X/Y.06) and MATH 1010.03 are recommended.

CROSSLISTED: EARTH 3701.03

FORMATS: Lecture | Tutorial

ENVS 3702 Sustainable Industries

CREDIT HOURS: 3

This course introduces concepts and methods for analyzing industrial sustainability through an interdisciplinary lens including economic, social and environmental considerations. The business case for industrial sustainability, the tools necessary to decouple economic growth of our business sectors from resource use and environmental degradation, and the role of sustainable industries in the sustainable development agenda are explored.

PREREQUISITES: (ENVS 1100.03 and ENVS 1200.03) or MGMT 1700.06 or ENVI 1100.06 or ENVS 1000.06 or SUST 2000.06 or SUST 2001.06 or (MGMT 1702.03 and MGMT 2702.03)

CROSSLISTED: MGMT 3702.03

FORMATS: Lecture

ENVS 3703 Ecology and Environmental Issues in the Bahamas

CREDIT HOURS: 3

This applied field course includes introductory lectures in Canada followed by a place-based field trip to the Cape Eleuthera Institute, Bahamas. Students will collect and analyze a wide spectrum of data related to environmental problems on the island and will consider and problematize various environmental solutions.

PREREQUISITES: ENVS 1100.03 and ENVS 1200.03 (with a grade of B- or higher in each) or SUST 1000.06 or SUST1001.06 (with a grade of B- or higher), An introductory course in statistics (STAT 1060.03 or similar) is recommended. Must be at least a 2nd year student OR have permission of the instructor.

RESTRICTIONS: E1 and E2

FORMATS: Lecture | Experiential Learning | Other (explain in comments)

ENVS 3801 Directed Readings in Environmental Science

CREDIT HOURS: 3

This course is intended for third and fourth-year students who wish to study in an area of environmental science not covered in other courses offered at the university. It involves independent study supervised by a faculty member. Class content and marking scheme must be approved by the Director of Environmental Programs during the first week of the academic term in which the credit is being sought. It is the student's responsibility to consult with Environmental Programs at least 2 weeks prior to the term in which the Directed Readings course will take place.

PREREQUISITES: ENVS 1000X/Y.06 or ENVS 2001.03 or (ENVS 1100.03 and ENVS 1200.03) and third year student status.

ENVS 4001 Environmental Impact Assessment

CREDIT HOURS: 3

This courses provides an opportunity to explore all aspects of environmental impact assessment (EIA) as practiced in Canada and in other countries. The course traces the development of EIA over the past 30 years and critically examines the scientific, procedural and political dimensions.

CALENDAR NOTES: All students taking BIOL 4001.03 or ENVS 4001.03 must have completed 90 credits and be in their fourth year of study or have permission of instructor.

PREREQUISITES: ENVS 1000X/Y.06 or ENVS 1100.03 and ENVS 1200.03 or BIOL 2060.03 or EARTH 2410.03 or GEOG 2100X/Y.06 or GEOG 2201.03 or GEOG 2202.03 or INTD 2001.03 or OCEA 2000X/Y.06 (or OCEA 2001.03 and OCEA 2002.03) or SUST 2000.06 or SUST 2001.06.

CROSSLISTED: BIOL 4001.03

FORMATS: Lecture | Tutorial

ENVS 4002 The Science of Wetland Ecosystems

CREDIT HOURS: 3

An interdisciplinary introduction to wetland ecosystems, with emphasis on the relationship between wetlands and the surrounding watershed. This relationship determines wetland type, function and in developed landscapes, wetland health. Inversely, wetland type, function and health can affect the developed landscapes. Students will gain an appreciation of the physical relationship through an examination of wetland hydrology, chemical cycling, and ecology. Management of wetlands in the landscape through policy and engineering will also be studied.

PREREQUISITES: CHEM 1011.03/1012.03 or CHEM 1021.03/1022.03 and BIOL 2060.03

CROSSLISTED: BIOL 4002.03

FORMATS: Lecture

ENVS 4003 Coral Reefs and Environmental Change

CREDIT HOURS: 3

Coral reefs are iconic marine ecosystems both biologically and economically. This class introduces students to the biology of both tropical and cold-water corals, key characteristics of their abiotic environments, human impacts at both local and global scales, and management options for sustainable resource use and the protection of biodiversity.

PREREQUISITES: Chem 1011/Chem 1012 and Biol 2060. Also restricted to students with 6 credit hours in Environmental Science or Biology or Marine Biology at or above the 3000 level.

CROSSLISTED: MARI 4003

RESTRICTIONS: Restricted to exclude E1, E2, E3.

ENVS 4004 Pathways to Sustainable Energy

CREDIT HOURS: 3

Students gain a practical understanding of how to move towards a low-carbon energy future. Students learn about international, national, and subnational policies that drive adoption of renewable energy, energy efficiency, and carbon capture and storage technologies and how the technologies work. The technological barriers to their widespread adoption and how to overcome these barriers are also discussed.

PREREQUISITES: 4th year student, or have permission of instructor.

CROSSLISTED: SUST 4004.03

EXCLUSIONS: E1, E2, E3

FORMATS: Lecture

ENVS 4005 Coral Reefs and Environmental Change with Field Trip

CREDIT HOURS: 3

Coral reefs are iconic marine ecosystems both biologically and economically. This class introduces students to the biology of both tropical and cold-water corals, key characteristics of their abiotic environments, human impacts at both local and global scales, and management options for sustainable resource use and the protection of biodiversity. This course runs parallel with ENVS 4003 but includes the addition of a 5-day field trip to the Bermuda Institute of Ocean Science.

PREREQUISITES: Chem 1011/Chem 1012 and Biol 2060. Also restricted to students with 6 credit hours in Environmental Science or Biology or Marine Biology at or above the 3000 level. Permission of Instructor Required

CROSSLISTED: MARI 4005

RESTRICTIONS: Restricted to exclude E1, E2, E3, permission of instructor required

EXCLUSIONS: ENVS 4003

FORMATS: Lecture | Lab | Discussion | Experiential Learning

ENVS 4100 Environmental Science Capstone

CREDIT HOURS: 3

Students apply the multidisciplinary knowledge they have acquired during their program of study to real world environmental issues. Students work individually and in groups in preparation towards a formal debate. They evaluate evidence from science, economics, philosophy and other ways of understanding the world to develop mastery and nuance among current environmental topics.

PREREQUISITES: (ECON 1101.03 or ECON 1102.03), PHIL 2480.03, STAT 2080.03, ENVS 2100.03, ENVS 3200.03, and ENVS 3501. Must be a fourth year student.

RESTRICTIONS: E1, E2, E3

FORMATS: Seminar | Discussion

ENVS 4850 Geographic Information Science Research Project

CREDIT HOURS: 3

Students learn how to design, manage and complete a research project in Geographic Information Science (GIS). Projects must include a substantive analytical component where GIS is central to methods employed. Evaluation includes a written report, oral presentation and digital data. Required for completion of the Certificate in GIS.

COREQUISITES: EARTH 5420.03/GEOG 4520.03/ERTH 4520.03

PREREQUISITES: ENVS 3500.03/ERTH 3500.03/GEOG 3500.03

CROSSLISTED: BIOL 4850.03, SCIE 4850.03, EARTH 4850.03, GEOG 4850.03

EXCLUSIONS: Restricted to 3rd and 4th year students.

FORMATS: Lecture

ENVS 4901 Honours Thesis Part A

CREDIT HOURS: 3

Mastery of the basic skills of problem definition, proposal preparation and project implementation is the key to dealing with a wide range of "real-life" situations, both on and off the career path. Includes lectures and tutorials on proposal writing, research design and methodologies, and an independent environmental science research project carried out under the supervision of an approved faculty member. Required for Honours Environmental Science.

PREREQUISITES: Fourth year Environmental Science and permission of Instructor/Director

FORMATS: Lecture | Seminar

ENVS 4902 Honours Thesis Project Part B

CREDIT HOURS: 3

Independent research project carried out under the supervision of an approved faculty member or affiliated research scientists. Required for Honours Environmental Science.

PREREQUISITES: ENVS 4901.03 with a grade of B+ or higher

ENVS 4950 Advanced Topics in Environmental Science

CREDIT HOURS: 3

This course will address current interdisciplinary issues in environmental science with topics varying each semester. Details as to the content of the course will be announced by Environmental Programs at least one month in advance of the course offering. The course will be taught by Dalhousie faculty, and/or visiting scholars.

PREREQUISITES: This class is restricted to students in the Honours/Major/Double Major in Environmental Science, or permission of the Director of Environmental Programs.

FORMATS: Lecture | Seminar

ENVS 8891 Co-op Work Term I

CREDIT HOURS: 0

Co-op Work Term I. See Environmental Programmes for details.

ENVS 8892 Co-op Work Term II

CREDIT HOURS: 0

See Environmental Programmes for details.

ENVS 8893 Co-op Work Term III

CREDIT HOURS: 0

See Environmental Programmes for details.

ENVS 8894 Co-op Work Term IV

CREDIT HOURS: 0

See Environmental Programmes for details.

First Year Interest Groups (FIGs) for Science Students

a start for university success

What is a FIG and why sign up?

A First Year Interest Group, or FIG, is a group of students who meet weekly for an hour during the fall term of their first year at Dal. Groups are composed of about 15 students who have similar academic interests or goals, and who are enrolled in one or more of the same first year courses.

FIGs are designed to complement the classroom experience. It's a place to meet other first year students, and to discuss some of the big ideas emerging in your future field of study. Signing up for a FIG can help you get involved, meet people, and maybe even form lasting friendships. FIGs are free, informal, interactive groups that will help you make the most out of your first year at Dal.

What will you do in a FIG?

- Get to know other first year students with similar interests (maybe you'll find a study partner)
- Meet Dal faculty or professionals who work in your area of interest
- Find out how to get involved (volunteer opportunities, events, clubs)
- Learn about future opportunities for students with your interests (scholarships, summer research, co-op, study abroad)
- Talk!

Who should enrol in a FIG?

Any student in the Faculty of Science who has been accepted as an undeclared Science student and is in their first year of studies can enrol in a FIG.

How do I enrol in a FIG?

You enroll in a FIG when you registered for your regular courses, using the same registration procedure. First, make sure that the time slot of the FIG doesn't conflict with the lecture, lab or tutorial times of your other courses. Then register for the appropriate FIG section (FIGS 0001, 0002, etc.).

Does a FIG count toward my degree?

The FIG will appear on your academic transcript – it can be seen by future employers along with the credit courses you complete. However, because it is not for credit, a FIG does not count as part of the 90 or 120 credit hours you must complete for a BSc degree.

Will I receive a grade for my FIG?

If you complete the FIG, it will appear on your academic transcript with Pass noted beside it. Letter grades are not given for FIGs, and FIGs are not included in calculation of your GPA. However, to receive a Pass you must participate in the FIG sessions.

What if I don't like my FIG?

We expect that most students will enjoy their FIG, and will feel that the time has been well spent. However, if for some reason you find that you do not want to participate in your FIG, you may withdraw. The FIG will then not appear on your transcript.

Can I sign up for more than one FIG?

No. We want to offer the opportunity to participate in a FIG to as many students as possible, and so students may not register in more than one FIG.

FIG options for science students

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

Course Descriptions

FIGS 0001 Psychology and Human Behaviour

CREDIT HOURS: 0

Psychology & Human Behaviour is a group for first year science students with interests in psychology, the brain, human behaviour and mental health. In this FIG, you will meet other first year students and will be able to explore your interests and learn about academic and extra-curricular opportunities. FIGS are a great way to gain unique access and exposure to experts, professors, labs and facilities during your first year in science.

CALENDAR NOTES: Note: For first year students enrolled in the Faculty of Science. FIGS courses are zero credit hours, but will appear as a PASS on the

academic transcript if completed.

RESTRICTIONS: Restricted to Faculty of Science students (Undeclared Science, Integrated Science, Medical Science, King's Foundation Year) who have fewer than 16 credit hours.

FORMATS: Seminar

FIGS 0002 Neuroscience and the Brain

CREDIT HOURS: 0

Neuroscience and the Brain is a group for first year science students who are coming to Dal to learn about how the brain works and why that matters. In this FIG, you will meet other first year students and will be able to explore your interests and learn about academic and extra-curricular opportunities. FIGS are a great way to gain unique access and exposure to experts, professors, labs and facilities during your first year in science.

CALENDAR NOTES: Note: For first year students enrolled in the Faculty of Science. FIGS courses are zero credit hours, but will appear as a PASS on the academic transcript if completed.

RESTRICTIONS: Restricted to Faculty of Science students (Undeclared Science, Integrated Science, Medical Science, King's Foundation Year) who have fewer than 16 credit hours.

FORMATS: Seminar

FIGS 0003 Health and Medicine

CREDIT HOURS: 0

Health & Medicine is a group for first year science students who are coming to Dal to learn about human biology, physiology and/or disease and are interested in pursuing a career in medicine, medical research or another health profession. In this FIG, you will meet other first year students and will be able to explore your interests and learn about academic and extra-curricular opportunities. FIGS are a great way to gain unique access and exposure to experts, professors, labs and facilities during your first year in science.

CALENDAR NOTES: Note: For first year students enrolled in the Faculty of Science. FIGS courses are zero credit hours, but will appear as a PASS on the academic transcript if completed.

RESTRICTIONS: Restricted to Faculty of Science students (Undeclared Science, Integrated Science, Medical Science, King's Foundation Year) who have fewer than 16 credit hours.

FORMATS: Seminar

FIGS 0004 Oceans

CREDIT HOURS: 0

Oceans is a group for first year science students who are coming to Dal to learn more about oceans and ocean life, including marine conservation, climate change, ocean research, and the living organisms found in ocean environments. In this FIG, you will meet other first year students and will be able to explore your interests and learn about academic and extra-curricular opportunities. FIGS are a great way to gain unique access and exposure to experts, professors, labs and facilities during your first year in science.

CALENDAR NOTES: Note: For first year students enrolled in the Faculty of Science. FIG courses are zero credit hours, but will appear as a PASS on the academic transcript if completed.

RESTRICTIONS: Restricted to Faculty of Science students (Undeclared Science, Integrated Science, Medical Science, King's Foundation Year) who have fewer than 16 credit hours.

FORMATS: Seminar

FIGS 0005 Earth and Environment

CREDIT HOURS: 0

Who should register: You are coming to Dal with an interest in the natural world. You may want to focus your studies on how our world came to be as it is today – continental drift, mountain building, ice ages, river migration, paleobiology, or you may be most interested in how we as humans are changing that world – our impacts on climate, land, water and ecosystems. In this FIG, you will meet first year students with similar interests. You will have the opportunity to explore your interests and the options for shaping your academic pathway, with senior peers and with experts, all in a small group setting. Relevant Science programs: Earth Sciences, Environmental Science, Biology, Chemistry, Economics, Marine Biology, Physics, Statistics, Sustainability

CALENDAR NOTES: Note: For first year students enrolled in the Faculty of Science as Undeclared Science majors or as BSc students in the College of Sustainability. FIG courses are zero credit hours, but will appear on the academic transcript if completed.

COREQUISITES: One Science course or SUST 1000

RESTRICTIONS: Restricted to UNDS or BSc (College of Sustainability) students with fewer than 16 credit hours.

FORMATS: Seminar

FIGS 0007 Innovation and Entrepreneurship in Science

CREDIT HOURS: 0

Innovation and Entrepreneurship is a group for first year students with an interest in how design thinking and innovation can lead to science or technology-based solutions for real world problems. In this FIG, you will meet other first year students and will have opportunities to explore your interests and opportunities together. We will talk about the creative process and design testing, and about opportunities to get involved in SURGE, Dalhousie's Science sandbox, as well as the larger innovation ecosystem on campus. FIGS are a great way to gain unique access and exposure to experts, professors, labs and facilities during your first year in science.

CALENDAR NOTES: For first year students enrolled in the Faculty of Science or Computer Science. FIG courses are zero credit hours, but will appear as a PASS on the academic transcript if completed.

RESTRICTIONS: Restricted to Faculty of Science students (Undeclared Science, Integrated Science, Medical Science, King's Foundation Year) who have fewer than 16 credit hours.

FORMATS: Seminar

FIGS 0008 Logic and Problem Solving

CREDIT HOURS: 0

Logic & Problem Solving is a group for first year students with an interest in mathematics, statistics or related areas of study such as economics or physics. In this FIG, you will meet first year students with similar interests. We will learn about how to approach mathematical problems, and we will work through challenges and puzzles of varying complexity and talk about math in the real world.

CALENDAR NOTES: Note: For first year students enrolled in the Faculty of Science or Computer Science. FIG courses are zero credit hours, but will appear as a PASS on the academic transcript if completed.

RESTRICTIONS: Restricted to Faculty of Science (Undeclared Science, Integrated Science, Medical Science, King's Foundation Year) or Computer Science students who have fewer than 16 credit hours.

FORMATS: Seminar

FIGS 0009 Navigate Your Science Degree

CREDIT HOURS: 0

This is a not-for-credit course for first year Science students. The class meets seven times throughout the winter semester leading up to the March course registration date. We start by matching you with career goals based on your interests. Throughout the seven workshop sessions you explore career options based on these interests, identify employable skills required for 21st century careers, and match these skills with academic courses, co-curricular experiences, work and volunteering opportunities.

CALENDAR NOTES: For first year students enrolled in the Faculty of Science. FIG courses are zero credit hours, but will appear as a PASS on the academic transcript if completed.

RESTRICTIONS: Restricted to Faculty of Science students (Undeclared Science, Integrated Science, Medical Science, King's Foundation Year) who have fewer than 30 credit hours.

FIGS 0010 Indigenous Ways of Knowing

CREDIT HOURS: 0

This is a group for first year students who want to know more about the intersection between Science and Indigenous ways of knowing, as both a learner and participant. In this FIG you will meet first year students and have opportunities to explore concepts such as holistic approaches, life-long and land-based learning, and Indigenous medicine. We will also discuss ideas around reconciliation, relationships among communities, and how diversity and inclusion may be experienced in science. There will be guests, field trips, and activities.

CALENDAR NOTES: Note: For first year students enrolled in the Faculty of Science. FIG courses are zero credit hours, but will appear as a PASS on the academic transcript if completed.

RESTRICTIONS: Restricted to Faculty of Science students (Undeclared Science, Integrated Science, Medical Science, King's Foundation Year) who have fewer than 16 credit hours.

FORMATS: Experiential Learning

FIGS 0021 Science for Everyone

CREDIT HOURS: 0

Our goal is to affirm and support historically excluded and underrepresented students in STEM. If you have the passion for science but you are bewildered by the many unwritten rules of science, we can help! Are you wondering how to plan your STEM degree? Are you interested in becoming part of a more inclusive science community? Are you uncertain about how to access all the tools you can use to succeed in STEM? Do you want to know where to find support? We will help you with these and other challenges. We will work as a group to address these topics and learn how to support each other's success. There will be group work, hands-on activities, and guest speakers. This is a winter-term learning module offered as part of the Dalhousie Science Scholars and Leaders Program.

CALENDAR NOTES: For first year students in the Faculty of Science

RESTRICTIONS: BSc or BSc (Medical Sciences) students with fewer than 30 credit hours

FORMATS: Seminar

FIGS 0101 FIG Action: Climate change

CREDIT HOURS: 0

In this First year Interest Group you will have the opportunity to work on a project together with other students where you explore CLIMATE CHANGE from the perspective of your interests in oceans, ecosystems, earth, energy, economics, innovation or research. Groups will be mentored by a faculty member and a senior student. These one hour Lunch and Learn sessions will run weekly, and are offered at no cost. They require no homework and are not for credit, but will appear as a PASS on your transcript if completed. A minimum of 5 students must register for the session to run.

CALENDAR NOTES: Can be taken together with FIGS 0009

RESTRICTIONS: restricted to Faculty of Science students with less than 30 earned credit hours

FORMATS: Seminar

FIGS 0102 FIG Action: Stress

CREDIT HOURS: 0

In this First year Interest Group you will have the opportunity to work on a project together with other students where you explore STRESS from the perspective of your interests in mental health, cardiovascular health, gut health, immunology, epidemiology, learning and memory, behaviour, drugs or research. Groups will be mentored by a faculty member and a senior student. These one hour Lunch and Learn sessions will run weekly, and are offered at no cost. They require no homework and are not for credit, but will appear as a PASS on your transcript if completed. A minimum of 5 students must register for the session to run.

CALENDAR NOTES: Can be taken together with FIGS 0009

RESTRICTIONS: Restricted to Faculty of Science students with less than 30 earned credit hours

FORMATS: Seminar

FIGS 0201 BSc Truro Start I

CREDIT HOURS: 0

This is a not-for-credit course for first year students starting their Science (BSc) program on the Truro campus. The class meets weekly throughout the fall semester. In this FIG, you will meet other first year students and will start to explore your interests, and academic goals. FIGS are a great way to gain unique access and exposure to experts, professors, labs and facilities during your first year in science. The one-hour meetings will consist of discussions, activities and short excursions, and brief information sessions, where you will learn about science-related academic and extra-curricular opportunities.

CALENDAR NOTES: For first year students enrolled in the Faculty of Science. FIGS courses are zero credit hours and will appear as a PASS on the academic transcript if completed.

RESTRICTIONS: Restricted to Faculty of Science students who have fewer than 30 credit hours and are starting their BSc program on the Truro campus.

FORMATS: Seminar

FIGS 0202 BSc Truro Start II

CREDIT HOURS: 0

This is a not-for-credit course for first year students starting their BSc program on the Truro campus. The class meets weekly throughout the winter semester. You will learn about future academic opportunities available in a BSc program, including research, honours, and co-op. You will explore the various Science Majors and get help choosing the best fit for you. The meetings will consist of discussions, activities and an opportunity for a one-day visit to the Halifax campus.

CALENDAR NOTES: For first year students enrolled in the Faculty of Science. FIG courses are zero credit hours and will appear as a PASS grade on your academic transcript if completed.

RESTRICTIONS: Restricted to Faculty of Science students who have fewer than 30 credit hours and are starting their BSc program on the Truro campus.

FORMATS: Seminar

Geography

Note: There is no Geography program at Dalhousie; however, several courses taught in various departments are commonly recognized as Geography courses. Only courses which are cross-listed in Science departments may be used to meet the life or physical science subject requirement for the BA degree.

Staff

Deans

Macy, C., BA (Arch) (Calif. At Berkeley), MArch (MIT)

Macdonald, C.L.B., BSc (Hons), PhD (Dalhousie), Professor (Chemistry)

Gantar, J., BA, MA (University of Ljubljana), PhD (University of Toronto) (Acting Dean)

Geography Coordinators

Architecture and Planning: **Manuel, P.**, BA (Carleton), MSc (McGill), PhD (Dalhousie), MCIP, LPP (patricia.manuel@dal.ca)

Arts and Social Sciences: **TBD**

Minor in Geography

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Science) program.

To fulfill the requirements for a Minor in Geography, students must complete 24 credit hours, including the following:

- GEOG 1030.03/ERTH 1030.03: Introduction to Physical Geography
- GEOG 1035.03: Introduction to Human Geography
- GEOG 2000.03: Cartography

Additional 15 credit hours from the following list: at least 6 of which must be at the 3000 level or higher.

- GEOG 1060/ERTH 1060: Natural Disasters
- GEOG 2006.03/PLAN 2006.03: Space, Place, and Geographic Information Systems
- GEOG 2070.03/HIST 2383.03/SPAN 2070.03: Area Studies on Mexico and Central America
- GEOG 2100.06/SOSA 2100.06: Environment and Culture
- GEOG 2201.03/INTD 2001.03: Introduction to Development
- GEOG 2202.03/INTD 2002.03: Introduction to Development II
- GEOG 2206.03/INTD 2106.03: Africa: An Introduction
- GEOG 2336.03/ECON 2336.03: Regional Development
- GEOG 2800.03/PHYC 2800.03/OCEA 2800.03: Climate Change
- GEOG 3102.03/SUST 3102.03: Coastal Change and Adaptation
- GEOG 3106.03/SUST 3106.03: The Canadian North
- GEOG 3165.03/SOSA 3165.03: Peoples and Cultures of the World: Selected Area Studies
- GEOG 3110.03/INTD 3110.03: Migration and Development
- GEOG 3114.03/INTD 3114.03: Agriculture and Development
- GEOG 3284.03/SOSA 3284.03: Living in cities
- GEOG 3400.03/ENVS 3400.03: Human Health and Sustainability
- GEOG 3440.03/ERTH 3440.03: Geomorphology
- GEOG 3500.03/ERTH 3500.03/ENVS 3500.03/ERTH 5600.03: Exploring Geographic Information Systems
- GEOG 3633.03/ENVS 3633.03/BIOL 3633.03: Spatial Information and GIS in Ecology
- GEOG 3700.03/ERTH 3700.03/ENVS 3700.03: Earth resources, sustainability, and society
- GEOG 4440.03/ERTH 4440.03: Geomorphology and Landscape Evolution
- GEOG 4450.03/ERTH 4450.03: Introduction to Landscape Simulation
- GEOG 4520.03/ERTH 4520.03: GIS Applications to Environmental and Geological Sciences
- GEOG 4530.03/ERTH 4530.03: Environmental Remote Sensing
- GEOG 4850.03/SCIE 4850.03/BIOL 4850.03/ENVS 4850.03/ERTH 4850.03: Geographic Information Science Research Project

Note that the following courses are not offered in upcoming terms, but may be counted toward the Minor in Geography if taken previously:

- GEOG 2001.03/PLAN 2001.03: Landscape analysis
- GEOG 3001.03/PLAN 3001.03: Landscape Ecology
- GEOG 3002.03/PLAN 3002.03: Reading the City
- GEOG 3005.03/PLAN 3005.03: Cities and the Environment
- GEOG 3006.03/PLAN 3006.03: Reading the Landscape
- GEOG 3110.03/INTD 3110.03: Migration and Development
- GEOG 3114.03/INTD 3114.03: Agriculture and Development
- GEOG 3210.03/HIST 3210.03/CANA 3020.03: Canadian Cultural Landscapes
- GEOG 3220.03/SOSA 3220.03: Coastal Communities in the North Atlantic
- GEOG 3370.03/HIST 3370.03: North American Landscapes

NOTE: Students in the BCD program may not select PLAN cross-listed courses that are required courses for their degree program

Contact [Geography](#) for more information.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions

GEOG 1030 Introduction to Physical Geography

CREDIT HOURS: 3

This non-lab science course examines the nature of weather and climate, earth's surface features and processes, and internal processes that contribute to landform development. An integral component of the course is an exploration of the representation and interpretation of physical geographic data through the examination of a variety of maps.

CALENDAR NOTES: There are no pre-requisites for this course and students may take this class in addition to any other first year Earth Sciences class.

CROSSLISTED: EARTH 1030.03

FORMATS: Lecture | Tutorial

GEOG 1035 Introduction to Human Geography

CREDIT HOURS: 3

Human geography examines the ways that people perceive, use, and alter the landscapes they occupy. This course considers aspects of culture that characterize different social groups, as well as the systems of production, livelihood, spatial organization, and administration that societies erect. The class introduces the principal tools of human geographers: maps, demography, and analysis of cultural patterns.

CALENDAR NOTES: This class cannot be used to meet the life or physical science subject requirement for the BA degree.

FORMATS: Lecture

GEOG 1060 Earthquakes, Volcanoes and Natural Disasters

CREDIT HOURS: 3

Earthquakes, meteorite impacts, rapid climate change, volcanic eruptions, hurricanes, landslides, solar flares, and floods are natural disasters that affect our economy, public policy, and safety. Where, why and how frequently do natural disasters occur? Are predictions possible? Are media portrayals of risk and damage realistic? This course, aimed at the nonspecialist, investigates these intriguing questions. Excerpts of "disaster films", in conjunction with lectures and discussions are used to identify the causes, consequences and sometimes erroneous perceptions of natural hazards. Examples from Atlantic Canada and contemporary disasters are used to assess local risk and real-time events worldwide.

CROSSLISTED: EARTH 1060.03

FORMATS: Lecture

GEOG 2000 Cartography

CREDIT HOURS: 3

Maps, are essential aids to disciplines that span archaeology to zoology. Navigation is the art and science of finding one's way through both natural and built landscapes. This class investigates how maps are constructed and interpreted, how maps can distort perceptions, and can influence one's decisions.

PREREQUISITES: EARTH/GEOG 1030, or EARTH 1080

FORMATS: Lecture

GEOG 2001 Landscape Analysis

CREDIT HOURS: 3

Designers and planners need to understand the influence of physical, biological, and cultural systems in landscape evolution, and the relevance of that information in analyzing land capability. Students develop inventory and analysis tools for understanding environmental processes and their implications for design and planning. There will be field trips and a lab component.

CROSSLISTED: PLAN 2001.03

GEOG 2006 Space, Place and Geographic Information Systems

CREDIT HOURS: 3

Planners use Geographical Information systems (GIS) for data collection, coordination, and analysis. Properly interpreted, GIS data contribute to informed decision-making. This course explores the application of GIS in planning within a project-centred setting. Students learn to use GIS to address and use site planning issues. The course also considers mapping standards used within the field of planning, and examines legal, privacy, and ethical implications of using GIS data in the public realm.

CROSSLISTED: PLAN 2006.03

FORMATS: Lecture | Lab

GEOG 2070 Area Studies on Mexico and Central America

CREDIT HOURS: 3

Following an examination of the indigenous heritage, and the colonial legacy of the conquistadors, the class deals principally with the contemporary period, examining the Mexican Revolution and its aftermath, the Somoza dynasty, Nicaragua under the Sandinistas, the U.S. role in the region, the human rights situation in Central America, and probable developments in the region. The class is designed to provide an understanding of the contemporary reality of this volatile region, in many ways a microcosm of the crucial situation of Latin America as a whole.

PREREQUISITES: No prerequisites. Open to students in all departments. No knowledge of Spanish necessary

CROSSLISTED: HIST 2383.03. SPAN 2070.03

FORMATS: Lecture | Discussion

GEOG 2100 Environment and Culture

CREDIT HOURS: 6

Concern about the environment is a widespread phenomenon as virtually everyone is confronted by environmental issues -- be they global warming, the depletion of the ozone layer or the continuing problems of water pollution and solid waste disposal. Furthermore, we are becoming increasingly aware of that environmental issues often have global implications. The efforts of cities in Canada to deal with environmental pollution, for example, may lead to conflicts with rural regions. Similarly, rural regions, in their use of various chemical agents, may find themselves affecting the lives of city dwellers. This class will explore key relationships between human culture and the physical environment. Topics to be examined include: historical, social, and legal aspects of contemporary environmentalism, food and agriculture, environmental ethics, health, traditional ecological knowledge, sustainable forestry, waste management, public participation and environmental movements.

CALENDAR NOTES: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

PREREQUISITES: One of SOSA 1000X/Y.06, SOSA 1050X/Y.06, SOSA 1100X/Y.06, SOSA 1200 X/Y.06

CROSSLISTED: SOSA 2100.06

FORMATS: Lecture

GEOG 2201 Global Justice and Development I

CREDIT HOURS: 3

Poverty, inequality and injustice are widespread throughout the contemporary developing world. This course will examine how this situation came to be. It begins by analyzing the different meanings of the term "development" and then examines the major approaches that have shaped practical development initiatives on the ground in the Global South over the past 60 years. The course also examines the legacies of history for contemporary development efforts in the Global South through specific case studies.

PREREQUISITES: Completion of five full credits at the 1000 level or permission of the instructor

CROSSLISTED: INTD 2001.03

FORMATS: Lecture | Tutorial

GEOG 2202 Global Justice and Development II

CREDIT HOURS: 3

This course builds upon the core concepts and approaches studied in INTD 2001 (i.e. different theoretical approaches to development and the historical creation of underdevelopment). The course examines key contemporary issues in the field of development and analyses the connections between them: debt, global trade rules, foreign aid, hunger and malnutrition, rural and urban livelihoods, population growth. The course also examines the principle actors involved in development and the strategies they have used to promote and resist development, including: governments, non-governmental organizations (NGOs), the World Bank and IMF, and popular social movements in the Global South and North.

PREREQUISITES: Completion of five credits at the 1000 level or permission of the instructor

CROSSLISTED: INTD 2002.03

FORMATS: Lecture | Tutorial

GEOG 2206 Africa: An Introduction

CREDIT HOURS: 3

This course will focus on contemporary Africa. Stereotypical portrayals of Africa will be examined and critiqued with the goal of emphasizing the immensity, diversity and complexity of the continent in order to better understand the opportunities and challenges of African development in the twenty-first century.

CROSSLISTED: INTD 2106.03

FORMATS: Lecture | Tutorial

GEOG 2336 Regional Development

CREDIT HOURS: 3

Most countries have richer and poorer regions. Economic development issues, policies, and theories facing more industrialized nations are analyzed with particular focus on Canada (especially the Atlantic region), the European Economic Community, U.S.A., Japan, and Australia. Approved with Canadian Studies. In addition to the prerequisites, the student is advised to take one class in Political Science and one class in Canadian History before taking ECON 3336.

PREREQUISITES: ECON 1101.03 and 1102.03

CROSSLISTED: ECON 2336.03

FORMATS: Tutorial | Seminar

GEOG 2800 Climate Change

CREDIT HOURS: 3

Most models of the atmosphere predict that increasing concentrations of greenhouse gases will continue to warm the surface of the earth and the oceans in the twenty-first century. The magnitude of the warming and its consequences are still very controversial. This class will discuss, mainly from a nonmathematical viewpoint, the reasons for the greenhouse effect, the current warming in the context of the historical record of climate change, and sources of natural climate variability such as the El Nino Southern Oscillation. It will also review arguments that attribute the warming that has occurred in the Twentieth century to natural variability, and those that attribute the warming to increased human emission of greenhouse gases.

CROSSLISTED: PHYC 2800.03 and OCEA 2800.03

EXCLUSIONS: ECON2850.06, PHYC2850.06

GEOG 3001 Landscape Ecology

CREDIT HOURS: 3

Landscapes reflect the interaction of natural and cultural processes. This course introduces the principles of ecology to landscape analysis. It explores relationships between environmental components in the landscape to inform community design and land use planning applications.

PREREQUISITES: PLAN 2001.03 or GEOG 2001.03 or permission of the instructor

CROSSLISTED: PLAN 3001.03

FORMATS: Lecture | Lab

GEOG 3002 Reading the City

CREDIT HOURS: 3

Any city reflects the history of its topography, cultural traditions, and design interventions. This course introduces the principles, theories, and methods of urban form analysis in the local urban context. Students explore the local urban environment to interpret what the city means, and how it comes to take the shape it does.

CROSSLISTED: PLAN 3002.03

FORMATS: Lecture | Lab

GEOG 3005 Cities and the Environment

CREDIT HOURS: 3

The contemporary landscape reflects a long history of human activities on the land and design and planning interventions through time. Civilizations rise and fall, often because of their degradation of the ecosystems that support them. This course examines the relationship of cities with the environment to enhance our understanding of landscape change, urban form and patterns in human settlements through the ages.

CROSSLISTED: PLAN 3005.03

FORMATS: Lecture | Seminar

GEOG 3006 Reading the Landscape

CREDIT HOURS: 3

Any landscape reflects its natural and cultural history. This course explores principles, theories, and methods of landscape interpretation. These approaches will be applied to community design problems in local landscapes.

PREREQUISITES: PLAN 3001.03, 3002.03, or GEOG 3001.03, 3002.03

CROSSLISTED: PLAN 3006.03

GEOG 3102 Coastal Change and Adaptation

CREDIT HOURS: 3

Human activities alter coastal environments directly and by influencing natural processes. We analyze the drivers of change and impacts on environment, economy and society. Mitigation and management strategies for sustainable adaptation are investigated. Lectures are integrated with student presentations, guest lectures and discussion of current coastal and marine research.

PREREQUISITES: Must be third year standing or above

CROSSLISTED: SUST 3102.03

EXCLUSIONS: SUST 3952.03 (winter 2016 and winter 2017)

GEOG 3106 The Canadian North

CREDIT HOURS: 3

This course introduces the Canadian North through an examination of the challenges faced by northern peoples. Emphasis is placed on the causes and consequences of global environmental change, and interactions with ecological processes and challenges for the human environment. Inuit perspectives of ecological knowledge will complement discussions on planning and development in a warming future. Principles of ecosystem management and emergent challenges for a sustainable future will also be addressed.

PREREQUISITES: Third year status or above, or permission of instructor.

CROSSLISTED: SUST 3106.03

EXCLUSIONS: SUST 3956.03 (offered in Winter 2019) ENVI 5106.03

FORMATS: Lecture

GEOG 3110 Migration and Development

CREDIT HOURS: 3

The purpose of this course is to explore and better understand the connections between migration and development in contemporary societies. Classes will introduce or further explore one main theme or issue, such as development-induced displacement, labour migration, and HIV/AIDS and migration. Each class will centre on one or more discussion questions, exchange insights from relevant experiences of class participants or focus on a case study

CROSSLISTED: INTD 3110.03

FORMATS: Lecture | Seminar

GEOG 3114 Environment and Development

CREDIT HOURS: 3

This course will examine the interconnections between the natural environment and different forms of social and economic development with a specific focus on developing countries. Various perspectives will be used to analyze the links between environmental issues and poverty, inequality, wealth, economic globalization and the ways in which different cultures understand and interact with the environment.

CROSSLISTED: INTD 3114.03

FORMATS: Lecture | Seminar

GEOG 3165 Peoples and Cultures of the World: Selected Area Studies

CREDIT HOURS: 3

This class examines a specific geographic and/or culture area. The class begins with background material on geography and history. Its focus is on the people themselves, their social organization and political, economic, and cultural systems. How they relate to globalization and development will also be examined.

Consult the Department to find which region is to be covered in a particular year. **Approved with International Development Studies.**

PREREQUISITES: SOSA 1000X/Y.06; 1050X/Y.06; 1100X/Y.06; 1200X/Y.06

CROSSLISTED: SOSA 3165.03

EXCLUSIONS: SOSA 2370.03

FORMATS: Lecture

GEOG 3210 Canadian Cultural Landscapes

CREDIT HOURS: 3

This course explores the origins of one "signature" landscape in each province. Contact with different geographies shaped distinctive regional histories; but at the same time, the story of each place is tied to the national narrative. These landscapes also illuminate how nature has been understood, used, and transformed since the fifteenth century.

CROSSLISTED: HIST 3210.03, CANA 3020.03

FORMATS: Lecture | Discussion

GEOG 3220 Coastal Communities in the North Atlantic

CREDIT HOURS: 3

Coastal communities as a social/ecological type are examined as populations, and social structures (territorial, economic, occupational, political) as they have developed in response to particular ecological and social circumstances. Various perspectives which have been applied to coastal communities are examined with regard to the contribution they may make to understanding the dynamics of these communities. The focus is on North Atlantic communities.

PREREQUISITES: One of SOSA 1000X/Y.06, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06

CROSSLISTED: SOSA 3220.03

FORMATS: Lecture

GEOG 3284 Living in Cities

CREDIT HOURS: 3

2008 marked the first time in history that more of the global population lived in cities than in rural areas. What perspectives to anthropology and sociology offer on cities and their inhabitants? This course explores the social dynamics that constitute 'the city' and surveys how social scientists have studied and engaged with cities and city-dwellers. It approached 'the city' both as a whole and through its constituent parts: people and places. Examples may be drawn from cities large and small, near and far - including Halifax.

PREREQUISITES: One of SOSA 1000.06, SOSA 1050.06, SOSA 1100.06 SOSA 1200.06 FYP or PLAN 2005.06

CROSSLISTED: SOSA 3284.03

FORMATS: Lecture | Seminar

GEOG 3302 Quaternary Sedimentary Environments

CREDIT HOURS: 3

The student is exposed to fluvial, alluvial, subglacial, glaciolacustrine, hillslope, eolian, coastal, shallow marine, rift, wedge top, retroarc, and foreland basin environments. Field trips and labs provide experience in methods used to distinguish the environments, including sedimentology, geomorphology, geochronology and thermochronology, and analysis of soils, cores, pebble fabrics, and section-scale non-petroleum sedimentary facies. Quaternary paleoclimatology and tectonic controls on weathering and deposition are discussed and debated.

PREREQUISITES: EARTH 2203.03

CROSSLISTED: EARTH 3302.03

FORMATS: Lecture | Lab

GEOG 3370 North American Landscapes

CREDIT HOURS: 3

Landscapes are the product of human culture ordering nature for economic, social, political, religious, recreational, and artistic purposes. Landscape history analyzes and interprets the use and design of such features as fields and woodlands, roads and waterways, settlements and buildings, towns and suburbs, and parks and cities. This class examines the use and meaning of the spatial environment among the various societies in North America from the sixteenth to the twentieth centuries. Among the topics are the meaning of area resources for indigenous peoples, the occupation and settlement of colonial populations, transportation and continental expansion, town planning, the politics of water and land in the West, preservation movements, scenic tourism, and the literary and artistic stylization of landscapes. The class welcomes non-history students with an interdisciplinary interest in issues regarding planning and design, cultural ecology, and the governance of resources.

CROSSLISTED: HIST 3370.03

FORMATS: Lecture | Discussion

GEOG 3400 Human Health and Sustainability

CREDIT HOURS: 3

This course examines the relationships between the health of populations and health determinants in the context of environmental sustainability. Weekly laboratory exercises will teach students how geomatics (GIS, GPS, and remote sensing technologies) and epidemiological tools can be used to assess the links between the health of human populations and the health of the environment, and how to use these tools for environmental health research.

PREREQUISITES: Must be a third year student or have permission of instructor

CROSSLISTED: ENVS 3400.03

FORMATS: Lecture | Lab

GEOG 3440 Geomorphology

CREDIT HOURS: 3

Geomorphology is the quantitative study of Earth's surface processes and landforms applies to geology, civil engineering, hydrogeology, and environmental management. We investigate slope stability, weathering and soils, sediment production, wind-driven and coastal environments, tectonic landforms, and river, glacial and permafrost processes.

PREREQUISITES: EARTH 1080.03 (or SCIE 1506.09/SCIE 1507.09) and (EARTH 1090.03 or EARTH 1091.03); OR completion of (or concurrent enrolment in) a 1000-level mathematics class, a 1000-level physics class, a 1000-level chemistry class AND permission of instructor

CROSSLISTED: EARTH 3440.03

FORMATS: Lecture | Lab

GEOG 3500 Exploring Geographic Information Systems

CREDIT HOURS: 3

Geographic Information Systems (GIS), as a tool for the management of georeferenced data, have become indispensable for disciplines where location of objects and pattern of processes is important. GIS plays a fundamental role for a wide range of applications, from modeling, to analysis and predictions, to decision making. The class is designed for a broad base of potential users and draws on examples of the role of GIS in global climate change, mineral exploration, preservation of biodiversity, coastal zone management, resource depletion, and many other present and future environmental issues. The course material will be of interest to those studying geoscience, environmental science, ecology, marine biology, oceanography, epidemiology, urban and rural planning, civil engineering, and any other field involving spatial data. Laboratory exercises emphasize the principles of raster and vector GIS, and the integration of databases and GPS (global positioning systems) data into GIS. Exercises draw on the diversity of GIS applications in a number of topical areas.

PREREQUISITES: Two years of university study or equivalent or instructor's permission

CROSSLISTED: EARTH 3500, EARTH 5600, ENVS 3500

EXCLUSIONS: Credit will only be given for one of GEOG 3500, SCIE 3600, EARTH 3500, EARTH 5600, ENVS 3500

FORMATS: Lecture | Lab

GEOG 3633 Spatial Information and GIS in Ecology

CREDIT HOURS: 3

A hands-on approach to understanding and using spatial information, this course introduces students to Geographic Information Systems (GIS) as a tool to answer ecological questions. Together, students conduct a major field project, collecting data, creating maps using GIS, and interpreting spatial patterns, to address an applied problem in ecology.

CALENDAR NOTES: Offered in the summer through SEASIDE. an auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.

PREREQUISITES: BIOL 2060.03

CROSSLISTED: ENVS 3633.03, BIOL 3633.03

GEOG 3700 Earth Resources, Sustainability, and Society

CREDIT HOURS: 3

This course addresses the question: What do we need to know and understand about the nature and distribution of geologic resources to optimally reconcile mineral extraction with society's needs, considerations of the environment, and the sustainable development goals in a more sustainable, geoethical, and balanced approach, through the 21st century.

CALENDAR NOTES: Aimed as an elective course for majors in Earth Sciences and in Environmental Sciences. Must be third year students.

PREREQUISITES: EARTH 1080

CROSSLISTED: EARTH 3700 ENVS 3700

RESTRICTIONS: E1 and E2

FORMATS: Lecture | Seminar | Discussion | Other (explain in comments)

GEOG 4520 GIS Applications to Environmental and Geological Sciences

CREDIT HOURS: 3

Geographic information systems (GIS) provide a rich set of new tools to the geologist and environmental scientist, not only to solve conventional problems, but also to explore transdisciplinary questions not readily answered by other means. This class builds on the fundamentals of GIS taught in EARTH 3500.03 to explore analytical tools that aid in decision-making processes encountered in mineral exploration, hydrogeology, site selection, environmental assessment, and global change analysis. The class concentrates on case studies and problem solving, including those requiring multi-criteria and multi-objective decision making processes.

PREREQUISITES: GEOG 3500.03, ENVS 3500, EARTH 3500.03; EARTH 5600, or SCIE 3600.03; STAT 1060.03

CROSSLISTED: EARTH 4520.03

FORMATS: Lecture | Lab

GEOG 4530 Environmental Remote Sensing

CREDIT HOURS: 3

The goal of this class is to introduce students to the role of remote sensing as a technique provide environmental and geologic information. Particular emphasis will be placed on examining the potential and limitations of remote sensing methods and data in this context. The lectures discuss the fundamentals of remote sensing with an emphasis on optical multispectral satellite systems. In the lab, students use computerized techniques of digital image enhancement and thematic information extraction to process images derived from a range of remote-sensing systems. The integration of remote-sensing information with GIS (Geographic Information Systems) is stressed in both the labs and lectures.

PREREQUISITES: EARTH 3500.03, ENVS 3500.03, or EARTH 5600.03 or SCIE 3600.03 or GEOG 3500.03

CROSSLISTED: EARTH 4530.03

FORMATS: Lecture | Lab

GEOG 4850 Geographic Information Science Research Project

CREDIT HOURS: 3

Students learn how to design, manage and complete a research project in Geographic Information Science (GIS). Projects must include a substantive analytical component where GIS is central to methods employed. Evaluation includes a written report, oral presentation and digital data. Required for completion of the Certificate in GIS.

COREQUISITES: EARTH 5420.03/GEOG 4520.03/ERTH 4520.03

PREREQUISITES: ENV 3500.03/ERTH 3500.03/GEOG 3500.03

CROSSLISTED: BIOL 4850.03, ENV 4850.03, SCIE 4850.03, EARTH 4850.03

EXCLUSIONS: Restricted to 3rd and 4th year students

FORMATS: Lecture

Humanistic Studies in Science

Attention is drawn to the following courses, offered in several departments. All of these courses are concerned with the humanistic aspects of scientific thought and its development. For complete course descriptions please consult the appropriate department listing in this calendar.

NOTE: Not all courses are offered every year. Please consult the current timetable for this year's offerings.

History of the Sciences

- BIOL 3503.06, HSTC 2200.06, SCIE 2000.06: Introduction to the History of Science
- BIOL 4664.03/OCEA 4331.03/SCIE 4001.03/HIST 3073.03/HSTC 3331.03: History of Marine Sciences

Philosophy of the Sciences

- PHIL 3420.03, BIOL 3580.03: Philosophy of Biology
- PHIL 2560.03: Minds & Machines: Introduction to cognitive Science
- PHIL 2660.03 Logic: Understanding Scientific Reasoning
- BIOL 3601.03: Nature Conservation
- PHIL 2130.03: Logic
- PHIL 3051.03: Epistemology
- PHIL 3670.03: Philosophy of Science

Integrated Science Program

Location:

Life Sciences Centre

Phone Number: (902) 494-2765

Fax Number: (902) 494-1123

Email Address: disp@dal.ca

Website: disp.science.dal.ca

Introduction

Dalhousie's Integrated Science Program is a unique and engaging way for a serious and well-prepared student to complete the first year of a BSc degree. In addition to learning the core material of several first-year science subjects, students gain an interdisciplinary perspective, develop transferrable skills, and conduct research, all in their first year. The goals of the program are:

1. To engage students in the process of scientific inquiry with hands-on experience in scientific research skills.
2. To provide a strong academic background for second-year courses in the subjects covered by the program.
3. To identify links among the science disciplines.
4. To learn effective team skills.

5. To explore the relevance of science for society at large.

The Integrated Science program exposes first year students to a broad range of science disciplines in an integrated manner, and provides a strong foundation for most BSc programs. Students learn from a team of instructors with expertise in particular subject areas, who also highlight the natural links among disciplines. Integrated Science students are members of a small cohort (maximum 80) who take the majority of their lectures, labs and field trips together.

The Integrated Science program has a strong emphasis on research-relevant training. Students study experimental design, collect and analyze data in the laboratory and during field trips, work on communication skills, including scientific writing, and are introduced to some of the ethical questions that arise in the practice of science. In the winter term, students undertake an independent research project under the supervision of a Dalhousie-affiliated researcher, which culminates in a presentation at a conference-style event.

Integrated Science consists of a core program taken only by IS students, and auxiliary courses taken together with other first year BSc students. The core program covers Biology, Psychology, Earth Sciences, Statistics, and Ethics in Science. Auxiliary courses include Chemistry, Math and Physics (optional). Exposure to multiple science disciplines can also be helpful for students who are unsure which subjects interest them most, and early training in research is especially valuable for those considering an Honours program. Integrated Science is also excellent preparation for professional graduate programs, such as Law or Medicine.

Integrated Science candidates should be highly-motivated, have a strong interest in science, and be willing to think across discipline boundaries. They should be enthusiastic about being part of a small cohort of students intent on learning how to work and think like scientists; they should want to learn to be cooperative and effective team members; they should have good study, work, and time-management skills; and they should welcome the challenge to work hard, to think critically, and to solve problems.

Students wishing to enter this program normally must have a minimum Grade 12 average of 80%, with a minimum of 80% in Mathematics and 70% English, and a minimum of 75% in two of Grade 12 Chemistry, Biology or Physics. The average high school mark of incoming Integrated Science students is around 90%. Students must be accepted to the Integrated Science Program as well as be accepted to the BSc at Dalhousie University.

Choosing an Integrated Science Option

Integrated Science is a full-time, first-year program designed to prepare BSc students for second year courses in multiple science programs. The IS program emphasizes the connections among the different science disciplines, and provides students with research training and experience. Students take the core program as a cohort (max 80 students).

The core consists of two 9-credit-hour courses, Integrated Science I (SCIE 1506.09), and Integrated Science II (SCIE 1507.09), as well as Ethics in Science (PHIL 1050.03). In the fall, students have lectures, laboratories and field trips in Biology, Psychology and Statistics, and receive training in research skills (experimental design, analysis, scientific writing). The winter term consists of lectures and laboratories in Biology, Psychology and Earth Sciences, and students conduct a 10-week independent research project in a Dalhousie or Dalhousie-affiliated research lab. Students present the results of their research at a conference-style event.

Integrated Science I and II are equivalent to two terms of Biology and Psychology, and one term of Earth Sciences and Statistics. Together with PHIL 1050: Ethics in Science, the core fulfills the writing requirement for BSc students.

Students also register for several auxiliary or co-requisite courses; these are taken along with other BSc students, typically in larger classes. Students take a full year of Chemistry (CHEM 1011.03/CHEM 1012.03) and a half year of Calculus (MATH 1000.03 or MATH 1215.03). Students have the option to enroll in a second term of Calculus (MATH 1010.03) and to take Physics (full year or half year). See co-requisite details below:

Fall term* co-requisite courses taken at the same time as Integrated Science I (SCIE 1506.09)

Required:

1. Ethics in Science (PHIL 1050.03)
2. Concepts in Chemistry: Structure and Reactivity (CHEM 1011.03)
3. Differential and Integral Calculus I (MATH 1000.03) **OR** Life Sciences Calculus (MATH 1215.03)

Optional:

1. Introduction to Physics I (PHYC 1190.03) **OR** Physics in and Around You I (PHYC 1310.03)

Winter term co-requisite courses taken at the same time as Integrated Science II (SCIE 1507.09)**

Required:

1. Concepts in Chemistry: Energy and Equilibrium (CHEM 1012.03)

Optional:

1. Differential and Integral Calculus II (MATH 1010.03).
2. Introduction to Physics II (PHYC 1290.03) **OR** Physics in and Around You II (PHYC 1320.03)

**In the fall term Integrated Science students take a course overload with 18-21 credit hours (21 credit hours if Physics is included). 15 credit hours is a full course load for regular BSc students. Students enrolling in 21 credit hours can expect a significantly heavier work load. Students planning to take only one term of calculus have the option of taking MATH 1000.03 in the winter to lighten their fall course load.*

***In the winter term, Integrated Science students may take an overload (18 credit hours), a regular full course load (15 credit hours,) or a lighter course load of 12 credit hours (if they choose not to take MATH or PHYSICS in winter).*

Choice of Math and Physics courses

Prior to selecting Math or Physics courses please consult the course descriptions in the Dalhousie Academic Calendar.

- PHYC 1190/PHYC 1290 is designed for students in Physical Sciences and Engineering, and PHYC 1310/ PHYC 1320 is designed for students in Life Sciences.
- MATH 1000 should be taken by students interested in math, economics or the physical sciences, while MATH 1215 is designed for life sciences students.
- One calculus course (MATH 1000.03 or MATH 1215.03) together with SCIE 1506.09 (Statistics) satisfies the full math requirement for BSc students. Students who do not require MATH 1010 for their programs have the option to take only one calculus course.

BSc Programs	First year Math courses	First year Physics courses
Actuarial Science	MATH 1000/MATH 1010	
Biochemistry & Molecular Biology	MATH 1000 (or MATH 1215) MATH1010 (recommended)	
Biology	MATH 1215 (or MATH1000)

Psychology	MATH 1215 (or MATH 1000)	
Statistics	MATH 1000/MATH 1010	

* *Physics is required for all Earth Science Honours programs. PHYC 1190/PHYC 1290 is recommended, as PHYC 1310/PHYC 1320 may not be recognized for PGeo (Professional Geologist) certification. Physics is not required for Earth Sciences Major programs.*

** *Marine Biology students who wish to include 2nd year courses in Ocean Sciences (other than OCEA 2001/OCEA 2002: The Blue Planet) in their programs should take PHYC 1310/PHYC 1320 (or PHYC 1190/PHYC 1290).*

BSc degree requirements and the Integrated Science program

The Integrated Science program core satisfies the Writing requirement, the Social Science and Science subject requirements, and with MATH 1000 or MATH 1215, the Math requirement for BSc students at Dalhousie. It satisfies *half* of the Humanities/Language requirement; another Humanities or Language course is needed before graduation.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses so designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

Course Descriptions

SCIE 1506 Integrated Science I

CREDIT HOURS: 9

This course comprises the first half of the Integrated Science Program, a challenging first year option for BSc students interested in exploring connections among science disciplines. SCIE 1506 consists of lectures, laboratories, and field trips in Biology, Psychology and Statistics, as well as integrated lectures and

workshops that cut across disciplines. It also has an interdisciplinary Writing in Science component that prepares students for research projects in SCIE 1507. Together, SCIE 1506 and SCIE 1507 provide comprehensive first-year preparation for major or honours degrees in science. Students in Integrated Science I must also register for CHEM 1011.03 and PHIL 1050.03 (Ethics in Science). Registration in PHYC 1190.03 or PHYC 1310.03 is recommended for students considering programs that require Physics. For calculus, students register in MATH 1000.03 (fall or winter) or MATH 1215.03 (fall or winter). Students taking MATH 1010.03 in fall term have the option to additionally take MATH 1010.03 in winter term.

CALENDAR NOTES: SCIE 1506 and SCIE 1507 are to be taken in consecutive terms. Both must be completed to receive credit for the Writing in Science component (equivalent to SCIE 1111.03).

COREQUISITES: PHIL 1050.03, CHEM 1011.03

RESTRICTIONS: Registration is restricted to Integrated Science students.

EXCLUSIONS: BIOL 1011.03, BIOL 1021.03, PSYO 1011.03, STAT 1060.03

FORMATS: Lecture | Lab

SCIE 1507 Integrated Science II

CREDIT HOURS: 9

This course comprises the second half of the Integrated Science Program, a challenging first year option for BSc students interested in exploring connections among science disciplines. SCIE 1507 consists of lectures, laboratories, and field trips in Biology, Psychology and Earth Sciences, as well as integrated lectures and workshops that cut across disciplines. The Writing in Science component, continued from Integrated Science I, includes a 10-week research project in which students apply the research design concepts and statistical analyses covered in Integrated Science I. Together, SCIE 1506 and SCIE 1507 provide comprehensive first-year preparation for major or honours degrees in science. Students in Integrated Science II must also register for CHEM 1012.03. Registration in MATH 1010.03 and in one of PHYC 1290.03 or PHYC 1320.03 is recommended for students considering programs with those requirements. For calculus, students must register in either MATH 1000 (fall or winter) or MATH 1215 (fall or winter).

CALENDAR NOTES: SCIE 1506 and SCIE 1507 are to be taken in consecutive terms. Both must be completed to receive credit for the Writing in Science component (equivalent to SCIE 1111.03).

COREQUISITES: CHEM 1012.03

PREREQUISITES: SCIE 1506.09, CHEM 1011.03, PHIL 1050.03

RESTRICTIONS: Registration is restricted to Integrated Science students

EXCLUSIONS: BIOL 1010.03, BIOL 1020.03, PSYO 1012.03, EARTH 1080.03, SCIE 1111.03

FORMATS: Lecture | Lab

Introduction

The Marine Biology Program offers students the opportunity to study and experience marine life, from the tiny plankton that drive ocean ecosystems to the sharks and marine mammals at the top of the food chain. In the first two years of the program, Marine Biology students obtain a basic grounding in Biology and start to learn the basics of how the ocean works. They then use their third and fourth years to study in greater depth the diversity, physiology, ecology, and evolution of marine animals and plants. Many students combine their studies of marine biology with courses in the chemistry or physics of the ocean. Marine Biology students are offered a Co-op option, where three work terms in industry, government or university laboratories, or ecotourism are included within the program.

The Biology department is located adjacent to the sea in the Life Sciences Centre. All eight floors have running sea water, and we have a 15m pool tank and a 10m deep tower tank. Within a 30 km radius there are salt marshes, rocky shores, estuaries, and sand beaches for field work.

Our students have many opportunities to participate in marine-related research; examples can be viewed on our website. "Ocean studies" is an area of special emphasis for Dalhousie University, and thus many faculty members have active research programs in marine science. In addition, many marine scientists at local research institutions, including the Bedford Institute of Oceanography and the Institute for Marine Biosciences serve as supervisors for our Honours students.

An undergraduate major in Marine Biology at Dalhousie qualifies you for technical positions in places like government fisheries laboratories, aquaculture farms, and consulting firms. In the Marine Biology program's summer field courses or in the honours research courses, you'll get plenty of hands-on opportunities to explore the ocean—preparing you for the exciting challenges of diverse marine-related careers.

Degree Programs

The Department of Biology offers the following degree programs in Marine Biology

- BSc (120 credit hour) Honours (Concentrated)*
- BSc (120 credit hour) Combined Honours*
- BSc (120 credit hour) Major*
- BSc (120 credit hour) Double Major*
- Minor in Marine Biology

* BSc [Co-op option available](#)

* May be combined with Minor programs from other disciplines

Departmental requirements for each degree program can be seen by following the links in the menu at the right.

In addition to departmental requirements, students must satisfy the requirements outlined in the [Academic Regulations](#) and the [College of Arts and Science Degree Requirements](#) sections.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Student applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with a Marine Biology undergraduate academic advisor.

Prospective Marine Biology students should be aware that to advance to the second year Biology courses in the Marine Biology program, they must achieve at least a C grade in the prerequisite first year Biology courses. Students with exceptional extenuating circumstances may appeal this requirement to the Biology Undergraduate Curriculum Committee. Students should go to the Biology Main Office for further details.

Staff

Dean

Macdonald, C.L.B., BSc (Hons), PhD (Dalhousie), Professor (Chemistry)

Undergraduate Program Co-ordinator

Program Advisors

For Marine Biology program advising, please email biology.advising@dal.ca and indicate whether you are interested in Majors or Honours advising.

BSc or BA (120 credit hour) Concentrated Honours in Marine Biology

Students who want a challenging program resulting in a broad background in Marine Biology, including an independent research experience may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours.

To graduate with Honours, students must complete a minimum of 54 credit hours with a grade of C or better above the 1000 level in Marine Biology/Biology. A minimum B+ average (GPA of 3.3), with no grade less than C, is required in the Core Biology and Core Marine Biology courses. Students must also have a cumulative B average (GPA of 3.0) in courses in the honours subject at the time of graduation. Students write a research-based Honours thesis. The Honours Qualifying Examination requirement is satisfied through completion of MARI 4901.03 AND MARI 4902.03.

A Science Co-op option is available for students enrolled in a BSc Concentrated Honours in Marine Biology. See [Co-operative Education Program](#).

Admission to Honours

Students must apply for admission to Honours programs. Students considering Honours should consult with a Marine Biology Honours Advisor early in their studies. To be admitted, students must:

- Have a minimum B+ average (GPA of 3.3) in Core Biology and Core Marine Biology courses with no grade less than C. A maximum of two of these core courses may be repeated once to achieve this requirement.
- Have a minimum B average (GPA of 3.0) across all courses in the honours subject.
- Identify and gain the support of a thesis supervisor during their third year of studies (see Honours webpage for supervisor eligibility)
- With the supervisor's input, draft and submit a thesis proposal to the Honours Committee no later than May 15th of their third year of studies. See Honours webpage for thesis proposal guidelines, and admission procedures for Honours Co-op students.

Marine Biology/Biology Honours webpage <https://www.dal.ca/faculty/science/biology/honours.html>

Course Requirements

In addition to fulfilling the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections, students in a Concentrated Honours program in Marine Biology must complete the following courses:

1000 level

- BIOL 1010.03: Principles of Biology Part I (or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- BIOL 1011.03: Principles of Biology Part II (or BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences (or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus or MATH 1030.03: Matrix Theory and Linear Algebra 1
- CHEM 1011.03: Concepts of Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium

Note: Marine Biology students wishing to incorporate **Ocean Sciences** into their program should include MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus and PHYC 1190.03/PHYC 1290.03 Introduction to Physics (or PHYC 1310.03/PHYC 1320.03 or PHYC 1300.06 Physics in & Around You)

2000 level

Core Biology courses

- BIOL 2003.03: Animal Diversity
- BIOL 2004.03: Diversity of Plants and Microorganisms
- BIOL 2020.03: Cell Biology
- BIOL 2030.03: Genetics and Molecular Biology
- BIOL 2040.03: Evolution
- BIOL 2060.03: Introductory Ecology

Other required courses

- OCEA 2000.06: The Blue Planet or OCEA 2001.03: The Blue Planet I and OCEA 2002.03: The Blue Planet II
- MATH 2080.03/STAT 2080.03: Statistical Methods for Data Analysis and Inference

3000/4000 level

Core Biology/Core Marine Biology Courses

- BIOL 3101/MARI 3101 OR BIOL 3761/MARI 3761

Students must choose **15** credit hours from any of the following courses:

- BIOL 3042/MARI 3042 Molecular Ecology
- BIOL 3063/MARI 3063 Resource Ecology
- MARI 3074 Physiology of Marine Animals Part I
- MARI 3076 Physiology of Marine Animals Part II
- BIOL 3080/MARI 3080 The Ecology and Evolution of Fishes
- MARI 3090 Marine Mammalogy OR BIOL 3626/MARI 3626 Field Studies of Marine Mammals
- BIOL 3101/MARI 3101 Microbial Ecology
- BIOL 3221/MARI 3221 Diversity of Algae
- BIOL 3301/MARI 3301 Invertebrate Biology
- MARI 3602 Introduction to Aquaculture
- BIOL 3761/MARI 3761 Marine Ecology
- MARI 4350 Cutting Edge in Marine Science
- MARI 4665 Hacking the Blue Planet
- Any two MARI SEASIDE course
- Any two OCEA course cross-listed as MARI

In addition, students must complete an Honours Thesis:

- MARI 4901.03: Honours Research and Thesis I and MARI 4902.03: Honours Research and Thesis II

In addition, students must complete at least another **12** credits hours in MARI or MARI-Equivalent courses to achieve the minimum of 54 credit hours in their honours subject above the 1000 level. This may include additional SEASIDE courses or any courses cross-listed as MARI.

BSc or BA (120 credit hour) Combined Honours in Marine Biology and another subject

Students who wish to study Marine Biology in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science (other than Biology), the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Marine Biology may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject. Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. Students must have their program of study approved by Academic Advisors in both subject areas.

To graduate with Honours, students must complete a minimum of 36 credit hours above the 1000 level in Marine Biology/Biology, whether Marine Biology is the primary or the secondary subject. A minimum B+ average (GPA of 3.3), with no grade less than C, is required in the Core Biology/Core Marine Biology courses. Students must also have a cumulative B average (GPA of 3.0) in courses in the honours subject at the time of graduation. Students write a research-based Honours thesis and complete an Honours Qualifying Examination in their primary subject area. For Marine Biology, this requirement is satisfied through MARI 4901.03/MARI 4902.03.

A Co-op option is available for students enrolled in a BSc Combined Honours in Marine Biology. See [Co-operative Education Program](#).

Admission to Honours

Students must apply for admission to Honours programs. Students considering Honours should consult with a Marine Biology Honours Advisor early in their studies. To be admitted, students must:

- Have a minimum B+ average (GPA of 3.3) in Core Biology/Core Marine Biology courses with no grade less than C. A maximum of two of these core courses may be repeated once to achieve this requirement.
- Have a minimum B average (GPA of 3.0) across all courses in the honours subject.
- If Marine Biology is to be the primary subject area, students must
 - Identify and gain the support of a thesis supervisor during their third year of studies (see Honours webpage for supervisor eligibility)
 - With the supervisor's input, draft and submit a thesis proposal to the Honours Committee preferably no later than May 15th of their third year of studies. See Honours webpage for thesis proposal guidelines, and admission procedures for Honours Co-op students.

Course Requirements

In addition to fulfilling the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections, students in a Combined Honours program in Marine Biology and another subject must complete the following:

1000 level

- BIOL 1010.03: Principles of Biology Part I (or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- BIOL 1011.03: Principles of Biology Part II (or BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus or MATH 1030.03: Matrix Theory and Linear Algebra 1
- CHEM 1011.03: Concepts of Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium

Note: Marine Biology students wishing to incorporate **Ocean Sciences** into their program should include MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus and PHYC 1190.03/PHYC 1290.03 Introduction to Physics (or PHYC 1310.03/PHYC 1320.03 or PHYC 1300.06 Physics in & Around You)

2000 level

Core Biology courses

- BIOL 2003.03: Animal Diversity
- BIOL 2004.03: Diversity of Plants and Microorganisms
- BIOL 2020.03: Cell Biology
- BIOL 2030.03: Genetics and Molecular Biology
- BIOL 2040.03: Evolution
- BIOL 2060.03: Introductory Ecology

Other recommended courses

- OCEA 2000.06: The Blue Planet or OCEA 2001.03: The Blue Planet I and OCEA 2002.03: The Blue Planet II
- MATH 2080.03/STAT 2080.03: Statistical Methods for Data Analysis and Inference

3000 and 4000 levels

Core Biology/Core Marine Biology Courses

- BIOL 3101/MARI 3101 OR BIOL 3761/MARI 3761

If Marine Biology is the primary subject, students must choose an additional **9** credit hours from any of the following courses. If Marine Biology is the secondary subject, you must choose an additional **15** credit hours from any of the following courses:

- BIOL 3042/MARI 3042 Molecular Ecology
- BIOL 3063/MARI 3063 Resource Ecology
- MARI 3074 Physiology of Marine Animals Part I
- MARI 3076 Physiology of Marine Animals Part II
- BIOL 3080/MARI 3080 The Ecology and Evolution of Fishes
- MARI 3090 Marine Mammalogy OR BIOL 3626/MARI 3626 Field Studies of Marine Mammals
- BIOL 3101/MARI 3101 Microbial Ecology
- BIOL 3221/MARI 3221 Diversity of Algae
- BIOL 3301/MARI 3301 Invertebrate Biology
- MARI 3602 Introduction to Aquaculture
- BIOL 3761/MARI 3761 Marine Ecology
- MARI 4350 Cutting Edge in Marine Science

- MARI 4665 Hacking the Blue Planet
- Any two MARI SEASIDE courses
- Any two OCEA courses cross-listed as MARI

If Marine Biology is the primary subject, students will also complete

- MARI 4901.03: Honours Research and Thesis I and MARI 4902.03: Honours Research and Thesis II

BSc or BA (120 credit hour) Major in Marine Biology

The 120 credit hour Major is suited to students who want to focus on Marine Biology, but wish to have a program that is more flexible than the Honours program. It provides a four-year survey of Marine Biology, and is designed for students not anticipating subsequent experimental graduate-level training in Marine Biology or related disciplines. Marine Biology Majors complete a minimum of 42 credit hours in Marine Biology courses above the 1000 level and do not have thesis (or related) requirements. Research and other experiential learning opportunities are available through laboratories, independent research courses, special topics courses and experiential learning courses. Students should plan their programs carefully and obtain advice from an academic advisor in the Biology Department.

A Science Co-op option is available for students enrolled in a Major program in Marine Biology. See [Co-operative Education Program](#).

Course Requirements

In addition to fulfilling the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections, students in a Major program in Marine Biology must complete the following courses:

1000 level

- BIOL 1010.03: Principles of Biology Part I (or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II)
- BIOL 1011.03: Principles of Biology Part II (or BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences (or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus or MATH 1030.03: Matrix Theory and Linear Algebra I
- CHEM 1011.03: Concepts of Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium

Note: Marine Biology students wishing to incorporate **Ocean Sciences** into their program should include MATH 1000.03: Differential and Integral Calculus I (or MATH 1215.03: Life Sciences Calculus) and PHYC 1190 and PHYC 1290.03 Introduction to Physics (or PHYC 1310.03 and PHYC 1320.03 or PHYC 1300.06 Physics in & Around You)

2000 level

- BIOL 2003.03: Animal Diversity
- BIOL 2004.03: Diversity of Plants and Microorganisms
- BIOL 2020.03: Cell Biology
- BIOL 2030.03: Genetics and Molecular Biology
- BIOL 2040.03: Evolution
- BIOL 2060.03: Introductory Ecology
- OCEA 2000.06: The Blue Planet or OCEA 2001.03: The Blue Planet I and OCEA 2002.03: The Blue Planet II

3000/4000 level

- A minimum of 24 credit hours, of which at least 3 credit hours must be at the 4000 level, of Marine Biology (MARI) or MARI-equivalent courses. This may include any MARI SEASIDE courses or any courses cross-listed as MARI.

BSc or BA (120 credit hour) Double Major in Marine Biology and another subject

BSc or BA (120 credit hour) Double Major in Marine Biology and another subject

The Double Major degree program allows students to combine a study of Marine Biology with another subject. The other subject may be any discipline from the Faculty of Science (other than Biology), the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Marine Biology may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

Regardless of whether Marine Biology is the primary or secondary subject, the Biology departmental requirements are the same (see below). Students must complete a minimum of 33 credit hours in Marine Biology/Biology courses above the 1000 level. It is recommended that students enrolled in a Double Major program consult with advisors in both subject areas.

A Science Co-op option is available for students enrolled in a Double Major with Marine Biology as the primary subject. See [Co-operative Education Program](#).

Course Requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Double Major program in Marine Biology and another subject must complete the following:

1000 level

- BIOL 1010.03: Principles of Biology Part I (or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- BIOL 1011.03: Principles of Biology Part II (or BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences (or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus or MATH 1030.03: Matrix Theory and Linear Algebra I
- CHEM 1011.03: Concepts of Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium

Note: Marine Biology students wishing to incorporate **Ocean Sciences** into their program should include MATH 1000.03: Differential and Integral Calculus I (or MATH 1215.03: Life Sciences Calculus) and PHYC 1190 and PHYC 1290.03 Introduction to Physics (or PHYC 1310.03 and PHYC 1320.03 or PHYC 1300.06 Physics in & Around You)

2000 level

- BIOL 2003.03: Animal Diversity
- BIOL 2020.03: Cell Biology
- BIOL 2030.03: Genetics and Molecular Biology
- BIOL 2040.03: Evolution
- BIOL 2060.03: Introductory Ecology

3000/4000 level

- A minimum of **18** credit hours of Marine Biology (MARI) or MARI-equivalent courses at or above the 3000 level whether Marine Biology is the primary or secondary subject. This may include any MARI SEASIDE courses or any courses cross-listed as MARI.

Please note that a double major in Biology and Marine Biology is not offered.

Minor in Marine Biology

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Science) program.

Requirements

- A minimum of 18 to a maximum of 36 credit hours in Marine Biology (MARI) courses at the 2000 level or higher. A maximum of 6 credit hours may be MARI-equivalent.

Contact [Marine Biology](#) for more information.

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Co-operative Education Program (Science Co-op) in Marine Biology

Co-op Academic Advisor: Dr. N McAllister-Irwin (nancy.mcallister-irwin@dal.ca)

Science Co-op is a program where academic study in a science subject is combined with paid career-related work experience. Students undertake three work-terms interspersed with their academic study terms. Science Co-op degree programs enable students to apply their knowledge directly while providing them with work experience that assists in making educated career choices.

Science Co-op is available to students in **BSc (120 credit hour) Honours or Major programs** in Marine Biology, or in Combined Honours or Double Major programs with Marine Biology as the primary subject. The number of students admitted into Science Co-op each year is limited. A minimum GPA of 3.00 is required for admission and for continuation in the Co-op program. For entry into Marine Biology Co-op, a minimum grade of B+ in BIOL 1010.03 is required. Students must be eligible to work in Canada.

Students normally apply to join Science Co-op during their first year of study, but application during the second year of study is possible. Students must apply before April 15, and it is recommended that interested students meet contact their Departmental Co-op advisor early in the Winter term of their first year. If accepted into Science Co-op, students must register for, and attend the Science Co-op Seminar Series (SCIE 2800.00) at least four months prior to the first work term.

Details are available from the Marine Biology/Co-op Academic Advisor and from the Co-operative Education office www.dal.ca/academics/cooperative_education.html. For more information on Co-op Education in Marine Biology, please see the Departmental webpage www.dal.ca/academics/programs/undergraduate/marinebio/what_will_I_learn/coop_work_terms.html

Minors available to students in Marine Biology

Minor programs allow students to develop subject specialties in addition to their major or honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs (including Science Co-op).

Students in a BSc (120 credit hour) program in Marine Biology may choose to include a Minor selected from the [list of approved Minors](#). Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc in Marine Biology, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of [Faculty of Science Certificates](#) and requirements can be found at the beginning of the [Faculty of Science](#) section. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the [College of Arts and Science Degree Requirements](#) section.

Certificates of particular interest to student enrolled in a BSc in Marine Biology include:

- [Certificate in Animal Behaviour](#)
- [Certificate in Aquaculture and the Environment](#)
- [Certificate in Environmental Impact Assessment](#)
- [Certificate in Genetics](#)
- [Certificate in Geographic Information Science](#)

- [Certificate in Science Leadership and Communication](#)

MARI-Equivalent Courses

The following courses given by other departments may be taken as a Marine Biology course toward a BA, BSc and BSc (Honours) Marine Biology degrees.

Please note that MARI-equivalent courses will not count towards a minor program in Marine Biology.

Any course cross-listed as a MARI course

Aquaculture (AQUA)

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

Course Notes

The normal entry requirement for upper level courses in Biology and Marine Biology is a grade of C or better in BOTH terms of first year Biology or in SCIE 1506.09 and SCIE 1507.09. Students with extenuating circumstances may appeal to the departmental Undergraduate curriculum committee. Students should go to the Biology Main Office for further details.

Course Descriptions

MARI 3003 Introduction to Field Oceanography

CREDIT HOURS: 3

See course description for OCEA 3003.03 in the Oceanography section of the calendar.

MARI 3042 Molecular Ecology

CREDIT HOURS: 3

We survey techniques of molecular genetic analysis and consider how they can be used to identify species, populations, sexes, individuals and family relationships, and study population attributes such as historical dispersal, contemporary connectivity, mating behaviour and effective population size. Evaluation is based on assignments, a test and a final exam.

PREREQUISITES: A grade of B- or better in each of BIOL 2030.03 (or GENE 2000.03), BIOL 2040.03, and BIOL 2060.03

CROSSLISTED: BIOL 3042.03

EXCLUSIONS: BIOL 4042.03

FORMATS: Lecture

MARI 3063 Resource Ecology

CREDIT HOURS: 3

This course considers the ecology, utilization, and management of natural resources in fisheries, wildlife and forest management, agriculture and aquaculture. Topics include population dynamics, community interactions, and ecosystem support of resources as well as the history of resource utilization, practices of controlling production, pests, and predators, and sustainable management strategies.

PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03), MATH 1000.03 (or MATH 1215.03 or SCIE 15xx), STAT 1060.03 (or SCIE 15xx)

CROSSLISTED: BIOL 3063.03

FORMATS: Lecture | Tutorial

MARI 3074 Physiology of Marine Animals, Part I

CREDIT HOURS: 3

Animals in a marine environment are quite different from those found in air or fresh water, but the “physiological principles” are similar. This course deals with the same principles as BIOL 3078, but emphasizes the special characteristics of marine animals and the techniques necessary to study them in laboratories. Note: Students must complete MARI 3074.03 before MARI 3076.03

PREREQUISITES: BIOL 2003.03 and BIOL 2020.03 (or BIOA 2001.03)

CROSSLISTED: BIOL 3078.03

FORMATS: Lecture | Lab

MARI 3076 Physiology of Marine Animals Part II

CREDIT HOURS: 3

Animals in a marine environment are quite different from those found in air or fresh water, but the “physiological principles” are similar. This course deals with the same principles as BIOL 3079, but emphasizes the special characteristics of marine animals and the techniques necessary to study them in laboratories.

PREREQUISITES: MARI 3074.03 OR BIOL 3078.03

CROSSLISTED: BIOL 3079.03

RESTRICTIONS: BIOA 3005.03

FORMATS: Lecture | Lab

MARI 3080 The Ecology and Evolution of Fishes

CREDIT HOURS: 3

The course examines selected topics on the ecology and evolution of marine and freshwater fishes. Topics include: phylogeny and systematics; functional morphology and physiology; population biology; life-history evolution; behavior; fisheries science; and conservation biology.

PREREQUISITES: A cumulative GPA of 2.7 (B-) or better in BIOL 2003.03, BIOL 2040.03, BIOL 2060.03 (or BIOA 3001.03)

CROSSLISTED: BIOL 3080.03

EXCLUSIONS: BIOL 3067.03, MARI 3067.03, BIOL 5067.03

FORMATS: Lecture

MARI 3090 Marine Mammalogy

CREDIT HOURS: 3

This course examines the characteristics of marine mammals, the roles of marine mammals in oceanic ecosystems and general principles of marine mammal

population biology. Students use information on the biology of marine mammals to explore conservation/management issues. They learn of these animals and explore how they interact with humans.

PREREQUISITES: BIOL 2060.03 or BIOA 3001.03

EXCLUSIONS: BIOL 4060.03, MARI 4060.03

FORMATS: Lecture

MARI 3101 Microbial Ecology

CREDIT HOURS: 3

Lectures on the ecology of bacteria, viruses, protists. Community structure, food web nutrient cycling, biogeochemical cycles, competition, succession and symbiosis are discussed with examples from marine, fresh-water and soil habitats. There is an emphasis on marine organisms.

PREREQUISITES: BIOL 2004.03 (or MICI 2100.03) and BIOL 2060.03 (or BIOA 3001.03)

CROSSLISTED: BIOL 3101.03

FORMATS: Lecture

MARI 3221 Diversity of Algae

CREDIT HOURS: 3

This course is a taxonomic introduction to the major algal groups (macrophytic and microscopic) with an emphasis on the marine seaweeds. Basic taxonomic differences are covered, along with an introduction to macrophyte ecology, human uses and symbioses. Laboratory sessions focus on morphology and reproduction.

CALENDAR NOTES: Also offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times, and special registration procedures, see <http://www.seaside.science.dal.ca>

PREREQUISITES: BIOL 2004.03 or equivalent

CROSSLISTED: BIOL 3221.03

EXCLUSIONS: BIOL 3212.03, MARI 3212.03

MARI 3301 Invertebrate Biology

CREDIT HOURS: 3

A survey of the diversity, ecology and evolutionary history of the major invertebrate groups. Lectures will emphasize phylogenetics and diversity of body plans. Labs will emphasize identification and anatomy through dissections and observations.

PREREQUISITES: BIOL 2003.03

CROSSLISTED: BIOL 3301.03

RESTRICTIONS: This course is restricted to MARI majors.

EXCLUSIONS: BIOL 3321X/Y.06

FORMATS: Lecture | Lab

MARI 3370 Comparative Animal Physiology

CREDIT HOURS: 3

Lecture course examining principles of animal physiology, with emphasis on the coordination of metabolism, neural and sensory function, muscular function, stress, and reproduction, all within the context of ecology and evolution.

PREREQUISITES: BIOL 2003.03, BIOL 2020.03 (or BIOA 2001.03)

CROSSLISTED: BIOL 3370

EXCLUSIONS: BIOL 3078, BIOL 3079, MARI 3074, MARI 3076

FORMATS: Lecture

MARI 3371 Laboratory in Comparative Animal Physiology

CREDIT HOURS: 3

This laboratory intensive course will provide opportunities for students to experience firsthand the role that experimentation, and data collection, interpretation, and communication plays in our understanding of how animals function. Vertebrate and invertebrate examples are used, in a comparative approach, to study a variety of physiological processes.

CALENDAR NOTES: Laboratory experiments involve live invertebrates and/or vertebrate tissues. Students are required to handle live invertebrates during the lab.

PREREQUISITES: Grade of B- or higher in BIOL 3078 or MARI 3074 or BIOL 3370 or MARI 3370; CHEM 1011 and CHEM 1012; STAT 1060 or STAT 2060

CROSSLISTED: BIOL 3371

EXCLUSIONS: BIOL 3079, MARI 3076

FORMATS: Lecture | Lab | Tutorial

MARI 3602 Introduction to Aquaculture

CREDIT HOURS: 3

This course offers an introductory overview of aquaculture, the culturing of aquatic plants and animals. The following topics are covered with both a Maritimes and global perspective: overview physico-chemistry of water, engineering, culture techniques, health, nutrition, genetics, environmental and socio-economic considerations.

PREREQUISITES: BIOL 2003.03

EXCLUSIONS: BIOL 3600.03, MARI 3600.03

FORMATS: Lecture

MARI 3603 Practical Aquaculture

CREDIT HOURS: 3

This course provides students with aquaculture practical experience. The laboratories involve finfish, shellfish and live feed, and help students acquire skills useful for conducting experiments with aquatic animals (e.g. marking, measuring, anaesthesia, etc.). Students collect real data and learn to conduct exploratory graphical and statistical analyses.

COREQUISITES: MARI 3602.03

PREREQUISITES: STAT 1060.03 and BIOL 2003.03

EXCLUSIONS: BIOL 3600.03, MARI 3600.03, BIOL 5603

FORMATS: Lab

MARI 3604 Field Aquaculture

CREDIT HOURS: 3

Hands-on learning of aquaculture techniques through field trips to several aquaculture-related facilities (e.g. farms, hatcheries, research institutes, government offices) in the Maritimes and through laboratory exercises in water quality analysis, necropsies, fish processing, knots/rope handling, and culturing of artemia, rotifers, microalgae and other species in the Aquatron's on-going research.

CALENDAR NOTES: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca. Not offered every year.

PREREQUISITES: BIOL 2003.03 or Instructor's approval. MARI 3602.03 is recommended.

RESTRICTIONS: Restricted from students with fewer than 60 credit hours.

FORMATS: Lecture | Lab

MARI 3623 Applied Coastal Ecology

CREDIT HOURS: 3

Coastal Ecology explores anthropogenic impacts on the structure and function of coastal ecosystems. Through field trips, laboratories and guest demonstrations, students examine ecosystem health, e.g. communities on rocky shores, salt marshes and sandy shores, and will learn basic experimental design, principles of environmental assessment and monitoring, and coastal habitat remediation.

CALENDAR NOTES: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca

PREREQUISITES: BIOL 2003.03 and BIOL 2060.03 (or BIOA 3001.03)

CROSSLISTED: BIOL 3623.03, ENVS 3623.03

FORMATS: Lecture | Lab

MARI 3626 Field Studies of Marine Mammals

CREDIT HOURS: 3

Hands-on introduction to research on marine mammals. Lectures provide an overview of marine mammal adaptations, evolution, population biology, social organization, conservation, and management. Labs include a necropsy and techniques of photographic identification of individuals. On a several-day camping trip, students observe marine mammals from whale-watch boats and conduct research projects.

CALENDAR NOTES: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.

PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03), and BIOL 3062.03 (or BIOL 3630.03 or PSYO 2160.03), and STAT 1060.03 (or equivalent)

CROSSLISTED: BIOL 3626.03

FORMATS: Lecture | Lab

MARI 3627 Biology and Conservation of Sharks, Skates and Rays

CREDIT HOURS: 3

This course offers a combination of lectures, labs, and field trips that explore the elements of elasmobranchs (shark, skate and ray) biology and conservation. Students are introduced to current methods used in shark research, such as tagging, and learn about the role of sharks in ecosystems.

CALENDAR NOTES: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca

PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03) and BIOL 2003.03

FORMATS: Lecture | Lab

MARI 3628 Marine Ornithology

CREDIT HOURS: 3

Overview of the biology of birds in marine environments. Seabird ecology, evolution, adaptations, identification, and natural history. Tools and techniques for studying their behaviour, diet, and populations in the field. Lectures, exercises, and a week-long field trip to Maritime seabird breeding colonies. Student team and independent research projects and presentations.

CALENDAR NOTES: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see: seaside.science.dal.ca.

PREREQUISITES: BIOL 1010 or BIOL 1020 or equivalent, and BIOL 1011 or BIOL 1021 or equivalent, or SCIE 15XX, one of BIOL 2003 or BIOL 2004, and BIOL 2060, or instructor's permission. Knowledge of statistics, Geographic Information Systems (GIS), and familiarity with Excel spreadsheets are helpful, but not required, for research projects.

CROSSLISTED: BIOL 3628.03

FORMATS: Lecture | Lab

MARI 3632 Applied Field Methods in Fish Ecology

CREDIT HOURS: 3

Practical experience conducting field research on fishes with field trips to streams and shallow water marine/freshwater habitats. Techniques include collecting fish, designing and conducting surveys, studying behaviour, measuring phenotypic variability, quantifying temporal and spatial variation, planning for statistical analysis, and weighing tradeoffs between data quality, quantity, costs and ethical/environmental considerations.

CALENDAR NOTES: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.

PREREQUISITES: BIOL 2060.03 or BIOL 2003.03 or BIOA 3001.03 and STAT 1060.03 or their equivalents or permission of instructor. STAT 2080 is recommended.

CROSSLISTED: BIOL 3632.03, ENVS 3632.03

FORMATS: Lecture | Lab

MARI 3633 Spatial Information and GIS in Ecology

CREDIT HOURS: 3

A hands-on approach to understanding and using spatial information, this course introduces students to Geographic Information Systems (GIS) as a tool to answer ecological questions. Together, students conduct a major field project, collecting data, creating maps using GIS, and interpreting spatial patterns, to address an applied problem in ecology.

CALENDAR NOTES: Offered in the summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.

PREREQUISITES: BIOL 2060.03 or BIOA 3001.03

CROSSLISTED: ENVS 3633.03, GEOG 3633.03, BIOL 3633.03

EXCLUSIONS: PLAN 2006.03, GEOG 2006.03

FORMATS: Lecture | Lab

MARI 3635 Species at Risk Field Course

CREDIT HOURS: 3

This course provides practical field experience in the biology of Species at Risk (SAR). Students learn through lectures, presentations, field work, and writing a formal report. On a week-long field trip to Southwestern Nova Scotia, students learn from SAR biologists how to conduct field surveys, document data, and recover SAR.

CALENDAR NOTES: Intensive summer field course. Field trip to Southwestern NS for 7-9 days. Auxiliary fee charged to cover field expenses. Application and deposit required for permission to register. See www.seaside.science.dal.ca for details.

PREREQUISITES: BIOL 2003.03 or BIOL 2004.03; and BIOL 2060.03. BIOL 3065.03 is recommended.

CROSSLISTED: BIOL 3635.03

RESTRICTIONS: Requires permission of instructor

FORMATS: Lecture | Lab | Other (explain in comments)

MARI 3650 Ocean Technology for the Observation and Conservation of Marine Species

CREDIT HOURS: 3

This course offers lectures, labs, and field trips that explore the emerging field of ocean technology and observation efforts that are applied to the conservation of marine species. Students learn about applications of ocean technology, including remotely operated vehicles, acoustic receivers, and other tools used to track and manage species.

CALENDAR NOTES: Auxiliary fee charged to cover field expenses. Application and deposit required for permission to register. See www.seaside.science.dal.ca for details. This course is envisioned to be three weeks August 2nd - 15th, 2021.

PREREQUISITES: BIOL 2060.03 and BIOL 2003.03

RESTRICTIONS: Course open to all Marine Biology majors; Requires permission of instructor; (preference given to Co-op students).

EXCLUSIONS: E1 and E2

FORMATS: Lecture | Lab | Experiential Learning | Other (explain in comments)

MARI 3664 Intertidal Ecology and Diversity

CREDIT HOURS: 3

Hands-on, intensive introduction to ecological research on rocky shores, tidal flats, and sandy beaches. Relevant ecological concepts, sampling techniques for flora and fauna, and statistical skills are learned. Field sampling on day and camping trips is followed by lab work (e.g., identification of seaweeds, invertebrates), statistical analysis, and report preparation.

CALENDAR NOTES: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.

PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03) and BIOL 2003.03 and (MATH 1060.03/STAT 1060.03 or SCIE 15xx)

CROSSLISTED: BIOL 3664.03, ENVS 3664.03

EXCLUSIONS: BIOL 3662.03, BIOL 3663.03

FORMATS: Lecture | Lab

MARI 3680 Scientific Diving Methods for Marine Ecology

CREDIT HOURS: 3

This course introduces students that are certified divers to the practice of underwater research using SCUBA. It combines lectures with supervised dives in various marine habitats to demonstrate the application of standard sampling and experimental procedures in marine ecology, with an emphasis on logistical considerations and diving safety.

CALENDAR NOTES: Offered every other summer through the SEASIDE program. An auxiliary fee is charged to cover costs of dive trips. For dates, times and special registration procedures, see seaside.science.dal.ca.

PREREQUISITES: BIOL 2003.03 and BIOL 2060.03 (or BIOA 3001.03) and STAT 1060.03 or SCIE 15xx, and an internationally recognized diving certification, and a diving physical. Recommended: BIOL 3221.03/MARI 3221.03, BIOL 3301.03

CROSSLISTED: BIOL 3680.03

FORMATS: Lecture | Lab

MARI 3682 Tropical Marine Biology

CREDIT HOURS: 3

This course provides a practical introduction to tropical marine biology, including a multi-day field trip to tropical marine ecosystems (reef, mangrove, seagrass). Identification of species, ecological interactions and tropical marine conservation will be discussed. Evaluation includes, but is not limited to, lecture and field tests, presentations, field observations and reports.

CALENDAR NOTES: Field work involves snorkeling; students must be comfortable swimming for extended periods in open water. Offered in summer through SEASIDE. Special application procedure. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see: seaside.science.dal.ca.

PREREQUISITES: BIOL 2003.03 and BIOL 2060.03 or equivalent courses; or Instructor's permission. An introductory course in statistics and familiarity with spreadsheets (e.g. Excel) will be useful.

FORMATS: Lecture | Lab

MARI 3685 The Gulf of Eilat Ecosystem: Coral Reef and Subtropical Sea

CREDIT HOURS: 3

Introductin to physical, chemical, and biological oceanography, marine geology, biogeochemistry, and coral-reef biology. Focus is on subtropical seas, the coral reef ecosystem, and the unique characteristics of the Gulf of Eilat. Lectures, laboratories, demonstrations, field trips, exam, group field research projects in the sea, oral presentation, and scientific research paper.

CALENDAR NOTES: This is a field course given at the Eilat Ocean Studies Centre in Isreal. Entry is restricted and requires submission of an application form

PREREQUISITES: OCEA 2000, STAT 1060 or permission of instructor

CROSSLISTED: OCEA 3685.03

FORMATS: Lecture | Lab

MARI 3761 Marine Ecology

CREDIT HOURS: 3

Building upon an understanding of basic ecological and evolutionary principles, and a familiarity with the major marine invertebrate and algal taxa, this course examines patterns and processes at the organismal, population and community levels that determine the diversity and distribution of life in the sea.

PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03), and (BIOL 2003.03 or BIOL 2004.03) and OCEA 2000X/Y.06 or (OCEA 2001.03 and OCEA 2002.03)

CROSSLISTED: BIOL 3761.03

RESTRICTIONS: This course is restricted to 3rd and 4th year students.

FORMATS: Lecture | Lab

MARI 3800 Experiential Learning

CREDIT HOURS: 3

Experiential Learning recognizes the learning experience relevant to the program outside the scheduled curriculum. Students are responsible for drafting a learning agreement with the course coordinator and supervisor to specify learning outcomes, activities designed to accomplish these outcomes, a quantifiable assessment strategy and a timetable.

CALENDAR NOTES: To register in this course, a student must first find a suitable supervisor and sign a learning agreement between the course coordinator, the student and the supervisor.

PREREQUISITES: Students must be registered in a Biology or Marine Biology program, have completed a minimum of 18 credit hours in Biology or Marine Biology above the 1000 level and have a minimum cumulative GPA of 2.4 or permission of the course coordinator.

CROSSLISTED: BIOL 3800.03

EXCLUSIONS: Scheduled courses at a learning institution, study that would qualify for a Special Topics class, an Honours project, co-op work terms and paid work. Only one experiential learning course per degree is permitted.

MARI 4003 Coral Reefs and Environmental Change

CREDIT HOURS: 3

Coral reefs are iconic marine ecosystems both biologically and economically. This course introduces students to the biology of both tropical and cold-water corals, key characteristics of their abiotic environments, human impacts at both local and global scales, and management options for sustainable resource use and the protection of biodiversity.

PREREQUISITES: CHEM 1011.03/CHEM 1012.03 and BIOL 2060.03 and 6 credit hours in ENVS or BIOL or MARI at or above the 3000 level.

CROSSLISTED: ENVS 4003

RESTRICTIONS: This course is restricted to fourth year students.

MARI 4005 Coral Reefs and Environmental Change with Field Trip

CREDIT HOURS: 3

Coral reefs are iconic marine ecosystems both biologically and economically. This class introduces students to the biology of both tropical and cold-water corals, key characteristics of their abiotic environments, human impacts at both local and global scales, and management options for sustainable resource use and the the protection of biodiversity. This course runs parallel with ENVS 4003 but includes the addition of a 5-day field trip to the Bermuda Institute of Ocean Science.

PREREQUISITES: Chem 1011/Chem 1012 and Biol 2060. Also restricted to students with 6 credit hours in Environmental Science or Biology or Marine Biology at or above the 3000 level. Permission of Instructor Required

CROSSLISTED: ENVS 4005

RESTRICTIONS: Restricted to exclude E1, E2, E3, permission of instructor required

EXCLUSIONS: MARI 4003

FORMATS: Lecture | Lab | Discussion | Experiential Learning

MARI 4080 Laboratory Studies of Fishes

CREDIT HOURS: 3

Through a series of laboratory exercises, the course provides students with practical experience on various topics related to the study of ichthyology. Topics shall include the following: species identification; meristics and morphometrics; use of dichotomous keys; internal and external morphology; ageing and growth determination; ecomorphological attributes; data collection and analysis.

PREREQUISITES: BIOL 3080.03 or MARI 3080.03

CROSSLISTED: BIOL 4080.03

EXCLUSIONS: BIOL 3067.03, MARI 3067.03, BIOL 5067.03

FORMATS: Lab

MARI 4090 Evolutionary ecology of marine mammals

CREDIT HOURS: 3

Mammals evolved on land and then made their way into the ocean. The course considers how marine mammals adapted to this major change in habitat, so that they are now highly successful participants in the marine ecosystem. Students examine adaptations ranging from the cellular to social structure.

PREREQUISITES: One of MARI 3090.03, BIOL 3626.03, MARI 3626.03, BIOL 4060.03, MARI 4060.03 or permission of Instructor

EXCLUSIONS: BIOL 5651

FORMATS: Lecture

MARI 4141 Advances in Biological Oceanography

CREDIT HOURS: 3

This course explores major advances in biological oceanography through analysis and discussion of influential historical and recent cutting-edge papers from

the scientific literature. The course will be delivered through a combination of student presentations, class discussions, and invited speakers.
CALENDAR NOTES: MARI 4141 can be taken after or concurrently with OCEA 4140.03 or (OCEA 5140.03 or BIOL 4661.03 or MARI 4661.03).
COREQUISITES: OCEA 4140.03 or permission of instructor.
CROSSLISTED: OCEA 4141.03
RESTRICTIONS: E3
EXCLUSIONS: BIOL 4141.03, BIOL 5141.03
FORMATS: Seminar

MARI 4215 Marine Plants in the 21st Century

CREDIT HOURS: 3

This course focuses on the growing importance of habitat-forming marine plants, including mangroves, saltmarshes, seagrass meadows, kelp forests and other seaweed beds. We cover issues around wild harvesting, aquaculture, blue carbon storage, bioprospecting, habitat restoration, ecosystem-based management, and climate change. Class format includes overview lectures, case-studies, discussions, and interactive work.

PREREQUISITES: BIOL 2060.03 and OCEA 2000X/Y.06 (or OCEA 2001.03 and OCEA 2002.03) and two of any of the following: MARI 3063.03/BIOL 3063.03 or BIOL 3065.03 or MARI 3221.03/BIOL 3221.03 or MARI 3602.03 or MARI 3623.03/BIOL 3623.03/ENVS 3623.03 or MARI 3664.03/BIOL 3664.03 /ENVS 3664.03 or BIOL 3761.03/MARI 3761.03.

EXCLUSIONS: MARI 5215

FORMATS: Lecture | Tutorial

MARI 4323 Biologging & Biotelemetry in Ecology

CREDIT HOURS: 3

This course explores the fundamentals and applications of biologging and biotelemetry: the use of electronic tags to study free-ranging animals and their environment. Students are introduced to the wide range of tags and their diverse applications in biology.

PREREQUISITES: BIOL 2060.03 or BIOA 3001.03 or PSYO/NESC 2160.03 or permission of the instructor.

CROSSLISTED: BIOL 4323.03

FORMATS: Lecture | Lab

MARI 4335 Environmental Impacts in Marine Ecosystems

CREDIT HOURS: 3

See course description for OCEA 4335.03, in the Oceanography section of this calendar.

MARI 4350 Cutting Edge in Marine Science

CREDIT HOURS: 3

This course focuses on current, often hotly debated topics in marine science. We discuss recently published papers and current research initiatives on urgent issues, including biodiversity, fisheries, conservation, management, climate change, and human-ocean interactions. Class format includes lectures, case-studies, as well as active discussion, debates, group work and hands-on assignments.

PREREQUISITES: BIOL 2060.03 and OCEA 2000X/Y.06 (or OCEA 2001.03 and OCEA 2002.03) and one of any of the following; BIOL 3065.03, MARI 3063.03, BIOL 3067.03, MARI 3067.03, MARI 3080.03, BIOL 3600.03, MARI 3600.03, MARI 3602.03 or MARI 3761.03.

CROSSLISTED: MARI 5350.03

FORMATS: Lecture | Tutorial

MARI 4369 Fisheries Oceanography

CREDIT HOURS: 3

See course description for OCEA 4160.03, in the Oceanography section of this calendar.

MARI 4370 Deep Sea Biology

CREDIT HOURS: 3

See course description for OCEA 4370.03, in the Oceanography section of this calendar.

MARI 4600 Ecosystem Modelling for Aquaculture

CREDIT HOURS: 3

Learn a collection of tools for the sustainable utilization of aquatic resources. Emphasis is on bilateral interactions between aquaculture and the environment. Topics include water/sediment/biota variability, carrying capacity, invasive species, habitat destruction/creation, ecosystem functions/services, climate changes, etc. Tools include data analysis/modelling/visualization/mapping using Python™ (prior programming experience is not required).

PREREQUISITES: MARI 3602.03 or Instructor's approval

RESTRICTIONS: Restricted from students with fewer than 60 credit hours
FORMATS: Lecture

MARI 4661 Biological Oceanography

CREDIT HOURS: 3

See course description for OCEA 4140.03, in the Oceanography section of this calendar.

MARI 4662 Biology of Phytoplankton

CREDIT HOURS: 3

This is an upper-division course on the phytoplankton in the context of their evolutionary history and ecological diversity, with an emphasis on their adaptations and acclimation to different environments and their role in food webs and in biogeochemical cycling.

PREREQUISITES: MATH 1000.03 (or MATH 1215.03) and MATH 1010.03 or equivalent, and OCEA 2001.03 and OCEA 2002.03; or permission of Instructor

CROSSLISTED: OCEA 4230, OCEA 5230, BIOL 4662

EXCLUSIONS: E1, E2

FORMATS: Lecture | Discussion

MARI 4664 History of Marine Sciences

CREDIT HOURS: 3

In this course, we will trace the history of marine sciences from the ancients to the 20th century. Topics may include ancient cosmologies, voyages of discovery, ocean circulation, and a range of scientific perspectives and technological developments that have shaped human understanding of the oceans.

PREREQUISITES: Instructor's consent

CROSSLISTED: BIOL 4664.03, OCEA 4331.03/5331.03, HIST 3073.03, HSTC 3331.03, SCIE 4001.03

FORMATS: Lecture

MARI 4665 Hacking the blue planet: The scientific and social dimensions of ocean fertilization

CREDIT HOURS: 3

This course explores the biology, ecology, biogeochemistry and ethical and legal dimensions of purposeful ocean fertilization. Through lectures, discussion, case studies, and group projects, students consider the biological and oceanographic basis of ocean fertilization and its use as a 1) scientific tool and 2) controversial geoengineering strategy for climate change mitigation.

PREREQUISITES: One of the BIOL 3101.03, OCEA 2000X/Y.06, EARTH 3601.03, BIOL 3060.03 or instructor's permission

CROSSLISTED: OCEA 4665.03

EXCLUSIONS: BIOL 5665.03, OCEA 5665.03

FORMATS: Lecture | Discussion

MARI 4666 Benthic Ecology

CREDIT HOURS: 3

See course description for OCEA 4330.03, in the Oceanography section of this calendar.

MARI 4806 Independent Research I

CREDIT HOURS: 3

Students conduct supervised, independent research in Marine Biology. The student and faculty supervisor together develop a course outline, with a proposal for original research and the method of evaluation, including a formal research paper. Outline must be approved by the course coordinator before the student is permitted to register.

CALENDAR NOTES: This course is intended for Biology or Marine Biology majors in their fourth year of study. The signature required to register can only be given by the Chair of the Biology Undergraduate Curriculum Committee or their designate. The course outline must be submitted for approval no later than one week after the start of the term in which the student wishes to register. For forms and more information see

<https://www.dal.ca/faculty/science/biology/programs/undergraduate.html>

PREREQUISITES: Signature required

FORMATS: Other (explain in comments)

MARI 4807 Independent Research II

CREDIT HOURS: 3

Students conduct supervised, independent research in Marine Biology. The student and faculty supervisor together develop a course outline, with a proposal for original research and the method of evaluation, including a formal research paper. Outline must be approved by the class coordinator before the student is

permitted to register.

CALENDAR NOTES: This course is intended for Biology or Marine Biology majors in their fourth year of study. The signature required to register can only be given by the Chair of the Biology Undergraduate Curriculum Committee or their designate. The course outline must be submitted for approval no later than one week after the start of the term in which the student wishes to register. For forms and more information see

<https://www.dal.ca/faculty/science/biology/programs/undergraduate.html>

PREREQUISITES: Signature required

FORMATS: Other (explain in comments)

MARI 4809 Independent Research III

CREDIT HOURS: 3

Students conduct supervised, independent research in Biology. The student and faculty supervisor together develop a course outline, with a proposal for original research and the method of evaluation, including a formal research paper. Outline must be approved by the course coordinator before the student is permitted to register.

CALENDAR NOTES: This course is intended for Biology or Marine Biology majors in their fourth year of study. The signature required to register can only be given by the Chair of the Biology Undergraduate Curriculum Committee or their designate. The course outline must be submitted for approval no later than one week after the start of the term in which the student wishes to register. For more information see

<https://www.dal.ca/faculty/science/biology/programs/undergraduate.html>

PREREQUISITES: Signature required

FORMATS: Other (explain in comments)

MARI 4880 Communicating science for societal impact

CREDIT HOURS: 3

This class is for students interested in communicating scientific content with relevance to society, contributing to positive change. We aim to build skills to reach media, decision makers, regulators, and the public. The emphasis will be on communicating findings effectively and developing critical skills in science communication and scientific leadership.

CROSSLISTED: BIOL 4880

RESTRICTIONS: E3

FORMATS: Lecture | Tutorial | Experiential Learning

MARI 4901 Honours Research and Thesis I

CREDIT HOURS: 3

This course is required for, and restricted to, all Marine Biology Honours programs in which Marine Biology is the major area of study. Students conduct a research project supervised by a research scientist and attend weekly meetings of the class. The classes (MARI 4901.03 and MARI 4902.03) are normally taken in the students' final year. See Marine Biology and Biology Honours webpage for more details (<https://www.dal.ca/faculty/science/biology/honours.html>).

CALENDAR NOTES: MARI 4901.03 and MARI 4902.03 must be taken in consecutive fall/winter or winter/fall terms (Co-op only). Grades will not be recorded for either course until both have been completed, and the final Honours Thesis has been evaluated.

PREREQUISITES: Permission of Honours Coordinator

CROSSLISTED: BIOL 4901.03

RESTRICTIONS: Students in the Marine Biology Honours Programme

EXCLUSIONS: BIOL 4900.06 and MARI 4900.06

FORMATS: Other (explain in comments)

MARI 4902 Honours Research and Thesis II

CREDIT HOURS: 3

This course is required of, and restricted to, all Marine Biology Honours programs in which Marine Biology is the major area of study. Students conduct a research project supervised by a research scientist and attend weekly meetings of the class. The classes (MARI 4901.03 and MARI 4902.03) are normally taken in the students' final year.

CALENDAR NOTES: MARI 4901.03 and MARI 4902.03 must be taken in consecutive fall/winter or winter/fall terms (Co-op only). Grades will not be recorded for either course until both have been completed, and the final Honours Thesis has been evaluated. See Biology Honours homepage for more details (<https://www.dal.ca/faculty/science/biology/honours.html>). <https://www.dal.ca/faculty/science/biology/honours.html>

PREREQUISITES: Permission of Honours Coordinator

CROSSLISTED: BIOL 4902.03

RESTRICTIONS: Students in the Marine Biology Honours Programme, normally in their final year of study.

EXCLUSIONS: BIOL 4900.06 and MARI 4900.06

FORMATS: Other (explain in comments)

MARI 8891 Co-op Workterm I

CREDIT HOURS: 0

PREREQUISITES: SCIE 2800.03

MARI 8892 Co-op Workterm 2

CREDIT HOURS: 0

PREREQUISITES: SCIE 2800.03, MARI 8891.00

MARI 8893 Co-op Workterm 3

CREDIT HOURS: 0

PREREQUISITES: SCIE 2800.03, MARI 8892.00

MARI 8894 Co-op Workterm 4

CREDIT HOURS: 0

PREREQUISITES: MARI 8893.00 and SCIE 2800.03

Introduction

The Mathematics division offers a full range of programs aimed at students of diverse interests and levels. This includes honours, major, minor and joint degree programs. We work closely with students to choose a program that is the right fit for their interests and goals. Mathematics is a creative activity with its own intrinsic value and beauty. Mathematics also provides a solid foundation for every scientific field. A degree in mathematics can prepare students for a career in academia, industry, management, information technology, banking, teaching, and other areas.

General Interest Courses

We offer a number of courses for students not majoring in Mathematics:

- MATH 1000.03/MATH 1010.03: These core calculus courses are the starting point for any degree program in the sciences.
- MATH 1030.03/MATH 2040.03 : These courses serve as introductions to matrix theory, linear equations and linear algebra, topics of importance in many fields.
- MATH 1060.03: This course serves as an introduction to the basic ideas of statistics, through examples drawn from a wide variety of disciplines.
- MATH 1215.03: This course emphasizes the application of calculus to the life sciences.
- MATH 2110.03: This course is concerned with the foundations of mathematics, including logic, set theory, and proof techniques.

- MATH 2300.03: Topics from science and technology are used to motivate and illustrate basic mathematical tools of linear algebra and calculus. Mathematical software such as Matlab and Maple is also introduced.

Six credit hours of Mathematics or Statistics are required for a BSc degree. The following courses may not be used to satisfy this requirement: MATH 1001.03, MATH 1002.03, MATH 1003.03, MATH 1115.03, MATH 1315.03.

Degree Programs

The Department of Mathematics and Statistics offers the following degree programs in Mathematics :

- BSc (120 credit hour) Honours (Concentrated)*
- BSc (120 credit hour) Combined Honours*
- BSc (120 credit hour) Major*
- BSc or BA (120 credit hour) Double Major*
- BSc (90 credit hour) Minor in Mathematics
- Minor in Mathematics (added to a 120 credit hour degree)

* May be combined with Minor programs from other disciplines

Departmental requirements for each degree program can be seen by following the links in the menu to the right.

In addition to departmental requirements, students must satisfy the requirements outlined in the [Academic Regulations](#) and the [College of Arts and Science Degree Requirements](#) sections.

A BSc degree is the choice of most students in Mathematics; however, a BA degree option is also available for each of the programs listed below. The Departmental requirements for each BA degree program are the same as those of the corresponding BSc degree program; however, students are advised that some of the general College of Arts and Science requirements differ for the BA and BSc degrees. Minors and certificates that can be combined with a BSc degree can also be combined with a BA degree.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Students applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with a Mathematics undergraduate academic advisor. Students who participated in the Integrated Science Program in their first year should consult the Undergraduate Calendar for first year course equivalencies.

Students in any Mathematics program are strongly encouraged to include CSCI 1105.03 and CSCI 1110.03 in their programs.

BSc (120 credit hour) Concentrated Honours in Mathematics

An Honours degree offers an in-depth preparation in undergraduate mathematics, including an independent research experience. This degree option is recommended for students interested in eventually pursuing graduate studies in mathematics. Honours students

complete a minimum of 54 credit hours above the 1000 level in Mathematics with a minimum GPA of 3.0 and write an Honours Comprehensive Examination.

Admission to Honours

Students must apply for admission to Honours programs. Students considering Honours in Mathematics should consult with a Mathematics Honours Advisor early in their studies to have their programs approved.

Departmental requirements

The Department offers two Honours streams in Mathematics: (A) Pure Mathematics and (B) Applied Mathematics. Stream A emphasizes the power and beauty of mathematics as an independent academic discipline. Stream B emphasizes the connections between mathematics and other scientific disciplines. Both streams follow the same courses for the first two years. Students decide which stream to pursue during their second year.

In addition to fulfilling the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections, students in a BSc Concentrated Honours program in Mathematics must complete the following courses:

1000 level

- MATH 1000.03/MATH 1010.03 (or equivalent)
- MATH 1030.03: Matrix Theory and Linear Algebra I

2000 level

- MATH 2001.03: Intermediate Calculus I/MATH 2002.03: Intermediate Calculus II
MATH 2135.03: Linear Algebra and MATH 2505.03: Introductory Analysis
- Fifteen additional credit hours in mathematics at or above the 2000 level - not including courses listed below

3000 level

- MATH 3031.03: Abstract Algebra I and MATH 3501.03: Intermediate Analysis I
- Students in Stream A are required to take MATH 3032.03: Abstract Algebra II and MATH 3502.03: Intermediate Analysis II
- Students in Stream B are required to take MATH 3080.03: Introduction to Complex Variables and (MATH 3120.03: Differential Equations or MATH 3260.03: Applied Differential Equations)

4000 level

- MATH 4950.03: Honours Research Project
- Twelve additional credit hours at or above the 4000 level

Note: Students will not receive credit for taking MATH 1115.03 after receiving credit for MATH 1000.03, MATH 1500X, or MATH 1215.03

Programming requirement

- Students must complete a 3-credit course that incorporates computer programming. Suggested course is one of CSCI 2202.03, MATH 2300.03/STAT 2300.03, PHYC 2050.03/MATH 2052.03, or permission of advisor.

Students in Stream A are advised to include a selection of courses from the following list in their programs:

- MATH 2051.03: Problems in Geometry
- MATH 2113.03: Discrete Structures
- MATH 3045.03: Curves and Surfaces
- MATH 3070.03: Theory of Numbers
- MATH 3080.03: Introduction to Complex Variables
- MATH 3120.03: Differential Equations
- MATH 3330.03: Applied Graph Theory
- MATH 3360.03: Probability

Students in Stream B are advised to include a selection of courses from the following list in their programs:

- MATH 2060.03: Introduction to Probability and Statistics
- MATH 2300.03: Mathematical Modelling
- MATH 3032.03: Abstract Algebra II
- MATH 3045.03: Curves and Surfaces
- PHYC 3050.03: Introduction to Numerical Programming
- MATH 3300.03: Optimization
- MATH 3330.03: Applied Graph Theory
- MATH 3360.03: Probability
- MATH 3400.03: Classical Game Theory
- MATH 3502.03: Intermediate Analysis II
- MATH 3900.03: Financial Mathematics

Honours Comprehensive Examination

The Honours Comprehensive Examination in mathematics consists of a written paper of about 20-30 pages researched and prepared by the student. The topic is decided on in conjunction with the Honours advisor. The paper is also presented to the honours seminar. The work for this paper is done as part of the required course MATH 4950.03: Honours Research Project.

BSc (120 credit hour) Combined Honours in Mathematics and another subject

Students who wish to study Mathematics in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Mathematics may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject. Students contemplating a Combined Honours program in Mathematics and another subject should bear in mind, however, that the work in either subject may be insufficient for admission to a regular graduate program.

Students planning to enrol in a Combined Honours program should consult with academic advisors from both programs early in their studies. The same standards and conditions for admission apply as for entry into a Concentrated Honours program (see above). In addition, students must have their program of study approved by Academic Advisors in both subject areas. Students must complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Mathematics, this requirement is satisfied through MATH 4950.03.

Departmental Requirements

Students in a BSc Combined Honours program in Mathematics and another subject must fulfill the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections. A combined total of 66 credit hours above the 1000 level must be completed in two subjects, with a minimum of 30 credit hours above the 1000 level in each subject. In addition, students must complete a minimum of 18 credit hours at the 3000 level or above in each of the primary and secondary subjects.

Students in a BSc Combined Honours program in Mathematics, with Mathematics either as the primary subject or as the secondary subject, must complete the following courses. The program must be approved by a Mathematics Honours Advisor and an Honours advisor from the other subject.

2000 level

- MATH 2001.03: Intermediate Calculus I
- MATH 2002.03: Intermediate Calculus II
- MATH 2135.03: Linear Algebra
- MATH 2505.03: Introductory Analysis

3000 level

- At least two of MATH 3031.03: Abstract Algebra I, MATH 3032.03: Abstract Algebra II, MATH 3080.03: Introduction to Complex Variables, (MATH 3120.03: Differential Equations or MATH 3260.03: Applied Differential Equations), MATH 3501.03: Intermediate Analysis I, MATH 3502.03: Intermediate Analysis II

4000 level

- Six additional credit hours in MATH at the 4000 level

If Mathematics is the primary subject, students must also complete:

- MATH 4950.03: Honours Research Project

Note: Students will not receive credit for taking MATH 1115.03 after receiving credit for MATH 1000.03, MATH 1500X, or MATH 1215.03

BSc (120 credit hour) Major in Mathematics

The 120 credit hour Major is suited to students who want to focus on Mathematics, but wish to have a program that is somewhat less constrained than the Honours program. Students in a Major program normally choose to concentrate in Pure Mathematics, Applied Mathematics or Mathematics Education.

Departmental Requirements

In addition to fulfilling the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections, students in a BSc Major program in Mathematics must complete the following courses:

1000 level

- MATH 1000.03/MATH 1010.03 (or equivalent)
- MATH 1030.03: Matrix Theory and Linear Algebra I

2000 level

- MATH 2001.03: Intermediate Calculus I/MATH 2002.03: Intermediate Calculus II
- MATH 2040.03: Matrix Theory and Linear Algebra II (or MATH 2135.03: Linear Algebra)
- At least one of MATH 2110.03: Logic and set theory (or MATH 2112.03 : Discrete Structures I), MATH 2051.03: Problems in Geometry or MATH 2505.03: Introductory Analysis
- Six additional credit hours in MATH at or above 2000 level
- Three credit hours in a STAT course at or above 2000 level

3000 level

- 24 additional credit hours in MATH at or above the 3000 level. This selection may not include MATH 3700.03: Mathematics for Economists, MATH 3800.03: Financial Economics.

Programming requirement

- Students must complete a 3-credit course that incorporates computer programming. Suggested course is one of CSCI 2202, MATH 2300/STAT 2300, PHYC 2050/MATH 2052, or permission of advisor.

Students wishing to concentrate in Applied Mathematics should choose the additional MATH courses from

- MATH 2060.03: Introduction to Probability and Statistics/MATH 2080.03: Statistical Methods for Data Analysis and Inference
- MATH 2120.03: Methods for Ordinary Differential Equations/MATH 3120.03: Differential Equations
- MATH 2300.03: Mathematical Modelling
- MATH 3120.03: Differential Equations
- MATH 3210.03: Introduction to Numerical Analysis
- MATH 3300.03: Optimization
- MATH 3330.03: Applied Graph Theory
- MATH 3400.03: Classical Game Theory

Students wishing to concentrate in Pure Mathematics should choose the additional MATH courses from

- MATH 2060.03: Introduction to Probability and Statistics/MATH 2080.03
- MATH 2120.03: Methods for Ordinary Differential Equations/MATH 3120.03: Differential Equations
- MATH 3031.03: Abstract Algebra I/MATH 3032.03: Abstract Algebra II
- MATH 3045.03: Curves and Surfaces
- MATH 3070.03: Theory of Numbers
- MATH 3080.03: Introduction to Complex Variables

Students contemplating a career in Mathematics Education should choose the additional MATH courses from

- MATH 2051.03: Problems in Geometry
- MATH 2060.03: Introduction to Probability and Statistics/MATH 2080.03
- MATH 2110.03: Logic and set theory
- MATH 2113.03: Discrete Structures
- MATH 2300.03: Mathematical Modelling
- MATH 3031.03: Abstract Algebra I/MATH 3032.03: Abstract Algebra II
- MATH 3070.03: Theory of Numbers
- MATH 3080.03: Introduction to Complex Variables
- MATH 3140.03: Introduction to Wavelets
- MATH 3300.03: Optimization
- MATH 3330.03: Applied Graph Theory
- MATH 3400.03: Classical Game Theory

Note: Students will not receive credit for taking MATH 1115.03 after receiving credit for MATH 1000.03, MATH 1500X, or MATH 1215.03

BSc or BA (120 credit hour) Double Major in Mathematics and another subject

The Double Major degree program allows students to combine the study of Mathematics with another subject. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Mathematics may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

Students enrolled in a Double Major program are advised to review their proposed program of study with advisors in both subject areas.

Departmental requirements

In addition to fulfilling the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections, students in a BSc or BA Double Major program in Mathematics and another subject must complete the following:

Mathematics as the primary subject

Student completing a double major with Mathematics as the primary subject can fulfill the Mathematics requirements by following one of two programs below.

Pure Mathematics

1000 level

MATH 1000.03/MATH 1010.03 (or equivalent)

2000 level

- MATH 2001.03: Intermediate Calculus I and MATH 2002.03: Intermediate Calculus II
- MATH 2040.03: Matrix Theory and Linear Algebra II (or MATH 2135.03: Linear Algebra)
- At least two of MATH 2110.03: Logic and set theory (or MATH 2112.03: Discrete Structures I), MATH 2051.03: Problems in Geometry, MATH 2505.03: Introductory Analysis

3000 level

- 18 additional MATH credit hours at or above the 3000 level. This selection may not include MATH 3700.03: Mathematics for Economists, MATH 3800.03: Financial Economics.

Programming requirement

- Students must complete a 3-credit course that incorporates computer programming. Suggested course is one of CSCI 2202.03, MATH 2300.03/STAT 2300.03, PHYC 2050.03/MATH 2052.03, or permission of advisor.

Applied Mathematics

1000 level

- MATH 1000.03/MATH 1010.03 (or equivalent)

2000 level

- MATH 2001.03: Intermediate Calculus I
- MATH 2040.03: Matrix Theory and Linear Algebra II (or MATH 2135.03: Linear Algebra)
- MATH 2120.03: Methods for Ordinary Differential Equations and MATH 2002.03: Intermediate Calculus II
- MATH 2060.03: Introduction to Probability and Statistics or MATH 2080.03: Statistical Methods for Data Analysis and Inference

3000 and 4000 level

- MATH 3120.03 or MATH 3260.03
- At least 15 credit hours selected from : MATH 3045.03, MATH 3080.03, MATH 3210.03, MATH 3300.03, MATH 3330.03, MATH 3340.03, MATH 3360.03, MATH 3400.03, MATH 3900.03, MATH 4190.03, MATH 4220.03, MATH 4230.03, MATH 4250.03, MATH 4320.03, MATH 4370.03, MATH 4540.03.

Programming requirement

- Students must complete a 3-credit course that incorporates computer programming. Suggested course is one of CSCI 2202.03, MATH 2300.03/STAT 2300.03, PHYC 2050.03/MATH 2052.03, or permission of advisor.

Mathematics as the secondary subject

A student enrolled in a Double Major with Mathematics as the secondary subject also fulfills the Mathematics requirements by following one of the programs listed above for a Double Major with Mathematics as the primary subject.

Note: Students will not receive credit for taking MATH 1115.03 after receiving credit for MATH 1000.03, MATH 1500X, or MATH 1215.03.

BSc (90 credit hour) Minor in Mathematics

The 90 credit hour Minor in Mathematics is appropriate for students who want to study some Mathematics but do not wish to complete the conventional four-year program. The degree is best suited for students who want a general science degree with some specialization in Mathematics. A 90 credit hour degree program is not suitable for students who wish to pursue graduate studies. With additional study, the degree may be upgraded to a 120 credit hour Major or Honours degree at a later date.

A 90 credit hour BSc in Mathematics is usually the preferred option for students who wish to combine studies in Mathematics with a degree in Engineering (see BSc/BEng Concurrent Program).

See the [Minor in Mathematics](#) section of this Calendar.

Minor in Mathematics

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

BA or BSc (90 credit hour) degree program with a Minor in Mathematics is also available.

Requirements

* A minimum of 18 credit hours in MATH courses at the 2000 level or higher to a maximum of 36 credit hours.

* It is recommended that students take MATH 1010 and MATH 1030. These are prerequisites for many other upper-level MATH courses.

Contact [Mathematics and Statistics](#) for more information.

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Minors available to students in Mathematics

Minor programs allow students to develop subject specialties in addition to their Major or Honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs (including Science Co-op).

Students in a BSc (120 credit hour) program in Mathematics may choose to include a Minor selected from the [list of approved Minors](#). Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc in Mathematics, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of [Faculty of Science Certificates](#) and requirements can be found at the beginning of the [Faculty of Science](#) section. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the [College of Arts and Science Degree Requirements](#) section of the calendar.

Certificates of particular interest to students enrolled in a BSc in Mathematics include:

- [Certificate in Actuarial and Financial Mathematics](#)
- [Certificate in Applied and Computational Mathematics](#)

BSc/BEng Concurrent Program

BEng/BSc (90 credit hour) concurrent degree (Mathematics)

This degree combines an engineering degree with a deeper knowledge of mathematics, and provides a strong foundation for students interested in areas such as robotics, telecommunications, systems analysis and modelling. Following is the recommended sequence of courses for students wishing to obtain a concurrent BEng and BSc (90 credit hour) degree with Minor in Mathematics. Interested students must consult with the Assistant Dean, Faculty of Science, and the Associate Dean, Faculty of Engineering prior to enrolling in a concurrent BEng/BSc degree.

It is recommended that students also discuss their selection of courses with an undergraduate advisor in the Department of Mathematics and Statistics. A concurrent BEng/BSc Honours Mathematics program can be designed for interested candidates.

Fall

Winter

Registered in BEng

Year 1 CHEM 1021 *Chemistry I*

CHEM 1022 *Chemistry II*

MATH 1280 *Engineering Math I*

MATH 1290 *Engineering Math II*

ENGI 1103 *Engineering Design I*

ENGI 1203 *Engineering Mechanics I: Statics*

PHYC 1190 *Physics I*

PHYC 1290 *Physics II*

ENGM 1081 *Computer Programming*

ENGM 1041 *Applied Linear Algebra*

CPST 1103 *Technical Communications I*

CPST 1203 *Technical Communications II*

Apply for admission into concurrent BEng/BSc

Year 2^a ENGM 2101 *Applied Vector Calculus*

ENGM 2022 *Applied Differential Equations*

ENGM 2032 *Applied Probability & Statistics* HSTC 1801 *History of Engineering II*

^b Writing course (Humanities)

^d One Engineering elective

Two 2000 level (or higher) MATH courses **Two 2000 level (or higher) MATH courses**
(may not be MATH 2001 or MATH 2120) (may not be MATH 2001 or MATH 2120)

One social science course ^c **One social science or humanities course** ^c

Year 3^a IENG 2005 *Engineering economics*

ENGI 2203 *Engineering design II*

ECED 2000 *Electric circuits*

^c Two Engineering electives

ENGI 2102 *Thermo-Fluid Engineering I*

One 3000 level (or higher) MATH^e course

One 3000 level (or higher) MATH^e course (may not be MATH 2001 or MATH 2120)

(may not be MATH 2001 or MATH 2120) **One Science/FASS course (may be MATH)**

One Science/FASS course (may be MATH)

Graduate with Diploma in Engineering and BSc 90 credit degree

Year 4 Continue in BEng program

Year 5 Complete BEng program

^aTo meet the BSc 90 credit hour Minor in Mathematics requirements, students complete 30 credit hours in addition to their Engineering requirements: 12 credit hours of MATH courses at or above the 2000 level, as specified above, 6 MATH credit hours at or above the 3000 level, 6 credit hours of social science/humanities courses, and 6 credit hours in Science/FASS courses (which may be MATH)

^b Writing requirement: choose from eligible writing courses in CLAS, ENGL, GERM, HIST, PERF, PHIL, RELS, or RUSN to fulfill writing and humanities requirements [College of Arts and Science]

^c Choose from CANA, CTMP, ECON, EMSP, EURO, GWST, HIST, HSTC, INTD, POLI, PSYO, SOSA, SUST for social science courses. Choose from ARBC, CANA, CHIN, CLAS, CTMP, CRWR, EMSP, EURO, SWST, GERM, HIST, HTSC, ITAL, PERF, PHIL, RELS, RUSN, SPAN and THEA for humanities courses

^d See Engineering section of the calendar for details

^e Upper level courses that may be of particular interest to Engineering students include MATH 4220, MATH 4230 and MATH 4165

Notes:

- For a BEng/BSc with Minor in Math, students will not receive credit for MATH 1030, MATH 2001 or MATH 2120
- Completion of ENGM 2101, ENGM 2022 and ENGM 2032 fulfill the Math Minor requirements for MATH 2001 and MATH 2120
- ENGM 1041 fulfills the MATH 1030 requirement for the Math minor

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses so designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

Course Notes

Course descriptions for Statistics can be found in the calendar under Statistics.

Credit may not be obtained twice for the same course even if the numbers have been changed.

Courses with the designation (MLC) are supported by the tutorial services of the Math Learning Centre.

The following three courses below the 1000 level are offered by the College of Continuing Education. Students register and pay for them at the College of continuing Education located at 1220 LeMarchant Street, 2nd Floor or by calling (902) 494-2375 (see [College of Continuing Education](#) for more details).

Course Descriptions

MATH 0009 Academic Math

CREDIT HOURS: 0

Academic Math has been developed to prepare you for the math involved in non-calculus courses. If you have solid math skills (at least grade 11 academic level) and want to develop them to the university level necessary for entrance to the Faculty of Arts, Bachelor of Commerce, Management, or Nursing programs, this course is designed for you. MATH 0009.00 is accepted by Dalhousie University in place of NS Math 12 Academic.

PREREQUISITES: At least grade 10 academic math or equivalent

FORMATS: Lecture | Tutorial

MATH 0010 Pre-Calculus Accelerated

CREDIT HOURS: 0

This single-term accelerated course has been designed for calculus bound students, who have a firm grasp of grade 11 and 12 math skills. Focus is placed on pre-calculus key concepts, assuming students have current knowledge of grade 11 and 12 math concepts. Students requiring review of grade 11 and 12 concepts should take Pre-Calculus Plus (MATH 0011.00). Topics are explored in class following a clear, logical progression, with mastery generally occurring after assignments are completed.

PREREQUISITES: Recommend at least 80% in grade 11 and 12 math

FORMATS: Lecture | Tutorial

MATH 0011 Pre-Calculus Plus

CREDIT HOURS: 0

This full year course has been designed for the majority of students either requiring pre-calculus to gain admittance to the Dalhousie BSc program or as preparation for MATH 1000.03. This course provides a more in depth coverage of math concepts than found in the accelerated 1 term class, and adds a review of relevant 11 and 12 material, as well as a study of area under a curve. Students who have been away from math for 2 or more years, or have a heavy schedule, will find this course a better fit than the accelerated MATH 0010.00. Throughout the course, algebra, and applied geometric problem solving skills needed for calculus, are emphasized.

PREREQUISITES: Grade 11 and 12 math or equivalent

FORMATS: Lecture | Tutorial

MATH 1000 Differential and Integral Calculus I

CREDIT HOURS: 3

This course offers a self-contained introduction to differential and integral calculus. The topics include functions, limits, differentiation of polynomial, trigonometric, exponential and logarithmic functions, product, quotient and chain rules, applications of differentiation, antiderivatives and definite integrals, integration by substitution. A sequel to this course is MATH 1010.03.

PREREQUISITES: Nova Scotia Mathematics advanced 11 and 12 or pre-calculus. Pre-calculus is highly recommended.

EXCLUSIONS: MATH 1215.03, MATH 1280.03, MATH 1500X/Y.06

FORMATS: Lecture

MATH 1010 Differential and Integral Calculus II

CREDIT HOURS: 3

A continuation of the study of calculus with topics including: Riemann sums, techniques of integration, elementary differential equations and applications, parametric equations and polar coordinates, sequences and series, Taylor series.

PREREQUISITES: MATH 1000.03, or MATH 1215.03 with a grade of B or better
FORMATS: Lecture | Tutorial

MATH 1030 Matrix Theory and Linear Algebra I

CREDIT HOURS: 3

This course is a self-contained introduction to Matrix Theory and Linear Algebra. Topics include: systems of linear equations, vectors in \mathbb{R}^n , matrices, spans, linear independence, bases, dimension, linear transformations in \mathbb{R}^n , determinants, eigenvalues and eigenvectors, diagonalization, applications.

PREREQUISITES: Nova Scotia Advanced Mathematics 11 or 12 (or equivalent)

EXCLUSIONS: MATH 2030.03

FORMATS: Lecture

MATH 1060 Introductory Statistics for Science and Health Sciences

CREDIT HOURS: 3

See course description for STAT 1060.03 in the Statistics section of this calendar.

MATH 1215 Life Sciences Calculus

CREDIT HOURS: 3

This course emphasizes the application of calculus to the life sciences. The concepts and content studied include derivatives, techniques of differentiation, logarithmic and exponential functions, optimization, basic ordinary differential equations, integration, and techniques and applications of integration.

CALENDAR NOTES: Students who have already received credit for MATH 1215.03 cannot subsequently receive credit for MATH 1115.03.

PREREQUISITES: Nova Scotia Mathematics 11 and 12 or pre-calculus is highly recommended.

EXCLUSIONS: MATH 1000.03, MATH 1280.03, MATH 1500.06

FORMATS: Lecture | Tutorial

MATH 1280 Engineering Mathematics I

CREDIT HOURS: 3

This forms an introduction to differential and integral calculus for Engineering students. All topics of MATH 1000.03 are covered, but in greater depth. In addition, this course covers functions, differentiation of polynomial, trigonometric, exponential and logarithmic functions, product, quotient and chain rules, Taylor series, antiderivatives and definite integrals, Riemann sums, polynomial approximations, and numerical approximations of integrals.

CALENDAR NOTES: Students who have already received credit for MATH 1280.03 cannot subsequently receive credit for MATH 1000.03 or MATH 1115.03

PREREQUISITES: Nova Scotia Mathematics advanced 11 and 12 or pre-calculus. Pre-calculus is highly recommended.

EXCLUSIONS: MATH 1000.03, MATH 1215.03

FORMATS: Lecture | Tutorial

MATH 1290 Engineering Mathematics II

CREDIT HOURS: 3

This course is a sequel to MATH 1280. All topics of MATH 1010.03 are covered, but in greater depth. This course also introduces the students to the application of mathematics in engineering problems.

CALENDAR NOTES: 1: Students who have already received credit for MATH 1290.03 cannot subsequently receive credit for MATH 1010.03 2: MATH 1010.03 is not equivalent to MATH 1290.03

PREREQUISITES: MATH 1280.03

FORMATS: Lecture | Tutorial

MATH 1315 Discrete Mathematics for Computer Science

CREDIT HOURS: 3

This course is an introduction to formal reasoning and discrete mathematics with applications to computer science. Students will be introduced to formal notation and reasoning about problems and algorithms. Topics include: sets, sequences, and summations, simple proof techniques, elementary number theory, back-of-the-envelope approximations, combinatorial objects. Applications and relevance of these concepts in computer science will be emphasized.

EXCLUSIONS: CSCI 1315.03, MATH 2112.03

FORMATS: Lecture

MATH 2001 Intermediate Calculus I

CREDIT HOURS: 3

Topics include review of parametric equations, polar coordinates, conic sections, coordinate systems and vectors, dot product and cross product, vector

functions, derivatives and integrals of vector functions, arc length and curvature, functions of several variables and partial derivatives, directional derivatives and double and triple integrals.

PREREQUISITES: MATH 1010.03

FORMATS: Lecture

MATH 2002 Intermediate Calculus II

CREDIT HOURS: 3

Topics include multiple integrals and changes of variables, and vector calculus, with an emphasis on Green's and Stokes' theorems. The course also includes an introduction to second order ordinary differential equations.

PREREQUISITES: MATH 2001.03

FORMATS: Lecture

MATH 2040 Matrix Theory and Linear Algebra II

CREDIT HOURS: 3

This course is a continuation of MATH 1030.03. Topics include: vector spaces and linear transformations, complex numbers, real and complex inner product spaces, orthogonal and orthonormal bases, Gram-Schmidt procedure, orthogonal projections, generalized Fourier series, orthogonal and unitary transformations, diagonalization of symmetric and hermitian matrices, quadratic forms, least squares approximation and curve fitting, applications.

PREREQUISITES: MATH 1030.03 or 2030.03, and MATH 1000.03 or MATH 1215.03

EXCLUSIONS: MATH 2135.03

FORMATS: Lecture

MATH 2051 Problems in Geometry

CREDIT HOURS: 3

This is a basic course for all students interested in geometry. Topics from Euclidean and non-Euclidean geometry may include: transformation geometry, symmetry groups, frieze groups, wallpaper groups and the crystallographic restrictions, similarities; projective geometry and the classical theorems of Menelaus, Ceva, Desargues, Pappus, Pascal; hyperbolic geometry.

PREREQUISITES: MATH 1010.03

FORMATS: Lecture

MATH 2052 Introduction to Numerical Programming

CREDIT HOURS: 3

See PHYC 2050

PREREQUISITES: PHYC 1190.03/1290.03 or equivalent , or MATH 1010.03 or equivalent

CROSSLISTED: PHYC 2050.03

EXCLUSIONS: MATH 2400.03

FORMATS: Lecture

MATH 2060 Introduction to Probability and Statistics

CREDIT HOURS: 3

See course description for STAT 2060.03 in the Statistics section of this calendar.

PREREQUISITES: Math 1000 or Math 1215 or Math 1500 or 1500X/Y

MATH 2080 Statistical Methods For Data Analysis and Inference

CREDIT HOURS: 3

See course description for STAT 2080.03 in the Statistics section of this calendar.

MATH 2110 Logic and Set Theory

CREDIT HOURS: 3

This course is an introduction to the foundations of modern mathematics, including basic set theory, proof techniques, and programming. Topics include: set-theoretic encoding of mathematical entities: tuples, relations, numbers, sequences, families; set comprehension; cardinality; sets and classes; proof techniques; existential and universal quantifiers; induction; proof by contradiction; programming as a tool for problem solving.

EXCLUSIONS: MATH 2112.03

FORMATS: Lecture

MATH 2113 Discrete Structures

CREDIT HOURS: 3

This course continues CSCI 2112.03/MATH 2112.03. This course covers some basic concepts in discrete mathematics which are of particular relevance to students of computer science, engineering, and mathematics. The topics to be covered will include solution of recurrence relations, generating functions, number theory, Chinese remainder theorem, trees and graphs, finite state machines, abstract algorithms, Boolean algebra.

PREREQUISITES: MATH 1315.03 or MATH 2110.03 or MATH 2112.03

CROSSLISTED: CSCI 2113.03

FORMATS: Lecture

MATH 2120 Methods for Ordinary Differential Equations

CREDIT HOURS: 3

A comprehensive introduction to the theory of ordinary differential equations (ODEs), which is a broad field in pure and applied mathematics with numerous applications in other sciences. The topics include: special types of ODEs of 1st order, homogeneous and inhomogeneous linear ODEs with constant coefficients, Laplace transforms, systems of ODEs.

COREQUISITES: MATH 1030.03 or 2030.03

PREREQUISITES: MATH 1010.03 or permission of the instructor

FORMATS: Lecture

MATH 2135 Linear Algebra

CREDIT HOURS: 3

This course is a continuation of MATH 1030.03 or 2030.03 with an emphasis on foundations and the theory of vector spaces and linear transformations.

Additional topics include inner product spaces, symmetric and orthogonal transformations, bilinear forms, similarity and diagonalization, the solution of linear differential equations, and various applications in mathematics, physics and computer science.

PREREQUISITES: MATH 1030.03 (or MATH 2030.03) and MATH 1000.03

EXCLUSIONS: MATH 2040.03

FORMATS: Lecture

MATH 2300 Mathematical Modelling

CREDIT HOURS: 3

By using fundamental calculus concepts in a modelling framework, the student investigates practical problems chosen from common experiences encompassing many academic disciplines, including the mathematical sciences, operations research, engineering and the management and life sciences. A significant part of the course is learning to use MAPLE as a mathematical tool.

COREQUISITES: MATH 1030.03 or 2030.03

PREREQUISITES: MATH 1000.03

CROSSLISTED: STAT 2300.03

FORMATS: Lecture

MATH 2505 Introductory Analysis

CREDIT HOURS: 3

This course is for honours students and other serious students of mathematics. Topics include: the axioms for the real number system, geometry and topology of Euclidean space, limits, continuity, differentiability, the inverse and implicit function theorems.

PREREQUISITES: MATH 2001.03

FORMATS: Lecture

MATH 2600 Theory of Interest and Life Contingencies

CREDIT HOURS: 3

Simple and compound interest are covered in detail. Topics include: nominal and effective rates of interest/discount, force of interest, annuities, perpetuities, and bonds.

PREREQUISITES: MATH 1010.03, MATH 1115.03 or MATH 1215.03

CROSSLISTED: STAT 2600.03

FORMATS: Lecture

MATH 3031 Abstract Algebra I

CREDIT HOURS: 3

Groups, subgroups, permutation groups, cosets, direct products, fundamental theorem of finitely generated abelian groups, simple groups, group homomorphisms, factor groups, isomorphism theorems of groups, series of groups, Sylow theorems and applications. Additional topics may include free groups, group actions, and groups in Topology.

PREREQUISITES: MATH 2040.03 or MATH 2135.03

EXCLUSIONS: MATH 3030X/Y.06

FORMATS: Lecture

MATH 3032 Abstract Algebra II

CREDIT HOURS: 3

Rings, fields, integral domains, Fermat's theorem, Euler's theorem, ideals, quotient rings, prime and maximal ideals, factorization of polynomials, Gröbner bases, Unique Factorization Domains, Euclidean Domains and Gaussian integers, and applications as time allows.

PREREQUISITES: MATH 3031.03

EXCLUSIONS: MATH 3030X/Y.06

FORMATS: Lecture

MATH 3045 Curves and Surfaces

CREDIT HOURS: 3

The course is designed as an introduction to differential geometry, the study of geometric objects by means of analysis. It presents a comprehensive study of curves and surfaces in Euclidean space. Topics include: Frenet frame and equations, curvature, torsion, first and second fundamental forms, shape operator, Gauss-Weingarten equations.

PREREQUISITES: MATH 2002.03 and (MATH 2040.03 or MATH 2135.03) or consent of instructor

FORMATS: Lecture

MATH 3070 Theory of Numbers

CREDIT HOURS: 3

Topics include: congruences and residues; elementary properties of congruences, linear congruences, theorems of Fermat, Euler and Wilson, Chinese remainder theorem, quadratic residues, law of quadratic reciprocity, Legendre, Jacobi and Kronecker symbols, arithmetic functions, algebraic fields, algebraic numbers and integers, uniqueness of factorization, elementary properties of ideals, and class number.

PREREQUISITES: MATH 2040.03 (or MATH 2135.03)

FORMATS: Lecture

MATH 3080 Introduction to Complex Variables

CREDIT HOURS: 3

An introduction to the basic elements of complex analysis. Topics include: complex numbers, functions, differentiation and integration in the complex plane, some special mappings, series in general, Taylor and Laurent Series, residues, some principles of conformal mapping theory.

PREREQUISITES: MATH 2002.03

FORMATS: Lecture

MATH 3120 Differential Equations

CREDIT HOURS: 3

The topics discussed are of great importance to any student interested in applied mathematics. Areas include Fourier series, orthogonal polynomials, Sturm-Liouville problems, the classical partial differential equations, and some applications to physics, chemistry and engineering.

PREREQUISITES: MATH 2120.03 or MATH 2135.03 or PHYC 2140.03

FORMATS: Lecture

MATH 3140 Introduction to Wavelets

CREDIT HOURS: 3

Wavelet analysis provides an extremely powerful and highly flexible tool for the compression, denoising, and recognition of both audio and image signals. This course will develop many of the essential mathematical ideas behind Fourier analysis and wavelets. Many applications will also be discussed and examined.

PREREQUISITES: MATH 2002.03, and MATH 1030.03 (or MATH 2030.03)

FORMATS: Lecture

MATH 3210 Introduction to Numerical Analysis

CREDIT HOURS: 3

This course covers the practice as well as theory of basic numerical techniques. Topics may include: root finding, interpolation, integration, initial value problems, linear and nonlinear fitting, boundary value problems. We will emphasize error analysis and stability of methods, as well as practical implementation on a computer.

PREREQUISITES: MATH 2001.03 or (MATH 2120.03 and one of MATH 1030.03 or MATH 2030.03)

MATH 3300 Optimization

CREDIT HOURS: 3

An introduction to the concepts and applications of linear programming. Topics include the simplex method for linear programming, duality and sensitivity analysis. Some of these topics are illustrated by means of interactive computer packages.

PREREQUISITES: MATH 1030.03 or 2030.03

FORMATS: Lecture

MATH 3330 Applied Graph Theory

CREDIT HOURS: 3

An introduction to graph theory and the analysis of networked data. The course covers logical reasoning about graph concepts including: paths and cycles, shortest route problem, connectivity, minimum spanning trees, network flow, matchings, graph colouring. The course also teaches computational analysis of networks and concepts such as: clustering coefficient, centrality, communities, modularity.

CALENDAR NOTES: This course uses computational tools to analyze graphs. Elementary knowledge of a computer programming language such as Python is highly recommended.

PREREQUISITES: MATH 2110.03 or MATH 2113.03 or CSCI 2202.03

MATH 3340 Regression and Analysis of Variance

CREDIT HOURS: 3

See course description for STAT 3340.03 in the Statistics section of this calendar.

COREQUISITES: STAT 2450.03 (if not taken as a prerequisite)

PREREQUISITES: MATH 1030.03 AND STAT 2060.03 or MATH 2060.03 AND STAT 2080.03 or MATH 2080.03 or ECON 3338.03 AND STAT 2450.03.

CROSSLISTED: STAT 3340.03

FORMATS: Lecture

MATH 3350 Design of Experiments

CREDIT HOURS: 3

See course description for STAT 3350.03 in the Statistics section of this calendar.

MATH 3360 Probability

CREDIT HOURS: 3

See course description for STAT 3360.03 in the Statistics section of this calendar.

MATH 3370 Combinatorics: Techniques and Structures

CREDIT HOURS: 3

We introduce counting techniques and combinatorial structures, and show their application and use in all branches of mathematics. Counting techniques include combinations and permutations, the pigeonhole principle, inclusion/exclusion. Other topics include recurrence relations, generating functions and power series. Structures include partial orders, set systems and transversals, and simplicial complexes

PREREQUISITES: MATH 2110.03 or MATH 2113.03

RESTRICTIONS: E1

EXCLUSIONS: MATH 4370.03

FORMATS: Lecture

MATH 3380 Sample Survey Methods

CREDIT HOURS: 3

See course description for STAT 3380.03 in the Statistics section of this calendar.

MATH 3460 Intermediate Statistical Theory

CREDIT HOURS: 3

See course description for STAT 3460.03 in the Statistics section of this calendar.

MATH 3501 Intermediate Analysis I

CREDIT HOURS: 3

MATH 3501.03 continues the analysis sequence begun in MATH 2505.03. Topics include: Metric spaces, point-set topological notions, sequences, completeness, separability, compactness (Heine-Borel, Bolzano-Weierstrass, Finite Intersection, complete and totally bounded), limits and continuity, continuity in topological terms, connectedness, path and local-path connectedness, homeomorphisms, uniform continuity, Lipschitz continuity, contractions, contraction principle, sequences of functions, uniform convergence. Further topics may include: Arzela-Ascoli theorem, Stone-Weierstrass theorem.

PREREQUISITES: (MATH 2040 or MATH 2135.03) and MATH 2505.03

EXCLUSIONS: MATH 3500X/Y.06

FORMATS: Lecture

MATH 3502 Intermediate Analysis II

CREDIT HOURS: 3

Topics include: The full derivative for functions between Euclidean spaces, directional derivatives, Jacobian matrix, differentiability, C^1 functions, multilinear maps, higher derivatives, Taylor's theorem, extrema, inverse and implicit function theorems, extrema subject to constraints, Lagrange multipliers. Further topics may include: normed vector spaces and basic functional analysis, basic theory of manifolds in \mathbb{R}^n Fourier series.

PREREQUISITES: MATH 3501.03

EXCLUSIONS: MATH 3500X/Y.06

MATH 3700 Mathematics for Economists

CREDIT HOURS: 3

See course description for ECON 3700 in the Economics section of this calendar.

MATH 3790 Mathematical Problem Solving: Techniques & Methods

CREDIT HOURS: 3

This class will provide an introduction to techniques for solving mathematical problems of the sort encountered in competition (such as the Mathematical Olympiad or the William Putnam competition). There will be self-contained modules developing techniques from several branches of mathematics including number theory, combinatorics, geometry and analysis. The majority of the class time, however, will be devoted to examining examples. Students will be expected to prepare and present in class solutions to assigned problems.

COREQUISITES: MATH 1030.03 or 2030.03

PREREQUISITES: MATH 1000.03, MATH 1010.03 or equivalent, and consent of instructor.

MATH 3800 Financial Economics

CREDIT HOURS: 3

See course description for ECON 3800.03 in the Economics section of this calendar.

MATH 3900 Financial Mathematics

CREDIT HOURS: 3

This course is an introduction to derivative pricing. Topics include: binomial tree model, stochastic calculus, Itô calculus, Black-Scholes model, market price of risk, log-normal models.

PREREQUISITES: MATH 2060.03 and (MATH 2120.03 or MATH 2135.03), or permission of the instructor

CROSSLISTED: ECON 3900.03

MATH 4001 AARMS Summer School I

CREDIT HOURS: 3

A Topics class given by leading researchers in the precise field, which varies from year to year. Consult the Department for current details.

PREREQUISITES: Permission of the Honours Advisor

CROSSLISTED: STAT 4001.03

FORMATS: Lecture

MATH 4002 AARMS Summer School II

CREDIT HOURS: 3

A Topics class given by leading researchers in the precise field, which varies from year to year. Consult the Department for current details.

PREREQUISITES: Permission of the Honours Advisor

CROSSLISTED: STAT 4002.03

FORMATS: Lecture

MATH 4010 Introduction to Measure Theory and Integration

CREDIT HOURS: 3

Lebesgue's theory of measure and integration. The topics include: sigma-algebras, measures, construction of measures, Lebesgue measure on the real line, measurable functions, the Lebesgue integral and convergence theorems, L_p spaces, product measures and the Fubini-Tonelli theorem.

PREREQUISITES: MATH 3501.03

EXCLUSIONS: MATH 5010.03

FORMATS: Lecture

MATH 4020 Analytic Function Theory

CREDIT HOURS: 3

Topics include: review of analytic complex functions including topological properties of the plane, Mobius mappings, exponential, logarithmic, trigonometric and related functions, integration and the Cauchy theorem. Cauchy's integral formula, residues, harmonic functions, analytic continuation, entire and meromorphic functions, some results of conformal mapping, including the Riemann mapping theorem.

PREREQUISITES: MATH 2002.03 (MATH 3080.03 recommended)

CROSSLISTED: MATH 5020.03

MATH 4025 Commutative Algebra I

CREDIT HOURS: 3

This introduction to commutative algebra includes a selection of the following topics: prime and maximal ideals, primary decomposition, Noetherian rings, Hilbert's Basis Theorem and the Nullstellensatz.

PREREQUISITES: MATH 3032.03

CROSSLISTED: MATH 5025.03

FORMATS: Lecture

MATH 4035 Topics in Commutative Algebra

CREDIT HOURS: 3

This course covers special topics in commutative algebra.

PREREQUISITES: MATH 4045.03 or permission of the instructor

CROSSLISTED: MATH 5035.03

FORMATS: Lecture

MATH 4045 Advanced Algebra I

CREDIT HOURS: 3

Introduction to module theory: modules, submodules, quotient modules, module homomorphisms, generators for modules, direct sums, free modules, tensor products, exact sequences, projective modules, injective modules, and flat modules. Modules over principal ideal domains. Additional topics may include homological algebra, Ext and Tor functors, symmetric and exterior algebras.

PREREQUISITES: MATH 3032.03

EXCLUSIONS: MATH 5045.03

FORMATS: Lecture

MATH 4055 Advanced Algebra II

CREDIT HOURS: 3

Field theory, field extensions, Galois theory and applications.

PREREQUISITES: MATH 3032.03

CROSSLISTED: MATH 5055.03

FORMATS: Lecture

MATH 4057 Lie Theory

CREDIT HOURS: 3

Introduction to Lie algebras and Lie groups: linear groups; universal enveloping algebras; Lie's three theorems; classification of semisimple Lie algebras. Additional topics may include: Lie algebra cohomology; representation theory of semisimple Lie groups; Tannaka-Krein duality; Clifford algebras; Bruhat and Schubert decompositions.

PREREQUISITES: MATH 3031 and MATH 4045

RESTRICTIONS: None

EXCLUSIONS: MATH 5057

FORMATS: Lecture

MATH 4065 Algebraic Geometry

CREDIT HOURS: 3

This is a first course in algebraic geometry and will introduce students to the basic properties of affine and projective varieties. Topics covered will include a selection from: local properties of plane curves, elliptic curves, Bezout's Theorem, Riemann-Roch Theorem.

PREREQUISITES: MATH 3032.03

CROSSLISTED: MATH 5065.03

FORMATS: Lecture

MATH 4066 Advanced Statistical Theory I

CREDIT HOURS: 3

See course description for STAT 4066.03 in the Statistics section of this calendar.

MATH 4070 Algebraic Number Theory

CREDIT HOURS: 3

An introduction to algebraic number theory, with special emphasis on quadratic and cyclotomic fields. A more general study of rings of integers of algebraic number fields focuses on divisibility properties. Other topics include Dedekind domains, ideals and their factorization into prime ideals, and class groups and class numbers.

PREREQUISITES: MATH 3032.03 (MATH 3070.03 recommended)

CROSSLISTED: MATH 5070.03

FORMATS: Lecture

MATH 4116 Cryptography

CREDIT HOURS: 3

This course is an introduction to modern cryptographic techniques and its mathematical foundations. The material covered includes: elementary number theory and algebra, classical cryptosystems, probability, the Data Encryption Standard, prime number generation and primality tests, public key cryptosystems, and further applications, such as digital signatures and identification.

PREREQUISITES: MATH 1000.03, MATH 1010.03, MATH 1030.03 (or MATH 2030.03), and at least six additional credit hours in Mathematics beyond the first year, or permission of the instructor.

CROSSLISTED: CSCI 4116.03

MATH 4130 Design and Analysis of Algorithms II

CREDIT HOURS: 3

See course description for CSCI 4113.03 in the Computer Science section of this calendar.

MATH 4135 Introduction to Category Theory

CREDIT HOURS: 3

Categories, functors, natural transformations and adjointness are introduced with emphasis on examples drawn from undergraduate Mathematics and theoretical Computer Science. The calculus of diagram chasing, limits, colimits and Kan extensions is explored in detail.

PREREQUISITES: MATH 3031.03 and MATH 3501.03 or permission of the instructor.

CROSSLISTED: MATH 5135.03

FORMATS: Lecture

MATH 4136 Topics in Category Theory

CREDIT HOURS: 3

Topics of current interest in category theory will be discussed with an emphasis on open problems. No previous knowledge of category theory is required. The necessary concepts will be discussed in the context of their applications. However, a certain familiarity with the basic concepts of modern mathematics such

as found in courses on algebra and topology would be an asset.
PREREQUISITES: MATH 3031.03 and consent of instructor
CROSSLISTED: MATH 5136.03

MATH 4140 Introduction to Functional Analysis

CREDIT HOURS: 3

An introduction to the basic principles of functional analysis including the following topics: infinite dimensional vector spaces, normed spaces, inner-product spaces, Banach and Hilbert spaces, linear and continuous linear functionals, the Hahn-Banach Theorem, the principle of uniform boundedness, dual spaces, weak* topology, and the Alaoglu theorem, the open mapping and closed graph theorems, and consequences and applications.

PREREQUISITES: MATH 3502.03

CROSSLISTED: MATH 5140.03

FORMATS: Lecture

MATH 4165 Mathematical Methods in Physics

CREDIT HOURS: 3

Topics discussed include: complex variable theory, Fourier and Laplace transform techniques, special functions, partial differential equations.

PREREQUISITES: MATH 3120.03 or MATH 3260.03 or permission of instructor.

CROSSLISTED: PHYC 4160.03

EXCLUSIONS: PHYC 5160.03, MATH 5165.03

FORMATS: Lecture

MATH 4170 General Topology

CREDIT HOURS: 3

An introduction to topological spaces that includes the following topics: classification in terms of cardinality of bases, separation, etc., product spaces, Tychonoff theorem, compactness, compactifications, Tychonoff spaces, metrization.

PREREQUISITES: MATH 3502.03

CROSSLISTED: MATH 5170.03

FORMATS: Lecture

MATH 4175 Topics in Mathematical Physics

CREDIT HOURS: 3

This course is a continuation of MATH 4165.03 and deals with special topics in mathematical physics selected from areas such as the Green's function technique for solving ordinary and partial differential equations, scattering theory and phase shift analysis, diffraction theory, group theory, tensor analysis and general relativity.

PREREQUISITES: MATH 4165.03

CROSSLISTED: PHYC 4170.03, PHYC 5170.03

MATH 4180 Introduction to Algebraic Topology

CREDIT HOURS: 3

An introduction to algebraic topology including the following topics: the definitions, properties and methods of computation of the fundamental group of a topological space; simplicial, singular and cellular homology groups; basic properties and methods of computation of homology groups; a selection of application such as the classification of surfaces and fixed point theorems.

PREREQUISITES: MATH 2505.03, MATH 4170.03

CROSSLISTED: MATH 5180.03

FORMATS: Lecture

MATH 4200 Ordinary Differential Equations - Qualitative Theory

CREDIT HOURS: 3

Qualitative theory is concerned with determining the behaviour of solutions of differential equations without finding explicit solutions. Topics are selected from Liapunov stability theory, stable and unstable manifolds of singular points and periodic solutions, classification of plane singular points, structural stability and Hamiltonian systems. Other topics at the instructor's discretion.

PREREQUISITES: MATH 4190.03

EXCLUSIONS: MATH 5200.03

FORMATS: Lecture

MATH 4220 Introduction to Partial Differential Equations

CREDIT HOURS: 3

This course is a basic introduction to the theory of partial differential equations. Topics covered include: modelling physical systems, method of characteristics, Laplace, wave and heat equations, separation of variables, eigenfunction expansions, integral transforms, maximum principles and Ritz Raleigh theory.

PREREQUISITES: MATH 3120.03 or MATH 3260.03 or permission of instructor

CROSSLISTED: MATH 5220.03

FORMATS: Lecture

MATH 4230 Partial Differential Equations

CREDIT HOURS: 3

This course will provide students with an introduction to advanced topics in partial differential equations in a variety of settings. Topics may include: reaction diffusion systems, pattern formation, numerical methods, applications to physical sciences, variational methods, Sobolev Theory.

PREREQUISITES: MATH 3120.03 or MATH 3260.03 or permission of the instructor

CROSSLISTED: MATH 5230.03

FORMATS: Lecture

MATH 4250 Asymptotic Analysis

CREDIT HOURS: 3

Most mathematical models of physical systems cannot be solved exactly. Often such systems have a naturally occurring small parameter which may be exploited using asymptotic analysis techniques. In this course, we will study a variety of physical systems which illustrate many of the common approaches used in asymptotic analysis. Focus will be on applications to ordinary and partial differential equations.

PREREQUISITES: (MATH 1030.03 or MATH 2030.03) and (MATH 3120.03 or MATH 3260.03), or permission of the instructor

CROSSLISTED: MATH 5250.03

FORMATS: Lecture

MATH 4330 Topics in Graph Theory

CREDIT HOURS: 3

This course covers current research topics in graph theory. Items are selected from the following topics: graph colourings, combinatorial optimization, random graphs, network analysis, graph clustering, processes on graphs.

PREREQUISITES: MATH 3330.03 or CSCI 3110.03 or permission of the instructor

CROSSLISTED: CSCI 4115.03

EXCLUSIONS: MATH 5330.03

FORMATS: Lecture

MATH 4331 Topics in Combinatorics

CREDIT HOURS: 3

This course covers current research in combinatorics. Selected topics may include: graph polynomials, simplicial complexes, partial orders, enumeration problems, and algebraic methods in combinatorics.

PREREQUISITES: MATH 2113.03 or MATH 3330.03 or MATH 3370.03

FORMATS: Lecture

MATH 4340 Discrete Random Structures

CREDIT HOURS: 3

This course covers basics of probability and stochastic processes, and then focuses on areas where probability and combinatorics interact. Topics include: probabilistic method, stochastic graph models for complex networks, probabilistic algorithms. Probabilistic techniques include: expectation and concentration of random variables, stochastic processes, conditional expectation, Markov chains, martingales, branching processes.

PREREQUISITES: MATH 2110.03 or MATH 2113.03 or STAT 3360.03

CROSSLISTED: MATH 5340.03

FORMATS: Lecture

MATH 4360 Combinatorial Modelling

CREDIT HOURS: 3

This course introduces a common framework for combinatorial structures (graphs, digraphs, hypergraphs, posets, preorders, lattices, finite topologies, simplicial complexes), with an emphasis on how to model these structures with other fields of mathematics, such as matrix theory and linear algebra, commutative algebra, topology, analysis, probability and logic.

PREREQUISITES: MATH 2060.03 and MATH 3032.03 or permission of the instructor.

CROSSLISTED: MATH 5360.03
FORMATS: Lecture

MATH 4370 Combinatorics: Techniques and Structures

CREDIT HOURS: 3

We introduce counting techniques and combinatorial structures, and show their application and use in all branches of mathematics. Counting techniques include combinations and permutations, the pigeonhole principle, inclusion/exclusion. Advanced techniques include recurrence relations, generating functions and power series. Structures include partial orders, set systems and transversals, and finite geometries

PREREQUISITES: MATH 2112.03 or MATH 2051.03 or MATH 3070.03 or MATH 3330.03

CROSSLISTED: MATH 5370.03

FORMATS: Lecture

MATH 4410 Cosmology

CREDIT HOURS: 3

A self-contained introduction to cosmology will be given and no prior knowledge of differential geometry or general relativity will be assumed (although some knowledge of elementary differential equations will be useful). A cosmological model is a model of the universe, as a whole, on the largest scales; the emphasis of the course will be on the modelling aspects of cosmology.

PREREQUISITES: Instructor's permission

CROSSLISTED: MATH 5410.03, PHYC 4660.03/PHYC 5660.03

FORMATS: Lecture

MATH 4500 Introduction to Harmonic Analysis

CREDIT HOURS: 3

This course covers the basic elements of L^p -spaces, convolution, interpolation, maximal functions, Fourier analysis of functions, and the theory of generalized functions, or distributions. Further topics may include L^2 -Sobolev spaces, boundary values of harmonic functions, spherical harmonics, singular integral operators, or multipliers.

PREREQUISITES: MATH 4010.03/MATH 5010.03, or MATH 3502.03 with permission of instructor

EXCLUSIONS: MATH 5500.03

FORMATS: Lecture

MATH 4530 Differential Geometry

CREDIT HOURS: 3

This course is a self-contained introduction to manifold theory. Topics include: elements of surface theory, the tangent space, vector fields, differential forms and more general tensors, the Lie derivative, connections, Riemannian geometry, applications in mechanics and general relativity.

PREREQUISITES: MATH 3045.03 or MATH 3502.03 or permission of the instructor

CROSSLISTED: MATH 5530.03

FORMATS: Lecture

MATH 4540 Applied Analysis

CREDIT HOURS: 3

This course is an introduction to the methods of modern applied analysis. This course is suitable for advanced undergraduate and graduate students. The topics include classification of planar dynamical systems, nonlinear dynamics, and equilibria, global nonlinear techniques, closed orbits and limit cycles. Calculus of Variations: first and second variations, symmetries, conservation laws and Noether's theorem, Hamiltonian formalism. Time permitting, other topics in Applied Analysis such as tensor calculus will be covered.

PREREQUISITES: (MATH 3120.03 or MATH 3260.03) and MATH 3501.03, or consent of instructor

EXCLUSIONS: MATH 5540.03

FORMATS: Lecture

MATH 4650 General Relativity

CREDIT HOURS: 3

A review of differential geometry will be given followed by an introduction to the general theory of relativity. Various topics will be discussed, including: linearized theory and gravitational radiation, spherically symmetric metrics and the Schwarzschild solution, gravitational collapse, black holes, and cosmology.

PREREQUISITES: MATH 3045.03 or permission of the instructor

CROSSLISTED: MATH 5650.03, PHYC 4650.03/PHYC 5650.03

FORMATS: Lecture

MATH 4660 Theory of Computation

CREDIT HOURS: 3

See course description for CSCI 4112.03 in the Computer Science section of this calendar.

MATH 4680 Topics in Logic and Computation

CREDIT HOURS: 3

This course covers topics of current interest in logic and/or the foundations of computation. Suitable topics include: formal logic, soundness and completeness, Gödel's incompleteness theorem, formal set theory, the Zermelo-Fraenkel axioms, non-standard models, independence of axioms, lambda calculus and foundations of functional programming languages, proof theory, semantics.

CALENDAR NOTES: Please consult the instructor for the topics offered in a particular year. This course is suitable for advanced undergraduates and graduate students from both mathematics and computer science.

COREQUISITES:

Suggested prerequisites for math students are algebra or analysis at honours undergraduate level. Students from computer science should be familiar with formal language theory and concepts of programming languages. All students should be comfortable with writing mathematical proofs. When in doubt about prerequisites, please consult the instructor.

CROSSLISTED: MATH 5680.03

FORMATS: Lecture

MATH 4681 Topics in Logic

CREDIT HOURS: 3

This course covers topics of current interest in logic. Suitable topics include: formal logic, soundness and completeness, Gödel's incompleteness theorems; model theory, compactness; set theory, non-standard models; categorical logic; proof theory; type theory, proof assistants.

CALENDAR NOTES: Please consult the instructor for the topics offered in a particular year. This course is suitable for advanced undergraduates and graduate students from both mathematics and computer science.

PREREQUISITES: MATH 3032.03, or MATH 3502.03, or MATH 3031.03 and MATH 3501.03, or CSCI 3110.03 and CSCI 3136.03, or permission of the instructor.

CROSSLISTED: MATH 5681.03

FORMATS: Lecture

MATH 4682 Topics in Computation

CREDIT HOURS: 3

This course covers topics of current interest in the mathematical study of computation. Suitable topics include: the lambda calculus and foundations of functional programming languages; the Curry-Howard correspondence; denotational and operational semantics; complexity theory; quantum information and computation.

CALENDAR NOTES: Please consult the instructor for the topics offered in a particular year. This course is suitable for advanced undergraduates and graduate students from both mathematics and computer science.

PREREQUISITES: MATH 3032.03, or MATH 3502.03, or MATH 3031.03 and MATH 3501.03, or CSCI 3110.03 and CSCI 3136.03, or permission of the instructor.

CROSSLISTED: MATH 5682.03

FORMATS: Lecture

MATH 4950 Honours Research Project

CREDIT HOURS: 3

A requirement for the mathematics honours degree, this course consists of a supervised research project culminating in a written report and an oral presentation in the honours seminar. Enrolment must be approved by the mathematics honours coordinator.

CALENDAR NOTES: Students are required to take twelve additional credit hours at or above the 4000-level in addition to this one.

MATH 8891 Co-op Work-Term I

CREDIT HOURS: 0

PREREQUISITES: SCIE 2700.03

MATH 8892 Co-op Work-Term II

CREDIT HOURS: 0

Introduction

The Medical Sciences program is a 4-year Bachelor of Science aimed at students who wish to initiate studies in medical science as undergraduates. The program will introduce students to subjects such as human anatomy, physiology, neuroscience, epidemiology, and health ethics.

In the first two years of the program, students take core courses in Biology, Chemistry, Mathematics, Statistics, Psychology, Microbiology, Sociology, Neuroscience, Biochemistry, and Physiology. These courses will not only provide a solid background in basic sciences, but will prepare students for admission tests for various medical sciences disciplines (such as the MCAT, DAT, OAT, GRE), meet (or exceed) the early prerequisites for acceptance into medically related professional programs (such as Medicine, Dentistry, Pharmacy, Nursing, Physiotherapy, Optometry, Ultrasound Technology, Radiological Therapy etc.) locally and across the country, and meet (or exceed) the early prerequisites required for acceptance into biomedical sciences graduate programs at Dalhousie and across the country. In their third and fourth years, students take core and selective courses in various subjects within the medical sciences. These courses come from Pharmacology, Microbiology & Immunology, Physics, Anatomy, Pathology, Philosophy, and Community Health & Epidemiology departments. In fourth year, students will either pursue an Honours, with an associated research project, or a one-term case-based Capstone course.

Career path advising and the course selection process are critical to the success of the Medical Sciences undergraduate program. In addition to guidance with respect to health-related programs and their entry requirements, academic advising is provided so that students are aware of what courses are required should they want to enter graduate programs in the various biomedical science disciplines. Opportunities are available to concentrate in areas of special interest, explore scientific curiosities further, or fulfil professional school prerequisites. Students will graduate with a broad biomedical science background that will prepare them for a variety of clinical professional programs, graduate school, employment in the biotechnology industry, health administration, and in government.

Degree Programs

The curriculum offers core courses from 14 different departments, providing a broad background in biomedical science and a guided learning experience throughout the program. Students are also required to take a minimum of 21 credit-hours in “Selective” courses (chosen from a predetermined list provided by the program) in relevant medical sciences fields. These selective courses allow students to focus their interests in a particular area (including advanced courses in year 4), explore their interests further, and fulfil professional school prerequisites. Furthermore, for those interested, selectives will aptly prepare students in pursuit of senior research projects,

subsequently providing the necessary groundwork to be excellent candidates for graduate programs in a specialized field at Dalhousie or elsewhere in Canada.

NOTE: Most second and third year core courses in the Medical Sciences curriculum have prerequisites with minimum grade requirements in those prerequisite courses. Please consult the appropriate calendar section for these requirements.

The program also offers 21 credit hours in open "Electives", which allows students to take any course offered at Dalhousie (at the appropriate level). Students are encouraged to fulfil the Writing requirement using one or both Electives in the first year and it is recommended that students take the writing course from the English department, since some professional schools require six credit hours in ENGL courses.

Students can choose to do a concentrated Honours in their fourth year, where they have the option of completing the research project at any Dalhousie research site, provided the Medical Sciences Honours Committee approves the project and supervisor. Despite the research site where students complete the project, they will still receive an Honours degree in Medical Sciences. If students do not choose Honours, they will take a case-based Capstone course that integrates multiple medical sciences disciplines by examining 5 medically-related cases, through expert lectures, group discussions, and student presentations.

The Medical Sciences program offers the following degree options:

- BSc (Medical Sciences) Honours - 120 credit hour
- BSc (Medical Sciences) - 120 credit hour

Students also have the option of doing a [Minor](#). Core courses and required selectives may not be double-counted as Minor courses; extra selectives and electives may be used towards the minor. If a minor is added, students may find that they need to take more than 120 credit hours to complete all of their degree requirements.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with a Medical Sciences undergraduate academic advisor.

Program requirements can be seen by following the links to the right. In addition, students must satisfy the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections of this calendar.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Students applying the old academic regulations should consult the calendar of the appropriate year.

Staff

Dean

Macdonald, C.L.B., BSc (Hons), PhD (Dalhousie), Professor (Chemistry)

Assistant Dean

Wells, S. M., BSc (Western), PhD (Toronto), Associate Professor (Biomedical Engineering), joint appointment in Physics & Atmospheric Sciences

Program & Honours Coordinator

Jordan, J., BSc (St. FX), PhD (Dalhousie)

Medical Sciences Clerk

Haq-Montford, A., BA (Dalhousie)

BSc (Medical Sciences)

The Bachelor of Science (Medical Sciences) degree is a 120 credit hour program, typically completed in 4 years. It will provide an educational experience that offers a broad, interdisciplinary background in all relevant subjects in biomedical sciences. The degree also meets the general degree requirements for the Faculty of Science. This program may fulfill the Dalhousie Faculty of Graduate Studies requirements for graduate school, but may not satisfy department-specific or other school-specific graduate school entry requirements.

Requirements

In addition to the courses listed below, students must ensure that they satisfy the requirements outlined in the "[Degree Requirements](#)" section for the [College of Arts and Science](#). For the required Writing class, students can choose from the list of approved writing classes in the Academic Calendar. Before selecting a writing course, students are encouraged to consult the advising sheet available on the Medical Sciences program website, as some professional schools require an ENGL course as a prerequisite for entry.

- BIOL 2020.03: Cell Biology
- BIOL 2030.03: Genetics and Molecular Biology
- CHEM 2401.03: Introductory Organic Chemistry: Structure, Concepts of Mechanisms and Spectroscopy *and* CHEM 2402.03: Introductory Organic Chemistry: Reactivity of Functional Groups
- BIOC 2300.03: Introduction to Biochemistry
- PHYL 2044.03: Human Systems Physiology
- MICI 2100.03: Introductory Microbiology and Immunology (in-class or distance)
- PHYL 2041.03: Human Neurophysiology
- PHIL 2805.03: Ethics and Health Care: Patient Care *or* PHIL 2810.03: Ethics and Health Care: Social Policy
- SOSA 2503.03: Health and Society

3000 and 4000 Level

- MICI 3115.03: Immunology
- PHAC 3030.03: Pharmacology - The Drugs Around Us
- ANAT 3010.03: Introductory Human Anatomy
- PATH 3000.03: Introduction to Pathology
- EPAH 4010.03: Epidemiology Principles
- SCIE 4005.03: Medical Sciences Capstone

24 credit hours of Selectives, including at least 3 credit hours of Advanced Selectives

[List of Selectives and Advanced Selectives](#)

BSc (Medical Sciences) Honours

Students who want a challenging program resulting in a broad background in medical sciences, including independent research experience, may want to enrol in the Honours program. An Honours degree in the Medical Sciences program aims to prepare students for future thesis-based graduate studies in a number of medically related fields. In addition to specific core course requirements with a minimum GPA of 3.0, students must identify a faculty member who has agreed to be their research supervisor. Students will have the flexibility to do their Honours research at a Dalhousie Research site of their choice (Faculty of Science, Faculty of Medicine, Faculty of Arts & Social Sciences, or other), subject to the approval of the Honours class coordinator. All students conduct an independent research project in their final year under the supervision of a faculty member. Students must attend weekly classes, submit a satisfactory Interim Report and thesis, and deliver a satisfactory symposium presentation of the thesis research in a Medical Sciences student research forum.

Students should consult with an advisor and choose their electives and selectives carefully in their second, third and fourth years to ensure that they are prepared for Honours and potentially graduate studies in their field of interest. Students with an Honours degree will also be well prepared for entry into professional schools.

Requirements

1000 Level

- BIOL 1010.03: Principles of Biology Part I *or* BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution *with* BIOL 1011.03: Principles of Biology Part II *or* BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology *or* SCIE 1506.09 + 1507.09: Integrated Science
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity *and* CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
- MATH 1215.03: Life Sciences Calculus *or* MATH 1000.03: Differential and Integral Calculus I
- STAT 1060.03: Introductory Statistics for Science and Health Sciences *or* SCIE 1506.09 + 1507.09: Integrated Science
- PSYO 1011.03: Introduction to Psychology and Neuroscience I: From Neuron to Person *or* PSYO 1031.03: Introduction to Psychology and Neuroscience I: From Neuron to Person *with* PSYO 1012.03: Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology *or* PSYO 1032.03: Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology, *or* SCIE 1506.09 + 1507.09: Integrated Science
- PHYC 1310.03: Physics In and Around You I *or* PHYC 1310 + 1320: Physics In and Around You I & II
- Writing course (6 credit hours) *

2000 Level

- BIOL 2020.03: Cell Biology
- BIOL 2030.03: Genetics and Molecular Biology
- CHEM 2401.03: Introductory Organic Chemistry: Structure, Concepts of Mechanisms and Spectroscopy *and* CHEM 2402.03: Introductory Organic Chemistry: Reactivity of Functional Groups
- BIOG 2300.03: Introduction to Biochemistry
- PHYL 2044.03: Human Systems Physiology
- PHYL 2041.03: Human Neurophysiology
- MICI 2100.03: Introductory Microbiology and Immunology (in-class or distance)
- PHIL 2805.03: Ethics and Health Care: Patient Care *or* PHIL 2810.03: Ethics and Health Care: Social Policy
- SOSA 2503.03: Health and Society

3000 and 4000 Level

- MICI 3115.03: Immunology
- PHAC 3030.03: Pharmacology - The Drugs Around Us
- ANAT 3010.03: Introductory Human Anatomy
- PATH 3000.03: Introduction to Pathology
- EPAH 4010.03: Epidemiology Principles
- SCIE 4901.03 + SCIE 4902.03: Medical Sciences Honours Research and Thesis I and II

21 credit hours of Selectives (see list below), including at least 3 credit hours of Advanced Selectives

Required standing for graduation:

GPA 3.0 in core courses

GPA 3.70 in core and selective courses for first class

* See [Writing Course Requirements](#). Before selecting a writing course, students are encouraged to consult the advising sheet available on the Medical Sciences program website, as some professional schools require an ENGL course as a prerequisite for entry.

[List of Selectives and Advanced Selectives](#)

List of Selectives and Advanced Selectives

Medical Sciences Honours students must include in their program at least 21 credit hours in the following courses. Students not in the honours program must include at least 24 credit hours of these courses. In both cases, at least one of the Selectives must be an Advanced Selective.

Selectives:

Biochemistry and Molecular Biology

- BIOC 2610: Introductory Biochemistry Lab
- BIOC 3300: Intermediary Metabolism
- BIOC 3400: Nucleic Acid Biochemistry & Molecular Biology
- BIOC 3610: Laboratory Techniques in Biomedical Sciences
- BIOC 3700: Biomolecular Chemistry

Biology

- BIOL 2003: Animal Diversity
- BIOL 2040: Evolution
- BIOL 2060: Introductory Ecology
- BIOL 3046: Molecular Evolution
- BIOL 3050: Developmental Biology
- BIOL 3322: Parasitology
- BIOL 3326: Vertebrate Functional Morphology
- BIOL 3328: Medical Entomology (only offered in Summer)
- BIOL 3421/ANAT 3421: Comparative Vertebrate Histology
- BIOL 3430/ANAT 2160: Introduction to Human Histology

Biomedical Engineering

- BMNG 3000: Technology in Medicine

Chemistry

- CHEM 2301: Introduction to Physical Chemistry I
- CHEM 2304: Introduction to Physical Chemistry II
- CHEM 3601: Chemistry of Living Systems

Economics

- ECON 2231: Perspectives in Health Economics
- ECON 3231: Topics in Health Economics

Environmental Science

- ENVS 3400: Environment and Human Health

Humanities and Social Sciences

- ENGL 2030: Literature, Health, and Healing
- ENGL 3320: Literature and the History of Medicine
- HSTC 2102 : Origins of Modern Medicine
- HSTC 2202: The Beginnings of Western Medicine: The Birth of the Body
- HSTC 2206: Biopolitics: Human Nature In Contemporary Thought
- HSTC 2211: Introduction to History of Science I: From the Ancients to the Birth of the Modern

- HSTC 2212: Introduction to History of Science II: From the Birth of Modern to the Present
- HSTC 2350: The Body in Early Modern Europe
- HSTC 3101/CTMP 3204: Human Experiments
- HSTC 3121: In Search of the Philosopher's Stone: The History of European Alchemy
- INTD 3115: Global Health in the 21st Century
- PHIL 2805: Ethics and Health Care: Patient Care (students can only count PHIL 2805 *or* 2810 as selective and other as core ethics course)
- PHIL 2810: Ethics and Health Care: Social Policy (students can only count PHIL 2805 *or* 2810 as selective and other as core ethics course)
- PHIL 3800: Philosophy of Medicine
- SOSA 2502: Biomedicine and the Illness Experience
- SOSA 3135: The Social Organization of Health Care
- SOSA 3143: Health, Illness, and the World System
- SOSA 3145/GWST 3145: Gender and Health
- SOSA 3147: Aging Cross Culturally
- SOSA 3148: Drugs, Health, and Society
- SOSA 3403: Qualitative and Field Methods

Interprofessional Health Education

- IPHE 2201/IDHS 2201: Introduction to Aboriginal Peoples' Health and Healing

Kinesiology

- KINE 2465: Introductory Biomechanics
- KINE 3485: Psychology of Sport & Physical Activity

Mathematics

- MATH 1010: Differential and Integral Calculus II

Medical Neuroscience

- ANAT 2160/BIOL 3430: Introduction to Human Histology
- ANAT 3421/BIOL 3421: Comparative Vertebrate Histology

Microbiology and Immunology

- MICI 2400: Laboratory Methods in Microbiology and Immunology
- MICI 3114: Virology
- MICI 3119: Physiology of Prokaryotic Cell
- MICI 4115: Medical Immunology
- MICI 4218: Clinical Microbiology

Neuroscience

- NESC 2130/PSYO 2130: Introduction to Cognitive Psychology
- NESC 2570/PSYO 2570/PHYL 2570: Cellular Neuroscience
- NESC 3043/PSYO 3043: Neurobiology of Learning
- NESC 3170/PSYO 3170: Hormones and Behaviour
- NESC 3227/PSYO 3227: Principles of Human Neuropsychology
- NESC 3670: Genes, Brain and Behaviour

Physics

- PHYC 1290: Introduction to Physics
- PHYC 1320: Physics In and Around You II
- PHYC 2250: Physics of Biological and Medical Technology
- PHYC 2610: Introduction to Biomechanics

Physiology and Biophysics

- PHYL 2570: Cellular Neurophysiology
- PHYL 3120: Exercise Physiology in Health & Disease
- PHYL 3320: Human Cell Physiology
- PHYL 3420: Sensory Physiology
- PHYL 3520: Core Concepts in Medical Physiology
- PHYL 3600: Directed Project in Physiology
- PHYL 3620: Human Physiology Lab

Psychology

- PSYO 2080: Social Psychology
- PSYO 2090: Developmental Psychology
- PSYO 2130/NESC 2130: Introduction to Cognitive Psychology
- PSYO 2220: Adult Psychopathology
- PSYO 2444: Forensic Psychology
- PSYO 2770: Brain & Behaviour
- PSYO 3043/NESC 3043: Neurobiology of Learning
- PSYO 3129: Childhood Psychopathology
- PSYO 3170/NESC 3170: Hormones and Behaviour
- PSYO 3227/NESC 3227: Principles of Human Neuropsychology

Science

- SCIE 2111/2112 - Becoming a Scientist I & II
- SCIE 3100: Experiential Learning in Medical Sciences

Advanced Selectives:

Biochemistry and Molecular Biology

- BIOC 4010: Bioinformatics (offered in alternate years)
- BIOC 4302: Biochemistry of Lipids
- BIOC 4305: Mechanisms of Signal Transduction
- BIOC 4403: Genes and Genomes
- BIOC 4404: Gene Expression
- BIOC 4501: Medical Biotechnology I
- BIOC 4700: Proteins
- BIOC 4701: Enzymes
- BIOC 4835/BIOL 4035: Human Genetics

Biology

- BIOL 4020: Advanced Cell Biology
- BIOL 4035/BIOC 4835: Human Genetics

Computer Science

- CSCI 4180: Introduction to Computational Biology and Bioinformatics

- CSCI 4181: Algorithms in Bioinformatics

Humanities and Social Sciences

- PHIL 4801: Topics in Ethics and Healthcare (offered every 3-4yr)
- POLI 4260: The Politics of Health Care

Medical Neuroscience

- ANAT 4010: Advanced Human Anatomy

Microbiology and Immunology

- MICI 4027: Molecular Mechanisms of Cancer
- MICI 4033: Advanced Microbial Genetics
- MICI 4100: Processes & Mediators of Inflammation
- MICI 4114: Advanced Topics in Molecular & Medical Virology
- MICI 4116: Current Topics in Mucosal Immunology
- MICI 4302: Clinical and Molecular Immunology

Neuroscience

- NESC 3180/PSYO 3180: Psychoneuroimmunology/Ecological Immunology (offered in alternate years)
- NESC 3970/PSYO 3970: Molecular Neuroscience
- NESC 4185/PHYL 4000: Current Advances in Synaptic Function or Plasticity

Pathology

- PATH 4100: Critical Thinking in Neuropathology

Pharmacology

- PHAC 4403: Systems Pharmacology 1
- PHAC 4409: Systems Pharmacology 2

Physiology and Biophysics

- PHYL 4000/NESC 4185: Current Advances in Synaptic Function and Plasticity
- PHYL 4324: Endocrine Physiology
- PHYL 4504: Respiratory Physiology
- PHYL 4680: Cardiovascular Physiology

Psychology

- PSYO 3180/NESC 3180: Psychoneuroimmunology/Ecological Immunology
- PSYO 3970/NESC 3970: Molecular Neuroscience

Science

- SCIE 4101 & SCIE 4102: Directed Project in Medical Sciences I and II
- SCIE 4444 - Leadership in Science

Microbiology and Immunology

Location:

Introduction

Microbiologists study small cells (microorganisms) and viruses. Among other things, immunologists want to know how larger organisms (such as humans) respond to foreign objects, many of which are very small. These two disciplines are thus inextricably linked, and when taken together comprise a major strength of the Dept. Another focus of the department is cancer biology, a natural fit with other interests, as cancers can be thought of as foreign objects, and many are caused by bacteria and viruses.

Degree programs in Microbiology and Immunology at Dalhousie focus on education and training in bacteriology, virology and immunology, with an understanding that biochemistry, genetics, and cell and molecular biology are also essential elements of a comprehensive academic program. A degree in Microbiology and Immunology provides a firm foundation for future employment in a variety of laboratory environments, for the pursuit of an advanced post-graduate degree, and/or for entry into the health professions (e.g. medicine).

Degree Programs

The Department offers the following degree programs in Microbiology and Immunology

- BSc (120 credit hour) Honours (Concentrated)*
- BSc (120 credit hour) Combined Honours*
- BSc (120 credit hour) Major*
- BSc (120 credit hour) Double Major*
- BSc (90 credit hour) Minor in Microbiology and Immunology

* BSc [Co-op option](#) available

* May be combined with Minors from other disciplines.

Departmental requirements for each degree program can be seen by following the links in the menu to the right.

In addition to departmental requirements, students must satisfy the requirements outlined in the [Academic Regulations](#) and the [College of Arts and Science Degree Requirements](#) sections.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Student applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully. It is recommended that students considering an Honours or Major program consult with a Microbiology and Immunology Academic Advisor prior to registering for second year classes.

Students who participated in the Integrated Science Program in their first year should consult the Undergraduate Calendar for first year course equivalencies. The following options fulfill the first year requirements for any Microbiology and Immunology program:

- SCIE 1515.36
- SCIE 1520.30
- SCIE 1540.27
- SCIE 1505.18
- SCIE 1506.09 and SCIE 1507.09

Staff

Dean

Macdonald, C.L.B., BSc (Hons), PhD (Dalhousie), Professor (Chemistry)

Head of Department

Makrigiannis, A. P.

Advising

MicroImm.Advising@dal.ca

Professors

Duncan, R., PhD (Guelph), Graduate Studies Coordinator (Molecular Virology)

Haldane, D. J. M., MBChB (Dundee), FRCP(C) (Medical Microbiology)

Hoskin, D. W., PhD (McGill) (Tumour Immunology; Cancer Biology)

Issekutz, T. B., MD (Dalhousie), FRCP(C), Prof., Pediatrics (Lymphocytes in Autoimmune Disease)

Johnston, B., PhD (Calgary) (Inflammation and Immune Response)

Johnston, G. C., PhD (York)

Kelvin, D., PhD (Toronto) (Immunology)

Lee, S. F., PhD (Guelph) (Oral Microbiology; Microbial Pathogenesis, Mucosal Vaccines)

Makrigiannis, A. P., PhD (Dalhousie) (Natural Killer Cells in Infection and Cancer)

Marshall, J. S., PhD (Manchester) (Mast Cells in Inflammation and Cancer)

McCormick, C., PhD (UBC) (Viral Oncology)

Richardson, C. D., PhD (UBC) (Molecular Virology)

Stadnyk, A. W., PhD (McMaster) (Intestinal Inflammation; Cytokines)

Stoltz, D. B., PhD (McMaster) (Biology of Parasitic Insects; Polydnviruses)

Associate Professors

Davidson, R. J., PhD (Manitoba) (Antimicrobial Mechanisms of Action and Resistance)

Hatchette, T. F., MD (Memorial) Pathology (Clinical Virology and Influenza)

LeBlanc, J., PhD, FCCM, (ABMM) (Dalhousie) (Clinical and Molecular Microbiology)

Li, Y. H., PhD (Manitoba) (Bacteriology and Molecular Biology)

Rohde, J., PhD (British Columbia) (Bacterial Pathogenesis and Ubiquitin)

Thomas, N., PhD (Queen's) (Molecular Bacterial Pathogenesis)

Wang, J., PhD (McMaster) (Host Defense Mechanisms Against Infection and Cancer and Vaccine Development)

Assistant Professors

Boudreau, J., PhD (McMaster)

Cheng, Z., PhD (Waterloo) (Host-bacterial Interactions, Cancer Biology)

DiCara, F., PhD (Naples) (Role of Peroxisome Biogenesis in Innate Immunity)

Gujar, S., PhD (Memorial)

Kelvin, A., PhD (Queens University Belfast) (Pediatrics)

Khaspersky, D., PhD (State University of New York, Buffalo) (Host Pathogen Interaction, Influenza A virus, Cellular Stress Responses)

Senior Instructor

Murray, L. E., PhD (Dalhousie) (Molecular Genetics)

BSc (120 credit hour) Concentrated Honours in Microbiology and Immunology

Students who want a challenging program that results in a broad and in-depth background in Microbiology and Immunology, and includes an independent research experience, may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours. Honours students complete a minimum of 54 credit hours above the 1000 level in Microbiology and Immunology subject courses, with a minimum GPA of 3.0 and write a research-based Honours thesis. The Honours thesis and Qualifying Examination requirements are satisfied through completion of MICI 4901/4902.06. Certain specified courses from other departments (BIOC, BIOL, CHEM, NESC) count as MICI-subject courses (see below).

A [Co-op option](#) is available for students enrolled in a BSc Concentrated Honours in Microbiology and Immunology.

Admission to Honours

Students who wish to enrol in a Microbiology and Immunology Honours program should apply for admission after receiving their 2nd year Fall term grades. To be admitted, students must have:

- Consulted with a departmental academic advisor
- Completed the required 1000 level classes
- A GPA of B+ at the time of application

Departmental requirements

In addition to fulfilling the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections, students in a BSc Concentrated Honours program in Microbiology and Immunology must complete the following courses:

1000 level

- BIOL 1010.03: Principles of Biology Part I/BIOL 1011.03: Principles of Biology Part II or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution/BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus
- MATH 1010.03: Differential and Integral Calculus II or STAT 1060.03: Introductory Statistics for Science and Health Sciences

Or Integrated Science Program: One of SCIE 1515.36, SCIE 1520.30, SCIE 1540.27, SCIE 1505.18

2000 level

- MICI 2100.03: Introductory Microbiology and Immunology and MICI 2400.03: Laboratory Methods in Microbiology and Immunology
- BIOL 2020.03: Cell Biology and BIOL 2030.03: Genetics and Molecular Biology
- BIOC 2300.03: Introduction to Biochemistry and BIOC 2610.03: Introductory Biochemistry Lab
- CHEM 2401.03: Introductory Organic Chemistry: Structure, Concepts of Mechanisms and Spectroscopy and CHEM 2402.03: Introductory Organic Chemistry: Reactivity of Functional Groups

3000 level

- BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology
- MICI 3114.03: Virology
- MICI 3115.03: Immunology
- MICI 3119.03: Physiology of the Prokaryotic Cell

4000 level

- MICI 4901/4902.06: Honours Research and Thesis*
- One additional 4000-level MICI course
- A minimum of three additional courses from the list below, at least one of which is at the 4000 level
 - MICI 2115.03: Human Organs and Tissues, MICI 3024.03: Microscopy, MICI 3620.03: Experiential Learning in Microbiology and Immunology, MICI 4027.03: Molecular Mechanisms of Cancer, MICI 4033.03: Advanced Microbial Genetics, MICI 4100.03: Processes and Mediators of Inflammation, MICI 4114.03: Advanced Topics in Molecular and Medical Virology, MICI 4115.03: Immunology of the Host Resistance, MICI 4116.03: Current Topics in Mucosal Immunology, MICI 4118.03: Molecular Bacterial Pathogenesis, MICI 4119.03: Host Pathogen Interactions, MICI 4218.03: Clinical Microbiology, MICI 4302.03: Molecular Immunology
 - BIOC 4010.03: Bioinformatics, BIOC 4403.03: Genes and Genomes, BIOC 4404.03: Gene Expression, BIOC 4501.03: Medical Biotechnology, BIOC 4835.03/BIOL 4035.03: Human Genetics
 - BIOL 2004.03: Diversity of Life II, BIOL 3037.03 Gene Editing, and Synthetic Biology, BIOL 3101.03: Microbial Ecology, BIOL 3102.03: Microbial Eukaryotes, BIOL 3322.03: Parasitology, BIOL 4020.03 Advanced Cell Biology
 - PSYO 3180.03/NESC 3180.03: Psychoneuroimmunology/Ecological Immunology
 - FOSS 3080.03: Food Microbiology

* The Honours research thesis (MICI 4901/4902.06) is normally supervised by a faculty member from Microbiology and Immunology or from Biochemistry and Molecular Biology (including joint and cross appointments). Students who wish to undertake their honours

research project in another department must first have the project approved by the Microbiology and Immunology Undergraduate Studies Committee.

Grade requirements for Honours:

- In the following core courses, MICI 2100.03: Introductory Microbiology and Immunology, MICI 2400.03: Laboratory Methods in Microbiology and Immunology, MICI 3114.03: Virology, MICI 3115.03: Immunology, MICI 3119.03: Physiology of the Prokaryotic Cell and MICI 4901/4902.06: Honours Research and Thesis, a minimum grade of B in five and a minimum grade of B- in the sixth course. In the other MICI or required courses a grade of C or greater is required.

BSc (120 credit hour) Combined Honours in Microbiology and Immunology and another subject

Students who wish to study Microbiology and Immunology in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Microbiology and Immunology may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject.

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. The same standards and conditions for admission apply as for entry into a Concentrated Honours program (see above). In addition, students must have their program of study approved by Academic Advisors in both subject areas. Students must complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Microbiology and Immunology, this requirement is satisfied through MICI 4901/4902.06.

A [Co-op option](#) is available for students enrolled in BSc Combined Honours with Microbiology and Immunology as the primary subject.

Departmental requirements

In addition to fulfilling the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections, students in a Combined Honours program in Microbiology and Immunology and another subject must complete the following:

Microbiology and Immunology as the primary subject

- 1000-level as for Concentrated Honours (above)
- MICI 2100.03: Introductory Microbiology and Immunology and MICI 2400.03: Laboratory Methods in Microbiology and Immunology
- BIOL 2020.03: Cell Biology and BIOL 2030.03: Genetics and Molecular Biology
- CHEM 2401.03: Introductory Organic Chemistry: Structure, Concepts of Mechanisms and Spectroscopy and CHEM 2402.03: Introductory Organic Chemistry: Reactivity of Functional Groups
- BIOC 2300.03: Introduction to Biochemistry and BIOC 2610.03: Introductory Biochemistry Lab
- BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology
- MICI 3114.03: Virology, MICI 3115.03: Immunology, MICI 3119.03: Physiology of the Prokaryotic Cell
- MICI 4901/4902.06: Honours Research and Thesis
- One additional MICI course at the 4000 level

Requirements for a Combined Honours with Biochemistry & Molecular Biology as the secondary subject can be met by completing the following courses in addition to the above list:

- BIOC 3300.03: Intermediate Metabolism, BIOC 3700.03: Biomolecular Chemistry
- Two courses from BIOC 40XX, 43XX, 44XX, 45XX, or 47XX
- Three additional MICI or BIOC courses at or above the 2000 level

Microbiology & Immunology as the secondary subject

- 1000-level as for Concentrated Honours (above)
- MICI 2100.03: Introductory Microbiology and Immunology and MICI 2400.03: Laboratory Methods in Microbiology and Immunology
- BIOL 2020.03: Cell Biology and BIOL 2030.03: Genetics and Molecular Biology

- CHEM 2401.03: Introductory Organic Chemistry: Structure, Concepts of Mechanisms and Spectroscopy and CHEM 2402.03: Introductory Organic Chemistry: Reactivity of Functional Groups
- BIOC 2300.03: Introduction to Biochemistry and BIOC 2610.03: Introduction Biochemistry Lab
- BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology/MICI 3114.03: Virology, MICI 3115.03: Immunology, MICI 3119.03: Physiology of the Prokaryotic Cell
- One additional MICI or MICI-approved course at or above the 3000 level.
- One additional MICI course at the 4000 level

Grade requirements for Combined Honours:

In the following core courses, MICI 2100.03: Introductory Microbiology and Immunology, MICI 2400.03: Laboratory Methods in Microbiology and Immunology, MICI 3114.03: Virology, MICI 3115.03: Immunology, MICI 3119.03: Physiology of the Prokaryotic Cell and MICI 4901/4902.06: Honours Research and Thesis, a minimum of B in five and a minimum of B- in the sixth course. In the other MICI or required courses a grade of C or greater is required.

BSc (120 credit hour) Major in Microbiology and Immunology

The 120 credit hour Major is suited to students who want to focus on Microbiology and Immunology, but wish to have a program that is somewhat less constrained than the Honours program. Microbiology and Immunology Majors complete a minimum of 42 credit hours in program courses above the 1000 level. Certain specified courses from other departments (BIOC, BIOL, CHEM, NESC) count as program courses (see below). Research and other experiential learning opportunities are available through laboratories, and through direct research and experiential classes.

A [Co-op option](#) is available for students enrolled in a 120 credit hour BSc Major program in Microbiology and Immunology.

It is required that a student consult with a MICI departmental advisor.

Departmental requirements

In addition to fulfilling the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections, students in a Major program in Microbiology and Immunology must complete the following courses:

1000 level

- BIOL 1010.03: Principles of Biology Part I/BIOL 1011.03: Principles of Biology Part II or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution/BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus
- MATH 1010.03: Differential and Integral Calculus II or STAT 1060.03: Introductory Statistics for Science and Health Sciences

Or Integrated Science Program: One of SCIE 1515.36, SCIE 1520.30, SCIE 1540.27, SCIE 1505.18

2000 level

- MICI 2100.03: Introductory Microbiology and Immunology and MICI 2400.03: Laboratory Methods in Microbiology and Immunology
- BIOL 2020.03: Cell Biology and BIOL 2030.03: Genetics and Molecular Biology
- BIOC 2300.03: Introduction to Biochemistry and BIOC 2610.03: Introductory Biochemistry Lab
- CHEM 2401.03: Introductory Organic Chemistry: Structure, Concepts of Mechanisms and Spectroscopy and CHEM 2402.03: Introductory Organic Chemistry: Reactivity of Functional Groups

3000 level

- BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology
- MICI 3114.03: Virology
- MICI 3115.03: Immunology
- MICI 3119.03: Physiology of the Prokaryotic Cell

4000 level

- One of the following courses: MICI 4033.03: Advanced Microbial Genetics, MICI 4100.03: Processes and Mediators of Inflammation, MICI 4114.03: Advanced Topics in Molecular and Medical Virology, MICI 4115.03: Immunology of the Host Resistance, MICI 4116.03: Current Topics in Mucosal Immunology, MICI 4118.03: Molecular Bacterial Pathogenesis, MICI 4119.03: Host Pathogen Interactions, MICI 4218.03: Clinical Microbiology, or MICI 4302.03: Molecular Immunology
- Three additional credit hours in MICI-approved courses at or above the 3000 level

Grade requirements for Majors:

For all MICI or required courses you must obtain a grade of C- or better. In some cases, you will need a grade of B- as a prerequisite for entry into 3000 or 4000 level courses.

BSc (120 credit hour) Double Major in Microbiology and Immunology and another subject

The Double Major degree program allows students to combine a study of Microbiology and Immunology with another subject. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Microbiology and Immunology may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

It is recommended that students enrolled in a Double Major program consult with advisors in both subject areas.

A [Co-op option](#) is available for students enrolled in BSc Double Major with Microbiology and Immunology as the primary subject.

Departmental requirements

In addition to fulfilling the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections, students in a Double Major program in Microbiology and Immunology and another subject must complete the following set of core courses:

1000 level

- BIOL 1010.03: Principles of Biology Part I/BIOL 1011.03: Principles of Biology Part II or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution/BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus
- MATH 1010.03: Differential and Integral Calculus II or STAT 1060.03: Introductory Statistics for Science and Health Sciences

Or Integrated Science Program: One of SCIE 1515.36, SCIE 1520.30, SCIE 1540.27, SCIE 1505.18

2000 level

- MICI 2100.03: Introductory Microbiology and Immunology and MICI 2400.03: Laboratory Methods in Microbiology and Immunology
- BIOL 2020.03: Cell Biology and BIOL 2030.03: Genetics and Molecular Biology
- BIOC 2300.03: Introduction to Biochemistry and BIOC 2610.03: Introductory Biochemistry Lab
- CHEM 2401.03: Introductory Organic Chemistry: Structure, Concepts of Mechanisms and Spectroscopy and CHEM 2402.03: Introductory Organic Chemistry: Reactivity of Functional Groups

3000/4000 level

- BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology
- MICI 3114.03: Virology
- MICI 3115.03: Immunology
- MICI 3119.03: Physiology of the Prokaryotic Cell
- MICI 3XXX-4XXX (or MICI approved): one course or 6 credit hours if the second subject is Biochemistry
- One of MICI 4033.03: Advanced Microbial Genetics, MICI 4100.03: Processes and Mediators of Inflammation, MICI 4114.03: Advanced Topics in Molecular and Medical Virology, MICI 4115.03: Immunology of the Host Resistance, MICI

4116.03: Current Topics in Mucosal Immunology, MICI 4118.03: Molecular Bacterial Pathogenesis, MICI 4119.03: Host Pathogen Interactions, MICI 4218.03: Clinical Microbiology, or MICI 4302.03: Molecular Immunology

The same set of core courses is required in a Double Major with Microbiology and Immunology as the primary or secondary subject.

Grade requirements for Double Major:

For all MICI or required courses you must obtain a grade of C- or better. In some cases, you will need a grade of B- as a prerequisite for entry into 3000 or 4000 level courses.

Minor in Microbiology and Immunology

The 90 credit hour degree is suited to students who want to focus on Microbiology and Immunology, but wish to graduate in three years rather than four in the event of acceptance into a professional school that has the prerequisite of an undergraduate degree. Students will complete a minimum of 18 credit hours in Microbiology and Immunology above the 1000 level. Certain specified courses from other departments (BIOC, CHEM) are also required.

Departmental Requirements

In addition to fulfilling the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections, students in a 90 credit BSc Minor program in Microbiology and Immunology must complete the following courses:

1000 level

BIOL 1010 and 1011 or BIOL 1020 and 1021

CHEM 1011 and 1012

2000 level and above

MICI 2100.03: Introductory Microbiology and Immunology, and MICI 2400.03: Laboratory Methods in Microbiology and Immunology, plus 12 additional credit hours in MICI (or MICI-approved) courses above the 1000 level. Note that 3000 level MICI courses will, for the most part, require certain prerequisite grades within courses provided by other departments, such as BIOL 2020, BIOL 2030 and BIOC 2300.

It is required that a student considering the 90 credit hour degree consult with a MICI departmental advisor.

Contact [Microbiology and Immunology](#) for more information.

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Co-operative Education Program (Science Co-op) in Microbiology and Immunology

Co-op Academic Advisor: Dr. D.B. Stoltz (dstoltz@dal.ca)

Science Co-op is a program where academic study in a science subject is combined with paid career-related work experience. Students undertake three work-terms interspersed with their academic study terms. Science Co-op degree programs enable students to apply their knowledge directly while providing them with work experience that assists in making educated career choices.

Science Co-op is available to students in BSc (120 credit hour) Honours or Major programs in Microbiology and Immunology, or in Combined Honours or Double Major programs with Microbiology and Immunology as the primary subject. The number of students admitted into Science Co-op each year is limited. A minimum GPA of 3.3 is required for admission and for continuation in the Co-op program as is a grade of B+ in MICI 2100.03. Students must be eligible to work in Canada.

Students normally apply to join Science Co-op during their first year of study. Students must apply before April 15, and it is strongly recommended that interested students meet with their Departmental Co-op advisor early in the Winter term of their first year. If accepted into Science Co-op, students must register for, and attend the Science Co-op Seminar Series (SCIE 2800.00) in the Fall term of the year they join.

Details are available from the Microbiology and Immunology Co-op Academic Advisor and from the Co-operative Education office www.dal.ca/academics/cooperative_education.html For more information on Co-op Education in Microbiology and Immunology, please see the Department webpage www.dal.ca/academics/programs/undergraduate/mbim/what_will_i_learn/coop_work_terms.html

Minors available to students in Microbiology and Immunology

Minor programs allow students to develop subject specialties in addition to their Major or Honours subjects. Minors in other subjects are normally embedded within 120 credit hour programs (including Science Co-op).

Students in a BSc (120 credit hour) program in Microbiology and Immunology may choose to include a Minor selected from the [list of approved Minors](#). Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc in Microbiology and Immunology, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of [Faculty of Science Certificates](#) and requirements can be found at the beginning of the [Faculty of Science](#) section. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the [College of Arts and Science Degree Requirements](#) section.

Certificates of particular interest to students enrolled in a Microbiology and Immunology Major or Honours program include:

- [Certificate in Genetics](#)
- [Certificate in Medicinal Chemistry](#)

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

Course Notes

For more detailed information on the following courses please see the departmental webpage <http://microbiology.medicine.dal.ca>

NOTE: Owing to the combined pressures of student numbers and a dearth of available space, the names of students absent from the first day of course may be deleted from course lists; students are therefore advised that being signed into a course is no guarantee of continued registration.

Course Descriptions

MICI 1050 Basic Microbiology and Immunology for Pharmacy

CREDIT HOURS: 3

This course is only for pharmacy students and involves problem based learning tutorials, lectures and laboratory sessions (demonstrations and exercises). Topics include: concepts of antibiotics and immunity, basic principles of microbial structure, physiology, and genetics in relation to microbial pathogenesis. PREREQUISITES: BIOL 1010.03 or BIOL 1020.03 and BIOL 1011.03 or BIOL 1021.03 or instructor's consent
FORMATS: Lecture | Lab | Tutorial

MICI 1100 Health Science Microbiology

CREDIT HOURS: 3

An introduction to microbiology and infectious diseases only for healthcare professionals. It includes a study of the structure and physiology of microorganisms, the ways microorganisms cause disease in man and the way they affect human's well being.

CALENDAR NOTES: This course is also offered by distance education to all students.

RESTRICTIONS: This course is restricted to Nursing and Kinesiology students. It is not for students registered in the Faculty of Science.

FORMATS: Lecture

MICI 1200 Introduction to General and Oral Microbiology

CREDIT HOURS: 3

See course description in the Dental Hygiene section of the Dentistry, Law and Medicine Calendar (DEHY 2850.03).

MICI 2100 Introductory Microbiology and Immunology

CREDIT HOURS: 3

An introduction to the basic concepts of microbiology and immunology. Topics include: structure, genetics and biology of microorganisms, basic immunology and host defence mechanisms. The class is designed to interrelate the major research themes within the Department (bacteriology and microbial pathogenesis, immunology, microbial and molecular genetics, virology and cancer biology).

CALENDAR NOTES: This class is also offered by distance education with online labs.

PREREQUISITES: Grade of B- or better in BIOL 1010.03 and 1011.03, (or BIOL 1020.03 and BIOL 1021.03) and CHEM 1011.03 and CHEM 1012.03

FORMATS: Lecture | Lab | Online Delivery

MICI 2115 Human Organs and Tissues

CREDIT HOURS: 3

Using a histology approach, students learn how tissues and organs are constructed and function at the cellular level normally and in disease. The course does not cover all histology topics. Instead, the subject matter has been selected for its relevance and potential for complementing advanced courses in microbiology, immunology, physiology, and pathology.

PREREQUISITES: Grade of B- or better in BIOL 1010.03 and BIOL 1011.03 (or BIOL 1020.03 and BIOL 1021.03)

CROSSLISTED: PATH 2115.03

RESTRICTIONS: Bachelor of Medical Sciences students cannot take this course

EXCLUSIONS: ANAT 2160.03/BIOL 3430.03, PATH 3000.03

FORMATS: Lecture

MICI 2400 Laboratory Methods in Microbiology and Immunology

CREDIT HOURS: 3

An introduction to techniques in Microbiology and Immunology through a rigorous wet laboratory experience that includes training in how to explore safely and effectively the properties of viruses, bacteria and immune cells. This course is directed to students in Microbiology and Immunology, Biochemistry & Molecular Biology, and Biology programs.

COREQUISITES: BIOL 2020.03 and BIOL 2030.03

PREREQUISITES: Grade of B- or better in MICI 2100 or instructor's consent

FORMATS: Lab

MICI 3024 Microscopy

CREDIT HOURS: 3

Biological ultrastructural analysis concentrating on transmission and scanning electron microscopy. Topics include: physical and chemical principles governing technical procedures such as fixation, staining, freeze-fracture, immunocytochemistry, autoradiography, X-ray microanalysis and photography. During laboratory periods, students have the opportunity through individual projects to participate in some techniques covered in lectures.

PREREQUISITES: Grades of B- or better in MICI 2100.03 and BIOL 2020.03

CROSSLISTED: BIOL 3024.03

FORMATS: Lecture | Lab

MICI 3114 Virology

CREDIT HOURS: 3

Viruses play important roles in infectious diseases and cancer as well as in model systems for gene regulation, molecular evolution and gene therapy. Topics include: virus structure, assays, classification, gene organization and expression, host-cell interactions, cell transformation, gene therapy and molecular mechanisms of pathogenesis.

PREREQUISITES: MICI 2100.03, BIOC 2300.03, BIOL 2020.03 and BIOL 2030.03 (a minimum of B- in each of these courses). BIOC 3400.03 should be taken either prior to or concurrently with this course; the same grade requirement applies.

FORMATS: Lecture | Tutorial

MICI 3115 Immunology

CREDIT HOURS: 3

An introduction to cellular and molecular immunology and impacts in human health. Topics include: cells and tissues of the immune system, the structure and synthesis of antibodies, complement pathways, lymphocyte subsets and their functions, the genetics of the immune response and the immunologic contributions to human disease.

PREREQUISITES: MICI 2100.03, BIOC 2300.03, BIOL 2020.03 and BIOL 2030.03 (a minimum of B- in each of these courses)

FORMATS: Lecture

MICI 3119 Physiology of the Prokaryotic Cell

CREDIT HOURS: 3

An introduction to the bacterial physiological processes required for interactions with other organisms and the environment. Topics include: molecular architecture and assembly of bacterial cell components, metabolism and energy production, utilization of energy, adaptation responses to host and environmental challenges, and host-pathogen interactions.

PREREQUISITES: MICI 2100.03, BIOC 2300.03, BIOL 2020.03 and BIOL 2030.03, (a minimum of B- in each of these courses).

MICI 3620 Experiential Learning in Microbiology and Immunology

CREDIT HOURS: 3

This lab-based course is designed to give students an introduction to general lab procedures, molecular and cell biological techniques in bacterial pathogenesis, cancer cell biology, immunology, molecular genetics, or virology. In collaboration with the research supervisor, students will draft a learning agreement specifying learning outcomes and how these will be achieved. Students are expected to work an average of 7-10 hours per week in the laboratory of their research supervisor (minimum 72 hours per term). Lab research may be conducted in any laboratory that focuses on microbiology and immunology or a related discipline (e.g. cell biology, pharmacology), however the research supervisor or co-supervisor must be a member of the Department of Microbiology and Immunology.

CALENDAR NOTES: To register in this course, students will need to find a research supervisor and receive approval from the coordinator.

PREREQUISITES: MICI 2100.03, BIOC 2300.03, BIOC 2610.03, BIOL 2020.03 and BIOL 2030.03 (a minimum of B- in each of these courses). Permission of instructor required.

RESTRICTIONS: Normally restricted to students registered in a Majors or Honours degree in Microbiology and Immunology; any other students interested should consult the course coordinator.

EXCLUSIONS: The following may not be used towards MICI 3620: lab work that is part of another scheduled class, co-op workterms, and paid employment. Only one experiential learning course per degree is permitted. Students may not take MICI 3620 concurrently with MICI 4900, MICI 4700, MICI 4901, MICI 4902, or a co-op work term.

MICI 4033 Advanced Microbial Genetics

CREDIT HOURS: 3

This advanced course focuses on select aspects of bacterial gene regulation including bacterial viruses. Topics include gene transfer, transposon biology, bacterial cell signaling, activators and repressors, molecular and chemical approaches to genetic analysis and regulation of bacterial gene expression.

PREREQUISITES: Grade of B- or better in MICI 3119.03 or instructor's consent.

EXCLUSIONS: MICI 5033.03

FORMATS: Lecture

MICI 4100 Processes and Mediators of Inflammation

CREDIT HOURS: 3

This advanced course focuses on the cellular and molecular mechanisms of inflammation and consists of lectures and student presentations based on review articles and current research papers. Topics include: inflammatory mediators and receptors, complement, steroids, tissue remodeling. Current research questions and emerging treatments are emphasized.

PREREQUISITES: Grade of B+ or better in MICI 3115.03 and instructor's consent

EXCLUSIONS: MICI 5100.03, PATH 5100.03

FORMATS: Lecture | Discussion

MICI 4114 Advanced Topics in Molecular and Medical Virology

CREDIT HOURS: 3

This advanced course focuses on selected aspects of virology and consists of lectures and student presentations based on current research papers. Topics may include: viruses and innate immunity, virus interactions with host cells, zoonotic viruses, vaccines and antiviral drugs. Exact topics change from year to year. Students who consider future graduate studies and/or intend to do Honours research in virology or closely related themes (e.g. host-pathogen interactions, innate immunity) will benefit the most from taking this course.

PREREQUISITES: Students enrol in the Fall semester, but must attend the first class where final admittance is determined. Restricted enrollment based on

performance in MICI 3114.03 (minimum A- or instructor's consent)
CROSSLISTED: MICI 5114.03
FORMATS: Lecture | Discussion

MICI 4115 Medical Immunology

CREDIT HOURS: 3

This advanced course focuses on fundamental and advanced immune mechanisms involved in the host immune response to pathogens and tumor cells and consists of lectures and student presentations based on review articles and current research papers.. Topics also include: allergic inflammation and transplantation immunology.

PREREQUISITES: Minimum grade of B in MICI 3115.03 or instructor's consent

FORMATS: Lecture | Discussion

MICI 4116 Current Topics in Mucosal Immunology

CREDIT HOURS: 3

This advanced course focuses on the mucosal immune system, which maintains a state of tolerance to environmental antigens while mounting a strong immune response to infectious agents. The course consists of lectures and student presentations based on review articles and research papers. Topics include: immune mechanisms in the gastrointestinal tract and respiratory and genitourinary systems.

PREREQUISITES: MICI 3115.03 with a grade of B or better or instructor's consent

CROSSLISTED: MICI 5116.03

MICI 4118 Molecular Bacterial Pathogenesis

CREDIT HOURS: 3

This advanced course focuses on the molecular basis of bacterial pathogenesis and consists of lectures and student presentations based on landmark articles and current research papers. Topics include: the regulation of genes encoding virulence factors, the function of these factors in surface colonization, invasion, intracellular growth and toxin production.

PREREQUISITES: Grade of B or better in MICI 3119.03 or instructor's consent

EXCLUSIONS: MICI 5118.03

MICI 4119 Host Pathogen Interactions

CREDIT HOURS: 3

This is an advanced undergraduate course, focusing on how pathogens modify, disrupt or utilize cellular functions for their own purposes and the significance of these interactions in both pathogenesis and host defense. It will help students critically evaluate the scientific literature, develop hypotheses and design experiments to test these hypotheses.

PREREQUISITES: Students must have taken 2 out of 3 of the following: MICI 3114, MICI 3115, MICI 3119, or receive permission from the instructor.

Students require a B average in these classes, with a minimum B- in any one.

FORMATS: Lecture

MICI 4218 Clinical Microbiology

CREDIT HOURS: 3

This advanced course covers all aspects of clinical microbiology including bacteriology, virology, parasitology, mycology and molecular diagnostics. The emphasis will be placed on bacteriology. Topics include epidemiology and transmission, laboratory management and identification, antimicrobial testing and resistance, treatment and prevention of infectious diseases.

PREREQUISITES: Grade of B- or better in MICI 3119.03 or instructor's consent

FORMATS: Lecture

MICI 4701 Advanced Topics in Microbiology and Immunology

CREDIT HOURS: 3

This is an advanced literature review course that is not part of the regular BSc program. Approval is required from the departmental undergraduate committee.

PREREQUISITES: Permission of the Undergraduate Studies Committee and a member of the Department who will supervise the independent study program.

MICI 4702 Advanced Topics in Microbiology and Immunology

CREDIT HOURS: 3

This is an advanced literature review course that is not part of the regular BSc program. Approval is required from the departmental undergraduate committee.

PREREQUISITES: Permission of the Undergraduate Studies Committee and a member of the Department who will supervise the independent study program.

MICI 4703 Directed Research Project 1

CREDIT HOURS: 3

Students spend at least one day per week performing laboratory research in the lab of approved departmental faculty. This course is not for students in a regular BSc Honours program. Approval is required from the departmental undergraduate committee.

CALENDAR NOTES: Credit can only be given for this course if MICI 4703.03 and MICI 4704.03 are completed in consecutive terms, and partial credit cannot be given for a single term.

PREREQUISITES: Permission of the Undergraduate Studies Committee and a member of the Department who will serve as a supervisor. At least a B average for MICI 3114.03, MICI 3115.03 and MICI 3119.03.

EXCLUSIONS: MICI 4700.06

MICI 4704 Directed Research Project 2

CREDIT HOURS: 3

Students spend at least one day per week performing laboratory research in the lab of approved departmental faculty. This course is not for students in a regular BSc Honours program. Approval is required from the departmental undergraduate committee.

CALENDAR NOTES: Credit can only be given for this course if MICI 4703.03 and MICI 4704.03 are completed in consecutive terms and partial credit cannot be given for a single term.

PREREQUISITES: Permission of the Undergraduate Studies Committee and a member of the Department who will serve as supervisor. At least a B average for MICI 3114.03, MICI 3115.03, and MICI 3119.03.

EXCLUSIONS: MICI 4700.06

MICI 4901 Honours Research and Thesis 1

CREDIT HOURS: 3

MICI 4901 is followed by MICI 4902, both being required for completion of the Honours. While typically requiring original research conducted under the supervision of a faculty member, in the period of the pandemic and ahead, Honours can be conducted in 1 of 3 options: 1) If the student is permitted into the supervisor's laboratory beginning with 4901, for both terms (e.g. 4902), the project should be original research conducted at the bench. 2) If the student is not in the laboratory or conducting in silico analyses for both 4901 and 4902, (for example, not on campus) a written project will be based on research of the literature on a problem related to the supervisor's research, in consultation with the supervisor. 3) If the student is permitted into the laboratory in the (second, i.e. 4902) only, the project could be a "hybrid" of a literature review.

CALENDAR NOTES: This course must be taken consecutively with MICI 4902.03. No grade is provided until both MICI 4901.03 and MICI 4902.03 are completed.

PREREQUISITES: B average in at least three of MICI 3114.03, MICI 3115.03, MICI 3119.03 and BIOC 3400.03 with no grade lower than B- (AND instructor's permission); and a member of the department who will serve as a supervisor. Students must have completed all second year course requirements, and preferably all third year course requirements, although there may be exceptions in which one required third year course is deferred to fourth year.

EXCLUSIONS: MICI 4900.06

MICI 4902 Honours Research and Thesis 2

CREDIT HOURS: 3

MICI 4902 is a continuation of MICI 4901. While typically requiring original research conducted under the supervision of a faculty member, in the period of the pandemic and ahead, Honours can be conducted in 1 of 3 options: 1) If the student is permitted into the supervisor's laboratory beginning in fall term, for both terms, the project should be original research conducted at the bench. 2) If the student is not in the laboratory or conducting in silico analyses for both terms, a written project will be based on research of the literature on a problem related to the supervisor's research, in consultation with the supervisor. 3) If the student is permitted into the laboratory in the (second, 4902) winter term only, the project could be a "hybrid" of a literature review

CALENDAR NOTES: This course must be taken consecutively with MICI 4901.03. No grade is provided until both MICI 4901.03 and MICI 4902.03 are completed.

PREREQUISITES: B average in at least three of MICI 3114.03, MICI 3115.03, MICI 3119.03 and BIOC 3400.03 with no grade lower than B- (AND instructor's permission); and a member of the department who will serve as a supervisor. Students must have completed all second year course requirements.

EXCLUSIONS: MICI 4900.06

MICI 8891 Co-op Work Term I

CREDIT HOURS: 0

MICI 8892 Co-op Work Term II

CREDIT HOURS: 0

MICI 8893 Co-op Work Term III

Introduction

The primary goal of the field of Neuroscience is to understand the brain. Neuroscientists examine all aspects of the structure and function of nervous systems and use a variety of experimental strategies to understand them, including molecular, biochemical, behavioural, anatomical, physiological, and developmental approaches. The programs outlined below represent all of these approaches, with an emphasis on behaviour as the adaptive product of neural activity and neuroplasticity. Knowledge obtained from research in Neuroscience may be applied to a variety of human health problems, including Alzheimer's disease, Parkinson's disease, and a variety of drug- or injury-induced behavioural disorders.

A. Enrolment Limitations

Neuroscience is a popular program, and we have a high enrolment of students. Potential Major and Honours students should note that there are limitations on the number of students that can be taught in these programs in any given year. Passing introductory courses with the required grade of B- and declaring an intent to Major in Neuroscience does not guarantee a spot in any particular course. We do our best to provide spots in core required courses to students in the program; however, students are advised to register as early as possible for required courses to secure a space.

There are strict size restrictions on individual courses. Lecture courses are limited by room size. Enrolment in laboratory courses is further restricted because of equipment limitations and requirements for supervision. All Major and Honours students should carefully review program requirements and choose prerequisite courses accordingly. Laboratory courses fill rapidly, and not all laboratory courses are offered every year.

B. Enrolment of Other Students

Only Major and Honours students in Neuroscience or Psychology may enrol in NESC 2000.03, NESC 2470.03, and PSYO 2501.03, and such students are given preference in other second-year courses. All students must have at least a B- in both the introductory psychology and neuroscience courses, or a B- in the psychology and neuroscience component of the Integrated Science Program, to register in any second-year course in Neuroscience.

C. Laboratories

Neuroscience laboratory courses typically involve data collection and interpretation, and writing reports on the results. All Major and Honours students must take the second-year research methods course (NESC 2000.03) and at least two 3000-level research laboratory courses (six credit hours).

Degree Programs

The Department of Psychology and Neuroscience offers the following degree programs in Neuroscience:

- BSc (120 credit hour) Honours (Concentrated)*
- BSc (120 credit hour) Combined Honours*
- BSc (120 credit hour) Major*
- BSc (120 credit hour) Double Major*

- Minor in Neuroscience

* May be combined with Minor programs from other disciplines (except Psychology).

Departmental requirements for each degree program can be seen by following the links in the menu at the right.

In addition to departmental requirements, students must satisfy the requirements outlined in the [Academic Regulations](#) and the [College of Arts and Science Degree Requirements](#) sections.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Students applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with a Neuroscience undergraduate academic advisor.

Staff

Dean

Macdonald, C.L.B. BSc (Hons), PhD (Dalhousie), Professor (Chemistry)

Chairperson of Department

Newman, A. J., BA (Winnipeg), MSc, PhD (Oregon)

Academic Advisors

To contact an academic advisor, please go to the Psychology and Neuroscience Main Office (LSC 3263), telephone (902) 494-3417, or visit the [Psychology and Neuroscience website](#).

Professors Emeriti

Brown, R. E., BSc (Victoria), MA, PhD (Dalhousie)

Klein, R. M., BA (SUNY), MA, PhD (Oregon)

LoLordo, V. M., AB (Brown), PhD (Penn)

Meinertzhagen, I. A., BSc (Aberdeen), PhD, DSc (St. Andrews)

Mitchell, D. E., BSc, MAppSc (Melb), PhD (Berkeley)

Rusak, B., BA (Toronto), PhD (Berkeley), FRSC

Professors

Abbass, A., BSc (Ottawa), MD (Dalhousie), FRCPC (Toronto), major appointment in Psychiatry

Adamo, S., BSc (Toronto), PhD (McGill), Graduate Coordinator

Barrett, S. P., BA (St. FX), PhD (McGill)

Boe, S., BPhEd (Brock), PhD, MPT (Western), major appointment in the School of Physiotherapy

Campbell-Yeo, M., BSc, MScN (Dalhousie), PhDN (McGill), major appointment in the School of Nursing

Chambers, C. T., BSc (Dalhousie), MA, PhD (UBC), joint appointment in Pediatrics, Faculty of Science Killam Professor in Psychology

Corkum, P. V., BSc (Dalhousie), MA, PhD (OISE at Toronto)

Crowder, N. A., BSc, PhD (Alberta)

Deacon, S. H., BSc (UPEI), PhD (Oxon)

Duffy, K., BA (St. Thomas), PhD (McMaster)

Eskes, G. A., BA, PhD (Berkeley), joint appointment in Psychiatry

Finley, G. A., BSc, MD (Dalhousie), FRCPC, major appointment in Anaesthesia

Good, K., BSc (UNB), MSc, PhD (UBC), major appointment in Psychiatry

Kay-Raining Bird, E., BA (Queen's), MSc (Columbia), PhD (Univ Wisconsin - Madison), major appointment in the School of Human Communication Disorders

Kieffe, M., BA (Memorial), MSc, PhD (Alberta), major appointment in the School of Human Communication Disorders

Moore, C. L., BA, PhD (Cantab)

Newman, A. J., BA (Winnipeg), MSc, PhD (Oregon)

Perrot, T. S., BSc, PhD (Western)

Phillmore, L., BA (UWO), MA, PhD (Queen's)

Rosen, N. O., BA (Queen's), PhD (McGill)

Semba, K., BEd, MA (Tokyo), PhD (Rutgers), major appointment in Medical Neuroscience

Sherry, S. B., BA (York), MA (UBC), PhD (Saskatchewan)
Smith, I. M., BA (Dalhousie), MSc (Brown), PhD (Dalhousie), major appointment in Pediatrics, Joan and Jack Craig Chair in Autism Research
Stewart, S., BSc (Dalhousie), PhD (McGill), joint appointment in Psychiatry
Taylor-Helmick, T. L., BA (Calgary), MSc, PhD (Dalhousie)
Tibbo, P., BSc Hons. (Mt Allison), B.MEd.Sc, MD (Memorial), FRCPC, AHRMR (Alberta), major appointment in Psychiatry
Top, D., BSc Hons (Toronto), PhD (Dalhousie), major appointment in Pediatrics
Uher, R., MRCPsych (Royal College of Psychiatrists), CCT (London Deanery, UK), PhD, MUDr. (Charles Univ), major appointment in Psychiatry
Ungar, M., BA, BSW, MSW (McGill), PhD (Wilfrid Laurier), major appointment in the School of Social Work
Westwood, D. A., BSc, MA, PhD (Waterloo), major appointment in the School of Health and Human Performance

Associate Professors

Aiken, S., BA, MSc (Western), PhD (Toronto), major appointment in the School of Human Communication Disorders
Bardouille, T., BSc (Queen's), MSc (Dalhousie), PhD (Toronto) major appointment in Psychiatry
Blais, J., BA/MA/PhD (Carleton)
Bombay, A., BSc (Ottawa), MSc, PhD (Carleton), major appointment is held jointly with the School of Nursing and Psychiatry
Chorney, J., BSc (Dalhousie), MA, PhD (West Virginia), major appointment in Anesthesiology
Fisher, D., BSc (Ottawa), MSc, PhD (Carleton), major appointment in Psychiatry
Fisk, J., BSc, MA, PhD (Western), major appointment in Psychiatry
Franklin, T., BSc (King's), MSc (Dalhousie), PhD (Swiss Federal Institute of Technology)
Jacques, S., BA (McGill), MA, PhD (Toronto)
Johnson, S., BA (Kalamazoo), MSc, PhD (Victoria), Clinical PhD Program Director of Training
Meier, S., BSc, MSc (Universitat Basel, Switzerland), PhD (Ruprecht Karls Universitat, Germany)
Neyedli, H., BSc Hons (Dalhousie), MSc, PhD (Toronto), major appointment in Health and Human Performance
Robinson, L., BSc (Victoria), MA, PhD (Simon Fraser), major appointment in the School of Health and Human Performance
Weaver, I. C. G., BSc (Aberdeen), MSc (Bristol), PhD (McGill)
Yakovenko, I., BSc (Toronto), MSc (Calgary), PhD (Yale), joint appointment in Psychiatry

Assistant Professors

Cloutier, A., BA, MA (Carleton), PhD (Queens) major appointment in Rowe School of Business
Conrad, C., BA, MEC, PhD (Dalhousie), MA (Queens) major appointment in Information Management
Dithurbide, L., BA (St. Mary's), MA (Brock), PhD (Michigan State), major appointment in Health and Human Performance
Filliter, J., BSc, MSc, PhD (Dalhousie) major appointment in Pediatrics
Ghanouni, P., BSc/MSc (SBUMS), PhD (UBC) major appointment in Occupational Therapy
Hashimi, J., BSc (Punjab), MSc (Western), PhD (Toronto), major appointment in Anesthesia
Ilie, G., BSc, MA (York), PhD (Toronto), major appointment in Community Health and Epidemiology
Lee-Bagley, D., BSc (Calgary), MSc, PhD (UBC), major appointment in Family Medicine
Lovas, D., BSc, MD (Dalhousie), major appointment in Psychiatry
Pavlova, B., MSc (Palacky Univ., Czech Republic), PhD (Charles Univ., Czech Republic), DCLinPsy (Inst. of Psychiatry, King's College)
Thomas, M., BSc (St. Andrew's), MBChB (Manchester), DRCOG/MRCP-UK (Glasgow), PhD (Central Lancashire) FRCPCH FRCP, major appointment in Pediatrics
Top, D., BSc (Hons) Toronto, PhD (Dalhousie), major appointment in Pediatrics
Town, J., BSc (York), DCLinPsy (Univ of Sheffield), major appointment in Psychiatry
Weatherhead, D., COGS-P-BCH (Queen's), PhD (Waterloo)

University Teaching Fellows

Gadbois, S., BP, MAPs (Moncton), PhD (Dalhousie)
Stamp, J., BSc (Dalhousie), PhD (Cambridge)
Stevens, L., BSc (Acadia), MSc, PhD (Dalhousie), Undergraduate Program Coordinator

Senior Instructors

Borycz, J., PhD (Inst. of Pharmacology, Krakow, Poland)
Christie, J., BSc, MSc, PhD (Dalhousie)
Juckes, T., BA, MA (Natal), PhD (Dalhousie)
Mackinnon, S., BA(H) (UCCB), MSc (Wildred Laurier), PhD (Dalhousie)
Pencer, A., BSc (St. FX), MSc, PhD (Calgary)

Instructors

Caceres, L., BSc (Alberta), PhD (McGill)
Sparks, E., BA (Hons) Queen's MSc, PhD (Dalhousie)
Stratton, N., BA (Concordia), MA/PhD (Ryerson)

Adjunct Professors

Barresi, J., BSc (Brown), MA (S Calif), MS, PhD (Wisc), Psychology and Neuroscience/Dalhousie
Birnie, K., BA (Calgary), PhD (Dalhousie), Cummings School of Medicine, Univ. of Calgary
Cawley, E., BA (Hons) Ottawa, MSc, PhD (McGill), National Mental Health Strategy
Champod, A.S., BSc (Montreal), PhD (McGill) Psychology/Acadia
Chipman, K., BA (UPEI), MA, PhD (Western), Neuropsychology Service/Nova Scotia Hospital
Church, E., BA (St. John's), MA, PhD (Toronto), School Psychology/Mount Saint Vincent
Cohen, A., BA (McGill), MSc, PhD (Queen's), Psychology, UPEI
Conrad, N., BA (St. Mary's), PhD (McMaster), Psychology/Saint Mary's
Day, A., BA (Manitoba), MSc, PhD (Waterloo), Psychology/Saint Mary's
DiGiorgio, C., BA (UCCB), BSc, BEd (Dalhousie), MEd (St. FX) PHD (Univ. South Australia)
Ellsworth, C., BA (McMaster), MA, PhD (Queen's), Psychology/IWK Health Centre
Ezekiel, R., BA, MSc (Western), PhD (Toronto), Vice-Provost, Student Affairs, Dalhousie
Flanagan, H., BA, BSc (McMaster), MA, PhD (York)
Gilin Oore, D., BSc (Northern Michigan), MA, PhD (Missouri-St. Louis), Psychology/Saint Mary's
Ivanoff, J., BSc, MA (Guelph), PhD (Dalhousie), Psychology/Saint Mary's
Khoury, J., BSc (Toronto), MA, PhD (Ryerson), Psychology Mount Saint Vincent
Lackner, C., MSc (Queen's) PhD (Brock), Psychology/Mount Saint Vincent
LoLordo, V. M., AB (Brown), PhD (Penn), Psychology and Neuroscience/Dalhousie
MacNeil, B., BSc (St. FX), PhD (New Brunswick) Mental Health and Addictions/QEII Health Sciences Centre
Marchand, Y., MCS (Univ of Paris), PhD (Compiegne)
Mazerolle, E., BSc, MSc, PhD (Dalhousie), Psychology St. FX
McLaughlin, P., BSc (Toronto), MA, PhD (York) Nova Scotia Health
Mitchell, D. E., BSc, MAppSc (Melb), PhD (Berkeley), Psychology and Neuroscience/Dalhousie
Olthuis, J., BA (Smith College), PhD (Dalhousie), Psychology, UNB
Omisade, A., BA (York), PhD (Dalhousie), Neuropsychology/QEII Health Sciences Centre
Pohlmann-Eden, B., PhD, MD (Univ. of Heidelberg)
Redden, R.J., BA, MSc, PhD (Dalhousie), Psychology, Univ. of Alberta
Rigney, G., BHons, PhD (South Australia) Psychology/CQUniversity Adelaide
Robertson, E., BA (Mt. A), MA, PhD (Western), Psychology/Cape Breton Univ
Roy-Charland, A., BPs, MAPs and PhD (Moncton), Psychologie/Univ. de Moncton
Saint-Aubin, J., BA (Sherbrooke), MPs, PhD (Laval), École de psychologie/ Université de Moncton
Schellinck, H., BSc, MSc, PhD (Dalhousie), Psychology and Neuroscience/Dalhousie
Shaw, S. R., BSc (London), PhD (St. Andrews), Psychology and Neuroscience/Dalhousie
Smith, S. M., BA (Bishop's), MA, PhD (Queen's), Psychology/Saint Mary's
Vallis, T. M., BSc (Dalhousie), MA, PhD (Western), Psychology/QEII Health Sciences Centre
Watt, M., BA (St. FX), PhD (Dalhousie), Psychology/St. Francis Xavier

BSc (120 credit hour) Concentrated Honours in Neuroscience

The Honours program is intended to serve as a preparation for graduate work in Neuroscience, biological psychology, medicine, human communication disorders and related fields. Its interdisciplinary nature is reflected in the participation of faculty from several departments in the program. In the first year of study, students take courses which provide a firm grounding in the physical and biological sciences. In subsequent years, the program includes credits in courses drawn from Neuroscience, Psychology and Biology. These include a number of required core courses that emphasize the acquisition and application of laboratory skills.

Honours students complete a minimum of 54 credit hours above the 1000 level in Neuroscience, with a minimum GPA of 3.0, and write a research-based Honours thesis. The Honours Thesis and Qualifying Examination requirements, outlined in the [College of Arts and Science Honours Program Requirements](#), are satisfied through completion of NESC 4901.03 and NESC 4902.03.

Admission to Honours

Students must apply for admission to Honours programs. Students wishing to enroll in Honours in Neuroscience should consult with the Neuroscience Honours Advisor. Students may not apply for Honours before April of their third year of studies. A detailed description of the Honours application process can be found on the departmental website, www.dal.ca/psychandneuro. Admission requirements include:

- A grade of B+ (or higher) in NESC 2000.03: Methods in Experimental Psychology & Neuroscience (or equivalent)

- An average of A- (or higher) in the last six completed Neuroscience courses (excluding 1000-level courses and NESC 2000.03)
- A confirmed, eligible supervisor who has agreed to supervise the student's honours thesis

Departmental requirements

All students must fulfill the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections. In addition, students in a Concentrated Honours program in Neuroscience must complete the following:

1000 level

- PSYO 1011.03: Introduction to Psychology and Neuroscience I: From Neuron to Person (or equivalent) with a grade of B- or better
- PSYO 1012.03: Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology (or equivalent) with a grade of B- or better
- BIOL 1010.03: Principles of Biology I (or equivalent) with a grade of B- or better
- BIOL 1011.03: Principles of Biology II (or equivalent) with a grade of B- or better
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
- MATH 1215.03: Life Science Calculus (recommended) or MATH 1000.03: Differential and Integral Calculus I
- An additional three credit hours in mathematics or statistics (STAT 1060.03 recommended)

Note that, together, SCIE 1506.03 and SCIE 1507.03 are considered equivalent to all of the above.

2000 level

- NESC 2000.03: Methods in Experimental Psychology & Neuroscience (or equivalent) with a grade of B+ or better
- PSYO 2501.03: Statistical Methods I
- NESC 2470.03: Systems Neuroscience (or equivalent)
- NESC 2570.03: Cellular Neuroscience (or equivalent)
- BIOL 2020.03: Cell Biology

Plus an additional six credit hours, selected from:

- NESC 2130.03: Introduction to Cognitive Psychology
- NESC 2140.03: Learning: Conditioning & Motivation
- NESC 2150.03: Perceptual Processes
- NESC 2160.03: Animal Behaviour
- BIOC 2300.03: Introduction to Biochemistry
- BIOL 2030.03: Genetics and Molecular Biology

3000 level

Six credit hours of designated lab courses, selected from:

- NESC 3051.03: Research Methods in Sensation and Perception
- NESC 3131.03: Research Methods in Attention
- NESC 3133.03: Research Methods in Memory
- NESC 3134.03: Research Methods in Psycholinguistics
- NESC 3137.03: Research Methods in Cognitive Neuroscience
- NESC 3161.03: Measuring Behaviour
- NESC 3165.03: Neuroethology
- NESC 3370.03: Advanced Methods in Neurobiology
- NESC 3371.03: Neuronal Organization Laboratory
- NESC 3440.03: Neuroanatomy
- NESC 3505.03: Neural Data Science
- NESC 3100.03/NESC 3101.03 Independent Research Project (Note: The full-year Independent Research Project may only be used to fulfill **three-credit hours of 'laboratory courses'**)

An additional six credit hours, selected from:

- NESC 3162.03: Advanced Animal Behaviour
- NESC 3170.03: Hormones and Behaviour
- NESC 3180.03: Psychoneuroimmunology/Ecological Immunology
- NESC 3190.03: Psycholinguistics
- NESC 3227.03: Principles of Human Neuropsychology
- NESC 3237.03: Drugs and Behaviour
- NESC 3264.03: The Science of Sleep
- NESC 3270.03: Developmental Neuroscience
- NESC 3271.03: Developmental Origins of Health and Disease
- NESC 3670.03: Genes, Brain and Behaviour
- NESC 3770.03: Behavioural Neuroscience
- NESC 3970.03: Molecular Neuroscience
- BIOL 3020.03: Advanced Cell Biology
- PATH 4100.03: Critical Thinking in Neuropathology
- PHAC 3001.03: Pharmacology I (*discontinued 21/22*)
- PHAC 3030.03: Pharmacology: The Drugs Around Us
- PHAC 4001.03: Pharmacology I (*discontinued 21/22*)
- PHAC 4403.03: Systems Pharmacology I
- PHAC 4409.03: Systems Pharmacology II
- PHYL 3420.03: Sensory Physiology

4000 level

- NESC 4901.03: Honours Foundation (a grade of B- or better is required to continue to NESC 4902.03)
- NESC 4902.03: Honours Thesis
- PSYO 3502.03: Statistical Methods II
- Six credit hours of 4000-level NESC or PSYO seminar courses (the following courses may also count toward this requirement: BIOC 4301.03, BIOL 4510.03, PATH 4100.03, PHAC 4403.03, PHAC 4409.03)

Plus six additional credit hours of 3000/4000-level NESC courses (the following courses may also count toward this requirement: PHAC 3001.03, PHAC 3030.03, PHAC 4403.03, PHAC 4409.03, PHYL 3420.03)

Other regulations

- Courses that are counted towards the Honours program requirements must have a minimum grade of C.

BSc (120 credit hour) Combined Honours in Neuroscience and another subject

Students who wish to study Neuroscience in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be from any discipline in the Faculty of Science (other than Psychology), the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Neuroscience may be the primary subject (with a minimum of 45 credit hours beyond the 1000 level), or the secondary subject (30 credit hours).

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. Students must have their program of study approved by Academic Advisors in both subject areas. As outlined in the [College of Arts and Science Honours Program Requirements](#), students complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Neuroscience, this requirement is satisfied through completion of NESC 4901.03 and NESC 4902.03.

Departmental requirements

In addition to fulfilling the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections, students in a Combined Honours program in Neuroscience and another subject must complete the following:

1000 level (same whether Neuroscience is primary or secondary):

- PSYO 1011.03: Introduction to Psychology and Neuroscience I: From Neuron to Person (or equivalent) with a grade of B- or better
- PSYO 1012.03: Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology (or equivalent) with a grade of B- or better
- BIOL 1010.03: Principles of Biology I (or equivalent) with a grade of B- or better
- BIOL 1011.03: Principles of Biology II (or equivalent) with a grade of B- or better
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
- MATH 1215.03: Life Science Calculus (recommended) or MATH 1000.03: Differential and Integral Calculus I
- An additional three credit hours in mathematics or statistics (STAT 1060.03 recommended)

Note that, together, SCIE 1506.03 and SCIE 1507.03 are considered equivalent to all of the above.

Neuroscience as the primary subject

2000 level

- NESC 2000.03: Methods in Experimental Psychology & Neuroscience (or equivalent) with a grade of B+ or better
- PSYO 2501.03: Statistical Methods I
- NESC 2470.03: Systems Neuroscience (or equivalent)
- NESC 2570.03: Cellular Neuroscience (or equivalent)
- BIOL 2020.03: Cell Biology (if the student's primary or secondary degree also requires BIOL 2020.03, the student must take an alternative three credit hour NESC elective at the 2000 level in place of this requirement)
- An additional three credit hours of NESC courses at the 2000-level or above

3000 level

Six credit hours of designated lab courses, selected from:

- NESC 3051.03: Research Methods in Sensation and Perception
- NESC 3131.03: Research Methods in Attention
- NESC 3133.03: Research Methods in Memory
- NESC 3134.03: Research Methods in Psycholinguistics
- NESC 3137.03: Research Methods in Cognitive Neuroscience
- NESC 3161.03: Measuring Behaviour
- NESC 3165.03: Neuroethology
- NESC 3370.03: Advanced Methods in Neurobiology
- NESC 3371.03: Neuronal Organization Laboratory
- NESC 3440.03: Neuroanatomy
- NESC 3505.03: Neural Data Science
- NESC 3100.03/NESC 3101.03 Independent Research Project (Note: The full-year Independent Research Project may only be used to fulfill **three-credit hours of 'laboratory courses'**)

An additional three credit hours, selected from:

- NESC 3162.03: Advanced Animal Behaviour
- NESC 3170.03: Hormones and Behaviour
- NESC 3180.03: Psychoneuroimmunology/Ecological Immunology
- NESC 3190.03: Psycholinguistics
- NESC 3227.03: Principles of Human Neuropsychology
- NESC 3237.03: Drugs and Behaviour
- NESC 3264.03: The Science of Sleep
- NESC 3270.03: Developmental Neuroscience
- NESC 3271.03: Developmental Origins of Health and Disease
- NESC 3670.03: Genes, Brain and Behaviour
- NESC 3770.03: Behavioural Neuroscience
- NESC 3970.03: Molecular Neuroscience
- BIOL 3020.03: Advanced Cell Biology
- PATH 4100.03: Critical Thinking in Neuropathology

- PHAC 3001.03: Pharmacology I (*discontinued 21/22*)
- PHAC 3030.03: Pharmacology: The Drugs Around Us
- PHAC 4001.03: Pharmacology I (*discontinued 21/22*)
- PHAC 4403.03: Systems Pharmacology I
- PHAC 4409.03: Systems Pharmacology II
- PHYL 3420.03: Sensory Physiology

4000 level

- NESC 4901.03: Honours Foundation (a grade of B- or better is required to continue to NESC 4902.03)
- NESC 4902.03: Honours Thesis
- PSYO 3502.03: Statistical Methods II
- Six credit hours of 4000-level NESC or PSYO seminar courses (the following courses may also count toward this requirement: BIOC 4301.03, BIOL 4510.03, PATH 4100.03, PHAC 4403.03, PHAC 4409.03)

Neuroscience as the secondary subject

2000 level

- NESC 2000.03: Methods in Experimental Psychology & Neuroscience (or equivalent) with a grade of B+ or better
- PSYO 2501.03: Statistical Methods I
- NESC 2470.03: Systems Neuroscience (or equivalent)
- NESC 2570.03: Cellular Neuroscience (or equivalent)
- BIOL 2020.03: Cell Biology (if the student's primary or secondary degree also requires BIOL 2020.03, the student must take an alternative three credit hour NESC elective at the 2000 level in place of this requirement)

3000/4000 level

Six credit hours of designated lab courses, selected from:

- NESC 3051.03: Research Methods in Sensation and Perception
- NESC 3131.03: Research Methods in Attention
- NESC 3133.03: Research Methods in Memory
- NESC 3134.03: Research Methods in Psycholinguistics
- NESC 3137.03: Research Methods in Cognitive Neuroscience
- NESC 3161.03: Measuring Behaviour
- NESC 3165.03: Neuroethology
- NESC 3370.03: Advanced Methods in Neurobiology
- NESC 3371.03: Neuronal Organization Laboratory
- NESC 3440.03: Neuroanatomy
- NESC 3505.03: Neural Data Science
- NESC 3100.03/NESC 3101.03 Independent Research Project (Note: The full-year Independent Research Project may only be used to fulfill **three-credit hours of 'laboratory courses'**)

Plus 12 additional credit hours of 3000/4000-level NESC courses (the following courses may also count toward this requirement: BIOL 3020.03, PATH 4100.03, PHAC 3001.03, PHAC 3030.03, PHAC 4001.03, PHAC 4403.03, PHAC 4409.03, PHYL 3420.03)

Other regulations

- Courses that are counted towards the Honours program requirements must have a minimum grade of C.

BSc (120 credit hour) Major in Neuroscience

The 120 credit hour Major is suited to students who want to focus on Neuroscience, but wish to have a program that is somewhat less constrained than the Honours program. It provides a four-year survey of Neuroscience, and is designed for students not anticipating subsequent graduate-level training in Neuroscience or related disciplines. Neuroscience Majors complete a minimum of 45 credit hours in Neuroscience courses above the 1000 level and do not have thesis (or related) requirements.

Students should plan their programs carefully and, if required, obtain advice from an academic advisor. Advisors can be consulted by visiting the [Psychology and Neuroscience website](#) or by contacting the Psychology and Neuroscience Main Office (Life Sciences Centre, Room 3263 or 902-494-3417).

Departmental requirements

All students must fulfill the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections of this calendar. In addition, students in a Major program in Neuroscience must complete the following:

1000 level

- PSYO 1011.03: Introduction to Psychology and Neuroscience I: From Neuron to Person (or equivalent) with a grade of B- or better
- PSYO 1012.03: Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology (or equivalent) with a grade of B- or better
- BIOL 1010.03: Principles of Biology I (or equivalent) with a grade of B- or better
- BIOL 1011.03: Principles of Biology II (or equivalent) with a grade of B- or better
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
- MATH 1215.03: Life Science Calculus (recommended) or MATH 1000.03: Differential and Integral Calculus I
- An additional three credit hours in mathematics or statistics (STAT 1060.03 recommended)

Note that, together, SCIE 1506.03 and SCIE 1507.03 are considered equivalent to all of the above.

2000 level

- NESC 2000.03: Methods in Experimental Psychology & Neuroscience (or equivalent)
- PSYO 2501.03: Statistical Methods I
- NESC 2470.03: Systems Neuroscience (or equivalent)
- NESC 2570.03: Cellular Neuroscience (or equivalent)
- BIOL 2020.03: Cell Biology

Plus an additional six credit hours, selected from:

- NESC 2130.03: Introduction to Cognitive Psychology
- NESC 2140.03: Learning: Conditioning & Motivation
- NESC 2150.03: Perceptual Processes
- NESC 2160.03: Animal Behaviour
- BIOC 2300.03: Introduction to Biochemistry
- BIOL 2030.03: Genetics and Molecular Biology

3000/4000 level

Six credit hours of designated lab courses, selected from:

- NESC 3051.03: Research Methods in Sensation and Perception
- NESC 3131.03: Research Methods in Attention
- NESC 3133.03: Research Methods in Memory
- NESC 3134.03: Research Methods in Psycholinguistics
- NESC 3137.03: Research Methods in Cognitive Neuroscience
- NESC 3161.03: Measuring Behaviour
- NESC 3165.03: Neuroethology
- NESC 3370.03: Advanced Methods in Neurobiology
- NESC 3371.03: Neuronal Organization Laboratory
- NESC 3440.03: Neuroanatomy
- NESC 3505.03: Neural Data Science
- NESC 3100.03/NESC 3101.03 Independent Research Project (Note: The full-year Independent Research Project may only be used to fulfill **three-credit hours of 'laboratory courses'**)

An additional six credit hours, selected from:

- NESC 3162.03: Advanced Animal Behaviour
- NESC 3170.03: Hormones and Behaviour
- NESC 3180.03: Psychoneuroimmunology/Ecological Immunology
- NESC 3190.03: Psycholinguistics
- NESC 3227.03: Principles of Human Neuropsychology
- NESC 3237.03: Drugs and Behaviour
- NESC 3264.03: The Science of Sleep
- NESC 3270.03: Developmental Neuroscience
- NESC 3271.03: Developmental Origins of Health and Disease
- NESC 3670.03: Genes, Brain and Behaviour
- NESC 3770.03: Behavioural Neuroscience
- NESC 3970.03: Molecular Neuroscience
- BIOL 3020.03: Advanced Cell Biology
- PATH 4100.03: Critical Thinking in Neuropathology
- PHAC 3001.03: Pharmacology I (*discontinued 21/22*)
- PHAC 3030.03: Pharmacology: The Drugs Around Us
- PHAC 4001.03: Pharmacology I (*discontinued 21/22*)
- PHAC 4403.03: Systems Pharmacology I
- PHAC 4409.03: Systems Pharmacology II
- PHYL 3420.03: Sensory Physiology

An additional 12 credit hours of 3000/4000-level NESC courses. The following courses may also be used toward this requirement:

- BIOL 3020.03: Advanced Cell Biology
- PATH 4100.03: Critical Thinking in Neuropathology
- PHAC 3001.03: Drugs and Society
- PHAC 3030.03: Pharmacology: The Drugs Around Us
- PHAC 4403.03: Pharmacology I
- PHAC 4409.03: Pharmacology II
- PHYL 3420.03: Sensory Physiology
- BIOL 4510.03: Cultural Evolution

BSc (120 credit hour) Double Major in Neuroscience and another subject

The Double Major degree program allows students to combine the study of Neuroscience with another subject. The other subject may be from any discipline in the Faculty of Science (other than Psychology), the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Neuroscience may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

Students enrolled in a Double Major program must have their program of study approved by advisors in both subject areas.

Departmental requirements

All students must fulfill the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections of this calendar. In addition, students in a Double Major program in Neuroscience and another subject must complete the following:

1000 level (same whether Neuroscience is primary or secondary):

- PSYO 1011.03: Introduction to Psychology and Neuroscience I: From Neuron to Person (or equivalent) with a grade of B- or better
- PSYO 1012.03: Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology (or equivalent) with a grade of B- or better
- BIOL 1010.03: Principles of Biology I (or equivalent) with a grade of B- or better
- BIOL 1011.03: Principles of Biology II (or equivalent) with a grade of B- or better
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium

- MATH 1215.03: Life Science Calculus (recommended) or MATH 1000.03: Differential and Integral Calculus I
- An additional three credit hours in mathematics or statistics (STAT 1060.03 recommended)

Note that, together, SCIE 1506.03 and SCIE 1507.03 are considered equivalent to all of the above.

2000 level (same whether Neuroscience is primary or secondary):

- NESC 2000.03: Methods in Experimental Psychology & Neuroscience (or equivalent)
- PSYO 2501.03: Statistical Methods I
- NESC 2470.03: Systems Neuroscience (or equivalent)
- NESC 2570.03: Cellular Neuroscience (or equivalent)
- BIOL 2020.03: Cell Biology (if the student's primary or secondary degree also requires BIOL 2020.03, the student must take an alternative three credit hour NESC elective at the 2000 level in place of this requirement)
- An additional three credit hours of NESC courses at the 2000-level or above

Neuroscience as the PRIMARY subject

3000/4000 level

Six credit hours of designated lab courses, selected from:

- NESC 3051.03: Research Methods in Sensation and Perception
- NESC 3131.03: Research Methods in Attention
- NESC 3133.03: Research Methods in Memory
- NESC 3134.03: Research Methods in Psycholinguistics
- NESC 3137.03: Research Methods in Cognitive Neuroscience
- NESC 3161.03: Measuring Behaviour
- NESC 3165.03: Neuroethology
- NESC 3370.03: Advanced Methods in Neurobiology
- NESC 3371.03: Neuronal Organization Laboratory
- NESC 3440.03: Neuroanatomy
- NESC 3505.03: Neural Data Science
- NESC 3100.03/NESC 3101.03 Independent Research Project (Note: The full-year Independent Research Project may only be used to fulfill **three-credit hours of 'laboratory courses'**)

An additional six credit hours, selected from:

- NESC 3162.03: Advanced Animal Behaviour
- NESC 3170.03: Hormones and Behaviour
- NESC 3180.03: Psychoneuroimmunology/Ecological Immunology
- NESC 3190.03: Psycholinguistics
- NESC 3227.03: Principles of Human Neuropsychology
- NESC 3237.03: Drugs and Behaviour
- NESC 3264.03: The Science of Sleep
- NESC 3270.03: Developmental Neuroscience
- NESC 3271.03: Developmental Origins of Health and Disease
- NESC 3670.03: Genes, Brain and Behaviour
- NESC 3770.03: Behavioural Neuroscience
- NESC 3970.03: Molecular Neuroscience
- BIOL 3020.03: Advanced Cell Biology
- PATH 4100.03: Critical Thinking in Neuropathology
- PHAC 3001.03: Pharmacology I (*discontinued 21/22*)
- PHAC 3030.03: The Drugs Around Us
- PHAC 4001.03: Pharmacology I (*discontinued 21/22*)
- PHAC 4403.03: Systems Pharmacology I
- PHAC 4409.03: Systems Pharmacology II
- PHYL 3420.03: Sensory Physiology

An additional six credit hours of 3000/4000-level NESC courses (the following courses may also count toward this requirement: PHAC 3001.03, PHAC 3030.03, PHAC 4403.03, PHAC 4409.03, PHYL 3420.03)

Neuroscience as the **SECONDARY** subject

3000/4000 level

Six credit hours of designated lab courses, selected from:

- NESC 3051.03: Research Methods in Sensation and Perception
- NESC 3131.03: Research Methods in Attention
- NESC 3133.03: Research Methods in Memory
- NESC 3134.03: Research Methods in Psycholinguistics
- NESC 3137.03: Research Methods in Cognitive Neuroscience
- NESC 3161.03: Measuring Behaviour
- NESC 3165.03: Neuroethology
- NESC 3370.03: Advanced Methods in Neurobiology
- NESC 3371.03: Neuronal Organization Laboratory
- NESC 3440.03: Neuroanatomy
- NESC 3505.03: Neural Data Science
- NESC 3100.03/NESC 3101.03 Independent Research Project (Note: The full-year Independent Research Project may only be used to fulfill **three-credit hours of 'laboratory courses'**)

Plus 12 additional credit hours of 3000/4000-level NESC courses (the following courses may also count toward this requirement: BIOL 3020.03, PATH 4100.03, PHAC 3001.03, PHAC 3030.03, PHAC 4001.03, PHAC 4403.03, PHAC 4409.03, PHYL 3420.03)

Minor in Neuroscience

This Minor is available to non-Neuroscience/Psychology students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science, or Bachelor of Science (Medical Science) program.

Requirements

- A minimum of 18, to a maximum of 36, credit hours in Neuroscience courses at the 2000 level or higher, with a maximum of 6 credit hours from NESC-equivalent courses (e.g., BIOC 2300.03, BIOL 2030.03).
- Note that NESC 2000.03: Methods in Experimental Psychology and Neuroscience, NESC 2470.03: Systems Neuroscience, and PSYO 2501.03: Statistical Methods I, are restricted to students in a Major/Honours program in Neuroscience or Psychology. However, if a student has completed these courses and switches from a major to a minor, these credits can be used to fulfill the requirements of the minor.

Contact [Neuroscience](#) for more information.

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Minors available to students in Neuroscience

Minor programs allow students to develop subject specialties in addition to their Major or Honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs (including Science Co-op).

Students in a BSc (120 credit hour) program in Neuroscience may choose to include a Minor selected from the [list of approved Minors](#) (except Psychology). Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc in Neuroscience, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of [Faculty of Science Certificates](#) and requirements can be found at the beginning of the [Faculty of Science](#) section. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the [College of Arts and Science Degree Requirements](#) section.

Certificates of particular interest to students enrolled in a BSc in Neuroscience include:

- [Certificate in Animal Behaviour](#)
- [Certificate in Science Leadership and Communication](#)
- [Certificate in Neurotechnology](#)

BSc/BEng Concurrent Program

Students wishing to combine their interest in Neuroscience with a degree in Engineering may choose a BSc/BEng Concurrent Program. Students take courses toward, and complete the requirements for a BSc 120 credit hour Major in Neuroscience, at the same time as they fulfill their BEng requirements. Such a program normally takes 5 years (or longer) to complete. Interested students should see undergraduate advisors from Neuroscience and from the Faculty of Engineering in their first year of study.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

Course Notes

4000-Level Seminars

These seminars are intended for fourth-year Honours students in Neuroscience or Psychology. Third-year students may be eligible provided they obtain permission from the instructor, and the needs of all the Honours students have been met. Seminar courses offered, and the topics covered, vary from year to year. Go to the departmental website (www.dal.ca/psychandneuro) for more detail about course offerings and the topics to be covered in the current academic year.

Course Descriptions

NESC 2000 Methods in Experimental Psychology and Neuroscience

CREDIT HOURS: 3

This course provides a thorough grounding in scientific research methods used by experimental psychologists and neuroscientists. Lectures explore concepts, methods, and analytic tools employed to investigate human and animal behaviour and neurophysiology. Students also complete assignments and write reports on a series of supervised laboratory experiments to illustrate concepts presented in lectures.

CALENDAR NOTES: Restricted to students registered in Neuroscience Major or Honours programs. It is highly recommended that students take PSYO 2501.03, Statistical Methods I, concurrently with NESC 2000.03. Students must attend the first lecture section.

PREREQUISITES: (PSYO 1011.03 or PSYO 1031.03 or equivalent) and (PSYO 1012.03 or PSYO 1032.03 or equivalent) with a grade of B- or better, OR SCIE 1506.09/1507.09 or equivalent with a grade of B- or better in the Psychology portion.

CROSSLISTED: PSYO 2000.03

RESTRICTIONS: Neuroscience Majors

EXCLUSIONS: NESC 2007.03

FORMATS: Lecture | Lab

NESC 2130 Introduction to Cognitive Psychology

CREDIT HOURS: 3

Lectures focus on the processes involved in transforming sensory information into the meaningful everyday world that we know. Initially, emphasis is on the visual system, and how information within that system is structured and organized, followed by a consideration of the character of internal representations

used in thinking and remembering.

PREREQUISITES: PSYO 1011.03 (or PSYO 1021.03 or PSYO 1031.03) and PSYO 1012.03 (or PSYO 1022.03 or PSYO 1032.03); OR SCIE 1506.09/1507.09 (or SCIE1505X/Y.18). All prerequisite courses must have a grade of B- or better.

CROSSLISTED: PSYO 2130.03

FORMATS: Lecture

NESC 2140 Learning: Conditioning and Motivation

CREDIT HOURS: 3

Lectures focus on several goals: (1) providing general principles of learning; (2) understanding the behaviour of particular species; (3) direct application to human problems. Emphasis is on understanding why researchers in animal learning do what they are currently doing (given the goals and the historical context).

PREREQUISITES: PSYO 1011.03 (or PSYO 1021.03 or PSYO 1031.03) and PSYO 1012.03 (or PSYO 1022.03 or PSYO 1032.03); OR SCIE 1506.09/1507.09 (or SCIE1505X/Y.18). All prerequisite courses must have a grade of B- or better.

CROSSLISTED: PSYO 2140.03

FORMATS: Lecture

NESC 2150 Perceptual Processes

CREDIT HOURS: 3

Perception deals with the way in which our senses provide us with information about our environment. This course focuses on the process by which sensory experiences are coded, how they are interpreted by the nervous system, and how experience modifies perception.

PREREQUISITES: PSYO 1011.03 (or PSYO 1021.03 or PSYO 1031.03) and PSYO 1012.03 (or PSYO 1022.03 or PSYO 1032.03); OR SCIE 1506.09/1507.09 (or SCIE1505X/Y.18) OR BIOL 1010.03 (or BIOL 1020.03) and BIOL 1011.03 (or BIOL 1021.03). All prerequisite courses must have a grade of B- or better.

CROSSLISTED: PSYO 2150.03

EXCLUSIONS: NESC/PSYO 3005.03

FORMATS: Lecture

NESC 2160 Animal Behaviour

CREDIT HOURS: 3

Using concepts from behavioural biology and psychology, animal behaviourists attempt to explain why animals behave the way they do. The course examines topics such as mating and social systems, mate choice, the evolution of behaviour, and animal communication. The behaviour of a wide range of animals is studied.

PREREQUISITES: PSYO 1011.03 (or PSYO 1021.03 or PSYO 1031.03) and PSYO 1012.03 (or PSYO 1022.03 or PSYO 1032.03), each with a grade of B- or better; OR SCIE 1506.09/1507.09 (or SCIE1505X/Y.18), each with a grade of B- or better; OR BIOL 1010.03 or BIOL 1020.03 and BIOL 1011.03 or BIOL 1021.03, each with a grade of C or better.

CROSSLISTED: PSYO 2160.03

FORMATS: Lecture

NESC 2470 Systems Neuroscience

CREDIT HOURS: 3

This lecture class examines the brain's role in controlling experience and behaviour in both animals and humans. The course will focus on the functional anatomy of several psychological systems, in particular the brain pathways involved in sensation, perception, movement, motivation, mood, memory, sleep, emotion, and language. There will be emphasis on recent research findings and understanding methodology for asking questions in neuroscience.

CALENDAR NOTES: Restricted to students registered in Neuroscience or Psychology Major or Honours programs.

PREREQUISITES: Introduction to Psychology I (PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03) and Introduction to Psychology II (PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03) EACH with a grade of B- or better, OR SCIE 1506.09 and SCIE 1507.09 EACH with a grade of B- or better or SCIE 1505X/Y.18 with a grade of B- or better.

CROSSLISTED: PSYO 2470.03

RESTRICTIONS: Restricted to students registered in Neuroscience or Psychology Major or Honours programs.

EXCLUSIONS: PSYO 2770.03, PHYL 2041.03

FORMATS: Lecture

NESC 2570 Cellular Neuroscience

CREDIT HOURS: 3

This course explores the brain at the neuronal level. Material covered includes: the ionic basis of resting potentials; the electrical activity of neurons; synaptic transmission and plasticity; synthesis and action of synaptic transmitters; and drug actions. Cellular phenomena relevant to healthy and neurologically-dysfunctional systems are also discussed.

PREREQUISITES: Introduction to Psychology I (PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03) and Introduction to Psychology II (PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03) EACH with a grade of B- or better, or Principles of Biology I (BIOL 1010.03 or BIOL 1020.03) and Principles of Biology II (BIOL 1011.03 or BIOL 1021.03) EACH with a grade of B- or better, OR SCIE 1506.09 and SCIE 1507.09 EACH with a grade of B- or better, or SCIE

1505X/Y.18 with a grade of B- or better.
CROSSLISTED: PSYO 2570.03, PHYL 2570.03
FORMATS: Lecture

NESC 3001 Directed Research in Neuroscience

CREDIT HOURS: 3

Students work on single-term project under the supervision of faculty advisor. Requirements include a minimum grade of B in NESC 2000.03 (or PSYO 2000.03), an overall B+ (GPA 3.30) average in all other Psychology courses, and securing a faculty advisor to supervise the research project. Note: This course cannot be used to fulfill the department's research laboratory requirement. Coordinator permission required - contact: pnistud@dal.ca

CALENDAR NOTES: This course provides 3-credit hours of directed research. Students wanting a full-year research experience in a single lab with single project, should register for NESC 3100.03 / NESC 3101.03.

PREREQUISITES: NESC 2000.03 or PSYO 2000.03, AND PSYO 2501.03 and previous or concurrent enrolment in two other 3000-level courses.

CROSSLISTED: PSYO 3001.03

EXCLUSIONS: NESC 3000.06, PSYO 3000.06, NESC 3100.03, NESC 3101.03, PSYO 3100.03, PSYO 3101.03

FORMATS: Lab

NESC 3002 Directed Research in Neuroscience

CREDIT HOURS: 3

Students work on single-term project under the supervision of faculty advisor. Requirements include a minimum grade of B in NESC 2000.03, an overall B+ (GPA 3.30) average in all other Neuroscience courses, and securing a faculty advisor to supervise the research project. Note: This course cannot be used to fulfill the department's research laboratory requirement. Coordinator permission required - contact: pnistud@dal.ca

CALENDAR NOTES: This course provides 3-credit hours of directed research. Students wanting a full-year research experience in a single lab with single project, should register for PSYO 3100.03 and PSYO 3101.03.

PREREQUISITES: NESC 2000.03 or PSYO 2000.03, PSYO 2501.03, previous or concurrent enrolment in two other Psychology or Neuroscience 3000-level courses, and Coordinator's consent.

EXCLUSIONS: PSYO 3000.06, NESC 3000.06, PSYO 3100.03, PSYO 3101.03, NESC 3100.03, NESC 3101.03

FORMATS: Lab

NESC 3011 Experiential Learning in Science Communication I

CREDIT HOURS: 3

An experiential learning class for suitably-qualified senior students. This is a fundamentally 'learn by doing' course in which students have the opportunity to develop and consolidate teaching and communications skills in Psychology and Neuroscience. Students develop these skills through a series of communication-based projects, in-class instruction, and preparing, delivering, and marking lab materials for PSYO 1011.03 and PSYO 1012.03 lab groups (approx. 25 students). SIGNATURE REQUIRED.

CALENDAR NOTES: This course must be taken in the same academic year as NESC 3012.03 and no credit can be given for one course without the other. A grade will be given for NESC 3011.03 only after NESC 3012.03 is completed.

PREREQUISITES: B+ or better in NESC 2007.03 (or equivalent), advanced courses in Psychology or Neuroscience, and Instructor's consent.

CROSSLISTED: PSYO 3011.03

EXCLUSIONS: PSYO 3010.06

FORMATS: Lecture | Lab | Seminar

NESC 3012 Experiential Learning in Science Communication II

CREDIT HOURS: 3

An experiential learning class for suitably-qualified senior students. This is a fundamentally 'learn by doing' course in which students have the opportunity to develop and consolidate teaching and communications skills in Psychology and Neuroscience. Students develop these skills through a series of communication-based projects, in-class instruction, and preparing, delivering, and marking lab materials for PSYO1011.03 and PSYO1012.03 lab groups (approx. 25 students). SIGNATURE REQUIRED.

CALENDAR NOTES: This course must be taken after, and in conjunction with, NESC 3011.03 in the same academic year and no credit can be given for one course without the other. A grade will be given for PSYO 3011.03 only after PSYO 3012.03 is completed.

PREREQUISITES: NESC 3011.03

CROSSLISTED: PSYO 3012.03

EXCLUSIONS: NESC 3010.06

FORMATS: Lecture | Lab | Seminar

NESC 3051 Research Methods in Sensation and Perception

CREDIT HOURS: 3

A hands-on course that explores sensory perception with an emphasis on data collection, analysis, and interpretation. Several methodologies are used across the different senses to study perception and its neural underpinnings.

CALENDAR NOTES: Students should be aware that some data collection may occur outside of class time.

PREREQUISITES: PSYO 2000.03 or NESC 2000.03, NESC 2470.03/PSYO 2470.03, and NESC 2150.03/PSYO 2150.03

CROSSLISTED: PSYO 3051.03
FORMATS: Lecture | Lab

NESC 3100 Independent Research in Neuroscience I

CREDIT HOURS: 3

For upper-year students who wish to gain research experience. Requirements include a minimum grade of B in NESC 2000.03/PSYO 2000.03, a high level of performance in other Neuroscience courses, an overall B+ (GPA 3.30) average, and securing a faculty advisor to supervise the research project. SIGNATURE REQUIRED. Contact: pnistud@dal.ca

CALENDAR NOTES: This course must be taken in the same academic year as NESC 3101.03 and no credit can be given for one course without the other. The work undertaken in NESC 3101.03 should be a continuation of that initiated in NESC 3100.03. A grade will be given for NESC 3100.03 only after NESC 3101.03 is completed.

PREREQUISITES: PSYO 2000.03 or NESC 2000.03, PSYO 2501.03, previous or concurrent enrolment in two other Psychology or Neuroscience 3000-level courses, and Coordinator's consent.

CROSSLISTED: PSYO 3100.03

RESTRICTIONS: Restricted to Neuroscience Majors and Honours Students

EXCLUSIONS: NESC 3001.03, NESC 3000.06

FORMATS: Lab | Experiential Learning

NESC 3101 Independent Research in Neuroscience II

CREDIT HOURS: 3

For upper-year students who wish to gain research experience. Requirements include a minimum grade of B in NESC 2000.03/PSYO 2000.03, a high level of performance in other Neuroscience courses, an overall B+ (GPA 3.30) average, and securing a faculty advisor to supervise the research project. SIGNATURE REQUIRED. Contact: pnistud@dal.ca

CALENDAR NOTES: This course must be taken in the same academic year as NESC 3100.03 and no credit can be given for one course without the other. The work undertaken in NESC 3101.03 should be a continuation of that initiated in NESC 3100.03. A grade will be given for NESC 3101.03 only after NESC 3100.03 is completed.

PREREQUISITES: NESC 3100.03 and Coordinator's consent

CROSSLISTED: PSYO 3101.03

RESTRICTIONS: Restricted to Neuroscience Majors and Honours Students

EXCLUSIONS: NESC 3001.03, NESC 3000.06

FORMATS: Lab | Experiential Learning

NESC 3131 Research Methods in Attention

CREDIT HOURS: 3

The methods, findings, and theories that underpin our understanding of attention (alertness, preparation, selection, and control of information processing) are covered. Behavioural and neuroscientific evidence as well as computational models are examined in the lectures. Laboratories emphasize behavioural methods used to isolate and reveal the components of attention.

PREREQUISITES: PSYO 2000.03 or NESC 2000.03, PSYO 2501.03, and NESC 2130.03/PSYO 2130.03 or NESC 2150.03/PSYO 2150.03

CROSSLISTED: PSYO 3131.03

EXCLUSIONS: NESC 3130.06/PSYO 3130.06

FORMATS: Lecture | Lab

NESC 3132 Research Methods in Visual Cognition

CREDIT HOURS: 3

Visual cognition is the study of how we extract meaning from our visual environment and use it to direct our behaviour. Emphasis is placed on object, face, and word recognition as revealed by normal behaviour, and by neuroimaging techniques and neuropsychological studies of brain-damaged individuals who have lost these recognition abilities.

PREREQUISITES: PSYO 2000.03 or NESC 2007.03, PSYO 2501.03, and NESC 2130.03/PSYO 2130.03 or NESC 2150.03/PSYO 2150.03

CROSSLISTED: PSYO 3132.03

EXCLUSIONS: NESC 3130.03/PSYO 3130.06

FORMATS: Lecture | Lab

NESC 3133 Research Methods in Memory

CREDIT HOURS: 3

This course examines human memory from the perspective of cognitive psychology and, to a lesser extent, cognitive neuroscience. Lectures emphasize cognitive approaches to the study of memory with an explicit focus on empirical research methods, data, and interpretation of results.

PREREQUISITES: PSYO 2000.03 or NESC 2000.03, PSYO 2501.03, and NESC 2130.03/PSYO 2130.03

CROSSLISTED: PSYO 3133.03

EXCLUSIONS: NESC 3130.03/PSYO 3130.06

FORMATS: Lecture | Lab

NESC 3134 Research Methods in Psycholinguistics

CREDIT HOURS: 3

Provides hands-on experience with various methodologies employed in the study of language processing, and uses these to explore topics in psycholinguistics in greater depth. Methods covered may include reaction time, priming, self-paced reading, computational modeling, corpus-based research, and event-related brain potentials. Students serve as experimenters and participants in class experiments.

PREREQUISITES: PSYO 2000.03 or NESC 2007.03, PSYO 2501.03, and NESC 3190.03/PSYO 3190.03

CROSSLISTED: PSYO 3134.03

EXCLUSIONS: NESC 3130.06/PSYO 3130.06

FORMATS: Lecture | Lab

NESC 3137 Research Methods in Cognitive Neuroscience

CREDIT HOURS: 3

An overview of neuroimaging and other techniques of cognitive neuroscience (including fMRI, ERP, and others) focusing on how they work, how they are applied, and their inherent limitations. Labs include experience collecting and analyzing ERP data, demonstrations of fMRI scanning, and analysis of fMRI data.

PREREQUISITES: PSYO 2000.03 or NESC 2000.03, PSYO 2501.03, and NESC 2130.03/PSYO 2130.03

CROSSLISTED: PSYO 3137.03

FORMATS: Lecture | Lab

NESC 3161 Measuring Behaviour

CREDIT HOURS: 3

Measuring behaviour is essential in the study of ethology, behavioural neuroscience, developmental, social and clinical psychology. The function of this laboratory course is to teach methods of observing and scoring behavior using qualitative and quantitative methods. Sampling methods, behaviour description and analysis will be done in laboratory and naturalistic settings.

PREREQUISITES: PSYO 2000.03 or NESC 2000.03

CROSSLISTED: PSYO 3161.03

FORMATS: Lab

NESC 3162 Advanced Animal Behaviour: Theories and Applications

CREDIT HOURS: 3

This course focuses on advanced theories and applications of animal behaviour, with a focus on proximate, integrative and applied questions. It offers a more in-depth analysis of topics covered in NESC/PSYO 2160.03 and explores trends and issues in contemporary ethology, animal psychology and behavioural ecology.

PREREQUISITES: PSYO 2000.03 or NESC 2000.03 or BIOL 3062.03 or BIOL 3630.03, and NESC 2160.03/PSYO 2160.03

CROSSLISTED: PSYO 3162.03

FORMATS: Lecture

NESC 3165 Neuroethology

CREDIT HOURS: 3

Neuroethology explores how assemblies of neurons work together to produce behaviour. The course typically uses a mix of simple model systems, including live animals (e.g., earthworms), virtual systems, and robotics to examine how nervous systems produce behaviour.

CALENDAR NOTES: All experiments in the accompanying lab involve invertebrates. Students are required to handle invertebrates during the lab.

PREREQUISITES: NESC 2570.03/PSYO 2570.03, and either PSYO 2000.03 or NESC 2000.03 or BIOL 2020.03

CROSSLISTED: PSYO 3165.03

FORMATS: Lab

NESC 3170 Hormones and Behaviour

CREDIT HOURS: 3

This course examines how chemical signals of the neural, endocrine, and immune systems interact to influence the brain and behaviour and how neurotransmitters, cytokines, and hormones control neural and behavioural development, sexual, aggressive, and maternal behaviour. Hormone receptors in the brain, reproduction, puberty, brain sex differences, and stress are also examined.

PREREQUISITES: NESC 2470.03/PSYO 2470.03 or PHYL 2041.03

CROSSLISTED: PSYO 3170.03

EXCLUSIONS: NESC 2170.03/PSYO 2170.03

NESC 3180 Psychoneuroimmunology/Ecological Immunology

CREDIT HOURS: 3

Our behaviour can influence how well we resist disease, and infection can alter behaviour. This course examines how immune systems and nervous systems interact in both vertebrates and invertebrates. Evolutionary forces that have led to the existence of these interactions are also examined.

PREREQUISITES: BIOL 1010.03 or BIOL 1020.03 and BIOL 1011.03 or BIOL 1021.03, and one of NESC 2470.03/PSYO 2470.03 or PSYO 2770.03 or PHYL 2041.03 or MICI 2100.03; or BIOL 2020.03

CROSSLISTED: PSYO 3180.03

FORMATS: Lecture

NESC 3190 Psycholinguistics

CREDIT HOURS: 3

Explores the cognitive and neural bases of human language processing. Topics include: human language and other communication systems; phonology; morphology; semantics; syntax; discourse; first and second language acquisition; relationship of language to general cognitive functions such as music and mathematics; signed languages such as American Sign Language, and non-linguistic gesture.

PREREQUISITES: PSYO 2000.03 or NESC 2000.03, and NESC 2130.03/PSYO 2130.03

CROSSLISTED: PSYO 3190.03

EXCLUSIONS: NESC 2190.03/PSYO 2190.03

FORMATS: Lecture

NESC 3227 Principles of Human Neuropsychology

CREDIT HOURS: 3

Clinical neuropsychologists study the organization of cognitive, emotional, and social functions in the brain to understand how brain damage alters human behaviour across the lifespan. We examine how clinicians diagnose and rehabilitate persons with brain diseases and disorders. Assignments emphasize application of textbook/lecture-based knowledge, critical thinking, and group presentation skills.

PREREQUISITES: NESC 2470.03/PSYO 2470.03 or PSYO 2770.03 or PHYL 2041.03, NESC/PSYO 2130 is recommended

CROSSLISTED: PSYO 3227.03

FORMATS: Lecture

NESC 3237 Drugs and Behaviour

CREDIT HOURS: 3

An introduction to behavioural psychopharmacology. The lectures involve basic anatomy, physiology, and chemistry of the nervous system. Behavioural effects and underlying mechanisms of various psychoactive drugs are discussed. Specific topics covered are alcohol, tobacco, amphetamines, cocaine, opiates, hallucinogens, tranquilizers, and antipsychotic drugs.

PREREQUISITES: PSYO 2000.03 or NESC 2000.03, and one of NESC 2470.03/PSYO 2470.03 or NESC 2570.03/PSYO 2570.03

CROSSLISTED: PSYO 3237.03

FORMATS: Lecture

NESC 3264 The Science of Sleep

CREDIT HOURS: 3

This course reviews the history, methods and results of the scientific study of sleep. Topics include: circadian and homeostatic regulation; developmental and cultural impacts; normal and abnormal function of neural and other control mechanisms; effects of sleep loss on performance and health; theories of the functions of sleep.

PREREQUISITES: PSYO 2000.03 or NESC 2000.03 and NESC 2470.03/PSYO 2470.03 or BIOL 2020.03

CROSSLISTED: PSYO 3264.03

FORMATS: Lecture

NESC 3270 Developmental Neuroscience

CREDIT HOURS: 3

This course presents the fundamentals of development in complex and simple nervous systems. Cell differentiation, pattern regulation, proliferation, migration, and circuit development are discussed. Special attention is given to later developmental events such as neuronal growth cones, cell death, growth factors, neuron-target interactions, and synapse formation.

PREREQUISITES: PSYO 2000.03 or NESC 2007.03, NESC 2470.03/PSYO 2470.03 and NESC 2570.03/PSYO 2570.03

CROSSLISTED: PSYO 3270.03

FORMATS: Lecture

NESC 3271 Developmental Origins of Health and Disease

CREDIT HOURS: 3

This course explores the role that developmental events (internal and external) play in health and disease, emphasizing their role in programming stress responding and metabolic processes across the lifespan. Students learn about underlying epigenetic mechanisms, environmental/sociocultural influences, disease processes impacted (e.g., stress-related and metabolic-related diseases), societal implications, and prevention/mitigation strategies.

PREREQUISITES: NESC 2000.03 or PSYO 2000.03 AND NESC 2470.03 or PSYO 2470.03

CROSSLISTED: PSYO 3271.03

FORMATS: Lecture

NESC 3370 Advanced Methods in Neurobiology

CREDIT HOURS: 3

Introduction to several neurophysiological techniques used in contemporary neuroscience, employing extracellular and intracellular electrical recording and stimulation methods on nervous system preparations, both sensory and motor. After introductory instruction, students in groups of 2 or 3 get to perform quite sophisticated practical experiments themselves, enabled by computer-based data acquisition.

PREREQUISITES: PSYO 2000.03 or NESC 2000.03, NESC 2470.03/PSYO 2470.03 and NESC 2570.03/PSYO 2570.03

CROSSLISTED: PSYO 3370.03

FORMATS: Lab

NESC 3371 Neuronal Organization Laboratory

CREDIT HOURS: 3

Introduction to several techniques used in contemporary neuroscience. Students work under supervision in groups of 2 or 3 in regular labs that introduce neuroanatomical analyses using the following: Golgi impregnation, immunocytochemistry, dye-tracing of connections, electronmicroscopy of the retina, and neurotransmitter determinations using HPLC.

PREREQUISITES: PSYO 2000.03 or NESC 2000.03, NESC 2470.03/PSYO 2470.03 and NESC 2570.03/PSYO 2570.03

CROSSLISTED: PSYO 3371.03

FORMATS: Lab

NESC 3440 Neuroanatomy

CREDIT HOURS: 3

This is a survey of the structure and function of the human central nervous system (CNS, the brain and spinal cord). The laboratory component provides the opportunity to dissect the human brain and to study the microscopic anatomy of the CNS. This course provides the lecture and laboratory component for the graduate course ANAT 5100 Human Neuroanatomy. ORGANIZER: W. Baldrige

PREREQUISITES: BIOL 2020.03 or permission of the instructor

FORMATS: Lecture | Lab

NESC 3505 Neural Data Science

CREDIT HOURS: 3

An introduction to data management, manipulation, visualization, and analysis for neuroscience. Students learn scientific programming in Python, and use this to work with example data from areas such as single-cell recording, EEG, structural and functional MRI, and confocal microscopy. Basic signal processing techniques including filtering are covered.

PREREQUISITES: PSYO 2501.03 with a grade of B or higher, and NESC 2000.03 or PSYO 2000.03, and NESC 2470.03 or PSYO 2470.03

CROSSLISTED: PSYO 3505.03

FORMATS: Lab | Online Delivery

NESC 3670 Genes, Brain and Behaviour

CREDIT HOURS: 3

The application of genetic techniques to the study of cognitive abilities, psychopathology, personality disorders, stress-related illnesses, and ethical issues in genetic research. The role of genetic factors in eating and drug abuse problems, as well as methods used to study gene-environment interactions are explored.

PREREQUISITES: NESC 2470.03/PSYO 2470.03 or PSYO 2770.03 or PHYL 2041.03, AND BIOL 1010.03 or BIOL 1020.03 and BIOL 1011.03 or BIOL 1021.03, or SCIE 1505X/Y.18, SCIE 1515X/Y.36, SCIE 1520X/Y.30 or SCIE 1540.27 (with a grade of B- or better); BIOL 2020.03 and BIOL 2030.03 are recommended

CROSSLISTED: PSYO 3670.03

EXCLUSIONS: NESC 2670.03/PSYO 2670.03

FORMATS: Lecture

NESC 3770 Behavioural Neuroscience

CREDIT HOURS: 3

Behavioural neuroscience explores the neural and hormonal mechanisms underlying a variety of behavioural phenomena. The course focuses on neural

correlates of social and emotional behaviour, motor behaviour and patterns, and behavioural toxicology processes (neurotoxins and endocrine disruptors).

PREREQUISITES: PSYO 2000.03 or NESC 2000.03, and NESC 2470.03/PSYO 2470.03 or PSYO 2770.03

CROSSLISTED: PSYO 3770.03

FORMATS: Lecture

NESC 3970 Molecular Neuroscience

CREDIT HOURS: 3

This course examines the development, function, and pathology of the brain at the molecular level. A particular focus will be placed upon the molecular mechanisms thought to contribute to neurological disease. The basic molecular neuroscience tools used to study these mechanisms are emphasized.

PREREQUISITES: NESC 2570.03/PSYO 2570.03 or BIOL 2020.03 or BIOL 2030.03

CROSSLISTED: PSYO 3970.03

FORMATS: Lecture

NESC 4000 Directed Reading Project

CREDIT HOURS: 3

An individually tailored reading or study course designed to allow Honours students to focus on a particular issue, or a set of related issues, that are not part of the regular program. Enrolment is contingent upon securing a faculty member to supervise the study program. This course will count as a seminar class.

SIGNATURE REQUIRED Contact pnistud@dal.ca for details.

CROSSLISTED: PSYO 4000.03

RESTRICTIONS: Restricted to Neuroscience Majors and Honours Students

FORMATS: Seminar

NESC 4007 Contemporary Issues in Neuroscience

CREDIT HOURS: 3

This is a seminar course that focuses on a significant theme or topic in the research literature in Neuroscience. Topics vary from year to year. Consult the department for the details about course content. **SIGNATURE REQUIRED**

PREREQUISITES: NESC Honours student, permission of the instructor.

FORMATS: Seminar

NESC 4008 Topics in Neuroscience

CREDIT HOURS: 3

This is a seminar course that focuses on a significant theme or topic in the research literature in neuroscience. Topics vary from year to year. Consult the department for details about course content. **SIGNATURE REQUIRED**.

CALENDAR NOTES: Instructor Permission Required.

RESTRICTIONS: Neuroscience Honours Student, permission of the instructor.

FORMATS: Seminar

NESC 4050 Topics in Perception

CREDIT HOURS: 3

SIGNATURE REQUIRED

PREREQUISITES: NESC 3051.03/PSYO 3051.03 or instructor's consent

CROSSLISTED: PSYO 4050.03

FORMATS: Seminar

NESC 4070 Chemical Neurobiology

CREDIT HOURS: 3

The goal is to acquaint the student with neurotransmitters (excitatory amino acids, acetylcholine, monoamines, neuropeptides). Anatomical, biochemical, physiological, pharmacological, behavioral, and clinical aspects of individual neurotransmitter systems are discussed. Lectures are given by the instructors. Students are expected to write an examination and a review, and give a presentation.

PREREQUISITES: NESC 2470.03/PSYO 2470.03 and NESC 2570.03/PSYO 2570.03, or instructor's consent

CROSSLISTED: NESC 5070.03

FORMATS: Seminar

NESC 4130 Topics in Cognition

CREDIT HOURS: 3
SIGNATURE REQUIRED
CROSSLISTED: PSYO 4170.03
RESTRICTIONS: Restricted to NESC/PSYO Honours Students
FORMATS: Seminar

NESC 4177 Theoretical Neuroscience

CREDIT HOURS: 3
An introduction to basic concepts and research questions in computational neuroscience. This includes cellular mechanisms such as spike generation and synaptic plasticity, network-level concepts such as perceptrons and associative attractor networks, and system-level concepts such as memory, learning and anticipation. This course includes an introduction to MATLAB programming. **SIGNATURE REQUIRED**
PREREQUISITES: Intended for third- or fourth-year Neuroscience students.
FORMATS: Seminar

NESC 4185 Synaptic Function and Plasticity

CREDIT HOURS: 3
Key recent research studies in cellular and system neurophysiology are presented and critically discussed. Emphasis is placed on plasticity, synaptic function, excitability, dendritic integration, neural networks and relevant advances in experimental methods. Newly published papers within these areas are reviewed weekly, followed by a more extensive critique of two publications.
PREREQUISITES: NESC 2570/PHYL 2570 or permission of course instructors
CROSSLISTED: PHYL 4000.03
FORMATS: Seminar

NESC 4225 The Science of Mindfulness

CREDIT HOURS: 3
This seminar focuses on the scientific literature relating to the concept, and practice of, mindfulness. Topics explore the effects of mindfulness practice on the brain, cognition, the immune system, addiction, emotion regulation, interpersonal relations, pain, and stress. Critical evaluation of the literature is emphasized.
CROSSLISTED: PSYO 4225
RESTRICTIONS: Requires permission of instructor
EXCLUSIONS: PSYO 6225.03, PSYO 4001.03 (offered in 2017/18, 18/19, 19/20)
FORMATS: Seminar

NESC 4230 Human Performance Topics

CREDIT HOURS: 3
SIGNATURE REQUIRED
CROSSLISTED: PSYO 4230.03

FORMATS: Seminar

NESC 4501 Honours Thesis I

CREDIT HOURS: 3

Under a staff member's supervision, each student conducts original research in psychology. Students meet as a class to describe their proposed research and progress. A formal written report of the completed research is required. The final grade is based on originality and skill with emphasis on the written and oral reports. Please note: admission requires that the student has secured a willing supervisor. **SIGNATURE REQUIRED.**

CALENDAR NOTES: This course must be taken in the same academic year as NESC 4502.03 and no credit can be given for one course without the other. The work undertaken in NESC 4502.03 should be a continuation of that initiated in NESC 4501.03. A grade will be given for NESC 4501.03 only after NESC 4502.03 is completed.

PREREQUISITES: PSYO 2000.03 or equivalent with a grade of B+ or higher, PSYO 3502.03, admission to the honours program, and instructor's consent.

CROSSLISTED: PSYO 4501.03

RESTRICTIONS: Restricted to Honours Neuroscience students in their graduating year.

EXCLUSIONS: NESC 4500.06

FORMATS: Lecture | Lab | Experiential Learning

NESC 4502 Honours Thesis II

CREDIT HOURS: 3

Under a staff member's supervision, each student conducts original research in psychology. Students meet as a class to describe their proposed research and progress. A formal written report of the completed research is required. The final grade is based on originality and skill with emphasis on the written and oral reports. Please note: admission requires that the student has secured a willing supervisor. **SIGNATURE REQUIRED.**

RESTRICTIONS: Restricted to Honours Neuroscience students in their graduating year.

EXCLUSIONS: NESC 4500.06

FORMATS: Lecture | Lab | Experiential Learning

NESC 4587 Topics in the History of Neuroscience

CREDIT HOURS: 3

This course examines the history of the attempts to find the neurobiological basis for human thought and behaviour. This involves the examination of the theories, methods and experimental data which have attempted to link neural activity with thought and behaviour. Historical documents and web-based resources are used to examine original sources.

PREREQUISITES: PSYO 1011.03 or PSYO 1012.03 or equivalent, or instructor's consent

EXCLUSIONS: HSTC 4301.03

FORMATS: Seminar

NESC 4670 Behavioural Neuro(epi)genetics and Genomics

CREDIT HOURS: 3

This senior seminar course examines the primary scientific literature on the use of (epi)genetic techniques to study the molecular and cellular bases of behaviour. Transgenic-technology is discussed combined with recent advances in next-generation biological techniques (e.g., DNA/RNA methylome sequencing, optogenetics) and genome editing (e.g., CRISPR/Cas9) tools for investigation of neural circuits underlying brain function.

CALENDAR NOTES: Course aimed at NESC Honours students

RESTRICTIONS: NESC Honours student, Instructor permission required.

FORMATS: Seminar

NESC 4705 Neurotechnology Innovation, Commercialization, and Entrepreneurship

CREDIT HOURS: 3

An introduction to neurotechnology, clinical neuroscience, and commercialization. Topics include neuroimaging methods; diagnosis, assessment, and treatment of nervous system-related disorders; the process of innovation; and business fundamentals. Features guest lectures by successful scientists and entrepreneurs, as well as hands-on workshops and lab exercises on business and neurotechnology topics **SIGNATURE REQUIRED**

PREREQUISITES: Two full years of undergraduate University study, plus instructor's consent.

CROSSLISTED: PSYO 4705.03, SCIE 4705

EXCLUSIONS: PSYO 7705.06

FORMATS: Lecture

NESC 4740 Topics in the Neurobiology of Learning and Memory

CREDIT HOURS: 3

SIGNATURE REQUIRED

PREREQUISITES: NESC 2470.03/PSYO 2470.03, NESC 2140.03/PSYO 2140.03

CROSSLISTED: PSYO 4740.03

FORMATS: Seminar

NESC 4901 Honours Foundation

CREDIT HOURS: 3

Under a faculty member's supervision, each student conducts original research in Neuroscience. Students meet as a class to describe their proposed research and progress. A presentation of the research proposal and formal written report are both required. Students are expected to begin their project during fall term and final grade will reflect presentation, written proposal and lab work/skills development. Students must receive a grade of B- or higher in 4901 in order to continue into 4902. Students who do not receive a B- or higher in 4901 will be removed from the Honours degree.

CALENDAR NOTES: This course must be taken in the same academic year as NESC 4902.03. A minimum grade of B- or higher is required in NESC 4901.03 to continue on in NESC 4902.03. Student who do not achieve the minimum grade in NESC 4901.03 will be removed from NESC 4902.03 and not permitted to continue in the Honours program. The work undertaken in NESC 4902.03 should be a continuation of that initiated in NESC 4901.03.

COREQUISITES: PSYO 3502.03

PREREQUISITES: Instructor Approval (see Academic Calendar for Honours Admission Requirements)

CROSSLISTED: PSYO 4901.03

RESTRICTIONS: NESC and PSYO majors only

EXCLUSIONS: NESC 4501.03, PSYO 4501.03, NESC 4500.06, PSYO 4500.06

FORMATS: Seminar

NESC 4902 Honours Thesis

CREDIT HOURS: 3

Under a faculty member's supervision, each student conducts original research in psychology. Students meet as a class to describe their research projects and ongoing progress. A formal written report of the completed thesis is required. Final grade will reflect written thesis and lab work/skills development. Students must receive a grade of B- or higher in 4901 in order to continue into 4902. Students who do not receive a B- or higher in 4901 will be removed from the Honours degree.

CALENDAR NOTES: This course must be taken in the same academic year as PSYO 4901.03. A minimum grade of B- or higher is required in PSYO 4901.03 to continue on in PSYO 4902.03. Ocean Sciences

Location:

Life Sciences Centre

Department of Oceanography

1355 Oxford Street

PO BOX 15000

Halifax NS

B3H 4R2

Phone Number: (902) 494-3557

Fax Number: (902) 494-3877

Email Address: oceanography@dal.ca

Website: www.dal.ca/oceanography

Introduction

Ocean Sciences includes the study of the physics, biology, geology, chemistry, and meteorology of the marine environment. Topic areas include ocean currents, waves, tides, marine sediments, oceanic crustal structure, nutrient cycling, acoustics, ocean-atmosphere coupling, biological production, marine biodiversity, and seawater properties, among others. Students enrolled in the Ocean Sciences program will be educated in the core oceanographic sub-disciplines of physical, geological, chemical, and biological oceanography, while also being exposed to issues in marine policy, law, and management. Graduates of the Ocean Sciences program will have gained an appreciation of the interdisciplinary and collaborative approaches often required to arrive at effective solutions to environmental problems relating to the oceans. They will have developed strong quantitative and practical skills, as well as a breadth of knowledge

across ocean science disciplines. Ocean scientists are employed in research laboratories, universities, government agencies, and private industry. Career paths include environmental prediction, environmental monitoring and assessment, marine technology, marine surveying, marine resource use and extraction, and marine conservation.

NOTE: Not all courses are offered every year. Please consult the current timetable for this year's offerings.

Degree Programs

The Department of Oceanography offers the following degree programs in Ocean Sciences:

- [BSc \(120 credit hour\) Honours \(Concentrated\)*](#)
- [BSc \(120 credit hour\) Combined Honours*](#)
- [BSc \(120 credit hour\) Major*](#)
- [BSc \(120 credit hour\) Double Major*](#)
- [Minor in Ocean Sciences](#)

* May be combined with Minor programs from other disciplines

NOTE: There is no 90 credit hour (3 year) degree program in Ocean Sciences.

Departmental Requirements for these programs are described below. In addition to departmental requirements, students must satisfy the requirements outlined in the [Academic Regulations](#) and the [College of Arts and Science Degree Requirements](#) sections.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Student applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with an Ocean Sciences undergraduate academic advisor.

Students who participated in the Integrated Science Program in their first year should consult the Undergraduate Calendar for first year course equivalencies. The following options fulfill the first year requirements for any Ocean Sciences program:

- SCIE 1515.36
- SCIE 1520.30
- SCIE 1530.27
- SCIE 1540.27, MATH 1000.03/MATH 1010.03 and PHYC 1300.06 or PHYC 1310.03/PHYC 1320.03
- SCIE 1505.18, Option A or B (MATH 1000.03/MATH 1010.03, PHYC 1300.06 or PHYC 1310.03/PHYC 1320.03)

Wallace, D. W., BSc (Univ of East Anglia), PhD (Dalhousie)

Associate Professors

Algar, C. K., BSc (Laurentian), PhD (Dalhousie)
Barclay, D., BSc (McGill), PhD (Scripps, Univ of California)
Brown, C., BSc (Univ Reading), PhD (Univ of Portsmouth)
Kienast, S., MSc (Kiel), PhD (UBC)
Oliver, E., BSc (Acadia), MSc (Ottawa), PhD (Dalhousie)

Assistant Professors

Buchwald, C., BSc (MIT), PhD (MIT/WHOI)
Fortune, S., BAH (Queen's), MSc, PhD (UBC), Canadian Wildlife Federation Chair in Large Whale Conservation
Musgrave, R., BSc (Melbourne), BSc (Hons) (Monash), PhD (Scripps)

Instructor

deGelleke, L., BS (Univ of Hawaii at Manoa), MSc (Dalhousie)

Adjunct (FGS)

Azetsu-Scott, K., BSc, MSc (Japan), PhD (Dalhousie)
Baumgartner, M., BSc (Notre Dame), MSc (Southern Mississippi), PhD (Oregon State)
Brilliant, S., BSc, MSc (UNB), PhD (Univ of Sydney)
Dale, A., BSc (Birmingham), MSc, PhD (Plymouth)
Davies, K., BSc (UVic), PhD (Dalhousie)
Devey, C., BSc (Univ of London), PhD (Oxford)
Devred, E., MAPHys (Tulon), PhD (Littoral Cote d'Opale)
Dosso, S., BSc, MSc (UVic), PhD (UBC)
Ellis, D., BSc (Mt. A), MSc, PhD (McMaster)
Fortin, M.-J., BSc, MSc (Montreal), PhD (New York)
Gardner, I., BVSc (Sydney), MPVM, PhD (California)
Greatbatch, R., BSc (Liverpool), PhD (Cambridge)
Greenberg, D., MMath (Waterloo), PhD (Liverpool)
Krastel, S., PhD (Kiel)
Lu, Y., BEng (Tsinghua), MSc (Qingdao), MSc (Memorial), PhD (Victoria)
Martin, S. B., BSc (Royal Military College), MSc, PhD (Dalhousie)
Milligan, T., BSc, MSc (Dalhousie)
Perrie, W., BSc (Toronto), MSc (California), PhD (Massachusetts Institute of Technology)
Piper, D., BA, MA, PhD (Cantab)
Richards, C., BSc (New Brunswick), MSc (Memorial), PhD (Dalhousie)
Ritchie, H., BSc (Mt. A), BA (Oxford), MSc, PhD (McGill)
Snelgrove, P., BSc (MUN), MSc (McGill), PhD (MIT/WHOI), Memorial University of Newfoundland
Tanhua, T., MSc, PhD (Goteborg)
Vanderlaan, A., BSc (Dalhousie), MSc (UVic), PhD (Dalhousie)
Wu, Y., BEng (Petroleum Univ of China), MEng, PhD (Tianjin Univ)
Zedel, L., BSc (Victoria), PhD (UBC) Adjunct (Retired)

Adjunct (Retired)

Beaumont, C., BSc (Sussex), PhD (Dalhousie)
Lewis, M. R., BS, MS (UMd), PhD (Dalhousie)
Ruddick, B., BSc (Victoria), PhD (MIT)
Taggart, C. T., BSc (Carleton), MSc (York), PhD (McGill)

BSc (120 credit hour) Concentrated Honours in Ocean Sciences

Students who want a challenging program that results in a broad and in-depth background in Ocean Sciences, and includes an independent research experience, may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours. Honours students complete a minimum of 54 credit hours above the 1000 level in Ocean Sciences with a minimum GPA of 3.3 and write a research-based Honours thesis. The Honours Qualifying Examination requirement is satisfied through completion of OCEA 4201.03 and OCEA 4202.03.

Admission to Honours

Students considering Honours should consult with an Ocean Sciences Honours Advisor early in their studies.

Departmental Requirements

In addition to fulfilling the requirements outline in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#), students in a Concentrated Honours program in Ocean Sciences must complete the following courses:

1000 level

- PHYC 1190.03 and PHYC 1290.03: Introduction to Physics or PHYC 1310.03 and PHYC 1320.03: Physics In and Around You
- MATH 1000.03: Differential and Integral Calculus I and MATH 1010.03: Differential and Integral Calculus II
- STATS 1060.03: Introductory Statistics for Science and Health Sciences or STATS.03 2060.03: Introduction to Probability and Statistics
- Any two of the following three introductory course sequences: BIOL 1010.03/BIOL 1011.03: Principles of Biology, CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium, EARTH 1080.03: Geology I/ERTH 1090.03: Geology II

OR Integrated Science Program (options above)

A "B+" average (3.3) must be attained in the following 2000, 3000, and 4000 level courses.

2000 level

- OCEA 2001.03 and OCEA 2002.03: The Blue Planet (minimum grade of "B")
- OCEA 2020.03: Tools and Concepts in Ocean Sciences I and OCEA 2021.03: Tools and Concepts in Ocean Sciences II (minimum grade of "B")

3000 and 4000 level

- OCEA 3003.03: Introduction to Field Oceanography
- A minimum of twelve (12) credit hours from the Ocean Science areas. See [Ocean Science Areas](#).
- OCEA 3001.03: Introduction to Physical Oceanography or OCEA 4120.03: Physical Oceanography
- OCEA 3002.03: Introduction to Chemical Oceanography
- OCEA 4110.03: Geological Oceanography
- OCEA 4140.03: Biological Oceanography
- Any 12 credit hours from Ocean Areas Courses
- OCEA 4000.03: Oceans and Global Change
- OCEA 4401.03: Marine Management I and OCEA 4402.03: Marine Management II
- OCEA 4201.03 and OCEA 4202.03: Honours Research

BSc (120 credit hour) Combined Honours in Ocean Sciences and another subject

Students who wish to study Ocean Sciences in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Ocean Sciences may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject.

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. The same standards and conditions for admission apply as for entry into a Concentrated Honours program (see above). In addition, students must have their program of study approved by Academic Advisors in both subject areas. Students must complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Ocean Sciences, this requirement is satisfied through OCEA 4201.03 and OCEA 4202.03.

Departmental Requirements

In addition to fulfilling the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#), students in a BSc or BA Combined Honours program in Ocean Sciences and another subject must complete the following:

Ocean Sciences as the primary subject

1000 level

- PHYC 1190.03/PHYC 1290.03: Introduction to Physics or PHYC 1310.03/PHYC 1320.03 Physics In and Around You (or PHYC 1300.06)
- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences or MATH 2060.03/STAT 2060.03: Introductory Probability & Statistics
- Any two of the following three course sequences: BIOL 1010.03/BIOL 1011.03: Principles of Biology, CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium, EARTH 1080.03: Geology I/ERTH 1090.03: Geology II

OR Integrated Science Program (options above)

A "B+" average (3.3) must be attained in the following 2000-, 3000- and 4000- courses.

2000 level

- OCEA 2001.03 and OCEA 2002.03: The Blue Planet (minimum grade of "B")
- OCEA 2020.03: Tools and Concepts in Ocean Sciences I/OCEA 2021.03: Tools and Concepts in Ocean Sciences II (minimum grade of "B")

3000 and 4000 level

- OCEA 3003.03: Introduction to Field Oceanography
- OCEA 3001.03: Introduction to Physical Oceanography or OCEA 4120.03: Physical Oceanography
- OCEA 3002.03: Introduction to Chemical Oceanography
- OCEA 4110.03: Geological Oceanography
- OCEA 4140.03: Introduction to Biological Oceanography
- A minimum of twelve (12) credit hours from the Ocean Science areas. See [Ocean Science Areas](#).
- OCEA 4000.03: Oceans and Global Change
- OCEA 4201.03 and OCEA 4202.03: Honours Research

Ocean Sciences as the secondary subject

1000 level

- PHYC 1190.03/PHYC 1290.03 or PHYC 1310.03/PHYC 1320.03 (or PHYC 1300.06)
- MATH 1000.03/MATH 1010.03
- MATH 1060.03/STAT 1060.03 or MATH 2060.03/STAT 2060.03

- Any two of the following three course sequences: BIOL 1010.03/BIOL 1011.03, CHEM 1011.03/CHEM 1012.03, EARTH 1080.03/ERTH 1090.03

OR Integrated Science Program (options above)

A “B+” average (3.3) must be attained in the following 2000-, 3000- and 4000- courses.

2000 level

- OCEA 2001.03 and OCEA 2002.03: The Blue Planet
- OCEA 2020.03: Tools and Concepts in Ocean Sciences I/OCEA 2021.03: Tools and Concepts in Ocean Sciences II

3000 and 4000 level

- OCEA 3003.03: Introduction to Field Oceanography
- OCEA 3001.03: Introduction to Physical Oceanography or OCEA 4120.03: Physical Oceanography
- OCEA 3002.03: Introduction to Chemical Oceanography
- OCEA 4110.03: Geological Oceanography
- OCEA 4140.03: Introduction to Biological Oceanography
- A minimum of six credit hours from the Ocean Sciences areas. See [Ocean Sciences areas](#).
- OCEA 4000.03: Oceans and Global Change

BSc (120 credit hour) Major in Ocean Sciences

The 120 credit hour Major is suited to students who want to focus on Ocean Sciences, but wish to have a program that is somewhat less constrained than the Honours program. Ocean Science Majors complete a minimum of 42 credit hours in OCEA courses. Research and other experiential learning opportunities are available through laboratories, special topics and experiential courses.

Departmental Requirements

In addition to fulfilling the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#), students in a Major program in Ocean Sciences must complete the following courses:

1000 level

- PHYC 1190.03 and PHYC 1290.03: Introduction to Physics or PHYC 1310.03 and PHYC 1320.03: Physics In and Around You
- MATH 1000.03: Differential and Integral Calculus I and MATH 1010.03: Differential and Integral Calculus II
- STAT 1060.03: Introductory Statistics for Science and Health Sciences or STAT 2060.03: Introductory Probability & Statistics
- Any two of the following three introductory course sequences: BIOL 1010.03/BIOL 1011.03: Principles of Biology, CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium, EARTH 1080.03: Geology I/ERTH 1090.03: Geology II

OR Integrated Science Program (options above)

2000 level

- OCEA 2001.03 and OCEA 2002.03: The Blue Planet
- OCEA 2020.03: Tools and Concepts in Ocean Sciences I and OCEA 2021.03: Tools and Concepts in Ocean Sciences II

3000 and 4000 level

- OCEA 3003.03: Introduction to Field Oceanography
- OCEA 3001.03: Introduction to Physical Oceanography or OCEA 4120.03: Physical Oceanography
- OCEA 3002.03: Introduction to Chemical Oceanography
- OCEA 4110.03: Geological Oceanography
- OCEA 4140.03: Biological Oceanography
- A minimum six credit hours from the Ocean Science areas. See [Ocean Science Areas](#).
- OCEA 4000.03: Oceans and Global Change

- OCEA 4401.03: Marine Management I and OCEA 4402.03: Marine Management II

BSc or BA (120 credit hour) Double Major in Ocean Sciences and another subject

The Double Major degree program allows students to combine a study of Ocean Sciences with another subject. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Ocean Sciences may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject.

Departmental requirements

In addition to fulfilling the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#), students in a Double Major program in Ocean Sciences must complete the following courses:

1000 level

- PHYC 1190.03 and PHYC 1290.03: Introduction to Physics or PHYC 1310.03 and PHYC 1320.03: Physics In and Around You
- MATH 1000.03: Differential and Integral Calculus I and MATH 1010.03: Differential and Integral Calculus II
- STAT 1060.03: Introductory Statistics for Science and Health Sciences or STAT 2060.03: Introductory Probability & Statistics
- Any two of the following three introductory course sequences: BIOL 1010.03/BIOL 1011.03: Principles of Biology, CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium, EARTH 1080.03: Geology I/ERTH 1090.03: Geology II

OR Integrated Science Program (options above)

2000 level

- OCEA 2001.03 and OCEA 2002.03: The Blue Planet
- OCEA 2020.03: Tools and Concepts in Ocean Sciences I and OCEA 2021.03: Tools and Concepts in Ocean Sciences II

3000 and 4000 level

- OCEA 3003.03: Introduction to Field Oceanography
- OCEA 3001.03: Introduction to Physical Oceanography or OCEA 4120.03: Physical Oceanography
- OCEA 3002.03: Introduction to Chemical Oceanography
- OCEA 4110.03: Geological Oceanography
- OCEA 4140.03: Biological Oceanography
- A minimum twelve (12) credit hours from the Ocean Science areas. See [Ocean Science Areas](#).
- OCEA 4000.03: Oceans and Global Change

Minor in Ocean Sciences

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Requirements

- A minimum of 18 to a maximum of 36 credit hours in Ocean Sciences courses at the 2000 level or higher.

Please note that there are prerequisite requirements for entry into upper level Ocean Sciences courses (see [Department of Oceanography course listings](#)).

Contact [Ocean Sciences](#) for more information.

Ocean Science Areas

The following is a list of courses that satisfy the Ocean Areas requirement:

OCEA 3001.03: Introduction to Physical Oceanography (if not taken to fulfill another requirement)
OCEA 3004.03: The Last Billion Years
OCEA 3420.03: Geochemistry of Aquatic Environments
OCEA 4120.03: Physical Oceanography (if not taken to fulfill another requirement)
OCEA 4130.03: Chemical Oceanography
OCEA 4301.01: Special Topics in Ocean Sciences
OCEA 4302.03: Independent Research in Ocean Sciences
OCEA 4401.03: Marine Management I (if not taken to fulfill another requirement)
OCEA 4402.03: Marine Management II (if not taken to fulfill another requirement)
OCEA 4665.03: Hacking the Blue Planet

The following are advanced courses, which also satisfy the Ocean Areas requirement, and are typically oriented towards primarily graduate students. The typical Ocean Science undergraduate program may not provide the required pre-requisite knowledge without taking additional courses and so we suggested you speak with the course instructor before registering for any of these. Also note that these courses may not be offered every year.

OCEA 4160.03: Fisheries Oceanography
OCEA 4210.03: Time Series Analysis
OCEA 4220.03: Numerical Modelling
OCEA 4221.03: Ocean Dynamics
OCEA 4222.03: Estuary, Coast and Shelf Dynamics
OCEA 4230.03: Biology of Phytoplankton
OCEA 4250.03: Acoustical Oceanography
OCEA 4290.03: Advanced Chemical Oceanography
OCEA 4311.03: Fluid Dynamics I
OCEA 4330.03: Benthic Ecology
OCEA 4331.03: History of Marine Sciences
OCEA 4370.03: Deep Sea Biology
OCEA 4380.03: Marine Modelling

The following are courses offered outside the Department of Oceanography, cross-listed as OCEA, and which also satisfy the Ocean Areas requirement. As with the advanced courses, the typical Ocean Science undergraduate program may not provide the required pre-requisite knowledge without taking additional courses and so we suggested you speak with the course instructor before registering for any of these.

OCEA 4411.03: Atmospheric Dynamics I
OCEA 4412.03: Atmospheric Dynamics II
OCEA 4470.03: Introduction to Seismic Imaging
OCEA 4505.03: Atmospheric Physics
OCEA 4520.03: Introduction to Atmospheric Science
OCEA 4541.03: Synoptic Meteorology I
OCEA 4550.03: Synoptic Meteorology II
OCEA 4595.03: Atmospheric Chemistry

[See Oceanography section for course descriptions.](#)

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Minors available to students in Ocean Sciences

Minor programs allow students to develop subject specialties in addition to their major or honours subjects. Minors in other subjects are normally added to 120 credit hour BSc programs

Students in a BSc program in Ocean Sciences may choose to include a Minor selected from the [list of approved Minors](#). Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc in Ocean Sciences, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of Faculty of Science Certificates and requirements can be found at the beginning of the [Faculty of Science](#) section. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the [College of Arts and Science Degree Requirements](#) section.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

Course Descriptions

OCEA 1001 Conversations with Ocean Scientists: Part I

CREDIT HOURS: 3

Students engage with working ocean scientists about their research, its relevance, and how to communicate science to different audiences. In addition to regular writing exercises that include journaling, blogging, and lab reporting, students compose a research paper and follow it through the process of submission and peer-review for an in-class journal.

CALENDAR NOTES: College of Arts & Science writing requirement fulfilled if OCEA 1001.03 and OCEA 1002.03 are completed in the same academic year. Credit will not be granted if courses are not completed consecutively.

COREQUISITES: MATH 1000.03 or MATH 1215.03 or MATH 1060.03/STAT 1060.03

EXCLUSIONS: OCEA 1000.06

FORMATS: Lecture | Tutorial

OCEA 1002 Conversations with Ocean Scientists: Part II

CREDIT HOURS: 3

Students engage with working ocean scientists about their research, its relevance, and how to communicate science to different audiences. In addition to regular writing exercises that include journaling, blogging, and lab reporting, students compose a research paper and follow it through the process of submission and peer-review for an in-class journal.

CALENDAR NOTES: College of Arts & Science writing requirement fulfilled if OCEA 1001.03 and OCEA 1002.03 are completed in the same academic year. Credit will not be granted if courses are not completed consecutively.

PREREQUISITES: OCEA 1001.03 (must have been taken in same academic year)

EXCLUSIONS: OCEA 1000.06

FORMATS: Lecture | Tutorial

OCEA 2001 The Blue Planet I

CREDIT HOURS: 3

This course provides a general survey of oceanography. It is designed to develop an understanding of the ocean and of the science of oceanography. Students learn about the geological, chemical, physical and biological processes at work in the sea.

EXCLUSIONS: OCEA 2000.06, OCEA 2850.06, OCEA 2851.03/OCEA 2852.03

FORMATS: Lecture

OCEA 2002 The Blue Planet II

CREDIT HOURS: 3

This course provides a general survey of biological oceanography. Students learn about marine biology and marine ecosystems. Consideration is also given to human impacts.

PREREQUISITES: OCEA 2001.03

EXCLUSIONS: OCEA 2000.06, OCEA 2850.06, OCEA 2851.03/OCEA 2852.03

FORMATS: Lecture

OCEA 2020 Tools and Concepts in Ocean Sciences I

CREDIT HOURS: 3

Students gain practical insights into oceanographic concepts introduced in OCEA 2001.03/2002.03 through lab exercises. Labs focus on navigation and position, instruments and calibration, ocean optics and acoustics, water movement, and basic marine chemistry. Labs involve data acquisition and analyses to develop quantitative skills. Students will become familiar with the 'R' programming language.

COREQUISITES: OCEA 2001.03; or permission of instructor.

PREREQUISITES: MATH 1000.03; MATH 1060.03/STAT 1060.03 (or MATH 2060.03/STATS 2060.03); PHYC 1190/1290.03 (or PHYC 1310.03/1320.03 or PHYC 1300.06); at least one of: CHEM 1011.03/1012.03, EARTH 1080.03/1090.03, or BIOL 1010/1011 or (BIOL 1020.03/1021.03); or permission of instructor.

FORMATS: Lab

OCEA 2021 Tools and Concepts II

CREDIT HOURS: 3

Students gain practical insights into oceanographic concepts introduced in OCEA 2001/2002 through lab exercises. Labs focus on particle dynamics and life in the ocean and involve data acquisition and analysis to develop quantitative skills. At the end of the course, students observe a mesocosm to synthesize concepts from both OCEA 2020.03 and OCEA 2021.03. Students will continue to use the 'R' programming language.

COREQUISITES: OCEA 2002.03; or permission of instructor

PREREQUISITES: OCEA 2020.03

FORMATS: Lab

OCEA 2800 Climate Change

CREDIT HOURS: 3

See course description for PHYC 2800.03 in the Physics and Atmospheric Science section of this calendar.

CROSSLISTED: PHYC 2800.03, GEOG 2800.03

EXCLUSIONS: ECON2850.06, PHYC2850.06

OCEA 3001 Introduction to Physical Oceanography

CREDIT HOURS: 3

This course introduces Ocean Physics, focusing on issues of interest to undergraduates in ocean-related disciplines. The approach is to bind facts together with ideas, often starting with thought experiments and proceeding to simple mathematical models.

PREREQUISITES: MATH 1000.03 or permission of Instructor

FORMATS: Lecture

OCEA 3002 Introduction to Chemical Oceanography

CREDIT HOURS: 3

This course provides students with a basic understanding of the composition of seawater and the processes that leads to this composition. This understanding is both qualitative and quantitative through the use of thermodynamic, kinetic and box models to describe the balances that produce the observed chemical distributions.

PREREQUISITES: CHEM 1011.03 and CHEM 1012.03 (or equivalent), OCEA 2001.03 and OCEA 2002.03 (or OCEA 2000.06); OCEA 2020.03 and OCEA 2021.03; or permission of instructor

EXCLUSIONS: OCEA 3170

FORMATS: Lecture

OCEA 3003 Introduction to Field Oceanography

CREDIT HOURS: 3

This course explores interrelationships between living organisms in the sea and the ocean environment. Biological processes are introduced in the context of

the physical and chemical oceanography. The emphasis is on sea-going field work on day trips in local marine waters and hands-on laboratory investigation.

CALENDAR NOTES: The OCEA 3003 requirement could be waived in light of equivalent course workload at another institution.

PREREQUISITES: OCEA 2001.03 and OCEA 2002.03 (or OCEA 2000.06)

CROSSLISTED: MARI 3003.03, BIOL 3003.03

FORMATS: Lecture

OCEA 3004 The Last Billion Years

CREDIT HOURS: 3

This course examines major events in Earth history. The geological and geochemical evidence will be described, and the hypothesized causes of the events will be examined. The goal of this course is to develop an understanding of the functioning of the earth/ocean/atmosphere system, how it has reacted to perturbations in the past and how it will react to current perturbations in the future.

PREREQUISITES: OCEA 2001.03 and OCEA 2002.03 (or OCEA 2000.06); or EARTH 1080.03

FORMATS: Lecture

OCEA 3420 Geochemistry of Aquatic Environments

CREDIT HOURS: 3

This course is an introduction to the governing principles and processes of aquatic geochemistry. Specific topics will include physical chemistry of natural waters, kinetics of geochemical reactions, the hydrologic cycle, the carbonate system and pH, redox reactions, weathering and mineral-solution equilibria, controls on the composition of rainwater, rivers, and oceans.

PREREQUISITES: CHEM 1011.03/1012.03 or equivalent and EARTH 1080.03/1090.03

CROSSLISTED: EARTH 3420.03

FORMATS: Lecture

OCEA 4000 Oceans and Global Change

CREDIT HOURS: 3

This course examines the role and response of the Oceans to global change, including alterations in currents and circulation, increases in sea level and storm surges, changes in ocean chemistry, modification to the types and patterns of sediment deposition, alterations in the abundances and distributions of organisms, and overall productivity. The course will discuss means of predicting these changes and their effects.

PREREQUISITES: OCEA 3001.03, OCEA 3002.03, OCEA 4110.03, OCEA 4140.03 or permission of Instructor

FORMATS: Lecture

OCEA 4110 Geological Oceanography

CREDIT HOURS: 3

This course provides a broad survey of geology and geophysics as they apply to the oceans. The course content covers methods and observations with quantitative applications to an understanding of marine geophysical and geological processes. The topics covered include the origin of ocean basins, plate tectonics, heat flow, gravity, and magnetism (1/3 of the course); patterns and processes of sediment transport and deposition, and the paleoceanographic reconstruction of past climates (2/3 of the course).

CALENDAR NOTES: Training in calculus and statistics will prove to be advantageous to the student's outcome.

PREREQUISITES: OCEA 2001.03 and OCEA 2002.03 (or OCEA 2000.06), OCEA 2020.03, OCEA 2021.03, and EARTH 1080.03; or permission of instructor.

CROSSLISTED: OCEA 5110.03, EARTH 4110.03

FORMATS: Lecture

OCEA 4115 Micropaleontology and Global Change

CREDIT HOURS: 3

See course description for EARTH 4502 in the Earth Sciences section of this calendar.

CROSSLISTED: EARTH 4502.03

OCEA 4120 Physical Oceanography

CREDIT HOURS: 3

This course introduces undergraduate students to the physical properties and dynamics of the oceans. Topics range from global circulation down to the small scales of turbulence. Fact and theory are blended throughout. Quantitative problem solving is emphasized in assignments.

PREREQUISITES: MATH 1000.03, MATH 1010.03, classic calculus or equivalent, and permission of the instructor

RESTRICTIONS: Third- and fourth-year students only

EXCLUSIONS: OCEA 5120.03

FORMATS: Lecture

OCEA 4130 Chemical Oceanography

CREDIT HOURS: 3

This course covers the major and minor constituents of sea water, the controls on its chemical composition, nutrient cycling, gas exchange and the influence of the oceans on atmospheric chemistry. Other topics included are chemical tracers, and radiochemical dating methods, stable isotope studies, chemical speciation and chemical models of sea water.

PREREQUISITES: OCEA 2001.03 and OCEA 2002.03 (or OCEA 2000.06), and OCEA 3002.03, or instructor's consent

EXCLUSIONS: OCEA 5130.03

FORMATS: Lecture | Lab

OCEA 4140 Biological Oceanography

CREDIT HOURS: 3

The goal is to describe how physical, chemical and biological processes interact to determine the species composition, biogeochemical activities, and trophic structure of marine communities. Outstanding problems currently facing biological oceanographers and earth systems scientists are discussed, as are current attempts and methodologies to address them.

CALENDAR NOTES: Biological oceanography is a quantitative science and extensive problem solving is required. Students should be competent in mathematics through calculus. Permission of instructor is required.

PREREQUISITES: OCEA 2001.03 and OCEA 2002.03 (or OCEA 2000.06); OCEA 2020.03 and OCEA 2021.03; or permission of instructor

CROSSLISTED: OCEA 5140.03, BIOL 4661.03, 5661.03, MARI 4661.03

FORMATS: Lecture

OCEA 4141 Advances in Biological Oceanography

CREDIT HOURS: 3

This course explores major advances in biological oceanography through analysis and discussion of influential historical and recent cutting-edge papers from the scientific literature. The course will be delivered through a combination of student presentations, class discussions, and invited speakers.

CALENDAR NOTES: OCEA 4140 may be completed either before, or concurrently with, OCEA 4141

COREQUISITES: OCEA 4140.03 or BIOL 4661.03 or MARI 4661.03

PREREQUISITES: 4th year standing or permission of the instructor

EXCLUSIONS: OCEA 5140.03

FORMATS: Lecture

OCEA 4160 Fisheries Oceanography

CREDIT HOURS: 3

Oceanographic influences on ecology of marine fish: on population dynamics, distribution, abundance, reproduction, life history, feeding, growth, metabolism, mortality, and recruitment. Emphasis on contemporary hypotheses and primary literature and some on fishery management. Primary-publication-style research paper required. Competence with fundamental population dynamics, ecology, physical oceanography, mathematics, and statistical analyses expected.

PREREQUISITES: OCEA 2001.03 and OCEA 2002.03 (or OCEA 2000.06); BIOL 2060.03 or BIOL 3080.03 or equivalent; MATH 1060.03/STAT 1060.03 or STAT 2080.03 or MATH 2060.03/STAT 2060.03 or instructor's consent.

CROSSLISTED: BIOL 4369.03, MARI 4369.03, OCEA 5160.03

FORMATS: Lecture | Tutorial

OCEA 4201 Honours Research - Part I

CREDIT HOURS: 3

This course is required for students enrolled in the Concentrated Honours in Ocean Sciences, and certain streams of the Combined Honours in Oceanography program. It consists of a research project under the supervision of a faculty member, and should include an original component in oceanography. Students are required to participate in weekly meetings of the class and make a presentation (oral or poster) at the annual CDOGS meeting in March.

CALENDAR NOTES: Credit can only be given for this course if OCEA 4201.03 and OCEA 4202.03 are completed in consecutive terms. Partial credit cannot be given for a single term.

PREREQUISITES: Permission given by instructor.

EXCLUSIONS: OCEA 4200.06

OCEA 4202 Honours Research - Part II

CREDIT HOURS: 3

This course is required for students enrolled in the Concentrated Honours in Ocean Sciences, and certain streams of the Combined Honours in Oceanography program. It consists of a research project under the supervision of a faculty member, and should include an original component in oceanography. Students are required to participate in weekly meetings of the class and make a presentation (oral or poster) at the annual CDOGS meeting in March.

CALENDAR NOTES: Credit can only be given for this course if OCEA 4201.03 and OCEA 4202.03 are completed in consecutive terms and partial credit cannot be given for a single term.

PREREQUISITES: Permission given by instructor.

EXCLUSIONS: OCEA 4200.06

OCEA 4210 Time Series Analysis in Oceanography and Meteorology

CREDIT HOURS: 3

See course description for STAT 4390.03 in the Statistics section of this calendar.

PREREQUISITES: Instructor's consent

CROSSLISTED: STAT 4390.03

EXCLUSIONS: STAT 5390.03, OCEA 5210.03

FORMATS: Lecture

OCEA 4220 Numerical Modelling of Atmospheres and Oceans

CREDIT HOURS: 3

This course discusses numerical modelling techniques for simulating atmospheric and oceanic circulations. Material includes: review of governing equations; finite difference, finite element, and spectral methods; Eulerian, semi-implicit and semi-Lagrangian time integration techniques; accuracy and stability analyses; data assimilation and ensemble prediction methods; and boundary treatment for ocean models.

PREREQUISITES: 1000-level calculus course and instructor's consent

CROSSLISTED: OCEA 5220.03

FORMATS: Lecture

OCEA 4221 Ocean Dynamics

CREDIT HOURS: 3

An advanced course for students in Physical Oceanography and Atmospheric Science that studies the basic equations governing rotating geophysical flows, plus applications. Topics include geostrophy, conservation of potential vorticity, quasi-geostrophic dynamics, geostrophic adjustment, response to surface forcing (steady and unsteady).

CROSSLISTED: OCEA 5221.03

OCEA 4222 Estuary, Coast and Shelf Dynamics

CREDIT HOURS: 3

This course discusses the physical processes that operate on continental shelves to create long waves, tides, tidal mixing, thermohaline circulation, wind forcing, upwelling, etc. Both observations and models for these processes are discussed.

PREREQUISITES: OCEA 4120.03

CROSSLISTED: OCEA 5222.03

FORMATS: Lecture

OCEA 4230 Biology of Phytoplankton

CREDIT HOURS: 3

This is an upper-division course on the phytoplankton in the context of their evolutionary history and ecological diversity. It has an emphasis on their adaptations and acclimation to different environments and their role in food webs and biogeochemical cycling.

PREREQUISITES: MATH 1000.03 and 1010.03 or MATH 1215.03, OCEA 2001.03 and 2002.03; or permission of Instructor.

CROSSLISTED: BIOL 4662.03, OCEA 5230.03, MARI 4662.03

FORMATS: Lecture

OCEA 4250 Acoustical Oceanography

CREDIT HOURS: 3

This class covers the basic theory of sound propagation and scattering in the ocean environment, and the applications to acoustic remote sensing of the ocean interior. Topics include: normal modes; ray theory; scattering from particles, bubbles and biota; sonar theory and operation.

PREREQUISITES: MATH 2001.03 and 2002.03 or equivalent and instructor's consent

CROSSLISTED: OCEA 5250.03

FORMATS: Lecture

OCEA 4290 Advanced Chemical Oceanography

CREDIT HOURS: 3

This course presents research topics in chemical oceanography, taught as 3-4 self-contained modules. Examples include, the oceanic CO₂ system and its relation to climate change, chemical reactions in sediments, photochemistry in the upper ocean, and inferring the chemistry of ancient oceans through the isotope record in sediments.

PREREQUISITES: Students will have completed all required 3000 level courses in Oceanography, OCEA 4130, and have the consent of the instructor of this course.

CROSSLISTED: OCEA 5290.03

RESTRICTIONS: Open only to students enrolled in the combined Honours in Chemistry and Oceanography

OCEA 4301 Special Topics in Ocean Science

CREDIT HOURS: 3

This course provides upper level undergraduate students with the opportunity to study an area of Ocean Science that is not offered through the existing curriculum. Students consult with a faculty member to arrange the topic of study and together develop course proposal. The course proposal must be approved by the course coordinator before the student is permitted to register.

CALENDAR NOTES: Instructors are regular faculty members in the Department of Oceanography and serve as supervisors of the Special Topics course. A maximum of 3 credit hours can be taken as a Special Topics course. The Special Topics course cannot replace one of the required core OCEA courses. The course coordinator is the Chair of the Curriculum Committee or designate. The student, with approval from the instructor, must submit the the Registration Form and other documents to the course coordinator no later than 3 days after the start of the term in which the student wishes to register. For Registration Form and more information, please visit www.dal.ca/faculty/science/oceanography/programs.html

PREREQUISITES: OCEA 2001.03, OCEA 2002.03, OCEA 2020.03, OCEA 2021.03, and at least two 3000-level OCEA course. An average grade of 'B' (GPA 3) must be attained in these OCEA courses. Signature required from the course coordinator.

RESTRICTIONS: Material produced during a Special Topics course cannot fulfill the requirements for an Honours thesis. For additional restrictions, please see <http://>

EXCLUSIONS: E3

FORMATS: Other (explain in comments)

OCEA 4302 Independent Research in Ocean Science

CREDIT HOURS: 3

Students in their 3rd or 4th year of study conduct supervised, independent research in Ocean Science. The student and a faculty supervisor together develop a course outline, with a proposal for original research and the method of evaluation, including a formal research paper. The course outline must be approved by the course coordinator before the student is permitted to register. The course coordinator is the Chair of the Curriculum Committee or designate.

CALENDAR NOTES: This course builds on field work, lab experiment(s) or measurements, literature meta-analysis, and/or modeling exercise(s). The course is to be started and completed within one term. Supervisors are regular faculty in the department of Oceanography who conduct research in an area related to the course. A maximum of 3 credit hours can be taken as an Independent Research course. The Independent Research course cannot replace one of the required core OCEA courses. The student, with approval from the supervisor, must submit the the Registration Form and other documents to the course coordinator no later than 3 days after the start of the term in which the student wishes to register. For Registration Form and more information, please visit www.dal.ca/faculty/science/oceanography/programs.html

PREREQUISITES: OCEA 2001.03, OCEA 2002.03, OCEA 2020.03, OCEA 2021.03, and at least one 3000-level OCEA course. An average grade of 'B' average (GPA 3) must be attained in these OCEA courses. Signature required from the course coordinator.

RESTRICTIONS: Material prepared for an Independent Research course cannot be used in an Honours thesis. Students cannot take OCEA 4302.03 and the Honours course (OCEA 4201.03 and OCEA 4202.03) in the same academic year. For additional restrictions, please see <http://>

EXCLUSIONS: E2

FORMATS: Other (explain in comments)

OCEA 4311 Fluid Dynamics I

CREDIT HOURS: 3

An introduction to the theory of fluid dynamics, with some emphasis on geophysically important aspects. Contents: tensor mathematics, flow kinematics, equations of motion, viscous flow, potential flow, convection, turbulence, and basic aerodynamics. Occasional reference will be made to current research topics, especially those in Physical Oceanography.

PREREQUISITES: Intended for first-year graduate students in physical oceanography, but graduate students or senior undergraduates in Mathematics or Physics are invited to take it (subject to instructor approval)

CROSSLISTED: PHYC 4311.03,

EXCLUSIONS: PHYC 5311.03, OCEA 5311.03

FORMATS: Lecture

OCEA 4320 Seafloor Mapping

CREDIT HOURS: 3

A fourth-year undergraduate course on ocean mapping technologies and techniques for the study of the seabed environment. Acoustic remote sensing technologies, ground-validation techniques, and data processing and integration methods using geospatial software are covered. The focus of the course is on how these approaches are used to study and map the geology and biology of the ocean floor.

PREREQUISITES: ENV5 3500.03/ERTH 3500.03./GEOG 3500.03, or permission of instructor

EXCLUSIONS: OCEA 5320.03

OCEA 4330 Benthic Ecology

CREDIT HOURS: 3

A fourth year undergraduate course on major topics of benthic ecology, such as animal-sediment relationships, ecosystem processes and geospatial patterns of structure and dynamics of benthic communities. Courses consist of two lectures per week and one journal discussion session. The last three weeks are devoted to a class research project.

PREREQUISITES: OCEA 2001.03, OCEA 2002.03, and BIOL 2060.03, or permission of instructor

CROSSLISTED: BIOL 4666.03, MARI 4666.03

FORMATS: Lecture

OCEA 4331 History of Marine Sciences

CREDIT HOURS: 3

In this course, we will trace the history of marine sciences from the ancients to the 20th century. Topics may include ancient cosmologies, voyages of discovery, ocean circulation, and a range of scientific perspectives and technological developments that have shaped human understanding of the oceans.

PREREQUISITES: Instructor's consent

CROSSLISTED: BIOL 4664.03, OCEA 5331.03, SCIE 4001.03, HIST 3073.03, HSTC 3331.03, MARI 4664.03

FORMATS: Lecture

OCEA 4370 Deep Sea Biology

CREDIT HOURS: 3

We focus on the biology of organisms inhabiting the deep sea: physiological adaptations to the physicochemical and geological environment; spatial and temporal distributions of biological assemblages; and regulatory factors of these assemblages, such as currents, food availability, reproduction and recruitment. Also, we delve into unique habitats, such as hydrothermal vents.

PREREQUISITES: BIOL 2060.03, OCEA 2001.03 and OCEA 2002.03

CROSSLISTED: BIOL 4370.03, MARI 4370.03,

EXCLUSIONS: OCEA 5370.03

OCEA 4380 Marine Modelling

CREDIT HOURS: 3

This course provides an overview of modelling techniques applied to biological and biogeochemical topics in oceanography, including the philosophy of modelling, population dynamics, linear and non-linear regression analysis, Principal Component Analysis, numerical approaches to solving differential equations, and visualization. All techniques are introduced with concrete examples and applied to specific problems.

PREREQUISITES: MATH 1000.03; MATH 1010.03; OCEA 2020.03; OCEA 2021.03; or permission of instructor.

CROSSLISTED: OCEA 5380.03

FORMATS: Lecture

OCEA 4401 Marine Management I

CREDIT HOURS: 3

This course exposes students with a marine science background to the increasing need for marine scientists and ocean managers and policy makers to work collaboratively to address the interdisciplinary nature of the problems confronting the world's oceans. This course is restricted to 4th year students with a marine science background.

PREREQUISITES: OCEA 2001.03 and OCEA 2002.03 (or OCEA 2000.06)

RESTRICTIONS: Restricted to 4th year students

FORMATS: Lecture

OCEA 4402 Marine Management II

CREDIT HOURS: 3

Students focus on the linkages between ocean governance and ocean science to understand the role of marine science in informing and influencing decisions affecting coastal and marine space and resources at multiple geographic and jurisdictional scales. This course is restricted to 4th year students with a marine science background.

PREREQUISITES: OCEA 2001.03 and OCEA 2002.03 (or OCEA 2000.6); OCEA 4401.03

RESTRICTIONS: Restricted to 4th year students

FORMATS: Lecture

OCEA 4411 Atmospheric Dynamics I

CREDIT HOURS: 3

See course description for PHYC 4411.03 in the Physics and Atmospheric Science section of this calendar.

PREREQUISITES: PHYC 2140.03, or instructor's consent

CROSSLISTED: PHYC 4411.03

EXCLUSIONS: OCEA 5411.03, PHYC 5411.03

OCEA 4412 Atmospheric Dynamics II

CREDIT HOURS: 3

See course description for PHYC 4412.03 in the Physics and Atmospheric Science section of this calendar.

PREREQUISITES: OCEA 4411.03/5411.03 or PHYC 4411.03/5411.03, or instructor's consent

CROSSLISTED: OCEA 5412.03, PHYC 4412.03/ PHYC 5412.03

OCEA 4470 Introduction to Seismic Imaging

CREDIT HOURS: 3

See course description for EARTH 4470.03 in the Earth Sciences section of this calendar.

PREREQUISITES: EARTH 2270.03, or instructor's consent

CROSSLISTED: OCEA 5470.03, EARTH 4470.03/5470.03

OCEA 4505 Atmospheric Physics

CREDIT HOURS: 3

See course description for PHYC 4505.03 in the Physics & Atmospheric Science section of this calendar.

CROSSLISTED: OCEA 5505, PHYC 4505/5505

OCEA 4520 Introduction to Atmospheric Science

CREDIT HOURS: 3

See course description for PHYC 4520.03 in the Physics and Atmospheric Science section of this calendar.

PREREQUISITES: PHYC 2140.03, or instructor's consent

CROSSLISTED: OCEA 5520.03, PHYC 4520.03/5520.03

OCEA 4541 Synoptic Meteorology I

CREDIT HOURS: 3

See course description for PHYC 4540.03 in the Physics and Atmospheric Science section of this calendar.

COREQUISITES: OCEA 4411.03

PREREQUISITES: At least one third-year Physics course

CROSSLISTED: PHYC 4541.03

EXCLUSIONS: OCEA 5541.03, PHYC 5541.03

OCEA 4550 Synoptic Meteorology II

CREDIT HOURS: 3

See course description for PHYC 4550.03 in the Physics and Atmospheric Science section of this calendar.

PREREQUISITES: OCEA 4541.03, or PHYC 4540

CROSSLISTED: OCEA 5550.03, PHYC 4550.03/5550.03

OCEA 4595 Atmospheric Chemistry

CREDIT HOURS: 3

See course description for PHYC 4595.03 in the Physics and Atmospheric Science section of this calendar.

PREREQUISITES: PHYC 2140.03 and a first-year chemistry course

CROSSLISTED: PHYC 4595.03, CHEM 4595.03

EXCLUSIONS: OCEA 5595.03, PHYC 5595.03

OCEA 4665 Hacking the blue planet: The scientific and social dimensions of ocean fertilization

CREDIT HOURS: 3

See course description for MARI 4665.03 in the Marine Biology section of this calendar.

PREREQUISITES: One of the BIOL 3101.03, OCEA 2000X/Y.06, EARTH 3601.03, BIOL 3060.03 or instructor's permission

CROSSLISTED: MARI 4665.03

EXCLUSIONS: BIOL 5665.03, OCEA 5665.03

FORMATS: Lecture | Discussion

Introduction

How does the world work? What are the rules that govern how things happen? These are the questions that intrigue physicists who try to explain the great diversity of nature with the fewest and simplest hypotheses. They discover that there are underlying similarities between things that look very different on the surface. Good physicists have the imagination to see these similarities, coupled with the understanding of the fundamentals of their science to determine the rules that govern the universe. Our programs are designed to allow you to learn physics in a systematic manner and understand how physics applies to the world around us.

Physicists are employed in many areas in universities, government departments and industry and are valued for their ability to discover and apply fundamental insights to a variety of situations.

This intellectual rigor can be applied in many fields beyond physics including meteorology, engineering, education, law, medicine, dentistry, health sciences, and business. Because practicing physicists often have knowledge of several fields, we have a number of combined programs with other science disciplines to provide that broader approach.

Our Honours program is our most comprehensive program aimed at those intending to become career physics specialists. Our various major and combined programs described below provide the opportunity to pursue a broad education in both physics and other areas.

First Year Courses

PHYC 1400 is a general interest course and is not acceptable as a prerequisite for further courses in physics. PHYC 1190/PHYC 1290, and PHYC 1310/PHYC 1320 both give a general introduction to physics, but each has its own particular approach and selection of topics.

PHYC 1190/PHYC 1290 is primarily for students intending to make a study of a physical science or engineering; it has regular labs, occasional tutorials, uses calculus, and is accepted as a prerequisite for advanced physics courses. Nova Scotia Grade XII Physics or its equivalent is a prerequisite. It is recommended that PHYC 1190/PHYC 1290 be taken consecutively, but PHYC 1190 is not a prerequisite for PHYC 1290.

PHYC 1310/PHYC 1320 is an introduction to physics that is oriented towards the health sciences and is primarily intended for students in biology, pre-medicine, pre-dentistry and allied health sciences. The course incorporates labs and tutorials, and is accepted as a prerequisite for advanced physics courses when MATH 1000.03 and MATH 1010.03 are taken concurrently. It is a good preparation for the Medical College Admission Test (MCAT). Nova Scotia Grade XII Physics or its equivalent is highly recommended.

Students who are participating in the Integrated Science Program, and are interested in continuing in Physics, should consult the Undergraduate Advisor.

Second Year Courses

There are five 2nd year core physics courses (PHYC 2050, PHYC 2060, PHYC 2150, PHYC 2510, PHYC 2515). These courses are also suitable for students in other disciplines who would like to enhance their knowledge of physics. In particular, PHYC 2150 provides an opportunity to gain more laboratory experience, which is extremely valuable in many jobs.

Third and Fourth Year Courses

Not all courses are offered each year. Students should take careful note of the year in which each of these courses is planned to be offered. This information can be found at the department website <http://www.physics.dal.ca>

Prizes are awarded to the top students in each year of the program. Please refer to [Awards](#).

Degree Programs

The Department of Physics and Atmospheric Science offers the following degree programs in Physics

- BSc or BA (120 credit hour) Honours (Concentrated)*
- BSc or BA (120 credit hour) Combined Honours*
- BSc or BA (120 credit hour) Major*
- BSc or BA (120 credit hour) Major combined with a Diploma in Meteorology*
- BSc or BA (120 credit hour) Double Major*
- BSc or BA (90 credit) Minor in Physics
- Minor in Physics
- One year Diploma in Meteorology

* BSc [Co-op option](#) available

* May be combined with Minor programs from other disciplines

Departmental requirements for each degree program can be seen by following the links in the menu to the right.

In addition to departmental requirements, students must satisfy the requirements outlined in the [Academic Regulations](#) and the [College of Arts and Science Degree Requirements](#) sections.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Student applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with a Physics undergraduate academic advisor.

Staff

Dean

Macdonald, C.L.B., BSc (Hons), PhD (Dalhousie), Professor (Chemistry)

Chair of Department and George Munro Professor of Physics

Hill, Ian. (902) 494-3897 ian.hill@dal.ca

Undergraduate Advisor Coordinator

Bennett, P. (902) 494-2313 philip.bennett@dal.ca

Coordinator, Atmospheric Science

Folkins, I. (902) 494-1292 ian.folkins@dal.ca

Coordinator, Diploma in Meteorology

Folkins, I. (902) 494-1292 ian.folkins@dal.ca

Graduate Coordinator

Labrie, D. (902) 494-2322 daniel.labrie@dal.ca

Co-op Academic Advisor

Labrie, D. (902) 494-2322 daniel.labrie@dal.ca

Professors Emeriti

Dahn, J. R., BSc (Dalhousie), MSc, PhD (UBC), FRSC, O.C., Principle Investigator-NSERC/Tesla Canada/Dalhousie Alliance Grant
Drummond, J. R., BA, MA, PhD (Oxford), FRSC, Canada Research Chair, Remote Sounding of Atmospheres
Dunlap, R. A., BS (Worcester), AM (Dart), PhD (Clark), Research
Jericho, M. H., BSc, MSc (Dalhousie), PhD (Cantab), FRSC
Kreuzer, H. J., MSc, DSc (Bonn), FRSC, A.C. Fales Professor of Theoretical Physics
Rotermund, H. H., PhD (Berlin)
Stroink, G., BSc, MSc (Delft), PhD (McGill), PEng

Professors Research

Dunlap, R. A., BS (Worcester), AM (Dart), PhD (Clark), Research
Geldart, D. J. W., BSc (Acadia), PhD (McMaster), FRSC, Research

Professors

Beyea, S., PhD (UNB), primary appointment with Diagnostic Radiology
Chapman, S. C., BSc, MSc, PhD (UBC)
Hall, K. C., MSc, PhD (Toronto), Canada Research Chair, Ultrafast Science
Hewitt, K., BSc (Toronto), PhD (SFU), PPhys
Hill, I. G., BSc, PhD (Queen's), George Munro Professor of Physics
Johnson, E.R. BSc (Carleton, PhD (Queen's)
Kreplak, L., MSc (Supelec), PhD (Univ Paris XI), cross appointment with Biomedical Engineering
Monchesky, T., BAsC (Toronto), PhD (SFU)
Robar, J., MSc (McGill), PhD (UBC), primary appointment with Radiation Oncology
Rutenberg, A. D., BSc (Toronto), PhD (Princeton)
Zwanziger, J. W., BA (Chicago), PhD (Cornell), Canada Research Chair in NMR Studies of Materials, primary appointment with Chemistry

Associate Professors

Bardouille, T., BSc (Queens), MAsC (Dalhousie), PhD (Toronto)
Duck, T., BSc, PhD (York)
Chang, R. Y. -W., BAsC, MAsC, PhD (Toronto), Canada Research Chair in Atmospheric Science
Folkins, I., BSc (Dalhousie), MSc, PhD (Toronto)
Kyriakidis, J., BSc, MSc (Dalhousie), PhD (Basel)
Labrie, D., BSc (Montreal), MSc, PhD (McMaster)
Maksym, G. N., PhD (McGill), primary appointment in the School of Biomedical Engineering
Maassen, J., BEng, MAsC (Ecole Polytechnique de Montreal), PhD (McGill)
Obrovac, M., PhD (Dalhousie), primary appointment in Chemistry

Assistant Professors

Bennett, P., PhD (UBC), St. Mary's
Brewer, K., PhD (Dalhousie), Primary appointment with Department of Diagnostic Radiology
Chang, R. Y. -W., BAsC, MAsC, PhD (Toronto), Canada Research Chair in Atmospheric Science
Cherpak, A., PhD (Carleton), Primary appointment with Department of Radiation Oncology
Chytyk-Praznik, K., PhD (Manitoba), Primary appointment with Department of Radiation Oncology
Hashmi, J., PhD (Toronto), Primary appointment with Department of Anesthesia, Pain Management and Perioperative Medicine
Helbig, M., BSc (University of Freiburg), MSc (University of Hamburg), PhD (Universite de Montreal)
Maassen, J., BEng, MAsC (Ecole Polytechnique de Montreal), PhD (McGill)
Metzger, M., MSc (Technical University of Munich), PhD (Technical University of Munich)
Syme, A., PhD (Alberta), Primary appointment with Department of Radiation Oncology
Thomas, C., BSc (St. Mary's), MSc (Dalhousie), PhD (Western), Primary appointment with Department of Radiation Oncology
Xiao, P., BSc (Beihang University), PhD (University of Texas)
Yang, C., BSc (Nanjing), PhD (Chinese Academy of Sciences), Tesla Canada Chair
Yewondwossen, M., PhD (Dalhousie), Primary appointment with Department of Radiation Oncology

Senior Instructors

de Vet, S. J., MSc (Dalhousie), PhD (Western)
Payne, S. H., BSc, PhD (Canterbury)

Adjunct Professors

Bennett, J. C., PhD (Waterloo), Physics, Acadia

***Dahn, J. R.**, BSc (Dalhousie), MSc, PhD (UBC), FRSC, O.C., Principle Investigator-NSERC/Tesla Canada/Dalhousie Alliance Grant

Grabtchak, S., PhD (UPEI)

Hayes, P., PhD (Northwestern)

Isaac, G., BSc, MSc, PhD (McGill)

Kilfoil, M., PhD (Memorial)

***Lesins, G. B.**, PhD (Toronto)

Yaghoobikoopae, H., PhD (Semnan)

Zhang, L., PhD (Texas)

Zhang, N., PhD (Northeastern)

BSc or BA (120 credit hour) Concentrated Honours in Physics

Students who want a challenging program resulting in a broad and in-depth background in Physics, including an independent research experience, may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours. Honours students complete a minimum of 54 credit hours above the 1000 level in the Physics courses listed below with a minimum GPA of 3.0, and write a research-based Honours thesis. The thesis requirement is satisfied through completion of PHYC 4800.03/PHYC 4850.03.

A [Co-op option](#) is available for students enrolled in a BSc Concentrated Honours in Physics.

Admission to Honours

Students must apply for admission to Honours programs. Students considering Honours in Physics should consult with a Physics Undergraduate Advisor early in their second year.

Departmental requirements

In addition to fulfilling the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections, students in a Concentrated Honours program in Physics must complete the following courses:

1000 level

- PHYC 1190.03/PHYC 1290.03: Introduction to Physics or PHYC 1310.03/PHYC 1320.03: Physics In and Around You
- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
- MATH 1030.03: Matrix Theory and Linear Algebra I

Or Integrated Science Program (options above)

2000 level

- PHYC 2060.03: Oscillations and Waves/PHYC 2150.03: Physics Tools: Experiment
- PHYC 2515.03: Modern Physics/PHYC 2510.03: Electricity and Magnetism
- MATH 2001.03: Intermediate Calculus I

- MATH 2120.03: Methods for Ordinary Differential Equations
- PHYC 2050.03: Computer Simulation in Science

3000 and 4000 level

- PHYC 3000.03: Experimental Physics I/PHYC 3010.03: Experimental Physics II
- PHYC 3640.03: Quantum Physics I/PHYC 3590.03: Advanced Classical Mechanics
- PHYC 3200.03: Thermodynamics/PHYC 3210.03: Statistical Mechanics
- MATH 3120.03: Differential Equations/PHYC 3100.03
- PHYC 4151.03: Quantum Physics II
- PHYC 4160.03: Mathematical Methods of Physics
- PHYC 4800.03/PHYC 4850.03: Honours Research Project
- An additional six credit hours of 3000 or 4000 level PHYC courses, other than PHYC 3160.03, PHYC 3170.03, PHYC 3330.03, PHYC 4540.03: Synoptic Meteorology I, PHYC 4550.03: Synoptic Meteorology II

* Up to 30 credit hours of general electives may be chosen from the Faculty of Engineering.

Honours Qualifying Exam

The Honours Qualifying Exam grade is the average of best ten grades obtained in 3000 and 4000 level Honours courses.

BSc or BA (120 credit hour) Combined Honours in Physics and another subject

Students who wish to study Physics in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Physics may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject. In recent years, students have combined Physics with

- Mathematics
- Biology
- Earth Sciences
- Chemistry
- Computer Science
- History of Science and Technology
- Contemporary studies

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. The same standards and conditions for admission apply as for entry into a Concentrated Honours program (see above). In addition, students must have their program of study approved by Academic Advisors in both subject areas. Students must complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Physics, this requirement is satisfied through PHYC 4800.03/PHYC 4850.03.

A [Co-op option](#) is available for students enrolled in BSc Combined Honours with Physics as the primary subject.

Departmental requirements

In addition to fulfilling the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections, students in a Combined Honours program in Physics and another subject must complete the courses listed below. Elective Physics courses should be chosen in consultation with a Physics undergraduate advisor. If courses are not selected carefully, students in a Combined Honours program may not be qualified to enter a regular graduate program in Physics after graduation.

Physics as the primary or secondary subject

1000 level

- PHYC 1190.03/PHYC 1290.03: Introduction to Physics or PHYC 1310.03/ PHYC 1320.03: Physics In and Around You
- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium

Or Integrated Science Program (options above)

2000 level

- PHYC 2060.03: Oscillations and Waves/PHYC 2150.03: Physics Tools: Experiment
- PHYC 2515.03: Modern Physics/PHYC 2510.03: Electricity and Magnetism
- MATH 2001.03: Intermediate Calculus I
- MATH 2120.03: Methods for Ordinary Differential Equations
- PHYC 2050.03: Computer Simulation in Science

3000 and 4000 levels

- A minimum of 18 credit hours in PHYC courses at or above the 3000 level

If Physics is the primary subject

- An additional six credit hours at or above the 3000 level, which may be PHYC 4800.03/PHYC 4850.03: Honours Research Project

BSc or BA (120 credit hour) Major in Physics

The 120 credit hour Major is suited to students who want to focus on *Physics*, but wish to have a program that is somewhat less constrained than the Honours program. Physics Majors complete a minimum of 42 credit hours in Physics courses past the 1000 level as listed below. Research and other experiential learning opportunities are available through laboratories, special topics and experiential classes.

A [Co-op option](#) is available for students enrolled in a 120 credit hour BSc Major program in Physics.

Departmental requirements

In addition to fulfilling the requirements outline in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections, students in a Major program in Physics must complete the following courses:

1000 level

- PHYC 1190.03/PHYC 1290.03: Introduction to Physics or PHYC 1310.03/PHYC 1320.03: Physics In and Around You
- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium

Or Integrated Science Program (options above)

2000 level

- PHYC 2060.03: Oscillations and Waves/PHYC 2150.03: Physics Tools: Experiment
- PHYC 2515.03: Modern Physics/PHYC 2510.03: Electricity and Magnetism
- MATH 2001.03: Intermediate Calculus I
- MATH 2120.03: Methods for Ordinary Differential Equations
- PHYC 2050.03: Computer Simulation in Science
- Six additional physics credit hours at or above the 2000 level

3000 and 4000 level

- A minimum of 21 additional physics credit hours at or above the 3000 level

BSc (120 credit hour) Major in Physics combined with a Diploma in Meteorology

This is an integrated Physics/Meteorology program. In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students must complete the following courses:

1000 level

- PHYC 1190.03/PHYC 1290.03: Introduction to Physics or PHYC 1310.03/PHYC 1320.03: Physics In and Around You
- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
- MATH 1030.03: Matrix Theory and Linear Algebra I

Or Integrated Science Program (options above)

2000 level

- PHYC 2060.03: Oscillations and Waves/PHYC 2150.03: Physics Tools: Experiment
- PHYC 2515.03: Modern Physics/PHYC 2510.03: Electricity and Magnetism
- MATH 2001.03: Intermediate Calculus I/MATH 2120.03: Methods for Ordinary Differential Equations
- PHYC 2050.03: Computer Simulation in Science
- Three additional physics credit hours at or above the 2000 level

3000 level

- PHYC 3100.03 or PHYC 3210.03: Statistical Mechanics or PHYC 3250.03: Computational Methods in Physics or PHYC 3590.03: Advanced Classical Mechanics or PHYC 4311.03: Fluid Dynamics I
- PHYC 3200.03: Thermodynamics

4000 level: Meteorology course requirements

- PHYC 4505.03: Atmospheric Physics/PHYC 4570.03: Light Scattering, Radiative Transfer, and Remote Sensing
- PHYC 4540.03: Synoptic Meteorology I/PHYC 4550.03: Synoptic Meteorology II
- PHYC 4411.03: Atmospheric Dynamics I/PHYC 4412.03: Atmospheric Dynamics II
- PHYC 4520.03: Introduction to Atmospheric Science/PHYC 4595.03: Atmospheric Chemistry
- OCEA 4120.03: Physical Oceanography
- OCEA 4220.03: Numerical Modelling of Atmospheres and Oceans or another three credit hour course approved by Program Coordinator

Students are encouraged to ensure that their program meets the requirements for the 90 credit hour BSc by the end of Year 3.

After completion of the Major in Physics and Diploma in Meteorology program, students are eligible to be considered for admission to a graduate program in Atmospheric Science at Dalhousie.

BSc or BA (120 credit hour) Double Major in Physics and another subject

The Double Major degree program allows students to combine a study of Physics with another subject. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Physics may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

It is recommended that students enrolled in a Double Major program consult with advisors in both subject areas.

A [Co-op option](#) is available for students enrolled in BSc Double Major with Physics as the primary subject.

Departmental requirements

In addition to fulfilling the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections, students in a Double Major program in Physics and another subject must complete the following:

Physics as the primary or secondary subject

1000 level

- PHYC 1190.03/PHYC 1290.03: Introduction to Physics or PHYC 1310.03/PHYC 1320.03: Physics In and Around You or equivalent
- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium

Or Integrated Science Program (options above)

2000 level

- PHYC 2060.03: Oscillations and Waves/PHYC 2150.03: Physics Tools: Experiment
- PHYC 2515.03: Modern Physics/PHYC 2510.03: Electricity and Magnetism
- PHYC 2050.03: Computer Simulation in Science

3000 and 4000 levels

- A minimum of 18 credit hours in PHYC courses at or above the 3000 level

BSc or BA (90 credit hour) Minor in Physics

The 90 credit hour degree with Minor in Physics is appropriate for students who want to study some Physics but do not wish to complete the conventional four-year program. The degree is best suited for students who want a general science degree with some specialization in Physics. A 90 credit hour degree program is not suitable for students who wish to pursue graduate studies. With additional study, the degree may be upgraded to a 120 credit hour Major or Honours degree at a later date.

A 90 credit hour BSc in Physics is usually the preferred option for students who wish to combine studies in Physics with a degree in Engineering (see BSc/BEng or BA/BEng Concurrent Program below). Students with a 90 credit hour BSc in Physics may also want to consider the one year [Diploma in Meteorology program](#).

See the [Minor in Physics](#) section of this Calendar.

Diploma in Meteorology

Students with a general 90 credit hour BSc degree in Physics, Mathematics, Chemistry, or other quantitative disciplines, may apply for admission into a one year Diploma in Meteorology program, provided they have completed the appropriate Physics and Mathematics courses. A strong background in Physics and Mathematics is necessary, and courses taken should cover Vector Calculus and differential equations. More information on the Diploma in Meteorology program is available at http://atm.dal.ca/Diploma_in_meteorology/.

Course requirements

- PHYC 4505.03: Atmospheric Physics/PHYC 4570.03: Light Scattering, Radiative Transfer, and Remote Sensing
- PHYC 4540.03: Synoptic Meteorology I/PHYC 4550.03: Synoptic Meteorology II
- PHYC 4411.03: Atmospheric Dynamics I/PHYC 4412.03: Atmospheric Dynamics II
- PHYC 4520.03: Introduction to Atmospheric Science/PHYC 4595.03: Atmospheric Chemistry
- OCEA 4120.03: Physical Oceanography
- OCEA 4220.03: Numerical Modelling of Atmospheres and Oceans or another three credit hour course approved by Program Coordinator

After completion of the Diploma program, students are eligible to be considered for admission to a graduate program in Atmospheric Science at Dalhousie.

Minor in Physics

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A BSc or BA (90 credit hour) degree program with a Minor in Physics is available to students in the Faculty of Science.

Departmental Requirements

A minimum of 18 credit hours in Physics (PHYC) courses at the 2000 level or higher, to a maximum of 36 credit hours, not including Physics (PHYC) courses that do not count toward a 120 credit hour degree in Physics.

Contact [Physics and Atmospheric Science](#) for more information.

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Co-operative Education Program in Physics

Co-op Academic Advisor: Dr. D. Labrie (daniel.labrie@dal.ca)

Co-operative Education in Science is a program where academic study in a science subject is combined with paid career-related work experience. Students undertake three work-terms interspersed with their academic study terms. Science Co-op degree programs enable students to apply their knowledge directly while providing them with work experience that assists in making educated career choices.

Co-op is available to students in BSc (120 credit hour) Honours or Major programs in Physics, or in Combined Honours or Double Major programs with Physics as the primary subject. The number of students admitted into Co-op each year is limited. A minimum GPA of 3.00 is required for admission and for continuation in the Co-op program. Students must be eligible to work in Canada.

Students normally apply to join Co-op during their first year of study. Students must apply before April 15, and it is strongly recommended that interested students meet with their Departmental Co-op advisor early in the Winter term of their first year. If accepted into Science Co-op, students must register for, and attend the Science Co-op Seminar Series (SCIE 2800.00) at least four months prior to the first work term.

Details are available from the Physics Co-op Academic Advisor and from the Co-operative Education office www.dal.ca/academics/cooperative_education.html. For more information on Co-op Education in Physics, please see the departmental webpage www.dal.ca/academics/programs/undergraduate/pas/what_will_i_learn/coop_work_term.html.

Minors available to students in Physics

Minor programs allow students to develop subject specialties in addition to their major or honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs (including Science Co-op).

Students in a BSc or BA (120 credit hour) program in Physics may choose to include a Minor selected from the [list of approved Minors](#). Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc or BA in Physics, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of [Faculty of Science Certificates](#) and requirements can be found at the beginning of the [Faculty of Science](#) section. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the [College of Arts and Science Degree Requirements](#) section.

Certificates of particular interest to student enrolled in a BSc or BA in Physics include:

- [Certificate in Information Technology](#)
- [Certificate in Materials Science](#)
- [Certificate in Science Leadership and Communication](#)

BSc/BEng or BA/BEng Concurrent Program

BEng/BSc (90 credit hour) concurrent degree (Physics)

This degree prepares students for research and development careers in a broad range of sectors such as materials engineering, optoelectronics and clean technologies. Following is the recommended sequence of courses for students wishing to obtain a concurrent BEng and BSc (90 credit hour) degree with Minor in Physics. Interested students must consult with the Assistant Dean, Faculty of Science, and the Associate Dean, Faculty of Engineering prior to enrolling in a concurrent BEng/BSc degree.

It is recommended that students also discuss their selection of courses with an undergraduate advisor in the Department of Physics. A concurrent BEng/BSc Honours Physics program can be designed for interested candidates.

Graduate with Diploma in Engineering and BSc 90 credit Minor in Physics degree

Year 4 Continue in BEng program

Year 5 Complete BEng program

^a To meet the BSc 90 credit hour Minor in Physics requirements, students complete 30 credit hours in addition to their Engineering requirements: 18 credit hours of PHYC courses at or above the 2000 level (excluding any PHYC course that does not count toward a

120 credit hour degree in Physics), 6 credit hours of social science/humanities courses, and 6 credit hours of elective courses from Science or FASS (may be additional PHYC courses)

^b Writing requirement: choose from eligible writing courses in CLAS, ENGL, GERM, HIST, PERF, PHIL, RELS, or RUSN to fulfill [writing and humanities requirements](#).

^c Choose from CANA, CTMP, ECON, EMSP, EURO, GWST, HIST, HSTC, INTD, POLI, PSYO, SOSA, SUST for social science courses. Choose from ARBC, CANA, CHIN, CLAS, CTMP, CRWR, EMSP, EURO, SWST, GERM, HIST, HTSC, ITAL, PERF, PHIL, RELS, RUSN, SPAN and THEA for humanities courses

^d Selection of engineering electives depends on engineering discipline. See [Engineering section](#) of the calendar for details.

Notes:

- ENGM 2101 and 2022 fulfill the MATH 2001/2002 requirement for the Physics Minor
- ENGM 1081 fulfills the PHYC 2050 requirement for the Physics Minor

Geophysics

For students interested in Geophysics, two options are recommended:

- Combined Honours program in Physics and Earth Sciences,

OR

- Concentrated Honours in Physics
- Elective courses: EARTH 2270.03, EARTH 3270.03, EARTH 4470.03, EARTH 4480.03.

PHYC-Equivalent Courses

Other Dalhousie departments offer courses in one or more areas of Physics. Students enrolled in a 120 credit hour BSc or BA program in Physics may count any of the following courses toward their Physics program course requirements:

Please note that PHYC-equivalent courses will not count towards a minor program in Physics.

Any course cross-listed as a PHYC course

Department	Courses
Electical and Computer Engineering	ECED 4350

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above

are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions

PHYC 0010 University Prep Physics

CREDIT HOURS: 0

This course can be used as a prerequisite for PHYC 1100X/Y.06 and PHYC 1300X/Y.06. The course will develop problem-solving techniques in preparation for topics to be covered in PHYC 1100X/Y.06 and PHYC 1300X/Y.06. This course is offered by the College of Continuing Education. Students may register and pay for this course at the College of Continuing Education located at 1220 LeMarchant Street, 2nd Floor or by calling (902) 494-2375. This course is offered in the Fall and Summer sessions only (see College of Continuing Education for more details <http://collegeofcontinuinged.dal.ca>).

PREREQUISITES: Grade 12 Pre-Calculus Math

PHYC 1190 Introduction to Physics

CREDIT HOURS: 3

This course concentrates on mechanics (forces and motion). Primarily for students interested in Physical Sciences and Engineering. Students entering this course must be familiar with algebra, graphs, and trigonometry, and should be taking calculus (MATH 1000.03/1010.03 or MATH 1280.03/1290.03) concurrently. Ideas are introduced through in-class demonstrations enabling students to relate physical theory to events in the real world. Students explore many concepts via hands-on labs.

PREREQUISITES: High School Physics equivalent to the Nova Scotia 12 level. Students not having a physics credit equivalent to Nova Scotia Grade 12 Physics are strongly advised to take PHYC 0010.00 available in the summer and in the fall term. See the College of Continuing Education at: <http://collegeofcontinuinged.dal.ca>.

EXCLUSIONS: Credit will be given for only one of 1190.03, 1280.03, or 1310.03

FORMATS: Lecture | Lab

PHYC 1290 Introduction To Physics

CREDIT HOURS: 3

This course concentrates on oscillations and waves, optics, electricity and magnetism. Primarily for students interested in Physical Sciences and Engineering. This course is required for all Engineering programs. Students entering this course must be familiar with algebra, graphs, and trigonometry, and should be taking calculus (MATH 1000.03/1010.03 or MATH 1280.03/1290.03) concurrently. Ideas are introduced through in-class demonstrations enabling students to relate physical theory to events in the real world. Students explore many concepts via hands-on labs.

PREREQUISITES: High School Physics equivalent to the Nova Scotia 12 level. Students not having a physics credit equivalent to Nova Scotia Grade 12 Physics are strongly advised to take PHYC 0010.00 available in the summer and in the fall term. See the College of Continuing Education at: <http://collegeofcontinuinged.dal.ca>.

EXCLUSIONS: Credit will be given for only one of 1190.03/1290.03, 1280.03/1290.03, 1300X/Y.06, or 1310.03/1320.03

FORMATS: Lecture | Lab

PHYC 1310 Physics in and Around You I

CREDIT HOURS: 3

This is an introduction to physics for students in Biology, Psychology, Arts and Environmental Sciences, and for students preparing for MCAT, and Medicine, Dentistry and Applied Health Sciences. It is accepted as a prerequisite to advanced courses in physics when combined with PHYC1320, MATH 1000.03 and 1010.03. Basic concepts in mechanics, waves, sound and fluids are applied, where possible, to realistic biological models, e.g. forces and torques are related to muscles and joints.

CALENDAR NOTES: This course is not acceptable for the Engineering program

PREREQUISITES: High School Physics equivalent to the Nova Scotia 12 level. Students not having a physics credit equivalent to Nova Scotia Grade 12 Physics are strongly advised to take PHYC 0010.00 available in the summer and in the fall term. See the College of Continuing Education at: <http://collegeofcontinuinged.dal.ca>.

EXCLUSIONS: Credit will be given for only one of PHYC 1000X/Y.06, 1100X/Y.06, 1190.03, 1280.03, 1300X/Y.06, or 1310.03

FORMATS: Lecture | Lab

PHYC 1320 Physics in and Around You II

CREDIT HOURS: 3

This is a continuation of the introduction to physics presented in PHYC 1310. Topics include optics, electricity, atomic and nuclear physics with applications to vision, cellular activity, imaging and radiation treatment. The course is designed for students in Biology, Psychology, Arts and Environmental Sciences, and for students preparing for MCAT, and Medicine, Dentistry and Applied Health Sciences. It is accepted as a prerequisite to advanced courses in physics

when combined with PHYC 1310, MATH 1000.03 and 1010.03.

CALENDAR NOTES: This course is not acceptable for the Engineering program.

PREREQUISITES: PHYC 1310.03 or PHYC 1190.03

EXCLUSIONS: Credit will be given for only one of PHYC 1000X/Y.06, 1100X/Y.06, 1290.03, 1300X/Y.06, or 1320.03

FORMATS: Lecture | Lab

PHYC 1400 Life in the Universe

CREDIT HOURS: 3

This course provides an overview of the night sky, solar system and stellar astronomy. The focus is on conditions necessary for life, the requirements of extrasolar planetary systems to support Earth-like environments, and the development of life on the Earth.

CALENDAR NOTES: Suitable as science elective for non-science majors.

EXCLUSIONS: PHYC 1451.03, PHYC 1452.03

FORMATS: Lecture | Lab | Tutorial

PHYC 1600 Understanding Weather

CREDIT HOURS: 3

The changing weather is a topic of almost universal interest. This course provides an introductory explanation for the basic processes that comprise the day to day weather changes in a non-mathematical way. Topics include weather maps and the wide range of atmospheric phenomena.

FORMATS: Lecture

PHYC 2050 Computer Simulations in Science

CREDIT HOURS: 3

Computer simulation plays an essential role in all fields of science. This class introduces techniques in computer simulation, including finite-difference calculations, Monte Carlo methods, and scientific visualization. A modern programming language and practical tools will be used. The course is suitable for students in Science, Computer Science and Engineering.

PREREQUISITES: PHYC 1190.03/PHYC 1290.03, MATH 1000.03/MATH 1010.03

PHYC 2060 Oscillations and Waves

CREDIT HOURS: 3

Oscillations and waves occur in a wide range of physical, chemical and biological systems. The objective of this course is to quantitatively explore the physics of oscillation and waves in a variety of classical systems such as mechanical and electrical oscillators, sound, and electromagnetic waves.

CALENDAR NOTES: This course replaces PHYC 2140.

PREREQUISITES: PHYC 1190/1290 or PHYC 1310/1320, and MATH 1000/1010 or MATH 1280/1290

EXCLUSIONS: PHYC 2140

FORMATS: Lecture | Tutorial

PHYC 2150 Physics Tools: Experiment

CREDIT HOURS: 3

Introducing experimental tools and techniques within a theoretical framework, this course explores concepts in oscillations, waves, electricity and magnetism. The aim is to learn and apply techniques commonly used in Physics research. The following experimental tools and techniques are explored: Instrumentation; Fourier series; Data analysis; building AC and DC circuits; Detection and production of ultrasonic, acoustic, visible, microwaves; Mechanical systems. For example, the concept of resonance is applied to electronic (e.g. Radio), optical, acoustic (e.g. Music), mechanical and nuclear (e.g. MRI) systems in the lab. Textbook: An Introduction to Error Analysis, John R. Taylor.

PREREQUISITES: PHYC 1190.03/1290.03 or 1300X/Y.06 or SCIE 1500X/Y.30 and a 1000-level calculus course, or permission of instructor

FORMATS: Lecture | Lab

PHYC 2250 Physics of Biological and Medical Technology

CREDIT HOURS: 3

This course focuses on the nature of different forms of radiation and their interactions with living organisms. Particular attention is given to imaging techniques for the examination of internal organs, and the resulting effects of radiation. Topics may include ultrasound, nuclear medicine, X-ray tomography, magnetic resonance imaging, and exposure to ultraviolet and nuclear radiation.

PREREQUISITES: PHYC 1190.03/1290.03 or 1300X/Y.06; MATH 1000.03/1010.03 or SCIE 1500X/Y.30, 1501X/Y.30, 1501X/Y.27, 1502X/Y.21, 1503X/Y.21, 1504X/Y.27, or 1510X/Y.33 or permission of the instructor.

FORMATS: Lecture

PHYC 2310 Energy and the Environment

CREDIT HOURS: 3

The physical principles and limitations of renewable energy source utilization and energy conversion. A quantitative introduction to energy conversion and storage systems, including solar power and heating, wind, tidal, geothermal, hydroelectric, nuclear power, hydrogen technology, electrical and mechanical energy storage. The input of these energy options on the global climate and environment will be discussed.

PREREQUISITES: PHYC 1190.03/1290.03 (or PHYC 1310/1320), CHEM 1011.03/1012.03, and MATH 1000.03 (or MATH 1215.03), or permission of the instructor.

CROSSLISTED: ENVS 2310.03

EXCLUSIONS: Students who have previously taken PHYC 3330 can not take PHYC 2310.

FORMATS: Lecture

PHYC 2451 Solar System Astronomy & the Night Sky

CREDIT HOURS: 3

An introduction to solar system astronomy and the night sky for science students. The historical development of astronomy, and celestial coordinate systems are discussed, with focus on the planets and satellites of our solar system. Planetarium sessions are included, as are opportunities to observe the night sky through small telescopes.

PREREQUISITES: A first year science course

EXCLUSIONS: PHYC 1400, PHYC 1451

FORMATS: Lecture

PHYC 2452 Stellar & Galactic Astrophysics

CREDIT HOURS: 3

This companion course to PHYC 2451 will serve as a general introduction to the astrophysics of stars and galaxies for science students. The basic properties of stars, star formation, stellar evolution, stellar populations, star clusters, and the late stages of stellar evolution will be discussed. The course will examine the interstellar medium, and galactic structure and evolution, and compact objects (neutron stars, black holes, quasars) at an introductory level. The role of dark matter and dark energy in the formation of the universe, and in establishing the present-day large scale structure of the universe will be reviewed.

PREREQUISITES: A first year science course, and one of MATH 1000, 1215, 1500, or 1280

EXCLUSIONS: PHYC 1452, PHYC 2450

FORMATS: Lecture

PHYC 2510 Electricity and Magnetism

CREDIT HOURS: 3

The course will develop the vector calculus needed for the description of electric and magnetic fields. Other topics include scalar and vector potentials, forces on charges, magnetic induction and Maxwell's equations. The course will give students the necessary foundation for an understanding of more advanced topics in electricity and magnetism.

PREREQUISITES: PHYC 2140.03 or PHYC 2060.03, MATH 2001.03 and MATH 2120.03 (which can be taken concurrently), or permission of the instructor.

FORMATS: Lecture | Tutorial

PHYC 2515 Modern Physics

CREDIT HOURS: 3

This course introduces two physics revolutions: Einstein's theory of special relativity and the theory of quantum mechanics. Important early experiments are considered throughout the course. We consider length contraction, time dilation, and relativistic kinematics. Then, to account for wave-like properties of matter, we introduce complex wave functions in one-dimension and show how they lead to energy quantization, Schrodinger's equation, and penetration into classically forbidden regions. Other topics of modern physics, such as random walks (transport theory) may be introduced. A tutorial is offered.

PREREQUISITES: PHYC 1190.03/1290.03 or PHYC 1300.06 or SCIE 1500.03, and a 1000 level calculus course

FORMATS: Lecture | Tutorial

PHYC 2610 Introduction to Biomechanics

CREDIT HOURS: 3

This course provides an introduction to mechanical and analytical concepts applied to the study of biological systems, particularly human movements and tissues. It expands on the knowledge acquired in PHYC 1310, the mechanics as it applies to the human body. It deals with the muscle forces required for the different tasks, the role of the centre of mass in balance and motion and the stresses and strains endured by the different biological tissues. The primary goal of the course is to learn to apply basic mechanical concepts to human movements.

PREREQUISITES: PHYC 1310.03 or PHYC 1190.03 or permission of the instructor

EXCLUSIONS: KINE 2465.03

FORMATS: Lecture

PHYC 2800 Climate Change

CREDIT HOURS: 3

The workings of the Earth's climate system are examined and then applied to help understand contemporary climate change. The role of numerical climate models is discussed with the aim of interpreting climate change predictions for the coming decades. Finally the impacts of climate change are studied with a focus on the various mitigation and adaptation strategies needed.

CROSSLISTED: GEOG 2800.03, OCEA 2800.03

EXCLUSIONS: ECON2850.06, PHYC2850.06

PHYC 2850 The Science and Economics of Climate Change

CREDIT HOURS: 6

This course examines how climate change will impact the environment and human activities, and how to formulate and implement economically realistic solutions. It integrates the physical and biological science with economics in order to analyze the response options as we move towards a carbon-neutral society.

PREREQUISITES: ECON 1101.03 or ECON 1102.03 or any first year science or math course or permission of the instructor.

CROSSLISTED: ECON 2850.03

EXCLUSIONS: PHYC 2800, ECON 2216

FORMATS: Lecture

PHYC 3000 Experimental Physics I

CREDIT HOURS: 3

This course introduces students to electronics and measuring techniques. Topics include digital electronics: logic gates, clocks, shift registers, counters, memory; analog electronics; R.C.L. circuits, operational amplifiers; electronic systems: A/D and D/A chips, computer chips, and displays. The course also introduces students to modern data acquisition methods (including LabVIEW), skills which will be applied in the design and execution of experiments that illustrate fundamental concepts in physics. This course is open to Honours students only.

CALENDAR NOTES: This course has no final examination. Student evaluation is through performance on assignments and projects, and evaluation of written lab reports.

PREREQUISITES: PHYC 2150.03 and PHYC 2515.03, or permission of the instructor.

FORMATS: Lecture | Lab

PHYC 3010 Experimental Physics II

CREDIT HOURS: 3

Designed to give the students a chance to do non-set experiments and thereby encounter and solve the problems of experimentation. Original approaches by the students are encouraged. As the number of experiments is small (three) students should achieve a real understanding of a few physical phenomena.

Lecture topics include data & analysis as encountered in the different areas of physics.

PREREQUISITES: PHYC 3000.03 with a minimum grade of B, or permission of the instructor

FORMATS: Lecture | Lab

PHYC 3100 Electrodynamics

CREDIT HOURS: 3

Topics include electrostatics and magnetostatics, boundary value problems, fields in matter, time-dependent phenomena, Maxwell's equations, electromagnetic waves, radiation and special relativity.

PREREQUISITES: PHYC 2510.03 and either 2060.03 or PHYC 2140.03

EXCLUSIONS: PHYC 4100.03

FORMATS: Lecture

PHYC 3180 Contemporary Physics

CREDIT HOURS: 3

This course covers a variety of current research topics in physics within a format that introduces students to the learning techniques used in research in academic or industrial settings. Through this course, students will: (i) learn how to read and digest current physics topics using the standard presentation in physics journals; (ii) develop skills required to communicate topics of current interest in physics to classmates through written summaries and oral presentations; and (iii) develop skills required for collaborative discussion to solve research problems.

PREREQUISITES: MATH 2001.03 and at least one of PHYC 2515.03 or PHYC 2150.03 or permission of the instructor

FORMATS: Lecture

PHYC 3200 Thermodynamics

CREDIT HOURS: 3

An introduction to the basic concepts and laws of thermodynamics. There will be a short survey of required Mathematics (partial derivatives). Topics include:

thermometry, equations of state, energy and entropy, thermodynamic potentials, heat engines, thermodynamic efficiency and phase transitions.
PREREQUISITES: PHYC 2140.03 or PHYC 2060.03, MATH 2001.03 and MATH 2120.03, or permission of the instructor.
FORMATS: Lecture | Tutorial

PHYC 3210 Statistical Mechanics

CREDIT HOURS: 3

Using statistical entropy, we will explore how macroscopic thermodynamic behavior emerges from microscopic models. We will consider the microcanonical, canonical, and the grand canonical statistical ensembles. We will examine two-state systems as well as non-interacting Fermionic and Bosonic systems. Finally, we will learn about deceptively simple interacting systems such as the Ising model.

PREREQUISITES: PHYC 3200.03 or equivalent; MATH 2001.03, MATH 2120.03

PHYC 3303 Materials Science

CREDIT HOURS: 3

This course emphasizes understanding the principles behind materials' physical properties, such as thermal and mechanical stability, and electrical and optical properties. Materials discussed include liquid crystals, perfect crystals, defective solids, polymers and glasses. Applications, such as the use of materials in displays, gas sensors, and lasers, are discussed.

CALENDAR NOTES: This course holds lectures together with CHEM 3305. CHEM 3305 has a lab and PHYC 3303 has a major term paper.

PREREQUISITES: CHEM 1012.03, and PHYC 3200.03 (can be co-requisite) or (CHEM 2301.03 and CHEM 2304.03) or (ERTH 2001.03 and EARTH 2002.03)

EXCLUSIONS: CHEM 3305.03

FORMATS: Lecture

PHYC 3340 Electronics

CREDIT HOURS: 3

Topics include digital electronics: logic gates, clocks, shift registers, counters, memory; analog electronics: R.C.L. circuits, operational amplifiers; electronic systems: A/D and D/A chips, computer chips, and displays.

CALENDAR NOTES: Credit cannot be given for both PHYC 3000.03 and PHYC 3340.03

PREREQUISITES: PHYC 2150.03; or ENGI 2001.03

FORMATS: Lecture | Lab

PHYC 3540 Optics and Photonics

CREDIT HOURS: 3

Topics in physical and geometrical optics will be covered. Selected applications will be presented in certain areas of photonics, including micro-optic sensors, semiconductor lasers and detectors, optical waveguides and fibres, optical signal processing and telecommunications.

PREREQUISITES: PHYC 2150.03 and PHYC 2510.03, MATH 2001.03, MATH 2120.03

FORMATS: Lecture

PHYC 3590 Advanced Classical Mechanics

CREDIT HOURS: 3

Topics include: central force motion, the principle of virtual work, Lagrange's equations, the principle of least action, Hamilton's equations, canonical transformations, Hamilton-Jacobi equation.

PREREQUISITES: PHYC 2140.03 or PHYC 2060.03, MATH 2120.03

FORMATS: Lecture

PHYC 3640 Quantum Physics I

CREDIT HOURS: 3

This course introduces the formal structure of quantum mechanics as well as quantum mechanical calculations. The emphasis is on problem solving. The course starts with quantum measurement, then considers particles in a box and the quantum harmonic oscillator. The course starts with one-dimensional quantum mechanics and ends with higher dimensional problems. The course introduces quantum mechanical operators, time-evolution, quantum angular momentum, and the solution of the hydrogen atom.

PREREQUISITES: PHYC 2515.03 and PHYC 2140.03 or PHYC 2060.03, MATH 1030.03 and MATH 2120.03

FORMATS: Lecture

PHYC 3810 Microcomputers and the Real World

CREDIT HOURS: 3

Subject material: measurement theory, modern sensors, microcomputer architecture, and software simulation of digital electronic circuits. Interfacing techniques including serial, parallel USB and GPIB ports. The graphical programming language is used throughout.

PREREQUISITES: PHYC 2150.03, PHYC 3340.03

CROSSLISTED: CSCI 3122.03

FORMATS: Lecture | Lab

PHYC 3900 Introduction to Soft Condensed Matter Physics

CREDIT HOURS: 3

The aim of this course is to provide an introduction to some concepts used in soft condensed matter physics through the study of three systems, polymers, colloids and liquid crystals. The course will be divided in four modules: I) Brownian dynamics and diffusion II) Polymers shape, molecular mass distribution, osmotic pressure, gel, entropic elasticity III) Colloids: van der Waals and electrostatic interactions, Hamaker constant, DLVO theory, polymer layers (brushes), gel electrophoresis IV) Liquid crystals: order parameter, optical properties of nematics (birefringence), phase transitions, LCD

PREREQUISITES: MATH 2001.03, MATH 2120.03

FORMATS: Lecture

PHYC 4098 The Physical Cosmology

CREDIT HOURS: 3

The course is intended to provide a sound physical foundation to modern cosmology and the formation and evolution of the Universe. The course introduces the principles of geometrical and astrophysical cosmology and emphasizes the direct confrontation of observational data with contemporary theories.

PREREQUISITES: PHYC 2515, PHYC 2140 or PHYC 2060, or permission of instructor

FORMATS: Lecture

PHYC 4099 Stellar Structure and Evolution

CREDIT HOURS: 3

This course introduces concepts in stellar astronomy, building an understanding of stellar physics to probe the evolution of stars. Topics covered include stellar timescales, energy generation, and derivation of equations of stellar structure, evolution of stars from the pre-main sequence, through the main sequence hydrogen burning, and beyond.

PREREQUISITES: PHYC 2515, PHYC 2140 or PHYC 2060, or permission of instructor

FORMATS: Lecture

PHYC 4151 Quantum Physics II

CREDIT HOURS: 3

This course builds on the concepts and theory of quantum mechanics presented in "Quantum Physics I" (PHYC 3640) by introducing additional topics of fundamental importance, including: spin, identical particles, time-independent perturbation theory, variational approach, WKB approximation, time-dependent perturbation theory, and scattering theory.

PREREQUISITES: PHYC 3640.03

EXCLUSIONS: PHYC 5151.03

FORMATS: Lecture

PHYC 4160 Mathematical Methods of Physics

CREDIT HOURS: 3

Topics discussed include: complex variable theory, Fourier and Laplace transform techniques, special functions, partial differential equations.

PREREQUISITES: MATH 2001.03, MATH 2120.03, PHYC 2140.03 or PHYC 2060.03

EXCLUSIONS: PHYC 5160.03, MATH 5165.03

FORMATS: Lecture

PHYC 4180 Nuclear and Particle Physics

CREDIT HOURS: 3

This is an introductory course in nuclear physics. Topics discussed include: nucleon-nucleon interactions, nuclear structure, gamma transitions, alpha decay, beta decay, nuclear reactions and elementary particle physics, with applications to the interior of stars and the earlier universe.

PREREQUISITES: PHYC 3640.03

CROSSLISTED: PHYC 5180.03

FORMATS: Lecture

PHYC 4230 Introduction to Solid State Physics

CREDIT HOURS: 3

An introduction to the basic concepts of solid state physics which are related to the periodic nature of the crystalline lattice. Topics include crystal structure, X-ray diffraction, phonons and lattice vibrations, the free electron theory of metals, energy bands, magnetism and superconductivity.

PREREQUISITES: PHYC 3640.03 and 3210.03 which may be taken concurrently, or permission of instructor

EXCLUSIONS: PHYC 5230.03

FORMATS: Lecture

PHYC 4250 Topics in Numerical Computing

CREDIT HOURS: 3

This class focuses on discrete and stochastic techniques of computational physics. Topics may include stochastic methods, global optimisation techniques, spectral methods, linear algebra, correlations, and computational modelling.

PREREQUISITES: PHYC 1280.03/1290.03 or equivalent, MATH 1010.03 / PHYC 2050 or equivalent

FORMATS: Lecture

PHYC 4311 Fluid Dynamics I

CREDIT HOURS: 3

An introduction to the theory of fluid dynamics with some emphasis on geophysically important aspects. Contents: tensor mathematics, flow kinematics, equations of motion, viscous flow, potential flow, convection, turbulence, and basic aerodynamics.

PREREQUISITES: Subject to instructor approval

CROSSLISTED: OCEA 4311.03/

EXCLUSIONS: PHYC 5311.02, OCEA 5311.01

FORMATS: Lecture

PHYC 4411 Atmospheric Dynamics I

CREDIT HOURS: 3

The basic laws of fluid dynamics are applied to studies of atmospheric motion, including the atmospheric boundary layer and synoptic scale weather disturbances (the familiar highs and lows on weather maps). Emphasis will be placed on the blend of mathematical theory and physical reasoning which leads to the best understanding of the dominant physical mechanisms.

PREREQUISITES: PHYC 2140.03 or PHYC 2060.03 or permission of the instructor

CROSSLISTED: OCEA 4411.03/

EXCLUSIONS: PHYC 5411.03, OCEA 5411.03.

FORMATS: Lecture

PHYC 4412 Atmospheric Dynamics II

CREDIT HOURS: 3

The approach is the same as for PHYC 4411.03, with emphasis on synoptic-scale wave phenomena, frontal motions and the global circulation. Additional topics including tropical meteorology, middle atmospheric dynamics, severe storms, mesoscale meteorology and numerical weather prediction may be included.

PREREQUISITES: PHYC 4411.03 or permission of the instructor.

CROSSLISTED: PHYC 5412.03, OCEA 4412.03/5412.03

FORMATS: Lecture

PHYC 4460 Photons and Atoms

CREDIT HOURS: 3

This class covers a selection of topics in advanced optics, that may include: a quantum treatment of light-matter interactions, strong field effects, quantum optics, nonlinear optics, optical resonators, laser physics, laser dynamics, and photonic devices.

PREREQUISITES: PHYC 3640.03

CROSSLISTED: PHYC 5460.03

FORMATS: Lecture

PHYC 4505 Atmospheric Physics

CREDIT HOURS: 3

Moist thermodynamics is applied to a variety of atmospheric phenomena. These include aerosols, cloud droplets, precipitation formation, convection, supercells, hurricanes, lightning, and the boundary layer. We also discuss the radar equation and the interpretation of radar images.

PREREQUISITES: PHYC 2140 or PHYC 2060 and PHYC 4520, or permission of the instructor

CROSSLISTED: PHYC 5505, OCEA 4505/5505

FORMATS: Lecture

PHYC 4520 Introduction to Atmospheric Science

CREDIT HOURS: 3

The general overview of the atmosphere provides the student with an understanding of the composition and thermal structure of the atmosphere, air mass and frontal theory and weather generating physical processes and their consequences. Other topics include atmospheric radiation, dynamic meteorology, climatology and the physics of clouds and storms.

PREREQUISITES: PHYC 2140.03 or PHYC 2060.03 or permission of instructor

CROSSLISTED: OCEA 4520.03/

EXCLUSIONS: PHYC 5520.03, OCEA5520.03

FORMATS: Lecture

PHYC 4540 Synoptic Meteorology I

CREDIT HOURS: 3

This course introduces the practical skills of meteorological observation and analysis. Emphasis is on developing skills in drawing and interpreting weather maps, and on studying the three-dimensional structure of weather systems. Satellite and radar remote sensing of the atmosphere is also introduced. Case studies of atmospheric systems and processes are carried out during the tutorial-laboratory period.

COREQUISITES: PHYC 4411.03

PREREQUISITES: At least one third-year physics course

CROSSLISTED: PHYC 5540.03, OCEA 4541.03/5541.03

FORMATS: Lecture | Lab | Tutorial

PHYC 4550 Synoptic Meteorology II

CREDIT HOURS: 3

This course extends the analysis and diagnosis of atmospheric dynamics and weather processes introduced in PHYC 4540.03. Emphasis is on the practical application of meteorological theory, particularly in the area of diagnosing the cases of weather events. Modern computer and statistical methods are discussed, and students receive an introduction to weather forecasting.

PREREQUISITES: PHYC 4540.03

CROSSLISTED: PHYC 5550.03, OCEA 4550.03/5550.03

FORMATS: Lecture | Lab | Tutorial

PHYC 4570 Light Scattering, Radiative Transfer, and Remote Sensing

CREDIT HOURS: 3

The equations of radiative transfer through the atmosphere will be developed and used. Special topics include transfer of infrared radiation. Mie scattering, absorption by atmospheric gases and aerosols, transfer through clear and cloudy atmospheres. Also remote sensing techniques and radiative transfer models are covered.

PREREQUISITES: PHYC 2140.03 or PHYC 2060.03, PHYC 2510.03

CROSSLISTED: PHYC 5570.03, OCEA 5570.03

FORMATS: Lecture

PHYC 4595 Atmospheric Chemistry

CREDIT HOURS: 3

A fundamental introduction to the physical and chemical processes determining the composition of the atmosphere and its implications for climate, ecosystems, and human welfare. Origin of the atmosphere. Nitrogen, oxygen, carbon, sulfur cycles. Climate and the greenhouse effect. Atmospheric transport and turbulence. Stratospheric ozone. Oxidizing power of the atmosphere. Regional air pollution: aerosols, smog, acid rain.

PREREQUISITES: MATH 1000.03, PHYC 1190.03/1290.03 (or PHYC 1310.03/1320.03 or 1300.06) and CHEM 1011.03/1012.03

CROSSLISTED: CHEM 4595.03, OCEA 4595.03

EXCLUSIONS: PHYC 5595.03, OCEA 5595.03

FORMATS: Lecture

PHYC 4650 General Relativity

CREDIT HOURS: 3

A review of differential geometry will be given followed by an introduction to the general theory of relativity. Various topics will be discussed, including: linearized theory and gravitational radiation, spherically symmetric metrics and the Schwarzschild solution, gravitational collapse, black holes, and cosmology.

PREREQUISITES: MATH 3045.03 or permission of the instructor

CROSSLISTED: PHYC 5650.03, MATH 4650.03/5650.03

FORMATS: Lecture

PHYC 4660 Cosmology

CREDIT HOURS: 3

A self-contained introduction to cosmology will be given and no prior knowledge of differential geometry or general relativity will be assumed (although some knowledge of elementary differential equations will be useful). A cosmological model is a model of the universe, as a whole, on the largest scales; the emphasis of the course will be on the modeling aspects of cosmology.

PREREQUISITES: Instructor's permission

CROSSLISTED: PHYC 5660.03, MATH 4410.03/5410.03

FORMATS: Lecture

PHYC 4850 Honours Research Project II

CREDIT HOURS: 3

Students in the honors stream will do a second research project or continue the project started in PHYC 4800 under the direction of a faculty member. A research plan, interim progress reports and a formal, final report are required. The final grade will be based on an evaluation of the reports and an oral presentation.

PREREQUISITES: PHYC 4800 and permission of the coordinator and supervisor.

PHYC 8891 Co-op Work-Term I

CREDIT HOURS: 0

PREREQUISITES: SCIE 2800.00

PHYC 8892 Co-op Work-Term II

CREDIT HOURS: 0

PHYC 8893 Co-op Work-Term III

CREDIT HOURS: 0

PHYC 8894 Co-op Work-Term IV

Professors Emeriti

Brown, R. E., BSc (Victoria), MA, PhD (Dalhousie)

Klein, R. M., BA (SUNY), MA, PhD (Oregon)

LoLordo, V. M., AB (Brown), PhD (Penn)

Meinertzhagen, I. A., BSc (Aberdeen), PhD, DSc (St. Andrews)

Mitchell, D. E., BSc, MAppSc (Melb), PhD (Berkeley)

Rusak, B., BA (Toronto), PhD (Berkeley), FRSC

Professors

Abbass, A., BSc (Ottawa), MD (Dalhousie), FRCPC (Toronto), major appointment in Psychiatry

Adamo, S., BSc (Toronto), PhD (McGill), Graduate Coordinator

Barrett, S. P., BA (St. FX), PhD (McGill)

Boe, S., BPhEd (Brock), PhD, MPT (Western), major appointment in the School of Physiotherapy

Campbell-Yeo, M., BSc, MScN (Dalhousie), PhDN (McGill), major appointment in the School of Nursing

Chambers, C. T., BSc (Dalhousie), MA, PhD (UBC), joint appointment in Pediatrics, Faculty of Science Killam Professor in Psychology

Corkum, P. V., BSc (Dalhousie), MA, PhD (OISE at Toronto)

Crowder, N. A., BSc, PhD (Alberta)

Deacon, S. H., BSc (UPEI), PhD (Oxon)

Duffy, K., BA (St. Thomas), PhD (McMaster)

Eskes, G. A., BA, PhD (Berkeley), joint appointment in Psychiatry

Finley, G. A., BSc, MD (Dalhousie), FRCPC, major appointment in Anaesthesia

Good, K., BSc (UNB), MSc, PhD (UBC), major appointment in Psychiatry

Kay-Raining Bird, E., BA (Queen's), MSc (Columbia), PhD (Univ Wisconsin - Madison), major appointment in the School of Human Communication Disorders

Kiefte, M., BA (Memorial), MSc, PhD (Alberta), major appointment in the School of Human Communication Disorders

Moore, C. L., BA, PhD (Cantab)

Newman, A. J., BA (Winnipeg), MSc, PhD (Oregon)

Perrot, T. S., BSc, PhD (Western)

Phillmore, L., BA (UWO), MA, PhD (Queen's)

Rosen, N. O., BA (Queen's), PhD (McGill)

Semba, K., BEd, MA (Tokyo), PhD (Rutgers), major appointment in Medical Neuroscience

Sherry, S. B., BA (York), MA (UBC), PhD (Saskatchewan)

Smith, I. M., BA (Dalhousie), MSc (Brown), PhD (Dalhousie), major appointment in Pediatrics, Joan and Jack Craig Chair in Autism Research

Stewart, S., BSc (Dalhousie), PhD (McGill), joint appointment in Psychiatry

Taylor-Helmick, T. L., BA (Calgary), MSc, PhD (Dalhousie)

Tibbo, P., BSc Hons. (Mt Allison), B.MEd.Sc, MD (Memorial), FRCPC, AHRMR (Alberta), major appointment in Psychiatry

Top, D., BSc Hons (Toronto), PhD (Dalhousie), major appointment in Pediatrics

Uher, R., MRCPsych (Royal College of Psychiatrists), CCT (London Deanery, UK), PhD, MUDr. (Charles Univ), major appointment in Psychiatry

Ungar, M., BA, BSW, MSW (McGill), PhD (Wilfrid Laurier), major appointment in the School of Social Work
Westwood, D. A., BSc, MA, PhD (Waterloo), major appointment in the School of Health and Human Performance

Associate Professors

Aiken, S., BA, MSc (Western), PhD (Toronto), major appointment in the School of Human Communication Disorders
Bardouille, T., BSc (Queen's), MSc (Dalhousie), PhD (Toronto) major appointment in Psychiatry
Blais, J., BA/MA/PhD (Carleton)
Bombay, A., BSc (Ottawa), MSc, PhD (Carleton), major appointment is held jointly with the School of Nursing and Psychiatry
Chorney, J., BSc (Dalhousie), MA, PhD (West Virginia), major appointment in Anesthesiology
Fisher, D., BSc (Ottawa), MSc, PhD (Carleton), major appointment in Psychiatry
Fisk, J., BSc, MA, PhD (Western), major appointment in Psychiatry
Franklin, T., BSc (King's), MSc (Dalhousie), PhD (Swiss Federal Institute of Technology)
Jacques, S., BA (McGill), MA, PhD (Toronto)
Johnson, S., BA (Kalamazoo), MSc, PhD (Victoria), Clinical PhD Program Director of Training
Meier, S., BSc, MSc (Universitat Basel, Switzerland), PhD (Ruprecht Karls Universitat, Germany)
Neyedli, H., BSc Hons (Dalhousie), MSc, PhD (Toronto), major appointment in Health and Human Performance
Robinson, L., BSc (Victoria), MA, PhD (Simon Fraser), major appointment in the School of Health and Human Performance
Weaver, I. C. G., BSc (Aberdeen), MSc (Bristol), PhD (McGill)
Yakovenko, I., BSc (Toronto), MSc (Calgary), PhD (Yale), joint appointment in Psychiatry

Assistant Professors

Cloutier, A., BA, MA (Carleton), PhD (Queens) major appointment in Rowe School of Business
Conrad, C., BA, MEC, PhD (Dalhousie), MA (Queens) major appointment in Information Management
Dithurbide, L., BA (St. Mary's), MA (Brock), PhD (Michigan State), major appointment in Health and Human Performance
Filliter, J., BSc, MSc, PhD (Dalhousie) major appointment in Pediatrics
Ghanouni, P., BSc/MSc (SBUMS), PhD (UBC) major appointment in Occupational Therapy
Hashimi, J., BSc (Punjab), MSc (Western), PhD (Toronto), major appointment in Anesthesia
Ilie, G., BSc, MA (York), PhD (Toronto), major appointment in Community Health and Epidemiology
Lee-Bagley, D., BSc (Calgary), MSc, PhD (UBC), major appointment in Family Medicine
Lovas, D., BSc, MD (Dalhousie), major appointment in Psychiatry
Pavlova, B., MSc (Palacky Univ., Czech Republic), PhD (Charles Univ., Czech Republic), DCLinPsy (Inst. of Psychiatry, King's College)
Thomas, M., BSc (St. Andrew's), MBChB (Manchester), DRCOG/MRCP-UK (Glasgow), PhD (Central Lancashire) FRCPCH FRCP, major appointment in Pediatrics
Top, D., BSc (Hons) Toronto, PhD (Dalhousie), major appointment in Pediatrics
Town, J., BSc (York), DCLinPsy (Univ of Sheffield), major appointment in Psychiatry
Weatherhead, D., COGS-P-BCH (Queen's). PhD (Waterloo)

University Teaching Fellows

Gadbois, S., BP, MAPs (Moncton), PhD (Dalhousie)
Stamp, J., BSc (Dalhousie), PhD (Cambridge)
Stevens, L., BSc (Acadia), MSc, PhD (Dalhousie), Undergraduate Program Coordinator

Senior Instructors

Borycz, J., PhD (Inst. of Pharmacology, Krakow, Poland)
Christie, J., BSc, MSc, PhD (Dalhousie)
Juckes, T., BA, MA (Natal), PhD (Dalhousie)
Mackinnon, S., BA(H) (UCCB), MSc (Wildred Laurier), PhD (Dalhousie)
Pencer, A., BSc (St. FX), MSc, PhD (Calgary)

Instructors

Caceres, L., BSc (Alberta), PhD (McGill)
Sparks, E., BA (Hons) Queen's MSc, PhD (Dalhousie)
Stratton, N., BA (Concordia), MA/PhD (Ryerson)

Adjunct Professors

Barresi, J., BSc (Brown), MA (S Calif), MS, PhD (Wisc), Psychology and Neuroscience/Dalhousie
Birnie, K., BA (Calgary), PhD (Dalhousie), Cummings School of Medicine, Univ. of Calgary
Cawley, E., BA (Hons) Ottawa, MSc, PhD (McGill), National Mental Health Strategy
Champod, A.S., BSc (Montreal), PhD (McGill) Psychology/Acadia
Chipman, K., BA (UPEI), MA, PhD (Western), Neuropsychology Service/Nova Scotia Hospital

Church, E., BA (St. John's), MA, PhD (Toronto), School Psychology/Mount Saint Vincent
Cohen, A., BA (McGill), MSc, PhD (Queen's), Psychology, UPEI
Conrad, N., BA (St. Mary's), PhD (McMaster), Psychology/Saint Mary's
Day, A., BA (Manitoba), MSc, PhD (Waterloo), Psychology/Saint Mary's
DiGiorgio, C., BA (UCCB), BSc, BEd (Dalhousie), MEd (St. FX) PHD (Univ. South Australia)
Ellsworth, C., BA (McMaster), MA, PhD (Queen's), Psychology/IWK Health Centre
Ezekiel, R., BA, MSc (Western), PhD (Toronto), Vice-Provost, Student Affairs, Dalhousie
Flanagan, H., BA, BSc (McMaster), MA, PhD (York)
Gilin Oore, D., BSc (Northern Michigan), MA, PhD (Missouri-St. Louis), Psychology/Saint Mary's
Ivanoff, J., BSc, MA (Guelph), PhD (Dalhousie), Psychology/Saint Mary's
Khoury, J., BSc (Toronto), MA, PhD (Ryerson), Psychology Mount Saint Vincent
Lackner, C., MSc (Queen's) PhD (Brock), Psychology/Mount Saint Vincent
LoLordo, V. M., AB (Brown), PhD (Penn), Psychology and Neuroscience/Dalhousie
MacNeil, B., BSc (St. FX), PhD (New Brunswick) Mental Health and Addictions/QEII Health Sciences Centre
Marchand, Y., MCS (Univ of Paris), PhD (Compiègne)
Mazerolle, E., BSc, MSc, PhD (Dalhousie), Psychology St. FX
McLaughlin, P., BSc (Toronto), MA, PhD (York) Nova Scotia Health
Mitchell, D. E., BSc, MAppSc (Melb), PhD (Berkeley), Psychology and Neuroscience/Dalhousie
Olthuis, J., BA (Smith College), PhD (Dalhousie), Psychology, UNB

Website: www.dal.ca/psychandneuro

Introduction

Psychology is an experimental science: Its purpose is to discover the conditions that control the activities of animals and people, to measure these conditions and the responses they produce, and to use this knowledge to predict and change behaviour. It is a subject for inventive but also scientifically rigorous people, better suited to those who want to find out for themselves than to those who want to be told what to believe.

Psychology at Dalhousie treats behaviour as a natural phenomenon, and in that sense shares much with the other life sciences. The boundaries that historically separated psychology from zoology, physiology, and cellular biology are blurred. As well, important ties are being made to such disciplines as anthropology, sociology, and philosophy. The student will find that the diverse subject matter includes three major levels of analysis: the organism, the organism's biological machinery, and the broader social-environmental context in which particular behaviour patterns are expressed. Meaningful integration of these diverse levels and forms of analysis is an intellectual challenge of major proportions. Similarly, the time perspectives of immediate causation, development, evolution, and function all contribute to the modern approach to behavioural science and each must be evaluated in relation to the others.

A. Enrolment Limitations

Psychology is a popular program, and we have a high enrolment of students. Potential Major and Honours students, and those intending to enrol in the 90 credit hour Minor in Psychology, should note that there are limitations on the number of students that can be taught in these programs in any given year. Passing introductory psychology courses with the required grade of B- and declaring an intent to Major in Psychology does not guarantee a spot in any particular course. We do our best to provide spots in core required courses to students in the program; however, students are advised to register as early as possible for required courses to secure a space.

There are strict size restrictions on individual courses. Lecture courses are limited by room size. Enrolment in laboratory courses is further restricted because of equipment limitations and requirements for supervision. All Major and Honours students, and those enrolled in a 90 credit hour program, should carefully review program requirements and choose prerequisite courses accordingly. Laboratory courses fill rapidly, and not all laboratory courses are offered every year.

B. Enrolment of Other Students

Only Major and Honours students in Psychology or Neuroscience may enrol in PSYO 2000.03, PSYO 2470.03, and PSYO 2501.03, and such students are given preference in other second-year courses. All students must have at least a B- in both the introductory psychology courses, or a B- in the psychology component of the Integrated Science Program, to register in any second-year course in Psychology.

C. Laboratories

Psychology laboratory courses typically involve data collection and interpretation, and writing reports on the results. All Major and Honours students must take the second-year research methods course (PSYO 2000.03) and at least one 3000-level research laboratory course (for Honours students, the requirement is two laboratory courses, for a minimum of six credit hours).

Degree Programs

The Department of Psychology and Neuroscience offers the following degree programs in Psychology:

- BSc or BA (120 credit hour) Honours (Concentrated)*
- BSc or BA (120 credit hour) Combined Honours*
- BSc or BA (120 credit hour) Major*
- BSc or BA (120 credit hour) Double Major*
- BSc or BA (90 credit hour) Minor in Psychology
- Minor in Psychology

* May be combined with Minor programs from other disciplines (except Neuroscience).

Departmental requirements for each degree program can be seen by following the links in the menu to the right.

In addition to departmental requirements, students must satisfy the requirements outlined in the [Academic Regulations](#) and the [College of Arts and Science Degree Requirements](#) sections. Students are advised that a number of requirements differ between the BA and BSc degrees.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Students applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with a Psychology undergraduate academic advisor.

A detailed description of the Psychology programs is available in a guidebook titled "A Student's Guide to Psychology at Dalhousie University." The guidebook is available on the Department's website (www.dal.ca/psychandneuro) and at the Psychology and Neuroscience Main Office (Life Sciences Centre, Room 3263).

BSc or BA (120 credit hour) Concentrated Honours in Psychology

Students who want a challenging program resulting in a broad background in Psychology, including independent research experience, may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours. Honours students complete a minimum of 54 credit hours above the 1000 level in Psychology, with a minimum GPA of 3.0, and write a research-based Honours thesis. The Honours Thesis and Qualifying Examination requirements, outlined in the

[College of Arts and Science Honours Program Requirements](#), are satisfied through completion of PSYO 4901.03 and PSYO 4902.03.

Admission to Honours

Students must apply for admission to Honours programs. Students wishing to enroll in Honours in Psychology should consult with an Honours Advisor. Students may not apply for Honours before April of their third year of studies. A detailed description of the Honours application process can be found on the departmental website, www.dal.ca/psychandneuro. Admission requirements include:

- A grade of B+ (or higher) in PSYO 2000.03: Methods in Experimental Psychology & Neuroscience (or equivalent)
- An average of A- (or higher) in the last six completed Psychology courses (excluding 1000-level PSYO courses and PSYO 2000.03)
- A confirmed, eligible supervisor who has agreed to supervise the student's honours thesis

Departmental requirements

All students must fulfill the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections. Students are advised that a number of requirements differ between the BA and BSc degrees. In addition, students in a Concentrated Honours program in Psychology must complete the following:

1000 level

- PSYO 1011.03: Introduction to Psychology and Neuroscience I: From Neuron to Person (or equivalent) with a grade of B- or better
- PSYO 1012.03: Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology (or equivalent) with a grade of B- or better
OR
- A grade of B- or better in the Psychology component of SCIE 1506.09 and SCIE 1507.09: Integrated Science Program I and II (or equivalent)

2000 level

- PSYO 2000.03: Methods in Experimental Psychology & Neuroscience (with a grade of B+ or better)
- PSYO 2501.03: Statistical Methods I
- PSYO 2470.03: Systems Neuroscience (or equivalent)

Plus an additional nine credit hours, selected from:

- PSYO 2080.03: Social Psychology
- PSYO 2090.03: Developmental Psychology
- PSYO 2130.03: Introduction to Cognitive Psychology
- PSYO 2140.03: Learning: Conditioning and Motivation
- PSYO 2150.03: Perceptual Processes
- PSYO 2160.03: Animal Behaviour
- PSYO 2220.03: Adult Psychopathology
- PSYO 2444.03: Forensic Psychology
- PSYO 2570.03: Cellular Neuroscience

Care should be taken in selecting second-year courses to ensure they provide the necessary prerequisites for courses intended to be taken in third and fourth years of study.

3000 level

Six credit hours of designated lab courses, selected from:

- PSYO 3051.03: Research Methods in Sensation and Perception
- PSYO 3082.03: Experimental Social Psychology
- PSYO 3091.03: Methods in Developmental Psychology
- PSYO 3122.03: Methods in Experimental Clinical Psychology
- PSYO 3131.03: Research Methods in Attention
- PSYO 3133.03: Research Methods in Memory
- PSYO 3134.03: Research Methods in Psycholinguistics
- PSYO 3137.03: Research Methods in Cognitive Neuroscience
- PSYO 3161.03: Measuring Behaviour
- PSYO 3165.03: Neuroethology
- PSYO 3370.03: Advanced Methods in Neurobiology
- PSYO 3371.03: Neuronal Organization Laboratory
- PSYO 3505.03: Neural Data Science
- PSYO 3511.03: Data Communication and Visualization in Psychology
- PSYO 3100.03/3101.03: Independent Research Project (Note: PSYO 3100/3101 full-year Independent Research Project may only be used to fulfill **3 credit hours of lab course requirement**)

Plus an additional nine credit hours of 3000/4000-level PSYO courses

4000 level

- PSYO 4901.03: Honours Foundation (a grade of B- or better is required to continue to PSYO 4902.03)
- PSYO 4902.03: Honours Thesis
- PSYO 3502.03: Statistical Methods II
- Six credit hours of 4000-level PSYO or NESC seminar courses (the following courses may also count toward this requirement: BIOC 4301.03, BIOL 4510.03, PATH 4100.03, PHAC 4001.03, PHAC 4403.03, PHAC 4409.03)

Plus six additional credit hours of 3000/4000-level PSYO courses

Other regulations

- Laboratory courses focusing on human psychology typically require students to serve as participants and/or as experimenters in course projects. Students who do not wish to participate in such projects should ensure that they have the prerequisites necessary to register in alternative laboratory courses.
- Courses that are counted towards the Honours program requirements must have a minimum grade of C.

BSc or BA (120 credit hour) Combined Honours in Psychology and another subject

Students who wish to study Psychology in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be from any discipline in the Faculty of Science (other than Neuroscience), the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Psychology may be the primary subject (with a minimum of 45 credit hours beyond the 1000 level), or the secondary subject (30 credit hours).

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. Students must have their program of study approved by Academic Advisors in both subject areas. As outlined in the [College of Arts and Science Honours Program Requirements](#), students complete an Honours Qualifying Examination in one of the two subject

areas, a requirement normally completed in the primary subject area. For Psychology, this requirement is satisfied through completion of PSYO 4901.03 and PSYO 4902.03.

Departmental requirements

All students must fulfill the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections. Students are advised that a number of requirements differ between the BA and BSc degrees. In addition, students in a Combined Honours program in Psychology and another subject must complete the following program requirements:

Psychology as the PRIMARY subject

1000 level

- PSYO 1011.03: Introduction to Psychology and Neuroscience I: From Neuron to Person (or equivalent) with a grade of B- or better
- PSYO 1012.03: Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology (or equivalent) with a grade of B- or better
OR
- A grade of B- or better in the Psychology component of SCIE 1506.09 and SCIE 1507.09: Integrated Science Program I and II (or equivalent)

2000 level

- PSYO 2000.03: Methods in Experimental Psychology & Neuroscience (with a grade of B+ or better)
- PSYO 2501.03: Statistical Methods I
- PSYO 2470.03: Systems Neuroscience (or equivalent)

Plus an additional nine credit hours, selected from:

- PSYO 2080.03: Social Psychology
- PSYO 2090.03: Developmental Psychology
- PSYO 2130.03: Introduction to Cognitive Psychology
- PSYO 2140.03: Learning: Conditioning and Motivation
- PSYO 2150.03: Perceptual Processes
- PSYO 2160.03: Animal Behaviour
- PSYO 2220.03: Adult Psychopathology
- PSYO 2444.03: Forensic Psychology
- PSYO 2570.03: Cellular Neuroscience

Care should be taken in selecting second-year courses to ensure they provide the necessary prerequisites for courses intended to be taken in third and fourth years of study.

3000 level

Six credit hours of designated lab courses, selected from:

- PSYO 3051.03: Research Methods in Sensation and Perception
- PSYO 3082.03: Experimental Social Psychology
- PSYO 3091.03: Methods in Developmental Psychology
- PSYO 3122.03: Methods in Experimental Clinical Psychology
- PSYO 3131.03: Research Methods in Attention
- PSYO 3133.03: Research Methods in Memory
- PSYO 3134.03: Research Methods in Psycholinguistics
- PSYO 3137.03: Research Methods in Cognitive Neuroscience
- PSYO 3161.03: Measuring Behaviour
- PSYO 3165.03: Neuroethology
- PSYO 3370.03: Advanced Methods in Neurobiology
- PSYO 3371.03: Neuronal Organization Laboratory
- PSYO 3505.03: Neural Data Science
- PSYO 3511.03: Data Communication and Visualization in Psychology

- PSYO 3100.03/3101.03: Independent Research Project (Note: PSYO 3100/3101 full-year Independent Research Project may only be used to fulfill **3 credit hours of lab course requirement**)

Plus an additional six credit hours of 3000/4000-level PSYO courses

4000 level

- PSYO 4901.03: Honours Foundation (a grade of B- or better is required to continue to PSYO 4902.03)
- PSYO 4902.03: Honours Thesis
- PSYO 3502.03: Statistical Methods II
- Six credit hours of 4000-level PSYO or NESC seminar courses (the following courses may also count toward this requirement: BIOC 4301.03, BIOL 4510.03, PATH 4100.03, PHAC 4001.03, PHAC 4403.03, PHAC 4409.03)

Psychology as the SECONDARY subject

1000 level

- PSYO 1011.03: Introduction to Psychology and Neuroscience I: From Neuron to Person (or equivalent) with a grade of B- or better
- PSYO 1012.03: Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology (or equivalent) with a grade of B- or better
OR
- A grade of B- or better in the Psychology component of SCIE 1506.09 and SCIE 1507.09: Integrated Science Program I and II (or equivalent)

2000 level

- PSYO 2000.03: Methods in Experimental Psychology & Neuroscience (with a grade of B+ or better)
- PSYO 2501.03: Statistical Methods I
- PSYO 2470.03: Systems Neuroscience (or equivalent)

Plus an additional nine credit hours, selected from:

- PSYO 2080.03: Social Psychology
- PSYO 2090.03: Developmental Psychology
- PSYO 2130.03: Introduction to Cognitive Psychology
- PSYO 2140.03: Learning: Conditioning and Motivation
- PSYO 2150.03: Perceptual Processes
- PSYO 2160.03: Animal Behaviour
- PSYO 2220.03: Adult Psychopathology
- PSYO 2444.03: Forensic Psychology
- PSYO 2570.03: Cellular Neuroscience

Care should be taken in selecting second-year courses to ensure they provide the necessary prerequisites for courses intended to be taken in third and fourth years of study.

3000/4000 level

Three credit hours of designated lab courses, selected from:

- PSYO 3051.03: Research Methods in Sensation and Perception
- PSYO 3082.03: Experimental Social Psychology
- PSYO 3091.03: Methods in Developmental Psychology
- PSYO 3122.03: Methods in Experimental Clinical Psychology
- PSYO 3131.03: Research Methods in Attention
- PSYO 3133.03: Research Methods in Memory
- PSYO 3134.03: Research Methods in Psycholinguistics
- PSYO 3137.03: Research Methods in Cognitive Neuroscience
- PSYO 3161.03: Measuring Behaviour

- PSYO 3165.03: Neuroethology
- PSYO 3370.03: Advanced Methods in Neurobiology
- PSYO 3371.03: Neuronal Organization Laboratory
- PSYO 3505.03: Neural Data Science
- PSYO 3511.03: Data Communication and Visualization in Psychology
- PSYO 3100.03/3101.03: Independent Research Project (Note: PSYO 3100/3101 full-year Independent Research Project may only be used to fulfill **3 credit hours of lab course requirement**)

Plus an additional 15 credit hours of 3000/4000-level PSYO courses

Other regulations

- Laboratory courses focusing on human psychology typically require students to serve as participants and/or as experimenters in course projects. Students who do not wish to participate in such projects should ensure that they have the prerequisites necessary to register in alternative laboratory courses.
- Courses that are counted towards the Honours program requirements must be a minimum grade of C.

BSc or BA (120 credit hour) Major in Psychology

The 120 credit hour Major is suited to students who want to focus on Psychology, but wish to have a program that is somewhat less constrained than the Honours program. Psychology Majors complete a minimum of 42 credit hours in Psychology courses above the 1000 level. Research and other experiential learning opportunities are available through laboratories and research project classes.

Students should plan carefully and, if required, obtain advice from an academic advisor. Advisors can be consulted by visiting the [Psychology and Neuroscience website](#) or by contacting the Psychology and Neuroscience Main Office (Life Sciences Centre, Room 3263 or 902-494-3417).

Departmental requirements

All students must fulfill the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections of this calendar. Students are advised that a number of requirements differ for the BA and BSc degrees. In addition, students in a Major program in Psychology must complete the following:

1000 level

- PSYO 1011.03: Introduction to Psychology and Neuroscience I: From Neuron to Person (or equivalent) with a grade of B- or better
- PSYO 1012.03: Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology (or equivalent) with a grade of B- or better
- OR
- A grade of B- or better in the Psychology component of SCIE 1506.09 and SCIE 1507.09: Integrated Science Program I and II (or equivalent)

2000 level

- PSYO 2000.03: Methods in Experimental Psychology & Neuroscience
- PSYO 2501.03: Statistical Methods I
- PSYO 2470.03: Systems Neuroscience (or equivalent)

Plus an additional nine credit hours, selected from:

- PSYO 2080.03: Social Psychology
- PSYO 2090.03: Developmental Psychology
- PSYO 2130.03: Introduction to Cognitive Psychology
- PSYO 2140.03: Learning: Conditioning and Motivation
- PSYO 2150.03: Perceptual Processes
- PSYO 2160.03: Animal Behaviour
- PSYO 2220.03: Adult Psychopathology
- PSYO 2444.03: Forensic Psychology

- PSYO 2570.03: Cellular Neuroscience

3000/4000 level

Three credit hours of designated lab courses, selected from:

- PSYO 3051.03: Research Methods in Sensation and Perception
- PSYO 3082.03: Experimental Social Psychology
- PSYO 3091.03: Methods in Developmental Psychology
- PSYO 3122.03: Methods in Experimental Clinical Psychology
- PSYO 3131.03: Research Methods in Attention
- PSYO 3133.03: Research Methods in Memory
- PSYO 3134.03: Research Methods in Psycholinguistics
- PSYO 3137.03: Research Methods in Cognitive Neuroscience
- PSYO 3161.03: Measuring Behaviour
- PSYO 3165.03: Neuroethology
- PSYO 3370.03: Advanced Methods in Neurobiology
- PSYO 3371.03: Neuronal Organization Laboratory
- PSYO 3505.03: Neural Data Science
- PSYO 3511.03: Data Communication and Visualization in Psychology
- PSYO 3100.03/3101.03: Independent Research Project (Note: PSYO 3100/3101 full-year Independent Research Project may only be used to fulfill **3 credit hours of lab course requirement**)

An additional 21 credit hours of 3000/4000-level PSYO courses

BSc or BA (120 credit hour) Double Major in Psychology and another subject

The Double Major degree program allows students to combine the study of Psychology with another subject. The other subject may be from any discipline in the Faculty of Science (other than Neuroscience), the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. A Double Major in Psychology requires 36 credit hours beyond the 1000 level. Psychology may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

Students enrolled in a Double Major program must have their program of study approved by advisors in both subject areas.

Departmental requirements

All students must fulfill the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections of this calendar. Students are advised that a number of requirements differ for the BA and BSc degrees. In addition, students in a Double Major program in Psychology and another subject must complete the following:

Psychology as the PRIMARY or SECONDARY subject (same requirements for both options)

1000 level

- PSYO 1011.03: Introduction to Psychology and Neuroscience I: From Neuron to Person (or equivalent) with a grade of B- or better
- PSYO 1012.03: Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology (or equivalent) with a grade of B- or better
- OR
- A grade of B- or better in the Psychology component of SCIE 1506.09 and SCIE 1507.09: Integrated Science Program I and II (or equivalent)

2000 level

- PSYO 2000.03: Methods in Experimental Psychology & Neuroscience
- PSYO 2501.03: Statistical Methods I

- PSYO 2470.03: Systems Neuroscience (or equivalent)

Plus an additional nine credit hours, selected from:

- PSYO 2080.03: Social Psychology
- PSYO 2090.03: Developmental Psychology
- PSYO 2130.03: Introduction to Cognitive Psychology
- PSYO 2140.03: Learning: Conditioning and Motivation
- PSYO 2150.03: Perceptual Processes
- PSYO 2160.03: Animal Behaviour
- PSYO 2220.03: Adult Psychopathology
- PSYO 2444.03: Forensic Psychology
- PSYO 2570.03: Cellular Neuroscience

3000/4000 level

Three credit hours of designated lab courses, selected from:

- PSYO 3051.03: Research Methods in Sensation and Perception
- PSYO 3082.03: Experimental Social Psychology
- PSYO 3091.03: Methods in Developmental Psychology
- PSYO 3122.03: Methods in Experimental Clinical Psychology
- PSYO 3131.03: Research Methods in Attention
- PSYO 3133.03: Research Methods in Memory
- PSYO 3134.03: Research Methods in Psycholinguistics
- PSYO 3137.03: Research Methods in Cognitive Neuroscience
- PSYO 3161.03: Measuring Behaviour
- PSYO 3165.03: Neuroethology
- PSYO 3370.03: Advanced Methods in Neurobiology
- PSYO 3371.03: Neuronal Organization Laboratory
- PSYO 3505.03: Neural Data Science
- PSYO 3511.03: Data Communication and Visualization in Psychology
- PSYO 3100.03/3101.03: Independent Research Project (Note: PSYO 3100/3101 full-year Independent Research Project may only be used to fulfill **3 credit hours of lab course requirement**)

An additional 15 credit hours of 3000/4000-level PSYO courses

BSc or BA (90 credit hour) Minor in Psychology

The 90 credit hour degree with a Minor in Psychology is appropriate for students who want to study some Psychology but do not wish to complete the conventional four-year program. The degree is best suited for students who want a general Science degree with some specialization in Psychology. A 90 credit hour degree program is not suitable for students who wish to pursue graduate studies. With additional study, the degree may be upgraded to a 120 credit hour Major or Honours degree at a later date.

A 90 credit hour BSc or BA in Psychology is usually the preferred option for students who wish to combine studies in Psychology with a degree in Engineering (see [BSc/BEng or BA/BEng Concurrent Program](#) below).

See the [Minor in Psychology](#) section of this Calendar.

Minor in Psychology

This Minor is available to non-Psychology/Neuroscience students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science, or Bachelor of Science (Medical Science) program.

A BSc or BA (90 credit hour) degree program with a Minor in Psychology is also available.

Requirements

- A minimum of 18, to a maximum of 36, credit hours in Psychology courses at the 2000 level or higher.

- Note that PSYO 2000.03: Methods in Experimental Psychology and Neuroscience, PSYO 2470.03: Systems Neuroscience, and PSYO 2501.03: Statistical Methods I, are restricted to students in a Major/Honours program in Psychology or Neuroscience. However, if a student has completed these courses and switches from a major to a minor, these credits can be used to fulfill the requirements of the minor.

Please note that entry into upper-level Psychology courses (at the 2000 level or higher) requires completion of six credit hours at the first year level:

- PSYO 1011.03: Introduction to Psychology and Neuroscience I: From Neuron to Person (or equivalent) with a grade of B- or better
- PSYO 1012.03: Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology (or equivalent) with a grade of B- or better
OR
- A grade of B- or better in the Psychology component of SCIE 1506.09 and SCIE 1507.09: Integrated Science Program I and II (or equivalent)

Contact [Psychology](#) for more information.

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Minors available to students in Psychology

Minor programs allow students to develop subject specialties in addition to their Major or Honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs (including Science Co-op).

Students in a BSc or BA (120 credit hour) program in Psychology may choose to include a Minor selected from the [list of approved Minors](#) (except Neuroscience). Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc or BA in Psychology, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of [Faculty of Science Certificates](#) and requirements can be found at the beginning of the [Faculty of Science](#) section. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the [College of Arts and Science Degree Requirements](#) section.

Certificates of particular interest to student enrolled in a BSc or BA in Psychology include:

- [Certificate in Animal Behaviour](#) (Biology, Psychology and Neuroscience)
- [Certificate in Science Leadership and Communication](#)
- [Certificate in Neurotechnology](#)

BSc/BEng or BA/BEng Concurrent Program

Students interested in combining their interest in Psychology with a degree in Engineering may choose a BSc/BEng or BA/BEng Concurrent Program, normally completed in a 5 year period. Over the first three years, students complete the requirements for a 90 credit hour BSc or BA degree in Psychology and a Diploma of Engineering (the first two years of engineering studies). Two more years of engineering studies are then required to obtain a BEng. Interested students should see an undergraduate advisor from Psychology and from the Faculty of Engineering in their first year of study.

Required Psychology courses for a BSc/BEng or BA/BEng program in Psychology:

1000 level

- PSYO 1011.03: Introduction to Psychology and Neuroscience I: From Neuron to Person (or equivalent) with a grade of B- or better

- PSYO 1012.03: Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology (or equivalent) with a grade of B- or better
OR
- A grade of B- or better in the Psychology component of SCIE 1506.09 and SCIE 1507.09: Integrated Science Program I and II (or equivalent)

2000 level or higher

- A minimum of 18 credit hours in Psychology courses at the 2000 level or higher, other than PSYO 2000.03, PSYO 2470.03, and PSYO 2501.03, which are restricted to students in the Major and Honours programs in Psychology or Neuroscience.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

Course Notes

4000-Level Seminars

These seminars are intended for Honours students in Psychology or Neuroscience. Third-year students may be eligible provided they obtain permission from the instructor, and the needs of all the Honours students have been met. Seminar courses offered, and the topics covered, vary from year to year. Go to the departmental website (www.dal.ca/psychandneuro) for more detail about course offerings and the topics to be covered in the current academic year.

Course Descriptions

PSYO 1011 Introduction to Psychology and Neuroscience I: From Neuron to Person

CREDIT HOURS: 3

Material covered includes historical background, research methodology, neural mechanisms that underlie behaviour, sensory and perceptual processes, states of consciousness, learning, and memory. The course is taught by several different instructors with expertise in the topics covered. Biweekly labs add depth to the material covered in lectures.

CALENDAR NOTES: To enrol in 2000-level Psychology courses, a grade of B- is required in Intro to Psychology I (PSYO 1011.02 or PSYO 1021.03 or PSYO 1031.03) AND Intro to Psychology II (PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03). COORDINATOR: L. Stevens

EXCLUSIONS: PSYO 1000X/Y.06, PSYO 1001X/Y.06, PSYO 1010X/Y.06, PSYO 1021.03, PSYO 1031.03, SCIE 1500X/Y.30, SCIE 1501X/Y.27, SCIE 1503X/Y.21, SCIE 1504X/Y.27, SCIE 1510X/Y.33, SCIE 1515X/Y.36, SCIE 1520X/Y.30, SCIE 1540X/Y.27, SCIE 1505X/Y.18, SCIE 1506.03 and SCIE 1507.03

FORMATS: Lecture | Lab

PSYO 1012 Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology

CREDIT HOURS: 3

This course extends the coverage offered in PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03 and includes material on development, cognition, intelligence, motivation, personality, social behaviour, and psychopathology. The course is taught by several different instructors with expertise in the topics covered. Biweekly labs add depth to the material covered in lectures.

CALENDAR NOTES: To enrol in 2000-level Psychology courses, a grade of B- is required in Intro to Psychology I (PSYO 1011.02 or PSYO 1021.03 or PSYO 1031.03) AND Intro to Psychology II (PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03) COORDINATOR: L. Stevens

EXCLUSIONS: PSYO 1000X/Y.06, PSYO 1001X/Y.06, PSYO 1010X/Y.06, PSYO 1022.03, PSYO 1032.03, SCIE 1500X/Y.30, SCIE 1501X/Y.27, SCIE 1503X/Y.21, SCIE 1504X/Y.27, SCIE 1505X/Y.18, SCIE 1510X/Y.33, SCIE 1515X/Y.36, SCIE 1520X/Y.30, SCIE 1540X/Y.27, SCIE 1506.03 and SCIE 1507.03

PSYO 1021 Introduction to Psychology and Neuroscience I: From Neuron to Person

CREDIT HOURS: 3

Material covered includes historical background, research methodology, neural mechanisms that underlie behaviour, sensory and perceptual processes, states of consciousness, learning, and memory. The course is taught by one or two different instructors with expertise in the topics covered. This course has no accompanying laboratory/tutorial.

CALENDAR NOTES: To enrol in 2000-level Psychology courses, a grade of B- is required in Intro to Psychology I (PSYO 1011.02 or PSYO 1021.03 or PSYO 1031.03) AND Intro to Psychology II (PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03).

EXCLUSIONS: PSYO 1000X/Y.06, PSYO 1001X/Y.06, PSYO 1010X/Y.06, PSYO 1011.03, PSYO 1031.03, SCIE 1500X/Y.30, SCIE 1501X/Y.27, SCIE 1503X/Y.21, SCIE 1504X/Y.27, SCIE 1510X/Y.33, SCIE 1515X/Y.36, SCIE 1520X/Y.30, SCIE 1540X/Y.27, SCIE 1505X/Y.18, SCIE 1506.03 and SCIE 1507.03

FORMATS: Lecture

PSYO 1022 Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology

CREDIT HOURS: 3

This course extends the coverage offered in PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03 and includes material on development, cognition, intelligence, motivation, personality, social behaviour, and psychopathology. The course is taught by one or two different instructors with expertise in the topics covered. This course has no accompanying laboratory/tutorial.

CALENDAR NOTES: To enrol in 2000-level Psychology courses, a grade of B- is required in Intro to Psychology I (PSYO 1011.02 or PSYO 1021.03 or PSYO 1031.03) AND Intro to Psychology II (PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03).

EXCLUSIONS: PSYO 1000X/Y.06, PSYO 1001X/Y.06, PSYO 1010X/Y.06, PSYO 1012.03, PSYO 1032.03, SCIE 1500X/Y.30, SCIE 1501X/Y.27, SCIE 1503X/Y.21, SCIE 1504X/Y.27, SCIE 1510X/Y.33, SCIE 1515X/Y.36, SCIE 1520X/Y.30, SCIE 1540X/Y.27, SCIE 1505X/Y.18, SCIE 1506.03, SCIE 1507.03

FORMATS: Lecture

PSYO 1031 Introduction to Psychology and Neuroscience I: From Neuron to Person

CREDIT HOURS: 3

PSYO 1031 is the online distance education equivalent of PSYO 1011. Material covered includes historical background, research methodology, neural mechanisms that underlie behaviour, sensory and perceptual processes, states of consciousness, learning, and memory. Recorded lectures, lab activities and write-ups, quizzes, and class discussions will be delivered through the University's learning management system.

CALENDAR NOTES: To enrol in 2000-level Psychology courses, a grade of B- is required in Intro to Psychology I (PSYO 1011.02 or PSYO 1021.03 or PSYO 1031.03) AND Intro to Psychology II (PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03).

EXCLUSIONS: PSYO 1000X/Y.06, PSYO 1001X/Y.06, PSYO 1010X/Y.06, PSYO 1011.03, PSYO 1021.03, SCIE 1500X/Y.30 SCIE 1501X/Y.27, SCIE 1503X/Y.21, SCIE 1504X/Y.27, SCIE 1505X/Y.18, SCIE 1510X/Y.33, SCIE 1515X/Y.36, SCIE 1520X/Y.03, SCIE 1540X/Y.27, SCIE 1506.03 and SCIE 1507.03

FORMATS: Online Delivery

PSYO 1032 Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology

CREDIT HOURS: 3

PSYO 1032 is the online distance education equivalent of PSYO 1012. Material covered includes psychological development, problem solving, reasoning, intelligence, motivation and emotion, social behaviour, personality, health psychology, psychological disorders, and treatment. Recorded lectures, lab activities and write-ups, quizzes, and discussion will be delivered through the University's learning management system.

CALENDAR NOTES: To enrol in 2000-level Psychology courses, a grade of B- is required in Intro to Psychology I (PSYO 1011.02 or PSYO 1021.03 or PSYO 1031.03) AND Intro to Psychology II (PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03).

EXCLUSIONS: PSYO 1000X/Y.06, PSYO 1001X/Y.06, PSYO 1010X/Y.06, PSYO 1012.03, PSYO 1022.03, SCIE 1500X/Y.30, SCIE 1501X/Y.27, SCIE 1503X/Y.21, SCIE 1504X/Y.27, SCIE 1505X/Y.18, SCIE 1510X/Y.33, SCIE 1515X/Y.36, SCIE 1520X/Y.03, SCIE 1540X/Y.27, SCIE 1506.03 and SCIE 1507.03

FORMATS: Online Delivery

PSYO 2000 Methods in Experimental Psychology and Neuroscience

CREDIT HOURS: 3

This course provides a thorough grounding in scientific research methods used by experimental psychologists and neuroscientists. Lectures explore concepts, methods, and analytic tools employed to investigate human and animal behaviour and neurophysiology. Students also complete assignments and write reports on a series of supervised laboratory experiments to illustrate concepts presented in lectures.

CALENDAR NOTES: Restricted to students registered in Psychology programs. It is highly recommended that students take PSYO 2501.03, Statistical Methods I, concurrently with PSYO 2000.03. Students must attend the first lecture session.

PREREQUISITES: PSYO 1011.03 (or PSYO 1021.03 or PSYO 1031.03) and PSYO 1012.03 (or PSYO 1022.03 or PSYO 1032.03); OR SCIE 1506.09/1507.09 (or SCIE1505X/Y.18). All prerequisite courses must have a grade of B- or better.

CROSSLISTED: NESC 2000.03

EXCLUSIONS: NESC 2007.03
FORMATS: Lecture | Lab

PSYO 2080 Social Psychology

CREDIT HOURS: 3

The course undertakes a critical analysis of social theory and research promoting a close and skeptical evaluation of our knowledge, our obedience and rebellion, our affections and hostilities, our willingness to help and injure, our attempts to explain ourselves and others, our erotic orientations, and our gender roles.

PREREQUISITES: PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03 and PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03, OR SCIE 1506.09/1507.09 (or SCIE1505X/Y.18). All prerequisite courses must have a grade of B- or better.

FORMATS: Lecture

PSYO 2090 Developmental Psychology

CREDIT HOURS: 3

People change with age. This course examines the changes that occur in humans from conception through adolescence. Biological, social, cognitive, and linguistic aspects of development are considered. Theory, research, and practical implications are integrated throughout the course.

PREREQUISITES: PSYO 1011.03 (or PSYO 1021.03 or PSYO 1031.03) and PSYO 1012.03 (or PSYO 1022.03 or PSYO 1032.03); OR SCIE 1506.09/1507.09 (or SCIE1505X/Y.18). All prerequisite courses must have a grade of B- or better.

FORMATS: Lecture

PSYO 2130 Introduction to Cognitive Psychology

CREDIT HOURS: 3

Lectures focus on the processes involved in transforming sensory information into the meaningful everyday world that we know. Initially, emphasis is on the visual system, and how information within that system is structured and organized, followed by a consideration of the character of internal representations used in thinking and remembering.

PREREQUISITES: PSYO 1011.03 (or PSYO 1021.03 or PSYO 1031.03) and PSYO 1012.03 (or PSYO 1022.03 or PSYO 1032.03); OR SCIE 1506.09/1507.09 (or SCIE1505X/Y.18). All prerequisite courses must have a grade of B- or better.

CROSSLISTED: NESC 2130.03

FORMATS: Lecture

PSYO 2140 Learning: Conditioning and Motivation

CREDIT HOURS: 3

Lectures focus on several goals: (1) providing general principles of learning; (2) understanding the behaviour of particular species; (3) direct application to human problems. Emphasis is on understanding why researchers in animal learning do what they are currently doing (given the goals and the historical context).

PREREQUISITES: PSYO 1011.03 (or PSYO 1021.03 or PSYO 1031.03) and PSYO 1012.03 (or PSYO 1022.03 or PSYO 1032.03); OR SCIE 1506.09/1507.09 (or SCIE1505X/Y.18). All prerequisite courses must have a grade of B- or better.

CROSSLISTED: NESC 2140.03

FORMATS: Lecture

PSYO 2150 Perceptual Processes

CREDIT HOURS: 3

Perception deals with the way in which our senses provide us with information about our environment. This course focuses on the process by which sensory experiences are coded, how they are interpreted by the nervous system, and how experience modifies perception.

PREREQUISITES: PSYO 1011.03 (or PSYO 1021.03 or PSYO 1031.03) and PSYO 1012.03 (or PSYO 1022.03 or PSYO 1032.03); OR SCIE 1506.09/1507.09 (or SCIE1505X/Y.18) OR BIOL 1010.03 (or BIOL 1020.03) and BIOL 1011.03 (or BIOL 1021.03). All prerequisite courses must have a grade of B- or better.

CROSSLISTED: NESC 2150.03

EXCLUSIONS: PSYO 3005.03/NESC 3005.03

FORMATS: Lecture

PSYO 2160 Animal Behaviour

CREDIT HOURS: 3

Using concepts from behavioural biology and psychology, animal behaviourists attempt to explain why animals behave the way they do. The course examines topics such as mating and social systems, mate choice, the evolution of behaviour, and animal communication. The behaviour of a wide range of animals is studied.

PREREQUISITES: PSYO 1011.03 (or PSYO 1021.03 or PSYO 1031.03) and PSYO 1012.03 (or PSYO 1022.03 or PSYO 1032.03), each with a grade of B-

or better; OR SCIE 1506.09/1507.09 (or SCIE1505X/Y.18), each with a grade of B- or better; OR BIOL 1010.03 or BIOL 1020.03 and BIOL 1011.03 or BIOL 1021.03, each with a grade of C or better.

CROSSLISTED: NESC 2160.03

FORMATS: Lecture

PSYO 2220 Adult Psychopathology

CREDIT HOURS: 3

This course provides an introduction to adult psychopathology. Diagnostic criteria and evidence on etiology and treatment of the major mental health disorders within adulthood are discussed. Historical, social, cultural, and contextual aspects of adult psychopathology are examined and current research in the field is highlighted.

PREREQUISITES: PSYO 1011.03 (or PSYO 1021.03 or PSYO 1031.03) and PSYO 1012.03 (or PSYO 1022.03 or PSYO 1032.03); OR SCIE 1506.09/1507.09 (or SCIE1505X/Y.18). All prerequisite courses must have a grade of B- or better.

FORMATS: Lecture

PSYO 2444 Forensic Psychology

CREDIT HOURS: 3

This course provides an introduction to the application of psychology to the various areas of the criminal justice system (i.e., court, corrections, policing). In addition, consideration is given to the professional and ethical issues that arise when psychological knowledge is applied in forensic contexts.

PREREQUISITES: PSYO 1011.03 (or equivalent) and PSYO 1012.03 (or equivalent) with grade of B- or higher in both

EXCLUSIONS: PSYO 3224

FORMATS: Lecture

PSYO 2470 Systems Neuroscience

CREDIT HOURS: 3

This course provides an introduction to the functional systems of the brain. We examine neural systems (e.g., the sensory systems, motor system, neurotransmitter-specific systems) individually. We explore their anatomy and function, neurobiological properties that make each unique, and factors that are common to all neural systems (e.g., development and plasticity).

CALENDAR NOTES: Restricted to students registered in Psychology or Neuroscience Major or Honours programs.

PREREQUISITES: Introduction to Psychology I (PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03) and Introduction to Psychology II (PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03) EACH with a grade of B- or better, OR SCIE 1506.09 and SCIE 1507.09 EACH with a grade of B- or better, or SCIE 1505X/Y.18 with a grade of B- or better.

CROSSLISTED: NESC 2470.03

RESTRICTIONS: Restricted to students registered in Psychology or Neuroscience Major or Honours programs.

EXCLUSIONS: PHYL 2041.03, PSYO 2770.03

FORMATS: Lecture

PSYO 2501 Statistical Methods I

CREDIT HOURS: 3

This course provides an introduction to research design and statistics within Neuroscience and Psychology. Particular emphasis is placed on conducting and interpreting various statistical procedures, including descriptive and inferential statistics (z-test, t-test, ANOVA, chi-square tests), frequently used in these fields.

CALENDAR NOTES: Only students undertaking a Major or Honours degree in Psychology or Neuroscience are eligible for enrolment. This course does not fulfil any part of the Faculty of Science Mathematics requirement.

PREREQUISITES: PSYO 1011.03 (or PSYO 1021.03 or PSYO 1031.03) and PSYO 1012.03 (or PSYO 1022.03 or PSYO 1032.03); OR SCIE 1506.09/1507.09 (or SCIE1505X/Y.18). All prerequisite courses must have a grade of B- or better.

EXCLUSIONS: PSYO 3501.03

FORMATS: Lecture

PSYO 2570 Cellular Neuroscience

CREDIT HOURS: 3

This course explores the brain at the neuronal level. Material covered includes: the ionic basis of resting potentials; the electrical activity of neurons; synaptic transmission and plasticity; synthesis and action of synaptic transmitters; and drug actions. Cellular phenomena relevant to healthy and neurologically-dysfunctional systems are also discussed.

PREREQUISITES: Introduction to Psychology I (PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03) and Introduction to Psychology II (PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03) EACH with a grade of B- or better, or Principles of Biology I (BIOL 1010.03 or BIOL 1020.03) and Principles of Biology II (BIOL 1011.03 or BIOL 1021.03) EACH with a grade of B- or better, OR SCIE 1506.09 and SCIE 1507.09 EACH with a grade of B- or better, or SCIE 1505X/Y.18 with a grade of B- or better.

CROSSLISTED: NESC 2570.03, PHYL 2570.03

FORMATS: Lecture

PSYO 3001 Directed Project in Psychology

CREDIT HOURS: 3

Students work on single-term project under the supervision of faculty advisor. Requirements include a minimum grade of B in PSYO 2000.03, an overall B+ (GPA 3.30) average in all other Psychology courses, and securing a faculty advisor to supervise the research project. Note: This course cannot be used to fulfill the department's research laboratory requirement. Coordinator permission required - contact: pnistud@dal.ca

CALENDAR NOTES: This course provides 3-credit hours of directed research. Students wanting a full-year research experience in a single lab with single project, should register for PSYO 3100.03 and PSYO 3101.03.

PREREQUISITES: PSYO 2000.03 or NESC 2000.03, PSYO 2501.03, previous or concurrent enrolment in two other Psychology or Neuroscience 3000-level courses, and Coordinator's consent.

CROSSLISTED: NESC 3001.03

EXCLUSIONS: PSYO 3000.06, NESC 3000.06, PSYO 3100.03, PSYO 3101.03, NESC 3100.03, NESC 3101.03

FORMATS: Lab

PSYO 3002 Directed Research in Psychology

CREDIT HOURS: 3

Students work on single-term project under the supervision of faculty advisor. Requirements include a minimum grade of B in PSYO 2000.03 (or NESC 2000.03), an overall B+ (GPA 3.30) average in all other Psychology courses, and securing a faculty advisor to supervise the research project. Note: This course cannot be used to fulfill the department's research laboratory requirement. Coordinator permission required - contact: pnistud@dal.ca

CALENDAR NOTES: This course provides 3-credit hours of directed research. Students wanting a full-year research experience in a single lab with single project, should register for PSYO 3100.03 and PSYO 3101.03.

PREREQUISITES: PSYO 2000.03 or NESC 2000.03, PSYO 2501.03, previous or concurrent enrolment in two other Psychology or Neuroscience 3000-level courses, and Coordinator's consent.

CROSSLISTED: NESC 3002.03

EXCLUSIONS: PSYO 3000.06, NESC 3000.06, PSYO 3100.03, PSYO 3101.03, NESC 3100.03, NESC 3101.03

FORMATS: Lab

PSYO 3011 Experiential Learning in Science Communication I

CREDIT HOURS: 3

An experiential learning class for suitably-qualified senior students. This is a fundamentally 'learn by doing' course in which students have the opportunity to develop and consolidate teaching and communications skills in Psychology and Neuroscience. Students develop these skills through a series of communication-based projects, in-class instruction, and preparing, delivering, and marking lab materials for PSYO 1011.03 and PSYO 1012.03 lab groups (approx. 25 students). SIGNATURE REQUIRED.

CALENDAR NOTES: This course must be taken in the same academic year as PSYO 3012.03 and no credit can be given for one course without the other. A grade will be given for PSYO 3011.03 only after PSYO 3012.03 is completed.

PREREQUISITES: B+ or better in PSYO 2000.03 (or equivalent), advanced courses in Psychology or Neuroscience, and Instructor's consent.

CROSSLISTED: NESC 3011.03

EXCLUSIONS: NESC 3010.06

FORMATS: Lecture | Lab | Seminar

PSYO 3012 Experiential Learning in Science Communication II

CREDIT HOURS: 3

An experiential learning class for suitably-qualified senior students. This is a fundamentally 'learn by doing' course in which students have the opportunity to develop and consolidate teaching and communications skills in Psychology and Neuroscience. Students develop these skills through a series of communication-based projects, in-class instruction, and preparing, delivering, and marking lab materials for PSYO 1011.03 and PSYO 1012.03 lab groups (approx. 25 students). SIGNATURE REQUIRED.

CALENDAR NOTES: This course must be taken after, and in conjunction with, PSYO 3011.03 in the same academic year and no credit can be given for one course without the other. A grade will be given for PSYO 3011.03 only after PSYO 3012.03 is completed.

PREREQUISITES: PSYO 3011.03

CROSSLISTED: NESC 3012.03

EXCLUSIONS: PSYO 3010.06

FORMATS: Lecture | Lab | Seminar

PSYO 3051 Research Methods in Sensation and Perception

CREDIT HOURS: 3

A hands-on course that explores sensory perception with an emphasis on data collection, analysis, and interpretation. Several methodologies are used across the different senses to study perception and its neural underpinnings.

CALENDAR NOTES: Students should be aware that some data collection may occur outside of class time.

PREREQUISITES: PSYO 2000.03 or NESC 2000.03, PSYO 2470.03/NESC 2470.03, and PSYO 2150.03/NESC 2150.03

CROSSLISTED: NESC 3051.03

PSYO 3060 Psychological Perspectives of Sex & Gender

CREDIT HOURS: 3

Students will explore how the different areas of psychology understand, inform, and at times contradict, knowledge of and diversity in sex and gender.

PREREQUISITES: PSYO 1011.03 and PSYO 1012.03

FORMATS: Lecture | Discussion

PSYO 3082 Experimental Social Psychology

CREDIT HOURS: 3

This course attempts to develop students' skill level in empirical analysis of social psychology phenomena. Students complete two research projects during the term. The projects involve testing subjects, coding data, computer data analysis, and report writing. Familiarity with computer-based statistical analysis and text processing is strongly recommended.

PREREQUISITES: PSYO 2000.03 or NESC 2000.03, PSYO 2501.03, and PSYO 2080.03

FORMATS: Lecture | Lab

PSYO 3091 Methods in Developmental Psychology

CREDIT HOURS: 3

This course provides a survey of research methods in developmental psychology. It assumes knowledge of basic methodology and design, and concentrates on methods of relevance to the study of human development. In addition to lectures, students conduct a number of research exercises to gain experience in conducting research with children.

PREREQUISITES: PSYO 2000.03 or NESC 2000.03, PSYO 2501.03, and PSYO 2090.03

FORMATS: Lecture | Lab

PSYO 3093 Development of Language and Literacy Abilities

CREDIT HOURS: 3

This course examines the cognitive and linguistic processes underlying language acquisition and how they interact in influencing the development of language and literacy abilities.

PREREQUISITES: PSYO 2000.03 or NESC 2000.03, and PSYO 2090.03

FORMATS: Lecture

PSYO 3100 Independent Research in Psychology I

CREDIT HOURS: 3

For upper-year students who wish to gain research experience. Requirements include a minimum grade of B in PSYO 2000.03/NESC 2000.03, a high level of performance in other Psychology courses, an overall B+ (GPA 3.30) average, and securing a faculty advisor to supervise the research project. SIGNATURE REQUIRED. Contact: pnistud@dal.ca

CALENDAR NOTES: This course must be taken in the same academic year as PSYO 3101.03 and no credit can be given for one course without the other.

The work undertaken in PSYO 3101.03 should be a continuation of that initiated in PSYO 3100.03. A grade will be given for PSYO 3100.03 only after PSYO 3101.03 is completed.

PREREQUISITES: PSYO 2000.03 or NESC 2000.03 and PSYO 2501.03

CROSSLISTED: NESC 3100.03

RESTRICTIONS: Restricted to Psychology Majors and Honours Students

EXCLUSIONS: PSYO 3001.03, PSYO 3000.06

FORMATS: Lab | Experiential Learning

PSYO 3101 Independent Research in Psychology II

CREDIT HOURS: 3

For upper-year students who wish to gain research experience. Requirements include a minimum grade of B in PSYO 2000.03/NESC 2000.03, a high level of performance in other Psychology courses, an overall B+ (GPA 3.30) average, and securing a faculty advisor to supervise the research project. SIGNATURE REQUIRED. Contact: pnistud@dal.ca

CALENDAR NOTES: This course must be taken in the same academic year as PSYO 3100.03 and no credit can be given for one course without the other.

The work undertaken in PSYO 3101.03 should be a continuation of that initiated in PSYO 3100.03. A grade will be given for PSYO 3100.03 only after PSYO 3101.03 is completed.

PREREQUISITES: PSYO 3100.03 and Coordinator's consent

CROSSLISTED: NESC 3101.03

RESTRICTIONS: Restricted to Psychology Majors and Honours Students

EXCLUSIONS: PSYO 3000.06, PSYO 3001.03

PSYO 3122 Methods in Experimental Clinical Psychology

CREDIT HOURS: 3

Students learn how to conduct research on topics in applied clinical psychology. Students conduct a series of research projects in the laboratory by serving both as subjects and experimenters, and analyze the results of these studies in written lab reports. Research studies serve to illustrate concepts discussed in class.

PREREQUISITES: PSYO 2000.03 or NESC 2000.03, PSYO 2501.03, and PSYO 2220.03

FORMATS: Lecture | Lab

PSYO 3129 Childhood Psychopathology

CREDIT HOURS: 3

This course examines a wide range of mental health disorders in children (e.g., reading disability, autism, ADHD). The goal is to gain a better understanding of the nature of these disorders, to learn about evidence-based assessment and treatment, and to review research findings in relation to children's mental health.

PREREQUISITES: PSYO 2000.03 or NESC 2000.03; PSYO 2220.03 is recommended

FORMATS: Lecture

PSYO 3131 Research Methods in Attention

CREDIT HOURS: 3

The methods, findings, and theories that underpin our understanding of attention (alertness, preparation, selection, and control of information processing) are covered. Behavioural and neuroscientific evidence as well as computational models are examined in the lectures. Laboratories emphasize behavioural methods used to isolate and reveal the components of attention.

PREREQUISITES: PSYO 2000.03/NESC 2000.03, PSYO 2501.03, and PSYO 2130.03/NESC 2130.03 or PSYO 2150.03/NESC 2150.03

CROSSLISTED: NESC 3131.03

EXCLUSIONS: PSYO/NESC 3130.06

FORMATS: Lecture | Lab

PSYO 3132 Research Methods in Visual Cognition

CREDIT HOURS: 3

Visual cognition is the study of how we extract meaning from our visual environment and use it to direct our behaviour. Emphasis is placed on object, face, and word recognition as revealed by normal behaviour, and by neuroimaging techniques and neuropsychological studies of brain-damaged individuals who have lost these recognition abilities.

PREREQUISITES: PSYO 2000.03 or NESC 2007.03, PSYO 2501.03, and PSYO 2130.03/NESC 2130.03 or PSYO 2150.03/NESC 2150.03

CROSSLISTED: NESC 3132.03

EXCLUSIONS: PSYO 3130.06/NESC 3130.06

FORMATS: Lecture | Lab

PSYO 3133 Research Methods in Memory

CREDIT HOURS: 3

This course examines human memory from the perspective of cognitive psychology and, to a lesser extent, cognitive neuroscience. Lectures emphasize cognitive approaches to the study of memory with an explicit focus on empirical research methods, data, and interpretation of results.

PREREQUISITES: PSYO 2000.03 or NESC 2007.03, and PSYO 2501.03, and PSYO 2130.03/NESC 2130.03

CROSSLISTED: NESC 3133.03

EXCLUSIONS: PSYO 3130.06/NESC 3130.06

FORMATS: Lecture | Lab

PSYO 3134 Research Methods in Psycholinguistics

CREDIT HOURS: 3

Provides hands-on experience with various methodologies employed in the study of language processing, and uses these to explore topics in psycholinguistics in greater depth. Methods covered may include reaction time, priming, self-paced reading, computational modeling, corpus-based research, and event-related brain potentials. Students serve as experimenters and participants in class experiments.

PREREQUISITES: PSYO 2000.03 or NESC 2007.03, PSYO 2501.03, and PSYO 3190.03/NESC 3190.03

CROSSLISTED: NESC 3134.03

EXCLUSIONS: PSYO 3130.06/NESC 3130.06

FORMATS: Lecture | Lab

PSYO 3137 Research Methods in Cognitive Neuroscience

CREDIT HOURS: 3

An overview of neuroimaging and other techniques of cognitive neuroscience (including fMRI, ERP, and others) focusing on how they work, how they are applied, and their inherent limitations. Labs include experience collecting and analyzing ERP data, demonstrations of fMRI scanning, and analysis of fMRI data.

PREREQUISITES: PSYO 2000.03/NESC 2000.03, PSYO 2501.03, and PSYO 2130.03/NESC 2130.03

CROSSLISTED: NESC 3137.03

FORMATS: Lecture | Lab

PSYO 3161 Measuring Behaviour

CREDIT HOURS: 3

Measuring behaviour is essential in the study of ethology, behavioural neuroscience, developmental, social and clinical psychology. The function of this laboratory course is to teach methods of observing and scoring behaviour using qualitative and quantitative methods. Sampling methods, behaviour description and analysis will be done in laboratory and naturalistic settings.

PREREQUISITES: PSYO 2000.03/NESC 2000.03

CROSSLISTED: NESC 3161.03

FORMATS: Lab

PSYO 3162 Advanced Animal Behaviour: Theories and Applications

CREDIT HOURS: 3

This course focuses on advanced theories and applications of animal behaviour, with a focus on proximate, integrative and applied questions. It offers a more in-depth analysis of topics covered in PSYO 2160.03/NESC 2160.03 and explores trends and issues in contemporary ethology, animal psychology and behavioural ecology.

PREREQUISITES: PSYO 2000.03/NESC 2000.03 or BIOL 3062.03 or BIOL 3630.03, and PSYO 2160.03/NESC 2160.03

CROSSLISTED: NESC 3162.03

FORMATS: Lecture

PSYO 3165 Neuroethology

CREDIT HOURS: 3

Neuroethology explores how assemblies of neurons produce behaviour. The course typically uses a mix of simple model systems, including live animals (e.g., earthworms), visual systems, and robotics to examine how nervous systems produce behaviour.

CALENDAR NOTES: All experiments in the accompanying lab involve invertebrates. Students are required to handle invertebrates during the lab.

PREREQUISITES: PSYO 2570.03/NESC 2570.03, and either PSYO 2000.03 or NESC 2000.03 or BIOL 2020.03

CROSSLISTED: NESC 3165.03

FORMATS: Lab

PSYO 3170 Hormones and Behaviour

CREDIT HOURS: 3

This course examines how chemical signals of the neural, endocrine, and immune systems interact to influence the brain and behaviour and how neurotransmitters, cytokines, and hormones control neural and behavioural development, sexual, aggressive, and maternal behaviour. Hormone receptors in the brain, reproduction, puberty, brain sex differences, and stress are also examined.

PREREQUISITES: PSYO 2470.03/NESC 2470.03 or PHYL 2041.03

CROSSLISTED: NESC 3170.03

EXCLUSIONS: PSYO 2170.03/NESC 2170.03

PSYO 3180 Psychoneuroimmunology/Ecological Immunology

CREDIT HOURS: 3

Our behaviour can influence how well we resist disease, and infection can alter behaviour. This course examines how immune systems and nervous systems interact in both vertebrates and invertebrates. Evolutionary forces that have led to the existence of these interactions are also examined.

PREREQUISITES: BIOL 1010.03 or BIOL 1020.03 and BIOL 1011.03 or BIOL 1021.03, and one of PSYO 2770.03 or PSYO 2470.03/NESC 2470.03 or PHYL 2041.03 or MICI 2100.03; OR BIOL 2020.03

CROSSLISTED: NESC 3180.03

FORMATS: Lecture

PSYO 3190 Psycholinguistics

CREDIT HOURS: 3

Explores the cognitive and neural bases of human language processing. Topics include: human language and other communication systems; phonology; morphology; semantics; syntax; discourse; first and second language acquisition; relationship of language to general cognitive functions such as music and mathematics; signed languages such as American Sign Language; and non-linguistic gesture.

PREREQUISITES: PSYO 2000.03/NESC 2000.03 and PSYO 2130.03/NESC 2130.03

CROSSLISTED: NESC 3190.03

EXCLUSIONS: PSYO/NESC 2190.03

FORMATS: Lecture

PSYO 3220 Clinical Psychology

CREDIT HOURS: 3

A survey of professional issues relevant to the practice of clinical psychology in hospitals, private practice, schools, the court system, and the community. Students gain knowledge about psychological services, and an understanding of the training, ethics, and expertise that clinical psychology brings to the delivery of mental health and healthcare.

PREREQUISITES: PSYO 2000.03/NESC 2000.03, and PSYO 2220.03

EXCLUSIONS: PSYO 2120.03

FORMATS: Lecture

PSYO 3225 Health Psychology

CREDIT HOURS: 3

A study of psychological influences on how people stay healthy and how they respond when they become ill. Using a biopsychosocial model, this course examines topics such as health behaviours and prevention, stress and coping, the patient in treatment settings, and management of chronic and terminal illness.

PREREQUISITES: PSYO 2000.03/NESC 2000.03, and PSYO 2220.03

FORMATS: Lecture

PSYO 3227 Principles of Human Neuropsychology

CREDIT HOURS: 3

Clinical neuropsychologists study the organization of cognitive, emotional, and social functions in the brain to understand how brain damage alters human behaviour across the lifespan. We examine how clinicians diagnose and rehabilitate persons with brain diseases and disorders. Assignments emphasize application of textbook/lecture-based knowledge, critical thinking, and group presentation skills.

PREREQUISITES: NESC 2470.03/PSYO 2470.03 or PSYO 2770.03 or PHYL 2041.03, NESC/PSYO 2130.03 is recommended

CROSSLISTED: NESC 3227.03

FORMATS: Lecture

PSYO 3237 Drugs and Behaviour

CREDIT HOURS: 3

An introduction to behavioural psychopharmacology. The lectures involve basic anatomy, physiology, and chemistry of the nervous system. Behavioural effects and underlying mechanisms of various psychoactive drugs are discussed. Specific topics covered are alcohol, tobacco, amphetamines, cocaine, opiates, hallucinogens, tranquilizers, and antipsychotic drugs.

PREREQUISITES: PSYO 2000.03/NESC 2000.03, and PSYO 2470.03/NESC 2470.03 or PSYO 2570.03/NESC 2570.03

CROSSLISTED: NESC 3237.03

FORMATS: Lecture

PSYO 3264 The Science of Sleep

CREDIT HOURS: 3

This course reviews the history, methods and results of the scientific study of sleep. Topics include: circadian and homeostatic regulation; developmental and cultural impacts; normal and abnormal function of neural and other control mechanisms; effects of sleep loss on performance and health; theories of the functions of sleep.

PREREQUISITES: PSYO 2000.03/NESC 2000.03, and PSYO 2470.03/NESC 2470.03; OR BIOL 2020.03

CROSSLISTED: NESC 3264.03

FORMATS: Lecture

PSYO 3270 Developmental Neuroscience

CREDIT HOURS: 3

This course presents the fundamentals of development in complex and simple nervous systems. Cell differentiation, pattern regulation, proliferation,

migration, and circuit development are discussed. Special attention is given to later developmental events such as neuronal growth cones, cell death, growth factors, neuron-target interactions, and synapse formation.

PREREQUISITES: PSYO 2000.03/NESC 2000.03, and PSYO 2470.03/NESC 2470.03 and PSYO 2570.03/NESC 2570.03

CROSSLISTED: NESC 3270.03

FORMATS: Lecture

PSYO 3271 Developmental Origins of Health and Disease

CREDIT HOURS: 3

This course explores the role that developmental events (internal and external) play in health and disease, emphasizing their role in programming stress responding and metabolic processes across the lifespan. Students learn about underlying epigenetic mechanisms, environmental/sociocultural influences, disease processes impacted (e.g., stress-related and metabolic-related diseases), societal implications, and prevention/mitigation strategies.

PREREQUISITES: NESC 2000.03 or PSYO 2000.03 AND NESC 2470.03 or PSYO 2470.03

CROSSLISTED: NESC 3271.03

FORMATS: Lecture

PSYO 3280 Personality

CREDIT HOURS: 3

Personality deals with questions such as: Is a science of persons possible? Are there types of personalities, or is each individual's personality unique? Is an individual's life history an expression of his or her personality, or is personality description merely a summary statement of behaviour whose cause lies elsewhere?

PREREQUISITES: PSYO 2000.03/NESC 2000.03, and one of PSYO 2080.03 or PSYO 2090.03 or PSYO 2220.03

FORMATS: Lecture

PSYO 3370 Advanced Methods in Neurobiology

CREDIT HOURS: 3

Introduction to several neurophysiological techniques used in contemporary neuroscience, employing extracellular and intracellular electrical recording and stimulation methods on nervous system preparations, both sensory and motor. After introductory instruction, students in groups of 2 or 3 get to perform quite sophisticated practical experiments themselves, enabled by computer-based data acquisition.

PREREQUISITES: PSYO 2000.03/NESC 2000.03, PSYO 2470.03/NESC 2470.03 and PSYO 2570.03/NESC 2570.03

CROSSLISTED: NESC 3370.03

FORMATS: Lab

PSYO 3371 Neuronal Organization Laboratory

CREDIT HOURS: 3

Introduction to several techniques used in contemporary neuroscience. Students work under supervision in groups of 2 or 3 in regular labs that introduce neuroanatomical analyses using the following: Golgi impregnation, immunocytochemistry, dye-tracing of connections, electronmicroscopy of the retina, and neurotransmitter determinations using HPLC.

PREREQUISITES: PSYO 2000.03/NESC 2000.03, PSYO 2470.03/NESC 2470.03 and PSYO 2570.03/NESC 2570.03

CROSSLISTED: NESC 3371.03

FORMATS: Lab

PSYO 3444 Criminal Behaviour

CREDIT HOURS: 3

This course provides a theoretical and practical understanding of the causes and correlates of criminal behaviour. Topics include biological and social theories of crime, risk assessment, rehabilitation, and the application of each topic to the study of different populations involved in the justice system (youth, women, Indigenous peoples, etc.).

PREREQUISITES: PSYO 2000 or NESC 2000 (or equivalent), and students must have completed at least 30 credit hours toward their degree.

RESTRICTIONS: E1

FORMATS: Lecture

PSYO 3502 Statistical Methods II

CREDIT HOURS: 3

This course is the continuation of PSYO 2501.03, with the examination of more complex, but commonly used, inferential statistics. Topics include factorial ANOVA, ANCOVA, and multiple regression. This course is for Honours students in Psychology or Neuroscience. Class work includes computer-based assignments.

CALENDAR NOTES: PSYO 3502.03 is to be taken concurrently with PSYO 4901.03/NESC 4901.03. Permission for registration is dependent upon admission to the Honours program.

COREQUISITES: NESC 4901.03/PSYO 4901.03

RESTRICTIONS: Restricted to PSYO and NESC Honours students only. Permission by instructor REQUIRED.

FORMATS: Lecture | Lab

PSYO 3505 Neural Data Science

CREDIT HOURS: 3

An introduction to data management, manipulation, visualization, and analysis for neuroscience. Students learn scientific programming in Python, and use this to work with example data from areas such as single-cell recording, EEG, structural and functional MRI, and confocal microscopy. Basic signal processing techniques including filtering are covered.

PREREQUISITES: PSYO 2501.03 with a grade of B or higher, and NESC 2000.03 or PSYO 2000, and NESC 2470.03 or PSYO 2470.03

CROSSLISTED: NESC 3505.03

FORMATS: Lab | Online Delivery

PSYO 3511 Data Communication and Visualization in Psychology

CREDIT HOURS: 3

The history, psychology, and practical guidance in data visualization and reporting are covered. Open source statistics software will be used and so some coding will be done. The format will be lecture and lab.

PREREQUISITES: PSYO 2000.03, PSYO 2501.03

FORMATS: Lecture | Lab

PSYO 3581 History of Psychology I

CREDIT HOURS: 3

Drawing on writings from antiquity to the early years of the 20th century, we explore the nature of historical explanation, explanation in science, knowledge and truth, life, human nature, the domains of animal and man, neuroscience, and personality. Usually offered in the Fall term.

PREREQUISITES: PSYO 1011.03 or PSYO 1012.03 or equivalent, or Instructor's consent

EXCLUSIONS: PSYO 3580.06

FORMATS: Lecture

PSYO 3582 History of Psychology II

CREDIT HOURS: 3

Drawing on writings from antiquity to the early years of the 20th century, we explore the nature of learning, thinking, memory, intelligence, mental illness and treatment, the unconscious, dreams, development, and the self. Usually offered in the Winter term. Familiarity with ideas developed in PSYO 3581 is helpful.

PREREQUISITES: PSYO 1011.03 or PSYO 1012.03 or equivalent, or instructor's consent

EXCLUSIONS: PSYO 3580.06

FORMATS: Lecture

PSYO 3670 Genes, Brain and Behaviour

CREDIT HOURS: 3

The application of genetic techniques to the study of cognitive abilities, psychopathology, personality disorders, stress-related illnesses, and ethical issues in genetic research. The role of genetic factors in eating and drug abuse problems, as well as methods used to study gene-environment interactions are explored. PREREQUISITES: PSYO 2470.03/NESC 2470.03 or PSYO 2770.03 or PHYL 2041.03, AND BIOL 1010.03 or BIOL 1020.03 and BIOL 1011.03 or BIOL 1021.03, or SCIE 1505X/Y.18, SCIE 1515.X/Y36, SCIE 1520X/Y.30, or SCIE 1540X/Y.27 (with a grade of B- or better); BIOL 2020.03 and BIOL 2030.03 are recommended.

CROSSLISTED: NESC 3670.03

EXCLUSIONS: PSYO/NESC 2670.03

FORMATS: Lecture

PSYO 3770 Behavioural Neuroscience

CREDIT HOURS: 3

Behavioural neuroscience explores the neural and hormonal mechanisms underlying a variety of behavioural phenomena. The course focuses on neural correlates of social and emotional behaviour, motor behaviour and patterns, and behavioural toxicology processes (neurotoxins and endocrine disruptors).

PREREQUISITES: PSYO 2000.03/NESC 2000.03, and PSYO 2470.03/NESC 2470.03

CROSSLISTED: NESC 3770.03

FORMATS: Lecture

PSYO 3970 Molecular Neuroscience

CREDIT HOURS: 3

This course examines the development, function, and pathology of the brain at the molecular level. A particular focus will be placed upon the molecular mechanisms thought to contribute to neurological disease. The basic molecular neuroscience tools used to study these mechanisms are emphasized.

PREREQUISITES: PSYO 2570.03/NESC 2570.03 or BIOL 2020.03 or BIOL 2030.03

CROSSLISTED: NESC 3970.03

FORMATS: Lecture

PSYO 4000 Directed Reading Project

CREDIT HOURS: 3

An individually tailored reading or study course designed to allow Honours students to focus on a particular issue, or a set of related issues, that are not part of the regular program. Enrollment is contingent upon securing a faculty member to supervise the study program. This course can count as a seminar class.

SIGNATURE REQUIRED

Contact: pnistud@dal.ca

CROSSLISTED: NESC 4000.03

FORMATS: Seminar

PSYO 4001 Contemporary Issues in Psychology

CREDIT HOURS: 3

SIGNATURE REQUIRED

FORMATS: Seminar

PSYO 4002 Topics in Experimental Psychology

CREDIT HOURS: 3

This seminar explores select topics in experimental psychology. Students develop in-depth knowledge of a specific area of research through critical evaluation of the scientific literature. Topics vary from year to year; please consult the department for information on this year's focus.

CALENDAR NOTES: This is a fourth-year seminar for students completing an Honours degree in Psychology or Neuroscience.

RESTRICTIONS: Instructor permission required

FORMATS: Seminar

PSYO 4040 Learning Applications in Clinical and Social Psychology

CREDIT HOURS: 3

SIGNATURE REQUIRED

FORMATS: Seminar

PSYO 4050 Topics In Perception

CREDIT HOURS: 3

SIGNATURE REQUIRED

PREREQUISITES: PSYO 3051.03/NESC 3051.03

CROSSLISTED: NESC 4050.03

FORMATS: Seminar

PSYO 4060 Contemporary Issues in Human Sexuality

CREDIT HOURS: 3

This course examines human sexuality from a psychological perspective. Theory, research, and clinical issues are covered, emphasizing critical evaluation of the empirical literature. Rather than cover the breadth of human sexuality, this seminar examines key issues in depth. Topics are chosen to stimulate thinking and discussion about sexuality and research.

CALENDAR NOTES: This is a fourth-year seminar for students completing an Honours degree in Psychology or Neuroscience. It is expected that students will possess sound foundational knowledge relating to the science of human behaviour. The course will include a combination of lecture, in-class discussion, and student-led presentations.

RESTRICTIONS: Instructor permission required

CREDIT HOURS: 3
SIGNATURE REQUIRED
FORMATS: Seminar

PSYO 4091 Social Determinants of Health and Child Development

CREDIT HOURS: 3

This course focuses on the impacts of social determinants of health on child and adolescent development. Different social determinants of health are explored in relation to development (e.g., income, food insecurity, social safety network, social exclusion, education/literacy, childhood trauma, access to health services, sexual orientation, gender, disability, culture, racism, etc.).

CALENDAR NOTES: This is a fourth-year course for students completing an Honours degree in Psychology. It is expected that students will possess sound foundational knowledge relating to the science of human behaviour.

CALENDAR NOTES: PSYO 2140.03/NESC 2140.03 recommended
CROSSLISTED: NESC 4140.03
FORMATS: Seminar

PSYO 4160 Topics in Behavioural Biology

CREDIT HOURS: 3
SIGNATURE REQUIRED
CROSSLISTED: NESC 4160.03
FORMATS: Seminar

PSYO 4170 Topics in Behavioural Neuroendocrinology

CREDIT HOURS: 3
SIGNATURE REQUIRED
CROSSLISTED: NESC 4170.03
RESTRICTIONS: Restricted to PSYO/NESC Honours Students
FORMATS: Seminar

PSYO 4196 Quantitative Intros & Meta Analyses

CREDIT HOURS: 3
Introduction to the quantitative introduction, meta analyses and, preeminently, meta analytic thinking primarily through exercises tailored to student interests, when possible.
PREREQUISITES: Advanced statistics classes or experience are expected (e.g., PSYO 3502 or PSYO 6001)
RESTRICTIONS: Instructor permission required
FORMATS: Seminar

PSYO 4224 Topics in Forensic Psychology

CREDIT HOURS: 3
SIGNATURE REQUIRED
RESTRICTIONS: Restricted to Psychology Honours students
FORMATS: Seminar

PSYO 4225 The Science of Mindfulness

CREDIT HOURS: 3
This seminar focuses on the scientific literature relating to the concept, and practice of, mindfulness. Topics explore the effects of mindfulness practice on the brain, cognition, the immune system, addiction, emotion regulation, interpersonal relations, pain, and stress. Critical evaluation of the literature is emphasized.
CROSSLISTED: NESC 4225.03
RESTRICTIONS: Requires permission of instructor
EXCLUSIONS: PSYO 6225.03, PSYO 4001.03 (in 2017/18, 18/19, 19/20)
FORMATS: Seminar

PSYO 4227 Neurobiological Basis of Psychopathology

CREDIT HOURS: 3
This seminar will focus on biological foundations of the etiology, maintenance, and treatment of various forms of psychopathology. Topics will include: evolutionary, genetic and neurobiological foundations of psychopathology; as well as how various therapeutic approaches (e.g. diet, exercise, psychotherapy, medication) impact neurobiological processes.
RESTRICTIONS: Signature required
EXCLUSIONS: PSYO 6804.03
FORMATS: Seminar

PSYO 4230 Human Performance Topics

CREDIT HOURS: 3
SIGNATURE REQUIRED
CROSSLISTED: NESC 4230.03
FORMATS: Seminar

PSYO 4501 Honours Thesis I

CREDIT HOURS: 3
Under a staff member's supervision, each student conducts original research in psychology. Students meet as a class to describe their proposed research and progress. A formal written report of the completed research is required. The final grade is based on originality and skill with emphasis on the written and oral reports. Please note: admission requires that the student has secured a willing supervisor. SIGNATURE REQUIRED.
CALENDAR NOTES: This course must be taken in the same academic year as PSYO 4502.03 and no credit can be given for one course without the other. The work undertaken in PSYO 4502.03 should be a continuation of that initiated in PSYO 4501.03. A grade will be given for PSYO 4501.03 only after PSYO 4502.03 is completed.
PREREQUISITES: PSYO 2000.03 or equivalent with a grade of B+ or higher, PSYO 3502.03, admission to the honours program, and instructor's consent.
CROSSLISTED: NESC 4501.03
RESTRICTIONS: Restricted to Honours Psychology students in their graduating year.
EXCLUSIONS: PSYO 4500.06
FORMATS: Lecture | Lab | Experiential Learning

PSYO 4502 Honours Thesis II

CREDIT HOURS: 3

Under a staff member's supervision, each student conducts original research in psychology. Students meet as a class to describe their proposed research and progress. A formal written report of the completed research is required. The final grade is based on originality and skill with emphasis on the written and oral reports. Please note: admission requires that the student has secured a willing supervisor. SIGNATURE REQUIRED.

CALENDAR NOTES: This course must be taken in the same academic year as PSYO 4501.03 and no credit can be given for one course without the other. The work undertaken in PSYO 4502.03 should be a continuation of that initiated in PSYO 4501.03. A grade for 4501.03 will only be given when 4502.03 is complete.

PREREQUISITES: PSYO 2000.03 or equivalent with a grade of B+ or higher, PSYO 3502.03, and PSYO 4501.03 admission to the honours program, and instructor's consent.

CROSSLISTED: NESC 4502.03

RESTRICTIONS: Restricted to Honours Psychology students in their graduating year.

EXCLUSIONS: PSYO 4500.06

FORMATS: Lecture | Lab | Experiential Learning

PSYO 4581 Topics in the History of Psychology

CREDIT HOURS: 3

This course will cover in depth a particular topic in Psychology as it changes through history, from conception, development, and study, including important figures and historical context. Topic changes from year to year.

PREREQUISITES: PSYO 1011.03 or PSYO 1012.03 or equivalent, or instructor's consent.

FORMATS: Seminar

PSYO 4705 Neurotechnology Innovation, Commercialization, and Entrepreneurship

CREDIT HOURS: 3

Intensive 2-week course in neurotechnology, clinical neuroscience, and commercialization. Topics include neuroimaging methods; diagnosis, assessment, and treatment of nervous system-related disorders; the process of innovation; and business fundamentals. Features guest lectures by successful scientists and entrepreneurs, as well as hands-on workshops and lab exercises on business and neurotechnology topics.

PREREQUISITES: Two full years of undergraduate University study, plus instructor's consent

CROSSLISTED: NESC 4705.03

EXCLUSIONS: PSYO 7705.06

FORMATS: Lecture

PSYO 4740 Topics in the Neurobiology of Learning and Memory

CREDIT HOURS: 3

SIGNATURE REQUIRED

PREREQUISITES: PSYO 2470.03/NESC 2470.03, PSYO 2140.03/NESC 2140.03

CROSSLISTED: NESC 4740.03

FORMATS: Seminar

PSYO 4901 Honours Foundation

CREDIT HOURS: 3

Under a staff member's supervision, each student conducts original research in psychology and/or neuroscience. Students meet weekly as a class to describe their proposed research and progress. A formal written report of the completed research is required. The final grade is based on presentation, written proposal report, and lab work/skills. Please note: admission requires that the student has secured a willing supervisor in addition to meeting grade requirements.

SIGNATURE REQUIRED.

CALENDAR NOTES: This course must be taken in the same academic year as PSYO 4902.03. A minimum grade of B- or higher is required in PSYO 4901.03 to continue on in PSYO 4902.03. Student who do not achieve the minimum grade in PSYO 4901.03 will be removed from PSYO 4902.03 and not permitted to continue in the Honours program. The work undertaken in PSYO 4902.03 should be a continuation of that initiated in PSYO 4901.03.

COREQUISITES: PSYO 3502.03

PREREQUISITES: Instructor Approval (see Academic Calendar for Honours Admission Requirements)

CROSSLISTED: NESC 4901.03

RESTRICTIONS: PSYO and NESC Honours students only

EXCLUSIONS: PSYO 4501.03, NESC 4501.03, PSYO 4500.06, NESC 4500.06

FORMATS: Seminar

PSYO 4902 Honours Thesis

CREDIT HOURS: 3

Under a faculty member's supervision, each student conducts original research in psychology. Students meet as a class to describe their research projects and ongoing progress. A formal written report of the completed thesis is required. Final grade will reflect written thesis and lab work/skills development. Students must receive a grade of B- or higher in 4901 in order to continue into 4902. Students who do not receive a B- or higher in 4901 will be removed from the Honours degree.

CALENDAR NOTES: This course must be taken in the same academic year as PSYO 4901.03. A minimum grade of B- or higher is required in PSYO 4901.03 to continue on in PSYO 4902.03. Student who do not achieve the minimum grade in PSYO 4901.03 will be removed from PSYO 4902.03 and not permitted to continue in the Honours program. The work undertaken in PSYO 4902.03 should be a continuation of that initiated in PSYO 4901.03.

PREREQUISITES: PSYO 4901.03 with B- or higher and Instructor Approval (see Academic Calendar for Honours Admission Requirements)

CROSSLISTED: NESC 4902.03

RESTRICTIONS: PSYO and NESC majors only

EXCLUSIONS: PSYO 4502.03, NESC 4502.03, PSYO 4500.06, NESC 4500.06

FORMATS: Seminar

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

Course Descriptions

SCIE 1111 Writing for the Sciences

CREDIT HOURS: 3

This course satisfies the Faculty of Science Writing Requirement. The course covers communication theory; scientific style; grammar and punctuation; words, sentences, and paragraphs; the scientific process and scientific communication; research proposals; graphics; sections of the scientific paper; citations and references; posters; and ethics. Weekly assignments/quizzes apply writing skills introduced in lectures and small weekly tutorials further develop skills.

FORMATS: Lecture | Tutorial

SCIE 1506 Integrated Science I

CREDIT HOURS: 9

This course comprises the first half of the Integrated Science Program, a challenging first year option for BSc students interested in exploring connections among science disciplines. SCIE 1506 consists of lectures, laboratories, and field trips in Biology, Psychology and Statistics, as well as integrated lectures and workshops that cut across disciplines. It also has an interdisciplinary Writing in Science component that prepares students for research projects in SCIE 1507. Together, SCIE 1506 and SCIE 1507 provide comprehensive first-year preparation for major or honours degrees in science. Students in Integrated Science I must also register for CHEM 1011.03 and PHIL 1050.03 (Ethics in Science). Registration in PHYC 1190.03 or PHYC 1310.03 is recommended for students considering programs that require Physics. For calculus, students register in MATH 1000.03 (fall or winter) or MATH 1215.03 (fall or winter). Students taking MATH 1010.03 in fall term have the option to additionally take MATH 1010.03 in winter term.

CALENDAR NOTES: SCIE 1506 and SCIE 1507 are to be taken in consecutive terms. Both must be completed to receive credit for the Writing in Science component (equivalent to SCIE 1111.03).

COREQUISITES: PHIL 1050.03, CHEM 1011.03

RESTRICTIONS: Registration is restricted to Integrated Science students.

EXCLUSIONS: BIOL 1011.03, BIOL 1021.03, PSYO 1011.03, STAT 1060.03

FORMATS: Lecture | Lab

SCIE 1507 Integrated Science II

CREDIT HOURS: 9

This course comprises the second half of the Integrated Science Program, a challenging first year option for BSc students interested in exploring connections among science disciplines. SCIE 1507 consists of lectures, laboratories, and field trips in Biology, Psychology and Earth Sciences, as well as integrated lectures and workshops that cut across disciplines. The Writing in Science component, continued from Integrated Science I, includes a 10-week research project in which students apply the research design concepts and statistical analyses covered in Integrated Science I. Together, SCIE 1506 and SCIE 1507

provide comprehensive first-year preparation for major or honours degrees in science. Students in Integrated Science II must also register for CHEM 1012.03. Registration in MATH 1010.03 and in one of PHYC 1290.03 or PHYC 1320.03 is recommended for students considering programs with those requirements. For calculus, students must register in either MATH 1000 (fall or winter) or MATH 1215 (fall or winter).
CALENDAR NOTES: SCIE 1506 and SCIE 1507 are to be taken in consecutive terms. Both must be completed to receive credit for the Writing in Science component (equivalent to SCIE 1111.03).
COREQUISITES: CHEM 1012.03
PREREQUISITES: SCIE 1506.09, CHEM 1011.03, PHIL 1050.03
RESTRICTIONS: Registration is restricted to Integrated Science students
EXCLUSIONS: BIOL 1010.03, BIOL 1020.03, PSYO 1012.03, EARTH 1080.03, SCIE 1111.03
FORMATS: Lecture | Lab

SCIE 2001 Introduction to the History of Science I

CREDIT HOURS: 3

This course covers the historical foundations of science, from ancient Babylonia to the Enlightenment. Open to first-year students and above, it can be taken as a humanities or a science course and serves as preparation for its modern counterpart, HSTC 1202.03 / HSTC 2212.03 / HIST 2076.03 / SCIE 2002.03
CALENDAR NOTES: Credit can only be given for this course if SCIE 2001.03 and SCIE 2002.03 are completed in consecutive terms and partial credit cannot be given for a single term.

CROSSLISTED: HSTC 1201.03

EXCLUSIONS: HSTC 2201.03, BIOL 3502.03, HIST 3072.03, SCIE 4000.03, HIST 3074X/Y.06, HIST 2074X/Y.06, HSTC 1200.06, HSTC 2200.06, SCIE 2000.06

FORMATS: Lecture | Tutorial

SCIE 2002 Introduction to the History of Science II

CREDIT HOURS: 3

This course covers the creation of modern science, from the radical changes of the Enlightenment to contemporary notions of technoscience and our place in nature and the cosmos. It follows the themes and contexts introduced in HSTC 1201.03/HSTC 2211.03/ HIST 2075.03/SCIE 2001.03. Open to first-year students and above, it can be taken as a humanities or science credit.

CALENDAR NOTES: Credit can only be given for this course if SCIE 2001.03 and SCIE 2002.03 are completed in consecutive terms and partial credit cannot be given for a single term.

CROSSLISTED: HSTC 1202.03

EXCLUSIONS: HSTC 2201.03, BIOL 3502.03, HIST 3072.03, SCIE 4000.03, HIST 3074X/Y.06, HIST 2074X/Y.06, HSTC 1200.06, HSTC 2200.06, HSTC 1200.06, SCIE 2000.06

FORMATS: Lecture | Tutorial

SCIE 2111 Dalhousie Science Scholars and Leaders: Becoming a Scientist I

CREDIT HOURS: 0

This course examines the structure of science and situates science majors in the context of the scientific process. The course de-mystifies the language and culture of science. Students will develop skills to help them progress towards a science career. The course also explores the translation of science to society.

CALENDAR NOTES: BIOL 2111.03 and BIOL 2112.03 must be taken in consecutive fall/winter terms.

CROSSLISTED: BIOL 2111.00

RESTRICTIONS: E1. The course requires permission of instructor. Preference will be given to students in the Dalhousie Science Scholars & Leaders Program. BIOL 2111 will be open to Biology majors. SCIE 2111 will be open to students from other units within the Faculty of Science.

FORMATS: Experiential Learning

SCIE 2112 Dalhousie Science Scholars and Leaders: Becoming a Scientist II

CREDIT HOURS: 3

This course examines the structure of science and situates science majors in the context of the scientific process. The course de-mystifies the language and culture of science. Students will develop skills to help them progress towards a science career. The course also explores the translation of science to society.

CALENDAR NOTES: BIOL 2111.00 and BIOL 2112.03 must be taken in consecutive fall/winter terms.

PREREQUISITES: Permission of instructor

CROSSLISTED: BIOL 2112.03

RESTRICTIONS: E1. The course requires permission of instructor. Students must have been enrolled in BIOL/SCIE2111 in the Fall term. BIOL 2112.03 will be open to Biology majors. SCIE 2112.03 will be open to students from other units within the Faculty of Science.

FORMATS: Other (explain in comments)

SCIE 2800 Science Co-op Seminar Orientation

CREDIT HOURS: 0

This course is designed to introduce Science Co-op students to aspects of career development and preparation for their work terms. This course is a prerequisite to the first work term and is a mandatory component of the Science-Cooperative Education program; all Science Co-operative Education students are required complete this course at least four months prior to the first workterm. A grade of Pass is required before students undertake the first work term

experience.
FORMATS: Seminar

SCIE 3100 Experiential Learning in Medical Sciences

CREDIT HOURS: 3

This is an outside-the-classroom learning experience in which the student works to acquire knowledge and skills relevant to medical sciences under the direction of a supervisor. Suitable work environments may be located at any Dalhousie-affiliated site. Supervisors may be in any department/Faculty. This course is intended for students with no prior research experience.

CALENDAR NOTES: Open only to students in the Bachelor of Science Medical Sciences Program. Students are advised to take SCIE 3100 prior to SCIE 4901/4902 (Honours Project) or SCIE 4101/4102 (Directed Project). Students must gain permission from coordinator before registering. To gain permission for this class, a student must find a supervisor willing to supervise the work experience. The student and supervisor must sign a learning agreement that has been approved by the course coordinator.

PREREQUISITES: Permission of course coordinator required. To register for this class, a student must find a supervisor willing to supervise the work experience. This course is intended for students in their third year with no prior research experience. It is strongly recommended that students take SCIE 3100 prior to SCIE 4901/4902 or SCIE 4101/4102.

RESTRICTIONS: Open only to students in the Bachelor of Science Medical Sciences Program.

EXCLUSIONS: Lab work that is part of another scheduled class or paid employment cannot be used towards SCIE 3100. Only one experiential learning course per degree is permitted. Cannot be taken concurrently with PHYL 3600, SCIE 4901/4902 (Honours Project) or SCIE 4101/4102 (Directed Project).

FORMATS: Other (explain in comments)

SCIE 3111 Communicating Science

CREDIT HOURS: 3

A course for senior science students to hone communication skills. Students (1) learn to communicate scientific information to various non-specialist audiences, and (2) prepare and deliver tutorials to small groups of SCIE 1111.03 students. The course allows students to use different communication styles and topics to build a portfolio.

PREREQUISITES: Permission of instructor

SCIE 3211 Communicating Science to Non-Scientists

CREDIT HOURS: 3

In this course, science students learn and practice core concepts of communicating science to a non-scientist audience. Multiple forms of delivery are discussed, practiced, and critiqued, including written, oral, and visual. The impact of social media on the ways in which scientists communicate with the public are also explored.

CALENDAR NOTES: Course is open to students in the Bachelor of Science and Bachelor of Science (MedSci) programs, only. Instructor permission required.

PREREQUISITES: Instructor permission required. Students must be enrolled in a Bachelor of Science (BSc) program and have completed at least 60 credit hours towards their degree.

RESTRICTIONS: Course is restricted to students enrolled in a Bachelor of Science degree in the Faculty of Science (BSc or BSc(Medical Sciences)).

FORMATS: Lecture

SCIE 3333 Science Education: Introduction to Principles and Practices

CREDIT HOURS: 3

Students investigate and apply key principles related to teaching and learning in sciences. Emphasized are: (1) conveying how science works; (2) the nature of learning; (3) the science-society connection; (4) teaching concepts that cross the sciences such as patterns, scale, visualization, complexity, uncertainty, bias, and multiple perspectives. Experiential learning is an integral component.

PREREQUISITES: Minimum of 4 courses at or above the second year level AND permission of the Instructor.

RESTRICTIONS: E1 and E2

FORMATS: Tutorial | Seminar | Experiential Learning

SCIE 3600 Exploring Geographic Information Systems

CREDIT HOURS: 3

This course provides a general overview of Geographic Information Systems (GIS), examining what GIS is, what it can do, and how it works. The course is aimed at students studying in all disciplines and will involve creating, understanding, manipulating and displaying geographic data. Topics will include data models, analysis of vector and raster data, creation of spatial databases, the Global Positioning System and other aspects of spatial data. Lectures (3 per week) will explore basic aspects of GIS in detail and introduce material to be covered in the labs. Labs are held once per week and will provide practical experience in data manipulation and problem solving.

PREREQUISITES: Two years of university study

EXCLUSIONS: EARTH 3500.03, ENVS 3500.03, GEOG 3500.03, EARTH 5600.03

SCIE 4001 History of Marine Sciences

CREDIT HOURS: 3

In this course, we will trace the history of marine sciences from the ancients to the 20th century. Topics may include ancient cosmologies, voyages of discovery, ocean circulation, and a range of scientific perspectives and technological developments that have shaped human understanding of the oceans.

PREREQUISITES: Instructor's consent

CROSSLISTED: BIOL 4664.03, OCEA 4331.03/5331.03, HIST 3073.03, HSTC 3331.03, MARI 4664.03

FORMATS: Lecture

SCIE 4005 Major Capstone Course in Medical Sciences

CREDIT HOURS: 3

Integration of multiple Medical Sciences disciplines through in-depth analysis of a series of 5 medical "cases" through expert lectures, group discussion, and small group presentations. Cases are selected from across all biomedical disciplines (Medicine, Dentistry, Nursing, Physiotherapy, Occupational Therapy, etc), reflecting a wide range of patient ages and demographics. This course is required by Medical Sciences students not pursuing Honours. Medical Science Honours students take SCIE 4901 & 4902 instead. This course cannot be taken at the same time as the Medical Sciences Honours courses SCIE 4901 & 4902.

PREREQUISITES: Writing requirement, PHAC 3001.03, MICI 3115.03, ANAT 3010.03, PATH 3000.03, and PHIL 2810.03 or PHIL 2805.03.

RESTRICTIONS: Open only to fourth year Major students in the Bachelor of Sciences Medical Sciences Program

EXCLUSIONS: This course cannot be taken at the same time as the Medical Sciences Honours courses SCIE 4901 & 4902.

FORMATS: Lecture

SCIE 4100 Directed Project in Medical Sciences

CREDIT HOURS: 6

This is an outside-the-classroom learning experience in which the student works on a research project relevant to medical sciences under the direction of a supervisor. Suitable work environments may be located at any Dalhousie-affiliated site. Supervisors may be in any department/Faculty.

CALENDAR NOTES: To register for this class, a student must find a supervisor willing to supervise the work experience. The student and supervisor must sign a learning agreement that has been approved by the course coordinator.

PREREQUISITES: Permission of coordinator required. Students are advised to have at least 2 senior (3000- or 4000-level) courses on topics relevant to the research area, including SCIE3100 (Research Skills in Medical Sciences). Minimum B average (GPA 3.0) in at least three of the following Medical Sciences 3rd Year core courses (PHAC 3001, MICI 3115, ANAT 3010, PATH 3000, PHIL 2810).

RESTRICTIONS: Open only to Major students in the Bachelor of Science Medical Sciences Program.

EXCLUSIONS: Lab work that is part of another scheduled class or paid employment cannot be used towards SCIE 4100X/Y. Cannot be taken concurrently with SCIE3100. Cannot be taken with SCIE 4900X/Y.

FORMATS: Other (explain in comments)

SCIE 4101 Directed Project in Medical Sciences I

CREDIT HOURS: 3

This is the first half of an outside-the-classroom learning experience in which the student works on a research project relevant to medical sciences under the direction of a supervisor. Suitable work environments may be located at any Dalhousie-affiliated site. Supervisors may be in any department/Faculty.

CALENDAR NOTES: Open only to students in the Bachelor of Science Medical Sciences Program. To register for this class, a student must find a supervisor willing to supervise the work experience. The student and supervisor must sign a learning agreement that has been approved by the course coordinator. This course must be taken in the same academic year as SCIE 4102.03 and no credit can be given for one course without the other. Grades will not be assigned for SCIE 4101.03 until SCIE 4102.03 has also been completed.

PREREQUISITES: Permission of coordinator required. Students are advised to have at least 2 senior (3000- or 4000-level) courses on topics relevant to the research area, including SCIE 3100.03 (Experiential Learning in Medical Sciences). Minimum B average (GPA 3.0) in at least three of the following Medical Sciences 3rd year core courses (PHAC 3001.03, MICI 3115.03, ANAT 3010.03, PATH 3000.03, PHIL 2805.03 or PHIL 2810.03).

EXCLUSIONS: Open only to students in the Bachelor of Science Medical Sciences Program. Research work that is part of another scheduled class or paid employment cannot be used towards SCIE 4101.03. Cannot be taken concurrently with SCIE 3100.03. Cannot be taken with SCIE 4901.03 or SCIE 4902.03.

FORMATS: Other (explain in comments)

SCIE 4102 Directed Project in Medical Sciences II

CREDIT HOURS: 3

This is an outside-the-classroom learning experience in which the student works on a research project relevant to medical sciences under the direction of a supervisor. Suitable work environments may be located at any Dalhousie-affiliated site. Supervisors may be in any department/Faculty.

CALENDAR NOTES: Open only to students in the Bachelor of Science Medical Sciences Program. To register for this class, a student must find a supervisor willing to supervise the work experience. The student and supervisor must sign a learning agreement that has been approved by the course coordinator. This course must be taken in the same academic year as SCIE 4101.03 and no credit can be given for one course without the other. No grade will appear for SCIE 4101.03 until SCIE 4102.03 has also been completed.

PREREQUISITES: Permission of coordinator required. Students are advised to have at least 2 senior (3000- or 4000-level) courses on topics relevant to the research area, including SCIE 3100.03 (Experiential Learning in Medical Sciences). Minimum B average (GPA 3.0) in at least three of the following Medical Sciences 3rd year core courses (PHAC 3001.03, MICI 3115.03, ANAT 3010.03, PATH 3000.03, PHIL 2805.03 or PHIL 2810.03).

EXCLUSIONS: Open only to students in the Bachelor of Science Medical Sciences Program. Research work that is part of another scheduled class or paid employment cannot be used towards SCIE 4101.03. Cannot be taken concurrently with SCIE 3100.03. Cannot be taken with SCIE 4901.03 or SCIE 4902.03.

FORMATS: Other (explain in comments)

SCIE 4211 Portfolio in Science Communication

CREDIT HOURS: 0

Students completing the Science Communication certificate are required to register for this zero-credit hour course in the semester in which they are submitting their completed portfolio for evaluation (typically, the final semester of their degree). The portfolio is a record that can be shared with future employers and built upon into the future. More details about the requirements for the portfolio itself, are available from the certificate coordinator.

CALENDAR NOTES: Restricted to students registered in the Science Communication Certificate. Permission of Coordinator required.

PREREQUISITES: Permission of Coordinator

RESTRICTIONS: Restricted to students enrolled in the Science Communication Certificate.

SCIE 4444 Leadership in Science

CREDIT HOURS: 3

Students will develop leadership skills and build confidence while applying their scientific knowledge. Through in-class activities and a science-based practicum, students gain experience with various aspects of leadership, allowing for integration and application of their expertise.

PREREQUISITES: Instructor permission. Students should have completed at least three (3) third year courses in their declared major and have a minimum of B+ average in their major.

SCIE 4445 Science Leadership and Communication Portfolio

CREDIT HOURS: 0

This zero-credit course is the final component of the Science Leadership and Communication Certificate requirement. Students should only register for this course in the semester that they are submitting their completed portfolio for evaluation. The portfolio represents an opportunity for you to highlight and synthesize your learning about leadership and communication in science throughout your undergraduate years in a concise package, and includes reflection on each of the required Certificate courses, their interconnections, and the practica involved.

CALENDAR NOTES: 1. This is a zero-credit course, carrying a pass-fail grading scheme. 2. Deadline for submission of the portfolio is 6 weeks prior to graduation.

PREREQUISITES: Registration in the Science Leadership and Communication Certificate. Completion or co-completion of the required Certificate courses.

FORMATS: Other (explain in comments)

SCIE 4701 Science and Technology Innovation, Commercialization, and Entrepreneurship I

CREDIT HOURS: 3

Capstone course providing an introduction to the processes and mindsets around innovation and commercialization of science and technology, including entrepreneurship. Experiential learning format; teams work to develop and pitch a viable business model for a scientific solution to a real-world problem. Complemented by lectures, case studies, and guest presentations.

CALENDAR NOTES: This course must be taken in the same academic year as SCIE 4702.03 and no credit can be given for one course without the other. The work undertaken in SCIE 4702.03 should be a continuation of that initiated in SCIE 4701.03.

COREQUISITES: SCIE 4702.03

PREREQUISITES: Registration by instructor's permission. Undergraduates should have completed at least three full years (90 credit hours) of university study, and have previous exposure to innovation and entrepreneurship such as events offered by Dalhousie sandbox programs.

RESTRICTIONS: Registration by instructor's permission.

EXCLUSIONS: NESC 4705.03/PSYO 4705.03, SCIE 5701.06

FORMATS: Lecture | Lab | Tutorial | Experiential Learning

SCIE 4702 Science and Technology Innovation, Commercialization, and Entrepreneurship II

CREDIT HOURS: 3

Capstone course providing an introduction to the processes and mindsets around innovation and commercialization of science and technology, including entrepreneurship. Experiential learning format; teams work to develop and pitch a viable business model for a scientific solution to a real-world problem. Complemented by lectures, case studies, and guest presentations.

CALENDAR NOTES: This course must be taken in the same academic year as SCIE 4701.03 and no credit can be given for one course without the other. The work undertaken in SCIE 4702.03 should be a continuation of that initiated in SCIE 4701.03.

PREREQUISITES: SCIE 4701.03. Registration by instructor's permission.

RESTRICTIONS: Registration by instructor's permission

EXCLUSIONS: NESC 4y705.03/PSYO 4705.03, SCIE 5701.06

FORMATS: Lecture | Lab | Tutorial | Experiential Learning

SCIE 4705 Neurotechnology Innovation, Commercialization, and Entrepreneurship

CREDIT HOURS: 3

An introduction to neurotechnology, clinical neuroscience, and commercialization. Topics include neuroimaging methods; diagnosis, assessment, and

treatment of nervous system-related disorders; the process of innovation; and business fundamentals. Features guest lectures by successful scientists and entrepreneurs, as well as hands-on workshops and lab exercises on business and neurotechnology topics **SIGNATURE REQUIRED**
PREREQUISITES: Two full years of undergraduate University study, plus instructor's consent.
CROSSLISTED: PSYO 4705.03, NESC 4705.03
EXCLUSIONS: PSYO 7705.06
FORMATS: Lecture

SCIE 4850 Geographic Information Science Research Project

CREDIT HOURS: 3

Students learn how to design, manage and complete a research project in Geographic Information Science (GIS). Projects must include a substantive analytical component where GIS is central to methods employed. Evaluation includes a written report, oral presentation and digital data. Required for completion of the Certificate in GIS.

COREQUISITES: EARTH 5420.03/GEOG 4520.03/ERTH4520.03

PREREQUISITES: ENVS 3500.03/ERTH 3500.03/GEOG 3500.03

CROSSLISTED: BIOL 4850.03, ENVS 4850.03, EARTH 4850.03, GEOG 4850.03

EXCLUSIONS: Restricted to 3rd and 4th year students

FORMATS: Lecture

SCIE 4901 Medical Sciences Honours Research & Thesis I

CREDIT HOURS: 3

The course is required of, and restricted to, students in the Medical Sciences Honours program. Students conduct a research project in the laboratory or research site of an approved faculty member and attend weekly meetings of the class. Students have the flexibility to undertake their research in a department of their choice, subject to the approval of the Honours Committee. Class participation, an interim report, a written thesis, and a presentation at the Annual Medical Sciences Symposium are required for completion. No grade will appear for the course in the Fall term; grade for the course will appear in the Winter term.

CALENDAR NOTES: This course must be taken in the same academic year as SCIE 4902.03 and no credit can be given for one course without the other.

Students will not receive a grade for SCIE 4901.03 until both SCIE 4901.03 and SCIE 4902.03 have been completed.

PREREQUISITES: An approved research project supervisor (as determined by the Medical Sciences Honours Committee) and minimum average GPA of 3.0 calculated from the following core courses: BIOL 2020.03, BIOL 2030.03, PHYL 2041.03, PHYL 2044.03, MICI 2100.03, BIOC 2300.03, SOSA 2503.03, PHIL 2810.03 or PHIL 2805.03, PHAC 3001.03, MICI 3115.03, ANAT 3010.03, PATH 3000.03, CHEM 2401.03, and CHEM 2402.03. At the time of application, you are unlikely to have completed all the listed core courses; therefore, your GPA of the completed courses at the time of application must be equal to or greater than 3.0 (B average). A GPA of at least 3.0 is also required for all core courses at the time of graduation.

EXCLUSIONS: SCIE 4900.06

FORMATS: Other (explain in comments)

SCIE 4902 Medical Sciences Honours Research & Thesis II

CREDIT HOURS: 3

The course is required of, and restricted to, students in the Medical Sciences Honours program. Students conduct a research project in the laboratory or research site of an approved faculty member and attend weekly meetings of the class. Students have the flexibility to undertake their research in a department of their choice, subject to the approval of the Honours Committee. Class participation, an interim report, a written thesis, and a presentation at the Annual Medical Sciences Symposium are required for completion. No grade will appear for the course in the Fall term; grade for the course will appear in the Winter term.

CALENDAR NOTES: This course must be taken in the same academic year as SCIE 4901.03 and no credit can be given for one course without the other. A cumulative grade for SCIE 4901.03 & SCIE 4902.03 will be granted in the Winter term, once SCIE 4902.03 has been completed.

PREREQUISITES: An approved research project supervisor (as determined by the Medical Sciences Honours Committee) and minimum average GPA of 3.0 calculated from the following core courses: BIOL 2020.03, BIOL 2030.03, PHYL 2041.03, PHYL 2044.03, MICI 2100.03, BIOC 2300.03, SOSA 2503.03, PHIL 2810.03 or PHIL 2805.03, PHAC 3001.03, MICI 3115.03, ANAT 3010.03, PATH 3000.03, CHEM 2401.03, and CHEM 2402.03. At the time of application, you are unlikely to have completed all the listed core courses; therefore, your GPA of the completed courses at the time of application must be equal to or greater than 3.0 (B average). A GPA of at least 3.0 is also required for all core courses at the time of graduation.

Introduction

It doesn't matter if you want to design computer games, study the safety of nuclear power plants, analyze the stock market or conduct political polls: scientists of all kinds work with numbers to measure and explore the world. That's where statistics comes in. Statistics is the study of the collection, organization, analysis, interpretation and presentation of data. Extracting knowledge from data helps us plan for the future and improve our quality of life.

The Dalhousie Statistics program is the only program in the Maritimes that offers a full range of undergraduate and graduate programs. Our undergraduate courses are also approved by the accreditation committee of the Statistics Society of Canada, so that our graduates can apply for the Associate Statistician designation.

Statistics makes a great undergraduate degree with wide applicability and is an essential component of any program in the sciences or social sciences.

Degree Programs

The Department of Mathematics and Statistics offers the following degree programs in Statistics

- BSc or BA (120 credit hour) Honours (Concentrated)*
- BSc or BA (120 credit hour) Combined Honours*
- BSc or BA (120 credit hour) Major*
- BSc or BA (120 credit hour) Double Major*
- BSc or BA (90 credit hour) Minor in Statistics
- Minor in Statistics

* May be combined with Minor programs from other disciplines

Departmental requirements for each degree program can be seen by following the links in the menu to the right.

In addition to departmental requirements, students must satisfy the requirements outlined in the [Academic Regulations](#) and the [College of Arts and Science Degree Requirements](#) sections. Students are advised that a number of requirements differ for the BA and BSc degrees.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Students applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with a Statistics undergraduate academic advisor.

Staff

Dean

Macdonald, C.L.B., BSc (Hons), PhD (Dalhousie), Professor (Chemistry)

Chair of the Department

Janssen, J. C., MSc (Eindhoven), PhD (Lehigh)

Director of Division

Dowd, M., PhD (Dalhousie)

Faculty Advisor

Susko, E., PhD (Waterloo), Honours and Undergraduate Advisor, Statistics

Kenney, T., BA (Hons), MMath, PhD (Cambridge), Honours and Undergraduate Advisor, Actuarial Science

Brown, J., MSc, PhD (Toronto) Co-op Coordinator

Professor Emeritus

Field, C. A., MSc, PhD (Northwestern)

Hamilton, D. C., MA, PhD (Queen's)

Thompson, K., MSc (Manchester), PhD (Liverpool) (CRC Chair), jointly with Oceanography

Professors

Beiko, R., PhD (Ottawa), cross appointment with Computer Science

Bielewski, J., MA, PhD (Texas A & M), jointly with Biology

Dowd, M., PhD (Dalhousie)

Feng, C., MSc. & PhD (Simon Fraser U.), cross appointment with Community Health and Epidemiology

Gu, H., MSc (Peking), PhD (Hong Kong)

Mills-Flemming, J., MSc (TUNS), PhD (Dalhousie), Graduate Advisor Statistics

Smith, B., MSc (Calgary), PhD (Berkeley)

Susko, E., PhD (Waterloo), Killam Professor, Undergraduate Advisor

Associate Professors

Kenney, T., BA (Hons), MMath, PhD (Cambridge), cross appointment with Mathematics

Assistant Professors

Ho, L, PhD (Univ of Wisconsin)

Murphy, O., MSc. & PhD (McGill)

University Teaching Fellows

Sarhan, A., PhD (Gdansk)

Adjunct Professors

Gupta, R. P., PhD (Delhi) Dalhousie

Herbinger, C., MSc (Paris), PhD (Dalhousie), jointly with Biology

Millar, M., PhD (Dalhousie) MSVU

Sneddon, G., PhD (Dalhousie) MSVU

Statistical Consultant

Wang, H., PhD (Ottawa)

Please refer to the entry for the [Department of Mathematics and Statistics](#) for a full listing of the members of the Department and information on other programs offered by the Department.

BSc or BA (120 credit hour) Concentrated Honours in Statistics

Students who want a challenging program resulting in comprehensive knowledge of both theoretical and applied Statistics may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours. Honours students must write a research-based Honours thesis. The research thesis and the Honours Qualifying Examination requirement are satisfied through completion of STAT 4950.03.

Admission to Honours

Students must apply for admission to Honours programs. Students considering Honours in Statistics should consult with a Statistics Honours Advisor early in their studies.

Departmental requirements

In addition to fulfilling the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections, students in a BSc or BA Concentrated Honours program in Statistics must complete the following courses:

1000 level

- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II or MATH 1215.03: Life Sciences Calculus/MATH 1010.03: Differential and Integral Calculus II
- STAT 1060.03: Introductory Statistics for Science and Health Sciences¹
- MATH 1030.03: Matrix Theory and Linear Algebra I

2000 level

- MATH 2001.03: Intermediate Calculus I
- MATH 2002.03: Intermediate Calculus II or MATH 2505: Introductory Analysis
- MATH 2040.03: Matrix Theory and Linear Algebra II or MATH 2135.03: Linear Algebra
- STAT 2060.03: Introduction to Probability and Statistics
- STAT 2080.03: Statistical Methods for Data Analysis and Inference²
- STAT 2450.03 Introduction to Data Mining with R
- CSCI 2202.03: Computer modelling for scientists
- At least two additional statistics³ courses at or above the 2000 level (6 credit hours)

3000 level

- STAT 3340.03: Regression and Analysis of Variance
- STAT 3360.03: Probability
- STAT 3460.03: Intermediate Statistical Theory
- At least two mathematics⁴ courses at the 3000 level (6 credit hours)
- Two of STAT 3350.03: Design of Experiments, STAT 3380.03: Sample Survey Methods, STAT 3450.03: Statistical Learning with R, STAT 3740.03: Predictive Analytics

4000 level

- STAT 4066.03: Advanced Statistical Theory I
- One of STAT 4130.03: Bayesian Data Analysis, STAT 4350.03: Applied Multivariate Analysis, STAT 4390.03: Time Series Analysis, STAT 4620.03: Data Analysis, STAT 4690.03: Computational Statistics.
- STAT 4950.03: Honours Research Project

¹The requirement to take STAT 1060.03: Introductory Statistics for Science and Health Sciences may be waived for students entering the program in their second year.

²Some students may take STAT 2080.03 in the first year of their degree program.

³Statistics courses are any courses listed or cross-listed as STAT (with the exception of STAT 3069)

⁴3000 level mathematics courses can be chosen from the following list, and count toward the required credit hours in statistics:

- MATH 3045: Curves and Surfaces
- MATH 3080: Introduction to Complex Variables
- MATH 3120: Differential Equations
- MATH 3140: Introduction to Wavelets
- MATH 3210: Introduction to Numerical Analysis
- MATH 3260: Applied Differential Equations
- MATH 3300: Optimization
- MATH 3330: Applied Graph Theory
- MATH 3400: Classical Game Theory
- MATH 3500X/Y.06: Intermediate Analysis
- MATH 3501: Intermediate Analysis I
- MATH 3502: Intermediate Analysis II
- MATH 3900: Financial Mathematics

BSc or BA (120 credit hour) Combined Honours in Statistics and another subject

Students who wish to study Statistics in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Statistics may be the primary subject (defined as the subject with the larger number of credits at the second year or above), or the secondary subject.

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. Students must have their program of study approved by Academic Advisors in both subject areas. Students must complete a research thesis and an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Statistics, this requirement is satisfied through STAT 4950.03.

Departmental requirements

Students in a BSc or BA Combined Honours program in Statistics and another subject must fulfill the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections.

- Courses must include:
- Math 1030.03: Matrix Theory and Linear Algebra I
- MATH 2001.03: Intermediate Calculus I
- STAT 2060.03: Introduction to Probability and Statistics
- STAT 2080.03: Statistical Methods for Data Analysis and Inference
- STAT 2450.03: Introduction to Data Mining with R
- STAT 3340.03: Regression and Analysis of Variance
- STAT 3360.03: Probability
- STAT 3460.03: Intermediate Statistical Theory
- At least one STAT course at the 4000 level (3 credit hours)

If Statistics is the primary subject, students will also complete

- One Statistics³ course at or above the 2000 level (3 credit hours)
- One Mathematics⁴ course at the 3000 level (3 credit hours)
- STAT4950.03 : Honours Research Project

If Statistics is the secondary subject, students will also complete

- One Statistics³ course at or above the 3000 level (3 credit hours)
- One Statistics³ or Mathematics⁴ course at or above the 3000 level (3 credit hours)

³Statistics courses are any courses listed or cross-listed as STAT. (with the exception of STAT 3069) The following can also be counted towards statistics credit hours:

- MATH 2002.03: Intermediate Calculus II
- MATH 2040.03: Matrix Theory and Linear Algebra II or Math 2135.03 Linear Algebra

⁴3000 level mathematics courses can be chosen from the following list, and count toward the required credit hours in statistics:

- MATH 3045: Curves and Surfaces
- MATH 3080: Introduction to Complex Variables
- MATH 3120: Differential Equations
- MATH 3140: Introduction to Wavelets
- MATH 3210: Introduction to Numerical Analysis
- MATH 3260: Applied Differential Equations
- MATH 3300: Optimization
- MATH 3330: Applied Graph Theory
- MATH 3400: Classical Game Theory
- MATH 3500X/Y.06: Intermediate Analysis
- MATH 3501: Intermediate Analysis I
- MATH 3502: Intermediate Analysis II
- MATH 3900: Financial Mathematics

BSc or BA (120 credit hour) Major in Statistics

The 120 credit hour Major is suited to students who want to focus on Statistics, but wish to have a program that is somewhat less constrained than the Honours program.

Departmental requirements

In addition to fulfilling the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections, students in a BSc or BA Major program in Statistics must complete the following courses:

1000 level

- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II or MATH 1215.03: Life Sciences Calculus/MATH 1010.03: Differential and Integral Calculus II
- STAT 1060.03: Introductory Statistics for Science and Health Sciences¹
- Math 1030.03: Matrix Theory and Linear Algebra I

2000 level

- MATH 2001.03: Intermediate Calculus I
- MATH 2002.03: Intermediate Calculus II or MATH 2505: Introductory Analysis or STAT 2450: Data Visualization
- MATH 2040.03: Matrix Theory and Linear Algebra II or MATH 2135.03: Linear Algebra
- CSCI 2202.03: Computer modelling for scientists
- STAT 2060.03: Introduction to Probability and Statistics
- STAT 2080.03: Statistical Methods for Data Analysis and Inference²
- [STAT 2450](#).03: Introduction to Data Mining with R

3000 level

- STAT 3340.03: Regression and Analysis of Variance
- STAT 3360.03: Probability
- STAT 3460.03: Intermediate Statistical Theory
- One Statistics course (3 credit hours) at or above the 3000 level.
- One Statistics course (3 credit hours) at the 4000 level
- One of STAT 3350: Design of Experiments, STAT 3380: Sample Survey Methods, STAT 3450: Statistical Learning with R, STAT 3740: Predictive Analytics

¹The requirement to take STAT 1060.03: Introductory Statistics for Science and Health Sciences may be waived for students entering the program in their second year.

²Some students may take STAT 2080.03 in the first year of their degree program.

³Statistics courses are any courses listed or cross-listed as STAT (with the exception of STAT 3069)

BSc or BA (120 credit hour) Double Major in Statistics and another subject

The Double Major degree program allows students to combine a study of Statistics with another subject. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Statistics may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

It is recommended that students enrolled in a Double Major program consult with advisors in both subject areas.

Departmental requirements

Students in a BSc or BA Double Major in Statistics and another subject must fulfill the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections.

- Courses must include:
- Math 1030.03: Matrix Theory and Linear Algebra I
- MATH 2001.03: Intermediate Calculus I
- STAT 2060.03: Introduction to Probability and Statistics
- STAT 2080.03: Statistical Methods for Data Analysis and Inference
- STAT 2450.03 Introduction to Data Mining with R

- STAT 3340.03: Regression and Analysis of Variance
- STAT 3360.03: Probability
- STAT 3460.03: Intermediate Statistical Theory
- One Statistics³ course at or above the 3000 level (3 credit hours)
- Two Statistics³ or Mathematics⁴ course at or above the 3000 level (6 credit hours).

³Statistics courses are any courses listed or cross-listed as STAT (with the exception of STAT 3069)

⁴3000 level mathematics courses can be chosen from the following list, and count toward the required credit hours in statistics:

- MATH 3045: Curves and Surfaces
- MATH 3080: Introduction to Complex Variables
- MATH 3120: Differential Equations
- MATH 3140: Introduction to Wavelets
- MATH 3210: Introduction to Numerical Analysis
- MATH 3260: Applied Differential Equations
- MATH 3300: Optimization
- MATH 3330: Applied Graph Theory
- MATH 3400: Classical Game Theory
- MATH 3500X/Y.06: Intermediate Analysis
- MATH 3501: Intermediate Analysis I
- MATH 3502: Intermediate Analysis II
- MATH 3900: Financial Mathematics

BSc or BA (90 credit hour) Minor in Statistics

The 90 credit hour Minor in Statistics is appropriate for students who want to study some Statistics but do not wish to complete the conventional four-year program. The degree is best suited for students who want a general science degree with some specialization in Statistics. A 90 credit hour degree program is not suitable for students who wish to pursue graduate studies. With additional study, the degree may be upgraded to a 120 credit hour Major or Honours degree at a later date.

A 90 credit hour BSc or BA in Statistics is usually the preferred option for students who wish to combine studies in Statistics with a degree in Engineering (see [BSc/BEng or BA/BEng Concurrent Program](#)).

See the [Minor in Statistics](#) section of this Calendar.

Minor in Statistics

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A BSc or BA (90 credit hour) degree program with a minor in Statistics is also available.

Requirements

A minimum of 18 to a maximum of 36 credit hours in Statistics, which must include:

- MATH 1030.03: Matrix Theory and Linear Algebra
- STAT 2060.03: Introduction to Probability and Statistics
- STAT 2080.03: Statistical Methods for Data Analysis and Inference
- STAT 2450.03: Introduction to Data Mining with R
- STAT 3340.03: Regression and Analysis of Variance
- At least one additional statistics¹ course at the 2000 level or above (3 credit hours)
- At least one additional statistics course at the 3000 level or above (3 credit hours)

¹Statistics courses are any courses listed or cross-listed as STAT, (including STAT 3069). The following can also be counted as 2000 level statistics credit hours:

- MATH 2001.03: Intermediate Calculus
- MATH 2002.03: Intermediate Calculus II

- MATH 2040.03: Matrix Theory and Linear Algebra II or Math 2135.03 Linear Algebra
- BIOL 4062.03: Analysis of Biological Data

Contact [Statistics](#) for more information.

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Minors available to students in Statistics

Minor programs allow students to develop subject specialties in addition to their Major or Honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs.

Students in a BSc or BA (120 credit hour) program in Statistics may choose to include a Minor selected from the [list of approved Minors](#). Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc or BA in Statistics, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of [Faculty of Science Certificates](#) and requirements can be found at the beginning of the [Faculty of Science](#) section. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the [College of Arts and Science Degree Requirements](#) section.

Certificates of particular interest to student enrolled in a BSc or BA in Statistics include:

- [Certificate in Actuarial and Financial Mathematics](#)
- [Certificate in Applied and Computational Mathematics](#)
- [Certificate in Data Analytics](#)

BSc/BEng or BA/BEng Concurrent Program

Students interested in combining their interest in Program with a degree in Engineering may choose a BSc/BEng or BA/BEng Concurrent Program, normally completed in a 5 year period. Over the first three years, students complete the requirements for a 90 credit hour BSc or BA degree in Statistics and a Diploma of Engineering (the first two years of engineering studies). Two more years of engineering studies are then required to obtain a BEng. Interested students should see an undergraduate advisor from Statistics and from the Faculty of Engineering in their first year of study.

Required Statistics courses for a BSc/BEng or BA/BEng program in Statistics

- A minimum of 18 credit hours in Statistics courses at the 2000 level or higher, which must include STAT 2060.03, STAT 2080.03, STAT 3340.03 and at least one other STAT course⁴ at or above the 3000 level

⁴Statistics courses are any courses listed or cross-listed as STAT. The following can also be counted towards statistics credit hours:

- MATH 2001.03
- MATH 2002.03
- MATH 2030.03
- MATH 2040.03 or Math 2135.03

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current [timetable](#) for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions

Course Notes

Certain courses have been approved for use in fulfilling the educational requirements of the Associate Statistician (A.Stat.) designation of the Statistical Society of Canada (SSC). See the Department or the SSC website (<http://ssc.ca/en/accreditation/apply/suggested-courses-use-towards-astat-designation>) for details.

Credit may not be obtained twice for the same course even if the numbers have been changed.

Statistics

STAT 1060 Introductory Statistics for Science and Health Sciences

CREDIT HOURS: 3

This course gives an introduction to the basic concepts of statistics through extensive use of examples. The topics include experimental design, descriptive statistics, simple linear regression and the basics of statistical inference. Students will learn to use the statistical package MINITAB. NOTE: Students who have already taken university level Calculus should consider taking STAT 2060.03 instead of STAT 1060.03.

CALENDAR NOTES: Students will not receive credit for taking STAT 1060.03 after receiving credit for STAT 2060.03.

PREREQUISITES: Academic or advanced Grade 12 Mathematics (or pre-calculus) or equivalent

CROSSLISTED: MATH 1060.03

EXCLUSIONS: COMM 2501.03, MGMT 1501.03, DISP, STAA 2000.03

FORMATS: Lecture | Tutorial

STAT 2060 Introduction to Probability and Statistics

CREDIT HOURS: 3

Rigorous introduction to probability and statistical theory. Topics covered include elementary probability, random variables, distributions, estimation and hypothesis testing. Estimation and testing are introduced using maximum likelihood and the generalized likelihood ratio. Natural sequels for this course are STAT 2080.03 and 3360.03

PREREQUISITES: MATH 1000.03 or MATH 1215.03 or CSCI 1300 with a minimum grade of C

CROSSLISTED: MATH 2060.03

EXCLUSIONS: ENGM 2032.03, ECON 2260.03

FORMATS: Lecture

STAT 2080 Statistical Methods for Data Analysis and Inference

CREDIT HOURS: 3

The usual sequel to STAT 1060.03 or STAT 2060.03. This course introduces a number of techniques for data analysis and inference commonly used in the experimental sciences. Topics covered include two-sample inference one-way and two-way analysis of variance, correlation, linear regression, and the analysis of categorical and count data. A natural sequel for this course is STAT 3340.03.

PREREQUISITES: STAT 1060.03 or STAT 2060.03 or DISP

CROSSLISTED: MATH 2080.03

EXCLUSIONS: COMM 2502.03, MGMT 2502.03, ECON 2280.03

FORMATS: Lecture

STAT 2300 Introduction to Mathematical Modelling I

CREDIT HOURS: 3

See course description for MATH 2300.03 in the Mathematics section of this calendar.

STAT 2430 Data Visualization

CREDIT HOURS: 3

Data visualization is the art and science of turning data into readable graphics. We will explore how to design and create data visualizations based on data available and tasks to be achieved. This course aims to introduce students to data visualization, including both the principles and techniques. Students will learn the value of visualization, specific techniques and understand the best visualization method.

PREREQUISITES: At least one MATH or STAT course at or above the 1000 level

FORMATS: Lecture

STAT 2450 Introduction to Data Mining with R

CREDIT HOURS: 3

This course provided as introduction to data mining and R programming, suited for science students. Data mining methods include a vast set of tools developed in different areas for identifying the patterns in data. Students will learn programming methods for manipulating and exploring data through learning the basic ideas of some clustering, regression and classification methods. No prior programming knowledge is assumed.

PREREQUISITES: MATH 1000.03 or MATH 1215.03 or CSCI 1300.03 and either (STAT 1060.03 or MATH 1060.03) or (STAT 2060.03 or MATH 2060.03)

FORMATS: Lecture

STAT 2600 Theory of Interest

CREDIT HOURS: 3

See course description for MATH 2600.03 in the Mathematics section of this calendar.

STAT 3069 Statistical Rethinking: Applied Bayesian Statistics

CREDIT HOURS: 3

This course, which uses Richard McElreath's popular 'Statistical Rethinking' book as a foundation, provides a broad introduction to applied Bayesian models using R or Python. Examples are drawn from Biology and Social Science, in contexts designed to be widely applicable to analysis of observational data across disciplines.

CALENDAR NOTES: Course aimed at non-stats majors seeking to do applied statistical work, primarily in Biology but including other disciplines; Students majoring in statistics (including Honours, Majors, Combined Honours and Double Major programs) cannot receive STAT course credit for this course. Students Minorng in Statistics can count this as a 3000 level STAT course credit.

PREREQUISITES: STAT 2060.03 OR STAT 2080.03 AND One of: STAT 2450.03, CSCI 2202.03, BIOL 3872.03, MARI 4600.03

CROSSLISTED: BIOL 4069.03

FORMATS: Lecture

STAT 3340 Regression and Analysis of Variance

CREDIT HOURS: 3

A thorough treatment of the theory and practice of regression analysis. Topics include: fitting general linear models using matrices, optimality of least squares estimators (Gauss-Markov theorem), inferences, simple and partial correlation, analysis of residuals, case-deletion diagnostics, polynomial regression, transformations, use of indicator variables for analysis of variance and covariance problems, model selection, and an introduction to nonlinear least squares.

This course makes extensive use of computer packages.

COREQUISITES: Stat 2450.03 (if not taken as a prerequisite)

PREREQUISITES: Math 1030.03 AND STAT 2060.03 or MATH 2060.03 AND STAT 2080.03 or MATH 2080.03 or ECON 2280.03 or 3338.03, AND STAT 2450.03

CROSSLISTED: MATH 3340.03

FORMATS: Lecture

STAT 3345 Environmental Risk Assessment

CREDIT HOURS: 3

Statistical methods for assessing risk are discussed, including dose-response models, survival analysis, relative risk analysis, bioassay, estimating methods for zero risk trend analysis and association risks. Case studies are used to illustrate the methods.

PREREQUISITES: MATH 1000.03 or MATH 1215.03, STAT 2080.03 or equivalent

STAT 3360 Probability

CREDIT HOURS: 3

The concepts and application of probability. Topics include the classical discrete and continuous distributions, including the binomial, hypergeometric, multinomial, Poisson, uniform, exponential and normal; definitions and properties of random variables; independence; sums of independent random variables, including the law of large numbers and central limit theorem; conditional probability; and the bivariate normal distribution. Examples will be taken from the natural and physical sciences.

PREREQUISITES: STAT 2060.03 and MATH 2001.03

CROSSLISTED: MATH 3360.03
FORMATS: Lecture

STAT 3380 Sample Survey Methods

CREDIT HOURS: 3

The development of design and analysis techniques for sample surveys. Topics include simple, stratified and systematic random sampling, ratio and regression estimation, sub-sampling with units of equal and unequal size, double-multistage and multiphase sampling, non-sample errors and non-respondents.

PREREQUISITES: STAT 2060.03

CROSSLISTED: MATH 3380.03

FORMATS: Lecture

STAT 3450 Statistical learning with R

CREDIT HOURS: 3

This course teaches students how to use the R software environment to analyze data of various types. Students will be given the opportunity to write their own programs to explore data and solve meaningful problems. Emphasis will be given to a good understanding of supervised/unsupervised learning models, their founding principles, and to data processing and interpretation.

PREREQUISITES: STAT 2450

FORMATS: Lecture

STAT 3460 Intermediate Statistical Theory

CREDIT HOURS: 3

This course provides an intermediate level coverage of statistical theory to provide a framework for valid inferences from sample data. The methods developed are based on the likelihood function and are discussed from the frequentist, likelihood, and Bayesian approaches. The problems of point estimation, interval estimation and hypothesis testing and the related topics of sampling distributions, sufficiency, and Fisher Information are discussed.

PREREQUISITES: STAT 3360.03

CROSSLISTED: MATH 3460.03

FORMATS: Lecture

STAT 3703 Actuarial Models I

CREDIT HOURS: 3

This class builds on the material in STAT 3360 to develop the theoretical basis for construction and evaluation of actuarial models. Topics covered include survival models, probability distributions, deductibles and limits, and aggregate loss models, with application to insurance. This course covers the part of the syllabus for the professional actuarial examination concerned with the Construction and Evaluation of Actuarial Models.

PREREQUISITES: STAT 3360.03 OR MATH 3360.03

CROSSLISTED: ACSC 3703.03

EXCLUSIONS: STAT 4701.03

FORMATS: Lecture

STAT 3720 Life Contingencies I

CREDIT HOURS: 3

This course introduces the student to the mathematical models for valuation of life contingencies (e.g. life insurance policies). The course covers both the statistical aspects of modelling survival data, and the financial aspects of valuing uncertain future cash-flows.

PREREQUISITES: STAT 3360.03, STAT 2600.03

CROSSLISTED: ACSC 3720.03

FORMATS: Lecture

STAT 3740 Predictive Analytics

CREDIT HOURS: 3

This course teaches students to analyse data in a real-world context, going through all stages of the data analysis: problem formulation; initial data exploration; model selection and validation; and communication of results. It is intended that this course should prepare students for the Society of Actuaries Predictive Analytics examination.

PREREQUISITES: STAT 2450, STAT 3340

CROSSLISTED: ACSC 3740

FORMATS: Lecture

STAT 3750 Credibility Theory

CREDIT HOURS: 3

Credibility theory deals with the difficulty in combining information from two samples, one of which is small but very relevant, the other is large but less relevant. In this course, we will study different approaches to dealing with this problem.

COREQUISITES: ACSC 3703.03

PREREQUISITES: STAT 3360.03

CROSSLISTED: ACSC 3750.03

STAT 4001 AARMS Summer School I

CREDIT HOURS: 3

A Topics class given by leading researchers in the precise field, which varies from year to year. Consult the Department for current details.

PREREQUISITES: Permission of the Honours Advisor

CROSSLISTED: MATH 4001.03

STAT 4002 AARMS Summer School II

CREDIT HOURS: 3

A Topics class given by leading researchers in the precise field, which varies from year to year. Consult the Department for current details.

PREREQUISITES: Permission of the Honours Advisor

CROSSLISTED: MATH 4002.03

STAT 4066 Advanced Statistical Theory I

CREDIT HOURS: 3

This course, together with STAT 5067.03 provides a solid basis in the theory of statistical inference. After a review of some probability and distribution theory, the Bayesian and classical theories of estimation and testing are introduced.

PREREQUISITES: STAT 3460.03 or instructor's consent

CROSSLISTED: MATH 4066.03/

EXCLUSIONS: MATH5066.03, STAT 5066.03

FORMATS: Lecture

STAT 4100 Survival Analysis

CREDIT HOURS: 3

This course is an introduction to survival analysis methods and will cover both the statistical theory behind the methods, and the application of various techniques. Topics to be discussed include survivorship and hazard functions and their relationship to lifetime distributions and densities; modes of censoring; the Kaplan-Meier estimate of the survivor function; parametric survival time distributions; proportional hazard models and their semi-parametric estimation; accelerated life models, log rank tests, including the Mantel-Haenszel test; and goodness of fit measures.

PREREQUISITES: STAT 3340.03 and STAT 3460.03, or equivalent

CROSSLISTED: STAT 5100.03

FORMATS: Lecture

STAT 4130 Bayesian Data Analysis

CREDIT HOURS: 3

This course introduces the student to the Bayesian methods in applied statistics. The course covers all the fundamental concepts of Bayesian methods, and works from the simplest ideas (characterizations of probability; comparative inference; prior, posterior and predictive distributions) up through hierarchical models applied to various data. Computational methods include MCMC for posterior simulation.

PREREQUISITES: MATH 2030.03 or Math 1030.03, and STAT 3460.03

EXCLUSIONS: STAT 5130.03

FORMATS: Lecture

STAT 4300 Topics in Statistics and Probability

CREDIT HOURS: 3

CROSSLISTED: STAT 5300.03

STAT 4350 Applied Multivariate Analysis

CREDIT HOURS: 3

The course deals with the stochastic behaviour of several variables in systems where their interdependence is the object of analysis. Greater emphasis is placed on practical application than on mathematical refinement. Topics include classification, cluster analysis, categorized data, analysis of interdependence, structural simplification by transformation or modelling and hypothesis construction and testing.

PREREQUISITES: STAT 3340.03 and MATH 2135.03 or 2040.03

EXCLUSIONS: STAT 5350.03

FORMATS: Lecture

STAT 4360 Robust Statistics

CREDIT HOURS: 3

Robust statistics are those which provide protection against violation of assumptions underlying the statistical procedure. We will develop basic concepts including sensitivity, influence and breakdown of estimates and tests. Classical procedures will be evaluated in terms of robustness and alternate techniques developed based on weighted least squares and/or median based generalizations. We will also consider robust techniques in time series.

PREREQUISITES: STAT 3340.03 and STAT 3460.03

CROSSLISTED: STAT 5360.03

STAT 4370 Stochastic Processes

CREDIT HOURS: 3

The theory and application of stochastic processes. Topics to be discussed include the Poisson process, renewal theory, discrete and continuous time Markov processes, and Brownian motion. Applications will be taken from the biological and physical sciences, and queueing theory.

PREREQUISITES: STAT 3360.03 or instructor's consent

CROSSLISTED: STAT 5370.03

FORMATS: Lecture

STAT 4390 Time Series Analysis

CREDIT HOURS: 3

Time series analysis in both the time and frequency domain is introduced. The course is applied and students are required to develop their own computer programs in the analysis of real time series with an emphasis on oceanographic data. Topics to be discussed include the nature of time series, stationarity, auto and cross covariance, ARMA models, spectral analysis, and state space models (the Kalman filter and the particle filter).

PREREQUISITES: STAT 3340.03, 3360.03, STAT 3460.03, or instructor's consent

CROSSLISTED: OCEA 4210.03

EXCLUSIONS: OCEA 5210.03, STAT 5390.03

FORMATS: Lecture

STAT 4570 Statistical Genetics

CREDIT HOURS: 3

Statistical aspects of several ideas in genetics are discussed. Topics of some or all the following: gene frequency estimation, Hardy-Weinberg equilibrium, linkage analysis, association studies, quantitative traits, microarrays.

PREREQUISITES: STAT 3460 or permission of instructor

CROSSLISTED: STAT 5570

FORMATS: Lecture

STAT 4620 Data Analysis

CREDIT HOURS: 3

A variety of statistical models which are useful for the analysis of real data are discussed. Topics include: generalized linear models, such as logistic regression and Poisson regression, models for multidimensional contingency tables, ordered categories and survival data.

PREREQUISITES: STAT 3340.03, 3460.03, or instructor's consent

CROSSLISTED: STAT 5620.03

FORMATS: Lecture

STAT 4690 Computational Statistics

CREDIT HOURS: 3

The advances in computing over the past decades have opened up possibilities for statistical analyses that were not previously possible. However, increasing model complexity can exceed even today's huge computational resources. This course covers techniques for handling computationally intensive tasks arising from statistical analysis of data.

PREREQUISITES: STAT 2450.03, STAT 3460.03

EXCLUSIONS: STAT 5690.03

FORMATS: Lecture

STAT 4701 Actuarial Models I

CREDIT HOURS: 3

This course develops the theoretical basis of a number of probabilistic models useful for the study of life contingencies, including survival models, Markov chains, Poisson processes, with application to life insurances and annuities.

PREREQUISITES: STAT 3360.03

FORMATS: Lecture

STAT 4703 Actuarial Models II

CREDIT HOURS: 3

This course focuses on the development of statistical methods for the estimation and validation of actuarial models. Topics to be discussed include: methods of estimation, properties of estimators, goodness of fit, credibility theory, survival estimators, measures of risk, estimation of severity and ruin models.

PREREQUISITES: STAT 3703 or ACSC3703

CROSSLISTED: ACSC 4703.03

FORMATS: Lecture

STAT 4720 Life Contingencies II

CREDIT HOURS: 3

STAT 3720.03 covers the basics of life contingencies in a simple standard situation. In this course we extend this to deal with a number of common additional features that affect life insurance policies. We introduce multiple-state models, pensions, interest rate risk and profit testing.

PREREQUISITES: STAT 3720.03

CROSSLISTED: ACSC 4720.03

FORMATS: Lecture

STAT 4950 Honours Research Project

CREDIT HOURS: 3

This course is required for students in the honours program. It will consist of a research project carried out under the supervision of a faculty member. The results of the research will be submitted to the statistics honours advisor as a written report. Students wishing to enroll in this course must have a suitable background in statistics, and must meet with, and obtain the approval of, the statistics honours co-ordinator before undertaking their project.

STAT 8892 Co-op Work-Term II

CREDIT HOURS: 0

STAT 8893 Co-op Work-Term III

Centres and Institutes

Introduction

A number of centres and institutes for study and research in specific fields are based at the University. These are:

Atlantic Institute of Criminology

Director: D.H. Clairmont, BA, MA, PhD

The Atlantic Institute of Criminology (AIC) is a research institute that is heavily policy-oriented in the field of crime and the criminal justice system. Its mandate is to foster the exchange of information among researchers and policy makers in those areas. Consultative services are provided to fellow scholars and researchers, including graduate students and visiting professors, with respect to the planning and execution of research projects and related undertakings. The AIC is an entity that itself conducts extensive research in criminology, especially with respect to policing, the administration of justice, youth justice issues, race, ethnic and equity issues in justice. It has produced a significant body of policy-oriented research on Aboriginal and African-Canadian justice issues. The AIC Dalhousie website (Dalhousie - SOSA-AIC), which is regularly updated, provides a clear indication of the research products of recent years even though the website is largely restricted to research output that does not include articles in professional journals or edited books available elsewhere.

Atlantic Research Centre (ARC)

Director: Neale Ridgway

Phone: (902) 494-7133

Website: <http://arc.medicine.dal.ca/>

Established in 1967, the ARC conducts basic biomedical research in the fields of lipid metabolism and cell signalling, areas of fundamental importance to a variety of disorders including cancer, neurological, heart and infectious diseases. It also provides education and expertise in these fields to undergraduate and graduate students, other researchers, and the general public. The ARC houses state-of-the-art facilities for biochemical and molecular biological research. The Centre's staff hold appointments in the Departments of Pediatrics and Biochemistry and Molecular Biology in the Faculty of Medicine. Research at the ARC is supported by agencies such as the CIHR, NSERC, CFI, Heart and Stroke Foundation, National Cancer Institute, Atlantic Innovation Fund, and the IWK Health Centre.

Beatrice Hunter Cancer Research Institute

Director: Dr. Gerry Johnston

Administrative Director: Cindy Pettipas

Telephone: 902 494-4513

Fax: 902 494-8472

Email: cpettipas@dal.ca

Website: www.bhcrci.ca

In 1999, Beatrice Hunter bequeathed \$12.5 million to the Dalhousie Medical Research Foundation for cancer research, in memory of her parents, Dr. Owen and Mrs. Pearle Cameron. The bequest was placed in the Cameron Endowment Fund, with the annual earnings supporting cancer research at Dalhousie Faculty of Medicine. Early on, Beatrice Hunter's generosity sparked the creation of the Dalhousie Cancer Research Program (DCRP) that united key players within charitable, University and government sectors to create and support a thriving cancer research community. Over a short period of time, talented researchers and trainees were recruited to the region and collectively now secure millions of dollars of cancer research funding from outside granting agencies.

In 2009, the DCRP and its funding partners took the next bold step to become the Beatrice Hunter Cancer Research Institute (BHCRI), which was created to foster a more powerful, productive and collaborative cancer research environment throughout Atlantic Canada. The Institute provides regular workshops, lectures and symposia that serve as a common forum for researchers to share ideas and forge new collaborations within Atlantic Canada and beyond. The Institute also provides a key entry point for members of the public who want to learn more about cancer research in the region. The Institute represents the major resource within our region for those seeking training and careers in cancer research as well as those interested in supporting cancer research. The BHCRI has over 300 active members (both principal investigators and trainees at all career stages) throughout Atlantic Canada. BHCRI is supported by advisory committees populated by cancer experts and informed members of the public that provide advice on all aspects of cancer research and training. BHCRI receives financial support from a broad range of local and national organizations and the Institute takes responsibility for allocation of financial resources that support all aspects of cancer research and training, with funds allocated through peer-review processes that meet international standards.

Researchers within the Beatrice Hunter Cancer Research Institute share a collective vision and work toward the same goal: to save lives and ease the burden of cancer on individuals, families and society. Even though our funding comes from many sources, all of this funding stays in Atlantic Canada to build and support cancer research within our own region.

The Beatrice Hunter Cancer Research Institute was approved as an institution by Dalhousie on November 29, 2017.

Brain Repair Centre

Chair: Dr. Victor Rafuse, Director
Website: <http://www.brainrepair.ca/>

The Brain Repair Centre (BRC) is a collaboration of Dalhousie University, the Capital District Health Authority and the IWK Health Centre. The BRC is a multi-disciplinary unit focusing on research that can lead to the diagnosis, treatment, and repair of the brain to overcome the effects of neurological and psychiatric disorders such as Parkinson's disease, Huntington's disease, Amyotrophic Lateral Sclerosis (ALS), Epilepsy, Muscular Sclerosis (MS), stroke and spinal cord injury. The BRC grew out of the clinical Neural Transplantation Program, collaboration between basic neuroscientists and clinicians interested in treating Parkinson's disease. The success of the Neural Transplantation Program led clinical and basic neuroscientists to decide to form the Brain Repair Centre. The BRC was formed in 1999 and has focused on stem cell transplantation, Parkinson's disease, spinal cord injury, psychotic disorders, stroke and neuroimaging as areas of innovation at Dalhousie University, Capital Health and the IWK Health Centre.

Examples of BRC achievements include:

- Attracted capital funding from private donors, institutions and the public sector to support construction and fit-up of the new Life Sciences Research Institute. When the LSRI is completed, the Brain Repair Centre will become the anchor tenant of this new research and commercialization building with state-of-the-art research, equipment and facilities.
- Establishment of collaboration agreements with research teams at McLean Hospital/Harvard University; Jilin University, China; Cardiff University, Wales; and Neurodyn, Inc.
- Establishment of a \$12 million magnetic resonance imaging facility with the national Research council's Institute for Biodiagnostics (NRC-IBD).
- In 2006, the BRC was awarded \$5.5 million for infrastructure from the Canadian Foundation for Innovation, the largest such award to date in Atlantic Canada. Also in 2006, BRC received a \$3 million Atlantic Innovation Fund award for research, a follow-on to an earlier \$3 million research award.
- Dr. David Clarke, a member of the Brain Repair Centre used a virtual model of a patient's brain to remove a simulated brain tumour before removing the actual tumour the following morning. Developed by a partnership of the National Research Council and a team of about 50 people in 10 Centres across Canada, this was the first such surgery performed in the world.
- Medtronic Canada, Capital District Health Authority, QEII Foundation, and the Brain Repair Centre established a Canadian Centre of Excellence and Training at the Halifax Infirmary. This new \$3.5 million centre provides important new clinical facilities for training and development in imaging, spinal cord and neuromodulation.
- In the neurotransplantation field, the BRC is unique in Canada and one of only four centres worldwide involved in clinical application of neural transplantation, with the "Halifax Protocol" accepted as the world gold standard.
- The BRC is an innovative collaboration that integrates its research expertise with pioneers in the fields of imaging, neurology, stem cell neurobiology, vision, molecular neurobiology, pharmacology, psychiatry, clinical trials and cognitive neuroscience.
- The BRC brings together the expanding fields of neuroimaging and stem cell technologies with application to the treatment of neurological and psychiatric disorders.
- The BRC is the Atlantic Canada presence in the Stem Cell Network, a National Centre of Excellence in stem cell research.

The BRC places emphasis on moving basic science research from the bench to the clinical bedside and from the bedside back to the bench. A key objective of the BRC is to produce innovative technologies that will be commercialized.

Canadian Center for Vaccinology

Director: Scott Halperin, MD
Associate Directors: Robert Anderson, MD
Joanne Langley, MD
Janice Graham, PhD

Website: www.centerforvaccinology.ca

Email: ccfv@iwk.nshealth.ca

Facebook: CCfVhfx
Twitter: @VACCres
Phone: 902 470-8141
Fax: 902 470-7232

Vision

CCfV is an integrated collaborative multidisciplinary vaccine research team committed to excellent research. CCfV unites the biomedical and clinical sciences with the social sciences and humanities to effectively span the research continuum from basic discovery to translation into useful vaccines to prevent disease in humans and to change population and public health outcomes.

Organization

Activity within CCfV is organized into three groups

- Vaccine Discovery Group
- Vaccine Evaluation Group
- Health Policy & Translation Group

An **Advisory Committee** of CCfV investigators and external advisors provides counsel on the strategic direction and objectives of CCfV research.

Members

Anyone with an interest in vaccine-related research may apply for membership at <http://www.centerforvaccinology.ca/about-ccfv/join-us/>

For a list of current members go to <http://www.centerforvaccinology.ca/about-ccfv/members/>

CCfV is made possible by a continuing collaboration of Dalhousie University, the IWK Health Centre, and Capital Health. The CCfV's 20,000 square foot facility in the IWK Health Centre includes laboratories for microbiological and molecular research, ambulatory and inpatient clinical trial facilities, data analysis, training and conference space. It was founded in 2007 with financial assistance from the Canada Foundation for Innovation, the Nova Scotia Research and Innovation Trust, and the Government of Nova Scotia's Department of Economic Development, among others. The Clinical Research/Vaccine Challenge Unit, which opened in 2009, was made possible by additional funding from Sanofi Pasteur.

Canadian Institute of Fisheries Technology (CIFT)

Director: A. T. Paulson, PhD

Phone: (902) 494-3280

Fax: (902) 420-0219

Website: <http://cift.engineering.dal.ca>

CIFT was established in 1979 at the former Nova Scotia Technical College (later TUNS). The federal Department of Fisheries and Oceans provided much of its early specialized laboratory and seafood pilot scale processing equipment, and Industry Canada provided start-up funding and designated CIFT a centre of excellence. As a government-approved laboratory for advanced technology, it also provides R&D services on a cost-recovery basis to industry and to various governmental agencies. The Institute promotes technology transfer and the development of advanced technologies aimed at more effective commercial utilization of both marine and terrestrial resources in Canada and throughout the world.

In addition, CIFT offers unique opportunities for post-graduate training and research through the Food Science program. Major areas of emphasis are: food biochemistry and microbiology; fats, oils, nutraceuticals and other bioactives; physical properties of foods; fish/food process engineering; food safety and preservation; food rheology, food fermentation and beverage science.

Facilities

CIFT is located in the MacDonald Building of Sexton Campus at 1360 Barrington Street in downtown Halifax. The Institute's facilities include:

- fats and oils laboratory
- food chemistry laboratory
- food development laboratory
- sensory evaluation laboratory
- food process engineering pilot plant
- low temperature storage facility
- food physical properties laboratory
- food microbiology laboratory

These areas contain specialized instrumentation and food processing equipment to enable experimental processing, laboratory analysis, and product storage evaluation. In addition to a computer- controlled cold-storage facility, the pilot plant is equipped for experimental processing including freezing, chilling, thermal processing, drying, centrifugal separation, and meat-bone separation.

The pilot plant is well equipped for thermal processing with an automated retort capable of steam, steam-air, or water immersion processing research. The specially designed cold-storage facility is computer controlled and particularly useful for the study of changes in foods as a result of frozen storage history. The pilot plant is also equipped with a custom-built computer-controlled heat pump dryer that is used in food dehydration experiments.

Specialized laboratory equipment includes: automated high performance and fast protein liquid chromatography systems, gas chromatography/mass spectroscopy system, preparative ultracentrifuge, multi-purpose refrigerated centrifuge, microtube centrifuge, analytical and preparative electrophoretic/isoelectric focusing equipment, pulsed field electrophoresis system, thermocycler, DNA gel electrophoresis, Hoefer Daltsix for 2D eletrophoresis, Image Master 2D elite software, capillary electrophoresis system, ultra-low temperature freezer, universal texture testing machine, various colorimeters, U.V. and visible spectrophotometer, spectrofluorometer, electrokinetic analyzer, workstation for mathematical modelling and computer simulation, Linkham shearing stage/microscope, Nikon microscope (various attachments), controlled stress rheometer with a high temperature/pressure attachment, controlled rate rheometer, Viscomat, and a rolling ball viscometer.

Educational Opportunities

Graduate (MSc and PhD) programs are available through the Food Science and Technology program. Also post-doctoral research opportunities are offered. Graduate level class work and research opportunities relate to food science, seafood processing technology, marine oils, engineering design, packaging technology, fish post-mortem biochemistry, food microbiology, food rheology and food process science. Students with degrees in food science, engineering, chemistry/biochemistry, microbiology or biology are invited to apply.

Centre for African Studies

Phone: (902) 494-3814/494-1377

Fax: (902) 494-2105

Director: Theresa Ulicki, PhD

The mandate for this Centre is under review.

This centre, established in 1975, advances instruction, publication, research and development education programs in African Studies. Associated faculty offer classes through the Departments History, International Development Studies, Political Science, French, Sociology and Social Anthropology and Philosophy. The Centre organizes academic and informal seminars and public policy conferences on Africa and encourages interdisciplinary interaction at all levels on African subjects and issues. It co-operates with the International Development Studies department and with the International Research and Development office.

Centre for Comparative Genomics and Evolutionary Bioinformatics

Director: Andrew J. Roger, PhD

Coordinator: Wanda Danilchuk

Phone: (902) 494-2620

Fax: (902) 494-1355

Website: <http://www.cgeb.dal.ca>

The Centre for Comparative Genomics and Evolutionary Bioinformatics (CGEB) at Dalhousie University encompasses an interdisciplinary group of researchers in the Faculties of Medicine, Science and Computer Science. Although microbial genome evolution and diversity is at the heart of many of the CGEB researchers' activities, our work spans computational biology, computer science, statistical modeling and comparative genomics, with a strong focus on method and theory. The application of DNA sequencing technologies to characterize the genomes of a wide diversity of microbes has generated vast quantities of genome sequence data. Now the intellectual challenge is to develop from this enormous resource more comprehensive and theoretically robust phylogenetic, genetic and ecological models to further our understanding of the many roles of microbes in the biological world.

CGEB researchers are united by the common goal of using this vast resource of genomic information to elucidate evolutionary patterns and processes: the pathways by which microbial organisms have diversified over the last 3.5 billion years of Earth's history

and through which they continue to shape the global environment. Only through the integration of experimental genomic approaches and sophisticated bioinformatic modeling will we be able to achieve this goal.

CGEB researchers and trainees are supported by grants from the Canadian Institutes for Health Research (CIHR), Natural Sciences and Engineering Research Council (NSERC), and the Nova Scotia Health Research Foundation (NSHRF). The Centre itself is supported by funding from the Tula Foundation (<http://www.tula.ca>), the Faculties of Medicine, Science, and Computer Science, and the Provost and Vice President Academic. CGEB is also supported by a large grant from the Tula Foundation (<http://www.tula.ca>) that provides funds for training top-notch postdoctoral and graduate trainees in the CGEB research specialties. CGEB also has a regular seminar series that brings world renowned scientists to speak at Dalhousie University and interact with faculty members and trainees.

Centre for Environmental and Marine Geology

Contact: Ann Bannon, Administrator

This Centre was originally founded as the Centre for Marine Geology in 1983 to promote interdisciplinary studies of various types of problems in marine Geology, capitalizing on our unique position in Canada with links to related departments such as Oceanography, Physics, Biology, the Bedford Institute of Oceanography and our hosting of the Canadian office of the Ocean Drilling Program. Since 1983 the role of the Centre has changed, reflected in the new name, which better describes the work being done now where marine geology is combined with environmental problems. We have three new faculty that expand our expertise into new chronological techniques and permafrost as well as strengthening our capacity in the petroleum-related environmental geology. Some of the objectives of the Centre are to: 1) continue to expand our participation in a revitalized east coast offshore energy related problems; 2) continue our climate-change work with a variety of approaches both offshore and on land; 3) expand into Arctic regions both with major oceanographic and shore-based programs; and 4) expand our capacity to help solve some of the many environmental geology problems associated with urbanization.

Centre for European Studies

Director: Jerry White (Canada Research Chair in European Studies)

Email: jerry.white@dal.ca

The Centre for European Studies was established in 2007 to promote research on all aspects of European society and its relations with the rest of the world. The Centre facilitates the work of Europeanist scholars at Dalhousie, including the participating Canada Research Chairs in European Studies, enables research collaboration with scholars from Canada and around the world on projects related to Europe and the European Union.

Centre for Innovation in Infrastructure

Director: John Newhook, PhD, PEng

Location: Room B233, Sexton Campus

1360 Barrington Street

PO Box 1000

Halifax, NS B3J 2X4

Phone: (902) 494-2847

Email: forgeron@dal.ca

The Centre for Innovation in Infrastructure is an industry-oriented research centre with the Faculty of Engineering and with strong affiliations with the Department of Civil and Resource Engineering. Established in 1983 as the Nova Scotia CAD/CAM Centre, the Centre originally focussed on assisting Atlantic Canadian industry with the integration of computer added manufacturing and computer aided design technology in their operations. Since the 1990's the Centre has continued to evolve to meet the needs of industry in other areas and to take a more active role in research and development in civil infrastructure.

Today the Centre act as a focal point for research, innovation and technology transfer in Civil Infrastructure related areas. The major funding partnerships are with the Atlantic Canadian departments of transportation, industries related to bridge and structural engineering and with companies developing new materials and products for infrastructure.

Our combined areas of expertise and research interests include:

- Structural Analysis and Design
- Structural Health monitoring

- Bridge engineering and innovations
- Soil-steel structures
- Fibre reinforced polymers
- Fibre reinforced concrete
- NDT of bridge decks and pavements
- Sustainable asphalt technology

The Centre has acquired and maintains significant testing equipment related to these research areas and contributes to the maintenance and operation of the research facilities within the Department of Civil and Resource Engineering.

Centre for Research in Sustainable Supply Chain Analytics (CRSSCA)

Location: 6100 University Avenue, Room 4065

PO Box 15000

Halifax, NS B3H 4R2

Director: Dr. M. Ali Ülkü

Phone: (902) 494-3848

Email: crssca@dal.ca

Fax: (902) 494-1107

Website: www.dal.ca/crssca

The Centre for Research in Sustainable Supply Chain Analytics (CRSSCA), housed in the Faculty of Management, is the supply chain research hub in Eastern Canada. We conduct interdisciplinary research that sheds light on complex issues in supply chain management. Focusing on social, environmental, economic and cultural sustainability, CRSSCA aims to create new knowledge in prescribing solution models for data-driven industrial problems, devise analytical tools for better decision-making, and develop insights into the intricate relationships between supply chain operations, green logistics (global trade, inventory, process and product design, procurement, manufacturing, transportation), and sustainable consumption. CRSSCA supports annual workshops on Supply Chain and Logistics Management (SC&LM), Bachelor of Commerce Major in SC&LM, and involvement of students in research activities.

Centre for Management Research and Innovation (CMRI)

CONTACT INFO: Dominika Wranik, Associate Dean of Research, Faculty of Management

CONTACT EMAIL: cmri@dal.ca

MISSION: To activate, support, accelerate, and promote interdisciplinary management research that meaningfully impacts our knowledge, economy, workplaces, institutions, and communities.

Centre for Marine Vessel Development and Research (CMVDR)

Contact: Josh Leon, Dean of Engineering

The mandate for this Centre is under review.

Centre for the Study of Security and Development

Director: Brian Bow

Established in 1971 the Centre is concerned with teaching, research, publication, policy advice and other professional activities in the various aspects of foreign policy, security studies, development studies, and international politics.

The Centre's work is concentrated in the areas of Canadian and comparative maritime security and oceans policy, Canadian and American foreign and security policies, and global security and international development. Its geographical specializations include Canada, North America, Europe, and the South (especially Africa, Asia, and the Caribbean). The Centre encourages activities in these

areas by Faculty, Research, and Doctoral Fellows, and advances communication among local and international communities in these fields through seminars, workshops conferences and colloquia, often in collaboration with local, national, and/or international organizations. It publishes occasional papers and monographs on Maritime Security, Canadian Defence and Security, and Global Security issues.

The Centre is an integral part of the Department of Political Science. Centre faculty offer classes through the Department in foreign and defence policy, international relations and development, and maritime affairs at both undergraduate (majors and honours) and graduate (MA and PhD) levels. They also supervise masters and doctoral theses in these fields.

For further information, consult the Centre's website: dal.ca/sites/cssd.html.

Centre for Transformative Nursing and Health Research

Director: Dr. Ruth Martin-Misener

Research Coordinator: Julie Barry

Location: School of Nursing, 5869 University Avenue, Halifax NS B3H 4R2

Phone: (902) 494-6125

The Centre for Transformative Nursing and Health Research is a designated Research Centre at Dalhousie University. The vision of the Centre is to undertake collaborative research that develops, enhances, expands and disseminates evidence and knowledge to inform ways to improve and sustain people's health and wellbeing. The mission of the Centre is to generate nursing research and inspire discovery that is methodologically sound, actionable, and dedicated to improving outcomes for those requiring health care, their providers and the overall system. Through strong research partnerships and extensive research capacity building initiatives, the Research Centre will be acknowledged as a key resource for health system planning. This collective strength creates a more research-intensive environment, transforming the culture of health research within and beyond the School so that evidence and the quest for new knowledge are well integrated into teaching and clinical practice. The overall improved scholarly environment ensures graduates engage in original research, advance professional knowledge and are well positioned to be leaders in practice and health system change.

In concert with the School of Nursing's transformation strategy, Academic Plan and Research Strategy and informed by Boyer's Model of Scholarship, the Centre's activities will focus on four research pillars: the health needs of people, health workforce and health systems planning, marginalized populations and health equity, and knowledge translation.

Centre for Water Resources Studies

Director: Graham Gagnon, PhD, PEng

Location: Office D-514

1360 Barrington Street

Phone: (902) 494-3268

Email: cwrs@dal.ca

The Centre for Water Resources Studies was established in December 1981, by a resolution of the Board of Governors (TUNS). The objectives of the Centre are to carry out applied research which contributes to the effective and sustainable protection of water resources in Atlantic Canada, nationally and internationally, and to facilitate the transfer of new knowledge to potential users. Research programs directed by the Centre address the design of cost-effective on-site wastewater systems, soil erosion processes, drinking water treatment, the use of roofwater cisterns for domestic water supply, eutrophication, watershed management and the computer modeling of hydrodynamic and hydrochemical processes. The Centre also has a number of research advisory panels, which involve professionals from industry, government and academia in applied research related to water use and water management.

Facilities

The Centre for Water Resources Studies is located on the fifth floor of "D" Building on Sexton Campus. Laboratory and office space is available for specific graduate research topics, as well as ongoing research carried out by Centre personnel. Analytical equipment includes instrumentation for determining low levels of major ions and nutrients, as well as trace quantities of metal ions in water. The Centre has apparatus for laboratory investigation and pilot scale testing of innovative water treatment methods using Dissolved Air Floatation (DAF) and ozonation and has worked with local consultants and municipalities to develop new applications of the technologies. The Centre is a North American leader in the development of on-site sewage disposal and has had an active research program in this area since 1987. In conjunction with the Faculty of Agriculture, the Centre has a field laboratory investigating sloping sand filters and septic disposal.

Educational Opportunities

The Centre co-operates with academic units in the training of undergraduate and graduate students who have an interest in water resources. The Centre also participates in the program leading to a dual degree in water resources engineering and planning, in conjunction with the School of Planning into the Faculty of Architecture and Planning.

Children and Youth in Challenging Contexts Institute

Director: Dr. Michael Ungar

The Children and Youth in Challenging Contexts (CYCC) Institute is an interdisciplinary research initiative and a network of Canadian and international researchers committed to making a lasting difference in the lives of vulnerable children and youth. CYCC Institute researchers examine the political, social, psychological and biological factors that pose serious risks to children and youth exposed to adversity across contexts and cultures. Through interdisciplinary collaboration and innovation, the Institute promotes change at the program and policy level that will improve the protection and well-being of young people around the world. More than 200 policy makers, mental health practitioners, directors of local and international NGOs, law enforcement officers, Aboriginal child welfare advocates, national defence personnel, and researchers are among the community partners who provide leadership to, and benefit from, the work of the Institute.

Clean Technologies Research Institute

Director: Daniel Boyd, PhD

Administrative Offices: 6414 Coburg Road

PO Box 15000

Halifax, NS B3H 4R2

Phone: (902) 494-6373

Fax: (902) 494-8016

Website: <http://irm.dal.ca>

Established in 2002, Clean Technologies Research Institute is made up of over 90 faculty members in six faculties (Science, Engineering, Dentistry, Medicine, Architecture and Planning and Health). The goals of the Institute include advancing the collective interdisciplinary research efforts in materials science and engineering at Dalhousie University, facilitating interdisciplinary teaching in materials science within the existing discipline structure, and enhancing interactions between materials researchers at Dalhousie University with relevant government laboratories and industry, especially within the region. The Institute leads collaboration within the university on interdisciplinary applications to funding agencies for major equipment and research infrastructure, and collaborates with external organizations to pursue research opportunities.

All Dalhousie University faculty members carrying out research in the area of materials are eligible to be Members of Clean Technologies Research Institute. Postdoctoral fellows and graduate students associated with these research groups are invited to become Associate Members of Clean Technologies Research Institute.

In addition to equipment operated by individual members of the Institute, Clean Technologies Research Institute has established (2003) the Facilities for Materials Characterization, an \$11 million suite of instruments managed by the Institute.

The equipment includes:

- High-field solid-state NMR spectrometer (managed by the Nuclear Magnetic Resonance Research Resource)
- Scanning electron microscope
- Focused ion beam
- X-ray photoelectron spectrometer (XPS)
- Secondary ion mass spectrometer (SIMS)
- Physical property measurement system (PPMS)
- Scanning thermal microscope (SThM)
- Hot press
- Grindo Sonic
- High-speed motion recorder/analyzer
- FT-Raman spectrometer

These facilities are open to external users. Please contact IRM@dal.ca for details.

Dalhousie Institute for Society and Culture (DISC)

Director: Associate Dean, Research in the Faculty of Arts and Social Sciences

Email: discfass@dal.ca

Website: <http://arts.dal.ca/Research>

Established in 2008, the Dalhousie Institute on Society and Culture serves as the virtual home for the many divergent research activities and initiatives within the Faculty of Arts and Social Sciences. Its primary function is to support research within the Faculty through various fellowship programs, publicity and fund raising initiatives, publishing ventures, conferences and lecture series, and cross-disciplinary exchanges.

The Institute encompasses two broad and overlapping research clusters: *Societies in Local, National, and Global Contexts*, and *Cultural Representations and Presentations*. The former cluster aims to develop new knowledge about political, social, and economic transformations, about national and regional identities, and about global relations, whereas the latter seeks to investigate and preserve cultural traditions, literatures, and languages, to foster studies and theories of cultural identity, to stimulate artistic innovation, to examine the shaping influence of beliefs and religions, and to contribute to the cultural life and profile of the province. These two clusters, with a flexibility and breadth unequalled in Eastern Canada, are uniquely equipped to analyze social and cultural change.

Global Health Office

Director: Shawna O'Hearn

Location: C-241, 5849 University Avenue

PO Box 15000

Halifax, NS B3H 4R2

Phone: (902) 494-1965

Fax: (902) 494-2799

Email: gho@dal.ca

Website: <http://dal.ca/globalhealth>

Working through an interprofessional lens, the Global Health Office is committed to training global health leaders who strengthen health systems for vulnerable populations in Canada and abroad. The office prepares students, residents and faculty doing clinical electives, training or research with our international partners as well as leads local and global electives.

- Events focusing on relevant and timely global health issues are organized through the office including global health rounds, speaker series, conferences.
- Opportunities to become involved in research and mentorship.
- A certificate in “Advocates in Global Health”.
- Annual awards are presented to a student, resident and faculty member who demonstrate leadership in global health
- Partnerships with organizations strengthen the global reach including CSHI (Canadian Society for International Health), CCGHR (Canadian Coalition for Global Health Research), National Network on MNCH (Maternal, Newborn and Child Health), ACIC (Atlantic Council for International Cooperation), GHEC (Global Health Education Consortium), and International Centre (Dalhousie)

Health Law Institute

Director: Matthew Herder, Bsc, LLB, LLM.

Location: Dalhousie University

6061 University Avenue

PO Box 15000

Halifax, NS B3H 4R2

Phone: 902 494-6881

Fax: 902 494-6879

Email: hli@dal.ca

Website: <http://www.dal.ca/hli>

An Interdisciplinary Institute of the Faculties of Law, Medicine, Health, and Dentistry, the Institute is committed to the advancement of health law and policy and the improvement of health care practice and health systems through scholarly analysis, professional education, and public service. Its objectives are:

1. To foster strong and innovative health law and policy scholarship by:
 - cultivating interdisciplinary health law and policy research networks
 - engaging in principled analysis of both recognized and emerging areas of health law and policy
 - enabling knowledge transfer
1. To advance health law and policy education by:
 - designing and implementing education programs for law, medicine, health professions and dentistry students
 - providing continuing education opportunities for health professionals and legal practitioners
1. To serve the public in our areas of expertise by:
 - contributing to the societal understanding of health law and policy issues
 - providing expertise and consulting to organizations in the public sector
 - engaging in and supporting the policy-making process at local, regional, provincial, national and international levels.

Healthy Populations Institute

Managing Director: Maureen Summers, MSc

Scientific Director: Lois Jackson, PhD

Project Coordinators,

Other: Research Scholars, Research Assistants, and students

Phone: (902) 494-2240

Fax: (902) 494-3594

Website: www.dal.ca/hpi

The Healthy Populations Institute or HPI (formerly Atlantic Health Promotion Research Centre, AHPRC) is a leading Canadian health promotion research centre based at Dalhousie University. HPI was established in 1993 to conduct interdisciplinary, collaborative population health and prevention research that informs policies and programs to improve the health and well-being of Canadians.

The centre is conducting research on health services and health systems, healthy eating and physical activity, knowledge translation, prevention of chronic illness and disability, oral health of seniors, youth obesity, aboriginal health, and harm reduction.

The HPI is currently supported by the Faculties of Health, Dentistry, and Medicine, and the Office of the Provost and Vice President Academic at Dalhousie University. Support for specific research projects comes from agencies such as Canadian Institutes for Health Research, Social Sciences and Humanities Research Council of Canada, Nova Scotia Health Research Foundation, and charitable sector research institutes, and private foundations.

Our research associates hold appointments in the Faculties of Health, Architecture, Management, Medicine, Dentistry and Science.

Institute for Big Data Analytics at Dalhousie University

Director: Dr. Stan Matwin

Location: Goldberg Computer Science Building

6500 University Avenue

PO Box 15000

Halifax, NS B3H 4R2

Phone: (902) 494-4320

Email: bigdata@cs.dal.ca

Website: <https://bigdata.cs.dal.ca>

Big data is not a single breakthrough invention, but rather a coming together and maturing of several technologies: huge, inexpensive data harvesting tools and databases, efficient, fast data analytics and data mining algorithms, the proliferation of user-friendly data visualization methods and the availability of affordable, massive and non-proprietary computing. Using these technologies in a knowledgeable way allows us to turn the masses of data that are created daily by businesses and government into an important asset that will result in better, more informed decisions. This could lead, for an example, to intelligent, personalized electric power pricing for consumers, to optimized port traffic management or to the discovery of interesting patterns of migrations in marine life.

The Institute for Big Data Analytics (Big Data @ Dal) acts as a catalyst and a container in which a number of Dalhousie researchers and internationally renowned experts in all of the above areas can work together on Big Data.

The Institute has three main goals. Firstly, we want to become an international hub of excellence in big data research - a place to which scientists will come to work on interesting problems, but also in search of interesting, real-life applications. Our second goal is to make the Institute very relevant to local industries in Nova Scotia, and in Canada. To achieve this goal, we want to focus - for example - on becoming a world leader in the analytics of marine data and all aspects relating to marine biology, fisheries and shipping. Thirdly, we will develop a focused and advanced training program that covers all aspects of big data, preparing our next generation of researchers and practitioners for this important field of study.

Law and Technology Institute

Director: Lucie Guibault, LLB, LLM, PhD

Associate Director: vacant

Location: Schulich School of Law
6061 University Avenue
PO Box 15000
Halifax, NS B3H 4R2

Phone: 902 494-1469

Fax: 902 494-1316

Email: lynda.corkum@dal.ca

Website: www.dal.ca/faculty/law/LATI.html

The Law and Technology Institute was established at the Schulich School of Dalhousie in 2001 to provide teaching, research, and continuing education on technology law issues to students, faculty members, and the practicing Bar. The Institute participates, with the faculties of Computer Science and Management, in Dalhousie's Master of Digital Innovation Program, and has been involved in collaborative projects with the private sector and governments on information technology issues. Also, in conjunction with Dalhousie's Industry Liaison and Innovation Office, the Institute sometimes offers a student placement program in intellectual property and commercialization. Its faculty members provide graduate supervision to students interested in the developing field of technology law, and are active in law and technology organizations. The Institute hosts an Eminent Speakers Series, which brings leading IT lawyers and academics to Dalhousie to share their expertise. The Institute is home to the Canadian Journal of Law and Technology, co-edited by Professors Guibault and Dugas. The CJLT is the pre-eminent technology law review in Canada.

Classes Offered:

- Law and Technology
- Internet and Media Law
- Privacy Law

- Intellectual Property Law
- Information Technology Transactions
- Entertainment Law
- Intellectual Property and Commercialization Placement
- Special Topics on Intellectual Property (IPII)
- Copyright Law
- Patent law
- The Law of Digital Commerce
- Science and the Law
- Technology & Innovation Law Clinic: Clinical Advocacy
- Harold G. Fox Intellectual Property Moot

Students also have the opportunity to pursue specialized interests in fields such as criminal law, health law and alternate dispute resolution, as they relate to law and technology.

MacEachen Institute for Public Policy and Governance

Scholarly Director: Kevin Quigley, PhD

[The MacEachen Institute for Public Policy and Governance](#) at Dalhousie University is a nationally-focused, non-partisan, interdisciplinary institute designed to support the development of progressive public policy and encourage greater citizen engagement. The MacEachen Institute is named in honour of [Allan J. MacEachen](#), retired federal cabinet minister and senator and one of Nova Scotia's most accomplished political leaders.

The MacEachen Institute is a collaboration between Dalhousie's Faculties of Arts & Social Sciences, Law, Health and Management, as well as the Office of the Vice-President, Research & Innovation. It stimulates debate, discussion and research by engaging thought leaders from across Canada and internationally.

The Institute builds on Allan J. MacEachen's legacy and passion by promoting vigorous debate on progressive public policy issues, ranging from community and neighbourhood issues to those of national concern.

Marine & Environmental Law Institute

Location: Schulich School of Law

6061 University Avenue

PO Box 15000

Halifax, NS B3H 4R2

Phone: 902 494-1988

Fax: 902 494-1316

Email: MELAW@dal.ca

Website: <http://www.dal.ca/law/MELAW>

The Institute, which is housed in the Schulich School of Law, carries out teaching, research capacity-building and consultancy activities and also directs the MELP academic specialization, in marine and/or environmental law to JD students. In addition to their scholarly research and publication activities, MELAW faculty and associates carry out research projects and provide advisory services to agencies of the United Nations, international non-governmental organizations, and regional organizations as well as assisting government departments, private sector institutions and non-governmental organizations in Canada and overseas.

The Marine & Environmental Law Institute is home to the editorial office of the Ocean Yearbook. The Ocean Yearbook is a major international interdisciplinary annual, devoted to ocean affairs, published in collaboration with the International Ocean Institute (IOI) in Malta. MELP law students have the chance to gain experience working as research assistants on the Institute's research projects and workshops, and assisting with editing the Ocean Yearbook.

MELAW supports student collaboration in addressing environmental issues through the Environmental Law Students' Society (ELSS) and the East Coast Environmental Law Association (ECELA), a non-governmental organization dedicated to environmental law education and law reform. MELAW encourages interdisciplinary collaborations within the Dalhousie University community including the School for Resource and Environmental Studies (SRES), the Marine Affairs Program (MAP), the College of Sustainability, the International Development Studies Program (IDS), the Ocean Frontier Institute (OFI), the Ocean Tracking Network (OTN) led by the

Department of Oceanography and the Institute for Ocean Research Enterprise (IORE). MELAW also participates in national collaborations such as, the *OceanCanada* Partnership. International linkages include: the Global Forum on Oceans, the IUCN Academy of Environmental Law, the Australia Canada Ocean Research Network (ACORN) as well as numerous other partner institutions in Asia, the Caribbean, Europe, South America, Africa, and the United States.

Minerals Engineering Centre

Director: Josh Leon, PhD, PEng

Location: G Building, Sexton Campus

1360 Barrington Street

PO Box 15000

Halifax, NS B3H 4R2

Phone: (902) 494-3955

Fax: (902) 494-3506

Email: mec@dal.ca

Website: <http://minerals.engineering.dal.ca>

The Minerals Engineering Centre was established from the Laboratory for the Investigation of Minerals. The Minerals Engineering Centre provides research, analytical and advisory services to industries, universities, and government bodies in Atlantic Canada, Canada and International. The Centre is located in G Building on Sexton Campus and is affiliated with the Materials Engineering program. The services offered include:

- Sample preparation of ores, soils, silts, rocks, cores, clay fraction and wood pellets
- Size analysis, including screening, sieving, and sub-sieve analysis
- Minerals separation using dense liquids
- Physical and chemical analytical methods using atomic adsorption, XRD, ICP-OES, AA, x-ray fluorescence spectographic, wet chemical techniques and carboy/sulphur analysis
- Analysis of samples including geological, metalliferous ores, industrial minerals, coals, metals, alloys and water
- Mineral processing test work covering the whole range of investigative techniques from bench scale to pilot plant, including crushing, grinding, classification, gravity separation, dense medium separation, magnetic separation, electrostatic separation, flotation, flocculation, thickening, filtration, and drying
- Evaluation of biomass fuels calorific value of raw material and wood pellet.

The Minerals Engineering Centre provides opportunities for undergraduate and graduate students to learn various analytical and testing techniques applicable in their course of studies. It also offers services to faculty members to assist in their teaching and research activities.

Further information may be obtained from the Director of the Centre.

Neuroscience Institute

Contact: neuroscience.institute@dal.ca

Website: <http://www.neuroscience.dal.ca>

The Neuroscience Institute was founded in 1990 to promote and coordinate research in neuroscience, the modern interdisciplinary study of the brain and nervous system.

It serves as an umbrella organization to foster research and training in neuroscience at Dalhousie. A major objective is to increase understanding of the functions of the nervous system in health and disease. To this end, the Institute coordinates the activities of neuroscientists in the Faculty of Medicine, the Faculty of Science, the Faculty of Computer Science and the School of Biomedical Engineering, facilitating collaboration between clinical and basic scientists in these Faculties. Some foci of current research activity include: development and plasticity of the nervous system; cognitive neuroscience; motor control; autonomic function; synaptic function; and sensory physiology. The Institute also provides a vehicle to seek new sources of funding, and encourages new initiatives in all areas of neuroscience research at Dalhousie. In addition, the Institute promotes and coordinates training programs in neuroscience currently offered through its constituent departments at both the undergraduate and graduate levels. It sponsors seminar series annually, and coordinates a variety of community outreach events.

Nuclear Magnetic Resonance Research Resource (NMR3)

Director: J. K. Rainey, BSc, MSc, PhD
Facility Coordinator: M. D. Lumsden, BSc, PhD
Solid-state NMR Coordinator: U. Werner-Zwanziger, BSc, PhD

Established in 1982 with assistance from the Natural Sciences and Engineering Research Council, the Resource is located in the Department of Chemistry and is used by faculty, researchers and graduate students in all Maritime universities, the NRC, local industry and many Dalhousie Departments. It is concerned with applications of magnetic resonance spectroscopy to problems in chemistry, materials science, biology, biochemistry and related areas. Its current instrumentation includes Bruker, Avance 300 and Avance 500 NMR spectrometers for liquids and Bruker Avance DSX 400 and Avance 700 NMR spectrometers for solids. NMR³ users also have direct access to a Bruker Avance III 700 NMR spectrometer with cryoprobe capabilities for liquids experiments. The Avance 500 and Avance 700 NMR spectrometers were installed in 2003 with funding from NSERC, the Canadian Foundation for Innovation and the Atlantic Innovation Fund. The cryoprobes on the Avance III 700 were purchased in 2009 by Dalhousie University through an Atlantic Canada Opportunities Agency Grant. The Resource offers facilities for hands-on use by researchers and also provides NMR spectra and expertise to scientists throughout the Atlantic Region and beyond.

For more information see: <http://nmr3.chemistry.dal.ca>.

Trace Analysis Research Centre

Director: A. Doucette, BSc, PhD

The Trace Analysis Research Centre (TARC) was established in 1971 with the assistance of a grant from the National Research Council. Its mission is to train analytical chemists and, through research, to contribute to the advancement of analytical chemistry. Members of TARC from Dalhousie and associated institutions comprise a group with expertise in a wide range of chemical analysis techniques in areas such as spectroscopy, chromatography, mass spectrometry, electrochemistry, and nuclear analytical chemistry.

Awards

Scholarships, Bursaries, Awards, and Prizes

The Registrar's Office is responsible for:

- Undergraduate Scholarships
- Undergraduate Bursaries
- Undergraduate Awards and Prizes
- Convocation Medals

IMPORTANT NOTE: The University regularly reviews the policy governing undergraduate awards. Consequently, portions of the following statement of policy may be modified or altered and may be implemented during the course of the academic year of this Calendar.

Helpful Terms

Admissions Average

This is the average of the subjects which were used for entry to the Dalhousie academic program and is governed by admission requirements for the degree/diploma selected.

Adjusted Average

This number is the sum of the Admissions Average, plus points which are assigned to the level of course difficulty (for AP and IB courses) and the number of university-preparatory subjects beyond the minimum five.

Faculty Groupings

There are eight: agriculture; architecture and planning; arts and social sciences; computer science; engineering; health professions; management; and science.

Types of Awards

- Scholarships: A monetary award, at the entrance, in-course and/or graduating level, based on academic performance (in specific subject or group of subjects).

- Awards: A monetary award, at the entrance, in-course and/or graduating level, based on academic performance (in specific subject or group of subjects) and on the recognition of additional relevant attributes.
- Bursary: An award granted on the basis of financial need.
- Medal: An award based on recognition of an outstanding academic record at Dalhousie for a specific degree program in a particular subject.
- Prize: A monetary award of any value, or a non-monetary award, based on general academic excellence, or proficiency in a specific area of study or competition.
- External Award: An award given to the student of the university by an external agency. The University may share in the selection, administration and/or payment of such an award.

General Policy

Applicable to those awards administered by the Registrar's Office. Selection criteria may be different for those awards administered by individual faculties/schools/departments.

Where Dalhousie Scholarships can be Used

Dalhousie University scholarships can be used only at Dalhousie unless the Will or Trust Deed should otherwise permit. The University of King's College has its own scholarship program. Insofar as scholarships, bursaries, awards, prizes, and governmental student loans are concerned, Dalhousie and King's are separate. In order to receive Dalhousie funds you must be a registered Dalhousie University student.

Changing Degree Programs or Faculties

Changing degree/diploma programs or faculties can have implications for scholarship retention. Scholarship holders considering degree or faculty changes should consult the Awards Office prior to making the change.

Scholarship Payments and Rebates

To receive scholarship funds, a student must be registered at least as a full-time student (minimum nine credit hours for degree students, six credit hours for technical students) at Dalhousie during the term(s) in which they are receiving the funds. Students registered in Graduate Studies, Medicine, Law and Dentistry (with the exception of Dental Hygiene students), are ineligible to receive in-course scholarships or renew an existing scholarship. These faculties have their own awards programs.

- Payments: Dalhousie University scholarships are credited towards students' accounts in two equal installments first and second term. Awards are applied first to tuition and prescribed fees, and secondly for residence fees.
- Rebates: The portion of scholarship money in excess of the above charges will be refunded to the student. Refunds are made by the Student Accounts Office in October and February upon request.

Entrance Awards

Entrance awards are available to students applying to Dalhousie directly from high school. Transfer students are not eligible for entrance awards, with the exception of the First Nations and Indigenous Black Students Scholarships. Entrants coming from Year II of a CEGEP program are considered to be transfer students. Students entering the third year of engineering (including students entering from Associated Universities) should review the In-Course Awards (Engineering) section of this Calendar for award opportunities.

Dalhousie offers both renewable and non-renewable entrance awards. Non-renewable awards are held for one year. Renewable entrance awards are typically renewable for a maximum of four years. To be considered for entrance awards, applicants must submit a complete Dalhousie application for admission, a scholarship application, and an official transcript, to the Registrar's Office by March 15. Students must be admitted with a minimum 80% average (26 predicted points for IB diploma candidates) for entrance award consideration. Achieving the minimum academic average does not guarantee that an applicant will receive an award.

Applicants will be evaluated for entrance awards based on some or all of the following criteria: academic merit, extracurricular involvement, financial need, initiative to fund their own education, ancestry, and leadership. A DalOnline application is available for accepted applicants in December. A paper-based application is available for applicants yet to be accepted the following February. Visit <http://www.dal.ca/scholarships> for more information.

Eligible Courses for Scholarship Assessment

The Registrar's Office (Awards) considers all those Dalhousie courses which are taken for credit in a designated degree/diploma program during the academic year (or term in the Co-op program) as eligible courses for scholarship assessment.

Correspondence courses are considered for scholarship purposes.

Unless taken on Letter of Permission, transfer credits do not count towards the credit hours reviewed for scholarship assessment.

Please note that courses taken at other institutions are counted, to a maximum of one course per term, for scholarship assessment if such courses are taken on Letter of Permission towards an eligible degree/diploma at Dalhousie.

Scholarship GPA (SGPA) Calculation

The scholarship GPA (SGPA) will be calculated for students who have completed a minimum of 30 credit hours of work over two terms within the preceding academic year. The SGPA will include all eligible courses attempted during this time period. Please note that the scholarship GPA and the sessional GPA normally differ. The scholarship GPA, expressed to two decimal places, does not show on a student's transcript.

Renewable Scholarships

Unless otherwise advised, an SGPA of 3.70 is required to maintain a renewable scholarship. Students must also complete a full course load (a minimum of 30 credit hours) over two terms within the previous academic year to be eligible for renewal. Co-op students who are on a work term during the calendar year must also complete 30 credit hours over two terms to be eligible. Students completing two work terms within one academic year must complete a minimum of 15 credit hours during their one academic term and achieve a minimum term GPA of 3.70 to be considered. In those cases where students have taken more than 30 credit hours, assessment is based on all courses taken within the term(s) being assessed. Transfer credits do not count towards the credit hours reviewed for scholarship assessment. Holders of renewable awards are notified of either the renewal or the non-renewal of their awards annually, via Dalhousie email.

Holders of renewable scholarships are not also entitled to hold Dalhousie in-course scholarships. Students registered in Graduate Studies, Medicine, Dentistry (with the exception of Dental Hygiene students), or Law are ineligible to receive in-course scholarships or renew an existing scholarship.

In-Course Scholarships

All undergraduate Dalhousie students not on a renewable scholarship, in eligible programs in the faculties of Architecture & Planning, Arts and Social Sciences, Computer Science, Engineering, Health Professions, Management and Science, who have completed a full course load (a minimum of 30 credit hours) over two terms within the previous academic year and achieved a minimum SGPA of 3.70 will be eligible for in-course scholarship consideration. Co-op students who are on a work term during the calendar year must also complete 30 credit hours over two terms and achieve a passing grade in the work term to be eligible for consideration. Students completing two work terms within one academic year must complete a minimum of 15 credit hours during their one academic term, achieve passing grades in both work terms, and achieve a minimum term GPA of 3.70 to be considered eligible for consideration. In those cases where students have taken more than 30 credit hours, assessment is based on all courses taken within the term(s) being assessed. Transfer credits do not count towards the credit hours reviewed for scholarship assessment. In-course scholarship recipients are notified of their award over the summer, via Dalhousie email.

Students registered in Graduate Studies, Medicine, Dentistry (with the exception of Diploma in Dental Hygiene students), or Law are ineligible to receive in-course scholarships or renew an existing scholarship.

Bursaries

The University's bursary program is intended as possible supplementary assistance to help qualifying students with a portion of their educational costs.

The University has funds for the purpose of assisting its students who may face certain types of financial situations. These bursaries are awarded primarily on the basis of demonstrable need as determined by the appropriate University office or committee, satisfactory academic standing (see as defined in Academic Regulations) is also expected. Students whose financial needs are exceptionally large and/or students whose academic standing is unsatisfactory may not be assisted. Normally, bursaries will be awarded only to students who have availed themselves of assistance under the Canada Student Loan Program and/or corresponding provincial or territorial loan programs or bank loans. Normally, receipt of the first installment of such funding is a prerequisite to the University's consideration of an application for bursary assistance. Students may access the bursary program for a maximum of five years.

International Exchanges

Students who have permission to study for one or two terms outside of Canada in an approved exchange program, and are considered to be full-time (normally 30 credit hours), can be considered eligible for in-course or renewable scholarship assessment. Students who hold a Dalhousie scholarship and are planning to study abroad are advised to contact the Assistant Registrar (Awards) prior to departure to discuss their funding schedule.

Scholarship Assessment

Students who hold renewable scholarships will be assessed for renewal in either June or September depending on completion of two academic terms. If a student has previously failed to renew their scholarship and subsequently achieves the required 3.70 SGPA in the next academic year, or in any academic year within four of the original offer, the scholarship may be reinstated.

All other undergraduate students are assessed for in-course scholarships in June or September depending on completion of two academic terms.

Reduced Course Load and Retention of Scholarship

Scholarship holders considering taking a reduced course load should consult the Registrar's Office - Awards before dropping courses. Students must complete a minimum of 30 credit hours over two terms within the academic year to qualify for renewal of their scholarships or an in-course scholarship.

Record of Scholarships

Scholarships, awards, and prizes are recorded on academic transcripts. The University retains the right to reassign the source funding of a student's scholarship as circumstances may warrant (but there would be no reduction in the amount).

Graduation and Renewable or In-Course Scholarships

Students holding a renewable scholarship who choose to graduate earlier than originally expected, and later decide to return to upgrade their degree to a four-year degree, must submit a request to access their scholarship for the final year. In addition, if a student graduates and then decides to upgrade their degree, they cannot be assessed for an in-course scholarship until a further 30 credit hours over two terms within the same academic year are completed and a minimum SGPA of 3.70 is achieved.

Taxation

Students registered as full or part-time students are not required to claim financial awards (e.g. scholarships, bursaries) as income on their taxes.

Withdrawing

Award funds are credited to a student's account with the expectation that they will remain registered at Dalhousie at least as a full-time student (minimum nine credit hours for degree students or six credit hours for technical students) within the applicable term.

Therefore, if a student reduces their course load or withdraws, these funds are expected to be returned to the University. However, depending on the time of the withdrawal, a student may be entitled to retain a prorated portion of the scholarship. Students in this situation are advised to contact the Assistant Registrar - Awards prior to withdrawing.

Scholarship Appeals

The deadline to appeal a scholarship decision for an entrance/in-course/renewable scholarship or entrance bursary is September 30.

Students may appeal under the following grounds:

- extraordinary or compassionate circumstances;
- unfair scholarship decision under the circumstances; and/or,
- inconsistent scholarship decision compared to other offers/decisions (compared to other Dalhousie scholarships)

Students must submit their appeal, in written form, to the Assistant Registrar, Awards, in the Registrar's Office, by the deadline noted above. The letter should clearly outline the grounds for appeal and the remedy being sought. Students should include documentation, if applicable, to support the basis of their appeal. The decision of the Appeals Committee is final.

Convocation Awards

The Governor General's Silver Medal, Governor General's Bronze Medal, University Silver Medal, Avery Prize, and University Medals are administered by the Registrar's Office (Awards) and are awarded at convocation. For the aforementioned medals and prize, a student who is completing a second Dalhousie degree will have only those courses required for the second degree used when calculating their cumulative average. Students graduating in the fall convocation are eligible for consideration for the aforementioned medals and prizes in the following spring convocation. In addition, any disciplinary action by the Senate Discipline Committee shall be deemed sufficient cause for any student to be ineligible.

In the College of Pharmacy, the School of Health and Human Performance, the School of Health Sciences, and the School of Nursing, a University medal is awarded annually at the spring convocation to a graduating student who demonstrates the following criteria have been met:

- The candidate has successfully completed the equivalent of three full-time years in their respective baccalaureate program (90 credit hours) at Dalhousie.
- Has met the FHP cumulative GPA requirement or better on courses taken at Dalhousie towards the degree.
- Of those eligible, has the highest GPA.

All credits taken towards the degree at Dalhousie will be used in the calculations. Transfer credits taken prior to entry into the program are not counted towards either the 90 credit hours criterion, or towards the cumulative GPA requirement. Classes taken on Letter of Permission, while registered in the program, are included in the 90 credit hours criterion and calculated as part of the cumulative GPA requirement. As the School of Social Work does not offer a three year (90 credit hour) BSW degree, it is not eligible for the University Medal.

Entrance Awards

Robert J Chadwick Scholarship

This renewable scholarship will support a first year student entering the Bachelor of Commerce or Bachelor of Management program at the Rowe School of Business who demonstrates academic merit, community involvement and athletic interest.

Eligibility: The eligible student will be entering first year of a Bachelor of Commerce or Bachelor of Management program. They will demonstrate academic merit, community involvement, and an interest in athletics.

Application Type: General Entrance Award Application

Application Deadline: March 1 - check dal.ca/scholarships

Clarence and Marjorie Anderson Scholarship

Established by Clarence and Marjorie Anderson to support students entering any undergraduate degree program at Dalhousie University.

Application Type: Automatic Consideration – No Application Required

Julius D. Solomon Scholarship

This scholarship provides support for one of more students entering first year of study in the Faculty of Engineering.

Eligibility: For students entering their first year of Engineering. Preference will be given to students with demonstrated leadership abilities in extra-curricular and/or community activities.

Application Type: General Entrance Award Application

Application Deadline: March 1 - check dal.ca/scholarships

The Harold Sawler Scholarship

Born in 1917, Harold Sawler was raised and educated in the north end of Dartmouth. Harold went on to graduate from Dalhousie with a Masters of Arts and Harvard University with a Masters of Education. Harold returned to the Dartmouth schools' system where he would eventually serve as principal of Bicentennial Junior High School from 1951 to 1982. Harold Sawler was dedicated to providing a quality education for his students; this scholarship aspires to further this legacy.

Eligibility: First preference for graduates of Dartmouth High School or Prince Andrew High School. If there are no applicants from either of these schools, the scholarship may go to a student entering from another Dartmouth high school. Recipient must have high academic achievement and engagement with their community. Recipient must be a Canadian citizen.

Application Type: General Entrance Award Application

Application Deadline: Mar 1

54th Avenue Capital Corporation Bursary

A \$2,500 bursary to provide financial assistance to a student with demonstrated financial need and good academic standing entering university directly from high school.

Eligibility: Available to students entering any program at Dalhousie University directly from high school. Applicants will have demonstrated financial need and have satisfactory academic standing.

Application Type: General Entrance Award Application

Application Deadline: March 1

Value: \$2,500

Albion Mines Scholarship

Awarded to a student based on academic achievement, community involvement and financial need.

Eligibility: Available to students entering any program at Dalhousie University directly from high school. Applicants must be permanent residents of Pictou County, Nova Scotia.

Application Type: General Entrance Award Application

Application Deadline: March 1

Value: \$1,000

Aldous Bachelor of Commerce Bursary

The Aldous BCOM Bursary is intended to provide financial support to a new Commerce student, and may be renewable annually.

Eligibility: Awarded to a Canadian student entering the Bachelor of Commerce program directly from high school with a minimum 80% average and demonstrated financial need.

Application Type: General Entrance Award Application

Application Deadline: March 1

Value: \$1,000

Suddy and Barbara Bill Ashfield Bursary

This endowment provides renewable bursaries annually to students entering Dalhousie with permanent disabilities and demonstrated financial need. The number and value of bursaries may vary from year to year. To be considered, students must submit medical documentation regarding the nature of their disability, and a complete General Entrance Award Application.

Eligibility: Available to students entering any program at Dalhousie University directly from high school with a documented permanent disability.

Application Type: General Entrance Award Application

Application Deadline: March 1

Atlantic Scholars Award

Atlantic Scholars Awards will provide tuition and residence costs (at shared-room rate, for as long as the recipient chooses to live in residence) for the length of the recipient's first diploma (up to two years) or degree (up to four years). The scholarship does not cover meals, books, and student fees. Only those applicants who have achieved a minimum average of 85% on the courses required for admission shall be considered. Selection criteria include academic performance, geographic distribution, and extracurricular activity.

Eligibility: Available to students entering any program at the Faculty of Agriculture directly from high school.

Application Type: General Entrance Award Application

Application Deadline: March 1

Value: \$40,000

Marjorie Ball Scholarship

Marjorie Ball was born in Newfoundland in 1912 and attended Dalhousie University in 1934. This scholarship was established by a bequest from the Estate of Marjorie Ball to the Dalhousie University Alumni Association.

Eligibility: Available to entering and current undergraduate students.

Application Type: Automatic Consideration – No Application Required

The Annie L. Beer Prize

Under the Will of the late Mrs. Thomas (Annie L.) Beer of Charlottetown a bequest was established at Dalhousie University. The net income from the fund provides for a prize which is to be awarded to the youngest student from Prince Edward Island who enters this University in each year.

Eligibility: Available to an entering undergraduate student from Prince Edward Island.

Application Type: Automatic Consideration – No Application Required

The Francis Hugh Bell Entrance Scholarship in Science

This scholarship was established by a bequest from the estate of Barbara Bell who attended Dalhousie in 1923 as a music student. This scholarship is awarded annually to honour her father, the late Mr. Francis Hugh Bell who was one of Dalhousie's earliest graduates.

Eligibility: Available to students entering any program in the Faculty of Science at Dalhousie University directly from high school.

Application Type: General Entrance Award Application

Application Deadline: March 1

Beta Sigma Phi Scholarship

The Halifax-Dartmouth City Council of Beta Sigma Phi sorority has established an endowment of \$2,000 whereby the annual income will provide for a scholarship. The successful candidate will be selected from the following categories, listed preferentially: first, an active Member; secondly, a daughter, son or spouse of an active Member; and thirdly, some other student chosen by the Registrar's Office. Applications are available from sorority members.

Eligibility: Available to students entering any program at Dalhousie University, with preference to an active member of the sorority or the child or spouse of an active sorority member.

Application Type: See dal.ca/scholarships for more information

Application Deadline: July 31

The Bissett Scholarship

A scholarship valued at \$24,000 (\$6,000 per year) was established by Mr. David Bissett with the intention of encouraging scholastic achievement by providing an incentive to capable high school students. A nomination for a Bissett Scholarship will not interfere with consideration of the nominee for other University scholarships. A student may not, however, hold a Bissett Scholarship and another Dalhousie scholarship at the same time. Students must be nominated by their school to be considered for this scholarship, and should contact the Guidance Office for more information.

Eligibility: Available to students entering any program at Dalhousie University directly from Cole Harbour District High School. Applicants must be attending university as full-time students.

Application Type: See dal.ca/scholarships for more information

Value: \$24,000

Black and Gold Awards

Each year the Dalhousie Black and Gold Club funds a number of awards that recognize outstanding student athletes and the contribution they make to university life. Returning students must have been a full time student for at least two semesters in an academic year at Dalhousie with a minimum GPA of 2.0 in three full year courses or the equivalent. Entering candidates must have an average of 80% or higher. Participation on a varsity team is a requirement.

Applicants should apply through the head coach of their respective varsity teams. Eligibility is verified by the Registrar's Office.

Eligibility: Available to student athletes in any program at Dalhousie University (excluding the Dalhousie Faculty of Agriculture). See award description for

specific eligibility requirements.

Application Type: Contact the Department of Athletics for more information

Jeff Bredin Memorial Scholarship in Men's Volleyball

This scholarship was established in memory of Jeff Bredin who graduated from Dalhousie in May, 1985 with a Bachelor of Physical Education. While at Dalhousie, Jeff was a member of the varsity volleyball team for two years and was the recipient of numerous awards for his contribution to the University's volleyball team. One or more scholarships will be awarded to entering or continuing student athletes on the Dalhousie men's volleyball team who demonstrate excellence in volleyball, sportsmanship and community service.

Eligibility: Available to student athletes in any program at Dalhousie University (excluding the Dalhousie Faculty of Agriculture). See award description for specific eligibility requirements.

Application Type: Contact the Department of Athletics for more information

Robert Bruce Scholarships

The University is a beneficiary of a bequest from the late Robert Bruce of Quebec whereby a portion of the annual income is to be used for both entrance and in-course scholarships, and for bursaries.

Eligibility: Available to entering and current undergraduate students (excluding students studying at the Faculty of Agriculture)

Application Type: Automatic Consideration – No Application Required

Dr. John Bubar Scholarship

After graduating in 1950, John Bubar returned to former NSAC in 1967 to become the first department head of Plant Science Department. By the time John relinquished the chair more than a decade later, it had grown to a professional group of dozen accomplished scientists and teachers. John Bubar loved to teach and share his love of plants and agriculture in general. He was affectionately known by many students as "Johnny Plant." In turn he knew every student's name and, by the time he retired in 1987, he had taught three generations of students at the former NSAC. John is a friend of the Agricultural Campus, and a strong proponent of practical learning. He has left an indelible mark on NSAC and the students who have passed through his doors.

Eligibility: Available to students entering the Bachelor of Science (Agriculture) program at Dalhousie University. Applicants must be permanent residents of New Brunswick. Selection criteria will include academic performance and financial need. Recipients cannot have received other significant awards.

Application Type: General Entrance Award Application

Application Deadline: March 1

Value: \$4,000

George Burris Scholarship

The scholarship was established by Mary Burris and Grace Burris in memory of their father, George Burris, to support Dalhousie students wishing to study in England as part of their academic program. Scholarships are awarded on the basis of academic and extracurricular excellence, financial need, and international experience. Open to Dalhousie University upper year Canadian students who have applied for admission to participate in an International Program/Placement in England. Value: up to \$5,000 each. Students must submit application a minimum of one month before departure.

Eligibility: Available to students participating in a study abroad or exchange program in England.

Application Type: Contact the International Centre for more information

Value: \$5,000

George H. Campbell Memorial Scholarship

In 1917 Mr. and Mrs. G. S. Campbell established the George H. Campbell Scholarship Fund to provide annual scholarships in memory of their late son, George Henderson Campbell.

Eligibility: Available to entering and current undergraduate students (excluding students studying at the Faculty of Agriculture)

Application Type: Automatic Consideration – No Application Required

Cobequid Salmon Association Scholarship

The Cobequid Salmon Association (CSA) provides this scholarship to support incoming Faculty of Agriculture students who have an interest in wild fish ecology, conservation, or habitat restoration.

Eligibility: Students must be entering Aquaculture, Environmental Sciences, or Engineering. Eligible students will have graduated from a high school in Colchester County.

Application Type: General Entrance Award Application

Application Deadline: March 1- check dal.ca/scholarships

Value: 750

Cochrane Fry Leadership Bursary

This family bursary was created to honour the generosity of others. Frank Godfrey, Ralph Cochrane's maternal grandfather, was the first member of the family to attend Dalhousie. He was sponsored by Walter Scott from Loggieville NB, to attend, and graduated from the Pharmacy program in 1923. Frank won the Frank W. Horner Medal for the highest standing in Practical Dispensing. Fry family Dalhousie graduates: Jennifer (BCOM '93), her mother (Catherine Fry nee Isnor BA '65) and sister Stefanie Fry (BA '96). Cochrane family Dalhousie graduates: Ralph (BA '90), his brother Russ (BA '93) and sister's children (Max Vermeir BA Candidate '16, Ella Vermeir BSc '14, MA Candidate '16). Jennifer and Ralph met at Dalhousie and 23 years later reconnected through a good friend and Dalhousie alumnus. Jennifer and Ralph were married in 2012.

Eligibility: Awarded to a student from Atlantic Canada beginning their studies at Dalhousie who have demonstrated leadership in a volunteer capacity in their community. The recipient will demonstrate financial need and be in good academic standing.

Application Type: General Entrance Award Application

Value: \$6,000

Dr. Garth Coffin Scholarship

This scholarship is established in honour of, Dr. Garth Coffin, who served as principal at the Nova Scotia College of Agriculture from 1997-2003. This entrance award will recognize an academically strong student who is beginning post-secondary studies at the Faculty of Agriculture.

Eligibility: Available to a student with strong academic standing entering their first year of an undergraduate degree or diploma program in the Faculty of Agriculture, with preference to a student in the Bachelor of Science (Agr.) in Business or Bachelor of Science (Agr.) in Economics programs.

Application Type: General Entrance Award Application

Application Deadline: Visit dal.ca/scholarships

H Reuben Cohen Scholarship

Created by Dr. H Reuben Cohen, CC, QC, to provide an annual scholarship to a top academic student entering Dalhousie from Moncton High School (New Brunswick). Reuben attended Moncton High School, Dalhousie University and after completing his law degree, began his career as a lawyer in Moncton. To name a few of his many accomplishments, he was awarded the Companion of the Order of Canada, the Order of New Brunswick, the Order of Moncton, the Fellowship of Honor with the YMCA, Prix Lescaillot Award, Paul Harris Fellow Award, District Governor of Rotary, Queen's Golden and Diamond Jubilee Medals, was a past Chancellor of Dalhousie University and a founding member of The Friends of The Moncton Hospital Foundation.

A fund for this purpose, established by the Dalhousie Club of New York and placed in the hands of the Board of Governors of the University, endows several scholarships open to students entering the Faculties of Arts and Social Sciences or Science from high school.

Eligibility: Available to students entering the Faculty of Arts & Social Sciences or the Faculty of science directly from high school.

Application Type: Automatic Consideration – No Application Required

Dalhousie Leadership Bursaries

A limited number of bursaries are available annually to students who have exhibited a record of considerable leadership achievement. Candidates must also demonstrate consistent satisfactory academic accomplishment. The Selecting Committee may consider such other matters as financial need, service to the University and the community, and character. Submit completed forms to the Department of Athletics and Recreation, which will forward your application with supplementary information.

Application Type: Contact the Department of Athletics for more information

Dalhousie University Entrance Scholarships

Going to university is investing in your future. We want to support students who have the potential to shape our campus community. Dalhousie's entrance awards recognize academic achievement and your unique skills and abilities.

Eligibility: Available to students entering any technical or undergraduate program at Dalhousie University directly from high school.

Application Type: General Entrance Award Application

Application Deadline: March 1

Value: \$500 - \$3,000

Frank R. Davis Memorial Scholarships

These scholarships are made possible by a fund established by Mrs. Davis in memory of her late husband, the Hon. Frank R. Davis, Minister of Public Health in the government of Nova Scotia and a graduate of this University. The scholarship will be awarded to deserving graduates of Bridgewater High School, on the nomination of the Supervisor of Schools and the Senior High School Staff. In selecting candidates, the governing considerations will be scholastic standing, unselfishness of purpose, and interest in the common good.

Eligibility: Available to entering students from Bridgewater Jr./Sr. High School.

Application Type: Automatic Consideration – No Application Required

Dean's Scholarship

Awarded to a top international applicant. Value is approximately based on international differential fees and shared residence accommodation

Eligibility: Awarded to an international student entering the Faculty of Agriculture directly from high school.

Application Type: General Entrance Award Application

Application Deadline: March 1

Value: \$40,000 (approximately)

The L. A. DeWolfe Memorial Scholarship

A fund has been established under the Will of the late Dr. L. A. DeWolfe to provide undergraduate scholarships in mathematics or science.

Eligibility: Available to entering and current undergraduate students in the Faculty of Science.

Application Type: Automatic Consideration – No Application Required

DSU Accessibility Bursary

The Dalhousie Student Union established this \$1,000 renewable bursary assistance for an entering student with a permanent disability and demonstrated financial need. This bursary is administered and awarded in combination with the Johnson Foundation Bursary. The recipient will typically receive \$1,000 from the DSU Bursary and an additional \$1,500 annually from the Johnson Foundation Bursary for a combined annual amount of \$2,500. To be considered, students must submit medical documentation regarding the nature of their disability.

Eligibility: Available to students entering any program at Dalhousie University directly from high school with a documented permanent disability.

Application Type: General Entrance Award Application

Application Deadline: March 1

Blair Eavis Scholarships

Blair Eavis, who received his early education in Cape Breton, graduated from Dalhousie University with a B.A. in 1986. During his time on campus he was actively involved in student organizations and intramural sports. He credits much of his later success as a naval officer and lawyer to experiences at Dalhousie.

Eligibility: Enrolled full-time in an undergraduate degree

Application Type: General Entrance Award Application

Application Deadline: see Dal.ca/entranceawards

Jeff D and Martha Edwards Scholarship

Hugh Maccagno established this scholarship in 2007 in memory of Jeff and Martha Edwards. As a young child living in the village of Lac La Biche in northeast Alberta, Hugh Maccagno clearly recalls his father speaking to Mr. Edwards and afterwards commenting "What a fine gentleman he is." Mr. Edwards, a black man dressed in a suit, tie, and hat, was in Lac La Biche coaching his baseball team from Amber Valley, Alberta. His father's words continue to inspire Hugh as they were voiced at a time when black people were subjected to so much discrimination in the US and Canada. Jeff Edwards was 21 when he and many other blacks left Oklahoma for Canada in 1910 seeking an escape from segregation and prejudice in the American South. He and his wife Martha homesteaded as pioneers at Amber Valley, raised 10 children, and contributed enormously to the community. Mr. Edwards embraced his new citizenship with pride, and when he died in 1973 at the age of 90, was remembered as a proud Canadian citizen who epitomized the spirit of black pioneers who settled the Canadian West. It is with these sentiments that Hugh Maccagno established this scholarship, which serves to provide post-secondary education to many from the large and long-established Black community of Nova Scotia.

Eligibility: Available to Black students entering any program at Dalhousie University directly from high school, with preference given to Canadian students of

Black African descent, followed by native Black Bermudian students.

Application Type: General Entrance Award Application

Application Deadline: March 1

Value: \$12,000

DA Eisenhower Memorial Scholarship

This fund was created in honour of the life and career of Daniel Andrew Eisenhower. It will aim to support engineering students from the South Shore of Nova Scotia and give them an opportunity to be inspired and accomplish their goals while studying Engineering at Dalhousie

Eligibility: This award is for students in Engineering. Preference is given for students in their first year. Preference is also given for students from the South Shore of Nova Scotia, with second preference for students from Nova Scotia at large.

Application Type: General Entrance Award Application

Application Deadline: see Dal.ca/entranceawards

Marjorie F. Ellis Scholarships

The late Marjorie F. Ellis bequeathed one-half of the remainder of her estate to Dalhousie University for scholarships to worthy students.

Eligibility: Available to entering and current undergraduate students (excluding students studying at the Faculty of Agriculture).

Application Type: Automatic Consideration – No Application Required

Evanov Radio Group Scholarship

One or two scholarships will be awarded to students entering a Music degree program. Students must demonstrate artistic excellence and a commitment to performing arts in the community.

Eligibility: Available to students entering first year of the Bachelor of Music program at Dalhousie. Applicants must be Canadian citizens or permanent residents of Canada.

Application Type: Contact the Department, School, or College for more information

Facilities Management Employee Scholarship

Established by the Department of Facilities Management employees at Dalhousie, this scholarship supports up to two entering students each year who are children, grandchildren or spouses of Facilities Management Employees. Selection is based on financial need and community involvement.

Eligibility: Available to students entering any program at Dalhousie University directly from high school.

Application Type: General Entrance Award Application

Application Deadline: March 1

Value: \$1,000

Fairfax Financial Holdings Limited Entrance Award

Two renewable awards of \$20,000 (\$5,000 per year) each, are awarded annually to assist worthy candidates. The scholarships were established to encourage scholastic achievement by providing an incentive to capable high school students who wish to obtain a university education and who might otherwise be prevented due to the cost of attending the university. Students will be selected on the basis of financial need but outstanding academic achievement, independently documented outstanding achievement, commitment in community and other extracurricular activities could also be influential.

Eligibility: Available to students entering any program at Dalhousie University directly from high school. Applicants must be a Canadian citizen or a permanent resident of Canada.

Application Type: General Entrance Award Application

Application Deadline: March 1

Value: \$20,000

Ross Faulkner Scholarships

The University received from the Estate of Julia L. Faulkner a bequest to provide scholarships in memory of her husband, Dr. Ebenezer Ross Faulkner.

Eligibility: Available to entering and current undergraduate students (excluding students studying at the Faculty of Agriculture).

Application Type: Automatic Consideration – No Application Required

First Nations and Indigenous Black Students Scholarships

Ten renewable entrance scholarships of \$12,000 (\$3,000 per year) each are available to First Nations and Indigenous Black students. Scholarships are available to students who are applying directly from high school as well as those who have attended another post-secondary institution. Scholarships will be awarded on the basis of a student's financial need and academic standing.

Eligibility: Available to Indigenous Black and First Nations students entering any program at Dalhousie University. Applicants must be permanent residents of one of the Maritime Provinces (NS, NB, PEI).

Application Type: General Entrance Award Application

Application Deadline: March 1

Value: \$12,000

Forsyth Family Nova Scotia Scholarship

A Dalhousie Law graduate established this scholarship in support of Black high school students from Nova Scotia wanting to pursue post secondary education at Dalhousie. This is one of our highest valued scholarships for entering undergraduates at a value of up to \$20,000 per year to cover tuition, housing and books; recipients receive up to \$80,000 over four years. One entering student is selected each year based on academic excellence, financial need and demonstrated participation in extra-curricular activities, preferably leadership, and a social conscience within his or her community.

Eligibility: Available to Black students entering any program at Dalhousie University directly from high school. Applicants must be permanent residents of Nova Scotia.

Application Type: General Entrance Award Application

Application Deadline: March 1

Value: \$80,000

Fountain Performing Arts Undergraduate Scholarships

Eligibility: Fountain Performing Arts Undergraduate Scholarships support exceptional students entering full-time studies in undergraduate Music, Theatre, and Cinema and Media major degree programs at Dalhousie University.

Application Type: General Entrance Award Application

Application Deadline: March 1

Value: \$24,000 (\$6,000 per year)

Notes: Awards vary by degree area. Please visit the Fountain School of Performing Arts' web pages for program-specific award information.

Frederick S. Fountain Scholarship

An endowment has been established by Frederick S. Fountain to provide scholarships to students who demonstrate academic excellence.

Eligibility: Available to students entering any program at Dalhousie University directly from high school, with preference given to those in the Faculty of Arts and Social Sciences. Applicants must be permanent residents of one of the Atlantic provinces (NB, NS, NL, PEI).

Application Type: General Entrance Award Application

Application Deadline: March 1

Value: \$32,000

R. C. Fraser Family Scholarship

Robert Clifford Fraser (or R. C., as he was known) was born in Pictou County, attended New Glasgow High School and graduated with a Bachelor of Commerce from Dalhousie in 1952. He received his CA designation in 1958 and dedicated many of his working years to Nova Scotia Power, both in Pictou County and Halifax. R. C.'s family ties to Dalhousie span many years and he enjoyed his time here tremendously.

Eligibility: Available to students entering the Bachelor of Commerce program at Dalhousie University directly from high school. Applicants must be graduates of North Nova Education Centre, New Glasgow, Nova Scotia.

Application Type: General Entrance Award Application

Application Deadline: March 1

Value: \$1,000

Rowland C. Frazee Scholarships in Business Administration

Established by Mrs. Marie Frazee, and family, to honour the memory of her late husband Dr. Rowland Frazee (BComm 1948, LLD 1980). Dr. Frazee was an outstanding alumnus of Dalhousie University and a business leader in Canada for many decades. He joined the Royal Bank of Canada in 1939 as a bank teller and rose to the position of Chairman and CEO in 1980. He attended Dalhousie University following his overseas service in World War II and rejoined the bank in 1948. He retired in 1986 living in Saint Andrew's, New Brunswick until his passing in the fall of 2007. Two scholarships of \$5,000 each are awarded annually to students.

Eligibility: Available to students entering any program in the Faculty of Management at Dalhousie University directly from high school.

Application Type: General Entrance Award Application

Application Deadline: March 1

Value: \$4,000

Reverend Trevor Phillips Memorial Scholarship

Rev. Trevor A. Phillips was born in Jamaica on March 5, 1941. He received his early education at Kingston College and Union Theological Seminary in Kingston. He was an Ordained Minister at Mount Zion United Church in Jamaica before migrating to Canada. From 1969-72 he continued his pastoral work in Prince Edward Island. Rev. Phillips moved to Nova Scotia and worked at St. Paul's United Church in Halifax from 1973-1981, and then Sambro-Parkhill-Jollymore Pastoral Charge from 1981 until his passing in 2008. He obtained degrees at the University of Prince Edward Island (BSc), St. Mary's University (MEd) and Dalhousie University (BEd 1975 & MA Education 1980) Science, Education, Educational Psychology, Counselling, Educational Administration and Supervision. During his career he was a teacher and guidance counsellor at several schools within the Halifax Regional School Board and a member of their Crisis Intervention Team. He was also a presenter at several national and provincial conferences delivering workshops on multi-culturalism, human rights, curriculum reform and discipline strategies. Rev. Phillips was a man of excellence with great passion for life. He was an avid sportsman who enjoyed badminton (at Dalplex with the "Silver Tigers" Table Tennis), cricket and jogging. His compassion and dedication to Christian Ministry, counselling within the community and caring for people in need was extensive and extraordinary. His amazing laughter and sense of humour brought joy to many lives. He was a legend in his time. On Eagles' Wings is an autobiographical account of his life and faith. The Rev. Trevor Phillips Memorial Scholarship was established as a "living" memorial so that his name and his excellence will be remembered in a significant way.

Eligibility: Awarded to students beginning their studies in any program directly from high school who are either Nova Scotia residents of Caribbean descent, or applying from the Caribbean.

Application Type: General Entrance Award Application

Application Deadline: March 15

The Hugh J. Potter Scholarship

An endowment has been established to provide a scholarship to a student who has demonstrated a high level of academic achievement. The scholarship honours the memory of Joseph Hugh Potter, a native of Digby County, who showed himself to be an exceptional initiator and developer of financial and commercial activity throughout this province in the fields of insurance, securities, shipbuilding, transportation and manufacturing.

Application Type: General Entrance Award Application
Application Deadline: March 1

Shatford Memorial Trust Scholarships

The J. D. Shatford Memorial Trust established a scholarship endowment fund in 1976 to provide assistance with the costs of attendance at Dalhousie University. The University's fund is independent of any other such trusts. Candidates must fulfill the following conditions: a) be coming directly to Dalhousie from high school, b) be undertaking studies leading to their first baccalaureate degree and c) be a bona fide resident of the bequest area (in Hubbards, Nova Scotia area) for at least three years prior to applying to Dalhousie. A candidate's satisfaction of the residency requirement is confirmed by the J. D. Shatford Trust Advisory Committee in Hubbards.
Eligibility: Available to current undergraduate students and students entering directly from high school who live in the Shatford Trust Area as defined by the Trust.
Application Type: Automatic Consideration – No Application Required

Sigma Chi Leadership Award

The Sigma Chi Leadership Award recognizes the qualities of entering students who meet the standards of Sigma Chi membership, as described by the Jordan Standard: being of high character, a student of fair ability, with ambitious purposes, a congenial disposition, possessed of good morals, having a high sense of honour, and a deep sense of personal responsibility.
Eligibility: Available to students entering any program at Dalhousie University directly from high school.
Application Type: General Entrance Award Application
Application Deadline: March 15
Value: \$1,000

Alexander Sinclair Scholarship

Under the Will of the late Evangeline Marion Winn, the University received an endowment for the purpose of providing scholarship awards to qualifying students from St. Mary's Municipality, Guysborough County, Nova Scotia.
Eligibility: Available to students entering any program at Dalhousie University directly from high school. Applicants must be graduates of St. Mary's Rural High School, Nova Scotia.
Application Type: General Entrance Award Application
Application Deadline: March 1
Value: \$16,000

The Slaughter Family Foundation Scholarship for African Students

The Slaughter Family Foundation Scholarship for African Students is a renewable scholarship valued at \$25,000 per year and is funded by a very generous gift by the Slaughter Family Foundation. The scholarship will be awarded annually to a full-time undergraduate student who resides in Africa and is either entering into their first year or returning (current) year of studies in any program at Dalhousie University. To be eligible, candidates must demonstrate financial need, hold good academic standing, and demonstrate involvement in their community.
Eligibility: Available to entering and current undergraduate students who are permanent residents of Africa.
Application Type: Automatic Consideration – No Application Required

Lenore Smith Cumming Bursary

From the Estate of Charles Gordon Cumming came a bequest of \$10,000 US to endow a bursary fund to assist needy students.
Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program entering directly from high school. App
Application Type: General Online Bursary Application
Application Deadline: October 15

The Ross Stewart Smith Scholarships

A significant bequest established these memorial scholarships for students who excel in the sciences or mathematics.
Eligibility: Available to current undergraduate students in the Faculty of Science.
Application Type: Automatic Consideration – No Application Required

Dr. David M. Soloan Scholarship

Under the Will of the late Dr. David M. Soloan the University received a sum of money. The Board of Governors decided that the gift be used to provide one or more entrance scholarships in the College of Arts and Science.
Eligibility: Available to entering students in the Faculty of Arts & Social Sciences or the Faculty of Science.

Application Type: Automatic Consideration – No Application Required

Katherine (Norman) Spavold Scholarship

In honour of the memory of Katherine (Norman) Spavold, and to recognize academic and other achievements of students.

Eligibility: Available to students entering the Bachelor of Arts program in the Faculty of Arts and Social Sciences at Dalhousie University directly from high school. Applicants must have graduated from a rural high school in Nova Scotia.

Application Type: General Entrance Award Application

Application Deadline: March 1

Value: \$2,000

Stanley William Spavold Scholarship

The purpose of this scholarship is to honour the memory of Stanley William Spavold (BA 1951, MA 1953) and recognize the achievements of students entering Dalhousie from Halifax West High School. Mr. Spavold became head of the Social Science Department at Halifax West in 1968 and was later named Vice Principal. This scholarship is awarded to a student who has demonstrated high academic achievement and a well-rounded approach to their academic and extracurricular activities.

Eligibility: Awarded to a student entering the Faculty of Arts & Social Sciences or the Faculty of Management directly from Halifax West High School.

Application Type: General Entrance Award Application

Application Deadline: March 1

Value: \$1,500

Betty Spencer Scholarship

Betty Spencer was born in Saint John, New Brunswick in 1916. She graduated from Saint John Vocational School and worked for a time at Wasson's Pharmacy where she met her husband. They retired in Bangor, Maine and later in St. Andrews, New Brunswick. Although Betty had no specific connection to Dalhousie, she generously bequeathed this endowment through her Will. Preference is given to students from the Atlantic provinces.

Eligibility: Available to entering and current undergraduate students (excluding the Faculty of Agriculture).

Application Type: Automatic Consideration – No Application Required

The I. C. Stewart Trust Fund

From the Estate of Georgie M. Stewart came a trust fund, the annual income from which is to be used for I. C. Stewart Scholarships to qualifying students from St. Mary's District in the County of Guysborough, Nova Scotia.

Eligibility: Available to students entering any program at Dalhousie University directly from high school. Applicants must be graduates of St. Mary's Rural High School, Nova Scotia.

Application Type: General Entrance Award Application

Application Deadline: March 1

Joseph Duncan Stewart Scholarships

A bequest under the Will of the late Joseph Duncan Stewart has made possible the funding of undergraduate scholarships.

Eligibility: Available to entering and current undergraduate students (excluding the Faculty of Agriculture).

Application Type: Automatic Consideration – No Application Required

Whit Strickland Aquaculture Scholarship

This scholarship is established in honour of Thomas 'Whit' Strickland, a Nova Scotia aquaculture producer, who would often tour Faculty of Agriculture students through his production facility. Thomas Whitman 'Whit' Strickland, was a leading contributor of the Nova Scotia aquaculture industry and the key innovator and developer of his salmon hatchery in Little Harbour since he started the business in the early 1980s. Whit was passionate about living off the land and enjoyed the outdoors. He especially enjoyed spending time with his five beautiful granddaughters.

Eligibility: Enrolled in Bachelor of Science (Agr.) in Aquaculture, Faculty of Agriculture. Student must be strong academically. Preference given to female students. Preference also given to students in their second year of study.

Application Type: Faculty of Agriculture In-Course Award Application

The Terry and Marion Poole Scholarship

The Terry and Marion Poole Scholarship is funded by a generous annual gift from the charitable foundation established by Mr. Terry Poole, BCom 1965 who now resides in Calgary, Alberta. To be eligible, candidates must demonstrate financial need and scholarship standing.

Eligibility: Available to full-time students entering any program at Dalhousie University directly from high school, with preference given to candidates who reside in Newfoundland and Labrador, Atlantic Canada, and Alberta.

Application Type: General Entrance Award Application

Application Deadline: March 1

Value: \$20,000

L. A. and Edith Upham Scholarship

A renewable scholarship has been established to recognize the long association of the Upham family with Dalhousie University.

Eligibility: Available to students entering any program in the Faculty of Arts and Social Sciences at Dalhousie University directly from high school.

Applicants must be graduates of a high school in Nova Scotia.

Application Type: General Entrance Award Application

Application Deadline: March 1

Value: \$20,000

The J. Douglas Vair Scholarship

This scholarship is available to students entering the University for the first time from Pictou County, Queen's County, and rural Halifax County. Failing a candidate from these areas, a student from other areas of Nova Scotia may be selected at the discretion of the Scholarship Committee. The award shall be based on scholarship and need, making it possible for a promising student to obtain a university education.

Eligibility: Available to an entering undergraduate student from Nova Scotia (excluding the Faculty of Agriculture).

Application Type: Automatic Consideration – No Application Required

Marguerite I. Vernon Scholarship

A trust has been established under the Will of the late Marguerite Vernon whereby, from time to time, a scholarship will be assigned to Dalhousie University for an entering student.

Eligibility: Available to an entering undergraduate student from Nova Scotia (excluding the Faculty of Agriculture).

Application Type: Automatic Consideration – No Application Required

Walker Wood Foundation Science Bursary

The Walker Wood Foundation established this bursary in support of a student with demonstrated financial need.

Eligibility: Available to students entering the Bachelor of Science program in the Faculty of Science at Dalhousie University directly from high school, with preference given to students from high schools within Atlantic Canada.

Application Type: General Entrance Award Application

Application Deadline: March 1

Value: \$16,000

F. W. Walsh Memorial Scholarship

Frederick Waldemar (Waldo) Walsh (1897-1984) was born in Moncton, New Brunswick, and spent his boyhood in Coverdale, New Brunswick, on the family farm. He attended the Nova Scotia Agricultural College (now Dalhousie University, Faculty of Agriculture) (Class of '17) and O.A.C. (Class of '22) and worked as Superintendent of Agriculture for the C.N.R. until 1934 when he became senior agriculturalist with the Nova Scotia Department of Agriculture, until his retirement as Deputy Minister in 1962. After his passing, his three sons Robert, Jack, and Fred set aside money, the interest of which would provide a memorial scholarship for a deserving young man or woman entering the degree course at the Faculty of Agriculture.

Eligibility: Available to students entering first year of any undergraduate degree program at the Faculty of Agriculture. Selection is based primarily on academic performance. Financial need and participation in school and community affairs will also be considered.

Application Type: General Entrance Award Application

Application Deadline: March 1

Value: \$500

Weinkauf Family Scholarship in Dental Hygiene

To provide an entrance scholarship in the School of Dental Hygiene.

Eligibility: First preference will be given to a student from Western Canada. If there are no suitable candidates, all first-year students will be considered.

Financial need may also be considered in the selection of the recipient.

Application Type: Contact the Faculty for more information

F. Hume Wells Scholarship

This scholarship is awarded on the basis of performance excellence to a student entering university for the first time directly from high school into a course of study leading to an undergraduate degree in music performance. It was established by Judith Wells and Karen Woolhouse in memory of F. Hume Wells, a businessman in Halifax, who was interested in music and thought university education was important.

Eligibility: Available to students entering first year of the Bachelor of Music program at Dalhousie.

Application Type: Contact the Department, School, or College for more information

The Women's Division of the Dalhousie Alumni Association Scholarships

This fund provides two entrance scholarships; one is named the Margaret Florence Newcombe Scholarship, which commemorates the 100th anniversary of the graduation of the first woman graduate of Dalhousie University in 1885. The second scholarship is named the Ruth Skaling Murray Scholarship, in memory of a dedicated alumna of the Dalhousie Women's Division.

Eligibility: Available to entering undergraduate students (excluding the Faculty of Agriculture).

Application Type: Automatic Consideration – No Application Required

Don Wright Scholarship of Excellence

This annual scholarship funded by the Lillian and Don Wright Foundation, supports outstanding students who are entering the Fountain School of Performing Arts in a Music degree program. While preference shall be given to awarding the scholarship to one student per year, if no one student merits the awarding of the scholarship, the awarding committee has the authority to award two scholarships to students who have applied and been accepted to study Music within the School. Where there is more than one eligible candidate, first preference shall be given to the candidate deemed to have the most merit as judged by a majority of the Fountain School of Performing Arts scholarships committee.

Eligibility: Available to students entering first year of the Bachelor of Music program at Dalhousie.

Application Type: Contact the Department, School, or College for more information

Sir William Young Scholarship

This fund was left by Sir William Young for the purpose of endowing scholarships.

Eligibility: Available to entering and current undergraduate students (excluding the Faculty of Agriculture).

Application Type: Automatic Consideration – No Application Required

Christine Zinck Scholarships

Four scholarships awarded annually in each of the four streams of Theatre: Acting, Costume Studies, Scenography and Technical Theatre and Stage Design and Theatre Studies.

Application Type: Automatic Consideration – No Application Required

In-Course Awards

How to use this Section

The term 'awards' in this section is a general term encompassing scholarships, bursaries, awards, prizes, medals, fellowships, and studentships. To see a list of awards that you may be eligible for, select your Faculty or College from the list on the right. You may also have the option to select a department within a faculty. Students who have yet to choose a major or belong to a Faculty of College that does not have Departments should select their Faculty or College, and then 'All Faculty Awards'.

The awards listed under the Department and 'All Awards' pages include those administered centrally (by the Registrar's Office, International Centre, and other units) as well as those administered within faculties and departments.

General Information

Dalhousie In-Course Scholarships

All undergraduate Dalhousie students not on a renewable scholarship, in eligible programs in the Faculties of Architecture and Planning, Arts and Social Sciences, Computer Science, Engineering, Health Professions, Management, and Science, and the Dental Hygiene program, who have completed a full course load (a minimum of 30 credit hours) over two terms within the previous academic year and achieved a minimum SGPA of 3.70 will be considered eligible for in-course scholarships. Co-op students who are on a work term during the calendar year must also complete 30 credit hours over two terms and achieve a passing grade in their work term to be eligible. Co-op students completing two work terms within one academic year must complete a minimum of 15 credit hours during their one academic term, achieve a minimum term GPA of 3.70, and achieve passing grades in both work terms, to be considered eligible. In those cases where students have taken more than 30 credit hours, assessment is based on all courses taken within the term(s) being assessed. Transfer credits do not count towards the credit hours reviewed for scholarship assessment. In-Course Scholarship assessment takes place over the summer months. Scholarship recipients will be notified by Dalhousie email.

Students registered in Graduate Studies, Medicine, Dentistry (with the exception Dental Hygiene Students), or Law are ineligible to receive in-course scholarships or renew an existing scholarship.

Dalhousie Undergraduate Bursary Program

The University's bursary program is intended as possible supplementary assistance to help qualifying students with a portion of their educational costs.

The University has funds for the purpose of assisting its students who may face certain types of financial situations. These bursaries are awarded primarily on the basis of demonstrable need as determined by the appropriate University office or committee, satisfactory academic standing (see as defined in Academic Regulations) is also expected. Students whose financial needs are exceptionally large and/or students whose academic standing is unsatisfactory may not be assisted. Normally, bursaries will be awarded only to students who have availed themselves of assistance under the Canada Student Loan Program and/or corresponding provincial or territorial loan programs or bank loans. Normally, receipt of the first installment of such funding is a prerequisite to the University's consideration of an application for bursary assistance. Students may access the bursary program for a maximum of five years.

Faculty of Agriculture In-Course Awards Program

The Faculty of Agriculture has its own in-course award program (including bursaries), typically due in the fall term. Most Faculty of Agriculture awards require a single application. More information is available at dal.ca/scholarships.

Golden Key International Honour Society

Dalhousie University has a participating chapter in the Golden Key International Society. The Golden Key Society is an academic honours society that recognizes the academic achievements of students. The society provides scholarships and leadership opportunities and career assistance to its student members. Students are invited to become members based upon criteria established by the society. For information please refer to the society's website: goldenkey.org.

College of Continuing Education

Introduction

This Calendar is prepared some months before the year for which it is intended to provide guidance. The policies, procedures, and awards listed in this section are subject to continuing review and revision. Not all awards listed will be offered in any given year. Additionally, the number of awards offered, values of awards, and selection criteria may change without notice.

All CCE Awards

Morris Saffron Prize

A bequest under the will of the late Morris Saffron established an endowment to provide an annual prize to a student in the Transition Year Program who is judged to have made the greatest academic achievement during the year.

Application Type: Automatic Consideration – No Application Required

Jonathan Skeete Memorial Prize

Friends, faculty and former students of the Transition Year Program have established an endowment from which to fund an annual prize. The award honours the memory of Jonathan Skeete who, following completion of the TYP, graduated with a BComm degree and then served several years with the RCMP. An annual prize is available to a Black student who is enrolled in the Transition Year Program.

Eligibility: Available to current Black students in the Transition Year Program at the College of Continuing Education.

Application Type: Contact the Department, School, or College for more information

The Margaret Inglis Hagerman Undergraduate Bursary is intended to provide financial assistance to students who are residents of Nova Scotia with demonstrated financial need.

Eligibility: Available to Nova Scotia residents enrolled in full-time studies at the Dalhousie School of Nursing.

Application Type: General Online Bursary Application

Application Deadline to Apply: October 15

College of Sustainability Scholarship for Second Year ESS Degree Students

The College of Sustainability offers a scholarship to an ESS student who has completed the first year of their ESS Major/Honours and intends on continuing their studies into their second year of an ESS Major/Honours. The student awarded the scholarship will have achieved outstanding academic performance in their first ESS year and also demonstrated an engagement in activities that furthers the cause of sustainability, diversity and equity in their community during the past several years. Community can include the College of Sustainability, Dalhousie University or the student's residential community.

Eligibility: Eligibility ESS student who has completed the first year of their ESS Major/Honours and intends on continuing their studies into their second year of an ESS Major/Honours

Application Type: Contact the Department, School, or College for more information

Application Deadline to Apply: May 15

Advancement Bursary for Black Canadian or Indigenous Students

This bursary was created through the generosity of members of the staff of the Office of Advancement. The bursary is intended to alleviate financial difficulties for Black Canadian and Indigenous students.

Eligibility: Available to an undergraduate Black/African Canadian student or Indigenous student. The student will have demonstrated financial need.

Application Type: Automatic Consideration – No Application Required

Application Deadline to Apply: November 15

Aramark Leadership Award

This award provides scholarships for returning undergraduate students at Dalhousie registered in the Faculty of Architecture and Planning, Arts and Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Diploma of Dental Hygiene who show leadership in the community. Eligible students must have been full-time Dalhousie students during the previous academic year, be currently registered as a full-time undergraduate student, be in good academic standing, and demonstrate involvement and dedication to the Dalhousie community through leadership, citizenship and/or sportsmanship. Applications are available through DaOnline - Student Awards and Financial Aid section.

Eligibility: Available to current Dalhousie undergraduate students in any program at Dalhousie University (excluding the Dalhousie Faculty of Agriculture).

Application Type: Aramark Leadership Award Application

Value: \$4,000

Helen Archibald Memorial Bursary

To provide one or more bursaries for undergraduate students from Cape Breton, Nova Scotia, with preference given to students from Richmond County.

Eligibility: Available to full-time undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need, have satisfactory academic standing, and be a resident of Cape Breton.

Application Type: General Online Bursary Application

Application Deadline to Apply: October 15

The Eva and David Ashkins Memorial Bursary

The donors established this fund for the purpose of assisting pupils who have matriculated from selected high schools to enter Dalhousie. These high schools are (first) North Queen's Rural High School or Bridgewater High School, and (secondly) other high schools in the province of Nova Scotia. The recipient may be considered in subsequent years for further assistance.

Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need and have satisfactory academic standing. See award description for specific eligibility requirements.

Application Type: General Online Bursary Application

Application Deadline to Apply: October 15

Helen Mary and Earl Atkins Memorial Bursary

A trust from the estate of Helen Mary and Earl Atkins to provide bursaries for those who might otherwise be unable to attend university.

Eligibility: Available to first and second year undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need, have satisfactory academic standing, and be residents of rural Nova Scotia.

Application Type: General Online Bursary Application

Application Deadline to Apply: October 15

Avery Prize

This prize, bequeathed by J. F. Avery, MD, will be awarded on graduation to the student standing highest among graduates of the general degree program. The recipient cannot have received the Governor General's Silver Medal or University Silver Medal. For the aforementioned medals and prize, a student who is completing a second Dalhousie degree will have only those courses required for a second degree used when calculating their cumulative average. In addition, any disciplinary action by the Senate Discipline Committee shall be deemed sufficient cause for any student to be ineligible. For more information on deadlines and application procedures, please visit: www.dal.ca/scholarships.

Application Type: Automatic Consideration – No Application Required

The Avie Bennett Prize

This prize is one of six established by Mr. Avie Bennett, former Chairman and President of McClelland and Stewart to mark the company's 90th anniversary and the 40th anniversary of the New Canadian Library, of which the founding general editor was Dalhousie Professor Emeritus Dr. Malcolm M. Ross. It is awarded each year for the best essay on Canadian literature submitted from an undergraduate course at Dalhousie during the current academic year. Essays may have been written for courses in any department, but they should focus explicitly on a Canadian literary topic and not on history or culture more generally, and they must be written in English. Essays should be nominated by instructors; clean copies should be submitted by the specified date.

Eligibility: Available to any undergraduate student.

Application Type: Automatic Consideration – No Application Required

Harry and Kaye Bernstein Bursary

A bursary to an undergraduate student born and living in Halifax from a low income family, who shows financial need.

Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need and have satisfactory academic standing. See award description for specific eligibility requirements.

Application Type: General Online Bursary Application

Application Deadline to Apply: October 15

Beta Sigma Phi Scholarship to Dalhousie University

The Halifax-Dartmouth City Council of Beta Sigma Phi sorority has established an endowment of \$2,000 whereby the annual income will provide for a scholarship. The successful candidate will be selected from the following categories, listed preferentially: first, an active Member; secondly, a daughter, son or spouse of an active Member; and thirdly, some other student chosen by the Registrar's Office. Applications are available from sorority members.

Eligibility: Available to students entering any program at Dalhousie University, with preference to an active member of the sorority or the child or spouse of an active sorority member.

Application Type: See dal.ca/scholarships for more information

Application Deadline to Apply: July 31

Black and Gold Awards

Each year the Dalhousie Black and Gold Club funds a number of awards that recognize outstanding student athletes and the contribution they make to university life. Returning students must have been a full time student for at least two semesters in an academic year at Dalhousie with a minimum GPA of 2.00 in three full year courses (18 credit hours) or the equivalent. Entering candidates must have an average of 80% or higher. Participation on a varsity team is a requirement. Applicants should apply through the head coach of their respective varsity teams. Eligibility is verified by the Registrar's Office.

Eligibility: Available to student athletes in any program at Dalhousie University (excluding the Dalhousie Faculty of Agriculture). See award description for specific eligibility requirements.

Application Type: Contact the Department of Athletics for more information

The Jotham Blanchard Scholarship

The New Glasgow Literary and Historical Society in 1912 established this scholarship in memory of Jotham Blanchard. The scholarship will be awarded to a student of meritorious standing who is in the second year of an undergraduate program.

Eligibility: Available to a second year undergraduate student (excluding the Faculty of Agriculture).

Application Type: Automatic Consideration – No Application Required

George Boyd Bursary

The income from the George Boyd Trust will provide a bursary to a student who demonstrates financial need.

Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need and have satisfactory academic standing, with preference given to applicants from the Sydney area, Cape Breton.

Application Type: General Online Bursary Application

Application Deadline to Apply: October 15

Jeff Bredin Memorial Scholarship in Men's Volleyball

This scholarship was established in memory of Jeff Bredin who graduated from Dalhousie in May, 1985 with a Bachelor of Physical Education. While at Dalhousie, Jeff was a member of the varsity volleyball team for two years and was the recipient of numerous awards for his contribution to the University's volleyball team. One or more scholarships will be awarded to entering or continuing student athletes on the Dalhousie men's volleyball team who demonstrate excellence in volleyball, sportsmanship and community service.

Eligibility: Available to student athletes in any program (excluding the Faculty of Agriculture). See award description for specific eligibility requirements.
Application Type: Contact the Department of Athletics for more information

Ernest Brehaut Memorial Bursaries

This bursary is available to students if they maintain creditable academic standing and show genuine need.

Eligibility: These bursaries were established by the gift of Mrs. Ernest Brehaut of Colorado Springs, USA, in memory of her husband, a distinguished graduate of Dalhousie, Harvard and Columbia. Preference is to be given to relatives of the late Dr. Brehaut.

Application Type: General Online Bursary Application

Application Deadline to Apply: October 15

The Lt. (E) Harry J. Brewer, MBE, CD, RCN (Ret.), Memorial Bursary

A memorial bursary fund has been established to provide financial assistance to a full-time student who is enrolled in a degree or diploma program.

Eligibility: Available to full-time undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need and have satisfactory academic standing.

Application Type: General Online Bursary Application

Application Deadline to Apply: October 15

The Isabel Brown Scholarship

The scholarship was endowed in 1982 by the Brown family under the auspices of the Women's Division of the Dalhousie Alumni Association. The interest provides an annual scholarship ordinarily to a student who is entering the final undergraduate year.

Eligibility: Available to a final year undergraduate student (excluding the Faculty of Agriculture).

Application Type: Automatic Consideration – No Application Required

Robert Bruce Scholarships

The University is a beneficiary of a bequest from the late Robert Bruce of Quebec whereby a portion of the annual income is to be used for both entrance and in-course scholarships, and for bursaries.

Eligibility: Available to entering and current undergraduate students (excluding students studying at the Faculty of Agriculture)

Application Type: Automatic Consideration – No Application Required

Minnie F. Burbidge Scholarships

In her Will the late Minnie F. Burbidge bequeathed the residue of her Estate to Dalhousie University. In 1945 the sum of \$16,000 was endowed to provide undergraduate, usually in-course, scholarships.

Eligibility: Available to a current undergraduate student (excluding the Faculty of Agriculture).

Application Type: Automatic Consideration – No Application Required

George Burris Scholarship

The scholarship was established by Mary Burris and Grace Burris in memory of their father, George Burris, to support Dalhousie students wishing to study in England as part of their academic program. Scholarships are awarded on the basis of academic and extracurricular excellence, financial need, and international experience. Open to Dalhousie University upper year Canadian students who have applied for admission to participate in an International Program/Placement in England. Students must submit application a minimum of one month before departure.

Eligibility: Available to upper-year Dalhousie students participating in a study abroad or exchange program in England.

Application Type: Contact the International Centre for more information

Value: \$5,000

George H. Campbell Memorial Scholarship

In 1917 Mr. and Mrs. G. S. Campbell established the George H. Campbell Scholarship Fund to provide annual scholarships in memory of their late son, George Henderson Campbell.

Eligibility: Available to entering and current undergraduate students (excluding students studying at the Faculty of Agriculture)

Application Type: Automatic Consideration – No Application Required

Howard C. Clarke International Study Award

An endowment fund to assistance a Dalhousie student who is participating in a recognized study abroad or exchange program for academic credit. Student must demonstrate great financial challenges.

Eligibility: Available to an undergraduate Dalhousie student participating in a study abroad or exchange program.

Application Type: Contact the International Centre for more information

The Rebecca Cohn Bursary Fund

A gift of \$4,000 by the executors of the Estate of the late Rebecca Cohn provides an endowed bursary fund for needy students.

Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need and have satisfactory academic standing.

Application Type: General Online Bursary Application

Application Deadline to Apply: October 15

Dorothy Macdonald Crummey Memorial Bursary

This bursary was established by the family of the late Dorothy Macdonald Crummey (1912-2005) who was born in Little Harbour, Pictou County. She attended Halifax Ladies College (an affiliate of Dalhousie University) and graduated with a diploma in Household Science in 1932. Like many educated women of her generation, Dorothy did not work outside the home after marriage to Dr. Clarence Crummey (MD 1932). Nevertheless, she actively supported university students remembering her own efforts to fund her education during “The Great Depression”. Bursaries will be available to students enrolled in any undergraduate degree program from Nova Scotia with a preference for students from Pictou County. Apply through the general online bursary program. Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need, have satisfactory academic standing, and preferably graduated from a high school in Pictou County, Nova Scotia. Application Type: General Online Bursary Application Application Deadline to Apply: October 15

Dalhousie Leadership Bursaries

A limited number of bursaries are available annually to students who have exhibited a record of considerable leadership achievement. Candidates must also demonstrate consistent satisfactory academic accomplishment. The Selecting Committee may consider such other matters as financial need, service to the University and the community, and character. Submit completed forms to the Department of Athletics and Recreation, which will forward your application with supplementary information. Application Type: Contact the Department, School, or College for more information

Dalhousie Memorial Bursary Fund

From time to time at Dalhousie contributions have been made to the University as a memorial subscription in honour of some student or former student. Until now there has been no proper place into which these funds could be channeled. Because of these occurrences a Dalhousie Memorial Bursary Fund has been established. The existence of the fund will be commemorated by a book of remembrance to be located in a prominent place in the Killam Library. Names of persons in whose memory contributions have been made by relatives, friends, individuals or groups, to the Memorial Fund will be recorded in the book, along with the date of their birth and death. The pages will be turned on a regular basis. All money contributed to the Fund will be invested by the Board of Governors and only the investment income will be awarded. The award will be available to any full-time Dalhousie student, already registered and in attendance at courses, who can show a need for additional support. Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need and have satisfactory academic standing. Application Type: General Online Bursary Application Application Deadline to Apply: October 15

Dalhousie Student Union Student Accessibility Award

This award is open to Dalhousie students with a permanent disability (physical, mental or learning impairment). Adrian Facca Leadership Fund

The Adrian Facca Leadership Fund has been established in Memory of Adrian Facca. Adrian graduated from Dalhousie University with Bachelor's degrees in both Arts (1980) and Commerce (1982). He proudly wore number 19 for the Dalhousie Tigers hockey team for five seasons, starting in 1977. He exemplified leadership both on and off the ice and was an important contributor to his team and to Dalhousie.

Eligibility: Awarded to students on the Tigers men's hockey and women's volleyball teams.

Application Type: Contact the Department of Athletics for more information

Ross Faulkner Scholarships

The University received from the Estate of Julia L. Faulkner a bequest to provide scholarships in memory of her husband, Dr. Ebenezer Ross Faulkner.

Eligibility: Available to entering and current undergraduate students (excluding students studying at the Faculty of Agriculture).

Application Type: Automatic Consideration – No Application Required

The SLT Bruce Galloway Memorial Prize

Friends, family and shipmates of Sub-Lieutenant Bruce David Galloway, a member of the Ship's Company of H.M.C.S. Fraser and a 1983 Arts graduate of Dalhousie, have established a memorial fund. The prize is to be awarded to the student, male or female, attending Dalhousie University on the Regular Officer Training Plan who attained the highest academic standing (not less than a passing standing) in the program in which he or she is enrolled. A prize is to be awarded in each year in which there is a student attending Dalhousie on the Regular Officer Training Plan who achieves a passing standing.

Eligibility: Available to a current undergraduate student (excluding the Faculty of Agriculture).

Application Type: Automatic Consideration – No Application Required

Vince Ginley Scholarships

The Vince Ginley fund provides one or more annual scholarships to students who are entering their third year and fourth year registered in the ESS Major/Honours program. The recipients are selected based on their cumulative grade point average (GPA) by the ESS Awards Committee and funds are awarded in the Spring for the subsequent academic year.

Application Type: Automatic Consideration – No Application Required

The Irving and Jeanne Glovin Award

The Oskar Schindler Humanities Foundation established this award in 2003 to support research into the meaning and principles underlying “good human conduct”. Students enrolled in any major discipline, for example, Languages, Social Sciences, Humanities and Performing Arts, or any interdisciplinary program, for example, Canadian Studies, European Studies, Gender and Women Studies and IDS are encouraged to apply. The recipient will preferably have broad general education and interdisciplinary interests appropriate to the research topic chosen.

Eligibility: Available to a full-time student in the final year of any undergraduate program or any year of a graduate program at Dalhousie University.

Application Type: Contact the Faculty for more information

Application Deadline to Apply: mid-February

Governors' Awards

In 1992, to mark the 125th anniversary of the founding of the Dalhousie Student Union, and to recognize students' contribution to the quality and vitality of the University, the Board of Governors established a set of awards to be known as Governors' Awards. Up to four awards can be made each year, for exceptional contributions or leadership in the extracurricular realm in such areas as university governance, development of a sense of community on campus, community service, internationalizing the campus, visual or performing arts, minority access or athletics. To be eligible, students must have a minimum cumulative GPA of 3.0 or equivalent. Otherwise, all students - undergraduate, graduate, or professional faculty students, full or part-time, at any stage in their academic career, may be considered for an award. Information is available on the Student Services website.

Application Type: Contact the Department, School, or College for more information

Governor General's Silver Medal

Offered by His Excellency the Governor General of Canada, this medal is awarded to the undergraduate student who has achieved the highest academic standing among graduates of baccalaureate programs.

Application Type: Automatic Consideration – No Application Required

The Graham Family Athletic Awards

John and Lina Graham have established the Graham Family Athletic Awards, which recognize the contributions that varsity student athletes make in enriching the quality of life at Dalhousie University. Awards are available to entering and continuing varsity athletes. Award recipients should demonstrate positive attributes in the areas of citizenship, sportsmanship, and community service.

Eligibility: Available to student athletes in any program at Dalhousie University (excluding the Dalhousie Faculty of Agriculture).

Application Type: Contact the Department of Athletics for more information

MacCallum S. Grant Charitable Foundation Bursary

The MacCallum S. Grant Charitable Foundation supports a number of bursaries for Dalhousie University students each year. First priority will be given to students who have lived in Halifax County, Guysborough County and Preston for a period of at least two years immediately prior to receiving a bursary. Students from the former City of Halifax, Dartmouth and the town of Bedford are not eligible to receive a bursary.

Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need and have satisfactory academic standing. See award description for specific eligibility requirements.

Application Type: General Online Bursary Application

Application Deadline to Apply: October 15

Enid Hager Clarke Textbook Fund

A bequest from the Estate has set up an endowment from which to award bursaries to assist students from certain geographic areas of New Brunswick.

Students who are domiciled in King's and Saint John counties are eligible under the terms of the bequest.

Application Type: Automatic Consideration – No Application Required

The E. John Jordan Scholarships

Under the Will of the late E. John Jordan a bequest was left to the University for the purpose of funding entrance and in-course scholarships.

Eligibility: Available to entering or current undergraduate students (excluding the Faculty of Agriculture).

Application Type: Automatic Consideration – No Application Required

Nimmi and Teji Kanwal Bursary

Mr. Tejinder (Teji) and Mrs. Nirmal (Nimmi) Kanwal have cared and impacted numerous lives over the years. Although now retired, both were successful and beloved teachers for over 30 years. They grew up in India where their parents were strong believers in education and supported their schooling. Teji came to Canada in 1962 and Nimmi joined him in 1967. Travelling around the world twice, their love of adventure and travel continued throughout their lives. Both received Masters degrees from Dalhousie. They are supporters of equal rights for all, which includes their support for equal opportunities for teachers in Nova Scotia. As Teji puts it “If you can’t do something for someone, you are a no one.”

Eligibility: Awarded to an undergraduate Dalhousie student who is in good academic standing and demonstrates financial need, with preference to a female student.

Application Type: General Entrance Award Application

Application Deadline to Apply: October 15

The Khaki University Scholarships

From the Khaki University of Canada and the Young Men’s Christian Association Memorial Scholarship Fund, the trustees of Khaki University made a gift to Dalhousie University in 1921 of \$6,500 to endow scholarships.

Applicants will have demonstrated financial need, have satisfactory academic standing, and be residents of Springhill, Cumberland County, Nova Scotia.

Application Type: General Online Bursary Application

Application Deadline to Apply: October 15

Dr. Carolyn Savoy Award of Excellence

In March of 2009, Dr. Carolyn Savoy announced her retirement from coaching, after a 32-year career of outstanding service to Dalhousie University and its women's basketball program. Carolyn continues to work as an Associate Professor in the School of Health and Human Performance at Dalhousie. Dr. Savoy came to Dalhousie in 1977 as head coach of the women's basketball team, following seven years in the same capacity at St. FX. In over three decades of coaching, Coach Savoy posted very impressive results, including an 858-292 CIS win-loss record for a 74.5 winning percentage. A four-time AUS Coach of the Year, she led the Tigers to the national final in 1980, the semifinals in 1982, to a fourth place CIS finish in 2007 and placed sixth at nationals in 1986, 1996 and 2001. Coach Savoy's teams won nine regular season AUS titles and five AUS championships. Academically, her teams had a 100% graduation record for those playing three to five years in the program. As a Level 4 basketball master course conductor, Carolyn has coached at the national and international level as an assistant with the Canadian national team program and also served as head coach of the 2001 Nova Scotia Canada Games team. She completed her BPE degree in 1969 at the University of New Brunswick. She enjoyed an outstanding athletic career at UNB, where she was a star volleyball, basketball (she played on a team that compiled a 93-game winning streak) and field hockey player. She began her coaching career at St. FX (1969-77), where she transformed both the basketball and field hockey teams into winning programs. Carolyn has been honoured with a number of prestigious awards including the 2002 Women of Excellence award in the health, sport and fitness category. In 2005 she received the Frank Baldwin award for her contribution to the development of basketball in Nova Scotia. She was also inducted to the Saint John Sport Hall of Fame as a builder in 2003.

Eligibility: Available to athletes in the women's basketball program at Dalhousie University (excluding the Dalhousie Faculty of Agriculture).

Application Type: Contact the Department of Athletics for more information

Leslie Shaw Bursary

This bursary was established by Allan, Gabrielle, and Sarah Shaw for Leslie Shaw to honour her and to celebrate her 60th birthday. Leslie Shaw dedicates her professional and volunteer life to the betterment of our society. This bursary is awarded annually to permanent residents of Canada and/or international students whose first language is not English. First preference will be given to students who are either permanent residents or intending to become permanent residents of Canada.

Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need and have satisfactory academic standing. See award description for specific eligibility requirements.

Application Type: General Online Bursary Application

Application Deadline to Apply: October 15

The Slaughter Family Foundation Scholarship for African Students

The Slaughter Family Foundation Scholarship for African Students is a renewable scholarship valued at \$25,000 per year and is funded by a very generous gift by the Slaughter Family Foundation. The scholarship will be awarded annually to a full-time undergraduate student who resides in Africa and is either entering into their first year or returning (current) year of studies in any program at Dalhousie University. To be eligible, candidates must demonstrate financial need, hold good academic standing, and demonstrate involvement in their community.

Eligibility: Available to entering and current undergraduate students who are permanent residents of Africa.
Application Type: Automatic Consideration – No Application Required

Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

Charles A. Smith Memorial Bursary

Charles A. Smith was a Black Nova Scotian born in 1926. He pursued his career on the railway, starting as a sleeping car attendant and retiring at a senior level in customer service with Via Rail. This renewable bursary will be available to assist one or more Nova Scotia Black students who are single parents enrolled in undergraduate studies at Dalhousie.

Eligibility: Available to Black undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need, have satisfactory academic standing, and be residents of Nova Scotia. See award description for specific eligibility requirements.

Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

South House Sexual and Gender Resource Centre Bursary

The South House Sexual and Gender Resource Centre, formerly the Dalhousie Women's Centre, was founded in recognition of women and trans people's common and diverse needs. The South House recognizes that you cannot work for a society free of sexism and patriarchy without also working for a society free of all forms of oppression. The South House supports women and all people dealing with oppression on the basis of sexuality and gender. South House believes in working together for the creation of a society that is vibrant and safe for people of all genders. The funds available will be distributed according to identified need. Bursaries are given out in sums between \$25 and \$250. Available funds are split between applicants. See <http://southhousehalifax.ca/> for an application form.

Application Type: Contact the Department, School, or College for more information

Betty Spencer Scholarship

Betty Spencer was born in Saint John, New Brunswick in 1916. She graduated from Saint John Vocational School and worked for a time at Wasson's Pharmacy where she met her husband. They retired in Bangor, Maine and later in St. Andrews, New Brunswick. Although Betty had no specific connection to Dalhousie, she generously bequeathed this endowment through her Will. Preference is given to students from the Atlantic provinces.

Eligibility: Available to entering and current undergraduate students (excluding the Faculty of Agriculture).
Application Type: Automatic Consideration – No Application Required

Application Type: Automatic Consideration – No Application Required

Faculty of Agriculture

Introduction

This Calendar is prepared some months before the year for which it is intended to provide guidance. The policies, procedures, and awards listed in this section are subject to continuing review and revision. Not all awards listed will be offered in any given year. Additionally, the number of awards offered, values of awards, and selection criteria may change without notice.

All Faculty of Agriculture Awards

Dr. Stewart R. Keddy Memorial Scholarship

Dr. Stewart Keddy graduated from the Nova Scotia Agricultural College in 1967. He credited the AC as giving him a strong academic start. This award is in his honor and recognizes the academic skill of a student interested in agriculture.

Eligibility: This award is for students enrolled in the Faculty of Agriculture who are studying on a full-time basis. Students must be in their second year (or later) of an undergraduate program (including technical or degree programs). They will have strong academic standing and demonstrate financial need.

Preference will be given to a student who attended high school in the Annapolis Valley.

Application Type: Faculty of Agriculture In-Course Award Application

CMM & PHP Natural Resource Bursary

The purpose of the CMM & PHP Natural Resource Bursary is to encourage First Nation/Aboriginal student interest in the environment and natural resource stewardship. PHP, along with CMM has recognized the need to support students in their endeavors to protect the environment and its resources.

Eligibility: Students enrolled full time at the Faculty of Agriculture. Preference is given for a student who demonstrates an interest in environmental protection or natural resource sustainability.

Application Type: Faculty of Agriculture In-Course Award Application

Application Deadline to Apply: Please visit dal.ca/scholarships

Friends of Alex Taylor Memorial Award

To honour the memory of Alexander Taylor, the Friends of Alex Taylor Memorial Award will provide an annual award to a student with an interest in plant science and its relation to sustainability.

Eligibility: A full or part-time student enrolled in an undergraduate program at the Faculty of Agriculture in their second, third or fourth year, with a minimum GPA of 3.0. Preference is given to students that have taken courses related to plant science or agriculture and have demonstrated financial need.

Doug Bailey Memorial Bursary

Doug Bailey had a lengthy and successful career at Farmers Dairy (now Agropur). It began at what is now known as the Middleton Spreads Plant in 1968 when Twin Cities Dairy acquired J.D. MacKenzie's Limited. Doug held many managerial positions over the years, including General Manager of the Truro Cheese Plant and Vice-President and General Manager of Central Dairies in Newfoundland. He was appointed President and Chief Executive Officer of Farmers Dairy (now Agropur) in 1987, a position he held until his death in 1996. One of Doug's greatest strengths was his leadership ability, which he demonstrated not only with Farmers Dairy (now Agropur) but also throughout the industry. The Farmers Dairy (now Agropur) Board of Directors established this Bursary in memory of Doug.

Eligibility: Awarded to a technical, undergraduate, or graduate student at the Faculty of Agriculture who is a family member of an Agropur shareholder or employee. Selection criteria include leadership, extracurricular and community activities, financial need, and academic performance.

Application Type: Faculty of Agriculture In-Course Award Application

Application Deadline to Apply: Check dal.ca/scholarships for application deadline

Value: \$2,000

A. B. Banks Memorial Scholarship

This scholarship is given by friends and family in memory of A.B. Banks, a former Director of Livestock Services Branch, Nova Scotia Department of Agriculture and Marketing. Mr. Banks was highly dedicated to the agricultural industry throughout his 35 year career in Nova Scotia and elsewhere in Atlantic Canada. He was born and raised in the Annapolis Valley and graduated from the former Nova Scotia Agricultural College and the Ontario Agricultural College. His career included service with the Canada Department of Agriculture, the Newfoundland Department of Agriculture and Forestry and the Nova Scotia Department of Agriculture and Marketing. As one of the first agricultural representative in Nova Scotia, he served the counties of Colchester, Halifax, and Cumberland. He was a strong advocate of improved farm management skills and believed this to be an important key to improving agricultural production.

Eligibility: Awarded to the second year BSc(Agr) Animal Science student with the highest average from the first year of study.

Application Type: Faculty of Agriculture In-Course Award Application

Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: \$500

Bible Hill Garden Club Scholarship

The Bible Hill Garden Club, originally referred to as Hillcrest Landscape Club was first organized in January of 1947. The group was created to promote the improvement of home grounds, assist in the beautification of community grounds, local parks and schools. Over the years, the group has gained popularity and has grown from 17 members to over 60, mostly women who range in age of 50-60. The group contributes to the Faculty of Agriculture through help supporting students with the bursary they have created.

Eligibility: Available to current students who are permanent residents of the Truro area, in any undergraduate program at the Faculty of Agriculture, with preference given to students in at least the second year of study in Horticulture, preferably a landscape program. Selection criteria include academic performance and financial need.

Application Type: Faculty of Agriculture In-Course Award Application

Application Deadline to Apply: Check dal.ca/scholarships for application deadline

Value: \$500

Ali Brown Scholarship in Food Science

This scholarship is established to honour the memory of Ali Brown. Ali spent approximately 15 years of her life working towards improving and implementing food safety standards within the dairy industry. It was with a strong sense of ethics and determination that she had to walk the line between industry's goals and food safety for the public. This award salutes her dedication, determination, well rounded qualities and the spirit to succeed.

Eligibility: Recipient will be enrolled as a student at the Faculty of Agriculture, studying in any program in the Plant, Food and Environmental Science department. Recipients will have shown academic excellence. Preference for students with an interest in food science and/or food safety as demonstrated by having completed at least one food science or food safety course. Preference for students from Atlantic Canada as determined by where they attended high school. Preference for a student who identifies as female.

Application Type: Faculty of Agriculture In-Course Award Application

David W. Brown Memorial Scholarship

The David W. Brown bursary is an ongoing demonstration of appreciation to the foundation of the David Brown United Limited by Atlantic Poultry Incorporated formerly ACA Cooperative Limited. Initiated in November 25, 1976; the company has continued to fund an annual memorial scholarship.

Eligibility: Available to students who have graduated from a high school in Atlantic Canada and who are entering the second year of a technical program at the Faculty of Agriculture. Canard Conservation Undergraduate Scholarship

Dr. Charles Albert Eaves was born February 21st, 1908 in Liverpool England. Charles immigrated to Canada in March 1926 and in 1932 received his B.Sc. from McGill. In 1933 he attended Cambridge University on an I.O.D.E overseas scholarship before returning to McGill to receive his MSc. degree in 1937. On October 25, 2000, he received an Honorary Doctorate from Dalhousie University and the former Nova Scotia Agricultural College, now Dalhousie Faculty of Agriculture. The Canard Conservation Scholarships were established by Dr. & Mrs. Eaves to provide a graduate and undergraduate scholarship each year for students of Kings County focusing on environmental studies related to agricultural practices with particular reference to dyke land preservation and the general conservation of soil and water reserves.

Eligibility: Awarded to a student who is a permanent resident of Kings County, Nova Scotia, in the first or second year of the Bachelor of Science (Agriculture) program who is planning course and/or project work related to the environment. Selection criteria include academic performance, demonstrated interest in the environment, and career plans.

Donald E. Clark Memorial Scholarship

Professor Clark was born in Luchow, China in 1923 and came to Canada at the age of 15 months. In 1951 he graduated from the Ontario Agricultural College, B.S.A. (Honours). In 1962 while a member of the teaching staff at O.A.C. he received his M.S.A. from the University of Toronto. In 1968 he accepted a position with the NSAC as an Associate Professor and Head of the Agricultural Engineering Department. Donald was well known for his work with sprayers and zero tillage for corn production. He also served with distinction on such committees as the Canada Weed Committee, the Atlantic Herbicide Committee and the Atlantic Agricultural Engineering Committee. As a Professional Engineer and Agrologist, Donald was a charter member of the Canadian Society of Agricultural Engineers and in 1976 was elected President of this organization. As a result of Professor Donald E. Clark's sincere commitment to his chosen field of study, and his lifetime of contributions to both the NSAC and the Engineering community, a scholarship has been created in his memory.

Eligibility: Available to current students in their final year of the Diploma of Engineering program in the Faculty of Agriculture. Selection criteria include academic performance, interest, and aptitude in the engineering field.

Application Type: Faculty of Agriculture In-Course Award Application

Value: \$500

Class of 1950 Award Fund

The Class of '50 Award was first established in 2000 at the Class of 1950, 50th anniversary weekend celebration. President, Don Young and Vice-President, Jack Johnson spearheaded the campaign to get their classmates involved in their commitment to help future AC students. The group recognizes the difficulty that young students face to finance their post-secondary education, as they too faced similar challenges. After a great deal of preparatory work from Don, Jack and Cliff McIsaac, a proposal was created for the Class of '50 Award fund of to assist deserving students to "stick with it." The group of classmates have made and continue to make significant contributions to the campus and students.

Eligibility: Available to current students in financial need in any technical or undergraduate program in the Faculty of Agriculture.

Application Type: Faculty of Agriculture In-Course Award Application

Application Deadline to Apply: Check dal.ca/scholarships for application deadline

Value: \$1,000

Class of 1960 Memorial Bursary

In recognition of their 50th reunion, classmates established the Class of 1960 Memorial Bursary. Classmates contributed generously to this fund, with the intention of supporting an AC student. Their wish is to honour their deceased classmates who contributed to this fund, and who valued the experience and education they received at the Nova Scotia Agricultural College.

Eligibility: Awarded to a full-time technical or undergraduate student enrolled in any program at the Faculty of Agriculture who has demonstrated financial need.

Application Type: Faculty of Agriculture In-Course Award Application

Colonel Charles Coll Memorial Scholarship

The Colonel Charles Coll Memorial was established in memory of Col. Charles Coll Sr. He was the inventor, owner and president of Muskol Enterprises Limited. He manufactured and sold Muskol insect repellent first from his basement in his Truro, Nova Scotia home and later from his manufacturing plant in Hilden, just outside of Truro. In 1957 Charles concocted a perfume to apply to clothing while deer hunting and later registered a company. The deer lure was used by regular deer hunters, bow hunters, wildlife photographers and naturalists. Charles named the ingredient "Muskol" which derives from musk, an ingredient in the lure and the phonetic last name Coll. Federal and Provincial Departments of Fisheries, Resources, Mines, as well as many sportsmen and outdoors people still continue to use the Muskol Insect Repellent.

Eligibility: Available to students entering their final year of the Bachelor of Science (Agriculture) Animal Science program. Selection criteria include academic performance, involvement and interest in poultry, and achievement and contribution to 4-H.

Charles M. Collins Memorial Scholarship

The scholarship is in memory of Charles McKittrick Collins who spent the years 1936-1962 working in various positions in the agricultural industry in Nova Scotia, including teaching at Dalhousie's Agricultural Campus for twenty-five years. Collins Horticultural Building on the Dal-AC campus is named in his honour as well.

Eligibility: Available to current students studying Horticulture in any undergraduate program in the Faculty of Agriculture, with preference given to students studying in the Bachelor of Technology program in Environmental Landscape Horticulture who have not qualified for other significant awards.

Application Type: Faculty of Agriculture In-Course Award Application

Application Deadline to Apply: Check dal.ca/scholarships for application deadline

Value: \$1,200

George and Lottie Cook Memorial Scholarship

Lottie Cook first developed her passion for agriculture on her family farm on Cape Breton Island. Lottie's parents were pioneers in the agricultural industry, and her father a renowned farmer. At a young age Lottie became involved in 4-H where she achieved some of the club's top honours. She later graduated from the former Nova Scotia Agricultural College and worked as an assistant agricultural representative to J.C.F MacDonnell for many years. In 1943 Lottie married George Cook and the pair later opened a chick hatchery in Truro and became one of the foremost producers of high quality chicks in the Maritime Provinces. After the passing of her husband in 1954, Lottie continued to operate the family business. Due to Lottie's involvement in the agricultural industry and former NSAC community from both herself and family business, a scholarship has been created in her and her husband's name.

Eligibility: Available to students from Nova Scotia in the first or second year of a technical or undergraduate program at the Faculty of Agriculture. Selection

criteria include academic performance and financial need.

Dalhousie Agricultural Students' Association Awards

Dalhousie Agricultural Students' Association (DASA) is the student association for all students at the Dalhousie Agricultural Campus. DASA is the official voice of the student body, and provides leadership and vision for the students of the Agricultural Campus. DASA promotes student engagement and leadership through various campus activities including Orientation, Shinerama, College Royal and Winter Carnival. DASA also promotes student engagement within the surrounding communities of Truro and Bible Hill. DASA works closely with Student Services and Administration to collectively provide a welcoming community dedicated to higher learning and service to the community.

Eligibility: Awarded to students enrolled in the Faculty of Agriculture who have demonstrated, in the current academic year, exceptional school spirit and involvement in any or all of the following: DASA sponsored events, volunteering, campus community leadership.

Application Type: Automatic Consideration – No Application Required

Value: 2 @ \$300

K. de Geus Memorial Prize for Plant Science

The K de Geus Memorial Prize was created in memory of Klaus de Geus. Klaus, met his wife, Christina "Tina" de Geus, in DeBeemster, The Netherlands. Klaus and Tina immigrated to Canada in 1957 with their three children, Gram, Louise, and Tineke. When they arrived in Canada, they decided to settle in Nova Scotia where they made a new life for their family, including setting up and running a successful flower shop and landscaping business in Bridgetown. Tina took great pleasure in her work as a floral designer. Over the years, she gave many demonstrations on all aspects of floral designing. This led to a career in teaching floral design in the continuing education department of the former Nova Scotia Agricultural College.

Eligibility: Awarded to a graduating technical student from the Faculty of Agriculture, based on high standing in course work, with preference to students in the Horticultural field.

Application Type: Automatic Consideration – No Application Required

The Honourable W. H. Dennis Memorial Prizes for Literary Compositions in English

Two prizes known as the Joseph Howe Prizes are offered each year. First prize \$250, second prize \$150, for a poem or collection of poems of any length greater than one hundred lines. Two prizes known as the James DeMille Prizes are offered each year, one of \$250 for an essay, the other of \$250 for a prose short story.

Eligibility: Available to any full-time undergraduate or graduate Dalhousie student who submits the best essay, short story, or collection of poems.

Year of Study: 2, 3, 4

CA Douglas Bursary

The CA Douglas Bursary was originally established in 1984 in recognition of the impact of Charles Allan Douglas on the Agriculture industry in Nova Scotia. Charles held positions at Scotsburn Creamery, Avon Valley Greenhouse Farm and had a 35 year career with the Department of Agriculture and Marketing. Charles had a unique ability to inspire leadership and confidence in those around him, as he was very conscious of the importance of the individual. He devoted untiring energy to supporting rural youth and community development. As a result of his dedication and commitment to new technology, and his leadership and desire to relate to the individual Charles was inducted into the Atlantic Agricultural Hall of Fame in 1979 and honored with a bursary in his memory.

Eligibility: Awarded to a BSc(Agr) student enrolled full-time in the third or fourth year of study who has demonstrated financial need. Preference is given to students majoring in Animal Science.

Application Type: Faculty of Agriculture In-Course Award Application

Eastern Veterinary Technicians Association Bursary

The Eastern AHT Association represents AHTs and similar persons especially those working in the field of veterinary practice in the four Atlantic Provinces. Formed in 1989 it now numbers approximately 55 members including over 20 students enrolled in the AHT program at the Agricultural Campus. The EHTA Bursary is awarded annually to an AHT student entering the third year of the program based upon all-around performance, but with special reference to clinical ability.

Eligibility: Awarded to a student who best demonstrates proficiency in veterinary clinical skills during their first year and externship at the Atlantic Veterinary College as part of the Veterinary Technology program. Students must be in good academic standing and demonstrate financial need.

Application Type: Faculty of Agriculture In-Course Award Application

Application Deadline to Apply: Check dal.ca/scholarships for application deadline

Value: \$200

Paul C Eaton Memorial Scholarship

Paul C. Eaton was an alumnus, Class of '48, at the former Nova Scotia Agricultural College. Growing up on a dairy and apple farm, Mr. Eaton understood the importance of agriculture, and devoted his life to this passion. Mr. Eaton spent the majority of his career working in Extension Services on the Agricultural Campus.

Eligibility: Awarded to a full-time student from Atlantic Canada in the second year or higher of the BSc(Agr) program majoring in Environmental Sciences or Plant Science. Recipients must have a background in agriculture or come from a family farm. Selection is made on the basis of academic merit.

Application Type: Faculty of Agriculture In-Course Award Application

Application Deadline to Apply: See dal.ca/scholarships for application deadline

Value: at least \$2,500

Ernest L. Eaton Memorial Scholarship

Throughout Mr. Eaton's lifetime he maintained a keen interest in scientific agriculture, and the education and development of the interested young people. He personally established the Ernest L. Eaton Scholarships, and made provision for them to continue in perpetuity. Although none of his children are directly active in farming, they all are interested in, and support, the fine work being done at present at the Agricultural Campus. The hope for the recipient of the Ernest L. Eaton Scholarship is to encourage the pursuit of excellence in both academic and scientific activities.

Eligibility: Available to students entering third year of the Bachelor of Science (Agriculture) program based on performance in second year. Recipient cannot have received another scholarship of higher value.

Application Type: Faculty of Agriculture In-Course Award Application

Application Deadline to Apply: Check dal.ca/scholarships for application deadline

Value: \$1,000

Noel Enman Memorial Award

To honor the memory of Noel Enman, a former Agricultural Campus Animal Science Technician-Agricultural Technology student, 1979-1982, the Alumni Association has established a fund for the Noel Enman Memorial Award.

Eligibility: Awarded to a graduating technical student from the Faculty of Agriculture whose personality and fellowship have contributed to student life and activities, thereby gaining the respect of the students and faculty.

Application Type: Automatic Consideration – No Application Required

Faculty of Agriculture Mature Student Bursary

At the Faculty of Agriculture, the student body demographics have shifted dramatically over the past generation. We have increasingly more students transfer from other institutions or begin studies as a visiting or mature student. The 2012 Annual Appeal for the Faculty of Agriculture focused on raising funds for an endowment that would benefit mature students. In addition, alumnus Charles MacQuarrie directed that his planned gift benefit Faculty of Agriculture mature students.

Eligibility: Students enrolled at the Faculty of Agriculture in full-time studies who demonstrate financial need and are mature students (as defined by the Registrar's Office).

Application Type: Faculty of Agriculture In-Course Award Application

Application Deadline to Apply: See dal.ca/scholarships for application deadline

Value: at least \$1,000

Fall River Garden Club Bursary

The Fall River Garden Club's mission is to promote the improvement of home and community flower and vegetable gardens, lawns, trees and landscaping through friendly sharing of information, work and education. During the year they run fund raising events in order to raise money to beautify the neighborhoods. Their main fundraiser is their annual plant sale followed by an area garden tour whereby members open their gardens for viewing to the general public. The monies raised at these events go towards supporting Santa's Express and giving a Bursary to a student at the Agriculture Campus studying horticulture. In addition, the gardens maintained in the surrounding areas are also funded from these events.

Eligibility: Available to a first year student in a Horticulture program at the Faculty of Agriculture in good academic standing, with preference given to students from the Fall River, Waverley, Wellington, Oakfield, Lakeview or Windsor Junction, Nova Scotia areas. Other residents of Nova Scotia will be considered. Applicants will have demonstrated financial need and well-developed career plans.

Application Type: Faculty of Agriculture In-Course Award Application

The Irving and Jeanne Glovin Award

The Oskar Schindler Humanities Foundation established this award in 2003 to support research into the meaning and principles underlying “good human conduct”. Students enrolled in any major discipline, for example, Languages, Social Sciences, Humanities and Performing Arts, or any interdisciplinary program, for example, Canadian Studies, European Studies, Gender and Women Studies and IDS are encouraged to apply. The recipient will preferably have broad general education and interdisciplinary interests appropriate to the research topic chosen.
Eligibility: Available to a full-time student in the final year of any undergraduate program or any year of a graduate program at Dalhousie University.
Application Type: Contact the Faculty for more information
Application Deadline to Apply: mid-February

Governors' Awards

In 1992, to mark the 125th anniversary of the founding of the Dalhousie Student Union, and to recognize students' contribution to the quality and vitality of the University, the Board of Governors established a set of awards to be known as Governors' Awards. Up to four awards can be made each year, for exceptional contributions or leadership in the extracurricular realm in such areas as university governance, development of a sense of community on campus, community service, internationalizing the campus, visual or performing arts, minority access or athletics. To be eligible, students must have a minimum cumulative GPA of 3.0 or equivalent. Otherwise, all students - undergraduate, graduate, or professional faculty students, full or part-time, at any stage in their academic career, may be considered for an award. Information is available on the Student Services website.
Application Type: Contact the Department, School, or College for more information

Jennifer Hayes Starratt Scholarship

The Jennifer Hayes Starratt Scholarship was created by Jennifer's husband, Mark, as a Christmas gift. Jennifer Starratt attended the Agricultural campus and graduated in 1996 with a Bachelor of Science in Agriculture. According to her husband the Agricultural campus holds a very special place in Jennifer's heart and having a scholarship created in her name, is something very special to her. Due to the couple's success in their professional lives, they were able to create a legacy to give back to the communities that have helped enrich their lives.

Eligibility: Available to female students entering their final year of the Bachelor of Science (Agriculture) program, with preference given to students who have completed their first three years at the Faculty of Agriculture. Selection will be based on academic performance, leadership, and involvement in campus activities. The scholarship will not be awarded to a student receiving other significant scholarships.

Value: \$1,500

Anna Helvig Schousboe Memorial Scholarship

This scholarship was established with the Department of Agriculture, Fisheries and Aquaculture, Government of New Brunswick, in memory of Anna Helvig Schousboe. Anna and her husband Gustav emigrated from Denmark in 1928 and became lifelong Kings Co. NB farmers and also very active in their community. Always strong believers in the value of education, after her death in 1993 Gustav endowed this scholarship in her memory to assist New Brunswick youth in pursuing studies in the agricultural field.

Eligibility: Awarded to a resident from Kings County, New Brunswick, working towards a degree or diploma in agriculture at the Faculty of Agriculture.

Applicants must be permanent residents of Kings County, New Brunswick.

Application Type: Faculty of Agriculture In-Course Award Application

Application Deadline to Apply: Check dal.ca/scholarships for application deadline

Value: \$500

John Higgins Memorial Scholarship

John was a founding member of The Atlantic Association of Landscape Designers in 1992. He was instrumental to the development of Canada's first ever Certification Program for Landscape Designers, which was available to all designers in the Atlantic Region, and pre-empted the National Certification Program by several years. John Higgins' dedication and enthusiasm for the Landscape Design Industry throughout his career was unfaltering, his contributions immeasurable. It is for these reasons that AALD decided to offer a Design Scholarship for students attending the AC, to be dedicated in his name. The Atlantic Association of Landscape Designers hope is that, in part through this scholarship, his legacy will live on.

Eligibility: Available to students entering third year of the Bachelor of Technology in Environmental Landscape Horticulture program in the Faculty of Agriculture. Selection criteria include academic performance and skill and interest in landscape design.

Application Type: Faculty of Agriculture In-Course Award Application

Value: \$500

Eileen Holden Scholarship

To provide financial support for an undergraduate student.

Eligibility: Awarded to an undergraduate student who has graduated from a high school in/near Lunenburg County, NS. Preference is given to students who graduated from Bridgewater Jr/Sr High School or Park View Education Centre.

Application Type: Automatic Consideration – No Application Required

Dr. Bill Jenkins Memorial Scholarship

Bill's career began early and always had the same theme; to improve farm management and education. He held numerous positions with the Provincial Department of Agriculture, the Faculty of Agriculture at Dalhousie University, as well as Chairman of the Nova Scotia Farm Land Settlement Board. Bill retired as Principal of the former NSAC (now Dalhousie Faculty of Agriculture) in 1972 after witnessing growth in both the level and training for all sectors of the agricultural industry. He then joined the staffs of the Council of Maritime Premiers' Higher Education Commission, Services Overseas (CESO) in 1992. As a result of Bill Jenkins sincere commitment to his chosen career path, and his lifetime of contributions to both the AC and the Agricultural Industry, a scholarship has been created in his memory.

Eligibility: Available to students entering second or third year in any of the business degree programs in the Faculty of Agriculture. Selection criteria include overall academic performance, leadership, and financial need.

Application Type: Faculty of Agriculture In-Course Award Application

Joyce Family Foundation Agricultural Bursary

The Joyce Family Foundation Agricultural Bursaries were established to create an endowed bursary program to ensure students with financial barriers are able to access and succeed at the Faculty of Agriculture.

Eligibility: Must be a Canadian Citizen or Landed Immigrant, enrolled in any year of undergraduate study at the Faculty of Agriculture, has demonstrated financial need, and be in good academic standing.

Application Type: Faculty of Agriculture In-Course Award Application

Application Deadline to Apply: Visit dal.ca/scholarships

Randy and Gladys Keddy Memorial Scholarship

The Randy & Gladys Keddy Memorial Bursary was established by their son, Stewart Keddy in memory of his parents to provide an on-going legacy that is meaningful for family members and friends. Stewart graduated from the Faculty of Agriculture in 1967, from McGill University in 1969, and from Dalhousie Dentistry in 1974, where he was recognized for excellence in endodontics and radiology. Stewart practiced as a dentist for 37 years. He served in the Dental Corps from 1974-1979 and was a founding partner of Purdy's Wharf Dental Group from 1985 until his retirement in 2011. He held memberships in the Nova Scotia Dental Association, Canadian Dental Association, and Academy of General Dentistry.

Eligibility: Available to students entering second year of a diploma program or the third year of a degree program in the Faculty of Agriculture, with preference given to students from the Annapolis Valley of Nova Scotia with farm backgrounds. Awarded to a student whose background, program of study, course and project work and summer employment show a genuine interest in working in the agricultural industry following graduation. Selection criteria include career goals, academic performance, and financial need. Students receiving other scholarships of greater value will not be eligible for this scholarship.

Value: \$1,000

Ketchum Manufacturing Company Limited Prize

Zebulon Ketchum, an Ottawa, Canada based inventor and former professional lacrosse player turned his love of tinkering into a successful business. He owned a bicycle shop in downtown Ottawa and eventually grew and expanded that business into other products including becoming the first provider of the new "horseless carriage" in the nation's capital. However, it was his inventor's nature that led him to the genesis of the Ketchum business which was metal identification tags to be used in the livestock industry. The company has become the world's leading supplier of tags used to identify and trace the origins of wild caught and farmed seafood and they continue to be a metal stamping company as well and currently produce numerous metal products for various industries around the world. The business started on a rural farm outside of Ottawa and when it moved it found itself in the middle of the city. What started as a niche business serving the local agricultural community spread regionally, then nationally, and now competes in almost every market of the world.

Eligibility: The Ketchum Manufacturing Company Limited Prize is awarded to a graduate of the Animal Science option.

Application Type: Automatic Consideration – No Application Required

Kings Mutual Insurance Scholarships

In memory of Past Directors, the Kings Mutual Insurance Company awards scholarships to students in the Faculty of Agriculture. The Kings County Federation of Agriculture represents the interest of the agricultural community in Kings County and is an active voice for its 395 members with the Nova Scotia Federation of Agriculture, Council of Leaders and provincial and national governments.

Eligibility: Available to students in any technical or undergraduate program in the Faculty of Agriculture. Applicants must be permanent residents of Nova Scotia. Selection criteria include financial need, academic performance, and demonstrated interest in a career in the Agri-food industry as reflected by summer employment and/or extra-curricular involvement. This scholarship is not available to students receiving other scholarships of greater value. At least one scholarship will be awarded annually to a technical-level student.

Application Type: Faculty of Agriculture In-Course Award Application

Application Deadline to Apply: Check dal.ca/scholarships for application deadline

Value: \$1,000

P. Max Kuhn Scholarship

P. Max Kuhn grew up on a small farm in Lawrencetown, Halifax County. He lived from 1887 until 1928 and was the father to Bernard G. Kuhn. Max attended one year of the former NSAC General Course in 1908-1909. He was not able to return the next year because of need for him at home and shortage of funds, it was a great disappointment to him. That year was his only year of formal schooling; his home was so isolated that he was never able to attend grade school or high school, and his mother taught him at home. Max was a dedicated, hard-working farmer, and he made great use of his AC training. He bought his own Manor Hill Farm in 1918, located on Woodlawn Road (Portland Street) just outside what were then the town limits of Dartmouth. He market-gardened and ran a dairy there until his death. It was Bernard's wish to establish this scholarship to recognize his father, Max, give education opportunity to others beyond what his father had, and to "repay Nova Scotia, former NSAC and Canada in small part for the education and support that he received here" (Bernard G. Kuhn).

Eligibility: Available to students in any undergraduate program in the Faculty of Agriculture at Dalhousie, with preference given to students who have completed at least one year of study. Applicants must be permanent residents of Nova Scotia, with preference to students from the Halifax Regional Municipality. Awarded to a student with a farm background or those whose course and project work and summer employment demonstrates an interest in working in the agriculture industry after graduation. Selection criteria include financial need and academic performance.

Value: \$2,000

Landscape Nova Scotia Award

Landscape Nova Scotia's mission is to promote high standards in product quality, professional service and conduct in the horticultural trades industry; and to encourage the use of Association members by the public. Landscape Nova Scotia has been a voice for the landscape and horticultural industry for more than 20 years in Nova Scotia, and are committed to providing consumers with options to make informed decisions.

Eligibility: Available to students in a landscape-related undergraduate program in the Faculty of Agriculture. Selection criteria include academic performance and financial need.

Application Type: Faculty of Agriculture In-Course Award Application

Application Deadline to Apply: Check dal.ca/scholarships for application deadline

Value: \$750

Langille Brothers Scholarship

Alan Langille graduated from the Nova Scotia Agricultural College in 1958 and went on to have a career as a plant physiologist and professor at the University of Maine. Alan makes this scholarship possible in memory of his two older brothers, both also NSAC Alumni. Bruce Langille (grad 1946) went on to work as a chemist for the Plant Products Lab in Ottawa. Jim Langille (grad 1947) went on to a career as an Agronomist for Nappan Experimental Farm.

Eligibility: Awarded to a third year BSc(Agr) student majoring in Plant Sciences. Preference will be given to students who have completed their first three years of study at the Faculty of Agriculture. Awarded based on academic excellence and financial need.

Raymond Loo Memorial Scholarship in Organic Agriculture

Raymond Loo was a certified organic farmer from Springfield, PEI where he operated Springwillow Farms. Ensuring there was room for wildlife on the farm and exploring ways to produce healthy food with the smallest environmental impact was very important to Raymond. Committed to promoting better farming practices in his community, he was a founding member of ACORN and board director for 6 years. Raymond also helped found and was the first president of the PEI Certified Organic Producers Cooperative. Raymond was dedicated to his province and the field of organic agriculture and was recognized greatly for his contributions.

Eligibility: Awarded to an undergraduate or technical student at the Faculty of Agriculture enrolled in at least one organic agriculture course offered on the Dalhousie Agricultural Campus.

Application Type: Faculty of Agriculture In-Course Award Application

The Robert and Katherine MacDonald Award

An endowment has been established to provide an annual prize for Chinese students at Dalhousie. The recipient will be engaged in undergraduate studies and be a member of the Dal-TUNS Chinese Students' Association or its successor. The recipient will have demonstrated good academic achievement combined with leadership qualities and contribution to University life. The Association will recommend a candidate or candidates to the Head of Student Services.

Eligibility: Available to an undergraduate Chinese student who is a member of the Dalhousie Chinese Students and Scholars Association.

Application Type: Automatic Consideration – No Application Required

C. C. MacDougall Memorial Scholarship

C.C. MacDougall was the first district agriculturist to work with the NB Department of Agriculture in Sussex. The C.C. MacDougall Memorial Scholarship was established in 1958 by a large group of agriculture groups.

Eligibility: Available to current students in any undergraduate program in the Faculty of Agriculture. Awarded to a student pursuing a degree or diploma in Agriculture. The recipient must have been a 4-H member from Kings County, New Brunswick, or have parents who raise or breed Guernseys anywhere in New Brunswick.

Application Type: Faculty of Agriculture In-Course Award Application

Value: \$250

Danny MacEwen Memorial Scholarship

Danny was an example of what typifies a farmer – not afraid of hard work, willing to give everything he had even if the financial return wasn't always there, and proud of what he did for a living and never made an excuse for it. Danny was also very involved with the community and those who lived in it. He enjoyed not only showing off his many talents but also found great satisfaction in teaching others. Although he was not known for his patience, he strived hard to achieve the best at whatever he did. Danny will always be remembered for his passion for farming, and the agricultural world is a better place because of what he gave.

Eligibility: Awarded to a BSc(Agr) student majoring in Agricultural Business who has a background in agriculture or comes from a family farm. The recipient will be involved in the community and athletics, either at the Faculty of Agriculture or in the local area.

Application Type: Faculty of Agriculture In-Course Award Application

Application Deadline to Apply: Check dal.ca/scholarships for application deadline

Value: \$1,000

Dr. Allan and Barbara MacKay Scholarship

Born in Heathbell, Pictou County, Nova Scotia, Dr. Allan MacKay received his early agricultural experience on the Spruce Grove Farm that had the distinction of having one of the first purebred Guernsey herds in Canada. He was a member of the Scotsburn Junior Dairy Calf Club and represented his province in the National competitions for club members at the Royal Winter Fair in Toronto in 1941. Dr. MacKay received his primary education at Heathbell School and his secondary education at Pictou Academy. He graduated from former N.S.A.C. in 1943 and obtained his Doctor of Veterinary Medicine from the Ontario Veterinary College in 1951. That same year he established a veterinary practice in Pictou County and continued his work until his retirement in 1991. Dr. MacKay is honoured for his program of animal health care, for his philosophy of preventing disease problems before they occur and his dedication to farm families in the area he served.

Eligibility: Awarded to a student with strong academic performance from the Faculty of Agriculture who plans to study veterinary medicine at the Atlantic Veterinary College.

Paul R. MacPhail PEI Potato Industry Scholarship

The roots of the Prince Edward Island Potato Board can be traced as far back as 1920, when the first Potato Growers' Association was formed on Prince Edward Island. A true marketing board followed in 1950 and was restructured as a producer controlled board under the Natural Products Marketing Act in 1990. The PEI Potato Board established this award in memory of Paul R. MacPhail.

Eligibility: Awarded to a PEI student studying at the technical or undergraduate level of an agricultural program. The recipient will demonstrate an interest in working in the potato industry through course work, research projects related to potato production and utilization (including all disciplines, e.g. pathology, biotechnology, entomology, etc). Awarded based on academic performance and the project's relevance to the improvement of the potato industry.

Bill Mathewson Memorial Award

Bill Mathewson grew up on a hill sheep farm in Sma Glen, Scotland. He graduated with a BSc (Agriculture) in 1949 and later (1974) a MSc. both from Aberdeen University. On graduation 1949, he joined H.M. Overseas Civil Service. After further training in Cambridge and Trinidad, he was posted to Tanganyika, Africa where he worked for 14 years. On retirement in 1965, he worked for three years with the N.F.U. of Scotland in Edinburgh before immigrating with his family to Nova Scotia in 1968. He taught for 20 years at the Faculty of Agriculture. Bill retired in 1988 and was honored by his colleagues by being made Professor Emeritus. Much loved by students, faculty and the agricultural industry, Bill will be greatly missed. It is with his memory in mind, that Bill's friends and colleagues at the AC launched an award in his name.

Eligibility: Available to any student registered in any program at the Faculty of Agriculture participating in an international experience. In applying for consideration, students will submit a proposal to participate in such activities as a study semester abroad toward their degree/diploma, attendance at a conference to make a presentation, a specialized training course or an internship or development project.

Value: \$1,000

Donald McInnes Award

Established in 1904, Pictou Mutual Insurance Company is the oldest mutual insurance company in Nova Scotia. Initially established by a group of farmers who sought to provide local protection for each other in the event of loss, their company has grown to include more than 3,500 local and rural policyholders. Donald McInnes was born in 1933 on the original McInnes farm on Scotch Hill Road. A graduate of Pictou Academy high school, he attended the AC, graduating in 1955. As a shareholder of Scotsburn Co-op, Donald served as Director for 22 years and Chairman of the Board for 15 years. For 35 years Donald was active in the Pictou County Farmers Mutual Fire Insurance Company. Donald served first as an agent, then as a director and manager of the company. Due to Donald's sincere involvement with both the community and Pictou Mutual Insurance Company, an award has been created in his name which is funded by Pictou Mutual Insurance.

Eligibility: Available to a student enrolled at the Faculty of Agriculture. Selection criteria include commitment to and involvement in the community and leadership provided in student activities, academic performance and financial need. A student may not be selected for this award more than once.

Value: \$100

Clint McLean Memorial Scholarship

The Clint McLean Memorial Scholarship was established by Clint's loving family, with contributions from his many friends and colleagues. Clint loved life and had many interests including entertaining, fine cooking, travel and music. To Clint family was everything; no amount of trouble, sacrifice, or inconvenience was too much. However, his heart was in agriculture. He lived and breathed agriculture, but dairy had a special corner in his heart. Not only did he talk the talk, he walked the walk. Clint was a graduate of NSAC (Class of 1979) and Guelph University. He was also an active member of his alumni associations, serving as Vice President and President for the Agriculture College Alumni. Clint served on the Agricultural Institute of Canada Board of Directors and on numerous institute committees. He served as the chair of the Atlantic Forage Crops Advisory committee and represented the Atlantic Provinces at the National Expert Committee on Forage. Clint was a distinguished and valued member of the NB Department of Agriculture, taking a leading role in innumerable initiatives to support the true stewards of the land; the farmers of Atlantic Canada. His career was that of a scientist with a human touch.

Eligibility: Awarded to a third or fourth year BSc(Agr) student, with a preference to a student from New Brunswick and a preference to a student involved in the study of dairy. Recipients will have strong academic standing and demonstrate financial need.

John Reginald (Reg) Moore Memorial Scholarships

Reg Moore was born in Economy Nova Scotia on August 25, 1917; the fifth of six children. He was educated in Economy and Bass River graduating in 1935. Reg then enrolled in Normal (Teachers) College in Truro. He taught in various locations in Nova Scotia until called up for service in the Royal Canadian Air Force in 1940. Reg served as a staff pilot and as a Coastal Command pilot in Canada and the United Kingdom. Returning to Canada in 1945 Reg enrolled in the Nova Scotia Agricultural College (now the Faculty of Agriculture, Dalhousie University). He graduated from the former NSAC in 1947. Reg spent his entire post war career at the FCC. First as a Credit Advisor, then as Branch Manager for Nova Scotia. In 1960 he was transferred to Saint John, New Brunswick as Executive Assistant to the Regional Manager Atlantic. By 1962 Reg had tired of doing office work and transfers (four in three years) so requested a transfer to field duties where he would have day to day contact with farmers. He was assigned to the Sussex, NB Office where he completed his career, retiring in 1981.

Eligibility: Available to current students in any undergraduate program in the Faculty of Agriculture, with preference given to students studying in a full-time capacity. Applicants must be permanent residents of Colchester County, Nova Scotia and will have completed at least one year of study. Selection will be based on financial need and a cumulative average of at least 3.00.

A. C. Neish Memorial Trust Scholarship

Dr. Neish (1916-1973) was an undergraduate at the former Nova Scotia Agricultural College in Truro. This is where he had his first contact with science and where he had won the Governor General's Medal and a Macdonald College (Quebec) Scholarship. His work on fermentation, bacterial and plant metabolism and the biosynthesis of plant polysaccharides and lignins received international acclaim. He was a Fellow of the Chemical Institute of Canada, of the Royal Society of Canada, and the Royal Society of London. Dr. Neish was the first person to be awarded the Gold Medal of the Canadian Society of Plant Physiologists, and was awarded an honorary doctorate by Mount Allison University and an honorary Doctor of Science degree by McGill University. The A.C. Neish Memorial Trust Scholarship was established by friends, admirers, and colleagues of the late Arthur Charles Neish.

Eligibility: Available to students entering their final year of the Bachelor of Science (Agriculture) program. Selection criteria include high academic performance and qualities of leadership as indicated by participation and achievement in both academic and non-academic activities.

Value: 2 @ \$1,000

Nova Scotia Mink Breeders Association Award

Dr. Bruce Hunter passed away on October 19th, 2011 at the age of 61. He was a leading veterinarian in the fields of avian and furbearer disease, and an integral part of the Canadian mink industry, serving as director of research for the Canada Mink Breeders Association. He was a longtime champion of integrating animal, human and environmental health at OVC and around the world. He played a key role in setting up a Canadian Community Practice in EcoHealth (CoPEH) and a graduate-level course in ecosystem approaches to health involving U of Gm the University of British Columbia and Université du Québec à Montréal. Recently, he was co-leader of a poultry project in Ghana for Veterinarians Without Borders/Vétérinaires Sans Frontières-Canada. This year, he received the Aeroplan Volunteer of the Year Award from VWB/VSF in recognition of his work and commitment. The Nova Scotia Mink Breeders Association established this scholarship in memory of Dr. Bruce Hunter, a retired veterinarian from Ontario Veterinary College and recognized expert on naturally occurring diseases in mink. This scholarship will recognize students who have an interest in mink.

Eligibility: Available to current students in any Animal Science-related undergraduate program in the Faculty of Agriculture, with preference given to a student whose course/project work demonstrates an interest in the mink industry.

Donald Palfrey Award

The Don Palfrey Award was established in memory of Don Palfrey in recognition of his many years of service and contributions to weed science in Nova Scotia. Don was born in Fort Fairfield, Maine. He received his formal education in Pictou County and he graduated from the AC in Truro, Nova Scotia and from McGill University in Montreal, Quebec with a Bachelor of Science in Plant Pathology. He worked for the N.S. Department of Agriculture in Marketing for 37 years, retiring as Supervisor of Weed Science, where he was a key player and helping in pioneering work in extension and research in weed control in Nova Scotia. Don also taught at the AC for 18 years, teaching courses in Weed Control and Plant Pathology. He was a distinguished life member of the N.S. Institute of Agrologists and the first honorary life member of the Atlantic Vegetation Management Association. As a result of Don Palfrey's sincere commitment to the Department of Agriculture and his field of interest, an award has been created to honor his memory and legacy.

Eligibility: Awarded to a final year undergraduate student carrying out a research project in the area of pest management, with preference to a student involved in weed science, either through academic work or summer employment.

Value: \$1,200

Passionate Plants Person Award

In 1976, with two passionate plants men – the late Don Craig and the late Captain Richard Steele – as founding members, they began as RSCAR, the Rhododendron Society of Canada Atlantic Region. They were one of three regions, the other two being Niagara and Toronto. When Niagara and Toronto decided to join the American Rhododendron Society in the 1980s and RSC ceased being its own organization, the three regions – Atlantic, Niagara, and Toronto – became the 3 chapters in District 12 of the ARS. In 2003, they formed the Atlantic Rhododendron & Horticulture Society, to reflect the diversity of plant interests among local gardeners and plants people, while maintaining a central interest in rhododendrons and other ericaceous plants. They are a non-profit society registered in Nova Scotia.

Eligibility: Available to students entering second year of the Environmental Horticulture diploma program in the Faculty of Agriculture who are permanent residents of Nova Scotia. Preference is given to students whose passion for plants is infectious and will most impact the way we regard and understand plants in both public and private environments. The student should also demonstrate leadership abilities and financial need.

Stuart Rath Junior A Bearcat Hockey Education Award Fund

The Stuart Rath Truro Bearcat Education Awards have been established to encourage the pursuit of university education among players with the Truro Junior A Bearcat Hockey Team ("The Bearcats") by providing tuition support for players enrolled at Dalhousie University. Stuart Rath, a very involved community member of Colchester County and surrounding area, established The Bearcat Hockey Education Award. Some of Stuarts endeavors are as follows: he serves as the Vice President of Truro Centre Ltd, and the President of Stuco Holdings Ltd. From 1985-1995 Stuart served as the President of Halifax Cablevision Ltd, from 1976-1985 he served as the President and General Manager of Eastern Cablevision, and from 1960-1975 he was the Chairman of the Truro Industrial Society. A few of Stuarts other accomplishments are being Director of Nova Scotia Business Inc. since March 2007, Director of Morien Resources Corp since December 1997, as well as serving as Director of Stuco Holdings Ltd. and Director of Erdene Resource Development Corporation since June 2006 until November 2012.

Eligibility: Available to entering or current technical and undergraduate students at the Faculty of Agriculture. Selection is based on academic performance and the recommendation of the team coaches.

Cliff and Grace Retson Memorial Scholarship

The Grace and Cliff Retson Memorial Bursary was first created by Grace in memory of her husband, Cliff Retson who graduated from the AC in 1934. Cliff passed away in 1997. Grace was born in Waskada, Manitoba and grew up in Kerrobert, Saskatchewan. She attended secretarial school in Saskatoon and after retiring, she received her Bachelor of Arts from St. Mary's University. Grace met Cliff, her husband of 56 years, while she was working at the Senate in Ottawa. They married on July 26, 1941 and moved to Truro in 1947. The Retson's (Grace & Cliff) hosted several international students studying at the Faculty of Agriculture over the years. It is for this reason and to ensure ongoing support of the educational interests of International students studying at Dal-AC, that Grace created the scholarship.

Eligibility: Available to international students in any undergraduate program at the Faculty of Agriculture. Selection criteria include financial need, academic performance, and interest in and involvement in multi-cultural activities on campus.

Ira L. Rhodenizer Memorial Scholarship

Ira Rhodenizer was born in 1890 in Parkdale, Lunenburg County, Nova Scotia and lived there for the majority of his life. He served in the Canadian Army from 1914 to 1919 and was wounded overseas during World War I. He later became a farmer, storekeeper, and lumberman in Parkdale, NS. He was greatly interested in community life and was associated with farmer's organizations for many years. He was married and had seven children. He was a member of the Baptist Church, the I.O.O.F. and Masons. Ira was active in Nova Scotia Guides and Fish and Game Associations, had been a municipal counsellor and President of the Lunenburg Centre Liberal Association. He was a Director of the Nova Scotia Federation of Agriculture and was killed in a car accident on the way to a meeting of this organization in August 1958. The Ira L. Rhodenizer Memorial Scholarship was provided by the Federation as a memorial for his dedication and contributions through the years.

Eligibility: Available to students entering second year of any undergraduate program in the Faculty of Agriculture who are permanent residents of Nova Scotia. Selection criteria include academic performance, involvement in student affairs, and participation in the 4-H program.

Dr. Robert G. Rix Family Farm Scholarship

Robert (Bob) Rix was born in Halifax on July 29th, 1948. Robert graduated from Dalhousie University Dental School in 1974. He practiced in Musquodoboit Harbour, Tatamagouche, and Winsloe, PEI, prior to opening his own dental practice in Bible Hill. He took great interest in his profession and knew the family trees of most of his patients and will be fondly remembered by everyone for his excellent dentistry, story-telling, knowledge of American History, love of gardening, tinkering with mechanical items, love of nature and his family. Robert had originally established the "Robert G. Rix Family Farm Bursary" in 1985. Although not having a farm background himself, he shared his beliefs that everyone's roots are in the land and he felt his way to contribute to the importance of agriculture to our society was through this small bursary each year. A couple years ago, the award became known as the "Dr. Robert G. Rix Scholarship" to allow support to a student where the need was greatest. After Robert's passing, one of the faculty provided funds to continue the bursary in Robert's name. Since then, Robert's family has graciously supported the scholarship to allow his legacy and memory to live on.

Eligibility: Available to students in any undergraduate program in the Faculty of Agriculture who has shown determination and dedication to operating a family farm. Recipients will have demonstrated financial need.

Howard W. Roper Memorial Award

The Howard W. Roper Memorial Bursary: Presented by the Nova Scotia/Newfoundland Holstein Branch was established in memory of Howard Roper. Howard was born in Charlottetown, PEI and later moved to Princeport with his father in 1926 to manage the Beech Hill Farm and Dairy. Howard and his father purchased the farm in 1932 and operated the farm with purebred Guernsey's until 1952. Following the sale of the farm, he was employed by the Nova Scotia Animal Breeders Co-operative as Manager of Sales and Promotions. Howard was well-known throughout Canada, especially in Atlantic Canada for his work in the dairy industry and his love of dairy cattle, particularly Holsteins and Guernsey's. He was inducted into Atlantic Agricultural Hall of Fame in 1980, an institution in which he was instrumental in founding. The Canadian Association of Animal Breeders honored Howard in 1992 with the Award of Merit for outstanding contribution to the Dairy Cattle Industry. He was also made a lifetime member of the Canadian Guernsey Breeder Association. Those who knew Howard best will remember him for his honesty, integrity, love of people and his great eye for cattle.

Eligibility: Available to current students who have completed at least one year of study in any technical or undergraduate program at the Faculty of Agriculture, with preference given to second year students in the Diploma in Business Management - Dairy Farming program. Applicants must be either be permanent residents of Nova Scotia or Newfoundland and Labrador. Applicants must be members of Holstein Canada, or, a member of a family with Holstein Canada membership. Selection criteria include involvement in the dairy industry, extra-curricular involvement through athletics and clubs on campus, involvement in farm organizations, financial need and satisfactory academic performance.

Ted Rose Memorial Scholarship

The Ted Rose Memorial Scholarship was created by Mrs. Ann M. Rose in memory of her husband, Ted. Ted had grown up on a dairy farm in Urbania, near Shubenacadie. Ted and his brother Percy ran the farm after the death of their father. Although no one from the family had any connection to the AC, Mrs. Rose had a soft spot for farming, admitting there can be “nothing as rewarding as farming.” Rose wanted to provide a scholarship to a deserving young person who is interested in farming themselves someday, while honoring her husband’s memory.

Eligibility: Available to students in any undergraduate program at the Faculty of Agriculture. Awarded to a student who plans to operate a livestock farm. Selection criteria include financial need, academic performance and a documented commitment to animal welfare.

Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: \$500

Rotary Club of Truro International Student Bursary

The Rotary Club of Truro has been part of the fabric of the community of Truro as well as the network of Rotary Clubs around the world since 1926. The Rotary Club of Truro is proud of its years of service and benevolence in the community and internationally. In addition to providing assistance to countless individuals with special needs for medical treatment or equipment over the years, the Club has continued to focus on the needs of children with disabilities. Eligibility: Available to a current international student at the Faculty of Agriculture. Preference will be given to students registered in a program of study and registered full time, with additional preference given to students studying for the full year. Special consideration will be given to students who came from a developing country and plan to return and apply their education there. All students paying the international tuition differential are eligible for consideration. Selection criteria include financial need and potential impact of the bursary on the student’s lifestyle while at school and their future plans.

Jack Sibley Agriculture Bursary

This award was established by the John & Judy Bragg Foundation to honour John D (Jack) Sibley. Jack was born in 1937 at Meaghers Grant in Nova Scotia’s Musquodoboit Valley and graduated from Musquodoboit Rural High School in 1954. After receiving a BA from Mount Allison University in 1957 he attended the Nova Scotia Agricultural College and is an alumnus of the Class of 1959. He began his working career as a teacher and then moved on to work for several years as a field manager for McCain Foods. In 1965 he returned to Nova Scotia and spent the next 29 years as a wild blueberry extension specialist with the Department of Agriculture and Marketing. In 1994 he retired from this position and in 1997 began work with WBANA Canada in wild blueberry promotion, retiring in 2011 after a total of 44 years of service to the wild blueberry industry. Jack had a number of part-time careers which included operating his own wild blueberry acreage, working as a musician and MC, and teaching old-time fiddling to children from the Truro area.

Eligibility: Awarded to a full-time technical or undergraduate student at the Faculty of Agriculture who demonstrates financial need.

G. G. Smeltzer Memorial Award

Gerald “Gerry” Gordon Smeltzer was a graduate of the former Nova Scotia Agricultural College and McGill University, his work in the livestock industry, apiculture, livestock crops, 4-H, and his community rapidly earned Gerry Smeltzer the admiration of all who came to be associated with him. As an Extension worker with the Nova Scotia Department of Agriculture and Marketing, he promoted improved livestock management techniques and was considered a driving force in the 4-H program. While an agrologist with Agriculture Canada, his work on new varieties of corn for silage and grasses, legumes, soybeans, fababeans, field peas, and small grains, laid the foundation for the livestock industry of Eastern Canada. In 1966, Mr. Smeltzer was named the Annapolis

Valley Man of the Year in appreciation of his efforts. In 1987, he was awarded the Fred Rathje Memorial Award by the Canadian Beekeepers' Association. Eligibility: Available to students entering third or fourth year of the Bachelor of Science (Agriculture) program at Dalhousie University. Applicants must be permanent residents of one of the Atlantic provinces and be Plant Science - Agronomy majors. Selection criteria include a genuine interest in the area of field crops reflected through course and project work and summer employment, and financial need.

Sodhi Memorial Bursary

This bursary was established by the Sodhi family in memory of Mr. Bhagat S. Sodhi, long-time librarian at the former Nova Scotia Agricultural College. Mr. Sodhi immigrated to Canada in the 1960's, in search of opportunity for his future family. After meeting and bringing his wife Darshan to Canada, they settled in Truro, NS, and began their family. Mr. Sodhi began working at the former Agricultural College in 1968, when the campus library was housed in Cox Institute. He was instrumental in moving the library to its current location at the MacRae Library, acting as head librarian until 1995. Mr. Sodhi considered the library staff as a second family. As a tribute to his memory, the Sodhi Family established an award in his name upon his passing on June 1st, 2009.

Eligibility: Available to current international students at the Faculty of Agriculture in good academic standing, with preference given to students in undergraduate and technical programs based on financial need. Students in all programs of study are eligible.

South House Sexual and Gender Resource Centre Bursary

The South House Sexual and Gender Resource Centre, formerly the Dalhousie Women's Centre, was founded in recognition of women and trans people's common and diverse needs. The South House recognizes that you cannot work for a society free of sexism and patriarchy without also working for a society free of all forms of oppression. The South House supports women and all people dealing with oppression on the basis of sexuality and gender. South House believes in working together for the creation of a society that is vibrant and safe for people of all genders. The funds available will be distributed according to identified need. Bursaries are given out in sums between \$25 and \$250. Available funds are split between applicants. See <http://southhousehalifax.ca/> for an application form.

Application Type: Contact the Department, School, or College for more information

Sport Leadership Award

The Sport Leadership Award recognizes a high school varsity athlete enrolling full time in a program of study and planning on participating in a sport at the varsity level at the Faculty of Agriculture.

Eligibility: Available to entering technical or undergraduate students at the Faculty of Agriculture with an admissions average of at least 75%. Recipients of other major entrance scholarships are not eligible. Selection criteria include financial need, sport skills and leadership.

Application Type: Automatic Consideration – No Application Required

Phillip Stead Memorial Leadership Award

Phillip Stead graduated from the former Nova Scotia Agricultural College in 1965 with a degree certificate. He left Nova Scotia to complete his BSc. in Animal Science at McGill University and returned in 1967 to begin what was to be a long and successful career with the Nova Scotia Department of Agriculture, working as a sheep specialist with the Animal Industry Branch. In 1972 Phil continued his education by completing a MSc. in Agriculture and Nutrition at Virginia Polytechnic Institute and State University. For his passion for community involvement and his long standing contributions to Agriculture, a memorial award has been created in his name.

Eligibility: An award will be presented annually to a student who has exhibited outstanding leadership at the Faculty of Agriculture and/or within the community. Nominations for the award will be received by a committee representing the Student Leadership program at the Faculty of Agriculture and a member of the sponsoring body for the award (Nova Scotia/Newfoundland Holstein Branch). The committee will select an awardee from those nominated who best represents the leadership qualities and performance in the past year or number of years that would be a model for others. Selection criteria may also include academic performance, financial need, and the other awards that have been granted to the nominee.

Application Type: Contact the Faculty for more information

Captain R. M. Steele Memorial Fellowship

Captain Richard Steele was a founding member of the Atlantic Chapter of the Rhododendron Society of Canada (RSCAR) and supported the creation of the Atlantic Rhododendron & Horticultural Society. He faithfully attended, and contributed to, meetings and programs. A mentor and friend to many, and with an international network of plants people, he was a major influence on horticulture, locally and further afield. RSCAR members in the early days established the tradition of the annual Steele Lecture, the objective being to bring a top-ranking plants person to Nova Scotia as a guest speaker. Captain Steele died March 14th 2010.

Eligibility: Awarded to a final year undergraduate student in the Faculty of Agriculture who intends to pursue plant-related studies at the graduate level.

Catherine and Alexander Sutherland Bursary

This bursary was established in memory of Victor Sutherland's parents, Catherine and Alexander Sutherland. Born in the 1890s in the area of Earltown, Nova Scotia, Catherine and Alexander operated the Earltown General Store. Over a century later, this store still operates, under other ownership. Alexander also operated a saw mill, while Catherine managed the books and ran the store. In 1939 the family moved to Truro and operated a second store in Bible Hill, near the Nova Scotia Agricultural College. Alexander died in 1943, and Catherine continued to raise their three children. Catherine died in 1972, having lived a very full and satisfying life. Victor Sutherland is an alumnus of the Nova Scotia Agricultural College, Class of 1954. After completing his diploma at the NSAC, now the Dalhousie University Faculty of Agriculture, Victor completed a degree in geology at Acadia University. He spent his career working in the oil and gas industry, including forming his own company, Northrock Resources, in 1986.

Eligibility: Awarded to a full-time Faculty of Agriculture technical or undergraduate student who demonstrates financial need. Preference is given to students who have attended high school in Truro, and then to students who attended high school in Colchester County.

Application Type: Faculty of Agriculture In-Course Award Application

William D. Swetnam Memorial Award

Raised in Port Mouton and Liverpool, NS, William (Bill) Swetnam, graduated from the former Nova Scotia Agricultural College in 1956. Bill discovered what he was destined to do when he purchased a farm in Sheffield Mills, NS in 1958. Throughout his career, Bill dedicated countless hours to many boards. As a founder of the Nova Scotia Turkey Marketing Board he also spent time on the County South and East Livestock Health Services Board, the NS Crop and Livestock Insurance Commission, Canadian Livestock Feed Board Advisors Committee, as well as Nova Scotia Farm Loan Board. Bill also served as president of the Kings County Federation of Agriculture and became a member of the Council of Leaders with the Federation. Bill's dedication to his community has not gone unnoticed. In 2002 he was honored by the Queen with the Golden Jubilee Medal. Bill has truly distinguished himself in his area of expertise, bringing honour to the former NSAC and the Alumni Association. It is for this reason, an award has been created in his memory.

Eligibility: Available to students entering third or fourth year of the Bachelor of Science (Agriculture) program who have displayed leadership qualities during their program. Applicants must be permanent residents of one of the Atlantic provinces.

Syngenta Canada Inc. Awards

Syngenta is one of the world's leading companies with more than 28,000 employees in some 90 countries dedicated to their purpose: Bringing plant potential to life. Syngenta's mission is to make a difference for smallholders in developing countries. By helping them become more professional growers, they want to achieve added value for rural communities. One way they do that is through technical innovation. Equally important is access to markets, enabling smallholders both to buy inputs and sell their produce. These and other factors are all essential for sustainability successful agriculture.

Eligibility: Available to a technical or undergraduate student in any program in the Faculty of Agriculture. Awarded to students whose course and project work reflect an interest in the Maritime potato industry. Applicants will be required to submit a 300-500 word essay expressing opinion on a topic relating to the crop protection industry. Selection criteria include academic performance, and potato farm experience or background.

Bruce Trenholm/Atlantic '86 Scholarship

Bruce was born on the family farm in Grand Pre, Kings County, he graduated from the former Nova Scotia Agricultural College and MacDonald College, receiving his Bachelor of Science Degree in Animal Husbandry in 1947. Upon graduating from McDonald College he served as the Agricultural Representative in Yarmouth and then taught Animal Husbandry at the former Nova Scotia Agricultural College for three years. In 1952 he took over the family farm going on to establish the well-known Brulo herd. Bruce's contributions to agriculture have been many and varied and are worthy of recognition in the Atlantic Agricultural Hall of Fame. He had a lifelong interest in Holstein cattle and was Master Breeder and Past President of Holstein Canada. In 1986, the year of Bruce's death, he coordinated Atlantic '86 – the Annual National Convention of Holstein Canada. This scholarship was established in his name as an on-going memorial.

Eligibility: Available to students entering their final year in any undergraduate program at the Faculty of Agriculture. Applicants must be permanent residents of one of the Atlantic provinces, have a Holstein farm or 4-H (Holstein calf project) background. Selection criteria include academic performance and career goals.

Dr. Peter Van der Borch Memorial Bursary

Peter Van der Borch DVM established this bursary for an exceptional first year student from Truro, Nova Scotia.

Eligibility: Must be first year student registered at the Faculty of Agriculture and be from Truro, Nova Scotia.

Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Visit dal.ca/scholarships

Florence (Pineo) Ward Memorial Award

The Florence (Pineo) Ward Memorial Award was established by James Pineo in memory of his late sister, Florence. James wanted to leave a legacy behind for his sister, and help support the academic efforts of agricultural students, such as his niece Lisa (Orlando) Gowan, a BSc(Agr) Agricultural Chemistry graduate.

Eligibility: Available to current students who have completed at least one year of study in any technical or undergraduate program at the Faculty of Agriculture. Preference will be given to students from Boutilier's Point, Halifax County, and Advocate, Cumberland County. Awarded to students in financial need. Preference will be given to students with sound academic background who have come to the Faculty of Agriculture for technical training to enhance their employability but financial constraints are limiting their ability to continue their studies.

Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: \$1,000

Raymond Webber Memorial Scholarship

Ray was born and raised in Halifax, Nova Scotia. Upon completion of High School, Ray took a business course and worked in an office for the next five years. This soon became boring so Ray entered the “Nova Scotia Agricultural College” (now known as the Faculty of Agriculture) in Truro in 1928. After completing his studies at Truro, he attended MacDonal University in Montreal where in 1931 he received a Bachelor of Science Degree in Agriculture. After graduation, Ray went to work for Canada Agriculture in the Plant Protection Branch in Halifax in an administrative capacity. Due to Ray’s sincere dedication and commitment to Landscape Atlantic, a memorial scholarship has been established in his name to ensure his legacy lives on long into the future.

Eligibility: Available to students entering second year of the Diploma in Technology (Managed Landscapes) program at the Faculty of Agriculture. Selection criteria include academic performance and practical skills.

Application Type: Faculty of Agriculture In-Course Award Application

Application Deadline to Apply: Check dal.ca/scholarships for application deadline

Value: \$800

Michael Whidden Memorial Award

Awarded to a student who has provided leadership on the Faculty of Agriculture’s Woodsmen Team, and has maintained a sound academic performance.

Eligibility: Available to current technical and undergraduate students at the Faculty of Agriculture.

Application Type: Automatic Consideration – No Application Required

Wild Blueberry Producers Association of Nova Scotia Scholarship

The Blueberry Producers Association of Nova Scotia is a grower organization with approximately 1000 members from around the province. The Association promotes the production and consumption of wild blueberries. It constantly strives to keep growers informed of the newest technology available for both growing and harvesting. As well, it helps provide the producers with an adequate return to management, labour and capital.

Eligibility: Available to students entering third or fourth year of the Bachelor of Science (Agriculture) program with Plant Science majors. Preference given to someone with interest and experience in small fruit. Selection will be based on academic performance and financial need.

Application Type: Faculty of Agriculture In-Course Award Application

Application Deadline to Apply: Check dal.ca/scholarships for application deadline

Value: \$750

Eric Williams Memorial Scholarships

Born in 1938 Eric P. Williams started farming in 1959 with nine cows and twenty acres. Today the Williams’ family own and operate a two hundred head Holstein dairy farm in the Goulds and employ a nephew and one other worker. Eric worked hard to introduce supply management for milk producers in Newfoundland. In 1983 he was appointed the first chair of the Newfoundland Milk Marketing Board now known as the Dairy Farmers of Newfoundland and Labrador. During his lifetime he fought to improve the cost of production formula for milk producers in the province. Eric was also nominated by the Dairy Farmers of Newfoundland and Labrador in recognition of his tremendous contributions to agriculture, to become an inductee into the Atlantic Agricultural Hall of Fame. It is for the same reasons that the Dairy Farmers of Newfoundland and Labrador have established a scholarship in his memory for his dedication and commitment to agriculture.

Eligibility: Available to current students who have completed at least one year of study in any technical or undergraduate program in the Faculty of Agriculture. Applicants must be permanent residents of Newfoundland and Labrador. Selection will be based on academic performance. Typically one award is given to a technical student and the other to an degree-seeking student.

Zhuhui Ye Memorial Award

This fund was established by classmates of Zhuhui Ye (Kevin) to honour his memory. Kevin attended the former Nova Scotia Agricultural College as part of the FAFU 2+2 program, earning his BSc(Agr) in Aquaculture in 2012. Kevin continued his studies with the Dalhousie MSc. program. On September 8, 2012, Kevin lost his life in a drowning accident at Dollar Lake Provincial Park. Kevin is well remembered as an intelligent, popular, and outgoing man whose generosity touched the lives of many friends. The intent of the Zhuhui Ye Memorial Award is to further the understanding of culture and relationship between Chinese and Canadian students by supporting the FAFU/DAC 2+2 program.

Eligibility: Award to a Chinese student in the FAFU 2+2 program or another student demonstrating a commitment to and involvement with the FAFU 2+2 program at the Faculty of Agriculture, in addition to academic performance and financial need.

Class of 1960 Memorial Bursary

In recognition of their 50th reunion, classmates established the Class of 1960 Memorial Bursary. Classmates contributed generously to this fund, with the intention of supporting an AC student. Their wish is to honour their deceased classmates who contributed to this fund, and who valued the experience and education they received at the Nova Scotia Agricultural College.

Eligibility: Awarded to a full-time technical or undergraduate student enrolled in any program at the Faculty of Agriculture who has demonstrated financial need.

Application Type: Faculty of Agriculture In-Course Award Application

Class of 1950 Award Fund

The Class of '50 Award was first established in 2000 at the Class of 1950, 50th anniversary weekend celebration. President, Don Young and Vice-President, Jack Johnson spearheaded the campaign to get their classmates involved in their commitment to help future AC students. The group recognizes the difficulty that young students face to finance their post-secondary education, as they too faced similar challenges. After a great deal of preparatory work from Don, Jack and Cliff McIsaac, a proposal was created for the Class of '50 Award fund of to assist deserving students to "stick with it." The group of classmates have made and continue to make significant contributions to the campus and students.

Eligibility: Available to current students in financial need in any technical or undergraduate program in the Faculty of Agriculture.

Application Type: Faculty of Agriculture In-Course Award Application

Application Deadline to Apply: Check dal.ca/scholarships for application deadline

Value: \$1,200

George and Lottie Cook Memorial Scholarship

Lottie Cook first developed her passion for agriculture on her family farm on Cape Breton Island. Lottie's parents were pioneers in the agricultural industry, and her father a renowned farmer. At a young age Lottie became involved in 4-H where she achieved some of the club's top honours. She later graduated from the former Nova Scotia Agricultural College and worked as an assistant agricultural representative to J.C.F MacDonnell for many years. In 1943 Lottie married George Cook and the pair later opened a chick hatchery in Truro and became one of the foremost producers of high quality chicks in the Maritime Provinces. After the passing of her husband in 1954, Lottie continued to operate the family business. Due to Lottie's involvement in the agricultural industry and former NSAC community from both herself and family business, a scholarship has been created in her and her husband's name.

Eligibility: Available to students from Nova Scotia in the first or second year of a technical or undergraduate program at the Faculty of Agriculture. Selection criteria include academic performance and financial need.

Application Type: Faculty of Agriculture In-Course Award Application

Application Deadline to Apply: Check dal.ca/scholarships for application deadline

Country Ribbon Agricultural Award

Country Ribbon established this scholarship to recognize and support students from Atlantic Canada with a demonstrated interest in pursuing a career in agriculture.

Eligibility: Must be enrolled in an undergraduate degree or diploma program at the Faculty of Agriculture, who plans to pursue a career in agriculture, preferably in Newfoundland and Labrador. Preference given to a student who attended high school in Atlantic Canada.

Application Type: Faculty of Agriculture In-Course Award Application

Application Deadline to Apply: Visit dal.ca/scholarships

Dr. Kenneth Cox Memorial Scholarship

The Dr. Kenneth Cox Scholarship was created by the class of 1964 as a tribute for the retiring Principal of the former Nova Scotia Agricultural College. Dr. Kenneth Cox followed a very distinguished career in the Maritime agricultural industry. His early training was at the former NSAC, now known as the Faculty of Agriculture, where he graduated with the Class of 1921. He continued his studies at the Ontario Agricultural College graduating in 1924 with a Bachelor of Science in Agriculture.

Eligibility: Available to students entering the final year of the Bachelor of Science (Agriculture) program or a diploma program.

Application Type: Faculty of Agriculture In-Course Award Application

Application Deadline to Apply: Check dal.ca/scholarships for application deadline

Value: \$250

Dairy Farmers of Nova Scotia Award

The Dairy Farmers of Nova Scotia organization was created through legislation enacted in 2001, and replaces the former Nova Scotia Dairy Commission. The organization exists under the umbrella of the Natural Products Marketing Council of the Department of Agriculture. The Dairy Farmers of Nova Scotia bursary has been active since 1989 and continues to help support students with their post-secondary education.

Eligibility: Available to a third or fourth year Bachelor of Science (Agriculture) student or a graduate student from Nova Scotia undertaking course or project work related to the dairy industry. Selection criteria include proven interest and experience in the dairy industry, the potential beneficial impact of study on the Nova Scotia dairy industry, and academic performance.

Application Deadline to Apply: Check dal.ca/scholarships for application deadline

Value: \$1,000

Dartmouth Horticultural Society Scholarships

The Dartmouth Horticultural Society is a gardening club whose aim is to promote, enrich and expand the practice of amateur gardening. Monthly meetings are held where their guest speakers from inside and outside the Society share their knowledge. In addition club experts are available for formal and informal exchange of ideas. Some of the club's activities include a plant sale, a flower show, the planting and maintaining of a raised bed in Leighton Dillman Park, plant exchanges, and garden tours

Eligibility: Available to upper-year students in any plant-related undergraduate program in the Faculty of Agriculture. Applicants must be permanent residents of Nova Scotia, with preference given to students from the Halifax Regional Municipality, followed by all Nova Scotia residents, followed by residents of other Canadian provinces. Selection criteria include financial need and academic performance.

Application Type: Faculty of Agriculture In-Course Award Application

Application Deadline to Apply: Check dal.ca/scholarships for application deadline

Value: \$500

Dalhousie Agricultural Students' Association Awards

Dalhousie Agricultural Students' Association (DASA) is the student association for all students at the Dalhousie Agricultural Campus. DASA is the official voice of the student body, and provides leadership and vision for the students of the Agricultural Campus. DASA promotes student engagement and leadership through various campus activities including Orientation, Shinerama, College Royal and Winter Carnival. DASA also promotes student engagement within the surrounding communities of Truro and Bible Hill. DASA works closely with Student Services and Administration to collectively provide a welcoming community dedicated to higher learning and service to the community.

Eligibility: Awarded to students enrolled in the Faculty of Agriculture who have demonstrated, in the current academic year, exceptional school spirit and involvement in any or all of the following: DASA sponsored events, volunteering, campus community leadership.

Application Type: Automatic Consideration – No Application Required

Value: 2 @ \$300

K. de Geus Memorial Prize for Plant Science

The K de Geus Memorial Prize was created in memory of Klaus de Geus. Klaus, met his wife, Christina “Tina” de Geus, in DeBeemster, The Netherlands. Klaus and Tina immigrated to Canada in 1957 with their three children, Gram, Louise, and Tineke. When they arrived in Canada, they decided to settle in Nova Scotia where they made a new life for their family, including setting up and running a successful flower shop and landscaping business in Bridgetown. Tina took great pleasure in her work as a floral designer. Over the years, she gave many demonstrations on all aspects of floral designing. This led to a career in teaching floral design in the continuing education department of the former Nova Scotia Agricultural College.

Eligibility: Awarded to a graduating technical student from the Faculty of Agriculture, based on high standing in course work, with preference to students in the Horticultural field.

Application Type: Automatic Consideration – No Application Required

The Honourable W. H. Dennis Memorial Prizes for Literary Compositions in English

Two prizes known as the Joseph Howe Prizes are offered each year. First prize \$250, second prize \$150, for a poem or collection of poems of any length greater than one hundred lines. Two prizes known as the James DeMille Prizes are offered each year, one of \$250 for an essay, the other of \$250 for a prose short story.

Eligibility: Available to any full-time undergraduate or graduate Dalhousie student who submits the best essay, short story, or collection of poems.

Application Type: Contact the Department, School, or College for more information

CA Douglas Bursary

The CA Douglas Bursary was originally established in 1984 in recognition of the impact of Charles Allan Douglas on the Agriculture industry in Nova Scotia. Charles held positions at Scotsburn Creamery, Avon Valley Greenhouse Farm and had a 35 year career with the Department of Agriculture and Marketing. Charles had a unique ability to inspire leadership and confidence in those around him, as he was very conscious of the importance of the individual. He devoted untiring energy to supporting rural youth and community development. As a result of his dedication and commitment to new technology, and his leadership and desire to relate to the individual Charles was inducted into the Atlantic Agricultural Hall of Fame in 1979 and honored with a bursary in his memory.

Eligibility: Awarded to a BSc(Agr) student enrolled full-time in the third or fourth year of study who has demonstrated financial need. Preference is given to students majoring in Animal Science.

Application Type: Faculty of Agriculture In-Course Award Application

Ernest L. Eaton Memorial Scholarship

Throughout Mr. Eaton’s lifetime he maintained a keen interest in scientific agriculture, and the education and development of the interested young people. He personally established the Ernest L. Eaton Scholarships, and made provision for them to continue in perpetuity. Although none of his children are directly active in farming, they all are interested in, and support, the fine work being done at present at the Agricultural Campus. The hope for the recipient of the Ernest L. Eaton Scholarship is to encourage the pursuit of excellence in both academic and scientific activities.

Eligibility: Available to students entering third year of the Bachelor of Science (Agriculture) program based on performance in second year. Recipient cannot have received another scholarship of higher value.

Application Type: Faculty of Agriculture In-Course Award Application

Application Deadline to Apply: Check dal.ca/scholarships for application deadline

Value: \$1,000

Noel Enman Memorial Award

To honor the memory of Noel Enman, a former Agricultural Campus Animal Science Technician-Agricultural Technology student, 1979-1982, the Alumni Association has established a fund for the Noel Enman Memorial Award.

Eligibility: Awarded to a graduating technical student from the Faculty of Agriculture whose personality and fellowship have contributed to student life and activities, thereby gaining the respect of the students and faculty.

Application Type: Automatic Consideration – No Application Required

Faculty of Agriculture Mature Student Bursary

At the Faculty of Agriculture, the student body demographics have shifted dramatically over the past generation. We have increasingly more students transfer from other institutions or begin studies as a visiting or mature student. The 2012 Annual Appeal for the Faculty of Agriculture focused on raising funds for an endowment that would benefit mature students. In addition, alumnus Charles MacQuarrie directed that his planned gift benefit Faculty of Agriculture mature students.

Eligibility: Students enrolled at the Faculty of Agriculture in full-time studies who demonstrate financial need and are mature students (as defined by the Registrar's Office).

Application Type: Faculty of Agriculture In-Course Award Application

Application Deadline to Apply: See dal.ca/scholarships for application deadline
Value: at least \$1,000

Fall River Garden Club Bursary

The Fall River Garden Club's mission is to promote the improvement of home and community flower and vegetable gardens, lawns, trees and landscaping through friendly sharing of information, work and education. During the year they run fund raising events in order to raise money to beautify the neighborhoods. Their main fundraiser is their annual plant sale followed by an area garden tour whereby members open their gardens for viewing to the general public. The monies raised at these events go towards supporting Santa's Express and giving a Bursary to a student at the Agriculture Campus studying horticulture. In addition, the gardens maintained in the surrounding areas are also funded from these events.

Eligibility: Available to a first year student in a Horticulture program at the Faculty of Agriculture in good academic standing, with preference given to students from the Fall River, Waverley, Wellington, Oakfield, Lakeview or Windsor Junction, Nova Scotia areas. Other residents of Nova Scotia will be considered. Applicants will have demonstrated financial need and well-developed career plans.

Application Type: Faculty of Agriculture In-Course Award Application

Application Deadline to Apply: Check dal.ca/scholarships for application deadline

Value: \$1,000

Farm Focus Scholarship

Farm Focus of Atlantic Canada is an agricultural newspaper that covers the Atlantic Provinces and their diverse food production. The publication contains information on the various sectors of the agricultural industry, including: regional, national, and international news; profiles on farms and farm families; 4-H; features on new innovations and technology; and editorials and opinions on issues of importance to the farming community.

Eligibility: Available to students entering second year of any undergraduate program in the Faculty of Agriculture at Dalhousie. Selection is based on financial need and academic performance.

Application Type: Faculty of Agriculture In-Course Award Application

Application Deadline to Apply: Check dal.ca/scholarships for application deadline

Value: \$200

Ena Fenton Memorial Scholarship

Ena Fenton was a founding member of the Bedford Horticultural Society in 1950. Ena was an enthusiastic and willing participant in every function of that group for 47 years. Mrs. Fenton had been a teacher prior to her marriage and had always been interested in the education of young people. After her death in 1977, the Society decided to name their scholarship in her honor. They feel certain that she would have been very pleased by their acknowledgment of her interest in the development of Horticulture and Landscaping in Nova Scotia.

Eligibility: Available to students studying Horticulture or Environmental Studies, entering the second year of any undergraduate program in the Faculty of Agriculture. Applicants must be permanent residents of Nova Scotia, with preference given to those from Bedford, Sackville, and Waverley. In years when no student from Bedford, Sackville, or Waverley applies for the scholarship, consideration will be given to other students from the Halifax Regional Municipality (excluding those from Halifax and Dartmouth). Selection will be based on financial need, career plans, and academic performance.

Value: \$50

Dr. Gerry W. Friars Undergraduate Research Prize

Dr. Friars, a former NSAC Alumnus, was introduced to scientific research by an undergraduate research project. This was the beginning of a career in research in teaching. In recognition of the significance of this first research experience, Dr. Friars has provided a sum of money to endow an Undergraduate Research Award.

Eligibility: Awarded to a graduating undergraduate student from the Faculty of Agriculture who is judged to have completed the best written research report as part of the fourth-year project requirements.

Application Type: Automatic Consideration – No Application Required

Friends of the Federation Scholarship

The Nova Scotia Federation of Agriculture (NSFA) provides this scholarship to support undergraduate students at the Faculty of Agriculture and to recognize the importance of agricultural education. Funds for this award were raised in partnership with NSFA members and matched by the Federation.

Eligibility: Enrolled full-time in the Faculty of Agriculture. Eligible students will have attended high school in Nova Scotia. Preference will be given to family members of NSFA members, and to students with career interest in primary agriculture.

Application Type: Faculty of Agriculture In-Course Award Application

Application Deadline to Apply: See dal.ca/scholarships

Year of Study: Any

The Irving and Jeanne Glovin Award

The Oskar Schindler Humanities Foundation established this award in 2003 to support research into the meaning and principles underlying “good human conduct”. Students enrolled in any major discipline, for example, Languages, Social Sciences, Humanities and Performing Arts, or any interdisciplinary program, for example, Canadian Studies, European Studies, Gender and Women Studies and IDS are encouraged to apply. The recipient will preferably have broad general education and interdisciplinary interests appropriate to the research topic chosen.

Eligibility: Available to a full-time student in the final year of any undergraduate program or any year of a graduate program at Dalhousie University.

Application Type: Contact the Faculty for more information

Application Deadline to Apply: mid-February

Governors' Awards

In 1992, to mark the 125th anniversary of the founding of the Dalhousie Student Union, and to recognize students' contribution to the quality and vitality of the University, the Board of Governors established a set of awards to be known as Governors' Awards. Up to four awards can be made each year, for exceptional contributions or leadership in the extracurricular realm in such areas as university governance, development of a sense of community on campus, community service, internationalizing the campus, visual or performing arts, minority access or athletics. To be eligible, students must have a minimum cumulative GPA of 3.0 or equivalent. Otherwise, all students - undergraduate, graduate, or professional faculty students, full or part-time, at any stage in their academic career, may be considered for an award. Information is available on the Student Services website.

Application Type: Contact the Department, School, or College for more information

Application Deadline to Apply: Check dal.ca/scholarships for application deadline

Value: \$500

John Higgins Memorial Scholarship

John was a founding member of The Atlantic Association of Landscape Designers in 1992. He was instrumental to the development of Canada's first ever Certification Program for Landscape Designers, which was available to all designers in the Atlantic Region, and pre-empted the National Certification Program by several years. John Higgins' dedication and enthusiasm for the Landscape Design Industry throughout his career was unfaltering, his contributions immeasurable. It is for these reasons that AALD decided to offer a Design Scholarship for students attending the AC, to be dedicated in his name. The Atlantic Association of Landscape Designers hope is that, in part through this scholarship, his legacy will live on.

Eligibility: Available to students entering third year of the Bachelor of Technology in Environmental Landscape Horticulture program in the Faculty of Agriculture. Selection criteria include academic performance and skill and interest in landscape design.

Application Type: Faculty of Agriculture In-Course Award Application

Application Deadline to Apply: Check dal.ca/scholarships for application deadline

Value: \$500

Dr. Bill Jenkins Memorial Scholarship

Bill's career began early and always had the same theme; to improve farm management and education. He held numerous positions with the Provincial Department of Agriculture, the Faculty of Agriculture at Dalhousie University, as well as Chairman of the Nova Scotia Farm Land Settlement Board. Bill retired as Principal of the former NSAC (now Dalhousie Faculty of Agriculture) in 1972 after witnessing growth in both the level and training for all sectors of the agricultural industry. He then joined the staffs of the Council of Maritime Premiers' Higher Education Commission, Services Overseas (CESO) in 1992. As a result of Bill Jenkins sincere commitment to his chosen career path, and his lifetime of contributions to both the AC and the Agricultural Industry, a scholarship has been created in his memory.

Eligibility: Available to students entering second or third year in any of the business degree programs in the Faculty of Agriculture. Selection criteria include overall academic performance, leadership, and financial need.

Application Type: Faculty of Agriculture In-Course Award Application

Application Deadline to Apply: Check dal.ca/scholarships for application deadline

Joyce Family Foundation Agricultural Bursary

The Joyce Family Foundation Agricultural Bursaries were established to create an endowed bursary program to ensure students with financial barriers are able to access and succeed at the Faculty of Agriculture.

Eligibility: Must be a Canadian Citizen or Landed Immigrant, enrolled in any year of undergraduate study at the Faculty of Agriculture, has demonstrated financial need, and be in good academic standing.

Application Type: Faculty of Agriculture In-Course Award Application

Application Deadline to Apply: Visit dal.ca/scholarships

Randy and Gladys Keddy Memorial Scholarship

The Randy & Gladys Keddy Memorial Bursary was established by their son, Stewart Keddy in memory of his parents to provide an on-going legacy that is meaningful for family members and friends. Stewart graduated from the Faculty of Agriculture in 1967, from McGill University in 1969, and from Dalhousie Dentistry in 1974, where he was recognized for excellence in endodontics and radiology. Stewart practiced as a dentist for 37 years. He served in the Dental Corps from 1974-1979 and was a founding partner of Purdy's Wharf Dental Group from 1985 until his retirement in 2011. He held memberships in the Nova Scotia Dental Association, Canadian Dental Association, and Academy of General Dentistry.

Eligibility: Available to students entering second year of a diploma program or the third year of a degree program in the Faculty of Agriculture, with preference given to students from the Annapolis Valley of Nova Scotia with farm backgrounds. Awarded to a student whose background, program of study,

course and project work and summer employment show a genuine interest in working in the agricultural industry following graduation. Selection criteria include career goals, academic performance, and financial need. Students receiving other scholarships of greater value will not be eligible for this scholarship.

Value: \$1,000

Kings Mutual Insurance Scholarships

In memory of Past Directors, the Kings Mutual Insurance Company awards scholarships to students in the Faculty of Agriculture. The Kings County Federation of Agriculture represents the interest of the agricultural community in Kings County and is an active voice for its 395 members with the Nova Scotia Federation of Agriculture, Council of Leaders and provincial and national governments.

Eligibility: Available to students in any technical or undergraduate program in the Faculty of Agriculture. Applicants must be permanent residents of Nova Scotia. Selection criteria include financial need, academic performance, and demonstrated interest in a career in the Agri-food industry as reflected by summer employment and/or extra-curricular involvement. This scholarship is not available to students receiving other scholarships of greater value. At least one scholarship will be awarded annually to a technical-level student.

Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: \$1,000

P. Max Kuhn Scholarship

P. Max Kuhn grew up on a small farm in Lawrencetown, Halifax County. He lived from 1887 until 1928 and was the father to Bernard G. Kuhn. Max attended one year of the former NSAC General Course in 1908-1909. He was not able to return the next year because of need for him at home and shortage of funds, it was a great disappointment to him. That year was his only year of formal schooling; his home was so isolated that he was never able to attend grade school or high school, and his mother taught him at home. Max was a dedicated, hard-working farmer, and he made great use of his AC training. He bought his own Manor Hill Farm in 1918, located on Woodlawn Road (Portland Street) just outside what were then the town limits of Dartmouth. He market-gardened and ran a dairy there until his death. It was Bernard's wish to establish this scholarship to recognize his father, Max, give education opportunity to others beyond what his father had, and to "repay Nova Scotia, former NSAC and Canada in small part for the education and support that he received here" (Bernard G. Kuhn).

Eligibility: Available to students in any undergraduate program in the Faculty of Agriculture at Dalhousie, with preference given to students who have completed at least one year of study. Applicants must be permanent residents of Nova Scotia, with preference to students from the Halifax Regional Municipality. Awarded to a student with a farm background or those whose course and project work and summer employment demonstrates an interest in working in the agriculture industry after graduation. Selection criteria include financial need and academic performance.

Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline

Landscape Nova Scotia Award

Landscape Nova Scotia's mission is to promote high standards in product quality, professional service and conduct in the horticultural trades industry; and to encourage the use of Association members by the public. Landscape Nova Scotia has been a voice for the landscape and horticultural industry for more than 20 years in Nova Scotia, and are committed to providing consumers with options to make informed decisions.

Eligibility: Available to students in a landscape-related undergraduate program in the Faculty of Agriculture. Selection criteria include academic performance and financial need.

Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: \$750

Raymond Loo Memorial Scholarship in Organic Agriculture

Raymond Loo was a certified organic farmer from Springfield, PEI where he operated Springwillow Farms. Ensuring there was room for wildlife on the farm and exploring ways to produce healthy food with the smallest environmental impact was very important to Raymond. Committed to promoting better farming practices in his community, he was a founding member of ACORN and board director for 6 years. Raymond also helped found and was the first president of the PEI Certified Organic Producers Cooperative. Raymond was dedicated to his province and the field of organic agriculture and was recognized greatly for his contributions.

Eligibility: Awarded to an undergraduate or technical student at the Faculty of Agriculture enrolled in at least one organic agriculture course offered on the Dalhousie Agricultural Campus.

Application Type: Faculty of Agriculture In-Course Award Application

The Robert and Katherine MacDonald Award

An endowment has been established to provide an annual prize for Chinese students at Dalhousie. The recipient will be engaged in undergraduate studies and be a member of the Dal-TUNS Chinese Students' Association or its successor. The recipient will have demonstrated good academic achievement combined with leadership qualities and contribution to University life. The Association will recommend a candidate or candidates to the Head of Student Services.

Eligibility: Available to an undergraduate Chinese student who is a member of the Dalhousie Chinese Students and Scholars Association.

Application Type: Automatic Consideration – No Application Required

C. C. MacDougall Memorial Scholarship

C.C. MacDougall was the first district agriculturist to work with the NB Department of Agriculture in Sussex. The C.C. MacDougall Memorial Scholarship was established in 1958 by a large group of agriculture groups.

Eligibility: Available to current students in any undergraduate program in the Faculty of Agriculture. Awarded to a student pursuing a degree or diploma in

Agriculture. The recipient must have been a 4-H member from Kings County, New Brunswick, or have parents who raise or breed Guernseys anywhere in New Brunswick.

Application Type: Faculty of Agriculture In-Course Award Application

Application Deadline to Apply: Check dal.ca/scholarships for application deadline

Value: \$250

Danny MacEwen Memorial Scholarship

Danny was an example of what typifies a farmer – not afraid of hard work, willing to give everything he had even if the financial return wasn't always there, and proud of what he did for a living and never made an excuse for it. Danny was also very involved with the community and those who lived in it. He enjoyed not only showing off his many talents but also found great satisfaction in teaching others. Although he was not known for his patience, he strived hard to achieve the best at whatever he did. Danny will always be remembered for his passion for farming, and the agricultural world is a better place because of what he gave.

Eligibility: Awarded to a BSc(Agr) student majoring in Agricultural Business who has a background in agriculture or comes from a family farm. The recipient will be involved in the community and athletics, either at the Faculty of Agriculture or in the local area.

Application Type: Faculty of Agriculture In-Course Award Application

Application Deadline to Apply: Check dal.ca/scholarships for application deadline

Value: \$1,000

Dr. Allan and Barbara MacKay Scholarship

Born in Heathbell, Pictou County, Nova Scotia, Dr. Allan MacKay received his early agricultural experience on the Spruce Grove Farm that had the distinction of having one of the first purebred Guernsey herds in Canada. He was a member of the Scotsburn Junior Dairy Calf Club and represented his province in the National competitions for club members at the Royal Winter Fair in Toronto in 1941. Dr. MacKay received his primary education at Heathbell School and his secondary education at Pictou Academy. He graduated from former N.S.A.C. in 1943 and obtained his Doctor of Veterinary Medicine from the Ontario Veterinary College in 1951. That same year he established a veterinary practice in Pictou County and continued his work until his retirement in 1991. Dr. MacKay is honoured for his program of animal health care, for his philosophy of preventing disease problems before they occur and his dedication to farm families in the area he served.

Eligibility: Awarded to a student with strong academic performance from the Faculty of Agriculture who plans to study veterinary medicine at the Atlantic Veterinary College.

Paul R. MacPhail PEI Potato Industry Scholarship

The roots of the Prince Edward Island Potato Board can be traced as far back as 1920, when the first Potato Growers' Association was formed on Prince Edward Island. A true marketing board followed in 1950 and was restructured as a producer controlled board under the Natural Products Marketing Act in 1990. The PEI Potato Board established this award in memory of Paul R. MacPhail.

Eligibility: Awarded to a PEI student studying at the technical or undergraduate level of an agricultural program. The recipient will demonstrate an interest in working in the potato industry through course work, research projects related to potato production and utilization (including all disciplines, e.g. pathology, biotechnology, entomology, etc). Awarded based on academic performance and the project's relevance to the improvement of the potato industry.

Maritime Dairy Industry Scholarship

Dairy Farmers of Canada created this award to support Maritime students interested in the dairy industry. Dairy Farmers of Canada (DFC) is the national policy, lobbying and promotional organization representing Canada's farmers living on 12,529 dairy farms. DFC strives to create stable conditions for the Canadian dairy industry, today and in the future. It works to maintain policies that foster the viability of Canadian dairy farmers and promote dairy products and their health benefits.

Eligibility: Awarded to a third year student from the Maritime provinces enrolled in any Faculty of Agriculture program who shows commitment to and interest in the dairy industry, and professional and academic promise.

Bill Mathewson Memorial Award

Bill Mathewson grew up on a hill sheep farm in Sma Glen, Scotland. He graduated with a BSc (Agriculture) in 1949 and later (1974) a MSc, both from Aberdeen University. On graduation 1949, he joined H.M. Overseas Civil Service. After further training in Cambridge and Trinidad, he was posted to Tanganyika, Africa where he worked for 14 years. On retirement in 1965, he worked for three years with the N.F.U. of Scotland in Edinburgh before immigrating with his family to Nova Scotia in 1968. He taught for 20 years at the Faculty of Agriculture. Bill retired in 1988 and was honored by his colleagues by being made Professor Emeritus. Much loved by students, faculty and the agricultural industry, Bill will be greatly missed. It is with his memory in mind, that Bill's friends and colleagues at the AC launched an award in his name.

Eligibility: Available to any student registered in any program at the Faculty of Agriculture participating in an international experience. In applying for consideration, students will submit a proposal to participate in such activities as a study semester abroad toward their degree/diploma, attendance at a conference to make a presentation, a specialized training course or an internship or development project.

Value: \$1,000

Donald McInnes Award

Established in 1904, Pictou Mutual Insurance Company is the oldest mutual insurance company in Nova Scotia. Initially established by a group of farmers who sought to provide local protection for each other in the event of loss, their company has grown to include more than 3,500 local and rural policyholders. Donald McInnes was born in 1933 on the original McInnes farm on Scotch Hill Road. A graduate of Pictou Academy high school, he attended the AC, graduating in 1955. As a shareholder of Scotsburn Co-op, Donald served as Director for 22 years and Chairman of the Board for 15 years. For 35 years Donald was active in the Pictou County Farmers Mutual Fire Insurance Company. Donald served first as an agent, then as a director and manager of the company. Due to Donald's sincere involvement with both the community and Pictou Mutual Insurance Company, an award has been created in his name which is funded by Pictou Mutual Insurance.

Eligibility: Available to a student enrolled at the Faculty of Agriculture. Selection criteria include commitment to and involvement in the community and leadership provided in student activities, academic performance and financial need. A student may not be selected for this award more than once.

Value: \$100

Clint McLean Memorial Scholarship

The Clint McLean Memorial Scholarship was established by Clint's loving family, with contributions from his many friends and colleagues. Clint loved life and had many interests including entertaining, fine cooking, travel and music. To Clint family was everything; no amount of trouble, sacrifice, or inconvenience was too much. However, his heart was in agriculture. He lived and breathed agriculture, but dairy had a special corner in his heart. Not only did he talk the talk, he walked the walk. Clint was a graduate of NSAC (Class of 1979) and Guelph University. He was also an active member of his alumni associations, serving as Vice President and President for the Agriculture College Alumni. Clint served on the Agricultural Institute of Canada Board of Directors and on numerous institute committees. He served as the chair of the Atlantic Forage Crops Advisory committee and represented the Atlantic Provinces at the National Expert Committee on Forage. Clint was a distinguished and valued member of the NB Department of Agriculture, taking a leading role in innumerable initiatives to support the true stewards of the land; the farmers of Atlantic Canada. His career was that of a scientist with a human touch. Eligibility: Awarded to a third or fourth year BSc(Agr) student, with a preference to a student from New Brunswick and a preference to a student involved in the study of dairy. Recipients will have strong academic standing and demonstrate financial need.

John Reginald (Reg) Moore Memorial Scholarships

Reg Moore was born in Economy Nova Scotia on August 25, 1917; the fifth of six children. He was educated in Economy and Bass River graduating in 1935. Reg then enrolled in Normal (Teachers) College in Truro. He taught in various locations in Nova Scotia until called up for service in the Royal Canadian Air Force in 1940. Reg served as a staff pilot and as a Coastal Command pilot in Canada and the United Kingdom. Returning to Canada in 1945 Reg enrolled in the Nova Scotia Agricultural College (now the Faculty of Agriculture, Dalhousie University). He graduated from the former NSAC in 1947. Reg spent his entire post war career at the FCC. First as a Credit Advisor, then as Branch Manager for Nova Scotia. In 1960 he was transferred to Saint John, New Brunswick as Executive Assistant to the Regional Manager Atlantic. By 1962 Reg had tired of doing office work and transfers (four in three years) so requested a transfer to field duties where he would have day to day contact with farmers. He was assigned to the Sussex, NB Office where he completed his career, retiring in 1981.

Eligibility: Available to current students in any undergraduate program in the Faculty of Agriculture, with preference given to students studying in a full-time capacity. Applicants must be permanent residents of Colchester County, Nova Scotia and will have completed at least one year of study. Selection will be based on financial need and a cumulative average of at least 3.00.

A. C. Neish Memorial Trust Scholarship

Dr. Neish (1916-1973) was an undergraduate at the former Nova Scotia Agricultural College in Truro. This is where he had his first contact with science and where he had won the Governor General's Medal and a Macdonald College (Quebec) Scholarship. His work on fermentation, bacterial and plant metabolism and the biosynthesis of plant polysaccharides and lignins received international acclaim. He was a Fellow of the Chemical Institute of Canada, of the Royal Society of Canada, and the Royal Society of London. Dr. Neish was the first person to be awarded the Gold Medal of the Canadian Society of Plant Physiologists, and was awarded an honorary doctorate by Mount Allison University and an honorary Doctor of Science degree by McGill University. The A.C. Neish Memorial Trust Scholarship was established by friends, admirers, and colleagues of the late Arthur Charles Neish.

Eligibility: Available to students entering their final year of the Bachelor of Science (Agriculture) program. Selection criteria include high academic performance and qualities of leadership as indicated by participation and achievement in both academic and non-academic activities.

Donald Palfrey Award

The Don Palfrey Award was established in memory of Don Palfrey in recognition of his many years of service and contributions to weed science in Nova Scotia. Don was born in Fort Fairfield, Maine. He received his formal education in Pictou County and he graduated from the AC in Truro, Nova Scotia and from McGill University in Montreal, Quebec with a Bachelor of Science in Plant Pathology. He worked for the N.S. Department of Agriculture in Marketing for 37 years, retiring as Supervisor of Weed Science, where he was a key player and helping in pioneering work in extension and research in weed control in Nova Scotia. Don also taught at the AC for 18 years, teaching courses in Weed Control and Plant Pathology. He was a distinguished life member of the N.S. Institute of Agrologists and the first honorary life member of the Atlantic Vegetation Management Association. As a result of Don Palfrey's sincere commitment to the Department of Agriculture and his field of interest, an award has been created to honor his memory and legacy.

Eligibility: Awarded to a final year undergraduate student carrying out a research project in the area of pest management, with preference to a student involved in weed science, either through academic work or summer employment.

Stuart Rath Junior A Bearcat Hockey Education Award Fund

The Stuart Rath Truro Bearcat Education Awards have been established to encourage the pursuit of university education among players with the Truro Junior A Bearcat Hockey Team ("The Bearcats") by providing tuition support for players enrolled at Dalhousie University. Stuart Rath, a very involved community member of Colchester County and surrounding area, established The Bearcat Hockey Education Award. Some of Stuarts endeavors are as follows: he serves as the Vice President of Truro Centre Ltd, and the President of Stuco Holdings Ltd. From 1985-1995 Stuart served as the President of Halifax Cablevision Ltd, from 1976-1985 he served as the President and General Manager of Eastern Cablevision, and from 1960-1975 he was the Chairman of the Truro Industrial Society. A few of Stuarts other accomplishments are being Director of Nova Scotia Business Inc. since March 2007, Director of Morien Resources Corp since December 1997, as well as serving as Director of Stuco Holdings Ltd. and Director of Erdene Resource Development Corporation since June 2006 until November 2012.

Eligibility: Available to entering or current technical and undergraduate students at the Faculty of Agriculture. Selection is based on academic performance and the recommendation of the team coaches.

Application Type: Automatic Consideration – No Application Required

Cliff and Grace Retson Memorial Scholarship

The Grace and Cliff Retson Memorial Bursary was first created by Grace in memory of her husband, Cliff Retson who graduated from the AC in 1934. Cliff passed away in 1997. Grace was born in Waskada, Manitoba and grew up in Kerrobert, Saskatchewan. She attended secretarial school in Saskatoon and after retiring, she received her Bachelor of Arts from St. Mary's University. Grace met Cliff, her husband of 56 years, while she was working at the Senate in Ottawa. They married on July 26, 1941 and moved to Truro in 1947. The Retson's (Grace & Cliff) hosted several international students studying at the Faculty of Agriculture over the years. It is for this reason and to ensure ongoing support of the educational interests of International students studying at Dal-AC, that Grace created the scholarship.

Eligibility: Available to international students in any undergraduate program at the Faculty of Agriculture. Selection criteria include financial need, academic performance, and interest in and involvement in multi-cultural activities on campus.

Dr. Robert G. Rix Family Farm Scholarship

Robert (Bob) Rix was born in Halifax on July 29th, 1948. Robert graduated from Dalhousie University Dental School in 1974. He practiced in Musquodoboit Harbour, Tatamagouche, and Winsloe, PEI, prior to opening his own dental practice in Bible Hill. He took great interest in his profession and knew the family trees of most of his patients and will be fondly remembered by everyone for his excellent dentistry, story-telling, knowledge of American History, love of gardening, tinkering with mechanical items, love of nature and his family. Robert had originally established the "Robert G. Rix Family Farm Bursary" in 1985. Although not having a farm background himself, he shared his beliefs that everyone's roots are in the land and he felt his way to contribute to the importance of agriculture to our society was through this small bursary each year. A couple years ago, the award became known as the "Dr. Robert G. Rix Scholarship" to allow support to a student where the need was greatest. After Robert's passing, one of the faculty provided funds to continue the bursary in Robert's name. Since then, Robert's family has graciously supported the scholarship to allow his legacy and memory to live on.

Eligibility: Available to students in any undergraduate program in the Faculty of Agriculture who has shown determination and dedication to operating a family farm. Recipients will have demonstrated financial need.

Howard W. Roper Memorial Award

The Howard W. Roper Memorial Bursary: Presented by the Nova Scotia/Newfoundland Holstein Branch was established in memory of Howard Roper. Howard was born in Charlottetown, PEI and later moved to Princeport with his father in 1926 to manage the Beech Hill Farm and Dairy. Howard and his father purchased the farm in 1932 and operated the farm with purebred Guernsey's until 1952. Following the sale of the farm, he was employed by the Nova Scotia Animal Breeders Co-operative as Manager of Sales and Promotions. Howard was well-known throughout Canada, especially in Atlantic Canada for his work in the dairy industry and his love of dairy cattle, particularly Holsteins and Guernsey's. He was inducted into Atlantic Agricultural Hall of Fame in 1980, an institution in which he was instrumental in founding. The Canadian Association of Animal Breeders honored Howard in 1992 with the Award of Merit for outstanding contribution to the Dairy Cattle Industry. He was also made a lifetime member of the Canadian Guernsey Breeder Association. Those who knew Howard best will remember him for his honesty, integrity, love of people and his great eye for cattle.

Eligibility: Available to current students who have completed at least one year of study in any technical or undergraduate program at the Faculty of Agriculture, with preference given to second year students in the Diploma in Business Management - Dairy Farming program. Applicants must be either be permanent residents of Nova Scotia or Newfoundland and Labrador. Applicants must be members of Holstein Canada, or, a member of a family with Holstein Canada membership. Selection criteria include involvement in the dairy industry, extra-curricular involvement through athletics and clubs on campus, involvement in farm organizations, financial need and satisfactory academic performance.

Value: \$500

Ted Rose Memorial Scholarship

The Ted Rose Memorial Scholarship was created by Mrs. Ann M. Rose in memory of her husband, Ted. Ted had grown up on a dairy farm in Urbania, near Shubenacadie. Ted and his brother Percy ran the farm after the death of their father. Although no one from the family had any connection to the AC, Mrs. Rose had a soft spot for farming, admitting there can be "nothing as rewarding as farming." Rose wanted to provide a scholarship to a deserving young person who is interested in farming themselves someday, while honoring her husband's memory.

Eligibility: Available to students in any undergraduate program at the Faculty of Agriculture. Awarded to a student who plans to operate a livestock farm.

Selection criteria include financial need, academic performance and a documented commitment to animal welfare.

Jack Sibley Agriculture Bursary

This award was established by the John & Judy Bragg Foundation to honour John D (Jack) Sibley. Jack was born in 1937 at Meaghers Grant in Nova Scotia's Musquodoboit Valley and graduated from Musquodoboit Rural High School in 1954. After receiving a BA from Mount Allison University in 1957 he attended the Nova Scotia Agricultural College and is an alumnus of the Class of 1959. He began his working career as a teacher and then moved on to work for several years as a field manager for McCain Foods. In 1965 he returned to Nova Scotia and spent the next 29 years as a wild blueberry extension specialist with the Department of Agriculture and Marketing. In 1994 he retired from this position and in 1997 began work with WBANA Canada in wild blueberry promotion, retiring in 2011 after a total of 44 years of service to the wild blueberry industry. Jack had a number of part-time careers which included operating

his own wild blueberry acreage, working as a musician and MC, and teaching old-time fiddling to children from the Truro area.
Eligibility: Awarded to a full-time technical or undergraduate student at the Faculty of Agriculture who demonstrates financial need.

Value: \$1,000

Sodhi Memorial Bursary

This bursary was established by the Sodhi family in memory of Mr. Bhagat S. Sodhi, long-time librarian at the former Nova Scotia Agricultural College. Mr. Sodhi immigrated to Canada in the 1960's, in search of opportunity for his future family. After meeting and bringing his wife Darshan to Canada, they settled in Truro, NS, and began their family. Mr. Sodhi began working at the former Agricultural College in 1968, when the campus library was housed in Cox Institute. He was instrumental in moving the library to its current location at the MacRae Library, acting as head librarian until 1995. Mr. Sodhi considered the library staff as a second family. As a tribute to his memory, the Sodhi Family established an award in his name upon his passing on June 1st, 2009.
Eligibility: Available to current international students at the Faculty of Agriculture in good academic standing, with preference given to students in undergraduate and technical programs based on financial need. Students in all programs of study are eligible.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: \$1,000

South House Sexual and Gender Resource Centre Bursary

The South House Sexual and Gender Resource Centre, formerly the Dalhousie Women's Centre, was founded in recognition of women and trans people's common and diverse needs. The South House recognizes that you cannot work for a society free of sexism and patriarchy without also working for a society free of all forms of oppression. The South House supports women and all people dealing with oppression on the basis of sexuality and gender. South House believes in working together for the creation of a society that is vibrant and safe for people of all genders. The funds available will be distributed according to identified need. Bursaries are given out in sums between \$25 and \$250. Available funds are split between applicants. See <http://southhousehalifax.ca/> for an application form.
Application Type: Contact the Department, School, or College for more information

Sport Leadership Award

The Sport Leadership Award recognizes a high school varsity athlete enrolling full time in a program of study and planning on participating in a sport at the varsity level at the Faculty of Agriculture.
Eligibility: Available to entering technical or undergraduate students at the Faculty of Agriculture with an admissions average of at least 75%. Recipients of other major entrance scholarships are not eligible. Selection criteria include financial need, sport skills and leadership.
Application Type: Automatic Consideration – No Application Required

Phillip Stead Memorial Leadership Award

Phillip Stead graduated from the former Nova Scotia Agricultural College in 1965 with a degree certificate. He left Nova Scotia to complete his BSc. in Animal Science at McGill University and returned in 1967 to begin what was to be a long and successful career with the Nova Scotia Department of Agriculture, working as a sheep specialist with the Animal Industry Branch. In 1972 Phil continued his education by completing a MSc. in Agriculture and Nutrition at Virginia Polytechnic Institute and State University. For his passion for community involvement and his long standing contributions to Agriculture, a memorial award has been created in his name.
